RESOLUTION

Expressing the sense of the House of Representatives regarding the importance of mammograms and biopsies in the fight against breast cancer.

Whereas 1 in 8 women will develop breast cancer in her lifetime;

Whereas nearly 180,000 American women will be diagnosed with breast cancer this year, and nearly 44,000 women will die of the disease;

Whereas breast cancer is the leading cause of cancer death of women between the ages of 40 and 55;

Whereas it is universally recognized that regular mammograms are the best way to detect breast cancer at its earliest, most treatable stages, and that mammograms can detect small breast cancers up to 2 years earlier than they can be detected through self-examination;

Whereas early detection, including regular mammography screening with prompt treatment, could result in one-third fewer breast cancer deaths among women over age 50;

Whereas the American Cancer Society and the National Cancer Institute recognize that regular mammograms are beneficial to women in their forties and recommend that women begin mammography screening by age 40;

Whereas the Centers for Disease Control and Prevention determined in 1995 that nearly half of American women

age 50 and older, and more than one-third of American women age 40 to 49, had not received a mammogram in the previous year;

Whereas annual mammograms are essential in early detection of breast cancer, and biopsies are the only way to diagnose or rule out breast cancer with certainty;

Whereas it is vital that women have information about breast biopsy and the biopsy options that are available to them;

Whereas cutting-edge technology in women's health is creating more options for women; and

Whereas greater awareness of the importance of mammograms leads to more mammograms and biopsies: Now, therefore, be it

1 *Resolved*, That it is the sense of the House of Rep-
2 resentatives that—

3 (1) all American women should take an active
4 role in the fight against breast cancer by all the
5 means that are available to them, including self-ex-
6 amination, physician examination, and regular mam-
7 mograms;

8 (2) the role played by community organizations
9 and health care providers in promoting awareness of
10 the importance of regular mammograms and of bi-
11 opsy options and in helping to expand the availabil-
12 ity of low-cost mammograms and biopsies should be
13 recognized and applauded; and

1 (3) the Federal Government has a responsibility
2 to—

3 (A) endeavor to raise awareness about the
4 importance of the early detection (through
5 mammography and biopsy) and prompt treat-
6 ment of breast cancer;

7 (B) continue to fund research so that the
8 causes of and a cure for breast cancer may be
9 discovered; and

10 (C) continue to make mammograms and
11 biopsies more widely available to women over
12 40.
