

1 National Education Goal Five (U.S. students will
2 become first in the world in mathematics and science
3 achievement) requires a comprehensive educational
4 reform strategy that involves parents, schools, gov-
5 ernment, communities, and other public and private
6 organizations at all levels;

7 “(2) a crucial component of the strategy for
8 achieving these two goals is ensuring, through sus-
9 tained and intensive high-quality professional devel-
10 opment, and through the development and adoption
11 of high quality curriculum, that all teachers are ca-
12 pable of providing challenging learning experiences
13 in the core academic subjects for their students;

14 “(3) decisionmaking as to what activities a
15 State or local educational agency should undertake
16 to improve teaching and learning are best made by
17 individuals in the schools closest to the classroom
18 and most knowledgeable about the needs of schools
19 and students;

20 “(4) the potential positive impact of high-qual-
21 ity professional development is underscored by re-
22 cent research findings that—

23 “(A) professional development must be fo-
24 cused on teaching and learning in order to

1 change the opportunities of all students to
2 achieve higher standards; and

3 “(B) effective professional development fo-
4 cuses on discipline-based knowledge and sub-
5 ject-specific pedagogical skills, involves teams of
6 teachers and administrators in a school and,
7 through professional networks of teachers and
8 administrators, is interactive and collaborative,
9 motivates by its intrinsic content and relation-
10 ship to practice, builds on experience and learn-
11 ing-by-doing, and becomes incorporated into the
12 everyday life of the school;

13 “(5) engaging teachers in the development of
14 high quality curriculum is a powerful professional
15 development activity that improves teaching and
16 learning;

17 “(6) special attention must be given in profes-
18 sional development activities to ensure that edu-
19 cation professionals are knowledgeable of, and make
20 use of, strategies for serving populations that his-
21 torically have lacked access to equal opportunities
22 for advanced learning and career advancement;

23 “(7) States and local educational agencies also
24 need to engage teachers in the development of high
25 quality curricula that is aligned with State or local

1 content and performance standards in order to im-
2 prove teaching and learning and to ensure that stu-
3 dents achieve the State standards;

4 “(8) professional development is often a victim
5 of budget reductions in fiscally difficult times and
6 curriculum development is almost nonexistent in
7 many State and local school systems; and

8 “(9) the Federal Government has a vital role in
9 helping States and local educational agencies to
10 make sustained and intensive high-quality profes-
11 sional development in the core academic subjects be-
12 come an integral part of the elementary and second-
13 ary education system and in providing assistance to
14 such agencies to engage teachers in the development
15 of high quality curriculum that is aligned with State
16 or local content and performance standards.

17 **“SEC. 2102. PURPOSES.**

18 “The purposes of this part are to provide assistance
19 to States and local educational agencies so that such agen-
20 cies can determine how best to improve the teaching and
21 learning of all students through—

22 “(1) helping to ensure that teachers, other
23 staff, and administrators have access to sustained
24 and extensive high-quality professional development
25 that is aligned to challenging State content and per-

1 performance standards in the core academic subjects
2 and that—
