

104TH CONGRESS
1ST SESSION

S. 1048

To authorize appropriations for fiscal year 1996 to the National Aeronautics and Space Administration for human space flight; science, aeronautics, and technology; mission support; and Inspector General; and for other purposes.

IN THE SENATE OF THE UNITED STATES

JULY 18 (legislative day, JULY 10), 1995

Mr. PRESSLER (for himself and Mr. BURNS) introduced the following bill; which was read twice and referred to the Committee on Commerce, Science, and Transportation

A BILL

To authorize appropriations for fiscal year 1996 to the National Aeronautics and Space Administration for human space flight; science, aeronautics, and technology; mission support; and Inspector General; and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “National Aeronautics
5 and Space Administration Authorization Act, Fiscal Year
6 1996”.

1 **SEC. 2. DEFINITIONS.**

2 For the purposes of this Act—

3 (1) the term “Administrator” means the Ad-
4 ministrator of the National Aeronautics and Space
5 Administration;

6 (2) the term “NASA” means the National Aer-
7 onautics and Space Administration; and

8 (3) the term “institution of higher education”
9 has the meaning given such term in section 1201(a)
10 of the Higher Education Act of 1965 (20 U.S.C.
11 1141(a)).

12 **TITLE I—AUTHORIZATION OF APPROPRIATIONS**

13 **SEC. 101. HUMAN SPACE FLIGHT.**

14 There are authorized to be appropriated to the Na-
15 tional Aeronautics and Space Administration for Human
16 Space Flight the following amounts, to be available Octo-
17 ber 1, 1995:

18 (1) Space Station, \$1,818,800,000.

19 (2) Russian Cooperation, \$129,200,000.

20 (3) Space Shuttle, \$3,031,800,000.

21 (4) Payload and Utilization Operations,
22 \$293,000,000.

23 **SEC. 102. SCIENCE, AERONAUTICS, AND TECHNOLOGY.**

24 There are authorized to be appropriated to the Na-
25 tional Aeronautics and Space Administration for Science,

1 Aeronautics, and Technology the following amounts, to be-
2 come available October 1, 1995:

3 (1) Space Science, \$1,958,900,000, of which
4 \$48,700,000 shall be allocated to the Stratospheric
5 Observatory for Infrared Astronomy, \$15,000,000
6 shall be allocated to the Space Infrared Telescope
7 Facility, and \$30,000,000 shall be allocated to the
8 New Millennium initiative.

9 (2) Life and Microgravity Sciences and Applica-
10 tions, \$507,000,000, of which \$3,000,000 shall be
11 allocated for the construction of an addition to the
12 Microgravity Development Laboratory, Marshall
13 Space Flight Center.

14 (3) Mission to Planet Earth, \$1,360,100,000,
15 of which \$17,000,000 shall be allocated to the con-
16 struction of the Earth Systems Science Building,
17 Goddard Space Flight Center.

18 (4) Aeronautical Research and Technology,
19 \$891,300,000, of which \$5,400,000 shall be allo-
20 cated to the modernization of the Unitary Plan
21 Wind Tunnel Complex, Ames Research Center.

22 (5) Space Access and Technology,
23 \$766,600,000, of which at least \$70,000,000 shall
24 be allocated to support a shuttle flight for the Shut-
25 tle Imaging Radar-C, of which \$5,000,000 shall be

1 used to establish a Rural Technology Transfer and
2 Commercialization Center for the Rocky Mountains
3 and Upper Plains States region, and of which
4 \$159,000,000 shall be allocated to the Reusable
5 Launch Vehicle program.

6 (6) Mission Communication Services,
7 \$461,300,000.

8 (7) Academic Programs, \$104,700,000, of
9 which \$3,000,000 shall be allocated to support the
10 establishment of an Upper Plains States regional
11 science education and outreach center and of which
12 \$1,000,000 shall be allocated to establish a Rural
13 Teacher Resource Center.

