PURPOSE

The need for this legislation arises primarily from the expiration at the end of fiscal year 1998 of the authorizations for the programs in the Higher Education Act (HEA). The principle objective of the HEA is to expand postsecondary education opportunities, particularly for low-income individuals, and to increase the affordability of postsecondary education for moderate-income families. The fundamental purpose of the Higher Education Amendments of 1998 is to reaffirm America’s commitment to maintaining its higher education system as the best in the world.

The student assistance programs have increasingly become the dominant means by which the Federal Government pursues the goal of equal educational opportunity for all Americans. The fiscal year 1998 appropriation for programs authorized by the Higher Education Act will result in more than \$48 billion being available for student financial assistance. In addition, the tax credits and deductions included in the Taxpayer Relief Act of 1997, will result in an additional \$40 billion for postsecondary education over the next five years. In fact, the Federal student financial assistance pro-

grams currently provide 75 percent of the available student financial assistance from all sources in the United States. Roughly one out of every two undergraduates receive some form of Federal student aid. This compares with about 1 in 10 who receive state aid and 1 in 6 who receive institutional aid.

In undertaking the reauthorization of the Higher Education Act, the Committee adopted the following guiding principles:

- Making higher education more affordable;
- Simplifying the student aid system;
- Stressing academic quality; and,
- Improving access to a postsecondary education for all.

AFFORDABILITY

College affordability has been a central part of the discussions surrounding the Committee's review of the grant and loan programs found in the Higher Education Act. As Committee Members have talked to individuals across the country concerning the reauthorization of the Higher Education Act, the consistent question being asked by students and parents is "why is college so expensive and why are college prices rising so quickly?"

The Committee recognizes that in today's technology and information based economy, getting a high quality postsecondary education is more important than ever. For many Americans, it is the key to the American dream. Historically, higher education prices have increased at roughly the rate of inflation. However, since the early 1980's, college tuition has spiraled at a rate of two-to-three times that of inflation every year. According to a report released by the General Accounting Office (GAO), between 1980-1981 and 1994-1995, tuition at 4-year public colleges and universities increased 234 percent, while median household income rose 82 percent, and the consumer price index rose only 74 percent.

That is not to say that there are not affordable schools. The Committee recognizes that there are still some affordable schools and there are college presidents who are committed to keeping costs low. The Committee notes that there are schools that are trying very innovative things to reduce tuition prices, and Members of the Committee are hopeful that some of these practices can serve as models for similar types of institutions.

To better understand what is driving these cost increases and what could be done in order to reduce the price of a postsecondary education, the Committee favorably reported H.R. 1511, the Cost of College Review Act of 1997, by voice vote. This legislation was enacted on June 12, 1997 (P.L. 105-18) and established the National Commission on the Cost of Higher Education. The Commission was composed of 11 Members appointed in a bipartisan fashion. The Commission members were selected for their expertise in higher education finance, Federal financial aid programs, education economics research, and public or private higher education administration. They were assigned the task of studying the reasons for the rapid tuition increases that have occurred over the last several years and making specific recommendations as to how these increases can be brought under control.

On January 21, 1998, the Commission issued its final report, and on February 10, 1998, the Commission went out of existence. Rep-

representative McKeon (R-CA) and Representative Castle (R-DE) offered an amendment to H.R. 6 that was accepted by the Committee, to include a number of the Commission's recommendations in the reported bill. Most important for students and parents will be the increased availability of information with respect to college costs and prices that the Secretary of Education will make available on a yearly basis. In addition, Title X of the bill clarifies that colleges and universities can offer tenured faculty early retirement bonuses. This will give tenured faculty new retirement benefits while giving institutions more flexibility to provide instructors with the most up to date knowledge while reducing a costly regulatory burden on schools. It is the intent of the Committee that these cost savings be passed directly on to students.

H.R. 6 also addresses the issue of affordability by strengthening the Pell Grant Program, particularly for dependent and independent students who work and save for their college education. It addresses affordability by keeping the student loan programs viable with a workable solution to the 1998 interest rate problem. It addresses affordability by continuing and improving the campus-based aid programs that assist millions of students in financing their college education.

SIMPLIFICATION

The Committee's efforts at simplification are found throughout H.R. 6. The most significant step is the creation of a Performance-Based Organization (PBO) within the Department of Education to manage the application and processing systems in order to promote improved services to students, families and institutions of higher education. The PBO provisions are taken from H.R. 2536 introduced last fall by Representative McKeon (R-CA) and Representative Kildee (D-MI). It is intended that the Chief Operating Office of the PBO and the Secretary of Education work in close cooperation to provide a new level of high quality service. The Committee's efforts at simplification will directly benefit students by giving them faster and easier access to the financial aid they need to pursue a postsecondary education. Our efforts will improve service to borrowers after they graduate by giving them easy access to information on their student loans, and our efforts will benefit them as taxpayers by reducing the cost of running our Federal financial aid programs.

H.R. 6 takes the 1992 Amendments to the Higher Education Act a step further in the area of simplification and directs that the Free Application for Federal Student Aid (FAFSA) be the single application for both loan programs. H.R. 6 also provides institutions of higher education that perform well in their duties with relief from certain regulatory requirements. This will serve as a great benefit to their students, as well as an incentive to other institutions to perform well.

H.R. 6 will reduce paperwork and red tape for students. Under H.R. 6, students will be able to use one form to apply for all types of Federal student assistance. Students will no longer have to fill out a separate form for their FFEL loans. In addition, H.R. 6 requires the Secretary to develop an electronic application for student financial assistance. This will allow students to apply for aid from

their home, school, or library using a computer. H.R. 6 also retains the simplified needs test, allowing two-thirds of all Pell eligible students to avoid filling out substantial parts of the aid application form.

Under H.R. 6, students will no longer have to provide lenders with a statement of financial need. This responsibility is given to the school that the student attends. In addition, H.R. 6 simplifies the loan deferment process. Students will no longer have to file a form to get the in-school deferment to which they are entitled. Borrowers who provide evidence of qualifying for unemployment benefits will no longer have to provide additional forms to qualify for an unemployment deferment. Finally, under H.R. 6, students will be able to quickly check on the status of their loans over the Internet.

QUALITY

Improving academic quality comes in several forms in H.R. 6. The new teacher education program is the focal point for improving academic quality. Part E of Title II replaces current teacher training programs under Title V of the Higher Education Act, with a single, competitive grant to Governors. Activities of such grants will focus on strengthening State teacher certification procedures to better reflect current and future teacher's academic knowledge of the subjects they teach. Grants would also support the reform of schools of education in colleges and universities to focus more attention on academic content knowledge. In addition, this will provide incentives to increase the content knowledge of the academic subject matter of current and future teachers, including training in the use of effective technologies in the classroom. Testimony at our hearings indicated the need for teachers to be trained in the subject areas that they are teaching. These grants will help improve and strengthen the quality of teachers so that students have the tools they need to achieve academically.

By strengthening the TRIO programs, which provide outreach services to disadvantaged students, H.R. 6 will improve the academic preparedness of the students at our nation's colleges and universities. Students who previously would not have thought of pursuing a postsecondary education will be encouraged to excel in their studies, and will be better prepared for college level work.

H.R. 6 will allow students more convenient access to a postsecondary education through new distance learning programs. The quality of these programs is assured by the requirement that all such programs be accredited. Under H.R. 6, students will be able to select classes and instructors from across the country or around the world. This will give students the ability to take courses from the best professors without leaving their homes.

H.R. 6 will give students and parents quality information when choosing a school. For the first time, Americans will have access to current information on the cost of a particular college or university, the average amount of financial aid available to students at that institution, and how the institution is spending its money.

H.R. 6 will improve the quality of life on campus. The Campus Crime Reporting provisions in H.R. 6 will provide students a safer college experience. Students and their families will be given impor-

tant information on campus crime. They will be able to use this information in choosing a school, and in making decisions to protect their personal safety once on campus.

By strengthening the Urban Community Service program, H.R. 6 will improve the quality of life in cities across the nation. The best and brightest from campuses across the country will be encouraged to work with private organizations and civic groups to find solutions to the most pressing problems in their communities.

IMPROVING ACCESS

H.R. 6 extends and improves all of the existing funded programs found in the Higher Education Act. Programs to support Historically Black Colleges and Universities, Hispanic-Serving Institutions and Tribally Controlled Colleges and Universities have all been strengthened in Titles III and V of H.R. 6. The International Education Programs have been given a thorough review in light of the changing global dynamics and needs of the United States with respect to our international colleagues.

H.R. 6 strengthens early outreach and intervention during the high school and middle school years. Students and their families are frequently not well informed about the availability of financial assistance, the range of postsecondary educational options and the appropriate high school programs that lead to postsecondary education. H.R. 6 improves early outreach and intervention efforts by strengthening the TRIO programs and expanding the role of the States under the State Student Incentive Grant Program.

H.R. 6 improves access to a quality postsecondary education by allowing students, especially those in rural or remote areas, to take classes using new distance learning technologies. H.R. 6 creates a new distance learning demonstration program, under which the Secretary will be allowed to waive regulations that have been a barrier to the use of new technologies in the past. Under H.R. 6, students will be able to take courses from home over the Internet or through the use of emerging communications technology.

H.R. 6 also addresses the reauthorization of the Education of the Deaf Act.

HEARINGS

The Subcommittee on Postsecondary Education, Training and Life-Long Learning held hearings both in and outside of Washington to review and make determinations on revising the Higher Education Act. This review included, but was not limited to, grant programs, loan programs, institutional programs, integrity and accountability issues, and the overall role of the Federal Government in the area of higher education. Most importantly, the Subcommittee held these hearings to gather extensive information with respect to federal higher education policy and insight into the rising costs of higher education from those closest to the problems—local college presidents, students, and parents.

In addition, hearings were held on teacher preparation, the Education of the Deaf Act, and early retirement incentives. Specifically, the Subcommittee on Postsecondary Education, Training, and Life-Long Learning held a hearing on July 15, 1997 that focused on Title V of the Higher Education Act and the Education of the Deaf Act. At this hearing Members heard views relating to teacher preparation from teachers, higher education institutions, and the Administration and examined ways of improving upon the provisions the Education of the Deaf Act.

Another hearing was held on February 24, 1998 by the Subcommittee on Early Childhood, Youth, and Families that examined issues surrounding teacher preparation such as classroom reduction initiatives; teacher shortages; accreditation of schools of education; certification and licensure of teachers; alternative certification programs; and various State initiatives to improve teacher quality and improve education.

The Subcommittee on Employer-Employee Relations held a hearing on May 22, 1997 on early retirement in higher education to examine the flexibility under federal law to allow institutions of higher education to develop early retirement incentives that meet both institutional needs and the needs of tenured faculty members.

A total of 24 hearings (including those listed above) were held, including 11 field hearings outside of Washington. 187 witnesses testified at the hearings representing a broad cross section of experts and professionals as well as the consumers of education—parents and students. In fact, a total of 15 students testified at the hearings. Witnesses representing the Administration, including Secretary of Education Richard Riley also appeared before the Subcommittee. A list of all of the hearings follows:

Field hearings

The witnesses at the field hearings were invited to share their ideas, concerns and insights into higher education policy and programs contained in the Higher Education Act—those that work and those that do not work for students, families, and institutions. The witnesses were also asked to give their perspective on the current affordability of a postsecondary education.

On January 7, 1997, Representatives McKeon (R-CA), Goodling (R-PA), Clay (D-MO), and Kildee (D-MI) introduced H.R. 6, the Higher Education Amendments of 1998. On the basis of the hearings, bills referred to the Subcommittee, the recommendations of the Administration and the recommendations of the higher education and lending communities, a draft legislative print was prepared. The Subcommittee on Postsecondary Education, Training and Life-Long Learning considered this print as an Amendment in the Nature of a Substitute to H.R. 6 in legislative session on March 4, 1998 during which no amendments were accepted. H.R. 6 was ordered reported to the Full Committee on Education and the Workforce on March 4, 1998 by voice vote.

H.R. 6 was considered by the Committee on Education and the Workforce in legislative session on March 18 and 19, 1998, at which 34 amendments were considered. On March 19, 1998, the Committee on Education and the Workforce, with a majority of the Committee present, reported H.R. 6, to the House with amendments, by a vote of 38–3. The explanatory language in this report, including the section-by-section analysis, relates to the bill as reported.

SUMMARY

H.R. 6 amends the Higher Education Act of 1965 and has the following Titles: Title I—General Provisions; Title II—Postsecondary Education Improvement Programs; Title III—Strengthening Institutions; Title IV—Student Assistance; Title V—Developing Institutions; Title VI—International and Graduate Education Programs;

Title VII—Construction, Reconstruction, and Renovation of Academic Facilities; Title VIII—Additional Provisions; Title IX—Amendments to Other Laws; and Title X—Faculty Retirement Provisions. A summary of the specific provisions in these Titles is included in the Background and Committee Views section of this report.

BACKGROUND AND COMMITTEE VIEWS

TITLE I—GENERAL PROVISIONS

H.R. 6 repeals the current unfunded programs in Title I, Parts A, B, C. The repealed programs include School, College and University Partnerships; Articulation Agreements; and Access and Equity to Education for all Americans through Telecommunications. Title I is now General provisions and includes as Part A, Extension and Revision of General Provisions and Part B, Administrative Provisions for Delivery of Student Financial Assistance.

Part A, extension and revision of general provisions

The new Part A of Title I incorporates the general provisions applicable to the Higher Education Act previously located in Title XII. In relocating these provisions, the Committee felt strongly that the definition of “institution of higher education” needed to be located in one place rather than two as is currently the situation. The definition of “institution of higher education” found in Title I incorporates the provisions found in Title XII with provisions found in Section 481 of Title IV. Although the combining of the definitions does not result in substantive changes to eligibility, it does reflect the Committee’s view that all sectors of higher education are partners in our Nation’s continuing efforts to enhance the productivity of our workforce and enrich the lives of our citizens.

One specific change to the definition of proprietary institution of higher education is designed to clarify what is commonly known as the 85–15 rule. This rule was adopted during consideration of the 1992 Amendments to the Higher Education Act. The purpose of the amendment was to require proprietary institutions of higher education to obtain at least 15% of their revenues from sources other than Title IV funds. This language has been the subject of much debate and litigation based on the Department of Education’s interpretation of the intent of the language. It is the view of the Committee that the ability to compete in the market for government and industry training contracts is a clear indicator of the educational value of an institution’s program. In the definition of proprietary institution of higher education, the Committee clearly states our intent that revenue from educational programs offered by proprietary institutions, regardless of the program’s eligibility under title IV, are to be included in the institution’s revenues for purposes of the 85–15 rule so long as those programs are provided on a contractual basis under a government training program or under a specialized training request from business and industry.

Part B, performance-based organization for the delivery of Federal student financial assistance

Part B of Title I includes the language of H.R. 2536, the 21st Century Student Financial Aid System Improvement Act of 1997, which was introduced by Representative McKeon (R-CA) and Representative Kildee (D-MI) on September 24, 1997. This provision instructs the Department of Education to create a performance-based organization (PBO) within the Department for the delivery of federal student financial assistance. The PBO will be responsible for all aspects of managing the data and information systems that support the student financial assistance programs. A Chief Operating Officer having demonstrated management ability and expertise in information technology and financial services is to be hired to manage the PBO.

The purposes of the PBO are to: improve the level of service to program participants; reduce the costs of administering the programs; increase accountability; provide greater flexibility in the management of the operational functions; and integrate the information systems supporting federal student assistance programs.

The Committee recognized the need to make crucial changes to the student financial aid system in order to make it more simple, modern and efficient for the 21st Century. The need for this provision arises from the inability of the Department of Education to adequately manage over \$40 billion in student financial aid. For instance, under the current system, the Department has made very limited progress in integrating the National Student Loan Data System (NSLDS) with its other data systems that support the delivery of federal student aid despite legislative mandates in the last two authorizations of the Higher Education Act. Also, the Department's budget for student aid information systems has tripled over the last 5 years and instead of consolidating its existing data systems, the Department has increased the number of system contracts that cannot share data with each other. And in 1998 alone the Department is expected to spend over \$300 million on systems contracts to deliver student aid. Yet despite these significant expenditures, the current system requires dozens of paper forms and suffers from needless processing delays and breakdowns.

The Committee firmly believes that a customer-based, Performance-Based Organization within the Department, operated by an experienced Chief Operating Officer can take the necessary steps to properly reengineer the current systems and contracts. This is also in concurrence with the recommendations of the Department's own Inspector General and the independent Advisory Committee on Student Financial Assistance who both have advocated the PBO approach. The Committee also believes the creation of a PBO will result in a more efficient, effective, less expensive and less bureaucratic financial aid delivery system. The end result should be a system that is easy for students and parents to use and one that ensures that students have the information they need to select the education that is best for them—all while ensuring that taxpayer funds are being used efficiently and effectively.

A new Section 112 of the legislation, added by the McKeon-Castle amendment, directs the Secretary to review on a biennial basis all regulations that apply to the operations or activities of any par-

ticipant in programs authorized under Title IV of the Higher Education Act, and where possible repeal, consolidate, simplify, or modify them if they are no longer in the public interest. This section also requires the Secretary to report to Congress any legislative changes necessary to permit further regulatory simplification.

One of the “cost-drivers” identified by the College Cost Commission was regulatory compliance. During the Committee’s January 28, 1997, hearing in York, PA, the Committee was concerned to learn from one of its witnesses, Ms. Deborah Dunn, Executive Vice President of Yorktowne Business Institute, that between August 1992 and September 1993, the Department of Education issued 171 “Dear Colleague” letters changing the Title IV regulations or advising on new interpretations of the regulations. In addition, the Department’s regulations include 38 different definitions of “student”, 152 different reporting requirements, and 237 different definitions of “compliance.” The Committee is committed to ensuring the integrity of the Federal financial aid programs. However, it is not the intent of the Committee to unduly burden participants in the Federal student aid programs with regulations that are redundant, out of date, or difficult to comply with or understand.

TITLE II—POSTSECONDARY EDUCATION IMPROVEMENT PROGRAMS

Title II of the Higher Education Act contained the Higher Education Library Programs prior to enactment of P.L. 104–208 which established the Institute of Museum and Library Services and repealed all of Title II. H.R. 6 transfers several existing programs to Title II. The Urban Community Service Program is transferred from Part A of Title XI and is now Part A of Title II. This program provides incentives to urban institutions (including academic, private and civic bodies) to work together to devise and implement solutions to the most pressing and severe problems in their communities. Applied research, technical assistance, improvement and provision of services, training and data collection and analysis are examples of activities that can be supported under this part. This program has become very popular among urban institutions and other institutions have asked that the information developed as a result of this program be shared with those who may wish to conduct similar programs on their own. H.R. 6 specifically directs that this information be made available to any interested institution.

Part B of title II reflects the transfer of the Fund for the Improvement of Postsecondary Education from Part A of title X. The special projects that may be funded under the program have been expanded to include projects dealing with articulation agreements among institutions and international cooperation and student exchange among institutions. There are authorized to be appropriated \$30,000,000 for fiscal year 1999 and such sums for the four succeeding fiscal years.

In addition, the McKeon-Castle amendment strengthened our role in keeping college affordable by enhancing national support for innovative projects. Specifically, this amendment added innovative projects addressing issues of productivity, efficiency, quality improvement, and cost control at postsecondary institutions as one of the special projects that can be funded by FIPSE.

The Committee notes that one such initiative that the Commission found promising was maximizing the opportunity for cost savings through joint campus purchase of goods and services and joint use of facilities. The Committee believes these opportunities should be pursued through various types of partnerships. For example, the Committee is aware of innovative cost-containment efforts initiated by the Southeastern Pennsylvania Consortium for Higher Education (SEPCHE), a coalition of eight small colleges in the greater Philadelphia area. This initiative, geared to enhancing the quality, efficiency and cost effectiveness of academic programming, student access, faculty development, institutional operations and community and educational outreach through resource sharing, collective purchasing, joint planning and technological linkage, might well serve as a model for price control for other small colleges and universities. The Committee strongly endorses the pioneering work of consortia such as SEPCHE and encourages it and others like it to make the results of their efforts available to other small to mid-size institutions of higher learning.

Part C of Title II reflects the transfer of Grants to States for Workplace and Community Transition Training for Incarcerated Youth Offenders from Part E of Title X. The program is authorized to be appropriated at \$5,000,000 for fiscal year 1999 and such sums for the four succeeding fiscal years.

Part D of Title II reflects the transfer of the Advanced Placement Fee Payment Program from Part G of title XV of the Higher Education Amendments of 1992. The program is authorized to be appropriated at \$3,600,000 for fiscal year 1999 and such sums for the four succeeding fiscal years.

Part E of Title II replaces current teacher training programs under Title V of the Higher Education Act, with a single, competitive grant to Governors. Activities of such grants will focus on strengthening State teacher certification procedures to better reflect current and future teacher's academic knowledge of the subjects they teach. Grants would also support the reform of schools of education in colleges and universities to focus more attention on academic content knowledge. In addition, this will provide incentives to increase the content knowledge of the academic subject matter of current and future teachers, including training in the use of effective technologies in the classroom.

As part of the 1992 reauthorization of the Higher Education Act, numerous programs were established to address a variety of issues related to teacher recruitment, retention and development. When coupled with the programs that already existed under Title V, there were 17 separate programs, each with their own requirements, standards and authorization. As the Committee began its work in 1997 to reauthorize the Higher Education Act, there was a growing consensus to replace these programs, which have gone largely unfunded, with a more targeted source of funding to assist States and localities in addressing their needs in this area. This effort led to the establishment of the Teacher Quality Enhancement Grants.

In developing these grants, the Committee gathered a significant amount of information through hearings. Through these hearings, several major issues emerged related to teacher preparation. Spe-

cifically, despite continued reports of an impending “shortage of teachers,” the Committee found a far greater need to address problems with respect to the quality of teachers and of teacher preparation programs in this nation. Other issues identified during these hearings included insight into the area of alternative routes to teacher certification as a means to increase the pool of qualified teachers; the growing concern regarding the inadequacy of many State teacher licensure requirements which often lack a focus on academic knowledge; and the need to focus teacher professional development on academic content knowledge.

A number of legislative initiatives introduced by several Members of this Committee were also important in the development of this proposal. Those include: H.R. 2288, the Teaching Excellence for All Children Act of 1997 introduced by Representative Miller (D-CA); H.R. 3440, Alternative Routes to Teacher Certification Act of 1998 introduced by Representative Roemer (D-IN); H.R. 2698, America’s Teacher Preparation Improvement Act introduced by Representative McCarthy (D-NY); H.R. 2852, the Clinton Administration’s proposal introduced by Representative Kildee (D-MI); H.R. 3085, the Partnership for Professional Renewal Act of 1997 introduced by Representative Woolsey (D-CA); and H.R. 2495, Higher Education for the Twenty-First Century Act introduced by Representative Hinojosa (D-TX).

Unlike the prior array of teacher preparation programs under the former Title V, the Committee established a single program incorporating many of the issues addressed above. An important element of the Teacher Quality Enhancement Grants is providing States with the ability to competitively seek funds for initiatives which address the areas that they feel are most important within their own boundaries.

Specific activities supported under the Teacher Quality Enhancement Grants include strengthening State teacher certification procedures to better reflect current and future teacher academic knowledge of the subjects they teach, and reforming schools of education to better prepare teachers with academic content knowledge. In addition, initiatives would be funded which increase the content knowledge of the academic subject matter of current and future teachers, including training in the use of effective technologies in the classroom. States would be given priority in their funding application for these activities.

As a part of the Committee’s efforts to increase teacher content knowledge (for both current and future teachers), the Governor could also fund projects such as partnerships between public and private higher education institutions, local educational agencies, and private and parochial schools. Governors could also fund other activities related to expansion of State programs for alternative routes to certification and initiatives to expeditiously remove incompetent or unqualified teachers.

In short, while these grants provide significant flexibility to States in addressing issues related to teacher preparation, the Committee made an effort to ensure that the major focus be on improving overall teacher quality in this nation. During the hearings on teacher preparation, the Committee heard from many witnesses who provided a compelling case that the focus of efforts in this area

should be on the quality of teachers over that of expanding the quantity of teachers. One witness, C. Emily Feistritzer, Director, National Center for Educational Information, put into perspective recent projections from the Department of Education which claim that 2 million new teachers will be needed over the next decade as a result of growing enrollments and the aging of the current teaching workforce. Mrs. Feistritzer noted:

“When most people hear that we’ll need 200,000 new teachers every year for the next decade, [2 million in total] they think it means brand new teachers—people who have never taught before. Well, that is not what it means. * * * According to the National Center for Education Statistics Schools and Staffing Survey, 5.8 percent of the total teacher workforce of 2.39 million were “newly hired” in 1993–94 (the latest year for which these data are available). Of these 139,000 “newly hired” teachers, fewer than half (42 percent) were “newly minted” teachers, that is, teachers who had just finished a college program and had never taught before. Nearly one-fourth (24 percent) of them were “delayed entrants” * * * The remaining third of “new” teachers were actually former teachers coming back into the profession. These statistics are terribly important. The bottom line is the nation is hiring—and is projected to need to hire—approximately 45,000 newly minted teachers per year. That is a far cry from 200,000!” She also notes “only about a third of fully qualified teachers who graduate from the nation’s 1200 or so colleges that train teachers in any given year are actually teaching the following year.”

If there is truly a demand for 45,000 teachers each year, the question becomes “how many prospective teachers are graduating from our colleges and universities annually?” Mrs. Feistritzer, also provided insight into this question:

“According to the National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), 106,079 bachelor’s degrees in education were conferred in 1994–95, the latest year for which NCES has published data. In addition, 101,242 Master’s degrees in education and 6,905 doctorates in education were conferred. Every year in this decade, colleges and universities have been awarding more than 100,000 bachelor’s degrees in education alone. The education field is second only to business in number of degrees conferred”. She also notes “only about a third of fully qualified teachers who graduate from the nation’s 1200 or so colleges that train teachers in any given year are actually teaching the following year.”

These statistics explain why, according to Census data, there are more than 6 million individuals holding at least a Bachelors Degree in education, representing 16.2% of all degrees held by individuals. In short, the Committee found that too few graduates of teacher preparation programs go into teaching and too few stay in the

teaching profession. In fact, our colleges and universities are churning out more teachers annually than there are jobs. Based on current trends, we can only meet the future demand for teachers by encouraging more graduates of teacher preparation programs, including those who have chosen another profession to commit to the teaching profession, and by encouraging more college students to go into teacher preparation programs.

There is evidence to suggest that there is a problem with respect to the quality of many teachers. A recent report by the National Center for Education Statistics found that 36 percent of those now teaching core subjects, such as math and science neither majored nor minored in those subjects.

During hearings on teacher preparation, the Committee heard from numerous witnesses on the need to focus on quality. Some of the examples of the current situation were especially enlightening. Professor Ballou, Associate Professor of Economics at the University of Massachusetts, provided one such example from the Connetquot District in Long Island, NY, which recently had 758 applicants for 35 teaching spots. Mr. Ballou noted, "As a screening device, district officials required applicants to answer at least 40 out of 50 multiple-choice reading comprehension questions from old regents exams given to high school juniors. Of the 758 applicants, all of whom had baccalaureate degrees and teaching certificates, only 202 met this 11th grade standard."

The problem of qualified teachers is most critical in poor, urban and rural schools. While a variety of factors have been attributed to this problem; the most common are the lack of competitive salaries and the attractive working conditions available in the surrounding suburbs. A recent education report also noted that outdated and cumbersome hiring procedures compound the problem facing these schools and that principals in large urban bureaucracies have less control over hiring teachers than those in non-urban areas.

