S. RES. 108

Whereas atomic veterans are in many ways one of the most neglected groups of United States veterans;

Whereas atomic veterans served their country patriotically and proudly, believing fully that the United States Gov-

ernment would protect them from any serious hazards to their health;

Whereas atomic veterans were not told of the hazards they faced from exposure to ionizing radiation, often were provided with little protection from such exposure even when deployed at or near ground zero immediately after test detonations of nuclear weapons, on occasion were not provided film badges to measure their exposure to radiation during such detonations, and were provided with no follow-up medical care or other monitoring to determine the health consequences of such exposure;

Whereas for 40 years after World War II Federal law contained no provisions specifically providing veterans compensation or health care for atomic veterans for service-connected radiogenic diseases; and

Whereas many of the 250,000 members of the Armed Forces who participated in post-World War II atmospheric nuclear testing were forbidden from publicly revealing such participation for reasons of national security and received no recognition for their important contributions to the United States and the Armed Forces: Now, therefore, be it
