

109TH CONGRESS
1ST SESSION

S. 50

To authorize and strengthen the National Oceanic and Atmospheric Administration's tsunami detection, forecast, warning, and mitigation program, and for other purposes.

IN THE SENATE OF THE UNITED STATES

JANUARY 24, 2005

Mr. INOUE (for himself, Mr. STEVENS, Ms. CANTWELL, Mr. BURNS, Mr. LAUTENBERG, Ms. SNOWE, Mr. AKAKA, Ms. MURKOWSKI, Mrs. CLINTON, Mr. SMITH, and Mrs. MURRAY) introduced the following bill; which was read twice and referred to the Committee on Commerce, Science, and Transportation

A BILL

To authorize and strengthen the National Oceanic and Atmospheric Administration's tsunami detection, forecast, warning, and mitigation program, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Tsunami Preparedness
5 Act”.

6 **SEC. 2. FINDINGS AND PURPOSES.**

7 (a) FINDINGS.—The Congress finds the following:

1 (1) Tsunami are a series of large waves of long
2 wavelength created by the displacement of water by
3 violent undersea disturbances such as earthquakes,
4 volcanic eruptions, landslides, explosions, and the
5 impact of cosmic bodies.

6 (2) Tsunami have caused, and can cause in the
7 future, enormous loss of human life, injury, destruc-
8 tion of property, and economic and social disruption
9 in coastal and island communities.

10 (3) While 85 percent of tsunami occur in the
11 Pacific Ocean, and coastal and island communities
12 in this region are the most vulnerable to the destruc-
13 tive results, tsunami can occur at any point in any
14 ocean or related body of water where there are
15 earthquakes, volcanoes, or any other activity that
16 displaces a large volume of water.

17 (4) A number of States and territories are sub-
18 ject to the threat of tsunamis, including Alaska,
19 California, Hawaii, Oregon, Washington, American
20 Samoa, the Commonwealth of the Northern Mariana
21 Islands, Guam, Puerto Rico, and the U.S. Virgin Is-
22 lands.

23 (5) The National Oceanic and Atmospheric Ad-
24 ministration is responsible for maintaining a tsu-
25 nami detection and warning system for the Nation,

1 issuing warnings to United States communities at
2 risk from tsunami, and preparing those communities
3 to respond appropriately, through—

4 (A) the Pacific Tsunami Warning Center
5 in Ewa Beach, Hawaii, which serves as a warn-
6 ing center for Hawaii, all other United States
7 assets in the Pacific, and Puerto Rico;

8 (B) the Alaska/West Coast Tsunami Warn-
9 ing Center in Palmer, Alaska, which is respon-
10 sible for issuing warnings for Alaska, British
11 Columbia, California, Oregon, and Washington;

12 (C) the Federal-State national tsunami
13 hazard mitigation program;

14 (D) a tsunami research and assessment
15 program, including programs conducted by the
16 Pacific Marine Environmental Laboratory;

17 (E) the TsunamiReady Program, which
18 educates and prepares communities for survival
19 before and during a tsunami; and

20 (F) other related programs.

21 (6) The National Oceanic and Atmospheric Ad-
22 ministration also represents the United States as a
23 member of the International Coordination Group for
24 the Tsunami Warning System in the Pacific, admin-
25 istered by the Intergovernmental Oceanographic

1 Commission of UNESCO, for which the Pacific Tsu-
 2 nami Warning Center acts as the operational center
 3 and shares seismic and water level information with
 4 26 member states, and maintains UNESCO's Inter-
 5 national Tsunami Information Center, in Honolulu,
 6 Hawaii, which provides technical and educational as-
 7 sistance to member states.

8 (7) The Tsunami Warning Centers receive seis-
 9 mographic information from the Global Seismic Net-
 10 work, an international system of earthquake moni-
 11 toring stations, from the United States Geological
 12 Survey National Earthquake Information Center,
 13 and from cooperative regional seismic networks, and
 14 use these data to issue tsunami warnings and inte-
 15 grate the information with data from their own tidal
 16 and deep ocean monitoring stations, to cancel or
 17 verify the existence of a damaging tsunami. Warn-
 18 ings are disseminated by the National Oceanic and
 19 Atmospheric Administration to State emergency op-
 20 eration centers.

21 (8) Current gaps in the International Tsunami
 22 Warning System, such as the lack of regional warn-
 23 ing systems in the Indian Ocean, the southwest Pa-
 24 cific Ocean, Central and South America, the Medi-

1 terranean Sea, and Caribbean, pose risks for coastal
2 and island communities.

