SEC. 212. (a) The Secretary of Commerce shall implement a fishing capacity reduction program for the West Coast groundfish fishery pursuant to section 212 of Public Law 107-206 and 16 U.S.C. 1861a (b)-(e); except that the program may apply to multiple fisheries; except that within 90 days after the date of enactment of this Act, the Secretary shall publish a public notice in the Federal Register and issue an invitation to bid for reduction payments that specifies the contractual terms and conditions under which bids shall be made and accepted under this section; except that section 144(d)(1)(K)(3) of title I, division B of Public Law 106-554 shall apply to the program implemented by this section.

(b) A reduction fishery is eligible for capacity reduction under the program implemented under this section; except that no vessel harvesting and processing whiting in the catcher-processors sector (section 19 660.323(a)(4)(A) of title 50, Code of Federal Regulations)

may participate in any capacity reduction referendum or industry fee established under this section.

(c) A referendum on the industry fee system shall occur after bids have been submitted, and such bids have been accepted by the Secretary, as follows: members of the reduction fishery, and persons who have been issued Washington, Oregon, or California Dungeness crab and Pink shrimp permits, shall be eligible to vote in the referendum to approve an industry fee system; referendum votes cast in each fishery shall be weighted in proportion to the debt obligation of each fishery, as calculated in subsection (f) of this section; the industry fee system shall be approved if the referendum votes cast in favor of the proposed system constitute a simple majority of the participants voting; except that notwithstanding 5 U.S.C. 553 and 16 U.S.C. 1861a(e), the Secretary shall not prepare or publish proposed or final regulations for the implementation of the program under this section before the referendum is conducted.

(d) Nothing in this section shall be construed to prohibit the Pacific Fishery Management Council from recommending, or the Secretary from approving, changes to any fishery management plan, in accordance with applicable law; or the Secretary from promulgating regulations (including regulations governing this program), after an industry fee system has been approved by the reduction fishery.

(e) The Secretary shall determine, and state in the public notice published under paragraph (a), all program implementation aspects the Secretary deems relevant.

(f) Any bid submitted in response to the invitation to bid issued by the Secretary under this section shall be irrevocable; the Secretary shall use a bid acceptance procedure that ranks each bid in accordance with this paragraph and with additional criteria, if any, established by the Secretary: for each bid from a qualified bidder that meets the bidding requirements in the public notice or the invitation to bid, the Secretary shall determine a bid score by dividing the bid's dollar amount by the average annual total ex-vessel dollar value of landings of Pacific groundfish, Dungeness crab, and Pink shrimp based on the 3 highest total annual revenues earned from such stocks that the bidder's reduction vessel landed during 1998, 1999, 2000, or 2001. For purposes of this paragraph, the term "total annual revenue" means the revenue earned in a single year from such stocks. The Secretary shall accept each qualified bid in rank order of bid score from the lowest to the highest until acceptance of the next qualified bid with the next lowest bid score would cause the reduction cost to exceed the reduction loan's maximum amount. Acceptance of a bid by the Secretary shall create a binding reduction contract between the United States and the person whose bid is accepted, the performance of which shall be subject only to the conclusion of a successful referendum, except that a person whose bid is accepted by the Secretary under this section shall relinquish all permits in the reduction fishery and any Dungeness crab and Pink shrimp permits issued by Washington, Oregon, or California; except that the Secretary shall revoke the Pacific groundfish permit, as well as all Federal fishery licenses, fishery permits, area, and species endorsements, and any other fishery privileges issued to a vessel or vessels (or to persons on the basis of their operation or ownership of that vessel or vessels) removed under the program.

(g) *The Secretary shall establish separate reduction loan sub-amounts and repayment fees for fish sellers in the reduction fishery and for fish sellers in each of the fee-share fisheries by dividing the total ex-vessel dollar value during the bid scoring period of all reduction vessel landings from the reduction fishery and from each of the fee-share fisheries by the total such value of all such landings for all such fisheries; and multiplying the reduction loan amount by each of the quotients resulting from each of the divisions above. Each of the resulting products shall be the reduction loan sub-amount for the reduction fishery and for each of the fee-share fisheries to which each of such products pertains; except that, each fish seller in the reduction fishery and in each of the fee-share fisheries shall pay the fees required by the reduction loan sub-amounts allocated to it under this paragraph; except that, the Secretary may enter into agreements with Washington, Oregon, and California to collect any fees established under this paragraph.*

(h) *Notwithstanding 46 U.S.C. App. 1279(b)(4), the reduction loan's term shall not be less than 30 years.*

(i) *It is the sense of the Congress that the States of Washington, Oregon, and California should revoke all relinquishment permits in each of the fee-share fisheries immediately after reduction payment, and otherwise to implement appropriate State fisheries management and conservation provisions in each of the fee-share fisheries that establishes a program that meets the requirements of 16 U.S.C. 141861a(b)(1)(B) as if it were applicable to fee-share fisheries.*

(j) *The term "fee-share fishery" means a fishery, other than the reduction fishery, whose members are eligible to vote in a referendum for an industry fee system under paragraph (c). The term "reduction fishery" means that portion of a fishery holding limited entry fishing permits endorsed for the operation of trawl gear and issued under the Federal Pacific Coast Groundfish Fishery Management Plan.*

(b) *Neither the National Oceanic and Atmospheric Administration National Weather Service nor Galveston County will charge the other rent for use of the space and each will be responsible for the operation, maintenance and renovation costs it incurs.*

SEC. 315. Notwithstanding any other provision of law, for fiscal year 2003 the Secretaries of Agriculture and the Interior are authorized to limit competition for watershed restoration project contracts as part of the "Jobs in the Woods" Program established in Region 10 of the Forest Service to individuals and entities in historically timber-dependent areas in the States of Washington, Oregon, northern California, Idaho, Montana, and Alaska that have been affected by reduced timber harvesting on Federal lands. The Secretaries shall consider the benefits to the local economy in evaluating bids and designing procurements which create economic opportunities for local contractors.

SEC. 316. Amounts deposited during fiscal year 2002 in the roads and trails fund provided for in the 14th paragraph under the heading "FOREST SERVICE" of the Act of March 4, 1913 (37 Stat. 843; 16 U.S.C. 501), shall be used by the Secretary of Agriculture, without regard to the State in which the amounts were derived, to repair or reconstruct roads, bridges, and trails on National Forest System lands or to carry out and administer projects to improve forest health conditions, which may include the repair or reconstruction of roads, bridges, and trails on National Forest System lands in the wildland-community interface where there is an abnormally high risk of fire. The projects shall emphasize reducing risks to human safety and public health and property and enhancing ecological functions, long-term forest productivity, and biological integrity. The projects may be completed in a subsequent fiscal year. Funds shall not be expended under this section to replace funds which would otherwise appropriately be expended from the timber salvage sale fund. Nothing in this section shall be construed to exempt any project from any environmental law.

SEC. 317. Other than in emergency situations, none of the funds in this Act may be used to operate telephone answering machines during core business hours unless such answering machines include an option that enables callers to reach promptly an individual on-duty with the agency being contacted.

SEC. 318. No timber sale in Region 10 shall be advertised if the indicated rate is deficit when appraised using a residual value approach that assigns domestic Alaska values for western redcedar. Program accomplishments shall be based on volume sold. Should Region 10 sell, in fiscal year 2003, the annual average portion of the decadal allowable sale quantity called for in the current Tongass Land Management Plan in sales which are not deficit when appraised using a residual value approach that assigns domestic Alaska values for western redcedar, all of the western redcedar timber from those sales which is surplus to the needs of domestic processors in Alaska, shall be made available to domestic processors in the contiguous 48 United States at prevailing domestic prices. Should Region 10 sell, in fiscal year 2003, less than the annual average portion of the decadal allowable sale quantity called for in the Tongass Land Management Plan in sales which are not deficit when appraised using a residual value approach that assigns domestic Alaska values for western redcedar, the volume of western redcedar timber available to domestic processors at prevailing domestic prices in the contiguous 48 United States shall be that volume: (i) which is surplus to the needs of domestic processors in Alaska, and (ii) is that percent of the surplus western redcedar volume determined by calculating the ratio of the total timber volume which has been sold on the Tongass to the annual average portion of the decadal allowable sale quantity called for in the current Tongass Land Management Plan. The percentage shall be calculated by Region 10 on a rolling basis as each sale is sold (for purposes of this amendment, a "rolling basis" shall mean that the determination of how much western redcedar is eligible for sale to various markets shall be made at the time each sale is awarded). Western redcedar shall be deemed "surplus to the needs of domestic processors in Alaska" when the timber sale holder has presented to the Forest Service documentation of the inability to sell western redcedar logs from a given sale to domestic Alaska processors at a price equal to or greater than the log selling value stated in the contract. All additional western redcedar volume not sold to Alaska or contiguous 48 United States domestic processors may be exported to foreign markets at the election of the timber sale holder. All Alaska yellow cedar may be sold at prevailing export prices at the election of the timber sale holder.

SEC. 319. A project undertaken by the Forest Service under the Recreation Fee Demonstration Program as authorized by section 315 of the Department of the Interior and Related Agencies Appropriations Act for Fiscal Year 1996, as amended, shall not result in—

(1) displacement of the holder of an authorization to provide commercial recreation services on Federal lands. Prior to initiating any project, the Secretary shall consult with potentially affected holders to determine what impacts the project may have on the holders. Any modifications to the authorization shall be made within the terms and conditions of the authorization and authorities of the impacted agency.

(2) the return of a commercial recreation service to the Secretary for operation when such services have been provided in the past by a private sector provider, except when—

(A) the private sector provider fails to bid on such opportunities;

(B) the private sector provider terminates its relationship with the agency; or

(C) the agency revokes the permit for non-compliance with the terms and conditions of the authorization.

In such cases, the agency may use the Recreation Fee Demonstration Program to provide for operations until a subsequent operator can be found through the offering of a new prospectus.

SEC. 320. Prior to October 1, 2003, the Secretary of Agriculture shall not be considered to be in violation of subparagraph 6(f)(5)(A) of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1604(f)(5)(A)) solely because more than 15 years have passed without revision of the plan for a unit of the National Forest System. Nothing in this section exempts the Secretary from any other requirement of the Forest and Rangeland Renewable Resources Planning Act (16 U.S.C. 1600 et seq.) or any other law: Provided, That if the Secretary is not acting expeditiously and in good faith, within the funding available, to revise a plan for a unit of the National Forest System, this section shall be void with respect to such plan and a court of proper jurisdiction may order completion of the plan on an accelerated basis.

SEC. 321. Until September 30, 2005, the authority of the Secretary of Agriculture to enter into an agreement under the first section of Public Law 94-148 (16 U.S.C. 565a-1) for a purpose described in such section includes the authority to use that legal instrument when the principal purpose of the resulting relationship is to the mutually significant benefit of the Forest Service and the other party or parties to the agreement, including nonprofit entities. In entering into agreements with foreign countries pursuant to the Wildfire Suppression Assistance Act (42 U.S.C. 1856m) the Secretary of Agriculture and the Secretary of the Interior are authorized to enter into reciprocal agreements in which the individuals furnished under said agreements to provide wildfire services are considered, for purposes of tort liability, employees of the country receiving said services when the individuals are fighting fires. The Secretary of Agriculture or the Secretary of the Interior shall not enter into any agreement under this provision unless the foreign country (either directly or through its fire organization) agrees to assume any and all liability for the acts or omissions of American firefighters engaged in firefighting in a foreign country. When an agreement is reached for furnishing fire fighting services,

(2) *The 192,000,000 acres of national forests and grasslands of the National Forest System managed for multiple uses by the Forest Service provide an ideal setting for such organizational camps.*

(3) *The Federal Government should charge land use fees for the occupancy and use of National Forest System lands by such organizational camps that, while based on the fair market value of the land in use, also recognize the benefits provided to society by such organizational camps, do not preclude the ability of such organizational camps from utilizing these lands, and permit capital investment in, and maintenance of, camp facilities by such organizational camps or their sponsoring organizations.*

(4) *Organizational camps should—*

(A) *ensure that their facilities meet applicable building and safety codes, including fire and health codes;*

(B) *have annual inspections as required by local law, including at a minimum inspections for fire and food safety; and*

(C) *have in place safety plans that address fire and medical emergencies and encounters with wildlife.*

(C) *does not have as its primary purpose raising revenue through commercial activities.*

(2) *The term “Secretary” means the Secretary of Agriculture, acting through the Chief of the Forest Service.*

(3) The term “individual with a disability” has the meaning given the term in section 7(20) of the Rehabilitation Act of 1973 (29 U.S.C. 705(20)).

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the resolution (H.J. Res. 2) making further continuing appropriations for the fiscal year ending September 30, 2003, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effects of the action agreed upon by the managers and recommended in the accompanying conference report.

This conference agreement includes the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2003; the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 2003; the District of Columbia Appropriations Act, 2003; the Energy and Water Development Appropriations Act, 2003; the Foreign Operations, Export Financing, and Related Agencies Appropriations Act, 2003; the Department of the Interior and Related Agencies Appropriations Act, 2003; the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2003; the Legislative Branch Appropriations Act, 2003; the Department of Transportation and Related Agencies Appropriations Act, 2003; the Treasury and General Government Appropriations Act, 2003; the Departments of Veterans Affairs and Urban Development, and Independent Agencies Appropriations Act, 2003; the Homeland Security Act Amendments of 2003; additional appropriations for the Department of Defense; miscellaneous appropriations; and amendments to the Price-Anderson Act.

DIVISION A—AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES PROGRAMS APPROPRIATIONS, 2003

CONGRESSIONAL DIRECTIVES

The statement of the managers remains silent on provisions that were in both the House directives as contained in H. Rept. 107-623, and the Senate directives as contained in the Congressional Record of January 15, 2003, pages S356-S410, that remain unchanged by this conference agreement, except as noted in this statement of the managers.

For many years, this Act has included bill language regarding the employment of temporary personnel as authorized by 5 U.S.C. 3109 and/or 7 U.S.C. 2225. The conference agreement does not include this language under individual accounts in this Act, because it appears that this authority is no longer required. In particular, this authority was not utilized by the Farm Service Agency during fiscal year 2001, the most recent year for which information was

provided. The conferees agree to provide authority to employ temporary personnel as a general provision of this Act (section 703). The exercise of this authority will require detailed justification, notification to the House and Senate Committees on Appropriations, and advance approval of the Committees.

The conferees agree that Federal Employees' Compensation Act (FECA) costs be absorbed within appropriations provided herein.

TITLE I—AGRICULTURAL PROGRAMS

PRODUCTION, PROCESSING, AND MARKETING

OFFICE OF THE SECRETARY

The conference agreement provides \$3,412,000 for the Office of the Secretary as proposed by the Senate instead of \$31,629,000 as proposed by the House.

The conferees are seriously concerned by the growing frequency of departmental and agency initiatives for which the required prior notification to the Committees on Appropriations of the House and Senate has not been provided. The conferees note the efficiencies which attach to the least possible statutory requirements and the benefits which accrue to the more flexible Congressional direction expressed in Committee reports. However, the continuing practice of reliance on Committee report language must be accompanied by departmental and agency compliance with Congressional directives. Section 720 of this Act, and similar language included in previous acts, provide detailed guidelines to the U.S. Department of Agriculture for those activities that require prior notification to the Congress. Such notification was not provided in the recent release of Section 32 funds for the creation of a Livestock Compensation Program, the establishment of a Faith-Based and Community Initiatives Center, the improper use of Conservation Operations funds for the implementation of Farm Bill programs, and other similar violations of statutory reprogramming and prior notification requirements. The conferees expect full compliance with Section 720 in the areas of state office collocations, administrative and information technology convergence, and all other activities that fall within the scope of that section. The conferees also expect that no reprogramming of funds occur in the absence of an emergency or not as a consequence of unforeseen events. Further, the conferees note that when an agency submits a reprogramming request to the House and Senate Committees on Appropriations and does not receive identical responses from the House and Senate, it is the responsibility of the agency to reconcile the House and Senate differences before proceeding, and if reconciliation is not possible, to consider the reprogramming request unapproved.

The conferees are concerned that the U.S. and Canada made little progress in implementing the harmonized standards for pesticide regulation as required by the North American Free Trade Agreement (NAFTA). The conferees direct USDA, in consultation with the Environmental Protection Agency, to institute these standards so that concerns in the pricing of agricultural products for the farmers will be addressed. The conferees also direct USDA

to report on the planned actions taken to implement the harmonization standards to the Committees on Appropriations within 180 days of enactment of this Act.

EXECUTIVE OPERATIONS

CHIEF ECONOMIST

The conference agreement provides \$8,566,000 for the Office of the Chief Economist as proposed by the House instead of \$12,016,000 as proposed by the Senate.

The President's budget request included additional funding for the Website for Commodity Market Information, Weather Information and Drought Management, and to Analyze Critical Farm Energy Data. The conferees provide an increase of \$692,000 to be applied to the highest priority needs for which additional funding was requested.

NATIONAL APPEALS DIVISION

The conference agreement provides \$13,759,000 for the National Appeals Division as proposed by both the House and Senate.

OFFICE OF BUDGET AND PROGRAM ANALYSIS

The conference agreement provides \$7,358,000 for the Office of Budget and Program Analysis as proposed by both the House and Senate.

OFFICE OF THE CHIEF INFORMATION OFFICER

The conference agreement provides \$15,251,000 for the Office of the Chief Information Officer as proposed by the House instead of \$31,275,000 as proposed by the Senate.

The conferees expect that increases provided above fiscal year 2002 shall go toward the highest priority items contained in the fiscal year 2003 budget request.

COMMON COMPUTING ENVIRONMENT

The conference agreement provides \$133,155,000 for common computing environment as proposed by both the House and Senate.

OFFICE OF THE CHIEF FINANCIAL OFFICER

The conference agreement provides \$5,572,000 for the Office of the Chief Financial Officer as proposed by the House instead of \$7,877,000 as proposed by the Senate.

WORKING CAPITAL FUND

The conference agreement does not provide \$41,000,000 for the Working Capital Fund as proposed by the House. The Senate bill contained no such provision. The conferees note that \$21,700,000 in fiscal year 2002 balances have been transferred to the Working Capital Fund, and will be available to meet the needs for which an appropriation was requested.

The conferees direct the Secretary of Agriculture to submit a feasibility study to the Committees on Appropriations on the need

for remote mirroring backup technology of the National Finance Center's data. This study should include a breakdown of the costs and the timeframe associated with acquiring such technology, and should designate an appropriate physical location for the backup site. The study shall also specify how the costs of the remote data capability should be assigned and paid for by non-USDA users of the National Finance Center, including the Federal Retirement Thrift Investment Board. Upon approval by the Committees on Appropriations, the funds appropriated to the Working Capital Fund shall be made available to provide mirror imaging technology for the National Finance Center.

OFFICE OF THE ASSISTANT SECRETARY FOR CIVIL RIGHTS

The conference agreement provides \$400,000 for the Office of the Assistant Secretary for Civil Rights as proposed by the Senate. The House bill contained no such provision.

