However, on February 10, 1999, the committee met and organized into four subcommittees, three of which were assigned jurisdiction over major agricultural commodities and one of which dealt with various related agricultural operations. The four subcommittees were constituted as follows:

The revised edition of the Rules and Manual of the House of Representatives for the 106th Congress (House Document No. 105-358) provides the following concerning the Committee on Agriculture:¹

“This committee was established in 1820 (IV, 4149). In 1880 the subject of forestry was added to its jurisdiction, and the committee was conferred authority to receive esti-

mates of and to report appropriations (IV, 4149). However, on July 1, 1920, authority to report appropriations for the U.S. Department of Agriculture was transferred to the Committee on Appropriations (VII, 1860).

The basic form of the present jurisdictional statement was made effective January 2, 1947, as a part of the Legislative Reorganization Act of 1946 (60 Stat. 812). Subparagraph (7) was altered by the 93d Congress, effective January 3, 1975, to include jurisdiction over agricultural commodities (including the Commodity Credit Corporation) while transferring jurisdiction over foreign distribution and nondomestic production of commodities to the Committee on International Relations (House Resolution 988, 93d Congress, October 8, 1974, p. 34470). Nevertheless, the committee has retained a limited jurisdiction over measures to release CCC stocks for such foreign distribution (September 14, 1989, p. 20428). Previously unstated jurisdictions over commodities exchanges and rural development were codified effective January 3, 1975.

The 104th Congress consolidated the committee's jurisdiction over inspection of livestock and meat products to include inspection of poultry, seafood, and seafood products, and added subparagraph (20) relating to water conservation (section. 202(a), House Resolution 6, January 4, 1995, p.464). Clerical and stylistic changes were effected when the House recodified its rules in the 106th Congress (House Resolution 5, January 6, 1999, p. 111).

The committee has had jurisdiction of bills for establishing and regulating the Department of Agriculture (IV, 4150), for inspection of livestock and meat products, regulation of animal industry, diseases of animals (IV, 4154; VII, 1862), adulteration of seeds, insect pests, protection of birds and animals in forest reserves (IV, 4157; VII, 1870), the improvement of the breed of horses, even with the cavalry service in view (IV, 4158; VII, 1865).

The committee, having charge of the general subject of forestry, has reported bills relating to timber, and forest reserves other than those created from the public domain (IV, 4160). It has also exercised jurisdiction of bills relating to agricultural colleges and experiment stations (IV, 4152), incorporation of agricultural societies (IV, 4159), and establishment of a highway commission (IV, 4153), to discourage fictitious and gambling transactions in farm products (IV, 4161; VII, 1861), to regulate the transportation, sale and handling of dogs and cats intended for use in research and the licensing of animal research facilities (July 29, 1965, p. 18691); and to designate an agricultural research center (May 14, 1995, p.111). The committee shares with the Committee on the Judiciary jurisdiction over a bill comprehensively amending the Immigration and Nationality Act and including food stamp eligibility requirements for aliens (September 19, 1995, p.111).

The House referred the President's message dealing with the refinancing of farm-mortgage indebtedness to the committee, thus conferring jurisdiction (April 4, 1933, p. 1209).

The committee has jurisdiction over a bill relating solely to executive level position in the Department of Agriculture (March 2, 1976, p. 4958) and has jurisdiction over bills to develop land and water conservation programs on private and non-Federal lands (June 7, 1976, p. 16768).”

Some of the specific areas in which the Committee on Agriculture exercises its jurisdiction or that have been created for the committee by historical reference include:

(1) Public Law 480, 83d Congress, the restoration, expansion, and development of foreign markets for U.S. agricultural products; and the effect of the General Agreement on Tariffs and Trade (and the North American Free Trade Agreement), bilateral free trade agreements, the European Community, and other regional economic agreements and commodity marketing and pricing systems on United States agriculture.

II. COMMITTEE ACTIVITIES DURING THE 106TH CONGRESS

A. MAIN LEGISLATIVE ACTIVITIES

The Committee on Agriculture reported or otherwise considered a variety of bills in the 106th Congress covering many of the diverse areas within its jurisdictional interest. A considerable portion of the committee’s work in the first session of the 106th Congress was devoted to developing the Agricultural Risk Protection Act of 2000 (H.R. 2559) which was signed into Public Law 106–224 on June 20, 2000.

With abundant world supplies and declining export demand, the committee also spent a considerable amount of time during the first and second sessions of the 106th Congress developing legislation to supplement farm income and expand overseas markets. This led to the enactment of funding packages to supplement fiscal year 2000 and fiscal year 2001 farm income and again to legislation to expand crop insurance coverage and increase Federal premium subsidies.

In addition to legislative activity, the committee began the process of making permanent improvements to the current farm bill, which expires in 2002, by holding 10 field hearings across the country and five in Washington to hear from farmers and policy experts on the proper role of the Government for the future of U.S. agriculture.

Other major activities of the committee during the 106th Congress included the following:

Crop Insurance

The committee completed nearly a year of work that began in the first session of the 106th Congress by enacting H.R. 2559 (Public Law 106–224), the “Agricultural Risk Protection Act.” This legislation builds on the premium discounts provided by Congress for the 1999 and 2000 crop years. The chart below provides a comparison of the premium assistance offered at each coverage level (percentage of yield insured) under old law and under Public Law 106–224. For example, if a producer elects the 75 percent coverage level, Federal Crop Insurance Corporation (FCIC) would pay 24 percent of total premium under old law and 55 percent of total premium under Public Law 106–224.

COVERAGE LEVEL	50	55	60	65	70	75	80	85
Old Law	55%	46%	38%	42%	32%	24%	17%	13%

The act requires that the percentage of total premium FCIC must pay toward the purchase of each coverage level, above, applies to traditional Multi-Peril Corp Insurance (MPCI) policies that cover production losses as well as to revenue insurance policies, such as Crop Revenue Coverage (CRC), that cover production and price losses.

The act protects Actual Production History (APH) from the effects of multiple year disasters so insurable yields better reflect what farmers have proven they can grow. New law allows producers that record a yield of less than 60 percent of the long-term county average to exclude that low yield and use 60 percent of that county average yield in the calculation of their APH.

The act requires the Federal Crop Insurance Corporation (FCIC) to review the premium rates charged for insurance coverage and lower any premiums that are too high.

The act eliminates the unworkable “area loss” trigger of Non-insured Crop Disaster Assistance Program (NAP) so producers of crops that are not now insurable can receive assistance for losses on their individual farms regardless of whether the loss was widespread throughout the area.

The act cracks down on fraud, waste and abuse perpetrated by agents, loss adjusters, companies, farmers, or any other person through stiff penalties, including fines equal to the amount improperly gained by the violator or \$10,000, whichever is greater, and debarment from all farm programs.

The act expedites the research and development of new and innovative policies to meet the unique needs of producers of all crops from all regions and empowers the real experts—farmers, farmer-owned cooperatives, producer trade associations, colleges and universities, and others—to conduct new policy research and development with the help of reimbursements and contracts so producers receive the quality coverage they need.

Economic Assistance

The committee held three oversight hearings to review the agricultural economy and saw enacted into law several bills in response to the severe economic conditions in rural America, providing a total \$15.8 billion in supplemental agricultural assistance for 1999 and 2000.

In 1999, with agriculture prices continuing to remain depressed, Congress provided a total of \$8.7 billion to producers by making an additional 100 percent Agricultural Market Transition Act (AMTA) payment (referred to as Market Loss Assistance) totaling \$5.465 billion, \$475 million in oilseed assistance, \$200 million for livestock assistance, \$122 million for dairy, \$328 million for tobacco and \$1.2 billion in single year disaster assistance.

In 2000, as part of H.R. 2559, Congress provided \$7.1 billion in additional agricultural economic assistance to help producers cope with the continuation of low commodity prices.

Mandatory Price Reporting

As a result of the House Committee on Agriculture's February 10, 1999 hearing on livestock prices, a bipartisan call went out from the committee for packers and producers to enter into good faith discussions toward a productive compromise on mandatory price reporting.

After many months of complex and, at times, contentious work, the two sides were able to craft a proposal that balanced the needs of interested parties against the potential pitfalls of market disruption.

The legislation, passed in October, 2000 as part of the fiscal year 2000 Agriculture appropriations bill (Public Law 106-78), would require hog processing plants that slaughter an average of 100,000 hogs or more annually to submit purchases daily to the U.S. Department of Agriculture. Cattle plants that slaughter 125,000 head or more a year would also be required to submit purchases daily to the USDA. These thresholds effectively capture 94 percent of these livestock markets by requiring 10 percent of all plants to report.

The primary goal of a mandatory price reporting requirement is to provide producers with more accurate and timely information to allow the market transparency they seek for efficient price discovery. At the same time, care had to be taken to ensure that mandatory price reporting did not inadvertently cause packers to reveal proprietary data to their competitors.

Final rulemaking is virtually complete; USDA will be implementing the law in the very near future.

Biomass Research

The Biomass Research and Development Act of 2000 was included in title III of the conference report to the Agricultural Risk Protection Act (Public Law 106-224). Title III of the act authorizes research to promote the conversion of biomass into biobased industrial products.

The development of the biomass industry will benefit the agriculture community. Biomass products can be derived from plants, crop residues, wastes, and other organic sources. Organic waste products once deemed worthless have the potential of becoming valuable commodities such as plastics and fuel. Byproducts such as corn cobs, sugarcane stalks, and rice hulls could create power and cleaner air.

Plant Protection

The Plant Protection Act of 2000 (PPA), was included as part of the conference report on H.R. 2559, the Agricultural Risk Protection Act of 2000, and was developed in recognition of the new challenges facing the Plant Protection and Quarantine program of USDA's Animal and Plant Health Inspection Service under the developing global market in agricultural commodities.

The PPA addresses the three main goals of the Plant Protection and Quarantine program:

- (1) Safeguard America's abundant plant resources from invasive plant pests;
- (2) Expeditiously secure admission of an increasing volume of goods and passengers into the United States; and

(3) Facilitate agricultural trade in compliance with international obligations and standards.

PPA consolidates 11 previous plant quarantine laws that date back to 1913 and which comprised a patchwork of sometimes confusing and inadequate authorities. PPA law is intended to eliminate duplication, inconsistencies, and confusion regarding the appropriate application of provisions.

In addition to consolidation and streamlining of existing statutory authorities, the law would grant several new authorities to the Animal and Plant Health Inspection Service. Included among these provisions, the Department is granted authority to issue administrative subpoenas when involved in an investigation of suspected violations of the act.

Dairy

The 1996 farm bill required the Secretary of Agriculture to reform the Federal milk marketing order system, which USDA administers, and to consolidate the 31 existing orders into between 10 and 14 new orders. Due to controversy that developed as a result of the Secretary's proposed pricing formulas under the revised system, the Congress modified the final order of the Secretary through passage of H.R. 1402 on September 22, 1999. H.R. 1402 was subsequently reintroduced as H.R. 3428 and incorporated into the fiscal year 2000 omnibus appropriations (Public Law 106-113).

