The House met at 10 a.m.
The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer:

By Your divine providence, Lord God, through free election and the personal decisions of the American people, You have assembled these individuals as Members of the House of Representatives.

They are the men and the women who will create the laws that will guide the Nation, direct the behavior of the people of this country, and, through the appropriation process, shape the priorities of the future.

In Your judgment, Lord, they are the ones who are adequate for the moment to address the problems and needs of Your people.

Because the United States is regarded as the most powerful Nation in the world at this time, this Congress, as it is, becomes Your instrument to unite people around the globe and accomplish Your holy will in our day.

Knowing their awesome responsibilities and understanding the limitations of human nature, we, the people, commend them to You, Almighty God, for we place our trust in You now and forever. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Minnesota (Mr. GUTKNECHT) come forward and lead the House in the Pledge of Allegiance.

Mr. GUTKNECHT led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has agreed to the following resolution:

In the Senate of the United States, June 13, 2005,

Whereas J. James Exon served in the United States Army Signal Corps from 1942–1945 and in the United States Army Reserve from 1945–1948;

Whereas J. James Exon served as Governor of the State of Nebraska from 1971–1979;

Whereas J. James Exon served the people of Nebraska with distinction for 18 years in the United States Senate where he was a proponent of a strong national defense and knowledgeable source of geopolitical matters;

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of the Honorable J. James Exon, formerly a Senator from the State of Nebraska.

Resolved, That the Secretary of the Senate communicate these resolutions of the House of Representatives and transmit an enrolled copy thereof to the family of the deceased.

Resolved, That when the Senate adjourns today, it stand adjourned as a further mark of respect to the memory of the Honorable J. James Exon.

The message also announced that the Senate has passed without amendment a bill of the House of the following title:

H.R. 483. An act to designate a United States courthouse in Brownsville, Texas, as the "Reynaldo G. Garza and Filemon B. Vela United States Courthouse".

The message also announced that the Senate has passed without amendment a bill of the following title:

H.R. 483. An act to designate a United States courthouse in Brownsville, Texas, as the "Reynaldo G. Garza and Filemon B. Vela United States Courthouse".

The message also announced that the Senate has passed a bill of the following title in which concurrence of the House is requested:

S. 1140. An act to designate the State Route 1 Bridge in the State of Delaware as the "Senator William V. Roth, Jr. Bridge".

The message also announced that pursuant to Public Law 94–304, as amendment by Public Law 99–7, the Chair, on behalf of the Vice President, appoints the following Senators as members of the Commission on Security and Cooperation in Europe (Helsinki) during the One Hundred Ninth Congress:

The Senate from Oregon (Mr. SMITH). The Senate from Georgia (Mr. CHAMBLISS).

The Senator from North Carolina (Mr. BURR). The Senator from Louisiana (Mr. VITTER).

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair will entertain up to ten 1-minute requests on each side.

SHAME ON CONGRESS IF WE DO NOT BAN CLONING

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, Edmund Burke once said: "All that is necessary for the triumph of evil is for good men to do nothing." I might change that to read: "All that is necessary for human cloning to begin in America is for Congress to do nothing."

When Korean scientists announced last month they had cloned 18 sick people and killed their clones to get their stem cells, some thought that would provide the motivation for the Congress to ban human cloning. They were wrong.

The history of cloning is replete with defects, deformities, and death. It took 277 tries to clone Dolly the sheep. That is 276 dead and deformed sheep. And yet Congress does nothing to stop human cloning from happening in America. The House has done very little to force the Senate to act. And the House has yet to take up a bill this year.
DEALING WITH PROBLEMS FACING GULF WAR VETERANS

(Mr. KUCINICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KUCINICH. Mr. Speaker, Abraham Lincoln in his second inaugural said: "We shall care for him who has borne the battle." Today, men and women who have served this country in the Gulf War are waiting for this Congress to respond affirmatively to their medical needs.

Congress took steps in the 1990s by authorizing a scientific research program that looked into Gulf War Syndrome, and that report from the Research Advisory Committee on Gulf Veterans Illness found out that the illnesses suffered by Gulf War veterans, these often debilitating problems, could not be scientifically explained by stress or psychiatric illnesses; that veterans were having problems with their neurological and immunological systems, and they were having it with a frequency that was twice those of peer veterans not deployed.

They cited a list of possible exposures, which included chemical weapons, biological weapons, drugs to protect them from biological and chemical weapons, depleted uranium, oil well fire smoke, diesel fuel, jet fuel, and on and on and on.

Today, Congress will have before it a budget-neutral amendment that will give us a chance to do something about funding a program to help deal with the problems that Gulf War veterans are experiencing.

PASSING NEEDED PENSION REFORM

(Mr. PRICE of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PRICE of Georgia. Mr. Speaker, pension plans are on the minds of the American people. Just typing the words "pension plan" into an Internet search engine yields over 4,000 returns in less than a second.

Americans are very concerned about their retirements. Couples who were planning where they will spend their golden years are now trying to figure out what to do with shrinking pension checks, as businesses struggle to fund their pension plans.

Government and taxpayer bailouts are not fair to the public, and they are not a solution to the problem. Recent hearings here in the House have made the case crystal clear as experts have said that they think we need industry-specific reform to "fix" the pension crisis.

United Airlines recently dumped their pension plan onto the Pension Benefit Guarantee Corporation, so now thousands and thousands of their employees face an uncertain future and the PBGC goes billions of dollars further into the red. This is a no-win situation for everyone involved.

Mr. Speaker, let us take action. Let us be proactive, and let us pass much-needed pension reform now.

ANSWERS NEEDED FOR QUESTIONS REGARDING IRAQ

(Mr. MORAN of Virginia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MORAN of Virginia. Mr. Speaker, if you do not know where you are going, you are never going to get there. Another truth is that you do not begin a war without a plan to win the peace.

Is it now well past time for the legislative branch to ask of the executive branch the very things that our constitution demands of us: What is the White House's strategy for success in Iraq? How many Iraqi troops need to be adequately trained and sufficiently equipped, to take over the military protection of that country? How many Iraqi police forces are needed to restore law and order? How many more American dollars are needed to rebuild the infrastructure so that nation can be economically viable? And what does this administration consider to be political stability?

These are reasonable questions. We should have had the answers before we went to war, but we must demand them now. It is unfair, not only to the mothers and fathers of our soldiers, but to our senior military officers of our country not to know where they are headed in Iraq.

RESTORING HOPE, ORDER, AND PURPOSE TO THE UNITED NATIONS

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, the world has entrusted peacekeepers from the United Nations with the tremendous task of promoting peace and international cooperation throughout the globe.

Unfortunately, for years we have watched U.N. peacekeepers neglect their lofty goals and actually contribute to the very problems they are there to solve.

From the jungles of the Congo to the swamps of Sierra Leone, U.N. peacekeepers have committed crimes, including sexual exploitation, corruption, sex trafficking, and the systematic rape of women. In Bosnia, the U.N. quashed an investigation into the involvement of U.N. police in enslavement of Eastern European women.

Today, Congress has a rare opportunity to restore hope, order, and purpose to the U.N. Decades of U.N. waste, fraud, and abuse prove that strong action is the only remedy for the problems plaguing the organization. By linking U.S. support to U.N. reform, we can ensure the U.N. peacekeepers rightfully fulfill their mission.

In conclusion, God bless our troops and we will never forget September 11.

THE GROWING NATIONAL DEBT

(Mrs. MALONEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MALONEY. Mr. Speaker, these are tough economic times; but our economy is resilient, and I trust that we will eventually turn things around. But even then, this administration has created structural problems that will hinder us over the long run.

This administration continues to set economic records, only they are the wrong economic records. We have set under this administration a record trade deficit of over $600 billion, a record budget deficit of over $450 billion, and they have raised the debt ceiling three times.

As we stand here, our national debt is over $7.8 trillion, and that is over $26,000 for each citizen.

Mr. Speaker, let me tell my colleagues, that is not the legacy that I want to leave to my children and my grandchildren and the children of America. I hope it is not the legacy that Members want to leave.

REFORM THE UNITED NATIONS

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ROS-LEHTINEN. Mr. Speaker, I ask my colleagues to help stop sexual predators among the United Nations peacekeeping forces and vote in favor of the Hyde U.N. Reform Act of 2005. It is monstrous that an international organization charged with assisting nations rebuild after major turmoil has experienced an alarming number of scandals involving sexual harassment, rape, sex trafficking, misconduct, and harassment. Even one instance of these terrible crimes is appalling and unacceptable; but, unbelievably, over the past decade their appearance is frequent.

United Nations peacekeepers, the very people who have been sworn to protect and assist those most in need, in some instances have been the perpetrators of these crimes against the most vulnerable of our population, refugees. These crimes are yet another example of the ways in which
the U.N. is currently unfit to operate in its current state and must be reformed in order to restore its integrity and its authority.

Through the United Nations Reform Act of 2005, the United States, as the greatest contributor to U.N. peacekeeping, will do away with all of these scandals.

UPHOLDING THE PROMISES OF SOCIAL SECURITY
(Mr. BERRY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BERRY. Mr. Speaker, when this President was reelected, he announced proudly that he had political capital and he intended to spend it. He intended to replace Social Security. All of his proposals provide that we would replace Social Security with something less: “I let us give the working people of this country less than we promised.”

Social Security is a covenant between our working people and the United States Government. They are entitled to get what they have paid for. They have worked all their days and paid handsomely into the system. Now this President and some of my colleagues on the Republican side say, I am sorry, we just do not want to do that anymore, so we are not going to pay you. Pay into the system; that is just your tough luck. We are just not going to do that. We do not need to replace Social Security, we just need to fund it.

SUPPORTING CONTINUED OPERATION OF DETENTION FACILITY IN GUANTANAMO BAY
(Mr. WESTMORELAND asked and was given permission to address the House for 1 minute.)

Mr. WESTMORELAND. Mr. Speaker, I rise today to call on my colleagues in the House to support the continued operation of the detention facility in Guantanamo Bay, Cuba.

If it is proven that detainees have suffered abusive treatment, we should take corrective action, but continue to operate the detention facility.

I ask my colleagues, what good does it do to simply move to a different location? The fact is, we have to put these detainees somewhere. What better place than a heavily guarded island?

Mr. Speaker, the detainees at Guantanamo are not there for jaywalking or stealing a Snickers bar from the 7-Eleven. They are well-trained, hate-filled jihadists inflamed by an anti-American ideology. If they were released back into the wild, they would not return to a quiet family life of shepherding in the mountains of Afghanistan. They would simply take up arms to fight Americans again.

Already we have recaptured combatants on the battlefield who had been released from Guantanamo. We should learn a lesson from that. Let us make sure they stay there.

ABUSE OF POWER BY REPUBLICANS
(Ms. LEE asked and was given permission to address the House for 1 minute.)

Ms. LEE. Mr. Speaker, how can we spread democracy abroad if it is being, quite frankly, abused here in the House?

The Republican abuse of power appears to know bounds. Last Friday the Republicans literally cut off debate on the renewal of the USA PATRIOT Act. Apparently, it was not enough to bar witnesses critical of the PATRIOT Act, or to force Democrats to fight to get a critical witness in front of the committee, or to schedule that hearing for a day when the House was not in session. When dissenting voices started to speak, the hearing was abruptly ended, and the microphones were turned off.

Critics of the PATRIOT Act say that it represents the threat of unaccountable, undemocratic government, and the behavior of its Republican supporters here only serves to prove that point and is proof of that.

Hubert Humphrey once said that “Freedom is hammered out on the anvil of discussion, dissent, and debate…”

I hope that this Republican abuse of power will be ended before it is allowed to undermine our freedom.

Once again, how can we spread democracy abroad when it is being abused right here at home in the House of Representatives?

HONORING THE 25TH ANNIVERSARY OF EL MUNDO
(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, I rise today to honor the 25th anniversary of one of southern Nevada’s first Spanish-language publications, El Mundo. I would also like to recognize the dedication and perseverance of my longtime friend Eddie Escabedo, El Mundo’s founder and publisher.

What began as a truly local community newsletter has grown to a newspaper that reaches 50,000 Nevadans and many more through radio and television affiliations.

I applaud Eddie and all of those who have assisted him throughout these 25 years. The service that you provide the Spanish-speaking community in southern Nevada has benefited us all by demonstrating our common needs, despite our diversity.

Eddie, it was great to see you in Washington last week. Your efforts to provide our Spanish-speaking students with information on the resources available to them to continue their education are truly an invaluable service. I look forward to working with you on the Hispanic Scholarship Directory long into the future. I congratulate you and El Mundo on this milestone and wish you all the best of luck in the next 25 years.

Eddie, I am proud to call you a friend. Congratulations.

URGING THE PROTECTION OF AMERICA’S FLYING PUBLIC FROM THE THREAT OF SHOULDER-FIRED MISSILES
(Ms. BEAN asked and was given permission to address the House for 1 minute.)

Ms. BEAN. Mr. Speaker, I am here to urge my colleagues to act now to protect America’s flying public from the threat of shoulder-fired missiles.

Unfortunately, today, thousands of portable, easy-to-use antiaircraft missiles are in the hands of terrorist groups around the world, including Al Qaeda. The FBI, CIA, State Department, and White House recognize this serious threat. Now is the time for Congress to act.

Mr. Speaker, the Department of Homeland Security has been diligently working to apply successful military technology to our commercial aircraft, and now, for the same cost as in-flight entertainment systems, we can install proven portable defense systems on passenger jets.

Just this week, the Chicago Tribune editorialized that the financial costs of safeguarding our airlines are well worth it. However, while we have spent billions of dollars on transportation security since 9/11, Congress has not yet committed to providing such protection.

Last week, the gentleman from New York (Mr. ISRAEL) and I introduced the Commercial Airline Missile Defense Act, authorizing the TSA to provide missile defense systems to our commercial passenger jets. Today I urge my colleagues to cosponsor H.R. 2790 and join us in protecting America’s business and family travelers.

DOD APPROPRIATION
(Mr. GINGREY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGREY. Mr. Speaker, I rise today in strong support of H.R. 2863, the Department of Defense authorization bill.

As we continue assessing our national defense strategy to guard our Nation from threats at home and abroad, we must provide the necessary funding for our military needs to keep us safe.

We in Congress often praise our service men and women for the fine job they do, but lip service is not enough. We must back up our words with action.

The 2006 defense appropriation bill does just that. Mr. Speaker, $366 billion...
for our military will go to procure vital weapons systems, to further research, and develop new technologies, and to fund military operations in Iraq and Afghanistan. The bill also includes a 3.1-percent pay raise for service members, soldiers, sailors, airmen, and marines.

Mr. Speaker, we have the most dominant military in the history of the world, and this bill will keep it that way. With this funding, we are giving our defenders the tools they need to keep us safe.

URGING SUPPORT FOR SUCCESSFUL WITHDRAWAL STRATEGY FROM IRAQ

(Mr. RANGEL asked and was given permission to address the House for 1 minute.)

Mr. RANGEL. Mr. Speaker, I ask my colleagues to vote "no" on the previous question on the rule on the defense appropriation bill so that the gentlewoman from California (Ms. Pelosi) might give us an opportunity to vote, to consider and vote on her amendment, which actually contains a strategy for success in Iraq by allowing or asking the President to tell us, within 30 days after the enactment, what is his plan for success to bring the troops home.

Whether you voted for or against the war, or whether you are concerned about it, everyone has to be concerned about our troops that are there. The way this war has been waged is putting a huge strain on our men and women in uniform, and has become a threat to our armed forces' capacity to meet future needs. And if you take a look at what is happening with our military being spread through 120 countries, you will recognize that the administration's so-called "strategy" requires a troop to add on to the troops that are already in Iraq.

The problem that we are having is recruitment. We are not finding, notwithstanding the increases in bonuses up to $40,000, that we are getting the recruits that we need. We also find that the textile industry, we have lost a lot of jobs there. Towns Lenoir and Rutherford are only the latest chapter in a long series of job losses in the region.

But I want my constituents to know, Mr. Speaker, that there is help, there is hope, and they can contact my congressional office.

In Congress we cannot keep companies from closing, but there are some things we can do, and we will act and do what is right for our people and do what is best for our country.

EXTENDING A WARM WELCOME TO MEMBERS OF PARLIAMENT FROM MAIN OPPOSITION PARTY IN ZIMBABWE

(Mrs. CAPPS asked and was given permission to address the House for 1 minute.)

Mrs. CAPPS. Mr. Speaker, I rise today to welcome three women Members of Parliament from the main opposition party in Zimbabwe, the Movement for Democratic Change: the Honorable Thokozani Khupe, the Honorable Paurina Mparia, and the Honorable Pricilla Mushiambwii.

In the face of continued repression, this Movement for Democratic Change is working tirelessly to realize democracy for Zimbabwe. The Congressional Caucus on Women's Issues is honored to host these leaders of Zimbabwe today.

All three women have a remarkable record of advocating passionately for the issues that affect women and society in Zimbabwe. It is a real pleasure to welcome leaders from other nations who are working to bring about peaceful democratic changes within their country, and I know my colleagues will join me in extending a warm welcome to them today.

U.N. REFORM

(Mrs. BLACKBURN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BLACKBURN. Mr. Speaker, today we will debate the U.N. Reform Act, and I want to thank the gentleman from Illinois (Chairman Hyde) for making this a priority. We are trying to bring change to an organization that is growing fat, happy, and arrogant off of American taxpayer dollars.

Over the past several years, we have watched the oil-for-food scandal, and numerous scandals listed here on this poster, accounting errors, and then on top of this, in 2005, the U.N. asked for a $400 million budget increase.

Countries like Libya, Sudan, and Cuba are on the U.N. Human Rights Commission list, and we, the taxpayers, are paying for this. The United States sends more than $400 million a year to the U.N. We spend billions of dollars in direct aid and military aid, and I say, we are not doing our fair share. Requiring the U.N. to try and find spending priorities is clearly not a bad thing; it is a good thing. Neither is asking them to cut spending. If they are not using our money wisely, we should not be sending as much.

Mr. Speaker, I hope the House will overwhelmingly support this important and overdue legislation.

REPUBLICANS SILENCE OPPOSITION TO PATRIOT ACT IN COMMITTEE HEARING

(Ms. WASSERMAN SCHULTZ asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. WASSERMAN SCHULTZ. Mr. Speaker, while we are on the subject of arrogance, as a new Member of the House Committee on the Judiciary, the Republican majority, I noticed, has become so arrogant that they are now attempting to silence even the opposition from the minority party, preventing us from giving any opposing testimony.

Testimony comes from the gentleman from Wisconsin (Mr. Sensenbrenner), the chairman of the Committee on the Judiciary. As the committee prepares to vote on the reauthorization of the PATRIOT Act, Chairman Sensenbrenner has conducted 12 hearings on the issue, but has refused to allow almost any testimony from those who oppose the PATRIOT Act or its provisions.

Opposing testimony was allowed only after the gentleman from Michigan (Mr. Conyers) used the rules of the committee to force the chairman to hold a hearing that included Democratic panelists. Clearly miffed by this action, the gentleman from Wisconsin (Chairman Sensenbrenner) scheduled the hearing for just 18 hours later on a Friday morning when the House was not even in session. And that is not the worst of it.

During the actual hearing, the gentleman from Wisconsin (Chairman Sensenbrenner) rudely cut opposition voices off, and then abruptly and unilaterally concluded the hearing without a vote of the committee. After Democrats called a point of order, he gaveld the hearing to a close and left the room. When Democrats continued to voice their opposition, he turned the microphones off. When that did not stop them, he turned the lights off in the room.

Mr. Speaker, when are Republicans going to realize that the minority voice is an important one?
PAYING TRIBUTE TO CHUCK COLSON, FOUNDER OF PRISON FELLOWSHIP

(Mr. GUTKNECHT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUTKNECHT. Mr. Speaker, I rise today to pay tribute to a convicted felon.

Earlier this month, with the revealing of Deep Throat, we were reminded of Watergate, a pivotal event in American history that also marked a major turning point in the life of then House hatchet man Chuck Colson. Instead of returning to a career in the private sector after serving his prison sentence, Colson felt called to return to those still behind bars.

In 1976 he founded Prison Fellowship, the world’s largest prison outreach organization.

In 2005, after nearly 30 years of leading Prison Fellowship, Colson named former Virginia Attorney General Mark Earley as the man who would take the organization into the next generation. Now, June 16, 2005, marks another crowning moment as they dedicate new headquarters in Lansdowne, Virginia.

With over two million Americans behind bars in the United States, Prison Fellowship is working to change hearts and help return inmates to society as productive citizens.

Today we may dedicate bricks and mortar, but we are truly giving thanks that Prison Fellowship is not just an organization; it is a movement of churches and volunteers in all 50 States and now 108 countries around the world.

Thank you, Chuck Colson, for saving lives by saving souls.

REPUBLICAN ABUSES OF POWER

(Ms. WATSON asked and was given permission to address the House for 1 minute.)

Ms. WATSON. Mr. Speaker, how much does the majority leader underestimate the American people? For 6 months now the House Ethics Committee has been unable to meet because the Ethics Committee chairman refuses to abide by the committee’s own rules. As a result, this week, the gentleman from Texas (Mr. DELAY) says it is the Democrats who are keeping the committee from meeting because, according to him, they want to delay his case before the Ethics Committee until an election year.

If the majority leader really wants his case heard before the Ethics Committee, he should persuade the Ethics Committee chairman to abide by the ethics rules and appoint a nonpartisan staff director. The rules of the committee require that the staff be assembled and retained as a professional nonpartisan staff. If the gentleman from Washington (Chairman HASTINGS) is allowed to appoint his chief of staff, he would be breaking the committee rules by having a partisan staffer on the committee.

Democrats want the Ethics Committee to play by the rules. Please play by the rules.

PROVIDING FOR CONSIDERATION OF H.R. 2863, DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2006

Mr. COLE of Oklahoma. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 315 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 315
Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XCVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the bill (H.R. 2863) making appropriations for the Department of Defense for the fiscal year ending September 30, 2006, and for other purposes. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived. General debate shall be confined to the bill and shall not exceed one hour equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations. After general debate the bill shall be considered for amendment under the five-minute rule. All points of order against consideration of the bill are waived. During consideration of the bill for amendment, the Chairman of the Committee of the Whole may accord priority in recognition on the basis of whether the Member offering an amendment has caused it to be printed in the portion of the Congressional Record designated for that purpose in clause 8 of rule XXIII. Amendments so printed shall be considered as read. When the committee rises and reports the bill back to the House, with a recommendation that the bill do pass, the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore (Mr. FORBES). The gentleman from Oklahoma (Mr. COLE) is recognized for 1 hour.

Mr. COLE of Oklahoma. Mr. Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentleman from Massachusetts (Mr. MCGOVERN), pending which I yield myself such time as may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

GENERAL LEAVE

Mr. COLE of Oklahoma. Mr. Speaker, I ask unanimous consent that all Members may have 1 hour within which to revise and extend their remarks on H. Res. 315.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. COLE of Oklahoma. Mr. Speaker, on Tuesday the Rules Committee met and reported a rule for consideration of the House Report for H.R. 2863, the Department of Defense Appropriations Bill for Fiscal Year 2006.

Mr. Speaker, when the Rules Committee met, it granted an open rule, providing 1 hour general debate equally divided and controlled by the chairman and ranking member of the Committee on Appropriations. This rule waives all points of order against consideration of the bill. For the purposes of amendment, the bill shall be read by paragraph. Under this rule this rule waives all points of order against provisions in the bill which fail to comply with clause 2 of rule XXI, and it authorizes the Chair to accord priority in recognition to Members who have preprinted their amendments in the Record. It provides one motion to recommit with or without instructions.

Mr. Speaker, the committee believes this rule will provide ample opportunity for Members to fully debate the fulcrum of our national defense.

Mr. Speaker, I rise today in support of the rule for H.R. 2863 and the underlying bill. This important legislation takes dramatic steps to further prosecute the global war on terror, enhance our military mobility, and improve the lives of our servicemen and women. It is a bill that fundamentally addresses many of the transformative challenges faced by our military in the future and implements many measures needed to meet those challenges.

Mr. Speaker, the Defense Appropriations Subcommittee and the full Appropriations Committee have presented us with an excellent bill. This bill provides us with a way to meet many of the current challenges that we face by addressing the immediate requirements of our forces as well as the ongoing need to transform our military through the adoption of new technology, advanced methods of warfare, and innovative changes in military doctrine.

To fully appreciate the significance of H.R. 2863, one must understand the four long-term challenges that we seek to address in this legislation.

The first long-term challenge is a direct result of the procurement holiday that was taken by our country in the 1990s. To understand the consequences of shortchanging our military during this era, one need only to recall the procurement accounts as they were funded, or perhaps better described as not funded, during this period. The failure to maintain adequate stocks of ammunition, in particular, illustrates how the procurement holiday had the adverse effect of diminishing our country’s ability to project force.

Additionally, one can see the adverse effects that a constant surge in deployments in the 1990s had upon the maintenance levels of our hardware. This bill takes important steps to rectify that problem associated with the procurement holiday.

Mr. Speaker, the second long-term challenge we must address on a continual basis is related to the transformation of our military forces. The
famous Goldwater-Nichols legislation of 1986 altered the manner in which we organize to fight wars and committed us to transforming the nature of our forces, transformation demands an ongoing strategic, operational, and tactical review of our needs in relation to technology, procurement and the development of joint warfighting capabilities.

Each service, all our units and all our equipment must implement one another and contribute to the increased effectiveness of our forces. Transformation is not a goal in and of itself. It is a process of continuous change and adaptation that makes our forces more effective. This is an issue that must address on an ongoing basis. H.R. 2863 does just that.

Mr. Speaker, the third long-term challenge we face is related to our force structure and manpower requirements. This legislation, while it is designed to meet the request of the President's budget, also continues to fund additional forces required to prosecute the global war on terror. This is a good start. In future years, we must be able to respond to these needs, and I believe, increase the size of our forces. There is no short-term easy solution to recruiting and maintaining the larger forces I personally believe we will need in the dangerous world in which we live. Still, H.R. 2863 is a good interim step and one which we should take and support and build on in the coming years.

The fourth long-term challenge faced by the military results from the global war on terror. This is not a conventional war. We are not fighting a nation state. We are fighting the adherents of a fanatical ideology that transcends national borders and takes root whenever and wherever it can. We are involved in a conflict that is far from over, and I believe, require a more significant effort than we have made in the past. H.R. 2863 is a good interim step and one which we should take and support and build on in the coming years.

Mr. Speaker, the third long-term challenge we face is related to our force structure and manpower requirements. This legislation, while it is designed to meet the request of the President's budget, also continues to fund additional forces required to prosecute the global war on terror. This is a good start. In future years, we must be able to respond to these needs, and I believe, increase the size of our forces. There is no short-term easy solution to recruiting and maintaining the larger forces I personally believe we will need in the dangerous world in which we live. Still, H.R. 2863 is a good interim step and one which we should take and support and build on in the coming years.

The fourth long-term challenge faced by the military results from the global war on terror. This is not a conventional war. We are not fighting a nation state. We are fighting the adherents of a fanatical ideology that transcends national borders and takes root whenever and wherever it can. We are involved in a conflict that is far from over, and I believe, require a more significant effort than we have made in the past. H.R. 2863 is a good interim step and one which we should take and support and build on in the coming years.
this time of war is to automatically approve appropriations bills, no questions asked. Let me remind my colleagues that we also have a responsibility to do proper oversight, to conduct thoughtful debate, and to ensure that there is a clearly defined mission, which includes our men and women can come home. That is what the Pelosi amendment seeks to accomplish, but for some reason the Republican leadership does not want to talk about it.

To be honest, I do not think this administration has a clue about what they are doing in Iraq, and, Mr. Speaker, that is a tragedy.

Clearly the current situation is not what the administration predicted, but instead of giving us a truthful assessment, instead of candor and clarity, we are given spin. We are told that things are going great. That is simply not credible.

Mr. Speaker, it takes no courage for a politician to stand before a microphone and say we must stay the course. It is not our lives that are on the line. We must recognize that the Members of this House have a responsibility that has for too long been neglected.

We owe our troops, indeed we owe our country, some answers. I know that this is not a comfortable topic, but I would plead with my colleagues on both sides of the aisle to start worrying less about saving face and more about doing what is right.

At the end of this debate, Mr. Speaker, I will remind my colleagues I will be asking for a “no” vote on the previous question.

Mr. Speaker, I reserve the balance of my time.

Mr. COLÉ of Oklahoma. Mr. Speaker, I am pleased to yield 2 minutes to the gentleman from Georgia (Mr. GINGREY).

Mr. GINGREY. Mr. Speaker, I thank the gentleman from Oklahoma for yielding me time.

Mr. Speaker, I rise in strong support of the rule for the fiscal year 2006 Department of Defense Appropriations Act and the underlying legislation. I would like to commend the gentleman from California (Chairman LEWIS), the gentleman from Wisconsin (Ranking Member OBEY), the gentleman from Florida (Chairman YOUNG), the gentleman from Pennsylvania (Mr. MURTHA) and the staff of the Subcommittee on Defense for their tireless efforts in support of our soldiers, sailors, airmen and marines who are bravely defending us at home and abroad.

Mr. Speaker, this bill does a remarkable job of covering a wide scope of issues that are vitally important to our armed services, both Active and Reserve components, and it clearly meets the immediate needs of the warfighter. I am particularly grateful for the work the Committee on Appropriations has done to fund the FA–22 program this year. The funding for 25 planes will go a long way towards providing sta-

bility for that program and assuring that America does maintain air dominance for the foreseeable future. I also wholeheartedly agree with the committee’s assessment that the Department of Defense should look into the future needs for the FA–22 fighter and consider developing a new contract and extending the procurement life of the program beyond fiscal year 2009.

I am especially appreciative for the hard work of the gentleman from California (Chairman LEWIS) and the gentleman from Florida (Mr. YOUNG) in restoring the multiyear contract for the procurement of C–130Js. This is an absolutely vital program, Mr. Speaker, for our military’s current and future airlift capability, and I and our Nation are grateful for their strong support.

Again, Mr. Speaker, I would like to thank the chairman and ranking member of the committee for their hard work on this bill.

Mr. McGOVERN. Mr. Speaker, I yield 1 minute to the gentleman from California (Ms. PELOSI), our Democratic leader, whose amendment was not allowed to be made in order by the Committee on Rules last night.

Ms. PELOSI. Mr. Speaker, I rise today in opposition to action taken by the Committee on Rules last night when they refused to grant a waiver for my amendment, which I will describe in a moment.

First, I would like to commend the gentleman from Pennsylvania (Mr. MURTHA) and the gentleman from Florida (Mr. YOUNG) for their patriotism, for their hard work on behalf of the safety and security of our country and the well-being of our troops. I say to the gentleman from Florida (Mr. YOUNG) congratulations and thank you for what you have done.

The gentleman from Pennsylvania (Mr. MURTHA) is not in the room at the moment, but I want to acknowledge his amendment that of the gentleman from Wisconsin (Mr. OBEY), our ranking member of the full committee, and the gentleman from California (Mr. LEWIS), the new chairman of the full committee. They have all had a strong commitment to our national defense, to our men and women in uniform, to the safety and security of our country. They help us honor our oath of office which calls for providing for the common defense.

I would have hoped that in this legislation that comes before us we would have had an opportunity to give an accounting to the American people as to the conduct of the war in Iraq.

As we all know, Mr. Speaker, this Sunday is Father’s Day, and many fathers, young fathers, will be away from their families. They will be in Iraq. They will be in Iraq, just as many mothers were on Mother’s Day. These brave young mothers and fathers, sons and daughters, and many others are fighting a war in which we sent our young people in harm’s way without leveling with the American people. They were sent into a war without telling the intelligence about what they were going to confront, without the equipment to protect them and without a plan of what would happen after the fall of Baghdad.

I, as well as many of my colleagues on both sides of the aisle, have visited with soldiers in Iraq and many of whom are on their second tour of duty there. I have conveyed to those brave soldiers, as I have to the wounded in medical hospitals both at home and overseas, how grateful the American people are for their valor, their patriotism and the sacrifice they are willing to make for our country. They have performed their duties with great courage and great skill, and we are all deeply in their debt.

Disagreement with the policies and the conduct of the war that sent our troops to Iraq, and which keeps them in danger today, in no way diminishes the respect for the men and women, the soldiers and the civilians, who are doing their work on behalf of the safety and security of our troops.

Sadly, their level of sacrifice has not been met by the level of the administration’s planning, and now the American people agree. This war is not making America safer. It is not making the world a safer place. It cost in lives and limbs, the cost in dollars, the cost in reputation has been enormous.

Then-Republican Senator from Ohio, Senator Robert Taft, soon to become the majority leader, the Republican leader in the Senate of the United States, had this to say about our duty in time of war. He said, “Criticism in a time of war is essential to the maintenance of any kind of democratic government.” He is a Republican. That was during World War II, and what he said was right, “Criticism in a time of war is essential to the maintenance of any kind of democratic government.”

Each passing day confirms that the Iraq War has been a grotesque mistake. We are here today considering a rule for a defense appropriations bill that will provide another $45 billion for that war, in addition to the hundreds of billions of dollars already appropriated, and the end is not in sight. This money has been spent in Iraq without question by Congress, without accountability by the administration and without success.

Today we must also finally, if belatedly, heed the admonition of Senator Taft and pose questions. The questions are long overdue, about the policies by which the Iraq War is conducted. Congress did not discharge its responsibilities to oversee the policies at the start of the war, and it has not done so since. The American people, particularly our troops who are serving in harm’s way, deserve better.
If we defeat the previous question on this rule, this is a technicality inside a baseball process here, but if we defeat the previous question on this rule, we can consider my amendment, which says to the President: ‘Within 30 days of enactment of this legislation, Congress expects accountability from you as to what the strategy for success is. What security and political measures have you established that will bring our troops home?’

Specifically, my amendment would require the President within 30 days of enactment, as I mentioned, submit to Congress a report identifying the criteria that will be used to determine when it is appropriate to begin to bring our troops home from Iraq. It does not require that the troops be brought home by a particular day. It requires only that the means for judging when they may be brought home be shared with this Congress.

This is not new language. Under the leadership of the gentleman from Virginia (Mr. MORAN), even more expanded, more detailed criteria were set forth in the supplemental bill, which was agreed to in a bipartisan way. I believe the gentleman from Florida (Mr. YOUNG) was a party to that agreement with the gentleman from Pennsylvania (Mr. MURTHA).

So this is just raising the profile once again of that requirement, and I commend the gentleman from Virginia (Mr. MORAN) for his leadership, for his attention to the detail of all of this, for providing some questions for much-needed answers for the American people.

It is long time past due that the President level with the American people and tell them what the plan is for our troops to complete their work in Iraq, before any, more money is provided for this war. Congress must insist that information be shared.

I hope that the administration will honor the request, the bipartisan request, in the supplemental. This appropriation bill, which has even more money for Iraq, is an appropriate place for us to make that request as well.

This is an enormous issue in our country. Our troops are in harm’s way. Their actions there, again, have been marked by their patriotism, their skill, their love of our country and their courage, but we have to let them know what the goal is and when we have accomplished it so that they can come home.

I hope that we will have bipartisan consensus for a strategy for success in Iraq.

Regrettably, the Republican majority on the Committee on Rules refused to make amendments that are necessary. Therefore, opposing the previous question on the rule is the only way that we can force this issue on the defense appropriations bill.

I urge my colleagues to vote “no” on that vote and to “yes” for accountability for a safer America.

I thank the gentleman from Massachusetts (Mr. MCGOVERN) for his time.

Mr. COLE of Oklahoma. Mr. Speaker, I reserve the balance of my time.

Mr. MCGOVERN. Mr. Speaker, I yield 5 minutes to the gentleman from Wisconsin (Mr. O’NEY), the ranking Democrat on the Committee on Appropriations.

Mr. OBEY. Mr. Speaker, I thank the gentleman for the time.

Mr. Speaker, I would strongly urge this House vote “no” on the previous question on this resolution just laid out by the distinguished minority leader. I think there are some other reasons as well.

I happen to think that the Iraqi war is the dumbest war that we have engaged in since the War of 1812, but my opinion is not relevant on that point today. We are there, and the question is how do we best deal with the problem now that we are.

To me, it is irresponsible and mindless for us to be involved in a war unless we have some kind of idea how we will define success. How will we know when we have won; or conversely, how will we know if and when this effort becomes obviously counterproductive?

Right now we have no specific measuring stick. All we know is that we are in a morass, and we are likely to remain there for years. I would predict American troops are going to be there for a decade under existing policy. I do not think the American people will stand for that unless there is a clear policy and a clear set of goals and a clear set of tools to evaluate what it is we are doing. We need to know what standards of success will be held up for the American people as well.

I congratulate the gentleman from Virginia for offering the original language on the supplemental. This is a follow-up to that in a simplified version, but it aims at the same thing. It says, “Mr. President, tell us how you are going to determine whether this policy is a success or not. Quit the bull gravy. Give us specifics, not general platitudes which the Congress has been getting on this subject for the last 2 years.”

Mr. COLE of Oklahoma. Mr. Speaker, I yield myself such time as I may consume. My main purpose here, obviously, is to focus on the bill and the rule for the bill, but I want to discuss some of the concerns that my good friends on the other side of the aisle have.

Frankly, I do not doubt their patriotism for a minute, and I welcome the discussion and debate. I think it is a very good one and a very important one for the national purpose. But I think we ought to go back and recall a little bit the situation in Iraq. We ought to remember who and what Saddam Hussein was.

I was talking with a young American soldier. At that point we, like every other intelligence service in the world and most people in the world, thought there were WMDs in significant quantities in Iraq, although I do hasten to point out the capacity to acquire and to develop those was still very much there and Mr. Hussein was still working himself out of U.N. sanctions and placing himself in a position to do that.

I yield still think we were right to have acted early. But this young soldier that I was visiting with, I asked him: We’ve been here a considerable amount of time. We’ve not found the quantities of WMDs we expected. Do you think it was a wise decision to come? He was quiet for a moment and looked at me and he said: Yes, sir. I will tell you regardless, and I still think they had the capacity, but regardless I think it was a good decision to come.

I asked: Why?

And he answered my question with a question of his own. He said: Sir, have you ever been to a mass grave site?
I said: No, I haven't.
He said: I have. He said, Until you've seen hundreds of wailing women as bodies are coming out, one after another, trying to identify, is that a father, is that a son, is that a husband, is that a sister, do you know what terror really is. He said: My question is why the whole world wasn't here 10 years ago.
That is a very interesting question to ask. Because we of all people had the ability to do 10 times previously to have done that. We had just won a war with Saddam Hussein, we stopped at the border, and we actually urged people on the other side to rise up, and they did. And 50,000 of them were killed by Saddam Hussein and neither we nor our coalition allies did anything to help.
So I think looking at what was going on in Iraq, looking at the 400,000 deaths, looking at the 263 identified mass grave sites and looking, frankly, at our responsibility to have done something, if we decided, for a reason, we did nothing is something that we ought to think about and, frankly, something that the whole world ought to think about.
Just 2 weeks ago, or last week, actually, the New York Times ran an article on another mass grave site that had been located, was being frankly explored, if that is even the appropriate term, in preparation for Saddam Hussein's trial, and in that there were 2,500 people. The New York Times also reported on the fact that 8 million people came out to see what they are doing, the fact that American intervention in Iraq but is essentially the manner in which we hope someday to be able to leave a self-governing and free country.
But I think we ought to stop and look at the Iraqis on the ground and see what they are doing, the fact that a constitutional government has been established or is being established, the fact that 8 million people came out to see what they are doing, how much in the way of resources are necessary. We put that language into the conference on the Iraq supplemental. The gentleman from Pennsylvania (Mr. MURTHA) and I had it put into report language. The minorities asked that that language be stricken from the conference on the Iraq supplemental. The gentleman from Pennsylvania (Mr. MURTHA) and I had that language put into conference on the Iraq supplemental. The gentleman from Pennsylvania (Mr. MURTHA) and I had it put into report language. The minorities asked that that language be stricken from the conference on the Iraq supplemental.
That is the reason why I hope people will vote "no" on the previous question, to give us an opportunity to force this administration to do what it should have done a long time ago and define what this mission is all about.
Mr. Speaker, I yield 5 minutes to the gentleman from Virginia (Mr. MORAN).
Mr. MORAN of Virginia. I thank my friend and colleague from Massachusetts for yielding me this time.
Mr. Speaker, I am very much interested in the debate that just took place. I cannot help but be mindful of the fact that we are still debating today the advisability of going to war in Vietnam which concluded 30 years ago and we may continue this debate on the Iraq war for another generation.
But the comments that the gentleman makes are really not particularly relevant to why we are focusing on in the rule. I did not feel we should go into the Iraq war without an adequate exit strategy and without more reliable information connecting Saddam Hussein to the 9/11 attacks, but I was in the minority. The House gave the President the authority to go to war in Iraq. We accept that. But we did not give the President the authority to spend an unlimited amount of money. We did not give the President the authority to take an unlimited amount of time in fulfilling the mission in Iraq. We certainly did not give the President the authority to expend an unlimited number of American lives in pursuing that mission. We have to retain our oversight responsibility.
In the newspaper today, in The Washington Post, maybe some of my colleagues were struck at the juxtaposition of headlines, one headline says, "Bush Is Expected to Address Specifics on Iraq." And on the page facing it, it says: "Exit Strategy on Social Security Is Sought." Interesting juxtaposition. But in the story on Iraq, the White House spokesperson says, the President takes seriously his responsibility as Commander in Chief to continue to educate the American people about our strategy for victory.
That is all this amendment was about. That is all we are asking for, some reasonable information that is measurable criteria for success in Iraq. What level of military capability is necessary for the Iraq forces, what level of economic viability is necessary.
for the Iraq economy, what level of political stability is necessary for the Iraq Government. That is what we are asking. More importantly, that is what our constituents are asking. If we had a child in that war, would that not be the first thing we would want to know? What does it take to accomplish the mission so they can get back home to their loved ones? The Government Accountability Office, the GAO, just gave us a report that states that “U.S. Government agencies do not report reliable data on the extent to which Iraqi security forces are trained and equipped. The reported number of Iraqi police is unreliable because the Ministry of Interior does not receive consistent and accurate reporting from the police forces around the country.” Further, the Departments of State and Defense no longer report on the extent to which Iraqi security forces are equipped. We need to focus in on where they should be, on how we are doing, and how we are doing it. We need to provide for their own security as we work our way through this. We know what we need to do. We have been doing it. We need to do it faster. We need to do it better. We need to do it more efficiently. We need to do it with less cost. That is what it means to be a civilized world and that is what it means to be a responsible world. We as the United States in this effort to allow this established government in Iraq to take a strong hold and to be able to provide for their own security as we exit this war. That is the reason why we must have an exit strategy. We also know that we need to continue to support the government in Iraq. We know that we need to continue to support the Iraqi forces. We know that we need to continue to support the reconstruction efforts in Iraq. We know that we need to continue to support the Iraqi legal system. We know that we need to continue to support the Iraqi economy so that it will be economically viable. And how much more in the way of political stability will be necessary so that they could start to govern themselves? Until we get those answers, we do not know where we are going. And if we do not know where we are going, we are never going to get there.

Mr. COLE of Oklahoma. Mr. Speaker, I yield such time as I may consume. I yield myself such time as I may consume. I would just say to the very distinguished gentleman from Florida, whom I have a great deal of respect for, that all these terrible terrorist acts that we have cited were carried out by al-Qaeda. And, unfortunately, most of those masterminds are still at large because our forces have been diverted into this war in Iraq, and they are not focused on where they should be, on bringing to justice those who were working there at the airbase. Nineteen lives were lost. That was the battleground in this global war on terror. On August 7 of 1998, the United States Embassies, our sovereign property in Kenya and Tanzania, were bombed. Two hundred and fifty-nine lives were lost, including 11 Americans. That was the battleground then. On October 12 of 2000, USS Cole off the shore of Yemen was attacked by terrorists. Seventeen sailors lost their lives, and many, many more were wounded seriously. That was the battleground in this global war on terrorists then.

Mr. YOUNG of Florida. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Florida, whom I have a great deal of respect for, that all these terrible terrorist acts that we have cited were carried out by al-Qaeda. And, unfortunately, most of those masterminds are still at large because our forces have been diverted into this war in Iraq, and they are not focused on where they should be, on bringing to justice those who were working there at the airbase. Nineteen lives were lost. That was the battleground in this global war on terror. On August 7 of 1998, the United States Embassies, our sovereign property in Kenya and Tanzania, were bombed. Two hundred and fifty-nine lives were lost, including 11 Americans. That was the battleground then. On October 12 of 2000, USS Cole off the shore of Yemen was attacked by terrorists. Seventeen sailors lost their lives, and many, many more were wounded seriously. That was the battleground in this global war on terrorists then.

Mr. Speaker, I yield 3 minutes to the gentleman from Massachusetts (Mr. MEEHAN). Mr. Speaker, I thank the gentleman from Massachusetts for yielding me this time. Our strategy to win the peace in Iraq is failing. We have been killing or eliminating 1,000 to 3,000 Iraqi insurgents a month for 17 months, and in that same period of time, the insurgency has quadrupled. If we talk to people in the theater in Iraq today, they would tell us that that insurgency is anywhere from 150- to 200,000 people. We need to have an exit strategy. We want to have an amendment asking the President to come up with a success strategy. We do that to support our men and women in uniform and to support the administration’s coming up with an exit strategy, because it has been 25 months and 1,700 American fatalities since the President declared “mission accomplished” in Iraq. For over 2 years we have stayed the course, and it has brought us only casualties and less stability.

After returning to the United States from Iraq, I suggested 5 months ago that we needed to think of an exit strategy. Five months later the case for an exit strategy has only grown stronger. And having an exit strategy does not mean cut and run. It means having a blueprint for achieving our goal of leaving the Iraqi people sovereign and truly independent. And it is not a novel idea. All we are asking is that we do the same principle he had when he was Governor of Texas, when he said, “Victory means exit strategy.” It is important for the
President to explain to us what that exit strategy is, and that is what Govern-
ror George W. Bush said relative to our campaign in Kosovo, and it is more relevant today in Iraq than it was even then.

Any successful strategy in Iraq has to address the fundamental factors that are continuing to fuel the insurgency. One of those factors, Mr. Speak-
er, is the suspicion that the United States is going to occupy Iraq indefini-
tely. And until we lay out a frame-
work with the Iraqi Government to bring our troops home, the Iraqi people will never feel that they have control of their own destiny.

A fundamental problem with our failed strategy has been the failure to counter the suspicion among the Iraqis that the United States intends permanent occupation. We are pouring con-
crete all over that country, and in order to build credibility for the new government and make clear that our forces are only temporarily peacekeepers, we need to rename any intention of a long-term presence in Iraq. There are difficult and funda-
mental questions about Iraq's future, the structure of government, the de-
gree of religious and polit-
ical minorities. All of these things have to be worked out. But this process must be fully inclusive. It is our obli-
gation to press the process and pulling Iraqis out of the insurgency, pulling them into the political process. A clear exit strategy would help splinter insurg-
ent groups and help them set aside their own differences. The only reason they have united is to unite against us in our occupation. We should support this strategy.

Mr. COLE of Oklahoma. Mr. Speaker, I yield myself such time as I may con-
sume.

I have great respect, Mr. Speaker, for my colleagues on the other side of the aisle for their passion and their com-
mmitment, but I think they are making a fundamental mistake in their argument about Iraq. I think what they want is a timetable, not a strategy.

We have a strategy. It is called getting an elected government up and operational that can defend itself. We have made important steps along the way in succeeding in that strategy. We have turned over power to the Iraqis. The Iraqis have had an election. They have in the political process. A clear exit strategy would help splinter insurg-
ent groups and help them set aside their own differences. The only reason they have united is to unite against us in our occupation. We should support this strategy.

Mr. SPRATT. Mr. Speaker, after the
march of the war in Iraq has been marred by miscalculations and mis-
takes, made up for in many cases by our troops, who have filled the breach brilliantly by improvising, often doing duty for which they were never trained. You cannot go to Iraq and talk to our troops in the field and come home without saying to yourself, thank God there are such Americans.

But their valiant efforts would have been more effective if the Pentagon had not ignored General Shinseki and deployed too few troops initially to se-
cure the country and capitalize on our victory in battle.

Their efforts would have been more effective if the Pentagon had not ig-
nored General Garner and cashiered the entire Iraqi Army.

Their efforts would have been more effective if we had moved much sooner to set up a representative government and stand up Iraqi security forces to whom we can ultimately and must ulti-
mately hand over the responsibility for securing their own country.

Before we disengage from Iraq, we have to do both of the above. I firmly believe that. We have to stand up secur-
ity forces, and by that I mean police and border guards and the army, ade-
quate to stabilize the country; and we have to steer the Iraqis through the shools towards the adoption of a con-
stitution and the election of a govern-
ment under that constitution.

We cannot leave any sooner without risking the collapse of Iraq into a frac-
tious and bloody civil war which could very well require us to return. I believe

that.
But to be sure that we are moving systematically in the right direction, the minority leader, the gentlewoman from California (Ms. PELOSI), is asking for a yardstick, milestones, by which to measure our progress. This is not a plan of withdrawal. If it were, I would not vote for it. This is a strategy for success.

Let me give you one reason from a budget perspective why we need it. Basically, the budgets in the out years beyond 2006 contain no estimate of what the deployments in Iraq, Afghanistan, and North American Air Defense are costing us. Even though the cost is $80 billion to $100 billion a year, it is not included in the budget.

CBO undertook to estimate, to model, what our likely deployment in Iraq may cost, because otherwise there is a gaping hole, an unrealistic aspect, to the budget. Their estimate was that if we drew down to 20,000 troops in theater by the end of 2006 and 20,000 troops in Afghanistan by the end of 2006, and then taper that force off over the rest of the remaining 10-year period, the cost over 10 years would be $384 billion. That is a significant item.

If that is what is in the cards, if that is what the strategy for success, we need to know it, we need to plan for it, we need to be expecting it.

Given what is at stake, given the lives that have been lost, given the billions that have been spent, what are we asking for? The withdrawal of our forces from Iraq. Once again, we must get our funding priorities correct. We must get them straight.

Mr. Speaker, we must get our funding priorities right. And the American people need to know what the President’s plan is. What is his strategy? What does he consider success? The information that the Pelosi amendment is requesting is absolutely necessary to begin what the American people are demanding, and that is the withdrawal of the United States Armed Forces from Iraq.

It is incredible to me that we are sacrificing our funding needs for our critical efforts here in America, such as for health and education. Once again, we must get our funding priorities correct. We must get them straight. We must know what the President’s plan is. We must know what he intends to do. The Pelosi amendment would give that information.

I urge an “aye” vote.

Mr. COLE of Oklahoma. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to take this opportunity to respond to the gentleman from California (Ms. LEE). In the first month assumption that has been made by a number of my friends on the other side of the aisle, which is that we are somehow paying an extraordinary amount of our national wealth for defense. I would actually argue quite the opposite.

In 1959 and 1960, at the height of the Cold War, this country spent 50 percent, 50 percent, of the entire Federal budget on defense, almost 9 percent of the gross national product, an enormous sum of money. In 1980, fast forward, Ronald Reagan, we are spending about 6 percent of the gross national product and about one-third of the Federal budget on defense.

Today, about 3.7 percent of the national wealth and about 18 to 19 percent of the total Federal budget. That is a different number, an underestimate, and I think this bill is a step in that direction. The second assumption that I want to disagree with is that we are somehow less safe today because of the Iraqi war. That is asserted, never demonstrated.

The reality is, I think, if you asked most Americans on September 12, 2001, did they expect other incidents inside the domestic confines of the United States, they would have said yes, and they would have expected them in rather short order. It is a little short of miraculous that we have not had that horrific incident occur again. It could occur at any moment. As the President has said repeatedly in recent months, America is safer; America is certainly not safe.

But I would argue, again, the engagement of the enemy a far distance away, in the United States, and the method that keeps them tied down has actually contributed to the security of our country. This excellent piece of legislation will enable our military to continue to do the outstanding job it is doing. Again, on that piece of legislation, at least, I am delighted there is bipartisan unity.
Mr. Speaker, the Pelosi amendment would require the President to submit to Congress within 30 days a report on a strategy for success in Iraq. That is it. Mr. Speaker, whatever one’s position is on the war in Iraq, I think most of us realize that it is the responsibility of the administration to assess the situation in Iraq and to address the matter of an eventual withdrawal from that country. I hope Members will agree to at least consider this amendment today. The House has a responsibility to ask tough questions and to demand straight answers. I am tired of the spin, as so many other Members are. It is time for candor. The people of this country deserve that.

A “no” vote will not prevent us from considering the defense appropriations bill under an open rule, but a “no” vote will allow Members to vote on the Pelosi amendment. However, a “yes” vote will block the House from considering and voting on a success strategy in the war in Iraq. Mr. Speaker, we need a strategy, not just slogans.

Mr. Speaker, at this time I will enter into the RECORD two articles cited in my opening statement. I also had a very moving meeting yesterday with members of the Gold Star Families for Peace who have lost sons and daughters in the war in Iraq. These families have experienced the tragedy of this war firsthand, and they believe we should set a very different course. I will enter into the RECORD the personal statements by these family members regarding the continuing U.S. presence in Iraq.

[From Knight Ridder Newspapers, June 12, 2005.]
five million people, to the political table. Sunnis now find themselves in a country ruled by the Shiite and Kurdish political parties. This is a change from the Bush administration's policy of generating new items had been accidentally labeled as excess political terms. As a result of the political changes, the Defense Department is now being held accountable for its actions.

The evidence is overwhelming, compelling, and undeniable. The Bush administration's policy of generating new items had been accidentally labeled as excess political terms. As a result of the political changes, the Defense Department is now being held accountable for its actions.
Wolfe, and most effectively and treach-erously, Colin Powell, lied their brains out before the invasion. The war was even shown where the WMD's were on the map. We were and are smoking guns and it could come at any time in the form of a "mushroom cloud" or a cloud of toxic biological or chemical weapons. Does anyone remember duct tape and plastic sheeting?

Finally, the side of peace, truth and justice has its own smoking gun and it is burning our hands. They lied. The Downing Street Memo dated 23, July 2002, (almost 8 months before the invasion) that states that military action (against Iraq) is now seen as "inevitable" "and the time is now" "Bush wanted to remove Saddam through military action", justified by the conjunction of "terrorism and WMD's." The most damning thing to George in the memo is where the British intelligence officer who wrote the memo claims that the intelligence to base Great Britain and the U.S. staging a devastating invasion on Iraq was being "fixed around the policy." Now, after over three years of relentless propaganda, it is difficult to distinguish the proven lies from the new ones. But the President of the United States, was given a warning of the dangers of a preemptive war and that it could backfire and bring the world into a war of destruction. "If we are ever to reach Peace in Iraq we must confront the lies and deceptions that got us there, just as we could not wage a war successfully on lies, there can be no Peace based on lies. It is very simple in some ways, 1700 Americans have been killed, the citizens of Iraq have also been killed as a result. Yet I have to sift through the contents of a memo from the upper echelons of the British government. The memo reiterates the fact that our administration had no intention of going to war before the invasion. The most telling quote in this memo reads, "The intelligence and facts were being fixed around the policy." It was a ruse.

The clouds surrounding Sherwood's death became even darker recently when I read the contents of a memo from the upper echelons of the British government. The memo reiterates the fact that our administration had no intention of going to war before the invasion. The most telling quote in this memo reads, "The intelligence and facts were being fixed around the policy." It was a ruse. The leaders of our country politicized intelligence. Our course as a country, ultimately, stems from the individual conclusion of all of us to either complicit or resistant to war. The government's failure in Iraq becomes our own failure when we substitute political rhetoric or blanket ideology for reason. It becomes our fault when we are recklessly arrogant and willfully deaf.

The responsibility of citizens is to acknowledge and embrace the whole truth about the Iraq War. We must look past partisan pillaging and hold ourselves and our leaders to the high standards of justice and citizenship demands. When we fail to honor that responsibility, we fail to honor the sacrifices of our soldiers.

SILENCE IN THE FACE OF TRUTH: THE DOWNING STREET MEMO

(By Dante Zappala)

For the first 30 years of my brother Sherwood Baker’s life, he was a responsible citizen. He made oaths and he honored those oaths. This made him a loving father and husband. This also made him a noble and committed soldier. He courageously deployed with his National Guard unit to Iraq in 2004.

For the last six weeks of his life, Sherwood was assigned to provide convoy security for the Iraq Survey Group. He was killed in action, providing site security for the group that was looking for weapons of mass destruction. Mounting evidence indicates that the weapons’ non-existence wasn’t a mistake. It was a ruse.

We the American people are behind him to convene an investigation in the House Judiciary Committee. You can also write your Congressional Representative to help push the inquiry.

It is time to put partisan politics behind us to do what is right. George W. Bush is confronting America’s humanity. It is time for Congress and the American people to work together in peace and justice to rid our country of the stench of war. It is time for us to confront the suffering that permeates our White House and our halls of Congress. It is time to hold someone accountable for the carnage and devastation that has been caused. As a matter of fact, it is past time, but it is too late—Cindy Sheehan, mother of Casey Sheehan, KIA Apr. 4, 2004.

My name is Sherwood Baker, only 30 years old, a fine man, father, husband, social worker, musician, entertainer, friend, protector, patriot, national guard soldier lost his precious life on April 26, 2004, in Baghdad. He had been in Iraq for six weeks. He was assigned to protect the Iraq Survey Group the very week before his death. He was tasked with the responsibility of making sure the Iraq Survey Group would not form the next layer of mass destruction. He was guarding that group as they entered a munitions factory, it exploded, something hit my son in his head and he was killed immediately. He died two hours later, half a World away from all of us who love him so much.

Two years before this happened, people in the American Bush administration conspired to win the Iraq War. They were determined to have one, though the facts about any real dangers were "thin", though they had lost confidence of the Iraqi people rejected a capricious war. So these people who took their oath before God to be honorable leaders, betrayed the public trust and committed themselves and our Country to finding a way to have a war. Some of us suspected this from the beginning, but we didn’t have the documentation and other revealing documents bring the light of truth everyday to these horrendous betrayals.

Now it is the duty of congress to stand up and face these truths, investigate the documents, follow them where ever they lead. Hold those accountable who betrayed my son, my family, and I love.

If we are ever to reach Peace in Iraq we must confront the lies and deceptions that got us there, just as we could not wage a war successfully on lies, there can be no Peace based on lies. It is very simple in some ways, 1700 Americans have been killed, the citizens of Iraq have also been killed as a result. Yet I have to sift through the contents of a memo from the upper echelons of the British government. The memo reiterates the fact that our administration had no intention of going to war before the invasion.

In February 2003, until orders to return to the States on April 3, as he was headed to Kuwait the next week then back to Germany and his fiancé and wedding—Bill Mitchell, father of SGT. Mike Mitchell, KIA Apr. 4, 2004. He was sent to Kuwait on a 6 month rotation with his Battery, C1-39 FA (MLRS) in Augusta 2002. He was due back to the states in February 2003, until orders to returned were given. He was in December of the build-up. He was caught in this melee of horror with no other recourse to be a true soldier and fight for the cause. You can imagine the theater the listen to this and lies our government leaders so velemente declared to the nation as the truth. It was out of my control to tell my baby he was going to war. He was given a ruse, a mistake. It was a ruse.

If we are ever to reach Peace in Iraq we must confront the lies and deceptions that got us there, just as we could not wage a war successfully on lies, there can be no Peace based on lies. It is very simple in some ways, 1700 Americans have been killed, the citizens of Iraq have also been killed as a result. Yet I have to sift through the contents of a memo from the upper echelons of the British government. The memo reiterates the fact that our administration had no intention of going to war before the invasion.

The poet Archibald MacLish, who also lost a brother in war, wrote:

They say we leave you our deaths
Give them their meaning.

We must each confront ourselves over the failures in Iraq. For that failure is not simply the fault of our leaders misusing suspect intelligence. Our course as a country, ultimately, stems from the individual conclusion of all of us to either complicit or resistant to war. The government's failure in Iraq becomes our own failure when we substitute political rhetoric or blanket ideology for reason. It becomes our fault when we are recklessly arrogant and willfully deaf.

The responsibility of citizens is to acknowledge and embrace the whole truth about the Iraq War. We must look past partisan pillaging and hold ourselves and our leaders to the high standards of justice and citizenship demands. When we fail to honor that responsibility, we fail to honor the sacrifices of our soldiers.

When we fail to honor that responsibility, we fail to honor the sacrifices of our soldiers.

The world as I knew it ended when Neil was killed. Many years ago someone gave us a beautiful vase and somehow it knocked over and it broke into two pieces. I glued it together, it still holds water, but it lost its beauty. We are like that vase. For a while I lost my ability to pray. That has come back, thank God and all those who prayed for us. Many people go to work with coffee or tea in their cupholder. I go with tissues in my cupholder, because I cry to and from work. I am able to function at work because I work with children. Daily activities are no longer the same. I can speak to a large group of people, yet I have trouble going into stores. I cannot be around crowded stores and my closest friends just retired and I did not go to her retirement party, because I was worried that I would start sobbing. I love the theater, but I cannot go to see a show. I went to a retirement party, because I was worried that I would start sobbing. I love the theater, but I cannot go to see a show. I went to a retirement party, because I was worried that I would start sobbing.

It was out of my control to tell my baby he was going to war. He was given a ruse, a mistake. It was a ruse.

eager to be part of life. He didn’t expect to lose his life. He died from a shrapnel metal that pierced his right eye and traveled through his brain knocking out all the vital parts. His death was a victim of war. When a suicide bomber was allowed into a military base near their dismounted patrol, both soldiers were assigned 3rd Battalion, 7th Infantry Regiment, 3rd Infantry Division, and Fort Stewart, Ga. The soldiers are: Spc. Jacob L. Thompson, 20, of Buffalo, N.Y., killed his Sweetheart, Angela, shortly after his discharge in 2003. He was very excited. He had enlisted in the Army at the age of 20, Joe came to see me and told me why I think, no demand would that have happened. I want to someone to tell me why it happened. I will demand it himself. Cpl. Jonathan Castro, my only child, was killed December 21, 2004, when a suicide bomber was allowed into a military base mess tent in Mosul. I also demand that investigation in the name of all those who have died. We have left the world with a few more numbers, reasons to stay the course and continue to reveal these crimes and bring justice to each and every victim.

That number is 538. My nephew, PFC William Ramirez, was American soldier number 538 to die in this horrific travesty committed on the people of Iraq by conniving draft dodgers waving flags, liars, cheats and profiteers. His courage was squandered by the Army. He was assuring me that there was no threat. His youth and inexperience was stolen by conniving draft dodgers waving flags of patriotism and fear who never answered the call to serve. We must achieve the ends chosen by a handful of people and his death means nothing to them. Congress is still culpable. Our entire country will continue to pay for this. It is your job and duty now to investigate without stopping until truth and justice are served. I demand it in my son’s name because he is unable to demand it himself. Cpl. Jonathan Castro, my only child, was killed December 21, 2004, when a suicide bomber was allowed into a military base mess tent in Mosul. I also demand that investigation in the name of all those still serving. Many of them would demand it themselves if they didn’t fear military retribution—Vickie Castro, mother of Spc. Jonathan Castro, KIA Dec. 21, 2004.

As everyone will acknowledge, there are no words to describe the pain of losing a child. In our case, we held each other and assured one another that he did dying what he believed was right. We assured one in a few months in order to be discharged on time. The last words I heard him speak were on my answering machine about 2 weeks before he died. He said, “I love you and tell me he was sorry for this terrible loss. I was sure I would know if he was sincere. We had pictures taken with President Bush looking at the picture of me pinning on Joe’s boutineer at his wedding. The President asked me if I could release the words to the last song Joe wrote while in Iraq. The song “Freedom Isn’t Free” and on and on. Nothing really helped us except to keep saying to each other that Joe died doing something he believed was right. Joe died knowing we all loved him and that he was a true son of his Creator. Joe died among friends who had watched him overcome so many obstacles as the unsure boy, Joe, became the capable and accomplished young man we knew he was going to be. He left for Basic Training May 1, 2001. He arrived home from Basic on September 6, 2001. The party to celebrate this achievement was September 9, 2001. You know what happened next. All the rules changed. He married his Sweetheart, Angela, shortly after Basic Training. They moved to Washington near the Base. Joe continued to prepare in the Stryker Brigade at Fort Lewis, Wash. In December 21, 2004, for the deployment. He achieved the Expert Infantryman designation, which few managed to do. He told me he wanted to be the “one” to bring down Osama Bin Laden. He never fired his anger from this country, for this world. I know there are hundreds of thousands of people who have
June 16, 2005

CONGRESSIONAL RECORD—HOUSE

H4579

Mr. Speaker, I also ask unanimous consent to insert the text of the amendment immediately prior to the vote.

The SPEAKER pro tempore (Mr. Forbes). Is there objection to the reclassification of the gentleman from Massachusetts?

There was no objection.

Mr. MCGOVERN. Mr. Speaker, again, I urge all of my colleagues to vote for the amendment so that we can have an opportunity to vote on the Pelosi amendment. It is our responsibility as Members of Congress to ask tough questions, to demand answers, to do the oversight, to make sure that we are getting this right. We have not been doing that. This is an opportunity for us to demand that the administration give us answers.

Mr. Speaker, I yield back the balance of my time.

Mr. COLE of Oklahoma. Mr. Speaker, I yield myself the remaining time.

We have had an excellent and interesting discussion here this morning on the issue of Iraq, and we will continue to have those discussions undoubtedly as we move forward, but it doesn’t mean that we are going to stop. We are not going to stop.

In closing, Mr. Speaker, I want to again draw the attention of Members to the strength of this piece of legislation. Unfortunately, it was not discussed very much during the course of our exercises.

Mr. Speaker, H.R. 2863 takes many important steps forward in reforming the procurement and acquisition systems of the United States military, and increasing its end strength, and providing $45.3 billion in supplemental "bridge funding" for the war on terror.

Mr. Speaker, it must also be noted that this legislation would not have been possible without much hard work on the part of the gentleman from Florida (Chairman YOUNG), the gentleman from California (Mr. Lewis), and the members of the Subcommittee on Defense Appropriations and the members of the full committee. As evidenced by their hard work, this is a bipartisan bill that majority of the House will undoubtedly agree is a good product.

Mr. Speaker, no legislation is perfect, and, as I said in my opening statement, the defense appropriation bill takes important steps in an ongoing process that does not end; that is, the defense of our country. However frustrated some may be with particular aspects of H.R. 2863, it undoubtedly moves our military in the direction it needs to evolve and secure the security of our country and the well-being of our men and women in uniform.

Therefore, I, once again, urge my colleagues to support this rule and the underlying concurrent resolution.

Mr. Speaker, it must also be noted that the vast majority of our men and women in uniform have been lost, and another 12,000 have been injured. Close to 200 billion taxpayer dollars have been spent without a clear plan for success. And today, we are no closer to true success in Iraq than we were since the days of "Shock and Awe."

The Democratic Leader’s amendment is simple—it asks that this administration report to Congress within 30 days with their "Strategy for Success" in Iraq. The Pelosi amendment requires the President to explain how he can be sure that there are improvements in the military, border and police forces that can ensure the security of Iraq and that there is political stability in the country.

This amendment not about setting a hard date for withdrawal, or leaving Iraq before we finish what we started. This amendment, rather, simply ensures that Congress—and the American people—know what milestones and criteria by which our Nation will judge success in Iraq. Without such a guide, we will continue to be left with an open-ended military commitment for no clear sight.

Our men and women in uniform deserve nothing less than clear milestones that lead us to the day when we can bring them home. To get to that day, we need to know how we are

There will be prayers and religious services. Prayers for you, prayers for your loved one, prayers for peace, prayers for strength. Some will seek comfort in their faith, some will be interminably angry at God.

You never imagined signing a document called "Disposition of Remains" but there it is, your loved one’s name, in black and white. That name doesn’t belong there. It belongs on a letter with love from Iraq, it belongs on the coffin, soon to be handed to you, with the words “On behalf of a grateful nation.” Flags will arrive in the mail having flown over the state capitol or the nation’s capitol. They all mean the same thing—your loved one is never coming home and someone is very, very sad.

Maybe you never heard the phrase “Pain shared is divided”. We share your pain; we live and breathe your pain every single day. While you may have never imagined you would be a part of this group, please know that you are not alone—Karen Meredith, mother of I.F.T. Kenneth Ballard, KIA May 30, 2004.

Mr. Speaker, I yield back the balance of my time.

This amendment sets a hard date for withdrawal, or leaving Iraq before we finish what we started. This amendment, rather, simply ensures that Congress—and the American people—know what milestones and criteria by which our Nation will judge success in Iraq. Without such a guide, we will continue to be left with an open-ended military commitment for no clear sight.

Our men and women in uniform deserve nothing less than clear milestones that lead us to the day when we can bring them home. To get to that day, we need to know how we are
Mr. PAUL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on the further consideration of H.R. 2862, and that I may include tabular material on the same.

Mr. WOLF. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on the further consideration of H.R. 2862, and that I may include tabular material on the same.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this question will be postponed.

The material previously referred to by Mr. McGovern is as follows:

PREVIOUS QUESTION ON H. RES. 315—RULE FOR H.R. 2863 FT'06 DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2006

At the end of the resolution, add the following new sections:

SEC. 2. Notwithstanding any other provision of this resolution, the amendment printed in section 3 shall be in order without intervention of any point of order and before any other amendment if offered by Representative Pelosi of California or a designee. The amendment is not subject to amendment except for pro forma amendments or to a demand for a division of the question in the committee of the whole or in the House.

SEC. 3. The amendment referred to in section 2 above is amended as follows:

AMENDMENT TO H.R. 2863 AS REPORTED OFFERED BY MS. PELOSI OF CALIFORNIA (Defense Appropriations, 2006)

At the end of title VIII (page 108, after line 7), insert the following:

(a) Not later than 30 days after the date of the enactment of this Act, the President shall transmit to the Speaker and minority leader of the House of Representatives and the majority leader and minority leader of the Senate a report on a strategy for success in Iraq that identifies criteria to be used by the Government of the United States to determine when it is appropriate to begin a withdrawal of United States Armed Forces from Iraq.

(b) The report shall include a detailed description of the following:

(1) The criteria for assessing the capabilities and readiness of Iraqi security forces, goals for achieving appropriate capability and readiness levels for such forces, as well as for recruiting, training, and equipping such forces, and the milestones and timetable for achieving such goals.

(2) The estimated total number of Iraqi personnel trained at the levels identified in paragraph (1) that are needed for Iraqi security forces to perform duties currently being undertaken by United States and coalition forces, including defending Iraq's borders and providing adequate levels of law and order throughout Iraq.

(3) The number of United States and coalition advisors needed to support Iraqi security forces and associated ministries.

(4) The measures of political stability for Iraq, including the important political milestones to be achieved over the next several years.

(c) The report shall be transmitted in unclassified form but may contain a classified annex.

Mr. COLE of Oklahoma. Mr. Speaker, I yield back the balance of my time.

The CHAIRMAN. The Clerk will desire the amendment.

Mr. PAUL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Mr. PAUL. Mr. Chairman, I offer an amendment.

The SPEAKER pro tempore. The text of the amendment is as follows:

GENERAL LEAVE

Mr. WOLF. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on the further consideration of H.R. 2862, and that I may include tabular material on the same.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

SCIENCE, STATE, JUSTICE, COMMERCE, AND RELATED AGENCIES APPROPRIATIONS ACT, 2006

The SPEAKER pro tempore. Pursuant to House Resolution 314 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2862.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2862) making appropriations for Science, the Departments of State, Justice, and Commerce, and related agencies for the fiscal year ending September 30, 2006, and for other purposes, with Mr. HASTINGS of Washington in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Wednesday, June 15, 2005, the amendment by the gentleman from Vermont (Mr. SANDERS) had been disposed of, and the bill had been read through page 108, line 7.

AMENDMENT NO. 11 OFFERED BY MR. PAUL

Mr. PAUL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Pursuant to the order of the House of June 14, the gentleman from Texas (Mr. PAUL) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Texas (Mr. PAUL).

Mr. PAUL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the amendment I have is very simple, and it tells us exactly what it does, so I am just going to read it. It says, "None of the funds made available in this Act may be used to pay any United States contribution to the United Nations or any affiliated agency of the United Nations."

So, very simply, a vote for my amendment would be a vote to defund the United Nations, and it would be a policy statement, obviously. We have some debate already on the United Nations, and we will be having another debate either later today or tomorrow dealing with reform of the United Nations. Yesterday we had a vote dealing with removing half of the funding from the United Nations. This would be in the same direction, but it would remove all of the funding.

The United Nations has been under serious attack, and most Americans know there is a big problem with the United Nations. There is corruption involved with the oil-for-food scandal, as well as the abuse of human rights. There are a lot of people who believe that we can reform the United Nations and make it much more responsive to our principles. I do not happen to share that belief.

I have been a longtime opponent of the United Nations not so much because of the goals they seek, but because of their failure to reach these goals, as well as the attack on our national sovereignty. For me, it is a sovereignty issue, and that is the reason that I believe that it does not serve our interests to be in the United Nations, and we should make a statement for the many Americans who share that particular view.

But I would like to take a little bit of this time right now to relate my position on the United Nations with the bill that is coming up later today or tomorrow, and that is the reform bill. The reform bill is very controversial. We already have former Republican and Democrat ambassadors, Secretaries of State who are in opposition to this, and our own President has expressed opposition to that. It is not for the same reasons that I am opposed to that reform bill, but they are opposed to it because there is a threat of cutting some funding.

(3) The number of United States and coalition forces and associated ministries.
But in their attack on the reform bill, they do say they support the policy changes. That is what I would like to emphasize here. Most people see the reform bill as a mere threat to the United Nations to shape up, or we are going to lose our money. Their idea is that if we had a much more straightforward vote, because if you, also, believe in true reform, all those supporters of the reform bill should have supported the Hayworth amendment and not half of the time they did not. But the reform bill says that, well, if you do certain things, we are going to give you your money. Of course, those who really like the U.N. find that offensive and think that is too intrusive on the functioning of the United Nations.

But I, quite frankly, do not believe that if the U.N. reform bill gets anywhere, that there is any way, since the President of the United States has already recommended holding back funding until reform is passed, that individuals are opposed to it, that any funds will ever be cut. But I do believe a bill could get passed, and, that bill, also changes policy, which I think that too many of my conservative colleagues would think that it would change the policy of the United Nations to become involved. Today it is currently understood that if there is an invasion of one country by another, the United Nations is called upon and they assume responsibility, and then they can put in troops to do whatever they think is necessary. But if this new policy is adopted, it will literally institutionalize the policy that was used by our own government to go into Iraq, and that is preemptive war, preemptive strikes, to go in and either support an insurgency, or in order to get rid of a regime, or vice versa. This is a significant change and an expansion of U.N. authority. I, quite frankly, think that this is a move in the wrong direction.

Also, the Peacebuilding Commission, I think, is very risky, and also something that we should look at.

So I urge my colleagues to vote for my resolution to defund the United Nations, I urge my colleagues to look very cautiously at the U.N. reform bill, because there is a lot more in there than one might think. The one thing we do not need is John Bolton and Paul Wolfowitz, the authors of our policy for regime change in Iraq, in charge of the same policy in the U.N.

Mr. WOLF. Mr. Chairman, I rise in opposition to the gentleman’s amendment, and I yield myself such time as I may consume.

Mr. Chairman, this amendment amounts to a complete rejection of the United States’ engagement with the United Nations and many other nations of the world.

Last year this bill created a high-level task force to review the efforts of the United Nations. This task force was chaired by Speaker of the House Newt Gingrich, and former Majority Leader Senator Mitchell, and the task force came out with its recommendations yesterday. They are fairly dramatic, which will mandate, if you will, and force the United Nations to make dramatic change. Hopefully the Bush administration will embrace the Gingrich-Mitchell recommendations that will then be adopted by the United Nations when they meet in September.

As the chairman knows, we initiated this task force because of the U.N.’s lack of involvement on the Darfur, Sudan, issue, the sexual exploitation of young girls by U.N. peacekeepers, and the oil-for-food scandal. If we were not participating at all, we would not be able to put pressure on the U.N. to do the right thing with regard to Darfur. Genocide is taking place in Darfur as we now speak. Also, the U.N. will be sending peacekeepers to the North-South Sudanese peacekeeping agreements, and, as my colleagues know, better than 2.1 million people, mainly Christian, some Muslim, died at the hands of the Khartoum government as a result of their activities for the North. Also, Sudan is involved in terrorist activities, and we need to be able to put pressure on the Sudanese.

Not speaking boldly in an effort to force the U.N. to do something on this issue, the genocide in Darfur, and also to be able to implement and monitor, not with America, but with America; because, U.N. peacekeepers in Sudan, would be a mistake.

As the gentleman knows, we already have cut the administration request for international organizations by $310 million; therefore, essentially we are not recommending holding back any growth of the U.N. Lastly, as the gentleman from Texas says, the Hyde bill will be coming up shortly after this bill, and that is where you should address these issues.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The time of the gentleman from Texas (Mr. PAUL) has expired.

Mr. WOLF. Mr. Chairman, I yield the balance of my time to the gentleman from West Virginia (Mr. MOLLOHAN).

Mr. MOLLOHAN. How much time remains, Mr. Chairman?

The CHAIRMAN. The gentleman has 3 minutes remaining.

Mr. MOLLOHAN. Mr. Chairman, I yield myself such time as I may consume.

I rise in joining the chairman in opposition to this amendment, and I hope the same majority of our colleagues reject this amendment this year as did last year. I would note that this is the same or an extremely similar amendment that the gentleman from Texas (Mr. PAUL) introduced last year and was defeated by a 83-355 vote majority.

I hope that the body takes the same position with regard to this amendment this year as it did last. At a time when the United States is involved in a war against global terrorism, at a time when the international economic community is becoming increasingly integrated and the world is becoming increasingly smaller and we are increasingly bumping up against our friends and adversaries around the world, this is no time to do away with the organization.

However imperfect it may be, that brings together all of those divergent political interests, all those divergent countries, all those divergent political philosophies that represent people around the world and bring people closer to us so that we can debate them, so that we can fight them in the context of a civilized body, rather than going out and fighting them in wars. That is what the U.N., at its best represents. That is what we ought to be aspiring to, that is, perfecting the U.N., making it better, dealing with its imperfections instead of doing away with it.

We are lucky to have the U.N. in that sense. We are also fortunate to be a powerful enough country to influence the U.N. for the better because of the size of our contribution. If we were to withdraw our contribution, there is no doubt that that whole process would unravel. That would be a tragedy for all the above reasons. Mr. Chairman, I oppose the gentleman’s amendment and urge my colleagues to oppose it as well.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. PAUL).

The question was taken; and the amendment was agreed to, and the amendment offered by the gentleman from Texas (Mr. PAUL), was agreed to, and amendments Nos. 5, 6, rule XVIII, further proceedings on the amendment, was agreed to.

Mr. MOLLOHAN. The amendment No. 4 offered by Mr. HEPFLEY.

Mr. HEPFLEY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Pursuant to clause 6, rule XVIII, further proceedings on the amendment offered by the gentleman from Texas (Mr. PAUL) will be postponed.

AMENDMENT NO. 4 OFFERED BY MR. HEPFLEY.

Mr. HEPFLEY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 4 offered by Mr. HEPFLEY: At the end of the bill (before the short title), insert the following:

June 16, 2005 CONGRESSIONAL RECORD — HOUSE H4581
The budget resolution passed by the Congress has imposed upon us a very restrictive spending climate. This amendment constitutes attempts to reopen the decisions we already made in the budget resolution. The bill we are considering today may be within the competing national priorities. A number of accounts in the bill are funded very close to the bone and a reduction of 1 percent in these accounts would have a dramatic effect on the FBI, DEA, ATF, Marshals Service. And for those reasons, respecting what the gentleman is trying to do, I would ask for a "no" vote on that amendment.

Mr. Chairman, I yield the balance of time to the gentleman from West Virginia (Mr. Mollohan).

Mr. Mollohan. Mr. Chairman, the gentleman knows that I have the greatest respect for him and for all the tremendous work that he does in this body. But I must rise and oppose this across-the-board cut. First of all, I object across-the-board cuts generally because they are indiscriminate. Anybody who supports across-the-board cuts has to admit that the cuts are bound to affect some good programs, even in their judgment, as well as adversely affect programs that the author of the amendment appreciates. Having said that, I hope that the body judges this amendment in the same way it has in past years and on other bills and expresses its concern for the offering of across-the-board cuts generally. But having said that, I think that if the gentleman is not successful, if he does not prevail on his amendment, he should feel good for the same reasons I feel bad about this bill, and that is that it represents a huge number of cuts much greater than 1 percent on programs that I consider to be extremely worthy and that I would hope the chairman of the sub and full committees, as well as ranking, would consider the same.

NACA is increased by 2 percent, the Justice Department by 4 percent, and the FBI by 10 percent. That is the good news. Federal law enforcement programs have increased. Almost everything else in the bill has decreased a lot more than 1 percent. State and local law enforcement experienced a 22 percent reduction. The COPS program, a 13 percent reduction. Juvenile justice programs, a 12 percent reduction. The Commerce Department, a 12 percent reduction. And the State Department is receiving 11 percent less than the current level, in addition to international organizations receiving 10 percent less.

The gentleman ought to be pleased with the reductions in most of this bill, and surely he would not oppose the increases to the FBI and the Justice Department and hopefully not NASA.

This bill has taken its fair share of cuts. It has experienced the pain that has been imposed upon domestic discretionary programs generally, by the budget resolution; and I will note an inordinant number of amendments being offered by the majority here in the last 3 days have been trying to increase the author of each amendment's favorite domestic discretionary program.

But you add them all up and the majority has offered a lot of amendments increasing domestic discretionary spending. For those who have done that, I suggest that you look at the budget resolution the next time around, understand the relationship, the real relationship between a vote for the budget resolution and a squeeze on domestic discretionary programs as I have just described in response to the gentleman from Colorado's (Mr. Hefley) amendment.

For all those reasons, Mr. Chairman, I rise in opposition to the Hefley amendment and hope that my colleagues will turn it down.

Mr. Hefley. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado (Mr. Hefley).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. Hefley. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Colorado (Mr. Hefley) will be postponed.

For what purpose does the gentleman from Massachusetts (Mr. Markey) rise?

Mr. Wolf. Mr. Chairman, I move to strike the last word.

Mr. Chairman, if the next is the amendment that I think the gentleman is offering, I was going to say I accept it. I understand the gentleman from Massachusetts (Mr. Markey) wants to speak on it. I have brief, for a brief moment. But I wanted to be on record as being for it, and so I did not want to have my absence for 5 minutes look like I was avoiding an issue. I think this is the torture amendment.

Mr. Markey. Mr. Chairman, if the next is the amendment that I think the gentleman is offering, I was going to say I accept it. I understand the gentleman from Massachusetts (Mr. Markey) wants to speak on it. I have been upstairs briefly for a brief moment. But I wanted to be on record as being for it, and so I did not want to have my absence for 5 minutes look like I was avoiding an issue. I think this is the torture amendment.

Mr. Chairman, if the next is the amendment that I think the gentleman is offering, I was going to say I accept it. I understand the gentleman from Massachusetts (Mr. Markey) wants to speak on it. I have been upstairs briefly for a brief moment. But I wanted to be on record as being for it, and so I did not want to have my absence for 5 minutes look like I was avoiding an issue. I think this is the torture amendment.

Mr. Markey. Mr. Chairman, I offer the amendment. The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows: Amendment offered by Mr. Markey: At the end of the bill (before the short title), insert the following:

TITLE VIII—ADDITIONAL GENERAL PROVISIONS

SEC. 801. None of the funds made available in this Act may be used in contravention of the following laws and resolutions promulgated to implement the United Nations Convention Against Torture and Other
Cruel, Inhuman or Degrading Treatment or Punishment (done at New York on December 10, 1948):
(1) Section 2340A of title 18, United States Code.

The CHAIRMAN. Pursuant to the order of the House of June 14, the gentleman from Massachusetts (Mr. MARKEY) and a Member opposed each will control 7½ minutes.

The Chair recognizes the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Chairman, I yield myself 1 minute. And in that 1 minute, I will say that I appreciate very much the statement by the gentleman from Virginia (Mr. Wolf). Even when he is not physically present, he has a huge spiritual presence in this Chamber when it comes to the issue of human rights and torture, and I appreciate his willingness to support this amendment.

The amendment, quite simply, says that the United States, because of our support for the Convention against Torture, because of our support for the Geneva Convention, cannot condone the United States, after we have prisoners in our possession, sending those prisoners to other countries in the world that do not abide by the Convention on torture, that do not abide by the Geneva Convention.

So this amendment will make it unambiguously clear that that is a responsibility that the United States takes very seriously, and notwithstanding what goes on at Guantanamo, that when the United States has possession of a prisoner that we will not outsource torture, that we will not actually put these prisoners on planes and send them to countries which we know do engage in torture.

Mr. Chairman, I reserve the balance of my time.

The ACTING CHAIRMAN (Mr. Gillmor). Is there any Member seeking time in opposition to the amendment? If not, the gentleman from Massachusetts (Mr. MARKEY) for this useful effort.

Ms. McCollum of Minnesota. Mr. Chairman, torture is a crime. It is an international crime, and it is a violation of U.S. law. The state-sponsored exportation or outsourcing of torture called "extraordinary rendition" is repugnant and it is immoral. Outsourcing torture threatens America's security. It destroys our Nation's moral authority in the world, and it is the height of hypocrisy.

The fact that this country, through the Bush administration, has been sending detainees, including innocent individuals, to countries like Syria to be tortured and abused is a stain on America's reputation, and it is a shameful rejection of our national values.

Extraordinary rendition is indefensible. It is legally and morally to be condemned by this Congress.

I am pleased that it is to be incorporated into this bill. I strongly urge the Members of Congress to watch this issue carefully. Those of us who value human rights want to end the use of our tax dollars to fund the outsourcing of torture. And I am very pleased that this has been included in the bill.

Mr. MARKEY. Mr. Chairman, I yield 2 minutes to the gentlewoman from California (Ms. Harman).

Ms. Harman and was given permission to revise and extend her remarks.

Ms. Harman. Mr. Chairman, I thank the gentleman for yielding to me and rise to applaud the fact that this amendment will clearly be accepted as no one is speaking against it. This amendment has already passed the House and is part of the appropriations bill by a vote of 420 to 2, and a modified version of it was signed by the President.

This amendment states a policy we can all endorse. It does not expand existing law. Existing federal law makes it illegal and it is also a violation of international law to torture people. And existing law also bans cruel, inhuman, and degrading treatment of detainees.

I want to say to the gentleman from Massachusetts (Mr. Markey) that, as the ranking member on the Intelligence Committee, I have followed his work on this closely. I am pleased that he has raised this subject, that the entire House has heard him and agrees with him.

Mr. Smith of New Jersey. Mr. Chairman, I rise in strong support of this amendment. If we look at it clearly, it is only an affirmation of current law, but I think in the environment in which we are operating, with some of the revelations that are coming out about America's policy with regard to the treatment of incarcerated persons, it is really important to affirm current law.

We are identifying and pointing out and prosecuting very low-level people in the military with regard to certain transgressions, and I think it is part of the important work of the whole chain of command, right up to the very top, that our laws with regard to incarceration are to be obeyed.

The amendment, quite simply, says that the United States, because of our support for the Convention against Torture, because of our support for the Geneva Convention, cannot condone the United States, after we have prisoners in our possession, sending those prisoners to other countries in the world that do not abide by the Convention on torture, that do not abide by the Geneva Convention.

We are identifying and pointing out and prosecuting very low-level people in the military with regard to certain transgressions, and I think it is part of the important work of the whole chain of command, right up to the very top, that our laws with regard to incarceration are to be obeyed.
Mr. MARKEY. Mr. Chairman, I yield 1 minute to the gentlewoman from California (Ms. WOOLSEY).

Ms. WOOLSEY. Mr. Chairman, America’s treatment of prisoners over the last several years speaks poorly, and that is an understatement, to our national integrity.

Since 9/11, prisoners have been tortured in Iraq, Afghanistan, Guantánamo Bay, and considering the widespread use of torture, no one can claim that these are isolated incidents, that it is merely the work of a few bad apples.

At a time when the United States is courting the support of the international world, particularly the Arab world, the torture of foreign prisoners gives the world’s extremists and Iraqi insurgents what they believe to be a reason to hate the United States. There has been no better recruiting tool for al Qaeda than our attacking Iraq in the first place and the events at Abu Ghraib in the second place.

Mr. Chairman, there is a better way to conduct foreign policy. I urge all of my colleagues to support the Markey amendment and to end the use of torture by the United States.

Mr. CHAIRMAN. Mr. Chairman, I yield myself the remaining time.

I urge the House to embrace this amendment unanimously. It is wrong for the political, military and moral leader of the world to be taking prisoners which we have captured, putting them on planes, blinding them, drugging them and sending them to Syria, sending them to Uzbekistan, with the sure and certain knowledge that those prisoners are going to be tortured by countries that have already been condemned by the United States for those practices. That is wrong. It undermines our position in the world. It gives al Qaeda more ammunition to put up on Al Jazeera that we are supporting torture.

In Uzbekistan, hundreds of protesters were recently killed under the corrupt regime of President Karimov in what human rights groups are calling a massacre.

Last year former Secretary of State Colin Powell refused to certify that Uzbekistan had met its human rights treaty obligations. Because the State Department found that Uzbekistan used the following interrogation techniques:—"suffocation, electric shock, rape, beatings, and boiling prisoners to death." The amendment I am offering today prohibiting the use of diplomatic assurances as the basis for renditions, does not support or condone torture, or renounce our moral leadership.

Vote "aye" on this very important amendment.

The amendment I am offering today simply reaffirms the U.S. commitment to the Convention Against Torture by prohibiting the use of funds in contravention of laws and regulations promulgated to implement the Convention Against Torture. The U.S. signed this treaty under President Reagan, and the Senate ratified it in 1994.

The House voted overwhelmingly to approve a similar amendment that I offered to the Emergency Supplemental Appropriations bill on March 16, 2005 by a vote of 420 to 2. That amendment, however, only applied to funds appropriated in the Emergency Supplemental. The amendment I am offering today would apply to all funds appropriated for fiscal year 2005 to the Departments of State and Justice.

I am offering this amendment today because despite our commitments under this treaty and the statements made by the Administration emphasizing that the U.S. is emphatically and unambiguously against the use of torture, reports keep growing of the U.S. sending detainees to countries where they are likely to face torture, including to countries notorious for human rights violations. This practice, known as "Extraordinary Rendition," amounts to nothing more than Outsourcing Torture.

In order to meet its obligations under the Convention Against Torture, the Administration has been engaging in a piece of legalistic fiction. It has created a system of "diplomatic assurances" that any transferred detainee will not be tortured, and then based on these assurances it argues that our obligation under the Convention Against Torture has been satisfied because there is no longer a substantial likelihood that the person we are sending to one of these known torturing countries will, in fact, be tortured.

This is a sham. If Uzbekistan, a country that has actually boiled prisoners to death says we cannot trust, says they won't torture—can we believe them?

Syria has broken off all relations with U.S. military and CIA. What does this mean for the "diplomatic assurances" we received from Syria?

Here is what the State Department’s annual human rights report says about Syria’s methods of interrogation:

administering electrical shocks, pulling out fingernails, forcing objects into the rectum.

In Uzbekistan, hundreds of protesters were recently killed under the corrupt regime of President Karimov. What human rights groups are calling a massacre.

Last year former Secretary of State Colin Powell refused to certify that Uzbekistan had met its human rights treaty obligations. Because the State Department found that Uzbekistan used the following interrogation techniques:—"suffocation, electric shock, rape, beatings, and boiling prisoners to death.

The amendment I am offering today prohibits the use of any funds included in this bill to the contravention of our legal obligations under the Convention Against Torture, U.S. Law, and regulation. While I would have liked to include language barring the use of diplomatic assurances as the basis for renditions, I have not done so today, out of recognition that such an amendment would go beyond the scope of this bill and constitute new legislation. But what we can do today is take another step by having the U.S. Congress reaffirm that it does not support or condone torture, or rendition to countries likely to torture an individual.

Throughout United States history we have encountered and defeated brutal enemies, inhumane and monstrous dictators and met with hideous violence. We take pride that even as our Nation emerged from the Nazi and the Japanese Empire during World War II, that we did not ask our “Greatest Generation” to engage in torture or other war crimes.

The legacy of the U.S. then, and now, is that we uphold our commitment to justice in the face of shadows of terror and war. The test of a nation’s moral character is how it wages war as how it promotes the values of peace and democracy. That is what we must do today.

I urge you to vote "yes" on this amendment, and say "no" to torture.

Mr. TANCREDO. Mr. Chairman, I yield myself such time as I may consume.

Dozens of American cities, major cities, have policies that tie the hands of police officers to cooperate with immigration enforcement agents. The cities include Houston, Los Angeles, Chicago, San Francisco, Denver, Boston, Portland, and Seattle.

Cities that have such policies extend to their jails as well. Often jails do not identify or report illegal aliens to ICE. In our case, for example, Denver jail is not doing so. This means that ICE can’t remove these illegal aliens that have been incarcerated, so they are released back into the community after serving a sentence for a minor crime. These policies, I have pointed out in the past, violate Federal law.

It is especially galling, however, that local governments who have these illegal policies and practices do not hesitate to seek and receive Federal reimbursement for the costs of incarcerating illegal aliens, aliens they refuse to turn over to ICE for deportation. They take the money and then turn the folks loose.

In 2004, the Federal State Criminal Alien Assistance program, or SCAAP, gave awards totaling $300 million to States and counties in reimbursements for housing illegal aliens. Yesterday, or the day before, we added another $50 million to the amount that was being appropriated for that purpose, and I voted for the amendment.
In Los Angeles in 2003, over 30,000 criminal aliens were released from the county jail and not deported.

In Denver in 2004, the city-county jail asked for reimbursement for over 1,900 illegal aliens, but only turned over the names of 175 to Immigration Customs Enforcement.

It is amazing that Denver alone sent the Federal Government a bill for over 1,900 people they have incarcerated for committing other kinds of crimes, besides the fact they are here illegally; yet, when it came to turning those names over to ICE, they refused to do so, or turned over only 175, again as a result, I think, to a large extent, of these things we call sanctuary policy.

Why should Denver or Los Angeles be asking for Federal taxpayer dollars to reimburse their costs of housing illegal aliens but then refuse to turn those names over to ICE for deportation?

There are real human consequences to these things we call sanctuary policies. From 1995 to 1999, the INS released over 35,000 criminals who were not deported. Over 11,000 of them, almost 30 percent, went on to commit other crimes, and 2,000 committed violent crimes.

In Denver last month, on Mother's Day, a police officer was shot and killed and a second officer critically wounded by an illegal alien who has now been arrested in Mexico. He had been stopped twice by the Denver police for a traffic offense and had appeared in municipal court twice. In April, less than 1 month before the shooting, this man was in court with a Mexican driver's license; yet no one asked him about his immigration status because of Denver's sanctuary policy.

In July of 2004, a young man was riding his motorcycle in north Denver. He was struck and killed by a hit-and-run driver. The driver has been arrested and is in jail awaiting trial. He is an illegal alien. The driver has been arrested and is in jail awaiting trial. He is an illegal alien. The driver has been arrested and is in jail awaiting trial. He is an illegal alien. The driver has been arrested and is in jail awaiting trial. He is an illegal alien.

Mr. Chairman, the gentleman probably does not intend his amendment and amendment to be this, but I am afraid he is burgeoning on local police force bashing here.

He makes statements like, they take the money and let the aliens go. Well, in fact, by the gentleman's own statistics, the law enforcement amendment does turn over illegal aliens at some percentage of those that they arrest and identify, and I assume that they turn over a very large percentage of those that they identify. I have not looked closely at that question, but in any regard, we are participating in this process with the Federal Government of identifying and turning over some illegal aliens.

I would suggest to the gentleman that local law enforcement, first of all, are not trained to do this mission. We have a Federal police force. We have Federal agents that are trained to perform this mission.

Local law enforcement have a little different mission. They are in the business of trying to maintain stability in neighborhoods, and are particularly trained in identifying criminals in neighborhoods, which is a full-time job. While this is not my constituency, I can imagine in talking to my colleagues who do represent constituencies that have sizeable numbers of newly arrived immigrants, that it is a particularly difficult job to operate in those communities effectively if the policemen are seen as reporters on or, if you will, tattle-tales on the people who live in that community.

Mr. Chairman, I reserve the balance of my time.

Mr. MOLLOHAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the gentleman probably does not intend his amendment and amendment to be this, but I am afraid he is burgeoning on local police force bashing here.

He makes statements like, they take the money and let the aliens go. Well, in fact, by the gentleman's own statistics, the law enforcement amendment does turn over illegal aliens at some percentage of those that they arrest and identify, and I assume that they turn over a very large percentage of those that they identify. I have not looked closely at that question, but in any regard, we are participating in this process with the Federal Government of identifying and turning over some illegal aliens.

While this is not my constituency, I can imagine in talking to my colleagues who do represent constituencies that have sizeable numbers of newly arrived immigrants, that it is a particularly difficult job to operate in those communities effectively if the policemen are seen as reporters on or, if you will, tattle-tales on the people who live in that community.

Mr. Chairman, I reserve the balance of my time.

The Acting CHAIRMAN (Mr. GILLMOR). The time of the gentleman from Colorado (Mr. TUCREDO) has expired. Does the gentleman from West Virginia (Mr. SERRANO) wish to ask a question?

Mr. MOLLOHAN. Mr. Chairman, I yield the balance of my time to the distinguished gentleman from New York (Mr. SERRANO).

Mr. SERRANO. Mr. Chairman, I rise in strong opposition to the amendment. The gentleman's position would be amusing if its implications were not so serious. On one hand, we are providing SCAAP funding to help our States and localities incarcerate criminal aliens that pose a danger to our communities; yet, on the other hand, the gentleman's amendment would make it harder for our State and local law enforcement agencies to catch criminals in the first place.

Many law enforcement agencies have carefully built a relationship of trust with their immigrant communities over the years. If we were to damage this trust by confusing a State's law enforcement roles with Federal immigration enforcement roles, we would be hampering the ability of our police departments to perform their primary function: protecting communities from crime.

That is why police departments in our districts do not want this amendment. The amendment would have a chilling effect on immigrants' willingness to report crimes and cooperate with government overall, because immigrants are less likely to come forward with tips or to testify as witnesses if doing so could lead to deportation or other adverse consequences.

The effects of the amendment would be devastating. Law enforcement agencies, whether performing counterterrorism or other public safety functions, must rely on cooperation from immigrants to be effective. Furthermore, the harm of this amendment would extend beyond law enforcement. Public health could be
harm if, out of fear of being reported to the INS, immigrants were reluctant to make use of State and local services.

For instance, I imagine many communities throughout the Nation consider it in the best interest of all of its residents, documented or not, to ensure that every child has a vaccine shot for their children from city hospitals. If an undocumented person were presented a choice between deportation and risking illness, I am sure that person would make a choice that is not in the best interest of the community.

In closing, please understand law enforcement gets information and wants information from the immigrant community. If they now become Federal immigration officers, that information will not be forthcoming.

The Acting CHAIRMAN. All time for debate has expired. The question is on the amendment offered by the gentleman from Colorado (Mr. TANCREDO).

The question was taken; and the Acting Chairman announced that the noes appeared to have it.

Mr. TANCREDO. Mr. Chairman, I demand a recorded vote.

The Acting CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Colorado (Mr. TANCREDO) will be postponed.

AMENDMENT NO. 2 OFFERED BY MR. CLEAVER

Mr. CLEAVER. Mr. Chairman, I offer an amendment.

The Acting CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Title VIII—Additional General Provisions

Sec. 801. None of the funds made available by this Act may be used to process or approve a competition under Office of Management and Budget Circular A-76 for services provided by the National Logistics Support Center of the National Oceanic and Atmospheric Administration in Kansas City, Missouri.

The Acting CHAIRMAN. Pursuant to the order of the House of June 14, the gentleman from Missouri (Mr. CLEAVER) and a Member opposed each will control 7½ minutes.

The Chair recognizes the gentleman from Missouri (Mr. CLEAVER).

Mr. CLEAVER. Mr. Chairman, I yield myself such time as I may consume.

Mr. CLEAVER asked and was given permission to revise and extend his remarks.

Mr. CLEAVER. Mr. Chairman, let me begin by thanking the gentlemen from Virginia and West Virginia. They have both been very easy to work with.

Mr. Chairman, the amendment I am offering with my good friend and colleague, the gentleman from Missouri (Mr. SKELTON), is a very simple amendment. It would simply prohibit any funds appropriated under the bill from being used to carry out an A-76 privatization review of 25 employees at the National Oceanic and Atmospheric Ad-

ministration’s National Logistics Supply Center, known as the NLSC, in Kansas City, Missouri.

Our amendment does not require Members to vote on the A-76 issue overall; rather, it simply asks that our colleague from Virginia against this particular A-76 review. The NLSC’s A-76 was begun in order to achieve a quota established by OMB that Congress subsequently prohibited. That fact was outlined in a June 2002 NOAA memorandum in which the NLSC was told to use the NLSC every day to sell its services to agencies. It has been the recipient of multiple service awards, and it has reduced its response time to 2 days and raised its accuracy rates to 99 percent.

Finally, let me just say that the trouble that I have with this, that I hope every Member of Congress will have, is that we have spent over $1 million hiring consultants to study 25 employees. That turns out to be $41,000 per employee, more than many of them earn.

In April of this year, I, along with the gentleman from Missouri (Mr. SKELTON), Senators BOXER and TALENT, wrote the Department of Commerce urging Secretary Gutierrez to bring this privatization review to an end. However, despite this bipartisan support and the clear reasons for stopping this review, the Department of Commerce moved ahead.

Let me be clear, Mr. Chairman. This amendment does not address even slightly the overall issue of contracting out Federal jobs. Mr. Chairman, I reserve the balance of my time.

Mr. WOLF. Mr. Chairman, I claim time in opposition to the gentleman’s amendment, and I yield myself such time as I may consume.

I rise in opposition to the gentleman’s amendment to prohibit funds for a competitive sourcing study. We had asked the gentleman to consider withdrawing the amendment. We would have a better time, the Weather Bureau and really do everything we could. But for the Congress to interfere and do something like this, would be unprecedented.

I understand that NOAA first announced this particular cost competition in 2003. NOAA recently canceled the competition to ensure that the statement of work is comprehensive and plans to reannounce the study shortly. These competitions are conducted pursuant to the Competitive Sourcing Initiative in the President’s Management Agenda, and NOAA supports the competition.

Though I understand the gentleman’s concerns and have no preconceived notion as to the outcome of the study, I believe we cannot have the Congress on every A-76 proposal coming down and stopping it.

The gentleman from Virginia is here, the chairman of the committee.

Mr. Chairman, I yield such time as he may consume to the gentleman from Virginia (Mr. TANCREDO).

Mr. TANCREDO. Mr. Chairman, I too understand the gentleman’s concern on particular employees. The difficulty here is if the Congress starts coming out with each and every single group trying to protect this group or the other from competitive sourcing, we lose basically one of the best tools the executive branch has to make it run more efficiently.

Federal employees win 70 percent of the A-76 competitions at this point. But, Mr. Chairman, I would also join the gentleman from Virginia (Mr. WOLF) in opposing this amendment, and urge my colleagues to do likewise. Mr. WOLF. Mr. Chairman, I yield myself such time as I may consume just to say again, for the Congress to be voting on each and every procurement issue like this, it would just never end. So I reluctantly oppose the amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. CLEAVER. Mr. Chairman, I ask how much time remains.

The CHAIRMAN. The gentleman from Missouri (Mr. CLEAVER) has 5 minutes remaining.

Mr. CLEAVER. Mr. Chairman, I yield 1 minute to the gentleman from West Virginia (Mr. MOLLOHAN).

Mr. MOLLOHAN. Mr. Chairman, I rise in strong support of the amendment; and I certainly understand the reasons for the opposition of the chairman, the gentleman from Virginia (Mr. WOLF), and the gentleman from Virginia (Mr. TOM DAVIS) as well. If every one of these studies were challenged in this way, then it would be a lot of activity on every A-76 privatization review in the United States Congress.

But not every one is, and those that are particularly egregious, I think,
need to be brought to the floor. The gentleman from Missouri has done that today, and I compliment him for that. The gentleman from Missouri (Mr. CLEAVER) makes the case that is being made by his constituents in Missouri, in addition to the Members from the other side of the Capitol, who are also supportive of his position.

Just understand that the National Logistics Support Center is a particularly fine organization, and this review is being undertaken for only one reason: management has been ordered to hit a particular numerical privatization number. That is it. That is how arbitrary it is. It has nothing to do with the organization itself. This organization has won tremendous awards. It does not merit privatization, and I think it would be inefficient to do so.

Mr. Chairman, I thank the gentleman for allowing me to rise in support of his amendment.

Mr. WOLF. Mr. Chairman, I yield the balance of my time to the gentleman from Virginia (Mr. TOM DAVIS).

Mr. TOM DAVIS of Virginia. Mr. Chairman, just a couple of things. First of all, to my friends here, I understand their concern. I tell them that I do not know anything about this particular office. But it is not privatization; it is competitive sourcing. Basically, this allows the government sector to compete with the private sector to see how we can deliver a service to taxpayers the most efficiently.

The government wins 70 percent of these competitions, but in most cases ends up being more efficient as a result of that. They are able to retool their organizations and do things that, without the competition, the marketplace would probably not be incentivized to do.

Secondly, there are no numerical quotas or figures. In fact, Congress took several years ago when this administration set targeted figures in terms of the amounts of competitive sourcing they wanted to do under OMB Circular A-76. So that should not be part of this. It is not legal to be doing this, and I hope that is not driving it in this case.

But, again, for Congress to come back and cherrypick different segments and say, this is exempt, and this is exempt, basically destroys the whole system, in my view, and I am sympathetic with where the gentleman wants to go on this. I think there are other ways to accomplish it rather than coming to Congress. I think this will encourage everybody to offer these kinds of amendments, and we will lose one of the greatest tools we have toward government efficiency, and I would urge the amendment be defeated.

Mr. CLEAVER. Mr. Chairman, I yield 2 minutes to the gentleman from Missouri. Mr. SKEETON.

Mr. SKEETON. Mr. Chairman, if the gentleman from Virginia will yield for a colloquy, I fully understand, as the gentleman knows I am a co-sponsor of this amendment with the other gentleman from Missouri, and I think there are several good reasons for it and that the economics of the case would compel that this proceed and that the amendment be adopted. As I understand it, the chairman, and we also heard from the gentleman from Virginia (Mr. TOM DAVIS) a few moments ago, would be willing to work on this, because this is an exceptional situation. I think the gentleman from Virginia, the chairman, recognizes that.

What would the chairman be willing to do to see that this gets a fair shake? Because we have 25 employees out there that are doing such a magnificent job, I just hate to see them go down the drain when, truth in fact, it just should not happen.

□ 1245

If there was ever an amendment that ought to be adopted, but I understand the gentleman's position because you would have 15 dozen of these amendments coming up here every time this bill is brought up, but would you tell the gentleman from Missouri (Mr. CLEAVER) what you are willing to do.

Mr. WOLF. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from Virginia.

Mr. WOLF. Mr. Chairman, we would be glad to work with the gentleman from Virginia (Chairman Tom DAVIS), too. The chairman of the committee has jurisdiction. We could have a meeting, then we would bring the representative of the group out there, and we would try to make sure that this is done appropriately. We would do everything we possibly can.

This concern is if we did every one of these on the floor, and if we did one for the gentleman, there are probably 15 Members that would then come forward and say, Why did I not have an opportunity? I give my word, we would work in good faith.

Mr. TOM DAVIS of Virginia. Mr. Chairman, will the gentleman yield?

Mr. SKELTON. I yield to the gentleman from Virginia.

Mr. TOM DAVIS of Virginia. Mr. Chairman, I think the gentleman makes a strong case for this particular item. I would be happy to work with the gentleman as well in my position as chairman of the Committee on Government Reform to make sure that these employees are fully protected as we move forward on this and given the benefit of the doubt.

Mr. CLEAVER. Mr. Chairman, I ask unanimous consent to withdraw my amendment, and express appreciation to both gentlemen from Virginia, and look forward to working with them.

The CHAIRMAN. The amendment is withdrawn. There was no objection.

The text of the amendment is as follows:

Amendment No. 18 offered by Mr. TANCREDO
Page 108, after line 7, insert the following:

TITLE VIII—ADDITIONAL PROVISIONS
Sec. 801. None of the funds appropriated or otherwise made available in this Act may be used to include in any bilateral or multilateral trade agreement any provision that would—
(1) increase any limitation on the number of aliens authorized to enter the United States as a nonimmigrant, or to adjust to such status; or
(2) increase any limitation on the number of aliens authorized to enter the United States as an alien lawfully admitted for permanent residence, or to adjust to such status.

The CHAIRMAN. Pursuant to the order of the House of June 14, the gentleman from Colorado (Mr. TANCREDO) and the gentleman from California (Mr. THOMAS) each will control 5 minutes.

Mr. TANCREDO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, as a result of a peculiar event arising out of the inclusion of immigration provisions in the Singapore and Chile fast track trade bills of last year, I have decided to offer this amendment that would restrict the use of funds in the bill to include in any provision in any bilateral or multilateral trade agreements that would increase the number of aliens who would be admitted to the United States as an immigrant or nonimmigrant.

Mr. Chairman, I reserve the balance of my time.

Mr. THOMAS. Mr. Chairman, I yield myself 2 1/2 minutes.

Mr. Chairman, except for the provision of the limitation of funds which has become a gimmick to avoid the committees of jurisdiction, this particular piece of legislation would land right smack right in the middle of the Committee on Ways and Means in terms of international trade.

There are two reasons to oppose the amendment. The gentleman from Colorado (Mr. TANCREDO) indicated that he was concerned about content in the Singapore and Chile free trade agreements. Had he consulted the chairman of the committee of jurisdiction, he would have found out that we had entered into significant negotiations with the United States Trade Representative, and that they fully appreciate the fact that there will be no temporary provisions in any additional bilateral bills. They have expressly stated this in side letters accompanying various agreements. In addition, the United States Trade Representative has committed to the committee of jurisdiction that it will not deal with any issues related to temporary entry without extensive consultation with Congress and the appropriate committees. Second reason I oppose this amendment is because as we speak, the United States is attempting to negotiate the Doha Round, especially in the
area of market access for U.S. goods, services and agricultural products in emerging markets. The United States was principally responsible for making sure the Doha Round went forward.

A provision of the market access, or so-called GATT Mode 4, involves the discussion of negotiation over temporary movement of business personnel. If this amendment were to pass, we would be fundamentally and substantively undermining the United States in its attempts to negotiate agreements favorable to the United States in terms of market access.

The chairman of the Committee on Ways and Means would have appreciated knowing that this amendment was coming because of these two vital pieces of information: One, it is not necessary. We have taken steps to ensure it does not happen. And two, an expression of undermining the United States as it attempts to negotiate through the World Trade Organization fundamental agreements beneficial to the United States makes no sense whatever.

Mr. Chairman, I reserve the balance of my time.

Mr. TANCREDO. Mr. Chairman, I yield myself 30 seconds.

Of course, this amendment was printed in the CONGRESSIONAL RECORD 4 days ago. I assume that was an indication of our intent to offer it. I am pleased also to hear, as the chairman has indicated, that arrangements have been discussed about this, and there have been promises made that none of this kind of thing will come forward. Of course, if that is the case, this amendment should not provide a problem for anyone. We should simply make sure that we put in place the rule that Congress determines our immigration policy. We did not give that up with TPA.

Mr. Chairman, I reserve the balance of my time.

Mr. TANCREDO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, having to search through the CONGRESSIONAL RECORD to discover that someone is meddling in another committee's jurisdiction is probably not the best way to make sure that the United States passes laws that are in the interest of the United States.

Mr. Chairman, I yield 1 minute to the gentleman from West Virginia (Mr. MOLLOHAN). Mr. Chairman, I rise in strong opposition to the Tancredo amendment. Let me first say that I take a back seat to no one in being concerned about the effects of the internationalization of our economy, represents the steel industry and other basic industries that have been disadvantaged in this whole process terribly, and we have been concerned about the inadequacy of trade agreements as they do not protect these industries during the short term.

The first thing I want to say about the Tancredo amendment, is that this is a particularly bad vehicle to make the kind of decisions that this amendment is trying to make. This is an appropriations bill. This is for the Committee on Ways and Means, to do, and not to try to slip into an appropriations bill.

Second, this amendment addresses legal immigration. If there is anything we need to do, it is to be able to debate and discuss and compromise on how we deal with legal immigration, not to limit it on an appropriation bill.

Finally, Mr. Chairman, there are skills that we need in this country, and, we have to be very careful about how we might impact our ability to access those skills through this kind of a process.

Mr. TANCREDO. Mr. Chairman, I yield myself 30 seconds.

Mr. Chairman, the gentleman mentions the need to debate. I absolutely believe in the need to debate these issues, especially immigration issues. But when they get wrapped up into an organization function. That is not the purpose of my amendment, to ensure that debate stays in this Congress where it belongs, not in the negotiations between trading partners.

It is the unique responsibility of the Congress to establish immigration procedures. It is not something that we should cede over to our trade negotiators.

Mr. Chairman, I reserve the balance of my time.

Mr. THOMAS. Mr. Chairman, I yield myself 15 seconds.

Mr. Chairman, I just voted in committee on the question of a trade agreement with the Central America free trade region. It is extensively debated, it is discussed by the committees of jurisdiction, and the administration has to listen to what Congress has to say. It is entirely appropriate that it be done through the appropriate committees.

Mr. Chairman, I yield 1 minute to the gentleman from Florida (Mr. SHAW), the chairman of the Subcommittee on Trade.

Mr. SHAW. Mr. Chairman, this amendment does not just apply to these trade agreements. The amendment would prevent the use of the funds by State, Justice, Commerce and related agencies for any negotiations that would have the effect of increasing immigration.

The amendment is unnecessary. The United States Trade Representative, as we have already heard, has long recognized that trade agreements are not the appropriate forum to negotiate provisions regarding permanent immigration.

In addition, the U.S. Trade Representative has confirmed with the Committee on the Judiciary that it will refrain from negotiating any immigration provisions in any trade agreement negotiated since implementation of the Singapore and Chile agreements, including the agreement in the World Trade Organization.

This amendment would send a very negative signal to our trading partners about the United States' commitment to seeking liberalization in goods, agricultural services and the Doha Round. At a time when the services sector accounts for 8 out of 10 U.S. jobs and roughly 30 percent of U.S. exports, we have much to gain from these negotiations. Let us not tiptoe around those negotiating for the United States.

Mr. TANCREDO. Mr. Chairman, I yield myself 15 seconds.

Mr. Chairman, the fact is if there is an agreement made, and Members feel secure in the fact that there are never going to be any immigration provisions in a trade agreement, then no Member should be concerned about my amendment. We should allow it to pass in order to establish that as the will of Congress.

Mr. THOMAS. Mr. Chairman, I yield myself the balance of my time.

Mr. Chairman, I will repeat the second point I made. We are currently in delicate negotiations in the World Trade Organization, and one of the provisions is the question of temporary movement of legal aliens; not that it will be done, but that it is being discussed.

The gentleman's amendment will pull the rug out from under the United States. The amendment will have significant effects, and it should not pass.

Mr. TANCREDO. Mr. Chairman, I yield myself the balance of my time.

If it would have significant effect, then it even more sure we need to pass it, because, of course, we have to make sure that this is something that the Congress deals with, not trade representatives.

It happened last year when the trade agreements with Chile and Singapore came to the floor. A number of Democrats joined with me in expressing their concern about that. I remember particularly the gentlewoman from Texas (Ms. JACKSON-LEE) who came and was furious about the fact that these trade agreements included immigration provisions.

Well, I would respectfully request, just remember your words because they are true. It is an example of the fact that we do have something to fear that this amendment is being opposed to the extent it is by the chairman and others. The fact is if they are fearful of what this amendment might do, then we have to pass it.

I supported fast track authority for the President when it passed the House and have supported a number of trade agreements that have come before this body. It is not the issue of trade that we are debating here. It is also not the issue of whether or not service agreements should be dealt with, because service agreements, that is just a euphemism for immigration provisions that are identified mostly by certain categories that mean essentially guest worker provisions. We have that. It is in the law, and the number of people that will be allowed into this country for the purpose of providing services. That should be
something we decide. It should not be a part of these agreements.

They come to us after the discussions. Even in committees, they come to the floor, and Members know what happens; it is either we take it or leave it. We cannot amend it. That is the concern that we have.

Whether or not we agree with immigration caps, issues that should be debated openly and talked about openly are immigration, who has the responsibility for establishing immigration law? As I say, it is the Congress of the United States. It has nothing to do with people who are negotiating our trade arrangements. That is something that is important for us to understand. It is a peculiar aspect of these trade arrangements that, as I say, has only happened in the last few years. But I fear that the past is prologue, and that is exactly where we are going with these things. They will attempt to obfuscate, and it will not be all that clear that they are in there, but they will be in there in these service agreements, as the chairman has indicated.

Does that even raise a red flag with regard to immigration policy? But it most certainly is immigration policy.

It is imperative, therefore, that we simply establish our control over immigration policy. Enough authority has been handed over to our trade negotiators already. When we enter into bilateral and multilateral trade policies, we also, then, of course, enter into jurisdictional issues with regard to the WTO. I am not willing to turn over my responsibility as a Congressman to the WTO for trade or for immigration issues.

I ask for an “aye” vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado (Mr. TANCREDO).

The motion was taken; and the Chairman announced that the noes appeared to have it.

Mr. TANCREDO. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVII, further proceedings on the amendment offered by the gentleman from Colorado (Mr. TANCREDO) will be postponed.

AMENDMENT OFFERED BY MS. JACKSON-LEE OF TEXAS

Ms. JACKSON-LEE of Texas. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Ms. Jackson-Lee of Texas:

At the end of the bill (preceding the short title), insert the following:

TITLE VIII—ADDITIONAL GENERAL PROVISIONS

SEC. 8. None of the funds made available in this Act pursuant to the heading “OFFICE OF JUSTICE PROGRAMS—JUSTICE ASSISTANCE” may be used by the State Authorizing Agent that has not shared, with the Attorney General, its improvement of criminal justice records as described in Section 3759 of Title 41, United States Code.

The CHAIRMAN. Pursuant to the order of the lady, the gentlewoman from Texas (Ms. JACKSON-LEE) and the gentleman from Virginia (Mr. WOLF) each will control 5 minutes.

The Chair recognizes the gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this is an amendment that does not violate current law, does not in any way violate any concerns that the majority would have, and I thank both the chairman and the ranking member for over the past couple of days working with me on some of the concerns I have expressed. But I particularly offer to them this amendment because it is an amendment of fairness in Federal funding that, by the way, the President of the United States extinguished, if you will, in his budget but we added back in a bipartisan way the antidrug task forces. But what we did not support in the supporting of the Senate and the administration was the treatment of the prosecutions and arrests.

I rise today in the name of the victims of Tulia and Hearne, two cities in the State of Texas symbolic of cities around the Nation with antidrug task forces who in the past have had arrest and conviction on the single testimony of one individual. The case in Tulia showed premeditated perjury, no other evidence but the word of one task force member against 15 to 20 African Americans who were ultimately destroyed, taken away from their families, prosecuted, convicted, and jailed.

This amendment speaks to the need of ensuring that there is corroborated evidence either showing the drugs, either showing video or another witness saying that this particular individual was engaged in drug usage or drug possession or drug selling. The Jackson-Lee amendment seeks to restore justice into the justice system by making the operation of federally-funded state and local anti-drug task forces more transparent in order to prevent nightmares such as those that occurred in Tulia, Texas and more recently in Hearne, Texas.

Grants to fund state and local anti-drug task forces come from the “Edward Byrne Memorial State and Local Law Enforcement Assistance Programs (Byrne Program).” In Title 42 U.S.C. Subchapter V. As a member of the House Law Enforcement Caucus, I am an ardent proponent of initiatives that strengthen and support our law enforcement agencies. However, as a member of the Committee on Homeland Security, I make it a goal when ever possible to advocate for increased funding, better facilities, training, and equipment, and for improved interoperable communications for these first responders. However, with this amendment, I seek to restore the integrity, honesty, evenhandedness, and judiciousness of our law enforcement agencies.

42 U.S.C. Sec. 3789d section (b) of the “Omnibus Crime Control and Safe Streets Act of 1968,” reads

(b) Racial imbalance requirement restriction.

Notwithstanding any other provision of law, nothing contained in this chapter shall be construed to authorize the National Institute of Justice, the Bureau of Justice Statistics, or the Law Enforcement Assistance Administration to require funders to adopt such a ratio, system, or other program to achieve racial balance in any criminal justice agency; or

(2) to deny or discontinue a grant because of the refusal of an applicant or grantee under this chapter to adopt such a ratio, system, or other program.