OFFICE OF THE ASSISTANT SECRETARY FOR ADMINISTRATION

The conference agreement provides \$664,000 for the Office of the Assistant Secretary for Administration as proposed by the House instead of \$780,000 as proposed by the Senate.

AGRICULTURE BUILDINGS AND FACILITIES AND RENTAL PAYMENTS

The conference agreement provides \$196,781,000 for agriculture buildings and facilities and rental payments instead of \$195,900,000 as proposed by the House and \$197,662,000 as proposed by the Senate.

The President's budget request includes additional funding for the Fair Labor Standards and Service Contract Acts and for major repairs and improvements to headquarters. The conferees provide an increase of \$881,000 to be applied to the highest priority needs for which additional funding is requested.

HAZARDOUS MATERIALS MANAGEMENT

The conference agreement provides \$15,685,000 for Hazardous Materials Management as proposed by the House and Senate.

DEPARTMENTAL ADMINISTRATION

The conference agreement provides \$38,095,000 for Departmental Administration as proposed by the House instead of \$42,479,000 as proposed by the Senate.

OFFICE OF THE ASSISTANT SECRETARY FOR CONGRESSIONAL RELATIONS

The conference agreement provides \$3,821,000 for the Office of the Assistant Secretary for Congressional Relations as proposed by the House instead of \$4,157,000 as proposed by the Senate.

OFFICE OF COMMUNICATIONS

The conference agreement provides \$9,140,000 for the Office of Communications as proposed by the House instead of \$9,637,000 as proposed by the Senate.

The conferees direct the Office to provide to the Committees on Appropriations, in either electronic or facsimile format, as requested, copies of any open source news material made available to USDA officials that is purchased or otherwise obtained using appropriated funds, amending licenses as necessary.

OFFICE OF THE INSPECTOR GENERAL

The conference agreement provides \$74,097,000 for the Office of the Inspector General as proposed by the House instead of \$78,127,000 as proposed by the Senate.

The conference agreement does not include increased funds in this account for financial statement audits for the Food and Nutrition Service and Rural Development programs, or the increase requested for Forest Service audits. Funds for FNS and RD audits are included in the accounts for those programs, as requested.

OFFICE OF THE GENERAL COUNSEL

The conference agreement provides \$35,017,000 for the Office of the General Counsel instead of \$34,446,000 as proposed by the House and \$35,588,000 as proposed by the Senate.

The conferees expect that increases provided above the fiscal year 2002 level shall go toward highest priority items contained in the fiscal year 2003 budget request.

OFFICE OF THE UNDER SECRETARY FOR RESEARCH, EDUCATION AND ECONOMICS

The conference agreement provides \$588,000 for the Office of the Under Secretary for Research, Education and Economics as proposed by the House instead of \$780,000 as proposed by the Senate.

ECONOMIC RESEARCH SERVICE

The conference agreement provides \$69,123,000 for the Economic Research Service instead of \$73,329,000 as proposed by the House and \$65,123,000 as proposed by the Senate.

The conferees provide \$5,000,000 for ERS to carry out food and nutrition studies, of which \$1,000,000 is for the Small Research Grants Program. The conference agreement provides full funding for the ERS portion of the Agricultural Resource Management Survey.

The conferees are aware that the current primary livestock model used by USDA has not been re-estimated in its entirety since 1990 and much of the data used to develop this model was from the 1960s and 1970s, long before packer concentration, captive supplies and increasing imports. These factors have had significant impacts on the livestock industry. The conferees direct the Economic Research Service to update, revise, and improve livestock modeling capacity.

The conferees are concerned that ERS appears to have ceased publishing regional monthly production costs for dairy farmers. These monthly production calculations are a valuable tool and helpful to Congress in developing dairy policy. As such the conferees strongly urge the Department to publish or otherwise make available regional monthly production cost calculations for dairy farmers.

The conferees request the Economic Research Service to conduct a study of the Cranberry Marketing Committee and its administration of the Cranberry Marketing Order and report to the Committees on Appropriations by September 30, 2003. The study shall focus on the economics of the cranberry industry and the response of the Cranberry Marketing Committee to the unprecedented losses incurred by cranberry growers since 1999. The report of the study shall include recommendations to ensure that the Cranberry Marketing Order is administered in a manner that benefits cranberry growers and promotes the public interest.

NATIONAL AGRICULTURAL STATISTICS SERVICE

The conference agreement provides \$139,354,000 for the National Agricultural Statistics Service instead of \$137,858,000 as proposed by the House and \$140,854,000 as proposed by the Senate.

The conference agreement includes full funding for the NASS portion of the Agricultural Resource Management Survey, and \$1,500,000 for e-government activities.

AGRICULTURAL RESEARCH SERVICE

SALARIES AND EXPENSES

The conference agreement provides \$1,052,770,000 for the Agricultural Research Service, Salaries and Expenses, instead of \$1,002,193,000 as proposed by the House and \$1,053,597,000 as proposed by the Senate.

The conferees have agreed to increased funding for the following laboratories and areas of research: Genetic Resources Research, Riverside, CA, Parlier, CA, Corvallis, OR, Ames, IA, Davis, CA, Madison, WI, and Pullman, WA \$200,000 each; Agricultural Genome Sequencing at Weslaco, TX, \$250,000; Ithaca, NY, and Albany, CA, \$400,000 each; Improve Biomass Feedstock for Production of Energy and Biobased Products at Albany, CA, Athens, GA, and Madison, WI, \$200,000 each; Technologies for Biobased Products at Albany, CA, \$400,000, Athens, GA, \$200,000, and Peoria, IL, \$800,000; Improve Conversion of Agricultural Materials to Biofuels at Bushland, TX, Albany, CA, and Peoria, IL, \$200,000 each; Determine Rates of Gene Flow from Crops to Nearby Vegetation at Corvallis, OR, and Ames, IA, \$225,000 each; Develop and Test Novel Strategies to Prevent Pest Resistance to Plant-Incorporated Protectants at Wapato, WA, \$225,000; Limit Transgene Activity to Specific Tissues at Albany, CA, and Ames, IA, \$400,000 each, and Ithaca, NY, and Peoria, IL, \$225,000 each; Develop Biocontrol Programs for Invasive Pests at Davis, CA, Frederick MD, Newark, DE, \$200,000 each, and Wooster, OH, \$250,000; Identify and Characterize Exotic Plant Diseases at Wooster, OH, Frederick,

The conference agreement provides for the redirection of funding for hyperspectral imaging technology research, as proposed by the Senate.

The conferees expect that close cooperation will be established and maintained among the nursery and floral industry, the Agricultural Research Service, the University of Tennessee, and the Tennessee State University / ARS Nursery Crop Research Station in McMinnville, Tennessee, to avoid duplication of effort. The conference agreement includes \$750,000 for this collaborative ornamental horticulture program.

The conference agreement provides an increase of \$50,000 from the fiscal year 2002 level to continue research on shiitake mushrooms at the South Central Family Farm Research Center at Booneville, AR.

The conference agreement continues the fiscal year 2002 level of funding for all research projects proposed to be terminated in the President's budget.

BUILDINGS AND FACILITIES

The conference agreement provides \$119,480,000 for the Agricultural Research Service, Buildings and Facilities, instead of \$95,280,000 as proposed by the House and \$100,955,000 as proposed by the Senate.

National Agricultural Library.—The conferees understand that a number of cracks have occurred within the brick veneer structure of the Abraham Lincoln National Agricultural Library in Beltsville, Maryland, posing a serious life-safety concern for pedestrian traffic. The conference agreement provides \$1,500,000 to investigate and initiate remedy for this serious issue.

U.S. National Arboretum.—A study to determine the underlying cause of water quality degradation in the Hickey Run area was completed in 1999. This study provided numerous recommendations to reduce the waste and pollution entering the U.S. National Arboretum in the District of Columbia. The conference agreement provides \$1,700,000 for Hickey Run pollution abatement activities to be carried out at the U.S. National Arboretum.

Completion of facilities.—The conference agreement provides funding necessary to complete the construction of research facilities at the following locations: Maricopa, AZ; Aberdeen, ID; Manhattan, KS; Orono, ME; St. Paul, MN; Oxford, MS; Poplarville, MS; Woodward, OK; Brookings, SD; Logan, UT; and Madison, WI. The conferees expect that these construction projects will deliver complete and useable facilities within the appropriations provided under this Act.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

FOOD AND DRUG ADMINISTRATION

SALARIES AND EXPENSES

The conference agreement provides total appropriations, including Prescription Drug User Fee Act and Medical Device User Fee Act collections, of \$1,630,727,000 for the salaries and expenses of the Food and Drug Administration, instead of \$1,599,602,000 as proposed by the House and \$1,631,530,000 as proposed by the Senate, and provides specific amounts by FDA activity as reflected in the following table.

Program	Budget authority	Prescription drug user fees	Medical device user fees	Total
Foods	413,347,000	0	0	413,347,000
Human Drugs	278,067,000	148,604,000	0	426,671,000

Rental Payments to GSA	98,876,000	7,802,000	1,591,000	108,269,000
Net Appropriation	1,382,702,000	222,900,000	25,125,000	1,630,727,000

Resources for the field force of FDA, the Office of Regulatory Affairs, are included in the program amounts above, and total \$474,315,000. Included are \$264,235,000 for foods, \$95,155,000 for human drugs, \$30,060,000 for biologics, \$31,097,000 for animal drugs and feeds, and \$53,768,000 for devices. The conferees note that the agency has flexibility in using its field resources to respond to public health emergencies within the existing reprogramming requirements and expect the agency to use that flexibility when necessary.

The conference agreement provides the full budget authority requested for counter-terrorism activities, which is an increase of \$152,276,000 over the regular fiscal year 2002 appropriation for a total of \$159,048,000. The conference agreement provides increases of \$5,000,000 for adverse event monitoring and reporting and \$28,552,000 for pay cost increases as requested in the President's fiscal year 2003 budget.

The conference agreement makes \$25,125,000 in new medical device user fees available for the agency, as proposed by the Senate. This provision was not in the House bill, since it preceded passage of the authorizing legislation. The conference agreement provides a budget authority increase of \$15,199,000 for the device program, which includes \$4,000,000 over the budget request, instead of an increase of \$19,199,000, as proposed by the Senate, and \$11,199,000 as proposed by the House. The device program total including user fees is \$208,685,000, which represents a \$29,164,000 increase over the fiscal year 2002 regular appropriation. The conference agreement also provides an increase of \$6,227,000 in device user fees for the biologics program. The conferees expect that these substantial investments will significantly reduce application review times for medical devices.

The conference agreement funds the generic drugs program at \$44,532,000, an increase of \$5,332,000 over the fiscal year 2002 level, and expect the increase provided to be applied to meeting statutory timeframes for application review. The generics total includes \$750,000 above the budget request, instead of \$1,500,000 as proposed by the Senate and no increase above the request as proposed by the House. The conferees note that FDA should continue funding generic drug education activities at no less than \$400,000 and expect increased consumer education in 2003.

The conference agreement makes \$222,900,000 available to FDA for prescription drug user fees, a \$61,184,000 increase over the amount available in fiscal year 2002. The conference agreement also makes mammography user fees and export certification user fees available to the agency.

The conferees do not approve the proposed transfer of the Offices of Public Affairs and Legislative Affairs out of the agency and include funding for those offices in the total provided for this account.

The conferees note the importance of continued support for the Office of Women's Health, and direct that no less than \$3,000,000 be made available to that office. In addition, the conferees note that the Food and Drug Administration (FDA) has responded to the Women's Health Initiative (WHI) by recommending updated labeling for the entire class of hormone replacement therapy products. While the conferees believe that the FDA's action was an important step in the right direction, the Federal government needs to go even further in communicating clear and concise information to women and health professionals about hormone therapy. The conferees encourage the FDA to partner with medical professional and women's health groups, as well as other Federal agencies, to conduct a public awareness outreach campaign about the use of hormone therapy, including treatment of menopausal symptoms, which was not addressed in the WHI study.

The conferees provide an increase of \$1,000,000 for the CFSAN Adverse Event Reporting System (CAERS), instead of no increase as proposed by the House and \$2,000,000 as proposed by the Senate, for a total of \$6,600,000. CAERS is designed to ensure prompt identification of and response to adverse health events related to foods, including dietary supplements.

The conference agreement also provides an increase of \$250,000 for development of advanced test methods for foods at New Mexico State University, instead of no increase as proposed by the House and \$503,000 as proposed by the Senate.

The conference agreement includes a total of \$8,300,000 for the Unified Financial Management System, as proposed by both the House and Senate. The conferees note that any additional resources for this system are subject to notification and approval by the Committees on Appropriations.

The conferees direct that at least \$2,100,000 of the funds appropriated for FDA activities be used in support of Codex Alimentarius activities, as proposed by the Senate.

The conferees are aware that the Department of Health and Human Services is currently working to ensure that health care providers and first responders are vaccinated in the event of a public health emergency. Recognizing that a small percentage of the population may have an allergic reaction to natural rubber, the conferees encourage the Secretary to ensure that alternatives are readily accessible to those individuals allergic to the gloves normally provided. Additionally, the conferees are aware that the FDA proposed regulations in 1999 to reclassify all surgeons' and patient examination gloves as Class II medical devices. The conferees encourage the FDA to finalize those regulations.

The conferees are aware that the FDA has not finalized its proposed rule to require manufacturer tracking of blood-derived products and prompt patient notification of adverse events, and request a report on the status of the rule by March 1, 2003.

The conferees are aware of concerns regarding the sale of turtles as pets. The occurrence of Salmonella is frequent in all reptiles sold as pets, yet the FDA has banned only the sale of turtles under a certain size. The conferees expect the agency to respond to citizen petitions on this topic promptly. The conferees expect a report by March 1, 2003, describing the current regulation, and the status of the agency's response to related citizen petitions.

The conferees believe that print advertisements for pharmaceuticals should present information relating to side effects, contraindications and the effectiveness of advertised pharmaceuticals in the format that is most useful to consumers consistent with existing law. The conferees are aware that FDA addressed the issue of requirements for print drug advertisements in an April 2001 draft guidance. The conferees encourage FDA to work with consumers and industry to revise this draft guidance as necessary and move toward its finalization.

The conferees are concerned with the number of reprogramming proposals submitted for consideration by the FDA, and would like to remind the Agency that reprogramming requests should be submitted only in the case of an unforeseeable emergency, or situation that could not have been predicted when formulating the budget request for the current fiscal year. Further, the conferees note that when an agency submits a reprogramming request to the Committees on Appropriations and does not receive identical responses from the House and Senate, it is the responsibility of the agency to reconcile the House and Senate differences before pro-

ceeding, and if reconciliation is not possible, to consider the re-programming request unapproved.

BUILDINGS AND FACILITIES

The conference agreement includes \$8,000,000 for buildings and facilities, as proposed by the House, instead of \$11,000,000, as proposed by the Senate. The conference agreement fully funds the budget request.

INDEPENDENT AGENCIES

COMMODITY FUTURES TRADING COMMISSION

The conference agreement provides \$85,985,000 for the Commodity Futures Trading Commission, instead of \$79,884,000 as proposed by the House and \$93,985,000 as proposed by the Senate. The total includes \$8,815,000 for pay parity, as authorized in P.L. 107–171, and \$700,000 for retention bonuses.

The conferees understand that the Commission has undertaken an investigation of Enron, its affiliates, and energy trading by other entities, which has required significant resources from the agency's enforcement program. The conferees further understand that the agency's enforcement staff has devoted the resources of 30 staff members (which is equivalent to 25 percent of the staff for the Division of Enforcement), interviewed or taken testimony from at least 170 individuals, and reviewed in excess of 2 million pages of documents. The conferees direct the Commission to provide a report on its activities in this area prior to the fiscal year 2004 appropriations hearings.

FARM CREDIT ADMINISTRATION

LIMITATION ON ADMINISTRATIVE EXPENSES

The conference agreement includes a limitation of \$38,400,000 on administrative expenses of the Farm Credit Administration (FCA), as proposed by the House, instead of \$38,404,000, as proposed by the Senate.

The conferees recommend an increase in the limitation of FCA's administrative expenses to allow the FCA flexibility to deal with hiring and retention issues. This flexibility would allow the FCA Board to make adjustments to the budget, if necessary. The conferees understand that this action will not result in an increase in the amount of assessments on system institutions during the current fiscal year. The conferees request a report on the outcome of the FCA study related to hiring and retention needs, including the actual limitation amount necessary, the amount of carryover funds in FCA's reserve, and the change, if any, in the amount of the assessments on system institutions.

TITLE VII—GENERAL PROVISIONS

House and Senate Section 703.—The conference agreement deletes the old Section 703 authorizing research and service work under the Bankhead-Jones Act.

House Section 736.—The conference agreement (Section 703) authorizes employment pursuant to the Department of Agriculture Organic Act of 1944 and 5 U.S.C. 3109.

House and Senate Section 704.—The conference agreement (Section 704) retains the existing general provision regarding unobligated balance transfers to the Working Capital Fund.

House and Senate Section 705.—New obligational authority language.

House and Senate Section 713.—The conference agreement (Section 713) gives permanent authority to the Agricultural Marketing Service, the Grain Inspection, Packers and Stockyard Administration, the Animal and Plant Health Inspection Service, and the Food Safety & Inspection Service to use cooperative agreements, notwithstanding chapter 63 of title 31, United States Code.

House and Senate Section 720.—The conference agreement (Section 720) modifies Subsection (c) to include “the Secretary of Agriculture, the Secretary of Health and Human Services, or the Chairman of the Commodity Futures Trading Commission.” The conferees are seriously concerned by the growing frequency of departmental and agency initiatives for which the required prior notification to the Committees on Appropriations has not been provided. The conferees note the efficiencies which attach to the least possible statutory requirements and the benefits which accrue to the more flexible Congressional direction expressed in Committee reports. However, the continuing practice of reliance on Committee report language must be accompanied by departmental and agency compliance with Congressional directives. Section 720 of this Act, and similar language included in previous acts, provide detailed guidelines to the U.S. Department of Agriculture, the Food and Drug Administration, and the Commodity Futures Trading Commission for those activities that require prior notification to the Congress. Such notification was not provided in the recent release of Section 32 funds for the creation of a Livestock Compensation Program; the establishment of a Faith-Based and Community Initiatives Center; the improper use of Conservation Operations funds for the implementation of Farm Bill programs; and other similar violations of statutory reprogramming and prior notification requirements. The conferees expect full compliance with Section 720 in the areas of state office collocations, administrative and information technology convergence, and all other activities that fall within the scope of that section. The conferees also expect that no reprogramming of funds occur in the absence of an emergency or not as a consequence of unforeseen events. Further, the conferees note that when an agency submits a reprogramming request to the Committees on Appropriations and does not receive identical responses from the House and Senate, it is the responsibility of the agency to reconcile the House and Senate differences before proceeding, and if reconciliation is not possible, to consider the reprogramming request unapproved.

House and Senate Section 721.—The conference agreement (Section 721) does not include the date change as proposed by the House.

House and Senate Section 722.—The conference agreement (Section 722) does not include the date change as proposed by the House.

