PURPOSE

It is the purpose of the Reading Excellence Act to teach every child to read as soon as they are ready to read or as soon as possible once they enter school, but no later than third grade. This will be accomplished by improving the in-service instruction practices for teachers who teach reading through the use of findings from reliable, replicable research on reading, including phonics; the expansion of high-quality family literacy programs which insure that parents have the literacy skills necessary to help their children learn to read and that their children come to school ready to learn to read; and through other activities which improve the reading skills of students, such as increasing community involvement in teaching children to read. It is also the purpose of this Act to increase parental involvement through tutorial assistance grants which allow parents to choose reading tutors for their children from a list of providers developed by the local educational agency. In addition, this Act will work to reduce the number of students inappropriately referred to special education based on reading difficulties. Finally, this Act will provide additional College Work Study Students to work with children and families to help improve their reading skills.

COMMITTEE ACTION

The Full Committee on Education and the Workforce held three hearings on literacy: July 10, July 31, and September 3, 1997.

The July 10, 1997, hearing in Washington, DC, explored current research on how children learn to read. The Committee received testimony from Dr. Richard Venezky, Unidel Professor of Educational Studies, Linguistics and Computer Science, University of Delaware, Newark, Delaware; Dr. Reid Lyon, Acting Chief, Child Development and Behavior Branch, National Institute for Child Health and Human Development, National Institutes of Health, Rockville, Maryland; Dr. Catherine Snow, Henry Lee Shattuck Professor of Education, Harvard Graduate School of Education, Cambridge, Massachusetts; Dr. Bob Slavin, Co-Director of CRESPAR,
Center for the Social Organization of Schools, Johns Hopkins University, Baltimore, Maryland; and Dr. Vivian Gadsden, Director, National Center on Fathers and Families, University of Pennsylvania Graduate School of Education, Philadelphia, Pennsylvania. Testimony also was received from Ms. Janet Nicholas, Member, California Board of Education, Sonoma, California; Ms. Barbara Ruggles, Teacher, Frankfort, Illinois; and Ms. Margaret Doughty, Executive Director, Houston Read Commission, Houston, Texas.

The July 31, 1997, hearing in Washington, DC, reviewed the role of current federal literacy programs in helping children learn to read. The Committee received testimony from Dr. Maris Vinovskis, Professor of History, Research Scientist, Center for Political Studies, Institute for Social Research, University of Michigan, Ann Arbor, Michigan; Dr. Herbert Walberg, Research Professor of Education and Psychology, University of Illinois, Chicago, Illinois; Dr. Joseph Johnson, Director, Collaborative for School Improvement, Charles A. Dana Center, University of Texas, Austin, Texas; Dr. Cheryl Wilhoite, Superintendent of Schools, Madison, Wisconsin, representing the American Association of School Administrators, Arlington, Virginia; and Dr. Andrew Hayes, Associate Professor of Education, University of North Carolina, Wilmington, North Carolina.

The September 3, 1997, hearing in Washington, DC, focused on the need for strong professional development for teachers of reading based on reliable, replicable research on reading. The Committee received testimony from Mrs. Ann Mintz, Language Arts Instructional Facilitator, Howard County Elementary Schools, Howard County, Maryland; Ms. Debra Wakefield, Teacher, Del Norte County Schools, Crescent City, California; Ms. Kimberly Wilson, Graduate Student, American University, Washington DC; Dr. Laura Fredrick, Department of Educational Psychology and Special Education, Georgia State University, Atlanta, Georgia; Mrs. Beth Check, Supervisor, Reading Language Arts, Newport News School District, Newport News, Virginia; and Dr. Louisa Moats, Project Director, NICHD DC Early Intervention Project, Washington, DC.

**LEGISLATIVE ACTION**

On October 22, 1997, the Committee on Education and the Workforce assembled to consider H.R. 2614, the Reading Excellence Act. H.R. 2614, as amended, was favorably reported by the Education and the Workforce Committee by voice vote.

During Committee consideration of H.R. 2614, the following amendments were adopted:

An amendment offered by Mr. Riggs to modify the bill's provisions regarding the LEAs that are eligible to receive tutorial assistance grant funds to LEAs with at least 1 school in the geographic area served by the LEA that is located in an empowerment zone, enterprise community, and for those LEAs which do not have empowerment zones or enterprise communities located in the State
in which the agency is located, a local educational agency with at least one school in school improvement.

Adopted by voice vote.

An amendment offered by Mr. Miller, as amended by Chairman Goodling, to require each local educational agency receiving a subgrant under section 15104, to provide to the parent of any student in a school selected by a local educational agency under section 15104, information regarding the qualifications of the student’s classroom teacher to provide instruction in reading.

Adopted by a vote of 20–15.

An amendment offered by Mr. Kildee to add a school or public library that offers reading or literacy programs for children or families to the list of optional members of a State’s Reading and Literacy Partnership.

Adopted by voice vote.

An amendment offered by Mr. Payne to replace the evaluation provisions in H.R. 2614 with a national evaluation conducted by the Secretary.

Adopted by a vote of 15–13.

An amendment offered by Mr. Riggs to restore the state evaluation of local subgrantees which was deleted under the Payne amendment.

Adopted by voice vote.

**SUMMARY**

The Reading Excellence Act establishes a competitive grant program for the States to obtain funds to improve the teaching of reading for Title 1 Schools in School Improvement and other related activities which improve the reading skills of students. Each State Literacy and Reading Partnership receiving a grant must use a portion of their funds to provide subgrants to Local Education Agencies to carry out a program of Tutorial Assistance Grants. The Act also modifies the Even Start Family Literacy Program to improve the quality of services provided to families seeking literacy assistance. Changes are also made to the College Work Study Program to encourage schools to place participating students as tutors in reading programs for children and families. Lastly, the bill also repeals 67 unfunded Federal education programs.

**BACKGROUND AND NEED FOR LEGISLATION AND COMMITTEE VIEWS**

The problem of illiteracy in our country has been a major concern of the Committee on Education and the Workforce for many years. In recent years, the Committee has worked to improve the provision of literacy services to adults through modifications to the Adult Education Act. In particular, the Act was modified to permit the operation of family literacy programs, which address the literacy skills of parents and their children at the same time.
In late April 1997, the President forwarded to Congress his legisla-
tive proposal for the “America Reads Challenge” initiative. Subse-
sequently, Ranking Member Clay and 13 Democratic Members of this
Committee, introduced this initiative.

In general, the President’s proposal supported spending funds to
give children extra help in reading during the afternoons, week-
ends, and summers. This would be accomplished through the use
of tutors, who would be enlisted and trained to provide individual-
ized and small group assistance. Most funds would pay for 30,000
“reading specialists” who would train an estimated 1 million volun-
teer tutors. Tutors would be managed by “AmeriCorps” volunteers.
Additional funds would be used to pay for the Parents as First
Teachers program to support parents in their efforts to help their
children become successful readers by the end of third grade.

Subsequently, House and Senate Republican Leaders and the
President announced an agreement to balance the budget within 5
years. The agreement included, in concept, a commitment to pro-
vide discretionary funding toward a literacy initiative. The agree-
ment says that Congress will fund a literacy initiative, “consistent
with the goals and objectives of the America Reads Challenge.” In
our view, this agreement gives the Committee wide latitude to de-
velop a literacy initiative that meets our policy objectives and is
consistent with the President’s “goals and objectives.” This bill ful-
fills our mandate under the budget agreement.

In response to the President’s call for improvement in the read-
ing skills of young children and the Budget agreement, the Com-
mittee on Education and the Workforce held a series of hearings
on the topic of reading. These hearings explored current research
on how children learn to read, the need for strong professional de-
velopment for teachers of reading based on reliable, replicable re-
search on reading, and the role of current federal literacy programs
in helping children learn to read.

The Committee, based on testimony provided by witnesses, and
after reviewing the most recent National Assessment of Education
Progress (NAEP) data agrees with the President’s goal of improv-
ing the reading and literacy skills of our children. Large numbers
of American children were not learning to read or to read well. The
NAEP 1994 Reading Report Card found that 40 percent of students
in the fourth grade were below the basic level of reading achieve-
ment. And, according to Reid Lyon, Acting Chief of the Child De-
velopment and Behavior Branch of the National Institute of Child
Health and Human Development (NICHD), children who do not
learn to read before the end of third grade never actually catch up
to their peers. The Committee also heard testimony from witnesses
which indicated that the way to address this problem was by pro-
viding better pre-service and in-service training based on reliable,
replicable research for teachers who teach reading. In addition, the
Committee heard from witnesses who supported the use of volun-
tee tutors and community-based organizations in ensuring that
children learn to read by the end of third grade.

Although the Committee applauded the President for calling na-
tional attention to the reading issue, it decided that it was nec-
essary to improve upon the approach taken by the President in
order to reach the goal of helping every American child learn to read independently by the end of third grade.

One of the major concerns of the Committee with the President’s America Reads proposal was the establishment of a complicated new state and local grant program to (1) fund ongoing staff positions in local schools for professionals to train volunteer tutors; and (2) hire AmeriCorps participants to coordinate the activities of local tutors.

The Committee did, however, conclude that the best way to build upon the President’s initiative was to improve the reading ability of children by focusing on teachers who teach reading. The best way to do this is through the dissemination of reliable, replicable research on reading to individuals involved in teaching reading to children in federal programs with a strong reading component.

Dr. Lyon, of NIH testified before the Committee that fewer than 10 percent of our nation’s teachers have an adequate understanding of how reading develops or how to provide reading instruction to struggling readers. Less than two percent of our teachers have ever seen their professor demonstrate teaching practices with children of diverse skills in a systematic way. About 90 percent of our teachers have never had the theories they have learned—the theoretical information—directly linked to providing instruction to a wide range of children. Other witnesses before the Committee indicated that many teachers only take one course in reading as a part of their teacher preparation. In describing her role in hiring primary school teachers, Ann Mintz, Instructional Facilitator for Howard County Schools said,

Reading, however, is not a content to be mastered but a process to be learned and, as such, requires the teacher to know how each child is currently achieving and what needs to be done to further his or her progress. Teaching reading is an art, one that requires a thoughtful teacher who can move each child from point A to point B in a timely, developmentally appropriate manner. I am troubled by what I see as a lack of preparation, at the pre-service level, for many of the teachers I encounter. There are too many beginning teachers who lack an understanding of what good reading instruction entails.