3 (9) The tragic and extreme loss of life experi-
4 enced by countries in the Indian Ocean following the
5 magnitude 9.0 earthquake and resulting tsunami in
6 that region on December 26, 2004, illustrates the
7 destructive consequences which can occur in the ab-
8 sence of an effective tsunami warning and notifica-
9 tion system.

10 (10) An effective tsunami warning and notifica-
11 tion system is part of a multi-hazard disaster warn-
12 ing and preparedness program and requires near
13 real-time seismic, sea level, and oceanographic data,
14 high-speed data analysis capabilities, a high-speed
15 tsunami warning communication system, a sustained
16 program of education and risk assessment, and an
17 established local communications infrastructure for
18 timely and effective dissemination of warnings to ac-
19 tivate evacuation of tsunami hazard zones.

20 (11) The Tsunami Warning System for the Pa-
21 cific is a model for other regions of the world to
22 adopt, and can be expanded and modernized to in-
23 crease detection, forecast, and warning capabilities
24 for vulnerable states and territories, reduce the inci-
25 dence of costly false alarms, improve reliability of

1 measurement and assessment technology, and in-
2 crease community preparedness.

3 (12) Tsunami warning and preparedness capa-
4 bility can be developed in other vulnerable areas of
5 the world, such as the Indian Ocean, by identifying
6 tsunami hazard zones, educating populations, devel-
7 oping alert and notification communications infra-
8 structure, and by deploying near real-time tsunami
9 detection sensors and gauges, establishing hazard
10 communication and warning networks, expanding
11 global monitoring of seismic activity, encouraging
12 the increased exchange of seismic and tidal data be-
13 tween nations, and improving international coordina-
14 tion when a tsunami is detected.

15 (13) UNESCO has recognized the need to es-
16 tablish tsunami warning systems for regions beyond
17 the Pacific Basin that are vulnerable to tsunami, in-
18 cluding the Indian Ocean, and has convened a work-
19 ing group to lead an effort to expand the Inter-
20 national Tsunami Warning System in the Pacific to
21 such vulnerable regions.

22 (14) The international community and all vul-
23 nerable nations should take coordinated efforts to
24 establish and participate in regional tsunami warn-
25 ing systems and other hazard warnings systems de-

1 veloped to meet the goals of the United Nations
2 International Strategy for Disaster Reduction.

3 (b) PURPOSES.—The purposes of this Act are—

4 (1) to improve tsunami detection, forecast,
5 warnings, notification, preparedness, and mitigation
6 in order to protect life and property both in the
7 United States and elsewhere in the world;

8 (2) to improve and modernize the existing Pa-
9 cific Tsunami Warning System to increase coverage,
10 reduce false alarms and increase accuracy of fore-
11 casts and warnings, and expand detection and warn-
12 ing systems to include other vulnerable States and
13 United States territories, including the Caribbean/
14 Atlantic/Gulf region;

15 (3) to increase and accelerate mapping, mod-
16 eling, research, assessment, education, and outreach
17 efforts in order to improve forecasting, prepared-
18 ness, mitigation, response, and recovery of tsunami
19 and related coastal hazards;

20 (4) to provide technical and other assistance to
21 speed international efforts to establish regional tsu-
22 nami warning systems in vulnerable areas worldwide,
23 including the Indian Ocean; and

1 (5) to improve Federal, State, and international
2 coordination for tsunami and other coastal hazard
3 warnings and preparedness.

4 **SEC. 3. TSUNAMI DETECTION AND WARNING SYSTEM.**

5 (a) IN GENERAL.—The Administrator of the Na-
6 tional Oceanic and Atmospheric Administration shall oper-
7 ate regional tsunami detection and warning systems for
8 the Pacific Ocean region and for the Atlantic Ocean, Car-
9 ibbean, and Gulf of Mexico region that will provide max-
10 imum detection capability for United States coastal tsu-
11 nami.

12 (b) SYSTEM REQUIREMENTS.—

13 (1) PACIFIC SYSTEM.—The Pacific tsunami
14 warning system shall cover the entire Pacific Ocean
15 area, including the Western Pacific, the Central Pa-
16 cific, the North Pacific, the South Pacific, and the
17 East Pacific and Arctic areas.