House Section 734.—The conference agreement (Section 733) prohibits any transfer of funds appropriated in this Act except as authorized by this or any other appropriation Act.

Senate Section 729.—The conference agreement (Section 734) prohibits the closure or relocation of the Food and Drug Administration Division of Pharmaceutical Analysis in St. Louis, Missouri, outside the city or county limits.

Senate Section 730.—The conference agreement does not include language that prohibits funding the salary of anyone violating the “Buy America Act.”

Senate Sections 742 and 743.—The conference agreement (Section 744) combines these sections and authorizes watershed and flood prevention operations financial and technical assistance for the Kuhn Bayou (Point Remove) project in AR, and the Matanuska River erosion control project in AK.

Senate Section 744.—The conference agreement (Section 745) amends the Food for Progress Act of 1985.

House Section 737.—The conference agreement does not include a general provision limiting the alteration and repair of buildings.

House Section 738.—The conference agreement does not include language regarding citrus canker. This matter is addressed in Division N of this conference agreement.

House Section 739.—The conference agreement does not include House Section 739 regarding the release of sensitive information. The Senate had no similar provision. The conferees fully expect that all departments and agencies for which funding is made available by this Act give careful scrutiny to the release of information in order to ensure adequate protections are maintained for all departmental and agency personnel. The conferees do not imply that there should be a disruption of routine agency reporting of program activities directed either through statute or agency practice, but that general safeguards should be in place to ensure security for all facilities and personnel.

House Section 740.—The conference agreement (Section 755) makes the municipality of Carolina, Puerto Rico, eligible for grants and loans of the Rural Utilities Service.

House Section 741.—The conference agreement (Section 756) includes language prohibiting the use of funds to carry out section 7404 of P.L. 107-171. This prohibition will allow the Department to conduct its assessment of a National Academy of Sciences study that was released on December 10, 2002. The conferees agree that any similar study must be thoroughly justified prior to any expenditure of funds.

House Section 742.—The conference agreement (Section 757) authorizes the Agricultural Marketing Service and the Grain Inspection, Packers and Stockyards Administration, to purchase interest-bearing investments outside of Treasury without posting them as obligations and outlays in the records of the agency as long as they are insured and/or collateralized.

Senate Section 761.—The conference agreement does not include language expressing the Sense of the Senate regarding conservation technical assistance. The House had no similar provision. The conferees very strongly concur with an opinion issued by the General Accounting Office (GAO) on October 8, 2002, that conservation technical assistance for a number of Farm Bill conservation programs should be provided from funds of the Commodity Credit Corporation and that use of Conservation Operations appropriations for that purpose is contrary to law. Elsewhere in this Act, language is provided consistent with the legal finding of the GAO on this issue. The conferees direct the Administration to reconsider immediately its position in order to prevent USDA from being responsible for making impossible the delivery of conservation programs necessary for protection of this nation’s natural resources.

Senate Section 762.—The conference agreement (Section 766) extends the time period for certain Rural Housing Service funds.

Senate Section 763.—The conference agreement includes language (Section 767) relating to corn acreage.

Senate Section 764.—The conference agreement does not include Senate section 764 expressing the Sense of the Senate regarding international humanitarian food assistance. The conferees note the worsening conditions in many nations where adverse weather, social upheaval, warfare, and other causes have placed millions of people in dire threat of starvation. In addition, in-

creased commodity prices have further strained the resources for food aid made available through direct appropriations. The conferees direct the Secretary of Agriculture to give immediate attention to the growing risk and reality of this global tragedy, as witnessed in Africa and other continents, and make use of existing authorities of the Commodity Credit Corporation to assist in food assistance to those areas. In addition, the Secretary should consult with the President on the need to submit an emergency supplemental request to the Congress to make additional resources available for this purpose.

Senate Section 765.—The conference agreement does not include language on the sale of milk into California.

The conference agreement (Section 768) rescinds \$11,000,000 of fiscal year 2002 and prior year funds out of section 523(b)(1)(A) of the Housing Act of 1949.

The conference agreement (Section 770) includes language regarding grain warehouses.

The conference agreement (Section 771) includes language regarding organic standards for meat.

DIVISION B—COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 2003

TITLE I

DEPARTMENT OF JUSTICE

GENERAL ADMINISTRATION

SALARIES AND EXPENSES

The conference agreement recommends a total of \$100,579,000 for General Administration for fiscal year 2003. This account supports the development of policy objectives and the overall management of the Department of Justice. The recommendation provides

inflationary adjustments to maintain the current operating level in fiscal year 2003, and includes an increase of \$2,000,000 as requested for the Office of Intelligence Policy and Review (OIPR) to address the increase in Foreign Intelligence Surveillance Act (FISA) requests. The conferees expect OIPR to provide quarterly briefings to the Committees on Appropriations beginning April 1, 2003 on FISA-related activities, issues, and compliance with Congressional directives. The conferees expect that of the funding being transferred to the Department of Homeland Security from General Administration, that \$3,000,000 shall be used for the chemical plant vulnerability assessments as authorized under Public Law 106-40.

The conferees direct the Justice Department to submit a report to the Committees on Appropriations by June 27, 2003 assessing physical security needs of all domestic and foreign installations. The conferees also direct the Attorney General to submit a report to the Committees on Appropriations no later than June 4, 2003, that includes cost estimates and timelines for developing an International Law Enforcement training academy in Mexico in one of the following states: Chiapas, Durango, Oaxaca, or Yucatan.

The conferees are aware that the Justice Department intends to cap the reimbursement per employee for professional liability insurance (PLI) at \$50, a cut of up to \$65, due to "budget shortfalls". The conferees are unaware of any shortfalls. The Justice Department is directed to reimburse employees for the full amount policy allows for PLI. The Assistant Attorney General for Administration is directed to issue a circular to components to that effect and to confirm by letter, with circular attached, to the Committees on Appropriations that this directive has been implemented.

The conferees are not satisfied with the efforts of the Justice Department and the State Department to repatriate criminal aliens. A recent Supreme Court decision held that criminal aliens cannot be detained indefinitely. The conferees are concerned that potentially violent criminal aliens will be released into the United States because efforts to repatriate these individuals have been unsuccessful. The conferees therefore include bill language directing the Attorney General to notify the Secretary of State in each instance when a foreign country denies or unreasonably delays, under section 243 of the Immigration and Nationality Act, the repatriation of a criminal alien who is a citizen, subject, national or resident of that country. The conferees believe that this language will equip the Secretary of State and the Attorney General with the legal authority to prevent the release of violent criminal aliens in the United States.

The conferees support the Department's efforts to develop a unified financial management system which will bring the Justice Department into compliance with Federal Financial Management Improvement Act accounting system standards and security requirements. The conferees are aware that the unified financial management system is an eligible purpose for retained earnings in the Working Capital Fund and direct the Justice Department to use \$8,900,000 in retained earnings during FY 2003 for this purpose. The conferees believe that Working Capital Fund retained

earnings should be used for specific projects rather than being used to meet recurring costs, such as audit contract expenses.

Consistent with the report submitted to the Committees on Appropriations in May 2002 regarding the number of containers used for storage of classified information, the conference agreement includes necessary sums to continue efforts to replace locks used to store classified information.

The Department is directed to submit a report to the Committees on Appropriations by June 1, 2003 regarding the feasibility of making Foreign Agents Registration Act information available on line to the public, as is data from the Lobbying Disclosure Act.

The conferees remind the Department and its components that the use of recoveries is subject to the requirements included in section 605 of this Act.

The conferees include bill language carried in previous years regarding the position and workyear limits for the Offices of Public Affairs and Legislative Affairs, and include language, carried in previous years, which (1) makes up to \$3,317,000 of this appropriation available until expended for the Departmental building, renovation, maintenance, and security needs; (2) specifies the amount of funding provided for the Department Leadership Office; and (3) authorizes the Attorney General to transfer property to state or local government agencies to support community-based health and safety programs.

JOINT AUTOMATED BOOKING SYSTEM

The conference agreement includes \$15,973,000 for the continued deployment of a Joint Automated Booking System (JABS). The conferees have not adopted the Administration's request to combine JABS activities with the ongoing integration of the Immigration and Naturalization Service's IDENT fingerprint system with the Federal Bureau of Investigation's IAFIS fingerprint system (IDENT/IAFIS). Funding for IDENT/IAFIS activities is provided under a separate account. The conferees expect JABS incentive funds to be distributed to the component or components making the best progress in installing and operating the system.

This funding level enables Justice Department law enforcement components—the U.S. Marshals Service, the Federal Bureau of Investigation, the Drug Enforcement Administration, and the Bureau of Prisons—to share arrest information using a common information technology platform. The Immigration and Naturalization Service, now part of the Department of Homeland Security (DHS), is directed to continue participating in JABS. The Attorney General and the Secretary of Homeland Security shall submit a report to the Committees on Appropriations by June 27, 2003 to determine if other DHS law enforcement components should participate in JABS. The report should include expected operations and maintenance costs, and an assessment of whether state and local law enforcement agencies should have access to JABS. JABS is a secure information system that has automated the booking process, allowing law enforcement agencies to electronically share criminal data to improve criminal identification response times and avoid duplication of booking data entry.

AUTOMATED BIOMETRIC IDENTIFICATION SYSTEM/INTEGRATED
IDENTIFICATION SYSTEM INTEGRATION

The conferees recommend \$9,000,000 for continued integration of the FBI Automated Biometric Identification System and the INS Integrated Automated Fingerprint Identification Systems (IDENT/IAFIS). As noted previously, the conferees do not adopt the Administration's request to establish an Identification Systems Integration account. Of the amount provided, \$1,000,000 is for a pilot program for software for IAFIS that is capable of expedited background checks and that is capable of ten fingerprint to less than ten fingerprint comparisons. This funding level will enable IDENT/IAFIS to be deployed to additional sites, and will provide other refinements to, and planning for, the system. The Department of Justice, in cooperation with the Department of Homeland (DHS), is directed to provide a cost and operational effectiveness analysis, complete with implementation milestones, to the Committees on Appropriations by June 27, 2003. This report should determine if other DHS law enforcement components should participate in this ongoing integration effort.

LEGAL ACTIVITIES OFFICE AUTOMATION

The conference agreement includes \$15,942,000 in direct appropriations for Legal Activities Office Automation (LAOA). In addition, the conferees direct that an additional \$61,185,000 be derived from a transfer from the Working Capital Fund, to provide a total of \$77,127,000 for LAOA activities.

This account centrally funds the acquisition, deployment, and maintenance of Legal Activities Office Automation (LAOA) systems, the largest components of which are the Justice Consolidated Network and the Justice Consolidated Office Network. Funding provided supports ongoing computer modernization programs for the legal divisions, including the Antitrust Division, the Executive Office for Immigration Review, the Community Relations Service, and General Legal Activities. This year, the conference agreement directs that the Bureau of Prisons and Office of Justice Programs begin efforts to migrate onto this network.

The conference agreement includes bill language to provide for expenses related to design, development, engineering, acquisition, and implementation of office automation systems. The recommendation also includes language modified from language carried in previous Appropriations acts regarding the list of participating components.

NARROWBAND COMMUNICATIONS

The conference agreement includes a total of \$101,757,000 for Narrowband Communications, including direct appropriations of \$81,354,000 and \$20,403,000 in recoveries. The conferees note that \$68,043,000 remains unobligated in this account from prior year appropriations, and that funds for new and replacement radios and related costs are also provided in the modular costs allotted to each of the law enforcement components. New bill language is included directing the Attorney General to transfer these modular costs to

the Narrowband account to ensure that funding provided for radios is not diverted for other uses.

The conferees expect the Department to continue implementation of a consolidated, interagency Justice Wireless Network (JWN) to meet component needs and improve wireless capabilities, as such an approach will enhance interoperability and reduce costs associated with narrowband conversion. Amounts provided will be used to continue implementation of the JWN, operate and maintain legacy systems, expand the use of commercial services, and support the Wireless Management Office (WMO). The conferees continue to expect the Department to accommodate narrowband requirements without significant additional new resources. The conferees direct the WMO to continue to submit status reports to the Committee as directed in Public Law 106–553, to include an operational plan for expenditure of funds.

The Department shall provide a report to the Committees on Appropriations by June 27, 2003 regarding the use of radios and any deficiencies noted by Justice law enforcement components during the events of September 11, 2001. The conferees continue to support extensive efforts underway at the Office of Justice Programs regarding the interoperability of State and local law enforcement radios. The Department is directed to determine, in coordination with the National Institute of Justice, if there are interoperability solutions that have been developed for state and local law enforcement that could be applicable to Federal law enforcement communication needs. No funding is provided under this account for the Public Safety Wireless Information Network (PSWIN). Instead, the conferees expect the Department's participation in the PSWIN program and Project SAFECOM to be funded within the resources provided under the Office of Justice Programs, after consultation with the Committees on Appropriations.

The conferees recommend bill language, as carried in previous years, regarding the costs of conversion to narrowband communications, and the costs of operating and maintaining land mobile radio legacy systems.

COUNTERTERRORISM FUND

The conference agreement includes \$1,000,000 for the Counterterrorism Fund to cover extraordinary costs associated with a terrorist threat or incident. This level, when combined with current unobligated balances and recoveries of \$49,281,000, ensures a total level of \$50,281,000 for fiscal year 2003.

The Counterterrorism Fund was established in the 1995 Supplemental Appropriations Act after the bombing of the Alfred P. Murrah Federal Building in Oklahoma City, and is under the control and direction of the Attorney General. These funds may be used to reimburse any Department of Justice organization for the costs incurred from the reestablishment of an office or facility damaged or destroyed as a result of a domestic or international terrorist incident, and to cover extraordinary expenses necessary to counter, investigate, or prosecute domestic or international terrorism activities. The Attorney General is required to notify the Committees on Appropriations in accordance with section 605 of this Act prior to obligation of any funds from this account.

The conferees recommend bill language, carried in previous Appropriations acts, which makes funds available: (1) for costs incurred in reestablishing the operational capacity of an office or facility damaged or destroyed by a terrorist incident; and (2) for support to counter, investigate, or prosecute terrorism, including payments of rewards and detention costs in connection with these activities.

ADMINISTRATIVE REVIEW AND APPEALS

The conference agreement includes \$191,535,000 for Administrative Review and Appeals. Of the total amount provided, \$189,713,000 is for the Executive Office of Immigration Review (EOIR), and \$1,822,000 is for the Pardon Attorney. This level includes an increase of \$8,000,000 to address the growing immigration judge workload as a result of increases in Immigration and Naturalization Service enforcement activities.

The Attorney General is directed to submit a report to the Committees on Appropriations by April 30, 2003, regarding the implementation of the changes to the Bureau of Immigration Appeals process announced by the Attorney General August 23, 2002.

This appropriation supports the EOIR, which includes the Board of Immigration Appeals, Immigration Judges, and Administrative Law Judges who decide through administrative hearings on the admission or exclusion of aliens seeking to enter the country, and the transportation and adjustment of status of aliens whose status has been challenged; and the Office of the Pardon Attorney, which receives, investigates and considers petitions for all forms of Executive clemency.

DETENTION TRUSTEE

The conference agreement includes \$1,366,591,000 for the Federal Detention Trustee. This amount includes transfers of \$592,985,000 from the Immigration and Naturalization Service and \$773,606,000 from the Federal Prisoner Detention account. Within 45 days of enactment of this Act, the Trustee is directed to report to the Committees on Appropriations regarding the appropriateness of transferring to the Trustee any U.S. Marshals Service and Immigration and Naturalization Service personnel involved in procuring detention space.

The conferees are aware that a number of States have excess prison capacity. Therefore, the Detention Trustee is directed to use existing State prison capacity if it meets Federal standards and is cost effective. In addition, the conferees direct the Detention Trustee, in collaboration with the Bureau of Prisons and the Office of Justice Programs, to submit a plan to the Committees on Appropriations by April 30, 2003, to evaluate the health and safety of Federal prisoners in non-Federal institutions. The conferees also urge the Detention Trustee to continue its efforts with the Federal Judicial Center regarding alternatives to detention.

The recommendation also includes \$1,000,000 for development of the National Repository. The conferees direct the Department's Chief Information Officer to assist the Detention Trustee in establishing this clearinghouse as quickly as possible. The Committees

on Appropriations expect to be regularly briefed on progress in establishing this repository.

The Detention Trustee shall report to the Committees on Appropriations regarding its aircraft replacement procurement strategy not later than 180 days after enactment of this Act.

Section 114 of Public Law 106–113 directs that health care services provided for individuals in the custody of the U.S. Marshals Service (USMS) and the Immigration and Naturalization Service (INS) shall not exceed the lesser of the amount that would be paid for a similar service under Medicare and Medicaid. The conferees direct the Detention Trustee to review the impact that this language has had on the delivery of health care services. The review shall include: (1) an analysis of the cost of providing health care to individuals in USMS and INS custody of the Federal Prison System, including transportation and security costs; (2) the impact section 114 has had on the availability of the health care services throughout the country to individuals in the custody of the Department; and (3) any recommended changes to USMS, INS, FPS policies to ensure that individuals in the custody of the Department have access to necessary health care services at affordable rates. The conferees expect that the study will be funded by the affected components. The Detention Trustee shall submit its review to the Committees on Appropriations no later than 180 days after the enactment of this Act.

The conferees include bill language, modified from the request, which provides for the transfer of funding from the Detention Trustee to the USMS or to the Immigration Enforcement and Border Affairs account. The Committee also (1) recommends language carried in previous years regarding the authorities of the Detention Trustee; (2) modifies language previously carried regarding the construction of detention facilities; (3) provides that unobligated balances available in prior years from funds appropriated to the Federal Prisoner Detention account be transferred to the Detention Trustee account; and (4) directs that the Detention Trustee and the Bureau of Prisons develop a plan for evaluating the health and safety of Federal prisoners in non-Federal facilities.

OFFICE OF INSPECTOR GENERAL

The conference agreement includes \$57,937,000 for the Office of Inspector General. The recommended level includes a \$2,000,000 increase to address additional responsibilities resulting from P.L. 107–56.

The Office of Inspector General conducts and supervises audits and investigations relating to the programs and operations of the Department of Justice, and keeps the Attorney General and Congress informed about problems and deficiencies relating to the administration of such programs and activities. As the Nation's chief law enforcement agency, it is essential that the motives and actions of the Justice Department be above reproach. The conferees urge the Inspector General to be sensitive to such concerns and to continue to ensure the integrity and fairness of Justice Department management processes and Federal law enforcement efforts.

The conference agreement includes bill language providing up to \$10,000 to meet unforeseen emergencies and for the acquisition and operation of motor vehicles.

UNITED STATES PAROLE COMMISSION

SALARIES AND EXPENSES

The conference agreement includes \$10,488,000 for the U.S. Parole Commission for fiscal year 2003.