The Jackson Lee amendment does not seek to contravene this provision of the law. Rather, the amendment does seek to hold the State and local grant recipients accountable for the manner in which they conduct their anti-drug programs.

Mr. Chairman, the type of reporting that is prescribed under my amendment is authorized in law as found in 42 U.S.C. 3782, 42 U.S.C. 3759, and 42 U.S.C. 3789e, the Byrne Program as well as 42 U.S.C. 3751 and 3753.

Section 3782 lays out the parameters of the establishment of rules, regulations, and “procedures that are necessary to the exercise of"
agency function in carrying out the provisions of Byrne. Specifically, it authorizes the promulgation of rules and regulations that ensure that the entire program has a “high probability of improving the criminal justice system” and is “likely to contribute to the improvement of the criminal justice system and the reduction and prevention of crime.” More importantly, however, the rules and regulations promulgated must help the reporting agencies determine the program’s “impact on communities and participants.” The very negative results of the program that we saw in Tulia and Hearne, Texas, clearly and unequivocally contravene these provisions, and the Jackson Lee amendment seeks to correct this problem.

Section 3798 contains a report to the President and to Congress that relates to the nature of the activities conducted under this program. The Jackson Lee amendment seeks to ensure that unethical and dishonest application of anti-drug task forces funded under this program do not slip through the cracks. Mr. Chairman, this amendment is vital to protecting the integrity and the evenhandedness of the program and under this program. Many years of Civil Rights jurisprudence and law have been ignored and thrown out the window when America permitted situations such as that in Tulia and Hearne to take place with impunity!

Impoverished and illegal operation of anti-drug task forces was the impetus for my introduction of H.R. 2620, The Law Enforcement Evidentiary Standards Improvement Act of 2005. This bill will provide much-needed oversight and accountability for the millions of federal dollars spent by state and local law enforcement agencies to fight the drug war. Its provisions propose to minimize the injustice of erroneous arrests and convictions by (1) enhancing the evidentiary standard required to convict a person for a drug offense and (2) improving the criteria under which states hire law enforcement officers to participate in drug task forces.

In recent years, it has become clear that programs funded by the Edward Byrne Memorial Justice Assistance Grant program have borne directly on the abuse of the federal system, racially disparate treatment, corruption and tainting of law enforcement agencies, and the commission of civil rights abuses across the country. This is especially the case when it comes to the program’s funding of hundreds of regional narcotics task forces. Operation of anti-drug task forces around the country, which has lacked state or federal oversight, has been riddled with corruption and is the root of some America’s most horrific law enforcement-related scandals.

One of the dozen federally-funded anti-drug task force scandals occurred in Tulia, Texas several years ago. Fifteen percent (15%) of the African American population was arrested, prosecuted, and sentenced to decades in prison based on the uncorroborated testimony of a federally-funded undercover officer, who had a record of racial impropriety in the course of enforcing the law. The Tulia defendants have since been pardoned, but these kinds of scandals continue to plague the Byrne grant program.

In fact, just a month ago, on May 11, 2005, the district attorney for Robertson County, in Hearne, Texas and the South Central Texas Narcotics Task Force, in a case filed by the American Civil Liberties Union on behalf of 28 African Americans, offered to settle the case after five years of litigation. This case arose from the arrest of these 28 individuals—out of 4,500 other residents of Hearne in November 2000 on charges of possession or distribution of crack cocaine. During litigation, the presiding judge was asked to dismiss the charges. The court was basing its decision on evidence from an unreliable informant, as reported to the Houston Chronicle. Furthermore, reportedly, Task Force officers in the case suggested that the informant had added baking soda to narcotics recovered as evidence in one of the cases.

These scandals are not the result of a few “bad apples” in law enforcement; they are the result of a fundamentally flawed bureaucracy that is prone to corruption by its very structure. Byrne-funded regional anti-drug task forces are federally-funded, state managed, and locally staffed, which means they do not really have to answer to anyone. In fact, their ability to perpetuate themselves through asset forfeiture and federal funding makes them accountable to local taxpayers and governing bodies.

To date, fifty (52) organizations at the national, state, and local levels have signed on their support for this legislation and would support this important amendment that is consistent with its goals. Mr. Chairman, I ask that my colleagues who are very distinguished Senate committee work with me to accept this important amendment.

I would like to thank my staff member Dana Thompson for his detailed work on this important amendment. Thank you, Dana.

Mr. Chairman, I reserve the balance of my time.

Mr. WOLF. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this is a different amendment than was printed in the RECORD. I am not even sure that it addresses the same issue. We were told we had the ability to prohibit the amendment to be offered and I did not even want to do that. We felt that whatever the outcome was, it should be. The outcome is that we have taken away funds from State and local law enforcement. We just saw the amendment. I saw it 2 minutes ago, maybe it was 5 or 6 minutes ago.

We do not know the full impact of the funding prohibition. All we know is that the amendment will cut funds to fight crime. I told the gentleman we will continue to work with her on this issue. Just 5 minutes before, is it the same thing that the reference said it would be? Where does the language come from? If my memory serves me correctly, there have been many amendments to add into that category that we have spent time here.

Because of all those reasons, not for the subject matter, but for all those reasons, I would urge a “no” vote on that.

Mr. Chairman, I reserve the balance of my time.

Ms. JACKSON-LEE of Texas. Mr. Chairman, how much time is left? The CHAIRMAN. The gentlewoman has 2 minutes remaining.

Ms. JACKSON-LEE of Texas. Mr. Chairman, I yield 1 minute to the distinguished gentleman from Michigan (Mr. CONyers).

Mr. CONyers asked and was given permission to revise and extend his remarks.

Mr. CONyers. Mr. Chairman, the Jackson-Lee amendment, which is really based on the concept of no more Tulias, is one that I hope my colleagues will support. None of the funds made available in this act under the heading “Office of Juvenile Justice” may be used by a State authorizing agent that has not shared, with the Attorney General, its improvement of criminal justice records as described in section 3759 of title 42.

We remember the Tulia incident with great pain. This case arose out of Texas in which huge numbers of African Americans, 15 percent of the African American population was arrested and prosecuted and sentenced to decades in prison. This is our response to how we handle it. I urge support of our colleagues from Texas, a member of the Judiciary Committee, on this amendment.

Ms. JACKSON-LEE of Texas. Mr. Chairman, I yield 20 seconds to the distinguished gentleman from Texas (Mr. DOGGETT).

Mr. DOGGETT. Mr. Chairman, what happened in Tulia was a true disgrace. It is not an isolated example. While most of our law enforcement officers and prosecutors do a fine job and we support them, the type of information that this amendment would gather can only be helpful to them and effective law enforcement, and we do not care to protect innocent victims like those in Tulia. A gubernatorial pardon or a damage award, do not satisfy the full concerns of those who were injured in Tulia.

Mr. MOLLOHAN. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. Mr. Chairman, the gentleman from West Virginia is recognized for 5 minutes.

Mr. MOLLOHAN. Mr. Chairman, I yield 1½ minutes to the gentlewoman from California (Ms. WATERS).

Ms. WATERS. Mr. Chairman, I rise in support of this very important amendment. This amendment would simply cause to have funds withheld for State or local antidrug task forces that do not collect and make publicly available data as to the racial distribution of convictions made as a result of their operations. This is something that had many of the members from Tulia, Texas, here at the Congressional Black Caucus week where we do our legislative conference. Thirty-nine of them were black. They were arrested on drug charges. There were 38 convictions, real evidence, on the testimony of one informant who was later discredited. This one informant, this one man, had a record, he had a history, he lied, they came from a small town where nobody cared whether or not there was real evidence, and this was just outrageous.

The gentlewoman from Texas is absolutely correct. This information must

June 16, 2005
Mr. Chairman, I am a former judge and a trained lawyer, and I have consistently worked with law enforcement across America and in my hometown and in my State. I am not here to impugn the hard work of good law enforcement officers. I just want there to be more fairness, more respect for the rights of Americans and the law enforcement system and the judicial system. We cannot have a system of Federal funding that will fund antidrug task forces or other efforts that are not complying with our laws. It is not always the case that, in fact, have evidence, corroborating evidence, have video, have another witness, have the drugs that person is alleged to have actually had in their possession.

This simply requires agencies receiving Federal funds in law enforcement instances to improve their criminal justice record and to acknowledge that it is unfair to discriminate and prosecute one race, one community, one city, and have know we can do this in a bipartisan way, and I ask my colleagues to support this amendment. Mr. WOLF. Mr. Chairman, I yield myself the balance of my time.

I urge a “no” vote on this. The gentleman probably has been prohibited from offering the amendment. We said fine. The amendment was changed. In fact, the title was there and then the amendment changed. I do not think anybody truly here knows, I do not care where they went to law school, what it truly does and what it truly means.

They could have gone to UVA, Georgetown, Harvard, or Timbuktu. Secondly, if I could have the gentlewoman’s attention, I offered to her to let us sit down and talk about this. Nobody is opposing necessarily what she is trying to do. Let us sit down. Let us talk about it. Let us work it. No, we are going to go ahead and do it.

So this institution has to have some definition, or else we just take any and all amendments in different versions that precisely means. I urge a “no” vote on this. The gentleman probably has been prohibited from offering the amendment. We said fine. The amendment was changed. In fact, the title was there and then the amendment changed. I do not think anybody truly here knows, I do not care where they went to law school, what it truly does and what it truly means.

This simply requires agencies receiving Federal funds in law enforcement instances to improve their criminal justice record and to acknowledge that it is unfair to discriminate and prosecute one race, one community, one city, and have know we can do this in a bipartisan way, and I ask my colleagues to support this amendment. Mr. WOLF. Mr. Chairman, I yield myself the balance of my time.

I urge a “no” vote on this. The gentlewoman probably has been prohibited from offering the amendment. We said fine. The amendment was changed. In fact, the title was there and then the amendment changed. I do not think anybody truly here knows, I do not care where they went to law school, what it truly does and what it truly means.

They could have gone to UVA, Georgetown, Harvard, or Timbuktu. Secondly, if I could have the gentlewoman’s attention, I offered to her to let us sit down and talk about this. Nobody is opposing necessarily what she is trying to do. Let us sit down. Let us talk about it. Let us work it. No, we are going to go ahead and do it.

So this institution has to have some definition, or else we just take any amendment that comes along.

So all the amendments, I counted them up. The gentleman from Washington wanted to take money from the bill to put it in State and local law enforcement. This takes money from State and local law enforcement and puts it somewhere else. The gentleman from Nebraska (Mr. TERRY) wanted to take money from the rest of the bill and put it into State and local law enforcement. This takes it from State and local law enforcement and puts it somewhere else.

The gentleman from Iowa (Mr. BOSWELL) wanted to take money from another part of the bill, and God bless him, he had a good amendment, and put it in State and local law enforcement. This takes it from State and local law enforcement and puts it somewhere else. For what, with the law, submitting cases that will fund antidrug task forces or other efforts that are not complying with our laws.

Mr. MOLLOHAN. Mr. Chairman, in my time to the gentlewoman from Texas for her leadership on this issue. I believe that getting additional information can only be helpful to the many law enforcement and prosecuting agencies that are trying to do an effective job of protecting our families.

We have had now two instances that are publicly known in Texas of prosecutorial abuse concerning the investigation and enforcement of our drug laws, and they were really outrageous examples—so outrageous that a Republican Governor pardoned all the people involved in the Tulia incident. There have also been civil damage awards. But the damage done to a family by what could occur could be serious, and a pardon and a damage award is not enough to make up for the harm to that family.

Getting the information will help prevent these incidences from happening, that occur law enforcement, and appropriate protection for individual rights. We must not let racism contaminate our law enforcement.

But the damage done to a family by what could occur could be serious, and a pardon and a damage award is not enough to make up for the harm to that family.

Getting the information will help prevent these incidences from happening, that occur law enforcement, and appropriate protection for individual rights. We must not let racism contaminate our law enforcement.

Mr. MOLLOHAN. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, I would just point out that this amendment by the gentlewoman simply asks the Attorney General, the State authorizing agencies, to do what they are supposed to do under the law and to do it accurately and faithfully and that, among other things, it refers to requiring complete criminal histories, to include final disposition of arrests, the full automation of criminal justice histories and fingerprint records, the frequency and quality of history reports, the improvement of State records systems. I think it is very benign in that sense and requires States and government to report as they are supposed to report under our laws.

For that reason, Mr. Chairman, I express my support for it.

Mr. Chairman, I yield the balance of my time to the gentlewoman from Texas (Ms. JACKSON-LEE).

The CHAIRMAN. The gentlewoman from Texas (Ms. JACKSON-LEE) of Texas. Mr. Chairman, I would like to ask the chairman if he has any additional speakers.

Mr. WOLF. Mr. Chairman, I yield.

Ms. JACKSON-LEE of Texas. Mr. Chairman, I would like to ask the chairman if he has any additional speakers.

Mr. WOLF. Mr. Chairman, I yield.

Ms. JACKSON-LEE of Texas. Mr. Chairman, I would like to ask the chairman if he has any additional speakers.

Mr. WOLF. Mr. Chairman, I yield.

Mr. WOLF. Mr. Chairman, I yield.

Mr. WOLF. Mr. Chairman, I yield.
The question is on the amendment offered by the gentlwoman from Texas (Ms. JACKSON-LEE).

The question was taken; and the Chairman announced that the noes appeared to have it.

Ms. JACKSON-LEE of Texas, Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentlwoman from Texas (Ms. JACKSON-LEE) will be postponed.

AMENDMENT OFFERED BY MR. MORAN OF VIRGINIA

Mr. MORAN of Virginia. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. Moran of Virginia:

At the end of the bill (before the short title), insert the following:

TITLE VIII—ADDITIONAL GENERAL PROVISIONS

LIMITATION ON USE OF FUNDS TO LICENSE EXPORT OF CENTERFIRE 50 CALIBER RIFLES

SEC. 801. Notwithstanding the funds made available in this Act may be used to pay administrative expenses or compensate an officer or employee of the United States in connection with the licensing of a nonautomatic or semiautomatic rifle capable of firing a center-fire cartridge in 50 caliber, .50 BMG caliber, any other variant of 50 caliber, or any nonautomatic or semiautomatic rifle, to any nongovernmental entity, to any nongovernmental entity with the exception of a nongovernmental entity in the United States.

The CHAIRMAN. Pursuant to the order of the House of June 14, the gentleman from Virginia (Mr. MORAN) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Virginia (Mr. MORAN).

Mr. MORAN of Virginia. Mr. Chairman, I yield myself such time as I may consume.

I rise today to offer an amendment that would strengthen current State Department policy regarding the export of .50-caliber sniper rifles. Under this amendment only official government entities would be allowed to purchase these weapons through the export process. The language of the amendment would simply prevent export to any nongovernmental entity; in other words, the arms dealers that bought 25 of them for al Qaeda and the representatives of the IRA and the KLA.

The .50-caliber sniper rifle is in a class by itself. A weapon of war, the Army Handbook on Urban Combat states that the .50-caliber was designed to attack both fuel tanks and other impenetrable targets. It is considered able to penetrate all but the heaviest shielding material from up to a mile away.

This high-powered antimateriel weapon has even been touted by its manufacturers in advertisements that it is capable of not only destroying a modern jet aircraft. I quote from Barrett Firearms Manufacturing. In their advertisement, they say, “The cost-effectiveness of the .50-caliber sniper rifle cannot be overemphasized when a round of ammunition purchased for less than 10 U.S. dollars can be used to destroy or disable a modern jet aircraft.”

I should repeat that because it is hard to believe. But despite this unparalleled potential for damage, including the threat posed to railcars carrying hazardous materials and civil aviation, the .50-caliber is easier to obtain than a handgun and no less available than the smallest caliber.

Governor Schwarzenegger, who recently signed a law banning the .50-caliber in California, stated that this gun is “a clear and present danger to the public’s safety.”

These guns are sought after by terrorists, warlords, drug smugglers, and other individuals looking to use the .50’s exceptional power, accuracy, and distance for terrorist and criminal purposes.

There have been any number of substantiated reports that al Qaeda, the IRA, and the KLA have purchased a number of these guns in recent years. There is an arms race taking place just south of the border in Mexico where some groups are employing 50-calibers in a bloody turf war that has resulted in the deaths of hundreds of people caught up in the crossfire.

The “60 Minutes” TV show has reported at length on this issue. In their most recent piece, they profile an Albanian American gunrunner named Florin in Krasniqi. Mr. Krasniqi details how he has coordinated the export of .50-calibers from the U.S. to arm the Kosovo Liberation Army in their gue-rilla war to break away from Serbia. The reason the .50-caliber was his weapon of choice, he stated simply, “You could kill a man from over a mile away. You can dismantle a vehicle from over a mile away.” And they are so easy to obtain.

If we are not going to deal with the danger that .50-calibers pose to the American public, let us at least prevent the export of these weapons of terror to foreign terrorists. Restricting exports of .50-calibers is necessary because the United States is one of the original 50-caliber long-range rifles. It was used to implement buffalo hunting back in those years, and its being a 50-caliber is not the reason why it is among the most accurate long-range rifles, but because they chose that caliber back then for long-range accuracy, and they developed the cartridge for that kind of target shooting. And, in fact, there has been an entire organization that has grown up around target shooting that has to do with the 50-caliber, that ven-eer rifle, the buffalo gun. And now they are called the 50-caliber Target Shooting Club, and I know that they have been organized for over 20 years. So this amendment would target rifles when there is not a record of their being used for criminal intentions, but not a record that I can find.

And I look at some of these quotes: “Could be used to destroy or disable a modern jet aircraft.” Are we going to outlaw every caliber and every weapon that could be used to destroy or disable a modern jet aircraft? If that is the case, then we take every deer rifle out of the rack and out of every cabinet of every home in America because they can be used the same way. We can name caliber after caliber that could destroy or disable a modern jet aircraft. In fact, sometimes we are a little concerned about that happening.

The fact that the Governor of California advocates an assault on the 50-caliber target rifle, the buffalo gun, does not convince me in the least, but this would not do anything to prevent a 45-caliber or a 51-caliber or going a little bigger or a little smaller. It would encourage that. But what it would do, Mr. Chairman, is it would
make the 50-Caliber Shooting Club exclusively a USA club, and it would continue to develop the 50-caliber shooting in the United States, but our foreign friends that are involved in the same thing that we are here, legitimate hunting, legitimate target shooting and other things, would be prevented from doing so for an illogical reason, if there is a reason at all.

Mr. Chairman, I reserve the balance of my time.

Mr. MORAN of Virginia. Mr. Chairman, I yield 1 1/2 minutes to the gentleman from Tennessee (Mr. GORDON).

Mr. GORDON. Mr. Chairman, my friend from Virginia and I, and I think everyone here, share his objective, and that is to keep 50-caliber weapons, and for that matter any weapon, out of the hands of terrorists. I am afraid, though, that his amendment does not accomplish that.

The fact of the matter is that the State Department already has the ability, and uses it, to stop any type of sales of 50-caliber rifles to terrorists or any other type of undesirable groups. If there is any of these anywhere around the world, and again I am not aware of any incidence where that has taken place, they have been sold illegally. So this amendment is not going to address the illegal sales. It may keep all weapons of 50 caliber here in this country, but they can be made elsewhere all around the world. So it just simply does not accomplish the goal that I know he wants and that we all want.

And since he did mention the Barrett M107, let me point out also that it was selected by the Chief of Staff Office of the U.S. Army as one of the “top 10 inventions of 2004” for the fight against the war on terror. Certainly it has been beneficial to our troops. It can be beneficial to our allies around the world.

And I want to see these weapons or any weapons in the hands of terrorists. We already have a method to stop that in terms of legal sales. This amendment does not get to the illegal sales. So a good objective, but a flawed amendment.

Mr. MORAN of Virginia. Mr. Chairman, I yield myself such time as I may consume.

To respond to the points that were made, first of all, I agree that our soldiers like the weapon. I want them to continue to be able to use it. And this, of course, does not restrict their usage. I just do not want it to get into the enemies’ hands. And I think that the gentleman does not want terrorists being able to buy these. Al Qaeda has purchased 25 of them.

That is the point of it. These are unparalleled weapons. I am not trying to restrict them in the United States. They can have these U.S. clubs for .50 caliber guns. I just do not want them sold by arms dealers. We know that is what is happening, and they are getting away with it.

In a day when we see reports about people being arrested on public property because they were photographing public buildings, on the one hand, and then on the other hand we are allowing these weapons to be sold to terrorists? No. It is okay to sell them to a government, but not to these private individuals who are going to turn around and sell them to the terrorists.

There are certain things that we need to adjust to after 9/11. We are in a war against terrorism. Why would we go along with arming the opposition? So I think much of the argument that has been made supports our contention that we ought to ban the export of these to non-governmental organizations.

Mr. Chairman, I yield to the gentlewoman from New York (Mrs. MALONEY) for the purpose of making a unanimous consent request.

(Mrs. MALONEY asked and was given permission to revise and extend her remarks.)

Mrs. MALONEY. Mr. Chairman, I rise in support of the Moran amendment.

The CHAIRMAN. Pursuant to clause 2 of rule XVIII, further proceedings on the amendment offered by the gentleman from Virginia (Mr. MORAN) will be postponed.

AMENDMENT NO. 6 OFFERED BY MRS. MALONEY

Mrs. MALONEY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 6 offered by Mrs. MALONEY

At the end of the bill (before the short title), insert the following:

TITLE VIII—ADDITIONAL GENERAL PROVISIONS

SEC. 801. None of the funds made available in this Act may be used to enforce any provision of law that prohibits or restricts funding for the United Nations Population Fund (UNFPA).

The CHAIRMAN. Pursuant to the order of the House of June 14, the gentlewoman from New York (Mrs. MALONEY) and a Member opposed will each control 10 minutes.

The Chair recognizes the gentlewoman from New York (Mrs. MALONEY). Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, this limiting amendment simply prevents the State Department from spending taxpayer dollars to restrict funding for the United Nations Population Fund, UNFPA. The effect of this amendment would be to release much-needed funds to help women, children, and men in nearly 150 countries around the world. The Bush administration has withheld $34 million annually from UNFPA that passed both the House and Senate. UNFPA is the only multilateral agency devoted to helping developing countries combat female genital mutilation and obstetric fistula, to helping countries advance access to family planning and quality reproductive health care, to promoting HIV/AIDS prevention, improved education and health care. These are the jobs of UNFPA. They are the world’s leader in this task.

In this world in which we live, while I have been speaking, one woman has died from pregnancy-related causes, nine people have contracted HIV, and 6 cars have been sold from Al Qaeda. This tragedy occurs in just one minute, and all of it can be prevented if UNFPA is funded and allowed to do its work.

This is not the way it has to be. The U.S. annual $34 million contribution could prevent 2,000 maternal deaths, 800,000 induced abortions, 4,700 maternal deaths, and 77,000 infant deaths around the world. This is why we need UNFPA. We should not stand in their way, especially when women and girls are dying.

Will a government that champions tolerance, equal opportunity, life and hope. I urge my colleagues to allow the United States to join 169 countries that are already funding and supporting UNFPA. We are standing alone. We should join the world community and support this important work.

Mr. WOLF. Mr. Chairman, I rise in opposition to the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Virginia (Mr. WOLF) for 10 minutes.

Mr. WOLF. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this amendment does not belong in the bill. It is really an amendment that relates to the Foreign Assistance Appropriation, under the bill of the gentleman from Arizona (Mr. KOLBE) where this comes. It is inappropriate to use the funds for the Department of State’s operations, including salaries, to enforce the law, because it is the responsibility of the Secretary of State to enforce the law and would in essence mean that there could be no enforcement of Kemp-Kasten. It would make it null and void.

We determined by the Secretary of State in 2004 that because UNFPA continues its involvement in China’s coercive birth limitation program, current law precludes funding for UNFPA.

I visited China. The China policy with regard to coerced and forced abortion, the one-child policy, is barbaric. I could take a whole day to talk about the government of China with regard to the persecution of the Catholic
Mr. PITTS. Mr. Chairman, I rise in strong opposition to this amendment. The Chinese Government has a policy of killing unborn children it deems a waste of valuable space in one of the world’s largest countries. UNFPA actively promotes this policy of thinning the population by killing unborn children. In fact, it has gone so far as to praise China’s population control tactics. Until that changes, UNFPA should not get a dime of taxpayer funding.

As we debate this bill, let us face the truth: Is that really what we want to support or encourage? I do not think so.

Make no mistake about it. UNFPA is in bed with Beijing on forced abortions; and if we fund UNFPA, Beijing gets stronger. If we fund UNFPA, we only encourage the regime’s strategy of extinguishing the babies they do not want. If we truly care about human rights, we must support programs that work, programs that uphold the dignity of human life, not programs that allow a repressive, Communist government to enforce a systematic effort of abuse and repression and murder.

Our country does not believe in forced abortion. We do not believe in harvesting the organs of prisoners who are being executed.

Why do we want to support this? A Nation that believes in the rights to life, liberty, and the pursuit of happiness should not give aid to any organization that does not support these rights.

I urge opposition to and defeat of this amendment.

Mrs. MALONEY. Mr. Chairman, I yield 1 minute to the gentlewoman from California (Mrs. CAPPS). Mrs. CAPPS. Mr. Chairman, I thank the gentlewoman for yielding me time.

Mr. Chairman, I rise in strong support of the Maloney-Shays amendment regarding the United Nations Population Fund. UNFPA funding must be released to aid women, children, and men in the world’s poorest countries. The UNFPA provides critical maternal health in these nations, emergency assistance for refugees, reproductive education, prevention and treatment for HIV and AIDS, and clinical care for infants and children.

Yet the President has withheld the U.S. contribution to the UNFPA under false accusations that funds have been used to support coercive population practices in China. Every legitimate investigation of these accusations has proven them false.

Furthermore, UNFPA work in China actually contributes to putting an end to coercive practices. It is surely time for the United States to stop withholding funds from the UNFPA. These funds can make all the difference in the world, improving lives and saving lives around the world. I urge my colleagues to support this amendment and allow the U.S. to support the world’s largest international source of funding for population and reproductive health programs.

Mr. WOLF. Mr. Chairman, I yield 2 minutes to the gentleman from Lancaster, Pennsylvania (Mr. PITTS).

Mr. PITTS. Mr. Chairman, I rise in strong opposition to this amendment. For 25 years, the United Nations Population Fund has been an aggressive and shameful accessory to gross crimes against women and babies in the People’s Republic of China. Despite being admonished to do otherwise on countless occasions, the U.N. Population Fund continues to do the dirty work of the Chinese regime.

Now the gentlewoman from New York (Mrs. MALONEY) is offering an amendment that would suspend all U.S. laws, including all human rights laws, in order to compel U.S. taxpayer funding for the U.N. Population Fund. The Maloney amendment is written in such a way to immunize UNFPA from having to obey any U.S. law or funding restrictions, including the Kemp-Kasten anti-coercion amendments. I strongly urge its defeat.

Mr. Chairman, let us not forget that the UNFPA has whitewashed, sanitized, and facilitated—it has been an accomplice—in China’s barbaric one-child-per-couple coercive population program that has victimized hundreds of millions of women and murdered hundreds of millions of children.

As a direct result, there is this exceedingly dangerous statistical demographic anomaly known as the “missing girls.” There may be as many as 100 million missing girls in China today, a tragedy beyond words. As a result, there are also on any given day, according to the Country Reports for Human Rights Practices, the human rights report by the State Department, 500 women in China who commit suicide every day. Five hundred. This coercion has a terrible, deleterious effect on Chinese women.

As violations of human rights go, coercive population control in China is among the worst and most degrading systemic abuse in human history.

Let us not forget or be naive, I say to my colleagues, about the fact that in China today, babies who are illegal and children can only be born if permission is granted by the state.

We all know that in the United States, families get State and Federal tax credits and deductions for their children so they can better cope with economic pressures.

In China, on the other hand, there is no welcome mat for children, and Chinese parents have huge fines imposed upon them if they try to bring their children into the world. Unwed mothers are also severely punished in China, and are compelled to abort, even if it is the only one child, the one that they are supposedly permitted to have. China’s eugenics policy, which compels the murder of disabled babies, is clearly reminiscent of the Nazis.

Those who violate these cruel, inhumane, antichild policies are fined up to 10 times the annual salary of both husband and wife, a draconian penalty that usually ensures that the child, at the end of the day, is aborted.
Mr. Chairman, in all counties, including UNFPA-supported counties, severe fines are imposed on women who have babies out of plan. Some women do resist. Some women have their children on their own. Some are even tortured, some are even tormented, and some are jailed.

Last December I chaired yet another hearing on forced abortion in China. I have had about 18 or more hearings over the last several years, and we heard from a woman by the name of Mrs. Mao Hen Feng, a Chinese woman who had been imprisoned and tortured because of her resistance to coercive population control.

I would point out to my colleagues, I met with Peng Peiyun, the woman who runs this program, and, during the course of that several-hour conversation, she kept coming back to the fact that, oh, the UNFPA is here. They do not do anything. The UNFPA clearly enables the PCR to practice this draconian program, and then they resort to the whitewash and say, but the UNFPA is here, and, again, they do not find any of this.

Amazingly Chairwoman, the UNFPA calls China’s massive violence against women like Mrs. Mao voluntary family planning, as if cheap shopistry makes it all okay. Just call it voluntary family planning, and it is all okay. It is the definition of “voluntary” a joke.

To make matters worse, Mr. Chairman, UNFPA spokesmen gleefully encourage other countries to follow China’s disgraceful lead.

I hope the majority of our colleagues will have no part in enabling either China or its best friend, the UNFPA, in these horrible abuses. Instead of funding the UNFPA, both they and China should stop the International Criminal Court for crimes of genocide and crimes against humanity.

Talk to these women who have suffered. Look at the terrible loss of life, millions upon millions of babies killed, often right at the ninth month as women try to conceal their pregnancy, and the UNFPA is there on the ground enabling this terrible abuse. They provide cover, respectability, tangible support, and technical capabilities that predictably result in massive acts of cruelty and murder in China.

Defeat the Maloney amendment.

Mrs. MALONEY. Mr. Chairman, may I inquire on the time, please?

Mr. SMITH. The gentlewoman from New York has 5½ minutes remaining, and the gentleman from Virginia has 30 seconds remaining.

Mrs. MALONEY. Mr. Chairman, I yield 10 seconds to the distinguished minority leader, the gentlewoman from California (Ms. Pelosi).

Ms. PELOSI. Mr. Chairman, I thank the distinguished gentlewoman from New York (Ms. MALONEY) for yielding me this time and for her leadership over the years on this issue that is very important for America, to speak out in terms of reducing the number of abortions that take place throughout the world.

Mr. Chairman, I came to the floor because I listened with interest to the statements that were being made here, especially by a couple of speakers ago about China, including my distinguished colleague from New Jersey Mr. SMITH. The gentleman from New Jersey (Mr. SMITH) and the gentleman from Virginia (Mr. WOLF) and I have worked together over the years to speak out against China’s coercive family planning, as they call it, policies. The gentleman from New Jersey (Mr. SMITH), the gentleman from Virginia (Mr. WOLF) and I have fought together against the human rights abuses in China. We spoke against them when there was a Democratic President and the Republican Party.

None of us takes second place to anyone in our denunciation of the regime in Beijing for its inhumane treatment of its own people. The list is a long one that we could go into, but we do not have time today.

Where the gentleman from Virginia (Mr. WOLF) and the gentleman from New Jersey (Mr. SMITH) and I part company is on their characterization of the role of UNFPA. Certainly, I think without any question, every person in this body would denounce the coercive abortion policy of the Beijing government. Certainly we want fewer abortions to take place. The best way to do that is to have family planning. For many women, one can launch a campaign against UNFPA, because they have been effective in promulgating family planning information to women in need so that they will not find themselves in a situation where an abortion is an option.

When I was ranking member on the Committee on Foreign Operations Appropriations a number of years ago, we put forth a compromise where the money would go forth for UNFPA, but none of the funds would be used in China. It was not happy with that, because it made certain concessions, but it was a compromise, and each side had to yield something on it.

I just want our colleagues to know that a vote for the Maloney amendment is not a vote in support of any organization that would be sympathetic to the coercive abortion policies in China. It simply is not so.

UNFPA has done very very valuable work. We go through this year in and year out. I remind my colleagues that in 2001, President Bush, our new President, sent a team to China who certified that UNFPA had nothing to do with China’s coercive policies, and they were not in violation of Kemp-Kasten, and $21.5 million went forward.

Since 1999, there have been 60 delegations and 145 diplomats from around the world who have visited UNFPA’s China program. None of them have found any evidence to suggest that UNFPA is doing anything other than making the situation better. Family planning reduces abortions. It is that simple. Even after President Bush’s final certification, Secretary Powell was part of reviewing the activities there as well and came back with the same result.

What we are talking about here today is, let us reduce abortions, let us denounce the Beijing regime for what they do not only in this area, but in other areas, and not look the other way from that, because that is in my view, a crime against humanity, the way they treat women.

The gentleman from New Jersey (Mr. SMITH) knows chapter and verse. There is probably nobody in the Congress who knows better than the gentleman from New Jersey (Mr. SMITH) how coercive their abortion policies are. He has tried to give some opportunity to people who have been victims, and I salute him for that. But I disagree with the gentleman when he says that UNFPA is a part of any of that, and that they have done anything other than make the situation better in China.

So I hope that our colleagues will understand these distinctions and support the very important Maloney amendment.

Mrs. MALONEY. Mr. Chairman, the United States is isolated; 169 countries support the important work of UNFPA.

Mr. Chairman, I yield 2 minutes to the gentleman from Connecticut (Mr. SHAYS), the gentleman from New Jersey (Mr. SMITH) and the gentleman from Virginia (Mr. WOLF) knows chapter and verse. There is probably nobody in the Congress who knows better than the gentleman from New Jersey (Mr. SMITH) how coercive their abortion policies are. He has tried to give some opportunity to people who have been victims, and I salute him for that. But I disagree with the gentleman when he says that UNFPA is a part of any of that, and that they have done anything other than make the situation better in China.

So I hope that our colleagues will understand these distinctions and support the very important Maloney amendment.

Mr. SHAYS. Mr. Chairman, this is not a debate about Chinese policy on population growth, but I want to just say, I cannot imagine what it would be like to be in the United States and have four times as many people living here, four times as many people in Washington, D.C., four times as many people in New York City. So I do understand that China needs to deal with this issue, but not the way they are dealing with it. This amendment does not do any way impact what China is doing.

Cutting funds to the UNFPA will prevent vital assistance for poor women and children in developing countries. The UNFPA’s program helps families prevent unwanted pregnancies, undergo childbirth safety, avoid STDs including HIV/AIDS, and combat violence against women. I think that is what we want to do.

I believe we must support the UNFPA and its family planning initiatives, because world population continues to grow out of control. In 1960, we had 3 billion people on this Earth. Today we have 6 billion people. In 40 years, we will have 9 billion people. All those people need basic health care. There is no question about that. We cannot afford to cut back on the UNFPA, the World Bank and the IMF.
years, without worldwide family planning services, it will rise to 9 billion people.

The UNFPA responds to this growth by assisting the world’s poorest countries in formulating population policies and strategies. Overpopulation threatens not only the world’s political stability, but our global environment as well.

As a former Peace Corps volunteer, I can vouch for the substantial contributions international family planning makes to economic development, higher living standards, and improved health and nutrition.

Mr. Chairman, I just hope that we do not get sidetracked on a debate about what China is doing, when there are 150 poor countries around the world that need our help, and millions and millions of women who need our help and assistance.

Mrs. MALONEY. Mr. Chairman, may I inquire about the time?

The CHAIRMAN. The gentlewoman has 31⁄4 minutes remaining.

Mrs. MALONEY. Mr. Chairman, I yield 1 minute to the gentlewoman from California (Ms. WOOLSEY).

Ms. WOOLSEY. Mr. Chairman, we recently experienced the Southeast Asia tsunami that destroyed valuable medical services for women across the affected area. But, with the help of the UNFPA, we were able to calculate that 150,000 women were pregnant in the region at the time of the trauma, putting them at greater risk than normal because of the loss of medical support. Without UNFPA, these women would not have had the guarantee of safe, clean environments to deliver their babies. They would not have had the access to the medical support and medicines they need to ensure a healthy birth.

Safe and healthy childbirth should not be a political issue. While disagreements about UNFPA will certainly remain, continuing to ensure this program gets the needed support is more important than it is now. I urge my colleagues to join me in supporting the Maloney-Shays amendment.

Mrs. MALONEY. Mr. Chairman, I yield 1 minute to the gentleman from New York (Mr. ISRAEL).

Mr. ISRAEL. Mr. Chairman, I thank the gentlewoman for yielding me this time. I am proud to be a cosponsor of this amendment. I respect the passion and force the gentleman from New Jersey brings to the fight against coerced abortions in China, but this is not about coerced abortions in China. This is about saving lives in Sri Lanka and Indonesia and areas that have been devastated by the tsunami.

I was in Sri Lanka only a few months after the tsunami. I was in a maternity hospital that was ravaged by the first wave. That region has lost its capacity for maternal health care. It has lost its nurses, its doctors, its midwives, its entire maternity health care infrastructure.

Mr. Chairman, 150,000 women scheduled to give birth after the tsunami, they need help. The UNFPA is one of the only agencies of its kind that can provide that help. It does not make sense for us to abandon the lives of newborn babies and their mothers in tsunami-affected areas because of what we do not like happening in China. The two issues are separate.

We have an opportunity. This is something we can agree on, and that is maternal health care and reproductive health care, and saving lives in areas that desperately need it.

Mr. Chairman, I urge support for this amendment.

Mrs. MALONEY. Mr. Chairman, I yield 1 minute to the distinguished gentlewoman from New York (Mrs. LOWEY) who has been a great leader on this issue.

Mrs. LOWEY. Mr. Chairman, I rise in strong support of this amendment, which would correct an error in the interpretation of our law that has put the lives of the world’s most vulnerable women and children at risk.

Since 2002, the United States has provided no funds to the United Nations Population Fund. The facts are clear. UNFPA has a worldwide policy of not providing abortions, even when they are legal in the country in which UNFPA is operating. UNFPA does not coerce women into abortion and sterilization. It works to secure voluntary reproductive health options around the world.

U.S. law prohibits funding for organizations that support coercive practices.

But UNFPA is being penalized because it is trying to overturn, end coercive practices in China.

In meeting after meeting over the past 3 years, the State Department has repeatedly said that nothing UNFPA does will lead to a restoration of its funding as long as it continues to operate in China, unless China changed its laws.

Let us make it very clear. UNFPA is the premier multilateral organization helping to provide safe motherhood, reproductive health assistance to the world’s poorest children.

(Mrs. LOWEY asked and was given permission to revise and extend her remarks.)

Mrs. MALONEY. Mr. Chairman, may I inquire on the time.

The CHAIRMAN. Fifteen seconds.

Mrs. MALONEY. Mr. Chairman, is that on both sides?

The CHAIRMAN. The gentleman from Virginia has 15 seconds.

Mrs. MALONEY. Mr. Chairman, I would just like to say that we may have a disagreement in some ways, but UNFPA is a world leader.

Mr. Chairman, I yield the remaining time to the gentleman from Virginia (Mr. MORAN).

Mr. MORAN. Mr. Chairman, I cannot understand why, without passing the Maloney amendment, we punish millions of women throughout the Third World. Our annual $34 million contribution could prevent 2 million unintended pregnancies; 800,000 induced abortions; 4,700 maternal deaths, and most of them are young girls that are under control of the UNFPA, and 77,000 infant deaths. That is what we should be doing. This should not be about China. This should be about the Third World.

Mr. WOLF. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I want my comments to be separated. One, I want to commend and thank the minority leader, the gentlewoman from California (Ms. PELOSI), for her strong support on human rights. Particularly, she has been very good in China. She was there from the Tiananmen Square times and all the time. So I just want the record, we want to separate these out, but I want the record to show that I admire her and respect very much her support for human rights in China. It has been outstanding.

The second point I want to make is to separate back to the debate that my good friend, the gentleman from Virginia (Mr. MORAN), was just talking about. I favor family planning. I am speaking for myself. I favor family planning. But this is a government that still has Tiananmen Square demonstrators in prison. In 1991 the gentleman from New Jersey (Mr. SMITH) and I were in Beijing Prison Number 1, and we are the only two Members of the Congress that have been in a Chinese gulag, and we saw Tiananmen Square demonstrators making socks. Some of you may be wearing the socks, socks for export to the United States. God bless him, Senator Moynihan got the socks, when I came back, held the socks up on the Senate floor with regard to how bad China is. And I will get that, what Senator Moynihan said, and put it in the RECORD.

Mr. MOYNIHAN. Mr. President, here are pairs of prison socks that were sent to the international trade by the Chinese. You can buy these: socks with a panda with the word “boxing” and a little boxer; this fellow is playing golf, whatever.

Representative Wolf was in Beijing Prison No. 1, and not recognizing him as a Member of the House of Representatives, they thought he was a buyer. They started showing him the goods for sale.

They have stopped that. We have ratified that treaty at long last. Surely we ought to indicate that we mean it, that we intend to help enforce this international labor standard.

This is a fundamentally evil government that you cannot trust, Many Tiananmen Square demonstrators that we lament about and talk about are still in prison. Now, they moved them out of Beijing Prison Number 1, but they are still in prison. And if you do not think there is coercion, call Harry Wu. Harry Wu lives out in Fairfax County, in the district of the gentleman from Virginia (Mr. MORAN). And Harry will tell the gentleman about the forced abortions and the
policies and the abuse of this government. If you need a new kidney, they will go in the prisons, they will find somebody with your blood type, they will shoot them, maybe a Catholic priest, maybe Buddhist monk, maybe a Protestant pastor, or maybe a pickpocket, but you can get a new kidney for $50,000. This is the government that you basically want to give money to.

Now, many of you saw it. I think I did a Dear Colleague letter. Soon after the death of Pope John Paul II, they arrested two elderly Catholic priests. And I say to my friend, the gentleman from Connecticut (Mr. SHAYS), talks to the Cardinal Kung Foundation and let them tell you of all the persecution. I believe they are now 11 Catholic bishops. The gentleman from New Jersey (Mr. SMITH) took holy communion from Bishop Su.

Mr. Chairman, I would ask if I could yield to the gentleman just for two words. Where is Bishop Su now? Mr. SMITH of New Jersey. He is in prison.

Mr. WOLF. He is in prison. One other question. How old is he?

Mr. SMITH of New Jersey. He is in his mid-70s. Twenty-seven years in prison.

Mr. WOLF. Mid-70s in prison for giving holy communion.

Now, the government put him in jail. Nobody else. You have a government that you fundamentally cannot trust.

Lastly, Secretary Powell, a constituent of mine, somebody that we all admire. He lives out in my congressional district. Here is what he said on July 15, 2004: "Despite these efforts, China continues to employ a coercive in its birth planning program, including penalties for "out of plan births" and UNFPA's program has not been restructured to solve the problems identified in 2002."

So Secretary Powell, who we all trust, is still doing it. And then he ends, "however, as in 2002, UNFPA continues its support and involvement in China's coercive birth limitation program in counties where China's restrictive law and penalties are enforced by government officials." I urge you to defeat this amendment and send a message to this fundamentally bad government that is doing all these horrible things to women, doing all these things to Catholic priests, Catholic bishops, to evangelical pastors, to the Dalai Lama. I vote "no" on this amendment.

The Secretary of State

Hon. Henry J. Hyde,
Chairman, Committee on International Relations, House of Representatives.

Dear Mr. Chairman: The Foreign Operations, Export Financing and Related Programs Appropriations Act, 2004 (Public Law 108-196, Div. D) ("Act"), like every foreign operations appropriations act since 1985, provides that "none of the funds made available in this Act... may be made available to any organization or program which, as determined by the President of the United States, supports or participates in the management of a program of coercive abortion or involuntary sterilization." Separately in Section 507, the Act earmarks $34 million for the "United Nations Population Fund ("UNFPA").

In July 2002, I determined that UNFPA's support of, and involvement in, China's population-control regimen violates the Chinese Government to implement more effectively its program of coercive abortion, and that, therefore, the Kemp-Kasten Amendment precluded funding of UNFPA at that time.

Since that time, we have had numerous discussions with the leaders in the government of China to urge an end to China's program of coercive abortion. We have also urged UNFPA and China to restructure the UNFPA program so that UNFPA does not support or participate in the management of China's coercive program. Despite these efforts, China continues to employ coercive in its birth planning program, including penalties for "out of plan births" and UNFPA's program has not been restructured to solve the problems identified in 2002. However, as in 2002, UNFPA continues its support and involvement in China's coercive birth limitation program in counties where China's restrictive law and penalties are enforced by government officials. I maintain my determination that UNFPA does not support or participate in the management of China's coercive program. Despite these efforts, China continues to employ coercive in its birth planning program, including penalties for "out of plan births" and UNFPA's program has not been restructured to solve the problems identified in 2002. However, as in 2002, UNFPA continues its support and involvement in China's coercive birth limitation program in counties where China's restrictive law and penalties are enforced by government officials.

Therefore, I urge you to defeat this amendment and send a message to this fundamentally bad government that is doing all these horrible things to women, doing all these things to Catholic priests, Catholic bishops, to evangelical pastors, to the Dalai Lama. I vote "no" on this amendment.

Sincerely,

Colin L. Powell
Enclosures: As stated.

REPORT TO CONGRESS ON CHINA'S BIRTH LIMITATION POLICY

The Conference Report accompanying H.R. 2673, H. Report 108-401, in the Statement of Managers, requests the Department of State (hereinafter "the Department") to report "not later than July 15, 2004, on the steps it and UNFPA have taken to urge the Government of China to end its birth limitation policy, including the social compensation fee, and the results of its enforcement, nationally, and particularly in the counties in which UNFPA operates." This report responds to that request.

U.S. Engagement

Since the Secretary's determination of July 21, 2002, that funding for UNFPA was precluded by the Kemp-Kasten Amendment of the FY 2002 Foreign Operations Appropriations Appropriations Act, China has actively engaged with China to end coercive practices in its birth-limitation program and with UNFPA to end its support for that program. The United States has strongly urged the Chinese government to make decisions concerning reproduction free of discrimination, coercion, and violence. In order to operationalize this principle in the Chinese family planning program should be fully voluntary and free of all forms of coercion.

Immediately following the Secretary's determination, the Department commenced a round of five negotiating sessions with China with the objective of eliminating coercive measures in law and practices in the counties in which UNFPA is involved. We also encouraged China and UNFPA to restructure the UNFPA's activities in the new fifth country program (CPF) agreement in a way that would allow the United States to fund UNFPA. Discussions were held with senior UNFPA and Chinese officials in New York, Washington, Beijing, and during international meetings on population matters. Department personnel visited UNFPA project counties in China on two occasions, in November 2002 and August 2003. Embassy and Consulate personnel based in China made numerous field visits, both to UNFPA offices in China and field sites in which there is no UNFPA assistance. These field visits were designed to learn about the implementation of China's birth limitation law and policies and about UNFPA's activities in China. Despite several rounds of discussions with U.S. representatives, UNFPA and China decided not to make substantive changes to the program's fifth country program. For example, UNFPA did not condition the start of the program on the elimination of social compensation fees. The new CPF was in effect at the first round of negotiating sessions with the UNFPA Executive Board in January 2003, the United States could not support the program because of coercive measures in the enforcement of China's birth limitation laws. The U.S. delegate stated that the United States believes that UNFPA should not be associated in any way with coercion.

In the summer of 2003, the Administration considered that circumstances surrounding UNFPA's continued involvement in China's birth limitation program had not changed sufficiently to warrant U.S. funding.

As described below, many of those circumstances continued despite UNFPA's claims by Chinese officials that they are working to eliminate coercive measures. These, along with others described in State's annual human rights report, constitute compelling evidence that UNFPA's continued involvement in China's birth limitation program is contrary to the principle that the United States has advanced, and the United States believes all countries should abide by. This principle is enshrined in the U.N. International Bill of Rights, the U.N. Population and Development (ICPD) that all couples should have the right to decide freely and responsibly the number, spacing and timing of their children and to have the information and means to do so free of discrimination, coercion, and violence.

In order to operationalize this principle in the Chinese family planning program should be fully voluntary and free of all forms of coercion.
quality.’’ (Article 2.) ‘‘Citizens have a right to have a child and also have a duty to practice birth planning according to the law. . . .’’ (Article 17.) ‘‘The State shall stabilize currently high birth rate, promote birth planning and family size. Those who meet the conditions in laws and regulations can request the arrangement of the birth of a second child. Specific methods (shall be) decided by the people's congresses of provinces. . . .’’ (Article 18.) ‘‘Citizens who give birth to a child in violation of Article 18 of this law shall pay a social compensation fee’’ (Article 41) ‘‘(government) personnel who pay a social compensation fee in accordance with Article 41 of this law, those who are State staff should also be required to be administratively punished according to law.’’ ‘‘Other personnel (who are not state staff) should also (in addition to the social compensation fee) be given disciplinary punishment by their own unit or organization.’’ (Article 42.)

Since the promulgation of the national law, all provinces and equivalent governmental units except the Tibetan Autonomous Region have issued implementing regulations that set out birth planning requirements. The implementing regulations generally allow only child-bearing couples to have a second, or in rare cases, a third child. They also set ranges for assessment of the social compensation fee by local authorities. Fees range from the equivalent of one half the local average annual household income to as much as 10 times that level. One county where UNFPA has activities, Liuyang in Hunan Province, assesses a fee of two times the average annual household income. Liuyang County has waived the fee for pregnant births, both for infants with inadequate birth spacing (when an additional child is allowed), or for ‘‘out-of-plan’’ births. (An example of provinces implementing regulations is provided below.)

The Department has urged Chinese government officials to eliminate the SCF, as well as other coercive birth limitation measures. UNFPA has urged experimentation with the fee in UNFPA program counties with a view towards elimination by the end of the current program. The Chinese government has suggested that because the SCF is specifically prescribed in national law, local governments do not have authority to completely eliminate or modify the fee. Other coercive measures in place in China include cutting off state-funded education or health care benefits for ‘‘out of plan’’ children, loss of employment opportunities due to severe fines and penalties. National and Provincial Chinese government officials have declined or been unable to assure us that penalties such as demotion or loss of job are not also imposed in countries where UNFPA has activities. Authorities continued to reduce the use of targets and quotas, although over 1,900 of the country’s 2,800 counties continued to use such measures. Authorities using the target and quota system require each eligible married couple to obtain government permission before the woman becomes pregnant. In many counties, only a limited number of such permits were made available each year, so couples who did not receive a permit were required to wait at least a year before obtaining permission. Counties that did not meet targets and quotas often required women of legal child-bearing age to have a first child without prior permission.

The country’s population control policy relies on education, propaganda, and economic incentives, as well as on more coercive measures such as the threat of job loss or demotion and social compensation fees. Psycho- logical and economic pressure were very common; during unauthorized pregnancies, women sometimes were visited by birth planning workers who used the threat of social consequences to pressure women to terminate their pregnancies. The fees were assessed at widely varying levels and were generally extremely high. Reliable sources reported, for example, that the fee required to have a child in the city of Guangzhou was equivalent to eight times the average worker’s annual disposable income. Local officials have authority to adjust the fees downward and did so in many cases. Additional disciplinary measures against those who violated the limited child policy by having an unapproved child included the withholding of social benefits such as health care, job loss or demotion, loss of promotion opportunity, expulsion from the Party (membership in which was an unofficial requirement for certain jobs), and other administrative punishments, including in some cases the destruction of property. These penalties sometimes left women little practical choice but to undergo abortion or sterilization. Rewards for couples who adhered to birth limitation laws and policies included monthly stipends and preferential medical and educational benefits. In the cases of families that already had two children, one of the parents was usually pressured to undergo sterilization.

China: UNFPA’s Country Programmes focus on voluntary, client-oriented family planning services with a range of choices and options.’’

UNFPA has made a significant contribution to improving reproductive health knowledge, reducing the proportion of sterilization and abortions, reducing maternal mortality and increasing the proportion of births by skilled attended deliveries. ‘‘UNFPA does not support China’s one-child policy, and has proactively engaged in serious dialogue with the Chinese government on this matter in a spirit of cooperation. China is committed to the ICPD and its steadily, incrementally and firmly moving beyond demographic targets towards a voluntary and provincial-level FP (family planning) approach. UNFPA has been catalytic in fostering, supporting and guiding the transition.’’

UNFPA’S FIFTH COUNTRY PROGRAMME FOR CHINA

Much of UNFPA’s ‘‘input,’’ i.e., its programs, goals, and activities, in China is designed to assist China in ‘‘forming new manpower strategies and population policies,’’ as well as ‘‘to improve the social security system and the social compensation fee. . . .’’ The goals of its current program (CP5), building on those of its previous program (CP4), continue to focus on the Chinese government’s commitment to the ICPD and China’s efforts to achieve individual and individual and family planning program.” The goals of its previous program (CP4), building on those of its previous program (CP4), continue to focus on the Chinese government’s commitment to the ICPD. China is committed to the ICPD and its goals of its current program (CP5), building on those of its previous program (CP4), continue to focus on the Chinese government’s commitment to the ICPD and thus toward achieving individual and individual and family planning. The UNFPA-China agreement sets as a target to eliminate the SCF, as well as other coercive birth limitation measures. UNFPA has urged experimentation with the fee in UNFPA program counties with a view towards elimination by the end of the current program. The Chinese government has suggested that because the SCF is specifically prescribed in national law, local governments do not have authority to completely eliminate or modify the fee. Other coercive measures in place in China include cutting off state-funded education or health care benefits for ‘‘out of plan’’ children, loss of employment opportunities due to severe fines and penalties. National and Provincial Chinese government officials have declined or been unable to assure us that penalties such as demotion or loss of job are not also imposed in countries where UNFPA operates.

The Department has urged Chinese government officials to eliminate the SCF, as well as other coercive birth limitation measures. UNFPA has urged experimentation with the fee in UNFPA program counties with a view towards elimination by the end of the current program. The Chinese government has suggested that because the SCF is specifically prescribed in national law, local governments do not have authority to completely eliminate or modify the fee. Other coercive measures in place in China include cutting off state-funded education or health care benefits for ‘‘out of plan’’ children, loss of employment opportunities due to severe fines and penalties. National and Provincial Chinese government officials have declined or been unable to assure us that penalties such as demotion or loss of job are not also imposed in countries where UNFPA operates.

The 2004 State Department Country Report on Human Rights Practices China, with regard to violation of rights in China, does not make a point about information regarding its China program. The Director of UNFPA’s Asia and Pacific Division, Sultan Aziz, wrote to the Department, highlighting UNFPA’s concerns about UNFPA’s shares with the United States ‘‘over aspects of China’s family planning strategy that could lead to coercion.’’ In particular, he made the following point about UNFPA’s view of it approach and progress in China: ‘‘UNFPA, like all UN organizations, is guided by international human rights covenants and principles in all our programs. Using the ICPD principles as our platform, UNFPA’s engagement in China: UNFPA’s view of it approach and progress in China: UNFPA, like all UN organizations, is guided by international human rights covenants and principles in all our programs. Using the ICPD principles as our platform, UNFPA Country Programmes focus on voluntary, client-oriented family planning services with a range of choices and options.’’

UNFPA has made a significant contribution to improving reproductive health knowledge, reducing (the) proportion of sterilization and abortions, reducing maternal mortality and increasing the proportion of births by skilled attended deliveries. ‘‘UNFPA does not support China’s one-child policy, and has proactively engaged in serious dialogue with the Chinese government on this matter in a spirit of cooperation. China is committed to the ICPD and thus toward achieving individual and individual and family planning. The goals of its previous program (CP4), building on those of its previous program (CP4), continue to focus on the Chinese government’s commitment to the ICPD and China’s efforts to achieve individual and individual and family planning program.” The goals of its current program (CP5), building on those of its previous program (CP4), continue to focus on the Chinese government’s commitment to the ICPD and thus toward achieving individual and individual and family planning. The UNFPA-China agreement sets as a target to eliminate the SCF, as well as other coercive birth limitation measures. UNFPA has urged experimentation with the fee in UNFPA program counties with a view towards elimination by the end of the current program. The Chinese government has suggested that because the SCF is specifically prescribed in national law, local governments do not have authority to completely eliminate or modify the fee. Other coercive measures in place in China include cutting off state-funded education or health care benefits for ‘‘out of plan’’ children, loss of employment opportunities due to severe fines and penalties. National and Provincial Chinese government officials have declined or been unable to assure us that penalties such as demotion or loss of job are not also imposed in countries where UNFPA operates.

The 2004 State Department Country Report on Human Rights Practices China, with regard to violation of rights in China, does not make a point about information regarding its China program. The Director of UNFPA’s Asia and Pacific Division, Sultan Aziz, wrote to the Department, highlighting UNFPA’s concerns about UNFPA’s shares with the United States ‘‘over aspects of China’s family planning strategy that could lead to coercion.’’ In particular, he made the following point about UNFPA’s view of it approach and progress in China: ‘‘UNFPA, like all UN organizations, is guided by international human rights covenants and principles in all our programs. Using the ICPD principles as our platform, UNFPA Country Programmes focus on voluntary, client-oriented family planning services with a range of choices and options.’’
planning officials emphasized education, improved reproductive health services, and economic development, and they eliminated the target and quota systems for limiting births. However, these counties retained the birth limitation policy, including the requirement that couples employ effective birth control methods, and enforced it through other means, including compensation fees. Subsequently, 800 other counties also removed the target and quota system and tried to replicate the UNFPA project by emphasizing the advantages and informed choice of birth control methods. In April, a new UNFPA program began in 30 counties. Under this program, officials defined a list of “legitimate rights of reproduction according to law,” including the rights to choose contraception and right to legal remedies, among others.

**Jiangsu Province Birth Limitation Regulations Excerpts**

**CHAPTER 1 GENERAL PRINCIPLES**

**Article 5**

Local people’s governments at all levels within the province shall take integrated measures to control the size of the population and to improve its quality, and shall implement population and family planning programs. . . .

**Article 7**

Citizens have the right to reproduce and the obligation to practice family planning in accordance with the law. . . .

**CHAPTER 3 FERTILITY REGULATION**

**Article 21**

A man and a woman who have been legally registered as married may have one child, provided that neither has had a child previously.

**Article 22**

Married couples meeting any of the following conditions may apply to give birth to one additional child:

- The couple has only one child, and that child is certified by a pediatric illness and disability authentication institution to have a disability, other than a serious genetic disability, that cannot at present be treated, or their marriage shall pay social compensation fees in the amount of 0.5 to 2 multiples of the basic standard the per capita annual net income of rural residents in the township (town in the year prior to the child’s birth).
- The couple has only one child, who is a daughter. This rule shall apply to those whose parent is a rural resident and any of the following conditions are met:
  - The husband is a rural resident, and the [couple] has only one child which is a daughter.
  - The wife is a rural resident and any of the following conditions are met:
    - The husband has no brothers and only one sister, and [the couple] has only one child which is a daughter.
    - The husband, who has one brother and [the couple] has only one child which is a daughter.
    - The wife is a rural resident and any of the following conditions are met:
      - The husband has one brother or has legally had two children, and the [couple] has only one child which is a daughter.
      - The husband has no brothers and only one sister, and [the couple] has only one child which is a daughter.
      - The couple permanently resides in a coastal reclamation area with population density not greater than one person per five mu of land (calculated on a per village basis), and has only one child which is a daughter.

One spouse has been continuously occupied in ocean fishing for five years or more, is currently employed in ocean fishing, and the couple has only one child which is a daughter.

**CHAPTER VI LEGAL LIABILITY**

**Article 44**

A couple that gives birth to a child not in accordance with these regulations shall pay the social compensation fee.

For urban residents, social compensation fees shall be calculated by taking as the basic standard the per capita annual net income of urban residents in the municipality with districts or in the country (city) in the year prior to the child’s birth. For rural residents, social compensation fees shall be calculated by taking as the basic standard the per capita annual net income of rural residents in the township (town in the year prior to the child’s birth). The specific standards for the social compensation fees to be paid in accordance with paragraph one of this article are:

- Those who have one additional child not in accordance with the provisions of these regulations shall pay social compensation fees in the amount of four multiples of the basic standard.
- Those who have had two or more additional children not in accordance with the provisions of these regulations shall pay social compensation fees in the amount of five to eight multiples of the basic standard.

The Chair announced that the noes appeared to have it.

Mrs. MALONEY. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentlewoman from New York (Mrs. MALONEY) will be postponed.