Mrs. Mintz also quoted one of her first year teachers as saying, “When I think back to college, I was taught a lot of theory, but no one taught me specifically what to do.”

Other witnesses before the Committee questioned the effectiveness of current Federal literacy programs, such as Title 1, in helping children learn to read. Dr. Maris Vinovskis, a research scientist for the Center for Political Studies at the Institute for Social Research, University of Michigan, noted,

It is appalling, that having spent more than $150 billion on these compensatory education programs, we still do not know which practices and programs are particularly effective in helping at-risk children, especially those living in the high poverty areas of inner cities. These educational programs were premised on an unrealistic expectation that we could eradicate poverty almost entirely by
means of a few uncoordinated, under-funded, untested, and largely new Federal initiatives.”

For decades American education has followed fads. New ideas, or “education innovations” as they are often called, have swept through our schools like prairie fires. Teachers, responding to these latest “new ideas” or philosophies are most often unaware of the latest research of what works, or even if there is any. In the field of medicine, no new drug or treatment would be considered for public use without extensive evaluation and testing. Yet, somehow, education is different.

Although almost every practice that has ever been pursued in education has been supported with data by someone, much of it is not reliable. E.D. Hirsh, author of “The Schools We Need: Why We Don’t Have Them” made the following statement in April 1997 in an address to the California State Board of Education:

At the core of each discipline, there develops a consensus of the learned, and this consensus is highly dependable. A lot is close enough to being right that you can bet your life and your children’s lives on that scientific core. But out at the edge, on the frontier of the discipline, there is a lot of disagreement, and we can’t tell for sure which rival theory is right. When lawmakers say that education policy should be based on research, the spirit of that law implies reliable consensus research. Any other interpretation would mean, and has meant, carrying out unwarranted human experimentation on our own children.

How to teach children to read has been debated for most of this century. The pendulum has swung from “all phonics” to “no phonics.” But as the new century dawns, we now have indisputable evidence that children can be taught to read at an early age if given the proper instruction. The English language is a wondrous and a varied means of communication, but at the heart it is simple and consistent. Kindergarten and first grade is where most children can learn the skill of reading. With the basic phonics skills mastered in kindergarten and first grade, reading becomes a joy, and can be used to learn complex facts and ideas that are so fundamental to all learning.

Once children have gained a working knowledge of the 44 phonetic elements in the English language, at least 85% of the words in the English language are then “decodable.” Comprehension then follows as a student reads and studies the required text material. Any six year old loves to learn letters and the sounds they make. Most are fascinated by them. They have no problem with the rote learning that is needed to master this skill. If reading teachers know the reliable, replicable research on reading instruction, and apply it, they will develop students who have a lifelong love of reading.

In the field of reading research, there have been some breakthroughs in how children best learn to read. The cost of doing this research has been very expensive, and unfortunately, much of it remains “locked” in the research community. Benita Blachman, Professor of Education at Syracuse University and member of the NICHD research team makes the following observation about the
need for teaching direct, systematic phonics as a first step in learning to read:

The good news is that we have had scientific breakthroughs in our knowledge about the development of literacy. We now know a great deal about how to address reading problems even before they begin * * * The tragedy is that we are not exploiting what we know about reducing the incidence of reading failure. Specifically, the instruction currently being provided to our children does not reflect what we know from research. Direct, systematic instruction about the alphabetic code is not routinely provided in kindergarten and first grade, despite the fact that, given what we know at this moment, this might be our most powerful weapon in the fight against illiteracy.

Providing teachers with the latest information from reliable, replicable research in reading instruction will help reduce the incidence of illiteracy, empower teachers with the tools they need to teach children to read and ensure that our children reach their highest potential.

Although there has been extensive research in reading instruction conducted over the past thirty years, the most current is that done by NICHD. In 1985, Congress mandated that a comprehensive research program be developed in the area of reading and other learning disabilities. NICHD studies have cost the taxpayer more than $200 million and have been conducted at some of the most prestigious universities in America and Canada. The findings of these studies, and other studies equally reputable, can be summarized as follows: teach phonemic awareness directly in kindergarten; teach children how to “sound out” words; teach each sound spelling correspondence explicitly; teach frequent, highly regular sound spelling relationships systematically; teach how sounds spellings blend together to make words; teach reading comprehension and vocabulary development once the students have mastered these basic phonetic skills.

Teachers are not getting the research information they need. According to a survey of 43 texts used to train teachers of reading, none advocated systematic phonics instruction—and only nine even mentioned that there was a debate on the issue. As Lousia Moats, who testified before the Committee and an NICHD researcher noted,

* * * language mastery is as essential for the literacy teacher as anatomy is for the physician. It is our obligation to enable teachers to acquire it.

When children fail to acquire that training, they are often referred to special education as being “learning disabled.” The unfortunate reality, however, has been that many of these children are either not learning disabled, or are learning disabled but who would have not needed referral to special education if they had been taught to read in their first few years of school. The Individuals with Disabilities Education Act Amendments of 1997, P.L. 105–17, took small steps toward slowing the inappropriate identification of children as disabled. Section 614(b)(5) of the amended
law will ensure that schools do not identify children as disabled, “if the determinant factor for such determination is lack of instruction in reading. * * *” In coming years, that change will mean fewer non-disabled children are misidentified as disabled when their actual problem is an inability to read.

But section 614(b)(5) only addresses problems of nondisabled children who have failed to learn to read. It does nothing to assist the learning disabled child who could have learned to read had his or her teacher known the proper means to teach reading. The real solution is to teach these children to read on the first attempt. And only when their teachers possess research-backed knowledge about how children learn to read will we see a reduction in the number of children who are identified as being disabled and needing special education services to assist them in overcoming their difficulties.

Teacher training in the Reading Excellence Act will be based on reliable, replicable research, and if applied in the classroom can open up unlimited opportunities for children who would never reach their true potential.

The Committee believes it is extremely important that every child learn to read as soon as possible. Most can learn to read by the end of first grade, if properly taught. The National Adult Literacy Survey, which assessed the literacy skills of adults, found that almost 50 percent of our adult population read at the bottom two of five levels of literacy. Unless we improve how we teach children to read at an early age, there is a strong likelihood that these findings will repeat themselves over and over again.

If we are to keep our nation strong, we cannot afford to lose another generation to illiteracy. For individuals with low literacy skills the picture for the future is less than bright. Forty-three percent of those in the lowest literacy level live in poverty; 17 percent are receiving food stamps, and 70 percent are unemployed or under-employed. In addition, more than two-thirds of unwed parents, school dropouts, and those arrested have below average literacy levels. Today's highly technological society demands an even higher level of literacy and job skills than ever before. It is essential that each and every child graduate with the education they require to lead productive lives and compete in the world marketplace.

PROFESSIONAL DEVELOPMENT

One of the major factors in whether or not a child learns to read is the ability of his or her teacher to teach reading. If that teacher is not successful, it can affect the future academic success of the child in all of their other classes which require a high level of reading ability.

As indicated earlier in this report, there is evidence that fewer than 10 percent of teachers have received adequate instruction or have had enough experience in teaching reading as student teachers before they first enter the classroom. In addition, many of the teachers testifying before the Committee pointed out that they had few opportunities, once they began teaching, to obtain the most up-to-date information on how children learn to read or an opportunity to update their teaching skills based on such information. Kimberly
Wilson, a graduate student of education at American University in Washington, DC, noted,

They do not have the information they need to teach reading and * * * there are so many quick-fix programs that they do not know how to begin discerning the appropriate methodology. Teachers will continue to be discouraged until they are provided with the information and research equipping them to be successful with all students. Professional development for teachers is the key to reading success * * *

Debra Wakefield, a primary grade teacher in the Del Norte Unified School District, Crescent City, California noted,

The practical steps in my training that made the big change for me after so many years in the classroom were, number one, reading current professional material and research with my colleagues; * * * ongoing explicit in-service is critical. Without proper training we are seriously hampering the efforts of our teachers and jeopardizing the future of our children.

In response to this information, the Committee chose to focus the Reading Excellence Act on improving the ability of the classroom teacher to teach reading.

Local educational agencies with schools in school improvement wishing to participate in activities under this Act must agree to re-vise the way all teachers and other appropriate instructional staff within the school teach reading. Each participating school must choose a model or models of reading instruction using reliable, replicable research on reading as a model for implementing and improving reading instruction by all teachers and for all children in the school. In addition, schools must work with a person with experience or expertise about each model and its implementation in order to guarantee its appropriate and effective application.

The Committee believes that reforming the way reading is taught within the school, coupled with other required activities, will go a long way toward insuring that children within the school learn to read as soon as possible, and no later than the end of third grade. As stated earlier, Dr. Lyon, in his comprehensive research on how children learn to read, found “that if we wait to provide appropriate instruction until nine years of age—the 3rd grade is when most kids are typically picked up—75 percent of those kids will remain difficult or poor readers the remainder of their life.” * * * Children who fail to read prior to the end of third grade may learn to read, but they will never catch up to their more advantaged peers. Therefore, the development of reading skills early in a child’s educational experience must be a priority in all schools throughout the United States in order to ensure a literate, well-educated population for generations to come.

The Committee believes one of the best ways to ensure that children learn to read is to improve the ability of teachers to teach reading—both current teachers and those individuals preparing to become teachers. Dr. Laura Fredrick, Assistant Professor, Georgia State University, noted
teachers should learn what we know from scientific research about how children learn to read, interpret research and have to translate what they read into the classroom, learn to assess reading to determine where and how to begin teaching the children in their classes assess reading on a regular basis, such as with daily or weekly rate and accuracy tests for fluency so that we make necessary changes immediately if the instruction is not effective, and learn about the many reading programs currently available and how to critique them to determine their possible effectiveness with different groups of children.

COMMUNITY-BASED VOLUNTEER EFFORTS

In addition to the emphasis on professional development, the Committee also recognizes the need for community-based volunteer efforts aimed at providing tutoring after school, on weekends and during the summer as an effective method of ensuring that children can read by the end of the third grade. The bill includes a number of provisions to allow these types of activities, as long as the community-based organizations utilize methods based on reliable, replicable research on reading to provide such tutoring.