The Commission is an independent body within the Department of Justice that makes decisions regarding requests for parole and supervision of Federal and District of Columbia (D.C.) Code prisoners. As a result of legislation that established sentencing guidelines, the Parole Commission is phasing down its Federal operations. In August 1998, the Commission assumed jurisdiction over D.C. felony prisoners and D.C. Code parolees. When the D.C. Board of Parole ceased to exist, the Commission inherited a parole revocation caseload with a significant backlog of warrant requests and revocation hearings. In a May 2002 report to the Committee, the Attorney General reported that the Commission is responsible for conducting hearings and making parole decisions for over 3,000 Federal inmates; supervising about 4,000 Federal offenders currently on parole; and rendering parole revocation decisions for nearly 1,000 Federal offenders every year. The Commission also conducts hearings and adjudicates parole decisions for more than 7,000 eligible D.C. offenders who committed their crimes before August 5, 2000.

LEGAL ACTIVITIES

SALARIES AND EXPENSES, GENERAL LEGAL ACTIVITIES

The conference agreement includes \$611,325,000 for General Legal Activities for fiscal year 2003. This appropriation supports the Attorney General through the establishment of litigation policy, conduct of litigation, and various other legal responsibilities. The distribution of funding provided is as follows. The conferees remind the legal divisions that changes to these levels are subject to section 605 requirements in this Act.

General Legal Activities

[In thousands of dollars]

	<i>2003 appropriation</i>
Solicitor General	\$7,706
Tax Division	75,520
Criminal Division	129,766
Civil Division	207,718
Environment and Natural Resources	70,814
Office of Legal Counsel	5,474
Civil Rights Division	105,099
Interpol-USNCB	8,862
Office of Dispute Resolution	366
Total	<u>\$611,325</u>

Criminal Division.—The conference agreement provides a total of \$129,766,000, 810 positions and 822 workyears for the Criminal Division, to address cyber-terrorism, foreign legal assistance, for-

eign counterintelligence, and white collar crime. The Criminal Division is directed to submit a report to the Committee by May 2, 2003, on the \$4,800,000 enhancement provided in Public Law 107-117 to coordinate international legal activities related to the September 11, 2001 terrorist attacks.

Civil Division.—The recommendation provides a total of \$207,718,000, 1,042 positions and 1,063 workyears for the Civil Division. Included in this amount is an increase of \$10,000,000 for administrative expenses associated with the September 11th Victim Compensation program. The conferees direct the Office of the Special Master and the Civil Division to submit a report to the Committee by July 7, 2003 containing an update on the status of awards provided from the September 11th Victims Compensation Fund.

The conferees include bill language carried in previous Appropriations acts allowing the Attorney General to provide additional resources to the Civil Division, if emergent circumstances warrant, through transfers of funds from other Department of Justice sources. The conference agreement includes \$23,388,000 in funding available to the Department through the Working Capital Fund for the requested tobacco and other litigation activities. The conferees also include \$1,996,000 for administrative expenses associated with the Radiation Exposure Compensation Act (RECA) of 1990, as amended. This program was established, in accordance with RECA, to permit the payment of claims to individuals exposed to radiation as a result of atmospheric nuclear tests and uranium mining. Previously, these funds had been appropriated under a separate account. New language is included in this bill reflecting that funding is now being provided under the Civil Division. The conferees expect the Civil Division to absorb any additional requirements for processing RECA claims from other resources available to the Civil Division.

The conferees do not include requested programmatic increases for the Commercial Litigation section. Any additional requirements may be covered within existing resources through the regular reprogramming process. The funding level recommended for the Civil Division includes the requested reduction of \$1,762,000, reflecting improvements achieved as a result of the Torts Litigation Division's use of automated litigation support.

Civil Rights Division.—The conferees include \$105,099,000, 753 positions and 755 workyears, the full amount requested, for the Civil Rights Division to enforce voting rights, disability rights, and other civil rights policies.

Trafficking.—An estimated 1 to 2 million people are trafficked each year worldwide, with women and children making up at least 700,000 of this total. It is estimated that 50,000 of these women and children are trafficked into the United States annually by crime rings and loosely connected criminal networks. The Department of Justice is directed to provide a report to the Committees on Appropriations by May 9, 2003, regarding the Department's litigation and law enforcement efforts to combat trafficking in persons.

Courtroom technology.—The amounts provided include \$5,200,000 for courtroom technology to be distributed among the divisions on the basis of need.

The conference agreement includes bill language, similar to that included in previous fiscal years, which: (1) allows up to \$20,000 for expenses of collecting evidence; (2) makes up to \$10,000,000 for litigation support contracts available until expended; (3) makes up to \$1,000 available to the INTERPOL-USNCB for reception and representation expenses; and (4) allows the Attorney General to transfer funds to address emergent circumstances in the Civil Division. The conferees also recommend bill language, included in previous Appropriations acts under a separate heading, for administrative expenses in accordance with RECA. The recommendation does not include requested bill language making a portion of funds for certain activities available until expended.

THE NATIONAL CHILDHOOD VACCINE INJURY ACT

The conference agreement includes a reimbursement of \$4,028,000 for fiscal year 2003 from the Vaccine Injury Compensation Trust Fund to cover the Department of Justice's expenses associated with litigating cases under the National Childhood Vaccine Injury Act of 1986.

SALARIES AND EXPENSES, ANTITRUST DIVISION

The conference agreement provides \$133,133,000 for the Antitrust Division as proposed by the Senate, instead of \$134,295,000 as proposed by the House. This amount will be offset with Hart-Scott-Rodino fee collections, regardless of the year of collection, resulting in no direct appropriations.

The Conferees understand that due to changes in the Hart-Scott-Rodino fee structure and a reduction in merger activity that the number of pre-merger filings requiring review declined by 76 percent between fiscal year 2000 and fiscal year 2002. In light of this decline in filings, the Conferees direct the Antitrust Division to submit a financial and performance plan to the Committees on Appropriations within 60 days of enactment of this Act. The plan shall outline how the Division intends to vigorously enforce our nation's antitrust laws.

SALARIES AND EXPENSES, UNITED STATES ATTORNEYS

The conference agreement provides \$1,503,767,000 for the U.S. Attorneys. This appropriation supports the Executive Office of U.S. Attorneys and the 94 U.S. Attorneys Offices, which serve as the principal litigators for the U.S. Government for criminal, civil, and debt collection matters.

Corporate Fraud.—To aggressively prosecute cases of corporate fraud, the conference agreement includes an increase of \$13,000,000 to support the Justice Department's Corporate Fraud Task Force.

Intermodal Security Pilot Project.—The conferees recommend \$5,000,000 for Project Seahawk, an Intermodal Security pilot project, to be coordinated by the Office of the U.S. Attorneys. The U.S. Attorneys are directed to provide a spend plan to the Committees on Appropriations not later than March 15, 2003.

Legal Education.—The conference agreement provides \$18,842,000 for legal education and distance learning at the National Advocacy Center (NAC), and if merited, the NAC may expand or include antiterrorism, cybercrime and financial investigation classes. The conferees also include an increase of \$6,000,000 to expand distance learning capabilities at the NAC.

U.S. Attorneys Anti-Terrorism Task Forces.—The conferees note that the Joint Terrorism Task Forces, which were established in 1980 and have since grown to be active in each of the 56 FBI field offices, include representatives of local, State, and Federal law enforcement, including U.S. Attorneys, as well as other relevant participants from each community. The conferees believe that the Joint Terrorism Task Forces should play the lead Federal coordinating role with respect to multi-agency counterterrorism efforts, and that the U.S. Attorneys should continue to participate in these Task Forces rather than maintain a separate set of U.S. Attorneys task forces.

Violent crime task forces.—The conference agreement includes an additional \$1,500,000 within available resources to continue and expand task force activities associated with Operation Streetsweeper.

Cybercrime and Intellectual Property Enforcement.—Twenty-five percent of the software produced in the United States has been copied illegally in violation of U.S. copyright laws. The estimate of lost revenue to such industries exceeds \$300 billion annually. Therefore, the agreement includes \$10,000,000 for the continued pursuit of Federal copyright law violations and software counterfeiting crimes. The U.S. Attorneys shall report to the Committees on Appropriations by April 30, 2003, on the number, type and location of copyright prosecutions undertaken in the preceding year, including those under Public Law 105-147.

The conferees also include bill language, similar to that included in previous fiscal years, which: (1) makes up to \$2,500,000 for debt collection purposes available through fiscal year 2004; (2) makes available up to \$8,000 for official reception and representation expenses; (3) makes up to \$10,000,000 for automated litigation support contracts available until expended; (4) provides not to exceed \$2,500,000 for the operation of the National Advocacy Center to remain available until expended; and (5) specifies the number of positions and workyears provided for the United States Attorneys.

UNITED STATES TRUSTEE SYSTEM FUND

The conference agreement provides \$155,736,000 for the United States Trustees, to be funded entirely from offsetting collections, instead of \$159,161,000 as proposed by the House and \$150,381,000 as proposed by the Senate. The Conferees understand that this account has \$5,399,000 in prior year unobligated balances previously appropriated to the Trustee. The Conferees direct that these balances be used to offset this account's fiscal year 2003 operational requirements.

The conference agreement includes \$750,000 for the Bankruptcy Training Center at the National Advocacy Center, in support of the Trustees' continuing education program.

SALARIES AND EXPENSES, FOREIGN CLAIMS SETTLEMENT COMMISSION

The conference agreement includes \$1,136,000 for the Foreign Claims Settlement Commission for fiscal year 2003.

The Commission settles claims of American citizens arising out of nationalization, expropriation, or other takings of their properties and interests by foreign governments.

UNITED STATES MARSHALS SERVICE

SALARIES AND EXPENSES

The conference agreement includes \$680,474,000 for this account, instead of \$684,174,000 as provided by the House and \$673,146,000 as provided by the Senate. The conference agreement does not include the table included in the Statement of Managers accompanying the Senate bill. However, the Marshals are directed to submit a spend plan to the Committees on Appropriations by March 30, 2003 for this account that is as detailed as the Senate table. The conference agreement includes \$3,300,000 for Electronic Surveillance Unit [ESU] recurring costs, \$1,000,000 for hand/leg cuffs, and \$10,015,000 for special assignments.

Warrant Information Network. The conference agreement includes not less than \$2,766,000 (excluding a \$500,000 transfer from the Justice Detainee Information System) for the Warrant Information Network and subscriptions to various networks and on-line systems. The Marshals, with assistance from the Justice Department's Chief Information Officer, are expected to implement the recommendations included the Justice Department's Inspector General report (03-03) concerning the Marshal Network and the Warrant Information Network.

Protection of the Judicial Process. The conference agreement transfers \$15,800,000 for 106 senior Deputy U.S. Marshals [DUSMs] from the "Court Security" account in title III to this account. The conferees expect DUSMs and physical security experts to regularly survey courthouses and make security recommendations to the courts and the Committees on Appropriations. In addition, the agreement provides \$5,650,000 for 40 additional personnel and equipment, as requested, for the protection of the Judiciary for high threat trials. In addition, the agreement includes \$2,259,000 for 18 positions to be allocated to those districts with the highest priority needs.

Courthouse security equipment. The conference agreement includes \$12,061,000 for security equipment, furnishings, relocations, and telephone systems and cabling to improve security at the most ill-equipped courthouses. The distribution of these funds shall be described in the aforementioned spend plan.

Fugitive apprehensions. The conference agreement includes increases over the fiscal year 2003 request of \$2,268,000 to fully annualize the two existing fugitive task forces, \$2,916,000 to establish two additional centrally-managed fugitive task forces in the heartland, and \$2,750,000 for ESU personnel, training, and equipment.

Other. The conference agreement also includes increases over the fiscal year 2003 request of \$1,715,000 to establish a permanent Marshals Service presence in Jamaica, the Dominican Republic,

and Mexico and \$10,424,000 for vehicles. The conferees encourage the USMS to minimize the financial burden of Federal court security on State and local jurisdictions to the degree possible.

CONSTRUCTION

The conference agreement includes \$15,126,000 for this account.

Construction engineering consultants.—The Committee is aware that the Marshals have been using funds allocated by Congress for consulting services on construction projects to pay the federal salaries of nine permanent employees hired in fiscal year 2000. Apparently, this diversion of funds was prompted by confusion over terms and dollar amounts used by the Marshals and Congress. The Conferees expect the salaries of permanent employees to be paid out of the “Salaries and Expenses” account. The Marshals are directed to report on the proper execution of the construction engineering funds not later than 30 days after enactment of this Act.

Billings, MT.—The funds provided for construction for Billings shall only be available to renovate the Marshals Service space, including designated prisoner movement and holding areas, in the existing federal courthouse, space previously occupied by the Bureau of Indian Affairs. No other proposals are to be considered.

FEES AND EXPENSES OF WITNESSES

The conference agreement includes \$175,645,000 for Fees and Expenses of Witnesses for fiscal year 2003. This appropriation, which is considered mandatory for scorekeeping purposes, provides for fees and expenses of witnesses who appear on behalf of the Government in cases in which the United States is a party, including fact and expert witnesses, mental competency examinations, and witness/informant protection. Funds are also used to provide private counsel to pay certain legal expenses of Federal employees. This year, the conferees also include the costs associated with the U.S. Marshals Service Witness Protection Program.

The conferees include new bill language regarding the Witness Protection Program, and include language from previous Appropriations acts which allows: (1) up to \$6,000,000 for protected witness safesites; (2) up to \$1,000,000 for the purchase and maintenance of armored vehicles for prisoner transportation; and (3) up to \$5,000,000 for installation and operation of a secure automated network.

SALARIES AND EXPENSES, COMMUNITY RELATIONS SERVICE

The conference agreement includes \$9,474,000 for the Community Relations Service for fiscal year 2003. The agreement continues a provision that allows the Attorney General to transfer up to \$1,000,000 from funds made available to the Department of Justice to this account, thereby providing for a total funding level of up to \$10,744,000.

The Community Relations Service was established by Title X of the Civil Rights Act of 1964 to provide assistance to communities in resolving disagreements arising from discriminatory practices.

The conference agreement includes bill language, identical to that included in previous years, which allows the Attorney General to provide additional resources for the Community Relations Service, if emergent circumstances exist, through the transfer of funds from other Department of Justice programs, and subject to the requirements of section 605 of this Act. The conference agreement also includes modified language, as requested, clarifying the definition of the activities of the Community Relations Service.

ASSETS FORFEITURE FUND

The conference agreement includes \$21,901,000 for the Assets Forfeiture Fund for fiscal year 2003.

This account provides funds for additional investigative expenses of the FBI, DEA, and USMS, such as purchase of evidence, equipping of conveyances, and investigative expenses leading to seizure. Funds for these activities are provided from receipts in the Assets Forfeiture Fund resulting from the forfeiture of assets. Expenses related to the management and disposal of assets are also provided from these receipts in the Assets Forfeiture Fund by a permanent indefinite appropriation.

INTERAGENCY LAW ENFORCEMENT

INTERAGENCY CRIME AND DRUG ENFORCEMENT

The conference agreement includes \$372,131,000 for Interagency Crime and Drug Enforcement (ICDE) for fiscal year 2003. The ICDE program was created in 1982 to ensure a coordinated, multi-agency approach to attacking and dismantling high-level drug enterprises. Through its nine regional task forces, the ICDE program utilizes the combined resources and expertise of its 11 Federal agency members, in cooperation with State and local investigators and prosecutors, to target and destroy major narcotics trafficking and money laundering organizations. Amounts provided reimburse Department of Justice components for their costs to participate in ICDE task forces. Additional funding for non-Justice Department agencies' participation in ICDE is provided in other Appropriations acts. It is expected that the Immigration and Naturalization Service will continue to participate in this effort.

The table below reflects funding levels for each of the components. The Justice Department is reminded that changes to these levels are subject to section 605 of this Act.

The conferees have communicated concerns with regard to the ability of Federal law enforcement to maintain a strong focus on combating illegal drugs following the FBI's shift of some 567 agents away from drug investigations. The Committees on Appropriations approved the FBI's restructuring, and at the same time requested a comprehensive plan to ensure that all of the resources available to the Department of Justice to fight illegal drugs are deployed in priority locations. The Committees later approved a proposal by the DEA to shift 100 of its agents and support staff in response to the withdrawal of FBI agents. The Committee commends the DEA for taking this action. However, the Committee has yet to receive a comprehensive drug strategy from the Department, and urges submission of this plan without further delay.

The conference agreement includes an increase of \$15,000,000 for the Drug Enforcement Administration for their participation in task force operations. The conferees commend the management of this program for emphasizing a strong focus on disrupting and dismantling the major drug trafficking organizations, and expect that this infusion of DEA agents and support staff will further enhance these efforts. The conferees also include an increase of \$6,050,000 for needs associated with OCDETF wiretap investigations generated by the DEA's Special Operations Division, and an increase of \$724,000 for the U.S. Attorney's to establish an electronic surveillance tactical group to assist U.S. Attorney's offices in conducting electronic surveillance. To further the Justice Department's ability to investigate the links between illegal drugs and terrorism, an increase of \$3,000,000 is provided for additional financial investigative training and support.

The conferees include bill language, similar to that included in previous Appropriations acts, which: (1) allows for inter-governmental agreements with State and local law enforcement agencies; (2) makes \$50,000,000 available until expended; (3) allows funds to be used under existing authorities available to participating organizations; and (4) allows the Attorney General to reallocate unobligated balances among participating organizations, subject to the re-programming procedures described in Section 605 of this Act.

FEDERAL BUREAU OF INVESTIGATION

SALARIES AND EXPENSES

The conference agreement includes \$4,234,587,000 for the Federal Bureau of Investigations (FBI) salaries and expenses account for fiscal year 2003. This level provides programmatic increases totaling \$491,281,000 to support the FBI's core missions of counterterrorism, counterintelligence, and cybercrime. The conferees also include increases to combat violent crime and white collar crime, and for much needed information technology enhancements. In addition to the amounts provided to the FBI in this account, the conferees have included bill language and additional funding to establish a new account, the Foreign Terrorist Tracking Task Force (FTTTF).

The following distribution represents the conference agreement. The conferees remind the FBI that changes in this distribu-

tion are subject to the reprogramming requirements in section 605 of this Act.

Specific funding increases are provided as follows:

Counterterrorism and Counterintelligence.—The conference agreement includes increases of \$181,431,000 to bolster counterterrorism and counterintelligence activities of the FBI. Of this, an increase of \$20,000,000 is provided for intelligence analysts and associated equipment and support; and an increase of \$5,000,000 is to be transferred from the FBI to the DEA's Special Operations Division (SOD) to ensure continued collaboration on SOD activities. The FBI is expected to reinvigorate its participation in this multi-agency task force in order to strengthen the Justice Department's ability to investigate links between the sale of illegal drugs and terrorism. The conferees also include an additional \$38,246,000 for NIPC, including \$17,221,000 to fund phase II of a three-phase research and development initiative being run by the Special Technologies & Applications Unit. The conferees fully expect the STAU to have occupied 4,000 square feet recently made available at its new location in Virginia not later than March 31, 2003. To ensure that these resources are completely integrated with other information technology improvement programs underway at the FBI, the FBI Chief Information Officer is directed to review all ongoing information technology products and activities of the cyber division, including the National Infrastructure Protection Center, to ensure that activities underway are commensurate with the mission of the FBI, and that the products and techniques being developed are shared with the FTTTF and other law enforcement agencies, as appropriate. Finally, the conference agreement includes \$6,804,000 to expand the polygraph program.