**SEQUENTIAL VOTES POSTPONED IN COMMITTEE OF THE WHOLE**

The Chair will reduce to 5 minutes the time for any electronic vote after the first vote in this series.

**AMENDMENT NO. 11 OFFERED BY MR. PAUL**

The CHAIRMAN. The pending business is the demand for a recorded vote on the amendment offered by the gentleman from Texas (Mr. PAUL) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Chair will reduce to five minutes the time for any electronic vote after the first vote in this series.

The Clerk redesignated the amendment.
The CHAIRMAN. A recorded vote has been demanded. A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayeys 65, noes 357, not voting 11, as follows:

AYES—192

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT NO. 6 OFFERED BY MRS. MALONEY

The CHAIRMAN (during the vote).

Mr. CASTLE changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT NO. 6 OFFERED BY MRS. MALONEY

The CHAIRMAN. The pending business is the demand for a recorded vote on amendment No. 6 offered by the gentlewoman from New York (Mrs. MALONEY) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment. The Clerk redesignates the amendment.

RECORDED VOTE

The CHAIRMAN. A recorded vote has been demanded.

A recorded vote was ordered.

The CHAIRMAN. This will be a 5-minute vote. The vote was taken by electronic device, and there were—ayes 192, noes 233, not voting 8, as follows:

[Not Reported]
of our civil liberties. I was also pleased that dangerous provisions of the PATRIOT Act. I can no longer support the legislation. Under-funded. While I have supported this account are all examples of successful and telecommunications facilities and planning agencies appropriations act, 2006''.

The SPEAKER pro tempore. Pursuant to House resolution 314, the previous question is ordered. Is a separate vote demanded on any amendment?

Mr. MOLLOHAN. Mr. Speaker, I demand a separate vote on amendment No. 28 offered by the gentleman from Iowa (Mr. King).

The SPEAKER pro tempore. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. Mr. FOLEY having assumed the chair, Mr. Blumenauer, do pass.

The question is on the amendment.

Mr. Burton of Indiana. Mr. Speaker, I demand a recorded vote. A recorded vote was ordered.

The vote was taken by electronic device, and there being 218 ayes, 208, not voting 7, as follows:

The Speaker pro tempore announced that the noes appeared to have it.
ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tem (Mr. FOLEY) (durate the vote), Members are advised that there are two minutes remaining in this vote.

So the amendment was agreed to. The result of the vote was announced as above recorded.

Stated for:

Mr. FOLEY. Mr. Speaker, on roll call No. 267, the King of Iowa Amendment, I inadvertently voted "no." I meant to vote "aye." The SPEAKER pro tem. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and printed a third time, and the third reading.

The SPEAKER pro tem. The question is on the passage of the bill.
Ms. HARMAN changed her vote from "yea" to "nay."

So the previous question was ordered.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the resolution.

A motion to reconsider was laid upon the table.
be confined to the subject of the International Atomic Energy Agency and shall not exceed 10 minutes equally divided and controlled by the chairman and ranking minority member of the Committee on International Relations.

(4) Consideration of amendments printed in subpart D of part I of the report of the Committee on Rules shall begin with an additional period of general debate, which shall be confined to the subject of human rights and shall not exceed 20 minutes equally divided and controlled by the chairman and ranking minority member of the Committee on International Relations.

(5) Consideration of amendments printed in subpart E of part I of the report of the Committee on Rules shall begin with an additional period of general debate, which shall be confined to the subject of the Oil-for-Food Program and shall not exceed 20 minutes equally divided and controlled by the chairman and ranking minority member of the Committee on International Relations.

Sec. 3. It shall be in order at any time during consideration of the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore (Mrs. Biggert). The gentleman from Utah (Mr. Bishop) is recognized for 1 hour.

Mr. Bishop of Utah. Mr. Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentleman from California (Mr. LaTos), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

This resolution waives all points of order against consideration of the Henry J. Hyde United Nations Reform Act of 2005, and provides a structured rule for consideration of 28 different amendments, including an amendment in the nature of a substitute offered by the minority.

The rule provides for the offering of the 28 specified amendments according to subject areas as designated in the text of the resolution, and with a cumulative total of 90 minutes of general debate to be divided equally by the chairman and ranking minority member of the Committee on International Relations.

Madam Speaker, I am pleased to stand before you in strong support of this rule and the underlying legislation, H.R. 2745, the Henry J. Hyde United Nations Reform Act of 2005. Madam Speaker, with 28 amendments in order, to poorly paraphrase Winston Churchill, never will so much be said by so many about so little, in this case, just a single subject act.

It is fitting, though, Madam Speaker, that this bill be named after our esteemed colleague to my right, the gentleman from Illinois (Chairman Hyde), and the gentleman from California (Ranking Member Lanos), who has served and is serving with such distinction and integrity and has been a stalwart in these halls for the past 30 years. He is to be commended for putting together a well-thought-out, comprehensive measure aimed at helping to bring about long-sought reforms within the United Nations.

I commend also the gentleman from California (Mr. LaTos), the ranking member, as well for the long-standing cooperation and dedication to bipartisanship in the area of U.S. policy and diplomacy which is evident in many important aspects of this legislation.

In fact, Madam Speaker, when these two distinguished gentlemen were testifying before the Committee on Rules on this bill, I was struck by the fact that the House, and indeed the entire Nation, is the beneficiary of decades' worth of their collective wisdom and firsthand experience.

We spent the last few weeks discussing resolutions and appropriations, Interior, State and Justice appropriations, and these acts have a wide range of topics and generated a multitude of amendments. This specific act has generated 28 potential amendments on a single topic, and, Madam Speaker, I know my colleagues are going to love listening to all 28 of those amendments, but let that not overshadow the reality of this bill.

This bill is unusual in the bipartisan unity of the sponsors. When it comes to the issue of United Nations reform, I was also impressed that both gentlemen, the gentleman from Illinois (Chairman Hyde) and the gentleman from California (Ranking Member Lanos), small to to mention one mind when it relates to the necessity of reforms in the wake of continued scandals within various United Nations functions.

There was also a unique, bipartisan unity in supporting the need for a penalty to follow failure of reform. These reforms are necessary, and I believe they would trigger that penalty, which differences I know my colleagues on the other side of the aisle will bring forward, but there can be no doubt as to the underlying need of this penalty phase. That is telling.

To put it in a nutshell, Madam Speaker, this legislation is long overdue. It would require 39 very specific reforms within the areas of U.N. budgeting, oversight, accountability, and human rights. It provides clarity and a reasonable timetable under which the U.N. must act. With the U.S. footing the largest share of dues of any Nation, a share consistent with our voice, this act would provide real and real incentives to get the job done. To not require such withholdings would only create a paper tiger.

As an old teacher, I learned that I never made a threat that I was not willing to carry out. If students ever thought I was not seriously going to follow through on my disciplinary commitments, I would lose all credibility and lose both the respect and the cooperation of the kids. It would create an atmosphere of chaos. No learning would take place. Such an atmosphere of distrust cannot be part of our foreign policy. We have seen that too often, and such a potential cannot be ignored.

We are indeed precedents for what we are trying to do both in the 1980s and 1990s when actions by Congress ensured change within the United Nations.

It is regrettable, Madam Speaker, that this bill is even necessary. It is regrettable that the United Nations would not undertake to clean up its own act in the wake of the oil-for-food scandal, irregularities in the accounting and uses of its funds, misconduct by entrenched U.N. bureaucrats, and the deplorable state of the U.N. Commission on Human Rights.

We all witnessed the appalling lack of resolve and consistency in the U.N. when it failed to live up to and enforce the demands stemming from Saddam Hussein's murderous regime. When I am at home in my district, some of my constituents will say to me that we ought to pull out of the United Nations entirely. It is hard to argue with many of them who say that the U.N. is merely a haven for corruption, waste and, frankly, anti-Americanism.

We must do all we can to try and rectify all these problems, and to not act would indeed be irresponsible. This act sends an unmistakably clear message that specific reforms must be enacted or face real consequences. If these reforms are not enacted, the future looks bleak and will only increase the calls to replace the United Nations with a more updated handling of international disputes.

In conclusion, Madam Speaker, this rule is a good and fair rule. It made every single amendment in order, all 28, which were filed before the Committee on Rules. In short, the only complaint that one may have with this rule is that it may be somewhat parsimonious in its general debate, and we will provide in those 28 amendments a
long and wide-ranging debate of all of these important issues.

With that, Madam Speaker, I urge adoption of this rule.

Madam Speaker, I reserve the balance of my time.

Mr. HASTINGS of Florida. Madam Speaker, I yield myself 7 minutes, and I thank the gentleman from Utah (Mr. Bishop) for yielding me the time.

Let me quote, this would undermine American credibility at the United Nations. It would undermine our effectiveness. Those are the words of the distinguished Under Secretary of State Nicholas Burns, who said of the bill that we are considering, it will call into question our reliability as the founder and host Nation and leading contributor to the United Nations and would also harm our image worldwide.

My colleague from Utah pointed to the bipartisanship. I gather that he would agree that it is bipartisan when Nicholas Burns and Alcee Hastings and other Democrats and this administration join in opposing this measure.

In my opinion, this bill takes a shortsighted approach to reforming the United Nations. There are decent, necessary and desirable provisions in this legislation, but, Madam Speaker, this bill takes well-thought-out ideas and pushes them far into the realm of demagoguery, demonstrating a contempt for the United Nations that is entirely unfounded.

The United Nations Reform Act is yet another example of the majority’s willingness to punish over disagreement and force its will upon those who would otherwise disagree. The draconian requirements of the underlying legislation will affect everything from the promotion of human rights in the organization to the one issue, and that is how to end the conflict in those countries or the role of the United States in effecting the withdrawal of Syrian military forces from Lebanon.

In March of 2005, Secretary-General Annan released a string of initiatives to combat terrorism, proposals that the United States Government has openly supported. And in the Sudan, the United States has committed aid workers, troops, police, and money to ensure the success of peace accords.

The U.N. also continues to provide a global voice and to be a powerful advocate for change around the world. How many millions of children’s lives have been saved through UNICEF? How many have been made better through development assistance, cultural programs, and advances in education? Can we really justify cutting off our support for all of these efforts simply because the United States does not implement every single one of our reform proposals?

Madam Speaker, that is the reason I will be supporting the Lantos-Shays substitute to this bill. Eleanor Roosevelt, our country’s first representative to the United Nations, remarked, “Do what you feel in your heart to be right, for you will be criticized anyway. The only sin is to go along with what we are trying to do today.”

Adlai Stevenson, that great champion of world diplomacy, said, “The whole basis of the United Nations is the right of all nations, great or small, to have weight, to have a vote, to be attended to.” Now, more than 40 years later, the underlying legislation seeks to eliminate the right of any country besides our own to chart the future of the United Nations.

The only way for us to reform the United Nations is to work within it rather than threatening to take our ball and go home. We will not be successful by withholding the funds that are needed to do the job.

Thanks to the Bush administration, the United States’ international reputation as a peace-loving Nation is in tatters. Now my friends on the other side want to pass a bill which will withhold peacekeeping funds while conflicts rage around this world unchecked. This is irresponsible, immoral and a foreign policy disaster.

Everyone in this body realizes that the United Nations is not a perfect organization, but on balance, the United Nations has been and will continue to be good for America on a range of global issues.

Let us not forget the thousands of United Nations personnel who risked their lives in Iraq and Afghanistan to bring about successful and free elections in those countries or the role of the United Nations in effecting the withdrawal of Syrian military forces from Lebanon.

The reforms we are seeking are not going to be perfect, but they will still be criticized even if we adopt the substitute and these reforms are pushed through. But I would rather do the right thing and be criticized than give up and go home because things did not go in the percent of the way that we wanted to.

The Lantos-Shays substitute takes a realistic approach to reforming the United Nations. It includes virtually all of the reforms in H.R. 2745, with one crucial difference. The substitute gives the Secretary of State the flexibility to make decisions regarding funds based on the needs of the United States. The substitute avoids the counterproductive all or nothing approach of this measure, while still promoting the reforms everyone agrees are needed.

Madam Speaker, legislating unrealistic ultimatums will not achieve the goal that we are seeking. I urge my colleagues to oppose this ill-advised and shortsighted legislation.

Madam Speaker, I reserve the balance of my time.

Mr. BISHOP of Utah. Madam Speaker, I yield 1 minute to the distinguished gentleman from Illinois (Mr. Hyde), the chairman of the Committee on International Relations.

Mr. HYDE asked and was given permission to revise and extend his remarks.

Mr. HYDE. Madam Speaker, I want to respond to my friend from Florida that the language that substitutes for debate around here is troublesome. Demagogic, I heard the gentleman say. Inflammatory, gun-booted, and contempt for the United Nations. None of those inflammatory terms in my judgment, apply to this debate.

And I suggest that we can disagree as to the one issue, and that is how to enforce the reforms we all agree are needed, without calling each other names or disparaging our motives.

Mr. HASTINGS of Florida. Madam Speaker, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Florida.

Mr. HASTINGS of Florida. I thank the chairman, and I agree with him regarding our rhetoric. When I made my references I was referring to the Bush administration and not to the distinguished chairman and other Members in the body. And I stand by those statements, Mr. Chairman.

Mr. HYDE. Well, reclaiming my time, Madam Speaker, I thank the gentleman, but the Bush administration is on your side, not mine, this time.

Mr. HASTINGS of Florida. Madam Speaker, I yield 4 minutes to the distinguished gentlewoman from California (Ms. Matsui), my colleague on the Committee on Rules.

Ms. MATSUI asked and was given permission to revise and extend her remarks.

Ms. MATSUI. Madam Speaker, I thank the chairman and agree with him regarding our rhetoric. When I made my references I was referring to the Bush administration and not to the distinguished chairman and other Members in the body. And I stand by those statements, Mr. Chairman.

Mr. HYDE. Well, reclaiming my time, Madam Speaker, I thank the gentleman, but the Bush administration is on your side, not mine, this time.

Mr. HASTINGS of Florida. Madam Speaker, I yield 4 minutes to the distinguished gentlewoman from California (Ms. Matsui).
rights, peaceful resolution of conflict, and respect for international law and conventions. However, the reality of the U.N.’s composition of 191 member states, often with 191 different national interests, has challenged these high ideals. It is here that we need reforms.

Many are examining how to meet these challenges and improve the weaknesses of the organization: the Secretary-General’s report, the U.N. High-Level Advisory Panel, the Volcker Commission Investigation, the Mitchell-Gingrich report. And each of them, in addition to the bill we are debating today, is circling around the same group of reforms. But the central debate here on the House floor is not about what the reforms should be. Madam Speaker, the debate here is how you sell them.

There are 191 individual members of the organization that must agree on the reforms, sometimes unanimously, if we are to change an existing organization than it already is. And this is where I diverge from some of my colleagues.

I share the views of the eighty former U.S. ambassadors to the United Nations. I do not believe harsh, automatic penalties hold any chance of garnering support among the many nations needed to enact these reforms. I must note that their experience spans each of the five presidencies, from Jimmy Carter to George W. Bush. We should heed their sage advice.

For this reason, I support the Lantos-Shays substitute, which authorizes the Secretary of State to withhold a portion of our U.N. dues at his or her discretion instead of the severe automatic penalties.

We should not advocate a policy of withdrawal from the world community on the one hand and ask for it to engage on the other. But H.R. 2745 would stir up exactly that resentment in its current form, resentment that will kill any hope for change.

In closing, Madam Speaker, the United Nations has a genuine opportunity to reform and, with our leadership, the potential for great success. We must add to this momentum by supporting the Lantos-Shays substitute.

Mr. Bishop of Utah, Madam Speaker, I am pleased to yield 3 minutes to the gentleman from Florida (Mr. Crenshaw).

Mr. CRENSHAW. I thank the gentle- man for yielding me this time, Madam Speaker; and I rise in strong support of this rule.

I think that the underlying legis- lation is much needed and long overdue. I have been working to help reform the United Nations since I first came to Congress, and I have not found any- body yet that disagrees with the fact that we very, very direly need to re- form the United Nations. This once- utopian organization has degenerated into one that is largely nonfunctional and on the verge of becom- ing irrelevant, and that is why we need these reforms and we need them now.

There are a lot of areas that this legis- lation deals with, whether it is cro- nyism, corruption, or financial mis- management. But I just want to stress one that relates to budgetary reform and the way that people vote on that. Right now, the 128 nations that con- tribute about 22 percent of the general budget of the United Nations and 28 percent of the peacekeeping budget. If you take the last 128 nations that con- tribute, if you put all their dues together, they add up to less than 1 percent; yet they have the same vote. Those 128 nations have the same vote as the United States. In fact, if you take the top three countries, they con- tribute over half the dues, and yet ev- erybody has the same vote on budget- ary matters.

Imagine a family, if you will, where the dad goes out and works all year and provides income for his family. And at the time to decide how to spend it, the four kids get up and say, this is how we have to spend it. This is what we want that is where we want to go on our vacation, this is what hotel we want to stay in. Well, that is the way the United Nations works, and that is why we need the Henry Hyde U.N. Reform Act we are considering today.

One of the reforms in this act would say that when you vote on budgetary matters, then you weight those votes. That would do two things: number one, it would mean that the countries that contribute more would have more leverage in making sure that the money gets spent where it is supposed to be spent and in making sure that they get the results they want to get. And also would encourage some of the other countries to contribute more money to the dues of the United Nations.

One of the areas we often hear critici- zed is this area of cronyism. It is un- believable, but the United Nations, if you count the contract employees, they have over 43,000 employees. To put that in perspective, a lot of multibillion dollar corpora- tions do not have that many employ- ees. Ebay, people have heard of that, is a company worth $32 billion, and the United Nations has five times as many employees as they have. Anheiser Busch, which makes and sells beer around the world, the U.N. has a third more employees than they have.

So I think that we got a handle on how the money that American taxpayers send off to the United Nations gets spent, and this haphazard budgetary process can be changed by weighted voting.

There is no doubt in my mind that the time is now for reform at the U.N. This organization has become a shadow of its former self and likely bears little resemblance to what its founders had envisioned. Amid charges of cro- nyism, corruption, and financial scandal in recent months, the relevance and reputation of the United Nations has deteriorated drastically. What’s more, the U.N. appears to engage in anti-American sentiment for sport, promoting it around the globe.

This is a true slap in the face to the United States. After all, we are going to contribute 22 percent of the U.N.’s general budget and 28 percent of its peacekeeping budget this year. This means a funding request for Fiscal Year 2006 of $439 million by President Bush. The United States is the largest contributor of U.N. dues, paying more than 76 percent of all dues paid while the 128 countries with the lowest dues ac- count for less than 1 percent of dues paid. However, among the 192 member countries, everyone’s vote is worth the same. Imagine what a family would do, when the dad goes out and works all year, allowing the children to dictate where the family goes, what hotel they stay at, and what activities they do. That’s what is happening at the U.N. right now and that is why we need to support the Hyde Bill. H.R. 2745 calls for weighted voting on budgetary matters. Weighted voting on budgetary matters would give the U.N.’s biggest contributors more leverage to ensure that their money is achieving the purposes for which it is intended. Weighted voting would encourage other countries to increase their contribution to the organization.

The State Department said the U.S. paid nearly $3.3 billion in contributions to the U.N. system in 2004. And who knows where that all went? Some of that money went to fund patronage jobs of which the U.N. has many. Between full-time employees and contract workers, the U.N. employs almost 43,000 people. Let me put that in perspective: 43,000 workers is more than five times more than the top 10 companies employ on eBay, a company worth almost $52 billion. Another kicker: total U.N. employment is nearly one third greater than that of Anheuser-Busch, another multi-billion dollar company.

And with a stated aim, we have an obligation to be good stewards of the taxpayers’ money. It is our responsibility to bring reform to the U.N.’s haphazard budget practices and the Henry Hyde U.N. Reform Act of 2005 is a step toward accomplishing that goal. The American people deserve nothing less.

Madam Speaker, I urge adoption of the rule and the underlying bill.

Mr. HASTINGS of Florida. Madam Speaker, I am very pleased to yield 8 minutes to my very good friend, the gentleman from California (Mr. LANTOS), the distinguished ranking mem- ber of the Committee on International Relations.

Mr. LANTOS. Madam Speaker, I thank the gentleman for yielding me this time. First, I want to thank my friend from Utah for his most gracious words at the outset of this debate, and I would like to commend my distin- guished colleague, the gentleman from Florida, for his leadership on foreign policy matters and for his invaluable assistance on the Com- mittee on Rules.

Madam Speaker, as we embark upon today’s historic debate, at the outset I would like to publicly express my re- spect, my admiration, my affection, and my friendship to the chairman of the House Committee on International Relations. The gentleman from Illinois (Mr. Hyde) has been a giant in this body for many years. His contributions to the work of the Congress and to the welfare of our Nation are without lim- its, and it has been one of the great
privileges of my congressional career to have had the opportunity of serving on his committee.

Madam Speaker, let me make it clear that there is no Member of this body who is opposed to far-reaching reforms at the United Nations. We must approve legislation to fight corruption, hypocrisy, ineffectiveness, waste, and anti-Americanism at this important global institution. There is no disagreement, Madam Speaker, between Chairman Hyde and me as to whether the United Nations is in need of a reform. Where the two parts ways is on how to accomplish this incredibly important goal.

Madam Speaker, the good Lord gave us Ten Commandments. The legislation before the House today gives us 39.

While I know there has been some inflation over time, there is no rational explanation for such an explosion of legislative commandments.

The United Nations Reform Act is truly a guillotine on autopilot. If the United Nations accomplishes 38 out of 39 commandments, but only accomplishes one-half of the last commandment, these states will automatically cut off 50 percent of our contributions to the United Nations. Secretary of State Rice will have absolutely no choice in the matter. The President of the United States will have no choice in the matter, the Congress will have no choice in this matter.

The bill under consideration is also a death blow to United Nations peacekeeping. Upon enactment of this legislation, the United States will be forced to oppose any new or expanded peacekeeping mission until a comprehensive series of peacekeeping reforms are implemented, many of which we all know will take years to accomplish. Rwandan-style genocides could unfold before our eyes, and the United Nations would have to turn its back.

Madam Speaker, I agree that peacekeeping desperately needs reform, but it boggles the mind to think that this body would approve legislation which automatically cuts off all U.S. support for U.N. peacekeeping unless congressionally mandated commandments are immediately implemented.

We are not alone, Madam Speaker, in our deep opposition to the United Nations Reform Act in its current form. This bill is so massive in its administration is strongly opposed to this legislation. Under Secretary of State Nicholas Burns said yesterday that this legislation "would undermine American credibility at the United Nations and would call into question our reliability as the founder and host Nation and leading contributor to the United Nations."

Eight of our former Ambassadors to the United Nations, Republicans and Democrats alike, ranging from Ambassador Patrick J. Kennedy to Ambassador Danforth, a former distinguished Republican Senator, all oppose this legislation.

Madam Speaker, my Republican colleague, the gentleman from Connecticut (Mr. SHAYS), and I will offer a substitute amendment to promote U.N. reform effectively. Our substitute, which is rational, responsible and bipartisan, would be a rigorous yet automatic dictate that automatically cuts 50 percent of our dues. This provision makes the bill, which has many good provisions in it, a guillotine on autopilot. I urge all of my colleagues to vote for the Lantos-Shays substitute.

Mr. BISHOP of Utah. Madam Speaker, I yield 4 minutes to the gentlewoman from Florida (Ms. ROS-LEHTINEN), one of the leading voices on the Committee on International Relations.

Ms. ROS-LEHTINEN. Madam Speaker, I thank the gentleman for yielding me this time.

We are all sinners even though we have the Ten Commandments, but can Members imagine how much more sin we might be committing had those commandments been mere suggestions? That is why the Henry Hyde U.N. Reform Act does have commandments that the U.N. should and must adhere to. I rise in strong support of this bill.

On Monday as we were preparing for the debate on reforming the United Nations, a constituent of mine was at one of the sessions of the Economic and Social Council. He committed himself to being an active member of our United Nations bodies, and he was immediately struck by the almost Orwellian and secretive nature of the proceedings, as well as by the vitriolic, anti-American attacks in which the chairman and other members of the committee were engaged.

My constituent made several observations to me that reaffirmed that lives, not just policies, are at stake in the debate on reforming the United Nations, a constituent of mine was at one of the sessions of the Economic and Social Council. This constituent sent me a postcard like this one that reaffirmed to me the need for this. It had a note encouraging the Congress to overhaul the United Nations, and the picture on the postcard is a sculpture of a broken postcard like the one that reaffirmed to me the need for this. It had a note encouraging the Congress to overhaul the United Nations, and the picture on the postcard is a sculpture of a broken

However, how can the United Nations be considered a legitimate source of stability or an instrument for the protection of the most vulnerable populations when it is plagued with graft and corruption, when sexual predators and traffickers in human beings are part of the policing and peacekeeping mission, and when the Human Rights Commission is a country club of rogue states made up of dictators and tyrants and thugs?

Reforming the United Nations is necessary for its survival, and it is long overdue. However, reform must not be limited to rearranging the deck chairs, but instead to correcting the organization's serious institutional and systemic flaws. The U.N. has paid lip service to nominal efforts to reform itself, and the few times that those promises have been kept, it is when the United States has leveraged its financial support for the organization and its specialized agencies.

For this reason, the Henry Hyde U.N. Reform Act of 2005 mandates spending cuts in specific programs, redirects funds to priority areas, and, yes, holds 50 percent of U.S.-assessed dues if certifications are not made in critical areas. Those commandments must be adhered to.

If we are serious about making the United Nations relevant again, and I think in a bipartisan way we are, if we are serious about reforming it to reflect its core mission, and I think in a bipartisan way we are, if we are serious about saving the United Nations from itself, then we must render our overwhelming support for the Henry Hyde U.N. Reform Act.

I would just like to close by saying that it is very fitting that this bill before us should have the name of our distinguished chairman of the Committee on International Relations, the gentleman from New York (Mr. Hyde), who has been the conscience of the House, the voice of the people for so many years, has had such a distinguished public service career in the House and led us through some very difficult times as chairman of the Committee on the Judiciary as well as chairman of our Committee on International Relations. I am so pleased that this bill before us, which will reform this wonderful peacekeeping institution, will have his name as part of its reform legislation.

Mr. HASTINGS of Florida. Madam Speaker, I am pleased to yield 5 minutes to the gentleman from Massachusetts (Mr. DELAHUNT).

Mr. DELAHUNT. Madam Speaker, I also want to add to the remarks of the gentleman from Florida (Mr. HASTINGS) and our ranking member, the gentleman from California (Mr. LANTOS), who comes to this committee from Illinois (Mr. HYDE). I have served with the chairman both on the Committee on the Judiciary and on the Committee on International Relations. I have profound respect and deep affection for him, but I do not like his bill.

It is clear that there is a consensus that the United Nations needs reform. We want reform. Our allies want reform. The Secretary General wants reform. Just this week a congressionally created task force chaired by the former Speaker of the House Newt Gingrich and the former majority leader Senator George Mitchell issued a report urging adoption of many of the proposals put forward by the Secretary General; but it did not recommend that Congress withhold dues to serve as a catalyst to bring about those reforms. Presumably, they were in agreement with the eight former U.S. Ambassadors to the United Nations, both Republican and Democrat, who stated yesterday in a letter to the congressional leadership, and I would ask my
Mr. BISHOP of Utah. Mr. Speaker. I yield myself such time as I may con-
sume.
I love history. In fact, this is not nec-
essarily unprecedented. The Kasse-
bau-Solomon amendment in 1985 asked in the change and a meaningful change took place. In 1994, we insisted on an oversight committee and an oversight committee took place. And under the bipartisan Helms-Biden ap-
proach, once again we insisted on changes with the United Nations. The United Nations responded to it. This means the bill is keeping a tradition that is his-
torical going back for at least 20 years in this body.
Mr. Speaker, I yield 3/2 minutes to the distinguished gentleman from Indi-
a (Mr. BERTON).
Mr. BURTON of Indiana. Mr. Speak-
er, first of all, let me echo what has been said about the gentleman from Il-
linois (Mr. HYDE). There has never been a finer Member of Congress in the his-
story of this institution than the gen-
tleman from Illinois. He was one of the most eloquent speakers I have ever
known in this House. We really appreci-
ate all his hard work on this bill.
Now, let me say to my friend from Massachusetts, you say you are doing this stuff for 20 years. You cannot do anything to put pressure on the United Nations, because if you do, the whole world is going to hate us. The sky is going to fall. Henny Penny. The State Depart-
ment has been working with the United Nations for the last 20 years that I have been here and working on the Foreign Affairs Committee, Intern-
national Relations now. The problems still exist. The only difference is, it is worse now than it has ever been.
We have got to do something about it. Mr. Bolton needs to be confirmed on the other side because we need a tough guy over there to force the issue. We have got an Oil-for-Food scandal that is growing and growing. The head of the United Nations, the Secretary-
General, said, Oh, I didn’t have any-
things to do with it. We now are finding memos where he talked to the people in the oil industry saying that he would give them unqualified support.
A few months ago, he said, Oh, I never did that, and he said he would never resign under any circumstances. Now he is hedging his bets on that be-
cause the case against him and the Oil-
for-Food scandal is growing and grow-
ing. He is the head man over there. On his watch, everything has been going haywire.
We have got U.N. peacekeeping forces raping women and kids, and nothing has been done about that. We have got all kinds of problems over there and something must be done. How do you do that? We say, Well, let’s follow the same course we have been following for the last 20 years. The State Depart-
ment says, My god! Are you there?
and we’ll do something about it. I have high regard for Condoleezza Rice. I think she is a dynamite lady and going to do a dynamite job. But this body needs to put the hammer by using American taxpayers’ dollars on the U.N. to clean up that mess over there. We cannot go on day after day, week after week, month after month, year after year letting this thing be com-
pletely out of hand.
Mr. Speaker, I talked about the Mitchell and Gingrich report. They said that it is a mess over there. How do you clean it up? You make a change from top to bottom. How do you do that? We won the war or the war or the war, and much of the rest of the world says, Oh, my gosh, we don’t want the United States dictating to us. I can under-
stand that. We are the big guy on the block. They do not want us dictating to them, and we do not want to dictate to them. We want to work with them. But the fact of the matter is they are not listening in many cases and the corruption goes on and on and on, the manmanagement goes on and on and on, and nothing changes.
And the United States keeps pouring in, or almost that much, of the funds out of the taxpayer’s pockets in this country for that body.
How do you change it? You take out the hammer, and the hammer is the money. You say you are going to do this stuff to the world body, the United Nations. If you don’t clean up that mess, we are going to withhold funds. And if we withhold funds, you are going to have a big, big problem over there.
Mr. Speaker, the gentleman from California (Mr. LANTOS) is one of my dearest friends in this place and the gentleman from Massachusetts is not a bad friend, either. We have traveled to-
gether. I have high regard for him, even though he is wrong a lot of the time. But I just want to say, something has to be done. There must be some-
thing in the water in Massachusetts. I do not know. But something has to be done. And what has to be done is we have got to put pressure on the United Nations. If you don’t do that, you are going to withdraw funds. And the best way to do it is to say, ei-
ther you change things over there or we are going to withdraw funds.
Mr. HASTINGS of Florida. Mr. Speak-
er, I am pleased and privileged to yield 3 minutes to my good friend and classmate, the gentlewoman from Cali-
ifornia (Ms. WOOLSEY).
Ms. WOOLSEY. Mr. Speaker, I would like to say a word about the gentleman from Illinois, also. There are probably no two people that are more opposite than the two of us. I want the gent-
leman to know, I am going to miss him when he really does leave the floor.
Mr. Speaker, if H.R. 2745 is enacted, it will be a huge step backward for women around the world, because it would end U.S. funding for CEDAW. CEDAW is the U.N. Convention on the Elimination of Discrimination Against Women, which is the U.N. treaty on the rights of women around the world. CEDAW is a United Nations treaty that supports international standards to discourage sex-based discrimination and encourages equality in education,
health care, employment and all other arenas of public life for all women around the world. This treaty serves as a powerful tool for women worldwide as they fight against discrimination. It also leads to substantial improvements for girls across the world.

The impact of CEDAW can be seen in countries like Australia where the government cited its treaty obligations in passing national legislation against sexual harassment in the workplace based on CEDAW, or in Pakistan where education for girls was mandated by the CEDAW to be introduced in primary schools after treaty ratification in Pakistan, causing sharp increases in female enrollment in their schools.

To date, 170 countries have ratified CEDAW. Sadly, the United States continues to be the only industrialized nation that has not ratified, leaving us in the company of Afghanistan, North Korea, and Iran. It is time to abandon this unfavorable distinction. It is time to be a world leader and a champion of human and women’s rights. We must ratify CEDAW, and we must do it now. That is why I urge my colleagues to co-sponsor my resolution on CEDAW, H. Res. 67, to support the Lantos amendment and vote against this base bill unless we do something drastically to improve it.

Mr. BISHOP of Utah. Mr. Speaker, I am pleased to yield 2 minutes to the gentlewoman from North Carolina (Ms. FOXX) for her service and this bill.

Ms. FOXX. I thank the gentleman from Utah (Mr. BISHOP) for yielding me the time.

Mr. Speaker, I rise today in support of the rule and the bill. I also want to thank the gentleman from Illinois (Mr. HYDE) for his service and this bill. I had some prepared remarks, but I have got to respond to the last speaker who talked about CEDAW. It seems to me that is a perfect example of what is wrong with the United Nations and our funding the United Nations. What a joke CEDAW is. We are the only industrialized country that has not signed that treaty. Women do better here with a profound sense of gratitude for the leadership that my mentor and illustrious career in this Congress. I rise today in support of this rule and the bill and thank Mr. HYDE for his service and this bill. The United Nations Charter includes some very laudable goals, but when the rubber meets the road, the U.N. has failed miserably to put these ideals into practice, especially in recent years.

As a founding member of the U.N. and a permanent member of the U.N. Security Council, we have a duty to insist on a higher standard. And as Members of Congress, we have a duty to ensure accountability of each and every American taxpayer dollar that goes to the U.N. From the U.N. Oil for Food program to its lack of action with respect to the genocide in Darfur, Sudan to the horrendous human rights abuses by U.N. peacekeeping staff during their mission in the Congo, the U.N. is rife with fraud and abuse and needs reform.

This bill includes formidable reforms including: Shifting 18 programs from the regular assessed budget to voluntary funded programs so their funding would not be automatic; all new programs started by the U.N. to include sunsetting provisions; cuts and streamlining in the funding for the 15,484 conferences and scheduled meetings that occurred in 2004 and 2005, some of which cost $7–$8,000 per hour; creation of an ethics office to provide oversight over the U.N. budget and financial disclosure form.

And two of the most important items this bill requires are to direct the U.S. Permanent Representative to aggressively pursue a definition of terrorism and to mandate that the U.N. adopt criteria for membership on any human rights body.

The U.N. counts some of the world’s leading human rights violators and state sponsors of terrorism among its membership and even taps many of them to be in leadership positions on its subcommittees. This is completely outrageous and dangerously ironic.

Let us see our new ambassador to the U.N. and the administration with reforms that have some teeth and will effect change. The United Nations’ reputation of being a credible and effective, international peacekeeping body has been sorely tarnished. It is no wonder so many Americans question the efficacy and the very necessity of the United Nations.

Mr. Speaker, I submit humbly that it is time for U.N. reform with teeth.

One of the extraordinary things about this debate as it unfolds before the American people, Mr. Speaker, is the degree of agreement between the two men that I just mentioned. It is a rare piece of legislation indeed where there is so much agreement about the goals. But I believe what will become apparent to any observer of this debate is that we are not so much arguing over the ends as the means, and that is a legitimate argument that will be, I believe, a great service to the country. The United Nations is desperately in need of fundamental reform, and the Henry J. Hyde U.N. Reform Act does just that.

In 1994, staffers at UNICEF’s Kenya office defrauded and squandered up to $10 million by some estimates. In the Congo last year, U.N. peacekeepers and civilian personnel stand accused of widespread sexual exploitation. And we all know of the $10 billion Oil-for-Food scandal. Both sides agree it is time for reform in the wake of years of mismanagement and oversight scandal. But I submit humbly that it is time for U.N. reform with teeth, and that is precisely what the Hyde U.N. Reform Act provides. It focuses on budgets, streamlining, prioritization of programs, oversight, accountability, peacekeeping, and human rights. But the Hyde bill also places the leverage of withholding up to 50 percent of U.S. assessed dues if certifications are not made in key areas.

Under the Hyde bill, the U.N. must achieve 32 of 39 reforms, 14 of which are mandatory, or face the potential loss of 50 percent of U.S. assessed dues. Let us be clear. This is the point of contention, Mr. Speaker, that is, who controls the power of the purse. I submit at the beginning of this debate that the power of the purse is the power of the American people. It is not for the State Department or even the Secretary of State to say when and how the resources of the American people will be spent. That is the function of the Congress of the United States even where the United Nations is concerned. It is time to save the U.N. from its own scandals and mismanagement. It is time for U.N. reform with teeth.

Let us begin the debate. Then let us pass the Henry J. Hyde U.N. Reform Act.
Mr. Speaker, billions of dollars in coverups, fraud investigations, abuses of power, calls for resignation, shredded documents. I am not talking about the Nixon or the Clinton administrations, though both contained plenty of the above. I am talking about the U.N., that playground for international organizations. It has been the subject of many scandals. Billions of dollars intended to help the Iraqi people were stolen from the Oil-for-Food program.

It appears that that happened because of conflicts of interest at the highest levels of the U.N. Countries like Syria, Sudan, Libya, North Korea, China and Cuba have had seats or still have seats on the Human Rights Commission, the U.N.'s body for addressing human rights issues. Those nations are all members of the U.N., and we should not kick them out, but they should not be setting policy on human rights.

Members of this Commission can veto certain resolutions that come before the U.N.

Sudan, from its seats on the Commission, has vetoed efforts to condemn the genocide it is committing in Darfur. U.N. peacekeepers were recently found to be raping the children, the very people they were ordered to protect, in the Congo. We could go on and on.

The U.N. plays a vital role in mediating conflict, in caring for the poor, and facilitating dialogue. But the system seems to breed abuse and fraud and wasteful spending because of the U.N.'s huge bureaucracy. It is accountable to no one. Much of what happens happens behind closed doors.

Changes need to be made. They need to be made in the structure of the U.N. They need to be substantial, not cosmetic changes. The mess needs to be cleaned up.

I urge support for the Henry J. Hyde U.N. Reform plan, which will make changes of substance.

Mr. BISHOP of Utah. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey (Ms. SMITH), my good friend, the distinguished ranking member of the gentleman from Connecticut (Mr. SCHATZ), the gentleman from New Jersey (Ms. SMITH) in filling this measure; all of the members of the Committee on International Relations, indeed all the Members of this body recognize that the United Nations has problems. But if we are in the business of using this precedent, then we would not want to establish a precedent where using the hammer, as the gentleman from Indiana referred to the monetary withholding as being the hammer, to cause people to undertake to do what we say. Then we establish that as a precedent, and we look up next month, 2 months from now, another country comes forward. We are not the only dues payor, we are the largest dues payor to the United Nations. So someone else that decides that it should reform in a way more likely to comply with their government's understandings could use this as a precedent. I do not think that that is a good thing. I do not think that is good policymaking, and I have tried to make that clear.

Let me give the Members the analogy by way of an exact example. I happen to be the president of the Parliamentary Assembly of the Organization for Security and Cooperation. It is the first time that an American has been the president, and we are holding the Assembly's conference here in Washington, D.C., and I thank the Speaker of the House and the majority leader of the Senate for the extraordinary effort that they have put in allowing that this Assembly be undertaken in appropriate fashion in a bipartisan way. Secretary Rice is one of the featured speakers at that Assembly.

I raise it only for this reason, and I say to the gentleman from New Jersey (Mr. SMITH), my good friend, who is the Chair of the Helsinki House side of the same Assembly that I am talking eloquent, but fair-minded and bipartisan in a substantial number of efforts, and I, like all of our colleagues here, deeply appreciate the work that he has done on behalf of this Nation and indeed this world throughout the course of his career, and I compliment him in that regard.

I also accept the chastisement of the distinguished Chair with reference to rhetoric, but I would urge that some of the rhetoric that I may have used is rhetoric that I learned here in the House of Representatives that has been used on both sides of the aisle much too often, in my judgment.

That said, I would like not to be an apologist for the United Nations. The United Nations needs to be reformed, and I think that it could be put better by the words of Under Secretary of State Nicholas Burns, whom I quoted when I began. I further quote him in saying that it is more important to construct a structure that think Ambassador Burns is absolutely mindful of what all of us are. The gentleman from Illinois (Chairman HYDE), the gentleman from California (Mr. LANTOS), my good friend, the distinguished ranking member; the gentleman from Connecticut (Mr. SCHATZ), my good friend, has done a mighty job in filling this measure; all of the members of the Committee on International Relations, indeed all the Members of this body recognize that the United Nations has problems. But if we are in the business of using this precedent, then we would not want to establish a precedent where using the hammer, as the gentleman from Indiana referred to the monetary withholding as being the hammer, to cause people to undertake to do what we say. Then we establish that as a precedent, and we look up next month, 2 months from now, another country comes forward. We are not the only dues payor, we are the largest dues payor to the United Nations. So someone else that decides that it should reform in a way more likely to comply with their government’s understandings could use this as a precedent. I do not think that that is a good thing. I do not think that is good policymaking, and I have tried to make that clear.

Let me give the Members the analogy by way of an exact example. I happen to be the president of the Parliamentary Assembly of the Organization for Security and Cooperation. It is the first time that an American has been the president, and we are holding the Assembly's conference here in Washington, D.C., and I thank the Speaker of the House and the majority leader of the Senate for the extraordinary effort that they have put in allowing that this Assembly be undertaken in appropriate fashion in a bipartisan way. Secretary Rice is one of the featured speakers at that Assembly.

I raise it only for this reason, and I say to the gentleman from New Jersey (Mr. SMITH), my good friend, who is the Chair of the Helsinki House side of the same Assembly that I am talking
about. The gentleman from New Jersey (Mr. SMITH) can relate to what I am about to say, and I ask the gentleman from Illinois (Chairman HYDE) to do so as well.

More than a year ago, the governing side of the OSCE was met with threats from the country Russia. And we agree even today that transparency and accountability in that organization is critical. They hold most of their under-takings behind closed doors. They operate on the consensus rule, and it primarily stagnates the mission of the OSCE. But Russia said that unless the United States paid more dues, interestingly enough in this particular instance, and that they paid less dues, and that reform measures that they were seeking were implemented, that they would withhold their dues from the OSCE. It did not stop the organization from running. It is not going to stop the Assembly from taking place here in Washington, D.C. July 1 through July 5. But what it did was that threat caused turmoil inside the organization that is in need of reform, and I think we run into the same kind of measure here in this particular proposal.

Listen, Madeleine Albright and John Danforth, Richard Holbrooke and Jeane Kirkpatrick are nobody’s rookies, and they are not naive when it comes to what is needed. Thomas Pickering and Bill Richardson and Donald McHenry and Andrew Young, all eight of these individuals were people that served as our Ambassadors under Republican and Democratic administrations to the United Nations, and during that entire period of time, each of them in their own way contributed to meaningful reform. All of them have said. The need for United Nations reform is clear, but we urge that you carefully consider this legislation because it will not, it will not, do the need necessary reforms at the U.N.

The SPEAKER pro tempore (Mr. TERRY). The gentleman’s time has expired.

Mr. BISHOP of Utah. Mr. Speaker, I appreciate the kindness and flexibility of my good friend from Florida.

Mr. Speaker. I yield 1 minute to the gentleman from Texas (Mr. GOHMIERT).

Mr. GOHMERT. Mr. Speaker, I am proud to rise in support of the rule and the Henry J. Hyde U.N. Reform Act, just as proud to rise in tribute to the gentleman from Illinois (Mr. HYDE).

When the gentleman from Illinois (Mr. HYDE) feels something needs fixing, we had better take notice and know we need fixing.

We need an organization of nations that cares about human rights, but we need a united group of nations that believes more in the rights of individuals than it believes that the right of individuals is to plunder others.

It could be noticed that at a time when the United Nations’ reputation for truth, justice, and following its own rules is at an all-time low, it should be doing everything it can to bring information to light, whether it is good or bad. If the U.N. leadership, however, spent half the time lining the fabric of freedom than it has been lining the pockets of friends and family, then this would be approaching utopia. That is not the case.

Last month there was an investigator who had something called a conscience. He wanted to come forward with information. What did the U.N. do? They hired him an injunction to keep us from knowing the truth. It is time to be united and holding the United Nations accountable. Support the rule on the Henry H. Hyde bill. Mr. BISHOP of Utah. Mr. Speaker, I yield 1 minute to the gentleman from Georgia (Mr. GINGREY).

Mr. GINGREY. Mr. Speaker, I thank my colleague on the Committee on Rules for yielding me this 1 minute. I grew up in the Deep South in the late 1950s. Every other billboard in the South, in my part of Georgia, said, “Get out of the United Nations.” I did not think that was correct then, and I do not feel that way now. In fact, maybe we should have joined the League of Nations and we would never have had World War II. But if there is ever a time to reform an organization, it is absolutely now.

I am proud to support the rule and the bill. H.R. 2745, the Henry J. Hyde United Nations Reform Act of 2005.

The gentleman from California earlier talked about the Ten Commandments and the fact that we are burying the U.N. with these 39 commandments. But really what he is suggesting is that they are not commandments at all. They become suggestions. It does not really matter, the number.

I think we need some teeth in this reform, and that is what the Henry J. Hyde United Nations Reform Act does. I am fully supportive. I ask my colleagues on both sides of the aisle to support this, and let us straighten out that organization.

Mr. BISHOP of Utah. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker. I appreciate the opportunity for having had a very quality debate here today. It is interesting to note once again that the ranking member and the chairman have said the need for reform is obvious. There is no disagreement. It is seemingly the mechanism of doing that.

Once again I point out that in 1985, 1994 and 1999, this House set precedent by doing the exact same concept that is there. And it is true that maybe I have heard a concept here that I do not need to make all Ten Commandments to get to heaven, but I also know that when I was in my classroom and I put high standards and high expectations, my kids met those standards and then I wavered, they wavered at the same time.

This is a good piece of legislation. It is an excellent rule, and I urge its adoption and passage of the underlying legislation.

Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered. The resolution was agreed to.}

GENERAL LEAVE

Mr. HYDE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 2745.

The SPEAKER pro tempore (Mr. BISHOP of Utah). Is there objection to the request of the gentleman from Illinois?

There was no objection.

HENRY J. HYDE UNITED NATIONS REFORM ACT OF 2005

The SPEAKER pro tempore. Pursuant to House Resolution 319 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill. H.R. 2745.

The Chair designates the gentleman from New Hampshire (Mr. BASS) as Chairman of the Committee of the Whole, and requests the gentleman from Nebraska (Mr. TERRY) to assume the chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2745) to reform the United Nations, and for other purposes, with Mr. TERRY (Acting Chairman) in the chair.

The Clerk read the title of the bill.

The Acting CHAIRMAN. Pursuant to the rule, the bill is considered as having been read the first time.

Under the rule, the gentleman from Illinois (Mr. HYDE) and the gentleman from California (Mr. LANTOS) each will control 10 minutes.

The Chair recognizes the gentleman from Illinois (Mr. HYDE).

(Mr. HYDE asked and was given permission to revise and extend his remarks.)

Mr. HYDE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to announce that I am terribly flattered by the extravagant things that have been said, but I must confess I did not name this bill after myself. While I deeply appreciate the honor, I am a trifle embarrassed, not thoroughly embarrassed, but a trifle.

Mr. Chairman, most informed people agree that the U.N. is in desperate need of reform. Corruption is rampant, as evidenced by the expanding Oil-for-Food scandal. U.N. peacekeepers have sexually abused children in Bosnia, the Congo, Sierra Leone and other
places; and the culture of concealment makes rudimentary oversight virtually impossible. A casual attitude towards conflict-of-interest rules undermines trust in the U.N.’s basic governance.

I could spend many hours reciting a litany of problems and abuses. The cycle has become intolerable. So what do we do about it? What leverage do we have to bring about change in how this institution operates?

First of all, we pay 22 percent of the budget. That is $440 million. We pay 27 percent of the peacekeeping budget. Do not ask me what that is. You cannot find out. That is a secret. China pays 2.1 percent, or $36.5 million. Russia pays 1.1 percent, or $19 million.

Over the years, as we listened to the counsels for patience, the U.N.’s failings have grown worse, not lessened. Our many warnings, plans and urgings have largely come and gone, with few lasting accomplishments to mark their presence. Trust in gradual change, interpreted as indifference, a very expensive indifference.

So the time has finally come when we must in good conscience say “enough.” “Enough” to allowing oligarchic regimes such as Cuba, Sudan and Zimbabwe to arrogate as a matter of human rights. “Enough” to peacekeepers exploiting and abusing the people they are sent to protect. “Enough” to unkept promises and squalid dreams of generations. Voters are promised to the U.N. role in facilitating diplomacy, mediating disputes, monitoring the peace, and feeding the hungry. But we are opposed to the legendary bureaucratization, to political grandstanding, to billions of dollars spent on multitudes of programs with meager results, to the outright misappropriation of funds represented by the Oil-for-Food program. And we rightly bristle at the gratuitous anti-Americanism that has become engrained over decades, even as our checks continue to be regularly cashed.

No observer, be he a passionate supporter of this legislation or dismissive critic, can pretend that the current structure and operations of the U.N. represent an acceptable standard. Even the U.N. itself has acknowledged the need for change in how this institution operates.

In an effort to derail this legislation, it has been proposed that we hand to the Secretary of State the power to selectively withhold funds from the U.N. as a means of inspiring a cooperative attitude in the organization. I certainly mean no disrespect for the current Secretary, whom I hold in the highest esteem, but the power of the purse belongs to Congress and is not delegable, no matter who holds that high office.

We cannot escape this burden. The task we face is an extensive one, and I have no illusions regarding the difficulties and the challenges we face. But the choice is simple: we can either seek to accomplish concrete improvements, which will render an enforcement mechanism more credible and more decisive than mere wishes, or we can pretend to do so. For there can be no doubt that any proposal resting upon discretionary decisions concedes in advance that any reform will be fragmentary at best, if there is any at all.

We are in a peculiar situation. Opponents of change cloak themselves in the robes of defenders of the U.N., when it is in fact they who would condemn it to irrelevance. Those of us who believe it is in fact they who would condemn it to irrelevance.

Our many warnings, plans and urgings have largely come and gone, with few lasting accomplishments to mark their presence. Trust in gradual change, interpreted as indifference, a very expensive indifference.

We are already experiencing strenuous resistance to change from many opponents of this legislation and without. But admonishment will not transform sinners into saints; resolutions of disapproval will not be read; flexible deadlines and gentle proddings will be ignored.

Instead, more persuasive measures are called for. This legislation brings to bear instruments of leverage sufficient to the task, the most important being tying the U.S. financial contribution to a series of readily understandable benchmarks.

But there are no arguments in favor of maintaining the status quo. Even the opponents of this legislation concede the need for deep change. The key difference, the all-important difference, between their proposals and the one we have put forward lies in the methods to be used to accomplish that universally desired goal.

Mr. Chairman, the crushing flow of stories of scandal at the United Nations has forced a long-overdue recognition of an essential fact about the place: it is not a real country, like Japan or Norway. It is a derivative reality reflecting its less-than-perfect member states which, in varying degrees, have their own shortcomings, their own injustices, their own flaws, their own hypocrisies of all types. Because a quick fix is not to be expected, and rigid, punitive measures will not bring about a long-term fix, Mr. Chairman, I must oppose the legislation before the House today and indicate my intention to offer a substitute amendment.

Mr. Chairman, the Republican administration informed Congress that it strongly opposes the automatic withholding provisions of the Hyde bill as well as its infringements upon the President’s constitutional powers.

Let me repeat that, Mr. Chairman, and I want my Republican friends to listen. The Republican administration strongly opposes the Hyde bill.

Mr. Chairman, the Lord gave us Ten Commandments, but the bill before the House today gives us 39. What is worse, Mr. Chairman, is that if the United Nations achieves 38 of these benchmarks and only accomplishes half of the thirty-ninth, the Hyde bill automatically, contrary to 50 percent of the U.S. contribution to the United Nations.

Mr. Chairman, we are all aware of the problems with the Hyde bill. I urge my colleagues to take up this task of U.N. reform.

Mr. Chairman, I reserve the balance of my time.
Mr. BLUNT. Mr. Chairman, I rise today in strong support and appreciation really of both of our leaders on this bill, the gentleman from California (Mr. LANTOS), and I are particularly pleased to see this bill named in appreciation and recognition of the gentleman from Illinois (Mr. HYDE), International Relations chairman, the gentleman from Illinois (Mr. HYDE).

I think we all know on both sides of the aisle that the United Nations has not lived up to its expectations. It remains too close to its origins, too closely mirroring the ineffective activities of the organization it replaced, the League of Nations. This year, the U.N.'s budget increased to $1.8 billion. Of that $1.8 billion, we pay a substantial part of the cost of the U.N. These reforms are necessary. Moving the programs that this bill suggests be moved to voluntary programs only increases the willingness of people to support those programs. The transparency of those programs.

I strongly urge support for this bill. I strongly urge support for the penalties that it contains. I appreciate my friend, the gentleman from Illinois (Mr. HYDE), Dr. Condoleezza Rice, as she pursues reform at the United Nations would serve our national interest. The legislation before the Congress micromanages every possible reform at the United Nations. It creates too many, arbitrary, and automatic withholdings; and it gives Secretary of State Rice zero flexibility to get the job done.

For these reasons, Mr. Chairman, I will offer a substitute amendment to achieve U.N. reform which will give Secretary Rice the flexibility she asks for, she needs, and she fully deserves from the Congress.

Mr. Chairman, I urge all of my colleagues to side with our Nation's bipartisan foreign policy leaders in opposing this bill.

Mr. Chairman, I reserve the balance of my time.

Mr. HYDE. Mr. Chairman, I yield myself such time as I may consume. I just want to respond to my dear friend, and he is my dear friend. If I ever become President of the United States, I would nominate the gentleman from California (Mr. LANTOS) as my Secretary of State and be guided by his advice.

Mr. LANTOS. Mr. Chairman, if the gentleman will yield, I deeply appreciate that, Mr. Chairman.

Mr. HYDE. Mr. Chairman, that is what I think of the gentleman from California (Mr. LANTOS).

Mr. Chairman, I just want to point out that substantial compliance is accorded to the Secretary of State, so if 38 of the 39 are complied with, the 39th could have been substantially complied with. Why?

Mr. Chairman, I yield the remaining time to the gentleman from Missouri (Mr. BLUNT).
adopts 38 specific reforms—many of which cannot conceivably be adopted because they require unanimous consent from all 191 member-states, including Syria, Iran, and North Korea.

The Hyde bill would also halt funding for peacekeeping missions, endangering vital new or expanded U.N. operations in Darfur and Haiti, and ignoring the possibility of future crises that may demand international intervention in such places as Iran or Syria. The Democratic substitute, offered by my colleague and good friend from California Mr. LANTOS, which authorizes the Secretary of State to use her discretion in withholding funds to promote adoption of the reforms we seek, is far preferable. The Lantos substitute recommends reforms that will make the U.N. more fair and effective, but it avoids the rigid, draconian, automatic approach that makes the Hyde bill both unreasonable and dangerous.

Mr. NEUGEBAUER. Mr. Chairman, I rise today to express my strong support for H.R. 2745, the United Nations (U.N.) Reform Act. I would like to take this opportunity to thank the distinguished gentleman from Illinois (Mr. Hyde), Chairman of the International Relations Committee, for his leadership on this critically important issue.

For years, Americans have watched with disbelief as the United Nations has put brutal dictatorships like Syria and Sudan on its Human Rights Commission, while at the same time it lectures free democracies on what it means to respect human rights. Now, we are seeing not only misplaced condescension, but also widespread corruption.

The U.N. was established in order to promote international cooperation and peace between nations. However, the good intentions that led to the U.N.’s founding have been followed by a long list of mismanagement, scandal and corruption. Clearly, the U.N. is in desperate need of reform. Most recently, for example, there were problems of kickbacks, bribes and nepotism within the Oil for Food program. There are also serious concerns with the behavior of the U.N. peacekeepers in Africa, including accusations of sexual abuse of the very people they are there to protect. These are just two areas of concern; there are countless other examples.

This important legislation requires the U.N. to make 39 critical reforms to decrease bureaucracy, increase oversight and most significantly provide accountability. In order to ensure that the U.N. takes action, the bill requires the U.S. to withhold 50 percent of our contribution if the U.N. does not enact these much-needed reforms.

The United States is by far the largest contributor to the U.N. This year, the U.S. is expected to provide 22 percent of the U.N.’s budget, an estimated $362 million. It is a travesty that our tax dollars are being misused by the U.N. budget, an estimated $362 million. It is a travesty that our tax dollars are being misused by the U.N. This is why we need this legislation.

In closing, Mr. Chairman, I urge my colleagues to support this bill.

The Acting CHAIRMAN (Mr. TERRY). All time for initial general debate has expired.

Pursuant to the rule, the committee amendment in the nature of a substitute printed in the bill is considered as an original bill for the purpose of amendments and may be considered read.

The text of the committee amendment in the nature of a substitute is as follows:

...

(a) Policy of the United States relating to the regular assessed budget of the United Nations.—It shall be the policy of the United States to—

(1) redirect United States contributions to the United Nations to the use of the voice, vote, and influence of the United States at the United Nations in favor of policies described in paragraphs (1) and (2), the United States to the United Nations each biennial period, as agreed to by resolution of the General Assembly.

(b) Calculation with respect to certain organizational programs for redirection.—The percentage specified in subsection (b) shall be multiplied by one-half of the amount calculated under paragraph (a).
SEC. 103. BUDGET CERTIFICATION REQUIREMENTS.

(a) CERTIFICATION.—In accordance with section 601, a certification shall be required that certifies the conditions described in subsection (b) have been satisfied.

(b) CONDITIONS.—The conditions under this subsection are the following:

(1) NEW BUDGET PRACTICES FOR THE UNITED NATIONS.—The United Nations is implementing budget practices that—

(A) require the maintenance of a budget not in excess of the level agreed to by the General Assembly at the beginning of each United Nations budgetary biennium, unless increases are agreed to by consensus and do not exceed ten percent; and

(B) require the identification of expenditures by the United Nations by functional categories such as personnel, travel, and equipment.

(2) PROGRAM EVALUATION.—

(A) EXISTING AUTHORITY.—The Secretary General and the Director General of each specialized agency shall use their existing authorities to require program managers within the United Nations Secretariat and the Secretariats of the specialized agencies to conduct evaluations in accordance with the standardized methodology referred to in subparagraph (B) of—

(i) United Nations programs approved by the General Assembly;

(ii) programs of the specialized agencies.

(B) DEVELOPMENT OF EVALUATION CRITERIA.—

(i) UNITED NATIONS.—The Office of Internal Oversight Services has developed a standardized methodology for the evaluation of United Nations programs approved by the General Assembly, including specific criteria for determining the continuing relevance and effectiveness of the programs.

(ii) SPECIALIZED AGENCIES.—Patterned on the work of the Office of Internal Oversight Services of the United Nations, each specialized agency has developed a standardized methodology for the evaluation of the programs of the agency, including specific criteria for determining the continuing relevance and effectiveness of the programs.

(C) REPORT.—The Secretary General is assessing budget requests and, on the basis of evaluations conducted under subparagraph (B) for the relevant preceding year, submits to the General Assembly a report containing the results of such evaluations of programs that have satisfied the criteria for continuing relevance and effectiveness, and an identification of programs that have not satisfied such criteria and should be terminated.

(D) SUNSET OF PROGRAMS.—Consistent with the July 16, 1997, recommendations of the Secretary General regarding a sunset policy and results-oriented approach for United Nations programs, the United Nations and each specialized agency has established and is implementing procedures to require all new programs approved by the General Assembly to have a specific sunset date.

SEC. 104. ACCOUNTABILITY.

(a) CERTIFICATION OF CREATION OF INDEPENDENT OVERSIGHT BOARD.—In accordance with section 601, a certification shall be required that certifies that the following reforms related to the establishment of an Independent Oversight Board (IOB) have been adopted by the United Nations:

(1) An IOB is established from existing United Nations budgetary and personnel resources. The United Nations shall appoint a board member who shall be responsible for auditing and inspecting procurement and contracting activities. The Associate Director of OIOS for Procurement and Contract Integrity shall be responsible for initiating, conducting, and overseeing investigations involving allegations of wrongdoing by United Nations officials or peacekeeping troops regarding inefficiencies associated with United Nations procurement and contract activities. The Associate Director of OIOS for Peacekeeping Operations shall be responsible for initiating, conducting, and overseeing investigations involving allegations of wrongdoing by United Nations officials or peacekeeping troops regarding efficiencies associated with United Nations procurement and contract activities.