This legislation required the Secretary to implement the "Option 1-A" location based differentials for class I (fluid) milk when implementing the final rule to consolidate Federal milk marketing orders.

Required the Secretary to enter into formal rulemaking procedures to evaluate and revise the pricing formulas for class III (cheese) and class IV (powder) adopted as part of USDA's final rule. This rulemaking would be required to be completed by January 1, 2001.

Required the Secretary to implement a 5-year pilot program of price-forward contracting for milk used for manufactured dairy products (i.e., all products except fluid milk) in federally regulated milk orders to allow producers and cooperatives to voluntarily contract with handlers.

Decoupled consent for the Northeastern Interstate Dairy Compact with market order consolidation in order to extend congressional consent through September 30, 2001.

Trade

Twenty-five percent of U.S. farm income is derived from agricultural trade. Therefore, with exports being vital to the prosperity and success of U.S. farmers and ranchers, the committee worked and saw enacted legislation that will help enhance U.S. trade policies. For instance, H.R. 4444, which was signed into Public Law 106-286, will grant permanent normal trade relations with the People's Republic of China. The law will not only improve China's prospects for entry into the World Trade Organization, but most importantly will present a significant opportunity for U.S. farmers and ranchers to take advantage of China's lucrative export market.

Other provisions affecting agricultural trade were also contained in H.R. 17, the Selective Agricultural Embargoes Act of 1999,

which laid out congressional procedures for the approval or disapproval of future embargos on agricultural products that are not a part of an embargo on all products to a country. Amendments nearly identical to H.R. 17 passed both the House and Senate in the fiscal year 2001 agriculture appropriations measures that exempted food and medical products from current and future U.S. unilateral economic sanctions. Such products could be sold to buyers in five currently sanctioned countries (Cuba, Iran, Libya, North Korea, and Sudan).

H.R. 434, the African Growth and Opportunity Act, which was signed into Public Law 106–200. Provisions in the law allow for a rotation in the types of products targeted for trade retaliation (“carousel retaliation”), which requires the USTR to periodically revise the list of goods subject to retaliation when a foreign country fails to comply with a WTO ruling.

Grain Standards

The reauthorization of the U.S. Grain Standards Act will provide the Grain Inspection Packers and Stockyards Administration with the essential authority to continue the inspection of grain, both domestically and internationally. Also included in this legislation was a rewrite of the U.S. Warehouse Act which authorizes electronic warehouse receipts for commodities other than cotton.

Commodity Futures Modernization

The committee labored over the passage of H.R. 4541, the Commodity Futures Modernization Act of 2000, which was reported by all three committees of jurisdiction and passed by the House on October 19, 2000 by a vote of 377 yeas to 4 nays. This measure revamped U.S. futures laws to make them more conducive to the modern finance industry; make our domestic exchanges more competitive in the changing international markets; and provided legal certainty for risk management tools that have become so important to financial institutions worldwide.

On December 14, 2000, H.R. 5660 was introduced that contained major provisions of the House passed version of H.R. 4541. These provisions were included as part of the conference report (H. Rept. 106–1033) that accompanied H.R. 4577, the Consolidated Appropriations Act. (*Note.*—For further action see Public Law 106–111, under “1. Bills Enacted Into Law.”)

C. DIGEST OF BILLS WITHIN THE JURISDICTION OF THE COMMITTEE ON WHICH SOME ACTION HAS BEEN TAKEN

1. Bills enacted into law

Public Law 106-2 (H.R. 882)

To nullify any reservation of funds during fiscal year 1999 for guaranteed loans under the Consolidated Farm and Rural Development Act for qualified beginning farmers or ranchers, and for other purposes (approved March 15, 1999).

This act provided that funds reserved until April 1, 1999 for guaranteeing loans to beginning farmers and ranchers under the Beginning Farmers and Ranchers provisions of the Consolidated Farm and Rural Development Act be made available for purposes of guaranteeing loans to producers. The act also provided that beginning farmers and ranchers be given priority to the extent practicable by the Secretary for any funds made available for purposes of guaranteeing farm loans pursuant to a supplemental appropriations for fiscal year 1999.

Public Law 106-7 (H.R. 1212, S. 756)

To protect producers of agricultural commodities who applied for a Crop Revenue Coverage PLUS supplemental endorsement for the 1999 crop year (approved April 1, 1999).

This act required the Federal Crop Insurance Corporation to extend the sales closing date for crop insurance for a 14-day period beginning on the date of enactment of the bill, but no later than April 12, 1999, for producers who applied for Crop Revenue Coverage PLUS (CRCPLUS) for the 1999 crop year. During this time period, such producers could obtain new insurance at equivalent or lesser coverage levels for crops subject to CRCPLUS, and such producers could transfer other policies with the insurer to whom they applied for CRCPLUS to another approved insurance provider.

Public Law 106-41 (S. 604, H.R. 1135)

To direct the Secretary of Agriculture to complete a land exchange with Georgia Power Company (approved August 5, 1999).

This act directs the Secretary of Agriculture to convey to the Georgia Power Company about 1,275 acres of Federal land located in Lake Oconee, GA, and a cash payment of about \$23,250. In exchange, the company would convey to the Secretary about 1,175 acres of land in and near the Chattahoochee and Oconee National Forests in the State of Georgia. This exchange, which was an agreement between the Forest Service and the Company will, result in consolidation and more efficient management of national forests, increased protection of wildlife and habitats and improved recreational access for citizens.

Public Law 106-47 (S. 1543)

To amend the Agricultural Adjustment Act of 1938 to release and protect the release of tobacco production and marketing information (approved August 13, 1999).

This act authorizes the Secretary of Agriculture to provide to State government producer tobacco marketing information. Furthermore, the information provided to States shall only be used for purposes of calculating and dispersing tobacco settlement money to tobacco producers.

Public Law 106-96 (H.R. 609)

To amend the Export Apple and Pear Act to limit the applicability of the act to apples (approved November 12, 1999).

The Export Apple and Pear Act, enacted on June 10, 1933, required that apples and pears meet certain standards prior to export in order to ensure only high quality U.S. fruit moves in foreign commerce. U.S. pear producers and shippers recommended that pears should be dropped from the act so that they can increase the volume of pear exports.

This act eliminated pears from the act, thereby allowing U.S. exporters greater flexibility in the changing international marketplace and the opportunity to increase exports.

Public Law 106-102 (S. 900, H.R. 10)

To enhance competition in the financial services industry by providing a prudential framework for the affiliation of banks, securities firms, and other financial service providers, and for other purposes (approved November 12, 1999).

The Committee on Agriculture was appointed as conferees to title V, "Privacy" of H.R. 10/S.900. H.R. 10 was introduced in the House on January 6, 1999 and was referred to the Committee on Banking and Financial Services and the Committee on Commerce. On July 1, 1999 the Committee of the Whole House on the State of the Union adopted an amendment to H.R. 10 dealing with the regulation of disclosure of non-public information of financial institution customers. The House passed H.R. 10, with the privacy amendment, on July 1, 1999.

The privacy title had not previously been considered or debated in any committee of the House. Consequently, the Committee on Agriculture was not permitted to review those provisions of title V, which affected entities within the jurisdiction of the committee. By

letter to the Speaker, the chairman requested that the committee be appointed conferees to the conference on S. 900 in order to address those provisions of title V concerning the jurisdiction of the committee.

Title V prohibited the disclosure of certain customer information by financial institutions. Falling within the ambit of the definition of “financial institution” were the Federal Agricultural Mortgage Corporation and certain entities chartered and operating under the Farm Credit Act, and certain entities regulated by the Commodity Futures Trading Commission pursuant to the Commodity Exchange Act. Title V did not provide any means by which the Farm Credit Administration nor the Commodity Futures Trading Commission would be authorized to take part in rule making proceedings affecting their respective regulatees.

The Committee on Agriculture requested that the definition of “financial institution” exclude any person or entity with respect to any financial activity that is subject to the jurisdiction of the Commodity Futures Trading Commission under the Commodity Exchange Act and does not include the Federal Agricultural Mortgage Corporation or any entity chartered and operating under the Farm Credit Act of 1971. Such exclusion was agreed to by the Conference and appears in sections 509(3)(B) and (C) and 527(4)(D) of the act.

Public Law 106–156 (H.R. 2632, S. 1843)

To designate certain Federal lands in the Talladega National Forest in the State of Alabama as the Dugger Mountain Wilderness (approved December 9, 1999).

This act designated as wilderness approximately 9,200 acres of Federal land in the Talladega National Forest in the State of Alabama. According to the Forest Service, the land was currently being managed as a wilderness study area. Therefore, designating the land as wilderness will have little impact on how the land is currently being administered.

Public Law 106–171 (S. 1733, H.R. 2709)

To amend the Food Stamp Act of 1977 to provide for a national standard of interoperability and portability applicable to electronic food stamp benefit transactions (approved February 11, 2000).

This act provides for a national standard of interoperability and portability for the food stamp program. Requires the U.S. Department of Agriculture to set specific standards for States with electronic benefit transfer (EBT) systems so that food stamp participants can redeem their benefits in neighboring States. Under the food stamp coupon system, participants can redeem benefits in any retail food store. EBT portability is simply allowing recipients of benefits under the food stamp program to redeem those benefits without regard to State borders at the stores they choose. (*Note.*— See also discussion under “D. Oversight. 2. Legislative hearings. June 17, 1999: Review of H.R. 852.”)

Public Law 106–222 (S. 777, H.R. 852)

To require the Secretary of Agriculture to establish an electronic filing and retrieval system to enable farmers and other persons to file paperwork electronically with selected agencies of the Depart-

ment of Agriculture and to access public information regarding the programs administered by these agencies (approved June 20, 2000).

This act requires the Secretary of Agriculture to establish a user-friendly electronic filing and retrieval system, which would allow farmers to download forms from the Internet and submit completed and modified forms. Within 2 years, the completed system must be fully operational, allowing farmers to retrieve and file all relevant forms with USDA. (*Note.*— See also discussion under “D. Oversight. 2. Legislative hearings. August 5, 1999, Review of the Food Stamp Program and H.R. 2709.”)

Public Law 106-224 (H.R. 2559, S. 225)

To amend the Federal Crop Insurance Act to strengthen the safety net for agricultural producers by providing greater access to more affordable risk management tools and improved protection from production and income loss, to improve the efficiency and integrity of the Federal crop insurance program (approved June 20, 2000).

Title I—Crop Insurance provisions of Public Law 106-224 build on the 30 percent premium discount provided to producers for the 1999 crop year. Producers participating in the Federal Crop Insurance Program will receive additional premium assistance at all levels of buy-up coverage—encouraging producers to purchase better coverage for less premium. The act also affords producers greater flexibility in buying coverage that best fits their farm. Producers with good insurance or production experience may receive a performance-based discount on premiums.

