

One Hundred Eighth Congress
of the
United States of America

AT THE FIRST SESSION

*Begun and held at the City of Washington on Tuesday,
the seventh day of January, two thousand and three*

An Act

To provide assistance for poison prevention and to stabilize the funding of regional
poison control centers.

*Be it enacted by the Senate and House of Representatives of
the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the “Poison Control Center Enhancement and Awareness Act Amendments of 2003”.

SEC. 2. FINDINGS.

The Congress finds the following:

(1) Poison control centers are our Nation’s primary defense against injury and deaths from poisoning. Twenty-four hours a day, the general public as well as health care practitioners contact their local poison centers for help in diagnosing and treating victims of poisoning and other toxic exposures.

(2) Poisoning is the third most common form of unintentional death in the United States. In any given year, there will be between 2,000,000 and 4,000,000 poison exposures. More than 50 percent of these exposures will involve children under the age of 6 who are exposed to toxic substances in their home. Poisoning accounts for 285,000 hospitalizations, 1,200,000 days of acute hospital care, and 13,000 fatalities annually.

(3) Stabilizing the funding structure and increasing accessibility to poison control centers will promote the utilization of poison control centers, and reduce the inappropriate use of emergency medical services and other more costly health care services.

(4) The tragic events of September 11, 2001, and the anthrax cases of October 2001, have dramatically changed our Nation. During this time period, poison centers in many areas of the country were answering thousands of additional calls from concerned residents. Many poison centers were relied upon as a source for accurate medical information about the disease and the complications resulting from prophylactic antibiotic therapy.

(5) The 2001 Presidential Task Force on Citizen Preparedness in the War on Terrorism recommended that the Poison Control Centers be used as a source of public information and public education regarding potential biological, chemical, and nuclear domestic terrorism.

(6) The increased demand placed upon poison centers to provide emergency information in the event of a terrorist event

involving a biological, chemical, or nuclear toxin will dramatically increase call volume.

SEC. 3. AMENDMENT TO PUBLIC HEALTH SERVICE ACT.

Title XII of the Public Health Service Act (42 U.S.C. 300d et seq.) is amended by adding at the end the following:
