

107TH CONGRESS  
1ST SESSION

# H. R. 1693

To improve science, mathematics, and technology education in elementary and secondary schools, advance knowledge on the effective uses of information technologies in education, increase participation in science, mathematics, and engineering careers by groups underrepresented in those fields, provide for more effective coordination of public and private sector efforts to improve science, mathematics, and technology education, and for other purposes.

---

## IN THE HOUSE OF REPRESENTATIVES

MAY 3, 2001

Mr. HALL of Texas (for himself, Ms. EDDIE BERNICE JOHNSON of Texas, Ms. WOOLSEY, Mr. BARCIA, Mr. ETHERIDGE, Mr. UDALL of Colorado, Mr. LARSON of Connecticut, Mr. GORDON, Mr. COSTELLO, Ms. RIVERS, Ms. JACKSON-LEE of Texas, Mr. BACA, Mr. LAMPSON, Mr. MATHESON, Mr. HOEFFEL, and Mr. ISRAEL) introduced the following bill; which was referred to the Committee on Science, and in addition to the Committee on Education and the Workforce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

---

## A BILL

To improve science, mathematics, and technology education in elementary and secondary schools, advance knowledge on the effective uses of information technologies in education, increase participation in science, mathematics, and engineering careers by groups underrepresented in those fields, provide for more effective coordination of public and private sector efforts to improve science,

mathematics, and technology education, and for other purposes.

1        *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4        This Act may be cited as the “Science Education for  
5 the 21st Century Act”.

6 **SEC. 2. FINDINGS AND OBJECTIVES.**

7        (a) FINDINGS.—Congress finds the following:

8            (1) The quality of education in science, mathe-  
9 matics, and engineering is the foundation of the Na-  
10 tion’s future security and prosperity.

11           (2) The achievement of scientific and mathe-  
12 matical literacy by all people in the United States is  
13 an essential goal of all efforts to strengthen the Na-  
14 tion’s competitiveness in the global marketplace.

15           (3) Elementary and secondary students in the  
16 United States have demonstrated relatively poor per-  
17 formance in science and mathematics in inter-  
18 national comparison studies.

19           (4) Women and minorities, who constitute a  
20 growing percentage of the Nation’s workforce, are  
21 significantly underrepresented in many fields of  
22 science, mathematics, and engineering.

23           (5) The presence of highly qualified teachers in  
24 the classroom is a key factor in attaining satisfac-

1 tory student achievement in science and mathe-  
2 matics, but the National Center for Education Sta-  
3 tistics reports that 34 percent of public school math-  
4 ematics teachers and nearly 40 percent of science  
5 teachers lack even an academic minor in their pri-  
6 mary teaching fields.

7 (6) The Department of Education has esti-  
8 mated that more than 240,000 new science and  
9 mathematics elementary and secondary school teach-  
10 ers will be needed during the next decade.

11 (7) Improved undergraduate education for new  
12 teachers could be achieved through closer collabora-  
13 tion among education faculty and science, mathe-  
14 matics, and engineering faculty of institutions of  
15 higher education to design and implement better  
16 curricular materials and more effective courses of in-  
17 struction.

18 (8) Rigorous professional development activities  
19 for in-service teachers are needed to improve both  
20 content knowledge and pedagogical skills for science,  
21 mathematics, and technology teachers.

22 (9) Research and large-scale demonstration  
23 projects are needed to identify and quantify best  
24 practices and the most effective applications of edu-  
25 cational technologies in the classroom.

1           (10) Greater effort is needed to cultivate the in-  
2           terest of women and minorities in studying science  
3           and mathematics and in encouraging and adequately  
4           preparing individuals from underrepresented groups  
5           to pursue careers in science, mathematics, and engi-  
6           neering.

7           (11) Federal science and mathematics edu-  
8           cation programs should be closely coordinated to  
9           have the maximum effectiveness in assisting State  
10          and local school systems to improve student per-  
11          formance in science and mathematics.

12          (b) NATIONAL OBJECTIVES.—Congress declares that  
13          the following shall be national objectives:

14               (1) To improve the quality of science and math-  
15               ematics education available to all people in the  
16               United States.

17               (2) To encourage students in the United States  
18               to pursue postsecondary studies in science, mathe-  
19               matics, and engineering.

20               (3) To substantially increase the numbers of  
21               women and minorities pursuing careers in mathe-  
22               matics, science, and engineering.

23 **SEC. 3. DEFINITIONS.**

24          In this Act:

1           (1) The term “science teacher” means a  
2 science, mathematics, or technology teacher at the  
3 elementary or secondary school level.

4           (2) The term “Director” means the Director of  
5 the National Science Foundation.

6           (3) The term “institution of higher education”  
7 has the meaning given that term in section 101 of  
8 the Higher Education Act of 1965 (20 U.S.C.  
9 1001).

10          (4) The term “local educational agency” has  
11 the meaning given that term in section 14101 of the  
12 Elementary and Secondary Education Act of 1965  
13 (20 U.S.C. 8801), except that in the case of Hawaii,  
14 the District of Columbia, and the Commonwealth of  
15 Puerto Rico, the term “local educational agency”  
16 shall be deemed to mean the State educational agen-  
17 cy.

18          (5) The term “State educational agency” has  
19 the meaning given that term in section 14101 of the  
20 Elementary and Secondary Education Act of 1965  
21 (20 U.S.C. 8801).

1 **TITLE I—PRESERVICE TRAINING**  
2 **AND PROFESSIONAL DEVELOPMENT**  
3 **FOR SCIENCE**  
4 **TEACHERS**

5 **SEC. 101. SCIENCE TEACHER SCHOLARSHIPS FOR SCI-**  
6 **ENTISTS AND ENGINEERS.**

7 (a) PROGRAM AUTHORIZED.—The Director is au-  
8 thorized to make awards to institutions of higher edu-  
9 cation to provide scholarships to assist graduates of bacca-  
10 laureate degree programs in science, mathematics, or engi-  
11 neering, or individuals pursuing degrees in those fields,  
12 to fulfill the academic requirements necessary to become  
13 certified as science teachers. Such awards shall be made  
14 through competitive, merit-based procedures.

15 (b) SCHOLARSHIP AMOUNT AND DURATION.—Each  
16 scholarship provided pursuant to subsection (a) shall be  
17 in the amount of \$7,500 and shall cover a period of 1  
18 year.

19 (c) REQUIREMENTS.—

20 (1) ELIGIBILITY.—Institutions of higher edu-  
21 cation offering baccalaureate degrees in science,  
22 mathematics, and engineering and coursework to-  
23 ward teacher certification are eligible to apply for  
24 awards under the program established by subsection

1 (a). Such institutions may provide scholarships using  
2 such awards to individuals who are—

3 (A) undergraduate students majoring in  
4 science, mathematics, or engineering, who are  
5 within 1 academic year of completion of degree  
6 requirements; or

7 (B) graduates of baccalaureate or ad-  
8 vanced degree programs in science, mathe-  
9 matics, or engineering.

10 (2) GUIDELINES, PROCEDURES, AND CRI-  
11 TERIA.—The Director shall establish and publish ap-  
12 plication and selection guidelines, procedures, and  
13 criteria for the program established by subsection  
14 (a).