(2) The regular assessed budget of the United Nations for the Office of Internal Oversight Services shall be funded from existing United Nations budgetary resources and shall not be dependent upon any other entity, bureau, division, department, or specialized agency of the United Nations for such funding.

(3) All United Nations officials, including officials from any entity, bureau, division, department, or specialized agency of the United Nations who shall have the responsibility for auditing and inspecting procurement and contracting activities, shall be assisted by the Associate Director of OIOS for Procurement and Contract Integrity.

(b) CERTIFICATION OF REFORMS OF THE OFFICE OF INTERNAL OVERSIGHT SERVICES.—In accordance with section 601, a certification shall be required that certifies that the following reforms related to the Office of Internal Oversight Services (OIOS) have been adopted by the United Nations:

(1) The OIOS is designated as an independent entity within the United Nations. The OIOS shall not be subject to budget authority or organizational authority of any entity within the United Nations except as provided in this section.

(2) The regular assessed budget of the United Nations for the Office of Internal Oversight Services shall be funded from existing United Nations budgetary resources and shall not be dependent upon any other entity, bureau, division, department, or specialized agency of the United Nations for such funding.

(3) All United Nations officials, including officials from any entity, bureau, division, department, or specialized agency of the United Nations, may—

(A) make a recommendation to the OIOS to initiate an investigation of any aspect of the United Nations or its specialized agencies, or

(B) require the OIOS information or allegations of misconduct or inefficiencies within the United Nations.
Procurement and Contract Integrity, shall undertake a review of contract procedures to ensure that practices and policies are in place to ensure that—
(A) the United Nations has ceased issuing single bid contracts except for such contracts issued during an emergency situation that is justified by the Under Secretary General for Management;
(B) the United Nations has established effective controls to prevent conflicts of interest in the awarding of contract;
(C) the United Nations has established effective procedures and policies to ensure effective and comprehensive oversight and monitoring of United Nations performance.
(e) CERTIFICATION OF ESTABLISHMENT OF UNITED NATIONS OFFICE OF ETHICS.—In accordance with section 601, a certification shall be required that certifies that the following reforms related to the establishment of a United Nations Office of Ethics have been adopted by the United Nations:
(1) A United Nations Office of Ethics (UNEO) is established. The UNEO shall be an independent entity within the United Nations and shall not be subject to budget authority or organizational authority of any entity within the United Nations. The UNEO shall be responsible for establishing, maintaining, and enforcing a code of ethics for all employees of United Nations and its specialized agencies. The UNEO shall also be responsible for providing such employees with annual training related to such code. The head of the UNEO shall be a Director who shall be nominated by the Secretary General and who shall be subject to Security Council approval by majority vote.
(2) The UNEO shall receive operational and budgetary funding through appropriations by the General Assembly from existing levels of United Nations budgetary and personnel resources and shall not be dependent upon any other entity, bureau, division, department, or specialized agency of the United Nations for such funding.
(3) The Director of the UNEO shall not later than six months after the date of its establishment, publish a report containing proposals for implementing a system for the filing and review of individual annual Financial Disclosure Forms by each employee of the United Nations, including by each employee of its specialized agencies, at the P-5 level and above and by all contractors and consultants compensated at any salary level. Such system shall be in place and operational six months after the date of the publication of the report. Such completed forms shall be made available to the Office of Internal Oversight Services at the request of the President of the Office of Internal Oversight Services. Such system shall seek to identify and prevent conflicts of interest by United Nations employees and shall be comparable to the system used for such purposes by the United States Government. Such report shall also address broader reforms of the ethics program for the United Nations, including—
(A) the approach of establishment of ethics officers throughout all organizations within the United Nations;
(B) the impact of retention by the UNEO of Annual Financial Disclosure Forms;
(C) proposals for making completed Annual Financial Disclosure Forms available to the public on request through their Member State’s mission to the United Nations;
(D) proposals for annual disclosure to the public of information related to the annual salaries and benefits and pension payments and buyouts, of employees of the United Nations, including employees of its specialized agencies, and of consultants;
(E) proposals for biennial disclosure to the public of information related to per diem rates for all bureaus, divisions, departments, or specialized agencies of the United Nations;
(F) proposals for disclosure upon request by the Ambassador of a Member State of information related to travel and per diem payments made from United Nations funds to any person; and,
(G) proposals for annual disclosure to the public of information related to travel and per diem rates and payments made from United Nations funds to any person.
(f) CERTIFICATION OF ESTABLISHMENT OF POSITION OF CHIEF OPERATING OFFICER.—In accordance with section 601, a certification shall be required that certifies that the following reforms related to the establishment of the position of a Chief Operating Officer have been adopted by the United Nations:
(1) There is established the position of Chief Operating Officer (COO). The COO shall report to the Secretary General.
(2) The COO shall be responsible for formulating general policies and programs for the United Nations in coordination with the Secretary General and in consultation with the Security Council and the General Assembly. The COO shall be responsible for the daily administration, operation, supervision, and the direction and control of the business of the United Nations. The Chief Operating Officer shall also perform such other duties and may exercise such other powers as from time to time may be assigned to the COO by the Secretary General.
(e) CERTIFICATION OF ACCESS BY MEMBER STATES TO THE BOARD OF EXTERNAL AUDITORS.—In accordance with section 601, a certification shall be required that certifies that Member States may, upon request, have access to all external audits completed by the Board of External Auditors.
SEC. 105. TERRORISM AND THE UNITED NATIONS.
The President shall direct the United States Permanent Representative to the United Nations to use the voice, vote, and influence of the United States at the United Nations to work toward adoption by the General Assembly of—
(1) a definition that builds upon the recommendations of the Secretary General’s High-Level Panel on Threats, Challenges, and Change, and includes as an essential component of such definition any action that is intended to cause death or serious bodily harm to civilians with the purpose of intimidating a population or compelling a government or an international organization to do, or abstain from doing, any act; and,
(2) a comprehensive convention on terrorism that includes the definition described in paragraph (1).
SEC. 106. UNITED NATIONS TREATY BODIES.
The United States shall withhold from United Nations contributions to the regular assessed budget of the United Nations for a biennial period amounts that are proportional to the percentage of such budget that are expended for such entities.
(d) GAO AUDIT.—The Comptroller General of the United States shall conduct an audit of the Accountability Office to determine the extent to which the Accountability Office has developed and implemented the policies and procedures necessary to ensure that the activities of the Accountability Office are consistent with the requirements of the United States for the elimination of such duplicative entities and functions.
SEC. 107. EQUALITY AT THE UNITED NATIONS.
(a) IN GENERAL.—In General.—To avoid duplicative efforts and funding with respect to Palestinian interests and to ensure balance in the approach to Israeli–Palestinian issues, the Secretary shall—
(A) conduct an audit of the functions of the entities listed in paragraph (2); and,
(B) submit to the appropriate congressional committees a report containing recommendations for the elimination of such duplicative entities and functions.
(b) ENTITIES.—The entities referred to in paragraph (1) are the following:
(A) The United Nations Division for Palestinian Rights;
(B) The Committee on the Exercise of the Inalienable Rights of the Palestinian People.
(c) United Nations Special Coordinator for the Middle East Peace Process and Personal Representative to the Palestine Liberation Organization and the Palestinian Authority.
(D) The NGO Network on the Question of Palestine.
(e) IMPLEMENTATION BY PERMANENT REPRESENTATIVE.—
(1) IN GENERAL.—The President shall direct the United States Permanent Representative to the United Nations to use the voice, vote, and influence of the United States at the United Nations to carry out the objectives set forth in section 605(b)(1).
(2) WITHHOLDING OF FUNDS.—Until such recommendations have been implemented, the United States shall withhold from United States contributions to the regular assessed budget of the United Nations for a biennial period amounts that are proportional to the percentage of such budget that are expended for such entities.
(f) GAO AUDIT.—The Comptroller General of the United States shall conduct an audit of the Accountability Office to determine the extent to which the Accountability Office has developed and implemented the policies and procedures necessary to ensure that the activities of the Accountability Office are consistent with the requirements of the United States for the elimination of such duplicative entities and functions.
SEC. 108. REPORT ON UNITED NATIONS REFORM.
(a) IN GENERAL.—Not later than 180 days after the date of the enactment of this Act, and one year thereafter, the Secretary shall submit to the appropriate congressional committees a report on United Nations contributions and funding with respect to the United Nations:
(A) the status of the review by the General Assembly of its specialized agencies and its specialized agencies;
(B) the number of outputs, reports, or other items generated by General Assembly resolutions that have been eliminated;
(C) the progress of the General Assembly to modernize and streamline the committee structure and its specific recommendations on oversight and committee outputs, consistent with the March 2005 report of the Secretary General entitled “In larger freedom: towards development, security and human rights for all”;
(D) the status of the review by the General Assembly of all mandates older than five years and how resources have been redirected to new challenges, consistent with such March 2005 report of the Secretary General; and
(E) the continued utility and relevance of the Economic and Financial Committee and the Social, Humanitarian, and Cultural Committee, in light of the duplicative agendas of those committees and the Economic and Social Council.
SEC. 109. REPORT ON UNITED NATIONS PERMANENT REPRESENTATIVE.
(a) IN GENERAL.—Not later than one year after the date of the enactment of this Act, the Secretary of State shall submit to the appropriate congressional committees a report concerning the progress of the General Assembly to modernize human resource practices,
consistent with the March 2005 report of the Secretary General entitled "In larger freedom: towards development, security and human rights for all"; and
(2) recommending the information described in subsection (6).

(b) CONTENTS.—The report shall include—
(1) a comprehensive evaluation of human resources reforms at the United Nations, including an evaluation of—
(A) tenure;
(B) performance reviews;
(C) the United Nations system;
(D) a merit-based hiring system and enhanced regulations concerning termination of employment of employees; and
(E) the implementation of a code of conduct and ethics training;
(2) the implementation of a system of procedures for filing complaints and protective measures for work-place harassment, including sexual harassment;
(3) policy recommendations relating to the establishment of a rotation requirement for non-administrative positions;
(4) policy recommendations relating to the establishment of a prohibition preventing personnel from transferring to a position within the United Nations Secretariat that is compensated at the P-5 level and above;
(5) policy recommendations relating to a reduction in travel allowances and attendant oversight with respect to accommodations and air travel;
(6) an evaluation of the recommendations of the Secretary General relating to greater flexibility for the Secretary General in staffing decisions and immediate changing priorities.

TITLE II—HUMAN RIGHTS AND THE ECONOMIC AND SOCIAL COUNCIL (ECOSOC)

SEC. 201. HUMAN RIGHTS.

(a) STATEMENT OF POLICY.—It shall be the policy of the United States to use its voice, vote, and influence at the United Nations to ensure that a credible and respectable Human Rights Council or other human rights body established within the United Nations whose participation Member States uphold the values embodied in the Universal Declaration of Human Rights.

(b) HUMAN RIGHTS REFORMS AT THE UNITED NATIONS.—The President shall direct the United States Permanent Representative to the United Nations to ensure that the following human rights reforms have been adopted by the United Nations:

(1) A Member State that fails to uphold the values embodied in the Universal Declaration of Human Rights shall be ineligible for membership on any United Nations human rights body.

(2) A Member State shall be ineligible for membership on any United Nations human rights body if such Member State is—
(A) subject to sanctions by the Security Council; or
(B) under a Security Council-mandated investigation of human rights abuses.

(3) A Member State that is currently subject to an adopted country specific resolution, in the principal body in the United Nations for the promotion and protection of human rights, relating to human rights abuses perpetrated by the government of such country in such country, or has been the subject of such an adopted country specific resolution, shall not be eligible for membership on any United Nations human rights body. For purposes of this subsection, any specific resolution shall not include consensus resolutions on advisory services.

(4) A Member State that violates the principles of the United Nations human rights body to which it aspires to join shall be ineligible for membership on such body.

(5) No human rights body has a standing agenda item that relates only to one country or region.

(c) CERTIFICATION.—In accordance with section 12 of the International Atomic Energy Agency Act (IAEA Act), the President shall certify that the human rights reforms described under subsection (b) have been adopted by the United Nations.

(1) PROHIBITION OF ABUSE OF "NO ACTION" MOTIONS.—The United States Permanent Representative shall work to prevent abuse of "no action" motions, particularly as such motions relate to country specific resolutions.

(2) OFFICE OF THE UNITED NATIONS HIGH COMMISSIONER FOR HUMAN RIGHTS.—

(A) STATEMENT OF POLICY.—It shall be the policy of the United States to continue to strongly support the Office of the United Nations High Commissioner for Human Rights.

(B) CERTIFICATION.—In accordance with section 601, a certification shall be required that certifies that the Office of the United Nations High Commissioner for Human Rights has been given greater authority in field operation activities, such as in the Darfur region of Sudan and in the Democratic Republic of the Congo, in the furthearance of the purpose and mission of the United Nations.

SEC. 202. ECONOMIC AND SOCIAL COUNCIL (ECOSOC).

(a) STATEMENT OF POLICY.—It shall be the policy of the United States to use its voice, vote, and influence at the United Nations to—

(1) abolish secret voting in the Economic and Social Council (ECOSOC) council;
(2) ensure that, until such time as the Commission on Human Rights of the United Nations is abolished, only countries that are not ineligible for membership on a human rights body in accordance with paragraph (1) through (4) of section 201(b) shall be considered for membership on the Commission on Human Rights; and
(3) ensure that countries are nominated for membership on the Commission on Human Rights, the Economic and Social Council conducts a recorded vote to determine such membership.

(b) CERTIFICATION.—In accordance with section 601, a certification shall be required that certifies that the policies described in subsection (a) have been implemented by the Economic and Social Council.

TITLE III—INTERNATIONAL ATOMIC ENERGY AGENCY

SEC. 301. INTERNATIONAL ATOMIC ENERGY AGENCY.

(a) ENFORCEMENT AND COMPLIANCE.—

(1) OFFICE OF COMPLIANCE.—

(A) ESTABLISHMENT.—The President shall direct the United States Permanent Representative to the International Atomic Energy Agency (IAEA) to use the voice, vote, and influence of the United States to establish an Office of Compliance in the Secretariat of the IAEA.

(B) OPERATION.—The Office of Compliance shall—

(i) function as an independent body composed of technical experts who shall work in consultation with IAEA inspectors to assess compliance by IAEA Member States and provide recommendations to the IAEA Board of Governors concerning penalties to be imposed on IAEA Member States that fail to fulfill their obligations under IAEA Board resolutions;

(ii) base its assessments and recommendations on IAEA inspection reports; and

(iii) shall take into consideration information provided by IAEA Board Members that are one of the five nuclear weapons states as recognized by the Treaty on the Non-Proliferation of Nuclear Weapons (21 UST 743) (commonly referred to as the Nuclear Nonproliferation Treaty or the "NPT").

(C) STAFFING.—The Office of Compliance shall be staffed from existing personnel in the Department of Energy, the Department of Defense, the Department of Commerce, and the Department of Agriculture.

(b) LIMITATION ON USE OF FUNDS.—The President shall direct the United States Permanent Representative to the IAEA to use the voice, vote, and influence of the United States at the IAEA to—

(1) ensure that funds for safeguards inspections are prioritized for countries that have newly established nuclear programs or are initiating nuclear programs; and

(2) block the allocation of funds for any other IAEA development, enhance nuclear science assistance or activity to a country—

(i) the government of which the Secretary of State has determined, for purposes of section 6(b) of the Export Administration Act of 1979, section 620A of the Foreign Assistance Act of 1961, section 40 of the Arms Export Control Act, or other provision of law, is a government that has repeatedly provided support for acts of international terrorism and the government of which the Secretary has determined has not dismantled its nuclear weapons programs or mass destruction programs under international verification;

(ii) that is under investigation for a breach of or noncompliance with its IAEA obligations or the purposes and principles of the Charter of the United Nations; or

(iii) that is in violation of its IAEA obligations or the purposes and principles of the Charter of the United Nations.

(c) DETAIL OF EXPENDITURES.—The President shall direct the United States Permanent Representative to the IAEA to use the voice, vote, and influence of the United States at the IAEA to ensure that a high degree of confidence in the IAEA's nuclear activities by a Member State.

(2) SPECIAL COMMITTEE ON SAFEGUARDS AND VERIFICATION.

(A) ESTABLISHMENT.—The President shall direct the United States Permanent Representative to the IAEA to use the voice, vote, and influence of the United States at the IAEA to establish a Special Committee on Safeguards and Verification.

(B) RESPONSIBILITIES.—The Special Committee shall—

(i) improve the ability of the IAEA to monitor and enforce compliance by Member States of the Non-Proliferation Treaty and the Statute of the International Atomic Energy Agency; and

(ii) for which additional measures are necessary to enhance the ability of the IAEA, beyond the verification mechanisms and authorities contained in the Additional Protocol to the safeguards Agreement between the IAEA and Member States of the IAEA, to detect with a high degree of confidence undeclared nuclear activities by a Member State.

(3) PENALTIES.—

(A) IN GENERAL.—The President shall direct the United States Permanent Representative to the IAEA to use the voice, vote, and influence of the United States at the IAEA to—

(i) limit its ability to vote on its case; and

(ii) being prevented from receiving any technical assistance; and

(iii) being prevented from hosting meetings.

(B) TERMINATION OF PENALTIES.—The penalties described under subparagraph (A) shall be terminated when such investigation is concluded and such Member State has no longer in such breach or noncompliance.

(4) UNITED STATES REPRESENTATIVE.—

(A) VOTING CONTRIBUTIONS.—Voluntary contributions of the United States to the IAEA should primarily be used to fund activities relating to Nuclear Safety and Security or activities relating to Nuclear Verification.

(B) LIMITATION ON USE OF FUNDS.—The President shall direct the United States Permanent Representative to the IAEA to use the voice, vote, and influence of the United States at the IAEA to—

(1) ensure that funds for safeguards inspections are prioritized for countries that have newly established nuclear programs or are initiating nuclear programs; and

(2) block the allocation of funds for any other IAEA development, enhance nuclear science assistance or activity to a country—

(i) the government of which the Secretary of State has determined, for purposes of section 6(b) of the Export Administration Act of 1979, section 620A of the Foreign Assistance Act of 1961, section 40 of the Arms Export Control Act, or other provision of law, is a government that has repeatedly provided support for acts of international terrorism and the government of which the Secretary has determined has not dismantled its nuclear weapons programs or mass destruction programs under international verification;

(ii) that is under investigation for a breach of or noncompliance with its IAEA obligations or the purposes and principles of the Charter of the United Nations; or

(iii) that is in violation of its IAEA obligations or the purposes and principles of the Charter of the United Nations.

(3) DETAIL OF EXPENDITURES.—The President shall direct the United States Permanent Representative to the IAEA to use the voice, vote, and influence of the United States at the IAEA to secure, as part of the regular budget presentation of the IAEA to Member States of the United Nations, a detailed breakdown of the expenditures of the IAEA for safeguards inspections and nuclear security activities.
June 16, 2005
CONGRESSIONAL RECORD — HOUSE H4623

(c) MEMBERSHIP.—
(1) IN GENERAL.—The President shall direct the United States Permanent Representative to the IAEA to use the voice, cote, and influence of the United States to encourage the IAEA to block the membership on the Board of Governors of the IAEA for a Member State of the IAEA that has not signed and ratified the Additional Protocol and—
(A) is under investigation for a breach of or noncompliance with its IAEA obligations or the purposes and principles of the Charter of the United Nations;
(B) that is in violation of its IAEA obligations or the purposes and principles of the Charter of the United Nations;
(2) OTHER.—The United States Permanent Representative to the IAEA shall make every effort to modify the criteria for Board membership to reflect the principles described in paragraph (1) (d) REPORT.—Not later than six months after the date of the enactment of this Act and annually for two years thereafter, the President shall submit to the appropriate congressional committees a report on the implementation of this section.

SEC. 302. SENSE OF CONGRESS REGARDING THE NUCLEAR SECURITY ACTION PLAN OF THE IAEA.
It is the sense of Congress that the national security interests of the United States are enhanced by the Nuclear Security Action Plan of the IAEA and the Board of Governors should recommend, and the General Conference should adopt, a resolution incorporating the Nuclear Security Action Plan into the regular budget of the IAEA.

TITLE IV—PEACEKEEPING

SEC. 401. SENSE OF CONGRESS REGARDING REFORM OF UNITED NATIONS PEACEKEEPING OPERATIONS.
It is the sense of Congress that—
(1) although United Nations peacekeeping operations have contributed greatly toward the promotion of peace and stability for the past 57 years and the majority of peacekeeping personnel who have served under the United Nations flag have done so with honor and courage, the record of United Nations peacekeeping has been severely tarnished by operational failures and unconscionable acts of misconduct; and
(2) of great concern in United Nations peacekeeping operations is to be restored, fundamental and far-reaching reforms, particularly in the areas of planning, management, accountability, and discipline, must be implemented without delay.

SEC. 402. STATEMENT OF POLICY RELATING TO REFORM OF UNITED NATIONS PEACEKEEPING OPERATIONS.
It shall be the policy of the United States to pursue reform of United Nations peacekeeping operations in the following areas:

(a) PLANNING AND MANAGEMENT.—
(A) GLOBAL AUDIT.—As the size, cost, and number of United Nations peacekeeping operations have increased substantially over the past decade, the United States should conduct an audit of each such operation, with a view toward "right-sizing" operations and ensuring that such operations are cost effective, should be conducted and its findings reported to the Security Council.
(B) REVIEW OF MANDATES AND CLOSING OPERATIONS.—In conjunction with the audit described in subparagraph (A), the United Nations Department of Peacekeeping Operations should conduct a comprehensive review of all United Nations peacekeeping operation mandates, with a view toward identifying objectives that are practical, and report its findings and recommendations to the Security Council. In particular, the review should consider the following:
(i) Activities that fall beyond the scope of traditional peacekeeping operations should be redirected to a new Peacebuilding Commission, described in paragraph (3).
(ii) Long-standing operations that are static and cannot fulfill their mandate should be downsized or closed.
(iii) Where there is legitimate concern that the United Nations peacekeeping force is not cost effective, reviewed, and can no longer support the United Nations Peacekeeping Force in Cyprus, should be explored and instituted.
(B) LEADERSHIP.—As peacekeeping operations become larger and increasingly complex, the Secretariat should adopt a minimum standard of qualification for senior leaders and managers, with particular emphasis on the skills and experience, and current senior leaders and managers who do not meet those standards should be removed or reassigned.

(b) PRE-DEPLOYMENT TRAINING.—Pre-deployment training on interpretation of the mandate of the operation, specifically in the areas of use of force, civilian protection and field conditions, the Code of Conduct, HIV/AIDS, and human rights should be mandatory, and all personnel, regardless of category or rank, should be required to sign and understand such training as a condition of participation in the operation.

(c) CONDUCT AND DISCIPLINE.—
(A) ADOPTION OF A UNIFORM CODE OF CONDUCT.—A single, uniform Code of Conduct that has the status of a binding rule and applies equally to all personnel serving in United Nations peacekeeping operations, regardless of category or rank, should be promulgated, adopted, and enforced.
(B) UNDERSTANDING THE CODE OF CONDUCT.—All personnel, regardless of category or rank, should receive training on the Code of Conduct prior to deployment with a peacekeeping operation, in addition to periodic follow-on training. In particular—
(i) all personnel, regardless of category or rank, should be provided with a personal copy of the Code of Conduct that has been translated into the national language of such personnel, regardless of whether such language is an official language of the United Nations;
(ii) all personnel, regardless of category or rank, should sign an oath that each has reviewed and understands such training as a condition of participation in the operation;
(iii) the investigative body should include procedures that each has received such training.

(D) INVESTIGATIONS.—A permanent, professional, and independent investigative body should be established and introduced into United Nations peacekeeping operations. In particular—
(i) the investigative body should include professionals with experience in investigating sex crimes, as well as experts who can provide guidance on standards of proof and evidentiary requirements necessary for any subsequent legal action;
(ii) provisions should be included in a Model Memorandum of Understanding that obligate Member States that contribute troops to a peacekeeping operation to designate a military prosecutor who will participate in any investigation related to alleged misconduct against a Member State, so that evidence is collected and preserved in a manner consistent with the military law of such Member State;
(iii) the investigative body should be regionally based to ensure rapid deployment and should be equipped with modern forensics equipment for the purpose of positively identifying perpetrators and, where necessary, for determining paternity; and
(iv) the investigative body should report directly to the Associate Director of OIOS for Peacekeeping Operations, while providing copies of any reports to the Department of Peacekeeping Operations, the Head of Mission, and the Member State concerned.

(E) FOLLOW-UP.—A dedicated unit, similar to the Personnel Conduct Units, staffed and funded through existing resources and established within the headquarters of the United Nations Department of Peacekeeping Operations and tasked with—
(i) coordinating allegations of misconduct, and reports received by field personnel;
(ii) gathering follow-up information on completed investigations, particularly by focusing on disciplinary actions against the individual concerned taken by the United Nations or by the Member State that is contributing troops to which such individual belongs, and sharing such information with the Security Council, the Head of Mission, and the community hosting the peacekeeping operation.

(F) FINANCIAL LIABILITY AND VICTIMS ASSISTANCE.—Although peacekeeping operations should be immediately responsive to allegations of sexual abuse or exploitation, the responsibility for providing longer-term treatment, care, or restitution lies solely with the individual, subject to the personal liability of the misconduct. In particular, the following reforms should be implemented:
(i) The United Nations should not assume responsibility for providing long-term treatment or compensation by creating a "Victims Trust Fund"; or any other such similar fund, financed through assessed contributions to United Nations peacekeeping operations, thereby shielding individuals from personal liability and reinforcing an atmosphere of impunity.
(ii) If an individual responsible for misconduct has been repatriated, extradited, or otherwise unable to provide assistance, responsibility for providing assistance to a victim should be assigned to the Member State that contributed the troops to which such individual belonged or to the perpetrator.
(iii) In the case of misconduct by a member of a military contingent, appropriate funds shall be withheld from the troop contributing country concerned.
(iv) In the case of misconduct by a civilian employed or contracted for the United Nations, the appropriate wages shall be garnished from such individual or fines shall be imposed against such individual, consistent with existing United Nations Staff Rules.

(G) MANAGERS AND COMMANDERS.—The manner in which managers and commanders handle
cases of misconduct by those serving under them should be included in their individual performance evaluations, so that managers and commandants who take decisive action to deter and address misconduct are rewarded, while those who create a permissive environment or impede investigations are penalized or relieved of duty, as appropriate.

(H) DATA BASE.—A centralized data base should be created and maintained within the United Nations Department of Peacekeeping Operations to track cases of misconduct, including the outcome of investigations and subsequent prosecutions, to ensure that personnel who have engaged in misconduct or other criminal activities, regardless of category or rank, are permanently barred from participation in future peacekeeping operations.

(I) WELFARE.—Peacekeeping operations should assume responsibility for maintaining a minimum standard of welfare for mission personnel on an equitable basis, with assistance from the Member States that contribute troops to offset the cost of operation-provided recreational facilities.

(3) PEACEBUILDING COMMISSION.—
(A) Consistent with the recommendations of the High Level Panel Report, the United Nations should establish a Peacebuilding Commission, supported by a Peacebuilding Support Office, to marsh in international financial institutions, donors, and non-governmental organizations to assist countries in transition from war to peace.

(B) STRUCTURE AND MEMBERSHIP.—The Commission should—
(i) be a subsidiary body of the United Nations Security Council, limited in size to ensure efficiency;
(ii) include members of the United Nations Security Council, donors, major troop contributing countries, appropriate United Nations organizations, the World Bank, and the International Monetary Fund; and
(iii) be composed of ECOSOC, regional actors, Member States that contribute troops, regional development banks, and other concerned parties that are not already members, as determined appropriate, to consult or participate in meetings as observers.

(C) RESPONSIBILITIES.—The Commission should seek to ease the demands currently placed on the Department of Peacekeeping Operations to undertake tasks that fall beyond the scope of traditional peacekeeping, by—
(i) developing and integrating country-specific and subregional conflict prevention, post-conflict reconstruction, and long-term development policies and strategies; and
(ii) serving as the key coordinating body for the design and implementation of military, humanitarian, and civil administration aspects of complex missions.

(D) RESOURCES.—The establishment of the Peacebuilding Commission and the related Peacebuilding Support Office, should be staffed within existing resources.

SEC. 402. CERTIFICATION.—
(a) NEW OR EXPANDED PEACEKEEPING OPERATIONS CONTINGENT UPON PRESIDENTIAL CERTIFICATION OF PEACEKEEPING OPERATIONS REFORMS.—
(i) NO NEW OR EXPANDED PEACEKEEPING OPERATIONS.—
(A) CERTIFICATION.—Except as provided in subparagraph (B), until the Secretary of State certifies that the requirements described in paragraph (2) have been satisfied, the President shall direct the United States Permanent Representative to the United Nations to use the voice, vote, and influence of the United States at the United Nations to oppose the creation of new, or expansion of existing, United Nations peacekeeping operations.

(B) EXCEPTION AND NOTIFICATION.—The requirements described under subparagraphs (F) and (G) of paragraph (2) may be waived until January 1, 2007, if the President determines that such is in the national interest of the United States. If the President makes such a determination, the United States Department of Peacekeeping Operations and the OIOS shall monitor United Nations peacekeeping operations.

(b) CERTIFICATION OF PEACEKEEPING OPERATIONS REFORMS.—The certification referred to in paragraph (i) is a certification made by the Secretary to the appropriate congressional committees, including the following reforms, or an equivalent set of reforms, related to peacekeeping operations that have been adopted by the United Nations Department of Peacekeeping Operations or the General Assembly:

(A) A single, uniform Code of Conduct that has the status of a binding rule and applies equally to all personnel serving in United Nations peacekeeping operations, regardless of category or rank, has been adopted by the General Assembly and mechanisms have been established for training such personnel concerning the requirements of the Code and enforcement of the Code.

(B) All personnel, regardless of category or rank, serving in peacekeeping operations who have been trained concerning the requirements of the Code of Conduct and each has been given a personal copy of the Code, translated into the national language of such personnel.

(C) A single, uniform Code of Conduct, that is to be signed by each peacekeeping personnel, and that each understands the consequences of violating the Code, including the immediate termination of the participation of such personnel in the peacekeeping operation to which such personnel is assigned as a condition of the appointment to such operation.

(D) All peacekeeping operations have designed and implemented educational outreach programs to reach local communities where peacekeeping personnel of such operations are based to explain prohibited acts on the part of United Nations peacekeeping personnel and to identify the individual to whom the local population may direct complaints or file allegations of exploitation, abuse, or other acts of misconduct.

(E) A centralized data base has been created and is being maintained in the United Nations Department of Peacekeeping Operations that tracks and includes the outcomes of investigations and subsequent prosecutions, to ensure that personnel, regardless of category or rank, who have engaged in misconduct, are permanently barred from participation in future peacekeeping operations.

(F) A Model Memorandum of Understanding between the United Nations and each Member State that contributes troops to a peacekeeping operation has been adopted by the United Nations Department of Peacekeeping Operations that specifically obligates each such Member State to—

(i) designate a competent legal authority, preferably a prosecutor with expertise in the area of sexual abuse, to participate in any investigation into an allegation of misconduct brought against an individual of such Member State;

(ii) refer to a competent national or military authority for possible prosecution, if warranted, any investigation of a violation of the Code of Conduct of any other peacekeeping operation by an individual of such Member State;

(iii) report to the Department of Peacekeeping Operations on the outcome of any such investigation;

(iv) undertake to conduct on-site court martial proceedings relating to allegations of misconduct alleged against an individual of such Member State;

(v) assume responsibility for the provision of appropriate assistance to a victim of misconduct committed by an individual of such Member State.

(G) A professional and independent investigative and audit function has been established within the United Nations Department of Peacekeeping Operations and the OIOS to monitor United Nations peacekeeping operations.

TITLe V—DEPARTMENT OF STATE AND GOVERNMENT ACCOUNTABILITY OFFICE

SEC. 501. POSITIONS FOR UNITED STATES CITIZENS AT INTERNATIONAL ORGANIZATIONS.

The Secretary of State shall make every effort to recruit United States citizens for positions within international organizations.

SEC. 502. BUDGET JUSTIFICATION FOR REGULAR ASSESSED BUDGET OF THE UNITED NATIONS.

(a) DETAILED ITEMIZATION.—The annual congressional budget justification shall include a detailed itemized request in support of the assessed contribution of the United States to the regular assessed budget of the United Nations.

(b) CONTENTS OF DETAILED ITEMIZATION.—The detailed itemization required under subsection (a) shall—

(1) contain information relating to the amounts requested in support of each of the various sections and titles of the regular assessed budget of the United Nations; and

(2) compare the amounts requested for the current fiscal year with the amounts contributed by the United States in previous fiscal years for the same sections and titles.

(c) ADJUSTMENTS AND NOTIFICATION.—If the United Nations proposes an adjustment to its regular assessed budget, the Secretary of State shall, at the time such adjustment is presented to the appropriate congressional committees of the Senate and the House of Representatives, or at any time thereafter, forward to the appropriate congressional committees a report containing—

(i) the findings of such review; and

(ii) recommendations relating to—

(A) the continuation of such programs; and

(B) which of such programs should be voluntarily funded, other than those specified in subparagraphs (A) through (R) of subsection (c)(2) of section 11 of the United Nations Participation Act of 1945, as amended by section 101(c) of this Act.

SEC. 504. GOVERNMENT ACCOUNTABILITY OFFICE.

(a) REPORT ON UNITED NATIONS REFORMS.—Not later than 6 months after the date of the enactment of this Act, and again 12 months thereafter, the Comptroller General of the United States of the Government Accountability Office shall submit to the appropriate congressional committees a report on each such certification.

(b) REPORT ON DEPARTMENT OF STATE CERTIFICATIONS.—Not later than 6 months after each certification submitted by the Secretary of State to the appropriate congressional committees under this Act and subsection (d)(3) of section 11 of the United Nations Participation Act of 1945, as amended by section 101(c) of this Act, the Comptroller General shall submit to the appropriate congressional committees a report on each such certification. The Secretary shall provide the Comptroller General with any information required by the Comptroller General to submit any such report.
(a) CERTIFICATIONS AND ABSTINENCES.—

(1) SUBSTANTIAL COMPLIANCE.—Subject to subparagraph (B), if at least 32 of the 39 reforms amended by section 101(c) of this Act.

(b) EQUIVALENCY.—Reforms are substantially similar or accomplish the same purposes if—

(i) such reforms are formally adopted in written form by the executive or congressional committees of the United Nations or its specialized agency that has authority to enact or implement such reforms or are issued by the Secretariat or the appropriate entity or committee in written form; and

(ii) such reforms are not identical to the reforms required by a particular certification but in the determination of the Secretary will have the same, or nearly the same, effect, as such reforms.

(c) WRITTEN JUSTIFICATION AND CONSULTATION.—

A SUBSTANTIAL COMPLIANCE.—Subject to subparagraph (B), if at least 32 of the 39 reforms associated with subsection (a) have been implemented through reforms that are substantially similar to the requirements of such section or accomplish the same purposes as the requirements of such section.

(E) ALTERNATE CERTIFICATION MECHANISM.—

(A) IN GENERAL.—Except as provided in paragraph (3), in the event that the Secretary is unable to submit a certification in accordance with paragraph (1), the Secretary may submit to the appropriate congressional committees, in accordance with subparagraph (B), an alternate certification that certifies that the requirements of the section to which the original certification applies have been met. Such an alternate certification shall be submitted in accordance with subsection (d) and in accordance with paragraph (2), until such time as all certifications (or alternate certifications) are submitted in accordance with subsection (a), the United States shall appropriate, but withhold from expenditure, 50 percent of the contributions of the United States to the regular assessed budget of the United Nations for a biennial period.

(B) AVAILABLE UNTIL EXPENDED.—The contributions appropriated but withheld from expenditure under paragraph (1) are authorized to remain available until expended.

(C) APPLICATION WITH RESPECT TO SECTION 11(b) OF THE UNITED NATIONS PARTICIPATION ACT OF 1945.—Until such time as all certifications (or alternate certifications) are submitted in accordance with subsection (a) and paragraph (2), section 11(b) of the United Nations Participation Act of 1945 (as amended by section 113(c) of this Act) shall be administered as though such section reads as follows: “The Secretary may make a contribution to a regularly assessed biennial budget of the United Nations in an amount greater than 11 percent of the amount calculable under section (c).”.

(D) SECTION 110(b)(7) OF THE UNITED NATIONS PARTICIPATION ACT OF 1945.—

(A) SPECIAL RULE.—A certification under subsection (d)(3) of section 11 of the United Nations Participation Act of 1945 (as amended by section 113(c) of this Act) shall be treated as a certification under section (a) of this Act.

(B) APPLICATION.—If the Secretary does not submit a certification under section (a), the United States shall transfer to the United Nations the amount appropriated but withheld from expenditure under subsection (a).

(E) ANNUAL REPORT TO CONGRESSIONAL COMMITTEES.—

(A) IN GENERAL.—The Secretary shall conduct annual reviews, beginning one year after the date on which the Secretary submits the final certification (or alternate certification) in accordance with subsection (a), to determine if the United Nations continues to remain in compliance with all such certifications (or alternate certifications). If the United Nations fails to remain in compliance with all such certifications (or alternate certifications) for more than 30 days after the completion of each such review, the Secretary shall submit to the appropriate congressional committees a report containing the findings of each such review.

(B) ACTION.—If during the course of any such review the Secretary certifies that the United Nations has failed to remain in compliance with a certification (or alternate certification) that was submitted in accordance with subsection (a), the 50 percent withholding described under subsection (b) shall re-apply with respect to United States contributions each fiscal year to the regular assessed budget of the United Nations beginning with the fiscal year immediately following such review and subsequent fiscal years until the United States appropriate for such certifications (or alternate certifications) under subsection (a) have been submitted.
The gentleman from California (Mr. ROHRABACHER) and the gentleman from California (Mr. LANTOS) each will control 10 minutes.

The Chair recognizes the gentleman from California (Mr. ROHRABACHER).

(Mr. ROHRABACHER asked and was given permission to revise and extend his remarks.)

Mr. ROHRABACHER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I stand here with great pride next to my chairman, the gentleman from Illinois (Mr. HYDE), and recall all the great and wonderful battles that he has fought in his career, and I am so proud to be at his side at this, not the last battle that we will fight, but, as we lead into the sunset of his career, a battle that will be meaningful and remembered, and for which the American people will be grateful that we had his leadership.

Also, I might add, we are grateful for the honorable and variserial relationship that we have on the other side of the aisle, the gentleman from California (Mr. LANTOS), a champion of human rights, a dear friend, and someone who I greatly respect and whose guidance, I might say, has been important to my own career.

We are here today to take up the bill named for the gentleman from Illinois (Mr. HYDE), the Henry Hyde United Nations Reform Act of 2005. This bill will reform the United Nations in a meaningful and lasting way, especially in the arena of accountability.

Reform is vital in this area. And if anyone should doubt that, they only need look at the Oil-for-Food scandal which my subcommittee, under the leadership of the gentleman from Illinois (Mr. HYDE), has been investigating. The Oil-for-Food scandal let us remember what it was. The Oil-for-Food program was set up in order to make sure that the women and children and noncombatants of Iraq did not die of lack of food and medicines because of an oil boycott that we had put, the United Nations had placed, on Iraq under Saddam Hussein’s regime as a way of pressuring Saddam Hussein to give up his chemical and biological weapons, weapons of mass destruction, and to continue, and to refrain from his hostile acts like the invasion of Kuwait.

Unfortunately, the Oil-for-Food scandal is what happened to the Oil-for-Food program. We decided to establish a program, the Oil-for-Food program, which would permit the Iraqi regime to sell a certain amount of oil under United Nations supervision and to use the resources from that sale to purchase a certain amount of humanitarian supplies to help the so-called starving women and children of Iraq so these people would not be necessarily harmed.

Right from the beginning, as the United Nations organized the program, Saddam Hussein, this vicious dictator, this mass murderer, was able to choose the buyers for Iraq’s oil, as well as the suppliers of humanitarian goods, which would then be the product of the sale of that oil. What do you expect will happen when that is the way it is organized? And why was it organized that way? It was organized that way because it was a United Nations program.

Let us note that our allies, including France and Russia, who had demanded that the Oil-for-Food program be put in place to help those poor and starving Iraqi children, that as we put the program in place, instead of helping us, they became hindrances to our making sure that the program was run in an honest way. Saddam Hussein was able to demand kickbacks and surcharges for the sale of oil and the purchase of humanitarian goods. Our allies were all too willing to pay those kickbacks. These are the same ones who pressured us to establish the program.

Business was the driving factor, of course, in their decision. But let us note that another driving factor was the fact that we have uncovered that as part of the Oil-for-Food program, bribes were being channeled to people in those very governments, and perhaps that had something to do with the decision-making process of our so-called allies.

Of the estimated $65 billion in oil sales during the time of the Oil-for-Food program, perhaps as much as $10 billion was siphoned off by Saddam Hussein, this mass murderer, and this $10 billion, which was supposed to be going to the Iraqi people to alleviate their suffering.

A United Nations-sanctioned inquiry led by Federal Reserve Bank chairman Paul Volcker has unearthed these evidences of kickbacks paid, for example, to the former director of the Oil-for-Food program in the United Nations. Thus we are saying that it was a United Nations program and the Oil-for-Food program resources were used to bribe United Nations officials who oversaw the program who had been appointed by Secretary-General Kofi Annan and was a close confidant of Kofi Annan.

The Volcker Commission also published evidence detailing the destruction of documents about the Oil-for-Food program as late as last year by Annan’s former chief of staff, Iqbal Riza.

The House International Relations Committee has been investigating the United Nations Oil-for-Food program since March of 2004. The oversight of the Oil-for-Food program at the United Nations itself was undercut by the weak oversight management structures in the United Nations itself. The United Nations, as it was organized, as it is organized unless we act today, bears a great deal of the responsibility for the failure of these type of programs like the Oil-for-Food program.

There is not a culture of openness at the United Nations nor is the structure open, but instead a closed structure and a culture of arrogance. The United Nations Office of Internal Oversight Services, for example, was denied adequate funding and manpower needed to properly audit the Oil-for-Food program. If they were not given the proper resources, why were they not to be corrupted, especially when dealing with the likes of Saddam Hussein?

Saddam provided gifts from $10,000 to $25,000 to families of Palestinian suicide bombers and to Saddam Hussein that he received from the Oil-for-Food program. And let us note something else. If you want to find out what this program did and the power it gave Saddam Hussein, and the corruption of this idea of saving innocent women and children as a program officiated over by the United Nations, let us recall a speech in this body, not too long ago.

The President of the United States gave his State of the Union message here and introduced us to a lady sitting next to this man, and the one next to her was an Iraqi woman whose father had been assassinated by Saddam Hussein because he was a human rights activist. How was the assassin paid off? We have traced back the payment of the assassin of the woman introduced to us for the State of the Union, the assassin of that woman’s father, we have traced back that payment to a man who received the money from Saddam Hussein, and it was channeled through the United Nations program and the money ended up going through a United Nations program to an assassin who murdered the father of the woman who was introduced to us because he was a human rights activist.

If ever there was a travesty, it is this. Saddam Hussein was manipulating the program; and the United Nations, it seems, if not willing to go along with Saddam Hussein, was certainly not willing to go along with the reforms that would have corrected the program.

Without approval, the New York office of the Banque de Paris, or Paribas, this was the bank that oversaw the Oil-for-Food program, the U.N.’s bank for the program made unauthorized payments from the program to solicited third parties on more than 400 occasions. These third parties where the unauthorized payments were made went to people that they had no idea who they were given to. We have yet to be able to trace back who actually runs the corporations who received over 400 payments from the bank that ran this Oil-for-Food program, all of this, of course, under the United Nations direction.

Now, this is the Oil-for-Food program. We could go on about that for hours. But there are other problems at the U.N. which we need to mention, the nepotism at the United Nations. We have seen over and over again people hiring their children. We have seen situations where, for example, Benon Sevan sold his vouchers to a company in which his stepdaughter was hired,
which was in violation of U.N. job violation rules. And let us note former Secretary Boutros Boutros Ghali’s nephew.

Neoplasit is rampant at the U.N. Maurice Strong, a long-time U.N. official and confidant of Secretary General Annan, hired his stepdaughter, Maria Mayo for a U.N. job in violation of U.N. staff regulations. Benon Sevan allegedly sold his oil vouchers to a company run by former Secretary General Boutros Boutros-Ghali’s nephew. Moreover, this deal with Sevan was set up by Fred Nadler, Boutros-Ghal’s stepson.

Strong has also been tainted by his association with the Tongsun Park, from the Koreagate scandal, against whom a complaint was filed by the U.S. Attorney in the Southern District of New York in April. Park was attempting to illicitly influence a “U.N. official” through Iraqi Oil-For-Food money. Strong has confirmed that he was that U.N. official but denies wrongdoing.

The WMO in Geneva, Switzerland, a long-time WMO employee and Sudanese national was accused of skimming $3 million from accounts at the organization over a 3-4 year period. The funds were lost to this corruption and they will likely never be recovered.

He is said to have faked his death to avoid investigation. Accordingly, his wife presented a death certificate, acknowledged by Sudanese authorities to have been false, in order to claim his U.N. pension, which the U.N. has withheld pending the results of a full investigation being conducted by the Swiss authorities at the request of the WMO.

WMO authorities believe that ultimately there are 10-15 other WMO employees who could be viewed as negligent or even gross negligence.

The WMO Senior Legal Advisor reported that while bad, "the internal procedures were not the worst seen in the U.N. family of organizations."

At WIPO, also in Geneva, Michael Wilson, an Annan family friend, is being investigated by a Swiss judge on charges of bribing a senior official at WIPO to win a renovation contract at headquarters. The WIPO official acknowledges receiving $270,000 from Wilson. Wilson claims the money was from a private business venture.

There are also allegations of employee skimming of WIPO agency funds related to the renovation.

Prior to Operation Iraqi Freedom, the agency coordinated with international relief agencies and U.N. member states to relieve the suffering of the Iraqi people.

In January of 1998, $43,701 had to be recovered from an Iraq oil contractor, acknowledged by Sudanese authorities to have been false, in order to claim the U.N. pension of a U.N. official. The high-level official was accused of skimming $3 million from agency funds related to the renovation.

In 2003, Samuel Gonzalez-Ruiz, a senior advisor in the U.S. Department of State, was charged that the office “tolerates administrative and in some cases criminal violations” such as nepotism, mismanagement and misappropriation of funds by agency staff. A U.N. probe into corruption allegations found that “a senior official improperly purchased and registered a $1.27 billion, under the current exchange rate procedures.”

The United Nations Population Fund and U.N. Environment Program promotes environmental and population strategies among member governments.

In a statement before a U.N. Committee in 2004, Thomasdav Spasch of the U.S. Mission to the U.N. explained, the following extrava- gant travel expenses of two program staff for the U.N.: “In the U.N. Population Fund, we were quite surprised to learn that some senior staff members who spend more than half their time in travel status are racking up travel costs of $225,000. In the U.N. Environment Program, travel advances to other persons, in the amount of $92,208, had been outstanding for more than 20 months.”

United Nations Office of Drugs and Crime (UNODC) assists member states in their struggle against illicit drugs, crime and terrorism. In 2003, Samuel Gonzalez-Ruiz, a senior advisor in the U.S. Department of State, was charged that the office “tolerates administrative and in some cases criminal violations” such as nepotism, mismanagement and misappropriation of funds by agency staff. A U.N. probe into corruption allegations found that “a senior official improperly purchased and registered a $1.27 billion, under the current exchange rate procedures.”

These are but a few of the signs that the U.N. is on the wrong path. But talking about problems is not enough, we must do something about it.

This bill is vital for reform of the United Nations. Chairman Hyde’s bill brings real reform to an institution that is quite simply broken.

Regarding the Accountability section of the bill, there is a provision for a special investigator to be assigned to investigate further instances of corruption by high officials of the U.N., such as Benon Sevan.

This bill brings independence to the Office of Internal Oversight Services, OIOS, removing it from under the thumb of political influence at the U.N. and assures OIOS of proper funding to carry out its mission.

This bill creates a U.N. Office of Ethics—an office that after more than a year of investigation into the Oil-for-Food Program has shown—is sorely needed. Also, the Ethics office will be tasked in this bill with facilitating and operating a system for financial disclosure.

Finally, the bill creates an Independent Oversight Board (IOB) to review the audits of the OIOS and other audit bodies of the U.N. This office is vital to provide proper oversight of the U.N.

What we have certainly discovered about the U.N. in the hearings on the Oil-for-Food program that I have held in the subcommittee on Oversight and Investigations in the International Relations Committee, is that the U.N. was corrupted by Saddam Hussein. This bill will go some distance toward repairing this corruption.

I conclude by saying that the U.N. has not been accountable, transparent and it has not been living up to the standards expected of an institution that receives hundreds of millions of dollars every year from the United States. The American taxpayers deserve more for their money. This is why Chairman Hyde wrote this bill and why we are here today: to fix the U.N. so that the problems exemplified by the Oil-for-Food program as well as others such as that which was corrupted by U.N. peacekeepers are never repeated.

Mr. LANTOS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, before yielding, let me commend the gentleman from California (Mr. ROHRABACHER) for his powerful statement. And I commend the gentleman from Illinois (Chairman HYDE) for including in his bill extremely important measures that enhance accountability. I would like to state that the Lantos-Shays substitute which we will present later contains the same measures. We are in full accord on dramatically enhancing accountability at the United Nations.

Mr. ROHRABACHER. Mr. Chairman, would the gentleman yield for one moment?

Mr. LANTOS. Mr. Chairman, I would be delighted to yield to the gentleman from California.

Mr. ROHRABACHER. Mr. Chairman, let me just note that what measures that we have been suggesting in the bill, as you have just underscored, are very reasonable, and the fact that we have bipartisan support on the measures demanding accountability suggest that these are things that the United Nations should not be opposing. This is nothing that should raise the fur on the back of the necks of any official at the United Nations. So I appreciate the gentleman, and also, all those ladies and gentlemen on the other side of the aisle coming at these issues of accountability in a very bipartisan fashion.

Mr. LANTOS. Mr. Chairman, I thank the gentleman from California (Mr. ROHRABACHER) for his comments.

I am delighted to yield 3 minutes to the gentleman from Iowa (Mr. LEACH), the distinguished chairman of the Asia and Pacific Affairs Subcommittee of the International Relations Committee, my distinguished Republican colleague.

Mr. LEACH. Mr. Chairman, as ably demonstrated by the gentleman from California (Mr. LANTOS and Mr. ROHRABACHER), the U.N. is crying out for reform. But let us face the fact that the only oath we as Members take is to the Constitution and votes should reflect this obligation, not pique, not ideology, not well-intentioned concern for reform.

Unfortunately, the approach contained in the bill before us contravenes the United Nations charter and undercuts the rule of law. It also misreads the constitutional prerogatives of Congress. It is true that under article 1 we have been given plenary authority. It is not true that we have been provided the power to negotiate. That authority resides with the executive branch.
There has been a suggestion made that only by threatening the withholding of resources can progress be made at the U.N. This assertion at first blush sounds like commonsense realism. But counterintuitively to utterers of this kind of counsel, experience reveals that prior U.S. withholding tactics have frequently embarrased the United States and weakened, rather than strengthened, our diplomatic positions. Nobody likes to be threatened, especially threats that represent breaches of the law of nations.

It is no accident that the Bush administration has voiced opposition to this bill and warned that unilaterally backing out of our financial obligations will undermine our credibility and effectiveness at the U.N.

One obvious issue, especially for my Republican colleagues, is whether deference to the judgment of House leadership to conduct a financial war on the U.N. is more compelling than deference to the President. But this quandary is secondary to the issue of the rule of law. The fundamental choice today is between deference to the law or to the political process.

Any sense of history would suggest that now is not the time to denigrate law. The passions of men, no matter how understandable must be constrained by law if there is any hope for a more peaceful and just world.

Accordingly, I intend to vote for the principal substitute to the committee bill, but against either the committee bill or the substitute on final passage. The United States sends a congressional directive that in all likelihood will require the U.S. to declare financial war on the United Nations. The alternative approach, while more restrained, has the effect of authorizing the executive branch to conduct a financial war on the U.N. should the Secretary of State choose to do so. Both presumptuously imply that the United States is free of an international obligation to pay its assessment. This body would be wiser to abide the rule of law and fidelity to the Constitution, not the politics of the moment.

Finally, Mr. Speaker, it is at times like this I am reminded of the warning of the English philosopher, John Locke, who once suggested that little crime is more dangerous than a good prince, because that prince is so respected it is hard to object when he may be wrong. HENRY HYDE is not just a good prince, he is a great one. But I fear in this instance he may be wrong, and I would suggest to my colleagues that the most appropriate way to show our esteem is through respectful dissent to the finest in our midst.

Mr. Speaker, at the outset, let me express my appreciation to Chairman Hyde and his staff for reaching out to consult with me as this legislation was developed. Although we have differing perspectives on this bill, I have the utmost respect for our distinguished Chairman, as well as his staff, who are among the finest on Capitol Hill.

The Committee has done a quality job in assembling a panoply of United Nations reform proposals. Virtually all of the suggestions are compelling. The problem is the framework of their consideration. Unfortunately, in my judgment, the underlying Committee approach is thoroughly inappropriate. The Democratic subcommittee, better, but is inappropriate as well.

All of us are concerned about the U.N. As a supporter of the principles that underlie the founding of the United Nations, I must confess to profound disappointment in the conflicts of interest that developed in the oil-for-food program.

Bizarrely, the report recommends establishing a chief operating officer to be in charge of daily U.N. operations; empowering the Secretary General to replace his or her top officials; and creating an independent Oversight Board with adequate audit powers to prevent another scandal like oil-for-food. In addition, the report suggests abolishing the current U.N. Human Rights Commission and establishing a new Human Rights Council, ideally to be composed of democratic governments committed to monitoring, promoting, and enforcing human rights.

Over the years, there have been many reports advocate U.N. reform. By background, in the early 1990's I co-Chaired the United States Commission on Improving the Effectiveness of the United Nations. The Commission held six hearings in regional centers across the country, receiving testimony from hundreds of witnesses representing a cross-section of philosophical perspectives.

The report the commission put forth underlined a certain degree of optimism that the U.N. could play a constructive role in world affairs, but explicitly recognized “serious management problems” and lack of adequate financial accountability in the U.N. system, and called for the U.N. to establish a fully independent inspector general.

With respect to political and security issues, the Commission, like the Gingrich-Mitchell Commission, recognized that means must be found to make the Security Council more representative of power balances in the world today; accordingly, it recommended the expansion of permanent membership of the Security Council. I introduced a bill to this effect yesterday, House Resolution 321, and am hopeful it will receive serious Committee and House consideration at a later date.

As the Mitchell Commission, the United States Commission on Improving the Effectiveness of the United Nations recommended the establishment of a U.N. rapid reaction force to prevent acts of genocide and crimes against humanity.

Arguably, these last recommendations—expansion of the Security Council and establishment of a U.N. rapid deployment force—are the two most important reform proposals the world is considering today. The reform bill before us today is silent on each.

While both the Mitchell and the Commission highlighted severe management concerns, neither advocated linking progress on U.N. reform to U.S. payment of dues.

Indeed, eight former U.S. ambassadors to the United Nations—Madeleine Albright, John Danforth, Richard Holbrooke, Jeane Kirkpatrick, Donald McHenry, Thomas Pickering, Bruce Richardson and Andrew Young—urged Congress earlier this week to reject legislation that would withhold payments to the world body unless specific reform plans were enacted.

In this regard, in December 2004, Congress directed the United States Institute of Peace to establish a Task Force on the United Nations. The 12-member bipartisan Task Force, chaired by former House Speaker Newt Gingrich and former Senate Majority Leader Bob Dole, worked with public and private organizations to assess reforms that would enable the U.N. to better meet the goals of its 1945 charter and offer the U.S. government an actionable agenda to strengthen the U.N.

The report recommends establishing a chief operating officer to be in charge of daily U.N. operations; empowering the Secretary General to replace his or her top officials; and creating an independent Oversight Board with adequate audit powers to prevent another scandal like oil-for-food. In addition, the report suggests abolishing the current U.N. Human Rights Commission and establishing a new Human Rights Council, ideally to be composed of democratic governments committed to monitoring, promoting, and enforcing human rights.

Over the years, there have been many reports advocating U.N. reform. By background, in the early 1990's I co-Chaired the United States Commission on Improving the Effectiveness of the United Nations. The Commission held six hearings in regional centers across the country, receiving testimony from hundreds of witnesses representing a cross-section of philosophical perspectives.

The report the commission put forth underlined a certain degree of optimism that the U.N. could play a constructive role in world affairs, but explicitly recognized “serious management problems” and lack of adequate financial accountability in the U.N. system, and called for the U.N. to establish a fully independent inspector general.

With respect to political and security issues, the Commission, like the Gingrich-Mitchell Commission, recognized that means must be found to make the Security Council more representative of power balances in the world today; accordingly, it recommended the expansion of permanent membership of the Security Council. I introduced a bill to this effect yesterday, House Resolution 321, and am hopeful it will receive serious Committee and House consideration at a later date.

As the Mitchell Commission, the United States Commission on Improving the Effectiveness of the United Nations recommended the establishment of a U.N. rapid reaction force to prevent acts of genocide and crimes against humanity.

Arguably, these last recommendations—expansion of the Security Council and establishment of a U.N. rapid deployment force—are the two most important reform proposals the world is considering today. The reform bill before us today is silent on each.

While both the Mitchell and the Commission highlighted severe management concerns, neither advocated linking progress on U.N. reform to U.S. payment of dues.

Indeed, eight former U.S. ambassadors to the United Nations—Madeleine Albright, John Danforth, Richard Holbrooke, Jeane Kirkpatrick, Donald McHenry, Thomas Pickering, Bruce Richardson and Andrew Young—urged Congress earlier this week to reject legislation that would withhold payments to the world body unless specific reform plans were enacted.
Here, we must understand precisely what the meaning of a 50 percent cut in U.S. contributions to the U.N., as envisioned in the bill before us, implies. As the country in the world that most stands for the rule of law, we are proposing to circumvent it. The Committee approach represents a Congressional directive that in effect requires the U.S. to declare financial war on the United Nations. The alternative Democratic approach, while more restrained, has the effect of authorizing the Executive Branch to conduct a financial war on the U.N. should the Secretary of State choose to do it.

Both approaches contravene the U.N. Charter, a treaty binding all parties, including the United States. It specifies: “The expenses of the Organization shall be borne by the Members as apportioned by the General Assembly” (Article 172(2)). In 1962, the International Court of Justice held—sustaining the position of the United States—that apportionment of expenses by the General Assembly creates the obligation of each Member to bear that part of the expenses apportioned to it.

Both boldly, the second with an extra Executive Branch hurdle, presumptuously imply that the United States is free of an international obligation to pay its assessments. This position runs counter to elemental principles of international law. The Vienna Convention on the Law of Treaties provides that: “Every treaty in force is binding upon the parties to it and must be performed by them in good faith” (Article 26). It specifies that: “A state party to a treaty may not invoke the provisions of internal law as justification for its failure to perform the treaty” (Article 211(1)).

The apportionments made under this Treaty are mandatory. The Members take to the Constitution. Votes should reflect this obligation, not pique, not ideology, not well-intentioned concern for reform.

The bill before us undercut the rule of law. It also misreads the Constitutional prerogative of Congress. It is true under Article I that we have been given purse string authority. It is not true that we have been provided the power to negotiate. That authority resides with the Executive Branch.

The legislation before us eviscerates the separation of powers that our founders so thoughtfully constructed. The Democratic alternative represents a credible political, but uncompelling legal balancing. The wiser way to go is to take the group of reform ideas as-stated in the Committee bill, many of which, the second with an extra Executive Branch hurdle, presump-tuously imply that the United States is free of an international obligation to pay its assessments. This position runs counter to elemental principles of international law. The Vienna Convention on the Law of Treaties provides that: “Every treaty in force is binding upon the parties to it and must be performed by them in good faith” (Article 26). It specifies that: “A state party to a treaty may not invoke the provisions of internal law as justification for its failure to perform the treaty” (Article 211(1)).

