

Union Calendar No. 365

103D CONGRESS
2D SESSION

H.R. 4908

[Report No. 103-674]

A BILL

To authorize the hydrogen and fusion research, development, and demonstration programs, and the high energy physics and nuclear physics programs, of the Department of Energy, and for other purposes.

AUGUST 5, 1994

Committed to the Committee of the Whole House on the State of the Union and ordered to be printed

Union Calendar No. 365103^D CONGRESS
2^D SESSION**H. R. 4908****[Report No. 103-674]**

To authorize the hydrogen and fusion research, development, and demonstration programs, and the high energy physics and nuclear physics programs, of the Department of Energy, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

AUGUST 5, 1994

Mrs. Lloyd (for herself, Mr. BOUCHER, Mr. BROWN of California, Mr. WALKER, and Mr. BOEHLERT) introduced the following bill; which was referred to the Committee on Science, Space, and Technology

AUGUST 5, 1994

Committed to the Committee of the Whole House on the State of the Union
and ordered to be printed

A BILL

To authorize the hydrogen and fusion research, development, and demonstration programs, and the high energy physics and nuclear physics programs, of the Department of Energy, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

1 **SECTION 1. SHORT TITLE.**

2 This Act may be cited as the “Hydrogen, Fusion, and
3 High Energy and Nuclear Physics Research Act of 1994”.

4 **SEC. 2. GENERAL FINDINGS.**

5 The Congress finds that—

6 (1) by the year 2050, the world will need to
7 supply between 2 and 3 times as much energy as is
8 presently produced to meet minimum requirements
9 for food, shelter, transportation, and economic secu-
10 rity;

11 (2) meeting the increased energy demands of
12 the year 2050 cannot be achieved without substan-
13 tial environmental degradation unless there is a
14 massive shift from dependence on fossil fuels which
15 today provide more than three-quarters of all energy
16 supply;

17 (3) a wide variety of nonfossil fuel energy tech-
18 nologies must be developed to meet the expected de-
19 mand of the year 2050;

20 (4) the Federal Government has a responsibility
21 to fund research in energy technologies to help meet
22 future expected energy demand where the technical
23 or economic risks of development are too high, or
24 the development time is too long, to be borne solely
25 by the private sector, or where the benefits accrue

1 to all and cannot be recouped by a private investor;
2 and

3 (5) despite the urgent need to develop a wide
4 variety of nonfossil energy technologies, the Federal
5 Government's investment in all energy supply re-
6 search and development (including fossil fuels) has
7 declined in real terms by more than two-thirds in
8 the last 14 years.

9 **SEC. 3. DEFINITIONS.**

10 For purposes of this Act—

11 (1) the term “alternative fusion concepts”
12 means any concepts for the production of energy
13 based on the fusing of atomic nuclei other than to-
14 roidal magnetic fusion concepts, including heavy ion
15 inertial fusion, aneutronic fusion, and electrostatic
16 fusion;

17 (2) the term “demonstration” means a dem-
18 onstration to determine technological and economic
19 feasibility;

20 (3) the term “Department” means the Depart-
21 ment of Energy;

22 (4) the term “Fusion Energy Research Pro-
23 gram” means the program described in section 203;

1 (5) the term “host country” means the country
2 selected by the international partners as the site for
3 the ITER facility;

4 (6) the term “international partners” means
5 the United States, the European Atomic Energy
6 Community, Japan, and the Russian Federation;

7 (7) the term “ITER” means the International
8 Thermonuclear Experimental Reactor;

9 (8) the term “magnetic fusion” means fusion
10 based on toroidal confinement concepts;

11 (9) the term “Secretary” means the Secretary
12 of Energy; and

13 (10) the term “Tokamak Physics Experiment”
14 means a facility to replace the Tokamak Fusion Test
15 Reactor which is designed to be capable of conduct-
16 ing experiments on reactions with a pulse length of
17 at least 15 minutes and demonstrating a more com-
18 pact and efficient magnetic fusion reactor design.

19 **TITLE I—HYDROGEN ENERGY**
20 **RESEARCH PROGRAM**

21 **SEC. 101. SHORT TITLE.**

22 This title may be cited as the “Hydrogen Future Act
23 of 1994”.

24 **SEC. 102. FINDINGS.**

25 The Congress finds that—

1 (1) fossil fuels, the main energy source of the
2 present, have provided this country with tremendous
3 supply but are limited and polluting, and their pro-
4 duction and utilization technologies are mature;

5 (2) the basic scientific fundamentals are needed
6 for private sector investment and development of
7 new and better energy sources and enabling tech-
8 nologies;

9 (3) hydrogen holds tremendous promise as a
10 new and better energy source because it secures a
11 practically infinite supply from water and combusts
12 purely to water;

13 (4) hydrogen production efficiency is a major
14 technical barrier to society collectively benefitting
15 from one of the great energy sources of the future;

16 (5) an aggressive, results-oriented, multiyear re-
17 search initiative on efficient hydrogen fuel produc-
18 tion and use should continue; and

19 (6) the current Federal effort to develop hydro-
20 gen as a fuel is inadequate.