15 (3) REQUIREMENTS FOR SCHOLARSHIP APPLI-  
16 CATIONS.—Each application for a scholarship under  
17 this section shall include a plan specifying the course  
18 of study that will allow the applicant to fulfill the  
19 academic requirements for obtaining a teaching cer-  
20 tificate during the scholarship period.

21 (4) WORK REQUIREMENT.—As a condition of  
22 acceptance of a scholarship under this section, a re-  
23 cipient shall agree to work as a science teacher for  
24 a minimum of 2 years following certification as such

1 a teacher or to repay the amount of the scholarship  
2 to the National Science Foundation.

3 (d) AUTHORIZATION OF APPROPRIATIONS.—There  
4 are authorized to be appropriated to the National Science  
5 Foundation to carry out this section \$20,000,000 for each  
6 of fiscal years 2002 through 2004.

7 **SEC. 102. COLLABORATIONS FOR IMPROVING SCIENCE**  
8 **TEACHER EDUCATION.**

9 (a) PROGRAM AUTHORIZED.—The Director is au-  
10 thorized to establish a program to improve the under-  
11 graduate education and in-service professional develop-  
12 ment of science teachers. Under the program, competitive  
13 awards shall be made on the basis of merit to institutions  
14 of higher education that offer baccalaureate degrees in  
15 education, science, and mathematics.

16 (b) PROGRAM REQUIREMENTS.—

17 (1) USES OF FUNDS.—Awards made under sub-  
18 section (a) shall be used for developing—

19 (A) courses and curricular materials for—

20 (i) the preparation of undergraduate  
21 students pursuing education degrees who  
22 intend to serve as science teachers; or

23 (ii) the in-service professional develop-  
24 ment of science teachers; and

1 (B) educational materials and instructional  
2 techniques incorporating innovative uses of in-  
3 formation technology.

4 (2) GUIDELINES, PROCEDURES, AND CRI-  
5 TERIA.—The Director shall establish and publish ap-  
6 plication and selection guidelines, procedures, and  
7 criteria for the program established by subsection  
8 (a).

9 (3) PROPOSAL REQUIREMENTS.—Each proposal  
10 for an award under the program shall—

11 (A) involve a collaboration among edu-  
12 cation, mathematics, and science faculty and  
13 shall include a plan for maintaining the collabo-  
14 ration beyond the period of the award; and

15 (B) include a description of the in-service  
16 professional development activities for science  
17 teachers that will be offered by the awardee.

18 (4) SPECIAL PROPOSAL EVALUATION CRI-  
19 TERIA.—In making awards under this section, the  
20 Director shall consider—

21 (A) the degree to which courses and mate-  
22 rials proposed to be developed in accordance  
23 with paragraph (1) combine content knowledge  
24 and pedagogical techniques that are consistent  
25 with hands-on, inquiry-based teaching, are

1 aligned with established national science or  
2 mathematics standards, and are based on vali-  
3 dated education research findings; and

4 (B) evidence of a strong commitment by  
5 the administrative heads of the schools and de-  
6 partments of the institutions of higher edu-  
7 cation whose faculty are involved in preparing a  
8 proposal to the program to provide appropriate  
9 rewards and incentives to encourage continued  
10 faculty participation in the collaborative activ-  
11 ity.

12 (c) INTERNET-BASED TEACHER PROFESSIONAL DE-  
13 VELOPMENT.—Awards made under subsection (a) may in-  
14 clude support for the development of courses, curricular  
15 materials, and other resources for in-service professional  
16 development of science teachers that are—

17 (1) made available to science teachers through  
18 the Internet; and

19 (2) developed in collaboration with schools or  
20 school systems with demonstrated experience in com-  
21 puter-based and networked teacher professional de-  
22 velopment activities.

23 (d) COORDINATION.—The Director shall ensure that  
24 coordination and exchange of information occur on a con-  
25 tinuing basis between awardees under this section and the

1 National Science Foundation's Centers for Learning and  
2 Teaching.

3 (e) AUTHORIZATION OF APPROPRIATIONS.—There  
4 are authorized to be appropriated to the National Science  
5 Foundation to carry out this section \$25,000,000 for each  
6 of fiscal years 2002 through 2004.

7 **SEC. 103. MASTER SCIENCE TEACHERS.**

8 (a) PROGRAM AUTHORIZED.—The Director is au-  
9 thorized to make competitive, merit-based awards to State  
10 or local educational agencies for the purposes of imple-  
11 menting a plan for the development and use of master  
12 science teachers for kindergarten through grade 8, as de-  
13 scribed in subsection (b).

14 (b) PLAN.—In order to be eligible to receive a grant  
15 under this section, a State or local educational agency  
16 shall submit to the Director a plan providing for the devel-  
17 opment and use of such master teachers. The plan shall  
18 include—

19 (1) a description of the relationship master  
20 teachers will have to other administrative and mana-  
21 gerial staff and the State and local educational  
22 agency, the ratio of master teachers to other teach-  
23 ers, and the requirements for a master teacher of  
24 the State or local educational agency, including a de-  
25 scription of certification requirements;

1           (2) a plan for ongoing professional develop-  
2           ment; and

3           (3) a description of job responsibilities of the  
4           master teachers, including a discussion of the re-  
5           sponsibilities master teachers will have for—

6                   (A) development or implementation of  
7                   science, mathematics, engineering, or tech-  
8                   nology curriculums;

9                   (B) in-classroom assistance;

10                   (C) authority over hands-on inquiry mate-  
11                   rials, equipment, and supplies;

12                   (D) mentoring other teachers or fulfilling  
13                   any leadership role; and

14                   (E) professional development, including  
15                   training of other master teachers or other  
16                   teachers, or developing or implementing profes-  
17                   sional development programs.

18           (c) USE OF FUNDS.—Funds provided by the program  
19           established under subsection (a) shall be available—

20                   (1) to support professional development activi-  
21                   ties for master teachers, including reimbursement  
22                   for travel and expenses and stipends for summer  
23                   programs;

24                   (2) to support participation of master teachers  
25                   during the summer in research programs conducted

1 at private entities or government facilities, including  
2 salaries for the period of participation in the re-  
3 search and reimbursement of expenses;

4 (3) to provide educational materials and equip-  
5 ment; and

6 (4) to provide computer equipment and network  
7 connectivity necessary to enable master teachers to  
8 collaborate with other master teachers, to access  
9 educational materials available online and to commu-  
10 nicate with scientists or other mentors at remote lo-  
11 cations.

12 (d) PRIORITY.—The Director shall give special pri-  
13 ority in making awards under this section to eligible enti-  
14 ties having a low proportion of certified science teachers  
15 among teachers assigned to science, mathematics, or tech-  
16 nology classroom instruction.

17 (e) ASSESSMENT OF EFFECTIVENESS.—The Director  
18 shall put in place mechanisms to assess the effectiveness  
19 of activities carried out under this section, including the  
20 means to obtain quantitative evidence of trends in student  
21 performance in mathematics and science at the schools  
22 having master teachers.