Joint Terrorism Task Forces.—The conference agreement includes an increase of \$20,000,000 for the Joint Terrorism Task Forces (JTTF) which have been successful in enhancing the coordination of law enforcement at state, local and Federal levels. The conferees, while supportive of the concept of the JTTFs, want to en-

sure that these efforts complement and do not duplicate other counterterrorism efforts underway at the Department. Toward that end, the Bureau is directed to submit a report to the Committees on Appropriations that includes a thorough discussion of JTTF caseload over the last five years by type (domestic/foreign), offense(s), and disposition (referred for prosecution, prosecuted, convicted, etc.) on a task force by task force basis. The report should also include an explicit discussion of threats in existing or proposed JTTF locations. The report shall be delivered not later than April 30, 2003.

Trilogy.—To date, the Committees on Appropriations have provided the FBI with \$457,800,000 for Trilogy, the FBI's three year information technology upgrade plan. Funding of \$237,000,000, \$132,000,000 more than requested, was provided in Public Law 107-117 to complete the three-year funding stream in two years and to hasten deployment. The conferees continue to urge the FBI to deploy Trilogy as quickly as possible while ensuring the integrity of the program. The fiscal year 2003 level includes an additional \$8,000,000 as requested for Trilogy contractor support. The Bureau shall continue to provide quarterly status reports to the Committees on Appropriations regarding Trilogy implementation. In addition, the FBI CIO is directed to submit a plan to the Committee by March 31, 2003 for reviewing all of the FBI's some 40 plus databases, with the goal of removing applications that have outlived their usefulness in order for the FBI to concentrate resources on the highest priority information technology needs.

Information Technology Infrastructure.—In addition to the increase provided for Trilogy, the conference agreement provides increases of \$126,776,000 to continue efforts to provide the FBI with the most modern, efficient and effective information technology tools to enable it to prevent terrorist acts and further other critical priorities, including counterintelligence and cybercrime. Within this amount, the following increases are provided: \$50,300,000 for investigative data warehousing; \$11,000,000 for collaborative capabilities; \$10,000,000 for digital storage and retrieval of documents from counterterrorism investigations; \$17,444,000 for mainframe upgrades and continuity of operations at FBI headquarters; and \$3,032,000 for secure video teleconferencing. The agreement also includes an increase of \$5,000,000 for data mining. The conferees are concerned that data mining efforts underway at the FBI, the DEA and the Foreign Terrorist Tracking Task Force are not being coordinated or exploited to the fullest extent possible. Toward that end, the Justice Department is directed to provide a report to the conferees by June 13, 2003 on efforts to ensure that these efforts are complimentary, and not duplicative, both from a technological standpoint, and a law enforcement perspective. The conferees remain committed to providing the FBI with adequate resources to ensure that its information technology infrastructure enhances its ability to prevent or investigate acts of terrorism and other crimes for which it has responsibility. Toward that end, the conferees have provided an additional \$30,000,000 above the request for emergent information technology needs. These funds are made available to the FBI subject to the submission of spend plans pursuant to section 605 requirements of this Act.

Information Technology Report.—The Committees on Appropriations have provided the FBI with significant increases for information technology. To ensure that this funding is being centrally coordinated in order to provide the greatest return on investment, the conferees expect the FBI to provide an updated information technology report. This report shall include a complete listing of all information technology projects; the stage of each project's development and deployment; base funding for each project, to include all sources of funding; the fiscal year 2002 and 2003 funding level of each project; and the outyear cost projections for each project, including recurring requirements for operations and maintenance of these systems. This report should also include a plan for ensuring regular technology refreshment replacement cycles, as well as estimated costs for these needs. This report is to be submitted to the Committees on Appropriations by July 21, 2003.

Internet café.—The conference agreement includes \$3,620,000 for Internet café. A combination of a virtual private network and the electronic equivalent of a mail drop, Internet café will allow the FBI to establish a very low cost secure network that parallels Trilogy and protects it from penetration. The Bureau shall provide a report to the Committees on Appropriations on the distribution and use of Internet café sites not later than May 1, 2003.

The conference agreement provides an additional \$12,612,000 above last year's level for tactical operations. The amount provided should allow the FBI to keep pace with the explosion of court-ordered surreptitious entries and the rapid advance in easily obtained security technology and to cope with the new threat of entry into facilities contaminated by biological, chemical, radiological, or other hazardous materials. The agreement also includes \$18,435,000 as requested for information assurance and \$29,738,000 for the Enterprise Security Operations Center to continue efforts to ensure that sensitive data is more effectively managed. The Security Division is directed to provide an update to the Committee by April 30, 2003 regarding the FBI's internal security efforts. This review should include an update on the use of the new information technology enhancements provided during fiscal year 2002. The agreement also includes additional resources above the request for intelligence production needs, as well as surveillance and tactical operations.

The conference agreement also includes an increase of \$5,000,000 to ensure the highest integrity language translation program, and to aggressively reduce the backlog of documents that need to be translated. The FBI is directed to work with the Foreign Service Institute regarding language-training needs of the FBI. The conferees believe that the FBI needs to develop more in-house expertise with regard to language translation capabilities. The FBI is also directed to submit a report to the Committees on Appropriations by June 2, 2003 regarding efforts to implement section 323 of Public Law 107-306, development of a civilian linguistic reserve corps.

Legal Attaché Program.—The FBI received funding in Public Law 107-206 to establish additional Legats, update the Legat information infrastructure, and provide additional resources to existing Legats that have realized appreciable workload increases fol-

lowing the September 11th, 2001 terrorist attacks. Accompanying report language directed that the FBI submit a review of the Legat program prior to establishing additional Legats. The Committees on Appropriations have yet to receive this report. The FBI is directed to consult with the Committees on Appropriations within 30 days following the enactment of this Act to review the plan to deploy these additional resources.

Quantico Training.—The ongoing FBI restructuring plan revolves around a dramatic change in philosophy, shifting the FBI's focus from investigating crimes to preventing acts of terrorism. This change, coupled with the recruitment of new agents, analysts and other support personnel, has created significant new training requirements. The conferees therefore provide \$10,000,000 above the request for training needs, including support for the newly created College of Analytic Studies at Quantico, and for enhanced training in the fields of cybercrime, counterintelligence and counterterrorism. This additional funding shall also support the establishment of a program to provide senior FBI agents and support staff with the ability to earn advanced degrees in specialized areas that will broaden and enhance their on-the-job effectiveness.

Support.—The conference agreement also provides increases of \$9,333,000 for the Hazardous Materials Response Unit, \$3,272,000 for the Hazardous Devices School, and \$7,919,000 for Evidence Response Teams.

DNA matching.—The conference agreement includes an increase of \$867,000 for the Federal Convicted Offender Program, which maintains a DNA database of Federal convicts for cross-referencing with crime scene evidence. The conference agreement also includes an increase of \$4,000,000 to maintain or establish four regional mitochondrial DNA (mtDNA) forensic labs in affiliation with the FBI Laboratory. The labs will analyze mtDNA from human remains or other evidence to assist law enforcement in the identification of missing persons or criminal perpetrators. Affiliation with the FBI Laboratory ensures that uniform standards and procedures are maintained by all of the participating laboratories doing mtDNA analysis. The conferees note that the four scientists and technicians required to oversee regional labs were funded last year, but the labs themselves were not.

Serial rapists.—The conference agreement includes an increase of \$1,005,000 to expand the Violent Criminal Apprehension Program to include sexual assault cases, which should greatly improve the ability of law enforcement at all levels to identify, capture, and prosecute serial rapists.

Forensic research.—The conference agreement includes an increase of \$8,056,000 over last year to fund the highest priority forensic research proposals submitted to Congress by the FBI Laboratory as part of its fiscal year 2002 spend plan. The FBI shall report back to the Committees on Appropriations on the disposition of these resources not later than May 1, 2003.

Engineering Research Facility.—Last year, Congress funded the construction of a new annex at the Engineering Research Facility (ERF). Since then, the conferees have become aware that a flaw in the FBI's cost analysis, the failure to include cabling, wiring, and equipment costs, and out-dated pricing data, which failed to

capture inflation through the life of the construction project, resulted in an under-estimate of the true cost of the annex. Considering the importance of this facility, the conference agreement includes \$7,945,000 to partially cover the full costs of the ERF annex. The conferees urge the Bureau to complete this project as quickly as is prudent.

Aviation Support Program.—The conference agreement includes an increase of \$18,953,000, including \$13,000,000 for additional aircraft and related equipment. The conferees understand that the FBI is developing a proposal for needs associated with locations in the Northeast, and direct the FBI to submit this proposal in conjunction with a five year aviation master plan that includes: (1) current fleet assets by type, (2) logged flight hours by mission by aircraft/helicopter, (3) projected useful service life remaining by aircraft/helicopter, (4) utilization of current fleet assets, by mission type, for the last five years by year, and (5) basing, by aircraft/helicopter locations. The plan should also discuss the costs and benefits of maintaining versus replacing current fleet assets through 2008, maldeployments or other causes of underutilization of current fleet assets, if applicable, and capabilities of current fleet assets versus current and projected mission requirements. The report shall be delivered not later than May 1, 2003.

Violent Crime.—The conferees also include an increase of \$5,000,000 for the FBI's continued involvement in the National Integrated Ballistics Information Network, or NIBIN. Funding will support research, development and equipment for these activities. The conference agreement also includes an increase of \$10,000,000 for efforts to combat violent crime. The conferees expect the FBI to bring a national focus to cases that cross jurisdictions, including the activities of criminal alien gangs across the United States.

White Collar Crime.—The conferees include an increase of \$10,000,000 to provide key investigative assets to fight corporate fraud. This increase, along with increases provided elsewhere in this bill for the Securities and Exchange Commission and the U.S. Attorneys, will strengthen the Federal government's capabilities to bring corporate fraudsters to justice, and to protect investors, employees and consumers.

Trafficking.—The conferees support the FBI's continued involvement in the Southeast European Cooperative Initiative, and provide an increase of \$3,000,000 above the request for these purposes. As noted elsewhere in this report, the Justice Department is directed to submit a report to the Committees on Appropriations regarding efforts to combat sexual trafficking.

Advisory Board.—The conference agreement includes a \$5,000,000 increase and accompanying bill language to establish an Advisory Board. The Advisory Board will be a standing panel of outside experts to advise the FBI Director on matters relating to science, technology, research, engineering, information management, and other matters of special interest to the FBI. The Committees on Appropriations believe that the organizational changes and management reforms being pursued by the current FBI Director would be enhanced by the establishment of a panel of experts who can independently and regularly advise the Director on how the FBI can more effectively exploit and apply science and tech-

nology to improve its operations, particularly with respect to information sharing, data mining and the analysis of information and evidence collected during investigations. The efforts of the panel should be focused on the pressing and complex technology challenges facing the FBI, particularly the priorities of preventing terrorist attacks, countering foreign intelligence operations, combating cyber-based attacks, and strengthening the FBI's collaboration with other Federal law enforcement agencies and within the Intelligence Community. The panel will focus exclusively on strategic issues, and on suggesting and assessing organizational strategies for applying technology. Not later than 60 days after enactment of this legislation, the Director shall report to the Committees on Appropriations regarding progress toward establishing this panel.

The conferees include bill language, similar to that included in previous Appropriations acts, which provides: (1) for purchase of not to exceed 1,576 passenger vehicles, of which 1,085 will be for replacement only, without regard to general purchase price limitations, and the acquisition and operation of aircraft; (2) up to \$70,000 for unforeseen emergencies; (3) up to \$65,000,000 for automated data processing, telecommunications and technical equipment, and up to \$1,000,000 for undercover operations to remain available until September 30, 2004; (4) not less than \$475,300,000 for counterterrorism investigations, foreign counterintelligence, and national security activities; (5) up to \$10,000,000 to reimburse State and local police for assistance related to violent crime, terrorism and drug investigations; (6) up to \$50,000 for official reception and representation expenses; and (7) specifies the number of positions and workyears provided for the Federal Bureau of Investigation. In addition, bill language is included, as carried in prior fiscal years, setting forth certain authorities.

FOREIGN TERRORIST TRACKING TASK FORCE

The conference agreement establishes a separate account for the Foreign Terrorist Tracking Task Force (FTTTF), and includes funding of \$62,000,000, the full amount requested, for additional data collection and data sharing initiatives. The conferees direct the Attorney General to ensure that the efforts of the FTTTF are coordinated with, and not duplicative of, other information technology enhancement initiatives taking place throughout the Department.

The conferees are concerned that there remain disagreements within the Administration on the evidence needed to deny a visa on terrorism grounds. The conferees expect the Administration to develop a comprehensive set of standards by which to review visa applications, and to provide training for consular officers to use in reviewing visa applications. More guidance about this issue is also provided under Title IV of this Act. The conferees strongly support the recommendations contained in GAO's report, *Border Security: Visa Process Should Be Strengthened as an Antiterrorism Tool*, and recommend that the Administration implement its recommendations for strengthening the visa application process.

CONSTRUCTION

The conferees include \$1,250,000 for FBI construction.

DRUG ENFORCEMENT ADMINISTRATION

SALARIES AND EXPENSES

The conference agreement includes total budget authority of \$1,649,948,000 for the Drug Enforcement Administration (DEA) salaries and expenses account for fiscal year 2003, of which \$89,029,000 is derived from the Diversion Control Fund, resulting in a direct appropriation of \$1,560,919,000.

The following distribution represents the conference agreement. The DEA is reminded that any changes to this distribution are subject to the reprogramming requirements in section 605 of this Act.

Additional Drug Enforcement Agents.—As noted elsewhere in the conference agreement, the FBI's restructuring plan shifted 567 agents away from drug investigations to focus on fighting terrorism. Therefore, to compensate for this reduction, the conference agreement includes \$15,000,000 above the request to hire an additional 133 agents and support staff. As noted earlier in this agreement, the conferees note that the Justice Department has yet to submit the plan requested by the Committees on Appropriations regarding the strategy to maintain a strong focus on fighting illegal drug activity. The Justice Department is directed to submit this strategy as expeditiously as possible. The agreement also includes \$7,750,000 in available prior year recoveries for vehicles, bullet proof vests, and other basic equipment essential to agents in the performance of their duties.

Overseas Offices.—The DEA is directed to submit a report to the Committees on Appropriations by May 23, 2003 which provides a workload analysis and right sizing proposal as warranted for each overseas offices to ensure that the most urgent needs are being met with the limited resources available.

Financial Investigations.—The conference agreement includes an increase of \$4,121,000, 27 positions and 14 workyears, to strengthen the DEA's ability to better monitor and track the financial holdings and transactions of drug trafficking organizations, especially with regard to investigating the links between the sale of illegal drugs and terrorist organizations. Toward that end, the conference agreement directs the DEA to use \$25,000,000 in prior year recoveries for activities of the Special Operations Division. The FBI and the DEA shall brief the Committees on Appropriations on a quarterly basis beginning July 7, 2003 regarding efforts in this area.

Information Infrastructure.—The conference agreement recommends an additional \$6,683,000, 23 positions and 11 FTE to further strengthen DEA's data security infrastructure. The DEA should ensure that these enhancements are consistent with the Department's overall information technology security programs.

Physical Security Measures.—The conference agreement includes a requested increase of \$18,000,000 for additional anti-terrorism security measures at both domestic and foreign locations. As noted earlier in this report, the conferees expect the Justice Department to submit a comprehensive plan to ensure the safety of employees at all installations.

The conferees expect DEA to continue to provide quarterly reports on the investigative workhours and funding, by type, within major source and transit countries, including the Caribbean, delineated by country and function. The DEA shall report to the Committees on Appropriations, by June 1, 2003, providing a trend analysis gleaned from information provided in these reports.

OxyContin.—The Committee on Appropriations continue to be concerned with the availability of legal drugs that are diverted for illegal use, and in particular the prescription drug OxyContin, especially in Virginia, West Virginia and Kentucky. This epidemic is gaining a foothold in other areas of the country. To continue progress toward establishing a nationwide prescription drug monitoring program, the conferees include \$10,000,000 under the Office of Justice Programs (OJP) to continue implementation of the Harold Rogers Prescription Drug Monitoring Program. The conferees expect the DEA to continue to work with OJP on the implementation of this program, and to continue to provide the Committees on Appropriations with regular updates regarding efforts to thwart the illegal diversion of OxyContin and other legal drugs.

Methamphetamines.—The conferees remain concerned with the continuing problem of Ecstasy and methamphetamine use across the United States. The conferees expect the DEA to continue working with OJP and COPS on the implementation of its COPS methamphetamine programs, and to continue participating in the High Intensity Drug Trafficking Areas, particularly those operating in the Midwest, to combat the influx of methamphetamines.

Aviation Support Program.—The conferees direct the DEA to submit a five year aviation master plan that includes: (1) current fleet assets by type, (2) logged flight hours by mission by aircraft/helicopter, (3) projected useful service life remaining by aircraft/helicopter, (4) utilization of current fleet assets, by mission type, for the last five years by year, and (5) basing, by aircraft/helicopter locations. The plan should also discuss the costs and benefits of maintaining versus replacing current fleet assets through 2008, maldeployments or other causes of underutilization of current fleet assets, if applicable, and capabilities of current fleet assets versus current and projected mission requirements. The report shall be delivered not later than May 1, 2003.

Drug Diversion Control Fee Account.—The recommendation includes \$89,029,000 for DEA's Drug Diversion Control Program for fiscal year 2003. The conference agreement assumes that the level of balances in the Fee Account are sufficient to fully support diversion control programs in fiscal year 2003. As was the case in previous fiscal years, no funds are provided in the DEA salaries and expenses appropriation for this account in fiscal year 2003.

To control the diversion, distribution, manufacture and abuse of legitimate pharmaceuticals, DEA annually registers in excess of 900,000 drug handlers, of which over 1,670 are manufacturers, distributors, importers, exporters, and others handling large volumes of controlled substances. These registrants pay fees, which fully support the cost of this program. The conferees are aware that the DEA is proposing to change its fee structure, and urge the DEA to consult with the Committees on Appropriations regarding these changes.

The conference agreement includes bill language which provides: (1) up to \$70,000 for unforeseen emergencies; (2) for expenses for drug education and training programs; (3) for purchase of passenger vehicles without regard to general purchase price limitations, and acquisition and operation of aircraft; (4) up to \$33,000 for permanent change of status costs; (5) up to \$1,800,000 for research to remain available until expended; (6) up to \$4,000,000 for evidence and information, up to \$10,000,000 for automated data processing and telecommunications, up to \$2,000,000 for laboratory equipment, \$4,000,000 for technical equipment, and \$2,000,000 for aircraft replacement parts to remain available until September 30, 2004; and (7) up to \$50,000 for official reception and representation expenses. In addition, language is continued which specifies the number of positions and workyears provided to DEA.

CONSTRUCTION

The conference agreement includes \$7,250,000 in available prior year recoveries for construction of a new laboratory facility in Miami, Florida.