PARTICIPATING LOCAL EDUCATIONAL AGENCY ACTIVITIES

In addition to professional development, the Committee supports a variety of activities which build on sound teaching practices to help children learn to read. States and local grantees seeking funding will carry out several of these activities utilizing funds received under this Act or from appropriate Federal, State and local sources.

As was pointed out by several witnesses at Committee hearings, children come to school with a variety of reading readiness skills. Dr. Fredrick of Georgia State University noted, “Not everyone is ready for the same instruction at the same time.”

Kimberly Wilson, a graduate student of education at American University stated, “We need to stop expecting teachers to be able to teach all children to read using the same methods. There will be some children who need direct instruction. Underdeveloped reading skills are both a health and an economic issue.”

Some children have a limited vocabulary, which must be further developed before they can learn to read. Other children have broad vocabularies, know the alphabet, and the relationship between letters and sounds. Once children enter Kindergarten, their teacher must work with them to build on their existing skills and ensure they are all reading ready before they enter first grade. In addition, there are also children entering Kindergarten with limited social skills, who are not, at the end of the school year, ready to transition to first grade. Schools participating under this Act must provide additional assistance to help such children transition to first grade. This assistance could be in the form of an additional year of school, a transition first grade. For others, it could be the extension of the school year through the summer. It is the belief of the Committee that these children, if they are promoted to first grade, could very possibly fail, an experience which could have a lifelong negative impact. Transition periods help ensure a child is ready for
first grade and ready to learn to read and avoids having them experience failure in their first educational experience.

The Committee also understands that many children come from homes where their parents are not equipped to help them learn to read or to be their first and most important teacher. In many instances, these parents, themselves, have experienced educational failure and are not comfortable in the school environment. While these parents want to help their children succeed in school, they may not know how. It is, however, the belief of the Committee that these children will be at a distinct disadvantage throughout their education if their parents are not active participants in their education. Therefore, schools receiving funds must provide family literacy programs, to assist parents with limited literacy skills and their children. Such programs include adult education services for parents and other primary caregivers, appropriate educational assistance for their children and training in how to assist their children achieve academic success. By empowering parents to be their child’s first and most important teacher, we allow them to control the education of their children and help ensure their children learn to read and succeed in school. Participation by families in family literacy programs would be on a voluntary basis.

The Reading Excellence Act calls for the provision of additional assistance to children in grades 1 through 3 who experience reading difficulties. The Committee expects that such assistance will be provided before, after and during non-instructional hours during the school day, on weekends and during the summer. In providing additional assistance to students, schools are required to use appropriately trained and supervised individuals, including tutors. The Committee expects that such individuals will be trained in the same instructional methods using reliable, replicable research on reading used by teachers in the school. While the Committee expects fewer children to experience reading difficulties if their initial instruction is based on reliable, replicable research on reading, it is also aware that some children may have more extensive problems in learning to read which will require additional assistance.

HOW THIS ACT RELATES TO OTHER EDUCATION PROGRAMS

The Reading Excellence Act is a new Title to the Elementary and Secondary Education Act of 1965 (ESEA). The Committee believes it is appropriate that this legislation be considered at the same time as other elementary and secondary education programs are reviewed in the 106th Congress.

Since reading is a key focus of several existing elementary and secondary education programs including Title 1 and Bilingual Education, the Committee feels it is important to consider how the information gathered in the development of the Reading Excellence Act can be used to improve the effectiveness of other programs which focus on helping children learn to read.

According to NAEP data, at all three grades studied (fourth, eighth and twelfth), the percentage of Title 1 program participants performing below the basic level was higher than that of their peers who were not Title 1 participants. In fact, for fourth grade, 80 percent of Title 1 participants were below the basic skill level. According to NAEP, only about one-third or fewer of students...
across the three grades who were not Title 1 participants performed below the basic level. Although the Reading Excellence Act provides for the dissemination of reliable, replicable research on reading to all participants in federal education programs which have a focus on reading, this may not be enough to bring about the type of change necessary to improve program performance in Title 1 or other programs.

By placing the Reading Excellence Act on the same authorization timeline as the Elementary and Secondary Education Act, we will be able to determine whether or not programs under ESEA can be improved by applying the same principles on teaching reading as are incorporated in H.R. 2614. We can also evaluate whether there is a need to continue the Reading Excellence Act and other “reading” programs and whether or not their goals can be accomplished through improvements to other programs.

THE RELATIONSHIP BETWEEN THE READING EXCELLENCE ACT AND IDEA

The Reading Excellence Act recognizes the relationship between inadequate reading instruction and inappropriate referral to special education. Earlier this year, the Committee passed the Individuals with Disabilities Education Act (IDEA) Amendments of 1997, which was signed by the President on June 4, 1997. That law amended the nation’s core special education statute, IDEA, by adding a new consideration to the process of evaluating a child as disabled. In the future, children who are evaluated under IDEA are not to be determined to be disabled where the “determinant factor” for that finding is a lack of instruction in reading. While such children will no longer inappropriately enter the special education system because of a lack of instruction in reading, they will still need to learn how to read. The Reading Excellence Act recognizes that these children clearly need assistance and ensures that money appropriated under this program will be used to assist them.

SELECTION OF GRANTEES

It is the view of the Committee that those individuals with extensive knowledge of reliable, replicable research on reading should play a key role in determining which States receive funding under this Act. As such, the Committee provides for the development of a Peer Review Panel, consisting of individuals with a strong knowledge base in this area, to review State applications. The panel is to be convened by the National Institute for Literacy in consultation with the Secretary of Education, the National Research Council of the National Academy of Sciences and the National Institute of Child Health and Human Development. In addition to choosing additional panel members, representatives of the Institute, the Secretary, the National Research Council and the National Institute of Child Health and Human Development will serve as panel members.

As applications are received by the Secretary, they are to be forwarded to the Peer Review Panel which will review applications and recommend them for funding or disapproval. Applications are to be ranked by the panel based on their quality and the extent to which they further the purposes of this Act. The Committee strong-
ly believes that applications should be funded in the order they are ranked by the Peer Review Panel. Should the Secretary decide to fund applications based on rankings other than those in the Peer Review Panel’s recommendations, the Committee would expect the Secretary to provide an explanation for his actions.

In an effort to encourage States to review the criteria by which they certify teachers who teach reading, the Committee requires the panel to give priority to funding applications from States that have modified, are modifying, or plan to modify (within a year of receiving a grant under this Act) State teacher certification in the area of reading to reflect reliable, replicable research on reading. This priority, however, is not be construed to establish a national system of teacher certification.

FOCUS ON TITLE 1 SCHOOLS IN SCHOOL IMPROVEMENT

The Committee believes basing reading instruction on reliable, replicable research can help schools throughout the United States improve the ability of children to learn to read. But, for Title 1 schools in school improvement, it is even more important that they have an opportunity to change the way teachers teach reading. According to the 1994 NAEP Reading Report Card, the percentage of Title 1 students who performed below basic ranged from 59 percent at twelfth grade to 80 percent at fourth grade. This means they have only partially mastered the prerequisite knowledge and skills which are fundamental for proficient work at their grade level. Only about one-third or fewer of students across the three grades who were not Title 1 participants performed below the Basic level. The Committee, therefore, believes it is important to focus this initiative on those schools experiencing the greatest difficulty in raising the academic achievement of their Title 1 students, i.e., those schools in school improvement. If schools participating in the Reading Excellence Act are able to turn around student achievement by basing instruction in reading on reliable, replicable research, they can then lead the way to reforming the way teachers teach reading throughout the United States.

NEED FOR PARTNERSHIP AT STATE LEVEL

The Committee recognizes that some of the most effective reading initiatives have evolved through efforts at the State level to bring together key policymakers and representatives of groups active in improving the reading skills of young children. It is the intent of this legislation to build upon these efforts by allowing these existing State literacy partnerships, which at a minimum must include the Governor and the Chief State School Officer, to compete for grants under this Act. The Committee emphasizes the point that for these States, there is no need to establish another entity or partnership in order to participate in this program.

For States that do not already have such a partnership and seek to compete for these funds, the Governor, the Chief State School Officer, appropriate members of the State legislature, at least one representative from a local educational agency with a Title 1 school in school improvement, and one community-based organization with experience in working with children to improve their reading skills, must join together to form a Reading and Literacy Partn-
ship. In establishing this Partnership, Governors and the chief state school officers are strongly encouraged to expand participation to other appropriate individuals such as representatives of eligible research institutions; family literacy service providers; and parents of both public, private and home school students.

By forming such a partnership, the State demonstrates that there is cooperation and coordination among the different groups and entities responsible and interested in improving literacy throughout the State. Such groups also expand the base of knowledge and ability to make large scale improvement in reading statewide.

PARTNERSHIPS AT THE LOCAL LEVEL

The Committee understands that schools are not the only source of reading assistance for children. Many community-based organizations devote many hours to providing reading assistance to children and their families. These efforts, if provided in conjunction with high quality reading instruction in the child's home school, can improve the ability of a child to learn to read. The Committee wants to encourage such partnerships and requires local educational agencies seeking funds under this Act to form a partnership with one or more community-based organizations which have established a record of effectiveness with respect to reading readiness, reading instruction for children in kindergarten through 3rd grade and early childhood literacy. The Committee believes such partnerships will enhance the effectiveness of any reading reforms in the school as long as personnel from such organizations are trained in the same reading models based on reliable, replicable research on reading as those used by the school.

The Committee also provides a priority in funding for those local educational agencies which form a partnership with one or more Head Start Programs or one or more State or federally-funded preschool programs or family literacy programs. The Committee believes relationships between schools and early childhood programs can provide children with important reading readiness skills which help ensure they will learn to read once they enter school.

TUTORIAL ASSISTANCE GRANTS

The Committee notes that despite the efforts of schools, teachers, and parents, many children fail to grasp the basic concepts and skills necessary to read. In light of this fact, this legislation provides reading instruction opportunities for children with reading difficulties who are less likely to receive additional help because they live in high-poverty neighborhoods.

Under this Act, each State receiving a grant must use a portion of their funds to provide subgrants to local educational agencies for use by schools within Enterprise Communities and Empowerment Zones (or, in the case where a State has no such designated jurisdiction, Title I schools in school improvement). Parents with children who have reading difficulties and who attend these schools will have the opportunity to apply for tutorial assistance grants to offset the cost of sending their child to a reading tutor.

This Committee feels that it is important that tutoring assistance under this Act be of high quality and include linkages to what
is being taught to children during school. These objectives are accomplished through several means. Under the legislation, all tutors must be deemed eligible by the local education agency which compiles and maintains a list of qualified tutors. In order to be placed on this list, tutors must have a proven track record in reading readiness, early childhood literacy and reading instruction for children in grades K–3 and must commit to providing instruction based upon reliable, replicable research on reading.

Quality will also be driven by parents who, under this Act, are empowered to choose a tutor for their child from among the list maintained by the LEA. Tutors that are unsuccessful in teaching reading, even if they are able to remain on the list compiled by the LEA, will eventually be identified by parents and teachers by word of mouth or through other more formal means, as being ineffective. Whereas tutors who are able to provide quality reading instruction will quickly be referred by other parents and teachers. In essence, this structure builds positive competition among tutors and will result in more children gaining access to quality tutors and in more children being able to read.

ACCOUNTABILITY/EVALUATION

A major goal of this Committee has been to ensure that federally funded programs are built upon a system of accountability. Under the Reading Excellence Act, this accountability begins with the use of findings from reliable, replicable research. Specifically, this research must be used in supporting activities related to in-service instruction; family literacy programs; and for individuals such as tutors, who provide additional reading instruction to school children.

Accountability under this legislation is also built in through evaluations. Specifically, funds are available for the Secretary to carry out a national evaluation. The Committee strongly emphasizes the requirement that the Secretary, in developing the criteria for the assessment, receive recommendations from the peer review panel. The Committee stresses the need for this joint effort as a way to ensure the utmost amount of objectivity in the design and conduct of this evaluation. In addition to the national evaluation, each Reading and Literacy Partnership receiving funds under this Act is required to use a portion of their funding to evaluate the success of subgrantees in meeting the objectives of this Act. The Committee emphasizes that among the most important of these objectives is the extent to which subgrantees have improved the reading skills of students.

Under the legislation, Reading and Literacy Partnerships are directed to enter into contracts with eligible research institutions (defined as institutions of higher education which have conducted reliable, replicable research) to carry out State evaluations. The Committee believes that these institutions, by virtue of their work in this field, are well positioned to work with these Partnerships in evaluating reading and literacy programs.

INFORMATION DISSEMINATION

As detailed previously in this report, throughout hearings held on the topic of literacy, this Committee heard a consistent message
from witnesses, especially teachers, about the profound lack of information provided to reading instructors on the fundamental basics in teaching children to read. This, despite the millions of federal taxpayer dollars which have been spent in researching the topic.

This legislation addresses this issue by instructing the National Institute for Literacy (NIFL) to disseminate materials on reliable, replicable, research on reading and information on successful projects funded under this Act, to all recipients receiving funds under Federal programs such as Title I, IDEA, Head Start, and the Adult Education Act. Though not all States, and certainly not all schools, will receive funding under the Local Reading Improvement subgrants, this legislation, through the dissemination of the important research, can benefit all schools receiving federal assistance.

The Committee recognizes that there are currently several efforts to convene panels to assess the status of research-based knowledge on reading development, including the effectiveness of various approaches to teaching children to read. The NIFL is instructed to work with these panels in determining the criteria for judging what constitutes reliable, replicable research on reading and for developing strategies for disseminating such information. In carrying out such strategies, the Committee stresses the need for NIFL to coordinate with existing educational information networks in order to avoid possible duplication of effort.

The Committee notes that the NIFL, which is an independent agency that works with and for the Departments of Education; Health and Human Services; and Labor, has been charged with several new significant duties and responsibilities. This is largely based upon the fact that NIFL's mission is completely focused on the issue of literacy, and it has already been working on developing materials reflecting best practices in reading through its National Adult Literacy and Learning Disabilities Center. In addition, NIFL has already established a state-of-the-art Internet-based communication and information system (LINCS). LINCS has a presence in all fifty states and has the capacity to be expanded to meet the requirements of the proposed reading initiative. This is in addition to NIFL's support of a nationwide toll-free number and clearinghouse for the distribution of print products.

Based upon the past and current reading and literacy activities of the NIFL, the Committee believes they are well positioned to take on the additional responsibilities as directed under this legislation.

AMENDMENTS TO EVEN START

In 1995, the Department of Education released an evaluation of the Even Start program.

One of the most disappointing aspects of the report was the finding that the gains made by Even Start families were not much more than those similar families would obtain for themselves using available services, except in those projects which offered intensive services. In 1996, as a part of the appropriations bill for the District of Columbia, the Act was modified to require more “intensive” services.
The Committee feels very strongly that children whose parents are their first and most important teacher and who play an active role in their education are more likely to succeed in school. The Even Start Family Literacy Program is a voluntary family literacy program that provides parents with the academic and parenting skills they need to play a key role in their child's education.

Although the 1995 report was disappointing, a more recent report confirmed the positive outcomes for individuals participating in high quality Even Start Family Literacy programs providing intensive services. This report, compiled by the National Center for Family Literacy, found that, in all grades, Even Start children are achieving results at or above their peers. This finding is particularly important because children from homes where one or more of their parents have low levels of literacy, generally do not perform as well as their more advantaged peers. Sixty-two percent of the adults in the study received their GED or high-school certification. In addition, 45 percent of participants either reduced or eliminated their reliance on public assistance.

It is the hope of the Committee that all Even Start Programs can offer the same high quality, intensive services in order to ensure positive outcomes for program participants. As such, the Reading Excellence Act contains several changes which the Committee believes will strengthen the current program.

First, and most important, the Committee has added language requiring States receiving Even Start funds to develop indicators of program quality to be used to monitor, evaluate and improve programs within the state. This will provide states with tools by which to judge the quality of local Even Start Projects. States are also permitted to refuse additional funding to local grantees which are not making satisfactory progress in meeting the quality indicators if the State has provided them with technical assistance and they still fail to improve program quality.

An additional effort to raise the quality of Even Start Programs is a requirement for the dissemination of information on the components of successful family literacy programs. The legislation requires the Secretary to carry out (through grant or contract), research in the components of successful family literacy services and to disseminate the results to federal programs which carry out family literacy activities to be used as models for new programs or to improve the quality of existing programs. There are a variety of federal programs which encourage the use of the Even Start Family Literacy model, when appropriate, such as the Title 1 program, the Bilingual Education Act and the Migrant Education Program. The Committee understands that the National Center on Family Literacy has carried out an extensive review of the components of quality family literacy programs and would encourage the Department to work with the Center in carrying out this research.

The Committee has also included a definition of family literacy services in the Even Start Family Literacy Program. This same definition appears in Title 1 of the Reading Excellence Act. This definition clarifies that family literacy programs are to be carried out on a voluntary basis. In addition, the Committee would like to clarify that the term "parent" includes other "appropriate caregivers" who may be responsible for a child's education. This
could include grandparents, foster parents, etc. The word parent is not intended to limit participation by other individuals closely involved in a child’s education. In addition, the Committee would like to point out that the example of making sustainable changes in a family, i.e. reducing welfare dependency, does not mean states or locals should be judged on their ability to reduce welfare dependency among participants who are not currently welfare recipients.

Finally, the Committee believes that the family literacy model can play an important role in reducing reading difficulties in young children and would like to see States use other federal, state and local funds to carry out such programs. As such, the Committee provides that in addition to the funds available for this initiative, $10 million of the funds available for this initiative go to the Even Start Family Literacy Program to be used to award grants to states to enable them to plan and implement statewide family literacy initiatives by coordinating and integrating existing federal, state and local literacy resources. In order to ins sure that such activities are consistent with high quality family literacy programs, the Committee requires the Secretary to provide technical assistance to such states, either directly or through a grant or contract.

CHANGES TO THE COLLEGE WORK STUDY PROGRAM

The College Work Study Program found in Part C of the Higher Education Act of 1965 is amended to expand tutoring services provided by institutions of higher education. The amendment included in this legislation is closely patterned after the language adopted in the 1992 Amendments to the Higher Education Act designed to promote increased community service activities on the part of institutions of higher education. Similar to the current community service requirements, institutions of higher education will be required to use a portion of their work study funds to compensate students engaged (1) as reading tutors for children in preschool through elementary school; and (2) in family literacy projects.

Institutions of higher education will be required to use at least 2% of their annual work study allotment to compensate students engaged in these activities. Based on the Fiscal Year 1997 funding level of $830 million, this requirement would result in approximately $16 million being dedicated to tutoring and literacy activities. In order to assist students and institutions in meeting any training and travel related costs, institutions will be allowed to use their work study funds to compensate students for time spent in training and travel directly related to the tutoring and family literacy activities. In addition, the Federal share of the compensation of work study students compensated under this provision may exceed 75 percent in order to encourage widespread participation on the part of institutions and students in these activities. Furthermore, in order to avoid any hardship for students at a particular institution, the Secretary has the authority to waive the requirements of this provision.

In using funds allotted under this provision, institutions of higher education are to give priority to the employment of students in tutoring services in schools identified for school improvement under the Elementary and Secondary Education Act or in schools receiving a subgrant from funds authorized under this legislation. Work
study students who are providing tutoring services in a school receiving a subgrant under this legislation are to be trained in the instructional practices based on reliable, replicable research on reading used by the school.

The Amendment in the Nature of a Substitute is explained in this report.

**OVERSIGHT FINDINGS OF THE COMMITTEE**

In compliance with clause 2(l)(3)(A) of rule XI of the Rules of the House of Representatives and clause 2(b)(1) of rule X of the Rules of the House of Representatives, the Committee's oversight findings and recommendations are reflected in the body of this report.

**GOVERNMENT REFORM AND OVERSIGHT**

With respect to the requirement of clause 2(l)(3)(D) of rule XI of the Rules of the House of Representatives, the Committee has received no report of oversight findings and recommendations from the Committee on Government Reform and Oversight on the subject of H.R. 2614.

**COMMITTEE ESTIMATE**

Clause 7 of rule XIII of the Rules of the House of Representatives requires an estimate and a comparison by the Committee of the costs which would be incurred in carrying out H.R. 2614. However, clause 7(d) of that rule provides that this requirement does not apply when the Committee has included in its report a timely submitted cost estimate of the bill prepared by the Director of the Congressional Budget Office under section 403 of the Congressional Budget Act of 1974.

**CONSTITUTIONAL AUTHORITY**

The Elementary and Secondary Education Act of 1965 and the amendments made by H.R. 2614, are Constitutional under the spending clause of the constitution, Article I section 8, clause 1.

**APPLICATION OF LAW TO LEGISLATIVE BRANCH**

Section 102(b)(3) of Public Law 104–1 requires a description of the application of this bill to the legislative branch. This bill provides funds to States for programs and services to eligible recipients; the bill does not prohibit legislative branch employees from otherwise being eligible for such services.

**UNFUNDED MANDATE STATEMENT**

Section 423 of the Congressional Budget and Impoundment Control Act requires a statement of whether the provisions of the reported bill include unfunded mandates. The Committee received a letter regarding unfunded mandates from the Director of the Con-
gressional Budget Office and as such the Committee agrees that the bill does not contain any unfunded mandates. See infra.

BUDGET AUTHORITY AND CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

With respect to the requirement of clause 2(l)(3)(B) of rule XI of the House of Representatives and section 308(a) of the Congressional Budget Act of 1974 and with respect to requirements of clause 2(l)(3)(C) of rule XI of the House of Representatives and section 403 of the Congressional Budget Act of 1974, the Committee has received the following cost estimate for H.R. 2614 from the Director of the Congressional Budget Office:

U.S. CONGRESS,

House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the enclosed cost estimate for H.R. 2614, the Reading Excellence Act of 1997.

If you wish further details on this estimate, we will be pleased to provide them. The CBO staff contacts are Justin Latus and Christina Hawley Sadoti.

Sincerely,

JAMES L. BLUM
(For June E. O'Neill, Director).

Enclosure.

H.R. 2614—Reading Excellence Act of 1997

Summary: H.R. 2614 would amend the Elementary and Secondary Education Act of 1965 to establish grants to states for reading programs and would authorize to be appropriated for this purpose $260 million in each of fiscal years 1998, 1999, and 2000. In addition, the bill would repeal several education programs, none of which has received appropriations in recent years. With three exceptions, these programs are not currently authorized. The three currently authorized programs are: special programs and projects to improve education opportunities for Indian children, the De Lugo territorial education improvement program, and general territorial assistance to the Virgin Islands. Authorizations for these three programs total $11 million in each of fiscal years 1998 and 1999. Enacting this bill, therefore, would result in a net increase of authorizations of $249 million in 1998 and 1999 and $260 million in 2000. Actual funding for these authorizations would be subject to the annual appropriations process; pay-as-you-go procedures would not apply.

This bill contains no private-sector or intergovernmental mandates as defined in the Unfunded Mandates Reform Act of 1995 (UMRA) and would impose no costs on state, local, or tribal governments.
Estimated cost to the Federal Government: Increases in authorizations are shown in the following table, assuming that H.R. 2614 is enacted by November 15, 1997. The costs of this legislation fall within budget function 500 (Education, Employment, Training, and Social Services).

Basis of estimate: Title I of H.R. 2614 would authorize to be appropriated $260 million in each of fiscal years 1998, 1999, and 2000 for providing grants to states to improve the reading skills of children and families. The bill would require the National Institute of Literacy to convene a peer review panel that would evaluate grant applications submitted by state reading and literacy partnerships and make funding recommendations to the Secretary of Education. Of the total authorizations, $75,000 would be reserved to compensate non-federal members of this panel. Based on the panel's recommendations, the Secretary would make three-year grants to the partnerships, which, in turn, would use at least 95 percent of the funds received to make subgrants to local educational agencies. These subgrants would fall under two categories: local reading improvement and tutorial assistance.

The bill reserves for the Secretary 1.5 percent of the amount authorized to be appropriated (about $4 million annually) to conduct a national assessment of programs under this title. This title also would direct the National Institute for Literacy to disseminate information on reliable, replicable research on reading and information on subgrantee projects and would reserve $5 million of total authorizations to be used for this purpose.

Title II of the bill would reserve $10 million of the amount authorized under Title I to carry out programs under the Even Start family literacy program. These funds would have to be matched with an equal amount of non-federal contributions in order for a state to receive funding under this title.

Assuming that the reading grants would follow the same outlay patterns as other programs authorized under the Elementary and Secondary Education Act of 1965 and that appropriations are made accordingly, Titles I and II would result in an increase in outlays

Title III would require higher education institutions to use at least two percent of funds authorized for work study programs on tutoring and literacy activities. This requirement could be waived at the Secretary’s discretion. CBO anticipates that this provision would have no impact on the federal budget.

Title IV of the bill would repeal authorizations of several education programs, none of which is funded currently. Three of the programs to be repealed are authorized to receive appropriations in fiscal years 1998 and 1999, however. Authorizations for these three programs (special programs and projects to improve education opportunities for Indian children, the De Lugo territorial education improvement program, and general territorial assistance to the Virgin Islands) total $11 million in each of fiscal years 1998 and 1999. Repealing these authorizations would reduce outlays by $1 million in fiscal year 1998 and by $22 million over the 1998–2002 period.

Pay-as-you-go considerations: None

Intergovernmental and private-sector impact: H.R. 2614 contains no intergovernmental or private sector mandates as defined in UMRA and would impose no costs on state, local, or tribal governments. Any requirements on states and local education agencies would be conditions for receiving federal assistance under the programs authorized in the bill. The bill would authorize new appropriations for Reading Grants under the Elementary and Secondary Education Act of 1965. CBO estimates that under H.R. 2614, states and local education agencies would receive $241 million annually in grants for fiscal years 1998 to 2000. The bill would also require public institutions of higher education to reserve 2 percent of their Work-Study funds for tutoring and literacy activities.

Estimate prepared by: Federal cost: Justin Latus and Christina Hawley Sadoti; Impact on State, local, and tribal governments; Marc Nicole; Impact on the private sector: Nabeel Alsalam.

Estimate approved by: Paul N. Van de Water, Assistant Director for Budget Analysis.

TITLE X—PROGRAMS OF NATIONAL SIGNIFICANCE

[PART H—DE LUGO TERRITORIAL EDUCATION IMPROVEMENT PROGRAM]

[SEC. 10801. FINDINGS AND PURPOSES.]
(a) FINDINGS.—The Congress finds that—
(i) the attainment of a high quality education is important to a society and to each individual;
(ii) it is the policy of the United States that all citizens have a fair opportunity to receive a high quality education;
(iii) such opportunity should extend to United States citizens and nationals residing in the outlying areas;
(iv) reports show that the outlying areas have repeatedly placed last in national education tests which measure knowledge in core subject areas;
(v) all students must realize their potential if the United States is to prosper; and
(vi) students in the outlying areas require additional assistance if such students are to obtain the high standards established for all students in the United States.

(b) PURPOSES.—The purpose of this part is to authorize an education improvement program for the outlying areas which will assist in developing programs which will enhance student learning, increase the standard of education, and improve the performance levels of all students.

[SEC. 10802. GRANT AUTHORIZATION.]
The Secretary is authorized to make grants to the outlying areas to fund innovative education improvement programs which will increase student learning.

[SEC. 10803. CONSTRUCTION.]
No funds from a grant under section 10802 may be used for construction.

[SEC. 10804. AUTHORIZATION OF APPROPRIATIONS.]
There are authorized to be appropriated to carry out this subpart $3,000,000 for each of the fiscal years 1994 through 1999.

[PART L—THE EXTENDED TIME FOR LEARNING AND LONGER SCHOOL YEAR]

[SEC. 10993. THE EXTENDED TIME FOR LEARNING AND LONGER SCHOOL YEAR.]
(a) FINDINGS.—The Congress finds that—
(i) the Commission on Time and Learning has found that—
(ii) realizing the third National Education Goal, that states all students will leave grades four, eight and twelve
having demonstrated competency in challenging subject matter, including English, mathematics, science, foreign languages, civics and government, economics, arts, history, and geography, will require considerably more common core learning time than most students now receive;

(B) ensuring that all students learn to high standards will require flexibility and innovation in the use of common core learning time, as well as the rest of the time students spend both during and beyond the school day;

(C) teachers need regular, sustained time for lesson development, collegial collaboration and other professional development;

(D) schools, businesses, community-based organizations, tribal leaders, and other community agencies and members should work together to foster effective learning and enrichment programs and activities for students, including programs that operate outside of the regular school day or year;

(E) for most students in the United States, the school year is 180 days long. In Japan students go to school 243 days per year, in Germany students go to school 240 days per year, in Austria students go to school 216 days per year, in Denmark students go to school 200 days per year, and in Switzerland students go to school 195 days per year; and

(F) in the final four years of schooling, students in schools in the United States are required to spend a total of 1,460 hours on core academic subjects, less than half of the 3,528 hours so required in Germany, the 3,280 hours so required in France, and the 3,170 hours so required in Japan;

(2) increasing the amount and duration of intensive, engaging and challenging learning activities geared to high standards can increase student motivation and achievement;

(3) the benefits of extending learning time, including common core instructional time, can be maximized by concurrent changes in curriculum and instruction, such as accelerated learning, and engaging, interactive instruction based on challenging content;

(4) maximizing the benefit of increased common core and other learning time will require the collaboration and cooperation of teachers and administrators, students, parents, community members and organizations, businesses and others to develop strategies to meet the needs of students during and beyond the school day and year;

(5) a competitive world economy requires that students in the United States receive education and training that is at least as rigorous and high-quality as the education and training received by students in competitor countries;

(6) despite our Nation’s transformation from a farm-based economy to one based on manufacturing and services, the school year is still based on the summer needs of an agrarian economy;
American students’ lack of formal schooling is not counterbalanced with more homework. The opposite is true, as half of all European students report spending at least two hours on homework per day, compared to only 29 percent of American students. Twenty-two percent of American students watch five or more hours of television per day, while less than eight percent of European students watch that much television.

more than half of teachers surveyed in the United States cite “children who are left on their own after school” as a major problem;

over the summer months, disadvantaged students not only fail to advance academically, but many forget much of what such students had learned during the previous school year;

funding constraints as well as the strong pull of tradition have made extending the school year difficult for most States and school districts; and

experiments with extended and multi-track school years have been associated with both increased learning and more efficient use of school facilities.