21 **SEC. 103. PURPOSES.**

22 The purposes of this title are—

23 (1) to provide for the development and dem-
24 onstration of the processes and technologies needed
25 to produce, store, transport, and utilize hydrogen for

1 transportation, industrial, residential, and utility ap-
2 plications; and

3 (2) to foster industry participation during each
4 stage of the Department of Energy hydrogen re-
5 search, development, and demonstration program to
6 ensure that technology transfer to the private sector
7 occurs to develop viable, marketable products.

8 **SEC. 104. RESEARCH, DEVELOPMENT, AND DEMONSTRA-**
9 **TION.**

10 (a) PROGRAM GOAL.—The goal of the program de-
11 scribed in this section is the demonstration, by the year
12 2000, of the practicability of utilizing hydrogen for trans-
13 portation, industrial, residential and utility applications on
14 a broad scale.

15 (b) PRODUCTION.—The Secretary shall support hy-
16 drogen energy production research, development, and
17 demonstration in the following areas, including funding
18 for at least 1 technical demonstration in each such area:

19 (1) Photoconversion.

20 (2) Bioconversion.

21 (3) Electrolysis of water.

22 (c) STORAGE.—The Secretary shall support research,
23 development, and demonstration of safe and economical
24 storage of hydrogen, both for onboard vehicle and station-
25 ary use. Such research, development, and demonstration

1 should be aimed at improving existing methods and devel-
2 oping new approaches in each of the following areas, in-
3 cluding funding for at least 1 technical demonstration in
4 each such area:

5 (1) Hydrides and porous materials.

6 (2) Liquefaction and cryogenics.

7 (3) Compressed gas, especially low-temperature
8 dense gas.

9 (4) Advanced methods, such as iron oxide,
10 microspheres, and phase change materials.

11 (d) USE.—The Secretary shall support hydrogen en-
12 ergy research, development, and demonstration for each
13 of the following uses, including funding for at least 1 tech-
14 nical demonstration in each such area:

15 (1) Fuel cell systems for stationary applica-
16 tions.

17 (2) Fuel cell systems for mobile applications.

18 (3) Electricity generation using hydrogen as a
19 fuel source for utility and industrial applications.

20 (4) Heating and cooling using hydrogen.

21 (e) TRANSPORTATION.—The Secretary shall support
22 research, development, and demonstration of safe, effi-
23 cient, and nonpolluting hydrogen-based transportation ve-
24 hicles of the following types, including funding for at least
25 1 technical demonstration of each such type:

1 (1) An economically feasible, low emission
2 motor vehicle using hydrogen as a combustible power
3 supply, either in pure form or mixed with other
4 fuels, in a hybrid electric vehicle using a hydrogen
5 fuel cell.

6 (2) An economically feasible, zero emission or
7 low emission engine using hydrogen.

8 (f) SCHEDULE.—Within 180 days after the date of
9 enactment of this Act, the Secretary shall solicit proposals
10 for carrying out the research and development activities
11 authorized under this section. Awards of financial assist-
12 ance shall be made within 1 year after such date of enact-
13 ment.

14 (g) COST SHARING.—(1) Except as otherwise pro-
15 vided in section 105, for research and development pro-
16 grams carried out under this title, the Secretary shall re-
17 quire a commitment from non-Federal sources of at least
18 20 percent of the cost of the project. The Secretary may
19 reduce or eliminate the non-Federal requirement under
20 this paragraph if the Secretary determines that the re-
21 search and development is of a basic or fundamental na-
22 ture.

23 (2) The Secretary shall require at least 50 percent
24 of the costs directly and specifically related to any dem-
25 onstration project under this title to be provided from non-

1 Federal sources. The Secretary may reduce the non-Fed-
2 eral requirement under this paragraph if the Secretary de-
3 termines that the reduction is necessary and appropriate
4 considering the technological risks involved in the project
5 and is necessary to serve the purposes and goals of this
6 title.

7 (3) In calculating the amount of the non-Federal
8 commitment under paragraph (1) or (2), the Secretary
9 shall include cash, personnel, services, equipment, and
10 other resources.

11 (h) DUPLICATION OF PROGRAMS.—Nothing in this
12 title shall require the duplication of activities carried out
13 under otherwise authorized programs of the Department
14 of Energy.

15 **SEC. 105. HIGHLY INNOVATIVE TECHNOLOGIES.**

16 Of the amounts made available for carrying out sec-
17 tion 104, up to 5 percent may be used to support research
18 on highly innovative energy technologies. Such amounts
19 shall not be subject to the cost sharing requirements in
20 section 104(g).

21 **SEC. 106. TECHNOLOGY TRANSFER.**

22 The Secretary shall foster the exchange of generic,
23 nonproprietary information and technology developed pur-
24 suant to section 104, or other similiar Federal programs,

1 among industry, academia, and the Federal Government
2 with regard to production and use of hydrogen.