IMMIGRATION AND NATURALIZATION SERVICE

The conference agreement includes total new spending authority of \$6,159,529,000 for the Immigration and Naturalization Service (INS) for fiscal year 2003. This amount includes \$3,848,456,000 in direct appropriations and \$2,311,073,000 in anticipated fee collections. The conference agreement includes funding for border en-

forcement and immigration services under the Salaries and Expenses account, but does not adopt the Administration's request to establish a Support and Administration account. The conferees are aware that the INS will soon transfer from the Justice Department to the Department of Homeland Security (DHS). Guidance provided below is assumed to apply to any successor organizations of the INS that may be created within the DHS.

SALARIES AND EXPENSES

Funding provided for the INS Salaries and Expenses account includes a total direct appropriation of \$3,589,819,000 for salaries and expenses, including \$2,880,819,000 for Immigration Enforcement and Border Affairs, and \$709,000,000 for Immigration Services.

IMMIGRATION ENFORCEMENT AND BORDER AFFAIRS

The conference agreement includes \$2,880,819,000 for Immigration Enforcement and Border Affairs. This account provides for activities related to border inspections, border patrol, investigations, detention and deportation, and intelligence.

Entry Exit.—The conference agreement includes an increase of \$362,000,000, for the Entry Exit program and related information technology infrastructure upgrades. This funding is available for obligation pending submission of a comprehensive plan from the Secretary of Homeland Security for the Entry Exit program and needed information technology upgrades. The Committees on Appropriations held a series of briefings throughout the fiscal year regarding the planning and progress of the Entry Exit program, but have been disappointed by the lack of senior management involvement and oversight of this program, and by the lack of detail about how funds will be used. The conferees note that the Administration provided a plan for expenditure of funds in January 2003, which largely included funding for construction, and did not provide any detail on the technological solutions that would be employed to implement this program, nor any discussion regarding the involvement of Mexico and Canada and how any infrastructure changes between the U.S. and these countries would be accomplished. The conferees expect the INS to follow the direction contained in the report accompanying Public Law 107–206 regarding the involvement of the General Accounting Office (GAO) in the development and review of the Entry Exit program. The GAO should review and make recommendations to the INS prior to submission of plans to the Committees on Appropriations. The INS shall report to the Committees on Appropriations on a quarterly basis, beginning April 1, 2003, regarding Entry Exit program development. The conferees expect the INS to ensure full and open competition with regard to procurement actions, and to ensure that any funding proposals for subsequent years include a full analysis of expected operations and maintenance costs. As part of this plan, the conferees encourage the INS to explore biometric alternatives for use in developing more tamper resistant passports and INS re-entry documents. The conferees also direct the DHS to submit a report not later than July 1, 2003, to the Committees on Appropriations identifying the

number of green cards currently used with no expiration date or security features, the original date the cards were issued, as well as a proposed plan to replace these older green cards, if necessary.

Passenger and Crew Manifests.—One of the primary goals of the Entry Exit Program is to improve the collection, analysis and dissemination of information on passengers and crews at ports-of-entry, including the verification of traveler identity and access to data relevant to the determination of the excludability of the traveler. Such information is critical to the development of threat assessments. The INS' current paper-based system and stove-piped databases limit its ability to produce and coordinate such information with other agencies responsible for collecting this and similar critical information. The Congress enacted Public Law 107-295 directing the Transportation Security Administration (TSA) to develop and establish a Maritime Intelligence System (MIS), as defined in section 70113 of the Maritime Transportation Security Act of 2002 to address this very problem. The MIS system is intended to integrate and analyze collected data on passenger and crew manifests and any other relevant information that could be construed as potential threats against the United States. In order for this system to work, INS and other agencies that collect data on passengers and crew manifests must cooperate fully. Therefore, the conference agreement directs the INS to transfer \$25,000,000 to the TSA as a reimbursement for its MIS activities and requirements. The conferees expect MIS to include the data collected through the Container Security Initiative (CSI) program and other passenger, crew and cargo information collection systems. The conferees understand that the CSI program will enable the collection of additional shipping data through enhanced cooperative relationships between the U.S. Customs Service and foreign customs services.

Border Patrol Agents.—The conference agreement includes an increase of \$57,207,000, 570 positions and 285 FTE for new Border Patrol Agents, bringing the number of Border Patrol Agents to 11,000. The conferees expect the INS to submit a deployment plan to the Committees on Appropriations for the new agents provided, and to ensure that this plan is coordinated with construction projects and ongoing Entry Exit program planning. The INS should continue to provide the Committees on Appropriations with quarterly status reports on border patrol hiring, with the first such report due no later than April 1, 2003.

Immigration Inspectors.—The conference agreement includes an increase of \$25,500,000 to hire an additional 460 land border ports of entry inspectors. These inspectors shall be deployed along both the Northern and Southern borders. The conferees are concerned with staffing levels at the Ambassador Bridge/Detroit Tunnel, the Santa Teresa and Columbus ports of entry in New Mexico, and urge the INS to ensure that staffing levels are sufficient at these important ports of entry.

Pay Upgrades.—In response to concerns raised regarding a high rate of attrition of Border Patrol Agents and Immigration Inspectors, the Committees on Appropriations provided emergency supplemental funding in Public Law 107-206 for pay upgrades. The conference agreement continues this direction by including an

increase of \$58,550,000 for pay upgrades for Border Patrol Agents and Immigration Inspectors. The conferees note that this was not in the Administration's request. The conferees direct the Administration to submit a legislative proposal to the Congress with the FY 2004 budget that establishes a comprehensive, equitable program to compensate Federal law enforcement.

Interior Enforcement.—The conferees include an increase of \$10,000,000 for interior enforcement needs. This increase will provide the INS with additional staff to investigate and deport the more than 300,000 alien fugitives who have been ordered removed or deported from the U.S. but have failed to comply with those orders. The conferees are aware of a growing number of illegal aliens in Bettendorf and Davenport, Iowa; Moline and Rock Island, Illinois; and the Roanoke area in the upper Shenandoah Valley, and direct the INS to review staffing levels in these areas.

Joint Terrorism Task Forces.—The conference agreement continues to support the concept of Joint Terrorism Task Forces (JTTFs), and therefore includes an increase of \$6,000,000, 59 positions and 30 FTE for INS participation in JTTFs. This funding complements funding provided to the FBI and other Department of Justice components for these multi-agency law enforcement activities.

Interior Checkpoints.—Bill language is retained prohibiting funds for the site acquisition, design, or construction of any permanent Border Patrol checkpoint in the Tucson sector. The INS is reminded that it must not operate a checkpoint at the same location for seven consecutive days during a 14-day period in the Tucson Sector. The conferees direct INS to submit a report to the Committees on Appropriations by June 27, 2003, regarding the checkpoint program. This report should include a list of all checkpoints, when they were established, a profile of all resources associated with each checkpoint, as well as current and historical statistics. This review should discuss the checkpoint program, and how it complements the overall border security enforcement strategy in recognition of urgent homeland security issues. The conferees direct the Tucson Sector to continue negotiations regarding the relocation of Tucson Sector helicopter operations to Sierra Vista, Arizona.

Border Patrol Equipment.—Of the amounts provided for Border Patrol equipment, the Border Patrol is directed to provide no less than \$5,000,000 to procure lightweight handheld thermal imagers for Border Patrol field use and operations. The conferees support the continuation of ISIS and RVIS, and direct the INS to submit a report to the Committees on Appropriations by July 7, 2003, regarding the status of these initiatives, particularly in light of the deployment issues that have arisen on the Northern Border because of the differences in climate and terrain. The conference agreement also includes \$40,000,000 for vehicles. The conferees note that base funding is provided for every on board agent, and funding for each new agent hired includes funds to purchase new vehicles. The conferees urge the INS to ensure that funds provided for vehicles and other basic agent needs are spent as provided by the Congress, and not diverted for other uses.

Injured Illegal Aliens.—The conferees believe hospitals in Cochise, Pima, Santa Cruz and Yuma Counties, Arizona are bear-

ing an unfair burden as a result of illegal immigrants injured as a result of interaction with the Border Patrol, and therefore direct the INS to provide such sums as necessary to reimburse hospitals in these counties, as authorized by sections 562 and 563 of the Illegal Immigration and Immigrant Responsibility Act of 1996, as amended. The conferees believe that this one-time funding infusion is appropriate until a nation-wide solution is developed in fiscal year 2003. This funding is only available to the extent that these costs are not otherwise reimbursed through other Federal programs or cannot be recovered from the alien or another person. The conferees direct the INS, in coordination with the Department of Health and Human Services, to provide a report by July 1, 2003 to the Committees on Appropriations with recommendations to address this issue.

Trafficking.—To continue efforts to combat the illegal trafficking into this country of some 50,000 women and children every year, the conference agreement includes an increase of \$3,662,000 for costs associated with effectively implementing provisions of the Victims of Trafficking and Violence Protection Act. The conferees continue to be supportive of the INS' Violence Against Women Act Processing Unit which is responsible for the adjudication of immigration cases filed by victims of violence including battered immigrants, trafficking victims and other immigrant victims of crime. The conferees encourage the Administration to ensure that sufficient funding is available for the Unit to continue to adjudicate and process immigration cases.

Alternatives to Detention.—The conference agreement includes \$3,000,000 for alternatives to detention to promote community-based programs for supervised release from detention such as the Vera Institute for Justice's Appearance Assistance Project or other similar programs. These funds shall not be available for new or existing detention facilities, including non-secure detention and/or shelter care detention facilities.

Legal Orientation.—The conference agreement also includes \$1,000,000 for non-governmental agencies to provide "live presentations" to persons in INS detention prior to their first hearing before an immigration judge. These presentations will provide immigration detainees with essential information about immigration court procedures and the availability of legal remedies to assist detainees in distinguishing between meritorious cases and frivolous cases.

Criminal Aliens.—The conferees understand that the INS has an ongoing program to identify and deport criminal aliens in local and county jails, pursuant to Public Law 105-141, which requires the Attorney General to establish a program in local prisons to identify, prior to arraignment, criminal aliens and aliens who are unlawfully present in the United States. The conferees expect that within existing resources provided for detention and removal of aliens, the INS will continue to support this program, and increase resources as warranted for these activities. A recent Inspector General audit noted a number of problems in the INS' Institutional Removal Program, including the fact that INS has failed to identify all deportable criminal aliens, including aggravated felons. The conferees support the recommendations provided in the audit, and

urge the INS to adopt them as expeditiously as possible. Similarly, the conferees have provided funding for the High Intensity Criminal Alien Apprehension and Prosecution program to use automated fingerprint technology to improve the identification, apprehension, and prosecution of previously deported criminal aliens in L.A. County. The conferees direct INS to allocate sufficient staff, if warranted, to the Los Angeles office, in order to enter the fingerprint records of all deportable criminal aliens incarcerated in prisons and jails into the CAL-ID database in a timely fashion.

IMMIGRATION SERVICES

The conference agreement includes \$709,000,000 for Immigration Services.

Eliminating the Backlog of Immigration Applications.—The June 2002 Backlog Elimination Plan states that the INS will reach a national average processing time of six months or less for all applications by the end of fiscal year 2003, and will achieve a processing time standard of six months or less at every office by the end of fiscal year 2004. From 1993 to 2000, more than 6,900,000 legal immigrants have applied for citizenship, more than in the previous 40 years combined. The Committees on Appropriations have provided more than \$430,000,000 in appropriations to the INS over the last six years to address the backlog of applications and to improve the integrity of the naturalization process; this funding is in addition to the more than \$4,500,000,000 in fees that the INS has collected to process applications. The INS estimates that it will process about 9,400,000 applications in fiscal year 2003. The conferees look forward to receiving quarterly updates from the INS regarding efforts to achieve these new standards. The conferees expect that if the INS realigns existing staff to better address workload issues, that any shift in employees will be subject to reprogramming requirements in this Act.

The conferees continue to hear from Members of Congress and their constituents with concerns about the lack of attentiveness to requests for better service with regard to the processing of immigration applications. The conferees receive many requests for additional resources in the nearest INS office or for the opening of new INS offices to deal with backlogs. The conferees again urge the INS to review staffing levels throughout the country to ensure that resources are deployed to match work requirements. The conferees expect the INS to direct special emphasis toward backlog reduction problems in Northern Virginia; New York, New York; the Bronx, New York; the state of Iowa; Northern New Jersey; Florida; Arizona; and Michigan. The conferees also urge the INS to make every effort to acquire space in Portland, Oregon's Central Business District for its District Office.

Inadmissible Aliens.—The conferees direct the INS to remain vigilant with regard to enforcing section 212 of the Immigration and Nationality Act of 1952, as amended. This section pertains to the general classes of aliens ineligible to receive visas. The conferees are particularly concerned with people who are granted entrance into the United States who may have been foreign intelligence operatives against the United States; who have been or are involved in trafficking in persons; or who are foreign government

officials who have engaged in particularly severe violations of human rights or religious freedom. The INS, in cooperation with the State Department's Bureau of Consular Affairs, is directed to submit a report no later than June 27, 2003, describing efforts to enforce the provisions of Section 212. The conferees continue to urge the Secretary of State and the Attorney General to deny immigrant or non-immigrant visas to any citizens of the People's Republic of China whom they determine participates in or otherwise supports organ harvesting.

OFFSETTING FEE COLLECTIONS

The conference agreement assumes a total of \$2,311,073,000 in offsetting fee collections paid by persons who are traveling internationally or who are applying for immigration benefits. These fees support activities related to the legal admission of persons into the United States. The conferees are concerned about the findings of a recent Inspector General audit which found that INS fee collection procedures are poor and subject to errors and theft. Therefore, the INS is directed to adopt and enforce more stringent accounting procedures regarding the collection of fees for these activities as noted in this recent report.

Immigration Inspections User Fees.—The conference agreement assumes \$658,295,000 of spending from offsetting collections in this account. Last year, the conferees supported an increase in the INS user fee account to provide for additional inspectors and to facilitate the use of technology to improve the ability to process international air travelers and provide for greater security measures. Despite these increases, the Congress continues to hear concerns about staffing levels at airports around the country. Therefore, the conferees expect the INS to hire up to an additional 615 airport immigration inspectors and support staff with the expected increase in fee revenues. The conferees are particularly concerned with staffing levels at the Detroit International Airport and the Miami International Airport, and urge the INS to review staffing at all airports to ensure appropriate coverage to facilitate travel while ensuring secure borders. These new inspectors are expected to be deployed at new and renovated terminals, as well as at high growth airports. The conferees also direct the INS to hire up to an additional 85 seaport immigration inspectors and 8 support staff. The conferees include language clarifying that the newly established immigration inspection fee is intended to be applied to cruise ship passengers, and not to individuals who use ferries on a daily basis. The INS should consult with the Committees on Appropriations prior to the deployment of these new positions.

Immigration Examinations Fees.—The conference agreement assumes \$1,443,803,000 to support the adjudication of applications for immigration benefits, to be derived from fees collected from persons applying for immigration benefits. This funding level assumes an increase of \$50,496,000 to continue efforts to reduce the backlog of applications and at the same time improve the integrity of the process. As noted previously, the INS is expected to provide quarterly updates to the Congress regarding implementation of its Five Year Backlog Reduction Plan. The INS is expected to provide no less than \$43,000,000 for the telephone customer service center and

no less than \$7,200,000 for the indexing and conversion of INS microfilm images. The conferees support the ongoing efforts of the INS to index and convert deteriorating records to digital format, which ensures that the records will be maintained, and more readily searchable.

Land Border Inspections Fees.—The conference agreement assumes \$21,700,000 in spending from the Land Border Inspection Fund. The revenues generated in this account are from Dedicated Commuter Lanes in Blaine and Port Roberts, Washington; Detroit Tunnel and Ambassador Bridge, Michigan; and Otay Mesa, California; and Automated Permit Ports which provide pre-screened local border residents border crossing privileges by means of automated inspections. The conferees fully support the concept of Dedicated Commuter Lanes, and expect the INS to employ the lessons learned in this program to the development of the Entry Exit program.

Breached Bond/Detention Fund.—The conference agreement assumes \$171,275,000 in spending for detention of illegal aliens from the Immigration Breached Bond/Detention Fund in fiscal year 2003. The allowance assumes that \$50,069,000 will be used to fund additional detention space needs. The conferees expect the INS to rely on a mix of INS, private and state facilities for these additional needs. Resources available in this Fund are derived from the recovery of breached cash and surety bonds in excess of \$8,000,000, which are deposited in the Fund as offsetting collections. In addition, resources are also available in this account from a portion of fees charged under section 245(i) of the Immigration and Nationality Act. The conferees are aware that the number of detainee complaints and disturbances has decreased at the San Pedro Service Processing Center as a result of counseling and religious services being offered to detainees. The INS is directed to provide no less than \$1,500,000 to continue to provide such services to detainees at the INS Service Processing Centers.

H-1B Fees.—The conference agreement includes \$10,000,000 to process H-1B visas.

The H-1B is a temporary visa category for non-immigrant, highly skilled workers.

The conference agreement includes bill language, similar to that included in previous Appropriations acts, which provides: (1) up to \$50,000 to meet unforeseen emergencies of a confidential nature; (2) for the purchase of motor vehicles for police-type use and for uniforms, without regard to general purchase price limitations; (3) for the acquisition and operation of aircraft; (4) up to \$400,000 for research to be available until expended; (5) up to \$5,000,000 for payments to State and local law enforcement agencies engaged in cooperative activities related to immigration; (6) up to \$5,000,000 to fund or reimburse other Federal agencies for costs associated with the repatriation of smuggled aliens; (7) up to \$5,000 for official reception and representation expenses; (8) a limit on the level of funding for the Office of Legislative and Public Affairs; (9) a limit on the amount of funding available for non-career positions; (10) separate headings for Immigration Enforcement and Border Affairs and Immigration Services; (11) revised language carried in previous Appropriations acts regarding the operation of the check-

points in the Tucson Sector; and (12) deletes language carried in previous Appropriations acts regarding the operation of the San Clemente and Temecula checkpoints.

CONSTRUCTION

The conference agreement includes \$258,637,000 for construction projects for the Immigration and Naturalization Service for fiscal year 2003. The conference agreement does not adopt the proposal of the Administration to provide funding for construction under the salaries and expenses account but instead continues funding for these activities under a separate account.

This funding directly supports the Congress' commitment to ensuring that adequate facilities are provided for the increasing number of Border Patrol Agents and Immigration Inspectors being deployed to ensure safe borders. Of the amounts provided, not less than \$3,000,000 shall be used on border fences and other barrier construction in the Douglas, Naco and Nogales corridors, and such sums as necessary to continue fencing efforts in the San Diego corridor. The conferees direct that not less than \$1,000,000 be used for the Tucson Sector Air Operations facility in Sierra Vista, which the Committees on Appropriations directed be implemented last year.

FEDERAL PRISON SYSTEM

SALARIES AND EXPENSES

The conference agreement includes a fiscal year 2003 appropriation of \$4,071,251,000 for the salaries and expenses of the Federal Prison System. The conferees recognize the critical importance of providing adequate space for the incarceration of sentenced and unsentenced Federal prisoners, and the need to activate newly constructed prison facilities.

