

Dunlap. Deputy Chief Dunlap recalls, "Mike had an amazing wealth of knowledge about aircraft. He literally ate, drank, and slept airplanes."

When the Army gave the Beaumont Police Department two helicopters, it was only natural that Lane would be heavily involved in the helicopter operations that would come up. Any time there was a mission or training, Lane was the first in line to take part in it.

On the evening of September 15, 2004, the neighboring Port Arthur Police Department reported a boat fire on Sabine Lake. Lane was one of two pilots who was called to duty for the search and rescue mission that took place that moonless night, a night that Deputy Chief Dunlap recalled was extra dark. During the flight, Lane was tasked with shining the spotlight on the large, murky, marshy Sabine Lake near the Texas-Louisiana border while the other officer maneuvered the helicopter through the intense, immense darkness that surrounded them.

Flying a mere 6 feet above the lake in an effort to get closer and look for people or debris in the water, Sergeant Lane was once again fulfilling his oath to protect and serve the people.

Sergeant Lane and crew made last contact shortly after 10:30 p.m. and after that, there was only silence, silence in the stillness of the damp, dark, dreary night. A helicopter search team spotted the wreckage almost 4 hours later at 2 o'clock in the morning. Jefferson County Sheriff's Deputy Jeremy Battenfield, who was piloting the helicopter, survived the crash with minor injuries; but in the line of duty, doing what he loved and what he did best at the age of 54, Sergeant Mike Lane lost his life in the stillness of that September night.

Hundreds of law enforcement members from across Texas and Louisiana traveled to South Park Baptist Church in Beaumont to pay their respects to a unique and talented officer and pilot that will never be replaced. He was laid to rest in the same church where he served as a deacon and a mentor to kids.

Mr. Speaker, this past weekend, I had the opportunity to participate in the Fraternal Order of Police's 24th annual National Peace Officers Memorial Service here on the Capitol grounds to remember those police officers killed last year. I was honored to join the multitude of officers and surviving family members who traveled to Washington to assure their comrades that they never walk alone. I spent time with Sergeant Lane's wife, Renee; his son Ben; and his two sisters; and I was moved by the memories they had of their husband, their father, and their brother.

Mr. Speaker, there are more than 800,000 members of the law enforcement community in this Nation. They wear the badge, and with that badge they become a cut above the rest of us. They do what most of us would not do. They watch out for our country, our kids, our family and our great land.

In 2004, 156 officers were killed in the line of duty. Last year, our military lost nearly 900 of its band of brothers during operations in Iraq and Afghanistan. And while we often pay daily tribute to our fallen military who have been combating outlaws across the sea, these warriors against domestic outlaws, our police officers, often remain nameless, statistical heroes.

When President Bush spoke this last weekend, he stated that every generation of Americans has produced men and women willing to stand in watch over the rest of us. They are peace officers. When Sergeant Lane lost his life on the Sabine Lake that night, he did not die alone. His conviction, courage, and character live on and his spirit watches over his friends and family and the citizens of Jefferson County, Texas, that he devoted his life in protecting.

Thank you, Sergeant Mike Lane.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maine (Mr. ALLEN) is recognized for 5 minutes.

(Mr. ALLEN addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

CHICAGO LIGHTHOUSE INDUSTRIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. DAVIS) is recognized for 5 minutes.

Mr. DAVIS of Illinois. Mr. Speaker, I rise today to talk about an industry in my congressional district that is being frustrated, squeezed, uncertain about its future as a result of our trade policy, globalization and the general tenor of the times. I rise to talk about the Chicago Lighthouse Industries, which has made clocks for the Federal Government for the last 28 years. They have been consistent and diligent in their performance. Since 1977, the Chicago Lighthouse has made 3.3 million clocks. In fact, last year they made 104,000 clocks for all branches of the military, Energy Department, the Postal Service, and the Justice Department.

The unique thing about the Chicago Lighthouse is that they employ more than 40 people who are blind or are visually impaired.

□ 2000

They employ their workers at a salary of \$8.50 an hour and provide health benefits. On a recent visit to the Chicago Lighthouse, I was amazed at the level of detail and speed at which the workers developed the clocks. They have an assembly line that produces in packages 1,000 wall clocks daily.

In fact, Rita McCabe can assemble a 12-inch clock in less than 1 minute. Ms. McCabe, who is blind, found her job through the Chicago Lighthouse. When asked how she felt about her job, she stated the following: "It gives me a

chance to be with people, to make a living on my own, and to prove that I am competent enough to do this kind of work."

Ms. McCabe has worked for the Chicago Lighthouse for 25 years. Rita McCabe's job is in jeopardy due to competition from foreign sources. In the past 4 years, U.S. imports of wall clocks, most of them from China, have increased by 24 percent, totaling \$123 million in 2003.

The Chicago Lighthouse does not mind competition. They have suggested that they can compete with anyone as long as the rules are the same. Unfortunately, the playing field is not level when it comes to competing with China and other countries that do not have a minimum-wage requirement or pay health benefits to their workers. The Chicago Lighthouse pays its workers an average of \$8.50 per hour plus health benefits. In China, it is not uncommon for workers to make \$2 an hour and have no benefits. China is able to undercut clock manufacturers like the Chicago Lighthouse for the Blind because they do not play by the same rules. They are able to dump their products into the United States for a cheaper price. This adds to the trade deficit that currently exists.

More importantly, to allow foreign governments who do not pay minimum wage or a livable wage nor provide benefits to continue to undercut U.S. companies like the Chicago Lighthouse erodes the faith that citizens have in government and puts many jobs here at home at risk. The Chicago Lighthouse is not asking for preferential treatment. They are seeking fundamental fairness. The Lighthouse has been in existence now for 99 years, and they have done something right to be able to survive for so long.

The Federal Government, as a result of the Javitz-Wagner-O'Day Act, is required to show favor towards the Chicago Lighthouse and other organizations like it when purchasing clocks through the General Services Administration. However, this law has been eroded and many Federal purchases are going for the lower-priced clocks. Obviously, these are the clocks that are being produced through cheaper labor costs. The Federal Government must set the example and ensure that taxpayer money is not going to support foreign governments that do not have minimum wage or benefit standards comparable to those in the United States.

Everything comes at a price. The workers at Chicago Lighthouse are able to be productive tax-paying citizens because of their jobs. These jobs help to support them, their families, and the local economy. For example, Mr. Albert Harris has been with the Chicago Lighthouse since 1971, able to work, though blind.

Mr. Speaker, the Chicago Lighthouse and other entities that employ our people must be able to continue to do so. Let us make sure that our trade policies are fair and equitable and that