23 (f) AUTHORIZATION OF APPROPRIATIONS.—There  
24 are authorized to be appropriated to the National Science

1 Foundation to carry out this section \$25,000,000 for each  
2 of fiscal years 2002 through 2004.

3 **SEC. 104. ASSESSMENT OF IN-SERVICE TEACHER PROFES-**  
4 **SIONAL DEVELOPMENT PROGRAMS.**

5 (a) ASSESSMENT.—The Director shall review all pro-  
6 grams sponsored by the National Science Foundation that  
7 support in-service teacher professional development for  
8 science teachers to determine—

9 (1) the level of resources and degree of empha-  
10 sis placed on training teachers in the effective use of  
11 information technology in the classroom; and

12 (2) the allocation of resources between summer  
13 activities and follow-on reinforcement training and  
14 support to participating teachers during the school  
15 year.

16 (b) SPECIAL REQUIREMENTS.—On the basis of the  
17 assessment under subsection (a), the Director shall take  
18 such action as necessary to—

19 (1) ensure that the type of activities described  
20 under subsection (a)(1) constitute a major compo-  
21 nent of the future in-service teacher professional de-  
22 velopment efforts of the National Science Founda-  
23 tion; and

24 (2) provide adequate resources for school- and  
25 district-level professional development activities that

1 will provide continuing opportunities during the  
2 school year for science teachers to improve their sub-  
3 ject knowledge and pedagogical skills.

4 (c) REPORT.—The Director shall submit to Congress,  
5 not later than 1 year after the date of the enactment of  
6 this Act, a report that—

7 (1) describes the results of the review and as-  
8 sessment conducted under subsection (a);

9 (2) summarizes the major categories of in-serv-  
10 ice teacher professional development activities sup-  
11 ported at the time of the review, and the funding  
12 levels for such activities; and

13 (3) describes any proposed changes, including  
14 new funding allocations, to strengthen the in-service  
15 teacher professional development programs of the  
16 National Science Foundation and to address the re-  
17 quirements of subsection (b).

18 **TITLE II—EDUCATIONAL**  
19 **TECHNOLOGY**

20 **SEC. 201. RESEARCH ON EFFECTIVE EDUCATIONAL TECH-**  
21 **NOLOGIES.**

22 (a) PROGRAM AUTHORIZED.—

23 (1) IN GENERAL.—The Director and the Sec-  
24 retary of Education are authorized to establish a re-  
25 search program to determine the most effective edu-

1       cational uses of information technologies in elemen-  
2       tary and secondary school classrooms. The program  
3       shall be carried out through competitive, merit-based  
4       awards to consortia of institutions of higher edu-  
5       cation and elementary and secondary schools or  
6       school systems.

7               (2) GUIDELINES, PROCEDURES, AND CRI-  
8       TERIA.—The Director and the Secretary shall estab-  
9       lish and publish application and selection guidelines,  
10      procedures, and criteria for the program established  
11      by paragraph (1).

12      (b) IDENTIFICATION OF TECHNOLOGY-BASED AP-  
13      PROACHES.—The program established under subsection  
14      (a) shall identify educational approaches and techniques  
15      that are based on the use of information technology and  
16      that have the potential for being effective in classroom in-  
17      struction in elementary or secondary schools. Criteria for  
18      determining the potential educational effectiveness of the  
19      approaches and techniques identified shall include—

20              (1) the consistency of the approaches and tech-  
21      niques with the current state of knowledge on  
22      human cognition and learning;

23              (2) evidence of the approaches and techniques  
24      having been developed through collaborations involv-

1 ing content specialists, experts in information tech-  
2 nology, and educational practitioners; and

3 (3) evidence of the capability of the approaches  
4 and techniques to be adapted to different edu-  
5 cational settings.

6 (c) EXPERIMENTS.—

7 (1) EXPERIMENTS REQUIRED.—The program  
8 established under subsection (a) shall include the de-  
9 sign and conduct of experiments in elementary and  
10 secondary school classrooms to evaluate the effec-  
11 tiveness of the approaches and techniques identified  
12 under subsection (b). The experiments shall be de-  
13 signed to determine—

14 (A) the educational effectiveness of the ap-  
15 proaches and techniques studied in terms of  
16 student performance as described under sub-  
17 section (d);

18 (B) the key variables that influence edu-  
19 cational effectiveness; and

20 (C) the conditions necessary to implement  
21 successfully an approach or technique deter-  
22 mined to be educationally effective for a par-  
23 ticular educational setting.

24 (2) REQUIREMENTS FOR EXPERIMENTS.—The  
25 experiments under paragraph (1) shall involve a sub-

1       stantial number of students and be conducted in a  
2       wide range of educational settings to ensure vari-  
3       ation in—

4               (A) grade level;

5               (B) geographic location of the participating  
6       schools;

7               (C) socioeconomic characteristics of the  
8       communities in which participating schools are  
9       located;

10              (D) level of student ability; and

11              (E) qualifications and experience of par-  
12       ticipating teachers.

13              (3) MOST EFFECTIVE APPROACHES AND TECH-  
14       NIQUES.—Educational approaches and techniques  
15       found to be most effective and to have the most  
16       promise for being replicated successfully shall be  
17       highlighted in the documentation required in accord-  
18       ance with subsection (e).

19              (d) EDUCATIONAL ASSESSMENTS.—The program es-  
20       tablished under subsection (a) shall include development  
21       of metrics and assessment procedures, including proce-  
22       dures based on the application of information technology,  
23       for determining the academic performance of students in-  
24       volved in the experiments under subsection (c). The as-  
25       sessment procedures shall be incorporated in the design

1 of the experiments and shall be used to determine student  
2 performance over a multiyear period.

3 (e) DOCUMENTATION AND DISSEMINATION OF RE-  
4 SULTS.—

5 (1) IN GENERAL.—The results of the experi-  
6 ments conducted in accordance with subsection (c)  
7 shall be documented and widely disseminated, in-  
8 cluding through publication in peer-reviewed schol-  
9 arly journals.

10 (2) WORKSHOPS, CONFERENCES, AND WEB  
11 SITES.—The Director and the Secretary are author-  
12 ized to sponsor and support workshops, conferences,  
13 and dedicated web sites to disseminate information  
14 about the program established under subsection (a)  
15 and about results obtained by the program.

16 (3) DEPOSIT IN LIBRARY.—Information about  
17 effective approaches and techniques, including infor-  
18 mation and materials necessary for their implemen-  
19 tation, as determined by the experiments under sub-  
20 section (c), shall be deposited in the National  
21 Science, Mathematics, Engineering, and Technology  
22 Education Digital Library.

23 (f) SPECIAL CONSIDERATION REQUIRED FOR CER-  
24 TAIN PROPOSALS.—In making awards under the program  
25 established by subsection (a), the Director and the Sec-

1 retary shall give special consideration to proposals that are  
2 judged to be likely to attract and adequately support grad-  
3 uate students to pursue research on the use of information  
4 technology in education and research at the intersection  
5 of educational practice and basic research on human cog-  
6 nition and learning.

7 (g) AUTHORIZATION OF APPROPRIATIONS.—There  
8 are authorized to be appropriated to carry out this section  
9 \$50,000,000 for fiscal year 2002, \$75,000,000 for fiscal  
10 year 2003, and \$150,000,000 for fiscal year 2004.