Activation and Expansion of New Prisons.—The conference agreement includes an increase of \$101,416,000 for the activation of the new medium security facility in Glenville, West Virginia; and the new high security facilities at Big Sandy, Kentucky; McCreary, Kentucky; and Victorville, California. This amount will provide for more than 4,400 new beds. The conferees also include increases of \$10,132,000 for expansion at the Marion, Illinois facility and at the Safford, Arizona facility. This amount will provide for more than 764 new beds.

The conferees include new bill language designating funding levels provided for the activities under this account. Bill language, similar to that included in previous Appropriations acts, is also included which provides: (1) for the purchase of motor vehicles for police-type use; (2) for the provision of technical advice to foreign governments; (3) for transfer of funds to the Health Resources and Services Administration; (4) for the Director to enter into contracts to furnish health care; (5) up to \$6,000 for reception and representation expenses; (6) up to \$20,000,000 for contract confinement expenses for the care and security of Cuban and Haitian entrants; and (7) for the Federal Prison System to enter into contracts and other agreements with private entities for multi-year periods for the confinement of Federal prisoners. The conference agreement also includes a requested change in the number of new and replacement automobile purchases, and includes language, as requested, designating an amount to remain available for two fiscal years.

BUILDINGS AND FACILITIES

The conference agreement includes \$399,227,000 for fiscal year 2003 for the construction, modernization, maintenance and repair of prison and detention facilities housing Federal prisoners. The conferees agree that none of the funds appropriated for the Federal Prison System in this or prior Appropriations acts for the construction of new prison facilities shall be rescinded or cancelled. Further, the conferees expect all current projects to move forward as planned. The conferees provide increases of \$225,972,000 for facilities with prior funding:

[In thousands of dollars]

Facilities with prior funding:	
Hazelton, West Virginia	66,600
FCI Pollock, Louisiana	116,872
Berlin, New Hampshire	20,000
Subtotal	\$203,472

Expansions:

Sandstone, Minnesota	\$5,300
FCI Otisville, New York	11,600
USP Florence, Colorado	5,600
Total New Funding	\$225,972

The conference agreement includes bill language, similar to that included in previous Appropriations acts, which allows: (1) for planning, acquisition of sites, and construction of facilities; (2) for acquisition, remodeling, and equipping facilities by contract or force account; (3) up to \$14,000,000 to construct inmate work areas; (4) for use of prisoner labor; and (5) up to 10 percent of this appropriation to be transferred to the salaries and expenses account.

LIMITATION ON ADMINISTRATIVE EXPENSES, FEDERAL PRISON INDUSTRIES, INCORPORATED

The conference agreement continues a limitation on administrative expenses of \$3,429,000 for Federal Prison Industries, Incorporated, for fiscal year 2003.

OFFICE OF JUSTICE PROGRAMS

JUSTICE ASSISTANCE

The conference agreement includes \$201,291,000 for Justice Assistance. The distribution of funding is as follows:

Justice Assistance

(Dollars in thousands)

	<i>Amount</i>
National Institute of Justice	\$59,879
Office of Science and Technology	(33,000)
Nat. Law Enforce and Corrections Tech Centers	(17,000)
Bureau of Justice Statistics	32,335

Management and Administration	38,000
Total	201,291

National Institute of Justice (NIJ).—The conference agreement provides \$59,879,000 for the National Institute of Justice.

Office of Science and Technology.—The conferees commend the efforts of the leadership of the National Institute of Justice’s (NIJ) Office of Science and Technology (OS&T). This office has assisted local law enforcement in making significant advances in the areas of non-intrusive, concealed weapons and contraband detection, vehicle stopping, DNA testing, public safety standards development, officer protection, less-than-lethal incapacitation, public safety communications, information management, counterterrorism, crime mapping, location and tracking, secure communications, and noninvasive drug detection. In addition, the conferees commend and encourage the continuing partnership that OS&T has developed with the National Institute of Standards and Technology with the goal of developing standards and carrying out scientific and engineering research related to the public safety community.

To implement the mission of OS&T, pursuant to The Homeland Security Act of 2002 (Public Law 107–296), the conference agreement includes \$33,000,000 for OS&T from within the overall

amount provided for NIJ. In addition, within the funds provided for the local law enforcement block grant program, \$20,000,000 is for OS&T to assist local law enforcement units in identifying, selecting, developing, modernizing, and purchasing new technologies in accordance with the aforementioned Act.

The National Law Enforcement and Corrections Technology Centers.—Since 1994, the National Law Enforcement and Corrections Technology Centers (NLECTC) have served the State and local law enforcement and corrections communities by providing support, research findings, and technical expertise on issues that allow them to perform their jobs safer and more effectively. The NLECTC system consists of facilities located across the country and each facility specializes in one or more specific areas of research and development. The conferees commend the work that NIJ's Office of Science and Technology [OS&T], and through it the NLECTC system, has done to improve the capabilities of the law enforcement and corrections communities. To further the work of the NLECTC system, the conferees recommend \$17,000,000 for the continued support of the system. These funds are to be distributed equally among the Northeast Regional Center, Southeast Regional Center, Rocky Mountain Regional Center, Western Regional Center, Rural Law Enforcement Technology Center, and Northwest Center. The conferees continue to support the Centers receiving reimbursable funding from other accounts as needed.

Within available funds, the conferees recommend that NIJ consider funding the Center for Civil Force Protection and the Public Safety Technology Assessment Facility at Sandia National Laboratories in New Mexico. The Center provides important physical security counterterrorism assistance to Federal, State, and local law enforcement.

In addition, the current year level is provided for the Office of Law Enforcement Technology Commercialization, Inc. and Facial Recognition.

In addition to the above activities, within the amounts provided, NIJ is to provide grants for the following projects:

\$300,000 for Practitioners Assistance Team (PAT) to provide technical assistance to State and local agencies attempting to implement integrated justice systems;

\$1,000,000 for the University of Houston to study in-car law enforcement technologies;

\$1,000,000 for the State of Virginia to develop a State-wide emergency communications plan to address communications equipment and interoperability needs of first responders throughout the State. The plan should address both the new equipment needs of local first responder agencies and methods for making current communications systems interoperable within local jurisdictions and throughout the State. The State is encouraged to build upon the experiences and expertise learned in the National Institute of Justice's interoperable communications pilot project in the City of Alexandria (Project Agile);

\$500,000 for the Center for Advanced Media Analysis to fund advanced research in the area of multi-media capture and analysis of authorized law enforcement capture;

\$750,000 for Lane County, Oregon's Breaking the Cycle of Juvenile Drug Abuse program to decrease juvenile crime and drug abuse through early identification and intervention;

\$1,500,000 is for the Center for Task Force Training Program;

\$750,000 to the North Carolina Attorney General's Office for Telemarketing Fraud Enforcement and Privacy Project;

\$650,000 for the Mistral Security Non-Toxic Drug Detection and Identification Aerosol Technology;

\$350,000 for the Pennsylvania Task Force on Prison Overcrowding; and

\$750,000 for Operation Ceasefire in Charleston, SC for overtime for response teams.

Missing Children.—The conference agreement includes \$32,847,000 for the Missing Children Program for the following purposes:

MISSING CHILDREN PROGRAM

[In thousands of dollars]

Program	FY 2002 enacted	FY 2003 request	FY 2003 agree- ment
National Center for Missing and Exploited Children	11,450	11,450	12,500
Jimmy Ryce Law Enforcement Training Center	2,700	2,700	3,000
Internet Crimes Against Children Task Force	6,500	12,500	12,500
MEC Office	2,347	2,347	2,347
AMBER Alert Grants	—	—	2,500
Total	22,997	28,997	32,847

Of the funds provided for the National Center for Missing and Exploited Children (NCMEC), \$2,245,000 is for the CyberTipline. The conferees recommend that the NCMEC consult with I-Safe America to provide nationwide Internet Safety Training in grades K–12.

The conference agreement includes \$2,500,000 for training and technical assistance to develop an effective, coordinated AMBER Alert program.

Office of Victims of Crime.—The Office of Victims of Crime (OVC) administers formula and discretionary grants designed to benefit victims, provide training to professionals who work with victims, develops projects to enhance victims' rights and services, and undertakes public education and awareness activities on behalf of crime victims. In fiscal year 2002, OVC was provided \$68,100,000 to respond to the September 11, 2001 terrorist attacks. The conferees direct that the OVC provide a report to the Committees on Appropriations no later than 60 days after enactment on the status of how the emergency funds have been spent.

Regional Information Sharing System.—The conference agreement provides \$29,000,000 for the Regional Information Sharing System (RISS). In addition to the amount provided under this heading, there is \$10,000,000 under the heading "Domestic Preparedness" account to enhance the electronic dissemination and sharing of terrorist-related information among Federal, State, and local agencies. The conferees expect that RISS and other informa-

tion sharing systems will be eligible to receive grants under this program in order to enhance State and local agencies' ability to access and share crime and terrorist information.

The conferees support the current effort to link the RISS system with the Law Enforcement On-Line [LEO] information system, which will greatly expand access to critical law enforcement information at the Federal, State, and local level.

Management and Administration.—The conference agreement provides \$38,000,000 for the management and administration of the Office of Justice Programs (OJP). The conferees understand that OJP is not backfilling vacant positions, and therefore request a quarterly status report on staffing.

The Department has reported to the Committees on Appropriations on a competitive sourcing effort. To support this effort, the conferees must be assured that effectiveness is improved and savings are attained. The conferees direct that OJP provide the Committees on Appropriations with detailed plans on this effort before proceeding with changes.

OFFICE FOR DOMESTIC PREPAREDNESS

The conferees have long viewed State and local jurisdictions' ability to detect, prevent and respond to a terrorist attack as one of its highest priorities. State and local responders are first to arrive on the scene when a terrorist attack occurs and must be prepared to protect life and property. This function is inherently non-Federal, although Federal resources and expertise are needed to manage the crises and provide support to State and local assets when an attack overwhelms their resources.

The amounts provided by the conferees demonstrate the continued support for the Office of Domestic Preparedness (ODP). ODP must continue its vital and successful program for assisting State and local response agencies.

Equipment—The conferees provide \$458,500,000 for ODP equipment programs. Within these amounts, \$10,000,000 is provided to enhance the dissemination of electronic threat information among Federal, State, and local responders. The conferees understand that there is a large proliferation of local, State, regional, and Federal information sharing initiatives. The conferees also understand that many of these systems are being developed independently with no plan to integrate with other information sharing systems such as RISS and LEO. This funding is provided to ODP to enhance State and local agencies' ability to share intelligence information with each other and with the Department of Homeland Security and the Department of Justice. The conferees direct that the ODP coordinate this program with the Bureau of Justice Assistance (BJA). The conferees also expect BJA and ODP to continue to work with State, local, and Federal agencies through the Global Intelligence Working Group of the Global Justice Information Sharing Initiative.

Formula Grant Program to States—Of the amounts provided, \$400,000,000 is for the formula based grant program to States. The conferees direct that not less than 80 percent of equipment funding provided to the States by formula shall pass through to local governments.

Coordination—The conferees recognize that a significant portion of the funds provided under the formula grant program are used to improve voice and data communications interoperability among first responders. The conferees support this effort, but expect ODP to coordinate closely with other Federal agencies that also provide communications interoperability grants to first responders (i.e., FEMA, COPS, BJA, and NIJ), in order to ensure that Federal resources are being used effectively to improve intra- and inter-jurisdictional communications interoperability.

Standards—The conferees understand the need for minimum performance standards, testing, and evaluation in the areas of chemical, biological, radiological, and nuclear (CBRN) protective equipment, as well as voice/data communications equipment. The conferees, therefore, expect ODP to work closely with the National Institute of Standards and Technology (NIST) to test, evaluate, and develop minimum performance standards for CBRN protective

equipment and voice/data communications equipment for first responders.

Training—The conference agreement provides \$233,000,000 for training programs in ODP. This amount includes \$125,000,000 for the training consortium. In addition, the conference agreement includes \$5,000,000 for George Washington University to work in collaboration with George Mason University, Shenandoah University and other regional organizations to provide terrorism prevention and response training for multiple types of first responders including law enforcement, fire, hazmat, EMS and other types of responders. The conference agreement includes \$3,000,000 for the National Counterterrorism Policy Center in St. Petersburg, FL, to assist State and local homeland security and law enforcement officials with their strategic plans to prevent and detect acts of terrorism. The conference agreement also includes \$7,000,000 for the Center on Catastrophe Preparedness and Response at New York University (NYU), to support counterterrorism activities.

Exercises—The conference agreement provides \$112,000,000 for State and local exercises regarding an event involving weapons of mass destruction. Within this amount, \$7,000,000 is provided for the Top Official Exercise Series (TOPOFF). TOPOFF II is to be conducted in 2003, therefore, the Committees will consider a reprogramming for additional funds, if ODP finds it is necessary.

High Threat Urban Areas—Recognizing the vulnerability and high risk of terrorist attack in large urban areas, the Department of Defense (DoD) and later ODP provided training and equipment to the 120 largest U.S. cities through the Nunn-Lugar-Domenici Domestic Preparedness Program. While all of the cities identified in the Nunn-Lugar-Domenici Program have received domestic preparedness training, the conferees recognize that certain large urban areas remain high threat targets and are inadequately prepared to respond to a weapon of mass destruction (WMD) event. Therefore, the conferees recommend \$100,000,000 for ODP to develop a follow-on program to the Nunn-Lugar-Domenici program that addresses the unique equipment, training, planning and exercise needs of selected large high threat urban areas. The conferees recognize that large urban areas often cross State lines and involve multiple local jurisdictions. The conferees expect these plans will expand upon States' domestic preparedness strategies and that no funds will be awarded under this program until jurisdictions have clearly demonstrated a coordinated assessment of threat, vulnerability, needs, and capabilities. The conferees expect ODP to consult with the appropriate Federal agencies including the FBI and agencies within the Department of Homeland Security in identifying urban areas to be supported through this initiative. ODP should take into account credible threat; vulnerability; the presence of infrastructure of national importance; population; and identified needs of the jurisdiction's public safety agencies when determining program eligibility. The conferees expect ODP, in consultation with the appropriate Federal agencies, including the FBI and agencies within the Department of Homeland Security, to develop a multi-year strategy for addressing the unique needs of high threat urban jurisdictions to be supported by this program.

Research and Development—The conference agreement provides \$23,500,000 for research and development. Within the level of funding provided, ODP shall consider evaluating emerging first responding technologies such as hand-held detection equipment that can detect possible chemical or biological attacks, and emerging mapping, assessment, rescue and recovery technologies.

STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE

The conference agreement provides a total appropriation of \$2,065,269,000, of which \$20,990,000 is derived from prior year unobligated balances for the State and Local Law Enforcement Assistance Program. The conference agreement provides for the following programs:

Local Law Enforcement Block Grant.—The conference agreement includes \$400,000,000 for the Local Law Enforcement Block Grant program. This program provides grants to local law enforcement agencies to reduce crime, including acts of terrorism. Of the amount included, \$20,000,000 is provided to NIJ for assisting local units of government to identify, select, develop, modernize, and purchase new technologies for use by law enforcement and \$80,000,000 is provided for Boys and Girls Clubs. In addition, the conference agreement includes \$3,000,000 for Citizen Corps programs, including the expansion of Neighborhood Watch programs

and the Volunteers in Policing program. No funding is provided for Operation TIPS.

State Criminal Alien Assistance Program.—The conference agreement provides \$250,000,000 for the State Criminal Alien Assistance Program (SCAAP) for the reimbursement to States for the costs of incarceration of criminal aliens. The budget request proposed the elimination of this program. The conferees recognize the Southwest border States incur significant costs associated with criminal aliens. In addition to these funds, the conference agreement includes \$40,000,000 for the Southwest Border Prosecution program under the Community Oriented Policing Services account.

Indian Country Grants.—The recommendation provides \$18,000,000 for Indian Country grants. The conferees understand that the Comprehensive Indian Resources for Community Law Enforcement (CIRCLE) initiative is working well in the three Indian communities in which it is deployed. The conferees urge the Department to consider ways to expand the CIRCLE project into other communities. In addition, the conferees request that not later than 60 days after enactment of this Act, the Department submit a proposal to expand the CIRCLE project by integrating and coordinating resources from across the Federal agencies for purposes of Indian law enforcement, public safety, substance abuse, tribal justice systems, and facilities construction into a small grant program to Indian tribes and tribal consortia.

Within the amount for prison construction, the conferees direct that OJP shall review proposals and provide grants if warranted for the following projects:

Within the level of funds provided, \$5,000,000 is available for independent program evaluations. The conferees are aware of reports concerning the success of the Doe's Fund's Ready, Willing, and Able program. Within funds provided for program evaluation, OJP is directed to perform a program review of the program and submit to the Committees on Appropriations a report detailing the results of the review and any "best practices" of the program that can be applied to other similar grant recipients.

Violence Against Women Act.—The conference agreement includes \$390,165,000 to support grants under the Violence Against Women Act. The conference agreement provides funding under this account as follows:

OJP was required to submit a report detailing a plan to address violence against women with particular emphasis on Alaska, which ranks first in the Nation for domestic violence and child abuse. The report was to be completed by May 1, 2002, but has yet to be received by the Committees on Appropriations. The Department is directed to provide monthly updates on its progress until the report is completed as required.

Substance Abuse Treatment for State Prisoners.—The conference agreement includes \$65,000,000 for grants to States and

local governments for development and implementation of residential substance abuse treatment programs within State correctional facilities and certain local correctional and detention facilities. Up to 10 percent of the total program level maybe used for the treatment of parolees. These grants should only fund treatment for individuals up to 1 year after they are released from a State prison.

Juvenile Accountability Incentive Block Grant.—The conference agreement includes \$190,000,000 for the Juvenile Accountability Incentive Block Grant program. The conferees direct the Office of Juvenile Justice and Delinquency Prevention to provide \$250,000 to the American Prosecutors Research Institute to create and report on benchmarks to measure the use of individual programs and juvenile justice system performance in up to four pilot States. This funding shall be provided from the 2 percent set-aside under the Juvenile Accountability Block Grant program for technical assistance.

Within the level of funding provided, \$25,000,000 is available for Project ChildSafe, which has been merged with Project HomeSafe, for the purchase and distribution of gun safety locks. These funds may only be used to produce and distribute gun locks based on OJP's interim standard. The conferees note that no additional funding will be provided until a final standard is adopted.

Harold Rogers Prescription Drug Monitoring Program.—The conferees are concerned with the growing abuse of prescription drugs such as OxyContin and the devastating impact it has on families and communities throughout the country. In order to address this problem, the Committees on Appropriations provided \$2,000,000 in fiscal year 2002 for OJP to provide grants to States creating new prescription drug monitoring programs and to enhance current prescription drug monitoring programs. Prescription monitoring programs help prevent and detect the diversion and abuse of pharmaceutical controlled substances. States that have implemented prescription monitoring programs have the capability to collect and analyze prescription data much more efficiently than States without such programs, where the collection of prescription information requires the time consuming manual review of pharmacy files. The conference agreement includes \$7,500,000 to expand the Harold Rogers Prescription Drug Monitoring Program. Recognizing that prescription drug abusers often cross multiple State borders in order to fill prescriptions, the conferees encourage States to develop systems that allow bordering States to share information.