The apportionments made under this Treaty are not just the staff. They are simply the Secretariat. The Secretariat is just the staff. They are the hired help. They run the day-to-day affairs of the United Nations; but it is the Member states that set policy, that make decisions responsible for oversight in implementation of the United Nations resolutions.

In particular, it is the function of the Security Council to carry out those responsibilities. The United States is a permanent member of the Security Council, with the power to veto any resolution.

When the Security Council does not want the United Nations to work, it will not work. The Gingrich-Mitchell report put it this way, and I am quoting, "Too often the phrase 'the United Nations failed' should actually read 'the United Nations was blocked or undermined action by the United Nations.'"

An excellent example of this concept is the sanctions against Iraq in the Oil-for-Food program. The United States advocated for the sanctions on Iraq in the aftermath of the Gulf War and then supported the Oil-for-Food program, advocated for it, but it was the Secretary Council, not some amorphous United Nations somewhere up in New York, that had the responsibility to oversee the Oil-for-Food program and the sanction regime.

But when Jordan and Turkey notified the Security Council that they intended to purchase oil from Iraq, in defiance of the sanctions regime, the Security Council simply took notice, whatever that means. I still cannot figure it out, but they did nothing else. It did not block Jordan and Turkey from this trade. It did not sanction the other countries. It did not instruct the Secretariat to take any action. It did nothing.

As a result, Syria and Egypt then began to purchase oil from Iraq as well, and it is important to understand that this ended up as the largest illicit source of revenue for Saddam Hussein, and it had nothing to do with the Oil-for-Food program, nothing to do with it at all. The moneys derived from these so-called trade protocols far exceeded the money that Saddam Hussein skimmed from the Oil-for-Food program. This chart next to me shows that the so-called trade protocols generated over $8 billion in revenue for Saddam Hussein.

My friend, the chairman of the Subcommittee on Oversight and Investigations talks about $10 billion, $8 billion of that came from the Security Council's inaction while looking the other way.

Even some of the money that Sad-dam stole from the Oil-for-Food program could have been saved by aggressive oversight by the Security Council. It is important to note it was the Security Council that approved all prices on oil exports from Iraq, and every contract needed their approval for humanitarian goods coming into Iraq, and yet the Secretariat did not instruct the United Nations to oversee or terminate or begin to purchase oil from Iraq, in defiance of the sectarian regime.

I am convinced that those eight Americans who signed the letter to our congressional leadership are correct when they say withholding dues to the United Nations may sound like smart
policy, but would be counterproductive. It would create resentment, build animosity and actually strengthen the opponents of reform. It would place in jeopardy the reform initiatives that we embrace. Please understand that such a step is simply impracticable.

The CHAIRMAN. All time for general debate has expired on Part 1.

It is now in order to consider amendment No. 1 printed in Subpart A of Part 1 of House Report 109–132.

PART 1, SUBPART A AMENDMENT NO. 1 OFFERED BY MR. KING OF NEW YORK

Mr. KING of New York. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Part 1, Subpart A Amendment No. 1 offered by Mr. King of New York:

In section 104, add at the end the following new subsection:

(f) WAIVER OF IMMUNITY.—The President shall direct the United States Permanent Representative to the United Nations to use the voice, vote, and influence of the United States at the United Nations to ensure that the Secretary General exercises the right and duty of the Secretary General under section 20 of the Convention on the Privileges and Immunities of the United Nations to waive the immunity of any United Nations official in any case in which such immunity would impede the course of justice. In exercising such waiver, the Secretary General is urged to interpret the interests of the United Nations as favoring the investigation or prosecution of a United Nations official who is credibly suspected of having committed a serious criminal offense or who is credibly charged with a serious criminal offense.

The CHAIRMAN. Pursuant to House Resolution 319, the gentleman from New York (Mr. King) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from New York (Mr. King).

Mr. King of New York. Mr. Chairman, I yield myself such time as may consume.

At the outset, Mr. Chairman, let me join with my other colleagues in commending the gentleman from Illinois (Chairman Hyde) for the outstanding leadership he has demonstrated on this bill. It caps a tremendous career in this body and is just one further shining example of how much we owe him and how we are indebted to him for his years of service to the United States Congress.

Mr. Chairman, my amendment should be noncontroversial. As both sides have acknowledged, there have been enormous scandals at the United Nations. Its reputation has suffered dramatically.

For those who do wish the United Nations to be reformed, and for the United Nations to reform itself, it is essential that it restore or regain some modicum of credibility from the American public, indeed, from the world community. To do that, my amendment urges or directs the President of the United States to urge our permanent representative to the U.N. to call upon the Secretary General to waive immunity in those instances where U.N. officials have committed serious offenses.

We have heard descriptions of various alleged misconduct by officials such as Benon Sevan, who is head of the Oil-for-Food program. Also, other individuals have been relieved of their duties at the U.N., such as the official charged with supervising contractor selection.

To me, it just makes elemental sense that the Secretary General under section 20 exercise his discretion to waive immunity in those cases so that criminal action, if necessary, can be brought, and it would be imperative upon our upcoming representative to the United Nations to call upon him to do that.

It is an amendment on which I urge its adoption. I believe it is essential, again, a significant step, and yet one which is a common-sense step to restoring the credibility that the U.N. deserves.

Mr. LANTOS. Mr. Chairman, will the gentleman yield?

Mr. King of New York. I yield to the gentleman from California.

Mr. LANTOS. Mr. Chairman, I want to commend my friend from New York for offering this amendment. Our side is prepared to accept the gentleman’s amendment.

The diplomatic immunity that the United Nations is granted under international law is not designed to shield its employees from the due process of law when they commit crimes. Secretary General Kofi Annan has stated on numerous occasions that he would never allow the U.N.’s diplomatic immunity to protect any employee from prosecution for a crime she or he may have committed.

The Lantos-Shays substitute has a parallel amendment, and we are happy to accept the gentleman’s amendment.

Mr. King of New York. Mr. Chairman, reclaiming my time, I would certainly accept his support of the gentleman’s amendment.

Mr. LANTOS. Mr. Chairman, will the gentleman yield?

Mr. King of New York. I yield to the gentleman from Illinois.

Mr. HYDE. Mr. Chairman, I yield the gentleman from Illinois.

Mr. HYDE. Mr. Chairman, I thank the gentleman for yielding.

We, too, are very pleased to accept this excellent amendment and thank the gentleman from New York.

Mr. King of New York. Mr. Chairman, I thank the chairman.

Mr. DELAHUNT. Mr. Chairman, will the gentleman yield?

Mr. King of New York. I yield to the gentleman from Massachusetts.

Mr. DELAHUNT. Mr. Chairman, I thank the gentleman for yielding to me.

I do obviously support the acceptance by our ranking member of the amendment.

I think it is important to note for the record that there are currently investigations that are ongoing, and for the information of my friend from New York, the Secretary General has been very explicit that he will fully cooperate. We have received information back that that cooperation is, in fact, occurring, and he has publicly stated, without equivocation, that there will be no immunity for members of the United Nations.

Mr. King of New York. Mr. Chairman, reclaiming my time, I would agree with the gentleman from Massachusetts. In my remarks, I particularly did not direct my remarks to the Secretary General, and, in fact, the remarks are directed to our Ambassador to the United Nations, that in the future he continue that policy.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. King).

The question was taken; and the Chair announced that the ayes appeared to have it.

Mr. King of New York. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from New York (Mr. King) will be postponed.

It is now in order to consider amendment No. 2 printed in Subpart A of Part 1 of House Report 109–132.

PART 1, SUBPART A AMENDMENT NO. 2 OFFERED BY MR. GARRETT OF NEW JERSEY

Mr. GARRETT of New Jersey. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Part 1, Subpart A Amendment No. 2 offered by Mr. Garrett of New Jersey:

In section 504, add at the end the following new subsection:

(c) UNITED NATIONS CONSTRUCTION AND CONTRACTING.—Not later than six months after the date of the enactment of this Act, the Committee on International Relations of the House of Representatives, the Committee on Foreign Relations of the Senate, the Committee on Appropriations of the House of Representatives, the Committee on Appropriations of the Senate, the Committee on Appropriations of the House of Representatives of the United Nations Oversight Committee, the Committee on Appropriations of the Senate, and the Committee on Appropriations of the Senate shall report describing the costs associated with the contracting for and construction of the United Nations construction projects that involve major construction on a scale comparable to the WMO and WIPO construction projects, and a description of the results of an investigation into each such credible allegation.

The CHAIRMAN. Pursuant to House Resolution 319, the gentleman from New Jersey (Mr. Garrett) and a Member opposed each will control 5 minutes.
The Chair recognizes the gentleman from New Jersey (Mr. GARRETT).  

Mr. GARRETT of New Jersey. Mr. Chairman, I yield myself such time as I may consume.

Before I begin, let me just use this opportunity to express my appreciation to the chairman for his work in so many different areas important and vital to the people of this country, but right now, at the issue at hand before us, an area that is of utmost importance to the constituents in my district, as well as the citizens of this Nation and the world community as well. So I thank the chairman for his steadfast dedication to addressing these problems.

Also, let me take this opportunity to express my appreciation to the chairman’s staff as well for their efficiency in bringing these matters to the floor and their cooperation in working with our offices in order to proceed along on these matters.

I rise today, Mr. Chairman, to offer an amendment regarding possible contract abuses by high-ranking U.N. officials and to hopefully make the U.N. a more accountable and transparent body.

This amendment will ask the Office of the Comptroller General to submit a report to Congress detailing the costs associated with the renovation of two U.N. buildings in Geneva, Switzerland. Let my give my colleagues a little background.

Michael Wilson, a friend of U.N. Secretary General Kofi Annan, who has referred to the Secretary General as his “uncle,” is being investigated by a Swiss judge of possibly bribing a top U.N. official for a $50 million renovation contract at the World Intellectual Property Organization.

It is alleged that Mr. Wilson paid $270,000 to a top official at the intellectual property agency named Khamis Sued in return, the construction company Mr. Wilson represented was to be awarded the construction contract for this renovation work.

Here is the interesting connection. Mr. Wilson has also been a close business partner with the Secretary General’s son Kojo Annan. In fact, Mr. Wilson helped get Kojo a job at Cotecna, a Swiss-based inspection firm. Not long after hiring him, Cotecna was awarded a lucrative contract to inspect goods going to Iraq with the newly implemented Oil-for-Food program that we have heard talked about on this floor earlier.

Kofi Annan has continuously denied ever meeting with or supporting the Cotecna contract proposal. In fact, the Volcker Commission, appointed by Kofi Annan to investigate the Oil-for-Food scandal, in their second interim report that came out this spring came out and stated, “There is no evidence that the Commissioner in 1998 was subject to any affirmative or improper influence of the Secretary General in the bidding or selection process.”

However, just this week, a memo obtained from Mr. Wilson around the time that the Oil-for-Food inspection contract was being decided, stated: “We had brief discussions with the Secretary-General. We could count on their support.”

Now, the Volcker Commission only now is hastily reevaluating its initial findings in light of this new evidence; and Kofi Annan, as suspected, is dodging questions and hiding now behind the commission. I believe that the Volcker Commission has proven to be too cozy to the Secretary-General to adequately assess the true depth of corruption. In order to provide a full accounting of any illicit dealings to the American taxpayer, the United States must continue its aggressive investigation, and my amendment will further that goal.

Even real estate mogul Donald Trump states, in speaking about the proposal in New York City about their annex expansion to their headquarters, “The United Nations is a mess and they are spending hundreds of millions of dollars unnecessarily on this project.” If Donald Trump says they are wasting millions of dollars, I can only imagine what the average American taxpayer’s view must be on the U.N.

Investigations of the U.N. financial dealings under Kofi Annan resemble the peeling back of an onion. The more that is cut away, the greater the exposure. This amendment is a bold step, I believe, in slicing away one more slice of the onion, another layer, to reveal the full account of any illicit dealings at the U.N.

Mr. Chairman, I reserve the balance of my time.

Mr. LANTOS. Mr. Chairman, I claim time in opposition to the amendment, although I am not in opposition. Mr. Chairman, I yield ½ minutes to the gentleman from Massachusetts (Mr. DELAHUNT).

The CHAIRMAN. All time has expired.

Mr. DELAHUNT. Mr. Chairman, I thank my friend for yielding me this time.

I also read the same report that the gentleman from New Jersey referred to, but I would like to provide him an update at U.N. Building Number One that I am sure he received his information from a newspaper report, if I am correct.

Mr. GARRETT of New Jersey. Mr. Chairman, will the gentleman yield? Mr. DELAHUNT. I yield to the gentleman from New Jersey.

Mr. GARRETT of New Jersey. I received it from different locations, actually. It began, if I may, it began with newspaper reports.

Mr. DELAHUNT. Mr. Chairman, re-claiming my time, again, let me provide this as an update, because this is a report by the Associated Press from today, titled “U.N. Oil-for-Food author of e-mail memo says he never discussed Oil-for-Food contract bid with Kofi Annan. The executive who wrote an e-mail suggesting that the U.N. Secretary General Kofi Annan may have known about a U.N. contract awarded to his son’s company has denied ever discussing the firm’s bid with Annan, a law firm said Wednesday.”

So, again, I think it is worthy of a review, clearly worthy of an investigation; but I do find it interesting that when we talk about investigations that we have not taken the opportunity to investigate the report by the Special Inspector General for Iraq Reconstruction of the report by an American official indicating that the Coalition Provisional Authority provided less than adequate controls for approximately $9 billion of development funds for Iraq funds provided to Iraq through the national budget process. We cannot find this money.

Mr. LANTOS. Mr. Chairman, I yield back the balance of my time.

Mr. GARRETT of New Jersey. Mr. Chairman, I yield myself such time as I may consume. Our side is prepared to accept the gentleman’s amendment. We have heard very disturbing reports about possible contract abuses involving kickbacks at the World Meteorological Organization and the World Intellectual Property Organization in recent years. It will be extremely helpful to have our General Accounting Office also undertake a thorough review of these matters.

We are looking forward to working with the gentleman from Illinois (Mr. HYDE) and others to make certain that all U.N.-affiliated organizations achieve the appropriate reforms, and I thank the gentleman for offering this important amendment which will support our efforts.

Mr. Chairman, I yield 30 seconds, the balance of my time, to the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Mr. Chairman, I claim time in opposition to the amendment, although I am not in opposition. The U.S. generally pays 22 percent of the U.N. budget process. We cannot find the billions provided to Iraq through the provisional authority provided less than adequate controls for approximately $9 billion of development funds for Iraq funds provided to Iraq through the national budget process. We cannot find this money.

Mr. GARRETT of New Jersey. Mr. Chairman, I want to congratulate the gentleman on his amendment, and we are accepting it again as well.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from New Jersey (Mr. GARRETT).
The amendment was agreed to.

The CHAIRMAN. It is now in order to consider amendment No. 3 printed in Subpart A of Part 1 of House Report 109–132.

PART 1, SUBPART A AMENDMENT NO. 3 OFFERED BY MR. CANNON

Mr. CANNON. Mr. Chairman, I offer an amendment.

The text of the amendment is as follows:

Part 1, Subpart A amendment No. 3 offered by Mr. CANNON:

In section 108(b)(6) (relating to the report on United Nations reform), strike “and” after the semicolon.

In section 108(b)(6), strike the period at the end and insert “; and”.

In section 108(b), add at the end the following new paragraph:

whether the United Nations or any of its specialized agencies has contracted with any party included on the Lists of Parties Excluded from Procurement and Nonprocurement Programs.

The CHAIRMAN. Pursuant to House Resolution 319, the gentleman from Utah (Mr. CANNON) and a Member opposed each will control 5 minutes.

Mr. CANNON. Mr. Chairman, I yield myself such time as I may consume.

For their work on this bill, I would first of all like to thank the gentleman from Illinois (Mr. HYDE), the chairman, and the gentleman from California (Mr. LANTOS), two giants of this institution and people who I am pleased to call friends.

Mr. Chairman, our government is being forced to give financial support to corporations we normally would exclude because of our membership in the United Nations and where our dues are spent. When a Federal agency takes an action to exclude a contractor under the nonprocurement or procurement debarment and suspension system, the agency enters the information about the excluded party into the Excluded Parties List System, the EPLS, which is maintained by the General Services Administration. This means that we have a list of individuals and companies with whom our government is forbidden to do business or provide grants or similar assistance. The EPLS identifies those who are deemed corrupt or untrustworthy or even involved in terrorist activities, like the Islamic jihad and Hezbollah. These contractors are excluded from entering contracts and agencies may not solicit offers from, award contracts to, or consent to subcontracts with these contractors.

Contractors are excluded from conducting business with the government as agents or representatives of other contractors. What is more, every U.S. citizens can view the EPLS on line. We know who we do not support and why we do not support them and what their punishment is.

However, though our government has a list of parties we refuse to deal with, our dollars might be supporting them through the U.N. I am offering an amendment that will add a paragraph to section 108 of H.R. 2745, the Henry J. Hyde United Nations Reform Act of 2005. This section requires a report to be filed with the Congress of the United States on the status of the U.N.’s reform. My amendment requires a report on the contracts entered into by the United States, or any of its specialized agencies, with parties on the United States’ EPLS.

This amendment is endorsed by the Heritage Foundation, as well as Americans For Tax Reform. U.N. officials have time and again demonstrated poor judgment and an inability to appropriately manage the money provided by many countries, including the United States. It is absolutely clear, Mr. Chairman, that something has to be done about the U.N.

The release this week of the Oil-for-Food contractor Cotecna, calling into question Mr. Annan’s claim that he was unaware of Cotecna’s bid for a contract in 1998, is just the latest in a long stream of ethical blunders.

As a bipartisan report, featured in yesterday’s Wall Street Journal stated, “Until and unless it changes dramatically, the United Nations will remain an uncertain instrument, both for the governments that comprise it and for those that look to it for salvation.” It is only logical that the same restrictions we place upon our Federal agencies that require the money we give to the United States. It is absolutely clear, Mr. Chairman, that something has to be done about the United Nations Reform Act of 2005.

The amendment was agreed to.

The CHAIRMAN. Pursuant to House Resolution 319, the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Mr. Chairman, I yield myself such time as I may consume.

The CHAIRMAN. Pursuant to House Resolution 319, the gentleman from California (Mr. LANTOS).

Mr. LANTOS. Mr. Chairman, will the gentleman yield?

Mr. CANNON. I yield to the gentleman from California.

Mr. LANTOS. Mr. Chairman, I want to thank the gentleman for his comments and I want to commend him for bringing before this body an important amendment. We strongly support his amendment and I am very pleased to accept it.

Mr. CANNON. Reclaiming my time, Mr. Chairman, I thank the gentleman for his comments.

Mr. Chairman, I yield such time as he may consume to the gentleman from Utah (Mr. CANNON) for offering this very, very important amendment. It will ensure that the United Nations, or any of its specialized agencies, with parties on the United States’ EPLS, which is maintained by the General Services Administration.

This means that we have a list of individuals and companies with whom our government is forbidden to do business or provide grants or similar assistance. The EPLS identifies those who are deemed corrupt or untrustworthy or even involved in terrorist activities, like the Islamic jihad and Hezbollah. These contractors are excluded from entering contracts and agencies may not solicit offers from, award contracts to, or consent to subcontracts with these contractors.

Contractors are excluded from conducting business with the government as agents or representatives of other contractors. What is more, every U.S. citizens can view the EPLS on line. We know who we do not support and why we do not support them and what their punishment is.

However, though our government has a list of parties we refuse to deal with, our dollars might be supporting them through the U.N. I am offering an amendment that will add a paragraph to section 108 of H.R. 2745, the Henry J. Hyde United Nations Reform Act of 2005. This section requires a report to be filed with the Congress of the United States on the status of the U.N.’s reform. My amendment requires a report on the contracts entered into by the United States, or any of its specialized agencies, with parties on the U.S. Government’s EPLS.

This amendment is endorsed by the Heritage Foundation, as well as Americans For Tax Reform. U.N. officials have time and again demonstrated poor judgment and an inability to appropriately manage the money provided by many countries, including the United States. It is absolutely clear, Mr. Chairman, that something has to be done about the U.N.

The release this week of the Oil-for-Food contractor Cotecna, calling into question Mr. Annan’s claim that he was unaware of Cotecna’s bid for a contract in 1998, is just the latest in a long stream of ethical blunders.

As a bipartisan report, featured in yesterday’s Wall Street Journal stated, “Until and unless it changes dramatically, the United Nations will remain an uncertain instrument, both for the governments that comprise it and for those that look to it for salvation.” It is only logical that the same restrictions we place upon our Federal agencies that require the money we give to the United States. It is absolutely clear, Mr. Chairman, that something has to be done about the United Nations Reform Act of 2005.

The amendment was agreed to.

The CHAIRMAN. Pursuant to House Resolution 319, the gentleman from Utah (Mr. CANNON) for offering this very, very important amendment.

Mr. CANNON. I yield to the gentleman from Utah (Mr. CANNON) for offering this very, very important amendment.

Mr. SMITH of New Jersey. Mr. Chairman, I yield myself such time as I may consume.

The CHAIRMAN. Pursuant to House Resolution 319, the gentleman from California (Mr. LANTOS).
I would like to say that the rationale for bringing this forward is to provide a practical benefit to the reform effort at the United Nations; but I think it also is important that we recognize, as Martin Luther King, Jr., once said, "There can be no great sorrow where there is no great love."”

...Continued...

...Continued...

The amendment offered by the gentleman from Texas (Mr. POE) and a Member opposed each will control 5 minutes.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. POE).

The question was taken; and the CHAIRMAN announced that the ayes appeared to have it.

Mr. POE. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Texas (Mr. POE) will be postponed.

It is now in order to consider amendment No. 6 printed in Part 1, Subpart A of House Report 109–132.

The Chair recognizes the gentleman from New Jersey (Mr. SMITH) and the gentleman from California (Mr. LANTOS) each will control 5 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. SMITH). Mr. Chairman, I reserve the balance of my time.

Mr. LANTOS. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. Berman).

Mr. Berman. Mr. Chairman, I thank the ranking member for yielding me this time.

Because he is not on the floor at this point, I am not going to take this opportunity, I will have many more, to express in some detail my affection, my respect and my admiration for the chairman of our committee who sponsors this bill and who has announced his intent not to seek reelection to the next Congress. But once in a while in the course of both of our tenures here, I have had occasion to oppose an initiative, and in this case I do so very strongly.

On the surface this may look like a partisan conflict, but in reality it is not. The Ambassador under Ronald Reagan to the United Nations says about the bill before us, Reforming the United Nations is the right goal. Withholding our dues to the U.N. is the right methodology. When we last built debt to the U.N., the U.S. isolated ourselves from our allies within the U.N. and made diplomacy an impossible...
task. Modernizing the United Nations to be more capable and effective must be done through engaging our allies and being a leader for creating a U.N. for a new century. That is Ambassador Jeane Kirkpatrick, no member of the United States Federalists is she.

A recent submission co-authored by our former speaker Newt Gingrich, not a man enamored of ideological multilateralism, prepared a report on much-needed U.N. reforms and never suggests a mandatory dues cut as a way to effectively achieve those results.

The President of the United States and this administration, which I believe is a Republican administration, indicates very strongly the error of this approach and asks this body to re-consider moving ahead with this particular bill.

But the area that I want to most focus on does not deal with the dues cut, but has a provision on peacekeeping that is particularly egregious. Based on the failure to implement five reforms by the effective date of this bill, the day after this bill is signed into law, and those reforms are much needed, I think they are on the way to happening, and not argued with any of them, in fact, I think they are compelling in their nature, this bill mandates the President of the United States to instruct our Ambassador to the United Nations to veto any new or the expansion of any existing peacekeeping operation.

In other words, the Congress steps in, usurps the executive branch function of formulating foreign policy in exercising its discretion on what its appointee will do in the end without regard to U.S. national interests and in direct violation of executive branch prerogatives.

For the chairman of this committee to sponsor a bill that does something like this, I suggest, quite out of character because there is no one in this House who has made a stronger point in his career of trying to ensure that the President’s power as Commander in Chief and implementer of foreign policy is maintained.

The national interest issue compels us to say this is not the right approach. What if a new U.N. peacekeeping operation, the problems with China or Russia in the context of Darfur are overcome, or a consensus for a new augmentation there involving African countries, involving European countries, perhaps with no commitment whatsoever from the United States for such an operation? Because of the failure to fully implement all five of those reforms, our Ambassador is required to veto such a peacekeeping operation? What if a situation like East Timor comes up again, and whatever the problems have been, and whatever the failures to fully implement these reforms, there is a compelling national interest reason for us to support a peacekeeping operation once again that may not involve U.S. troops or forces? Why would we want to mandate something that is fraught with constitutional problems and does a disservice to our national interest? It looks like a foolish and improper amendment.

Mr. SMITH of New Jersey. Mr. Chairman, I ask unanimous consent to yield the balance of my time to the gentleman from Indiana (Mr. PENCE) and then yield back the balance of my time.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. PENCE. Mr. Chairman, I yield myself such time as I may consume.

I rise for a few brief moments to speak on behalf of title VI of this bill which calls for far-reaching reforms in the areas of planning, management, conduct and accountability of peacekeeping operations within the United Nations. It does, as the gentleman from California said quite accurately, it does involve some tough love and the potential for withholding support for the creation of new or expanded peacekeeping operations entirely or partially.

One does not implement the most basic yet critically important reforms that are called for.

As I have said before, the power of the purse is the power of the American people. In this case the threat of withholding additional funds for the United Nations peacekeeping operations to demand that these necessary reforms are implemented.

Mr. LANTOS. Mr. Chairman, will the gentleman yield?

Mr. PENCE. I yield to the gentleman from California.

Mr. LANTOS. Mr. Chairman, I have the greatest respect for the gentleman from Indiana (Mr. PENCE). The problem with this provision, as with much of the bill, is the lack of judgment that our Secretary of State could bring to bear as a new, tragic Darfur-like situation erupts someplace.

We do not question the need for improving the peacekeeping process, we are with you totally on that, but we would like to have our Secretary of State have the opportunity of exercising her judgment in a rapidly changing and evolving situation.

The CHAIRMAN. All time for general debate on Part 1, Subpart B has expired.

It is now in order to consider amendment No. 1 printed in Subpart B of Part 1 printed in House Report 109–132.

Mr. LANTOS. Mr. Chairman, I offer an amendment.

Mr. BOOZMAN. Mr. Chairman, I offer the amendment.

The CHAIRMAN. The Clerk will dictate the amendment.

The text of the amendment is as follows:

Part 1, Subpart B amendment No. 1 offered by Mr. BOOZMAN:
In section 402(1) (relating to reform of United Nations peacekeeping operations), add at the end the following new subparagraph:

(E) GRATIS MILITARY PERSONNEL.—The General Assembly should lift restrictions on the utilization at the headquarters in New York, the United States, of the Department of Peacekeeping Operations’ headquarters of gratis military personnel by the Department so that the Department may accept secondments from Member States of military personnel with expertise in mission planning, logistics, and other operational specialties.

The CHAIRMAN. Pursuant to House Resolution 319, the gentleman from Arkansas (Mr. BOOZMAN), and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Arkansas (Mr. BOOZMAN).

Mr. BOOZMAN. Mr. Chairman, I yield myself such time as I may consume.

I rise today to offer an amendment that would give the United Nations greater flexibility in the peacekeeping operations that they are involved in by allowing military personnel to serve at the Department of Peacekeeping Operations in New York. This was the norm until early 1999. Over time, 130 experienced officers had been loaned to the U.S. mission in Kosovo. This was an excellent way to build a force that had experience in mission planning, logistics, all of the things that are so important in these types of missions. There was a lull and because of the complaint of some of the other nations that 85 percent of this group came from developed countries, it was discontinued.

As a member of the Committee on International Relations, I frequently hear of the problems that we have with peacekeeping, the atrocities in various parts of the world. Again, I think that this is a situation that would greatly remedy that.

Rotating these professionals into the U.N. on a periodic basis provides a means for introducing new ideas, techniques, and experience without having to deal with terminating contracts or moving people and positions. It allows the system to deal with unexpected demands. The U.N.’s new operational responsibilities demand a more flexible approach.

I think the other thing is that this would not cost anything. This would be a mechanism where, in fact, I think we could save a great deal of money by being much more efficient. We are asking the United Nations to be more effective with their planning and their operations. The other thing that is important is that in no way does this require Department of Defense to assign any U.S. military personnel. It only leaves the door open.

I want to thank my chairman and thank the ranking member for their work on this and, again, our staffs.

Mr. Chairman, I reserve the balance of my time.

Mr. LANTOS. Mr. Chairman, I ask unanimous consent, although we do not oppose this amendment, that we have the time to explain our position.

The CHAIRMAN. Is there objection to the request of the gentleman from California?
Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arkansas (Mr. BOOZMAN).

The amendment was agreed to.

The CHAIRMAN. It is now in order to consider amendment No. 2 printed in Subpart B of Part 1 of House Report 109–132.

PART 1, SUBPART B AMENDMENT NO. 2 OFFERED BY MR. KLINE.

Mr. KLINE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Section 102(5) of the American Servicemembers' Protection Act.

Amendment No. 2, as printed in the Congressional Record for June 16, 2005, page 1915.

The CHAIRMAN. Pursuant to House Resolution 319, the gentleman from Minnesota (Mr. KLINE) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Minnesota (Mr. KLINE).

Mr. KLINE. Mr. Chairman, I am more pleased to yield 30 seconds to the gentleman from Texas (Mr. DELAY), the distinguished majority leader.

Mr. DELAY. Mr. Chairman, I thank the gentleman for yielding me this time. I rise in strong support of the Kline amendment and thank the gentleman from Minnesota for offering it today.

No one in this body knows better than the gentleman from Minnesota the paramount and absolute need to protect our men and women serving in uniform, our men and women in uniform. The gentleman from Minnesota's amendment today does just that by expressly stating in this long overdue United Nations reform package that all of the reforms we will pass augment, and in no way change, the Federal law that exempts our troops from prosecution in the International Criminal Court.

The ICC is a threat not only to the sovereignty of the United States but to the fundamental rights of American citizens; it is an overreaching distortion of the United Nations charter and its mission. The ICC would, in effect, disregard not only Federal and State law but also the Uniform Code of Military Justice, thereby establishing a rogue court in which foreign judges can indict, try, and convict American troops for broadly defined and openly interpreted crimes, all without any of the fundamental safeguards guaranteed by the United States Constitution.

The ICC, then, represents a clear and present danger to the ultimate success of the civilized world's war on terror and an affront to both our troops and our Nation's commitment to American men and women to risk their lives around the world to defend our freedom, the least we can do is promise them they will not be hauled before an unaccountable, politically motivated court just for doing their job.

The United Nations is not a party to the ICC and has even taken the unprecedented step of "unsigning" the treaty to clarify that point. We do not cooperate in any of its proceedings or pretenses, and we do not recognize its authority over any action undertaken by a single citizen of this Nation. The ICC is a product of the worst excesses of the undemocratic mindset that has so permeated the United Nations and distorted its true purpose.

The United Nations' mission is to protect and promote human rights around the globe, to exhort with clarity and courage the principles of justice and liberty to those who would seek to oppress them. The ICC, on the contrary, could be an instrument of undemocratic score-settling, a shadowy kangaroo court in which despots and their diplomats can humiliate and even imprison the men and women who have the courage to do the work the U.N. refuses to do.

I urge our colleagues to vote for the Kline amendment and reiterate America's commitment to our troops, our national sovereignty, and the hard work of human freedom.

Mr. LANTOS. Mr. Chairman, I ask unanimous consent that we be given 5 minutes to explain our position.

The CHAIRMAN. Is the gentleman from California in opposition to the amendment?

Mr. LANTOS. I am not opposed to the amendment.

The CHAIRMAN. Without objection, the gentleman is recognized for 5 minutes.

There was no objection.

Mr. LANTOS. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. BERMAN).

Mr. BERMAN. Mr. Chairman, I would like to use this time, if I might, to ask the gentleman from Minnesota a question.

His amendment says that nothing in this title, this title that the gentleman from Texas (Mr. DELAY) has brought to us, should be construed to supersede the Uniform Code of Military Justice or surrender U.S. officials to a foreign country or international tribunal.

Could the gentleman tell the body what section of the gentleman from Illinois' (Chairman HYDE) bill could be construed to require the surrender of officials? What section of the gentleman from Illinois' (Chairman HYDE) bill could be construed as requiring superseding the Uniform Code of Military Justice? I am certainly unaware of any such section, and I am certainly unaware of any desire by the gentleman from Illinois (Chairman HYDE) to present to the body such a section.

Mr. KLINE. Mr. Chairman, will the gentleman yield?

Mr. BERMAN. I yield to the gentleman from Minnesota.

Mr. KLINE. Mr. Chairman, I thank the gentleman for yielding to me.

This is extremely well-crafted legislation that the chairman has brought forward in close cooperation with many of his colleagues on the Committee on International Relations, and I am in very strong support of this bill. There is language in section 4 which calls for a uniform code of conduct, which I think is a very excellent idea.

We want to be very certain that as this legislation goes forward, it in no way be misinterpreted to impinge upon the Uniform Code of Military Justice or the American Servicemembers' Protection Act. We are trying to avoid any confusion here and make sure that our men and women who are going to work in United Nations peacekeeping operations and go around the world are in no way compromised.

Mr. DELAHUNT. Mr. Chairman, will the gentleman yield?

Mr. LANTOS. I yield to the gentleman from Massachusetts.

Mr. DELAHUNT. Mr. Chairman, I do not know if the proponent of the amendment is aware of the fact that U.S. personnel are already prohibited from being under the command of any other nation, and therefore would always be subject to the UCMJ.

Mr. KLINE. Mr. Chairman, will the gentleman yield?

Mr. LANTOS. I yield to the gentleman from California.

Mr. KLINE. Mr. Chairman, we are trying to make sure that there is no possibility for misinterpretation as we bring forward this very important new legislation, and that it can in no way subject the American Armed Forces or American personnel to the command of another nation, and therefore would always be subject to the UCMJ.

Mr. KLINE. Mr. Chairman, will the gentleman yield?

Mr. LANTOS. I yield to the gentleman from California.

Mr. KLINE. Mr. Chairman, we are trying to make sure that there is no possibility for misinterpretation as we bring forward this very important new legislation, and that it can in no way subject the American Armed Forces or American personnel to the command of another nation, and therefore would always be subject to the UCMJ.

Mr. KLINE. Mr. Chairman, will the gentleman yield?

Mr. LANTOS. I yield to the gentleman from California.

Mr. KLINE. Mr. Chairman, would it be fair to say that, in effect, his effort is an effort to gild the lily?

Mr. KLINE. Mr. Chairman, will the gentleman yield?

Mr. LANTOS. I yield for the final time, but before I do so, Mr. Chairman, let me say that we accept the gentleman's amendment.
I yield to the gentleman from Minnesota for the final time.

Mr. KLINE. Mr. Chairman, I thank the gentleman for yielding to me. I just want to be very brief.

Mr. BURTON of Indiana. Mr. Chairman, will the gentleman yield?

Mr. LANTOS. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. Mr. Chairman, I just want to say to my colleagues this is a very serious debate, and when one starts using terminology like is he trying to gild the lily, he is trying to protect American servicemen from any kind of legal action that might be taken against them. So let us be serious about it.

Mr. KLINE. Mr. Chairman, I yield myself such time as I may consume, and I thank the gentleman from Indiana for his comments.

I want to be very clear that I am in strong support of this legislation that has come before the Committee on International Relations, but there are things that raise my interest and my concern.

A few weeks ago media outlets throughout the world proudly parroted Amnesty International’s unfounded charge of war crimes and II treatment in the so-called America “gulags.” Instead of condemning the government-inflicted famine in Kim Jong-II’s North Korea or continued human rights abuses in Castro’s Cuba, the executive director of Amnesty International USA revealed the true goal of organizations such as his when he called on foreign governments to arrest and prosecute U.S. Government officials and military personnel. We want to make sure that we have got language in here that would prevent that.

The Belgian experience, for example, and recent propaganda espoused by Amnesty International shows that we were wise to doubt the merchants who were peddling “universal jurisdiction” at the cost of national sovereignty. Indeed, even President Clinton did not send the Rome Statute establishing the International Criminal Court to the U.S. Senate because of its fundamental flaws.

The United States is a Nation dedicated to justice and the rule of law, and we cannot allow these fundamental protections to be stripped from our servicemen and women performing peacekeeping missions, and I think we in the House need to be ever vigilant to ensure that that does not happen.

Mr. LANTOS. Mr. Chairman, if the gentleman will yield, we are pleased to accept the gentleman’s amendment.

Mr. Chairman, I yield back the balance of my time.

Mr. KLINE. Mr. Chairman, I yield the balance of my time to the gentleman from Minnesota (Mr. KLINE).

The amendment was agreed to.

The CHAIRMAN. It is now in order to debate the subject of the International Atomic Energy Agency.

The gentleman from Florida (Ms. ROS-LEHTINEN) and the gentleman from California (Mr. LANTOS) each will control 5 minutes.

The Chair recognizes the gentleman from Florida (Ms. ROS-LEHTINEN).

Ms. ROS-LEHTINEN. Mr. Chairman, I yield myself such time as I may consume.

I rise in strong support of the Henry J. Hyde United Nations Reform Act and would like to provide some insight into the background and the impetus for Title III of the bill that relates, as the Chair pointed out, to the International Atomic Energy Agency.

To put it simply, the catalyst was the Iran case. For at least two decades, the Iranian regime has been pursuing a covert nuclear program. According to the November 2003 report of the IAEA, Iran’s deceptions have dealt with the most sensitive aspects of the nuclear cycle. Furthermore, the International Atomic Energy Agency could not prove that Iran’s nuclear program was not for weapons development. In 2004, the IAEA reports enumerated more Iran’s breaches, including an element that could be used for nuclear explosions. And the response from the Iranian Foreign Minister as well as the Secretary of Iran’s Supreme National Security Council was that Iran had to be recognized by the international community as a member of the nuclear club and, “This is an irreversible path,” they said.

Fast forward to this year, and the and indeed dangerous violations and few months state that the Iranian regime plans to install 54,000 advanced P-2 model centrifuges at its facility in Natanz. The Director General of the IAEA has called upon Iran to allow its inspectors full access to the sites in Lavizan and Parchin.

Yet Iran has recently barred the International Atomic Energy Agency from visiting those sites, and Western intelligence sources cited by the media sources suspect that Iran may be experimenting with high explosives appropriate for nuclear weapons.

Just yesterday at the Board meeting in Vienna of the IAEA, it was revealed that Iran had conducted experiments to create plutonium for many more years beyond what it claimed.

All of this, and Iran has yet to suffer any consequences or has been held accountable by the IAEA for its flagrant and indeed dangerous violations and breaches. In fact, Iran recently served on the Board of Governors of the International Atomic Energy Agency because, under the current structure, under its policies, countries that are supported or breached safeguards, they are allowed to serve in leadership positions within the Agency.

The Iran case as well as the linkage to the nuclear black market network of Pakistani scientist A.Q. Khan illustrates another grave issue, the need to deny and deprive terrorists, whether state or nonstate actors, the access to the technology, to the parts, and to the materials to develop a nuclear-related arsenal. These are doing to allow us to protect the gentleman from Illinois (Chairman HYDE) and me to take immediate steps within the context of the U.N. reform bill to strengthen the International Atomic Energy Agency in the areas of safeguards, inspection, and nuclear security; also, to effectively use U.S. contributions to deny rogue states and state sponsors of terrorism, such as Iran, such as Syria, the ability to pursue dangerous weapons with virtual immunity.

And title III of this bill thereby translates objectives into concrete actions to achieve U.S.
counterproliferation goals. It seeks the establishment of an Office of Compliance and enforcement within the Secretariat of the Agency to function as an independent body of technical experts that will assess the activities of member states and recommend specific penalties for those that are found in violation of their obligations. Also, it establishes a Special Committee on Safeguards and Verification to advise the Board of Governors on additional measures necessary to enhance the Agency’s ability to detect undeclared activities by member nations. Furthermore, it seeks the suspension of privileges of member states that are under investigation or in breach or non-compliance of their obligations and the establishment of membership criteria that would keep such rogue states, such as Iran, such as Syria, from serving on the Board of Governors.

The section in this act reinforces our U.S. priorities concerning the safety of nuclear materials and counterproliferation by calling for U.S. voluntary contributions to the Agency to primarily be used to fund activities relative to nuclear security.

And, Mr. Chairman, that is why, under the leadership and expertise of the gentleman from Illinois (Chairman Hyde), we understand that the bill before us and especially Title III of this bill translates these objectives into concrete actions, and we hope that the full body will recommend passage of this bill.

The CHAIRMAN. The time of the gentlewoman from Florida expired.

Mr. CANTOR. Mr. Chairman, I yield myself such time as I may consume.

The International Atomic Energy Agency is a vital U.N.-affiliated agency that directly serves the national security interests of the United States and underpins the global nuclear non-proliferation regime.

The IAEA safeguards and inspection system is the primary means, and sometimes the only means, by which we as a world can police the spread of nuclear weapons. I want to take this opportunity to commend the IAEA’s investigation into Iran’s deceit, obfuscation and outright lies about its nuclear activities. For over 2 years now, IAEA investigators have sought to be intimidated by Iran’s crude threats and tactics, and they keep confronting Tehran with facts and inconsistencies in Iran’s feeble excuses and fabrications about its nuclear activities.

Even today, Mr. Chairman, an IAEA official is reporting that Iran has admitted, when confronted by IAEA investigators, to conducting plutonium processing experiments far more recently than it previously claimed and lying about when it obtained uranium centrifuge enrichment equipment.

Mr. Chairman, we must provide with all the financial and other support that we can, while pushing it, and its governing councils of member states, to give it more authority to investigate and even punish countries that have violated their safeguards agreements and their non-nuclear commitments. The provisions of the Lantos-Shays subsidies will help to do just that.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time for general debate under Part 1 of Subpart C has expired.

It is now in order to consider amendment No. 1 printed in Subpart C of Part 1 of House Report 109-132.

PART 1, SUBPART C AMENDMENT NO. 1 OFFERED BY MR. CANTOR

Mr. CANTOR. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Part 1, Subpart C amendment No. 1 offered by Mr. CANTOR:

Section 301, redesignate subsection (d) as subsection (e), and in section 301, insert after subsection (c) the following new subsection:

(d) NUCLEAR PROGRAM OF IRAN—

(1) USTR. The President shall direct the United States Permanent Representative to the IAEA to use the voice, vote, and influence of the United States at the IAEA to make every effort to ensure the adoption of a resolution by the IAEA Board of Governors that makes Iran ineligible to receive any nuclear material, technology, equipment, or assistance from any IAEA Member State and ineligible for any IAEA assistance not related to safeguards inspections or nuclear security until the IAEA Board of Governors determines that Iran—

(A) is providing full access to IAEA inspectors to its nuclear-related facilities; (B) has fully implemented and is in compliance with the Additional Protocol; and

(C) has permanently ceased and dismantled all activities and programs related to nuclear-enrichment and reprocessing.

(2) PENALTIES. If a Member State is determined to have violated the prohibition on assistance to Iran described in paragraph (1) before the IAEA Board of Governors has determined that Iran has satisfied the conditions described in subparagraphs (A) through (C) of such paragraph, such Member State shall be subject to the penalties described in section 301(a)(3), shall be ineligible to receive nuclear material, technology, equipment, or assistance from any IAEA Member State, and shall be ineligible to receive any IAEA assistance not related to safeguards inspections or nuclear security until such time as the IAEA Board of Governors makes such determination with respect to Iran.

The CHAIRMAN. Pursuant to House Resolution 319, the gentleman from Virginia (Mr. CANTOR) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Virginia (Mr. CANTOR),

Mr. CANTOR. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise today in support of this amendment to increase the ability of the United States to protect our world from the dangers of nuclear weapons.

This amendment does two things: first, it calls for the U.S. permanent representative to the International Atomic Energy Agency to do all it can to ensure that Iran be cut off from any nuclear material technology and assistance.

Secondly, the amendment provides for penalties for any country that continues to provide assistance to Iran’s nuclear efforts.

Mr. Chairman, for over 35 years Iran has been a non-nuclear party to the Nuclear Nonproliferation Treaty. As such, it is bound by the treaty to open up all of its nuclear program efforts for international inspection. Despite this obligation, Iran has continued to pursue the development of nuclear capability in the dark without transparency.

Two years ago, an Iranian opposition group revealed the location of hidden facilities used for the development of a nuclear program, locations which have since been verified by the IAEA. As the gentlewoman from Florida (Chairman Berkin) pointed out yesterday, Iran acknowledged working with plutonium, a possible nuclear arms component, for years longer than it admitted to the IAEA. We also found out it had received sensitive technology from Russia, that could be used as parts of weapons programs earlier than it originally said it did.

Iran claims these efforts are for a peaceful purpose. But how can one really believe that Iran needs a civilian nuclear program when it sits on the world’s second largest proven reserves of natural gas, not to mention its petroleum deposits? Clearly, Mr. Chairman, I posit Iran cannot be trusted.

As Iran has repeatedly lied to the world regarding the extent and sophistication of its nuclear program, Tehran serves as the world’s capital for the export and sponsorship of terrorism. It has demonstrated a willingness to provoke its neighbors, as well as the United States and Israel. Past efforts to stop Iran’s pursuit of nuclear weapons have obviously failed.

Mr. Chairman, this amendment makes a clear and unequivocal declaration to Iran, as well as to the nations of the world, that the United States is serious about stopping Iran’s development of nuclear weapons. I urge the passage of this amendment.

Mr. Chairman, I reserve the balance of my time.

Ms. BERKLEY. Mr. Chairman, I am not opposed to the amendment, and I ask unanimous consent to claim the time in opposition.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Nevada?

There was no objection.

The CHAIRMAN. The gentlewoman from Nevada (Ms. BERKLEY) is recognized for 5 minutes.

Ms. BERKLEY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I extend my thanks to my friend the gentleman from Illinois (Mr. HYDE) and the gentleman from California (Mr. LANTOS) for their work on this issue,
June 16, 2005
CONGRESSIONAL RECORD — HOUSE
H4639

and my good friend, the gentleman from Virginia (Mr. CANTOR), for co-sponsoring this amendment with me.

This amendment would take a strong stand against Iranian nuclear proliferation and would help to ensure that Iran ceases its program. The amendment directs the permanent representative to the IAEA to use his influence to ensure that Iran does not receive any nuclear material or technological assistance from other IAEA member states. The amendment also provides that Iran shall direct the United States Permanent Representative to the IAEA to use the voice, vote, and influence of the United States at the IAEA to make every effort to ensure that the IAEA changes the policy regarding the Small Quantities Protocol in order to—

(1) rescind and eliminate the Small Quantities Protocol;

(2) require that any IAEA Member State that has previously signed a Small Quantities Protocol to sign, ratify, and implement the Additional Protocol; and

(3) require that any IAEA Member State that does not comply with paragraph (2) to be ineligible to receive nuclear material, technology, equipment, or services from any IAEA Member State and subject to the penalties described in section 301(a)(8).

The CHAIRMAN. Pursuant to House Resolution 319, the gentleman from New Jersey (Mr. SMITH) and a Member of the Committee who will use ten minutes.

The Chair recognizes the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, by way of background, the Small Quantities Protocol frees countries from reporting the possession of up to 10 tons of uranium, up to 20 tons of depleted uranium, depending on enrichment, and up to 2.2 pounds of plutonium. Some experts suggest that 10 pounds of natural uranium can be processed into sufficient material for up to two nuclear warheads. Iran has already reportedly utilized much smaller quantities of uranium or plutonium in laboratory experiments with suspected links to nuclear arms programs.

A recent IAEA internal memorandum reportedly recommended that the agency’s board approve no further small quantities protocols and that it grant the IAEA chief the authority to ask that all signatories to the protocol agree to cancel them.

This amendment seeks to close the loophole from the inspections regime by, number one, calling for the IAEA to rescind the Small Quantities Protocol; secondly, to require that any nation that has signed the Small Quantities Protocol to have implemented and be in compliance with the additional protocol providing for more stringent inspections; and, third, to prohibit any IAEA member from receiving any nuclear-related material, technology, equipment, or assistance and be subjected to penalties if they do...
not adhere to the higher inspection standards.
Clearly, Mr. Chairman, the protocol is out of date in an era marked by secret nuclear programs that have been discovered in Iran, Libya and North Korea, and where the bar is set much higher for preventing and exposing atomic activities. By rescinding the Small Quantities Protocol, the IAEA will have additional access to evaluate the nuclear program of an IAEA member state and to confirm that the state is in full compliance with its safeguards obligations.

Mr. Chairman, I reserve the balance of my time.

Mr. MENENDEZ. Mr. Chairman, I am not opposed to the amendment, but I ask unanimous consent to claim the time in opposition.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?
There was no objection.

The CHAIRMAN. The gentleman from New Jersey (Mr. MENENDEZ) is recognized for 5 minutes.

(Mr. MENENDEZ asked and was given permission to revise and extend his remarks.)

Mr. MENENDEZ. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, I wanted to rise in strong support of the previous amendment by the gentleman from Virginia (Mr. CANTOR) and the gentlewoman from Nevada (Ms. BERKLEY). It is an important initiative, one that I have been working on in similar context for some time as a member of the Committee on International Relations.

It is certainly appropriate that we be voting on this amendment tonight, the day after Iran admits that it has once again lied to the international community, this time about its plutonium experiments, 5 years after they said that they had ceased continuing such experiments.

For nearly two decades, Iran has pursued a clandestine nuclear program, while claiming it had to keep this program hidden from the international community because of sanctions against it. Iran has repeatedly stated that it will never give up its right to enrich fuel for peaceful purposes under the Nuclear Nonproliferation Treaty. What they have here is clearly a pattern of deception. They have forfeited their right to any peaceful nuclear technology when they deliberately hid the activities, facilities, and materials of their nuclear program from the entire world for two decades.

Let us be clear. Iran is a country with huge oil and natural gas reserves. They simply do not need nuclear power for energy consumption. That is why I am very happy to support this amendment. We need to send a very clear message. It is clearly in the national security interest of the United States that Iran cannot move forward with impunity, and, certainly, that we do not, through the IAEA, give it operational capacity to do so; to be able to have the ability, for example, at the Bushehr Nuclear Facility, to be able to have operational capacity.

That is why that amendment is clearly so important. I look forward to the State Department authorization bill, where language has been included that we hope moves us closer, along with the Security Council, to coming to understand the grave nature of the challenge that we face in Iran and its nuclear enrichment activities.

Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey (Mr. ANDREWS).

(Mr. ANDREWS asked and was given permission to revise and extend his remarks.)

Mr. ANDREWS. Mr. Chairman, I thank my good friend, the gentleman from New Jersey for yielding me this time, and I rise in strong support of the amendment that the gentleman from New Jersey (Mr. MENENDEZ) has offered. I commend the gentleman from Illinois for being the original author of the amendment, and I am proud to be his cosponsor.

The reason we need this amendment is that the quantity of nuclear materials that could be put into a suitcase and made into a nuclear weapon and detonated in Times Square or in some other major place in the United States or around the world could be legally obtained from international inspection under the present protocol. This inspection protocol was written at a time when nuclear weapons were only reusable on warheads or submarines. It ignored the deadly new technology that can compress the size of the weapons, but not their deadliness.

The fact of the matter is that no quantity of uranium or plutonium that could be used for weapon purposes is too small for inspection. Those who would deem it worthy of using these quantities are more dangerous with smaller amounts.

So the idea here is that the international inspection regime be geared to the realities of the present risk. It is a very good idea. I would urge Members on both sides to support it so we can preclude the awful day when a very small amount of weapons material makes a very big and horrible difference for innocent people in our country or innocent people around the world.

I would urge a “yes” vote in favor of the amendment.

Mr. MENENDEZ. Mr. Chairman, I yield back the balance of my time.

Mr. SMITH of New Jersey. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. SMITH).

The amendment was agreed to.

My amendment would mandate that the President direct the United States Permanent Representative to the IAEA to use the voice, vote, and influence of the United States at the IAEA to ensure that a Member State of the IAEA that is found to be in breach of, in noncompliance with, or has withdrawn from the Nuclear Nonproliferation Treaty shall return to the IAEA all nuclear clear materials and technology received from the IAEA, any Member State of the IAEA, or any Member State of the Nuclear Nonproliferation Treaty.

The CHAIRMAN. Pursuant to House Resolution 319, the gentleman from Massachusetts (Mr. MARKEY) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, in the 35 years since the Nuclear Nonproliferation Treaty has been in force, much has changed around the world, what has not changed is the danger inherent in the spread of nuclear weapons.

My amendment says that the President of the United States shall direct the United States permanent representative to the IAEA to use their influence and their vote to secure an agreement within the IAEA requiring that any member state of the NPT that is in breach of the treaty or withdraws from the treaty must return any nuclear clear materials or technology acquired for peaceful purposes.

Now, why is this amendment needed? Well, for the first time in the treaty’s history, one country has withdrawn from the treaty. In 2002, international inspectors were asked to leave North Korea, and, in 2003, North Korea withdrew from the nonproliferation treaty. And just this year North Korea announced to the world that it has nuclear weapons; all the while, North Korea is allowed to keep any and all nuclear materials, nuclear technology, and assistance they receive as a member of the NPT.

So while considerable diplomatic activity has taken place to try to convince North Korea to change its action, there is actually no rule in place now at the IAEA that would require North Korea to return all of the nuclear materials it received.

My amendment would mandate that the President direct the United States permanent representative at the IAEA to secure such an agreement amongst the IAEA member states.
Mr. SMITH of New Jersey. Mr. Chairman, I yield the remainder of the time to the gentleman from New Jersey.

Mr. ROYCE. Mr. Chairman, I thank the gentleman for yielding me this time.

I rise in support of this amendment offered by the gentleman from Massachusetts (Mr. MARKEY). The global nuclear nonproliferation regime that has served the world well for many years has developed shortcomings, and the Markey amendment addresses one such shortcoming that I think we must address.

This is an issue that is especially important to me as chairman of the Subcommittee on International Terrorism and Nonproliferation. We held a hearing in April on the Nuclear Nonproliferation Treaty, and one of the key issues that we looked at was how NPT states should address the noncompliance or attempted withdrawal of a state from the treaty. This amendment takes a step forward in solving this challenge by calling upon the President to work with other International Atomic Energy Agency member states that are key to noncompliance with its NPT obligations, or attempts to withdraw from the NPT, will be compelled to return all the nuclear materials and technology it received as a consequence of being an NPT member. I believe such a provision would be helpful in convincing states to adhere to their NPT obligations.

States like North Korea and Iran have long already used their status, past status in the case of North Korea, as NPT states to develop nuclear weapons programs, and I believe it is vital that the United States play a leading role in multilateral efforts to close the loopholes that allow states to receive nuclear energy assistance, but not pay any penalty if they subsequently withdraw from the treaty, as has North Korea. Compelling the surrender of materials and equipment gained under the NPT would be a positive step forward, so I am pleased to support the Markey amendment.

Mr. MARKEY. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. LANTOS).

Mr. LANTOS. Mr. Chairman, I thank my friend for yielding me this time. I want to commend him on this most important amendment.

We cannot permit countries such as Iran to profit from their exploitation of the nuclear nonproliferation regime to acquire nuclear equipment and technology that they then use to develop nuclear weapons capabilities in violation of their solemn commitments under the Nuclear Nonproliferation Treaty.

The Markey amendment is a necessary step to establish a new global requirement that violators of the Nuclear Nonproliferation Treaty must surrender all nuclear materials, equipment, and technology they acquired through the subterfuge of "peaceful nuclear activities."

This is a singularly significant amendment, and I urge my colleagues across the aisle to support the amendment.

Mr. SMITH of New Jersey. Mr. Chairman, I yield back the balance of my time.

Mr. MARKEY. Mr. Chairman, how much time do I have remaining?

Mr. SMITH of New Jersey. Mr. Chairman, I thank my friend for yielding me this time. I want to commend him on this most important amendment.

I will conclude by saying this: There are no Democrats, there are no Republicans when it comes to the issue of nuclear nonproliferation. The one thing that President Bush and JOHN KERRY agreed upon in their Presidential debates is that this is the most important issue in the world. It may have been the only thing that they agreed upon, but they did agree upon this one issue.

Now, interestingly, in the Atomic Energy Act of the United States, in 1994, it is, in fact, a requirement under our law that if another nation is in violation of the agreement, that the nuclear materials which we give to that country is not used for peaceful purposes, that all of the materials that we have sent to that country must be returned to our country.

What this amendment says is that as a member of the United Nations and the IAEA, that we now will extend this not just to the United States, but to all countries in the world; that the IAEA must enforce a requirement that if a country is in violation of its agreement to use materials only for peaceful purposes, then the IAEA must act immediately to begin the process of reclaiming all of the material that all of the countries of the world have sent to that country which is in violation of the law.

We must put teeth in this law. We must not allow the short-term diplomatic or political agenda of any President or any Secretary of State, Democrat or Republican, to interfere with the overarching goal of ensuring that nuclear weapons are not used anywhere on this planet at any time.

And so I urge all Members to support this amendment. It goes a long way in sending a message to the rest of the world that the United States intends on being the leader on the issue of nuclear nonproliferation, regardless of which other country in the world is involved and regardless of which other country in the world was the supplier of those materials. We will be the moral leader.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. MARKEY).

The amendment was agreed to.

SequENTIAL VOTES POSTPONED IN COMMITTEE OF THE WHOLE

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, proceedings will now resume on those amendments on which further proceedings were postponed, in the following order: amendment No. 1 printed in Subpart A by the gentleman from New York (Mr. KING), amendment No. 5 printed in Subpart A by the gentleman from Texas (Mr. POE), amendment No. 1 printed in Subpart C by the gentleman from Virginia (Mr. CANTOR).

The first electronic vote will be conducted as a 15-minute vote. Remaining electronic votes will be conducted as 5-minute votes.

PART 1, SUBPART A, AMENDMENT NO. 1 OFFERED BY MR. KING OF NEW YORK

The CHAIRMAN. The pending business is the demand for a recorded vote on amendment No. 1 printed in Subpart A of Part 1 of House Report 109–132 offered by the gentleman from New York (Mr. KING) on which further proceedings were postponed and on which the ayes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

RECORDED VOTE

The CHAIRMAN. A recorded vote has been demanded.
A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 405, noes 13, as follows:

**RECORDED VOTE**

The CHAIRMAN. A recorded vote has been demanded.

A recorded vote was ordered.
The Clerk redesignated the amendment offered by the gentleman from Texas?

Accordingly, the Committee rose; and the amendment was agreed to.

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. FORTENBERRY. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to. Accordingly, the Committee rose; and the Speaker pro tempore (Mr. SIMPSON) having assumed the chair, Mr. BASS, Chairman of the Committee of the Whole House on the State of the Union, reported that Committee, having had under consideration the bill (H.R. 2745) to reform the United Nations, and for other purposes, had come to no resolution thereon.

LIMITING DEBATE ON HOUSE RESOLUTION 324

Mr. DELAY. Mr. Speaker, I ask unanimous consent that debate on the resolution noticed by the gentleman from New York (Mr. NADLER) be limited to 30 minutes equally divided and controlled by the gentleman from New York (Mr. NADLER) and the gentleman from Wisconsin (Mr. Sensenbrenner).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?
H4644

CONGRESSIONAL RECORD—HOUSE
June 16, 2005

There was no objection.

PRIVILEGES OF THE HOUSE—INTEGRITY OF PROCEEDINGS OF THE HOUSE

Mr. NADLER. Mr. Speaker, I offer a privileged resolution (H. Res. 324) as to a question of the privileges of the House and ask for its immediate consideration.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. Res. 324

Resolution disapproving the manner in which Representative Sensenbrenner has responded to the minority party’s request under rule XI of the House of Representatives for an additional day of oversight hearings on the reauthorization of the USA PATRIOT Act and the manner in which such hearing was conducted.

