primarily associated with emphysema and chronic bron-  
chitis;

Whereas an estimated 10,000,000 adults in the United States

Whereas risk factors for COPD include long-term smoking, a family history of COPD, exposure to air pollution or second-hand smoke, and a history of frequent childhood respiratory infections;

Whereas more than half of all adults who suffer from COPD report that their condition limits their ability to work, sleep, and participate in social and physical activities;

Whereas more than half of all adults who suffer from COPD feel they are not in control of their breathing, panic when they cannot catch their breath, and expect their condition to worsen;

Whereas nearly 119,000 adults died in the United States of COPD in 2000, making COPD the fourth leading cause of death in the United States;