(b) PURPOSES.—It is the purpose of this part to—

provide seed money to schools and local educational agencies to enable such agencies to devise and implement strategies and methods for upgrading the quality of, and extending, challenging, engaging learning time geared to high standards for all students; and

allow the Secretary to provide financial incentives and assistance to States or local educational agencies to enable such States or agencies to substantially increase the amount of time that students spend participating in quality academic programs, and to promote flexibility in school scheduling.

(c) PROGRAM AUTHORIZED.—

I N GENERAL.—The Secretary is authorized to award grants to local educational agencies having applications approved under subsection (d) to enable such agencies to carry out the authorized activities described in subsection (e) in public elementary and secondary schools.

AMOUNT.—The Secretary shall, to the extent practicable, provide an equitable distribution of grants under this section.

DURATION.—Each grant under subsection (a) shall be awarded for a period of not more than three years.

PRIORITY.—The Secretary shall give priority to awarding grants under this part to local educational agencies that serve schools with high percentages of students in poverty.

APPLICATION.—Each local educational agency desiring a grant under this section shall submit an application to the Secretary at such time, in such manner, and accompanied by such information as the Secretary may require. Each such application shall describe—

the activities for which assistance is sought;

any study or other information-gathering project for which funds will be used;
(3) strategies and methods the applicant will use to enrich and extend learning time for all students and to maximize the percentage of common core learning time in the school day, such as block scheduling, team teaching, longer school days or years, and extending learning time through new distance-learning technologies;
(4) the strategies and methods the applicant will use, including changes in curriculum and instruction, to challenge and engage students and to maximize the productiveness of common core learning time, as well as the total time students spend in school and in school-related enrichment activities;
(5) the strategies and methods the applicant intends to employ to provide continuing financial support for the implementation of any extended school day or school year;
(6) with respect to any application seeking assistance for activities described under subsection (e)(4), a description of any feasibility or other studies demonstrating the sustainability of a longer school year;
(7) the extent of involvement of teachers and other school personnel in investigating, designing, implementing and sustaining the activities assisted under this part;
(8) the process to be used for involving parents and other stakeholders in the development and implementation of the activities assisted under this part;
(9) any cooperation or collaboration among public housing authorities, libraries, businesses, museums, community-based organizations, and other community groups and organizations to extend engaging, high-quality, standards-based learning time outside of the school day or year, at the school or at some other site;
(10) the training and professional development activities that will be offered to teachers and others involved in the activities assisted under this part;
(11) the goals and objectives of the activities assisted under this part, including a description of how such activities will assist all students to reach State standards;
(12) the methods by which the applicant will assess progress in meeting such goals and objectives; and
(13) how the applicant will use funds provided under this part in coordination with other funds provided under this Act or other Federal laws.

(e) AUTHORIZED ACTIVITIES.—Funds under this section may be used—
(1) to study the feasibility of, and effective methods for, extending learning time within or beyond the school day or year, including consultation with other schools or local educational agencies that have designed or implemented extended learning time programs;
(2) to conduct outreach to and consult with community members, including parents, students, and other stakeholders, such as tribal leaders, to develop a plan to extend learning time within or beyond the school day or year;
(3) to develop and implement an outreach strategy that will encourage collaboration with public housing authorities, librar-
ies, businesses, museums, community-based organizations, and other community groups and organizations to coordinate challenging, high-quality educational activities outside of the school day or year;

(i)(4) to support public school improvement efforts that include expansion of time devoted to core academic subjects and the extension of the school year to 210 days;

(i)(5) to research, develop and implement strategies, including changes in curriculum and instruction, for maximizing the quality and percentage of common core learning time in the school day and extending learning time during or beyond the school day or year;

(i)(6) to provide professional development for school staff in innovative teaching methods that challenge and engage students, and also increase the productivity of extended learning time; and

(i)(7) to develop strategies to include parents, business representatives, and other community members in the extended time activities, especially as facilitators of activities that enable teachers to have more time for planning, individual student assistance, and professional development activities.

(f) DEFINITIONS.—For the purpose of this section the term “common core learning time” means high-quality, engaging instruction in challenging content in each of the following core academic subjects described in the third National Education Goal:

(f)(1) English.

(f)(2) Mathematics.

(f)(3) Science.

(f)(4) Foreign languages.

(f)(5) Civics and government.

(f)(6) Economics.

(g)(2) DIVERSITY.—In awarding grants under this section the Secretary shall ensure that such grants are awarded to a diversity of local educational agencies, including such agencies that serve rural and urban areas.

(h) APPROPRIATIONS AUTHORIZATION.—

(h)(1) IN GENERAL.—For the purpose of carrying out this section there are authorized to be appropriated $90,000,000 for fiscal year 1995 and such sums as may be necessary for each of the four succeeding fiscal years.

(h)(2) LIMITATION.—Not less than 80 percent of any amount appropriated under paragraph (1) shall be made available to applicants seeking to extend their school year to not fewer than 210 days.

(5) Most of these youths can be diverted from a life of crime into productive citizenship with available educational, vocational, work skills, and related service programs.

(6) If not involved with educational programs while incarcerated, almost all of these youths will return to a life of crime upon release.

(7) The average length of sentence for a youth offender is about 3 years. Time spent in prison provides a unique opportunity for education and training.

(8) Even with quality education and training provided during incarceration, a period of intense supervision, support, and counseling is needed upon release to ensure effective reintegration of youth offenders into society.

(9) Research consistently shows that the vast majority of incarcerated youths will not return to the public schools to complete their education.

(10) There is a need for alternative educational opportunities during incarceration and after release.

(b) DEFINITION.—For purposes of this part, the term “youth offender” means a male or female offender under the age of 25, who is incarcerated in a State prison, including a prerelease facility.

(c) GRANT PROGRAM.—The Secretary shall establish a program in accordance with this section to provide grants to the State correctional education agencies to assist and encourage incarcerated youths to acquire functional literacy, life, and job skills, through the pursuit of a postsecondary education certificate, or an associate of arts or bachelor's degree while in prison, and employment counseling and other related services which start during incarceration and continue through prerelease and while on parole.

(d) APPLICATION.—To be eligible for a grant under this section, a State correctional education agency shall submit to the Secretary a proposal for a youth offender program that—
(1) identifies the scope of the problem, including the number of incarcerated youths in need of postsecondary education and vocational training;
(2) lists the accredited public or private educational institution or institutions that will provide postsecondary educational services;
(3) lists the cooperating agencies, public and private, or businesses that will provide related services, such as counseling in the areas of career development, substance abuse, health, and parenting skills;
(4) describes the evaluation methods and performance measures that the State correctional education agency will employ, provided that such methods and measures are appropriate to meet the goals and objectives of the proposal, and that such methods and measures include measures of—
(A) program completion;
(B) student academic and vocational skill attainment;
(C) success in job placement and retention; and
(D) recidivism;
(5) describes how the proposed programs are to be integrated with existing State correctional education programs (such as adult education, graduate education degree programs, and vocational training) and State industry programs;
(6) addresses the educational needs of youth offenders who are in alternative programs (such as boot camps); and
(7) describes how students will be selected so that only youth offenders eligible under subsection (f) will be enrolled in postsecondary programs.

(e) PROGRAM REQUIREMENTS.—Each State correctional education agency receiving a grant under this section shall—
(1) integrate activities carried out under the grant with the objectives and activities of the school-to-work programs of such State, including—
(A) work experience or apprenticeship programs;
(B) transitional worksite job training for vocational education students that is related to the occupational goals of such students and closely linked to classroom and laboratory instruction;
(C) placement services in occupations that the students are preparing to enter;
(D) employment-based learning programs; and
(E) programs that address State and local labor shortages;
(2) annually report to the Secretary and the Attorney General on the results of the evaluations conducted using the methods and performance measures contained in the proposal; and
(3) provide to each State for each student eligible under subsection (f) not more than $1,500 annually for tuition, books, and essential materials, and not more than $300 annually for related services such as career development, substance abuse counseling, parenting skills training, and health education, for each eligible incarcerated youth.
[f) STUDENT ELIGIBILITY.—A youth offender shall be eligible for participation in a program receiving a grant under this section if the youth offender—

[(1) is eligible to be released within five years (including a youth offender who is eligible for parole within such time); and
[(2) is 25 years of age or younger.

[g) LENGTH OF PARTICIPATION.—A State correctional education agency receiving a grant under this section shall provide educational and related services to each participating youth offender for a period not to exceed 5 years, 1 year of which may be devoted to study in a graduate education degree program or to remedial education services for students who have obtained a secondary school diploma. Educational and related services shall start during the period of incarceration in prison or prerelease and may continue during the period of parole.

[h) EDUCATION DELIVERY SYSTEMS.—State correctional education agencies and cooperating institutions shall, to the extent practicable, use high-tech applications in developing programs to meet the requirements and goals of this section.

[i) ALLOCATION OF FUNDS.—From the amounts appropriated pursuant to subsection (j), the Secretary shall allot to each State an amount that bears the same relationship to such funds as the total number of students eligible under subsection (f) in such State bears to the total number of such students in all States.

[j) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section $5,000,000 for fiscal year 1995 and such sums as may be necessary for fiscal year 1996 and each of the four succeeding fiscal years.]

(1) the local community, when properly organized and challenged, is one of the best sources of academic support, motivation toward achievement, and financial resources for aspiring postsecondary students;
(2) local communities, working to complement or augment services currently being offered by area schools and colleges, can raise the educational expectations and increase the rate of postsecondary attendance of their youth by forming locally based organizations that provide both academic support (including guidance, counseling, mentoring, tutoring, encouragement, and recognition) and tangible, locally raised, effectively targeted, publicly recognized financial assistance;
(3) proven methods of stimulating these community efforts can be promoted through Federal support for the establish-
ment of area program centers to organize and challenge community efforts to develop educational incentives and support for local students; and

(4) using Federal funds to leverage private contributions to help students from low-income families attain educational and career goals is an efficient and effective investment of scarce taxpayer-provided resources.