11 **SEC. 202. EDUCATIONAL TECHNOLOGY UTILIZATION EX-**  
12 **TENSION ASSISTANCE.**

13 (a) PURPOSE.—The purpose of this section is to im-  
14 prove the utilization of educational technologies in elemen-  
15 tary and secondary education by creating an educational  
16 technology extension service based at intermediate school  
17 districts, regional education service agencies, or under-  
18 graduate institutions of higher education.

19 (b) FINDINGS.—Congress finds the following:

20 (1) Extension services such as the Manufac-  
21 turing Extension Partnership and the Agricultural  
22 Extension Service have proven to be effective public-  
23 private partnerships to integrate new technologies  
24 and to improve utilization of existing technologies by

1 small to medium sized manufacturers and the  
2 United States agricultural community.

3 (2) Undergraduate institutions of higher edu-  
4 cation working with nonprofit organizations and  
5 State and Federal agencies can tailor educational  
6 technology extension programs to meet specific local  
7 and regional requirements.

8 (3) Undergraduate institutions of higher edu-  
9 cation, often with the assistance of the National  
10 Science Foundation, have during the past 20 years  
11 been integrating educational technologies into their  
12 curriculums, and as such can draw upon their own  
13 experiences to advise elementary and secondary  
14 school educators on ways to integrate a variety of  
15 educational technologies into the educational proc-  
16 ess.

17 (4) Many elementary and secondary school sys-  
18 tems, particularly in rural and traditionally under-  
19 served areas, lack general information on the most  
20 effective methods to integrate their existing tech-  
21 nology infrastructure, as well as new educational  
22 technology, into the educational process and cur-  
23 riculum.

24 (5) Most Federal and State educational tech-  
25 nology programs have focused on acquiring edu-

1        cational technologies with less emphasis on the utili-  
2        zation of those technologies in the classroom and the  
3        training and infrastructural requirements needed to  
4        efficiently support those types of technologies. As a  
5        result, in many instances, the full potential of edu-  
6        cational technology has not been realized.

7            (6) Our global economy is increasingly reliant  
8        on a workforce not only comfortable with technology,  
9        but also able to integrate rapid technological  
10       changes into the production process. As such, in  
11       order to remain competitive in a global economy, it  
12       is imperative that we maintain a work-ready labor  
13       force.

14           (7) According to “Teacher Quality: A Report on  
15       the Preparation and Qualifications of Public School  
16       Teachers”, prepared by the Department of Edu-  
17       cation, only 1 in 5 teachers felt well prepared to  
18       work in a modern classroom.

19           (8) The most common form of professional de-  
20       velopment for teachers continues to be workshops  
21       that typically last no more than 1 day and have little  
22       relevance to teachers’ work in the classroom.

23           (9) A 1998 national survey completed by the  
24       Department of Education found that only 19 per-  
25       cent of teachers had been formally mentored by an-

1 other teacher, and that 70 percent of these teachers  
2 felt that this collaboration was very helpful to their  
3 teaching.

4 (c) PROGRAM AUTHORIZED.—

5 (1) GENERAL AUTHORITY—The Director, in co-  
6 operation with the Secretary of Education and the  
7 Director of the National Institute of Standards and  
8 Technology, is authorized to provide assistance for  
9 the creation and support of regional centers for the  
10 utilization of educational technologies (hereinafter in  
11 this section referred to as “ETU Centers”).

12 (2) FUNCTIONS OF CENTERS—

13 (A) ESTABLISHMENT.—ETU Centers may  
14 be established at any intermediate school dis-  
15 trict, regional education service agency, institu-  
16 tion of higher education, or consortium of such  
17 entities, but such Centers may include the par-  
18 ticipation of nonprofit entities.

19 (B) OBJECTIVES OF CENTERS.—The objec-  
20 tive of ETU Centers is to enhance the utiliza-  
21 tion of educational technologies in elementary  
22 and secondary education through—

23 (i) advising elementary and secondary  
24 school administrators, school boards, and  
25 teachers on the adoption and utilization of

1 new educational technologies and the util-  
2 ity of local schools' existing educational  
3 technology assets and infrastructure;

4 (ii) participation of individuals from  
5 the private sector, universities, State and  
6 local governments, and other Federal agen-  
7 cies;

8 (iii) active dissemination of technical  
9 and management information about the  
10 use of educational technologies; and

11 (iv) utilization, if appropriate, of the  
12 expertise and capabilities that exist in Fed-  
13 eral laboratories and Federal agencies.

14 (C) ACTIVITIES OF CENTERS.—The activi-  
15 ties of ETU Centers shall include the following:

16 (i) The active transfer and dissemina-  
17 tion of research findings and ETU Center  
18 expertise to local school authorities, includ-  
19 ing school administrators, school boards,  
20 and teachers.

21 (ii) The training of teachers in the in-  
22 tegration of local schools' existing edu-  
23 cational technology infrastructure into  
24 their instructional design.

1 (iii) The training and advising of  
2 teachers, administrators, and school board  
3 members in the acquisition, utilization, and  
4 support of educational technologies.

5 (iv) Support services to teachers, ad-  
6 ministrators, and school board members as  
7 agreed upon by ETU Center representa-  
8 tives and local school authorities.

9 (v) The advising of teachers, adminis-  
10 trators, and school board members on cur-  
11 rent skill set standards employed by pri-  
12 vate industry.

13 (3) PROGRAM ADMINISTRATION.—

14 (A) PROPOSED RULES.—The Director,  
15 after consultation with the Secretary of Edu-  
16 cation and the Director of the National Insti-  
17 tute of Standards and Technology, shall publish  
18 in the Federal Register, not later than 90 days  
19 after the date of the enactment of this Act, pro-  
20 posed rules for the program for establishing  
21 ETU Centers, including—

22 (i) a description of the program;

23 (ii) the procedures to be followed by  
24 applicants;

1 (iii) the criteria for determining quali-  
2 fied applicants; and

3 (iv) the criteria, including those listed  
4 in this section, for choosing recipients of fi-  
5 nancial assistance under this section from  
6 among qualified applicants.

7 (B) FINAL RULES.—The Director shall  
8 publish final rules for the program under this  
9 section after the expiration of a 30-day com-  
10 ment period on such proposed rules.

11 (4) ELIGIBILITY AND SELECTION.—

12 (A) APPLICATIONS REQUIRED.—Any inter-  
13 mediate school district, regional education serv-  
14 ice agency, undergraduate institution of higher  
15 education, or consortium of any of those enti-  
16 ties may submit an application for financial  
17 support under this section in accordance with  
18 the procedures established under this section.  
19 In order to receive assistance under this sec-  
20 tion, an applicant shall provide adequate assur-  
21 ances that the applicant will contribute 50 per-  
22 cent or more of the proposed ETU Center's  
23 capital and annual operating and maintenance  
24 costs.

1           (B) SELECTION.—The Director, in con-  
2           junction with the Secretary of Education and  
3           the Director of the National Institute of Stand-  
4           ards and Technology, shall subject each applica-  
5           tion to competitive, merit-based review. In mak-  
6           ing a decision whether to approve such applica-  
7           tion and provide financial support under this  
8           section, the Director of the National Science  
9           Foundation shall consider, at a minimum—

10                   (i) the merits of the application, par-  
11                   ticularly those portions of the application  
12                   regarding the adaptation of training and  
13                   educational technologies to the needs of  
14                   particular regions;

15                   (ii) the quality of service to be pro-  
16                   vided;

17                   (iii) the geographical diversity and ex-  
18                   tent of service area, with particular empha-  
19                   sis on rural and traditionally under-  
20                   developed areas; and

21                   (iv) the percentage of funding and  
22                   amount of in-kind commitment from other  
23                   sources.