Producers choosing innovative plans of insurance, such as revenue or cost of production insurance, would receive an equal percentage of premium assistance that producers choosing traditional Multi-Peril Crop Insurance would receive “making these plans of insurance that protect price as well as production risk more affordable to producers.

The act continues the standard catastrophic risk protection (CAT) coverage (insuring 50 percent of yield at 55 percent of price) at a fee of \$100. The act also allows producers to select an alternative CAT coverage based on area yields and losses that provides a higher combination of yield and price protection than the standard CAT coverage.

Producers are currently penalized with lower insurable yields that do not reflect their productive capability and coverage needs as a result of multiple-year disasters. The conference report ensures that farmers can better insure the yields they have proven they can produce by allowing producers that record a yield of less than 60 percent of the long-term county average to exclude that low yield and use 60 percent of that county average yield in the calculation of their Actual Production History (APH).

The act requires the Federal Crop Insurance Corporation (FCIC) to review the premium rates charged for insurance coverage and lower any premiums that are too high.

The act establishes new procedures for insuring multiple crops on the same land, with provisions for traditional double-cropping areas. Producers also have more flexibility with regard to prevented planting coverage.

The act changes the unworkable area loss requirements of the Non-insured Assistance Program (NAP) and replaces it with an individual loss trigger allowing producers of crops for which there is not an insurance policy to have risk protection similar to CAT coverage, with an equal fee.

The act enhances provisions concerning fraud, waste and abuse to build a stronger crop insurance program and lower producer costs. The act directs the Secretary to develop and implement a coordinated plan for the FCIC and the Farm Service Agency (FSA) to reconcile producer information annually. The FSA will also assist the FCIC with investigating claims of waste, fraud or abuse and FSA State committees will review insurance policies for program vulnerabilities to reduce waste and abuse. The act also directs the FCIC to establish methods to identify producers, agents and loss adjusters who may be abusing the program. The act provides for tougher penalties and program disqualification for producers, agents, loss adjusters and others who defraud the crop insurance program.

The act makes a substantial investment in research and development by allowing experts to research and develop new policies, rather than the FCIC. This provision will increase the quality and quantity of insurance available to producers and make insurance policies available more quickly. The FCIC would have the authority to enter into contracts for research and development for underserved States and commodities, including specialty crops.

The act provides for expanded pilot authorities, including coverage for livestock and also for a pilot program on premium rate reduction.

The act provides for the Secretary of Agriculture to establish competitive grants to educate producers in underserved areas about the full range of risk management options and expands the dairy options pilot program to 300 counties.

The act adds one additional farmer to the Board of Directors of the Federal Crop Insurance Corporation so that four active farmers would serve on the board. This provision would also require that at least one member of the board be a specialty crop producer.

The FCIC will make crop insurance information available electronically and will develop methods to allow producers and insurance providers to submit information electronically.

Title II of Public Law 106-224 provides producers with current Agricultural Market Transition Act (AMTA) contracts a payment to mitigate economic losses. Delivering the payment through the AMTA structure ensures USDA makes payments to the greatest number of producers quickly and efficiently, prior to the end of fiscal year 2000. The payments under this provision will total \$5.466 billion nationwide.

Title II provides oilseed producers with direct payments to mitigate losses due to continued low prices. Producers growing oilseeds eligible to obtain a marketing assistance loan in the 2000 crop year will be eligible to receive payments estimated at 15 cents per bushel. To compensate for depressed cotton seed prices, producers and cotton seed handlers will be eligible for a payment for the 2000 crop. At a payment rate of approximately \$20 per ton, these payments total \$100 million nationally.

The act provides for infrastructure improvements for growers of specialty crops. Specifically, the section provides \$59.45 million for the Perishable Agricultural Commodity Act, 1930 (PACA) reserve fund and the inspection service reserve fund to maintain the cost of licensing and inspection fees at the current level. The section also provides \$11.55 million to make improvements to the system used for inspecting fruits and vegetables. This section also provides \$200 million to be used by the Secretary to purchase specialty crops that experienced low prices in the 1998 and 1999 crop years. This section also provides \$25 million to compensate growers for losses resulting from plum pox virus, Pierce's disease and citrus canker. This section also provides loans, up to 3 years in term, for apple producers that are suffering economic losses resulting from low prices.

Title II provides a payment to peanut producers for the 2000 peanut crop. In total, peanut producers would receive \$47 million in economic assistance, which equates to \$30.50 per ton for quota peanuts and \$16 for additional peanuts. Title II provides \$340 million in total payments to tobacco farmers to compensate for economic losses. Due to continued depressed wool and mohair prices, producers will receive a direct payment of 20 cents per pound of wool and 40 cents per pound of mohair produced for the 1999 marketing year—totaling \$11 million. To mitigate the economic situation for honey producers, a recourse loan will be established.

Title II provides a payment to producers of wheat, oats, and barley who elect to graze their crop rather than harvest it mechanically. Payment will be made for the 2001 crop only.

However, producers of AMTA contract crops produced on a farm that does not have an AMTA contract are made eligible for a loan deficiency payments for 2000 crop year crops.

Title II provides \$10 million for farmland preservation and \$40 million to provide cost-share assistance for special 1-year conservation contracts.

Title II directs the Secretary to use \$15 million to award competitive grants to producers to facilitate greater participation in markets for value-added agricultural commodities.

Title II provides \$7 million for psuedorabies vaccination costs incurred by pork producers and \$6 million for bovine tuberculosis control and eradication efforts.

Title II provides USDA with authority to make 18-month no-interest loans to producers of 1999 crop grass, forage, vegetable and sorghum seed that have not received payments from AgriBiotech (ABT) as a result of bankruptcy proceedings involving ABT.

Title III—Biomass Research and Development Act of 2000, incorporated text of S. 935, which authorizes competitive grants, contracts and other financial incentives to promote the use of biobased industrial products.

Title IV—Plant Protection, includes a revised version of the Plant Protection Act (H.R. 1504), which consolidates and enhances the authority of the Secretary to regulate in interstate and foreign commerce, the movement of any plant, plant product, biological control organism, or noxious weed if the Secretary determines the action is necessary to prevent the introduction or dissemination of a plant pest or noxious weed.

Title V—Inspection Animals, provides for civil penalties of up to \$10,000 for causing harm to or interfering with a Department of Agriculture inspection animal. (*Note.*—See also discussion under “D. Oversight. 2. Legislative hearings. October 19, 1999. Review of H.R. 2827.”)

Public Law 106–330 (H.R. 4285)

To authorize the Secretary of Agriculture to convey certain administrative sites for National Forest System lands in the State of Texas, to convey certain National Forest System land to the New Waverly Gulf Coast Trades Center, and for other purposes (approved October 19, 2000).

This act gives authority to the Secretary of Agriculture to sell certain Forest Service administrative sites in the Davy Crockett, Sabine, and Angelina National Forests in Texas at fair market value, and to authorize the conveyance of approximately 57 acres of National Forest land, at fair market value, to the Waverly Gulf Coast Trades Center.

Public Law 106–393 (H.R. 2389, S.1608)

To restore stability and predictability to the annual payments made to States and counties containing National Forest System lands and public domain lands managed by the Bureau of Land Management for use by the counties for the benefit of public schools, roads, and other purposes (approved October 30, 2000).

The act provides each county an election to either receive current revenue sharing payments (25 percent payment for Forest Service counties and 50 percent payment for Bureau of Land Management counties) or to receive a guaranteed safety net payment. Safety-net payments amount to a county’s share of the State’s high 3-year average between 1986 and 1999, indexed annually for inflation. Counties receiving the safety-net payment may use between 80 percent and 85 percent of the total payment for roads and schools. For counties receiving all safety net payments (less than \$100,000) they may elect to use the total payment amount for road and schools. The act also authorizes the use of project funds reserved for projects on Federal or private land that benefit Federal land and resources. Furthermore, the act establishes resource advisory committees representing a broad cross-section of interest to approve project proposals prior to their submission to the Secretary. The act requires the Secretaries of Agriculture and the Interior to ensure that proposed projects comply with Federal laws, regulations, and policies, comply with applicable resources management plans, and be approved by local advisory committees. There is also established a pilot program authorizing separate contracts for the removal and sale of merchantable material for a fixed percentage of projects involving merchantable material. The act authorizes the use of project funds for county projects for search and rescue on Federal land, community service work camps, recreation and conservation easements, forest-related after school program, fire prevention programs and planning and community forestry. (*Note.*—See also the discussion under “D. Oversight. Legislative hearings. July 15, 1999 Review of H.R. 2389.”)

Public Law 106-399 (H.R. 4828)

To designate wilderness areas and a cooperative management and protection area in the vicinity of Steens Mountain in Harney County, Oregon, and for other purposes (approved October 30, 2000).

This act designates the Steens Mountain Wilderness Area to maintain the cultural, economic, ecological, and social health of the Steens Mountain area in Harney County, Oregon. (*Note.*—H.R. 4828 was introduced on July 12, 2000 and referred to the Committee on Resources, and in addition to the Committee on Agriculture. However, on October 2, 2000, the Committee on Agriculture waived further consideration by letter to the Chairman of the Committee on Resources in the interest of expediting the passage of the legislation.)

Public Law 106-472 (H.R. 4788, S. 3001)

To amend the United States Grain Standards Act to extend the authority of the Secretary of Agriculture to collect fees to cover the cost of services performed under that act, extend the authorization of appropriations for that act, and improve the administration of that act, to reenact the United States Warehouse Act to require the licensing and inspection of warehouses used to store agricultural products and provide for the issuance of receipts, including electronic receipts, for agricultural products stored or handled in licenses warehouses, and for other purposes (approved November 9, 2000.)

This act reauthorizes the U.S. Grain Standards Act and provides authority for the Grain Inspection, Packers and Stockyards Administration (GIPSA) and the Federal Grain Inspection Service (FGIS). The act also provides new legal authority for FGIS to collect fees to cover administrative and supervisory expenses associated with grain inspection as well as fees for the testing of equipment utilized in performing official inspection, official weighing or supervision of weighing of grain.

The act also makes several revisions to the Warehouse Act by authorizing and standardizing electronic documents and allowing their transfer from buyer to seller across State and international boundaries. The act authorizes warehouse operators to enter into contracts or agreements with depositors to allocate available storage space and protect the integrity of State warehouse laws and regulations from Federal preemption.