Whereas Representative Sensenbrenner willfully and intentionally violated the Rules of the House of Representatives by abusing and exceeding his powers as chairman;

Whereas subsequent to receiving a request for an additional day of hearings by members of the minority party pursuant to rule XI, Representative Sensenbrenner scheduled such hearing on less than 48 hours notice;

Whereas such hearing occurred on Representative Sensenbrenner’s directive to require that the witnesses’ written testimony be made available on less than 48 hours notice;

Whereas, during the course of the hearing, Representative Sensenbrenner made several false and disparaging comments about members of the minority party in violation of rule XVII;

Whereas Representative Sensenbrenner failed to allow members of the committee to question witnesses for a period of 5 minutes in violation of rule XI;

Whereas Representative Sensenbrenner refused to allow members of the committee to question witnesses for a period of 5 minutes in violation of rule XI;

Whereas Representative Sensenbrenner refused to recognize an important witness in the hearing of the Judiciary Committee. I and other Members of the House, both Republicans and Democrats, have a duty to defend the honor of this institution and the integrity of its proceedings. So long as power is abused, rules are ignored and broken and the rights of Members who represent millions of Americans are violated, this House cannot do its job properly. The American people are cheated of their rightful and constitutional right to question the government. I respectfully request that the Chairman, as a general Parliamentarian, call for an additional day of minority hearings by members of the minority party concerning the reauthorization of the USA PATRIOT Act.

Resolved, That
(1) the House strongly condemns the manner in which Representative Sensenbrenner has responded to the minority party’s request for an additional day of oversight hearings on the reauthorization of the USA PATRIOT Act, and the manner in which such hearing was conducted; and
(2) the House instructs Representative Sensenbrenner, in consultation with the Representative CONYERS, to schedule a further day of hearings with witnesses requested by members of the minority party concerning the reauthorization of the USA PATRIOT Act.

2000

The SPEAKER pro tempore (Mr. THORNBERRY). The resolution presents a question of the privileges of the House.

Under the previous order of the House, the gentleman from New York (Mr. NADLER) and the gentleman from Wisconsin (Mr. SENSENBRENNER) each will control 15 minutes.

The Chair recognizes the gentleman from New York (Mr. NADLER).

Mr. NADLER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it is with regret that I must rise again to invoke the privileges of the House and to defend the integrity of the rule. Yet it is regrettable that I must do so. I am not the only Member of this Committee who is finding it necessary to do so today. As I have said before. I do not enjoy taking time away from the important business of the Committee, but when a chairman abuses his power to stifle debate, Members of this House, both Republicans and Democrats, have a duty to defend the honor of this institution and the integrity of its proceedings. So long as power is abused, rules are ignored and broken and the rights of Members who represent millions of Americans are violated, this House cannot do its job properly. The American people are cheated of their rightful and constitutional right to question the government. I respectfully request that the Chairman, as a general Parliamentarian, call for an additional day of minority hearings by members of the minority party concerning the reauthorization of the USA PATRIOT Act.

As I said the last time I came to the floor for this purpose, it is my fervent hope that this will be the last time it will ever be necessary for me or any other Member to offer such a resolution or to raise a question of personal privilege. We should be spending our time dealing with the problems and concerns of the American people; but when a chairman abuses his power to stifle debate, Members of this House, both Republicans and Democrats, have a duty to defend the honor of this institution and the integrity of its proceedings. So long as power is abused, rules are ignored and broken and the rights of Members who represent millions of Americans are violated, this House cannot do its job properly. The American people are cheated of their rightful and constitutional right to question the government. I respectfully request that the Chairman, as a general Parliamentarian, call for an additional day of minority hearings by members of the minority party concerning the reauthorization of the USA PATRIOT Act.

I respectfully request that the Chairman, as a general Parliamentarian, call for an additional day of minority hearings by members of the minority party concerning the reauthorization of the USA PATRIOT Act.

As I said the last time I came to the floor for this purpose, it is my fervent hope that this will be the last time it will ever be necessary for me or any other Member to offer such a resolution or to raise a question of personal privilege. We should be spending our time dealing with the problems and concerns of the American people; but when a chairman abuses his power to stifle debate, Members of this House, both Republicans and Democrats, have a duty to defend the honor of this institution and the integrity of its proceedings. So long as power is abused, rules are ignored and broken and the rights of Members who represent millions of Americans are violated, this House cannot do its job properly. The American people are cheated of their rightful and constitutional right to question the government. I respectfully request that the Chairman, as a general Parliamentarian, call for an additional day of minority hearings by members of the minority party concerning the reauthorization of the USA PATRIOT Act.

CONGRESSIONAL RECORD — HOUSE

June 16, 2005

H4645

them and binged the pavel and got up from his seat. The rules require a motion to adjourn because hearings are not normally ended unilaterally by a chairman. We consulted with the House Parliamentarian who confirmed that an adjournment motion must be approved by members of the committee unless there is unanimous consent. The fact that adjournment is not normally contested because it is not necessary because everybody agrees does not change the rules. As the chairman unilaterally adjourned the hearing, while members were seeking recognition, while he refused to recognize those members seeking to raise points of order, the committee staff, either on the chairman's instructions or acting on their own accord, switched off members' microphones while we were attempting to speak, instructed the stenographer to stop recording the hearing and turned off the electronic transmission of the hearing. The hearing was not a proceeding because it had not been legally adjourned because there had been no vote and no unanimous consent. Thanks to C-SPAN, the rest of the hearing was recorded and broadcast so the chairman was unable to censor the minority. And the microphone problems illustrate that the American people, although he tried.

Can any Member recall a time when a member's microphone was turned off while he or she was speaking in a committee hearing? Mr. Speaker, it is fair to ask, why should a member of the majority or the public care about adherence to the rules in these respects or about the rights of the minority? The answer is simple. Every Member represents more than half a million American citizens. Every one of those Americans is entitled to a voice in our government. No one should ever be allowed to abuse the power of his office to silence opposing views or to disfavor views of Americans from having their views represented simply because they chose representatives of the minority party.

The greatness of our Nation is our freedom to stand up for what we believe and to have everyone's voice heard in the halls of government. The arrogance of power, the abuse of power, the silencing of minority voices, is a direct threat not only to our rules but to our democracy and to our freedom. The rules of this House exist to protect our democracy. Every Member of this House, regardless of party, must stand up for this institution, for its rules, and for the democracy it represents.

That is why I urge the adoption of this resolution and why I hope such a resolution will never again be necessary in this House.

Mr. Speaker, I reserve the balance of my time.

Mr. SENSENBRENNER. Mr. Speaker, I find myself such time as I may consume.

I strongly oppose this resolution because it does not state what the facts are relative to the Judiciary Committee's consideration of the PATRIOT Act. I rise today to respond to false, misleading, and malicious allegations that have been made by Members of this House and reported in the media concerning the conduct of the Judiciary Committee during the reauthorization of the USA PATRIOT Act and my consideration of the PATRIOT Act as chairman of the Committee on the Judiciary.

Since becoming chairman of this committee, I have consistently demonstrated a commitment to fair and equitable consideration of issues before the committee. Perhaps no other issue better demonstrates this commitment than the committee's response to the tragic events of September 11, 2001. Shortly following the attacks, I called a committee hearing to draft antiterrorism legislation at which the Attorney General and other top officials of the Justice Department testified. I also assigned this work to a bipartisan legislation to help detect, deter, and defeat terrorist threats to our Nation's security.

Since that time, the record clearly demonstrates that I have kept my word by conducting bipartisan and evidence-based consideration of this critical issue.

In October of 2001, the committee unanimously approved the PATRIOT Act by a vote of 36–0. I was enormously pleased to see that a committee comprising sharply diverging viewpoints could speak in a clear and united voice on an issue of overwhelming importance to the security, safety, and liberty of all Americans. When drafting this legislation, I also insisted that provisions expanding the scope of Federal authority be subject to congressional reauthorization. I included sunsets in these provisions because I strongly believe that Congress must play an active and continuing role in ensuring that the PATRIOT Act protects the safety and security of all Americans while preserving the freedom and liberty that distinguish us as Americans.

To ensure that the PATRIOT Act is being implemented in a manner that reflects the priorities of Congress, on multiple occasions Ranking Member CONyers and I have sent detailed, extensive, and bipartisan inquiries to the Department of Justice concerning the implementation of the legislation.

When the Justice Department did not fully respond to our detailed inquiries, I forcefully asserted the committee's prerogatives by raising the possibility of a committee subpoena to obtain the requested information.

The committee has conducted several hearings on matters related to the PATRIOT Act and senior administration officials have testified. At my request committee members have also received briefings on the implementation of the PATRIOT Act from senior law enforcement officials.

On March 28 of this year, the gentleman from Michigan (Mr. CONYERS), ranking member, and I jointly announced a series of hearings on the reauthorization of the PATRIOT Act. We did this to examine provisions of the PATRIOT Act that are set to expire at the end of this year, the scope of these hearings has been broadened to include provisions of the PATRIOT Act that will not sunset, and issues that are only tangentially related to PATRIOT Act have also received formal committee consideration at the request of the minority.

The record clearly proves that I have worked in a bipartisan manner to ensure that the committee has received testimony from and heard from knowledgeable witnesses of diverging viewpoints, and that members had the opportunity to address questions to each of them. And at this time I include in the RECORD a listing of the oversight activities and a chronology of the hearing record that has been held since April before the Committee on the Judiciary and its subcommittees.

OVERSIGHT: HOUSE JUDICIARY COMMITTEE OVERSIGHT OF THE USA PATRIOT ACT OVERSIGHT THROUGH LETTERS TO THE DEPARTMENT OF JUSTICE

House Judiciary Committee sent the Attorney General, John Ashcroft, a letter on June 13, 2002, with 50 detailed questions on the implementation of the USA PATRIOT Act. The questions were a result of extensive consultation between the majority and minority Committee counsel. Assistant Attorney General, Daniel Bryant, responded to Chairman Sensenbrenner and Ranking Member Mr. Conyers on July 26, 2002, providing lengthy responses to 28 out of the 50 questions. Then, on October 21, 2002, Mr. Bryant sent the responses to the remaining questions, after sending responses to six of the questions to the House Permanent Select Committee on Intelligence on September 20, 2002, Mr. Bryant sent the minority additional information regarding the Department of Justice's responses to these questions.

On April 11, 2003, Chairman Sensenbrenner and Ranking Member Mr. CONyers sent a second letter to the Department of Justice with additional questions on the use of pre-existing authorities and the new authorities conferred by the USA PATRIOT Act. Once again, the questions were the product of bipartisan committee counsel. Acting Assistant Attorney General, Jamie E. Brown, responded with a May 13, 2003 letter that answered the questions she deemed relevant to the Department of Justice and forwarded the remaining questions to the appropriate officials at the Department of Homeland Security on June 13, 2003.

On September 13, 2003, the Assistant Secretary for Legislative Affairs at the Department of Homeland Security, Pamela J. Turner, sent responses to the forwarded questions.

On November 20, 2003, Chairman Sensenbrenner and Congressman Hostetler, Chairman of the Subcommittee on Immigration,
June 16, 2005

OVERSIGHT THROUGH HEARINGS

On May 10, the Honorable’s Subcommittee on the Committee held an oversight hearing entitled, “Anti-Terrorism Investigations and the Fourth Amendment.” Attorneys from the Department of Justice appeared and answered questions regarding the implementation of the USA PATRIOT Act. In response to our request, the Department of Justice provided two separate briefings to Members, counsel, and staff:

During the second briefing, held on February 3, 2004, the Department of Justice discussed its views of Section 123, the “Security and Freedom Partnership” of the USA PATRIOT Act. During the briefing held on August 7, 2003, Department officials covered the longstanding authority for law enforcement to conduct “sensitive briefings” to the Department of Justice for Members of Congress and their staff.

The Department of Justice has also provided three classified briefings on the use of the Foreign Intelligence Surveillance Act (FISA) to the House Judiciary Committee Members and Staff on March 22, 2005.

HEARING CHRONOLOGY: HOUSE JUDICIARY COMMITTEE CONSIDERATION OF THE USA PATRIOT ACT

FULL COMMITTEE CONSIDERATION

June 10, 2005: Oversight Hearing on the Reauthorization of the USA PATRIOT ACT: Carla Tapia-Ruano, First Vice-President of the American Immigration Lawyers Association (Minority witness); Deborah Pearlstein, Director of Human Rights First (Minority witness); and Chip Pitts, Chair of the Board of Amnesty International USA; Minority Members Present: Delahunt, Jackson-Lee, Nadler, Scott, Van Hollen, Wasserman Schultz, Watt.

SUBCOMMITTEE CONSIDERATION

April 26, 2005: Oversight Hearing—Have sections 201, 202, 214 and 225 of the USA PATRIOT Act, and their effect on information sharing and the Fourth Amendment: Minority Members Present: Scott, Delahunt, Jackson-Lee, Waters.

Mr. Speaker, by scheduling 12 hearings on the reauthorization of the USA PATRIOT Act during this Congress, in addition to the bipartisan record established in previous Congresses, I have demonstrated my commitment to conducting rigorous and comprehensive oversight of the implementation of the USA PATRIOT Act. Since commencing this latest series of hearings in April, two top officials at the Justice Department, Deputy Attorney General Gonzales and his Deputy James Comey, have testified before the committee on separate occasions. In each of the nine additional recent hearings held on the subject, the minority was allowed to designate at least one and sometimes two of the customary four witnesses at committee hearings, thus providing a consistent platform for additional and often dissenting views.

The record clearly demonstrates that this committee has engaged in a thorough, comprehensive, and bipartisan review of the USA PATRIOT Act since its passage. Assertions to the contrary are not only unfounded, but also false, misleading, and malicious.

On June 8, 2005, the committee held a hearing on the “Reauthorization of the USA PATRIOT Act: Section 505 and Section 804” that addresses National Security Letters and Section 804 that addresses jurisdiction over crimes committed while in the United States Attorney’s Office. The committee heard testimony from the following witnesses:

- Professor of Law, Mortiz College of Law, the Ohio State University (Majority witness); and Peter Swire, Professor of Law, Mortiz College of Law, the Ohio State University (Minority witness).
- The Honorable Mary Beth Buchanan, United States Attorney for the Western District of Pennsylvania (Majority witness); and Suzanne Spaulding, Managing Director, the Harbour Group, LLC (Minority witness).
- Honorable Mary Beth Buchanan, United States Attorney for the Western District of Pennsylvania (Majority witness); and Suzanne Spaulding, Managing Director, the Harbour Group, LLC (Minority witness).
- Minority Members Present: Delahunt, Scott, Waters.
PATRIOT Act,” at which Deputy Attorney General Comey testified. At the commencement of this hearing and without previous notice or consultation, the gentleman from Michigan (Mr. CONYERS), ranking member, and other members of the committee requested additional witnesses to testify before the committee on the “Reauthorization of USA PATRIOT Act” pursuant to House Rules.

House Rule XI(2)(j) states: “Whenever a hearing is conducted by a committee on a measure or matter, the minority members of the committee shall be entitled, upon request to the chairman by a majority of them before the commencement of the hearing, to call witnesses selected by the minority to testify with respect to that measure or matter during at least 1 day of hearing thereon.” I complied with that request and set the additional hearing on June 10.

At the outset of this hearing, I reminded members and witnesses of the permissible scope of the hearing requested by the minority under House Rule XI by stating: “It is the Chair’s intention that the scope of the hearing be limited to the topic that was chosen by the Democratic minority that called this hearing and chose the witnesses, which is the reauthorization of the PATRIOT Act. Members and witnesses are advised that the questions and testimony not falling within the subject matter of the hearing chosen by the Democrats will not be included in the hearing record pursuant to House Rule XI.” After reviewing the testimony of the witnesses, I again expressed my concern stating that, “I am disturbed that some of the testimony that has been presented in written form by the witnesses today are far outside the scope of the hearing, which the Democratic minority called and which they set in their letter.”

Notwithstanding repeated reminders and admonitions concerning the permissible scope of the hearing under House Rule XI, the gentleman from Michigan (Mr. CONYERS), ranking member, and members of the minority invited witnesses to provide testimony and make statements clearly outside of the scope of the reauthorization of the PATRIOT Act.

For example, in his opening remarks, the gentleman from Michigan (Mr. CONYERS) stated: “For many of us, this process of hearings is not merely about the extension of the 10 expiring provisions of the PATRIOT Act. It is about the manner in which our government uses its legal authority to prosecute the war against terror both domestically and abroad. As we hear from our witnesses today, I think we will demonstrate that much of this authority has been abused.”

My repeated reminders and admonitions about House Rules concerning the permissible scope of the hearing were ignored by witnesses and members of the committee.

In the face of this refusal by the witnesses and members to appropriately conform their testimony to the subject matter of the hearing requested by the minority, I exercised great patience in permitting witnesses and members to weigh in on issues totally unrelated to that subject. I recognized all four witnesses and members present at the hearing for 5 minutes. The record clearly shows that I evinced no favoritism in providing time either to witnesses or members.

At the conclusion of the hearing, when each witness and member had been provided equal time to raise questions, and the witnesses asked and received permission to submit their complete testimony into the hearing record, I expressed my great disappointment that opponents of the PATRIOT Act have used it as a vehicle to bring a broad range of allegations before the committee. In the course of this hearing, I did nothing that remotely resembles conduct that can be described as illegal. And as chairman of the Committee on the Judiciary, I take particular umbrage at this mischaracterization.

The gentleman from New York (Mr. NADLER) has also contended that I chaired the hearing in a manner that was “with an attitude of total hostility.” Based on these remarks, it has been inaccurately reported that I “abruptly pulled the plug... when a hearing on the PATRIOT Act turned to prisoners and anti-immigration militia on the Mexican border.” These statements are clearly false. I permitted each witness an opportunity to complete his or her oral remarks, and the hearing was only concluded after 2 hours’ duration only when each member had been provided an equal opportunity to speak.

Following the hearing, I have met with the gentleman from Michigan (Mr. CONYERS), ranking member, to discuss ways in which the committee could respond to concerns expressed by some members of the minority, and we reached a resolution that might have averted this impasse. However, some in the minority have preferred a political issue to a workable solution. I trust that by fully and fairly examining the record of the June 10 hearing, as well as all other hearings conducted, that the record of bipartisan consideration of matters relating to the PATRIOT Act and other matters before the committee, Members of this House and the public at large will reject the false, malevolent, and derogatory allegations leveled against me by certain minority Members of this body.

Mr. Speaker, the American people expect and deserve Members of Congress to approach terrorism prevention in a thoughtful, fact-based manner. All too often opponents of the PATRIOT Act have constructed unfounded and totally unrelated conspiracy theories, erected strawmen, and engaged in irresponsible and totally unfounded hyperbole, or unjustly impugned the law enforcement officials entrusted with protecting the security of America’s citizens. While the PATRIOT Act was drafted and passed by both Houses with wide bipartisan majorities, it has been labeled by some into a political weapon of choice to allege a broad range of violations which have nothing to do with that
legislation. These efforts coarsen public debate and undermine the responsible, substantive examination that must inform congressional and public consideration of this critical issue. I will not be deterred by malicious attacks or minority obstructionism. In the coming months I will continue to energetically discharge my responsibilities as chairman to ensure thorough, bipartisan, and thoughtful consideration of issues relating to the PATRIOT Act and other legislation before the committee. This House and the American people who elect us to represent them expect and deserve no less.

Mr. Speaker, I yield back the balance of my time.

Mr. NADLER. Mr. Speaker, I yield 2 minutes to the gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Mr. Speaker, I believe all of my colleagues would accept the premise that justice is not outside of the jurisdiction of the Committee on the Judiciary, nor is the concept of justice outside of the concept of this august body. Justice is cited to have stated that the spirit of liberty is a spirit which is not too sure that it is right. So sometimes, Mr. Speaker, it is appropriate that those of us who believe in liberty should step back for a moment and question whether everything that we have done or everything that we think is right.

I think it is well to remind my colleagues that our Founding Fathers, those who came freely to this Nation, fled because they fled from persecution. And they fled to have the opportunity and the right to speak. We have always abhorred the tyranny of the majority. So it is important that those of us who stand today welcome, welcome, welcome the witness who might be repugnant to us. And sometimes the repugnancy of the witness that we might sit down and resolve these questions and these disputes.

But there is no doubt that the resolution offered by the gentleman from New York for yielding me time. I was particularly surprised and disappointed by the disposition demonstrated by the chairman during the hearing, and found it ironic that the Committee on the Judiciary, whose responsibilities include reviewing, safeguarding and upholding our Constitution, thought nothing of trampling the rights the minority’s witnesses by severe limiting their opportunities to be heard.

After 9/11, the vast majority of Americans were and remain willing today to give up some of our freedoms and civil liberties in order to keep us safe. When the USA PATRIOT Act was adopted by Congress, there were 16 provisions that
were troubling enough to most Members that they were required to be reviewed by Congress before they could remain in law past this year.

I think I share the views of many when I say that I may ultimately support all 16 provisions remaining in law. However, it did not seem too much to ask to thoroughly review those provisions, and not just hear a drastically lopsided set of witnesses called by the majority party.

If we are going to restrict civil liberties in the name of national and homeland security, it is more important than ever to shine the light on these provisions and make sure they can withstand a rigorous test.

Forfeiting civil liberties is not merely an inconvenience for our citizens. It must be a conscious decision, made with full disclosure and review and for good reason. If this forfeiture cannot withstand a review where proponents and opponents have their concerns aired, then our citizens cannot be expected to give up rights they were born with and for which our forefathers and foremothers so desperately fought.

It is troubling, that, like the other committee on which I serve, the Committee on Financial Services, which operates in an spirit of bipartisanship even on the most contentious of issues, that we can withstand the test, and this should be done without the abuse of power and trampling of democracy that we experienced last week.

Mr. NADLER. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan, the distinguished ranking minority member of the Committee on the Judiciary.

Mr. CONYERS. Mr. Speaker, I thank the gentleman for yielding me time.

Mr. Speaker, this is an embarrassing circumstance that we again find ourselves in. There are reasons that have required that the gentleman from New York, regrettably, bring this privileged resolution to the floor. There is little question that the hearing that the chairman of the gentleman from Wisconsin (Chairman SENSENBERNEN), was very, very unusual for the meeting that was held, which he was required to hold.

Now, do not take my word for it. I want you to go look at the evidence. It was all taped. I was stunned by my friend’s continued hostility, not just toward the members of the Democratic side, but the witnesses themselves. I have never, ever experienced a witness being simply interrupted in mid-sentence. It was highly inappropriate. The meeting was ended incorrectly. You cannot walk out of a meeting. You cannot say “The meeting is adjourned,” slam the gavel down and walk out.

I believe that the Committee on the Judiciary. I came to this committee and my all my career has been spent there. I worked under Emanuel Celler, Jack Brooks and Peter Rodino. I had wonderful times with the chairman that preceded the gentleman from Wisconsin (Chairman SENSENBERNEN), the gentleman from Illinois (Mr. HYDE).

What I want Members to do, and I plead with them, is to support the gentleman from New York’s privileged resolution, and allow the gentleman from Wisconsin (Chairman SENSENBERNEN) and me to continue meetings trying to get this committee back on track and make it work again. Join us in that request. Please.

Mr. NADLER. Mr. Speaker, I yield myself the balance of my time.

The SPEAKER pro tempore (Mr. THORNBERRY). The gentleman from New York has 2 minutes remaining.

Mr. NADLER. Mr. Speaker, we are not here discussing the substance or the merits of the PATRIOT Act or the manner in which it was adopted 4 years ago, or the sufficiency of the oversight of the PATRIOT Act by the Committee on the Judiciary. We will have plenty of time to discuss that on the floor in coming weeks. We are discussing the abuse of power and flouting of the rules by the chairman of the committee at the minority hearing on June 10.

What the chairman said today did not contest or dispute a single point or a single allegation or assertion in the resolution. He did not deny that he rigidly cut off witnesses, every witness, in mid-sentence, a practice unheard of normally in the committee on the judiciary.

He did not deny that he made several false and disparaging comments about members of the minority in violation of the rules.

He did not deny that on numerous occasions throughout the hearing to recognize members of the minority party attempting to raise points of order.

He did not deny that he refused to give all witnesses equal time to speak for themselves in. There are reasons that have led to the hearings of Mr. NADLER.

Mr. Speaker, this is an embarrassing resolution. He did not deny that he refused to give all witnesses equal time to speak for themselves in. There are reasons that have led to the hearings of Mr. NADLER.

Mr. Speaker, this is an embarrassing resolution. He did not deny that he refused to give all witnesses equal time to speak for themselves in. There are reasons that have led to the hearings of Mr. NADLER.

Mr. Speaker, this is an embarrassing resolution. He did not deny that he refused to give all witnesses equal time to speak for themselves in. There are reasons that have led to the hearings of Mr. NADLER.

Mr. Speaker, this is an embarrassing resolution. He did not deny that he refused to give all witnesses equal time to speak for themselves in. There are reasons that have led to the hearings of Mr. NADLER.

Mr. Speaker, this is an embarrassing resolution. He did not deny that he refused to give all witnesses equal time to speak for themselves in. There are reasons that have led to the hearings of Mr. NADLER.

**CONGRESSIONAL RECORD — HOUSE**

**June 16, 2005**

**H4650**

Mr. BROWN of Ohio said and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. BROWN of Ohio. Mr. Speaker, I ask unanimous consent to take my time to address the House.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. BROWN) is recognized for 5 minutes.

Mr. BROWN of Ohio. Mr. Speaker, at a recent White House news conference President Bush called on Congress to pass the Central American Free Trade Agreement this summer. A couple of weeks ago in this Chamber the most powerful Republican in the House, the gentleman from Texas (Mr. DELAY), promised a vote by July 4. Well, actually, last year the gentleman promised a vote on CAFTA during 2004, then a couple of months ago he promised there would be a vote by Memorial Day. Now, I think the gentleman from Texas (Mr. DELAY) really means it, that there will actually be a vote on CAFTA by July 4.

The many of us who have spoken out against CAFTA, and that includes lots of Republicans and Democrats, people on both sides of the aisle have a message. Our message is dump this Central American Free Trade Agreement. Negotiate a CAFTA that large numbers of Members of both parties can support.

Now, President Bush signed CAFTA more than a year ago. Every trade agreement negotiated by this administration, Chile, Singapore, Australia, Morocco, every single trade agreement negotiated by this administration has passed Congress within 2 months.

Mr. BROWN of Ohio. Mr. Speaker, I ask unanimous consent to take my time to address the House.

The SPEAKER pro tempore. The SPEAKER pro tempore (Mr. CONAWAY). Under the Speaker's announced policy of January 4, 2005, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. GUTKNECHT) is recognized for 5 minutes.

Mr. GUTKNECHT addressed the House. His remarks will appear hereafter in the Extensions of Remarks.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. PALLONE) is recognized for 5 minutes.

Mr. PALLONE addressed the House. His remarks will appear hereafter in the Extensions of Remarks.

ORDER OF BUSINESS

Mr. BROWN of Ohio. Mr. Speaker, I ask unanimous consent to take my Speaking Order at this time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?
percent, of their manufacturing: Michigan, 210,000 jobs lost; Illinois, 224,000 jobs lost; Pennsylvania, 199,000; New York, 222,000; Mississippi and Alabama, 138,000; South Carolina and North Carolina, 207,000; the gentleman from Ohio’s (Mr. KUCINICH) and my State, 217,000 manufacturing jobs lost, more than one out of five manufacturing jobs in our State.

The States in blue have lost 15 to 20 percent of their manufacturing jobs. More than 200,000 in Texas; Florida and Georgia, 178,000; State after State after State. Our trade policy simply is not working, Mr. Speaker.

Now, what the administration’s doing, though, what CAFTA supporters in this Congress have done is they have crafted a one-sided plan to benefit multinational corporations at the expense of American and Central American workers, at the expense of American and Central American small business, at the expense of American and Central American farmers.

It is the same old story. Every time there is a trade agreement, the President says three things: It will be mean jobs for Americans, it will mean more manufacturing done in the U.S. and more exports, and it will mean better wages for workers in developing countries.

Mr. Speaker, Benjamin Franklin said 200 or so years ago, the definition of insanity is doing the same thing over and over and expecting a different outcome. Every time the President says it is going to mean more jobs for Americans it is going to mean more manufacturing and more export, and it is going to raise living standards in the developing countries. Mr. Speaker, it never, ever does. These promises fall by the wayside in favor of big business interests that send U.S. jobs overseas.

Again, look at this chart. Look at the millions, 200,000, 200 plus, 200, 200, 200,000 jobs sent overseas. The standard of living in the developing world is stagnant, not going up. We are continuing to outsource jobs and the administration says let us pass the dysfunctional cousin of NAFTA. It is pass CAFTA. There is a reason CAFTA and NAFTA rhyme. It is because it is the same old story, the same dysfunctional cousin of NAFTA.

Now, the administration is doing something different. They are linking CAFTA to helping democracy and helping democracy develop in the developing world. That argument does not sell.

In May, the Chamber of Commerce brought the six Central American and Dominican Republic presidents to the United States on a junket, to Cincinnati, to Albuquerque, to New York, to Los Angeles, to Washington, trying to convince the American people and the American media that this is not workers in the United States.

The Costa Rican president said they will not ratify CAFTA unless an independent commission could determine the agreement will not hurt the working families in his country.

Now, the administration has opened the bank in time to cut deals. Mr. Speaker, when the world’s poorest people can buy American products, not just make them, we will know our trade policies are finally working.

IN HONOR OF THE 140TH ANNIVERSARY OF JUNETEENTH

The SPEAKER pro tempore (Mr. CONAWAY). Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE. Mr. Speaker, I rise today in honor of the 140th anniversary of Juneteenth. This is the oldest known African American celebration commemorating the ending of slavery in the United States. This holiday actually started because of an event in Texas history.

Back on June 19, 1865, Major General Gordon Granger led Northern soldiers into Galveston, Texas, to announce the ending of the War Between the States and to order the release of the last remaining slaves. While President Lincoln’s issuance of the Emancipation Proclamation occurred over 2 years earlier, on January 1, 1863, in the midst of the War Between the States, the peculiar institution of slavery, as Southerners referred to it, continued until this historic day. No one in Texas had ever heard that the slaves had been freed until June 19, 1865.

Before Texas was a State, it was a free republic, independent Nation, for 9 years. The Constitution of the Republic of Texas of 1836 expressly forbid the importation of slaves from Africa, but slaves continued to come to Texas from the United States. As a result, slavery spread.

Texas was admitted to the Union in 1845, by just one vote. I might add that some say they wish the vote had gone the other way. Nonetheless, the Lone Star State had some 30,000 slaves. In the census of 1850, 27 percent of the Texas population was slaves. In 1860, right before the war started, it was almost 30 percent.

So on that day in 1865, June 19, thus the phrase, “Juneteenth,” Major General Granger dramatically declared when he landed in Galveston, Texas: “The people of Texas are informed that in accordance with a Proclamation from the Executive of the United States, all slaves are free. This involves an absolute equality of rights and rights of property between former masters and slaves.”

It is interesting to note, Mr. Speaker, that Lincoln’s Emancipation Proclamation only applied to the Southern States. It took the 13th Amendment to free the slaves in the border States and the rest of the United States.

Now Juneteenth has become not just a Texas celebration but a national event. This Sunday, as thousands of Americans across the Nation celebrate Juneteenth through cultural displays and various educational activities, let us reflect back on this milestone in this ongoing struggle for equality and freedom. Let us remember the committed, courageous and critical men and women who made tremendous sacrifices to secure this ongoing freedom.

Our Nation’s history is littered with struggles for freedom starting with our revolution for independence from the British empire. World history, too, is filled with great labors for liberty, for human rights, for equality.

Just this January, I traveled to Iraq to observe its historic election, in which young and old, men and women, achieved the opportunity to make a free choice. So instead intimidation, threats and actual violence, the people of Iraq spoke out against the past oppression and broke off the chains of slavery from Saddam Hussein. There is something down in the soul of each of us that we have the yearning and the God-given desire to be free.

African American freedom fighters throughout countless generations paid a precious price to deliver equality and freedom for their brothers and sisters and their posterity. Overcoming many dangers, toils, and snares, civil rights activists like Texan Barbara Jordan, the first black woman to serve in the United States Congress from the South and Craig Washington, a masterful criminal defense attorney and the first black State senator in the State of Texas. He was an attorney and former Member of the United States House of Representatives. James Farmer, another Texas and principal organizer of the “Freedom Rides.” Dred Scott, Frederick Douglass, Sojourner Truth, Rosa Parks and Dr. Martin Luther King and some colleagues in this House, as well as many more, helped in the fight for equality in America.

Although we have made significant strides in ensuring that this country fulfills the words of our national anthem, “land of the free and home of the brave” we must always be ever vigilant and also make the Declaration of Independence a true reality for all peoples.

As that Declaration of Independence says, “We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.”

CENTRAL AMERICAN FREE TRADE AGREEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. KUCINICH) is recognized for 5 minutes.

Mr. KUCINICH. Mr. Speaker, soon the House of Representatives will bring before it legislation to clear the way for the Central American Free Trade Agreement to not only be discussed but, in my view, to be challenged.

Earlier my colleague the gentleman from Ohio (Mr. BROWN) spoke about the
loss of manufacturing jobs. I come from the Cleveland area, where we know that these trade agreements, NAFTA, GATT, the WTO which followed, have all worked against the American working people. We were told when these agreements were formed that it would mean more jobs in the United States because people in other countries would be buying our goods.

Well, let us look at the facts. Let us look at what the actual wages are and the purchasing power of people in various countries.

How, for example, can people in Honduras, $2,600 a year, be able to buy something that is made in the United States that has any powerful commercial value, like a car or like a washing machine? How could someone living in El Salvador, $4,800 a year, be able to purchase something, some manufactured product in the United States, that costs hundreds or thousands of dollars?

What is happening is that trade agreements are seeking cheaper labor where they can go to countries where the labor is cheap, but they are not selling American goods there. So we are actually losing our markets for our goods; yet, we are finding markets for cheap labor. That is what these trade agreements do. They open up markets for cheap labor.

Keep in mind, the workers in Honduras, Guatemala, El Salvador, Dominican Republic, Nicaragua and others represented on this chart, they do not have any rights. They do not have a right under these trade agreements, an inherent right for collective bargaining, a right to organize, a right to strike, a right to decent wages and benefits.

No. As these corporations get more power, they force upon the workers a take-it-or-leave-it proposition where people are left to work under conditions that are awful, for wages that are miserably low, and if they do not like it, they do not have any kind of a job at all.

Meanwhile, what happens in the United States? We are losing jobs by the millions. The trade agreements, which we have seen this country pass over the last 12 years, have resulted in a destruction of America’s basic manufacturing capability.

Remember, occupational security has depended on our strategic industrial base of steel, automotive and aerospace, and yet, we are seeing that base decline because of these trade agreements. We are giving away our ability to even defend our country. We are giving away our ability to create good-paying jobs.

Henry Ford understood more than 100 years ago that you had to be able to pay people a good wage so they could buy the things they make. These trade agreements turn all that on its head. Now, American workers are seeing their jobs exported to countries where people make low wages and countries where people cannot by American goods. That is where we are.

CAFTA is another in a long series of trade agreements which have worked against the interests of the American people. We have welcomed representatives of Central America to this Congress. It is clear that the agreements turn all that on its head. They have communicated to us. These Members of Congress of Central American countries have communicated to us that this trade agreement was passed in the dead of night in their countries; that this trade agreement was passed without the representatives even knowing what was in the bill; that this trade agreement was passed and set the stage for the privatization of public services. This trade agreement was passed and set the stage for higher taxes, with people already living very humbly with the lowest wages.

We are here to stand up for the American worker, stand up for American manufacturing, to stand up for the future of this country and to stand up for international solidarity on questions of human rights, workers rights and environmental quality principles.

It is time for us to say that CAFTA must be defeated; that we must go back to a whole new trade structure that is based on workers’ rights, that is based on human rights, that is based on environmental quality principles.

Commerce essentially depends on the agreements which we come up with in this House of Representatives. But commerce without economic justice is tyranny. Commerce without morality is a degradation of the human spirit. Commerce without basic principles which can strengthen a society is commerce that erosves the social compact of a society.

Mr. Speaker, I appreciate having this opportunity to share with the American people the urgency of seeing CAFTA defeated.

JUNETEENTH

The SPEAKER pro tempore (Mr. CONAWAY). Under a previous order of the House, the gentleman from Illinois (Mr. DAVIS) is recognized for 5 minutes.

Mr. DAVIS of Illinois. Mr. Speaker, June 19th, Juneteenth as it is called, is a unique people’s holiday. It is the oldest known celebration of the end of slavery in the United States. It marks the day that union soldiers arrived in Galveston, Texas, in 1865, with news that the war had ended and that all slaves were now free. 2½ years after the Emancipation Proclamation.

We do not know why it took so long for the news to get to Texas, but we do know that the military general order which was posted that day read in part, and I quote “The people of Texas are informed that in accordance with the proclamation from the executive of the United States, all slaves are free.”

The news spread like wildfire, and spontaneous celebrations sprang up throughout the State and were repeated each June 19th of each following year. We continue to celebrate Juneteenth because of the importance of slavery in American history and because the lingering effects of slavery remain a part of the legacy of our country.

The legacy of slavery continues to play a role in our daily lives and politics. The vast racial disparities in employment, income, home ownership, education, voter registration and participation, health status and mortality all continue to exist. The great historian John Hope Franklin wrote, and I quote, “Much history occurs of which some historians decide to take no notice.”

Juneteenth is the people’s answer to the obscuring and distortion of much of the history and experience of African Americans in this country. It is an enduring statement that the truth cannot be suppressed forever, and that the struggle for justice and equality will and must continue.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BURTON) is recognized for 5 minutes.

Mr. BURTON of Indiana. Mr. Speaker, CAFTA is another in a long series of trade agreements which we come up with in this House of Representatives. It is time for us to say that CAFTA is passed and set the stage for the privatization of public services. This trade agreement was passed and set the stage for higher taxes, with people already living very humbly with the lowest wages.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. NORWOOD) is recognized for 5 minutes.

Mr. NORWOOD of Georgia. Mr. Speaker, I appreciate having this opportunity to share with the American people the urgency of seeing CAFTA defeated.
LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. BLUMENAUER (at the request of Ms. PELOSI) for today after 4:10 p.m. and the balance of the week on account of official business.

Ms. HOOLEY (at the request of Ms. PELOSI) for today after 4:10 p.m. and the balance of the week on account of official business in the district.

Mr. REYES (at the request of Ms. PELOSI) for today after 4:10 p.m. and the balance of the week on account of personal reasons.

Mr. GILLMOR (at the request of Mr. DeLAY) for today after 8:00 p.m. and the balance of the week on account of business in the district.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

The following Members (at the request of Mr. BROWN of Ohio) to revise and extend their remarks and include extraneous material:

Mr. PALLONE, for 5 minutes, today.
Ms. WOOLSEY, for 5 minutes, today.
Mr. BROWN of Ohio, for 5 minutes, today.
Mr. CUMMINGS, for 5 minutes, today.
Mr. SCHIFF, for 5 minutes, today.
Mr. DEFAZIO, for 5 minutes, today.

The following Members (at the request of Mr. POE) to revise and extend their remarks and include extraneous material:

Mr. GUTKNECHT, for 5 minutes, June 23.
Mr. POE, for 5 minutes, June 17 and 20.
Mr. NORWOOD, for 5 minutes, June 17.
Mr. OSBORNE, for 5 minutes, June 20.

The following Members (at their own request) to revise and extend their remarks and include extraneous material:

Mr. KUCINICH, for 5 minutes, today.
Mr. DAVIS of Illinois, for 5 minutes, today.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker’s table and, under the rule, referred as follows:

S. 1140. An act to designate the United States courthouse in Brownsville, Texas, as the “Reynaldo G. Garza and Fillemon B. Vela United States Courthouse”.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 643. An act to amend the Agriculture Credit Act of 1987 to reauthorize State mediation programs.

ADJOURNMENT

Mr. DAVIS of Illinois, Mr. Speaker, I move that the House do now adjourn. The motion was agreed to; accordingly (at 10 o’clock and 34 minutes p.m.), the House adjourned until tomorrow, Friday, June 17, 2005, at 9 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker’s table and referred as follows:

2384. A letter from the General Counsel, FEMA, Department of Homeland Security, transmitting the Department’s final rule — Final Flood Elevation Determinations — received June 13, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

2385. A letter from the General Counsel, FEMA, Department of Homeland Security, transmitting the Department’s final rule — Final Flood Elevation Determinations — received June 3, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

2386. A letter from the Director, Regulations Policy and Management Staff, FDA, Department of Health and Human Services, transmitting the Department’s final rule — Dental Devices; Reclassification of Tricalcium Phosphate Granules and Classification of Other Bone-Building Material for Dental Bone Repair (Docket No. 2002F-0520) (formerly Docket No. 02F-0520) received May 13, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2387. A letter from the Director, Regulations Policy and Management Staff, FDA, Department of Health and Human Services, transmitting the Department’s final rule — Use of Ozone-Depleting Substances; Removal of Essential-Use Designations (Docket No. 2003F-0029) (RIN: 0910-AP19) received April 26, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2388. A letter from the General Counsel, FEMA, Department of Homeland Security, transmitting the Department’s final rule — Suspension of Community Eligibility (Docket No. FEMA-FES-7877) received June 3, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

2389. A letter from the Deputy Assistant Administrator, Office of Diversion Control, DEA, Department of Justice, transmitting the Department’s final rule — Schedules of Controlled Substances; Placement of Alpha-Methyltryptamine and 5-Methoxy-N,N-Dimethyltryptamine Into Schedule I of the Controlled Substances Act (Docket No. DEA-252F) received April 28, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2390. A letter from the Legal Advisor to the Chief, Media Bureau, Federal Communications Commission, transmitting the Commission’s final rule — Amendment of Section 73.202(b), Table of Allotments, FM Broadcast Stations (Sparta and Morrison, Tennessee) (Docket No. 05-139) received May 20, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2391. A letter from the General Counsel, Federal Energy Regulatory Commission, transmitting the Commission’s final rule — Standards for Business Practices of Interstate Natural Gas Pipelines (Docket No. RM06-1-002) received June 3, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2392. A letter from the Secretary, Federal Trade Commission, transmitting the Commission’s final rule — Children’s Online Privacy Protection Rule, received April 25, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2393. A letter from the General Counsel, Federal Retirement Thrift Investment Board, transmitting the Board’s final rule — Various Changes to the Thrift Savings Plan — received June 3, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

2394. A letter from the Acting Director, Office of Personnel Management, transmitting the Office’s final rule — Retirees’ Health Care Premium Payment Policy, and Retention Incentives (RIN: 3206-AK81) received May 23, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Government Reform.

2395. A letter from the Director, Office of Workers’ Compensation Programs, Department of Labor, transmitting the Department’s final rule — Performance of Functions; Claims for Compensation Under the Energy Employees Occupational Illness Compensation Program Act (RIN: 1215-AB51) received June 8, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on the Judiciary.

2396. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department’s final rule — Standard Instrument Approach Procedures; Miscellaneous Amendments (Docket No. 33944; Amdt. No. 3121) received May 19, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2397. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department’s final rule — Standard Instrument Approach Procedures; Miscellaneous Amendments (Docket No. 33974; Amdt. No. 3063) received May 19, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2398. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department’s final rule — Standard Instrument Approach Procedures; Miscellaneous Amendments (Docket No. 33978; Amdt. No. 3038) received May 19, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2399. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department’s final rule — Pyrotechnic Signaling Device Requirements (Docket No. FAA-2004-19947; Amendment No. 91-285) (RIN: 2120-A142) received May 19, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2400. A letter from the Program Analyst, FAA, Department of Transportation, transmitting the Department’s final rule — Revisions to Incorporated Provisions (Docket No. FAA-2004-19237; Amdt. Nos. 71-33, 97-1355) (RIN: 2120-A139) received May 19, 2005,
pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2401. A letter from the Program Analyst, F.A.A., Department of Transportation, transmitting the Department's final rule — Aviation Safety and Health Partnership Program (Docket No. FAA-2003-14578) received May 19, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2402. A letter from the Program Analyst, F.A.A., Department of Transportation, transmitting the Department's final rule — Amendment of Class E Airspace; Harrisburg, PA [Docket No. FAA-2005-20056; Airspace Docket No. 05-AEA-01] received June 15, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2403. A letter from the Program Analyst, F.A.A., Department of Transportation, transmitting the Department's final rule — Modification of Class E Airspace; Washington, KS. [Docket No. FAA-2005-20057; Airspace Docket No. 05-AEA-12] received June 15, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2405. A letter from the Program Analyst, F.A.A., Department of Transportation, transmitting the Department's final rule — Amendment of Class E Airspace; Burnsville, OR [Docket FAA 2001-18915; Airspace Docket 04-ANN-11] received June 15, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2406. A letter from the Program Analyst, F.A.A., Department of Transportation, transmitting the Department's final rule — Amendment of Class E Airspace; Harrisburg, PA [Docket No. FAA-2005-20057; Airspace Docket No. 05-AEA-02] received June 15, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2407. A letter from the Director, Regulations Management, Office of Regulation Policy and Management, Department of Veterans Affairs, transmitting the Department's final rule — Revision of Class E Airspace; New Orleans, LA [Docket 05-AEA-11] received June 15, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Veterans' Affairs.

2411. A letter from the Acting Chief, Publications and Regulations Branch, Internal Revenue Service, transmitting the Service's final rule — Estate of Mitchell v. Commissioner — received June 8, 2005, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. POMBO: Committee on Resources.

H.R. 394. A bill to direct the Secretary of the Interior to conduct a boundary study to evaluate the significance of the Colonial James Barrett Farm in the Commonwealth of Massachusetts and the suitability and desirability of its inclusion in the National Park System as part of the Minute Man National Historical Park, and for other purposes; with an amendment (Rept. 109–136). Referred to the Committee of the Whole House on the State of the Union.

Mr. BOEHNER: Committee on Education and the Workforce.

H.R. 2123. A bill to reauthorize the Head Start Act to improve the school readiness of disadvantaged children for other purposes; with an amendment (Rept. 109–136). Referred to the Committee of the Whole House on the State of the Union.

Mr. YOUNG: Committee on Transportation and Infrastructure.

H.R. 1412. A bill to amend the Ports and Waterways Safety Act to require notification of the Coast Guard regarding obstructions to navigation, and for other purposes; with an amendment (Rept. 109–137). Referred to the Committee of the Whole House on the State of the Union.

Mr. OXLEY: Committee on Financial Services.

H.R. 280. A bill to provide the provision of assistance by the Department of Housing and Urban Development for the cleanup and economic redevelopment of brownfields (Rept. 109–138). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule X, public bills and resolutions were introduced and severally referred, as follows:

By Mr. STUPAK (for himself, Mr. ELDER, Mr. EMANUEL, Ms. SCHRACK, Mr. BROWN of Ohio, Mr. KILDEE, Mr. KIRK, Mr. LA TOURTE, Ms. BALDWIN, Mr. DINGELL, Mr. LEVIN, Mr. KUCINICH, Ms. BEAN, Mr. RICHARDSON, Mr. KAPUT, and Ms. SLAUGHTER): H.R. 2930. A bill to prohibit the issuance of any Federal or State permit or lease for new oil and gas drilling, directional, or offshore drilling in or under one or more of the Great Lakes; to the Committee on Energy and Commerce.

H.R. 2931. A bill to amend part B of title III of the Higher Education Act of 1965 to expand the eligibility requirement to include Predominantly Black Institutions of higher education; to the Committee on Education and the Workforce.

By Mrs. BLACKBURN:

H.R. 2932. A bill to amend the International Air Transportation Competition Act of 1979 to modify restrictions on the provision of trans-border air transportation; to the Committee on Transportation and Infrastructure.

By Mr. FORBES (for himself, Mr. GALLAGHER, Ms. HARRIS of Maryland, Mr. GOODLATTE, Mr. BOOZMAN, Mr. BURTON of Indiana, Mr. NORWOOD, Mr. DEAL of Georgia, Ms. HARRIS, Ms. GINOW, Mr. BROWN of Florida, Mr. ISSA, Mr. PEARCE, and Mr. KING of Iowa):

H.R. 2933. A bill to amend the Immigration and Nationality Act to render inadmissible and deportable aliens who have participated in criminal street gangs, and for other purposes; to the Committee on the Judiciary.

By Mr. PILGER (for himself, Mr. KOLBE, Mrs. DAVIS of California, and Mr. FLAKE):

H.R. 2934. A bill to authorize Federal pay-ments for emergency medical services and medical and health services providers for the cost of uncompensated care of aliens aided by the border patrol or other Federal immigration official; to the Committee on Homeland Security.

By Mrs. DAVIS of California:

H.R. 2935. A bill to amend the Internal Revenue Code of 1986 to allow individuals a deduction for qualified long-term care insurance premiums, use of such insurance under cafeteria plans and flexible spending arrangements, and a credit for individuals with long-term care needs; to the Committee on Ways and Means.

By Mrs. DAVIS of California:

H.R. 2936. A bill to amend the Public Health Service Act, the Employee Retirement Income Security Act of 1974, and the Internal Revenue Code of 1986 to require that group and individual health insurance coverage and group health plans provide coverage for second opinions; to the Committee on Energy and Commerce, and in addition to the Committees on Education and the Workforce, and Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committees concerned.

By Mrs. DAVIS of California:

H.R. 2937. A bill to amend the Public Health Service Act, the Employee Retirement Income Security Act of 1974, and the Internal Revenue Code of 1986 to require that group and individual health insurance coverage and group health plans permit enrollment, direct access to services of obstetrical and gynecological physician services directly and without a referral; to the Committee on Energy and Commerce, and in addition to the Committees on Education and the Workforce, and Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committees concerned.

By Mr. DUNCAN (for himself and Mr. GORDON):

H.R. 2938. A bill to provide for local control for the siting of windmills; to the Committee on Energy and Commerce, and in addition to the Committees on Resources, and Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committees concerned.

By Mr. WELDON of Pennsylvania (for himself, Mr. FARR, Mr. ALLEN, and Mr. SAXTON):
H.R. 2939. A bill to establish a national policy for our oceans, to strengthen the National Oceanic and Atmospheric Administration, to establish a Committee on Ocean Policy, and for other purposes; to the Committee on Resources, and in addition to the Committee on Science, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. ENGLISH of Pennsylvania (for himself, Mr. KANJ러, Mr. REYNOLDS, Mr. BOEHLELT, Mr. THOMPSON of California, and Mr. WELLER): H.R. 2939. A bill to amend the Internal Revenue Code of 1986 to clarify that certain settlement funds established under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 are not subject to tax; to the Committee on Energy and Commerce.

By Mr. GRAVES (for himself, Mr. KENNEDY of Minnesota, and Mr. WILSON of South Carolina): H.R. 2941. A bill to amend title 18, United States Code, to protect potential victims of sex crimes by strengthening the sentencing provisions for sex offenders; to the Committee on the Judiciary.

By Mr. GRAVES (for himself, Mr. HONDA, Mr. ESLER, and Mr. BARD): H.R. 2942. A bill to amend the Small Business Act to establish eligibility requirements for business concerns to receive awards under the Small Business Innovation Research Program; to the Committee on Small Business, and in addition to the Committee on Science, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. HASTINGS of Florida (for himself, Mr. HINCHEN, Mr. MOORE of Kansas, and Mr. OWENS): H.R. 2944. A bill to provide for the assessment of a penalty to gasoline retailers who charge in exceedence of the prescribed index price for gasoline; to the Committee on Energy and Commerce.

By Mr. LOBIONDO (for himself, Mr. ROYCE, Mr. HASTINGS of Florida, Mr. KING of New York, Mr. VAN HOLEN, Ms. HERSETH, Mr. BROWN of South Carolina, Mr. MOORE of Kansas, Mr. PASCHELL, Mr. FRELINGHUYSEN, Mr. SMITH of New Jersey, Mr. MENendez, Mr. OWENS, Mr. PLATTs, Mr. HOLT, Mr. MCNULTY, Mr. PALLONE, Mr. HINCHEN, and Mr. ISSA): H.R. 2945. A bill to amend the Public Health Service Act to extend preventive health and research programs with respect to prostate cancer; to the Committee on Energy and Commerce.

By Mrs. MALONEY (for herself and Mr. HART): H.R. 2946. A bill to amend the Public Health Service Act and Employee Retirement Income Security Act of 1974 to require that group and individual health insurance coverage and group health plans provide coverage for qualified individuals for bone mass measurement (bone density testing) to prevent fractures associated with osteoporosis; to the Committee on Energy and Commerce, and in addition to the Committee on Education and the Workforce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. MILLIENDER-MCDONALD: H.R. 2947. A bill to amend the Elementary and Secondary Education Act of 1965 to authorize the use of funds for the inclusion in domestic violence education programs of information on legal rights available to adolescent victims of domestic violence; to the Committee on Education and the Workforce.

By Mrs. MILLIENDER-MCDONALD (for herself, Mr. OWENS, Mr. MOORE of Kansas, Mr. JEFFERSON, Mr. WEXLER, and Ms. WOOLSEY): H.R. 2948. A bill to give States the flexibility to reduce streamlining enrollment processes for the Medicaid and State children’s health insurance programs through better linkages with programs providing comprehensive assistance for low-income families; to the Committee on Energy and Commerce.

By Mr. GEORGE MILLER of California (for himself, Mr. KILDEE, Ms. PHILSON, Mr. OWENS, Mr. PAYNE, Ms. WOOLSEY, Mr. HINOJOSA, Mrs. MCCARTHY, Mr. TIERNEY, Mr. WU, Mr. KUCINICH, Mr. HOLT, Mr. BARNES of Minnesota, Mrs. DAVIS of California, Mr. DAVIS of Illinois, Mr. GRIJALVA, Mr. VAN HOLEN, Mr. RYAN of Ohio, Mr. BURBANK, Mr. BARNES, Mr. HIGGINS, Mr. DOGHTITT, Ms. MASIULI, Ms. BALDWIN, Mr. MICHAUD, Mrs. JONES of Ohio, Mr. STARK, Mr. CONEYERS, and Mr. WINTER): H.R. 2949. A bill to amend the Higher Education Act of 1965; to the Committee on Education and the Workforce.

By Mr. NEAL of Massachusetts (for himself, Mr. MITCHELL of Massachusetts): H.R. 2950. A bill to amend the Internal Revenue Code of 1986 to provide a revenue-neutral simplification of the individual income tax; to the Committee on Ways and Means.

By Mr. POMEROY: H.R. 2951. A bill to amend the Internal Revenue Code of 1986 to encourage guaranteed lifetime income payments by excluding from income a portion of such payments; to the Committee on Ways and Means.

By Mr. RYAN of Wisconsin (for himself and Mr. HERSETH): H.R. 2952. A bill to amend the Internal Revenue Code of 1986 with respect to the eligibility of certain qualified bond financing, and for other purposes; to the Committee on Ways and Means.

By Mr. SCOTT of Georgia: H.R. 2953. A bill to designate the building located at 490 Auburn Avenue, N.E., in Atlanta, Georgia, as the “John Lewis Civil Rights Institute”; to the Committee on Resources.

By Mr. SESSIONS: H.R. 2954. A bill to suspend temporarily the duty on manganese metal flake containing at least 99.5 percent by weight of manganese; to the Committee on Ways and Means.

By Mr. SMITH of Texas: H.R. 2955. A bill to amend title 22, United States Code, to clarify that the Court of Appeals for the Federal Circuit has exclusive jurisdiction of appeals relating to patents, plant variety protection, or copyrights, and for other purposes; to the Committee on the Judiciary.

By Mr. STUPAK: H.R. 2956. A bill to provide for the establishment of certain restrictions with respect to drugs containing isotretinoin (including the drug marketed as Accutane); to the Committee on Energy and Commerce.

By Mr. ABERCROMBIE (for himself, Mr. JONES of North Carolina, Mr. KUCINICH, Mr. PAUL, Mr. MEEHAN, Ms. PILISUK, Mr. BURBANK, and Ms. LEE): H.R. 2957. A resolution requiring the President to develop and implement a plan for the withdrawal of United States Armed Forces from Iraq, and for other purposes; to the Committee on International Relations, and in addition to the Committee on Armed Services, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. BROWN of Ohio (for himself and Mr. BILIRAKIS): H.Con. Res. 179. Concurrent resolution expressing the sense of the Congress regarding bone marrow failure diseases; to the Committee on Energy and Commerce.

By Mr. HOYER (for himself, Mr. WELCH of Pennsylvania, Mr. ANDREWS, Mr. BOEHLELT, and Mr. THOMPSON of Mississippi): H. Con. Res. 180. Concurrent resolution to support initiatives developed by the Firefighter Life Safety Summit and the mission of the National Fallen Firefighters Foundation and the United States Fire Administration to reduce firefighter fatalities and injuries, to encourage implementation of the new “Everyone Goes Home” campaign to make firefighter safety a national priority, and to support the traditional “stand down” called by fire organizations; to the Committee on Science.

By Mr. FOSSella (for himself, Mr. BILIRAKIS, Mrs. MALONEY, Mr. RYAN of Ohio, Mr. PETERSON of Minnesota, Mr. MCNULTY, Mr. ANDrews, Mr. RANGEL, Mr. KURL of New York, Mr. DAVIS of Illinois, Mr. ROTHMAN, Ms. WATSON, Mr. FRELINGHUYSEN, Mr. HOLT, Mr. MCGOVERN, Mr. PALLONE, Mr. LANTOS, Mr. SCOTT of Virginia, Mr. MENendez, and Mr. MCCOTTIER): H. Res. 325. A resolution honoring the spiritual leadership of Archbishop Iakovos to Greek Orthodox Christians in the Western Hemisphere; to the Committee on Government Reform.

By Mr. GALLEGGY (for himself, Mr. WEXLER, and Mr. SMITH of New Jersey): H. Res. 326. A resolution calling for free and fair parliamentary elections in the Republic of Azerbaijan; to the Committee on International Relations.

By Ms. LEE (for herself, Mr. LANTOS, Mr. PAYNE, Mr. GUTIERREZ, Mr. NORGREN, Mr. CONTRERAS, Mr. OWENS, and Ms. JACKSON-LEE of Texas): H. Res. 327. A resolution supporting the goals and ideals of National Passport Month; to the Committee on Government Reform.

ADDITIONAL SPONSORS

Under clause 7 of rule XII, sponsors were added to public bills and resolutions as follows:

H.R. 19: Mr. McCaul of Texas
Mr. SCHWARTZ of Pennsylvania and Mr. PLATTS.
H.R. 66: Mr. Fitzpatrick of Pennsylvania.
H.R. 70: Mr. Tom Davis of Virginia.
H.R. 75: Mr. BASS.
H.R. 97: Ms. SOLIS.
H.R. 98: Mr. COBLE.
H.R. 111: Mr. OLIVER.
H.R. 129: Mr. Israel and Mr. Miller of Florida.
H.R. 147: Mr. Boozman and Mr. FORBES.
H.R. 274: Mr. GEHLACH and Mr. SOUDER.
H.R. 392: Mr. LUCAS, Mr. LEWIS of Kentucky, and Mrs. BLACKBURN.
H.R. 408: Mrs. CAPPS, Mrs. BONO, and Ms. ZOR Lofgren of California.
H.R. 493: Mr. Scott of Virginia and Mr. BOEHLELT.
H.R. 515: Mr. Green of Wisconsin.
H. Res. 318: Mr. FRESY.
H. Res. 323: Mr. VAN HOLLLEN, Mr. SOUDER, Mr. MOORE of Kansas, Mr. WELDON of Pennsylvania, Mr. BOSWELL, and Mr. OWENS.

PETITIONS, ETC.
Under clause 3 of rule XII.
22. The SPEAKER presented a petition of the Committee on European Affairs, Hungarian Parliament, relative to a Declaration of Rights, which was referred to the Committee on International Relations.

AMENDMENTS
Under clause 8 of rule XVIII, proposed amendments were submitted as follows:

H. Res. 283
OFFERED BY: MR. DEAL OF GEORGIA
AMENDMENT NO. 12: At the end of the bill (before the short title), insert the following:

TITLE X—ADDITIONAL GENERAL PROVISIONS

Sec. 1001. None of the funds made available in this Act may be used for the Defense Prisoner of War/Missing Personnel Office of the Department of Defense until the Secretary of Defense submits to Congress a report assessing the level of cooperation and interaction of that Office with the National League of Families of American Prisoners and Missing in Southeast Asia and The Chosin Few (the organization of Korea/Cold War Veterans) and the members of those organizations, particularly with respect to compliance with chapter 76 of title 10, United States Code, and other applicable provisions of law.

H. Res. 283
OFFERED BY: MS. JACKSON-LEE OF TEXAS
AMENDMENT No. 13: Page 29, line 17, after "the short title)," insert the following: (increased by $500,000,000)".
The Senate met at 9:30 a.m. and was called to order by the Honorable John E. Sununu, a Senator from the State of New Hampshire.

The PRESIDING OFFICER. Today’s prayer will be offered by our guest Chaplain, the Reverend Dr. Therman E. Evans of Morning Star Community Christian Center in Linden, NJ.

PRAYER

The guest Chaplain offered the following prayer:

Let us pray.