24           (C) EVALUATION.—Each ETU Center that  
25           receives financial assistance under this section

1 shall be evaluated during its third year of oper-  
2 ation by an evaluation panel appointed by the  
3 Director. Each evaluation panel shall measure  
4 the involved ETU Center's performance against  
5 the objectives specified in this section. Funding  
6 for an ETU Center shall not be renewed unless  
7 the evaluation is positive.

8 (d) AUTHORIZATION OF APPROPRIATIONS.—There  
9 are authorized to be appropriated to the National Science  
10 Foundation to carry out this section \$7,000,000 for fiscal  
11 year 2002, \$8,500,000 for fiscal year 2003, and  
12 \$9,500,000 for fiscal year 2004.

13 **SEC. 203. NATIONAL SCIENCE, MATHEMATICS, ENGINEER-**  
14 **ING, AND TECHNOLOGY EDUCATION DIGITAL**  
15 **LIBRARY.**

16 In addition to any amounts otherwise authorized,  
17 there are authorized to be appropriated to the National  
18 Science Foundation for the National Science, Mathe-  
19 matics, Engineering, and Technology Education Digital  
20 Library \$10,000,000 for fiscal year 2002, \$15,000,000 for  
21 fiscal year 2003, and \$17,500,00 for fiscal year 2004.  
22 Such additional amounts shall be used primarily for activi-  
23 ties focused on development of precollege education collec-  
24 tions and support services for science teachers and school  
25 administrators, and uses of the amounts may include—

1           (1) production of educational materials de-  
2           signed to take maximum advantage of the Library's  
3           architecture and services;

4           (2) evaluation of materials to determine wheth-  
5           er such materials are aligned with established na-  
6           tionally recognized science and mathematics stand-  
7           ards for knowledge of students at different grade  
8           levels; and

9           (3) assistance to schools or school systems in  
10          the selection of curricular materials.

11 **SEC. 204. STUDY OF BROADBAND NETWORK ACCESS FOR**  
12 **SCHOOLS AND LIBRARIES.**

13          (a) **REPORT TO CONGRESS.**—The Director shall con-  
14          duct a study of the issues described in subsection (c), and  
15          not later than 1 year after the date of the enactment of  
16          this Act, transmit to Congress a report including rec-  
17          ommendations to address those issues. Such report shall  
18          be updated annually for 6 additional years.

19          (b) **CONSULTATION.**—In preparing the reports under  
20          subsection (a), the Director shall consult with the National  
21          Aeronautics and Space Administration, the National Insti-  
22          tute of Standards and Technology, and such other Federal  
23          agencies and educational entities as the Director considers  
24          appropriate.

25          (c) **ISSUES.**—The reports shall—

1           (1) identify the current status of high-speed,  
2           large bandwidth capacity access to all public elemen-  
3           tary and secondary schools and libraries in the  
4           United States;

5           (2) identify how the provision of high-speed,  
6           large bandwidth capacity access to the Internet to  
7           such schools and libraries can be effectively utilized  
8           within each school and library;

9           (3) consider the effect that specific or regional  
10          circumstances may have on the ability of such insti-  
11          tutions to acquire high-speed, large bandwidth ca-  
12          pacity access to achieve universal connectivity as an  
13          effective tool in the education process; and

14          (4) include options and recommendations for  
15          the various entities responsible for elementary and  
16          secondary education to address the challenges and  
17          issues identified in the reports.

18 **SEC. 205. BROADBAND DEMONSTRATION PROJECTS.**

19          (a) PROJECTS AUTHORIZED.—As part of the Next  
20          Generation Internet activities authorized under section  
21          103(a)(3) of the High-Performance Computing Act of  
22          1991 (15 U.S.C. 5513(a)(3)), the agencies participating  
23          in the Next Generation Internet program are authorized  
24          to provide such broadband Internet connections to schools  
25          as necessary to conduct demonstration projects to deter-

1 mine the uses and effectiveness of broadband connections  
2 in science, mathematics, and technology education in ele-  
3 mentary and secondary schools. The projects shall be car-  
4 ried out in coordination with the experiments authorized  
5 under section 201.

6 (b) ASSESSMENTS.—The agencies sponsoring  
7 projects under subsection (a) shall identify metrics to as-  
8 sess the educational effectiveness of the projects, put in  
9 place procedures to make such an assessment for each  
10 project supported, and document and disseminate the  
11 findings of the assessments. Descriptions of the projects  
12 and the findings of the assessments of projects shall be  
13 included in the reports required under section 204(a).

14 (c) AUTHORIZATION OF APPROPRIATIONS.—There  
15 are authorized to be appropriated to carry out this section  
16 \$10,000,000 for each of fiscal years 2002 through 2004.

17 **TITLE III—INCREASING PARTICI-**  
18 **PATION BY UNDERREP-**  
19 **RESENTED GROUPS IN**  
20 **SCIENCE AND ENGINEERING**

21 **SEC. 301. MATHEMATICS AND SCIENCE PROFICIENCY**  
22 **PARTNERSHIPS.**

23 (a) FINDINGS.—Congress finds the following:

24 (1) Proficiency in mathematics, science, and in-  
25 formation technology is necessary to prepare all stu-

1       dents in the United States for participation in the  
2       21st Century and to guarantee that the United  
3       States economy remains vibrant and competitive.

4               (2) In order to achieve such results, it is impor-  
5       tant that the Federal Government shows interest in  
6       economically disadvantaged students who have not  
7       been provided with opportunities that will improve  
8       their knowledge of mathematics, science, and tech-  
9       nology.

10              (3) Many economically disadvantaged students  
11       in urban and rural America share a common need  
12       to receive a quality education, but often the schools  
13       of such students lack the needed resources to lift  
14       those students into the information age.

15              (4) The schools and businesses serving urban  
16       and rural communities are strategically positioned to  
17       form a unique partnership with students that will in-  
18       crease their mathematics, science, and technology  
19       proficiency and encourage and support their under-  
20       graduate study in those fields for the benefit of the  
21       Nation.

22       (b) AUTHORITY.—

23              (1) IN GENERAL.—

24                      (A) GRANT PROGRAM.—The Director shall  
25       establish a demonstration project under which

1 the Director awards grants in accordance with  
2 this section to eligible local educational agen-  
3 cies.

4 (B) USES OF FUNDS.—A local educational  
5 agency that receives a grant under this section  
6 may use such grant funds to develop a program  
7 that builds or expands mathematics, science,  
8 and information technology curricula, to pur-  
9 chase equipment necessary to establish such  
10 program, and to provide professional develop-  
11 ment to enhance teacher quality in those fields.

12 (2) PROGRAM REQUIREMENTS.—A program de-  
13 scribed in paragraph (1) shall—

14 (A) provide teacher professional develop-  
15 ment specifically in information technology,  
16 mathematics, and science; and

17 (B) provide students with a rich standards-  
18 based course of study in mathematics, science,  
19 and information technology.