3 **SEC. 107. REPORTS TO CONGRESS.**

4 Within 18 months after the date of enactment of this
5 Act, and annually thereafter, the Secretary shall transmit
6 to the Congress a detailed report on the status and
7 progress of the Department of Energy's hydrogen re-
8 search, development, and demonstration programs. Such
9 report shall include an analysis of the effectiveness of such
10 programs, to be prepared and submitted by the Hydrogen
11 Technical Advisory Panel established under section 108
12 of the Spark M. Matsunaga Hydrogen Research, Develop-
13 ment, and Demonstration Act of 1990. Such Panel shall
14 also make recommendations for improvements to such
15 programs if needed, including recommendations for addi-
16 tional legislation.

17 **SEC. 108. COORDINATION AND CONSULTATION.**

18 (a) COORDINATION WITH OTHER FEDERAL AGEN-
19 CIES.—The Secretary shall coordinate all hydrogen re-
20 search, development, and demonstration activities with
21 other Federal agencies involved in similar research, devel-
22 opment, and demonstration, including the Department of
23 Defense and the National Aeronautics and Space Adminis-
24 tration.

1 (b) CONSULTATION.—The Secretary shall consult
2 with the Hydrogen Technical Advisory Panel established
3 under section 108 of the Spark M. Matsunaga Hydrogen
4 Research, Development, and Demonstration Act of 1990
5 as necessary in carrying out this title.

6 **SEC. 109. REPEAL.**

7 Sections 104 and 105 of the Spark M. Matsunaga
8 Hydrogen Research, Development, and Demonstration Act
9 of 1990 are repealed.

10 **SEC. 110. AUTHORIZATION OF APPROPRIATIONS.**

11 (a) GENERAL AUTHORIZATION.—There are author-
12 ized to be appropriated, to carry out the purposes of this
13 title, in addition to any amounts made available for such
14 purposes under other Acts—

- 15 (1) \$12,000,000 for fiscal year 1995;
- 16 (2) \$20,000,000 for fiscal year 1996;
- 17 (3) \$40,000,000 for fiscal year 1997; and
- 18 (4) \$60,000,000 for fiscal year 1998.

19 (b) RELATED AUTHORIZATIONS.—For each fiscal
20 year from 1995 through 1998, the total amount author-
21 ized to be appropriated for Energy Supply Research and
22 Development Activities shall not exceed \$3,302,170,000.

1 **TITLE II—FUSION ENERGY**
2 **RESEARCH PROGRAM**

3 **SEC. 201. FINDINGS.**

4 The Congress finds that—

5 (1) fusion energy is one of the nonfossil fuel
6 technologies which could potentially provide safe,
7 abundant, environmentally sound, secure, and af-
8 fordable energy supplies in the future;

9 (2) in the last 16 years, fusion energy research-
10 ers have made significant progress toward realizing
11 magnetic fusion as a viable source of energy, in-
12 creasing power production from test reactors more
13 than a million-fold over that time period;

14 (3) while significant engineering, technical, and
15 scientific challenges remain to make fusion energy
16 commercially viable, limited funding remains the pri-
17 mary constraint to more rapid progress;

18 (4) the technical risks and the long time scale
19 needed to demonstrate the commercial viability of
20 fusion energy will likely require a stable, predictable,
21 and sustained investment of government funding for
22 decades to come;

23 (5) while magnetic fusion is the leading fusion
24 technology, research on alternative fusion concepts
25 should continue to be supported;

1 (6) opportunities to participate in international
2 fusion experiments can dramatically lower the cost
3 to the Federal Government of fusion energy re-
4 search;

5 (7) the United States must demonstrate that it
6 is a credible partner in international scientific pro-
7 grams by being able to make and keep long-term
8 commitments to funding and participation; and

9 (8) the United States should commit to partici-
10 pating in the siting, construction, and operation of
11 ITER as soon as practicable.

12 **SEC. 202. PURPOSES.**

13 The purposes of this title are—

14 (1) to provide direction and authorize appro-
15 priations for a broadly based fusion energy research,
16 development, and demonstration program;

17 (2) to ensure that alternative fusion concepts
18 receive adequate funding and management attention
19 from the Department of Energy;

20 (3) to provide an accelerated commitment to
21 United States participation in ITER and provide au-
22 thorization of appropriations for such activity con-
23 tingent on meeting program milestones; and

24 (4) to provide for the selection of a host coun-
25 try and establish a site selection process for ITER.

1 **SEC. 203. FUSION ENERGY RESEARCH PROGRAM.**

2 (a) FUSION PROGRAM.—The Secretary shall carry
3 out in accordance with the provisions of this title a Fusion
4 Energy Research Program, including research, develop-
5 ment, and demonstration to demonstrate the technical and
6 economic feasibility of producing safe, environmentally
7 sound, and affordable energy from fusion.