14 **SEC. 103. MISSION SUPPORT.**

15 There are authorized to be appropriated to the Na-
16 tional Aeronautics and Space Administration for Mission
17 Support the following amounts, to become available Octo-
18 ber 1, 1995:

19 (1) Safety, Reliability, and Quality Assurance,
20 \$37,600,000.

21 (2) Space Communication Services,
22 \$219,400,000.

23 (3) Research and Program Management, in-
24 cluding personnel and related costs, travel, and re-
25 search operations support, \$2,047,800,000.

1 (4) Construction of Facilities, including land
2 acquisition, \$135,000,000, including the following:

3 (A) Restoration of Flight Systems Re-
4 search Laboratory, Ames Research Center;

5 (B) Restoration of chilled water distribu-
6 tion system, Goddard Space Flight Center;

7 (C) Replace chillers, various buildings, Jet
8 Propulsion Laboratory;

9 (D) Rehabilitation of electrical distribution
10 system, White Sands Test Facility, Johnson
11 Space Center;

12 (E) Replace main substation switchgear
13 and circuit breakers, Johnson Space Center;

14 (F) Replace 15kv load break switches,
15 Kennedy Space Center;

16 (G) Rehabilitation of Central Air Equip-
17 ment Building, Lewis Research Center;

18 (H) Restoration of high pressure air com-
19 pressor system, Marshall Space Flight Center;

20 (I) Restoration of Information and Elec-
21 tronic Systems Laboratory, Marshall Space
22 Flight Center;

23 (J) Restoration of canal lock, Stennis
24 Space Center;

1 (K) Restoration of primary electrical dis-
2 tribution system, Wallops Flight Facility;

3 (L) Repair of facilities at various locations,
4 not in excess of \$1,500,000 per project;

5 (M) Rehabilitation and modification of fa-
6 cilities at various locations, not in excess of
7 \$1,500,000 per project;

8 (N) Minor construction of new facilities
9 and additions to existing facilities at various lo-
10 cations, not in excess of \$1,500,000 per project;

11 (O) Facility planning and design, not oth-
12 erwise provided for; and

13 (P) Environmental compliance and restora-
14 tion.

15 **SEC. 104. INSPECTOR GENERAL.**

16 There are authorized to be appropriated to the Na-
17 tional Aeronautics and Space Administration for Inspector
18 General \$17,300,000, to become available October 1,
19 1995.

20 **SEC. 105. OFFICE OF COMMERCIAL SPACE TRANSPOR-**
21 **TATION.**

22 There are authorized to be appropriated to the Office
23 of Commercial Space Transportation of the Department
24 of Transportation \$7,000,000, to become available Octo-
25 ber 1, 1995.

1 TITLE II—LIMITATIONS AND GENERAL
2 PROVISIONS

3 **SEC. 201. SPACE STATION LIMITATION.**

4 The aggregate amount authorized to be appropriated
5 for Space Station and related activities under sections
6 101, 102, and 103 shall not exceed \$2,100,000,000.

7 **SEC. 202. EXPERIMENTAL PROGRAM TO STIMULATE COM-**
8 **PETITIVE RESEARCH.**

9 Of the amounts appropriated under sections 101 and
10 102, \$6,900,000 are authorized for the Experimental Pro-
11 gram to Stimulate Competitive Research in accordance
12 with title III of the National Aeronautics and Space Ad-
13 ministration Act, Fiscal Year 1993 (Public Law 102-588;
14 106 Stat. 5119).

15 **SEC. 203. SPECIAL TECHNOLOGY ENHANCEMENT GRANTS**

16 (a) IN GENERAL.—

17 (1) GRANTS.—The Administrator shall make up
18 to 4 special technology enhancement grants to areas
19 or States that have not participated fully in the Ad-
20 ministration's aeronautical and space programs in
21 order to enable such areas or States to increase their
22 capabilities in technology development, utilization,
23 and transfer in aeronautics, space science, and relat-
24 ed areas. At least one such grant shall be made
25 available to a consortium of States, each one of

1 which has an average population density of less than
2 12.3 persons per square mile, based on data for
3 1993 from the Bureau of the Census.