Other provisions included in the act:

H.R. 728, the Small Watershed Rehabilitation Amendments of 1999, which helps small communities raise financial resources to repair dams by providing grants and cost-share assistance;

H.R. 4965, which extends the filing deadline for producers to make claims arising from a false inspection certificate issued at the Hunts Point Terminal Market; and

H.R. 5224, the International Food Relief Partnership Act, which authorizes grants to private, non-profit organizations for stockpiling and rapid transportation, delivery, and distribution of shelf-stable prepackaged foods to needy individuals in foreign countries. (*Note.*—For further action, see the discussion under “2. Bills Acted on By the Committee Included in Other Laws Enacted, H.R. 728, H.R. 4965, and H.R. 5224,” and the discussion under “5. Bills Acted

on By the House But Not By the Senate, H.R. 728, H.R. 4965 and H.R. 5224.”)

Public Law 106-471 (H.R. 4646, S. 2865)

To designate certain National Forest System lands within the boundaries of the State of Virginia as wilderness areas, and for other purposes (approved November 9, 2000).

The act designates approximately 6,500 acres in the George Washington National Forest as the “Priest Wilderness Area,” and another area of approximately 4,800 acres as the “Three Ridges Wilderness Area.” (*Note.*—See also the discussion under “D. Oversight. Legislative hearings. September 19, 2000. Review of H.R. 4646.”)

Public Law 106-506 (H.R. 3388, S. 1925)

To promote environmental restoration around the Lake Tahoe basin (approved November 13, 2000.)

This act enables the Forest Service to plan and implement significant new environmental restoration activities and forest management activities to address degradation of the Lake Tahoe ecosystem, including sedimentation, dead and dying trees, loss of water clarity, groundwater contamination and increased risk of catastrophic forest fires. (*Note.*—H.R. 3388 was introduced and referred to the Committee on Resources, and in addition to the Committees on Agriculture, and Transportation and Infrastructure. However, on August 15, 2000, the Committee on Agriculture waived further consideration by letter to the Chairman of the Committee on Resources in the interest of expediting the passage of the legislation.)

Public Law 106-526 (S. 1936)

To authorize the Secretary of Agriculture to sell or exchange all or part of certain administrative sites and other National Forest System land in the State of Oregon and use the proceeds derived from the sale or exchange for National Forest System purposes (approved November 22, 2000).

This act will authorize the Secretary of Agriculture to sell or exchange specified National Forest System Land and improvements in Oregon. In addition, the act will give the right of first refusal to purchase the Bend Pine Nursery to the Bend Metro Park and Recreation District while requiring proceeds to be deposited in the fund established under the Sisk Act. Furthermore, it will allow proceeds to be used for the acquisition, construction, or improvements of the Deschutes National Forest, and acquisition of land in the State of Oregon. (*Note.*—On September 6, 2000, S. 1936 was referred to the Committee on Resources. On October 5, 2000, the Committee on Resources reported S. 1936 after an exchange of letters with the Committee on Agriculture wherein it did seek a sequential referral in the interest of expediting the passage of the legislation.)

Public Law 106-532 (S. 2773)

To amend the Agricultural Marketing Act of 1946 to enhance dairy markets through dairy product mandatory reporting, and for other purposes (approved November 22, 2000.)

The act establishes a mandatory program of price and sales volume reporting of products used by the USDA to establish the minimum monthly prices under the Federal Milk Order system. While a voluntary program had previously been administered by the USDA, concerns had been raised over the accuracy and timeliness of some reports. In addition to codifying the existing program, the legislation provides authority for the Secretary of Agriculture to enforce reporting mandates.

Other laws

Several bills acted on by other authorizing committees, but not acted on by the Committee on Agriculture, were enacted with provisions relating to matters within the committee's jurisdiction. Following are abbreviated summaries of these bills, including some of the relevant provisions:

Legislative matters

Public Law 106-5 (H.R. 808)

To extend for 6 additional months the period for which chapter 12 of title 11 of the United States Code is reenacted (approved March 30, 1999).

Chapter 12 is a specialized form of bankruptcy relief available only to a family farmer with regular annual income. It permits eligible family farmers to reorganize their debts pursuant to a repayment plan. Last Congress chapter 12 was extended until April 1, 1999 as part of the Omnibus Consolidated and Emergency Supplemental Appropriations Act. This act reenacted chapter 12 for the period beginning on April 1, 1999 and ending on October 1, 1999. It also specifies that all cases commenced or pending under chapter 12 shall be conducted and determined under such chapter as if such chapter were continued in effect after October 1, 1999.

Public Law 106-53 (S. 507, H.R. 1480)

To provide for the conservation and development of water and related resources, to authorize the United States Army Corps of Engineers to construct various projects for improvements to rivers and harbors of the United States, and for other purposes (approved August 17, 1999).

This act authorizes \$6.3 billion for projects and programs of the Army Corps of Engineers civil works program. The act responds to pressing water infrastructure priorities, policy initiatives to update existing water resources programs, and programs to restore, protect, and enhance the aquatic environment. The act also authorizes 114 new water resources projects including 45 major Corps projects, modifies 75 existing authorized projects, and authorizes the Corps to conduct 60 studies to address a variety of water resources problems and opportunities.

Specifically of interest is the Natural Resources Conservation Service (NRCS) small watershed program and the authorization of the Secretary of the Army to complete the NRCS's flood control program at Llagas Creek, California.

Public Law 106-70 (H.R. 1606)

To extend for 9 additional months the period for which chapter 12 of title 11 of the United States Code is reenacted (approved October 9, 1999).

This act extends Public Law 106-6 for an additional 9 months for which family farmers can reorganize their debts. (*Note.*—See the description of “Public Law 106-5 under 1. Bills Enacted Into Law; Other Laws.”)

Public Law 106-181 (H.R. 1000)

To amend title 49, United States Code, to reauthorize programs of the Federal Aviation Administration, and for other purposes (approved April 5, 2000).

This act authorizes approximately \$40 billion over 3 years through fiscal year 2003 for the airport improvement program (AIP), air traffic control facilities and equipment, and Federal Aviation Administration (FAA) operations. Included in this Act was a provision to ensure that airlines will continue to be able to carry animals while information is collected to determine whether there is a problem that warrants stronger legislative remedies. Toward this end, scheduled U.S. airlines will be required to provide monthly report to the Department of Transportation (DOT) describing any incidents involving animals that they carry. DOT and the Department of Agriculture must enter into a Memorandum of Understanding (MOU) to determine that the Department of Agriculture receives this information. DOT must publish data on incidents and complaints involving animals in its monthly consumer reports or other similar publications.

Public Law 106-200 (H.R. 434)

To authorize a new trade and investment policy for sub-Saharan Africa, expand trade benefits to the countries in the Caribbean Basin, renew the generalized system of preferences, and reauthorize the trade adjustment assistance programs (approved May 18, 2000).

This act contains a provision of H.R. 2991 included in section 407 of H.R. 434. It amends the Trade Act of 1974 to create a “carousel” effect for products on a World Trade Organization (WTO) sanctioned retaliation list.

If the United States issues a retaliation list because a country fails to implement a WTO decision, the act requires the United States Trade Representative (USTR) to review the list of retaliatory goods every 6 months. The act further directs the USTR to change the goods that are on the list by changing the whole list within specific parameters.

Public Law 106-286 (H.R. 4444)

To authorize extension of nondiscriminatory treatment (normal trade relations treatment) to the People’s Republic of China, and to establish a framework for relations between the United States and the People’s Republic of China (approved October 10, 2000).

This act grants the President the authority to exempt the People’s Republic of China from title IV of the Trade Act by submitting to the Congress a report outlining the terms and conditions for the People’s Republic of China’s accession into the WTO, which must

be a least equivalent to those agreed to in the November 15, 1999, bilateral agreement. The act also enforces the product-specific safeguard established under the U.S-China Bilateral Trade Agreement and establishes clear standards for Presidential implementation of the provisions to provide relief to injured U.S. industries and workers. However, for U.S. farmers and ranchers, with permanent Normal Trade Relations status, agricultural trade is expected to increase by as much as \$2 billion annually by 2005.

Appropriations

Public Law 106-31 (H.R. 1141, S.544)

Making Emergency Supplemental Appropriations for the Fiscal Year Ending September 30, 1999, and for other purposes (approved May 21, 1999).

This act provided funds for emergency farm credit needs and Farm Service Agency (FSA) operations, while also addressing immediate shortfalls in the current year's USDA budget by providing \$109.6 million to replenish USDA loan accounts; \$42.75 million to cover Farm Service Agency salaries and expenses; \$70 million for additional Livestock Disaster Assistance payments; \$28 million to fund Conservation Reserve Program technical assistance to farmers and ranchers for the remainder of fiscal year 1999 and \$35 million for fiscal year 2000; and \$145 million in emergency assistance available to agricultural producers.

This act provided \$8.7 billion in emergency farm aid for income and disaster assistance and is designed to expedite delivery of funds to producers, including \$1.2 billion for natural disasters, \$5.5 billion for market loss payments, including \$125 million for dairy producers and \$200 million livestock losses; \$650 million for crop insurance premium subsidy and for crop insurance associated costs; and \$475 million in direct payments to oilseed producers. The act also provided full funding for the Cotton Step 2 marketing assistance throughout the current farm bill; eased the limit on Loan Deficiency Payment (LDP) and Marketing Loan Gains from \$75,000 to \$150,000 to better reflect their farm income as that of a small business, and included Mandatory Livestock Pricing Reporting language.

Public Law 106-113 (H.R. 3194)

Making consolidated appropriations for the fiscal year ending September 30, 2000, and for other purposes (approved November 29, 1999).

This act which was a compromise final appropriation bill included an additional \$576 million in emergency disaster assistance for agriculture and implementation of the dairy reform known as Option 1-A. Also included was an extension for 2 years for the Northeast Dairy Compact. (*Note.*— See also the discussion under

“D. Oversight. 2. Legislative hearings. June 24, 1999. Review of H.R. 1402.”)

Public Law 106-246 (H.R. 4425)

Making appropriations for military construction, family housing, and base realignment and closure for the Department of Defense for the fiscal year ending September 30, 2001, and for other purposes (approved July 13, 2000).

This act provided emergency supplemental appropriations for the Department of Agriculture by providing \$210.4 million for farm and conservation programs, including \$81 million for marketing loan forgiveness and \$77.56 million for Farm Service Agency expenses.

The act also requires the Environmental Protection Agency to contract with the National Academy of Science for a review of the science used to develop and implement Total Maximum Daily Loads (TMDL) and to conduct a comprehensive assessment of the costs associated with the development and implementation of TMDLs that shall include, (1) the potential State resources that will be required, (2) the projected annual costs to the regulated community in both the private and public sectors, (3) analysis, responding to concerns raised by the Comptroller General, and (5) the projected costs to small businesses.

Public Law 106-291 (H.R. 4578)

Making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2001, and for other purposes (approved October 11, 2000).

