104TH CONGRESS 2D SESSION H. R. 2939

To direct the Secretary of the Interior to conduct a pilot test of the Mississippi Interstate Cooperative Resource Agreement.

IN THE HOUSE OF REPRESENTATIVES

FEBRUARY 1, 1996

Mr. GUNDERSON (for himself and Mr. BEREUTER) introduced the following bill; which was referred to the Committee on Resources

A BILL

- To direct the Secretary of the Interior to conduct a pilot test of the Mississippi Interstate Cooperative Resource Agreement.
 - 1 Be it enacted by the Senate and House of Representa-
 - 2 tives of the United States of America in Congress assembled,

3 SECTION 1. SHORT TITLE.

- 4 This Act may be cited as the "Mississippi Interstate
- 5 Cooperative Resource Agreement Act of 1996".

6 SEC. 2. FINDINGS.

- 7 The Congress finds that—
- 8 (1) several rivers flow between, or are common
- 9 to, two or more State boundaries;

(2) in many cases, there is not a single entity which has complete jurisdictional responsibility for the fishery resources in these rivers;
(3) a strong partnership between Federal and State governmental authorities and citizen groups is vital in coordinating and facilitating cooperative research and in resolving problems associated with large river ecosystems;
(4) many fishery management problems are caused by federally regulated activities (including activities resulting in point and nonpoint pollution)

tivities resulting in point and nonpoint pollution)
and federally constructed projects (including dams
and navigation facilities);

(5) in some rivers, the once rich assemblages of
fish fauna and diverse habitats have been lost and
formerly abundant native fish now exist only as endangered or depleted populations;

18 (6) without positive management actions, native
19 species in some rivers will continue to decline, foster20 ing even greater conflicts among water users;

(7) construction of waterway developments (including navigation, flood control, water level fluctuation, power generation, irrigation, and general water
depletion projects) is accelerating and increasingly
degrading large river ecosystems nationwide;

10

(8) the United States public will face reduced
opportunities for recreational, commercial, subsist-
ence, and aesthetic uses of river systems without de-
monstrable change in management strategies in the
near future;
(9) several programs have been proposed or are
underway to resolve conflicts in these management
strategies;
(10) in one of these programs, Federal, State,
and local fishery resource managers in the Mis-
sissippi River drainage basin have entered into the
Mississippi Interstate Cooperative Resource Agree-
ment under which the managers share information,
resources, facilities, and funding for preparation, de-
velopment, and implementation of long-range strate-
gic plans for management of the drainage basin's
interjurisdictional fishery resources;
(11) the Mississippi Interstate Cooperative Re-
source Agreement merits detailed evaluation as a
model for the development of long-range strategic
plans for the management of interjurisdictional riv-
ers fishery resources; and
(12) to ensure that these programs are appro-
priately coordinated and to conserve the fishery re-
sources in interjurisdictional rivers, there is a need

1	for strategies to improve coordination, cooperation,
2	research, and information sharing.
3	SEC. 3. MISSISSIPPI INTERSTATE COOPERATIVE RE-
4	SOURCE AGREEMENT.
5	(a) EVALUATION.—The Secretary, in cooperation
6	with the Mississippi Interstate Cooperative Resource Asso-
7	ciation, shall conduct a pilot test of the Mississippi Inter-
8	state Cooperative Resource Agreement.
9	(b) CONTENTS.—A pilot test conducted under this
10	section may include, among other matters, the following:
11	(1) Identification and description of each of the
12	river ecosystems of the Mississippi River drainage
13	system and the associated fishery resources and fish
14	habitats of such river ecosystems.
15	(2) Identification and description of—
16	(A) the known impacts, on fishery re-
17	sources of the Mississippi River drainage basin,
18	of agriculture, navigation, flood control, power
19	generation, irrigation, and municipal water sup-
20	ply projects, including the impacts of nonpoint
21	source pollution, dredging, channel mainte-
22	nance, water level management, sediment and
	contaminant transport, vessel traffic, water
23	1 / /
23 24	withdrawal, and changes in salinity and various

1 (B) techniques for mitigating those im-2 pacts.

3 (3) Analysis of existing resource data with re4 gard to regional depletion of important fish stocks
5 (including paddlefish, lake sturgeon, walleye, and
6 other high priority nonanadromous species) and the
7 potential for restoration of such fish stocks.

8 (4) Identification of major information gaps
9 and technological needs to improve the cooperative
10 management of interjurisdictional fishery resources.

(5) A comprehensive study of the status, and
the management, research, and restoration needs, of
the interjurisdictional fishery resources of the Mississippi River drainage system.

15 (6) Development of recommendations regarding
16 the scope, schedule, regional priorities, and roles of
17 participants in the Mississippi Interstate Cooperative
18 Resource Agreement for undertaking cooperative
19 management and research projects.

20 (7) Development of plans and testing projects
21 for the restoration and enhancement of depleted fish
22 stocks (including lake sturgeon, paddlefish, walleye,
23 and other high priority nonanadromous species) and
24 associated habitats of such fish stocks.

 $\mathbf{5}$

6 (8) Evaluation of the feasibility and expected

(8) Evaluation of the feasibility and expected
 success of the program under the Mississippi Inter state Cooperative Resource Agreement and the mer its of extending such program of cooperative man agement strategy to other interjurisdictional river
 basins in the United States.

7 (9) Estimates of funds required to implement
8 recommendations and plans developed under para9 graphs (6), (7), and (8).

(c) REPORT TO CONGRESS.—Not later than 36
months after the date of the enactment of this Act, the
Secretary shall transmit to the Congress a report containing the evaluation of the pilot test to be conducted under
this section.

15 SEC. 4. PAYMENT OF ASSISTANCE.

16 The Secretary may use amounts available to carry 17 out this Act to pay assistance to the Mississippi Interstate 18 Cooperative Resource Association, for costs it incurs in 19 participating in the pilot test under section 3.

20 SEC. 5. DEFINITIONS.

21 For the purpose of this Act, the following definitions22 apply:

23 (1) INTERJURISDICTIONAL FISHERY RE24 SOURCES.—The term "interjurisdictional fishery re25 sources" means fishery resources and associated

aquatic habitats that depend on interjurisdictional
 rivers and are under the management of two or
 more governmental entities.

4 (2) INTERJURISDICTIONAL RIVER.—The term
5 "interjurisdictional river" means a river that flows
6 along the boundary of, or is common to, two or more
7 States.

8 (3) SECRETARY.—The term "Secretary" means
9 the Secretary of the Interior, acting through the Di10 rector of the United States Fish and Wildlife Serv11 ice.

(4) STATE FISH AND WILDLIFE AGENCY.—The
term "State Fish and Wildlife Agency" includes any
State department or agency, or a part thereof, that
is empowered under the laws of the State to exercise
the functions ordinarily exercised by a State fish and
wildlife agency.

(5) THE MISSISSIPPI INTERSTATE COOPERATIVE RESOURCE ASSOCIATION.—The term "Mississippi Interstate Cooperative Resource Association" means the association comprised of the States
and entities that are signatories to the Mississippi
Interstate Cooperative Resource Agreement.