18 (2) ATLANTIC, CARIBBEAN, AND GULF OF MEX-
19 ICO SYSTEM.—The Atlantic, Caribbean, and Gulf
20 system shall cover areas of the Atlantic Ocean, Car-
21 ibbean Sea, and the Gulf of Mexico that the Admin-
22 istrator determines—

23 (A) to be geologically active, or to have sig-
24 nificant potential for geological activity; and

(B) to pose measurable risks of tsunamis for States along the coastal areas of the Atlantic Ocean or the Gulf of Mexico.

(3) COMPONENTS.—The systems shall—

(A) utilize an array of deep ocean detection buoys, including redundant and spare buoys;

(B) include an associated tide gauge and water level system designed for long-term continuous operation tsunami transmission capability;

(C) provide for establishment of a cooperative effort between the National Oceanic and Atmospheric Administration and the United States Geological Survey under which the Geological Survey provides rapid and reliable seismic information to the Administration from international and domestic seismic networks;

(D) provide for information and data processing through the tsunami warning centers established under subsection (c);

(E) be integrated into United States and global ocean and earth observing systems; and

(F) provide a communications infrastructure for at-risk tsunami communities that supports rapid and reliable alert and notification to

1 the public such as the National Oceanic and At-
2 mospheric Administration weather radio and
3 the All Hazard Alert Broadcasting Radio.

4 (c) TSUNAMI WARNING CENTERS.—

5 (1) IN GENERAL.—The Administrator shall es-
6 tablish tsunami warning centers to provide a link be-
7 tween the detection and warning system and the tsu-
8 nami hazard mitigation program established under
9 section 4 including—

10 (A) a Pacific Tsunami Warning Center in
11 Hawaii;

12 (B) a West Coast and Alaska Tsunami
13 Warning Center in Alaska; and

14 (C) any additional warning centers deter-
15 mined by the Administrator to be necessary.

16 (2) RESPONSIBILITIES.—The responsibilities of
17 each tsunami warning center shall include—

18 (A) continuously monitoring data from
19 seismological, deep ocean, and tidal monitoring
20 stations;

21 (B) evaluating earthquakes that have the
22 potential to generate tsunami;

23 (C) evaluating deep ocean buoy data and
24 tidal monitoring stations for indications of tsu-

1 nami resulting from sources other than earth-
2 quakes; and

3 (D) disseminating information and warn-
4 ing bulletins appropriate for local and distant
5 tsunamis to government agencies and the public
6 and alerting potentially impacted coastal areas
7 for evacuation.

8 (d) TRANSFER OF TECHNOLOGY; MAINTENANCE AND
9 UPGRADES.—In carrying out this section, the Adminis-
10 trator shall—

11 (1) promulgate specifications and standards for
12 forecast, detection, and warning systems, including
13 detection equipment;

14 (2) develop and execute a plan for the transfer
15 of technology from ongoing research to long-term
16 operations;

17 (3) ensure that detection equipment is main-
18 tained in operational condition to fulfill the fore-
19 casting, detection and warning requirements of the
20 regional tsunami detection and warning systems;

21 (4) obtain, to the greatest extent practicable,
22 priority treatment in budgeting for, acquiring, trans-
23 porting, and maintaining weather sensors, tide
24 gauges, water level gauges, and tsunami buoys incor-

1 porated into the system including obtaining ship
2 time; and

3 (5) ensure integration of the tsunami detection
4 system with other United States and global ocean
5 and coastal observation systems, the global earth ob-
6 serving system of systems, global seismic networks,
7 and the Advanced National Seismic System.

8 (e) CERTIFICATION.—Amounts appropriated for any
9 fiscal year pursuant to section 8 to carry out this section
10 may not be obligated or expended for the acquisition of
11 services for construction or deployment of tsunami detec-
12 tion equipment unless the Administrator certifies in writ-
13 ing to the Senate Committee on Commerce, Science, and
14 Transportation and the House of Representatives Com-
15 mittee on Science within 60 calendar days after the date
16 on which the President submits the Budget of the United
17 States for that fiscal year to the Congress that—

18 (1) each contractor for such services has met
19 the requirements of the contract for such construc-
20 tion or deployment;

21 (2) the equipment to be constructed or deployed
22 is capable of becoming fully operational without the
23 obligation or expenditure of additional appropriated
24 funds; and

1 (3) the Administrator does not reasonably fore-
2 see unanticipated delays in the deployment and oper-
3 ational schedule specified in the contract.