Sec. 303. (a) For the purpose of making grants and entering into contracts under this section, there are authorized to be appropriated such sums as may be necessary for each of the fiscal years 1993 through 1997.

(b)(1) The Commissioner is authorized to make grants to States and public or nonprofit organizations and agencies to pay up to 90 per centum of the cost of projects for providing vocational rehabilitation services or employment support services to individuals with disabilities, especially those with the most severe disabilities, in public or nonprofit community rehabilitation programs.

(2)(A) For purposes of this section, vocational rehabilitation services shall include—

(i) training with a view toward career advancement;

(ii) training (including on-the-job training) in occupational skills; and

(iii) services, including rehabilitation technology services, personal assistance services, and supported employment services and extended services, that—

(I) are related to training described in clause (i) or (ii); and

(II) are required by the individual to engage in such training.

(B) Pursuant to regulations, payment of weekly allowances may be made to individuals receiving vocational rehabilitation services and related services under this section. Such allowances may not be paid to any individual for any period in excess of two years. In determining the amount of such allowances for any individual, consideration shall be given to the individual's need for such an allowance, including any expenses reasonably attributable to receipt of
vocational rehabilitation services, the extent to which such an allowance will help assure entry into and satisfactory completion of training, and such other factors, specified by the Commissioner, as will promote such individual's capacity to engage in competitive employment.

(3) The Commissioner may make a grant for a project pursuant to this subsection only if the Commissioner determines that (A) the purpose of such project is to prepare individuals with disabilities, especially those with the most severe disabilities, for competitive employment, or to place or retain such individual in competitive employment, including supported employment; (B) the individuals to receive vocational rehabilitation services under such project will include only those who have been determined to be in need of such vocational rehabilitation services by the State agency or agencies designated as provided in section 101(a)(1) of the State in which the community rehabilitation program is located; (C) the full range of vocational rehabilitation services will be made available to each such individual, to the extent of that individual's need for such services; and (D) the project, including the participating community rehabilitation program and the vocational rehabilitation services provided, meets such other requirements as the Commissioner may prescribe in regulations for carrying out the purposes of this subsection.

(d)(1) The Commissioner is authorized to make grants to public or nonprofit community rehabilitation programs, or to an organization or combination of such programs, to pay the Federal share of the cost of projects to analyze, improve, and increase their professional services to individuals with disabilities, their management effectiveness, or any other part of their operations affecting their capacity to provide employment and services for such individuals.

(2) No part of any grant made pursuant to this subsection may be used to pay costs of acquiring, constructing, expanding, remodeling, or altering any building.

LOAN GUARANTEES FOR COMMUNITY REHABILITATION PROGRAMS

SEC. 304. (a) It is the purpose of this section to assist and encourage the provision of needed community rehabilitation programs for individuals with disabilities primarily served by State rehabilitation programs.

(b) The Commissioner may, under special circumstances and in accordance with this section and subject to section 306, guarantee the payment of principal and interest on loans made to nonprofit private entities by non-Federal lenders and by the Federal Financing Bank for the construction of facilities for community rehabilitation programs, including equipment used in their operation.

(c) In the case of a guarantee of any loan to a nonprofit private entity under this section, the Commissioner shall pay, to the holder of such loan and for and on behalf of the project for which the loan
was made, amounts sufficient to reduce by 2 percent per annum the net effective interest rate otherwise payable on such loan. Each holder of a loan which is guaranteed under this section shall have a contractual right to receive from the United States interest payments required by the preceding sentence.

(d) The cumulative total of the principal of the loans outstanding at any time with respect to which guarantees have been issued, or which have been directly made, may not exceed $100,000,000.

(e)(1) The Commissioner may not approve a loan guarantee for a project under this section unless the Commissioner determines that (A) the terms, conditions, security (if any), and schedule and amount of repayments with respect to the loan are sufficient to protect the financial interests of the United States and are otherwise reasonable, including a determination that the rate of interest does not exceed such per centum per annum on the principal obligation outstanding as the Commissioner determines to be reasonable, taking into account the range of interest rates prevailing in the private market for similar loans and the risks assumed by the United States, and (B) the loan would not be available on reasonable terms and conditions without the guarantee under this section.

(2)(A) The United States shall be entitled to recover from the applicant for a loan guarantee under this section the amount of any payment made pursuant to such guarantee, unless the Commissioner for good cause waives such right of recovery. Upon making any such payment, the United States shall be subrogated to all of the rights of the recipient of the payments with respect to which the guarantee was made.

(B) To the extent permitted by subparagraph (C), any terms and conditions applicable to a loan guarantee under this section (including terms and conditions imposed under paragraph (1)) may be modified by the Commissioner to the extent considered consistent with the interests of the United States.

(C) Any loan guarantee made by the Commissioner under this section shall be incontestable (i) in the hands of an applicant on whose behalf such guarantee is made unless the applicant engaged in fraud or misrepresentation in securing such guarantee, and (ii) as to any person (or a successor in interest) who makes or contracts to make a loan to such applicant in reliance thereon unless such person (or a successor in interest) engaged in fraud or misrepresentation in making or contracting to make such loan.

(D) Guarantees of loans under this section shall be subject to such further terms and conditions as the Commissioner considers necessary to assure that the purposes of this section will be achieved.

(f)(1) There is established in the Treasury a loan guarantee fund (hereinafter in this subsection referred to as the “fund”) which shall be available to the Commissioner without fiscal year limitation, in such amounts as may be specified from time to time in appropriation Acts—

(A) to enable the Commissioner to discharge the responsibilities under loan guarantees issued under this section; and

(B) for payment of interest under subsection (c) on loans guaranteed under this section.
There are authorized to be appropriated such amounts as may be necessary to provide the sums required for the fund. There shall also be deposited in the fund amounts received by the Commissioner in connection with loan guarantees under this section and other property or assets derived by the Commissioner from operations respecting such loan guarantees, including any money derived from the sale of assets.

(2)(A) If at any time the sums in the fund are insufficient to enable the Commissioner—
   (i) to make payments of interest under subsection (c); or
   (ii) to otherwise comply with guarantees under this section of loans to nonprofit private entities;
the Commissioner is authorized to issue to the Secretary of the Treasury notes or other obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions, as may be prescribed by the Commissioner with the approval of the Secretary of the Treasury.

(B) Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the notes or other obligations.

(C) The Secretary of the Treasury shall purchase any notes and other obligations issued under this paragraph, and for that purpose the Secretary may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act. The purposes for which securities may be issued under that Act are extended to include any purchase of such notes and obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by the Secretary under this paragraph. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as a public debt transaction of the United States.

(D) Sums borrowed under this paragraph shall be deposited in the fund and redemption of such notes and obligations shall be made by the Commissioner from the fund.

[COMPREHENSIVE REHABILITATION CENTERS]

SEC. 305. (a)(1) In order to provide a focal point in communities for the development and delivery of services designed primarily for individuals with disabilities, the Commissioner may make grants to any designated State unit to establish and operate comprehensive rehabilitation centers. The centers shall be established in order to provide a broad range of services to individuals with disabilities, including information and referral services, counseling services, and job placement, health, educational, social, and recreational services, as well as to provide facilities for recreational activities.

(2) To the maximum extent practicable, such centers shall provide, upon request, to local governmental units and other public and private nonprofit entities located in the area such information and technical assistance (including support personnel such as interpreters for individuals who are deaf) as may be necessary to assist those entities in complying with this Act, particularly the requirements of section 504.
(b) No grant may be made under this section unless an application therefor has been submitted to and approved by the Commissioner. The Commissioner may not approve an application for a grant unless the application—

(1) contains assurances that the designated State unit will use funds provided by such grant in accordance with subsections (c) and (d); and

(2) contains such other information, and is submitted in such form and in accordance with such procedures, as the Commissioner may require.

(c)(1) The designated State unit may—

(A) in accordance with subsection (e) make grants to units of general purpose local government or to other public or nonprofit private agencies or organizations and may make contracts with any agency or organization to pay not to exceed 80 percent of the cost of—

(i) leasing facilities to serve as comprehensive rehabilitation centers;

(ii) expanding, remodeling, or altering facilities to the extent necessary to adapt them to serve as comprehensive rehabilitation centers;

(iii) operating such centers; or

(iv) carrying out any combination of the activities specified in this subparagraph; and

(B) directly carry out the activities described in subparagraph (A), except that not more than 80 percent of the costs of providing any comprehensive rehabilitation center may be provided from funds under this section.

(2) Funds made available to any designated State unit under this section for the purpose of assisting in the operation of a comprehensive rehabilitation center may be used to compensate professional and technical personnel required to operate the center and to deliver services in the center, and to provide equipment for the center.

Such agreements may include provisions consistent with subsection (c) for the payment of the costs of projects developed by such organizations and agencies in cooperation with the Secretary. No payment shall be made by the Secretary toward the cost of any such project unless the Secretary determines that:

(F) Such project will not employ any eligible individual to perform work which is the same or substantially the same as that performed by any other person who is on layoff from employment with the agency or organization sponsoring such project.

(G) Such project will utilize methods of recruitment and selection (including the listing of job vacancies with the State agency units designated under section 101(a)(2)(A) to administer vocational rehabilitation services under this Act) which will assure that the maximum number of eligible individuals will have an opportunity to participate in the project.

(H) Such project will provide for (i) such training as may be necessary to make the most effective use of the skills and talents of individuals who are participating in the project, and (ii) during the period of such training, a reasonable subsistence allowance for such individuals and the payment of any other reasonable expenses related to such training.

(A) The prevailing rate of pay for persons employed in similar occupations by the same employer.

(B) The minimum wage which would be applicable to the employee under the Fair Labor Standards Act of 1938 if such employee were not exempt from such Act under section 13 thereof.

(C) The State or local minimum wage for the most nearly comparable covered employment.