20 (c) ELIGIBLE LOCAL EDUCATIONAL AGENCIES.—  
21 For purposes of this section, a local educational agency  
22 is eligible to receive a grant under this section if the  
23 agency—

24 (1) provides assurances that it has executed  
25 conditional agreements with representatives of the

1 private sector to provide services and funds de-  
2 scribed in subsection (d); and

3 (2) agrees to enter into an agreement with the  
4 Director to comply with the requirements of this sec-  
5 tion.

6 (d) PRIVATE SECTOR PARTICIPATION.—The condi-  
7 tional agreements referred to in subsection (c)(1) shall de-  
8 scribe participation by the private sector, including—

9 (1) the donation of computer hardware, soft-  
10 ware, and other technology tools;

11 (2) the establishment of internship and men-  
12 toring opportunities for students who participate in  
13 the mathematics, science, and information tech-  
14 nology program; and

15 (3) the donation of higher education scholarship  
16 funds for eligible students to continue their study of  
17 mathematics, science, and information technology.

18 (e) APPLICATION.—

19 (1) IN GENERAL.—To apply for a grant under  
20 this section, each eligible local educational agency  
21 shall submit an application to the Director in ac-  
22 cordance with guidelines established by the Director  
23 pursuant to paragraph (2).

24 (2) GUIDELINES.—

1 (A) REQUIREMENTS.—The guidelines re-  
2 ferred to in paragraph (1) shall require, at a  
3 minimum, that the application include—

4 (i) a description of proposed activities  
5 consistent with the uses of funds and pro-  
6 gram requirements under paragraphs  
7 (1)(B) and (2) of subsection (b);

8 (ii) a description of the higher edu-  
9 cation scholarship program, including cri-  
10 teria for selection, duration of scholarship,  
11 number of scholarships to be awarded each  
12 year, and funding levels for scholarships;  
13 and

14 (iii) evidence of private sector partici-  
15 pation and financial support to establish  
16 an internship, mentoring, and scholarship  
17 program.

18 (B) GUIDELINE PUBLICATION.—The Di-  
19 rector shall issue and publish such guidelines  
20 not later than 6 months after the date of the  
21 enactment of this Act.

22 (3) SELECTION.—The Director shall select a  
23 local educational agency to receive an award under  
24 this section on the basis of merit to be determined  
25 after conducting a comprehensive review.

1 (f) PRIORITY.—The Director shall give special pri-  
2 ority in awarding grants under this section to eligible local  
3 educational agencies that—

4 (1) demonstrate the greatest ability to obtain  
5 commitments from representatives of the private sec-  
6 tor to provide services and funds described under  
7 subsection (d); and

8 (2) demonstrate the greatest economic need.

9 (g) ASSESSMENT.—The Director shall assess the ef-  
10 fectiveness of activities carried out under this section.

11 (h) STUDY AND REPORT.—The Director—

12 (1) shall initiate an evaluative study of the ef-  
13 fectiveness of the activities carried out under this  
14 section in improving student performance in mathe-  
15 matics, science, and information technology at the  
16 precollege level and in stimulating student interest  
17 in pursuing undergraduate studies in those fields;  
18 and

19 (2) shall report the findings of the study to  
20 Congress not later than 4 years after the award of  
21 the first scholarship.

22 Such report shall include the number of students grad-  
23 uating from an institution of higher education with a  
24 major in mathematics, science, or information technology

1 and the number of students who find employment in such  
2 fields.

3 (i) DEFINITIONS.—In this section:

4 (1) The term “conditional agreement” means  
5 an arrangement between representatives of the pri-  
6 vate sector and local educational agencies to provide  
7 certain services and funds, such as, but not limited  
8 to, the donation of computer hardware and software,  
9 the establishment of internship and mentoring op-  
10 portunities for students who participate in mathe-  
11 matics, science, and information technology pro-  
12 grams, and the donation of scholarship funds for use  
13 at institutions of higher education by eligible stu-  
14 dents who have participated in the mathematics,  
15 science, and information technology programs.

16 (2) The term “eligible student” means a stu-  
17 dent enrolled in the 12th grade who—

18 (A) has participated in a mathematics,  
19 science, and an information technology program  
20 established pursuant to this section;

21 (B) has demonstrated a commitment to  
22 pursue a career in information technology,  
23 mathematics, science, or engineering; and

24 (C) has attained high academic standing  
25 and maintains a grade point average of not less

1           than 2.7 on a 4.0 scale for the period from the  
2           beginning of the 10th grade through the time  
3           of application for a scholarship.

4           (j) AUTHORIZATION OF APPROPRIATIONS.—There  
5           are authorized to be appropriated to the National Science  
6           Foundation to carry out this section \$5,000,000 for each  
7           of fiscal years 2002 through 2004.

8           (k) MAXIMUM GRANT AWARD.—An award made to  
9           an eligible local educational agency under this section may  
10          not exceed \$300,000.

11 **SEC. 302. GO GIRL GRANTS.**

12          (a) SHORT TITLE.—This section may be cited as the  
13          “Getting Our Girls Ready for the 21st Century Act (Go  
14          Girl Act)”.

15          (b) FINDINGS.—Congress finds the following:

16               (1) Women have historically been underrep-  
17               resented in science, mathematics, engineering, and  
18               technology occupations.

19               (2) Female students take fewer high-level math-  
20               ematics and science courses in high school than male  
21               students.

22               (3) Female students take far fewer advanced  
23               computer classes and tend to take only the basic  
24               data entry and word processing classes compared to  
25               courses that male students take.

1           (4) Female students earn fewer bachelors, mas-  
2           ters, and doctoral degrees in science, mathematics,  
3           engineering, and technology than male students.

4           (5) Early career exploration is key to choosing  
5           a career.

6           (6) Teachers' attitudes, methods of teaching,  
7           and classroom atmosphere affect females' interest in  
8           nontraditional fields.

9           (7) Stereotypes about appropriate careers for  
10          females, a lack of female role models, and a lack of  
11          basic career information significantly deter girls' in-  
12          terest in science, mathematics, engineering, and  
13          technology careers.

14          (8) Females consistently rate themselves signifi-  
15          cantly lower than males in computer ability.

16          (9) Limited access is a hurdle faced by females  
17          seeking jobs in science, mathematics, engineering,  
18          and technology.

19          (10) Common recruitment and hiring practices  
20          make extensive use of traditional networks that  
21          often overlook females.

22          (c) PROGRAM AUTHORITY.—

23                 (1) IN GENERAL.—The Director is authorized  
24                 to provide grants to and enter into contracts or co-  
25                 operative agreements with local educational agencies

1 and institutions of higher education to encourage the  
2 ongoing interest of girls in science, mathematics, en-  
3 gineering, and technology and to prepare girls to  
4 pursue undergraduate and graduate degrees and ca-  
5 reers in science, mathematics, engineering, or tech-  
6 nology.

7 (2) APPLICATION.—

8 (A) IN GENERAL.—To be eligible to receive  
9 a grant under this section, a local educational  
10 agency or institution of higher education shall  
11 submit an application to the Director at such  
12 time, in such form, and containing such infor-  
13 mation as the Director may reasonably require.

