

seen a body of water larger than her family's irrigation pond. It was not until this accomplished woman attended law school in Philadelphia that she gained the passion for rowing. I salute this young woman, for her proud representation of the sport of rowing, the country, and the state of Montana.

Mrs. Jean Foster is another young woman from Bozeman, Montana whom I want to recognize. Joan's career in shooting was paved a little better than Monica's. Jean is from a family with world championships in shooting under their belt, her mother being a world champion in rifle shooting, and her father a two-time Olympian and a USA hall of famer in shooting. Jean represented our state and our country with distinction in the 3-position rifle event. I congratulate Jean on the effort she put forth and on her and her family's commitment to the sport of shooting.●

S.C. AWARDED PAN AM GAMES FOR THE BLIND

● Mr. HOLLINGS. Mr. President, it is with great pleasure that I recognize Spartanburg, South Carolina and the South Carolina School for the Deaf and Blind as hosts of the 2001 Pan American Games for the Blind. This is not only a distinguished honor for Spartanburg and for the school, but also for our state and our nation. Three hundred blind and visually-impaired elite athletes from 22 countries will compete in the third Pan Am Games for the Blind May 29-June 3, 2001 in Spartanburg. It marks the first time that these Games have been held in the United States. Previous competitions took place in Buenos Aires and Mexico City.

Athletes will compete in track and field events, swimming and goal ball, a team sport developed specifically for the blind. Two students at the S.C. School for the Deaf and Blind, Royal Mitchell and Sonya Bell, will represent the United States in track and field events.

The International Blind Sports Association selected the S.C. School for the Deaf and Blind as the site for the 2001 Games because of its excellent facilities and the strong credentials of the athletic staff. Since its founding in 1849, the school has served South Carolina well and proven itself worthy of this latest distinction. I wish all the participants in the 2001 Pan American Games for the Blind much success.●

10TH ANNUAL CONVENTION OF THE AMERICAN FEDERATION OF MUSLIMS OF INDIAN ORIGIN

● Mr. ABRAHAM. Mr. President, I rise today to recognize the American Federation of Muslims of Indian Origin (AFMIO), which will hold its 10th Annual Convention on October 7-8, 2000 in Southfield, Michigan. The theme of the convention is "Information and Technology: The Digital Divide," providing

members of the AFMIO with an opportunity to explore new ways to expand upon the many beneficial things the organization is already doing in this realm.

The AFMIO is an umbrella organization which represents various Indian Muslim Associations. It has chapters throughout the world, and a membership which includes academicians, professionals, entrepreneurs and social activists. The mission of the organization is the educational and economic upliftment of Indian Muslims by seeking cooperation among the American and Indian relief and educational organizations.

The AFMIO stands for a stable democratic, secular and progressive India, where the human rights of all citizens, regardless of caste, religion, language or region, are preserved. The organization works in close cooperation with others that believe in these same principles, and thus serves as a bridge between Indian intellectuals, public officials and business people, and Indian Americans, particularly Muslims.

The highest priority of the AFMIO continues to be the eradication of illiteracy among Indian Muslim children, a goal which goes hand in hand with bridging the digital divide. Access to a computer can upon new worlds for children, and ensure that they are not only literate in the traditional sense, but culturally literate as well, which I think is equally important. In this regard, AFMIO has already done a great deal. Its grassroots mobilization and motivation program is termed as one of the most successful education programs in India.

AFMIO has also done much to aid Indian Muslims on other fronts. The organization has financed several projects which draw on the resources of local communities and aim for the economic upliftment of these communities by teaching citizens how to employ these resources. Through programs of political education and awareness, the organization has united forces that have similar beliefs of social justice and the upliftment of all people. Furthermore, it has been responsible for establishing several hospitals and orphanages, and has organized relief work at times of natural disasters.

I applaud the AFMIO for all of the wonderful work it has done to improve the living conditions of Indian Muslims. A large part of this success stems from educational programs which have been incredibly successful, and I am sure the discussion this weekend will focus upon how these programs can be even further adapted and improved in this Digital Age. On behalf of the entire United States Senate, I extend a much deserved thank you to the American Federation of Muslims of Indian Origin, and wish the organization continued success in the future.●

EULOGY FOR ELLEN GLESBY COHEN

● Mrs. BOXER. Mr. President, I come before you today to pay tribute to a staunch patient advocate whose dedication and commitment to biomedical research has changed the lives of all around her.

Ellen Glesby Cohen was the President and Founder of the Lymphoma Research Foundation of America (LRFA). Ellen founded this organization almost ten years ago after she was diagnosed with a slow growing form of non-Hodgkin's lymphoma (NHL).

Ellen, being the courageous person she was, decided to turn her experience into something positive by establishing the Lymphoma Research Foundation that is the nation's first and foremost organization dedicated to promoting and funding lymphoma-specific research.

Ms. Cohen's efforts on behalf of lymphoma-specific research has led to the Lymphoma Research Foundation awarding close to \$3 million to support 92 lymphoma research projects at top universities and cancer centers throughout the nation.

The foundation Ms. Cohen founded has been active not only in funding research, but has helped educate the public about the high incidence rates of non-Hodgkin's lymphoma by spearheading such initiatives as the National Lymphoma Awareness Week during the second week of October and an annual Lymphoma Advocacy Day on Capitol Hill.

I have been particularly impressed by Ms. Cohen's passion on behalf of lymphoma patients and, consequently, have supported increasing the funding for lymphoma research at the National Institutes of Health and the Centers for Disease Control and Prevention.

Ellen is survived by her husband Dr. Mitchell Cohen and her two children Hailey and Josh. While the last decade of Ellen Cohen's life was dedicated to lymphoma research, Ellen's accomplishments as a mother and a wife will forever be remembered even after the day comes that non-Hodgkin's lymphoma has been eliminated.

Although Ellen's work has already benefitted thousands across the country diagnosed with non-Hodgkin's lymphoma and other cancers, I know that she would like us all to continue her fight against this devastating disease by supporting such worthy organizations like the Lymphoma Research Foundation of America.

Despite the fact that Ellen is not here physically, her spirit will continue to live on through her family and friends. Thank you Ellen for what you gave to persons everywhere. You will truly be missed.●

NOVI HIGH SCHOOL NAMED BLUE RIBBON SCHOOL FOR 1999-2000

● Mr. ABRAHAM. Mr. President, in 1982, the United States Department of