With respect to the teacher quality in poor urban and rural schools, Kati Haycock, Director of the Education Trust, made the following observation during a Committee hearing:

As bleak as the overall situation is, the picture for low-income students and minority students is even bleaker. The least well-qualified teachers are most likely to be found in the high poverty schools, and predominately minority schools. Whereas only 8% of the public school teachers in low-poverty schools taught without a minor in their main teaching assignment, fully a third of the teachers in high poverty school were teaching without a minor in their main assignment field. Nearly 70% taught without a minor in their secondary assignment field. About one-third of the English classes in high poverty secondary schools are taught by an individual without either a college major or minor in English. In fact, students in schools with the highest minority enrollment have less than a 50% chance of having a science or math teacher who holds both a license and a degree in the field that he or she is teaching. It is ludicrous to expect these children to achieve at higher

levels when we provide them with teachers who do not know their subject areas.

H.R. 6 also addresses this problem by providing loan forgiveness to teachers who teach in high poverty elementary and secondary schools. An amendment offered by Representative Graham (R-SC) and Representative Kildee (D-MI) was accepted that allows teachers to have their student loan forgiven if they teach for three academic years in a high poverty school. The Committee hopes this provision will help retain quality teachers in these schools and reduce teacher shortages in these areas.

Although there is a debate with respect to the relative impact a “qualified” teacher has upon student success, common sense tells us that students do better if their teachers are knowledgeable in the subjects they teach—“you can’t teach what you don’t know.” Professor William Sanders of the University of Tennessee, who has studied the impact of teacher qualification on student achievement made the following conclusion: “What we’ve consistently found, starting back in the 80’s, is that when compared to class size or the ethnicity of the student, or whether they are on free or reduced price lunch, all of these things pale in comparison to the effectiveness of the individual classroom teacher.” Other researchers, including Dr. Ronald F. Ferguson, at Harvard, found that teacher qualifications are the single most important determinant of student test scores, having four times more impact on test scores than class size.

In response to these findings, the Committee has focused the Teacher Quality Enhancement Grants on addressing issues of quality, while providing States flexibility in implementing such initiatives.

Specifically, these grants will support efforts in States like Pennsylvania, which is working to increase the quality of teachers through a variety of approaches. This includes setting more challenging admissions standards for schools of education; implementing rigorous academic and curricular standards in teacher-training programs; setting higher qualifying examination scores for teacher certification; and expanding alternative routes to teacher certification.

As part of this focus on quality, another major focus of these grants is to encourage States to hold teacher preparation institutions more accountable for preparing quality teachers. The need to improve teacher preparation programs in colleges of education has received significant attention recently. There is growing consensus that these institutions have moved away from focusing on “what to teach” and instead focus too much on “how to teach.”

Responding to proposals to send funds to schools of education in hopes of their improvement, E.D. Hirsch, Jr., President, Core Knowledge Foundation, stated,

It would be unwise to spend any taxpayer money that finds its way into schools of education. Schools of education, are currently the origins of our problems, not their solution. Still, more generally, it is undesirable to channel money to administrative entities that are populated by education postgraduates or ex-professors of education, all

of whom tend to share a self-defeating emphasis on process rather than on knowledge. Unfortunately, this caveat applies to most state departments of education, to most accrediting organizations like NCATE, and to many grant-giving organizations like the education division of the National Science Foundation.”

As criticism of these institutions continues to escalate, current solutions to improve these schools of education have not yet achieved widespread support. In particular, efforts by the National Council for Accreditation of Teacher Education (NCATE) to accredit these schools has been met with resistance by those who claim that such accreditation has little or no impact on teacher quality.

During the Committee’s February 24, 1998 hearing, Eugene W. Hickok, Pennsylvania Secretary of Education also commented on NCATE. He testified:

The National Council for Accreditation of Teacher Education (NCATE) program approval process is extremely labor intensive and very expensive for the schools that seek the Council’s accreditation. It places far less emphasis on the rigorous academic quality measures that will be required under Pennsylvania’s initiative. Our experience in Pennsylvania has been that NCATE-approved schools over-emphasize education methods courses at the expense of content-area studies vital for teachers’ future success and professional stature.

Clearly, there is not sufficient evidence to support any particular initiative to improve schools of education. It is for this reason that under the Teacher Quality Enhancement Grants, Governors, (with certain exceptions with respect to State laws and State Constitutions), are provided the opportunity to receive grants to assist in their efforts to improve their schools of education. Specifically, the bill includes a priority for the receipt of funds to those Governors implementing reforms which hold institutions of higher education with teacher preparation programs accountable for preparing teachers who are highly competent in the academic content areas in which they plan to teach. Under the bill, these initiatives may also be undertaken through Partnerships described below.

A significant provision included under these grants is a strict accountability measure for any institution of higher education preparing teachers within States receiving funds. Specifically, in order to receive funds a State must demonstrate that 80 percent of graduates of each of the exemplary institutions of higher education in any Partnership who enter the field of teaching pass all applicable State qualification assessments of new teachers. Such assessments must include an assessment of each prospective teacher’s subject matter knowledge in the content area or areas in which the teacher provides instruction. A higher standard is set prior to subsequent funds going to the State, in that all institutions of higher education with teacher preparation programs must demonstrate a 70 percent threshold. To ensure that States do not simply make their test less difficult in order to allow more graduates to pass, the language also requires states to use an assessment “at least as rigorous as those in place on the date of enactment of this Act.”

In response to the significant evidence showing a general lack of academic knowledge of teachers in the subject areas in which they teach, the Teacher Quality Enhancement Grants also promote State initiatives to reform State teacher certification requirements. Specifically, these reforms are intended to ensure that current and future teachers possess the necessary academic content knowledge in the subject areas in which they are certified and assigned to teach.

The Committee also notes the limits of initiatives to implement a National teacher certification. One initiative currently being undertaken by the National Board for Professional Teaching Standards has failed to generate the systemic change in quality originally envisioned, despite nearly \$60 million in Federal expenditures over seven years.

Eugene Hickok, Secretary of Education in Pennsylvania illustrated this fact during a recent Committee hearing. He testified that "with only two of the 13 Master Teacher standards established by the National Board to evaluate Master Teachers, I am not convinced that this distinction rivals the rigorous content preparation that will be required for all teachers under Pennsylvania's proposal * * * While we watch the National Board with interest, we perceive its emphasis, like NCATE, to be too weighted in the traditional School of Education mind set of methodological training."

The 1992 Committee report on the reauthorization of the Higher Education Act provided the first authorization for the National Board. Although at the time, funding was intended to be "seed" money and funds were to be matched by the Board by 100%, this appears to no longer be the case, as efforts to increase the reliance on Federal funding expands. H.R. 6 includes a prohibition of Federal funds to be spent on this Board.

Another important focus of the Teacher Quality Enhancement Grants is to encourage the use and expansion of high quality programs which provide alternative routes to teaching for individuals such as paraprofessionals, former military personnel, and mid-career professionals. These programs provide opportunities for a wide variety of qualified individuals to enter the teaching profession.

According to C. Emily Feistritzer, Director, National Center for Educational Information, "Despite the growing interest in alternative routes for certifying teachers, most states' programs are underutilized, due primarily to opposition from state officials and colleges within the state that control teacher education and certification." This, despite the fact that these programs have provided a viable pathway for many minorities into the nation's teaching force. Mrs. Feistritzer also notes that, "Nationally, nine percent of public school teachers are minorities. This compares with about a third of teachers coming through alternative routes who are minorities." Evidence also suggests that expanded use of these programs could help meet the demand for teachers in inner cities, especially in bilingual education, special education, mathematics and science.

A major goal of this Committee has been to ensure that Federally funded programs are built upon a system of accountability. Therefore, the Teacher Quality Enhancement Grants have strong reporting and accountability requirements. Governors receiving

these funds must annually report to the Secretary of Education and to the Congress how they have met the following criteria in order to continue receiving these grants:

Raising the State academic standards required to teach;

Increasing the percentage of classes taught in core academic subjects areas by teachers fully certified by the State to teach in those subject areas;

Decreasing the shortage of qualified teachers in poor urban and rural areas; and,

Increasing opportunities for enhanced and ongoing professional development that improves the academic content knowledge of teachers in the subject areas in which they are certified to teach or in which they are working toward certification.

The Committee believes that these accountability measures will ensure that these grants provide incentives to States to improve the quality of teacher preparation by focusing on the academic content area teachers must know in order to be certified to teach. Based on the evidence that the Committee has heard through experts testifying at our hearings, the Committee believes that improving the quality of our nations teaching force should be a priority.

H.R. 6 also holds teachers accountable to parents by requiring that local educational agencies who received funds under this program through a partnership make available to parents the qualifications of their student's classroom teacher. Specifically, parents must be informed, upon request, about the qualifications of their child's teacher both generally and with regard to the subject matter in which the teacher is providing instruction. The Committee believes this is another tool for parents to determine whether teachers are qualified to teach the subject matter their child is studying. Similar language was included in Chairman Goodling's Reading Excellence Act that passed the House unanimously.

Finally, H.R. 6 has specific prohibitions to ensure that nothing in this part shall be construed to permit, allow, encourage or authorize any Federal control over any aspect of private, religious or home schools. In addition, H.R. 6 does not bar such schools from participation in programs or services provided by these grants. Also, H.R. 6 ensures that nothing in this part permits, allows, encourages, or authorizes any national system of teacher certification.

The Committee is adamant in its position that State and local communities must determine the qualifications of their teachers and must, in the end, be the ones who hold their teachers accountable. These Teacher Quality Enhancement Grants are only an incentive to help States boost their own State standards for teachers and help improve the quality of teachers graduating from colleges of education in their States.

TITLE III—INSTITUTIONAL AID

Title III of the Higher Education Act provides assistance to Historically Black Colleges and Universities (HBCUs) and other institutions of higher education that enroll large numbers of minority students and students from low-income backgrounds. To be eligible for funds under Title III, institutions must have low educational and general expenditures as compared to other similar institutions.

H.R. 6 makes significant changes to Title III, designed to expand the authorized activities to reflect the increased use of technology and new communication technologies in providing a quality higher education. In addition, schools which receive Title III grants may use up to 20% of those grants for establishing and/or improving their endowment funds in order to promote increased self-sufficiency on the part of these institutions. Provisions formerly included in Title III that related to Hispanic-Serving Institutions have been relocated to Title V, Developing Institutions, while the Minority Science and Engineering Improvement Programs formerly contained in Title X have been transferred to Title III as a new Part D. The other changes made are substantially technical and are designed to improve the administration of the program.

Part A, strengthening institutions

Part A of Title III provides Federal financial assistance to strengthen institutions of higher education that are in severe financial hardship. Funds can be used for a variety of purposes, including faculty development, funds and administrative management, the joint use of libraries and laboratories, student services, improving facilities for Internet or other distance learning instruction capabilities and establishing or improving an endowment fund. Institutions that are eligible for Title III funds under Part A must engage in a competition for these funds.

In light of the relatively low level of funding compared to the large number of applications for Part A funds, the Committee has included a provision requiring institutions that receive a grant to wait two calendar years before applying for another grant. The Committee believes that a waiting period is necessary in order to allow many different institutions to benefit from Part A funds. The Committee did hear from many Part A institutions about the rigors of the application process and the expense associated with simply applying for funds. In order to address their concerns, the Committee adopted a provision instructing the Secretary of Education to develop a preliminary application for use by institutions. The Committee intends that such a form be designed to allow institutions to apply without incurring great expense.

The Committee has included in Part A of Title III a new Section 316 to provide assistance to Tribally Controlled Colleges and Universities. The Committee believes the needs of these colleges are sufficiently strong to warrant a separate provision and separate authorization. An institution that qualifies and receives support under this provision may not, however, concurrently receive assistance under either Part A or Part B of this Title. Hispanic-Serving Institutions were formerly included in this section, but provisions related to Hispanic-Serving Institutions have been transferred to Title V.

Part A is authorized to be appropriated at (other than section 316) \$135,000,000 for fiscal year 1999 and such sums for the four succeeding fiscal years. Section 316 is authorized to be appropriated at \$10,000,000 for fiscal year 1999 and such sums for each of the four succeeding fiscal years.

Part B, strengthening historically black colleges and universities

Part B authorizes a formula grant program for HBCUs with undergraduate programs, as well as a separate program for certain designated HBCU graduate and professional programs and schools. To be eligible for funds under this Part, an institution must have been established prior to 1964 with the ongoing mission of educating African Americans. In general, the activities authorized under this Part are similar to the activities authorized under Part A. Applicants for funds under this Part must provide the Secretary of Education measurable goals for the applicant's financial management and academic programs and a plan for achieving those goals. At the hearing on June 26, 1997, before the Subcommittee on Post-secondary Education, Training and Life-Long Learning, Dr. Thomas Cole, Jr., President of Clark Atlanta University said, "There is consensus in the HBCU community on limiting our recommendations with respect to Title III because the program is working well and should be reauthorized with only modest changes." The Committee took Dr. Cole's statement seriously and made only minor changes with respect to Part B.

The Committee recognizes that Title III aid has been extremely important to the enhancement of HBCUs. Grants awarded under this title have been an integral part of the progress of HBCUs toward excellence and self-sufficiency. To add to the spectrum of effective uses of these grants, H.R. 6 amends Part B to mirror Part A by allowing institutions to use up to 20% of funds awarded under Part B to establish or improve endowment funds. Amounts used for this purpose must be matched by an equal or greater amount from non-Federal funds.

For Part B, other than Section 326, there are authorized to be appropriated \$135,000,000 for fiscal year 1999 and such sums as may be necessary for the four succeeding fiscal years.

Section 326 of part B, graduate institutions

African Americans continue to be underrepresented in the health and legal professions and in doctoral programs. Despite their small size and number as compared to the majority of U.S. institutions, HBCUs have been more effective than other institutions in producing African American graduate students. According to the National Association for Equal Opportunity in Higher Education, HBCUs graduate on a per institution basis, three and one half times more African American PhDs than all majority U.S. institutions combined. Title III, Section 326, has been a good investment as all sixteen of the institutions currently receiving aid under this program have developed outstanding programs and enhanced their applicant pool. In light of their success, the Committee has decided to include additional eligible institutions for purposes of Section 326. These two new institutions are Norfolk State University and Tennessee State University.

H.R. 6 provides a mechanism for adding these two new institutions without adversely affecting the awards to the existing sixteen schools. H.R. 6 also includes new provisions for allocating funds to all schools when total funding exceeds \$25,000,000. All newly appropriated funds above the FY 1998 level will be distributed based upon a formula that takes into account:

- (i) the number of doctoral or first professional degree students enrolled in an eligible program;
- (ii) the number of graduates from the qualified programs for the previous year; and,
- (iii) the average cost of instruction for all students enrolled in the qualified programs.

The Secretary is directed to develop the formula guidelines and share them with the sixteen institutions for comment. The Committee believes that such a formula based on productivity would enhance the Section 326 program. For Section 326, there are authorized to be appropriated \$35,000,000 for fiscal year 1999 and such sums as may be necessary for the four succeeding fiscal years.

Part C, endowment challenge grants

The Endowment Challenge Grant Program was established to ensure that the Federal government play a significant role in increasing the financial stability of developing institutions and HBCUs. Although funding for this Part has not been appropriated for the past several years, the Committee has retained the current provision.

For Part C, there are authorized to be appropriated \$10,000,000 for fiscal year 1999 and such sums as may be necessary for the four succeeding fiscal years.

Part D, Minority Science and Engineering Improvement Program

The Minority Science and Engineering Improvement Program is designed to effect long-range improvements in science and engineering education, and improve support programs for minority students enrolled in science and engineering programs at predominantly minority institutions. The program provides support for both minority students and institutions to improve access and program quality in the areas of science and engineering. It also calls for interagency cooperation within the Department of Education and within Federal, State, and private agencies that carry out programs to improve the quality of science, mathematics, and engineering education. Originally contained in Title X of the HEA, its provisions have been moved to Part D of Title III.

For Part D, there are authorized to be appropriated \$10,000,000 for fiscal year 1999 and such sums for the four succeeding fiscal years.

TITLE IV—STUDENT ASSISTANCE

Part A, grants to students in attendance at institutions of higher education

Subpart 1, Federal Pell Grants

Generally considered the foundation of student assistance, the Federal Pell Grant Program received a great deal of attention by the Committee in this reauthorization. Since 1973, when awards were first made to undergraduate students from low-income families to help them finance their education, the annual number of awards has grown from 176,000 recipients to 3.6 million in the 1995–96 academic year. After years of little or no increase to the appropriated maximum Pell Grant, Congress began providing seri-

ous increases to the Pell Grant Program starting with academic year 1996–97. For 1996–97, the increase was \$130 for a maximum of \$2,470. This maximum was increased again for the 97–98 academic year by \$230 for a new maximum of \$2,700. Then, for the 98–99 academic year, the Pell Grant maximum received a \$300 increase, the largest single year increase in the history of the program. In actual budget terms, the taxpayer funding of the Pell Grant Program has gone from \$2.4 billion in 1980 to over \$7 billion by 1998.

The Committee strongly supports the continued increase to the appropriated maximum Pell Grant. The authorized levels set in H.R. 6 reflect this commitment by establishing levels designed to reach a \$5,100 maximum by academic year 2002. The most recent statistics clearly indicate that the Pell Grant Program continues to serve very low-income students and families who will greatly benefit from increases to the appropriated maximum. The Department of Education's most recent student aid survey indicates that 54% of all Pell Grant recipients had incomes of less than \$10,000 when applying for student aid.

The Committee continues the changes made to the award rules in the 1992 Amendments to ensure that all needy students receive awards proportional to their need, while also including tuition-sensitivity in Pell Grant awards. In addition, the Committee recognizes that a \$750 allowance for childcare or disability related expenses is insufficient in today's economy for most students. The Committee doubles the allowance to provide additional assistance to students having these special expenses.

The Committee recognizes the importance of expanding Federal Pell grant eligibility to students who are continuing to make satisfactory progress in their education yet cannot complete their degrees within the time frame prescribed by current law. The 1992 Amendments also recognized this important issue by eliminating the requirement that a student will be eligible for Federal Pell grants for only 5 or 6 years, if in a 4 or 5 year program respectively. At that time, the Committee demanded close oversight of this particular issue to ensure that no misuse of Federal money was perpetrated by students who may deliberately extend their participation. To date, we have not seen any evidence of fraud with respect to this effort to assist part-time students and we continue the expansion adopted in 1992.

The Committee has taken an additional step toward improving the integrity of the Pell Grant Program by including a provision that has long been advocated by Representative Roukema (R-NJ). Currently, an institution of higher education which has cohort default rates in excess of 25% for three consecutive years loses its eligibility to participate in the student loan program. However, such an institution has been free to continue to participate in the Pell Grant Program. Under H.R. 6 that is no longer the situation. An institution that becomes ineligible to participate in the student loan program due to high default rates will also be ineligible to participate in the Pell Grant Program. This provision is prospective in nature and does not affect the eligibility of an institution deemed ineligible due to final default rate determinations that are prior to the 1996 fiscal year. In addition, no institution will be sub-

ject to this provision until it has had an opportunity to fully appeal any default rate determination made by the Secretary.

Subpart 2, Federal Early Outreach and Student Services Programs

In recognition of the Committee's belief that information, counseling, academic services, and early outreach activities are an integral part of the student assistance program aimed at achieving equal educational opportunity, the Committee has continued and strengthened the comprehensive approach to providing information and services currently found in Subpart 2.

The mainstay of providing counseling, academic support, early outreach and information services to economically disadvantaged students are the Federal Trio Programs and the National Early Intervention Scholarship and Partnership Program. To those programs the Committee has added the High Hopes for College Program which has been championed by Representative Fattah (D-PA) in order to promote early college awareness activities to students and parents who may not have access to information about college and financial aid.

Chapter 1—TRIO Programs

Since the initial authorization of the Higher Education Act in 1965, the importance of the programs authorized under what is now termed the TRIO Programs has become increasingly recognized. The TRIO Programs include Upward Bound, Talent Search, Student Support Services, Educational Opportunity Centers, and Ronald E. McNair Postbaccalaureate Achievement. Early intervention, access and retention services are an essential component of the Federal strategy to ensure equal educational opportunity.

The Committee believes that the design of the TRIO programs as it has evolved is sound. Widespread support of TRIO programs in communities across the nation, in the Congress and within the Administration confirm that belief. Accordingly, a number of the changes made in the TRIO programs designs in this bill are a logical extension from twenty-five years of program experience.

The increase of the authorization level to \$800 million reflects the Committee's confidence in the strength of the TRIO design as well as the conviction that TRIO services must be expanded to enroll a larger percentage of the eligible population. The Committee notes that presently a very small percentage of eligible youth and adults are served.

Many of the changes reflected in H.R. 6 are designed to improve and streamline the operation of the TRIO programs. Minimum grant levels, by program, are clearly established in order to provide sufficient funding levels for programs to operate.

Grants are all established for four-year time periods. Sponsoring institutions or agencies are encouraged to coordinate all the TRIO programs operating at their particular institution or organization and one single director may have responsibility for administering more than one program regardless of the funding source.

H.R. 6 continues the requirement of evaluations of the TRIO programs. In addition, H.R. 6 modifies the purpose of the evaluations to specifically investigate the effectiveness of alternative and inno-

vative methods within the TRIO Programs for increasing access to and retention of students in postsecondary education.

H.R. 6 expands the list of services which may be provided by Talent Search and intends to address areas with high drop out rates by allowing these projects to provide assistance to students who have dropped out of secondary school but who wish to return or enter programs designed for completing a general education development program. Listings of permissible services were included in this subpart for Student Support Services and Upward Bound in 1980. As with those programs, the Committee does not intend that by including a listing of permissible services for Educational Opportunity Centers and Talent Search, each individual project is required to provide all of the services. Such determinations can only be made by individuals with knowledge both of the difficulties experienced by disadvantaged students in a given institution or locality and of the locally funded resources available to such students.

The Committee has continued the purpose of Student Support Services Programs in H.R. 6. Student Support Services Programs are designed to increase college retention and graduation rates, to increase transfer rates and to foster a climate supportive of the success of low-income students, first-generation college students and students with disabilities. The Committee believes that achievement of each of these goals is necessary before the nation can realize its goal of assuring equal educational opportunity in postsecondary education and that Student Support Services Programs have a critical role to play in this regard.

The Committee believes that the success of Student Support Services Programs rests, in large part, upon the commitment of the sponsoring institutions to the success of students from low-income families, first-generation college students and students with disabilities.

H.R. 6 alters one assurance required from institutions applying for a Student Support Services Program grant. Currently, institutions must provide an assurance that they will offer sufficient financial assistance to meet a student's full financial need. The Committee is concerned about the possibility of overwhelming a student with too much loan debt as a means of meeting this assurance. The Committee also recognizes that in some cases loan debt is the only aid available due to the limited aid available at a particular institution. Therefore, the Committee has modified the requirement to emphasize the need to minimize a student's debt burden when fulfilling the requirement of offering financial assistance to meet full financial need.

Chapter 2—National Early Intervention Scholarship and Partnership Program

Chapter 2 of this subpart authorizes the National Early Intervention Scholarship and Partnership Program which is continued under H.R. 6. This program was first created in 1992 to encourage States to guarantee low-income students that, if they complete high school, they will receive the financial assistance needed to attend a higher education institution. In addition, the program is designed to provide counseling and mentoring services to students at an early age in order to prepare them for college. In fiscal year 1996–

97, nine states participated in the program. A total of \$3.1 million in Federal grant money was overmatched by the participating states that contributed \$4.4 million. During 1996–97, more than 44,000 students received early intervention services under this program. H.R. 6 continues the current authorization of \$200,000,000 for fiscal year 1999 and such sums for the succeeding four years for this program.

Chapter 3—High Hopes for College

Representative Fattah (D-PA) offered an amendment that was adopted by the Committee to authorize the High Hopes for College Program. The purpose of High Hopes is to promote a strong early intervention initiative aimed at narrowing the gap in college enrollment between students from high and low income families. Recent statistics continue to reflect that a large gap exists in college enrollment based on financial circumstances. Evidence suggests that barriers to college education for low-income students appear to include low educational expectations and poor academic achievement. To combat these barriers, it is critical that academic services, mentoring, counseling and tutoring be provided to students.

The new High Hopes Program would provide an array of early intervention services to middle schools serving a high percentage of low-income students. The partnerships created under High Hopes must include a degree-granting institution of higher education, a middle school that has at least 50 percent of its students eligible for free or reduced price lunches, the high schools that these students will attend and at least two community organizations. Applicants who include tuition assistance or guarantees from non-Federal sources may be given a preference by the Secretary in awarding these grants. The High Hopes Program is authorized at \$140 million for fiscal year 1999 and such sums for the succeeding five fiscal years.

Chapter 4—Frank Tejada Scholarship Program

Representative Romero-Barcelo (D-PR) offered an amendment that was adopted by the Committee to authorize the Frank Tejada Scholarship Program. The purpose of this new program is to recruit and train teachers who are proficient in both Spanish and English and who show academic promise. To receive a scholarship under this program a student must agree to teach in a public elementary or secondary school in which there is a demonstrated need for Spanish-speaking teachers and professionals for no less than one year for each year of scholarship assistance. This program is authorized at \$5,000,000 for fiscal year 1999 and such sums for the four succeeding fiscal years.

Chapter 5—Campus-Based Child Care

Representative Roukema (R-NJ) offered an amendment that was adopted by the Committee to authorize a Campus-Based Child Care Program. This new program authorizes the Secretary to award grants to institutions of higher education to assist in providing campus-based child care services to low income students. With more and more students attending postsecondary education who are considered non-traditional students, the need for affordable

child care on campus has become an important issue. The 1995–96 data collected by the Department of Education indicates that undergraduates were nearly evenly divided between those considered dependent versus independent. Independent students are those who are married, over the age of 24, a graduate or first professional student, a veteran or a student with legal dependents other than a spouse. As more people return to college for new training as demanded by the nation's economy, the numbers of independent students can expect to continue to increase.

Under the campus-based child care program, institutions wishing to receive a grant will have to demonstrate the need of low income students at the institution for child care services. Institutions will also have to identify resources which it can draw upon to support the child care program and demonstrate that any resources used for this purpose will not result in increases in student tuition. The Campus-Child Care Program is authorized at \$30,000,000 for fiscal year 1999 and such sums for the four succeeding fiscal years.

The existing programs under Chapters 3 through 8 (Chapter 3—Presidential Access Scholarships; Chapter 4—Model Program Community Partnership and Counseling Grants; Chapter 5—Public Information; Chapter 6—National Student Savings Demonstration Program; Chapter 7—Preeligibility Form; and Chapter 8—Technical Assistance for Teachers and Counselors) are all unfunded programs which have been repealed in H.R. 6.

Subpart 3, Federal Supplemental Educational Opportunity Grants

The Committee believes that the Federal Supplemental Educational Opportunity Grant (Federal SEOG) program is of critical importance to students who demonstrate exceptional need for supplemental grant support in addition to the funds provided by the Federal Pell Grant Program. The 1986 amendments emphasized the interaction between these two grant programs by requiring that at least three-quarters of the recipients of Federal SEOG awards at a given institution of higher education also be recipients of Federal Pell Grants. The 1992 amendments dealing with student eligibility required institutions to make SEOG awards to students with exceptional need and to give priority to students receiving Pell Grants. Although the Committee heard testimony that the language of this provision was restricting institutions from awarding Federal SEOG funds to students with considerable need, the Committee continues to believe that the coupling of SEOG awards and Pell Grant awards is an important feature of this program and helps serve those who have the greatest financial need. As a result, no changes were made to this provision.

H.R. 6 requires that institutions of higher education shall make SEOG funds available to independent and part-time students. However, the Committee has deleted the overly restrictive requirement that required a strict proportion of funds to be allocated to these students. The Committee intends that while institutions are given discretion in allocating an equitable amount of funds for non-traditional students, this discretion should not result in a reduction of funds for these students. The Committee intends to closely follow

this matter in order to ensure that nontraditional students continue to receive fair participation in the SEOG Program.