14 (B) CONTENTS.—The application referred  
15 to in subparagraph (A) shall contain, at a min-  
16 imum, the following:

17 (i) A specific program description, in-  
18 cluding the content of the program and the  
19 research and models used to design the  
20 program.

21 (ii) A description of how an eligible  
22 entity will provide for collaboration be-  
23 tween elementary and secondary school  
24 programs to fulfill goals of the grant pro-  
25 gram.

1 (iii) An explanation regarding the re-  
2 cruitment and selection of participants.

3 (iv) A description of the instructional  
4 and motivational activities planned to be  
5 used.

6 (v) An evaluation plan.

7 (d) USES OF FUNDS FOR ELEMENTARY SCHOOL  
8 PROGRAM.—Under grants awarded pursuant to sub-  
9 section (c), funds may be used for the following:

10 (1) Encouraging girls in grades 4 through 8 to  
11 enjoy and pursue studies in science, mathematics,  
12 engineering, and technology.

13 (2) Acquainting such girls with careers in  
14 science, mathematics, engineering, and technology.

15 (3) Educating the parents of such girls about  
16 the difficulties faced by girls to maintain an interest  
17 and desire to achieve in science, mathematics, engi-  
18 neering, and technology, and enlisting the help of  
19 the parents in overcoming these difficulties.

20 (4) Tutoring of such girls in reading, science,  
21 mathematics, engineering, and technology.

22 (5) Mentoring relationships for such girls, both  
23 in person and through the Internet.

1           (6) Paying the costs for such girls of attending  
2 events and academic programs in science, mathe-  
3 matics, engineering, and technology.

4           (7) After-school activities designed to encourage  
5 the interest of such girls in science, mathematics,  
6 engineering, and technology.

7           (8) Summer programs for such girls designed  
8 to encourage interest in, and develop skills in,  
9 science, mathematics, engineering, and technology.

10          (9) Purchasing software designed for such girls,  
11 or designed to encourage such girls' interest in  
12 science, mathematics, engineering, and technology.

13          (10) Field trips for such girls to locations that  
14 educate and encourage such girls' interest in science,  
15 mathematics, engineering, and technology.

16          (11) Field trips to locations that acquaint such  
17 girls with careers in science, mathematics, engineer-  
18 ing and technology.

19          (12) Purchasing and disseminating information  
20 to parents of such girls that will help parents to en-  
21 courage their daughters' interest in science, mathe-  
22 matics, engineering, and technology.

23          (e) USES OF FUNDS FOR SECONDARY SCHOOL PRO-  
24 GRAM.—Under grants awarded pursuant to subsection (c),  
25 funds may be used for the following:

1           (1) Encouraging girls in grades 9 and higher to  
2           major in science, mathematics, engineering, and  
3           technology in a postsecondary institution.

4           (2) Providing academic advice and assistance in  
5           high school course selection for such girls.

6           (3) Encouraging such girls to plan for careers  
7           in science, mathematics, engineering, and tech-  
8           nology.

9           (4) Educating the parents of such girls about  
10          the difficulties faced by girls to maintain an interest  
11          and desire to achieve in science, mathematics, engi-  
12          neering, and technology, and enlisting the help of  
13          the parents in overcoming these difficulties.

14          (5) Tutoring for such girls in science, mathe-  
15          matics, engineering, and technology.

16          (6) Mentoring relationships for such girls, both  
17          in person and through the Internet.

18          (7) Paying the costs for such girls of attending  
19          events and academic programs in science, mathe-  
20          matics, engineering, and technology.

21          (8) Paying 50 percent of the cost of internships  
22          for such girls in science, mathematics, engineering,  
23          or technology.

24          (9) After-school activities designed to encourage  
25          the interest of such girls in science, mathematics,

1 engineering, and technology, including the cost of  
2 that portion of a staff salary to supervise these ac-  
3 tivities.

4 (10) Summer programs for such girls designed  
5 to encourage interest in and develop skills in science,  
6 mathematics, engineering, and technology.

7 (11) Purchasing software designed for such  
8 girls, or designed to encourage such girls' interest in  
9 science, mathematics, engineering, and technology.

10 (12) Field trips for such girls to locations that  
11 educate and encourage such girls' interest in science,  
12 mathematics, engineering, and technology.

13 (13) Field trips to locations that acquaint such  
14 girls with careers in science, mathematics, engineer-  
15 ing, and technology.

16 (14) Visits to institutions of higher education to  
17 acquaint such girls with college-level programs in  
18 science, mathematics, engineering, or technology,  
19 and to meet with educators and female college stu-  
20 dents who will encourage them to pursue degrees in  
21 science, mathematics, engineering, and technology.

22 (f) AUTHORIZATION OF APPROPRIATIONS.—There  
23 are authorized to be appropriated to the National Science  
24 Foundation to carry out this section \$10,000,000 for each  
25 of fiscal years 2002 through 2004.

1 **SEC. 303. ARTICULATION PARTNERSHIPS BETWEEN COM-**  
2 **MUNITY COLLEGES AND SECONDARY**  
3 **SCHOOLS.**

4 (a) **OUTREACH GRANTS.**—In making awards for out-  
5 reach grants authorized under section 3(c)(2) of the Sci-  
6 entific and Advanced-Technology Act of 1992 (42 U.S.C.  
7 1862i(c)(2)), the Director shall give priority to proposals  
8 that involve secondary schools with a majority of students  
9 from groups that are underrepresented in the science,  
10 mathematics and engineering workforce. Awards in such  
11 cases shall not be subject to the requirement under section  
12 3(f)(3) of such Act for a matching contribution.

13 (b) **AUTHORIZATION OF APPROPRIATIONS.**—There  
14 are authorized to be appropriated to the National Science  
15 Foundation to carry out this section \$5,000,000 for each  
16 of fiscal years 2002 through 2004.

17 **TITLE IV—COORDINATION OF**  
18 **SCIENCE EDUCATION PRO-**  
19 **GRAMS**

20 **SEC. 401. INTERAGENCY COORDINATION COMMITTEE.**

21 (a) **ESTABLISHMENT.**—The Director of the Office of  
22 Science and Technology Policy shall establish an inter-  
23 agency committee to coordinate Federal programs in sup-  
24 port of science and mathematics education at the elemen-  
25 tary and secondary level.

1           (b) MEMBERSHIP.—The membership of the com-  
2 mittee shall consist of the heads, or designees, of the Na-  
3 tional Science Foundation, the Department of Energy, the  
4 National Aeronautics and Space Administration, the De-  
5 partment of Education, and other Federal agencies that  
6 have programs directed toward support of elementary and  
7 secondary science and mathematics education.