8 (b) PROGRAM GOALS.—The goals of the Fusion En-
9 ergy Research Program are to demonstrate by the year
10 2010 the practicability of commercial electric power pro-
11 duction and to lead to commercial production of fusion
12 energy by the year 2040.

13 (c) PROGRAM ELEMENTS.—The Fusion Energy Re-
14 search Program shall consist of the following elements:

15 (1) Research, development, and demonstration
16 on magnetic fusion energy technology, including—

17 (A) research on plasma physics and con-
18 trol, confinement, ignition, and burning;

19 (B) the design, construction, and operation
20 of experimental fusion reactors, including the
21 Tokamak Physics Experiment, and the develop-
22 ment of special materials for such reactors, the
23 facilities to develop such materials, and the de-
24 velopment of components which support the op-
25 eration of such reactors, such as diagnostic and
26 remote maintenance equipment; and

1 (C) participation by the United States in-
2 dustrial sector in the design and construction of
3 fusion reactors, and cooperation with utilities.

4 (2) Research, development, and demonstration
5 of alternative fusion concepts, to be administered
6 through a Program Director for Alternative Fusion
7 Research, including research and development need-
8 ed to build and test an Induction Linac Systems Ex-
9 periment, and for systems engineering and design of
10 a prototype inertial fusion energy power plant suit-
11 able for the eventual development of a heavy ion
12 based commercial power plant, for the purpose of
13 developing heavy ion inertial fusion energy.

14 (3) Participation in the design, construction,
15 and operation of ITER with the goal of ITER be-
16 coming operational by the year 2005.

17 **SEC. 204. INDEPENDENT REVIEW OF FUSION TECH-**
18 **NOLOGIES.**

19 Within 6 months after the date of enactment of this
20 Act, the Secretary shall contract with the National Acad-
21 emy of Sciences to conduct a study, to be completed within
22 18 months after such contract is executed, which—

23 (1) examines the various magnetic fusion tech-
24 nologies and alternative fusion concepts to assess
25 their current state of development;

1 (2) evaluates the potential of such technologies
2 and concepts to become commercially viable sources
3 of energy in the future;

4 (3) identifies research and development goals
5 and priorities, and the range of probable costs and
6 time scales needed to achieve commercial viability;
7 and

8 (4) reviews facilities formerly proposed by the
9 Department of Energy for construction during the
10 past 10 years, comparing their proposed capabilities
11 and the justification offered for such proposals with
12 the rationale for the subsequent withdrawal of the
13 proposals.

14 **SEC. 205. NATIONAL ACADEMY OF SCIENCES STUDY.**

15 Within 6 months after the date of enactment of this
16 Act, the Secretary shall contract with the National Acad-
17 emy of Sciences to conduct a study, to be completed within
18 18 months after such contract is executed, which examines
19 the status and promise of other energy sources, including
20 deuterated metal, and improvements in the efficient use
21 of energy which could affect our national energy needs on
22 the same time scale and quantity as projected fusion en-
23 ergy development, and which identifies priorities for re-
24 search on other energy sources and energy-efficient de-
25 vices and practices.

1 **SEC. 206. ITER SITE SELECTION PROCESS.**

2 (a) ITER STUDY AND REPORT.—Within 120 days
3 after the date of enactment of this Act, the Secretary shall
4 submit to Congress a study which compares the technical
5 and scientific advantages and disadvantages and the eco-
6 nomic costs and benefits to the United States of siting
7 ITER in the United States with siting ITER outside of
8 the United States. Such study shall include the consider-
9 ation of the impact on employment of constructing ITER
10 in the United States, the effect of manufacturing major
11 ITER subsystems (such as superconducting magnets) in
12 the United States, and the effect of siting on United
13 States funding requirements for participation in ITER.

14 (b) HOST-COUNTRY SELECTION.—The Secretary
15 shall seek to reach an agreement with the international
16 partners which provides for—

17 (1) the selection of a host country in which to
18 site ITER by October, 1995;

19 (2) the equitable distribution of economic and
20 technological benefits among the international part-
21 ners, including the siting and construction of ITER
22 and related facilities and the manufacture of major
23 ITER subsystems;

24 (3) substantial United States industry and util-
25 ity involvement in the design, construction, and op-
26 eration of ITER to ensure United States industry

1 and utility expertise in the technologies developed;
2 and

3 (4) a schedule to complete site-specific design
4 activities by 1998.

5 (c) UNITED STATES SITE SELECTION.—The Sec-
6 retary shall—

7 (1) immediately initiate a process for identify-
8 ing candidate sites within the United States which
9 meet the site requirements for the construction and
10 operation of ITER; and

11 (2) propose within 90 days after the date of en-
12 actment of this Act a process for selection of a site
13 within the United States by June, 1996, if the Unit-
14 ed States is selected as the host country for ITER
15 pursuant to the international agreement described in
16 subsection (b).