With respect to the formula for distributing campus-based aid, including SEOG funds, the Committee has made one significant change. The current formula distributes funds according to a two-part statutory formula. The first part, the "base guarantee" considers an institution's program expenditures in a previous year. The second part, based on institutional need for additional funding, allocates the amount remaining after the base guarantees are fully funded by providing one-fourth of the remaining funds to institutions on a pro rata basis (pro rata) and three-fourths to institutions based on the institutions need (fair share). Since 1986, an institution's base guarantee has been the principal determinant of its current-year allocation. Thus, today's allocation of campus-based funds largely reflects a 20-year-old distribution of program funds.

In recognition of the changing demographics on college campuses, the Committee has decided to modify the formula for distributing campus-based funds. At the same time, the Committee does not want to cause a disruption at campuses across the country that could occur if there are dramatic shifts in program funds between institutions. Therefore, the Committee decided to modify the formula by dropping the pro rata part and allowing all funds in excess of the base guarantee amounts to be distributed on a fair share basis. Such a change should allow institutions with increasing enrollments and populations of needy students to receive increases in campus-based funding.

H.R. 6 authorizes \$675,000,000 for fiscal year 1999 and such sums for the succeeding four years for this program.

Subpart 4, State Student Incentive Grants

The Committee believes that the State Student Incentive Grant (SSIG) Program is a successful partnership between the Federal Government and states. However, with Republican and Democrat administrations proposing the elimination of the program, the Committee has decided to restructure the program in order to more effectively allow states to serve the needs of their students. H.R. 6 includes a new Special Leveraging Educational Assistance Partnership Program for those states that are willing to increase the current match required to obtain funds whenever appropriations exceed \$25 million. States that apply for additional funds may use the funds to assist needy students by:

- (i) increasing state grant aid;
- (ii) carrying out transition programs from secondary to post-secondary education;
- (iii) establishing financial aid programs for students entering the teaching field, computer-related fields, or any other field of study determined by the state to be critical to the state's workforce needs;
- (iv) carrying out early intervention programs; and,
- (v) awarding merit aid to needy students.

H.R. 6 authorizes \$105,000,000 for fiscal year 1999 and such sums as necessary for the succeeding four fiscal years.

*Subpart 5, Special Programs for Students Whose Families
Are Engaged in Migrant and Seasonal Farmwork*

Migrant students are one of the most severely educationally deprived populations in the United States. Therefore, the Committee believes that the Secretary, in administering the programs under Title IV, should take into consideration how such programs as Federal Pell Grants, student loans, Federal College Work-Study, and TRIO programs can meet the needs of migrant students.

H.R. 6 continues both the College Assistance Migrant Program (CAMP) and the High School Equivalency Program (HEP) and requires grant recipients to coordinate projects with other local, state and Federal programs in order to maximize the resources available for migrant students. In addition, H.R. 6 instructs the National Center for Education Statistics to collect postsecondary education data on migrant students. H.R. 6 authorizes \$15,000,000 for fiscal year 1999 and such sums for the succeeding four years for the HEP program and \$5,000,000 for fiscal year 1999 and such sums for the succeeding four years for the CAMP program.

Subpart 6, Robert C. Byrd Honors Scholarship Program

H.R. 6 extends the authorization for Byrd Honors Scholarship Program. Under this program, the Secretary makes grants to states to enable states to award scholarships to individuals who have demonstrated outstanding academic achievement and who show promise of continued academic achievement. This program is authorized to be appropriated at \$40,000,000 for fiscal year 1999 and such sums for the succeeding four years for this program.

H.R. 6 repeals Subpart 8—Special Child Care Services for Disadvantaged College Students.

Part B, Federal Family Education Loans

In modifying the current Federal Family Education Loan (FFEL) Program, the Committee adopted recommendations from a wide range of program participants. The Committee's main goals in this reform effort were to resolve the pending crisis in the FFEL Program with respect to the new interest rate formula, improve service to students and institutions of higher education, and ensure the overall stability in the loan program. A bipartisan agreement to maintain a strong FFEL Program and a strong Direct Loan Program established the framework for the changes adopted by the Committee.

Interest Rates

Throughout the reauthorization process, one of the biggest challenges facing Members of the Committee has been attempting to reach a consensus on the optimal student loan interest rate for the Federal student loan programs. H.R. 6 establishes identical interest rates for loans in both the FFEL Program and the Direct Loan Program. These rates resulted from extensive discussions and negotiations over a period of many months. The Student Loan Reform Act of 1993 changed the index for establishing interest rates on these loans. Prior to the Student Loan Reform Act, interest rates had always been tied to 91-day Treasury bills. However, as part of the changes associated with the creation of the Federal Direct

Student Loan program, the index for establishing interest rates changed to one based on the 10-year Treasury bond. This rate change is scheduled to occur on July 1, 1998, and if not addressed will disrupt the Federal Family Education Loan Program (FFEL Program), which provides nearly 70 percent of this country's Federal student loans.

After working extensively with all parties involved—The United States Student Association (USSA), the United States Public Interest Research Group (US PIRG), the American Council on Education (ACE), the American Association of State Colleges and Universities (AASCU), the National Association of Independent Colleges and Universities (NAICU) and other members of the higher education and lending communities—it became clear to Committee Members that there was a consensus in three key areas. First, all parties agreed that tying the interest rate to a long-term instrument like the 10-Year Treasury bond would not work. Second, no one believed that the Direct Student Loan Program would be a viable alternative in the event that private loan capital became unavailable. Third, as the March 5, 1998, hearing before the Subcommittee on Postsecondary Education, Training and Life-Long Learning, showed the interest rates for lenders proposed by the Administration were too low to ensure widespread lender participation.

For example, Mr. Jon Veenis, President of Norwest Student Loan Center, testified that “our survey of the major FFEL lenders and the Ernst & Young analysis indicates that a train wreck will occur if the Gore proposal is enacted.” In discussing the Administration proposal, Mr. Paul Carey, Executive Vice President of Marketing and Servicing for Sallie Mae, Inc., had this to say, “The student at Hopkins, Harvard, or Stanford may well get their loans . . . The students attending state schools, community colleges, or learning a trade will not.” A recent report by the Congressional Budget Office (CBO) affirms this position, and shows that if the Administration's interest rates were implemented, only graduate and professional students at a few select colleges and universities would likely have access to private student loan capital.

The Committee is keenly aware of the burden being placed on our youth by student loan debt. Members are committed to ensuring that the interest rate on Federal student loans is kept as low as possible while maintaining fiscal discipline within the Federal budget. However, the Committee also recognizes that there is a point at which lenders will leave the program. That point is reached when their return on making these loans falls short of the return they could make by investing elsewhere.

Under this legislation, students will receive historically low interest rates. For new loans made after July 1, 1998, the interest rates borrowers will pay during the in-school and grace periods will be the equivalent of the 91-Day Treasury bond rate + 1.7 percent. During the repayment period, borrower interest rates will be the equivalent of the 91-Day Treasury bond rate + 2.3 percent. Both will remain capped at 8.25 percent. In today's terms, this means interest rates for students will drop from the current rate of 8.25 percent down to 7.43 percent during the repayment period. This is the lowest interest rate on these loans in 17 years.

At the same time, the amount lenders are paid will be reduced by 30 basis points, to a rate equal to the 91-Day Treasury bond rate + 2.2 percent during the in-school and grace periods, and equal to the 91-Day Treasury bond rate + 2.8 percent during the repayment period. The Committee believes this solution will ensure uninterrupted access to private capital for our nation's students.

The higher education community is supportive of this proposal. The major student groups have described this proposal as "a realistic, fair, and even-handed compromise that protects students' need for lower borrower rates." The American Council on Education and 10 other major higher education groups representing over 3,600 colleges and universities has praised the fact that the proposal "ensures the continued availability of capital in the guaranteed student loan program."

Finally, the Committee notes that the best way to reduce the debt burden for students is for colleges and universities to keep their prices low. Over the past 15 years we have seen college prices increase at two-to-three times the rate of inflation. The Committee challenges every college president in the nation to reduce the price of an education at his or her institution because the Federal student aid programs will never be able to keep up with costs that continue to increase at such a pace.

Guaranty Agency Financing

The new guarantor-financing model included in the Committee bill reflects a reformed administrative and financing structure that will achieve several goals of the Committee. First, the model provides incentives for greater efficiencies on the part of guaranty agencies since certain funds will now be the property of each individual agency. This is a major contrast to current law that dictates that all funds held by a guaranty agency belong to the Federal Government and are subject to recall at any time by Congress, thereby eliminating any incentive for guaranty agencies to operate more efficiently and produce savings.

Second, the model increases the current risk sharing for defaults from 98% to 95% which will cause all agencies to use their best efforts to prevent defaults. This provision addresses an often-heard criticism of the FFEL Program that 98% risk was not sufficient to have any impact on the practices of guaranty agencies. Third, the model decreases funds retained on defaulted loans from 27% to 24%. This provision also addresses an often-heard criticism that guaranty agencies have an incentive to allow loans to default due to the high collection retention rate. The combination of increased risk and lower retention rates should result in improved default prevention activities and greater collection efforts in the event of default in order to offset the lost revenues from both of these provisions. These changes should silence the criticism of these two aspects of the FFEL Program.

H.R. 6 clearly defines the services for which guarantors are paid and delineates which sources of revenue belong to the Federal Government (the reserve funds) and which are earned by the guarantor for services rendered. Revenues that remain the property of the Federal Government are clearly protected under the Committee bill in order to ensure their proper use by guaranty agencies, as well

as their proper investment. Guarantors will be able to invest the non-Federal funds in new technology, training, and service improvements for the benefit of students and institutions of higher education participating in the FFEL Program. In addition, guarantors will be able to use their funds for a variety of other financial aid activities, such as early awareness programs, state grant and scholarship programs, and other financial aid related programs and services which meet the state and local needs of students, families and institutions of higher education.

H.R. 6 also includes a new provision which allows the Secretary of Education and individual guaranty agencies (not to exceed six) to enter into voluntary agreements for participation in the FFEL Program. The Committee intends that this authority be used to test new and innovative methods for carrying out the types of activities currently required of guaranty agencies under the Higher Education Act in order to find more efficient and effective means of managing the FFEL Program.

Administrative and Programmatic Changes

Throughout H.R. 6, the Committee has modified provisions in order to encourage the use of modern technology. These changes range from the handling of routine inquiries to the processing of deferment requests. For example, the National Association of Student Financial Aid Administrators in their recommendations to Congress, suggested that borrowers be allowed to request forbearance electronically rather than in writing in order to reduce the number of technical and actual delinquencies and defaults. The Committee strongly agrees with this recommendation and encourages the Secretary to allow the use of new technology wherever and whenever possible in order to promote efficiencies among all the participants in the loan programs. The Committee in no way intends to limit the type of communication technologies that may be used for these purposes as the possibilities expand during the course of this reauthorization.

H.R. 6 corrects an oversight of the 1992 Amendments with respect to borrowers attending school on a half-time basis. Prior to the 1992 Amendments, a student attending school on a half-time basis was required to borrow a student loan in order to be eligible for an in-school deferment. The 1992 Amendments changed this provision so that a student would be eligible for a deferment without borrowing another loan. However, the change only applied prospectively leaving some students subject to the old requirement. H.R. 6 corrects this oversight and allows any student attending school on a half-time basis to be eligible for an in-school deferment.

In order to assist students in selecting repayment plans, H.R. 6 allows students to annually change their repayment plan in order to provide flexibility if their financial circumstances change from year to year.

H.R. 6 allows students to receive the benefit of a forbearance of payments on their student loans immediately upon request even though the necessary paperwork has not been filed. Lenders and students will have to collect the appropriate paperwork within sixty days in order to continue the forbearance. In addition, a lend-

er must take into consideration a student's total debt burden when establishing a forbearance agreement.

H.R. 6 continues the current provisions of the Emergency Student Loan Consolidation Act and allows students with FFEL Program loans and/or Direct Loans to obtain a consolidation loan from either program. In order to afford students the greatest option possible, the requirement that a student must first try to obtain a consolidation loan from a lender holding one of his or her loans has been eliminated. Students are free to go to any lender of their choice. In addition, a student who obtains a student loan within 180 days of receiving a consolidation loan may add such loan to the consolidation loan that provides the student the benefit of having only one loan to manage. The Committee deferred action on setting interest rates for consolidation loans and is continuing to study the available options for establishing rates for the FFEL Program and the Direct Loan Program.

As a result of some confusion after passage of the Emergency Student Loan Consolidation Act, H.R. 6 also clarifies that a lender does not have to include Health Education Assistance Loans (HEAL) when making a consolidation loan. Not all lenders participate in the HEAL Program, and those that do not are not able to service HEAL loans in accordance with the rules and regulations of the Department of Health and Human Services. Also, some lenders require a minimum balance for processing a consolidation loan due to the fee they must pay the Federal Government with respect to consolidation loans. H.R. 6 clarifies that a lender is not prohibited from establishing a minimum balance requirement.

H.R. 6 allows loans to students to be disbursed in a single disbursement if the loan is for less than one semester, one trimester, one quarter or four months. Students and financial aid administrators have all requested that the Committee adopt this change. Requiring multiple disbursements for very short periods of time has proven to cause undue and unnecessary hardships on students and unnecessary administrative burdens on institutions.

The Committee has also adopted the recommendation of many institutions of higher education to allow an over award tolerance of \$300 in the FFEL and Direct Loan Programs. The Committee believes this modest over award tolerance is low enough to prevent a student from incurring unreasonable excess debt, but high enough to avert costly administrative burdens for institutions. The \$300 limit is comparable to the over award tolerance currently allowed in other title IV programs.

In an effort to promote deregulation and provide incentives to institutions that keep default rates low, the Committee has included a provision to waive the 30-day delayed disbursement rule for institutions having cohort default rates of less than 10% for three consecutive years. The Committee estimates that approximately 2,000 institutions will benefit from this deregulation initiative. However, any institution that fails to stay below the 10% in subsequent years will again be subject to the delayed disbursement requirement.

The Committee has continued the authority of the Secretary to undertake a program to encourage corporations and other private and public employers to assist borrowers in repaying their loans. The Committee encourages the Secretary to use this authority to

implement new and positive ways to assist borrowers in managing their loan repayment.

Since the 1992 Amendments, great strides have been made in the area of program simplification. There is a single application known as the Free Application for Federal Student Aid (FAFSA), a single need analysis formula, standardized forms and processes implemented by guaranty agencies and many other improvements. The Committee commends all the parties for their efforts in promoting simplification and encourages the continuation of those projects. But, the Committee believes there is more to be done. Specifically, H.R. 6 requires the Secretary to use the FAFSA as the common form for both the FFEL and Direct Loan Programs, instead of only the Direct Loan Program. H.R. 6 also directs the Secretary, in cooperation with representatives involved in the financial aid programs, to develop a master promissory note that will allow for multiyear lines of credit bringing efficiencies and simplicity to the process of receiving student loans.

H.R. 6 continues the current cohort default rate provisions that result in the elimination of institutions from participation in the student loan programs if an institution's rates exceed 25% for three consecutive years. However, the Committee has made modifications to the appeal provisions available to institutions and to the exemption for Historically Black Colleges and Universities, Tribally Controlled Colleges and Universities and Navajo Community College.

In recognition of the fact that some institutions have high cohort default rates because they serve a student population at high risk of default, a safety net was enacted that permits the Secretary to exempt schools from the cohort default provision where exceptional mitigating circumstances make the application of the default triggers inequitable. This safety net, as defined by the Department of Education, has proven to be impossible to meet due to the narrowly defined circumstances under which an institution may qualify for an exemption.

H.R. 6 explicitly defines the criteria for demonstrating exceptional mitigating circumstances that the Secretary is to follow when rendering a decision with respect to an appeal under this provision. The exceptional mitigating circumstance appeal will continue to prove to be difficult for an institution to meet. They will have to serve a large number of low-income students, graduate a large percentage of their students, and place a large percentage of their students in jobs for which they have been trained. The Committee is aware of the difficulty of meeting such a standard. However, after carefully weighing the interest of students and the Federal Government, the Committee determined that the test reflected in H.R. 6 will be fair to those institutions that have a high success rate while serving a high-risk population.

In order to allow an institution to prepare a meaningful appeal, the Committee has revised the current provision dealing with access to loan servicing records. An institution needs adequate access to records in order to submit an appeal to the Secretary. Therefore, the Committee has included language that provides institutions with access to all relevant loan servicing records for both the FFEL and Direct Loan Programs. It is the Committee's intention that the Secretary exclude any loans which were not properly serviced and

therefore ineligible for insurance as demonstrated by the evidence in considering appeals with respect to cohort default rates.

On July 1, 1998, the exemption from program elimination due to high default rates for Historically Black Colleges and Universities, Tribally Controlled Colleges and Universities and the Navajo Community College will expire. These institutions have been exempt from this provision since its enactment in 1988. The exemption was intended to recognize the particular challenges of enrolling high risk students at institutions having limited administrative resources. The Committee believes that it is time to remove this blanket exemption. However, the Committee does not wish to cause the precipitous closure of any institution. Therefore, H.R. 6 allows an institution that has relied on the current exemption for program eligibility purposes to remain eligible as long as the institution complies with the following requirements:

- (i) provides an acceptable default management plan to the Secretary of Education that provides a reasonable assurance that the institution will, by July 1, 2001, have a cohort default rate that is less than 25%;
- (ii) engages an independent third party to assist in implementing such a plan; and,
- (iii) provides the Secretary with evidence of improvement in the institution's cohort default rate and successful implementation of the default management plan.

The Secretary may continue the eligibility of an institution under this provision if he is satisfied that the institution has complied and continues to comply with the default management plan and has made substantial improvement in its cohort default rate.

The Committee has included a special rule which reflects the regulation published by the Department of Education exempting institutions from the cohort default rate penalty if the institution has a participation rate index that is equal to or less than .0375 for any of the three most recent fiscal years. This provision was included in order to address the Committee's concern that schools not be eliminated if they have very few student loan borrowers compared to their overall enrollment.

H.R. 6 modifies slightly the definition of eligible lender for purposes of participation in the FFEL Program and deletes an obsolete provision that requires the filing and maintenance of a plan for doing business by certain participants in the program.

Part C, Federal Work-Study Program

The Committee strongly supports the Federal College Work-Study Program and applauds the administration for its efforts to increase the number of participants to over one million in the 1999–2000 academic year. In support of this target, the Committee has increased the authorization of appropriations for College Work-Study to \$1,000,000,000 for fiscal year 1999 and such sums for the succeeding four years.

The Committee has made several changes to College Work-Study designed to better serve the needs of students and institutions of higher education. In addition, the Committee has included language from Chairman Goodling's Reading Excellence Act in order

to encourage more work study students to perform literacy and tutoring activities in local elementary schools.

H.R. 6 expands the definition of community service to recognize that services designed to improve the quality of life for community residents may be performed on-campus or off-campus. Under current law, community service activities are required to be conducted off-campus, which restricts the number and type of services that can be offered by an institution of higher education. If an institution of higher education can offer a valuable service to the community on-campus, the Committee believes it should be allowed to do so.

The Committee has modified the campus-based formula for College Work-Study in the same fashion as was done for the SEOG Program. The current formula distributes funds according to a two-part statutory formula. The first part, the "base guarantee" considers an institution's program expenditures in a previous year. The second part, based on institutional need for additional funding, allocates the amount remaining after the base guarantees are fully funded by providing one-fourth of the remaining funds to institutions on a pro rata basis (pro rata) and three-fourths to institutions based on the institutions need (fair share). Since 1986, an institution's base guarantee has been the principal determinant of its current-year allocation. Thus, today's allocation of campus-based funds largely reflects a 20-year old distribution of program funds.

In recognition of the changing demographics on college campuses, the Committee has decided to modify the formula for distributing campus-based funds. At the same time, the Committee does not want to cause a disruption at campuses across the country that could occur if there are dramatic shifts in program funds between institutions. Therefore, the Committee decided to modify the formula by dropping the pro rata part and allowing all funds in excess of the base guarantee amounts to be distributed on a fair share basis. Such a change should allow institutions with increasing enrollments and populations of needy students to receive increases in campus-based funding.

H.R. 6 intends to expand the tutoring and literacy activities performed via the College Work Study Program by requiring institutions to use at least 2% of the total funds received under the program for these activities. Of the \$830 million appropriated for College Work-Study in fiscal year 1998, \$16 million would be allotted for these activities under H.R. 6. The provision included in H.R. 6 was taken from Chairman Goodling's Reading Excellence Act that passed the House of Representatives on November 9, 1997. Work-study students will be able to participate as reading tutors for children in preschool through elementary school or work in family literacy projects under this provision. Because these jobs are not always convenient to campus, the Committee has modified the existing work-study reimbursement provision to allow students to be compensated for time spent in both training and travel that is directly related to the tutoring and family literacy activities.

H.R. 6 requires that institutions of higher education make Work-Study funds available to independent and part-time students. However, the Committee has deleted the overly restrictive requirement included in the 1992 amendments that required a strict proportion

of funds to be allocated to these students. The Committee intends that while institutions are given discretion in allocating an equitable amount of funds for nontraditional students, this discretion should not result in a reduction of funds for these students. The Committee intends to closely follow this matter in order to ensure that nontraditional students continue to receive fair participation in the Work-Study Program.

H.R. 6 continues the language included in the 1992 amendments to allow institutions to carry back appropriations from current year funds to pay for previous year commitments. This is to correct a problem presented to the Committee by institutions of higher education. Many students begin summer work-study prior to July 1, the beginning of the fiscal year, but after the academic year ends in May or June. They, therefore, earn funds during one fiscal year which are not payable until the succeeding fiscal year. As a result, institutions currently incur enormous accounting and tracking problems. In addition, H.R. 6 allows institutions to credit a student's account or make direct deposits to a student's bank account with the student's permission. Since we have entered the era of electronic banking, it no longer makes sense to require each institution to cut checks in order to pay work-study earnings.

H.R. 6 increases the allotment of funds that may be used for the Job Location and Development Program from \$50,000 to \$60,000 and expands the type of jobs that may be located or developed to include cooperative education jobs. If funds are used for developing cooperative education jobs, the institution must notify the Secretary and provide assurances that the funds used under this paragraph will supplement and not supplant other available cooperative education funds and the cooperative education job will be related to a student's academic program.

The Committee continues the authorization for Work Colleges and authorizes appropriations of \$5,000,000 for 1999 and such sums for the four succeeding fiscal years.

Part D, Federal direct loans

Part D of Title IV of H.R. 6 continues the Federal Direct Loan Program and the Committee assumes it will coexist with the Federal Family Education Loan Program. All references to the phase-in of the program and transition to the Direct Loan Program have been deleted. Institutions that wish to participate in the program are free to apply as long as they meet the eligibility criteria.

H.R. 6 establishes identical interest rates for Federal Direct Loans as compared to loans made under the Federal Family Education Loan Program. This resulted from extensive discussions and negotiations with respect to interest rates with all participants in the student loan programs. Throughout the reauthorization process, one of the biggest challenges facing Members of the Committee has been addressing the interest rate offered in the Federal student loan programs. The Student Loan Reform Act of 1993 changed the index for establishing interest rates on these loans. Prior to the Student Loan Reform Act, interest rates had always been tied to 91-day Treasury bills. However, as part of the changes associated with the creation of the Federal Direct Student Loan Program, the index for establishing interest rates changed to one based on the

10-year Treasury bond. This rate change is scheduled to occur on July 1, 1998, and if not addressed will disrupt the Federal Family Education Loan program (FFEL), which provides nearly 70 percent of this country's Federal student loans.

After working extensively with all parties involved—The United States Student Association (USSA), the United States Public Interest Research Group (US PIRG), the American Council on Education (ACE), the American Association of State Colleges and Universities (AASCU), the National Association of Independent Colleges and Universities (NAICU) and other members of the higher education and lending communities—it became clear to Committee Members that there was a consensus in three key areas. First, all parties agreed that tying the interest rate to a long-term instrument like the 10-Year Treasury bond would not work. Second, no one believed that the Direct Student Loan Program would be a viable alternative in the event that private loan capital became unavailable. Third, as the March 5, 1998, hearing before the Subcommittee on Postsecondary Education, Training and Life-Long Learning showed, the interest rates for lenders proposed by the Administration were too low to ensure widespread lender participation. A recent report by the Congressional Budget Office (CBO) affirms that position, and shows that if the Administration's interest rates were implemented, only graduate and professional students at a few select colleges and universities would be likely to have access to private student loan capital.

The Committee is keenly aware of the burden being placed on our youth by student loan debt. Members are committed to ensuring that the interest rate on Federal student loans is kept as low as possible. However, the Committee also recognizes that there is a point at which lenders will leave the program. That point is reached when their return on making these loans falls short of the return they could make by investing elsewhere.

Under H.R. 6, students will receive historically low interest rates. For new loans made after July 1, 1998, the interest rates borrowers will pay during the in-school and grace periods will be the equivalent of the 91-Day Treasury bond rate + 1.7 percent. During the repayment period, borrower interest rates will be the equivalent of the 91-Day Treasury bond rate + 2.3 percent. Both will remain capped at 8.25 percent. In today's terms, this means interest rates for students will drop from the current rate of 8.25 percent down to 7.43 percent during the repayment period. This is the lowest interest rate on these loans in 17 years.

At the same time, the amount lenders are paid will be reduced by 30 basis points, to a rate equal to the 91-Day Treasury bond rate + 2.2 percent during the in-school and grace periods, and equal to the 91-Day Treasury bond rate + 2.8 percent during the repayment period. The Committee believes this solution will ensure uninterrupted access to private capital for our nation's students.

The higher education community is supportive of this proposal. The major student groups have described this proposal as "a realistic, fair, and even-handed compromise that protects students' need for lower borrower rates". The American Council on Education and 10 other major higher education groups representing over 3,600 colleges and universities have praised the fact that the proposal

“ensures the continued availability of capital in the guaranteed student loan program”.

Finally, the Committee notes that the best way to reduce the debt burden for students is for colleges and universities to keep their prices low. Over the past 15 years we have seen college prices increase at two-to-three times the rate of inflation. The Committee challenges every college president in the nation to reduce the price of an education at his or her institution.

H.R. 6 also provides the Secretary of Education with the ability to offer repayment incentives to borrowers to encourage on-time repayment. Currently, many lenders in the Federal Family Education Loan Program offer discounts to borrowers who repay their loans on time and the Committee has extended the same opportunity to direct loan borrowers. In order to exercise this authority, the Secretary will have to ensure that such a program can operate on a cost neutral basis and not increase costs to the taxpayer.

Section 458 of Part D has been modified to reflect the new payment structure adopted in H.R. 6 with respect to payments made to guaranty agencies. Under the revised structure, the Committee determined that slight increases in the yearly funding levels under 458 were necessary in order to allow the Direct Loan Program and the Federal Family Education Loan Program to both operate at their current levels.

H.R. 6 gives the Secretary of Education, in consultation with the Secretary of the Treasury, the authority to sell loans if it is determined to be in the best interest of the Federal Government. The Secretary may use funds from any such sales to offer repayment incentives to direct loan borrowers.

Loan Forgiveness for Teachers for Part B and Part D Loans

The Committee adopted an amendment offered by Representative Graham (R-SC) and Representative Kildee (D-MI) which created a loan forgiveness program for teachers in both the FFEL and Direct Loan Programs.

The Committee authorized this new program in order to address concerns about the quality of teachers in low-income schools and the ability of such schools to retain good teachers. A new borrower who takes out a loan may be eligible for loan forgiveness if he or she teaches in a public or other non-profit private elementary or secondary school which is in a school district eligible for assistance pursuant to Title I of the Elementary and Secondary Education Act and which has been determined to be a school in which the enrollment of children counted under section 1124(c) of the Elementary and Secondary Education Act exceeds 30 percent of the total enrollment of the school. To be eligible for loan forgiveness, a borrower must teach for two complete academic years and upon concluding the third academic year, he or she would be eligible for 30% loan forgiveness, 30% upon concluding the fourth year and 40% upon concluding the fifth year of teaching.

