Whereas 80 percent of births to teenagers are to unmarried teenagers, and teenage mothers have more children, on average, than women who delay childbearing, which makes it more difficult for them and their children to escape a life of poverty;

Whereas teenagers who give birth are less likely to complete high school and to go on to college, thereby reducing their potential for economic self-sufficiency; and

Whereas the children of teenage mothers are more likely to be born prematurely and at low birth-weight, and suffer from higher rates of abuse and neglect than other children: Now, therefore, be it