17 (d) FINAL COST ESTIMATE.—The Secretary shall
18 provide to Congress, within 90 days following the comple-
19 tion of site-specific design activities, a detailed estimate
20 of the final projected total cost and cost to the United
21 States of the construction and operation of ITER based
22 on final site-specific engineering and construction designs.

23 **SEC. 207. REPORTS AND MISCELLANEOUS PROVISIONS.**

24 (a) CONTINGENCY PLAN.—Within 120 days after the
25 date of enactment of this Act, the Secretary shall submit

1 to Congress a report on the feasibility of conducting a par-
2 allel design effort on the Tokamak Physics Experiment to
3 augment the capabilities of or accelerate construction of
4 the Tokamak Physics Experiment in the event that an
5 international agreement cannot be reached on the site se-
6 lection or construction of ITER.

7 (b) PROGRAM REPORT.—Within 180 days after the
8 date of enactment of this Act, and biennially thereafter,
9 the Secretary shall prepare and submit to the Congress
10 a report on the Fusion Energy Research Program and the
11 progress it has made in meeting the goals and require-
12 ments of this title.

13 (c) CONSULTATION.—(1) In consultation with the
14 Secretary of Defense, the Secretary shall review the re-
15 search and development activities of the defense Inertial
16 Confinement Fusion Program to determine the potential
17 of such activities to contribute to the civilian Inertial Fu-
18 sion Energy Program.

19 (2) Within 120 days after the date of enactment of
20 this Act, the Secretary, in consultation with the Secretary
21 of Defense, shall submit a report to Congress with rec-
22 ommendations for sharing budget and other resources in
23 order to enhance the civilian energy applications of the
24 defense Inertial Confinement Fusion Program.

1 (d) DUPLICATION OF ACTIVITIES.—Nothing in this
2 title shall require the duplication of activities carried out
3 under otherwise authorized programs of the Department
4 of Energy.

5 **SEC. 208. AUTHORIZATION OF APPROPRIATIONS.**

6 (a) FUSION ENERGY RESEARCH PROGRAM.—There
7 are authorized to be appropriated to the Secretary for car-
8 rying out the Fusion Energy Research Program
9 \$376,563,000 for fiscal 1995, \$425,000,000 for fiscal
10 year 1996, and \$475,000,000 for fiscal year 1997.

11 (b) ALTERNATIVE FUSION RESEARCH.—From the
12 sums authorized in subsection (a), there are authorized
13 to be appropriated to the Secretary for carrying out the
14 Alternative Fusion Research Program under section
15 203(c)(2)—

16 (1) \$10,000,000 for fiscal year 1995 for the In-
17 duction Linac Systems Experiment project and re-
18 lated base programs, and for the engineering and
19 design of a prototype inertial fusion energy power
20 plant;

21 (2) \$30,000,000 for fiscal year 1996, of
22 which—

23 (A) not more than \$20,000,000 shall be
24 for the Induction Linac Systems Experiment
25 project and related base programs; and

1 (B) not more than \$5,000,000 shall be for
2 the engineering and design of a prototype iner-
3 tial fusion energy power plant; and

4 (3) \$33,000,000 for fiscal year 1997, of
5 which—

6 (A) not more than \$20,000,000 shall be
7 for the Induction Linac Systems Experiment
8 project and related base programs; and

9 (B) not more than \$5,000,000 shall be for
10 the engineering and design of a prototype iner-
11 tial fusion energy power plant.

12 (c) TOKAMAK PHYSICS EXPERIMENT.—(1) Except as
13 provided in paragraph (2), there are authorized to be ap-
14 propriated to the Secretary for the period encompassing
15 fiscal years 1995 through 2000 not to exceed
16 \$700,000,000, to complete the design, development, and
17 construction of the Tokamak Physics Experiment.

18 (2) None of the funds are authorized to be appro-
19 priated for any fiscal year under paragraph (1) unless,
20 within 60 days after the submission of the President's
21 budget request for that fiscal year, the Secretary—

22 (A) certifies to the Congress that—

23 (i) the technical goals of the design, devel-
24 opment, and construction are being met;

1 (ii) the design, development, and construc-
2 tion can be completed without further author-
3 ization of appropriations beyond amounts au-
4 thorized under paragraph (1); and

5 (iii) the design, development, and construc-
6 tion can be completed by the end of fiscal year
7 2000; or

8 (B) submits to the Congress a report which de-
9 scribes—

10 (i) the circumstances which prevent a cer-
11 tification under subparagraph (A);

12 (ii) remedial actions undertaken or to be
13 undertaken with respect to such circumstances;
14 and

15 (iii) a justification for proceeding with the
16 program, if appropriate.

17 (d) CONSTRUCTION OF ITER.—No funds are author-
18 ized for the construction of ITER.

19 (e) LIMITATION ON MAGNETIC FUSION FACILI-
20 TIES.—No funds are authorized for the design, engineer-
21 ing, or construction of any magnetic fusion facility other
22 than ITER, facilities related to ITER, and the Tokamak
23 Physics Experiment.

