1           (2) a significant portion of the timber tradition-  
2 ally harvested in the United States, including the  
3 Pacific Northwest, derived from Federal forest  
4 lands, and these forests have played an important  
5 role in sustaining local economies;

6           (3) a number of traditionally timber-dependent  
7 communities are experiencing significant economic  
8 difficulties, particularly those located in proximity to  
9 the range of the northern Spotted Owl; and

10           (4) timber-dependent communities need eco-  
11 nomic assistance to help them diversify, including  
12 support from water and waste facility loans and  
13 grants and community facilities loans and grants  
14 funded through the Rural Development Administra-
