RESOLUTION

Expressing the sense of the House of Representatives regarding prenatal care for women and children.

Whereas unborn children benefit from quality prenatal health care;

Whereas the levels of infant mortality, premature delivery, and low birthweight are exceedingly high in the United States as compared with other developed countries;

Whereas low birthweight and premature delivery are causally associated with developmental disabilities among children;

Whereas proper prenatal care can prevent avoidable birth defects;

Whereas new medical advances, together with early diagnosis, can treat children with a wide range of disorders including spina bifida, HIV/AIDS, fetal distress, and anemia;

Whereas fetal surgery is now able to correct many life-threatening congenital disorders;

Whereas pregnant women benefit from quality health care, including physician care, hospital care, and prescription medications;

Whereas prenatal care can prevent medical and surgical complications that a mother may encounter during pregnancy and birth;

Whereas prenatal care can identify and treat a mother's pre-existing medical conditions which may be impacted by pregnancy;

Whereas an estimated 10,900,000 women of childbearing age (18–44) do not have health insurance;

Whereas the State Children's Health Insurance Program (SCHIP), created under title XXI of the Social Security Act, expands health coverage to uninsured children whose families earn too much for medicaid but too little to afford private coverage; and

Whereas on January 31, 2002, the Secretary of Health and Human Services, Tommy Thompson, proposed a regulation to allow States to include coverage for children from conception to age 19, which would allow low-income pregnant mothers to receive prenatal and delivery care: Now, therefore, be it
