S. 1406

AN ACT

- To amend the Plant Variety Protection Act to make such Act consistent with the International Convention for the Protection of New Varieties of Plants of March 19, 1991, to which the United States is a signatory, and for other purposes.
 - 1 Be it enacted by the Senate and House of Representa-
 - 2 tives of the United States of America in Congress assembled,

3 SECTION 1. SHORT TITLE; REFERENCES.

- 4 (a) SHORT TITLE.—This Act may be cited as the
- 5 "Plant Variety Protection Act Amendments of 1994".

1 (b) REFERENCES TO PLANT VARIETY PROTECTION 2 ACT.—Except as otherwise expressly provided, whenever 3 in this Act an amendment or repeal is expressed in terms 4 of an amendment to, or repeal of, a section or other provi-5 sion, the reference shall be considered to be made to a 6 section or other provision of the Plant Variety Protection 7 Act (7 U.S.C. 2321 et seq.).

8 SEC. 2. DEFINITIONS AND RULES OF CONSTRUCTION.

9 Section 41 (7 U.S.C. 2401) is amended to read as 10 follows:

11 "SEC. 41. DEFINITIONS AND RULES OF CONSTRUCTION.

12 "(a) DEFINITIONS.—As used in this Act:

13 "(1) BASIC SEED.—The term 'basic seed'
14 means the seed planted to produce certified or com15 mercial seed.

"(2) BREEDER.—The term 'breeder' means the 16 17 person who directs the final breeding creating a vari-18 ety or who discovers and develops a variety. If the 19 actions are conducted by an agent on behalf of a 20 principal, the principal, rather than the agent, shall 21 be considered the breeder. The term does not include 22 a person who redevelops or rediscovers a variety the existence of which is publicly known or a matter of 23 common knowledge. 24

25

"(3) Essentially derived variety.—

"(A) IN GENERAL.—The term 'essentially 1 derived variety' means a variety that-2 "(i) is predominantly derived from an-3 other variety (referred to in this paragraph 4 as the 'initial variety') or from a variety 5 that is predominantly derived from the ini-6 7 tial variety, while retaining the expression of the essential characteristics that result 8 from the genotype or combination of 9 genotypes of the initial variety; 10 "(ii) is clearly distinguishable from 11 the initial variety; and 12 "(iii) except for differences that result 13 14 from the act of derivation. conforms to the initial variety in the expression of the es-15 sential characteristics that result from the 16 17 genotype or combination of genotypes of 18 the initial variety. 19 "(B) METHODS.—An essentially derived variety may be obtained by the selection of a 20 natural or induced mutant or of a somaclonal 21 22 variant, the selection of a variant individual from plants of the initial variety, backcrossing, 23

transformation by genetic engineering, or other

25 method.

24

3

"(4) KIND.—The term 'kind' means one or 1 2 more related species or subspecies singly or collec-3 tively known by one common name, such as soybean, flax, or radish. 4 "(5) SEED.—The term 'seed', with respect to a 5 tuber propagated variety, means the tuber or the 6 7 part of the tuber used for propagation. "(6) SEXUALLY REPRODUCED.—The term 'sex-8 ually reproduced' includes any production of a vari-9 10 ety by seed, but does not include the production of 11 a variety by tuber propagation. "(7) TUBER PROPAGATED.—The term 'tuber 12 propagated' means propagated by a tuber or a part 13 of a tuber. 14 "(8) UNITED STATES.—The terms 'United 15 States' and 'this country' mean the United States, 16 17 territories and possessions of the United States, and 18 the Commonwealth of Puerto Rico. 19 "(9) VARIETY.—The term 'variety' means a plant grouping within a single botanical taxon of the

plant grouping within a single botanical taxon of the
lowest known rank, that, without regard to whether
the conditions for plant variety protection are fully
met, can be defined by the expression of the characteristics resulting from a given genotype or combination of genotypes, distinguished from any other

plant grouping by the expression of at least one
 characteristic and considered as a unit with regard
 to the suitability of the plant grouping for being
 propagated unchanged. A variety may be rep resented by seed, transplants, plants, tubers, tissue
 culture plantlets, and other matter.

7 "(b) RULES OF CONSTRUCTION.—For the purposes8 of this Act:

"(1) 9 SALE OR DISPOSITION FOR 10 NONREPRODUCTIVE PURPOSES.—The sale or disposi-11 tion, for other than reproductive purposes, of har-12 vested material produced as a result of experimen-13 tation or testing of a variety to ascertain the charac-14 teristics of the variety, or as a by-product of increasing a variety, shall not be considered to be a sale or 15 disposition for purposes of exploitation of the 16 17 variety.

18 "(2) SALE OR DISPOSITION FOR REPRODUCTIVE 19 PURPOSES.—The sale or disposition of a variety for 20 reproductive purposes shall not be considered to be 21 a sale or disposition for the purposes of exploitation 22 of the variety if the sale or disposition is done as an 23 integral part of a program of experimentation or 24 testing to ascertain the characteristics of the variety, or to increase the variety on behalf of the breeder
 or the successor in interest of the breeder.

"(3) SALE OR DISPOSITION OF HYBRID SEED.—
The sale or disposition of hybrid seed shall be considered to be a sale or disposition of harvested material of the varieties from which the seed was produced.

8 "(4) APPLICATION FOR PROTECTION OR EN-9 TERING INTO A REGISTER OF VARIETIES.—The filing of an application for the protection or for the en-10 11 tering of a variety in an official register of varieties, 12 in any country, shall be considered to render the variety a matter of common knowledge from the date 13 of the application, if the application leads to the 14 15 granting of protection or to the entering of the vari-16 ety in the official register of varieties, as the case 17 may be.

"(5) DISTINCTNESS.—The distinctness of one 18 19 variety from another may be based on one or more identifiable morphological, physiological, or other 20 characteristics (including any characteristics evi-21 22 denced by processing or product characteristics, such 23 as milling and baking characteristics in the case of 24 wheat) with respect to which a difference in geneal-25 ogy may contribute evidence.

"(6) Publicly known varieties.—

2	"(A) IN GENERAL.—A variety that is ade-
3	quately described by a publication reasonably
4	considered to be a part of the public technical
5	knowledge in the United States shall be consid-
6	ered to be publicly known and a matter of com-
7	mon knowledge.

8 ''(B) DESCRIPTION.—A description that 9 meets the requirements of subparagraph (A) 10 shall include a disclosure of the principal char-11 acteristics by which a variety is distinguished.

12 ''(C) OTHER MEANS.—A variety may be13 come publicly known and a matter of common
14 knowledge by other means.".