This act appropriated \$18.8 billion in new fiscal year 2001 budget authority. Approximately half of the funding, \$8.4 billion, finances Interior Department programs to manage and study the Nation’s animal, plant, and mineral resources and support Indian programs. The balance of the measure’s funds support other, non-Interior agencies such as the Forest Service in the Department of Agriculture. Furthermore, the act provided instructions for the use of \$1.8 billion for wildfire suppression, rehabilitation and prevention and requires the Secretaries of Agriculture and Interior to engage State and local government as joint decision-making partners in the use of these appropriations.

The act also establishes a national advisory committee to develop recommendations for long-term policy ensuring that counties adjacent to Federal forest lands receive sufficient funding for the benefit of public education and other public purposes.

Public Law 106-377 (H.R. 4635)

Making appropriations for the Departments of Veterans Affairs and Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 2001, and for other purposes (approved October 27, 2000).

This act appropriates \$23.6 billion in new budget authority for fiscal year 2001 for the Department of Energy, Army Corps of Engineers, and related programs. Included in this Act, is a provision that directs the Environmental Protection Agency (EPA) to contract expeditiously the National Academy of Sciences (NAS) for a review

of the quality of science used to develop and implement Total Maximum Daily Loads (TMDL) that directs that the final report be submitted to Congress by June 1, 2001. The provision further directed EPA to conduct a comprehensive assessment of the potential State resources which will be required for the development and implementation of TMDLs and to present the results of the study to Congress within 120 days of enactment. (*Note.*—See also the discussion under “D. Oversight. 1. Oversight hearings. May 22, 2000: Review of the impact of the proposed Total Maximum Daily Loan (TMDL) regulations on agriculture and silviculture” and “June 19, 2000: Review of the Environmental Protection Agency’s Total Maximum Daily Loan Program and the impacted on agricultural and silviculture industries.”)

Public Law 106-387 (H.R. 4461)

Making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2001, and for other purposes (approved October 28, 2000).

This act provided \$3.5 billion in emergency disaster funds, including a provision that lifts limits to \$150,000 this crop year on Loan Deficiency Payment (LDP) and provided legislation that lifts the ban on food and medicine exports to Cuba, Iran, Libya, North Korea and Sudan. Also included is the Hunger Relief Act, a \$1.6 billion program (over 5 years, \$66 million in fiscal year 2001). This legislation conforms the vehicle allowance in the Food Stamp program to the higher levels set in the TANF program, and increases the housing deduction from \$280 to \$340.

Public Law 106-554 (H.R. 4577)

Making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 2001, and for other purposes (approved December 21, 2000).

This act referred to as the Consolidated Appropriations Act, 2001, included H.R. 5660, the Commodity Futures Modernization Act of 2000. This bill contained major provisions of H.R. 4541 as passed by the House. These provisions are in titles I and II of the act and provide regulatory relief for the domestic futures exchanges, legal certainty for over-the-counter derivatives, and allow trading of single stock futures.

The agreement (H.R. 5660) added two new titles not included in the House passed bill. Title III, Legal Certainty for Swap Agreements, provides the guidelines for the SEC’s role in regulating equity based swaps.

Title IV, the “Legal Certainty for Bank Products Act of 2000” excludes banking products from the Commodity Exchange Act and provides guidelines to determine the regulator for new products if regulators disagree on who should regulate the product. (*Note.*—For further action, see the discussion of H.R. 4541, under “5. Bills acted on by the House but not the Senate.”)

Public Law 106-553 (H.R. 4942)

Making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against

the revenues of said District for the fiscal year ending September 30, 2001, and for other purposes (approved December 21, 2000).

This act contains Commerce, Justice, and State appropriations, as well as a compromise between the competing House and Senate versions of rural satellite legislation (H.R. 3615) that, among other things, included a change in the composition of the Board to include members from the Federal Reserve Board and from the Departments of Treasury, Commerce, and Agriculture. The compromise (title X of H.R. 5548) further requires full collateral on loans, that the loan program be technologically neutral, and provides that Internet and Weather Service Signals are additional considerations under the act. (Note: For further action see the discussion of H.R. 3615, under “5. Bills Acted on By the House By Not the Senate.”)

3. Vetoed bills

There were three bills vetoed by the President during the 106th Congress that contained tax cuts, which would have benefited U.S. farmers and ranchers. While none of the bills were referred to the Committee on Agriculture, following is an abbreviated summary of the bills, including the relevant provisions:

H.R. 8, to amend the Internal Revenue Code of 1986 to phase-out the estate and gift taxes over a 10-year period (vetoed on August 31, 2000).

H.R. 8, known as the “Death Tax Elimination Act of 2000” was reported by the Committee on Ways and Means (H. Rept. 106–651), amended, and passed by the House of Representatives on June 9, 2000 by a vote of 279 yeas to 136 nays. On July 14, 2000, the Senate passed the measure by a vote 59 yeas to 39 nays. The President vetoed H.R. 8 on August 31, 2000 and the House unsuccessfully voted to override the veto on September 7, 2000 by a vote of 274 yeas to 157 nays (two-thirds required for passage).

Currently family owned businesses (composed of 50 percent or more of business or farm assets) are exempt from taxes on estates valued up to 1.3 million. The act repealed the step-up in basis, applying a carry-over basis instead to estates of more than \$1.3 million.

The act reduced rates and repealed the Federal estate, gift, and generation-skipping transfer taxes over a 10-year period, beginning with a reduction of the tax immediately and eliminating it completely in 2010. The plan would also simplify portions of the generation skipping transfer tax rules prior to repeal and would expand the ability of farmers and ranchers to use conservation easements in their estate planning.

H.R. 2488, to provide for reconciliation pursuant to sections 105 and 211 of the concurrent resolution on the budget for fiscal year 2000 (vetoed on September 23, 1999).

H.R. 2488, know as the “Taxpayer Refund Act of 1999” was reported by the Committee on Ways and Means (H. Rept. 106–238), amended, on July 16, 1999 and passed by the House of Representatives on July 22, 1999 by a vote of 223 yeas to 208 nays. On July 30, 1999, the Senate struck all the language after the enacting clause and substituted the language of S.1429, as amended, and passed the bill by unanimous consent. The Conference Report (H. Rept. 106–289) was filed and passed by the House on August 5, 1999 by a vote of 221 yeas to 206 nays. That same day the Senate passed the Conference Report by a vote of 50 yeas to 49 nays. The President vetoed the bill on September 23, 1999.

A provision of the act was designed to help farmers and ranchers through tough economic times by providing them with a tax benefit during the good times by allowing them to make contributions to an account under the Fish, Farm and Ranch Risk Management Act (FFARRM). Contributions to FFARRM accounts are tax deductible and limited to 20 percent of the taxable income that is attributable to eligible businesses. Amounts deposited in a FFARRM account could remain for up to 5 years and must be distributed after that period of time.

H.R. 4810, to provide for reconciliation pursuant to section 103(a)(1) of the concurrent resolution on the budget for fiscal year 2001 (vetoed August 5, 2000).

H.R. 4810, known as the “Marriage Tax Relief Reconciliation Act” was introduced on July 10, 2000 and referred to the Committee on Ways and Means. The bill passed the House of Representatives on July 12, 2000. On July 18, 2000, the Senate struck all the language after the enacting clause and substitute the language of S. 2839, as amended, and passed the bill by a vote of 61 yeas to 38 nays. The Conference Report (H. Rept. 106–765) was filed and passed by the House on July 20, 2000 by a vote of 271 yeas to 156 nays. The next day the Senate passed the measure by a vote of 60 yeas to 34 nays. The President vetoed the bill on July August 5, 2000.

According to the Joint Committee on Taxation of the Congress, under current law, a married couple with two children making \$50,000 would pay \$3,425 in Federal taxes; by eliminating the marriage penalty that couple would pay \$3,185, saving \$240. That amounts to a 7 percent reduction in their taxes. The same couple earning \$75,000 would have their taxes reduced by 13 percent. At an annual income of \$200,000, the couple would receive a 3.9 percent reduction.

4. Bills acted on by both houses but not enacted

None.

5. Bills acted on by the House but not by the Senate

H.R. 17, to amend the Agricultural Trade Act of 1978 to require the President to report to Congress on any selective embargo on agricultural commodities, to provide a termination date for the embargo, to provide greater assurances for contract sanctity, and for other purposes

H.R. 17 was introduced on January 6, 1999 and referred to the Committee on Agriculture and in addition to the Committee on International Relations. The Committee on Agriculture reported H.R. 17, without amendments, on May 20, 1999 (H. Rept. 106–154, part 1). The Committee on International Relations reported H.R. 17, without amendments, on June 14, 1999 (H. Rept. 106–154, part 2). The bill then passed the House of Representatives on June 15, 1999 under suspension of the rules by a voice vote.

H.R. 17 was similar in intent and construction to the prior provisions of the Export Administration Act of 1979 that expired on August 20, 1994. The Export Administration Act of 1979 required that “If the President imposes export controls on any agricultural commodity in order to carry out the policy set forth in [this Act], the President shall immediately transmit a report on such action to the Congress, setting forth the reasons for the controls in detail and specifying the period of time, which may not exceed 1 year, that the controls are proposed to be in effect.”

H.R. 17 required that if the President acts to implement an embargo of any agricultural commodity to any country, the President must submit a report to Congress within 5 days of imposing the embargo that described the reasons for the embargo and the period of time the embargo would in effect. The bill also provided that if

within 100 days of receiving the President's report, a joint resolution must be enacted that approves the embargo, the embargo will end on the date determined by the President or 1 year after the date of enactment of the joint resolution, whichever is earlier. If a joint resolution disapproving the embargo is enacted during that 100-day period, the embargo would terminate at the end of that 100-day period.

The bill also granted an exception providing that an embargo may take effect during any period in which there is a state of war declared by Congress or a national emergency declared by the President.

The bill also clarified that "plant nutrient materials" are included in the category of agricultural commodities in the section of the Agricultural Trade Act of 1978, regarding contract sanctity. Therefore the protection afforded agricultural commodities in regard to suspension of trade and contract sanctity would apply to plant nutrient materials.

Furthermore, plant nutrient materials under export sales contracts would be protected from suspension of trade, as long as the contract is entered into before the suspension of trade is announced and the contract terms require delivery within 270 days after suspension of trade is imposed.

H.R. 169, to amend the Packers and Stockyards Act, 1921, to expand the pilot investigation for the collection of information regarding prices paid for the procurement of cattle and sheep for slaughter and of muscle cuts of beef and lamb to include swine and muscle cuts of swine.

H.R. 169 was introduced and referred to the Committee on Agriculture on January 6, 1999 and passed by the House of Representatives, amended, under suspension of the rules on February 9, 1999.

The bill would have simply added hogs and pork products to the pilot investigation on beef and lamb prices that was authorized during the 105th Congress as part of (Public Law 105-277) the Omnibus Appropriations package. During the 105th Congress, when the Omnibus bill was being crafted, the pork producers declined to be included in the USDA pilot investigation. However, with drastic declines in live hog prices, the pork producers reconsidered and ultimately reversed its decision.

(*Note.*—For further action see the discussion under "1. Bills Enacted Into Law. Public Law 106-78" and the discussion under "A. Main Legislative Activities. Mandatory Price Reporting.")

H.R. 701, to provide Outer Continental Shelf Impact Assistance to State and local governments, to amend the Land and Water Conservation Fund Act of 1965, the Urban Park and Recreation Recovery Act of 1978, and the Federal Aid in Wildlife Restoration Act (commonly referred to as the Pittman-Robertson Act) to establish a fund to meet the outdoor conservation and recreation needs of the American people, and for other purposes.

The Committee on Resources reported H.R. 701, as amended, on February 16, 2000 (H. Rept. 106-499, part 1). The bill was then sequentially referred to the Committee on Agriculture until March

17, 2000 and to the Committee on the Budget until March 31, 2000.

H.R. 701 established a new program that provided Outer Continental Shelf Impact assistance to State and local governments and amended several other statutes to create a fund for the purchase of land for parks, renovation of historic properties, creation of new wildlife habitat and areas and incentives to assist in the recovery of threatened and endangered species. The Conservation and Reinvestment Fund (CARA) would receive revenues from leased oil and gas tracts within defined areas of the Outer Continental Shelf. The Fund would then allocate the funds to State and local governments in accordance with the various titles of the bill.

Title VII of H.R. 701 which falls within the Committee on Agriculture's jurisdiction, provided \$150 million for annual funding dedicated to conservation easement and other landowner incentives to assist in the recovery of threatened and endangered species. The Committee on Agriculture and the Committee on Resources worked diligently on compromise language to address this committee's concerns regarding the implementation of that title.

Therefore, in an exchange of letters between the respective chairmen of the committees, the Committee on Agriculture waived its further consideration of the bill on March 17, 2000, and the bill with the compromise language passed the House on May 11, 2000, by a vote of 315 yeas to 102 nays.

H.R. 728, to amend the Watershed Protection and Flood Prevention Act to authorize the Secretary of Agriculture to provide cost share assistance for the rehabilitation of structural measures constructed as part of water resource projects previously funded by the Secretary under such Act or related laws.

H.R. 728 was introduced on February 11, 1999 and referred to the Committee on Agriculture, and in addition to the Committees on Resources, and Transportation and Infrastructure. The Committee on Transportation and Infrastructure reported the measure, amended, on November 18, 1999 (H. Rept. 106-484 part 1) and the Committee on Agriculture reported the measure on April 4, 2000 (H. Rept. 106-484 part 2).

On July 17, 2000, a compromise passed the House of Representatives, amended, under suspension of the rules, by a voice vote, that would have given the Secretary of Agriculture the authority to provide financial assistance to local organizations for up to 65 percent of the total costs for those dams built under the Small Watershed Program. The measure authorized a total of \$90 million over the next 5 years beginning in 2001, to help rehabilitate the Nation's watershed projects. (*Note.*—For further action, see the discussion of Public Law 106-472 under "1. Bill Enacted Into Law," and the discussion under "2. Bills Acted on By the Committee Included in Other Laws Enacted, H.R. 728" and "D. Oversight. 2. Oversight hearings. April 15, 1999: Review of Bexar-Medina-Atascosa Counties Small Watershed Project and H.R. 728, The Small Watershed Rehabilitation Amendments of 1999.")

H.R. 1402, to require the Secretary of Agriculture to implement the class I milk price structure known as Option 1-A as part of the implementation of the final rule to consolidate Federal milk marketing orders.

H.R. 1402 was introduced on April 14, 1999 and referred to the Committee on Agriculture. The Committee on Agriculture reported H.R. 1402, amended, on July 19, 1999 (H. Rept. 106–239) and it was passed by the House of Representatives on September 22, 1999 by a vote of 285 yeas to 140 nays.

H.R. 1402 required the Secretary of Agriculture to implement the class I “Option 1-A” milk price structure when implementing the final rule to consolidate Federal milk marketing orders. Option 1-A reflects the status-quo pricing structure in which milk marketing orders require milk processors to pay a certain minimum price for farm milk based on how the milk is used.

The bill also requires the Secretary of Agriculture to enter into formal rulemaking, on an emergency basis, to develop pricing formulas for class III and IV milk within 10 months, and prohibits the Secretary of Agriculture from collecting assessments from milk producers or handlers to administer the Federal milk market order program if the final rule regarding class III and class IV pricing formulas is delayed.

The bill reduces the processors’ manufacturing allowance for cheese from 17.02 cents per pound of cheese to 14.7 cents per pound as an interim while developing regulations regarding class III and class IV pricing formulas.

The bill extended for 1 year the dairy price support program at its current level while delaying implementation of the Recourse Loan Program for the same period of time.

Finally, the act required the Secretary to establish a forward pricing program so that producers and cooperatives may enter into contracts with handlers on a voluntary basis in order to manage risk and reduce the negative impacts of price volatility.

H.R. 3615, to amend the Rural Electrification Act of 1936 to ensure improved access to the signals of local television stations by multichannel video providers to all households which desire such service in unserved and underserved rural areas by December 31, 2006.

H.R. 3615 was introduced on February 10, 2000 and referred to the Committee on Agriculture, and in addition to the Committees on Commerce, and the Judiciary. On March 1, 2000, the Committee on Agriculture reported H.R. 3615, amended (H. Rept. 106–508 part 1), and the Committee on the Judiciary was discharged from further consideration on March 31, 2000. On April 6, 2000, the Committee on Commerce reported the bill, amended (H. Rept. 106–508 part 2). The bill then passed the House of Representatives, as amended, under a rule, by a vote of 375 yeas to 37 nays on April 13, 2000.

H.R. 3615 amended the Rural Electrification Act of 1936 in order to provide local television networks to rural satellite customers and authorized the Administrator of the Rural Utilities Service (RUS)

to provide loan guarantees to rural communities for building or improving satellite, cable television and multi-channel video distribution infrastructures to ensure improved access of local television signals into unserved or underserved rural areas by December 31, 2006.

H.R. 4541, to reauthorize and amend the Commodity Exchange Act to promote legal certainty, enhance competition, and reduce systemic risk in markets for futures and over-the-counter derivatives, and for other purposes.

H.R. 4541 was introduced on May 25, 2000, and referred to the Committee on Agriculture, and in addition to the Committees on Banking and Financial Services, and Commerce. On June 29, 2000, the Committee on Agriculture reported the bill, amended, (H. Rept. 106–711 part 1), and on September 6, 2000, both the Committee on Banking and Financial Services, and the Committee on Commerce reported the bill, amended, (H. Rept. 106–711 part 2, and part 3). On October 19, 2000, the bill passed the House of Representatives, amended, under suspension of rules by a vote of 377 yeas to 4 nays.

The bill as passed contained provisions from the three reported committee bills (Agriculture, Banking and Financial Services, and Commerce), including a compromise concerning the Commodity Exchange Act (CEAct): legal certainty for over-the-counter derivatives and swap transactions and regulatory relief for Commodity Futures Trading Commission (CFTC) regulated futures and option markets. Transactions in foreign currencies, government securities and other described financial instruments that are excluded under current law by the so-called “Treasury Amendment” may continue to trade exclusive of CFTC jurisdiction. This provision would allow banks and other regulated financial institutions to offer these products to their customers while leaving the CFTC with the authorities to bring enforcement actions against fraudulent bucket shops selling foreign currency futures and options illegally.

The bill gave no jurisdiction to CFTC over transactions in excluded commodities (non-agricultural) if they are traded between defined eligible contract participants and are not conducted on a trading facility that generally is described as a facility where bids and offers may be executed between multiple participants. Transactions in excluded commodities may be conducted on electronic trading facilities if the transactions are on a bilateral basis between eligible contract participants. Securities or depository instruments with futures or option components (hybrid instruments) that meet a predominance test will not be subject to CFTC jurisdiction.

The bill did, however, give the CFTC defined and limited jurisdiction over certain exempt commodities (energy products and metal) that are traded among eligible contract participants and are not traded on a trading facility. With the exception of the com-

modity options, eligible commercial entities were not subject to the Commodity Exchange Act's fraud provisions. Eligible commercial entities may conduct principal-to-principal trades on electronic trading facilities, and the CFTC may enforce its anti-fraud and anti-manipulation status and regulations as described in the bill.

Swap transactions on commodities other than agricultural commodities are excluded specifically from CFTC jurisdiction, as long as they are traded among qualified participants.

The measure allowed designated contract markets within boards of trade to establish and enforce its own rules to ensure fair and equitable markets with limited CFTC oversight so long as the contract market maintained trading standards and adhered to the 18 core principles. Futures and future options on agricultural commodities enumerated in the CEAct must be conducted on a registered contract market.

A board of trade operating contract markets may elect to operate as a registered derivatives transaction execution facility (DTEF) under conditions that set out the commodities that may be traded and persons that may trade on the DTEF. Because only sophisticated parties may trade or private individuals may trade only through a registered futures broker, they may trade in this less-regulated environment where they must adhere to nine core principles. DTEF's may trade excluded and exempt commodities.

The measure required for all clearinghouses, systems or organizations to be regulated by a Federal regulator. Derivatives clearing organizations, clearing transactions excluded from the CEAct may register with the CFTC and meet certain core principles. Federal banking regulators will be the default regulator for any clearing system otherwise not regulated.

Also included was a compromise of the Shad-Johnson reforms dealing with the trading of single stock futures and futures based on narrow-based stock indexes. The tax treatment of single stock transactions in security futures and security option contracts also has required reconciliation to ensure that neither the options or futures market has a competitive trading advantage. Reconciliation of tax treatment between security futures and security option contracts will be left to the Department of the Treasury to resolve by regulation. Major disagreements resolved were margin levels and margin setting, the definition of a narrow-based index that may contain one or two heavily-weighted stocks, commencement of stock futures trading and overall SEC authorities to intervene in stock futures trading.

H.R. 4965, To amend the Perishable Agricultural Commodities Act, 1930, to extend the time period during which persons may file a complaint alleging the preparation of false inspection certificates at Hunts Point Terminal Market, Bronx, New York.

H.R. 4965 was introduced on July 26, 2000 and referred to the Committee on Agriculture. On October 17, 2000, H.R. 4965 passed the House of Representatives under suspension of rules by a voice vote.

The act amends the Perishable Agricultural Commodities Act, 1930 by adding at the end the following: “Notwithstanding the preceding sentence, a person that desires to file a complaint under this section involving the allegation of false inspection certificates prepared by graders of the Department of Agriculture at Hunts Point Terminal Market, Bronx, New York, prior to October 27, 1999, may file the complaint until January 1, 2001.”

H.R. 5224, to amend the Agricultural Trade Development and Assistance Act of 1954 to authorize assistance for the stockpiling and rapid transportation, delivery, and distribution of shelf stable prepackaged foods to needy individuals in foreign countries.