1 **SEC. 209. REPEAL OF ADVISORY COMMITTEE.**

2 Section 7 of the Magnetic Fusion Energy Engineer-
3 ing Act of 1980 (42 U.S.C. 9306), authorizing the Tech-
4 nical Panel on Magnetic Fusion, is repealed.

5 **TITLE III—HIGH ENERGY AND**
6 **NUCLEAR PHYSICS**

7 **SEC. 301. SHORT TITLE.**

8 This title may be cited as the “Department of Energy
9 High Energy and Nuclear Physics Authorization Act of
10 1994”.

11 **SEC. 302. DEFINITIONS.**

12 For the purposes of this title—

13 (1) the term “CERN” means the European Or-
14 ganization for Nuclear Research;

15 (2) the term “construction” means all activities
16 necessary for completion of a project and its sup-
17 porting infrastructure, and includes conventional
18 construction and the fabrication, installation, test-
19 ing, and preoperation of technical systems;

20 (3) the term “conventional construction” means
21 the design and construction of civil works, facilities,
22 and other infrastructure necessary to construct a
23 project, including tunnels, buildings, and roads, nec-
24 essary to house and support the technical systems,
25 and utilities as necessary for the direct support of
26 elements of a project; and

1 (4) the term “Large Hadron Collider project”
2 means the Large Hadron Collider project at CERN.

3 **SEC. 303. AUTHORIZATION OF APPROPRIATIONS.**

4 (a) HIGH ENERGY PHYSICS.—There are authorized
5 to be appropriated to the Secretary for high energy phys-
6 ics activities of the Department—

7 (1) \$695,400,000 for fiscal year 1996;

8 (2) \$719,700,000 for fiscal year 1997;

9 (3) \$744,900,000 for fiscal year 1998; and

10 (4) \$713,600,000 for fiscal year 1999.

11 Funds authorized under paragraphs (1) through (4) may
12 be expended for the B-factory at the Stanford Linear Ac-
13 celerator Center and the Fermilab Main Injector. Funds
14 may also be expended for research, development, and plan-
15 ning for the Large Hadron Collider and its associated de-
16 tectors. No funds are authorized for United States partici-
17 pation in the construction and operation of the Large
18 Hadron Collider project until the Secretary certifies to the
19 Congress that there is an international agreement that in-
20 cludes the provisions described in section 304(a).

21 (b) NUCLEAR PHYSICS.—There are authorized to be
22 appropriated to the Secretary for nuclear physics activities
23 of the Department—

24 (1) \$337,100,000 for fiscal year 1996;

25 (2) \$348,900,000 for fiscal year 1997;

1 (3) \$361,100,000 for fiscal year 1998; and

2 (4) \$373,700,000 for fiscal year 1999.

3 None of the funds authorized under paragraph (2), (3),
4 or (4) are authorized to be appropriated for facility oper-
5 ations of the Los Alamos Meson Physics Facility. Funds
6 authorized under paragraphs (1) through (4) may be ex-
7 pended for the Relativistic Heavy Ion Collider at
8 Brookhaven National Laboratory.

9 (c) LIMITATION ON MAJOR CONSTRUCTION
10 PROJECTS.—No funds may be expended for the construc-
11 tion and operation of any high energy and nuclear physics
12 facility construction project of the Department, with total
13 project expenditures projected to be in excess of
14 \$100,000,000, unless funds are specifically authorized for
15 such purposes in an Act that is not an appropriations Act.
16 Funds authorized under subsections (a) and (b) may be
17 expended for preliminary research, development, and plan-
18 ning for such projects.

19 **SEC. 304. THE LARGE HADRON COLLIDER PROJECT.**

20 (a) NEGOTIATIONS.—The Secretary, in consultation
21 with the Director of the National Science Foundation and
22 the Secretary of State, shall enter into negotiations with
23 CERN concerning United States participation in the plan-
24 ning and construction of the Large Hadron Collider
25 project, and shall ensure that any agreement incorporates

1 provisions to protect the United States investment in the
2 project, including provisions for—

3 (1) fair allocation of costs and benefits among
4 project participants;

5 (2) a limitation on the amount of United States
6 contribution to project construction and an estimate
7 of the United States contribution to subsequent op-
8 erating costs;

9 (3) a cost and schedule control system for the
10 total project;

11 (4) a preliminary statement of costs and the
12 schedule for all component design, testing, and fab-
13 rication, including technical goals and milestones,
14 and a final statement of such costs and schedule
15 within 1 year after the date on which the parties
16 enter into the agreement;

17 (5) a preliminary statement of costs and the
18 schedule for total project construction and operation,
19 including technical goals and milestones, and a final
20 statement of such costs and schedule within 1 year
21 after the date on which the parties enter into the
22 agreement;

23 (6) reconsideration of the extent of United
24 States participation if technical or operational mile-
25 stones described in paragraphs (4) and (5) are not

1 met, or if the project falls significantly behind sched-
2 ule;

3 (7) conditions of access for United States and
4 other scientists to the facility; and

5 (8) a process for addressing international co-
6 ordination and cost sharing on high energy physics
7 projects beyond the Large Hadron Collider.