Only loans borrowed for the final two academic years of a four-year program, or three in the case of a program of instruction normally requiring five years, are eligible for loan forgiveness. In addition, secondary school teachers must have majored in the subject area in which they are teaching to be eligible for loan forgiveness.

An elementary school teacher must demonstrate, in accordance with state teacher certification or licensing requirements, subject matter knowledge and teaching skills in reading, writing, mathematics and other subjects taught in elementary schools in order to be eligible for loan forgiveness.

By creating this new loan forgiveness program, the Committee hopes that more students will enter the field of teaching and teach in areas where there is a shortage of highly qualified teachers. In addition, by requiring teachers to complete three years of teaching before a portion of their loan is forgiven, the Committee hopes more teachers will stay in the teaching profession.

Part E, Federal Perkins Loans

The Committee has modified the campus-based formula in a way identical to its treatment of the other campus-based programs (SEOG and College Work-Study). The current formula distributes funds according to a two-part statutory formula. The first part, the "base guarantee" considers an institution's program expenditures in a previous year. The second part, based on institutional need for additional funding, allocates the amount remaining after the base guarantees are fully funded by providing one-fourth of the remaining funds to institutions on a pro rata basis (pro rata) and three-fourths to institutions based on the institutions need (fair share). Since 1986, an institution's base guarantee has been the principal determinant of its current-year allocation. Thus, today's allocation of campus-based funds largely reflects a 20-year-old distribution of program funds.

In recognition of the changing demographics on college campuses, the Committee has decided to modify the formula for distributing campus-based funds. At the same time, the Committee does not want to cause a disruption at campuses across the country that could occur if there are dramatic shifts in program funds between institutions. Therefore, the Committee decided to modify the formula by dropping the pro rata part and allowing all funds in excess of the base guarantee amounts to be distributed on a fair share basis. Such a change should allow institutions with increasing enrollments and populations of needy students to receive increases in campus-based funding.

In addition to the formula change, the Committee has made numerous changes designed to reduce the administrative burdens associated with the Perkins Loan Program in order to assist institutions and students. Institutions participating in the Perkins Loan Program that have default rates of less than 20 percent and fewer than 100 students who borrow in an academic year will no longer be required to submit default management plans. The Committee believes that this de minimis standard will allow institutions with few Perkins Loans to avoid a prescriptive management plan while it employs its own innovative efforts to reduce defaults. Institutions will be allowed to extend new deferment and loan cancellation options to new and old borrowers in order to ease the administrative burden associated with deferment and cancellation processing.

H.R. 6 also requires that institutions of higher education shall make Perkins funds available to independent and part-time students. However, the Committee has deleted the overly restrictive

requirement included in the 1992 amendments that required a strict proportion of funds to be allocated to these students. The Committee intends that while institutions are given discretion in allocating an equitable amount of funds for nontraditional students, this discretion should not result in a reduction of funds for these students. The Committee intends to closely follow this matter in order to ensure that nontraditional students continue to receive fair participation in the Perkins Loan Program.

In order to assist students in the repayment of their loans, the Committee has more broadly defined the term "satisfactory arrangements to resume payment" in order to assist borrowers who are making a good faith effort to repay their loans. The Committee also requires institutions to notify credit bureaus whenever a borrower makes twelve consecutive monthly payments on his or her defaulted Perkins Loan in order to reflect the good faith effort to repay.

In H.R. 6, the Committee has shown its support of programs designed to encourage good repayment behavior on the part of student borrowers by allowing lenders in the Federal Family Education Loan Program and the Secretary in the Federal Direct Loan Program to offer repayment incentives to borrowers with good repayment histories. Therefore, the Committee has extended this authority to institutions participating in the Perkins Loan Program as long as it does not increase the net cost of the Perkins Loan Program to the Federal Government.

The Committee has also included a loan rehabilitation provision that allows borrowers to regain eligibility for student aid after making twelve consecutive on-time payments on a loan that is in default status. Both the incentive program and the rehabilitation program are designed to encourage borrowers to repay their loans on a timely basis.

In order to assist students who attended an institution that closed while they were enrolled, the Committee has extended the current discharge provisions available to borrowers under parts B and D to the Perkins Loan Program. If a student attends an institution that closes while the student is enrolled, he or she is entitled to a discharge of any amounts which should have been refunded by the institution and the Secretary will pursue the institution for restitution.

H.R. 6 makes two small changes to the existing cancellation provisions by including two new eligibility categories with respect to loan cancellation. A student who is a member of the Commissioned Corps of the Public Health Service of the United States and a student who is a non-physician mental health professional working in a shortage area designated under the Public Health Service Act will be eligible for loan cancellation.

H.R. 6 requires the Secretary of Education to return all funds collected by the Department to the Treasury and makes other necessary and technical changes to the Perkins Loan Program.

*Part F, need analysis**Single need analysis*

H.R. 6 continues the single need analysis formula included in the 1992 Amendments and makes technical changes designed to improve the formula for students and families. The Committee believes that the current single need analysis system has greatly simplified the student aid process and that only minor adjustments are required to make it more equitable and justifiable for students and their parents.

Cost of attendance

H.R. 6 recognizes that computers are more often essential rather than optional for students pursuing a postsecondary education and that the costs associated with computers has become increasingly more reasonable during the last few years. Therefore, the Committee decided to include an allowance for the rental or purchase of a personal computer when determining a student's cost of attendance.

Expected family contribution for dependent students

H.R. 6 combines parent and student assets and treats them as family assets for purposes of determining the family contribution from assets. This is a significant change from current law. Currently, parental assets are calculated and assessed at a rate of twelve percent for inclusion in determining the contribution from assets. On the other hand, a student's assets are assessed at a rate of 35% when determining a student's contribution from his or her assets. This high rate of assessment has caused many to question the prudence of working and saving for college since a student will be eligible for less aid if he or she works and saves. The Committee believes that students should be encouraged to work and save for college. The Congress has already moved in that direction by enacting the Taxpayer Relief Act of 1997 which provides tax credits and deductions, and promotes increased savings options for certain higher education expenses. The combining of student and parent assets and using the twelve percent assessment rate continues this effort to encourage savings by protecting the student who has been prudent and saved for college.

Dependent student contribution

The current need analysis fails to recognize that some dependent students contribute directly to the support of their families. The Committee has attempted to address this inequity by offsetting a dependent student's income by the amount of the negative adjusted parental available income. When the parent's income is not sufficient to meet standard living expenses and the formula yields a negative available income, the formula will allow the offsetting of the student's income by the negative amount. In addition, H.R. 6 increases the earnings a dependent student is allowed to exclude from the need analysis calculation from \$1,750 to \$3,000. Again, the Committee wants to encourage students to work and save for college and the increased income protection allowance is designed

to eliminate the disincentives to work currently included in the need analysis formula.

Independent students

The Committee also attempted to correct current inequities in the treatment of independent students under Part F. H.R. 6 attempts to make postsecondary education more accessible for non-traditional students, many of whom are independent students by increasing the income protection allowance for certain categories of independent students. Under the current need analysis formula, single independent students and married students where both are enrolled have an income protection allowance of \$3,000. Married students where one is enrolled receive an income protection allowance of \$6,000. Similar to the dependent students described above, the Committee wants to encourage students to work and save for college without fear of being penalized in the need analysis calculation. Therefore, the Committee has provided for increased income protection allowances for these groups of students equal to \$5,500 and \$8,500 respectively.

Miscellaneous

An additional change with respect to income protection allowances included in H.R. 6 which the Committee believes important is the authority of the Secretary to adjust the stated amounts on a yearly basis pursuant to the Consumer Price Index. Income protection allowances for the parents of dependent students are adjusted each year, while income protection allowances for a dependent student with earnings and independent students remain constant. The Committee believes that Consumer Price Index adjustments are appropriate for all students and parents.

Numerous witnesses testified before the Committee that students from families with proven need were being discouraged from participation in postsecondary education because of complicated forms that were not relevant to their situation. The Committee believes that very low-income families should have their eligibility for financial assistance determined with the least amount of bureaucratic red tape as possible. For this reason, the Committee has decided to keep in place the special procedures for determining a zero expected family contribution for the purposes of determining Federal student financial assistance eligibility and the simplified needs test.

Further, it is the Committee's intent to provide financial aid administrators with the authority to modify standard procedures when unusual circumstances exist. Although the Committee is confident that the system of need analysis prescribed under this title is appropriate for the majority of aid applicants, it remains our desire to permit necessary adjustments for students whose situations are not typical or for those students with special conditions. However, the Committee does not believe that the application process or the need analysis should be burdened with the detail necessary to identify and specify the appropriate treatment for every conceivable special circumstance. Adjustments for families in these circumstances are better made on an individual basis by the financial

aid administrator on campus, using all available information about the family.

The Committee does want to mention some examples of special circumstances that have been brought to the Committee's attention. These include tuition expenses at a private elementary or secondary school, medical or dental expenses not covered by insurance, unusually high child care expenses, recent unemployment of a family member or other changes in income or assets or a student's status. However, these examples are not intended to limit in any way either the types of adjustments that may be made or the circumstances under which adjustments may be made.

The Committee heard from many college administrators who wish to be able to refuse to certify loans for certain classes or categories of students. On the other hand, many students strongly opposed such a blanket policy with respect to loan eligibility. After lengthy discussions, the Committee did not agree with the policy of giving institutions blanket authority to deny or limit loans to certain groups of students. However, the Committee does believe that circumstances exist where financial aid administrators should have the authority on a case by case basis to deny or limit loan eligibility to particular students. Despite the existence of similar authority in current law, many student financial aid administrators appear to feel that any changes they might make to a loan certification will be subject to adverse findings by program reviewers.

The intent of the revisions in Section 479A is to clarify that financial aid administrators have the authority to limit borrowing with respect to individual students as long as the reason for the limitation is documented and provided in written form to the student affected by the decision and the student is afforded an opportunity to appeal such a decision. The Committee expects that institutions will not use this authority unless such limitations are in the best interest of students, and that any limitation will not result in the inability of a potential student to attend an institution of higher education.

Definitions

H.R. 6 also makes one definitional change with respect to the treatment of veterans benefits. In order to provide greater support to service members who are transitioning to civilian life, the Committee decided to change the treatment of veterans benefits provided under the Montgomery G.I. Bill. These particular benefits will now be treated identical to benefits received under the National and Community Service Act and will no longer be treated as estimated financial assistance for purposes of the need analysis formula.

Part G, general provisions

In amending this Part of the Higher Education Act, the Committee intends to simplify participation in the Federal financial aid programs for students and institutions, while at the same time preserving the integrity of the Federal student assistance programs and to prevent fraud and abuse in the programs.

Master Calendar

In its review of the Higher Education Act, the Committee continues the master calendar limitations on the effective date of regulations issued by the Secretary. The Committee continues to believe that the effective dates of all regulations on Title IV should be driven by the Master Calendar requirements in Section 482. H.R. 6 also adds to the list of activities governed by the master calendar a requirement that the Secretary notify eligible institutions, guaranty agencies, lenders, and other interested parties of the minimal hardware and software requirements necessary to administer the Title IV programs by December 1st prior to the start of the award year. As we modernize our Federal financial aid systems, and as institutions take advantage of the latest technologies to improve their operations, it is essential that institutions have adequate notice of the technological requirements of participation. It is the intent of the Committee that the Secretary provide that information in a timely manner. A provision added by Rep. Barrett (R-NE) extends that requirement to include interested software providers on the list of entities that are to receive these specifications by the December 1st deadline. In order to ensure that financial aid administrators and others have the necessary administrative knowledge for participation in the Title IV programs, the Secretary is further directed to conduct training activities in a timely manner, prior to the start of the award year.

H.R. 6 also extends the amount of time that the public has to comment on regulations proposed by the Secretary from 30 days to a minimum of 60 days. Throughout the hearing process, the Committee repeatedly heard from the public that they did not have enough time to thoroughly read proposed regulations and provide sound comment. This situation has worsened, as the Department has released several proposed regulations simultaneously in order to meet the deadlines for implementation imposed by the master calendar. It is the intent of the Committee that the public has adequate time to analyze and comment on any regulation proposed by the Secretary. The Committee further expects the Secretary to fully take into account those comments prior to issuing final regulations under Title IV.

Forms and regulations

One of the major goals of the Committee during this reauthorization is to simplify the process for applying for Federal aid for students and their parents. In testimony presented to the Committee, students informed us that the complexity of the forms caused confusion, and in some cases deterred students from applying for financial aid. As a result, the Committee made changes to the need analysis in Part F and the application form in Part G.

As part of the Committee's paperwork simplification initiative, H.R. 6 extends the use of a single form to the application for student loans under Part B. Currently, the Free Federal form can be used to apply for Title IV grant aid, Title IV Work Study aid, and student loan aid, but only if the student intends to borrow under the Federal Direct Student Loan program. Students borrowing under the Federal Family Education Loan program are still required to take the unnecessary step of filling out a separate second

application in order to apply for their student loans. It is the intent of the Committee in approving these provisions to simplify the financial aid process for students and families by allowing them to apply for all of their Federal financial aid at one time on one form.

In addition, H.R. 6 directs the Secretary to develop an electronic version of the Free Application for Federal Student Aid (FAFSA) within 120 days of enactment of this legislation. It is the intent of the Committee that in so doing, the Secretary should consult with lenders, State guarantee agencies, State grant agencies, representatives of the higher education community, and other relevant participants in the Federal student financial assistance programs. It is the hope of the Committee that the use of a common electronic form will further simplify the process for the students who choose to use it, and reduce the amount of time necessary to process Federal financial aid awards. In designing the electronic version of the FAFSA, the Committee expects the Secretary to take necessary steps to ensure that adequate safeguards are in place to protect the integrity and confidentiality of the data collected.

H.R. 6 continues the requirement that students apply for Federal student financial assistance on a Federal form that will be free of charge to the student, whether the data is collected by paper form or electronically. The Committee intends that the Secretary maintain a single Federal financial aid form for all students applying for Federal aid. The Committee further intends students to know that they are receiving Federal aid, understand which data elements are required of them by the Federal Government, and be aware that there is no charge whatsoever in applying for aid using the Federal form.

In our efforts to build upon previous simplification efforts, H.R. 6 continues the use of the simplified application process for students from families with low incomes. The Committee encourages the Secretary to require these families to answer only demographic questions, a question on their income and then be able to bypass the remainder of the application.

H.R. 6 also continues the use of a streamlined application process for Federal financial aid recipients who are reapplying for Federal aid. The Committee believes that students should only have to update information from their previous year's application that has changed. This is consistent with the Committee's efforts to continue practices that are working to simplify the current application process for students and their families.

Student eligibility

H.R. 6 makes changes to the Federal student financial aid form in an effort to reduce fraud in the program. Specifically, this legislation will allow the Secretary to better verify parental income data supplied by dependent students.

The Committee also included a provision that Representative Solomon (R-NY) has long championed that denies Federal aid to persons convicted of drug-related offenses. A similar provision was also included in the Taxpayer Relief Act of 1997. The amendment offered to H.R. 6 by Representative Souder (R-IN) and accepted by the Committee provides that a student loses eligibility for one year for the first conviction on a possession offense, two years for the

second conviction and indefinitely for the third conviction. Further, a student would lose eligibility for Title IV funds for two years for his or her first conviction for the sale of a controlled substance and indefinitely for the second conviction. The Committee intends that a student whose eligibility has been suspended would resume eligibility prior to the designated time if the student satisfactorily completes a drug rehabilitation program that complies with criteria prescribed by the Secretary.

Information for students

The Committee is aware that information on private or State sources of funding for students may be difficult to obtain. To ensure that this information is readily available to students and parents, H.R. 6 directs the Secretary to compile information on State prepaid tuition programs, and to update the Department's internet site to include direct links to databases containing information on public and private financial aid programs. The Committee intends that students and parents have access to the most complete information available regarding student financial assistance. However, the Committee expects the Secretary to take necessary safeguards to ensure that links are not provided to sources of fraudulent information, and that any site to which links are provided will be free of charge to the student.

Campus crime provisions

Over the years since the initial passage of the Crime Awareness and Campus Security Act of 1990, the Committee has been encouraged to make several changes to this law to increase its effectiveness in providing students with important information on campus crimes. The Committee has made several changes to current law to reflect the recommendations of students, institutions of higher education, campus officials and security personnel, and others interested in protecting students and reducing campus crime.

The Committee would, however, like to point out that our primary concern is insuring that participating schools comply with current law. We have been disappointed over the past few years at the growing number of reports about schools circumventing current law or failing to provide accurate information to students and faculty and others to whom such information is required to be made available. We again encourage the Department of Education to enforce the provisions of current law and to penalize those schools that are not in compliance.

Several of the changes to current law focus on providing students with a more accurate picture of the criminal activity that takes place on their respective campus.

The first of these changes is to increase the number of crimes for which statistics are to be reported. When the Crime Awareness and Campus Security Act was enacted on November 8, 1990, it was the intent of Congress to focus on those crimes most likely to involve violence or which had the potential to result in injury to students or faculty. In response to concerns about the lack of available information on the crimes of manslaughter, larceny and arson, the Committee has added these to the list of crimes for which statistics are to be reported.

The second change made by the Committee was to require the reporting of statistics for those crimes handled through the campus disciplinary system. While the Committee understands the sensitive nature of some of these crimes, we believe it will not jeopardize the confidential nature of these proceedings to require the reporting of statistics. If students are to take steps to protect themselves from becoming the victims of crimes on campus, they must have access to accurate information on the extent to which certain crimes take place on their campus.

Similarly, the Committee has expanded the number of individuals who must report statistics on campus crime. Current law requires the reporting of criminal offenses reported to campus security authorities or local police agencies. The Committee bill expands this list to include campus security authorities, campus officials who have direct administrative responsibility for student or campus activities, disciplinary officers and other officials responsible for resolving disciplinary matters, athletic department officials, or local police agencies. Because of the confidential nature of conversations between counselors and individuals seeking their assistance, the Committee does not require such individuals to report.

The Committee has also modified the reporting requirements for alcohol, drug and weapons violations. Currently schools only report on the number of arrests for such violations. However, it has come to our attention that the majority of such violations do not result in actual arrests but are referred, instead, to the campus disciplinary system for disposition. Because of the correlation between violent crimes on campus and the consumption of drugs and alcohol, the Committee believes it is important to receive accurate information on the extent to which drugs and alcohol are a problem on campus.

One of the key changes to current law is to require each institution maintaining either a police or security department of any kind to make, keep and maintain a daily log recording all crimes. This log is to be open to public inspection during normal business hours within two business days of the initial report. The log is to include information on all crimes reported to such police or security department, including the nature, date, time, and general location of each crime and the disposition of the complaint, if known. It is the intent of the Committee that students and others interested in obtaining current information on campus crimes be able to access such information from daily logs. The Committee does not, however, intend information protected by law to be released and has included language to prevent the disclosure of such information.

The final change made to current law by the Committee is to require all schools to provide campus crime statistics to the Secretary on a yearly basis. The intent of this provision is two-fold. First, it will allow the Department of Education to determine more clearly which schools are not in compliance with the reporting requirements of this law. It is not, however, the intent of the Committee to impose an additional paperwork burden on schools. Rather, the Committee expects schools to forward to the Department the same information it provides to students and faculty in printed form.

The second reason for this provision was the failure of the Department to gather the information necessary to report to Congress by September 1, 1995 on campus crime. Although current law did not require the Department of Education to gather statistics on a yearly basis, the Committee did expect the Department to collect such data at reasonable intervals in order to meet the deadline for the report. As a result of the Department's failure to gather this information, they did not report to Congress until January 1997. This report was based on a sample of schools rather than all schools covered by law and, therefore, did not provide an accurate picture of crimes on campus. The Committee believes the statistics reported by schools will allow us to determine if there are any trends in campus crimes and to ascertain which schools are successful in reducing the incidence of crimes on campus. As such, the Committee believes it is important to insure that the Secretary collects such data on an annual basis. The Committee bill also requires the Secretary to make copies of such statistics available to the public.

It is the belief of the Committee that these changes to current law will provide students, faculty and the public with a better picture of crimes on college campuses. The Committee would encourage students and others to use such information to make important decisions regarding their safety on campus.

Information on college athletic programs

The Committee notes that college athletic programs increasingly fuel public awareness of higher education. Many athletics programs are major financial enterprises, yet the Committee notes that little public information exists on the financial impact these programs have on the overall financial operation of their host institutions. H.R. 6 clarifies the information which schools must provide on their athletic programs.

In addition, H.R. 6 requires that institutions notify students and prospective students of any likely reductions in the number of athletes that will be allowed to participate in their programs, or likely reductions in the resources devoted to a sports program. The Committee does not intend this provision to intrude on the governance of institutions of higher education, but to provide information that will assist the public in making informed decisions about attending particular institutions.

National student loan data system

In an effort to improve the usefulness of the National Student Loan Data System (NSLDS) to students and parents, H.R. 6 requires the Secretary to modify NSLDS to permit borrowers to use the system to identify the current holders and servicers of the borrower's student loans. The Committee directs the Secretary to make these changes within one year of enactment of H.R. 6.

Quality assurance and regulatory simplification

The Committee recognizes the continued success of the Institutional Quality Control Pilot Project which has been authorized since 1985. The Committee is supportive of efforts to reduce the regulatory burden placed on schools, and believes the project has

proven to be a good method of focusing institutional resources on areas most in need of improvement, which encourages better management of student aid programs and reduced student aid processing errors.

However, the Committee is concerned with past attempts by the Secretary to waive certain statutory provisions within the experimental sites program without the statutory authority to do so, and to approve participation more as a favor to certain schools than as a useful or valuable experiment. H.R. 6 therefore clarifies the Committee's intent that the Secretary may only waive regulations issued under Parts A, B, C, D, E, and G, and may not waive a statutory requirement.

Distance education demonstration programs

The bill creates a new section 487B that authorizes the Secretary to permit distance education demonstration programs. Distance education is emerging as an increasingly important component of higher education. The types and numbers of institutions offering distance education courses and programs are dramatically expanding, and the methods of delivering distance education are rapidly evolving. Distance education holds the promise of expanding access to higher education at a time when the number of postsecondary students will be expanding, including those seeking retraining and those in rural communities without access to local colleges and universities. Distance education may also help institutions to control costs by more efficiently using their educational ability to offer distance education programs and courses. There are provisions in the HEA designed to control fraud and abuse in distance education programs, and the Committee believes that these programs and courses must be carefully monitored to protect against such occurrences.

Accordingly, the bill authorizes the Secretary to exempt carefully selected institutions from provisions in the Act which inhibit their ability to offer distance education effectively. In these controlled circumstances, the potential of distance education can be tested without unduly increasing the risk of fraud and abuse. The Committee wishes to emphasize that, in selecting institutions to participate, the Secretary should accept a broad range of institutions reflecting the diversity in higher education. In order to help ensure that only quality institutions and programs participate, institutions must be reviewed and accredited by, or have achieved pre-accreditation candidacy or equivalent status from an agency whose recognition includes assessment of distance education programs and courses as a precondition for participation.

Garnishment requirements/administrative subpoena authority

One of the most important issues confronted by the Committee during every reauthorization of the Higher Education Act is ensuring the integrity of the Federal loan and grant programs. In order to improve our efforts to collect on defaulted loans, H.R. 6 contains a provision increasing the percentage of a borrower's wages that can be garnished to 15 percent. In addition, H.R. 6 gives the Secretary the authority to issue administrative subpoenas. In granting

this authority, the Committee intends to give the Secretary another tool to use in investigating fraud and abuse of the programs under this Title.

Advisory committee on student financial assistance

The Committee notes that the existence of an independent Advisory Committee on Student Financial Assistance has been of great value in assisting in the evaluation of policies regarding student financial assistance and the administration of our Federal student financial aid programs. In this regard, the Advisory Committee has served both Congress and the Administration well. In order to broaden the perspectives represented on the Advisory Committee, H.R. 6 increases the Committee membership from the current 11 members to 15 members. In addition, when the Advisory Committee was created, the wide use of electronic formats for the publication of reports and other documents was not envisioned. H.R. 6 expands the current exemption enjoyed by the Advisory Committee from Secretarial review of its reports to those published in electronic form.

In addition, H.R. 6 gives the Advisory Committee three new responsibilities. Specifically, the Advisory Committee shall evaluate and monitor: the modernization of the student financial aid systems and delivery process; the implementation of a Performance Based Organization within the Department to run the day to day operations of the student financial assistance programs; and the methods for disseminating information about programs under this title.

Meetings and negotiated rule making

Throughout the reauthorization process, the Committee has heard a great deal of frustration from participants in the Title IV programs over the way in which the Secretary formulates and issues regulations. In order to give program participants meaningful input into the regulatory process, H.R. 6 strengthens the provisions for regional meetings and negotiated rule making in the development and revision of regulations on this Title. The Committee expects the individuals and groups involved in this negotiation to include representatives of all types of participants in the student financial assistance programs. The Committee further expects that the Secretary will take the advice of these participants seriously.

In strengthening the negotiated rule making process, the Committee has added a provision requiring the Secretary to keep a transcript of these sessions. This requirement has been added because of reports that the Committee received that in previous negotiations, there have been a number of instances where consensus was reached on changes needed to proposed regulations only to be ignored by the Department's representatives. Finally, the Committee expects the Secretary to conduct negotiated rule making sessions in a timely manner in order to meet deadlines imposed under the master calendar and Section 481 (g) of the General Education Provisions Act. The Committee intends for the negotiated rule making process to apply not only to new regulations stemming from the enactment of this Act, but for all revisions to the Secretary's regulations for Title IV programs.

Sense of the committee regarding college admissions policies

A growing number of Americans are receiving their elementary and secondary education in non-public, private, or non-traditional settings. These programs are a valuable part of our nation's efforts to prepare its youth for the demands of society at the edge of a new century.

For example, the Committee recognizes that home schooling is one of the fastest growing education movements in the country, with an estimated 1.5 million students being taught at home by their parents. Home schooling is presently a legal option in all 50 states. Home schools comply with states' compulsory attendance laws through specific home school provisions or through provisions applying to private schools.

In addition, there are numerous private and religious schools across the nation. These schools also comply with State compulsory attendance laws and teach the core curriculum required by the State. Students educated in these schools generally graduate with all the requirements of a college preparatory diploma, normally have a record of nationally standardized achievement scores well above the national average, and very often graduate with grade point averages high enough to be accepted by most colleges if their school had been State or regionally accredited.

Research indicates that children educated in non-public, private, and non-traditional settings perform well in relation to their peers nationwide. A 1994 study of standardized test scores of 16,000 home-educated students found their mean performance in language skills at the 79th percentile nationwide and their mean performance in mathematics at the 73rd percentile. Overall, more than half (54.7 percent) of the students studied achieved national scores in the top quarter of the population.

The most recent report of the annual nationally standardized achievement testing program for the American Association of Christian Schools (AACCS) indicated that these students placed in the top 10 percent of students that took the test nationwide (including students from both public and private schools). These results also showed that students from AACCS affiliated schools were on average more than one grade level ahead of the national average.

The Committee further notes research that found home-educated students performing above the national average on the American College Test (ACT), as well as studies indicating that the collegiate grade point average of home-educated students sampled is higher than the mean grade point average of their respective institutions.

However, the creative alternatives of non-traditional and individualized training frequently do not offer a seamless fit with traditional transcript formats and admission standards. Moreover, many colleges and universities have yet to address this emerging issue. In a 50-state survey of colleges conducted by the Home School Legal Defense Association, it was discovered that 96 percent of colleges sampled had at least one and sometimes more than 200 home educated graduates enrolled, but only 44 percent of these institutions had a verbal or written admission policy regarding home-educated students.