4 **SEC. 4. TSUNAMI HAZARD MITIGATION PROGRAM.**

5 (a) IN GENERAL.—The Administrator of the Na-
6 tional Oceanic and Atmospheric Administration is author-
7 ized to conduct a community-based tsunami hazard miti-
8 gation program to improve tsunami preparedness of at-
9 risk areas.

10 (b) COORDINATING COMMITTEE.—In conducting the
11 program, the Administrator shall establish a coordinating
12 committee comprising representatives of—

13 (1) the National Oceanic and Atmospheric Ad-
14 ministration;

15 (2) the United States Geological Survey;

16 (3) the Federal Emergency Management Agen-
17 cy;

18 (4) the National Science Foundation; and

19 (5) affected coastal States and territories.

20 (c) PROGRAM COMPONENTS.—The program shall—

21 (1) improve the quality and extent of inunda-
22 tion mapping, including assessment of vulnerable
23 inner coastal areas;

24 (2) promote and improve community outreach
25 and education networks and programs to ensure

1 community readiness, including the development of
2 multi-hazard risk and vulnerability assessment train-
3 ing and decision support tools, implementation of
4 technical training and public education programs,
5 and provide for certification of prepared commu-
6 nities;

7 (3) integrate tsunami preparedness and mitiga-
8 tion programs into ongoing hazard warning and risk
9 management programs in affected areas including
10 the National Response Plan;

11 (4) promote the adoption of tsunami warning
12 and mitigation measures by Federal, State, tribal,
13 and local governments and non-governmental entities
14 through a grant program for training, development
15 of guidelines, and other purposes;

16 (5) through the Federal Emergency Manage-
17 ment Agency as the lead agency, develop tsunami
18 specific rescue and recovery guidelines for the Na-
19 tional Response Plan, including long-term mitigation
20 measures, educational programs to discourage devel-
21 opment in high-risk areas, and use of remote sensing
22 and other technology in rescue and recovery oper-
23 ations;

24 (6) require budget coordination, through the
25 Administration, to carry out the purposes of this Act

1 and to ensure that participating agencies provide
2 necessary funds for matters within their respective
3 areas of authority and expertise; and

4 (7) provide for periodic external review of the
5 program and for inclusion of the results of such re-
6 views in the report required by section 6(c).

7 **SEC. 5. TSUNAMI RESEARCH PROGRAM.**

8 (a) ESTABLISHMENT.—The Administrator of the Na-
9 tional Oceanic and Atmospheric Administration shall, in
10 coordination with other agencies and academic institu-
11 tions, establish a tsunami research program to develop de-
12 tection, prediction, communication, and mitigation science
13 and technology that supports tsunami forecasts and warn-
14 ings, including advanced sensing techniques, information
15 and communication technology, data collection, analysis
16 and assessment for tsunami tracking and numerical fore-
17 cast modeling that will—

18 (1) help determine—

19 (A) whether an earthquake or other seis-
20 mic event will result in a tsunami; and

21 (B) the likely path, severity, duration, and
22 travel time of a tsunami;

23 (2) develop techniques and technologies that
24 may be used to communicate tsunami forecasts and

1 warnings as quickly and effectively as possible to af-
2 fected communities;

3 (3) develop techniques and technologies to sup-
4 port evacuation products, including real-time notice
5 of the condition of critical infrastructure along tsu-
6 nami evacuation routes for public officials and first
7 responders; and

8 (4) develop techniques for utilizing remote sens-
9 ing technologies in rescue and recovery operations.

10 (b) COMMUNICATIONS TECHNOLOGY.—The Adminis-
11 trator, in consultation with the Assistant Secretary of
12 Commerce for Communications and Information and the
13 Federal Communications Commission, shall investigate
14 the potential for improved communications systems for
15 tsunami and other hazard warnings by incorporating into
16 the existing network a full range of options for providing
17 those warnings to the public, including, as appropriate—

18 (1) telephones, including special alert rings;

19 (2) wireless and satellite technology, including
20 cellular telephones and pagers;

21 (3) the Internet, including e-mail;

22 (4) automatic alert televisions and radios;

23 (5) innovative and low-cost combinations of
24 such technologies that may provide access to remote
25 areas; and

1 (6) other technologies that may be developed.