8 (b) OTHER INTERNATIONAL NEGOTIATIONS.—Noth-
9 ing in this Act shall be construed to preclude the President
10 from entering into negotiations with respect to inter-
11 national science agreements.

12 (c) REQUIREMENT.—The Director of the Office of
13 Science and Technology Policy shall report, within 3
14 months after the date of enactment of this Act, to the
15 Committee on Science, Space, and Technology of the
16 House of Representatives and to the Committee on Com-
17 merce, Science, and Transportation of the Senate on spe-
18 cific goals for international coordination in megascience
19 projects, including an action plan needed to achieve these
20 goals. The action plan shall address such issues as cost
21 sharing and financial support, site location, access, and
22 management of megascience facilities.

23 **SEC. 305. OPERATING PLAN.**

24 Within 30 days after the date of the enactment of
25 any Act appropriating funds for the high energy or nuclear

1 physics activities of the Department, the Secretary shall
2 transmit to the Committee on Science, Space, and Tech-
3 nology of the House of Representatives and the Committee
4 on Energy and Natural Resources of the Senate a plan
5 for the operations of the high energy and nuclear physics
6 activities of the Department, as adjusted to reflect the
7 amounts appropriated for such purposes by such Act.

8 **SEC. 306. LONG-RANGE PLANNING AND GOVERNANCE.**

9 (a) PROGRAM GOVERNANCE REVIEW.—

10 (1) REQUIREMENT.—The Secretary shall con-
11 tract with an appropriate independent organization
12 to review the governance of all elements of the De-
13 partment’s high energy and nuclear physics pro-
14 grams. Such review shall include—

15 (A) an evaluation of the staff allocation
16 and funding balance among facility operations,
17 construction, and research support; and

18 (B) an analysis of the extent to which the
19 Department’s high energy and nuclear physics
20 advisory groups represent the diversity of, and
21 the full range of interests among, high energy
22 and nuclear physics researchers.

23 (2) REPORT TO CONGRESS.—The Secretary
24 shall submit a report to Congress within 18 months
25 after the date of enactment of this Act detailing the

1 results of the review required by this section, includ-
2 ing recommendations for implementing the results
3 and schedules for such implementation.

4 (b) LONG-RANGE PLAN.—

5 (1) REQUIREMENT.—The Secretary, in con-
6 sultation with the high energy and nuclear physics
7 communities, shall prepare a long-range plan for the
8 Department of Energy high energy and nuclear
9 physics programs based on current and projected
10 program funding levels. The Secretary shall coordi-
11 nate the preparation of the plan with the Director
12 of the National Science Foundation, as appropriate,
13 to ensure that long-range planning efforts and objec-
14 tives for the entire Federal high energy and nuclear
15 physics program are appropriately integrated. The
16 plan shall be modified every 3 years. The long-range
17 plan shall include—

18 (A) a list of research opportunities to be
19 pursued, including both ongoing and proposed
20 activities, listed in order of priority;

21 (B) an analysis of the relevance of each re-
22 search facility to the research opportunities list-
23 ed under subparagraph (A);

24 (C) a statement of the optimal balance for
25 the fiscal year in which the report is submitted

1 among facility operations, construction, and re-
2 search support and the optimal balance between
3 university and laboratory research programs;

4 (D) schedules for continuation, consolida-
5 tion, or termination of each major category of
6 research programs, and continuation, upgrade,
7 transfer, or closure of each research facility;

8 (E) a statement by project of efforts to co-
9 ordinate research projects with the international
10 community to maximize the use of limited re-
11 sources and avoid unproductive duplication of
12 efforts;

13 (F) a description of the extent to which the
14 plan modifications differ from previous plans
15 submitted under this subsection, along with an
16 explanation for such differences; and

17 (G) an estimate of—

18 (i) the number of scientists and grad-
19 uate students being supported by Federal
20 high energy and nuclear physics programs;
21 and

22 (ii) the number of scientists and grad-
23 uate students needed to carry out produc-
24 tive and sustainable research programs in
25 these fields over the next 10 years.

1 (2) REPORTS TO CONGRESS.—(A) The Sec-
2 retary shall transmit a copy of the original long-
3 range plan with the President’s annual budget re-
4 quest to Congress for fiscal year 1997. The plan as
5 modified shall be submitted with the President’s
6 budget request to Congress for every third fiscal
7 year thereafter.

8 (B) The Secretary shall transmit with the
9 President’s budget request to Congress each year a
10 report demonstrating the consistency of the current
11 long-range plan with the budget being requested for
12 the Department’s high energy and nuclear physics
13 programs.

14 (c) CAPITAL BUDGET ACCOUNT.—Each of the Presi-
15 dent’s annual budget requests to the Congress for high
16 energy physics activities of the Department, and for nu-
17 clear physics activities of the Department, shall distin-
18 guish between the budget for capital expenditures, includ-
19 ing all ongoing and planned major construction and cap-
20 ital equipment items, and other activities.