The Committee is aware that many colleges and universities now require applicants from non-public, private, or non-traditional secondary programs (including home schools) to submit scores from additional standardized tests (typically, the General Educational Development (GED) or Scholastic Aptitude Test subject area examinations [SAT-II]) in lieu of a transcript/diploma from an accredited high school. Historically, SAT II has been required when students seek advanced placement in specific subject areas. However, it is the understanding of the Committee that SAT II was not designed for, and until recently was not used to determine college admissions. Given that standardized test scores (ACT or SAT) and portfolio- or performance-based assessments may also provide a sound basis for an admission decision regarding these students, the Committee recommends that colleges and universities consider using these assessments for applicants educated in non-public, private, or non-traditional programs rather than requiring them to undergo additional types of standardized testing. Requiring additional testing only of students educated in these settings could reasonably be seen as discriminatory, and Members of the Committee are concerned that such practices could have the effect of discouraging these students from applying to certain institutions.

As the number of students from non-public, private, and non-traditional settings continues to grow, institutions of higher education and their governing entities must seriously consider addressing this issue if they have not already done so. For example, the State of North Carolina has adopted legislation stating that students from lawfully operating non-public, private, and non-traditional programs shall not be required to take additional admission tests if they otherwise qualify for admission. Similarly, the State of New Mexico now has a law stating that students from non-public, private, and non-traditional educational programs shall not be required to supply a GED credential for admission if they provide qualifying admission test scores.

The Committee believes that college admissions should be determined based on the academic ability of the student and not the accreditation status of the school in which he or she received a secondary education. Accordingly, it is the sense of the Committee that in determining requirements for admission, an institution of higher education that receives Federal funds shall make every effort to evaluate and treat applicants from non-public, private, and non-traditional educational programs fairly and in a non-discriminatory manner. The Committee further urges institutions of higher learning to adopt admission policies that reflect the sense of the Committee, and to engage in a dialogue with providers of non-public, private, and non-traditional educational programs regarding admission policies that will best serve the educational interests of their graduates. The Committee expects that institutions receiving Federal funds under the Higher Education Act will not discriminate against students educated in non-public, private, or non-traditional settings (including religious and home schools) in their admissions policies.

*Part H, program integrity**State Postsecondary Review Program*

The last reauthorization of the Higher Education Act created new State Postsecondary Review Entities (SPREs). The goal of these provisions was to enhance the integrity of the student financial assistance programs, but to do so in a way that did not increase Federal control. However, after enactment, it became apparent that adding another regulatory entity on top of the Department of Education, regional and national accrediting agencies, and other State regulatory agencies was unnecessary. The SPREs represented an unnecessary and overly burdensome intrusion on the autonomy of institutions of higher education. In reauthorizing the Higher Education Act, it is the goal of the Committee to reduce the regulatory burden placed on all participants in the Title IV programs. H.R. 6 therefore repeals the authorization for the SPREs. In taking this action, the Committee notes that States have a number of options in overseeing institutions within their boundaries including State Higher Education Boards and State licensing agencies. The Committee expects States to continue to use these entities to ensure the integrity of institutions operating within their boundaries.

Accrediting agency recognition

In proceeding with the reauthorization, one of the goals of the Committee has been to ensure the quality of the programs that are eligible for Federal financial assistance. The Committee recognizes that assessments of educational quality have historically been made by private accrediting organizations, and the Committee sees no need to give the Secretary increased authority in this area. H.R. 6 amends the criteria for which the Secretary may recognize accrediting bodies by including distance learning as an integral part of the accrediting agency's assessment of the quality of the institution in a range of areas. H.R. 6 also clarifies that new sites offered through telecommunications for programs previously included in the scope of accreditation approval need not be subjected to on-site visits.

The Committee wishes to underscore the importance of educational quality in the accreditation of programs and of institutions participating in Title IV. Most importantly, the Committee intends that the quality of an institution's education continue to be evaluated by voluntary accrediting organizations.

Regarding the rapidly emerging programs of distance learning, the Committee wishes to provide Title IV support only to quality programs while avoiding Federal control over program content. Voluntary accreditors working with the academic leaders and faculties of each institution have always seen to the assurance of educational quality. It is the understanding of the Committee that accrediting associations have been dealing with distance learning programs for many years, and that they are developing new approaches and procedures to address the new forms of distance education.

Eligibility and certification procedures

Ensuring that institutions participating in Title IV programs have the financial capability to meet their obligations is an important protection for America's students. However, it quickly became clear to the Committee that regulations promulgated by the Department in this area would not only impact schools in troubled financial condition, but could actually endanger the participation of schools that had been in existence in excess of 100 years, and that could reasonably be expected to remain solvent for decades to come. H.R. 6 clarifies the definition of financial responsibility for the purpose of eligibility and certification to focus on preventing precipitous closures, ensuring compliance, and meeting financial obligations. H.R. 6 also clarifies that the Secretary should take into account the differences in accounting practices applicable to public, private, and for-profit institutions when assessing financial responsibility. Finally, H.R. 6 directs the Secretary to develop an appropriate and cost effective process for determining financial responsibility that is not duplicative of other assessments.

The Committee recognizes another important aspect of protecting students is to ensure that schools participating in Title IV programs are able to administer these programs effectively. H.R. 6 clarifies the procedures used by the Secretary for assessing the administrative capability of schools relating to the approval, disbursement and delivery of Federal financial assistance.

The Committee is cognizant of the often-duplicative regulatory burdens placed on institutions by the Department and their accrediting bodies. H.R. 6 eliminates this duplication by requiring the Secretary to prioritize when making on-site visits and to coordinate those visits with accreditation visits.

Under current law, an eligible institution that undergoes a change in ownership resulting in a change of control must reapply for a determination of its eligibility under the new ownership to continue to participate in Title IV programs. The period of review commonly takes from 60–120 days, and during that period students lose access to their Title IV funds. This gap in funding can be very disruptive to students and institutions. In cases where the approval takes longer than the payment period, the interruption can result in denying eligible students the Pell Grant aid to which they are entitled.

H.R. 6 changes the existing practice by providing that Title IV eligibility is continued on a provisional basis after a preliminary Department review, provided the institution files a materially complete application for approval within 10 days of the transaction. The provisional certification would ordinarily expire at the end of the month following the month it was granted, but would be continued on a month-to-month basis in cases where the final decision of the Secretary has not been issued.

Program review and data

Program reviews by the Secretary are an essential component in ensuring the integrity of the Federal student financial assistance programs. However, if implemented in the standard "Washington knows best, one-size-fits-all" approach, they can pose an undue burden on institutions of higher education. H.R. 6 attempts to remedy

this by requiring the Secretary to prioritize when selecting institutions for program reviews. Criteria include significant fluctuations in student loan volume or Pell Grant awards, reports to the Secretary of deficiencies by either the State or the institution's accrediting body, and indications of high dropout rates. The Secretary may also prioritize reviews based on other factors, as he deems necessary. H.R. 6 also requires the Secretary to review the regulations of the Department and to ensure the uniformity of their interpretation and application. When conducting this review, the Secretary must consult with representatives of institutions participating in the Title IV programs.

TITLE V—DEVELOPING INSTITUTIONS

H.R. 6 creates a new Title V, titled Developing Institutions, and transfers the provisions specifically addressing Hispanic-Serving Institutions from Title III to the newly established Title V. Many of the provisions included in this Title have been adopted from H.R. 2495, introduced by Representative Hinojosa (D-TX) last fall.

Qualified institutions under the new Title V include eligible institutions having an enrollment of at least 25 percent Hispanic students of which 50% of those students must be from low-income families. Institutions receiving aid under this Title are authorized to use such funds for the same purposes currently allowed under Title III of the Higher Education Act. In addition to the currently authorized activities, institutions may also use such funds for improving and expanding graduate opportunities for their students.

Funds received under this Title are to be used to strengthen institutional, academic and fiscal resources and to increase services for Hispanic and other low-income, educationally disadvantaged students. In applying for funds under this Title, an institution will be required to include a 5-year plan for improving assistance provided by the institution to Hispanic and other low-income students. Of particular importance to the Committee is the authority of the Secretary to give priority to applicants that will be working with local organizations to reduce dropout rates and improve academic achievement. During the reauthorization hearings, statistics presented to the Committee indicated that the dropout rate for Hispanic students is a serious problem in this country.

The Developing Institutions Program under this title is authorized to be appropriated at \$80,000,000 for fiscal year 1999 and such sums for each of the succeeding 4 fiscal years. The Committee intends that the provisions transferred from Title III retain all currently applicable legislative and regulatory rules and regulations, as they apply to Title III, including regulatory determinations, administrative interpretations and guidance.

TITLE VI—INTERNATIONAL AND GRADUATE EDUCATION PROGRAMS

Title VI has been separated into two distinct Parts in H.R. 6. International education programs are included under Part A, while graduate education programs are included under Part B.

Part A, international education

The international education programs of Title VI, along with the Fulbright-Hays Act, has been the primary response of the Federal

Government to meeting the Nation's need for international expertise. The Title VI programs were originally introduced as part of the National Defense Education Act of 1958 enacted at the high point of the Cold War. Title VI funds induce universities to create and support high quality graduate training and research programs that produce well-trained specialists whose expertise spans the globe. These foreign area experts who graduate from Title VI centers staff government agencies, international organizations, and university centers and produce research that sets new standards of quality and coverage.

In order to expand and enhance the Nation's capacity in international studies and foreign languages, Title VI also authorizes cost effective programs at the undergraduate level. The amendments contained in H.R. 6 are designed to strengthen the capacity of Title VI programs to better address the Nation's current and future needs for international competence. H.R. 6 amends Title VI throughout in order to refine the title further so that the Nation's need for international education is met.

Subpart 1, international and foreign language studies

H.R. 6 amends the list of authorized activities that may be undertaken by national resource centers. In addition to the currently authorized activities, H.R. 6 requires such centers to:

Support the instruction of foreign languages and offer courses that cover the subject area or topic applicable to the national center;

Support teaching and the acquisition of research materials; and,

Support outreach programs with state and local educational agencies, government, and business.

Title VI has created a small but competent system of centers producing specialized faculty, international research, and a corps of international experts. The Committee strongly encourages the Secretary to promote interactive linkages among the national resource centers, state and local educational agencies, professional schools and colleges, government and business. The Committee views these linkage and outreach functions as an increasingly important role for the centers which serves the national interest.

H.R. 6 continues the authority for institutions to provide fellowships to graduate students who are undergoing advanced training in any center or program approved by the Secretary.

In addition, H.R. 6 expands the activities which may be conducted by a language resource center to include the operation of intensive summer language institutes to train advanced foreign language students, provide professional development and improve language instruction through preservice and inservice language training for teachers. However, the Committee believes there is still a need for a more systematic approach to addressing the needs of the less commonly taught languages. The Committee urges the Secretary to encourage the assessment of those needs and the cultivation of cost effective ways to meet those needs. For example, the Secretary may allow some centers to focus on geographic areas or language groups, utilize technology to organize and provide wide access to teaching materials, and encourage collaborations with the

less commonly taught language community and other Title VI grant recipients with similar missions.

The allowable use of grant funds awarded to undergraduate international and foreign language programs has been expanded to include activities such as, establishing linkages overseas with institutions of higher education; conducting summer institutes in foreign area and other international fields to provide faculty and curriculum development; and developing partnerships with the private sector, government and elementary and secondary schools in order to enhance international knowledge and skills. The Committee recommends that the Secretary promote support for undergraduate international education by outreach to undergraduate institutions. In order to encourage institutions of higher education to support undergraduate international relations and foreign language programs, a provision was included in H.R. 6 that authorizes the Secretary to use no more than 10% of the funds appropriated for this Part for undergraduate programs. The Committee also included an optional, non-Federal match of one-third cash from the private sector to encourage more applicants to leverage funding from private sector corporations and foundations.

H.R. 6 replaces the current program for periodical and other research materials published outside of the United States with a new technological innovation and cooperation for foreign information access program. The purpose of the program is to develop innovative techniques or programs using new electronic technologies to collect, organize, preserve and widely disseminate information on world regions and countries that address the nation's teaching and research needs in international education and foreign languages. This kind of program is timely as universities and libraries are faced with escalating costs for access to international resources and an increasing demand for international information, teaching and research materials in a wide variety of disciplines.

H.R. 6 also includes a new subsection designed to encourage the Secretary to provide grant funds to help establish new overseas research centers. If the Secretary determines that there are no qualified applications for a new center, the funds may be distributed to the existing centers.

Part A is authorized to be appropriated at \$80,000,000 for fiscal year 1999 and such sums for the four succeeding fiscal years.

Subpart 2, business and international education programs

The Business and International Education Programs are continued in their current form with one modification. For purposes of membership on the advisory council required in order to apply for grant funding, the Committee makes specific mention of including a representative of a community college in the region served by the center when selecting representatives from institutions of higher education. Centers for International Business Education are authorized to be appropriated at \$11,000,000 for fiscal year 1999 and such sums as may be necessary for the four succeeding fiscal years. Education and Training programs are authorized to be appropriated at \$7,000,000 for fiscal year 1999 and such sums as may be necessary for the four succeeding fiscal years.

Subpart 3, Institute for International Public Policy

H.R. 6 expands the current authority of The Institute for International Public Policy to operate several new programs designed to promote careers in international affairs. The programs include:

A summer abroad program in addition to the existing junior year abroad program;

A postbaccalaureate internship program to assist students in preparing for a master's degree program; and,

An institutional development program to enable eligible colleges and universities to strengthen international affairs programs.

This Subpart 3 is authorized to be appropriated at \$10,000,000 for fiscal year 1999 and such sums as may be necessary for the four succeeding fiscal years.

Subpart 4, general provisions

H.R. 6 amends General Provisions to repeal a provision titled Preservation of Pre-1992 Programs. This provision has served to limit the number of new programs which have been created under Title VI due to a prohibition on funding new projects unless funding in effect for pre-existing programs is equal to the 1992 fiscal year level. The Committee believes the Secretary of Education should be free to evaluate applications and fund those programs that meet the objectives and priorities of the Federal Government applicable at that time.

Part B, Graduate Assistance in Areas of National Need (GAANN)

H.R. 6 transfers the current Graduate Assistance in Areas of National Need Program (GAANN) from Title IX to Title VI and makes minor modifications to the program. H.R. 6 continues the current focus of GAANN by providing assistance to students of superior ability who demonstrate financial need. The designation of areas of national need will remain the responsibility of the Secretary of Education after consultation with appropriate Federal and nonprofit agencies and organizations.

H.R. 6 repeals the existing Patricia Roberts Harris Fellowship Program and the Jacob K. Javits Fellowship Program which have been funded through the GAANN appropriation. H.R. 6 directs the Secretary to make continuation awards to recipients of awards under those programs as well as recipients under GAANN as in effect prior to enactment of H.R. 6 in order to allow students to complete their programs of study.

GAANN is authorized to be appropriated at \$40,000,000 for fiscal year 1999 and such sums as necessary for the four succeeding fiscal years.

TITLE VII—CONSTRUCTION, RECONSTRUCTION, AND RENOVATION OF
ACADEMIC FACILITIES

Title VII provides for a straight extension of Part B, the Historically Black College and University Capital Financing Program, for FY 99 and the four succeeding fiscal years.

Title VII also provides for a straight extension of Part C, Loans for Construction, Reconstruction, and Renovation of Academic,

Housing and Other Educational Facilities, for FY 99 and the four succeeding fiscal years. Although no loans have been made under this program since 1993, the Department of Education is responsible for oversight and management of the loans made in previous years.

Part A of Title VII, Improvement of Academic and Library Facilities is repealed in H.R. 6.

TITLE VIII—ADDITIONAL PROVISIONS

In keeping with the Committee's goal of strengthening opportunities for all Americans to obtain an affordable, high quality postsecondary education, Title VIII of H.R. 6 contains requirements that the Department of Education and the General Accounting Office conduct a number of studies on issues relating to postsecondary education. Title VIII also contains provisions to provide parents and students with better information on making informed decisions about preparing for college. By including these provisions, the Committee hopes that well-informed consumers will create market competition among institutions of higher education, thus keeping colleges accountable and higher education affordable.

Study on transfer of credits

The Committee is concerned about reports of policies that may prevent the transfer of credits between colleges and universities and shorter course programs. While it is not the intent of the Committee to impose transfer of credit policies on institutions, the Committee is concerned that some accrediting bodies may be adopting transfer of credit policies that could adversely impact students. While little concrete data is available, the Committee has heard reports that many students must repeat coursework at their new institution in order to obtain credit towards a postsecondary degree, thus increasing their costs of attendance and in some cases student loan burden.

Section 801 requires the Secretary of Education to conduct a study evaluating the policies and/or practices instituted by recognized accrediting agencies or associations regarding the transfer of credits from one institution of higher education to another. Specifically, this study will look at the effects of such policies on students wishing to transfer and will include the additional time and expense that is incurred by these students, the extent to which Federal student financial aid is awarded for the duplication of coursework, and the aggregate cost to the Federal Government.

It is the Committee's hope that this study will provide insight into the effects of different policies adopted by accrediting agencies or associations and provide specific recommendations for the recognition of accrediting bodies which might save students time and money.

Study of market mechanisms in Federal student loan programs

In recent years, the Committee has been called upon on several occasions to recommend methods of reducing the costs of the student loan programs. The Committee is concerned that any such changes be made in such a way as to ensure continued participation of the private sector in these vital programs. Currently, the

Federal Family Education Loan (FFEL) program is a market-based program with private sector participation. However, to a large extent lender returns are set through a political process rather than a market process. This is disturbing for two reasons. First, if lender yield is set too low, private capital will become unavailable, and the student loan programs will collapse. Second, if the rate of return is set too high, the Federal Government forgoes savings that could be put to better uses or returned to the taxpayer. The difficulty of determining the appropriate yield became most apparent during this reauthorization as the Committee struggled with the 1998 interest rate problem.

In contrast, the Direct Student Loan Program, which has no market forces operating within it has been plagued with management problems, including a complete shutdown of the Direct Consolidation Loan process. As the Committee worked to solve the interest rate issue, it became very clear that no one believed the Direct Loan Program could absorb all the student loan volume currently handled by private sector participants in the FFEL Program.

Section 802 requires the Comptroller General to conduct a study of the potential use of an auction mechanism or other market based mechanism for the delivery of Federal student loans. In conducting this study, the Committee expects that the Comptroller General will pay special attention to methods of ensuring continued access for all borrowers. The Committee also expects that any recommendations for moving to a new system will be accompanied by a transition plan to ensure that no disruption in loan availability occurs. The Comptroller General is to issue his report within two years after the date of enactment of H.R. 6.

Improvements in market information and public accountability in higher education

One consistent concern that the Committee heard from parents and students was that the cost of attending college was rising too quickly. As part of this concern the Committee passed into law, the Cost of College Review Act of 1997, establishing the National Commission on the Cost of Higher Education. This Commission was tasked with studying the reasons why college tuitions were increasing so rapidly and to make specific recommendations as to how these increases could be brought under control. One of the Commission's findings was that timely, accurate, reliable and understandable information on college costs and prices was not readily available to the public.

Section 803, which was added as an amendment offered by Representatives McKeon (R-CA) and Castle (R-DE), requires the Secretary of Education to work with colleges and universities to develop a clear set of standards for reporting college costs and prices. It specifically requires the Secretary to redesign his collection of information on college costs and prices to make it more useful and timely to the public. It is the Committee's belief that these changes will allow students to make more informed choices about the level of education they pursue by requiring the Secretary to collect separate data on the costs and price of both undergraduate and graduate education. It will also help parents and students make informed decisions about the schools they choose by requiring the

Secretary to make available for all schools, on a yearly basis, information on tuition, price and the relationship between tuition increases and increases in institutional costs.

It is the understanding of the Committee that the Secretary already collects the data required to implement Section 803. To the extent practicable, the Committee intends that the Secretary re-format and re-configure data already collected from institutions of higher education and make this data more widely accessible and useful to parents and students. It is not the intent of the Committee to require or preclude the Secretary from collecting new or additional data from institutions of higher education.

Differential regulation

This provision, also added by the McKeon/Castle amendment, provides for a report by the Comptroller General on the extent to which unnecessary costs are imposed on colleges and universities as a consequence of requiring them to abide by the same regulations as industrial or commercial entities. For example, in its report, the Cost Commission noted that some institutions of higher education which might have grams of certain chemical substances on their campuses are often held to the same Federal regulations as industrial entities which might work with tons of the same substance. The Committee is supportive of regulatory reductions that can provide cost savings to institutions, as long as health and safety are not jeopardized. However, the Committee fully expects that any savings attained in this area will be passed on to America's students and families through lower tuitions.

Annual report on cost of higher education

Finally, the Committee notes that tuition increases have to an extent moderated in recent years, they are still increasing at close to twice the rate of inflation. In its report, the Commission concluded that in the long run, if colleges do not reduce their cost, prices cannot be contained without sacrificing either quality or access.

Section 805 directs the Comptroller General to conduct an ongoing study of college costs and tuition increases, and to report his findings to Congress on a yearly basis. In this way, the Committee will continue to track the progress made by colleges and universities in reducing their costs and tuition increases.

Repeals of previous higher education amendments provisions

Section 806 repeals a number of unfunded programs, studies, and commissions. Specifically, these include Secretarial Studies and Evaluations enacted by the Higher Education Amendments of 1986, General Accounting Office Reports, a study of the Costs of Postsecondary Education, a National Academy of Sciences Study, the Alien Youth Education Opportunity Panel, the Carl Albert Congressional Research and Studies Center, Studies by the Department of Education, the National Commission on Independent Higher Education, the National Commission on the Cost of Higher Education, the National Center for the Workplace, the National Clearinghouse for Postsecondary Education Materials, the School Based

Decision Makers Program, Grants for Sexual Offenses Education, and the Olympic Scholarships Program.

Limitation

Section 807 specifically prohibits Federal funds from being made available to the National Board for Professional Teaching Standards.

TITLE IX—AMENDMENTS TO OTHER LAWS

Part A, Education of the Deaf Act

H.R. 6 amends the Education of the Deaf Act (EDA) by extending the authorization for that Act through fiscal year 2003 and making other changes. The Committee felt that the Education of the Deaf should be considered when the Higher Education Act was reauthorized since most of the Education of the Deaf Act authorizes two higher education institutions: Gallaudet University and the National Technical Institute for the Deaf. Given the enormous importance of education to the future success of all Americans, the Committee affirms our long-standing commitment to programs targeted to people who are deaf or hearing impaired through the extension of the Education of the Deaf Act.

The Committee identified a need to enhance communication between the Secretary and Gallaudet University. To accomplish this, the Committee has made the Department of Education's liaison to Gallaudet University an ex-officio member of its Board of Trustees. The Committee believes that this addition will enhance the flow of information between the University and the Department, and thereby promote coordination between the University's varied activities and other programs that the Department oversees.

The 1992 amendments to the Education of the Deaf Act incorporated the procedural safeguards specified in the Individuals with Disabilities Education Act into the requirements for Gallaudet's elementary and secondary education programs. The 1998 Amendments update these references by citing the Individuals with Disabilities Education Act Amendments of 1997 (P.L. 105–17). These references include new provisions from P.L. 105–17 relating to mediation, placement in alternative educational settings, and transfer of parental rights at age of majority.

Because tracking of the costs associated with Gallaudet's various national mission activities and the operations of the elementary and secondary programs has been problematic, the Committee added language relating to the University's audit requirement stipulating that the costs for these activities must be separately identified. The Committee adds this requirement in the spirit of good stewardship for the resources targeted for the programs under its jurisdiction, not because of any concerns about mismanagement at Gallaudet.

During the July 15 hearing, the Committee heard testimony relating to improving the endowment programs at Gallaudet and NTID. The 1992 EDA Amendments added a new requirement that the institutions contribute \$2 from non-federal funds for every Federal dollar in excess of \$1 million. The unintended effect of this change has been to discourage private contributions beyond the \$1

million level. Therefore, the Committee decided to return to a dollar-for-dollar match. However, the Committee now stipulates that non-federal contributions can be matched with Federal funds only in the fiscal year in which they are raised. It further clarifies that the University and NTID have an on-going responsibility to keep records of income generated from their federal endowment funds from the prior year. Authorization for the Federal endowment programs are extended through fiscal year 2003.

In reviewing legislation under its jurisdiction over the past two years, the Committee has typically repealed programs that have been authorized, but not funded. Consistent with this practice, the Committee has repealed the unfunded scholarship program in section 208 of the EDA for individuals who are deaf preparing for careers in deaf education or special education at institutions with teacher training programs in deaf education or special education.

Responding to testimony regarding unused capacity at both Gallaudet and NTID, the Committee chose to repeal the current 10 percent enrollment cap on international students at both institutions. The Committee also established the requirement that no qualified United States citizen will be denied admission to Gallaudet or NTID. While the Committee considered increasing the amount of the tuition surcharge paid by international students, the Committee chose to maintain the current international surcharge at 90 percent of base tuition to address concerns raised by the institutions about a possible decrease in enrollment resulting from higher international student surcharges. However, the Committee also believes that the current surcharge is not a financial barrier for international students, noting that the current international student tuition (including the surcharge) at Gallaudet, for example, is \$11,200—about one-half of the tuition charged to students at other private universities in the District of Columbia.

The Committee extends authorization of appropriations for Gallaudet University, its elementary and secondary programs, and NTID through fiscal year 2002. However, in recognition of the greater revenue that the institutions will receive from lifting the cap on the enrollment of international students and from growth in the institutions' endowments, the Committee has included specific authorizations for each fiscal year through 2003. These authorization levels reflect the Administration's budget requests for the institutions in 1999, and are annually increased by 1.5 percent in fiscal year 2000 through 2003. In the case of NTID, the authorization levels also reflect the projected additional costs for NTID's renovation of dormitory facilities.

Part B, Extension and Revision of Indian Higher Education Programs

The Committee has extended all provisions of the Tribally Controlled Community College Assistance Act and the Navajo Community College Act. This continues the practice of insuring that these programs have the same reauthorization schedule as other Higher Education programs.

The Committee has included three important changes in current law regarding the Tribally Controlled Community College Assistance Act:

The Act will henceforth be known as the Tribally Controlled College and University Assistance Act, and all references in current law to “community colleges” will be changed to “colleges and universities” and the word “college” would be changed to “institution.” This is done to reflect more accurately the makeup of tribally controlled institutions of higher education;

There is a provision requiring the Secretary of Education to work with the Tribal Colleges and Universities to establish a national accreditation agency that would have a specific focus on the concerns of these institutions; and,

The base per-Indian student funding contained in the Tribally Controlled Colleges Universities Act would be increased from \$5,820 to \$6,000 and the overall authorization for grants to Tribally Controlled Colleges and Universities would be increased to \$40 million to reflect the increase in the per student figure.

TITLE X—FACULTY RETIREMENT INCENTIVES

Title X amends the Age Discrimination in Employment Act of 1967 (ADEA) to clarify that it is permissible for colleges and universities to offer voluntary early retirement incentives to tenured faculty that are in part age-based. Title X is identical to the bipartisan bill H.R. 3473, the Faculty Retirement Incentive Act. The Subcommittee on Employer-Employee Relations held a hearing on early retirement incentives in higher education on May 22, 1997.

Currently, tenured faculty members of most colleges and universities are covered by defined contribution retirement plans, which generally offer greater financial incentives to remain employed than to retire. In addition, the unique nature of the tenure contract limits an institution’s ability to respond to problems arising from the impact of age on employment. Prior to January 1, 1994, Section 12 of the ADEA permitted the mandatory retirement at age 70 of tenured faculty at institutions of higher education. In addition, some institutions offered age-based retirement incentives to encourage voluntary retirement of tenured faculty before age 70. The ability to offer these incentives is now increasingly important to colleges and universities as a result of (1) the recent expiration of the ADEA’s mandatory age 70 retirement provision; (2) increased budget pressures that are aggravated by the significant salary differential between long-term and entry-level faculty members; (3) an increasing need to respond to changing academic needs, including necessary hires in new and existing fields; and (4) a desire for cost-effective methods of providing faculty members who would like to retire at earlier ages the financial ability to do so.

The National Academy of Sciences study that was commissioned by Congress to examine the issue of “uncapping” the mandatory age 70 retirement provision assumed the availability of age-based voluntary early retirement incentive plans when it concluded that the mandatory retirement provision should be allowed to expire.

In addition, the bipartisan National Commission on the Cost of Higher Education included this legislative initiative in its January 1998 recommendations to check the skyrocketing cost of a college education. The Commission recommended that “Congress enact a

clarification to the Age Discrimination in Employment Act to ensure that institutions offering defined contribution retirement programs are able to offer early retirement incentives to tenured faculty members.”

In section 4(f)(2)(B)(ii) of current law, ADEA provides that “voluntary early retirement incentive plans consistent with the relevant purpose or purposes of the Act” do not violate the ADEA’s prohibition against age discrimination in “compensation, terms, conditions, or privileges of employment” contained in Section 4(a)(1). The relevant purposes of the Act are set forth in Section 2(b): “to promote employment of older persons based upon their ability rather than age; to prohibit arbitrary age discrimination in employment; and to help employers and workers find ways of meeting problems arising from the impact of age on employment.”

The legislative history of the Older Workers Benefit Protection Act of 1990 (OWBPA), which added Section 4(f)(2) of the ADEA, is reasonably clear that at least some voluntary early retirement incentive plans under which benefits are reduced or eliminated based upon age are consistent with the purposes of the ADEA and are, therefore, encompassed by Section 4(f)(2)(B)(ii). However, the OWBPA report language is somewhat ambiguous on this point. Moreover, the Equal Employment Opportunity Commission (EEOC) has taken the position that voluntary retirement incentive benefits that decrease based on age and ultimately cease at a specified age are by their nature inconsistent with the ADEA’s purpose of prohibiting arbitrary age discrimination in employment.¹ The Committee believes that the voluntary retirement incentives encompassed by Title X do not conflict with the purposes of the ADEA and that the ADEA should be amended to make this clear and to avoid unnecessary litigation on this issue.

Therefore, Title X adds to the ADEA a safe harbor under which institutions of higher education may offer to tenured faculty members voluntary retirement incentive benefits that are reduced or eliminated based upon age.

To satisfy the safe harbor, a plan or arrangement must not preclude an eligible employee who has attained too high an age for the maximum benefit otherwise available under the applicable formula from having an opportunity of at least 180 days’ duration to elect to retire and receive that maximum benefit. In determining that maximum benefit, the employee will be assumed to retire at the age which, under the applicable formula, results in the largest benefit, but all relevant factors other than age—such as salary or years of service—will be determined as of the employee’s actual age.

The safe harbor encompasses only benefits that are in addition to those already available to the faculty members under other plans or arrangements. Thus, the safe harbor would not apply to a plan under which active or retired faculty members, because they did not retire before a given age, ceased to receive benefits (other

¹See *EEOC v. Crown Point Community School Corporation et al.*, No. 2:93 CV 237 (N.D. Ind. 1997), in which a magistrate judge granted summary judgment for the EEOC; amicus curiae brief filed in *Lyon v. Ohio Educational Association*, 53 F.3d 135 (6th Cir. 1995), in which the Court of Appeals found no impermissible age discrimination and did not reach the section 4(f)(2) issue.

than the voluntary retirement incentive benefits themselves) that were available to other active or retired faculty members, respectively.

Under Title X, a college or university plan or arrangement would not violate the ADEA, for example, by offering to tenured faculty members who voluntarily retire between ages 65 and 70 a monthly “bridge” benefit, payable until age 70, equal to 50 percent of their final monthly salary, with the expectation that the faculty members would wait until age 70 to commence their regular retirement benefits. The bridge benefit that could be made available between other ages, such as 60 and 65, or 62 and 69, could involve a different percentage of pay, and could be subject to other conditions, such as a minimum service requirement for eligibility, or limitation of the plan to one or more schools, departments, or other classifications of tenured faculty. Similarly, under Title X, a plan or arrangement could, consistent with the ADEA, provide lump sum retirement incentives, expressed as a percentage of final salary, that are reduced based upon age at retirement and eliminated at a specified upper age (e.g., 65 or 70). The ADEA would also not be violated by a voluntary phased retirement program for eligible tenured faculty members under which the retirement incentive takes the form of subsidized pay for part-time work. The amount of the subsidy or duration of the part-time work, or both, is decreased or eliminated based upon age. In each case, upon adoption of the plan or arrangement, a faculty member who would otherwise be prevented by attainment of too high an age from receiving the maximum benefit under the applicable formula would be given an opportunity of at least 180 days’ duration to elect to retire and receive that maximum benefit, determined as described above.

No inference is intended that these or other retirement incentive plans or arrangements sponsored by institutions of higher education or other employers do not constitute “voluntary early retirement incentive plan[s] consistent with the relevant purpose or purposes of the [ADEA]” within the meaning of § 4(f)(2)(B)(ii) of the ADEA, or are not otherwise lawful without regard to this bill.

H.R. 6—Higher Education Act Amendments of 1998

Summary: H.R. 6 would amend the Higher Education Act of 1965 by reauthorizing several existing programs, authorizing new programs, and repealing others. Authorizations of appropriations under H.R. 6 would total \$101 billion for fiscal years 1999–2003, assuming adjustments for inflation. Without adjustments for inflation, authorizations would total \$100 billion.

H.R. 6 would also make numerous changes in federal student loan programs. These changes are estimated to reduce direct spending by \$185 million in 1998 but increase spending by almost \$3.8 billion over the 1999–2003 period.

H.R. 6 contains no intergovernmental or private sector mandates that would exceed the thresholds established in the Unfunded Mandates Reform Act (UMRA).

The estimates assume that H.R. 6 would be enacted by June 1, 1998. Except where provisions have specific effective dates, H.R. 6 would become effective on October 1, 1998.

Estimated cost to the Federal Government: The estimated budgetary impact of H.R. 6 is shown in Table 1.

The costs of this legislation fall within budget function 500 (education, training, employment, and social services).

Basis of estimate

Spending subject to appropriation

H.R. 6 would reauthorize several existing discretionary programs within the Higher Education Act of 1965. In addition, some new programs would be authorized, and a number of expiring provisions would be repealed. For most of the programs that would be reauthorized or newly authorized, the bill includes stated amounts of authorizations for fiscal year 1999, plus such sums as may be necessary for the four following fiscal years. CBO assumes current spending patterns in estimating outlays.

Tables 2 and 3 show the estimated impact of H.R. 6 on spending subject to appropriation by title, with and without adjustments for inflation after 1999.

Title I: General Provisions.—Title I would authorize a new performance-based organization (PBO) within the Department of Education for the delivery of student financial aid assistance. The PBO would have a chief operating officer and up to five senior managers whose pay would be linked to their performance in improving student financial aid services. The PBO would have greater flexibility than the Department currently has in its budgeting, procurement, and personnel processes but would have no role in developing policy. Although the policy implications of the creation of this new PBO could be significant, its budgetary implications would be minimal, because the principal activities of the PBO are already being performed by the Department of Education. CBO estimates that this provision would cost an additional \$2 million in 1999 and \$1 million in each of fiscal years 2000 through 2003 to cover start-up activities and compensation for new personnel.

Title II: Post-Secondary Improvement Programs.—Title II would authorize the Urban Community Service program, a fund for the improvement of post-secondary education, grants to states for workplace and community transition training for incarcerated

youth offenders, an advanced placement fee payment program, and teacher quality enhancement grants. These authorizations would total \$77 million in fiscal year 1999 and \$386 million for fiscal years 1999–2003, not including adjustments for inflation.

Title III: Institutional Aid.—Title III would provide authorizations for grants aimed at strengthening institutions of higher education, including historically black colleges and universities and tribally-controlled colleges and universities. Title III would also reauthorize the minority science and engineering improvement program. Authorizations under Title III would total \$335 million in fiscal year 1999, and \$1.7 billion for fiscal years 1999–2003, not including adjustments for inflation.

Title IV: Pell Grants.—Title IV–A would reauthorize the Pell grant program and change the formulas used to determine Pell award levels.

CBO has developed a simulation model using a sample of applicants for student aid to estimate the effects of various policy changes on federal spending under the Pell program and student

loan programs. Using detailed income, asset, and demographic data for individual students and their families, the model is used to estimate how much students and their families would be expected to contribute to educational costs. For Pell grants, the model also simulates program participation and estimates the amount of federal support necessary to fund the program, based on families' expected contributions, the award rules, the costs of the postsecondary schools that the students attend, and the maximum award level. The figures included in this cost estimate are based on the Department of Education's sample of Pell grant applicants and recipients for the 1996–1997 academic year, the latest year for which complete data are available.

Maximum awards.—The authorized Pell maximum award would be \$4,500 for academic year 1999–2000, \$4,700 for academic year 2000–2001, \$4,900 for academic year 2001–2002, \$5,100 for academic year 2002–2003, and \$5,300 for academic year 2003–2004. The Pell program is currently authorized only through fiscal year 1998 (academic year 1998–1999). H.R. 6 would increase estimated authorizations by \$13.2 billion for fiscal year 1999, \$14.2 billion for fiscal year 2000, \$15.7 billion for fiscal year 2001, \$17.3 billion for fiscal year 2002, and \$18.3 billion for fiscal year 2003. CBO estimates that, under the stated maximum grants, 4.6 million students would receive Pell grants in academic year 1999–2000, 4.7 million in 2000–2001, 5.1 million in 2001–2002, 5.4 million in 2002–2003, and 5.5 million in 2003–2004. The average award would be about \$2,890 in 1999–2000, \$3,000 in 2000–2001, \$3,100 in 2001–2002, \$3,220 in 2002–2003, and \$3,300 in 2003–2004. These estimates assume that the program would be funded at the maximum levels authorized and would include the needs analysis and other changes contained in the bill.

Needs analysis.—Part F of Title IV of the bill would modify the needs analysis formulas used for calculating federal Pell grants. The needs analysis formulas are used to determine the expected family contribution (EFC), or the amount that the federal government expects the parents and the student to contribute toward the student's education. In most cases, the size of the grant is determined by subtracting the EFC from the maximum award. Any change that would lower the EFC would increase an individual's grant.

Under H.R. 6, parents of dependent students who are also enrolled in college courses would no longer be counted as students when determining the parents' contribution from available income. This change would raise the EFC for these families and reduce the Pell award. CBO estimates that this provision would reduce program costs by about \$10 million, assuming a \$3,000 maximum award (the same level as in 1998–1999).

Under H.R. 6, assets held by dependent students and their parents would be combined and assessed together to determine a family contribution from assets, rather than assessing them separately and at different rates as under current law. Under this bill, dependent students would have to contribute 12 percent of their assets each year towards college, rather than the current 35 percent. CBO estimates that this provision would increase program costs by about \$90 million in 1999, assuming a \$3,000 maximum award.

H.R. 6 would increase the income protection allowance (IPA) for dependent students and for independent students without children. The IPA is an amount of income that is not expected to be used toward college and is not counted as income as part of the EFC calculations. H.R. 6 would increase the IPA from \$2,200 to \$3,000 for dependent students, from \$4,250 to \$5,500 for single students and for married students who are both enrolled in school, and from \$7,250 to \$8,500 for married students with only one enrolled. CBO estimates that the IPA increases would boost program costs by about \$310 million in 1999, assuming a \$3,000 maximum award.

H.R. 6 would index these IPA levels to the consumer price index for fiscal year 2000 and beyond. This provision would result in additional costs of about \$30 million in 2000, \$60 million in 2001, \$90 million in 2002, and \$120 million in 2003.

Under the bill, negative parental income (after taxes, employment expenses, and the IPA) would count as an offset against the students' available income. CBO estimates that this provision would increase costs by about \$180 million in 1999 with a \$3,000 maximum award.

H.R. 6 would give student financial aid administrators more discretion in determining a student's EFC. Under current law, a student financial aid administrator can, on a case-by-case basis and under "special circumstances," change the items that go into calculating a student's EFC. H.R. 6 would allow the aid administrator under "extraordinary circumstances" (to be defined by the Secretary of Education) to change a student's EFC itself. Since under current law an aid administrator has the discretion to affect a student's EFC, and since any use of the "extraordinary circumstances" provision would likely need substantial documentation, CBO assumes that this provision would be used infrequently and have a negligible effect on costs.

Other provisions.—Title IV would exclude schools with high loan default rates from participating in the Pell programs. CBO estimates that this provision would reduce Pell costs by about \$15 million in 1999, assuming a \$3,000 maximum award.

Part G of Title IV contains a provision that would exclude individuals attending college in Micronesia, the Marshall Islands, and Palau from receiving Pell awards beginning in 2001. This provision would reduce program costs by \$6 million each year assuming a \$3,000 maximum award.

Part G authorizes the Secretary of Education to verify income data by confirming that adjusted gross income (AGI) claimed on student financial aid forms corresponds to the AGI declared to the IRS. A recent audit by the Department of Education suggests that approximately 4.4 percent of applicants underreported their incomes and received larger awards than they should have. CBO estimates that the proposed policy could not be implemented until fiscal year 2000. Savings in that year would be \$180 million and would total \$735 million over the 2000–2003 period.

CBO estimates that other provisions would have little or no budgetary impact. They include increasing the tuition sensitivity formula threshold, increasing the dependent care allowance in cases where the tuition sensitivity formula is used, prorating a student's contribution for periods of enrollment less than nine months,

excluding from participation individuals convicted of drug-related offenses, changing the rule dealing with sources of revenues for proprietary schools, and allowing for a distance education demonstration project.

Title IV: Other Student Assistance.—In addition to authorizing Pell grants, Title IV–A would authorize other grants to students. These grants would include work-study grants, TRIO programs, a new High Hopes for College program, federal supplementary education opportunity grants, assistance for students whose families are engaged in migrant and seasonal farm work, a new Frank Tejeda Scholarship, and a Robert C. Byrd Honors Scholarship. With the exception of the High Hopes for College program, these grants would be authorized through 2003. The High Hopes program would be authorized through 2004. Discretionary spending authorized in Part A of Title IV, excluding Pell Grants, totals \$3.3 billion for fiscal year 1999 and \$16.5 billion from 1999–2003, not including adjustments for inflation.

Title V: Developing Institutions.—Title V would authorize grants to institutions with full-time undergraduate enrollment of at least 25 percent Hispanic students. A qualifying institution would need to provide assurances that at least 50 percent of its Hispanic students are low income. The bill would provide \$80 million in fiscal year 1999 and such sums as may be necessary for grants to Hispanic serving institutions. Title V would authorize \$400 million over the 1999–2003 period, not including adjustments for inflation.

Title VI: International and Grant Education Programs.—Title VI would authorize funding for international and foreign language studies, a business and international education program, an institute for international public policy, and graduate assistance areas of national need. Authorizations under Title VI would total \$148 million in fiscal year 1999 and \$740 million for fiscal years 1999–2003, not including adjustments for inflation.

Title VII: Construction, Reconstruction, and Renovation of Academic Facilities.—Title VII would authorize \$50 million in 1999 to cover the subsidy costs of loans for construction, reconstruction, and renovation of academic housing and other educational facilities. Estimated authorization levels would total \$250 million for fiscal year 1999–2003, not including adjustments for inflation.

Title VIII: Additional Provisions.—Title VIII would authorize several studies on various aspects of higher education. One study would be a report by the Department of Education on the existing practices concerning the transfer of credits between institutions of higher education. The General Accounting Office (GAO) would be required to undertake three studies: an analysis of the potential for using auctions or other market mechanisms in the delivery of student loans, a study on the costs to institutions of higher education of regulations affecting industrial and commercial enterprises, and an annual report on the costs of higher education. The final requirement of Title VIII is a study by the National Center on Education Statistics (NCES) on establishing consistent methodologies for reporting the various costs of the different institutions of higher education.

The report required by the Department of Education is estimated to have insignificant costs. After discussions with GAO staff, CBO

estimates that the GAO studies would cost \$1.1 million over the 1999–2000 period, with insignificant costs for the ongoing reporting requirement. Based on consultations with NCES staff, CBO estimates that the NCES study would cost \$2 million in both 1999 and 2000 and \$1 million annually for the ongoing collection and dissemination of data.

Title IX: Amendments to the Education of the Deaf Act of 1986 and Indian Higher Education Act.—Title IX would amend the Education of the Deaf Act by authorizing funds for Gallaudet University and the National Technical Institute for the Deaf (NTID). Under this title, Gallaudet’s authorization would total \$83 million in 1999 and \$430 million for fiscal years 1999–2003; the NTID would receive \$45 million in 1999 and \$239 million over the years 1999–2003.

Authorizations under Part B of Title IX would target tribally-controlled colleges and universities and would include funds for endowment growth, construction, economic development, teacher training, and the Navajo Community College Act. Total authorizations under Title IX would be about \$200 million in 1999 and about \$1.1 billion for fiscal years 1999–2003.

Direct spending

Title IV: Student Loans.—This bill makes several changes in the student loan programs, which under current law are expected to guarantee or issue about 52 million loans totaling \$210 billion over the 1998–2003 period. The bill would slightly modify the conditions of eligibility for loans and would increase the government’s cost of providing loan capital to students and parents. In general, the proposed changes may be generally classified by their impact: changes affecting interest rates for borrowers and lenders, changes affecting guaranty agencies, and changes affecting borrowers. The bill also contains a number of other changes to the program, but these would have relatively small budgetary effects.

Most provisions affecting the student loan programs are assessed under the requirements of credit reform. As such, the budget records all the costs and collections associated with a new loan on a present-value basis in the year the loan is obligated. The costs of all changes affecting outstanding loans are displayed in the year a bill is enacted—in this case 1998.

The changes included in this bill would decrease program costs by \$185 million in 1998, but increase costs by \$630 million in 1999 and \$3.8 billion over the 1998–2003 period (see Table 4). The overall federal discounted cost of providing loan capital to students and parents would be increased by about 2 percentage points per each dollar loaned from an estimated 11.6 percent to 13.6 percent.

² Less than \$500,000.

Changes Affecting Interest Rates for Borrowers and Lenders.—Under current law, a new formula for establishing the variable interest rate on guaranteed and direct student loans is scheduled to take effect in July 1998.¹ The interest rate received by private lenders will be the interest rate on bonds of comparable maturity plus 1.0 percentage points.² Borrowers will pay the same rate, but no more than 8.25 percent. To the extent that the yield to lenders exceeds the rate paid by borrowers, the federal government pays lenders the difference, which is called a special allowance. In addition the federal government pays the interest for student borrowers

¹ Before July 1998, borrowers in the guaranteed and direct student loan programs pay the bond equivalent of the 91-day Treasury bill rate plus 2.5 percentage points while the borrower is in school, grace, and deferment and 3.1 percentage points when the borrower is in repayment. The interest rate cap is 8.25 percent. The interest rate on guaranteed and direct parent loans is the bond equivalent of the 365-day Treasury bill rate plus 3.1 percentage points, with a cap of 9 percent.

² The CBO baseline assumes that the rate on bonds of comparable maturity is the 10-year bond rate. Recently, the Administration has indicated that it expects to use a blended rate of 10-year and 20-year maturities.

with subsidized loans while they are in school or in a period of grace or deferment.

H.R. 6 would set the rate paid by student borrowers at the bond-equivalent 91-day Treasury bill rate plus 1.7 percentage points while the borrower is in school, grace, or deferment and 2.3 percentage points when the borrower is in repayment. Lenders would receive a rate that would be 50 basis points (0.5 percentage points) higher, and the difference would be paid by the federal government. In addition, the cap of 8.25 percent on borrower's rates would be retained. (The bill would also change the rates on direct and guaranteed parent loans.)

The net budgetary effect of the changes in borrower interest rates and lender yields is to increase federal costs over the 1998–2003 period by about \$3.6 billion relative to current law. The increased cost is associated with the new, minimum 50-basis-point special allowance payment as well as the increased exposure of the federal government to interest rate subsidies when rates rise sufficiently to cause the borrowers' interest rates to be constrained by the statutory caps. The proposed new interest rate structure would move the interest rates closer to the caps. Moreover, the 91-day Treasury bill is a more volatile instrument than the 10-year bond rate. These costs are partially offset by higher borrower interest payments in the direct loan program.

In estimating the expected federal costs of the interest rate formula change, CBO used a vector autoregressive model to simulate the variation in interest rates around the CBO's baseline forecast. The model provided probabilities of how often and by how much the simulated rates exceeded the 8.25 percent interest rate cap. These probabilities were then used in CBO's model of the student loan program to estimate changes in subsidy costs.

Changes Affecting Guarantors.—H.R. 6 would restructure the financing of guaranty agencies and divide the current agency reserve funds into federal and agency property. In addition, many of the federal payments to and from the guaranty agencies would be altered by this bill. Overall, the provisions affecting guaranty agencies are estimated to reduce federal costs by \$329 million over the 1998–2003 period.

This bill would reduce the federal reinsurance rate on new insured loans from 98 percent to 95 percent; the reinsurance rates for high default agencies would also be lowered. This change would lower costs by \$355 million over the next five years.

H.R. 6 would lower the retention allowance on default collections by the guaranty agencies. Currently, agencies are allowed to retain 27 percent of their recoveries from loans that default; the remainder goes to the federal government. This bill would reduce the retention allowance to 24 percent except for consolidations of defaulted loans, where the percentage would be set at 18.5 percent. This change would apply to all default collections as of October 1, 1998, and result in an estimated \$385 million in savings over the 1998–2003 period.

The bill would eliminate the payment to guaranty agencies in cases where the agencies assist lenders in attempting to avert defaults. Currently the payment is equal to 1 percent of the principal and interest of loans for which the lenders do not file a default

claim for at least 270 days after the loan is determined to be delinquent. The elimination of this payment, which would apply for outstanding as well as new loans, would save \$260 million from 1998 to 2003.

The bill would reclaim \$150 million in agency reserves over the next five years. Although agency reserves are considered the property of the federal government, federal budgetary documents have never displayed these reserves as assets of the federal government. Consequently, as with the reserves recaptured in the Balanced Budget Act of 1997, the Office of Management and Budget (OMB) has displayed any reserves being reclaimed as offsetting receipts, and CBO has followed this budgetary treatment. The reserves reclaimed under H.R. 6 are estimated to reduce net federal spending by \$150 million over the 1999–2003 period.

The bill would establish a new federal subsidy payment to guaranty agencies equal to 0.65 percent of new guaranteed loan volume. Based on CBO's estimate of loan volume, this provision would cost \$690 million over the next five years.

The bill would increase the current \$150 million annual mandated set-aside of Section 458 funds to be used for administrative costs. The new payments would be 0.12 percent of outstanding guaranteed loan volume for 1999 and 2000 and 0.1 percent thereafter. Section 458 funds would be increased by \$131 million over the 1999–2003 period.

Changes Affecting Borrowers (exclusive of changes in interest rates).—H.R. 6 would make numerous changes in the student loan program that could have implications for borrowers. In total, the provisions affecting borrowers—excluding the change in interest rates—would cost the federal government an estimated \$388 million over the 1998–2003 period.

The bill would provide for a degree of loan cancellation for some teachers in public or private elementary or secondary schools in school districts eligible for Title I grants and in a school with more than 30 percent of students from low-income families. Teachers would have to be certified (in the case of elementary school teachers) or to be teaching in their college major (in the case of secondary school teachers). Loan cancellation would apply only to subsidized loans received after the first two years of college up to \$17,750, and the loans and accrued interest would be canceled according to the following schedule: nothing for the first two years of teaching, 30 percent in each of the third and fourth years, and the remaining 40 percent in the fifth year. Eligibility would be restricted to new loans issued to new borrowers beginning in October 1998. The estimated costs of this provision were based on information from the National Center on Education Statistics on the number of newly hired teachers who are recent college graduates and the number of teachers who teach in the types of schools which would be eligible to participate under this program, as well as information on the number of elementary teachers who are certified to teach and the number of secondary teachers who are teaching in their major. By 2003, over 30,000 new teachers are estimated to be participating in this program. The estimated subsidy costs of the provision are \$218 million over the next five years.

This bill would also modify certain rules with regard to loan disbursements, change the calculations determining eligibility for loans, modify various repayment rules and terms and alter loan amounts in certain cases. Estimates for the changes in eligibility requirements and loan amounts are generally derived from simulations from the Pell Grant model described earlier. Together these changes would increase costs by \$170 million over the 1998–2003 period.

Other Changes.—H.R. 6 would extend for one additional year an exemption to a rule that would eliminate schools from participating in the student loan program if their default rates for a cohort exceeded 25 percent. In addition, the Secretary of Education would be allowed to continue the exemption on a year-by-year and case-by-case basis for the next two years. CBO estimates that this provision will increase federal costs by \$5 million in both fiscal years 1998 and 1999.

Interactions Among Student Loan Provisions.—Because the proposed changes in the student loan programs interact with each other, the total savings from all of the provisions together do not equal the sum of the individual components. For example, changes in loan volume due to changes in eligibility rules would affect the costs of the change in interest rates. When all of the provisions are considered together, the interactions increase the costs by \$17 million in 1999 and \$61 million through 2003.

Perkins Loans.—Under current law, the Perkins loan revolving fund collects receipts of certain repayments from Perkins loans that have been assigned, referred to, or transferred to the Department of Education. The monies in this fund are to be disbursed by the Secretary to Perkins loan schools in the form of grants for new capital. H.R. 6 would repeal this fund and deposit its current balances in the Treasury. This change would save \$200 million over the 1998–2003 period. H.R. 6 would also mandate that the Secretary of Education pay off Perkins loans for borrowers whose schools closed before they completed their course of education. Few borrowers would be affected by this provision, and its cost would be negligible.

Pay-as-you-go considerations: The provisions H.R. 6 would affect direct spending and therefore would be subject to pay-as-you-go procedures under Section 252 of the Balanced Budget and Emergency Deficit Control Act of 1990. The pay-as-you-go procedures cover only the current year, the budget year, and the succeeding four years. The pay-as-you-go effects of the bill are shown in the table below.

Intergovernmental and Private-Sector Impact: H.R. 6 contains no intergovernmental or private-sector mandates that would exceed the thresholds established in UMRA. (The threshold for intergov-

ernmental mandates is \$50 million in 1996, adjusted annually for inflation. The threshold is \$100 million in 1996, adjusted annually for inflation.) The bill would prohibit all creditors, including state, local, and tribal governments, from garnishing grants, loans, or work assistance awarded to students (under Title IV of this bill) to satisfy any debt owed by the student. CBO estimates that any loss of revenue to creditors would not be significant.

The bill's provisions would, on the whole, benefit public institutions of higher education. Although some new requirements would be imposed on these institutions, they would not be considered mandates under UMRA because they would be conditions of receiving federal assistance.

[PART B—ARTICULATION AGREEMENTS

[SEC. 121. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) because more than one-half of all first-time first-year students attending postsecondary institutions attend community or junior colleges, and because almost one-half of minority students enrolled in higher education attend 2-year institutions, community and junior colleges represent a substantial and an important educational resource;

(2) declining participation rates for low-income students and minorities at institutions of higher education is of growing concern to the higher education community and Congress; and

(3) there is growing awareness of the need to assist low-income, minority and other nontraditional students in bridging the gap between 2-year to 4-year institutions, enabling such students to reach their individual potential, as well as contribute to the larger society.

(b) PURPOSE.—The purpose of this part is to improve the educational opportunities of this Nation's postsecondary students by creating comprehensive articulation agreements and planning between partnerships of 2-year and 4-year institutions of higher education.