Prison Rape Prevention and Prosecution.—The conferees understand that experts have conservatively estimated that at least 13 percent of the inmates in the United States have been sexually assaulted in prison and that many inmates have suffered repeated assaults. Under this estimate, nearly 200,000 inmates now incarcerated have been or will be the victims of prison rape. The total number of inmates who have been sexually assaulted in the past 20 years likely exceeds 1,000,000. The conferees understand that prison rape contributes to the spread of sexually transmitted diseases such as HIV and AIDS. The conferees also recognize that inmates with mental illness and juvenile inmates are particularly vulnerable to sexual victimization. The conferees further under-

stand that most prison staff are not adequately trained or prepared to prevent, report, or treat inmate sexual assaults and that prison rape often goes unreported. Finally, the conferees understand that Congress will legislatively address this issue during the First Session of the 108th Congress.

In order to immediately address this problem, the conference agreement includes \$13,000,000 for a new prison rape prevention and prosecution program. This funding is provided for statistical data collection and analysis, the establishment of a national clearinghouse of information, and will provide grants to States, local authorities, prisons, and prison systems to undertake more effective efforts to prevent prison rape, investigate such incidents, and punish the perpetrators. The conferees expect OJP to work with the Committees on Appropriations in the development of this program.

Senior citizens against marketing scams.—The recommendation provides \$1,995,000 for this program to assist law enforcement in preventing and stopping marketing scams against the elderly. The conferees request that some program sessions be held at the National Advocacy Center. Also, the conferees direct that this effort be coordinated with the Federal Trade Commission.

Terrorism Prevention and Response Training for Law Enforcement and Other Responders.—The conference agreement includes \$15,000,000 for terrorism prevention and response training for law enforcement and other responders to be administered by the Bureau of Justice Assistance (BJA). The conferees expect the grant approval process to include a review of training curricula and materials to ensure that grantees are using up-to-date training techniques. BJA is encouraged to work with the Office of Domestic Preparedness in the execution of this program. This program shall be available for the costs of developing training, conducting training, and procuring training equipment and materials.

Within the amounts appropriated, the conferees expects BJA to examine each of the following proposals, to provide grants if warranted, and to submit a report to the Committees on Appropriations on its intentions for each proposal:

\$500,000 for the Iowa Central Community College regional first responder training center;

\$1,000,000 for the Onondaga Community College for a Regional Anti-Terrorism Training Center;

COPS Hiring Program.—The conference agreement includes \$200,000,000 for the hiring of law enforcement officers, including school resource officers, to prevent acts of terrorism, and other violent and drug-related crimes. The budget request did not include any funding for this purpose. Through its knowledge of the local communities and interaction with citizens, local law enforcement plays a critical role in preventing and detecting terrorism and sharing this information with State and Federal law enforcement. The conferees also recognize that while local law enforcement responsibilities have expanded to include counterterrorism since September 11th, daily crime prevention and law enforcement duties must still be performed. Further, the conferees recognize that it is local law enforcement's role to respond to citizen concerns and alleviate fears related to terrorism and other violent crimes. The conferees expect the COPS Program Office to ensure the appropriate emphasis on law enforcement's role in combating terrorism, violence, and drug crime, and securing our nation's schools.

In addition, the conference agreement makes 30 percent of the funding available for law enforcement overtime costs for training and the prevention of acts of terrorism and other violent and drug-related crimes. The conferees feel that the cities of New York, NY, Detroit, MI and Wayne County, MI may be eligible under this program for anti-terrorism efforts.

The conferees also recognize that State and local law enforcement agencies depend on technology and communications equipment to perform their jobs safely and effectively. Therefore, the conference agreement includes language for a new communications

technology grant program under the COPS Crime-Fighting Technologies section of this report.

Within the level of funding provided, the conferees expect the COPS office to provide training to assist school resource officers in preventing terrorist acts aimed at schools. The officers will be trained in non-intrusive defensive measures to reduce the vulnerability of schools to terrorist attacks and offensive measures to prevent, deter, and respond to terrorism. The conferees direct that a report be provided to the Committees on Appropriations no later than 60 days after enactment of this Act to include a spending plan for this effort and the hiring and overtime effort described above.

Police Corps.—The conference agreement includes \$15,000,000 for the Police Corps program. The conferees understand that sufficient prior year unobligated balances exist to allow the program to maintain at least its current level. The conference agreement includes bill language, as requested, providing that funding agreements shall include the funding for outyear program costs of new recruits. This language is necessary to prevent the program from incurring unfunded future liabilities as new recruits enter the program.

The conferees understand that in fiscal year 2002 there were 22 States training recruits in the Police Corps programs. Within the available funding, including carryover balances, OJP is expected to fund additional programs as more State programs meet OJP program criteria. The conferees understand that Public Law 107–273 authorizes increased payments for scholarships, educational reimbursements, and stipends for trainees. However, the Administration’s budget request did not include additional funding to accommodate these increased costs. Therefore, in order to ensure there are sufficient resources to fund additional training programs, the conference agreement directs OJP to continue to provide payments at the levels authorized in fiscal year 2002. In addition, the conference agreement directs OJP to standardize the funding provided for recruit training and require State matching funds for training costs. The conference agreement directs OJP to submit a Police Corps financial plan no later than 180 days after enactment of this Act.

The conferees expect OJP to work with State Police Corps programs to ensure these programs are providing effective and up-to-date terrorism prevention and response training. The conferees also recognize that every State will not implement a Police Corps program and that the vast majority of law enforcement training will not be performed in Police Corps programs. The conferees direct OJP to submit a report no later than 180 days after enactment of this Act, describing how successful Police Corps training techniques can be incorporated in State and local law enforcement academies in order to maximize the number of recruits that receive this advanced training. The report shall also describe OJP’s efforts to incorporate terrorism prevention and response training into the Police Corps program and discuss the feasibility of establishing regional Police Corps training centers.

Indian Country.—The conference agreement includes \$35,000,000 to be used to improve law enforcement capabilities on Indian lands and native villages, both for hiring uniformed officers,

including village public safety officers, and for the purchase of equipment and training for new and existing officers. The conferees recommend that five percent of these funds be provided directly to tribal judicial systems to assist Tribal courts with the increased caseload associated with the increased arrests as a result of the additional funds for tribal law enforcement.

Methamphetamine Enforcement and Clean-Up.—The conference agreement includes \$57,132,000 for State and local law enforcement programs to combat methamphetamine production and distribution, to target drug “hot spots,” and to remove and dispose of hazardous materials at clandestine methamphetamine labs.

Within the amount provided, the conference agreement includes \$20,000,000 to reimburse the Drug Enforcement Administration (DEA) for assistance to State and local law enforcement for proper removal and disposal of hazardous materials at clandestine methamphetamine labs.

In addition, within the amount provided, the conferees expect the COPS Program Office, in consultation with DEA, to examine each of the following proposals, to provide grants if warranted, and to submit a report to the Committees on Appropriations on its intentions for each proposal:

\$415,000 for the Oklahoma Bureau of Narcotics and Dangerous Drug Control to properly train and equip officers for operations involving clandestine methamphetamine labs;

\$150,000 for the Criminal Justice Institute at the University of Arkansas at Little Rock to train rural law enforcement officers in the issues of safety, investigation, and evidence collection related to methamphetamine production;

COPS Interoperable Communications Technology Program.—

The conference agreement provides \$20,000,000 for the Office of Community Oriented Policing Services (COPS) Interoperable Communications Technology program. This program should be designed and implemented by the COPS Office, in coordination with the National Institute of Justice's Advanced Generation of Interoperability for Law Enforcement (AGILE) program and the Bureau of Justice Assistance (BJA). The conferees seek to utilize the expertise of all three organizations so as to create a grant program that is highly responsive to the immediate needs of the State and local law enforcement community.

This program should address the critical need of law enforcement to improve cross-jurisdictional communication and information sharing. The conferees direct the COPS Office to develop and submit to the Committee, no later than 60 days after the implementation of this Act, proposed guidelines for the program. In addition, this program should be coordinated with other Federal grant programs designed to address communications interoperability, so as to develop a comprehensive strategy for improving the current state of public safety communications systems. Consistent with the COPS Office's existing grant programs, the COPS Interoperable Communications Technology program should include a 25 percent match requirement.

The conferees understand and support the need for minimum standards for law enforcement communications technology. Therefore, within the amount provided, the conferees direct that \$5,000,000 be transferred to the National Institute of Standards and Technology to continue the efforts of the Office of Law Enforcement Standards (OLES) regarding the development of a comprehensive suite of minimum standards for law enforcement communications. In addition, to continue the research and development of improved communications technologies, the conferees direct that within the amounts provided, \$3,000,000 is to enhance the current program level for NIJ's AGILE program.

Law Enforcement Technology Program.—The conference agreement includes \$189,954,000 for the COPS Law Enforcement Tech-

TRADE AND INFRASTRUCTURE DEVELOPMENT

RELATED AGENCIES

The conference agreement includes a total of \$5,695,127,000 for the programs of the United States Trade Representative, the International Trade Commission and the Department of Commerce for fiscal year 2003.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

SALARIES AND EXPENSES

The conference agreement includes \$34,999,000 for the Office of the United States Trade Representative (USTR) for fiscal year 2003. The recommendation provides additional trade negotiator positions and ancillary costs to address the increasing workload associated with anticipated new trade agreements. The budget request recommended transferring funding jurisdiction to the Executive Office of the President. The conferees do not concur with this proposal.

The Office of the United States Trade Representative is responsible for developing and coordinating U.S. international trade, commodity, and direct investment policy, and leading or directing negotiations with other countries on such matters.

INTERNATIONAL TRADE COMMISSION

SALARIES AND EXPENSES

The conference agreement includes \$54,000,000 for the International Trade Commission for fiscal year 2003. The recommendation provides for inflation-related costs and the continuation of two IT projects.

The International Trade Commission is an independent, quasi-judicial agency responsible for conducting trade-related investigations; providing the Congress and the President with independent, expert technical advice to assist in the development and implementation of U.S. international trade policy; responding to the Congress and the President on various matters affecting international trade; maintaining the Harmonized Commodity Description and Coding System of internationally accepted product nomenclature; providing technical assistance to eligible small businesses seeking remedies and benefits under the trade laws; and performing other specific statutory responsibilities ranging from research and analysis to quasi-judicial functions on trade-related matters.

DEPARTMENT OF COMMERCE

INTERNATIONAL TRADE ADMINISTRATION

OPERATIONS AND ADMINISTRATION

The conference agreement recommends \$370,192,000 in total resources for the programs of the International Trade Administra-

tion (ITA) for fiscal year 2003. The recommendation includes \$362,192,000 to be derived from direct appropriations and \$8,000,000 from fee collections. Of the amount of fee collections, \$5,000,000 is anticipated from a new fee proposal requested in the budget. The agreement adopts the consolidation of this effort within the Under Secretary/Administration heading, as proposed.

The conference agreement includes additional funding to monitor and enforce trade agreements, and to expand access for U.S. companies to foreign markets. In addition, funding is provided to ensure the United States Foreign Commercial Service has adequate resources to fund increased security and operating costs for overseas posts. The recommendation also assumes a realignment of \$5,975,000 from base funds for information and communication systems and merges funding under the Under Secretary/Executive Administration to ensure greater efficiency, as proposed in the budget.

The following table reflects the distribution of the recommendation by subactivity:

Trade Development.—The conference agreement provides a total of \$67,669,000 for this component and an additional \$450,000 is available from prior year unobligated balances. The recommendation includes \$500,000 for increased inflationary costs. The conferees provide \$10,000,000 for the National Textile Centers, and \$3,000,000 for the Textile/Technology Center (TC2); \$500,000 for an international competitiveness program; \$500,000 for a trade processing center; \$250,000 for an export database; and \$500,000 for a travel industry statistics component, as provided in the prior year.

Of the funds provided, \$500,000 is to develop a new steel industry information management system. Further, the recommendation assumes a transfer of \$550,000 from this heading to the Under Secretary/Executive Administration heading for information and communication activities, as proposed.

Market Access Compliance.—The conference agreement includes \$31,204,000 for Market Access Compliance. Of the amounts provided, \$557,000 is to provide for increasing costs for ongoing operations; \$930,000 is provided to expand markets by combating regulatory barriers; \$576,000 is provided to support negotiation efforts for the Free Trade Area of the Americas; \$900,000 is provided to support new efforts relating to the Africa Growth Opportunity Act; and \$850,000 is for new efforts relating to the Caribbean Basin Initiative (CBI). The conferees determined that it is more prudent to use direct appropriations for the new CBI efforts instead of relying on anticipated fees for this purpose, as proposed.

The recommendation assumes a transfer of \$350,000 for information and communication activities from this heading to the Under Secretary/Executive Administration heading, as proposed.

Import Administration.—The conference agreement includes \$44,229,000 for the Import Administration. Of the amounts provided, \$7,500,000 is to continue overseas compliance and import surge monitoring and enforcement, including \$3,500,000 to monitor import data and customs flows for surges in key markets and sectors, such as steel and lumber, and take immediate action when such surges are detected. Such action should include using re-

sources to expedite unfair trade cases so U.S. companies can receive relief at the earliest possible date. The conferees expect Import Administration to vigorously monitor foreign subsidies so that action can be taken if the subsidies violate trade agreements.

Of the amounts provided, \$2,500,000 is provided to review and evaluate in-depth Chinese and Japanese compliance with anti-dumping and countervailing duty commitments. China and Japan represent the majority of unfair trade actions, and the conferees believe there is an urgent need for greater attention to both Japanese and Chinese trade practices.

Of the amounts provided, \$1,633,000 for expanded compliance efforts, including \$875,000 for additional personnel to increase enforcement of antidumping (AD) and countervailing (CV) duty laws, and \$758,000 for the costs of five full-time equivalents to increase legal support for increased World Trade Organization litigation.

The recommendation also includes a transfer of \$775,000 for information and communication activities from this heading to the heading of Under Secretary/Executive Administration heading, as proposed.

U.S. and Foreign Commercial Service (US & FCS).—The conference agreement includes \$202,040,000 for the US & FCS. Of the amounts provided, \$900,000 is to be derived from unobligated prior year balances. The conferees provide an additional 4 full-time equivalents and \$1,125,000 for expanded compliance efforts. The recommendation assumes \$6,000,000 for increased security costs and other uncontrollable costs of overseas posts, and \$1,000,000 is to continue funding for a rural export program.

In addition, \$1,674,000 is provided to expand U.S. commercial presence throughout the continent of Africa; and \$1,650,000 is provided to cover the costs of a new presence in El Salvador, as proposed. The conference agreement includes direct appropriations for new Caribbean Basin Initiative efforts instead of relying on fees for this purpose, as proposed.

The conferees direct ITA to establish a partnership with communities in the City of Chicago and in Cook County, Illinois, to enhance trade relationships between the United States and African countries, focusing initially on efforts with Nigeria.

The conferees continue to direct that the US & FCS should continue and expand its Global Diversity Initiative to support minority-owned businesses in underserved areas, including inner-city urban areas, empowerment zones, enterprise communities, and Indian reservations. This initiative should continue to include support for companies that are export-ready and hoping to enter into and/or expand international operations.

Further, the conferees direct the Commercial Service to continue its work on the Appalachian-Turkish Trade Project, a project to promote opportunities to expand trade, encourage business interests, stimulate foreign studies, and to build a lasting and mutually meaningful relationship between the Appalachian states and the Republic of Turkey, as well as the neighboring regions, such as Greece.

Executive Direction/Administration.—A total of \$25,050,000 is recommended for the administrative and policy functions of ITA. The conference agreement includes \$5,975,000 from base transfers

from other activities to centralize information and communication activities under this heading, as proposed. In addition, \$1,075,000 is for increased training efforts.

The conferees remain concerned that ITA's efforts to increase trade between the United States and its trading partners are coming at the expense of the promotion of human rights. The advancement of human rights and the development of economies are not mutually exclusive goals. In addition, the conferees understand that the majority of employees in the US & FCS have not received any formalized training to assist them in promoting human rights. Therefore, the conferees direct ITA to develop a comprehensive training program for all officers and employees to ensure that, when counseling U.S. businesses on market conditions within a particular country, they must include information on human rights, in addition to information on rule of law issues and corporate responsibility. Of the amounts provided for training efforts, \$500,000 is to implement a formal human rights training program. ITA is strongly urged to work with non-government organizations, the State Department, and private entities to develop a comprehensive training program. The conferees direct the Secretary of Commerce to provide quarterly reports on the progress of the implementation of this new program.

In addition, language is included in the bill, as carried since fiscal year 1999 designating the amounts available for each unit within ITA. The conferees remind ITA that any changes from the funding distribution provided in the bill and report, including carryover balances, are subject to the standard reprogramming procedures set forth in section 605 of this Act. In addition, ITA is directed to report to the Committees on Appropriations, not later than April 11, 2003, a spending plan for all ITA units, which incorporates any carryover balances from previous fiscal years.

Trade Missions.—The conferees direct all trade missions involving Department of Commerce agencies must be initiated, coordinated and administered through ITA.

Buying Power Maintenance.—The conferees direct ITA to report on the impact of exchange rate fluctuations on ITA's budget on a quarterly basis. The conferees expect that any exchange rate gains reflected in this report will be reserved to balance future exchange rate losses.

Trade Show Revenues.—The conferees direct ITA to submit a report by the date of the budget submission on the amount of trade show revenues that are collected on an annual basis, expenditures from these revenues, and how they displayed in the budget.

BUREAU OF INDUSTRY AND SECURITY

OPERATIONS AND ADMINISTRATION

The conference agreement includes \$79,328,000 for the Operations and Administration of the Bureau of Industry and Security (BIS), of which \$4,675,000 is from prior year unobligated balances. Within the total amount available, the recommendation includes the following:

Export Administration.—\$33,399,000 is provided for export administration activities, of which \$1,875,000 is from prior year unob-

ligated balances. The recommendation includes \$1,140,000 for export licensing personnel, as proposed.

Export Enforcement.—\$31,122,000 is provided for export enforcement activities. The recommendation continues funding for the Dubai and Cairo attaché offices, which received initial funding in Public Law 107–117. Of which, the recommendation provides \$3,356,000 and 13 full-time equivalents to maximize legal export opportunities while ensuring that illegal exports are prevented.

BIS is expected to enhance its export control efforts, including a new initiative under which BIS will send a limited number of export enforcement agents (attachés) overseas to conduct end—use checks. The conferees direct that, prior to the assignment of any attaché at U.S. missions overseas, BIS is expected to provide a detailed report to the Committees on Appropriations detailing the location and responsibilities of each attaché. Additionally, the report should detail the arrangement between Department of Commerce and the Department of State concerning accommodations for these personnel within Department of State facilities to ensure there is sufficient space.