2 **SEC. 6. TSUNAMI SYSTEM UPGRADE AND MODERNIZATION.**

3 (a) SYSTEM UPGRADES.—The Administrator of the
4 National Oceanic and Atmospheric Administration shall—

5 (1) authorize and direct the immediate repair of
6 existing deep ocean detection buoys and related com-
7 ponents of the system;

8 (2) ensure the deployment of an array of deep
9 ocean detection buoys in the regions described in
10 section 3(a) of this Act;

11 (3) ensure expansion or upgrade of the tide
12 gauge network in the regions described in section
13 3(a); and

14 (4) complete the upgrades not later than De-
15 cember 31, 2007.

16 (b) CONGRESSIONAL NOTIFICATIONS.—The Adminis-
17 trator shall notify the Senate Committee on Commerce,
18 Science, and Transportation and the House of Represent-
19 atives Committee on Science of—

20 (1) impaired regional detection coverage due to
21 equipment or system failures; and

22 (2) significant contractor failures or delays in
23 completing work associated with the tsunami detec-
24 tion and warning system.

1 (c) ANNUAL REPORT.—The Administrator shall
2 transmit an annual report to the Senate Committee on
3 Commerce, Science, and Transportation and the House of
4 Representatives Committee on Science on the status of the
5 tsunami detection and warning system, including accu-
6 racy, false alarms, equipment failures, improvements over
7 the previous year, and goals for further improvement (or
8 plans for curing failures) of the system, as well as progress
9 and accomplishments of the national tsunami hazard miti-
10 gation program.

11 (d) EXTERNAL REVIEW.—The National Academy of
12 Science shall review the tsunami detection, forecast, and
13 warning system operated by the National Oceanic and At-
14 mospheric Administration under this Act to assess further
15 modernization and coverage needs, as well as long-term
16 operational reliability issues, taking into account measures
17 implemented under this Act, and transmit a report con-
18 taining its recommendations, including an estimate of the
19 costs of implementing those recommendations, to the Sen-
20 ate Committee on Commerce, Science, and Transportation
21 and the House of Representatives Committee on Science
22 within 24 months after the date of enactment of this Act.

1 **SEC. 7. GLOBAL TSUNAMI WARNING AND MITIGATION NET-**
2 **WORK.**

3 (a) INTERNATIONAL TSUNAMI WARNING SYSTEM.—
4 The Administrator of the National Oceanic and Atmos-
5 pheric Administration, in coordination with other mem-
6 bers of the United States Interagency Committee of the
7 National Tsunami Mitigation Program, shall provide tech-
8 nical assistance and advice to the Intergovernmental
9 Oceanographic Commission of UNESCO, the World Mete-
10 orological Organization, and other international entities,
11 as part of international efforts to develop a fully functional
12 global tsunami warning system comprised of regional tsu-
13 nami warning networks, modeled on the International
14 Tsunami Warning System of the Pacific.

15 (b) DETECTION EQUIPMENT; TECHNICAL ADVICE.—
16 In carrying out this section, the Administrator—

17 (1) shall give priority to assisting nations in
18 identifying vulnerable coastal areas, creating inunda-
19 tion maps, obtaining or designing real-time detection
20 and reporting equipment, and establishing commu-
21 nication and warning networks and contact points in
22 each vulnerable nation; and

23 (2) may establish a process for transfer of de-
24 tection and communication technology to affected
25 nations for the purposes of establishing the inter-
26 national tsunami warning system.

1 (c) DATA-SHARING REQUIREMENT.—The Adminis-
2 trator may not provide assistance under this section for
3 any region unless all affected nations in that region par-
4 ticipating in the tsunami warning network agree to share
5 relevant data associated with the development and oper-
6 ation of the network.

7 (d) RECEIPT OF INTERNATIONAL REIMBURSEMENT
8 AUTHORIZED.—The Administrator may accept payment
9 to, or reimbursement of, the National Oceanic and Atmos-
10 pheric Administration in cash or in kind from inter-
11 national organizations and foreign authorities, or payment
12 or reimbursement made on behalf of such an authority,
13 for expenses incurred by the Administrator in carrying out
14 any activity under this Act. Any such payments or reim-
15 bursements shall be considered a reimbursement to the ap-
16 propriated funds of the Administration.

17 **SEC. 8. AUTHORIZATION OF APPROPRIATIONS.**

18 There are authorized to be appropriated to the Ad-
19 ministrator of the National Oceanic and Atmospheric Ad-
20 ministration \$35,000,000 for each of fiscal years 2006
21 through 2012 to carry out this Act.

○