The Department of Labor shall not issue any certificate of exemption under section 14(c) of the Fair Labor Standards Act of 1938 with respect to any person employed in a project under this section.

the Secretary may pay all of the costs of any such project which is (A) an emergency or disaster project, or (B) a project located in an economically depressed area, as determined by the Secretary in consultation with the Secretary of Commerce and the Director of the Community Services Administration.

(2) The non-Federal share of any project under this part may be in cash or in kind. In determining the amount of the non-Federal share, the Secretary may attribute fair market value to services and facilities contributed from non-Federal sources.

MINORITY VIEWS

We commend President Clinton for his leadership on children’s literacy and his recognition of the need to involve community-based organizations and volunteers in the goal of increased literacy for children. The President’s “America Reads” legislation calls for the expansion of community partnerships among schools, libraries, community organizations, and businesses to supplement classroom instruction in reading. The bill provides additional literacy assistance to children after school, on weekends, and during the summer with the goal of ensuring that all children can read independently by the end of the third grade.

On May 1, 1997, the President’s bill was introduced by Representatives Clay, Martinez, Miller, and thirty-seven other House Democrats. Shortly after the introduction of the America Reads legislation, the President and Congressional Leaders including in the budget agreement funding of $260 million for a literacy initiative consistent with the “goals and concepts” of the President’s America Reads initiative.

By combining America Reads with the Majority’s initiatives, we have produced a bill that will positively impact the efforts of our country’s educators to teach children to read. This legislation, through both efforts to improve professional development of teachers in reading and the utilization of community-based organizations in mobilizing volunteer tutors, will ensure that children read independently by the end of the third grade.

Before we can offer unqualified support for this bill, however, our concerns regarding Tutorial Assistance Grants (TAG grants) must be resolved. Under the bill, state literacy partnerships would be required to distribute funds to local education agencies (LEAs) that have schools in empowerment zones or enterprise communities. In the event that a State has no areas with such designation, state literacy partnerships would distribute funds to LEAs which have at least one school designated for “school improvement.” LEAs that receive these grants would be required to create a list of tutorial assistance providers from which parents could then select.

We are concerned that this provision lacks accountability for both academic results and the expenditure of Federal dollars. The money that would flow to school districts under this proposal would cause a great of political pressure to put an unqualified provider on the list, regardless of provisions of the bill that require experience in providing tutorial assistance based on reliable, replicable research. This dynamic would clearly lead to a large and completely arbitrary list of providers being developed—further complicating the process parents would have to maneuver to ensure that their children get the help they need.

In addition, we are concerned that these TAG grants are largely unconnected with the activities and purposes of the rest of the bill.
Under the larger local reading improvement subgrant, funds would be provided to LEAs, which in turn would use funding primarily to provide professional development, family literacy programs, assistance to children not ready to transition to the 1st grade, and additional support for students during non-instructional time (before and after school, on weekends, and during the summer). All of these activities closely connect the learning experiences of children with the school and the instructional methods used in the school. By contrast, the TAG grants would utilize non-school providers that may employ reading strategies inconsistent with the school.

We note that an analysis prepared by the Department of Education shows the provision of tutorial assistance under the bill to be nearly four times the cost of similar assistance under the larger local reading improvement subgrant. The Department estimated that it would cost $2,150 per child to provide tutoring to children under the tutorial assistance grant structure, but only $593 per child under the larger local reading improvement subgrant. We cannot support such an expensive, uncoordinated approach to reading assistance.

Because of these concerns, Representative Martinez offered an amendment at the markup to strike the tutorial assistance grant provision from the bill. In the interests of recognizing the policy goals of the Majority, Representative Martinez proposed that Democrats and Republicans reach a mutually agreeable resolution to their differences on this issue prior to floor consideration of the bill. At the markup, the following comments represented the agreement between Mr. Martinez and Chairman Goodling:

Mr. MARTINEZ. Before we go to the next amendment
* * * Am I to understand that we will come to some kind of mutual agreement [on TAG grants] before we come to the floor with this?
Chairman GOODLING. Right, you are to understand that.

In addition to the Martinez amendment, the Committee adopted an amendment offered by Representative Payne. This amendment replaced the joint Peer Review/Secretarial and State evaluations of the programs funded by this Act with one less costly and more effective national evaluation. While the subsequent Riggs amendment restored the State evaluation section from the original bill, the national evaluation provisions of the Payne amendment remain, ensuring that the Secretary will have the ability to conduct unilaterally evaluations of programs funded under this Act.

Despite the acceptance of this Riggs amendment, we are still concerned about the duplicative impact of both State and National evaluations and will work to resolve these differences.

We also commend Representative Kildee for the two amendments which he offered to improve the role of libraries in this legislation. These amendments, which allow library representatives as optional participants on the State reading and literacy partnerships, and give priority status to applications which demonstrate a contractual association with one or more public libraries, both passed the Committee by voice vote.

We are committed to ensuring that the tutorial assistance grant provision is reflective of both our policy objectives and those of the
Majority. With the modification of the TAG grant provision, this bill will give parents, teachers, students, and educators a powerful new tool to enhance reading achievement.

DISSENTING VIEW

Congress is considering creating yet another unconstitutional, ineffective federal education program by passing the Reading Excellence Act (H.R. 2614). The supporters of this bill claim that by passing the Reading Excellence Act, the federal government will “enable every child to learn to read.” Now this is certainly a noble goal, but before Congress creates yet another federal program, perhaps we should consider that over the past sixty years Congress has created a plethora of social programs—each one promising to bring an end to some social ill. These programs have not only failed to create the promised utopia but, in many cases, worsened the very problems they were created to solve.

Nowhere is the federal government’s failure to improve the lives of the American people through the welfare state more dramatically illustrated than in education. In 1963, when federal spending on education was less than nine hundred thousand dollars, the average Scholastic Achievement Test (SAT) score was approximately 980. Thirty years later, when federal education spending ballooned to 19 billion dollars, the average SAT scores fell to 902. Furthermore, according to the National Assessment of Educational Progress (NAEP) 1992 Survey, only 37% of America’s 12th graders were actually able to read at a 12th grade level.

Despite this history of failed federal programs, Congress is once again planning to solve a social problem through an increase in federal power. It is ironic that the reason we are considering this bill is because the budget agreement, which was supposed to end “the era of big government,” calls for the creation of a federal literacy program. Obviously, the budget deal does not end big government, but preserves and expands unconstitutional nanny-state-interference in areas where government has neither legitimacy nor competence.

Rather than returning money and authority to the states and the people, commensurate with the 10th amendment, this bill, creates another complex bureaucratic process, laden with rules, regulations and state mandates. Under this bill, states receiving a literacy grant must establish a Reading and Literacy Partnership, the makeup of which is dictated by the federal government. The partnership must then apply for a grant to the Secretary of Education, explaining how they would comply with all of the bill’s mandates. The grants are then approved by a Peer Review Panel, a group of “experts” chosen by the National Institute for Literacy and other federally-funded organizations. States receiving grants under this program would then have to distribute those grants to Local Education Agencies (LEAs), who submit a plan to the States’ Reading and Literacy Partnership. Among the information that states would be required to submit is a description of how subgrants made by the partnership would achieve the goals of the Act, a description
of how the partnership would evaluate subgrantees, and a description of how states will guarantee that a portion of the funds will be used to provide tutorial assistance grants.

Those receiving federal literacy funds may only use them for federally-defined purposes. Thus, this legislation creates another bureaucratized program rooted in pseudo-federalism, whereby states have the right to spend money on federally-defined goals and within the limitations set by Congress—provided, of course, they jump through all the Congressionally-constructed federal hoops.

Recipients of federal literacy funds must base their programs on “reliable, replicable research,” defined as research meeting scientific standards of peer-review. While none question the value of research into various educational methodologies it is doubtful that the best way to teach reading can be totally determined through laboratory experiments. Learning to read is a complex process, involving many variables, not the least of which are the skills and abilities of the individual child. Many effective techniques may not be readily supported by “reliable, replicable research.” Therefore, this program may end up preventing the use of many effective means of reading instruction. The requirement that recipients of federal funds use only those reading techniques based on “reliable, replicable research,” which in practice means those methods approved by the federally-funded “experts” on the Peer Review Panel, ensures that a limited number of reading methodologies will, in essence, be “stamped with federal approval.”

Furthermore, this bill mandates that schools participating in the federal literacy programs must make available to parents assurance of teacher qualifications. It is probably a good idea that local schools make this information available to parents, but it is not the role of the federal government to dictate local schools implement everything we in Congress think is a good idea. In addition, this provision seems to have been motivated by a desire to start Congress down the road to establishing a national system to certify teachers.

Due to the unfortunate influence of the federal government, the teaching methodologies funded under this program will become the methodologies used in every classroom in the nation. Thus, this bill represents another step toward imposing a national curriculum. Supporters of this bill will respond that the federal government is merely encouraging the use of sound instructional techniques. Setting aside the question of whether or not techniques based on “reliable, replicable research” can really lead one to discover the best means of educating children, the Constitution prohibits the federal government from any interference in the methodologies by which children are educated. The Constitutional prohibition on federal interference in education contains no exception for techniques based on “reliable, replicable, research.”

Another indication that this bill will move America toward a national curriculum is that the bill creates a federal definition of reading, thus making compliance with federal standards the goal of education.

Furthermore, the Reading Excellence Act requires each grantee to evaluate the success of their programs. Of course, the most effective way to evaluate the success of the various literacy projects re-
viewing federal funds is to administer a uniform test to the students participating in those programs. Thus, despite the overwhelming congressional rejection of national testing just last month, Congress is now considering authorizing the creation of a de facto national reading exam.

Another reason to oppose this bill is that it increases federal support for so-called “family literacy services.” One of the hallmarks of totalitarianism is state-control of child rearing. Despite the language that participation in these programs is “voluntary,” these programs enable government-funded social workers to subtly coerce parents to cede control of their child to the state.

In conclusion, the Reading Excellence Act represents another unconstitutional intrusion on the rights of states, local communities, and parents to educate children free from federal interference. It also takes several large steps down the dangerous road toward a national curriculum. Therefore, Congress should reject this bill, and instead support measures such as educational tax credits that will empower parents to provide effective literacy instruction for their children.