H.R. 5224 was introduced on September 20, 2000, and referred to the Committee on International Relations, and in addition to the Committee on Agriculture. On September 21, 2000, the Committee on International Relations ordered reported, the bill, amended. On September 25, 2000, the measure passed the House of Representatives, amended, under suspension of the rules, by a voice vote, after the Committee on Agriculture discharged itself from further consideration by letter to the Chairman of the Committee on International Relations.

The bill promotes public-private partnerships to leverage the donation of nutritious foods by volunteers to needy families throughout the world in times of famine, disaster, or other critical need. The bill authorizes the Agency for International Development (AID) to make matching grants to American non-profit institutions that are engaged in the processing and delivery of donated food for consumption by the less fortunate throughout the world in times of great need. The bill also authorizes AID to stockpile long shelf life food for rapid delivery to other places in the globe in times of crises, famine, or other need. Additionally, the bill encourages AID to make grants to non-profit organizations that provide matching or in-kind contributions and thereby serve to strengthen the international food relief effort carried out by non-profits and authorizes the AID to pre-position commodities overseas in anticipation of critical needs and to expedite the delivery of emergency food relief.

7. *Bills reported to the House but not considered*

H.R. 1523, to establish mandatory procedures to be followed by the Forest Service and the Bureau of Land Management in advance of the permanent closure of any forest road so as to ensure local public participation in the decisionmaking process.

H.R. 1523, known as the Forest Roads-Community Right-To-Know Act, was introduced on April 22, 1999 and referred to the Committee on Resources and in addition to the Committee on Agriculture.

The Committee on Resources reported H.R. 1523, as amended, on May 3, 2000 (H. Rept. 106-604, part 1). In the report filed by the Committee on Resources is a copy of an exchange of letters between the respective chairmen of the committees (Agriculture and Resources) explaining the reasons expediting this legislation. Therefore, on May 3, 2000, the Committee on Agriculture was discharged from further consideration.

H.R. 1523 provided that permanent road closures, including road decommissioning, would no longer be done by the Forest Service or Bureau of Land Management without adequate public notice and local government and public involvement. It specifically allows short-term closures that the agencies may deem necessary. However, the bill does not affect valid and existing rights.

H.R. 1524, to authorize the continued use on public lands of the expedited processes successfully used for windstorm-damaged national forests and grasslands in Texas.

H.R. 1524 was introduced on April 22, 1999 and referred to the Committee on Resources. On October 31, 2000, the Committee on Resources reported the bill, without amendment, (H. Rept. 106-1021), and the Committee on Agriculture did not seek a sequential referral by an exchange of letters between the respective Committee Chairmen.

H.R. 1524 would require the Secretaries of Agriculture and the Interior to request from the appropriate officials in the executive branch the authority to remove in an expedited manner dead or damaged trees on about 247,000 acres of Federal land. On September 12, 2000, the Committee on Resources reported the bill, amended, (H. Rept. 106-841, part 1), and the Committee on Agriculture was

discharged from further consideration by an exchange of letters between the respective Chairmen of the Committees.

H.R. 3661 would establish new requirements related to aircraft landing strips on Federal lands managed by the Secretaries of Agriculture and the Interior. It would prohibit the secretaries from closing certain aircraft landing strips for more than 180 days a year without the approval of the head of the aviation department of the State in which the landing strip is located. The bill also would require the secretaries to maintain those landing strips in consultation with State aviation departments and other interested parties and would authorize them to enter into cooperative agreements for that purpose. Finally, the bill would direct the secretaries to develop a national policy for managing certain landing strips under their jurisdiction.

S. 1288, to provide incentives for collaborative forest restoration projects on National Forest System and other public lands in New Mexico, and for other purposes.

S. 1288, known as the "Community Forest Restoration Act" passed the Senate on November 19, 1999, and referred to the Committee on Resources on January 27, 2000. On October 6, 2000, the Committee on Resources reported the bill, without amendment, and the bill was then sequentially referred to the Committee on Agriculture. On October 13, 2000, the Committee on Agriculture was discharged from further consideration of the bill.

S. 1288 would direct the Forest Service to establish a cooperative program for forest restoration in New Mexico to provide grants for experimental forest restoration projects. The bill also would authorize appropriations of \$5 million a year for that program and would specify the eligibility requirements for projects to receive funding under the program and would direct the Secretary of Agriculture to convene an advisory committee to recommend projects that meet those criteria.

D. OVERSIGHT

1. Oversight hearings

The Committee on Agriculture and its subcommittees were active in their oversight functions, holding a number of oversight hearings both in the field and in Washington, DC, during the course of the 106th Congress. The hearings related to the application, administration, and effectiveness of laws that lie within the committee’s jurisdiction as well as the organization and operation of the Department of Agriculture and other Federal agencies having responsibility for the administration of such laws. The hearings often resulted in recommendations for improvements in the administration of the laws, regulations and policies in effect in the executive branch as they related to the committee’s jurisdiction. Information gathered at these hearings was later useful in preparing legislation for consideration in the House of Representatives.

As part of its hearings, the committee and its subcommittees reviewed the way the particular Federal agency or department (usually the Department of Agriculture) administered existing laws related to the subject matter of the legislation before, or to be considered by, the committee. In some cases, legislation favorably reported to the House carries a termination date (a “sunset”) to ensure that in the future Congress will again review the effectiveness and the methods with which the executive branch of Government has carried out the letter and the spirit of that statute.

In keeping with the objective of the Oversight Plan as submitted to the Committee on Government Reform, the committee and its subcommittees conducted the following chronological oversight hearings during the 106th Congress:

Oversight hearings, 106th Congress—chronological listing

Appearing before the committee were officials from USDA, including the Secretary of Agriculture, Dan Glickman. Chairman Combest questioned the Secretary about the delays that continued to plague implementation of the disaster program and also questioned the administration’s commitment to certain programs that had received no funding in the President’s budget.

This was a joint hearing which brought together representatives from the Environmental Protection Agency (EPA), industry groups, and the scientific community to review the potential effects and costs of implementing a controversial new pesticide rule regulating the use of plants’ natural defenses against pests. During the hearing, it was requested that EPA consider re-proposing the rule and provide for a new comment period to address issues raised at the hearing including replacing the term “plant-pesticide” and “plant expressed protectant, expanding the proposed exemptions, and performing a thorough cost-benefit analysis of the new rule.

Bipartisan concerns were expressed about how the law would be implemented and whether a consistent, science based framework would be employed. The importance of the process by which the FQPA amendments are implemented was stressed by the subcommittee because of the potential of bringing major changes to the system of food production, disease control and other public health programs. May 5, 1999: Review of Federal milk marketing order reform. Subcommittee on Livestock and Horticulture. Hearing Serial No. 106-20.

The purpose of this hearing was to review the USDA’s final decision on the reform of Federal Milk Marketing Orders. The hearing was designed for the subcommittee to continue to exercise its oversight responsibilities with regard to the ongoing reform of America’s dairy industry as outlined and mandated under the Federal Agriculture Improvement and Reform Act of 1996, also known as the farm bill. The subcommittee heard from 18 witnesses, including several House representatives, U.S. Department of Agriculture officials representing the Agriculture Marketing Service, the Chief Economist, agribusiness and industry groups.

Testimony received during this oversight hearing of USDA’s regulatory effort to reform the system of Federal Milk Marketing Orders led to legislative activity resulting in modifications to the final regulation promulgated by the USDA. (*Note:* For further action, see the discussion under “1. Bills Enacted Into Law, Public Law

106–113” and the discussion under “A. Main Legislative Activities, Dairy.”)

May 18, May 19, May 20, and June 8, 1999: Review of the reauthorization of the Commodity Futures Trading Commission. Subcommittee on Risk Management, Research, and Specialty Crops. Hearing Serial No. 106–18.

The purpose of the hearings was to debate the reauthorization of the Commodity Futures Trade Commission (CFTC). The subcommittee identified some guidelines for a successful reauthorization process: (1) create and maintain a cooperative process through open dialog; (2) focus on maintaining and fostering the competitiveness of U.S. markets; (3) encourage regulatory efficiency; and (4) maintain market integrity. Subcommittee members heard testimony from a total of 28 witnesses during the series of hearings. Witnesses represented the CFTC, trade boards, market exchanges, commodity groups, banks, and exchange and securities organizations.

Testimony received during these oversight hearings led to the introduction of H.R. 4541, the Commodity Futures Modernization Act of 2000. (*Note.*—For further action, see the discussion under “5. Bills Acted on By The House But Not the Senate. H.R. 4541” and the discussion under “A. Main Legislative Activities, Commodity Futures Modernization.”)

May 18, 1999: Review of Forest Service payments to counties. Subcommittee on Department Operations, Oversight, Nutrition, and Forestry. Hearing Serial No. 106–19.

The purpose of the hearing was to review a proposal put forth by a grass roots movement called the National Forest Counties and Schools Coalition to resolve the continuing problems facing rural communities under the “25 percent county payment” system. The system worked on the premise that in counties where the Forest Service was the dominant landowner, the Government would share 25 percent of the revenue derived from the forest with the impacted communities to finance schools and local road infrastructure. After timber sales plummeted 75 percent from historic averages, the Government defaulted on its obligations under the contract, and the affected communities suffered. The subcommittee heard testimony from seven first time congressional witnesses representing the National Forest Counties and Schools Coalition. The coalition, which represents nearly 400 organizations in over 30 States, presented its set of principles for addressing the 25 percent payment problem.

This hearing led to the introduction of H.R. 2389, the County Schools Funding Revitalization Act. (*Note.*—For further action, see the discussion under “1. Bills Enacted Into Law, Public Law 106–393.”)

May 26, 1999: Review of the effects of electric deregulation on rural areas and an examination of legislative proposals. Subcommittee on General Farm Commodities, Resource Conservation, and Credit. Hearing Serial No. 106–21.

The purpose of the hearing was to review the possible side effects of a federally-mandated deregulation of the Nation’s electric power generation, transmission, and distribution system on rural areas. Rural areas face significant difficulties in competing for electricity and other utilities due to low populations, absence of economies of

scale, and a smaller percentage of individual customers which all lead to greater costs associated with providing service to these areas. The subcommittee discussed the proposed introduced by the administration and expressed concern as to whether deregulation was actually being achieved by this legislation (H.R. 1828). Seven witnesses appeared before the subcommittee including representatives from the USDA and the Department of Energy, university economists, and industry experts.

June 9, 1999: Review of economic sanctions and the effect on U.S. agriculture. Full Committee on Agriculture. Hearing Serial No. 106–26.