21 **TITLE IV—MISCELLANEOUS**
22 **PROVISIONS**

23 **SEC. 401. UNIVERSITY RADIATION SCIENCE AND TECH-**
24 **NOLOGY.**

25 (a) FINDINGS.—The Congress finds that—

1 (1) the future of fusion energy and advanced
2 nuclear energy technology research and development
3 programs will rely heavily on a healthy and vibrant
4 university-based radiation science and nuclear engi-
5 neering academic program;

6 (2) nuclear engineering is a broad, diverse field
7 with unique academic requirements, including math-
8 ematics, physics, reactor engineering, nuclear mate-
9 rials, radiation protection, and reactivity control and
10 operations;

11 (3) nuclear engineering academic programs at
12 both undergraduate and graduate levels have de-
13 clined in terms of the number of students enrolling
14 in such programs, the number of schools offering
15 such programs, and the number of research reactors
16 available on university campuses;

17 (4) the existing nuclear technical community
18 and faculties are aging, and new, younger graduates
19 are not entering the field, threatening the United
20 States technological superiority in this area;

21 (5) a robust, long-term fusion program will be
22 dependent on the availability of properly trained sci-
23 entific experts to carry on the program from the cur-
24 rent leaders in the field;

1 (6) in the 1950s and 1960s, the Federal Gov-
2 ernment was instrumental in founding and funding
3 the University Research Reactor program and the
4 Nuclear Engineering Education and Research pro-
5 gram, and as a primary user of the graduates of
6 these programs, continued strong support for these
7 programs for decades;

8 (7) the decline of Federal support for these pro-
9 grams has forced many universities to close down re-
10 search reactors and seriously erode the accompany-
11 ing academic programs;

12 (8) the current condition of the university re-
13 search reactors needs attention and funding to up-
14 grade instrumentation and safety features; and

15 (9) the Federal Government should continue its
16 fuel assistance program in order to avert further
17 hardships to the universities.

18 (b) PURPOSES.—The purposes of this section are
19 to—

20 (1) provide Federal support and maintain and
21 upgrade the Nation’s Nuclear Engineering Edu-
22 cation and Research and University Research Reac-
23 tor programs, while continuing the University Reac-
24 tor Fuel Assistance program;

1 (2) combine these programs into a comprehen-
2 sive and cohesive national program which will sup-
3 port the future needs of the Nation across many sci-
4 entific and technological disciplines; and

5 (3) provide the nuclear engineering education
6 and university research reactor academic community
7 opportunities to consult and cooperate with the De-
8 partment of Energy and the national laboratories in
9 the decisionmaking and priority setting processes.

10 (c) PROGRAM DIRECTION.—

11 (1) COMBINING OF PROGRAMS.—The Secretary
12 shall combine the Nuclear Engineering Research and
13 Education program, the University Research Reac-
14 tor program, and the University Reactor Fuel As-
15 sistance program to form a new University Radi-
16 ation Science and Technology program to be in-
17 cluded as a separate and distinct part of the Univer-
18 sity and Science Education program.

19 (2) COLLABORATION.—The Secretary, in devel-
20 oping the annual budget request and program plan
21 for the University Radiation Science and Technology
22 program, shall collaborate with the university radi-
23 ation science and technology community (including
24 academia, professional societies, and the national
25 laboratories).

1 (d) REPORTS.—

2 (1) COMPREHENSIVE PLAN.—The Secretary
3 shall request the Nuclear Engineering Education
4 Department Heads Organization and the National
5 Organization of Test, Research, and Training Reac-
6 tors to submit, within 60 days after the date of en-
7 actment of this Act, to the Congress and the Sec-
8 retary a minimum of a 5-year comprehensive na-
9 tional plan for the University Radiation Science and
10 Technology program. Such plan shall include com-
11 ments from industry and all appropriate professional
12 societies.

13 (2) PROGRAM PROPOSAL.—Within 120 days
14 after the submittal of the plan under paragraph (1),
15 the Secretary shall submit to the Congress a Univer-
16 sity Radiation Science and Technology program pro-
17 posal, which shall incorporate the plan submitted
18 under paragraph (1) and shall include comments
19 from the National Academy of Sciences regarding
20 the completeness of the program proposal.

21 (e) AUTHORIZATION OF APPROPRIATIONS.—There
22 are authorized to be appropriated to the Secretary for car-
23 rying out the University Radiation Science and Tech-
24 nology Program \$25,000,000 for fiscal year 1995,

1 \$25,000,000 for fiscal year 1996, and \$25,000,000 for fis-
2 cal year 1997.

3 **SEC. 402. LIMITATION ON APPROPRIATIONS.**

4 Notwithstanding any other provision of law, no funds
5 are authorized to be appropriated for carrying out the pro-
6 grams for which funds are authorized by this Act for any
7 fiscal year other than as provided by this Act.
