## A BILL

To preserve mathematics- and science-based industries in  
the United States.

1       *Be it enacted by the Senate and House of Representa-*  
2       *tives of the United States of America in Congress assembled,*

3       **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Math and Science In-  
5       centive Act of 2005”.

6       **SEC. 2. FINDINGS.**

7       The Congress finds the following:

8               (1) The United States can have a secure and  
9       prosperous future only by having a robust and in-  
10      ventive scientific and technical enterprise.

1           (2) Such an enterprise will require the United  
2 States to produce more scientists and engineers.

3           (3) The United States education system must  
4 do more to encourage students at every level to  
5 study science and mathematics and to pursue ca-  
6 reers related to those fields.

7           (4) The current performance of United States  
8 students in science and math lags behind their inter-  
9 national peers, and not enough students are pur-  
10 suing science and mathematics.

11          (5) The United States is still reaping the bene-  
12 fits of past investments in research and development  
13 and education, but we are drawing down that cap-  
14 ital.

15          (6) The United States needs to recommit itself  
16 to leadership in science, mathematics and engineer-  
17 ing, especially as advances are being made in such  
18 areas as nanotechnology.

19          (7) A program of loan forgiveness designed to  
20 attract students to careers in science, mathematics,  
21 engineering and technology, including teaching ca-  
22 reers, can help the United States maintain its tech-  
23 nological leadership.

24 **SEC. 3. ESTABLISHMENT OF PROGRAM.**

25          (a) PROGRAM.—

1           (1) IN GENERAL.—The Secretary shall carry