The purpose of this hearing was to review the effect of sanctions on United States agriculture, focusing on how it affects the prosperity of farmers and ranchers. Members urged the Clinton administration to move quickly on its policy of removing agricultural products from unilateral sanctions and to expand this policy to allow credit guarantees and other export assistance. The committee heard from nine witnesses. The administration was represented by the Secretary of Agriculture and the Under Secretary of State for Economics, Business, and Agricultural Affairs. One Member of Congress and several agribusiness and industry organization representatives appeared.

Several bills were introduced in the 106th Congress addressing unilateral sanctions on food and medicine. However, the fiscal year 2001 Agriculture appropriations included a provision eliminating unilateral food (including agriculture products such as cotton) and medicine sanctions on Libya, Iran, North Korea, Sudan, and Cuba. (*Note.*—For further action, see the discussion under “1. Bills Enacted Into Law, Public Law 106–387.”)

June 16, 1999: Review of structure and policies of the Loan Deficiency Payment Program. Full committee. Hearing Serial No. 106–24.

The purpose of this hearing was to examine the proposed change to a national, uniform LDP rate. The committee expressed concern over the ability of the proposed uniform LDP rate to create a more equitable market for farmers.

June 21, 1999: To review the implementation of the Northwest Forest Plan. Subcommittee on Department Operations, Oversight, Nutrition, and Forestry. Hearing Serial 106–23.

The subcommittee held a hearing in Medford, Oregon, to review the implementation of the Northwest Forest Plan. The plan called for 80 percent of the forests in the Pacific Northwest to be placed in reserves and 20 percent to be available for harvest in order to achieve sustainable forestry. The committee expressed concern over whether the implementation of the Plan was actually helping to achieve this goal. Eleven witnesses testified before the committee, including representatives from the United States Department of Agriculture, Department of Interior, Department of Commerce, and several State and local forest organizations. The committee urged the Federal agencies to work with each other and the affected parties to ensure that the Plan is carried out to meet its objectives.

June 23, 1999: Review of the Administration's Preparations for the 1999 World Trade Organization (WTO) Ministerial. Full committee. Hearing Serial No. 106-27.

The purpose of the hearing was to review the administration's preparation for the 1999 World Trade Organization (WTO) Ministerial. After hearing testimony from the Secretary of Agriculture, Committee members criticized the administration for categorizing supplemental Agricultural Marketing Transition (AMTA) Payments as trade distorting payments, and the committee requested the Secretary to change the classification of the payments for WTO purposes. A new round of multilateral trade negotiations will begin at the WTO ministerial meeting in November, 1999. These negotiations will provide a unique opportunity for United States agriculture to further reduce tariffs, open new markets, and address unfair trade practices around the world. The committee also heard testimony from 12 other witnesses including the United States Trade Representative and representatives from numerous commodity organizations.

After the WTO meeting in Seattle, WA, several bills were introduced and ultimately enacted that greatly affect producers. For example, H.R. 4444, the Permanent Normal Trade Relations for China, was signed by the President into Public Law 106-286. This measure will lower trade barriers to provide U.S. farmers better access to a market of 1.2 billion people. The Trade and Development Act of 2000, was signed by the President into Public Law 106-200. This measure included a provision for periodic revision of WTO approved retaliation lists, better known as the carousel law. Another provision of the Trade and Development Act is the Caribbean Basin Initiative, which removes duties and quotas on certain Caribbean apparel exports made from U.S. textile components. (*Note.*—For further action, see the discussion under "1. Bills Enacted Into Law, Public Law 106-200; Public Law 106-286 and Public Law 106-387" and the discussion under "A. Main Legislative Activities, Trade.")

September 14 and 15, 1999: Review of the farm financial crises. Full committee. Hearing Serial No. 106–34.

In the first of a series of two hearings held to review the farm financial crises, representatives from 10 various farmer, commodity, and lending organizations gathered to present testimony before the full committee. In addition, 10 Members of Congress submitted statements for the record. These testimonies served to witness the dire state of the U.S. agricultural economy and offered suggestions on how Congress could help alleviate the situation.

The committee concluded its review of the farm financial crises with the Secretary of Agriculture, the Honorable Dan Glickman, who testified to some of the possible causes of the financial crises, as well as to the administration's focus on what direction should be taken by Congress to help farmers weather these difficult times. Written testimony was also submitted by five Members of Congress and by the National Association of Conservation Districts.

The Congress provided a total of \$25.6 billion in supplemental agricultural assistance for 1998 through 2000. In 1998, Congress approved \$6.1 billion; in 1999, Congress approved \$9.1 billion; and assistance for 2000 totals \$10.6 billion. (*Note.*—For further action, see the discussion under “1 Bills Enacted Into Law, Public Law 106–31, Public Law 106–78, Public Law 106–113, Public Law 106–224 and Public Law 106–387, and the discussion under “A. They were joined by several Kansas farmers and representatives of Kansas farmer organizations. These witnesses impressed upon the committee the difficulties faced by farmers in the State and in the rest of the Nation. (*Note.*—For further action, see the discussion under “1 Bills Enacted Into Law, Public Law 106–31, Public Law 106–78, Public Law 106–113, Public Law 106–224 and Public Law 106–387,” and the discussion under “A. official request to the U.S. Government for additional food aid in fiscal year 2000.

October 14, 1999: Review of USDA's Civil Rights Programs and Responsibilities. Subcommittee on Department Operations, Oversight, Nutrition, and Forestry. Hearing Serial No. 106-37.

This hearing was held for the purpose of reviewing USDA's civil rights programs and responsibilities. The committee heard testimony from six witnesses. Ms. Rosalind D. Gray, Director, Office of Civil Rights, U.S. Department of Agriculture, testified that the Department had made incredible strides in implementing new civil rights reforms and implored the committee to enact certain legislation that would enable the Department to continue in this endeavor. However, many representatives of black farmer organizations and otherwise socially disadvantaged groups testified that the USDA had committed horrible crimes against their constituencies in the past, and that these inequities were continuing today. Among these witnesses were Mr. Stephon [sic] J. Bowens, executive director, Land Loss Prevention Project, and Mr. John W. Boyd, Jr., president, National Black Farmers Association.

House Concurrent Resolution 296, a resolution expressing the sense of the Congress regarding the necessity to expedite the settlement process for discrimination claims against the Department of Agriculture brought on by African-American farmers, was introduced on March 30, 2000, and considered by the House under suspension of the rules on May 8, 2000. (*Note.*—For further action on H. Con. Res. 296, see the discussion under "8. Bills Defeated in the House, H. Con. Res. 296.")

Chairman Combest pledged close consultation between the committee and the U.S. Trade Representative and the Department of Agriculture during the course of WTO negotiations. This hearing provided Members of the committee the opportunity to question USTR Ambassador Charlene Barshefsky and USDA Secretary Dan Glickman about the Government's planning for the upcoming Seattle negotiations. Chairman Combest stressed the importance that throughout this process, it is essential that these worldwide trade negotiations proceed under the close scrutiny of the farm sector represented by the Committee on Agriculture because world trade can provide greater opportunities for the success of our farmers and ranchers when the terms are fair to all concerned. (*Note.*—For further action, see the discussion under "1 Bill Enacted Into Law, Public Law 106-200; Public Law 106-286 and Public Law 106-387" and the discussion under "A. Main Legislative Activities, Trade.")

The purpose of this hearing was intended to be a broad review of several new rules and guidelines that the Environmental Protection Agency (EPA) has promulgated that would have a terribly negative impact on farmers, ranchers, and timber workers. Chairman Goodlatte criticized EPA for its disregard of existing laws passed by Congress to protect the environment and the use of unscientific

methods in promulgating new regulations. Among the witnesses that addressed the concerns of the subcommittee were Mr. J. Charles Fox, EPA, Ms. Glenda Humiston, USDA, Mr. John Barrett, EPA's TMDL Federal Advisory Committee, Mr. Robert J. Olszewski, The Timber Company, Mr. Ron Jones, Texas Institute for Applied Environmental Research, and Mr. Arthur Nash, Michigan Department of Environmental Quality.

Main Legislative Activities, Commodity Futures Modernization.")

February 22, 2000: Review of the status of Pierce's Disease on the winegrape industry. Subcommittee on Livestock and Horticulture. Hearing Serial No. 106-44.

This was a field hearing held in Rutherford, CA, to review the effects concerning the recent and severe outbreak of Pierce's Disease on winegrapes. Nearly 90 percent of America's wine is produced in California and it generates about 112,000 jobs annually with an additional 40 to 50 thousand during harvest time. Pierce's Disease represents a serious and substantial threat to this thriving agricultural sector; however, it also places citrus, stone fruits and almonds at risk. The subcommittee received testimony from 11 witnesses representing the U.S. Department of Agriculture, the California Department of Food and Agriculture, California Farm Bureau, universities, growers and producers.

March 6, 17, 18, 27, 29; April 1, 3, 12; May 1, 2, 12, 13, July 12, 19 and 26 2000. Review of Federal Farm Policy. Full committee. Hearing Serial No. 106-50 part I and II.

For 3 months, as producers prepared for another challenging year of poor commodity prices and uneven yields, Members of the House Committee on Agriculture traveled to 10 cities throughout rural America, convening field hearings on farm policy that were heard over the committee's Internet site as they occurred. Allowing

for the broadest discussion possible, the committee encouraged testimony beyond the effect of the current farm bill, to seek producer specifics on what is working—and what can work better—in all areas of Federal farm policy. Producers were strongly supportive of the flexibility of the “Freedom to Farm” concept, and in agreement with Committee Members critique of the Federal Government’s failure to pursue other promised elements of the market-oriented legislation: tax relief, reducing regulatory burdens, and the opening of more world markets for American agricultural products.

Under the leadership and initiative of Chairman Combest, and the support of Ranking Minority Member Stenholm, these farm policy field hearings enjoyed high attendance—totaling more than 2,500 present in the audiences, 181 witnesses, and a high degree of participation by Members of the committee. While producers were unable to agree on specifics for new policy initiatives, the personal involvement of Committee on Agriculture Members traveling thousands of miles to listen to local farmers and ranchers in their communities contributed to expressions of producer confidence in Members’ willingness to continue to work for consensus.

The committee concluded this comprehensive review with a series of hearings in Washington, DC, and heard from leaders of national farm organizations, national commodity organizations and producer groups that face many issues distinct to their industries.

Furthermore, the subcommittee examined the prospects of enabling rural America to benefit from local news coverage, weather reports, information related to natural disasters or community emergencies, local sports, politics, and other information that is vital to the integrity of communities across the country. Testimony was taken from Members of Congress, the administration, and various television station and trade association representatives.

On February 10, 2000, H.R. 3615 was introduced and referred to the Committee on Agriculture, and in addition to the Committees on Commerce, and the Judiciary. Two of the three Committee reported the bill and the measure passed the House of Representatives on April 13, 2000. (*Note.*—For further action, see the discussion under “5. Prior to this hearing the Subcommittee on Livestock and Horticulture held a business meeting and reported, H.R. 1275, as amended, on April 13, 2000.