[SEC. 122. AUTHORIZATION OF GRANTS.

(a) ASSISTANCE FOR ARTICULATION PARTNERSHIPS.—From amounts appropriated for this part, the Secretary shall make grants to States to enable States to make awards, either on a competitive basis or on the basis of a formula determined by the State, to articulation partnerships between—

(1) a qualified 2-year institution; and

(2) a qualified 4-year institution.

(b) QUALIFIED INSTITUTIONS.—For purposes of this part—

(1) a qualified 2-year institution is an institution of higher education (as determined under section 481(a)) that is an eligible institution under section 435(a) and that—

(A) is a nonprofit institution that offers a 2-year associate degree or a 2-year certificate program; or

(B) is a proprietary institution that offers a 2-year associate degree program; and

(2) a qualified 4-year institution is an institution of higher education (as determined under section 481(a)) that is an eligible institution under section 435(a) and that offers a baccalaureate degree program.

[(c) ALLOCATION AND STATE GRANTS.—

[(1) FORMULA ALLOCATION.—In any fiscal year for which the amount made available under section 129 to carry out the provisions of this part equals or exceeds \$50,000,000, the Secretary shall allot an amount that bears the same ratio to the amount appropriated under section 129 for such fiscal year as the total amount received under title IV by students attending institutions of higher education in that State for such fiscal year bears to the total amount received under title IV by all students for such fiscal year, based on the most recent year for which such data are available.

[(2) COMPETITIVE GRANTS.—In any fiscal year for which the amount made available under section 129 to carry out the provisions of this part do not equal or exceed \$50,000,000, the Secretary is authorized, in accordance with the provisions of this part, to make grants to States to carry out articulation agreements under sections 124 and 125.

[SEC. 123. STATE APPLICATION.

[Each State that desires to receive a grant under this part shall submit an application to the Secretary in such form and containing or accompanied by such information as the Secretary may require. Such application shall—

[(1) after consultation with the State agencies responsible for supervision of community colleges, technical institutes, or other 2-year postsecondary institutions, designate a sole State agency as the State agency responsible for the administration and supervision of activities carried out with assistance under this part;

[(2) describe how funds will be allocated in a manner consistent with section 124;

[(3) contain assurances that the State will comply with the requirements of this part;

[(4) provide for an annual submission of data concerning the use of funds and students served with assistance under this part; and

[(5) provide that the State will keep such records and provide such information to the Secretary as may be required for purposes of financial audits and program evaluation.

[SEC. 124. LOCAL APPLICATIONS.

[Any articulation partnership comprised of qualified institutions that desires to receive a grant from a State under this part shall submit an application to the State in such form and containing or accompanied by such information as the State may require and shall—

[(1) include in the articulation agreement—

[(A) assurances that academic credit earned at the qualified institution described in section 122(b)(1) will be transferable to the qualified institution or institutions as described in section 122(b)(2);

[(B) development of articulation agreement programs and services appropriate to the needs of the partnership participants;

- [(2) as part of the program's planning activities, to acquire technical assistance from Federal, State, or local entities that have successfully designed, established, and operated articulation programs;
- [(3) to provide workshops with students and teachers, counseling for students to continue their education to a bachelors degree, orientation visits at institutions participating in the partnerships;
- [(4) to develop agreements with local educational agencies for vocational course equivalency approval procedures for purposes of satisfying entrance requirements to qualified institutions; and

SEC. 400. STATEMENT OF PURPOSE; PROGRAM AUTHORIZATION.

(a) PURPOSE.—It is the purpose of this part, to assist in making available the benefits of postsecondary education to eligible students (defined in accordance with section 484) in institutions of higher education by—

(b) SECRETARY REQUIRED TO CARRY OUT PURPOSES.—The Secretary shall, in accordance with subparts 1 through [8] 6, carry out programs to achieve the purposes of this part.

(a) PROGRAM AUTHORITY AND METHOD OF DISTRIBUTION.—(1) The Secretary shall, during the period beginning July 1, 1972, and ending September 30, [1998] 2004, pay to each eligible institution such sums as may be necessary to pay to each eligible student (defined in accordance with section 484) for each academic year during which that student is in attendance at an institution of higher education, as an undergraduate, a [basic grant] *Federal Pell Grant* in the amount for which that student is eligible, as determined pursuant to subsection (b). [Not less than 85 percent of such sums shall be advanced to eligible institutions prior to the start of each payment period and shall be based upon an amount requested by the institution as needed to pay eligible students, except that this sentence shall not be construed to limit the authority of the Secretary to place an institution on a reimbursement system of payment.]

(2) Nothing in this section shall be interpreted to prohibit the Secretary from paying directly to students, in advance of the beginning of the academic term, an amount for which they are eligible, in cases where the eligible institution elects not to participate in [the disbursement system required by paragraph (1)] *the disbursement of Federal Pell Grants*.

(3) **[Basic grants]** *Grants* made under this subpart shall be known as “Federal Pell Grants”.

(b) PURPOSE AND AMOUNT OF GRANTS.—(1) The purpose of this subpart is to provide a **[basic grant]** *Federal Pell Grant* that in combination with reasonable family and student contribution and supplemented by the programs authorized under subparts 3 and 4 of this part, will meet at least 75 percent of a student’s cost of attendance (as defined in section 472), unless the institution determines that a greater amount of assistance would better serve the purposes of section 401.

[(2)(A) The amount of the basic grant for a student eligible under this part shall be—

- [(i)** \$3,700 for academic year 1993–1994,
- [(ii)** \$3,900 for academic year 1994–1995,
- [(iii)** \$4,100 for academic year 1995–1996,
- [(iv)** \$4,300 for academic year 1996–1997, and
- [(v)** \$4,500 for academic year 1997–1998,

less an amount equal to the amount determined to be the expected family contribution with respect to that student for that year.]

(2)(A) *The amount of the Federal Pell Grant for a student eligible under this part shall be—*

- (i) \$4,500 for academic year 1999–2000,*
- (ii) \$4,700 for academic year 2000–2001,*
- (iii) \$4,900 for academic year 2001–2002,*

* * * * *

(3)(A) For any academic year for which an appropriation Act provides a maximum **[basic grant]** *Federal Pell Grant* in an amount in excess of **[\$2,400]** \$3,000, the amount of a student’s **[basic grant]** *Federal Pell Grant* shall equal **[\$2,400]** \$3,000 plus—

- (i)** one-half of the amount by which such maximum **[basic grant]** *Federal Pell Grant* exceeds **[\$2,400]** \$3,000; plus
- (ii)** the lesser of—

(I) * * *

* * * * *

(B) For purposes of subparagraph (A)(ii)(I), a student’s allowance is **[\$750]** \$1,500 if the student has dependent care expenses (as defined in section 472(8)) or disability related expenses (as defined in section 472(9)).

(4) No **[basic grant]** *Federal Pell Grant* under this subpart shall exceed the difference between the expected family contribution for a student and the cost of attendance (as defined in section 472) at the institution at which that student is in attendance. If, with respect to any student, it is determined that the amount of a **[basic grant]** *Federal Pell Grant* plus the amount of the expected family contribution for that student exceeds the cost of attendance for that year, the amount of the **[basic grant]** *Federal Pell Grant* shall be

reduced until the combination of expected family contribution and the amount of the [basic grant] *Federal Pell Grant* does not exceed the cost of attendance at such institution.

(5) No [basic grant] *Federal Pell Grant* shall be awarded to a student under this subpart if the amount of that grant for that student as determined under this subsection for any academic year is less than \$400, except that a student who is eligible for a [basic grant] *Federal Pell Grant* that is equal to or greater than \$200 but less than \$400 shall be awarded a [basic grant] *Federal Pell Grant* of \$400.

If the preceding sentence applies, the financial aid administrator at the home institution may use the cost of the study abroad program, rather than the home institution's cost, to determine the cost of attendance of the student.

(c) PERIOD OF ELIGIBILITY FOR GRANTS.—(1) The period during which a student may receive [basic grants] *Federal Pell Grants* shall be the period required for the completion of the first undergraduate baccalaureate course of study being pursued by that student at the institution at which the student is in attendance except that any period during which the student is enrolled in a noncredit or remedial course of study as defined in paragraph (2) shall not be counted for the purpose of this paragraph.

* * * * *

(d) APPLICATIONS FOR GRANTS.—(1) The Secretary shall from time to time set dates by which students shall file applications for [basic grants] *Federal Pell Grants* under this subpart.

(2) Each student desiring a [basic grant] *Federal Pell Grant* for any year shall file an application therefor containing such information and assurances as the Secretary may deem necessary to enable the Secretary to carry out the functions and responsibilities of this subpart.

* * * * *

tion for each such student. Each such student financial aid administrator shall—

(A) * * *

* * * * *

(3) Each contractor processing applications for awards under this subpart shall for each academic year after academic year 1986–1987 prepare and submit a report to the Secretary on the correctness of the computations of amount of the expected family contribution, and on the accuracy of the questions on the application form under this subpart for the previous academic year for which the contractor is responsible. The Secretary shall transmit the report, together with the comments and recommendations of the Secretary, to the Committee on Appropriations and the Committee on Labor and Human Resources of the Senate and the Committee on Appropriations and the Committee on **[Education and Labor]** *Education and the Workforce* of the House of Representatives.

* * * * *

(j) *INSTITUTIONAL INELIGIBILITY BASED ON DEFAULT RATES.*—

(1) *IN GENERAL.*—No institution of higher education shall be an eligible institution for purposes of this section if such institution of higher education is ineligible to participate in a loan program under this title as a result of a final default rate determination made by the Secretary under part B or D of this title, or both, after the final publication of fiscal year 1996 cohort default rates.

(2) *SANCTIONS SUBJECT TO APPEAL OPPORTUNITY.*—No institution may be subject to the terms of this subsection unless it has had the opportunity to appeal its default rate determination under regulations issued by the Secretary for the Federal Family Education Loan or Federal Direct Loan Program, as applicable. This subsection shall not apply to an institution that was not participating in the loan programs authorized under part B or D of this title on the date of enactment of the Higher Education Amendments of 1998, unless the institution subsequently participates in the loan programs.

[(1) EXCESS INTEREST ON 10 PERCENT LOANS.—If, with respect to a loan for which the applicable interest rate is 10 percent under subsection (d) of this section at the close of any calendar quarter, the sum of the average of the bond equivalent rates of 91-day Treasury bills auctioned for that quarter and 3.25 percent is less than 10 percent, then an adjustment shall be made to a borrower’s account—

[(A) by calculating excess interest in the amount computed under paragraph (2) of this subsection; and

[(B)(i) during any period in which a student is eligible to have interest payments paid on his or her behalf by the

Government pursuant to section 428(a), by crediting the excess interest to the Government; or

[(ii) during any other period, by crediting such excess interest to the reduction of principal to the extent provided in paragraph (5) of this subsection.

[(2) AMOUNT OF ADJUSTMENT FOR 10 PERCENT LOANS.—The amount of any adjustment of interest on a loan to be made under this subsection for any quarter shall be equal to—

[(A) 10 percent minus the sum of (i) the average of the bond equivalent rates of 91-day Treasury bills auctioned for such calendar quarter, and (ii) 3.25 percent; multiplied by

[(B) the average daily principal balance of the loan (not including unearned interest added to principal) during such calendar quarter; divided by

[(C) four.

[(3) EXCESS INTEREST ON LOANS AFTER 1992 AMENDMENTS, TO BORROWERS WITH OUTSTANDING BALANCES.—If, with respect to a loan made on or after the date of enactment of the Higher Education Amendments of 1992 to a borrower, who on the date of entering into the note or other written evidence of the loan, has an outstanding balance of principal or interest on any other loan made, insured, or guaranteed under this part, the sum of the average of the bond equivalent rates of 91-day Treasury bills auctioned for that quarter and 3.1 percent is less than the applicable interest rate, then an adjustment shall be made—

[(A) by calculating excess interest in the amount computed under paragraph (4) of this subsection; and

[(B)(i) during any period in which a student is eligible to have interest payments paid on his or her behalf by the Government pursuant to section 428(a), by crediting the excess interest to the Government; or

[(ii) during any other period, by crediting such excess interest to the reduction of principal to the extent provided in paragraph (5) of this subsection.

[(4) AMOUNT OF ADJUSTMENT.—The amount of any adjustment of interest on a loan to be made under this subsection for any quarter shall be equal to—

[(A) the applicable interest rate minus the sum of (i) the average of the bond equivalent rates of 91-day Treasury bills auctioned for such calendar quarter, and (ii) 3.1 percent; multiplied by

[(B) the average daily principal balance of the loan (not including unearned interest added to principal) during such calendar quarter; divided by

[(C) four.

[(5) ANNUAL ADJUSTMENT OF INTEREST AND BORROWER ELIGIBILITY FOR CREDIT.—Any adjustment amount computed pursuant to paragraphs (2) and (4) of this subsection for any quarter shall be credited, by the holder of the loan on the last day of the calendar year in which such quarter falls, to the loan account of the borrower so as to reduce the principal balance of such account. No such credit shall be made to the loan account

of a borrower who on the last day of the calendar year is delinquent for more than 30 days in making a required payment on the loan, but the excess interest shall be calculated and credited to the Secretary. Any credit which is to be made to a borrower's account pursuant to this subsection shall be made effective commencing no later than 30 days following the last day of the calendar year in which the quarter falls for which the credit is being made. Nothing in this subsection shall be construed to require refunding any repayment of a loan. At the option of the lender, the amount of such adjustment may be distributed to the borrower either by reduction in the amount of the periodic payment on the loan, by reducing the number of payments that shall be made with respect to the loan, or by reducing the amount of the final payment of the loan. Nothing in this paragraph shall be construed to require the lender to make additional disclosures pursuant to section 433(b).

¶(6) PUBLICATION OF TREASURY BILL RATE.—For the purpose of enabling holders of loans to make the determinations and adjustments provided for in this subsection, the Secretary shall for each calendar quarter commencing with the quarter beginning on July 1, 1987, publish a notice of the average of the bond equivalent rates of 91-day Treasury bills auctioned for such quarter. Such notice shall be published not later than 7 days after the end of the quarter to which the notice relates.

¶(7) CONVERSION TO VARIABLE RATE.—(A) Subject to subparagraphs (C) and (D), a lender or holder shall convert the interest rate on a loan that is made pursuant to this part and is subject to the provisions of this subsection to a variable rate. Such conversion shall occur not later than January 1, 1995, and, commencing on the date of conversion, the applicable interest rate for each 12-month period beginning on July 1 and ending on June 30 shall be determined by the Secretary on the June 1 preceding each such 12-month period and be equal to the sum of (i) the bond equivalent rate of the 91-day Treasury bills auctioned at the final auction prior to such June 1; and (ii) 3.25 percent in the case of loans described in paragraph (1), or 3.10 percent in the case of loans described in paragraph (3).

¶(B) In connection with the conversion specified in subparagraph (A) for any period prior to such conversion, and subject to paragraphs (C) and (D), a lender or holder shall convert the interest rate to a variable rate on a loan that is made pursuant to this part and is subject to the provisions of this subsection to a variable rate. The interest rates for such period shall be reset on a quarterly basis and the applicable interest rate for any quarter or portion thereof shall equal the sum of (i) the average of the bond equivalent rates of 91-Treasury bills auctioned for the preceding 3-month period, and (ii) 3.25 percent in the case of loans described in paragraph (1) or 3.10 percent in the case of loans described in paragraph (3). The rebate of excess interest derived through this conversion shall be provided to the borrower as specified in paragraph (5) for loans described in paragraph (1) or to the Government and borrower as specified in paragraph (3).

[(C) A lender or holder of a loan being converted pursuant to this paragraph shall complete such conversion on or before January 1, 1995. The lender or holder shall notify the borrower that the loan shall be converted to a variable interest rate and provide a description of the rate to the borrower not later than 30 days prior to the conversion. The notice shall advise the borrower that such rate shall be calculated in accordance with the procedures set forth in this paragraph and shall provide the borrower with a substantially equivalent benefit as the adjustment otherwise provided for under this subsection. Such notice may be incorporated into the disclosure required under section 433(b) if such disclosure has not been previously made.

[(D) The interest rate on a loan converted to a variable rate pursuant to this paragraph shall not exceed the maximum interest rate applicable to the loan prior to such conversion.

SEC. 435. DEFINITIONS FOR STUDENT LOAN INSURANCE PROGRAM.

As used in this part:

(a) ELIGIBLE INSTITUTION.—

(1) IN GENERAL.—Except as provided in paragraph (2), the term “eligible institution” means an institution of higher education, as defined in section [481] 101(a)(2), except that, for the purposes of sections 427(a)(2)(C)(i) and 428(b)(1)(M)(i), an eligible institution includes any institution that is within this definition without regard to whether such institution is participating in any program under this title and includes any institution ineligible for participation in any program under this part pursuant to paragraph (2) of this subsection.

(2) INELIGIBILITY BASED ON HIGH DEFAULT RATES.—(A) An institution whose cohort default rate is equal to or greater than the threshold percentage specified in subparagraph (B) for each of the three most recent fiscal years for which data are available shall not be eligible to participate in a program under this part for the fiscal year for which the determination is made and for the two succeeding fiscal years, unless, within 30 days of receiving notification from the Secretary of the loss of eligibility under this paragraph, the institution appeals the loss of its eligibility to the Secretary. The Secretary shall issue a decision on any such appeal within 45 days after its submission. Such decision may permit the institution to continue to participate in a program under this part if—

(i) the institution demonstrates to the satisfaction of the Secretary that the Secretary’s calculation of its cohort default rate is not accurate, and that recalculation would reduce its cohort default rate for any of the three fiscal years below the threshold percentage specified in subparagraph (B); [or]

[(ii) there are, in the judgment of the Secretary, exceptional mitigating circumstances that would make the application of this paragraph inequitable.]

(ii) *there are exceptional mitigating circumstances within the meaning of paragraph (4); or*

(iii) *there are, in the judgment of the Secretary, other exceptional mitigating circumstances that would make the application of this paragraph inequitable.*

During such appeal, the Secretary may permit the institution to continue to participate in a program under this part.

* * * * *

(C) Until July 1, [1998,] 1999, this paragraph shall not apply to any institution that is—

(i) * * *

* * * * *

(C) is an institution whose cohort default rate equals or exceeds 20 percent for the most recent year for which data are available;

may include in its appeal of such loss or rate a defense based on improper loan servicing (in addition to other defenses). In any such appeal, the Secretary shall take whatever steps are necessary to ensure that such institution has access to a representative sample (as determined by the Secretary) of the relevant loan servicing and collection records of the affected guaranty agencies and loan servicers or, *at the request of the institution, a complete copy of the records for loans made under this part or of the direct loan servicer for loans made under part D* for a reasonable period of time, not to exceed 30 days. The Secretary shall reduce the institution's cohort default rate to reflect the percentage of defaulted loans in the representative sample that are required to be excluded pursuant to subsection (m)(1)(B).

(4) *DEFINITION OF MITIGATING CIRCUMSTANCES.*—For purposes of paragraph (2), an institution shall be treated as having exceptional mitigating circumstances that make application of that paragraph inequitable if such institution is certified by a certified public accountant to meet each of the following criteria:

(A) *at least two-thirds of the students enrolled on at least a half-time basis at the institution—*

(i) *are eligible to receive a Federal Pell Grant award that is at least equal to one-half the maximum Federal Pell Grant award for which the student would be eligible based on his or her enrollment status; or*

(ii) *have an adjusted gross income of the student, and his or her parents (unless the student is an independent student), of less than the poverty level, as determined under criteria established by the Department of Health and Human Services;*

(B) *at least two-thirds of the students enrolled on a full-time basis at the institution in any 12-month period ending not more than six months prior to the date the institution submits its appeal, and who remain enrolled beyond the point at which the student would be entitled to a tuition refund of 100 percent—*

(i) *complete the educational program in which they are enrolled within the time normally required to complete that program, as specified in the institution's enrollment contract, catalog, or other materials; or*

(ii) *continue to be enrolled and are making satisfactory academic progress toward completion of their program; or*

(iii) have entered active duty in the armed forces of the United States; and

(C) at least two-thirds of the students enrolled on a full-time basis at the institution who complete the educational program in which they are enrolled within any 12-month period ending not more than six months prior to the date the institution submits its appeal are placed for at least 13 weeks in an employment position for which they have been trained, or are enrolled for at least 13 weeks in higher level education program for which the educational program of the institution provided substantial preparation, or have entered active duty in the armed forces of the United States.

(5) REDUCTION OF DEFAULT RATES AT CERTAIN MINORITY INSTITUTIONS.—

(A) BENEFICIARIES OF EXCEPTION REQUIRED TO ESTABLISH MANAGEMENT PLAN.—After July 1, 1998, any institution that has a cohort default rate that equals or exceeds 25 percent for each of the three most recent fiscal years for which data are available and that relies on the exception in paragraph (2)(C) of this subsection to continue to be an eligible institution shall—

(i) submit to the Secretary a default management plan which the Secretary, in his discretion, after consideration of the institution's history, resources, dollars in default, and targets for default reduction, determines is acceptable and provides reasonable assurance that the institution will, by July 1, 2001, have a cohort default rate that is less than 25 percent;

(ii) engage an independent third party (which may be paid with funds received under part B of title III) to provide technical assistance in implementing such default management plan; and

(iii) provide to the Secretary, on an annual basis or at such other intervals as the Secretary may require, evidence of cohort default rate improvement and successful implementation of such default management plan.

(B) DISCRETIONARY ELIGIBILITY CONDITIONED ON IMPROVEMENT.—Notwithstanding the expiration of the exception in paragraph (2)(C), the Secretary may, in his discretion, continue to treat an institution described in subparagraph (A) of this paragraph as an eligible institution for each of the one-year periods beginning on July 1, 1999, and July 1, 2000, only if the institution submits by the beginning of such period evidence satisfactory to the Secretary that—

(i) such institution has complied and is continuing to comply with the requirements of subparagraph (A); and

(ii) such institution has made substantial improvement, during each of the preceding one-year periods, in its cohort default rate.

(B) *An institution shall provide the Secretary with sufficient data to determine its participation rate index within 30 days after receiving an initial notification of its draft cohort default rate.*

[(2)(A) For the purpose of qualifying as an institution under paragraph (1)(C) of this subsection, the Secretary shall establish criteria by regulation for the approval of institutions outside the United States and for the determination that such institutions are comparable to an institution of higher education as defined in section 1201(a). In the case of a graduate medical school outside the United States, such criteria shall include a requirement that a student attending a graduate medical school outside the United States is ineligible for loans made, insured, or guaranteed under part B of this title unless—

[(4) An institution shall not be considered to meet the definition of an institution of higher education in paragraph (1) if—

The Secretary may determine that a State need not review an institution if such institution meets the criterion in subsection (b)(10) only, such institution was previously reviewed by the State under subsection (d), and the State determined in such previous review that the institution did not violate any of the standards in subsection (d). The Secretary shall supply the State with a copy of the institutional audits, required pursuant to section 487(c), for the institutions which shall be reviewed by the State. In addition to those institutions identified by the Secretary, the State may, subject to approval by the Secretary, review additional institutions which meet one or more of the criteria provided in subsection (b), based on more recent data available to the State, or which the State has reason to believe are engaged in fraudulent practices. If the Secretary fails to approve or disapprove a State request to review additional institutions within 21 days, the State may proceed to review such additional institutions as if approved by the Secretary.

[(B) two-thirds or more of the institution's education and general expenditures are derived from funds provided to students enrolled at the institution from the programs established under this title (except subparts 4 and 6 of part A and section 428B).

[(3) Two-thirds or more of the institution's education and general expenditures are derived from funds provided to students enrolled at the institution pursuant to subpart 1 of part A of this title.

[(6) A citation of an institution by the Secretary for failure to submit audits required by this title in a timely fashion.

[(7) A year-to-year fluctuation of more than 25 percent in the amounts received by students enrolled at the institution from either Federal Pell Grant, Federal Stafford Loan, or Federal Supplemental Loans to Students programs, which are not accounted for by changes in these programs.

[(11) A pattern of student complaints pursuant to subsection (j) related to the management or conduct of the programs established by this title or relating to misleading or inappropriate advertising and promotion of the institution's program, which in the judgment of the Secretary are sufficient to justify review of the institution.

[(c) USE OF RECENT DATA.—The criteria provided for in subsection (b) shall be measured on the basis of the most recent data available to the Secretary. Institutions may request verification of the data used by the Secretary.

[(d) REVIEW STANDARDS.—Institutions which meet 1 or more of the criteria in subsection (b) shall be reviewed by the appropriate State entity in accordance with published State standards that are consistent with the constitution and laws of the State, developed in consultation with the institutions in the State, and subject to disapproval by the Secretary. Such review shall determine the following:

[TITLE V—EDUCATOR RECRUITMENT, RETENTION, AND DEVELOPMENT

[SEC. 500. FINDINGS AND PURPOSES.

[(a) FINDINGS.—The Congress finds that—

[(1) teachers in the classroom are the men and women who must play an integral role in leading our Nation's schools into the 21st century;

[(2) we should encourage individuals to enter the education profession so that our teaching force is representative both of the diversity of our Nation and of the tremendous talents and skills of our citizens;

[(3) the methods used to prepare prospective teachers and the continuing education and support provided to practicing teachers have a significant influence on the effectiveness of classroom teachers;

[(4) the postsecondary education of education professionals has not been linked to local, State and national goals and standards;

[(5) the inservice and continuing professional development of educators has not promoted systematic and sustained improvement of the education system;

[(6) State educational agencies have not been funded and staffed adequately to carry out a mission of supporting a process to achieve local, State, or national goals and standards;

[(7) in order to encourage more women and underrepresented minorities to enter the fields of science and mathematics and succeed in these fields, we must provide proper training for existing mathematics and science teachers and recruit women and underrepresented minorities as teachers in these fields;

[(8) educators must have the expertise and the support that allow them to adapt to the changing environment in our schools and to the evolving skills required of our schools' graduates; and

[(9) the Federal Government plays an essential role in providing support to educator training and professional development that will enable teachers to be classroom leaders and ad-

ministrators to be school leaders at the forefront of reforming our Nation's schools.

[(b) PURPOSE.—It is the purpose of this title—

[(1) to provide assistance to our Nation's teaching force for the continued improvement of their professional skills;

[(2) to provide assistance for professional development activities enabling teachers, school administrators, and institutions of higher education to work collaboratively to improve educational performance through school reform and restructuring;

[(3) to address the Nation's teacher shortage, particularly in areas where there are heavy concentrations of low-income students, by encouraging talented persons, including the individuals already employed as school paraprofessionals and individuals who have been employed in other areas of endeavor, to enter the teaching profession;

[(4) to encourage academically qualified students to become teachers through scholarship assistance;

[(5) to support the recruitment of underrepresented populations into teaching careers;

[(6) to provide scholarship assistance to encourage women and minorities who are underrepresented in the fields of science and mathematics to enter the teaching profession in these fields;

[(7) to encourage the establishment and maintenance of programs that provide professional teacher preparation to individuals who are moving to careers in education from other occupations;

[(8) to promote partnerships between institutions of higher education and local educational agencies for the purpose of promoting the simultaneous restructuring and renewal of elementary and secondary schools and college-based teacher education programs;

[(9) to improve the leadership and administrative skills of elementary and secondary school administrators;

[(10) to provide assistance to schools of education in institutions of higher education in order to reform teacher education programs by encouraging new developments in teacher preparation which provide for greater integration of subject matter and pedagogical training and which prepare classroom teachers to effectively meet changing noneducational challenges in the schools; and

[(11) to promote high quality child development and early childhood education specialist training programs, including preschool and early intervention services for infants and toddlers with disabilities.

**[PART A—IMPROVEMENT OF ACADEMIC AND
LIBRARY FACILITIES**

[SEC. 711. SHORT TITLE.