4 (2) ACTIVITIES.—Grants made under this sec-
5 tion shall be available for—

6 (A) assessment of resources and needs;

7 (B) development of infrastructure, includ-
8 ing incubators and prototype demonstration fa-
9 cilities;

10 (C) collaborations with industry;

11 (D) expansion of capabilities in procure-
12 ment;

13 (E) development of technology transfer
14 and commercialization support capabilities;

15 (F) activities to increase participation in
16 the Small Business Innovation Research pro-
17 gram and other NASA research, development,
18 and technology utilization and transfer pro-
19 grams;

20 (G) relevant research of interest to NASA;
21 and

22 (H) such other activities as the Adminis-
23 trator shall deem appropriate.

1 (3) SPECIAL CONSIDERATION.—In making
2 grants under this section, the Administrator shall
3 give special consideration to proposals that—

4 (A) will build upon and expand a develop-
5 ing research and technology base, and

6 (B) will insure a lasting research and de-
7 velopment and technology development and
8 transfer capability.

9 (b) ELIGIBLE ENTITIES.—Grants under subsection
10 (a)(1) may be made to—

11 (1) State and local governments;

12 (2) institutions of higher education; and

13 (3) organizations with expertise in research and
14 development, technology development, and tech-
15 nology transfer in areas of interest to NASA.

16 (c) FUNDING OF PROGRAM.—Of the amounts author-
17 ized in section 102 for the Space Access and Technology
18 account, \$15,000,000 are authorized to be used for grants
19 under subsection (a).

20 **SEC. 204. CLEAR LAKE DEVELOPMENT FACILITY.**

21 The Administrator shall acquire, for no more than
22 \$35,000,000, a certain parcel of land, together with exist-
23 ing facilities, located on the site of the property referred
24 to as the Clear Lake Development Facility, Clear Lake,
25 Texas, comprising approximately 13 acres and including

1 a light manufacturing facility, an avionics development fa-
2 cility, and an assembly and test building which shall be
3 modified for use as a neutral buoyancy laboratory in sup-
4 port of human space flight activities.

5 **SEC. 205. YELLOW CREEK FACILITY.**

6 Notwithstanding any other provision of law or regula-
7 tion, the National Aeronautics and Space Administration
8 (NASA) shall convey, without reimbursement, to the State
9 of Mississippi, all rights, title, and interest of the United
10 States in the property known as the Yellow Creek Facility
11 and consisting of approximately 1,200 acres near the city
12 of Iuka, Mississippi, including all improvements thereon
13 and any personal property owned by NASA that is cur-
14 rently located on-site and which the State of Mississippi
15 requires to facilitate the transfer: *Provided*, That appro-
16 priated funds shall be used to effect this conveyance: *Pro-*
17 *vided further*, That \$10,000,000 in appropriated funds
18 otherwise available to NASA shall be transferred to the
19 State of Mississippi to be used in the transition of the
20 facility: *Provided further*, That each Federal agency with
21 prior contact to the site shall remain responsible for any
22 and all environmental remediation made necessary as a
23 result of its activities on the site: *Provided further*, That
24 in consideration of this conveyance, NASA may require
25 such other terms and conditions as the Administrator

1 deems appropriate to protect the interests of the United
2 States: *Provided further*, That the conveyance of the site
3 and the transfer of the funds to the State of Mississippi
4 shall occur not later than 30 days after the date of enact-
5 ment of this Act.

