## A BILL

To provide for the reduction of adolescent pregnancy, HIV rates, and other sexually transmitted diseases, and for other purposes.

1        *Be it enacted by the Senate and House of Representa-*  
2        *tives of the United States of America in Congress assembled,*

3        **SECTION 1. SHORT TITLE.**

4        This Act may be cited as the “Family Life Education  
5        Act”.

6        **SEC. 2. FINDINGS.**

7        The Congress finds as follows:

8            (1)    The    American    Medical    Association  
9            (“AMA”),    the    American    Nurses    Association  
10           (“ANA”),    the    American    Academy    of    Pediatrics

1 (“AAP”), the American College of Obstetricians and  
2 Gynecologists (“ACOG”), the American Public  
3 Health Association (“APHA”), and the Society of  
4 Adolescent Medicine (“SAM”), support responsible  
5 sexuality education that includes information about  
6 both abstinence and contraception.

7 (2) Recent scientific reports by the Institute of  
8 Medicine, the American Medical Association and the  
9 Office on National AIDS Policy stress the need for  
10 sexuality education that includes messages about ab-  
11 stinence and provides young people with information  
12 about contraception for the prevention of teen preg-  
13 nancy, HIV/AIDS and other sexually transmitted  
14 diseases (“STDs”).

15 (3) Research shows that teenagers who receive  
16 sexuality education that includes discussion of con-  
17 traception are more likely than those who receive ab-  
18 stinence-only messages to delay sexual activity and  
19 to use contraceptives when they do become sexually  
20 active.

21 (4) Comprehensive sexuality education pro-  
22 grams respect the diversity of values and beliefs rep-  
23 resented in the community and will complement and  
24 augment the sexuality education children receive  
25 from their families.

1           (5) The median age of puberty is 13 years and  
2           the average age of marriage is nearly 26 years old.  
3           American teens need access to full, complete, and  
4           medically and factually accurate information regard-  
5           ing sexuality, including contraception, STD/HIV  
6           prevention, and abstinence.

7           (6) Although teen pregnancy rates are decreas-  
8           ing, there are still nearly 900,000 teen pregnancies  
9           each year. Nearly 80 percent of teen pregnancies  
10          among 15- to 19-year olds are unintended.

11          (7) Research shows that 75 percent of the de-  
12          crease in teen pregnancy between 1988 and 1995  
13          was due to improved contraceptive use, while 25 per-  
14          cent was due to increased abstinence.

15          (8) More than eight out of ten Americans be-  
16          lieve that young people should have information  
17          about protecting themselves from unplanned preg-  
18          nancies and sexually transmitted diseases.

19          (9) United States teens acquire an estimated  
20          4,000,000 sexually transmitted infections each year.  
21          By age 24, at least one in three sexually active peo-  
22          ple will have contracted a sexually transmitted dis-  
23          ease.

24          (10) An average of two young people in the  
25          United States are infected with HIV every hour of

1 every day. African Americans and Hispanic youth  
2 have been disproportionately affected by the HIV/  
3 AIDS epidemic. Although less than 16 percent of  
4 the adolescent population in the United States is Af-  
5 rican American, nearly 50 percent of AIDS cases  
6 through June 2000 among 13- to 19-year olds were  
7 among Blacks. Hispanics comprise 13 percent of the  
8 population and 20 percent of the reported adolescent  
9 AIDS cases through June 2000.

10 **SEC. 3. ASSISTANCE TO REDUCE TEEN PREGNANCY, HIV/  
11 AIDS, AND OTHER SEXUALLY TRANSMITTED  
12 DISEASES AND TO SUPPORT HEALTHY ADO-  
13 LESCENT DEVELOPMENT.**

13          HIV/AIDS;

15          sexuality between parent and child;

19          vances and how not to make unwanted verbal, phys-  
20          ical, and sexual advances; and

5 cence and subsequent stages of human maturation;