[This part may be cited as the “Higher Education Facilities Act of 1992”.

[SEC. 712. FINDINGS.

[The Congress finds that—

[(1) over the past 50 years institutions of higher education have expanded dramatically, while at the same time traditional sources of funding facilities maintenance and repair have declined and even disappeared in some instances;

[(2) in order to meet the rising cost of educating students, resulting mainly from inflation and the higher costs of research, many colleges and universities made the choice to defer renovations and improvements;

[(3) overall, the need for capital investment by institutions of higher education has been estimated to exceed \$60,000,000,000;

[(4) the deterioration of facilities has caused valuable research experiments and programs to be postponed, delayed or canceled; and

[(5) the United States’ competitive position within the world economy is vulnerable if the necessary research facilities are not available to provide advanced training in the fields of science and technology.

[SEC. 713. DISTRIBUTION OF ASSISTANCE.

[(a) **COMPETITIVE OR FORMULA DISTRIBUTION.**—

[(1) **COMPETITIVE GRANTS.**—If the amount appropriated pursuant to section 716 for a fiscal year is less than \$50,000,000, then the Secretary shall award grants under this part on a competitive basis in accordance with subsection (h) to institutions of higher education to carry out the activities described in section 714.

[(2) **ALLOTMENT FORMULA.**—

[(A) FORMULA.—If the amount appropriated pursuant to section 716 for a fiscal year is equal to or greater than \$50,000,000, then the Secretary shall allot to each State higher education agency with an approved application—

[(i) 50 percent of such funds on the basis of the population of the State compared to the population of all States; and

[(ii) 50 percent of such funds on the basis of the number of students attending institutions of higher education within the State compared to the number of students attending institutions of higher education in all States.

[(B) USE OF FORMULA GRANTS.—Each State higher education agency receiving an allotment pursuant to subparagraph (A), shall use such allotment to award grants, on a competitive basis, to institutions of higher education within the State to enable such institutions to carry out the activities described in section 714.

[(C) REALLOTMENT.—Except as provided in subsection (f), any amount that the Secretary determines will not be available to a State higher education agency because such agency elects not to participate in the program assisted under this part shall be reallocated to other States in the same manner as the original allotments were made.

[(b) MATCHING REQUIREMENTS.—

[(1) STATE MATCHING REQUIREMENT.—

[(A) IN GENERAL.—In order to receive an allotment under subsection (a)(2)(A), each State higher education agency shall provide matching funds equal to 25 percent of the amount of any allotment received pursuant to such subsection. The Secretary may waive the requirements of the preceding sentence if the State can demonstrate to the satisfaction of the Secretary that such matching requirement would present a severe financial hardship to the State.

[(B) CASH REQUIREMENT.—Each State higher education agency receiving funds under this part shall only provide matching funds pursuant to paragraph (1) in cash.

[(2) INSTITUTIONAL MATCHING REQUIREMENT.—In order to receive a grant under subsection (a)(1) or (a)(2)(B), each eligible institution shall provide matching funds equal to 50 percent of the amount of any grant received pursuant to such subsection. [(d) EQUITABLE PARTICIPATION.—In awarding grants pursuant to subsection (a), the Secretary or each State higher education agency shall ensure the equitable participation of both public and private eligible institutions within the State.

[(e) SPECIAL RULE.—If the Secretary determines that any eligible institution within a State has received, within the 2 preceding fis-

cal years, a direct, noncompetitive award of Federal funds for facilities construction, renovation, improvement or repair, then the eligible institution shall be ineligible to receive assistance under this part.

[(f) USE FOR MAINTENANCE.—An amount less than or equal to 10 percent of that portion of funds awarded under this part which is allotted by the recipient to meet costs of—

[(1) research and instructional instrumentation and equipment; and

[(2) equipment and structural changes necessary to ensure the proper functioning of such research or instructional instrumentation and equipment; may be allocated by the recipient for maintenance of equipment and changes described in paragraphs (1) and (2). Part or all of this percentage may also be applied to costs of upgrading such equipment and structural changes within 3 years of the date of initial use, if the recipient deems such upgrading essential to the continued usefulness of such research or instructional instrumentation and equipment.

[(g) SUPPLEMENTATION.—Grants awarded pursuant to subsection (a) shall be used to supplement and not supplant other Federal, State, and local funds available for improvement of academic and library facilities.

[(h) PEER REVIEW REQUIRED.—In making grants under subsection (a)(1), the Secretary shall utilize a national peer review panel. The panel shall be broadly representative of all types and classes of institutions of higher education in the United States.

[(2) CONTENTS.—Each application described in paragraph (1) shall—

[(A) describe the activities and services for which assistance is sought;

[(B) contain assurances that the State higher education agency will comply with the matching requirement described in section 713(b)(1);

[(C) contain a description and the amount of any direct, noncompetitive appropriation of funds for facilities construction, renovation, improvement or repair which the State provides to any institution of higher education within the State; and

[(D) contain such other assurances as the Secretary determines necessary to ensure compliance with the provisions of this part.

[(b) INSTITUTIONS OF HIGHER EDUCATION.—

[(1) APPLICATION.—Each institution of higher education desiring a grant pursuant to section 713(a)(1) or 713(a)(2)(B) shall submit an application to the Secretary or the State higher education agency, as appropriate, at such time, in such manner and accompanied by such information as the Secretary or such agency may reasonably require.

[(c) APPLICATIONS.—Any eligible institution of higher education offering a program of postbaccalaureate study leading to a master’s level, professional, or doctoral degree may apply for grants under this part. Each such institution may make an application to the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary may reasonably require. [(2) DOCTORAL DEGREE.—No student enrolled in graduate study leading to a doctoral degree shall receive an award under this part except during periods in which such student is maintaining satisfactory progress in, and devoting essentially full time to study, research (including acting as a teaching assistant or research assistant as may be required as a condition to award a degree), or dissertation work in the field in which such fellowship was awarded and is not engaging in gainful employment, other than part-time employment by the institution of higher education involved in teaching, research, or similar activities, approved by the Secretary. Such period shall not exceed a total of 3 years, consisting of not more than 2 years of support for study or research, and not more than 1 year of support for dissertation work, provided that the student has attained satisfactory progress prior to the dissertation stage, except that the Secretary may provide by regulation for the

[SEC. 1091. GRANTS TO STATES FOR WORKPLACE AND COMMUNITY TRANSITION TRAINING FOR INCARCERATED YOUTH OFFENDERS.

[(a) FINDINGS.—The Congress finds the following:

[(1) Over 150,000 youth offenders age 21 and younger are incarcerated in the Nation's jails, juvenile facilities, and prisons.

[(2) Most youth offenders who are incarcerated have been sentenced as first-time adult felons.

[(3) Approximately 75 percent of youth offenders are high school dropouts who lack basic literacy and life skills, have little or no job experience, and lack marketable skills.

[(4) The average incarcerated youth has attended school only through grade 10.

[(5) Most of these youths can be diverted from a life of crime into productive citizenship with available educational, vocational, work skills, and related service programs.

[(6) If not involved with educational programs while incarcerated, almost all of these youths will return to a life of crime upon release.

[(7) The average length of sentence for a youth offender is about 3 years. Time spent in prison provides a unique opportunity for education and training.

[(8) Even with quality education and training provided during incarceration, a period of intense supervision, support, and counseling is needed upon release to ensure effective reintegration of youth offenders into society.

[(9) Research consistently shows that the vast majority of incarcerated youths will not return to the public schools to complete their education.

[(10) There is a need for alternative educational opportunities during incarceration and after release.

[(b) DEFINITION.—For purposes of this part, the term “youth offender” means a male or female offender under the age of 25, who is incarcerated in a State prison, including a prerelease facility.

[(c) GRANT PROGRAM.—The Secretary shall establish a program in accordance with this section to provide grants to the State correctional education agencies to assist and encourage incarcerated youths to acquire functional literacy, life, and job skills, through the pursuit of a postsecondary education certificate, or an associate of arts or bachelor’s degree while in prison, and employment counseling and other related services which start during incarceration and continue through prerelease and while on parole.

[(d) APPLICATION.—To be eligible for a grant under this section, a State correctional education agency shall submit to the Secretary a proposal for a youth offender program that—

[(1) identifies the scope of the problem, including the number of incarcerated youths in need of postsecondary education and vocational training;

[(2) lists the accredited public or private educational institution or institutions that will provide postsecondary educational services;

[(3) lists the cooperating agencies, public and private, or businesses that will provide related services, such as counseling in the areas of career development, substance abuse, health, and parenting skills;

[(4) describes the evaluation methods and performance measures that the State correctional education agency will employ, provided that such methods and measures are appropriate to meet the goals and objectives of the proposal, and that such methods and measures include measures of—

[(A) program completion;

[(B) student academic and vocational skill attainment;

[(C) success in job placement and retention; and

[(D) recidivism;

[(5) describes how the proposed programs are to be integrated with existing State correctional education programs (such as adult education, graduate education degree programs, and vocational training) and State industry programs;

[(6) addresses the educational needs of youth offenders who are in alternative programs (such as boot camps); and

[(7) describes how students will be selected so that only youth offenders eligible under subsection (f) will be enrolled in postsecondary programs.

[(e) PROGRAM REQUIREMENTS.—Each State correctional education agency receiving a grant under this section shall—

[(1) integrate activities carried out under the grant with the objectives and activities of the school-to-work programs of such State, including—

[(A) work experience or apprenticeship programs;

[(B) transitional worksite job training for vocational education students that is related to the occupational goals of such students and closely linked to classroom and laboratory instruction;

[(C) placement services in occupations that the students are preparing to enter;

[(D) employment-based learning programs; and

[(E) programs that address State and local labor shortages;

[(2) annually report to the Secretary and the Attorney General on the results of the evaluations conducted using the methods and performance measures contained in the proposal; and

[(3) provide to each State for each student eligible under subsection (f) not more than \$1,500 annually for tuition, books, and essential materials, and not more than \$300 annually for related services such as career development, substance abuse counseling, parenting skills training, and health education, for each eligible incarcerated youth.

[(f) STUDENT ELIGIBILITY.—A youth offender shall be eligible for participation in a program receiving a grant under this section if the youth offender—

[(1) is eligible to be released within five years (including a youth offender who is eligible for parole within such time); and

[(2) is 25 years of age or younger.

[(g) LENGTH OF PARTICIPATION.—A State correctional education agency receiving a grant under this section shall provide educational and related services to each participating youth offender for a period not to exceed 5 years, 1 year of which may be devoted to study in a graduate education degree program or to remedial education services for students who have obtained a secondary school diploma. Educational and related services shall start during the period of incarceration in prison or prerelease and may continue during the period of parole.

[(h) EDUCATION DELIVERY SYSTEMS.—State correctional education agencies and cooperating institutions shall, to the extent practicable, use high-tech applications in developing programs to meet the requirements and goals of this section.

[(i) ALLOCATION OF FUNDS.—From the amounts appropriated pursuant to subsection (j), the Secretary shall allot to each State an amount that bears the same relationship to such funds as the total number of students eligible under subsection (f) in such State bears to the total number of such students in all States.

[(j) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section \$5,000,000 for fiscal year 1995 and such sums as may be necessary for fiscal year 1996 and each of the four succeeding fiscal years.

[(3) there is significant underrepresentation of minorities and women currently working in the aviation industry and African Americans constitute less than 1 percent of pilots with the Nation's scheduled air carriers;

[(4) there is a substantial projected increase of minorities and women as a proportion of the workforce by the year 2000; and

[(5) there is need for a comprehensive study of future human resources needs for the air transportation industry, including a thorough investigation of recruitment, aviation training outside the military context, financial and other incentives and disincentives which affect the flow of people, and especially minorities and women, into the industry.

[(b) STUDY REQUIRED.—The Secretary of Education shall enter into appropriate arrangements with the National Academy of Sciences Commission on Behavioral and Social Sciences and Education to study civilian aviation training programs needed to satisfy the workforce requirements of the commercial aviation industry in the year 2000 and beyond. [PART B—NATIONAL COMMISSION ON INDEPENDENT HIGHER EDUCATION

[SEC. 1421. SHORT TITLE.

[(This part may be cited as the “National Independent Colleges and Universities Discovery Act”).

[SEC. 1422. FINDINGS.

[(The Congress finds that—

[(1) the quality and scope of higher education in our Nation is without argument the finest in the world, and a distinguishing feature of our Nation’s system of higher education is its strong and diverse nonprofit independent sector;

[(2) independent colleges and universities are as diverse as the Nation itself and include traditional liberal arts institutions, major research universities, church- and faith-related colleges, colleges and universities primarily attended by minorities, women’s colleges, junior colleges, and schools of law, medicine, engineering, business and other professions;

[(3) the diversity of independent colleges and universities offers students a choice in the type of educational experience

that will best serve such students' interests, needs and aspirations;

[(4) independent colleges and universities enroll 21 percent of all students in the United States, award 33 percent of all bachelor's degrees in the United States, 42 percent of all such master's degrees, 36 percent of all such doctoral degrees, and 59 percent of all such professional degrees;

[(5) a majority of all undergraduate students attending independent colleges and universities receive some form of financial assistance, and such independent colleges and universities provide such financial assistance from their own resources;

[(6) independent colleges and universities are deeply involved in hundreds of partnerships with elementary and secondary schools, and such partnerships are largely funded by such colleges and universities;

[(7) independent colleges and universities have been an extraordinary example of private-public partnerships, with such colleges and universities operating in the public interest to provide a public good;

[(8) less than 20 percent of the revenue of independent colleges and universities comes from governmental funds, most of which is in the form of Federal and State financial aid;

[(9) decreases in Federal and State support for student financial aid programs has placed at risk the option of choosing an independent college or university for an increasing number of students;

[(10) whereas at the turn of the twentieth century 80 percent of the students enrolled in higher education in the United States were enrolled in independent colleges and universities, such percentage has now declined to 21 percent, and further erosions place at risk the option of choosing an independent college or university for students and parents; and

[(11) the entire sector of independent colleges and universities and the important contributions such sector makes to our Nation is at risk and deserves national policy attention.

ADDITIONAL VIEWS OF MICHAEL N. CASTLE

The purpose of the Higher Education Act is to increase access to higher education through a variety of programs, most importantly the financial aid programs. Ensuring access to higher education, however, should be a broad effort that post-secondary institutions actively participate in.

Most parents, regardless of their income, are concerned about how their children are going to be able to afford higher education. In response to this concern, Chairman McKeon initiated legislation to establish the Commission on the Cost of Higher Education to investigate trends of college tuition and to make recommendations to slow the rate of tuition increases.

H.R. 6 includes an amendment offered by Chairman McKeon and myself that codifies the recommendations of the National Committee on the Cost of Higher Education. Among other provisions, it requires the Department of Education to review student financial assistance regulations every two years, and where possible repeal, consolidate, or simplify those regulations. It also provides federal support for innovative projects addressing issues of productivity, efficiency, quality improvement, and cost control. And it requires GAO to issue a yearly report to Congress on various college cost factors and tuition increases.

But one of the most important provisions is the one requiring the Secretary of Education to work with colleges to develop a clear set of standards for reporting college costs and prices. With this in hand, colleges and universities will be well-positioned to provide valuable information to students and families that enables them to make accurate comparisons. They will have a clear sense of what their college tuition buys them, what institutions' financial priorities are. This valuable information could guide consumer choices, and may have some influence on institutions' spending decisions.

I offered an amendment, which I withdrew, to require institutions to report cost and tuition information to students and families. I think it makes sense for institutions to be financially transparent, and accountable for their spending decisions. My amendment required schools seeking Title IV financial aid to report the amount of, and annual percentage increase in, the charges for tuition, fees, room, and board, for the last five years.

In addition, it required schools to disclose the amount spent on teaching and instruction; academic support services for students; other student support services; buildings and facilities; research; general administrative expenses; and grants, scholarships, tuition remission, or other student financial aid for the last year and as an average for the 5 most recently completed academic years.

I ultimately withdrew this amendment because I'd rather see this reporting happen voluntarily. This is data that schools could easily make available to families. I'm attaching some charts sub-

mitted to the National Commission on the Cost of Higher Education in November by Harvard University President Neil Rudensteen, that contain the kind of information I think families would like to see.

The reasons behind tuition trends are multi-faceted and complex. I do not mean to suggest that mere reporting and accountability will reverse unfavorable trends by themselves. But reporting and accountability could have a distinct impact on these trends by focusing attention on institutional priorities, and perhaps raising questions. The answers to these questions are certainly part of the solution to making post-secondary education more affordable.

ADDITIONAL VIEWS OF HON. TOM PETRI

The committee report states that the Direct Student Loan Program “has no market forces operating within it.” This is not correct. Many of the functions of that program are performed by non federal contractors, and all of those services are procured in a competitive bid process, which is clearly a market process for determining how much such contractors should be paid. In addition, the cost of capital for Direct Loans is set in a market process when the federal government sells securities. It is the FFEL program, in contrast, which today has virtually no market processes for determining what non federal parties are paid for their services.

TEACHER TRAINING

We agree that there is a strong need to improve the quality of the teaching force nationwide. The minority believes there is a shortage of highly trained quality teachers—particularly in areas which serve large numbers of low-income and minority students. For this reason, a program designed to improve the quality of instruction must also contain a significant teacher recruitment provision.

In addition, the minority believes that if there is to be meaningful teacher reform, then all parties involved in the recruitment, training, licensing and placement of teachers must be included in the process. Meaningful partnerships which include local educational agencies, institutions of higher education and state teacher licensing agencies must be established. Providing competitive block grants to the Governors is not an acceptable substitute for genuine local involvement by local schools, and institutions of higher education, and community education leaders.

During the full Committee markup of H.R. 6, Representative Kildee (D-MI) offered a Democratic alternative which addressed the issues of improving the quality of instruction and the undersupply of highly qualified teachers. The amendment proposed creating strong partnerships between institutions of higher education, state education agencies (including state licensing agencies) and local education agencies (including local community organizations) designed to strengthen how teachers are trained. It encourages, through partnerships, the creation of a more diverse teaching force through the recruitment and preparation of minority individuals, including language minority individuals, and individuals with disabilities, to enter teaching. Further, it requires that teachers have demonstrated subject matter knowledge, teaching knowledge, and teaching skills necessary to teach effectively.

The Democratic alternative creates a discretionary grant program operated by the Secretary until such time as funding exceeds \$335 million. Above that funding level, the program would be formula driven to the state higher education agencies. It would provide scholarships and loan forgiveness as well as support services as part of a teacher recruitment initiative. In addition, it places emphasis upon recruiting paraprofessionals and persons from non-traditional areas (military retirees, corporate and scientific retirees, etc.) who have a high potential for teaching.

The Democratic alternative provides for a mentoring and induction period for new teachers; ensures areas most in need receive priority in receiving new teachers with increased skills; calls for greater accountability for institutions preparing teachers; provides support for improving the quality of counselors; and provides alter-

native routes to teacher certification. In short, the Democratic alternative is a far more comprehensive and inclusive effort to improve the quality of instruction received by our nation's school children. The minority members of the Committee will continue to work with the majority to strengthen the provisions on teacher training currently contained in H.R. 6.

We strongly oppose the bill's elimination of funding for the National Board of Professional Teaching Standards.

The National Board of Professional Teaching Standards was created in 1987 after the Carnegie Forum on Education and the Economy's Task Force on Teaching as a Profession released "A Nation Prepared: Teachers for the 21st Century." The report called for the creation of a National Board to "establish high standards for what teachers need to know and be able to do, and to certify teachers who meet that standard."

The National Board has developed assessments that measure the skills and knowledge of teachers in seven specialties. Funding from the U.S. Department of Education is critical to helping the National Board complete the development of the assessments for certificates in other fields. The Board also receives funds from private foundations, corporations, and revenue from certification fees.

The work of the Board is critical in our nation's efforts to raise standards for teachers. It is important because it invites experienced teachers to open their practice to rigorous examination and provides us with models of exemplary teaching. It gives us a way to determine what accomplished teaching looks like. Currently, only about half of the nation's teachers have access to National Board certification. It is critical that the Board receive federal funding to complete the development of the unfinished certificate areas so that all teachers have the opportunity to seek National Board certification.

GUARANTY AGENCY PROVISIONS

The Department of Education opposes H.R. 6's guaranty agency provisions. It believes the bill establishes excessive fees and counter-productive incentives that will result in poor guaranty agency performance and greater federal taxpayer cost. The Department may recommend the following changes:

The Secretary of Education should approve the use of the operating fund for student related activities; State approval should also be provided;

Base the portfolio/account maintenance fees on the current outstanding balance of loans rather than original principal;

Reduce the guaranty agency collection retention to 18.5% and use the savings to reduce the student origination fees;

Delete the provision in the House bill to deposit interest from the reserve fund into operating funds; and

Begin the default-aversion period at 120 days rather than 60 days.

These recommendations deserve serious consideration.

REDUCING STUDENT FEES

Students are currently required to pay a 4% loan origination fee (technically under the FFEL program the loan origination fee is 3% and there is a 1% guaranty agency insurance fee).

The loan origination fees were imposed on students in the 1980's as a temporary revenue measure—they were never intended to be permanent. Also, many students are not aware of these hidden fees until they are deducted from their loan proceeds.

We believe that these fees should be phased-out. Elimination of these fees would provide additional funds to students up front, at the time that loan funds are needed to pay for the cost of attendance.

DISSENTING VIEWS OF HON. RON PAUL

1. INTRODUCTION

Congress should reject HR 6, the Higher Education Act Amendments of 1998, because this bill furthers the federal stranglehold over higher education. Instead of furthering federal control over education, Congress should focus on allowing Americans to devote more of their resources to higher education by dramatically reducing their taxes. There are numerous proposals to do this before this Congress. For example, the Higher Education Affordability and Availability Act (HR 2847), of which I am an original cosponsor, allows taxpayers to deposit up to \$5,000 per year in a pre-paid tuition plan without having to pay tax on the interest earned, thus enabling more Americans to afford college. This is just one of the many fine proposals to reduce the tax burden on Americans so they can afford a higher education for themselves and/or their children. Other good ideas which I have supported are the PASS A+ accounts for higher education included in last year's budget, and the administration's HOPE scholarship proposal, which I was one of the few members of the majority to champion. Although the various plans I have supported differ in detail, they all share one crucial element: each allows individuals the freedom to spend their own money on higher education rather than forcing taxpayers to rely on Washington to return to them some percentage of their tax dollars to spend as bureaucrats see fit.

Federal control inevitably accompanies federal funding, because politicians cannot resist imposing their preferred solutions for perceived "problems" on institutions dependent upon taxpayer dollars. The prophetic soundness of those who spoke out against the creation of federal higher education programs in the 1960's because they would lead to federal control of higher education is demonstrated by numerous provisions in HR 6. Clearly federal funding is being used as an excuse to tighten the federal noose around both higher and elementary education.

II. HR 6 SHOULD BE OPPOSED BECAUSE IT CREATES AN UNCONSTITUTIONAL TEACHER TRAINING PROGRAM

One particular objectionable feature of the Higher Education Reauthorization Act is that this act creates four new federal programs at a cost to the taxpayers of approximately \$318.5 million. One can only approximate the cost because some of the programs have not yet been scored by the Congressional Budget Office. Voting to create new programs without a clear idea of how much they will cost does not seem to be responsible stewardship of the taxpayers' money.

The most objectionable program is "teacher training." The Federal Government has no constitutional authority to dictate, or "en-

courage,” states and localities to adopt certain methods of education. Yet, this Congress is preparing to authorize the federal government to bribe states, with monies the federal government should never have taken from the people in the first place, to adopt teacher training methods favored by a select group of DC-based congressmen and staffers.

As HR 6 was being drafted and marked-up, some Committee member did attempt to protect the interests of the taxpayers by refusing to support authorizing this program unless the spending was offset by cuts in other programs. Unfortunately, some members who might have otherwise opposed this program supported it at the Committee mark-up because of the offset.

While having an offset for the teacher training program is superior to authorizing a new program, at least from an accounting perspective, supporting this program remains unacceptable for two reasons. First of all, just because the program is funded this year by reduced expenditures is no guarantee the same formula will be followed in future years. In fact, given the trend toward ever-higher expenditures in federal education programs, it is likely that the teacher training program will receive new funds over and above any offset contained in this authorizing legislation.

Second, and more importantly, the 10th amendment does not prohibit federal control of education without an offset, it prohibits all programs that centralize education regardless of how they are funded. Savings from defunded education programs should be used for education tax cuts and credits, not poured into new, unconstitutional programs.

III. HR 6 IMPOSES NEW, UNCONSTITUTIONAL MANDATES ON INSTITUTIONS OF HIGHER EDUCATION IN THE NAME OF FIGHTING CAMPUS CRIME

Another unconstitutional interference within HR 6 is the provision creating new federal mandates on institutes of higher education regarding the reporting of criminal incidents to the general public. Once again, the federal government is using its funding of higher education to impose unconstitutional mandates on colleges and universities.

Officials of the Texas-New Mexico Association of College and University Police Departments have raised concerns about some of the new requirements in this bill. Two provisions the association finds particularly objectionable are those mandating that campus report incidents of arson and report students referred to disciplinary action on drug and alcohol charges. These officials are concerned these expanded requirements will lead to the reporting of minor offenses, such as lighting a fire in a trash can or a 19-year-old student caught in his room with a six-pack of beer as campus crimes, this, distorting the true picture of the criminal activity level occurring on campus.

The association also objects to the requirement that campuses make police and security logs available to the general public within two business days as this may not allow for an intelligent interpretation of the impact of the availability of the information and may compromise an investigation, cause the destruction of evidence, or the flight of an accomplice. Furthermore, reporting the general lo-

cation, date, and time for a crime may identify victims against their will in cases of sexual assault, drug arrests, and burglary investigations. The informed views of those who deal with campus crime on a daily basis should be given their constitutional due rather than dictating to them the speculations of those who sit in Washington and presume to mandate a uniform reporting system for campus crimes.

Another offensive provision of the campus crime reporting section of the bill that has raised concerns in the higher education community is the mandate that any campus disciplinary proceeding alleging criminal misconduct shall be open. This provision may discourage victims, particularly women who have been sexually assaulted, from seeking redress through a campus disciplinary procedure for fear they will be put "on display." For example, a student at Miami University in Ohio recently chose to seek redress over a claim of sexual assault "* * * through the university, rather than the county prosecutor's office, so that she could avoid the publicity and personal discomfort of a prosecution," (affidavit, p. 5, State of Ohio, ex. rel. *The Miami Student, et al. v. Miami University, et. al.*, Case No. 9601596 Supreme Court of Ohio). Assaulting the privacy rights of victimized students by taking away the option of a campus disciplinary proceeding is not only unconstitutional but immoral.

IV. HR 6 FURTHER INVOLVES THE GOVERNMENT IN EDUCATIONAL CENTRAL PLANNING

The Higher Education Reauthorization Act also contains a section authorizing special funding for programs in areas of so-called "national need" as designated by the Secretary of Education. This is little more than central planning, based on the fallacy that omnipotent "experts" can easily determine the correct allocation of educational resources. However, basic economics teaches that a bureaucrat in Washington cannot determine "areas of national need." The only way to know this is throughout the interaction of students, colleges, employers, and consumers operating in a free-market, where individuals can decide what higher education is deserving of additional resources as indicated by employer, and ultimately consumer, workplace demand.

V. CONCLUSION

The Higher Education Act of 1998 expands the unconstitutional role of the federal government in education by increasing federal control over higher education, as well as creating a new teacher training program. This bill represents more of the same, old "Washington knows best" philosophy that has so damaged American education over the past century. Congress should therefore reject this bill and instead join me in working to defund all unconstitutional programs and free Americans from the destructive tax and monetary policies of the past few decades, thus making higher education more readily available and more affordable for millions of Americans.