6 **SEC. 206. RADAR REMOTE SENSING SATELLITES.**

7 (a) FINDINGS.—The Congress finds that—

8 (1) radar satellites represent one of the most
9 important developments in remote sensing satellite
10 technology in recent years;

11 (2) the ability of radar satellites to provide
12 high-quality Earth imagery regardless of cloud cover
13 and to provide three-dimensional pictures of the
14 Earth's surface when the satellites are flown in com-
15 bination dramatically enhance conventional optical
16 remote sensing satellite capabilities and usefulness;

17 (3) the National Aeronautics and Space Admin-
18 istration has developed a unique background and ex-
19 pertise in developing and operating radar satellites
20 as a result of their activities connected with its
21 radar satellites, Shuttle Imaging Radar (SIR)–A,
22 SIR–B, and SIR–C, which has flown twice on the
23 Space Shuttle;

24 (4) other nations currently have operational
25 radar satellite systems, including Japan and West-

1 ern Europe, with other spacefaring nations expected
2 to develop such systems in the near future; and

3 (5) the development of an operational radar
4 satellite program at NASA featuring free-flying sat-
5 ellites and a related ground system is critical to
6 maintain United States leadership in remote sensing
7 satellite technology and is important to our national
8 security and international competitiveness.

9 (b) POLICY.—It is the policy of the United States
10 that—

11 (1) NASA should develop and operate a radar
12 satellite program as soon as practicable;

13 (2) NASA should build on the experience and
14 knowledge gained from its previous radar endeavors;

15 (3) NASA should work with other Federal
16 agencies and, as appropriate, with other spacefaring
17 nations, in its radar satellite activities; and

18 (4) NASA should make maximum use of exist-
19 ing National remote sensing assets such as the
20 Landsat system, activities connected with the Mis-
21 sion to Planet Earth, and the data management fa-
22 cilities of the Department of the Interior in all of its
23 radar satellite activities.

24 (c) PROGRAM REQUIREMENTS.—NASA shall initiate
25 a program to develop and operate a radar satellite pro-

1 gram. The program shall employ the most advanced radar
2 satellite technology currently available. To the maximum
3 extent possible, all of the data processing, dissemination,
4 and archiving functions shall be performed by the Depart-
5 ment of the Interior. The program should be planned in
6 such a way that the data from the radar satellite system
7 is converted into a broad range of informational products
8 with research, commercial, and government applications
9 and any other applications that are in the public interest
10 and to distribute such products over the widest user com-
11 munity that is practicable, including industry, academia,
12 research institutions, local and State governments, and
13 other Federal agencies. The program should coordinate
14 with, and make appropriate use of, other remote sensing
15 satellite programs, such as the Landsat program.

16 (d) PLAN.—Within 90 days after the enactment of
17 this Act, the Administrator shall submit a detailed plan
18 for implementation of the radar satellite program to the
19 Committee on Commerce, Science, and Transportation of
20 the Senate and the Committee on Science of the House
21 of Representatives. The plan should include—

- 22 (1) the goals and mission of the program;
23 (2) planned activities for the next 5 years to
24 achieve such goals and mission;

1 (3) strategies for maximizing the usefulness of
2 the satellite data to the scientific and academic com-
3 munities, the private sector, all levels of government,
4 and the general public;

5 (4) concepts for integrating the program with
6 other related NASA activities (such as Mission to
7 Planet Earth), the Landsat program, and other cur-
8 rent and emerging remote sensing satellite programs
9 and activities in the Federal government and all
10 other public and private sectors so that the program
11 complements and strengthens such programs and ac-
12 tivities and is not duplicative of these efforts;

13 (5) concepts developed in consultation with De-
14 partment of the Interior, for processing, archiving,
15 and disseminating the satellite data using, to the
16 maximum extent possible, existing Federal govern-
17 ment programs and assets at the Department of the
18 Interior and other Federal agencies;

19 (6) targets and timetables for undertaking spe-
20 cific activities and actions within the program;

21 (7) a 5-year budget profile for the program;
22 and

23 (8) a comparison between the program and the
24 radar satellite programs of other spacefaring na-