8           (c) FUNCTIONS.—The committee shall—

9                   (1) prepare a catalog of Federal research, de-  
10 velopment, demonstration, and other programs de-  
11 signed to improve elementary and secondary science  
12 or mathematics education, including for each pro-  
13 gram a summary of goals and the kinds of activities  
14 supported, a summary of accomplishments (includ-  
15 ing evidence of effectiveness in improving student  
16 learning), the funding level, and, for grant pro-  
17 grams, the eligibility requirements and the selection  
18 process for awards;

19                   (2) review the programs identified under para-  
20 graph (1) in order to—

21                           (A) determine the relative funding levels  
22 for—

23                                   (i) teacher professional development;

24                                   (ii) curricular materials;

1 (iii) improved classroom teaching  
2 practices;

3 (iv) applications of computers and re-  
4 lated information technologies; and

5 (v) other major categories of activi-  
6 ties;

7 (B) assess whether the balance among  
8 funding of activities as determined under sub-  
9 paragraph (A) is appropriate and whether un-  
10 necessary duplication or overlap among pro-  
11 grams exists;

12 (C) assess the degree to which the pro-  
13 grams assist the efforts of State and local  
14 school systems to implement standards-based  
15 reform of science and mathematics education,  
16 and group the programs in categories of high,  
17 moderate, and low relevance for assisting stand-  
18 ards-based reform;

19 (D) for grant programs, identify ways to  
20 simplify application procedures and require-  
21 ments and to achieve greater conformity among  
22 the procedures and requirements of the applica-  
23 ble agencies; and

24 (E) evaluate the adequacy of the assess-  
25 ment procedures used by the agencies to deter-

1           mine whether the goals and objectives of pro-  
2           grams are being achieved, and identify the best  
3           practices identified from the evaluation for as-  
4           sessment of program effectiveness; and

5           (3) monitor the implementation of the plan de-  
6           veloped under section 403 and provide to the Direc-  
7           tor of the Office of Science and Technology Policy  
8           its findings and recommendations for modifications  
9           to that plan.

10 **SEC. 402. EXTERNAL REVIEW.**

11           The Director shall enter into an agreement with the  
12 National Research Council to conduct an independent re-  
13 view of programs as described in section 401(c)(2) and  
14 to develop findings and recommendations. The findings  
15 and recommendations from the National Research Council  
16 review of programs shall be reported to the Director of  
17 the Office of Science and Technology Policy and to Con-  
18 gress.

19 **SEC. 403. EDUCATION PLAN.**

20           (a) PLAN CONTENTS.—On the basis of the findings  
21 of the review carried out in accordance with section  
22 401(c)(2) and taking into consideration the findings and  
23 recommendations of the National Research Council in ac-  
24 cordance with section 402, the Director of the Office of  
25 Science and Technology Policy shall prepare a plan for

1 Federal elementary and secondary science and mathe-  
2 matics education programs which shall include—

3           (1) a strategy to increase the effectiveness of  
4 Federal programs to assist the efforts of State and  
5 local school systems to implement standards-based  
6 reform of elementary and secondary science and  
7 mathematics education;

8           (2) a coordinated approach for identifying best  
9 practices for the use of computers and related infor-  
10 mation technologies in classroom instruction;

11           (3) the recommended balance for Federal re-  
12 source allocation among the major types of activities  
13 supported, including projected funding allocations  
14 for each major activity broken out by department  
15 and agency;

16           (4) identification of effective Federal programs  
17 that have made measurable contributions to achiev-  
18 ing standards-based science and mathematics edu-  
19 cation reform;

20           (5) recommendations to departments and agen-  
21 cies for actions needed to increase uniformity across  
22 the Federal Government for application procedures  
23 and requirements for grant awards for support of el-  
24 elementary and secondary science and mathematics  
25 education; and

1           (6) dissemination procedures for replicating re-  
2           sults from effective programs, particularly best prac-  
3           tices for classroom instruction.

4           (b) CONSULTATION.—The Director shall consult with  
5           academic, State, industry, and other appropriate entities  
6           engaged in efforts to reform science and mathematics edu-  
7           cation as necessary and appropriate for preparing the plan  
8           under subsection (a).

9   **SEC. 404. SCIENCE, MATHEMATICS, ENGINEERING, AND**  
10                           **TECHNOLOGY BUSINESS EDUCATION CON-**  
11                           **ERENCE.**

12           (a) IN GENERAL.—Not later than 180 days after the  
13           date of the enactment of this Act, the Director shall con-  
14           vene the first of an annual 3- to 5-day conference for kin-  
15           dergarten through the 12th grade science, mathematics,  
16           engineering, and technology education stakeholders,  
17           including—

18                   (1) representatives from Federal, State, and  
19                   local governments, private industries, private busi-  
20                   nesses, and professional organizations;

21                   (2) educators;

22                   (3) science, mathematics, engineering, and tech-  
23                   nology educational resource providers;

24                   (4) students; and

1           (5) any other stakeholders the Director deter-  
2           mines would provide useful participation in the con-  
3           ference.

4           (b) PURPOSES.—The purposes of the conference con-  
5           vened under subsection (a) shall be to—

6           (1) identify and gather information on existing  
7           science, mathematics, engineering, and technology  
8           education programs and resource providers, includ-  
9           ing information on distribution, partners, cost as-  
10          sessment, and derivation;

11          (2) determine the extent of any existing coordi-  
12          nation between providers of curricular activities, ini-  
13          tiatives, and units; and

14          (3) identify the common goals and differences  
15          among the participants at the conference.

16          (c) AUTHORIZATION OF APPROPRIATIONS.—There  
17          are authorized to be appropriated for the National Science  
18          Foundation to carry out this section—

19           (1) \$300,000 for fiscal year 2002; and

20           (2) \$200,000 for each of fiscal years 2003 and  
21          2004.

22       **SEC. 405. REPORTS.**

23          (a) INITIAL COORDINATION REPORT.—The Director  
24          of the Office of Science and Technology Policy shall sub-

1 mit to Congress, not later than 1 year after the date of  
2 the enactment of this Act, a report which—

3 (1) includes the plan described in section  
4 403(a);

5 (2) in accordance with section 403(a)(3), de-  
6 scribes, for each agency represented on the com-  
7 mittee established under section 401(a), appropriate  
8 levels of Federal funding;

9 (3) includes the catalog prepared under section  
10 401(c)(1);

11 (4) includes the findings from the review re-  
12 quired under section 401(c)(2);

13 (5) includes the findings and recommendations  
14 of the National Research Council developed under  
15 section 402; and

16 (6) describes the procedures used by each agen-  
17 cy represented on the committee to assess the effec-  
18 tiveness of its education programs.

19 (b) ANNUAL UPDATES.—The Director of the Office  
20 of Science and Technology Policy shall submit to Congress  
21 an annual update, at the time of the submission of the  
22 President’s annual budget request, of the report submitted  
23 under subsection (a), which shall include, for each agency  
24 represented on the committee, appropriate levels of Fed-  
25 eral funding for the fiscal year during which the report

1 is submitted and the levels proposed for the fiscal year  
2 for which the budget submission applies.

3 (c) CONFERENCE REPORT AND PUBLICATION.—At  
4 the conclusion of the conference required under section  
5 404, the Director shall—

6 (1) transmit to the Committee on Science of the  
7 House of Representatives and to the Committee on  
8 Commerce, Science, and Transportation of the Sen-  
9 ate a report on the outcome and conclusions of the  
10 conference, including an inventory of curricular ac-  
11 tivities, initiatives, and units, the content of the con-  
12 ference, and strategies developed that will support  
13 partnerships and leverage resources; and

14 (2) ensure that a similar report is published  
15 and distributed as widely as possible to stakeholders  
16 in science, mathematics, engineering, and technology  
17 education.

○