God, You are the one who created the universe. You are the one who established the life-sustaining ecological order of nature and the life being biological order of humans. You are the one who provides for all—the Sun, the soil, the atmosphere, the water, and the nourishment that results therefrom. And for all of this we say, “Thank You.”

You save us from destruction. You support us through difficulty. You sustain us to meet challenges. You strengthen us where we are weak. You steady us when we are shaky. You shake us when we need to be awakened. You stimulate us when we need to be active. And for all of this we say, “Thank You.”

Bless now, in a special way and inspire as never before, these our political leaders. Give them Your wisdom, Your peace, Your humility, Your kindness, Your love, Your righteousness, and Your faith as they continue to do the work they have been called to do. And for this opportunity You have given them to bless this wonderful Nation, we say, “Thank You and amen.”

PLEDGE OF ALLEGIANCE

The Honorable John E. Sununu led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

WASHINGTON, THURSDAY, JUNE 16, 2005

Senate

APPPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. Stevens).

The legislative clerk read the following letter:

U.S. Senate, President pro tempore, Washington, DC, June 16, 2005.

To the Senate,

Under the provisions of rule 1, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable John E. Sununu, a Senator from the State of New Hampshire, to perform the duties of the Chair.

Ted Stevens, President pro tempore.

Mr. Sununu thereupon assumed the Chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The Senator from New Mexico is recognized.

Mr. Domenici. Mr. President, I yield to the Senator from New Mexico to speak for a moment at this time.

The ACTING PRESIDENT pro tempore. The Senator from New Mexico is recognized.

THE GUEST CHAPLAIN

Mr. Corzine. Mr. President, I thank the distinguished Senator from New Mexico for this courtesy.

I am extraordinarily proud to have the friendship, the moral support, and the leadership of Dr. Therman Evans, who opened our session today with a prayer. This is an individual who is a true man for all seasons—a physician, a minister, an entrepreneur, a chief of a village in Ghana—an extraordinary man who is leading his flock and ministering in a ministry of wholeness, one that deals with the complete aspect of a human being’s life and sets a tone and a message for the community in Linden, NJ, and much more broadly across New Jersey and Pennsylvania. He is truly a unique and wonderful individual. We welcome him.

I am truly honored to call Dr. Therman Evans my friend.

I yield the floor.

Mr. Domenici. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. Reid. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF MINORITY LEADER

The ACTING PRESIDENT pro tempore. The minority leader is recognized.

LESSENING DEPENDENCE ON FOREIGN OIL

Mr. Reid. Mr. President, first, I rise to express my appreciation to Senator Cantwell for the issue she has brought before the Senate. I am so convinced that the 40 percent can be met in 20 years. When President Kennedy said, We need to go to the Moon, he did not set a formula how we would get to the Moon, but we got to the Moon. When we were in the depths of our Depression in 1932, President Roosevelt said, We can do this. I know there are people concerned, well, does this mean CAFE standards? Does this mean we are going to go totally to biomass? Are we...
going to do it all with alternative energy? I do not know, but the great genius of America can figure out a way to do this. We need to lessen our dependence on foreign oil. There is no question about that. Fifty-eight percent of the oil we use comes from other countries. Listening to the news this morning, the stock market just moved a little bit yesterday. Why did it not move more? Because the price of oil went up almost a dollar a barrel. We have to do better than this. The way we can do it is to lessen our dependence on foreign oil.

Unless we have a directive of this President and Presidents that follow him to meet this goal, we will continue to be dependent on foreign oil.

So I am totally impressed with the Senator from Washington and the great work she has done on this amendment. I hope it passes by a large margin.

FUNERAL OF FORMER SENATOR EXON

Mr. REID. Mr. President, I rise to respond to a statement that was made yesterday, and I wanted to say a few things. I was not here yesterday afternoon because of the funeral of Senator Exon. I say to my colleagues, those of us who went to that funeral were so impressed with what this man did for the State of Nebraska. For the first time in the history of Nebraska, a funeral was held in the State capitol. Why? Because Jim Exon made a difference in the State of Nebraska. I am sure all 100 Senators, as I have, ask are we making a difference in what happens in our States, in our country. The lesson we can look to is Jim Exon, a man with not a great education by modern-day standards but a person who by modern-day standards, or any standard, had a great heart and a great mind and was able to do wonderful work for the State and for the country.

His family expressed so many warm feelings about their father and grandfather. Bob Kerrey gave one of the most moving eulogies that has ever been given. I am sorry I was not here yesterday, but for those of us who went to that funeral—Senator Ben Nelson, Senator Hagel, Senator Bingaman, Senator Levin, Senator Akaka—it was so worth our time.

JOHN Bolton NOMINATION

Mr. REID. Mr. President, I rise to respond to a statement that was made yesterday. I want to provide an update on the status of the Bolton nomination. As I said yesterday, and I say now, we on this side of the aisle have been clear and consistent on our position on this matter. If the administration works in good faith to give the Senate the information it requires, Senators Democrats are ready immediately to give this nomination a vote.

This administration has also acquiesced to a fishing expedition of the Armed Services Committee. These questions were not directed to a member of the Intelligence Committee or to a member of the Armed Services Committee. These questions that we have asked were directed to the White House, to this administration. Let us take a look, though, at Senator Roberts’ efforts. First, it completely ignored one of the two issues on which we are seeking further clarification: namely, whether Bolton attempted to exaggerate what Congress and the American people would be told about Syria’s alleged weapons of mass destruction capabilities.

I remind my colleagues, this is no small matter. All over the news the last 2 days has been concerns about weapons of mass destruction by virtue of the memo that was discovered in England. Concerns about this administration hyping intelligence and Great Britain hyping intelligence cannot be dismissed lightly.

U.S. troops are fighting in Iraq today largely because this administration told the Congress and the American people that Iraq not only possessed stockpiles of weapons of mass destruction but was also capable of using them against us and our allies.

U.S. troops are fighting in Iraq today. In the last 48 hours, 11 American soldiers have been killed. During that same period of time, I do not know the exact count, but well over 100 Iraqis have been killed. During that same 48-hour period, I do not know how many American soldiers have been grievously injured. I have no idea how many Iraqis have been paralyzed, blinded, or lost limbs. It is serious.

But we have learned since the war that the administration’s own investigator concluded Iraq did not possess either the stockpiles or the means of delivery. Just as importantly, there are a series of unanswered questions about whether senior officials in this administration deliberately and intentionally hyped this threat to justify their desire to invade Iraq. So one can see why we believe it is no small matter for us to learn whether Mr. Bolton was a party to other efforts to hype this threat.

Let’s be clear about what is happening in Washington and the Senate. We have a White House that continues to drive an agenda—some say it is a radical agenda—determined to consolidate power and abuse it when necessary to push its unpopular policies. This disagreement over the Bolton nomination is not about partisan politics, ideology, or even reform at the United Nations. It is about whether we permit this administration yet again to walk roughshod over the Constitution.

Our duty as Senators is to ensure that our country is represented by qualified and, yes, ethical individuals. Instead of joining the Senate to protect and respect the Constitution, the administration has decided to pick a fight with large rhetoric and negative attacks as it consecrates its power and continues its secretive approach to governing.

Instead of joining us in a bipartisan conversation to reform Social Security, the administration pursues a risky privatization scheme that will slash benefits and threaten our economy with massive new debt. Public support for this privatization scheme is around the 20-percent mark.

This administration has also acquiesced to its radical rightwing base and supported the intrusion of the Federal Government into the private lives of American soldiers have been grievously injured. In the last 48 hours, 11 American soldiers have been killed. During that same period of time, I do not know the exact count, but well over 100 Iraqis have been killed. During that same 48-hour period, I do not know how many American soldiers have been grievously injured. I have no idea how many Iraqis have been paralyzed, blinded, or lost limbs. It is serious.
I end as I began. If this administration, like previous administrations, respects requests of the Senate, we will immediately move to grant Bolton an up-or-down vote. I stand by that pledge today as I did more than a month ago.

Mr. DOMENICI. Mr. President, I ask that I be permitted to speak 1 minute as in morning business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

PRISONER TREATMENT

Mr. DOMENICI. Mr. President, I listened with great attention to the minority leader. I want to state to the Senate, as I listened I had one question that went through my mind. I am in no way—I have not been studying Guantanamo, in terms of hearings and the like. But some of our leading officials, in whom I have great confidence—the generals who speak, the Vice President—are asking the question, What would we do with those people, those prisoners?

I guess it would be interesting for those who are very concerned about the issue to think with us a minute. What about the other side? What do they do with their prisoners? They don’t have any problems, right? They kill them. We have been watching that. They hold them as hostages, tell the world about it, and then the next day say cut off their heads. That is how they get rid of people who they think are an impediment to what they want to do, those who are fighting their cause.

We don’t have that luxury. We pick up these combatants and what do we do with them? What are we going to do with them? Will we put them out to sea? Will we put them into camps? What are we going to do, those who are fighting their cause?

We don’t have that luxury. We pick up these combatants and what do we do with them? What are we going to do with them? What do they do with their prisoners? They don’t have any problems, right? We don’t have that luxury. We pick up these combatants and what do we do with them? What are we going to do with them? Will we put them out to sea? Will we put them into camps? What are we going to do, those who are fighting their cause?

We don’t have that luxury. We pick up these combatants and what do we do with them? What are we going to do with them? Will we put them out to sea? Will we put them into camps? What are we going to do, those who are fighting their cause?

We don’t have that luxury. We pick up these combatants and what do we do with them? What are we going to do with them? Will we put them out to sea? Will we put them into camps? What are we going to do, those who are fighting their cause?
Saudi Arabia is a country we ought to take a close look at because we depend on it so much. Saudi Arabia is a royalty. It is a kingdom. It is a government which, on any given day, we are either embracing because they provide us with diminishing oil, or we are telling them they are doing things as a matter of policy that are inconsistent with American values. How much longer do we want to be joined at the hip with Saudi Arabia? How much longer do we want to be these sheiks and princes to decide how much oil they will release from their country and directly impact the cost of gasoline in America? I think the answer is very clear. The sooner we move toward independence, the more secure America is, the less soon we move toward independence, America?

rectly impact the cost of gasoline in we want to be joined at the hip with they are doing things as a matter of royalty. It is a kingdom. It is a govern-

pend on it so much. Saudi Arabia is a fered by Senator CANTWELL of Wash-

do better. I think the amendment of-

fewer and fewer miles per gallon, is to build cars larger and heavier, that get

our businesses. But to continue to love their SUVs. I understand that. But we all accept. There are people who this should be a bipartisan challenge America cannot meet that challenge, but America did that. It may not be as great a challenge as the Manhattan Project, when President Franklin Roo-

d said develop an atomic bomb that will end World War II, but we did that. I am confident, with the creat-

ivity and ingenuity of America, we can meet this challenge—40-percent re-

duction in dependence on foreign oil over the next 20 years. That is the pending amendment.

You would think most Senators would say: Fine, let’s accept the chal-

lenge. Let’s try. I mean, for America, I think it is a goal that can be reached by peo-

of good faith on both sides of the aisle who are prepared to accept the challenge.

Here is the challenge: Can we, over the next 20 years, reduce our depend-

ence on foreign oil by 40 percent? It is a challenge. It is not as great a challenge as putting a man on the Moon, but America did that. It may not be as great as the Manhattan Project, when President Franklin Roo-

d said develop an atomic bomb that will end World War II, but we did that. I am confident, with the creat-

ivity and ingenuity of America, we can meet this challenge—40-percent re-

duction in dependence on foreign oil over the next 20 years. That is the pending amendment.

I personally believe we should do something about the fuel efficiency of the vehicles we drive. Do you know it has been 20 years since we held Detroit responsible for reducing the amount of fuel that you consume to travel a mile in America? For 20 years we have talked about what has happened in the meantime? The fuel efficiency of vehicles in America has gone down, down, down. People drive these Hummers. Have you ever seen them? I personally think if you want to protect our military, you ought to not only that to join the Army. People want them and get 5 or 6 miles a gallon and Detroit keeps churning out these big, heavy cars.

From my point of view, we ought to step back as a nation and say, isn’t it worth something for us to have more fuel-efficient vehicles so we don’t get drawn into foreign conflicts over oil? It is more important to me to drive a sens-

cible car and to save some one’s son or 15 minutes with military strength in the Middle East in a war. That is not a great sacrifice on my part. And it is certainly a great reward, when we have fewer and fewer times when we are en-
tangled in this Middle East problem that continues today over our sources of oil.

I happen to believe this is a good bill. It can be improved and the Cantwell amendment improves it. There is one provision, only one in 800 pages, which takes 10 percent of the royalty in America—or at least reduces our de-

pendence. Let me be more specific: re-

ducing our dependence on foreign oil. There was a provision that was passed by the Senate the last time we debated this bill, 99 to 1. It was overwhelmingly supported. It said, over the next 10 years we will reduce our dependence on foreign oil by 1 million barrels a day. That is a good step in the right direc-
tion. The Cantwell amendment takes us a little further and I think is better overall. It is included in the bill. Do you know, 2 days ago President Bush and his White House sent us their evaluation of this bill and said that that provision is included in the bill, the President will veto it. The President will veto it if we embark on a policy of reducing our de-

pendence on oil by 1 million barrels a day over the next 10 years? What are they thinking? How can we be any safer as a nation more dependent on foreign oil? Should we not be accepting this challenge? Why is the Bush White House walking away from it?

Senator DOMENICI, myself, virtually every other Senator, agreed to put this provision in the bill last time. I think it is a good provision this time. Yet the Bush White House is opposed to it.

There is only a certain amount of oil we can drill for around America and around the areas we control to meet our needs. The total would oil supply in the United States is about 50 million barrels and that is about 3 percent. Yet we use 25 percent of the oil that is consumed each day. If we are going to be realistic, we have to understand we need more efficient vehicles, more use of alternative fuels such as ethanol and biodiesel, and we need to be looking for ways to reduce the waste of fuel, such as the one included in this bill, and I commend the Senator from New Mexico on this. The provision is included in the bill. The idling of diesel trucks is a great provision. All of these are sensible moves in the right direction. If they are, why isn’t this administration sup-

porting it? Why don’t we have a good, vigorous debate on this not only that provision but for the Cantwell provi-

sion, as well?

Let us accept the challenge. Let us not view that as a negative alternative that America just cannot do it. We can. We have proven it in the past. We can come together and pass this bill on a bipartisan basis.

I thank the Senator from New Mex-

co. I am greatly rewarded by his pati-

e in allowing me to speak a full 10 minutes with the military strength in the Middle East or whatever might have occurred.

I yield the floor and hope we are moving toward a vote.

Mr. DOMENICI. We are grateful. We will have a unanimous consent to take care of today.

Let me just say briefly, if I were President of the United States—which obviously is beyond the realm of possi-

bility—I would be opposed to this amend-

ment. It is not as if it does noth-

ing. Indeed, the President of the Uni-

ded States, whoever you are—and it obvi-

ously will not be this one—tell us how,

give us a plan, tell us how you will re-

duce America’s consumption of crude oil by 40 percent by a year certain.

What President would like to do that? What President would think that is a worthwhile effort if he would have to send up some kind of plan at which the whole world would laugh? Our cars would have to be the size of golf carts or whatever it would have to break-through in the next 10 years, which we have been working on for 40 or 50 years, and we have not made it yet.

The very ones talking about it do not want to even get the oil from ANWR. That is a million of what they are ask-

ing for, and it surely would be here by the time their resolution talks about it. What if the President, whoever it is, says: Let’s go to ANWR and get a million. Guess what they would say: De-

struct the world of the environment. But a nice little resolu-

tion, nice little bill saying we have a solution to this. We will just be a John F. Kennedy and say our goal is to some way, somehow, cut America’s consump-

tion of crude oil from overseas by 40 percent, when it has been going up every year with everything we are trying to do.

In this bill, we are trying what is real. We are challenging all of the tech-
nocrats, the technologists, the scien-

tists. We are telling them: Here are the resources, find solutions. What super-

entity would we create in this country and say: Here you are. You are on top
of all this. You prepare this plan. You give it to the President so he can give it to the people. To what end? What would it do? A 40-percent reduction reduces our consumption by 7.2 million barrels. We cannot even get anyone to vote to let America produce 1 million barrels now. If that 1 million would come off 7.2 million barrels, we would still be a huge way away.

Do not misunderstand, this issue is an American issue of high consequence. America is doing everything it can. We did not want to. That is why it is so hard now. We let it get away from us. It will not come back under control with a gaudy, impossible resolution that will sound like somebody has a plan. I have attempted just to tell the Senate the truth. I have attempted to offer an amendment to this and just up the ante and say if we can do 7.2 million, why don’t we do 8.2 or 9.2, and put it in there and say we will vote on a bigger one, maybe I new. I don’t know. It is what I have tried to be on this bill all along, honest and forthright, and as best I could explain to the Senate, we have to do everything we can, with imagination, with vigor, with certainty, with resources, but the kind of things we know can do, that we know we put our shoulders to it and we work hard.

We are finally coming to the point where Americans do believe it is a big problem to be admitted. We are bringing people anymore. It used to be we called the big oil companies up, swear them in under oath—I don’t know if the Senator remembers the day we called them up here and had them swear. We said: You are the problem; you are we who are importing all this oil.

Remember those days? They told us everything they could. That hearing went away. What happened? The next year we imported more oil and more oil.

It isn’t that the Senator doesn’t think we should have an American plan. What we have in this bill is an American plan. Senator Bingaman and I and many others have worked hard to put it together. Some people say it does not do enough as it is. I heard some reporters yesterday commenting. I wondered what they were reading. They said: It doesn’t do anything for nuclear power and the most famous and prounclable set of proposals we will have ever before us. The same commentators said it cost too much money. I don’t know where they got the numbers. We have not even spent in this bill. We have given a $2-billion reserve fund. We have not spent a cent of that yet. I shouldn’t have said that because everybody will be down here wanting to spend it, but they have to go through us before they can spend it.

The tax portion is about like the House portion is. It is a pretty good bill. It is not a spending bill. When you authorize programs, incidentally, you are not saying we are going to buy them or pay for them. The distinguished occupant of the Chair knows in agriculture you authorize programs, but you do not expect the appropriations to do exactly what you say. You say: This is a program we would like you to think about. That is what this bill does in terms of authorization. Overall, it is a very good bill.

Is the proposed unanimous consent agreement satisfactory?

Mr. BINGAMAN. Yes.

Mr. DOMENICI. I yield the floor.

The PRESIDING OFFICER. Without objection, the Senate goes into Executive Session for 2 minutes.

Mr. DOMENICI. I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

AMENDMENT NO. 791

(Purpose: To establish a renewable portfolio standard that would be a requirement that those producing electricity must comply with. Utilities could use existing renewable generation to comply with this program or they could comply with other Members in the Senate strongly support this effort.

The RPS we have offered is a flexible and market-driven approach to achieving the various goals I have mentioned at a negligible cost to consumers in this country. According to the Energy Information Administration, the amendment would result in over 350 billion kilowatt hours or 68,000 megawatts of renewable generation between 2008 and 2025. That is enough power generation to supply 56 million U.S. homes. The cost to consumers would be about .16 of a percent or less than one-fifth of 1 percent increase in overall energy prices.

This proposal would require retail sellers of electricity that sell more than 4 million megawatt hours per year to provide 10 percent of that electricity from renewable resources by the year 2010. The proposal would ramp up in 3-year increments to allow for planning flexibility. The Secretary of Energy would be required to develop a system of credits for renewable generation that could be traded or sold; again, making the program easier to comply with. Utilities could use existing renewable generation to comply with the program or they could comply with the program by buying credits from someone else who is producing renewable energy. New renewable programs could receive the credits to trade or to sell.

The cost of the program to the utilities would be capped by allowing the
Secretary to sell credit at 1.5 cents per kilowatt, adjusted for inflation. As long as the difference between the cost of the renewable generation is less than 1.5 cents per kilowatt hour, the utility could buy or generate renewables or offset the difference, and that price, obviously the cap would kick in, and it would become more cost effective for the utility to go ahead and buy the credits. We also would create a program for the sale of the credits to fund State programs for the development of renewables.

Congress has tried before to spur the development of renewables. In 1978, we passed the Public Utility Regulatory Policies Act, PURPA. That bill required utilities to buy renewables if the generators could meet the avoided cost of the utilities.Cogeneration—that is, the combined use of heat for industrial processes and for generation of electricity—was also eligible. That program resulted in a huge growth of cogeneration. Over half of the new generation that came online in the country during the 1980s and 1990s was from that resource.

It did, however, do much for renewable generation. These technologies have remained at about 2 percent of the total electricity supply for decades now. In other words, PURPA did not work to stimulate development of renewables as we had hoped it might.

Let me put up a chart to make the point of this 2 percent figure to give people an idea of what we are dealing with today.

This shows electricity generation by fuel for the period of 1970 through 2025. Of course, some of that is anticipated. This is from the Energy Information Agency which is part of the administration.

You can see that by far the largest percentage of the electricity we produce in this country is produced from coal. That is the case today, in 2005, as shown by this white line on the chart. It shows the case of coal since 1970, and that will be the case in the future. That is true regardless of whether this amendment is adopted or is not adopted.

The next source of power, the next fuel for electricity generation is soon to be—right now it is nuclear but it is very soon to be natural gas. You can see a green line there. It is probably a little hard to see against that blue background on the chart, but there is a green line which goes up pretty dramatically in the future. That is a concern I know all of us who have looked at this issue share. We see the price of natural gas going up a significant degree, because we have more and more of our power being produced from natural gas. That puts pressure on the price of natural gas. People who are buying natural gas to heat their homes or their businesses see the cost of their utilities going up because of the increased pressure on that price of natural gas coming from the increased demand for natural gas to produce electricity.

You can see the renewables number down here. The renewables is next to the bottom line, and it is bumping along at less than 5 percent. It is down around 2 percent today. It will increase very modestly.

This chart is a chart of how the Energy Information Agency would expect production to occur absent a renewable portfolio standard. What this amendment will try to do is increase somewhat the amount of electricity we are producing from renewables and, by doing so, decrease the amount of electricity we have to produce from natural gas. This is a way to keep down the increasing cost of natural gas, and it is a way to keep down the increasing price of natural gas as well.

Let me talk about some of the criticism that has been made of this amendment and this approach. Critics of the proposal point to a number of concerns they have. The No. 1 criticism I have heard is it costs too much; also, that States are already requiring development of renewables; and, third, some areas do not have readily available renewable resources. Those are the three major criticisms we hear, so let me respond to each of those.

In response to the argument that it costs too much, I will point to a number of studies of this proposal that have been done over the last several years.

In 2003, I asked the Energy Information Agency at the Department of Energy to look into the standard we would have. They found our standard would result in 350 billion kilowatt hours of new renewable generation between 2008 and 2025. That would not happen absent the adoption of this provision. They found the cost would be minimal. The report indicated there would be an increase in the cost of electricity of only one-tenth of a cent in 2025 over projected costs. When combined with the reduction in natural gas prices that would be caused by the RPS, that would pass the cost to the consumer on that consumer’s energy bill was projected to be less than one-twentieth of 1 percent.

I have asked the EIA to update this analysis with current conditions, and we have their update. They have sent me a letter which I can put in the RECORD. Let me cite the most important parts of it. It says:

Cumulative residential expenditures on electricity from 2005 through 2025 are $2.5 billion lower while cumulative residential expenditures on natural gas are reduced by $2.9 billion, or 0.5 percent. Cumulative expenditures for natural gas and electricity by all end-use sectors together would decrease by $22.6 billion.

Now, that is their current estimate of what the effect of this provision would be.

The report also indicates the generation of electricity from natural gas for those States that adopt this RPS rather than a standard would be other wise. It also projects that total electricity-sector carbon dioxide emissions are reduced by 7.5 percent relative to the status quo. They are reduced by 249 million metric tons.

A number of other studies have found positive results, even to the point of reducing overall energy costs. Earlier this year we held a hearing in the Energy Committee on generation portfolios. Dr. Ryan Wiser of Lawrence Berkeley National Laboratory presented a report that summarized the results of some 15 studies of renewable portfolio standards much like the one we are offering today. Those studies found that a portfolio standard would reduce natural gas prices. Twelve of the 15 studies projected a net reduction in overall energy bills as a result of the RPS.

The Energy Information Agency report projected that the RPS would lead to a 32 percent lower allowance cost for sulfur dioxide emissions. The cost is not great. So the argument we have heard that this is too expensive a proposition I think does not hold up.

Many have argued that States are implementing renewable portfolio standards and there is no need for a Federal program. It is true that States have taken the lead in pushing for renewable generation in their regions. Seventeen States currently have developed renewable requirements. Three more are soon to begin implementing renewable requirements.

Almost all of these standards are more aggressive than the Federal standard in the amendment I am proposing today. My home State of New Mexico requires 10 percent of electricity produced by utilities in that State to be from renewable sources by the year 2011—not 2020. Mr. President, 2020 is what our amendment calls for. But New Mexico says 2011. California says 20 percent by 2017. Maine requires 30 percent by 2000; Minnesota, 19 percent by 2015.

This will spur the growth of renewables in these regions. There is one thing, however, a State standard will not do. It will not drive a national market for these technologies. If some States have renewable standards and others do not, or if the technologies and requirements vary from State to State, it is impossible for a national market to develop for renewable credits.

This credit trading system is the purpose of our proposal that gives the greatest flexibility for compliance. A credit trading system also helps to reduce the cost of compliance by allowing credits for lower cost renewables from one region to be bought by utilities in another region.

Some argue this is a cost shift from the regions without renewable resources to those with renewable resources. I would argue it is a way to spread the cost to all who are seeing the benefits. If States do not have or choose not to develop renewable resources, they still realize the benefits of lower natural gas prices, of lower SO2 allowances, of lower cost carbon
reductions. It is only fair they share the slight increase in cost for generation of electricity that has created these savings.

The argument that many regions do not have renewable generation resources also has been made. While it is true that the best wind, geothermal, and solar resources are concentrated in Western States, the entire country has extensive biomass potential. We have another chart I want to put up here for people to look at.

As is true in other States have shown, paper production and agricultural processes are available everywhere. If Rhode Island, Pennsylvania, New Jersey, and Maryland can implement aggressive standards, then other States can as well.

This chart makes the case very strongly about where these renewable energy resources are available. You can see that solar, of course, is available everywhere but more prominently in the Southeast. Those shown in the upper right-hand part of this chart. Wind resources are not available everywhere but clearly are in many States and particularly in the West and the Midwest. That is shown on the lower right-hand side of the chart. Thermal resources are primarily concentrated in the West, but biomass and biofuel resources are everywhere in the country, and are particularly concentrated in the eastern part of the country. So as these technologies develop, as the markets for these technologies develop, there is an ability to produce energy from renewable sources everywhere.

The environmental benefits are clear. The renewable portfolio standard would result, according to the Energy Information Agency, in a 3.6-percent reduction in carbon emissions in the year 2025. This is a reduction of 31 million tons in that year alone. That reduction is equivalent to planting 27.5 million acres of trees, an area about the size of Pennsylvania. And this is in one single year.

The RPS also benefits the economy by driving job growth. According to the Union of Concerned Scientists, wind turbine construction alone would result in 43,000 new jobs per year on average. An additional 11,200 cumulative long-term jobs would result from the subsequent operations and maintenance of renewable facilities.

The Regional Economics Applications Laboratory for the Environmental Law and Policy Center found that 68,400 jobs and $6.7 billion in economic output are a result of renewable energy; wind power creates 22 direct and indirect construction and manufacturing jobs for each megawatt of installed capacity; wind power creates one operation and maintenance job for every 10 megawatts of installed capacity.

A study by the State of Wisconsin found that increased use of renewable energy sources would create three times as many jobs as increased use of traditional fuels for electricity production. U.S. PIRG reports that building 5,900 megawatts of renewable energy capacity in California would lead to 28,000 yearlong construction jobs and 3,000 operations and maintenance jobs. Over 30 years, these new plants would create four times the employment, four times as many person hours as building 5,900 megawatts of natural gas capacity.

According to the AFL-CIO, an estimated 8,092 jobs would be created over a 10-year horizon, 1,000 operations and maintenance jobs. Support for this concept and this proposal is strong throughout the country. Recent polls have shown that support.

A poll by Mellman Associates found that 70 percent of those surveyed nationwide supported a 20-percent portfolio standard. We are not proposing that aggressive a standard. We are proposing, by the year 2020, which I pointed out is substantially more modest than most of the States have embraced that have gone this route. These results held about the same in States as diverse as North Dakota, Georgia, Missouri, and Arizona.

Environmental groups from throughout the Nation, from the Sierra Club to the Natural Resources Defense Council, from industrial associations to the renewable trade groups and utilities, have all embraced this effort.

We are trying in this bill to implement a policy to develop an energy future for the Nation that would rely on our own resources, creating energy security for the country; that would provide for cleaner air and water; that would begin to reduce our emissions of carbon dioxide into the air; and that would drive our economy to greater heights. This portfolio standard is a low-cost, effective, market-driven way to accomplish these goals.

Let me put up one other chart before I yield the floor.

There is a chart we have that shows the production-added capacity of wind energy which I wanted to reference. It is entitled “Annual Installed Capacity.”

One of the arguments being made against this legislation is, through the Tax Code, we are already providing incentives for utilities to do this. Therefore, something like this is not required.

The truth is, we have had incentives in the Tax Code. Our history of success at getting additional installed capacity through that device has been extremely mixed. We have a tax provision for a year or two, and then we let it expire. Installation drops off dramatically. We have a tax provision put back in place. The installation of capacity goes up. We let it expire. Unfortunately, that has been the history in this Congress.

I would like to say it is going to be different in the future, but I am not persuaded. What the renewable portfolio standard will do is to set a long-term path for how we want to proceed and would give utilities and those who are involved in the generation of electricity a clear idea of what is to be expected from them as they go forward. This would have a beneficial effect on the development of these technologies, on bringing the cost of producing power from renewable sources down, and would bring us into line with many of the more industrially advanced countries in the world.

Mr. President, I think this is a useful provision. It is one that has bipartisan support in the Senate and one we have had the good sense to adopt in the previous two Congresses. I hope we will do that again this year.

I yield the floor. The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I remind the Senate that we have an hour and a half on our side. I am in control of the time. I am going to yield control of the time to the junior Senator from Tennessee. He will start and use as much time as he wants. Then I will return and use some. I have put the word out, if anybody else would like to speak in opposition to the Bingaman amendment.

With that understanding, I yield the floor and thank the Senator from Tennessee.

The PRESIDING OFFICER (Mr. ENZIO). The Senator from Tennessee.

Mr. ALEXANDER. Mr. President, I thank the Senator from New Mexico. While both Senators from New Mexico are in the Chamber, all of us appreciate the way they have brought this extremely important bill together. We know there are a handful of tough issues about which we disagree. Through their leadership, we have a consensus on what is well on its way to being an American Clean Energy Act of something that will dramatically transform the way we conserve energy, produce energy, and will help us keep our jobs and be more competitive in the world marketplace. That is our goal.

I also believe it will lower natural gas prices. And I thank the chairman and ranking member for their contributions.

At the end of our committee markup, during which the vote was 21 to 1, there were compliments abound. Senator BINGAMAN said he couldn’t remember a party-line vote in all the votes that we had, that we were voting based upon our own individual views and our regional differences. Senator CANTWELL said it was not only a clean energy bill, but it was a clean process. But that doesn’t mean that when we disagree, we shouldn’t disagree. And we have differences of opinion. That is what the Senate is for.

If I respect the other side for what is a high-sounding idea, the idea of a renewable portfolio standard, I believe there is a better way to spend these billions of dollars than the way
suggested by Senator BINGAMAN, if our real goal is to create an adequate supply of low-cost, reliable American-produced energy.

It is always important to start from the proposition that this is a big country and an economy. We use 25 percent of all the energy in the world, and we spend about $2,500 a year per person to produce that. So when we put up a windmill that only blows 20 or 30 or 40 percent of the time, it doesn’t matter much in terms of what we do. When we build a new nuclear power plant, which we haven’t done since the 1970s, it matters a lot. A windmill would be one of 6,700, but that power plant would be only 1 of 1,300 or 1,400 power plants we have in the country. So it takes quite a bit to affect our energy policy.

There are three reasons I hope my colleagues will vote against the renewable portfolio standard. The first reason is that it is an $18 billion tax. It is a new $18 billion rate increase on the electric ratepayers of America. The second reason is it is an increase in subsidy for a number of people, especially wind developers who already include a huge subsidy of a couple billion dollars a year for 5 years, which the Finance Committee has recommended we increase to $3.3 billion over the next 5 years just for giant windmills. Three, if not technically, it is at least in the spirit of an unfunded Federal mandate, the kind of thing that a lot of us were elected to stop, the idea of coming up with a big idea here in Washington and imposing it on the rest of the country and then sending them the bill.

I was thinking about this: We are all going to be going home in a couple of weeks, having debated the Energy bill and hopefully having passed it, feeling good about it. Our constituents are going to ask: What did you do about high gasoline prices? What did you do about high natural gas prices? What did you do about the possibility of blackouts so my computer wouldn’t work and so I wouldn’t be safe in my home? What did you do about the fact that China and India and other parts of the world are buying up oil reserves and growing their economies and creating constant pressure on the price of oil? What did you do about that, Senator, while you were in Washington over the last couple of weeks? I wonder if what we really want to say to our friends who elected us when we go back to Tennessee or Nevada or New Mexico is:

I raised your taxes $18 billion. I put a new $18 billion charge on your electric bill. That is the first thing I did. The second thing I did was I gave an increased subsidy to people who were already getting a lot of money. Windmill developers are making $2 billion over the next 5 years just to put up these giant windmills. We gave them another subsidy, and that is the second third thing I did was, since we all get smarter when we go to Washington on the airplanes, we decided that despite the fact that 17 or 18 States are already defining renewable energy sources in their own ways and already trying to meet them and already giving them incentives, we decided we would decide that better. We would decide that from Washington, D.C. While I am not sure about this, at least in earlier versions of the proposal, in a number of cases the credit you got for what you were doing according to your State renewable portfolio standard doesn’t count towards your national renewable portfolio standard.

I don’t think I want to go home and say to the people of Tennessee that what I did about the growth of China and India and the threat to their jobs and what I did about high gasoline prices and natural gas prices, what I did about blackouts was to add $18 billion to their electric rates, to give a big subsidy to windmill developers, and to put an unfunded mandate on top of that States ought to be doing for themselves.

There are better ways, if our goal is to produce low-carbon or carbon-free electricity, which is what this debate is really all about. This debate is motivated by those who feel most strongly about global warming and about low-carbon and carbon-free electricity. There is a better way to do that, particularly if we have $18 billion. I want to talk about that a little more as we go along.

The Senator from New Mexico, as he always does, gave a very careful and well-reasoned explanation of his points of view. His proposal is a little different from his proposal made in 2003. I want to go through why I said what I said and make sure my point of view is understood.

Let me begin with the idea of the $18 billion. I didn’t just pull that out of the air. This is a letter from the Department of Energy in Washington dated June 15, 2005, to Senator BINGAMAN. He quoted some of it. It talks about a number of things. It does talk about some places where in the whole economy there might be some reductions in expenditures as a result of the RPS based on their monitoring. But it also says the following:

From 2005 to 2025, the RPS has a cumulative total cost to the electric power sector of about $18 billion. . . . This cost includes $700 million in payments to the Government for compensation when the cap is reached and $10.7 billion in payments to owners of customer-sited photovoltaics that are eligible for triple credits.

In other words, we are going to spend $11 billion in payments for solar power.

Let me start by talking about what we mean when we say renewable energy. Some people get confused about ethanol, renewable fuel, and renewable energy. We are not talking about ethanol. We are only talking about renewable electricity. There are only a handful of ways to do that that make much difference. Senator BINGAMAN has defined those very nar-

rowly. Wind is one, giant windmills. Geothermal is another. That is hot water coming out of the ground to heat your home. Hydropower is one, but we exclude hydropower except for very limited new hydropower in this bill. Solar is another, using the sun. And we have put the other things into coal plants and burning them is yet another.

Today, all of those renewable fuels produce a little over 2 percent of the electricity. Since the 1970s, we tried very hard to encourage more. I can remember President Carter 20 years ago setting a goal of 20 percent of solar energy. In 1992, the wind developers said: We can make wind electricity out of wind, just give us a little bit of money to help get started, and then we will be off on our own. That was 1992.

Billions and billions of dollars later, wind is still not very much because that is not the best way to produce carbon-free electricity. For an economy of this size, to compound the problem by putting new taxes and new subsidies on the American people at a time when we are supposed to be talking about lower prices, I haven’t heard anybody say: I want higher natural gas prices. I want to pay a higher electric bill.

We are talking about higher prices, 18 billion new dollars on your electric rates. And for what? To build tens of thousands of windmills and to spend $18 billion over the next 5 years just for wind. The electric rates will end up being one-fifth of 1 percent of all the electricity that we will produce. That would be the solar electricity.

I am all for solar power. I have an amendment for solar power with Senator JOHNSON that we introduced as part of the Natural Gas Price Reduction Act. It would spend $380 million over the next 5 years for businesses and homeowners who want to use solar power. We would only get started and see if it could go on its own without huge higher costs. But this is nearly $11 billion for solar power to produce one-fifth of 1 percent of all the electricity in the United States.

After solar, tens of thousands of these windmills is the other major expenditure along with biomass. So what we are talking about is to begin with is wind and biomass and solar and landfill gas and geothermal, and trying to take near $11 billion, producing what would be a one-fifth. To do that, we are going to put an $18 billion tax increase on.

Now, let’s go to the second objection I have. That is the size of the subsidy and the people to whom the subsidy is going. I have been doing a little investigating. It is hard to get these numbers down, to try to see how much money we are spending for this kind of fuel, so I could see if we could better spend it some other way. I have noticed that we are spending about 1 percent of our energy producing electricity. There are re-
June 16, 2005

CONGRESSIONAL RECORD — SENATE

S6677

hasn't had the chance to take advantage of it. It pays you 1.8 cents for every kilowatt hour of wind power that you produce.

Now, wind has become—according to many of the utilities who buy and sell wind power—competition. The Finance Committee, yesterday, said they want to add a billion to that. The Finance Committee also said they not only want to subsidize the production of the kilowatt hours of power, they want to loan money so developers can build these giant windmills.

Some people may think I am talking about your grandmother's windmill out by the well somewhere pumping the water. I will have to make one correction in trying to describe these. I have said only one will fit into the second largest football stadium in America in Tennessee. The Senator from Pennsylvania, Mr. Santorum, reminded me that Penn State is larger than the University of Michi- gan, which is the largest, or the University of Tennessee, which is the third largest, just one of these windmills will fit in the skyboxes, and you can see the red lights from 20 miles away on a clear night. These usually come in groups of 10, 20, or 30 windmills.

This proposal would have the effect of increasing the number of these gigantic windmills from about 6,700, which we have in America today, to 45,000. That is the estimate of the Energy Information Administration. Each of these produces about 1 megawatt of power—or to be accurate, is rated to produce about 1 megawatt of power. The wind only blows 20 to 40 percent of the time, so it only produces about a third of a megawatt of power. Also, you have to take into account the fact that since these often are built in remote places or on top of scenic ridges, then you would build large transmission lines through backyards to carry the electricity. And you would have to take into account the fact that you cannot close down your coal plant and nuclear plant and your gas plant when you put up windmills because people don't want to shut off their computers, stop working, or turn off their lights. They have to keep their electricity all of the time, and you don't store power from wind in these amounts to use later.

So the idea that the United States of America would look to the future to keep its jobs and competition with Japan, with China, and with India—our country that uses 25 percent of all the energy in the world—by taxing its rate-payers $18 billion to build tens of thousands of windmills and, as good as solar power is, to spend $11 billion on solar power, which will produce one-fifth of 1 percent of all of the electricity we need in this country—I don't believe, respectfully, it is the best way to spend our money.

The third point is this about the States, and the Senator from New Mexico mentioned about what the States are doing. Someone said, “Senator Alexander hasn't gotten over being Governor. Maybe, in a way, I hope I never do because I don't think you automatically get smarter when you fly to Washington, DC. I know the President goes home almost every weekend. You gain a lot of wisdom while you are at home, and not here. To the extent that it is a good idea for electric utilities to begin to use a variety of different renewable sources, I submit that they are already doing it. They are working hard on it. The Government of California made a major ad-dress the other day about the use of solar power in California.

There are 19 States, plus the District of Columbia, that have some form of RPS today. They have all sorts of different standards. Connecticut increased its standard in 1999. Connecticut increased its standard in 2003. Texas has a well-regarded standard.

They use different definitions of re- newable sources of energy. Maine defines renewable to include pulp and paper waste and black liquor. Pennsylvania has a clean energy portfolio standard that includes waste coal. Connecticut includes fuel cells. The Western Governors Association includes clean coal.

I have a number of examples of how, under Senator Bingaman's 2003 proposal, which I have studied since his new proposal came just today, which I have not studied as closely, but there were a number of States where the credits at the local utilities would be re- ceived under their State plans, but they would not be allowed under the Federal plan. So we would be saying in Washington, DC, we see that in 19 States you have this idea of more re- newable energy, but we are going to do that ourselves. We are going to pre-empt the field, we are going to set the rules, we are going to define it, and we are going to spend $18 billion our way instead of your way. I think that is un- wise, Mr. President.

So the three arguments that I make against the Senator's amendment are these: One, it is an $18 billion new tax on ratepayers to build tens of thousands of windmills and spend $11 billion on solar power, which would produce one-fifth of 1 percent of all of the elec- tricity we need by 2025. That is not the wisest use of money, and I don't think that is what we want to say to our con- stituents when we go home.

Second, it adds an unneeded subsidy, especially to wind developers, who we are giving $2 billion already over the next 5 years to build these gigantic windmills, which mars the landscape and only work 20 or 40 percent of the time. The only reason they are being built is because of these huge sub-sidized incentives.

I predict that if legislation like this passes and we go from 6,700 to 45,000 of these big windmills, you are going to have an uprising in every State of people who don't want to see them and wonder why we are taking $18 billion away from their electric bills and sub-sidizing things like this.

Third, I trust the States. Nineteen of the States have an RPS, plus the Dis- trict of Columbia. These are the green ones on the chart, where you see more capacity for renewable fuel. If you put a 10-percent standard on Louisiana or Arkansas or Florida or Tennessee or Virginia, and we cannot meet that standard, what do we do? Our utility just writes a check to the Government under the RPS. It is a new tax. It is a new rate increase. It is the kind of thing we ought to be doing.

What should we be doing? Let me go back to my first chart, and then I will conclude my remarks. I like the direction of our bill as it is. You see, I think that when the bill went away, we hadn't been widely noted, and the Senator mentioned this a while ago—it would transform the way we produce electricity in the United States. If we really want carbon-free air, if we want to meet the Kyoto standards, stop the global warming that people are con- cerned about, you are not going to do it by building tens of thousands of windmills and spending $11 billion on solar panels.

Here is how you will do it: conserva- tion and efficiency. The Domenici-Bingaman bill that is here already would save us from building 45 500-megawatt gas plants just because of appliance standards. The hybrid car in- centive, coming from the Finance Committee will encourage the buying of 300,000 hybrid cars, resulting in more efficiency, less carbon in the air, and encouraging our auto industry to transform, as many of you hope they will do. If we do that, we should spend another $750 million, not on windmills, but on giving tax incentives to auto plants in the United States that retool to be able to produce hybrid cars. If we give incentives to buy those cars, we won't need to buy these Tennessee, Michigan, or elsewhere in this country, not in Yokohama. If we spend a new $750 million for that purpose, which is a recommendation of the National Commission on Energy Policy, it will help to create 30,000 new automobile jobs in the United States.

Senator Feinstein and Senator Snowe have a proposal for energy-effi- cient appliances and buildings. The cost, over 5 years, is $2 billion. Some of that is in the legislation. But more could be spent on it to great effect. Coal gasification powerplants. We have talked about nuclear, so I will go to nuclear; $2 billion for deployment of
advanced nuclear power plants. Mr. President, if we want carbon-free air, we know how to get it. We get it from nuclear power. Twenty percent of all of our electricity in this massive economy of ours that uses 25 percent of the energy in the world is from nuclear power today.

So why would we subsidize windmills and solar panels instead of spending $2 billion on advanced nuclear power plants? France does it. They are 80 percent carbon-free. It is true that Japan has one other nuclear plant a year. We have not started one since the 1970s, although we have dozens of Navy ships docking at our ports around the country with nuclear reactors that have never had a problem. So $2 billion for advanced deployment of nuclear power.

Right behind that, waiting in line—and I know both Senators from New Mexico agree with this—is coal gasification in powerplants, along with carbon recapture and sequestration technologies. If this could work, this would back up nuclear power and produce the large amounts of low-carbon or carbon-free energy that not only do we need in the world but that the world needs. If we do it here, they will do it there. If we don’t do it, they will not, and they will produce so much pollution and junk in the air that it won’t matter what we do because the air will blow around on top of us.

I mentioned solar energy development. I think there should be a substantial increase for solar energy development. The production tax credit, since 1992, has done nothing for solar power. I think it is mental all goes to wind. But an appropriate amount of money would be, over 5 years, $380 million. That is even more than the Finance Committee recommended. Under the RPS, we are talking about $1 billion collateral, increased rates and spent to produce one-fifth of 1 percent of the electricity we need in 2025.

Mr. President, I want low-carbon air. I want to transform the way we produce electricity. But I also want lower electric rates. The Tennessee Valley Authority just raised our rates 7 percent. That is a high rate increase. That means there are some manufacturing plants in Tennessee that are going to think twice about whether the jobs stay here or the jobs go somewhere else. If we start putting new taxes and new rate increases on homeowners and manufacturing plants in Tennessee and around this country in order to produce tens of thousands of windmills and this extent of solar power, we will not be taking the wisest course.

I suggest we support the bill as it is written, and to the extent we do, the President wants to do more. I suggest we spend $2 billion on hybrid vehicles, auto jobs, energy efficiency, coal gasification, modest, reasonable solar energy, carbon recapture research, advanced nuclear, and cogeneration projects.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I received notice that our Republican leader wishes to speak, he said, at 11:15.

I want to make an observation and see if the Senator from Tennessee will answer it. The Senator from Tennessee went through all these other ways we could go about cleaning up our air and reducing the carbon emissions. What strikes me is, let’s assume we are going to do all those things. Because I think that is what we are. I remind the Senator, however, that the $2 billion in there on nuclear—

THE PRESIDING OFFICER. The Senators in the early hearings wanted to see if the Senator from Tennessee was making. We are back on the amendment that I have offered for purposes of debate. I ask unanimous consent that Senator Obama be added as a co-sponsor to the Bingaman amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. The first point I would make, in response to the comments of the Senator and my colleague from Tennessee, who has contributed greatly to the development of this material, is the contribution of renewable energy has been very substantial and I very much respect his views, obviously we are in disagreement on this issue, and I will explain some of the reasons why.

First, much of what he said related to big windmills and the fact that this, in his view, is essentially a program that would cause the establishment of more big windmills. He pointed out the reasons why that was untrue.

This amendment is technology neutral. We have been very specific about this. We have said that qualifying renewables include wind, solar, geothermal, biomass, landfill gas, and incremental hydro. We have tried to talk about all of the different renewables and make it clear we are not specifying which of these renewables are used by particular utilities to meet this requirement.

It would be up to them, and it would be up to them based on how the various technologies develop. In fact, many utilities have chosen to pursue wind generation because they have found that was the least costly way to produce energy from renewable sources. Clearly, advances are being made in solar power, advances are being made in biomass, and in various others of these technologies. The purpose of this legislation is to accelerate that.

There is a chart which my colleague from Tennessee put up indicating the other ways in which we are trying to deal with our energy needs in this overall legislation and the other ways in which we are trying to reduce emissions into our atmosphere in this legislation. I agree with all of that. We do have provisions in this legislation to encourage the development of this gas-combined cycle technology and the use of that in our coal-fired powerplants.

I will put up the chart that we had earlier that shows the different sources for our electricity generation as they exist today and as the Energy Information Agency would expect them to exist in the year 2025.

You can see that by far the most significant source of our energy, our electricity generation in this country, is
coal. It has been in the past; it is today; it is going to be in the future. The only question is to what extent does that number, that top line, go up. And, more importantly, to what extent do we see pressure put on natural gas as a source for electricity generation in the future.

But we have provisions in this bill that try to encourage the use of IGCC technology. That is very much in the public interest and I very strongly support that.

We also have provisions in here to encourage more use of nuclear power, more production of electricity from nuclear power. You can see the nuclear line is largely flat coming from today, 2005, out to 2025. It is my hope, just as it is the hope of Senator DOMENICI and I am sure of many on our committee, you will see that line go up somewhat, as companies are able to see the benefits that are provided in this legislation and look at the cost comparisons, that they choose to put more resources into production of energy from nuclear sources as well. That is very much to be desired.

But to accomplish our goals, our overall goals for this country and our overall goals for our energy legislation, this is what we need to pursue all available resources. That is why I believe it is important we adopt this amendment, to give that extra push for renewables. The chart from the Energy Information Agency projects very little increase in this line down here, this blue line for renewables, without this renewable portfolio standard in place.

I saw the map of the United States the Senator from Tennessee put up, showing the different States that are doing this. All of that is taken into account by the Energy Information Agency. All of those State renewable portfolio standards are taken into account in their determination that there will still be only very modest, if any, increases in the use of renewables over the next 20 years.

What we are trying to do through this renewable portfolio standard is to increase the contribution from renewables somewhat. I am the first to admit we are not going to solve our energy problems with the use of renewables alone. We have to depend on nuclear power. We have to depend on clean coal technologies. We have to depend on progress in all of these areas. But the aspect of this amendment I have offered is to give some additional impetus to the use of renewables.

Let me make a couple of other points which I think bear mentioning at the same time. I think the Senator from Tennessee suggested that—maybe not the amendment that is currently before the Senate but an earlier version, I believe he indicated, would say you don’t get credit for what you do to meet your own standard in order to meet the national standard. Let me make it clear. That is not the case. I don’t think that has ever been the case in any version I have seen of this amendment, but it is certainly not the case in what we are talking about here. In States where there is a renewable portfolio standard in place—and in almost more cases that is a much more aggressive and demanding requirement than anything we are contemplating here—these States would be met without any difficulty. This is not an incremental standard above what the State requires. This is an effort to require some effort to be made nationwide and hopefully get us to a nationwide market for these technologies that we are promoting as part of this.

The other big point the Senator from Tennessee was making is this $18 billion cost. He is referring to this letter from the EIA. It does say the cumulative cost to the electric power sector is about $18 billion.

Three bullet points down in that same summary page, it says the cumulative expenditure for natural gas and electricity by end-use sector taken together, decreases by $22.6 billion.

What it is saying is the effect would be to decrease what they spend on natural gas and electricity by $22.6 billion at the same time there is the $18 billion to be shifted over in this area. So clearly the whole idea behind this legislation is that the people who are producing the companies that are generating electricity in this country, will do less of that through use of natural gas, less coal, less nuclear sources in 15 years is something I think is necessary so we begin to change how we do business, how we conserve, what we invest in. This is a major step in the right direction. Although the critics have raised some alarms about this amendment, numerous analyses have demonstrated the efficiency and savings that would flow from the adoption of this amendment.

Senator BINGAMAN has spoken at great length about some of these studies. The recent analysis conducted by the Energy Information Agency, provided some very strong support for what Senator BINGAMAN has proposed. In fact, it is the administration’s analysis that shows if we passed this national 10-percent renewable portfolio standard with a 2020 deadline on it, we would save residential customers over $5 billion, we would lower natural gas prices by 6.8 percent, and that would have enormous benefits for our chemical, pharmaceutical, and other industries that rely on natural gas. It would also reduce electric utility carbon dioxide emissions by 7.5 percent.

This does not even take into account all of the benefits that I believe would flow from this amendment. When it comes to renewables, we in the United States need to catch up. We are behind in this effort compared to other countries and we need to spur innovation and creativity.

I also support Senator CANTWELL’s amendment. This improves on a provision in the bill that would require the President to develop a plan to save 1 million barrels of oil per day by 2015. This is a laudable provision. Actually it was approved by the Senate 99 to 1, 2 years ago. It is unfortunate the President opposes this provision and has even threatened to veto the Energy bill over it. At a time when oil and gas prices are high, and as a time when national energy interests clearly dictate that we reduce our dependence on foreign oil, rather than rejecting this provision, we need to go further than we
went with the 99-to-1 vote, and that is exactly what the Cantwell amendment does. It establishes an ambitious goal of reducing by 40 percent the amount of oil the United States is projected to import in 2025.

Finally, we are a can-do nation. We can do this. This is something we should be committed to do. These are goals. These are not enforceable standards, but they spur us, they raise our aspirations, they help us to think more clearly about what we need to do to protect our Nation's economy and security.

I hope the President will relinquish his veto threat and that we will have strong bipartisan support on both the Cantwell and Bingaman amendments.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENIC. Mr. President, how much time remains on each side?

The PRESIDING OFFICER. There remains the majority side and 50 minutes on the minority side.

Mr. DOMENIC. I want the Senate to know on our side we do not intend to use as much time as we have, unless other Senators want to speak. Senator ALEXANDER certainly wants some additional time.

Senator BINGAMAN, I don't know if your side needs the whole amount. We are trying to get a unanimous consent agreement shortly.

As the Senator from New York leaves the floor, let me say right at the outset, the Bingaman amendment is not a goal. If it were a goal, that would be something different. It is a mandate. There is a very big difference between a goal and a mandate. This says exactly what each State is compelled to do with reference to the kinds of energies that are described. When you boil it all down, it means "wind" for the white area does not pass, we have not abandoned the Bingaman amendment is not a right way to go, to the development of windmills, the States that do not have wind, in spite of it being clean, and they dirty coal was going to be used because it can be cleaned. So it was in some ways similar, but it would have been billions upon billions of dollars in the development of resources, so it truly would have divided the country.

This divides us in another way, in a way that I think is not necessary. Let me say from the outset, for those who do not think the Bingaman amendment is the right way to go, to the development of windmills, we have a bill that is not going to push the development of renewables. The bill is laden with incentives to produce renewable energy.

As a matter of fact, in tax credits that will bring their bill here shortly, I understand almost all of their allocation of tax reductions, the loss of tax revenues by way of credits or the like, almost all of it will be renewable. As a matter of fact, the very major tax credit that I might say, is the principal reason wind is being developed at all is extended for 2 years at a very large cost to the taxpayers—maybe $3 billion or thereabouts.

We are pursuing the development of renewable energy led by wind, which at this point is the principal one unless we consider hydro, and I don't think we are considering hydro in any of this debate. It exists, and it has nothing to do with what we are talking about. What I am suggesting, if the amendment does not pass, we have not abandoned an American approach to pursuing the technology called renewables led by wind in these United States. What we are trying to say is that one might believe that what is more appropriate is a State that cannot do this because of the unfortunate situation of nature—they do not have the wherewithal to produce it, or if they had to produce it, they would produce it in places they would not want to produce it because it would not be consistent with another use of that land that is paramount and has a priority to the development of windmills, such as right down the middle of a national park.

Having said that, another point was made by my distinguished friend from New Mexico, Senator BINGAMAN, who has been a tremendous partner in this bill. He knows on this issue we do not agree, but he understands that on 99 percent of this bill, we will fight for it and win and have an energy bill for the first time that has a lot of good, solid things for the country. My good friend Senator BINGAMAN said that other States already have clean energy. They see the other requirements of goals, their own requirements. He used the word that they have done so "aggressively."

I remind the Senator, and I think I am correct, that those States do not use the same formula for what will make up their portfolio of renewables. I submit, if the Senator would like to amend his amendment and allow the myriad kinds of energy production used in other States to meet their current goals or current mandates, that would be a good bill.

For instance, the State of Pennsylvania has a very aggressive plan. If you think "aggressive" means they have a very aggressive wind program that will meet the Bingaman amendment, this amendment, that is not true. They are using other technologies consistent with their resources, many of which are related to products related to coal. Whatever remains after they use coal is the clean source of energy that counts toward their goal.

We think nuclear powerplants will be built in the future. It seems it would be appropriate that we might give credit for that. We believe there will be very formidable advances in converting coal not into clean coal but into coal that has the carbon removed that will, indeed, qualify for being as good for cleaning up with reference to the gases we are worried about in global warming as solar. It may end up, and from what I understand, even though it is new technology, it might be cheaper than what we think wind energy will be. It seems to me that the best way to talk about this is that it is a tax. I don't think, when we look at all of this, the best way to do it.

But we should not be causing certain States to pay a very big tax because they cannot produce solar energy. No one calls it a tax, but when someone takes funds out of their consumers' pockets and gives them to some other State, to some other utility in another State, it looks like a duck and quacks like a duck, it is a duck. It seems to me that the easiest way to talk about this is that it is a tax. I don't think, when we look at all of this, the best way to do it.

I don't say this in any way to belittle those who have pursued this with vigor, who think it is a very good approach. Senator BINGAMAN makes valid arguments. The Senator from Tennessee, particularly in his way of getting to the bottom of things and articulating eloquently about what he believes, has contributed immensely to learning just that this is all about. As a consequence, I am not at all sure as many people as thought this is a wonderful idea 6 months ago,
if they listen and understand, I am not so sure they would think this particular way to get renewables, led by a renewable called wind, would be the best way to go. I compliment him for that. I am not at all sure enough people are listening if we judge by the attendance—Senator Snowe—I do not think the people in America should do that. Senators are listening even though they are not here. If we judge on that, of course we will not change any minds.

As to that, there is good reason to say: Look, we are doing enough right now with this enormous credit. Frankly, I will add to the credit, I will say something that is beyond dispute. We have asked those who gauge and judge. How much wind energy can you produce? What is the maximum that the fabricators of these products, these things you describe, Senator, that someone is building, that we will pay for—someone is making a lot of money on them right now because of the subsidy. How much could we produce per year for the next 2 or 3 years? The answer has come: You cannot produce any more than the tax credit will cause you to produce.

Let me put it another way: This mandate has nothing to do with maximizing the production of wind so long as there is a credit. The credit is going to produce it. In a sense, why do you need both? One would say because of the nature of a little white credit versus we have 2 years, maybe 3 years of credits. But in America, the way we ought to look at this, you subsidize the technology so everyone involved can get with it and apply this ingenuity called America and do it better. This very large subsidy ought to surely get us in position where we can produce this wind—if that is what we want to do—that we can produce it cheaper, so the incentive is relevant to the next 8 or 10 years in that respect.

We ought to do better. To some extent, having the 10 percent out there and having the credit out there is a disincentive to maximizing innovation. What is the urgency? How are we sensitizing the marketplace to produce more efficient wind? When you give a tax credit and put a mandate on it, it seems to me whoever is doing it can sit around and say: We have a nice thing going, we do not need to change, just keep going. I thought the idea was to move technology. It could be you are moving other technology besides wind. But there is a long way to go before you get some of that solar onboard. I do not think this will make that move in the next 10 years unless there is a big breakthrough that I do not believe will be caused by this mandate.

I have some other issues I was going to discuss. I will make a point about States that are already doing some things in the southeast, in Pennsylvania. One would not think of Pennsylvania as being a State with a lot of wind, producing wind energy, yet they are in red on my chart. That means they have to borrow from my friend, Senator Bingaman, an aggressive policy on renewables. But it is not predicated upon the same requirements of this bill. It is not a huge 10-percent wind component. It is made up of other things.

If we look at each of these States in red and ask which States are meeting this goal in an aggressive manner, and then come to the Senate floor and say how each State is doing it, and then say, Why don’t we let any State that wants to do all these ways and means and meet it—all we have said is if the State is doing it, they get credit. That is what the sponsor says. But we have not said if they do it differently than this in the future, they get credit, as I understand it.

If we have another red State added up here—and I do not think the red and the blue of the last election has anything to do with this map; we do not have blue up there; we have red and blue States. If we added more reds before we had this bill, it would not be all wind or renewables as prescribed by this bill. It would be whatever they find meets their test of renewable energy. It seems to me that kind of flexibility would be better.

What we have is an attempt to saddle the industry and consumers with a hefty price tag to support a limited set of renewable resources. According to the Department of Energy, electricity generation in 2003 was comprised of non-hydro renewable energy sources such as geothermal, photo-voltaic, solar thermal, biomass, municipal solid waste and wind plants. This is so despite years of government subsidies and programs to encourage renewable energy.

Of this 2.2 percent total, 41 percent came from biomass generation (mostly at industrial facilities), 26 percent came from municipal waste and 10 percent from municipal waste, 13 percent from wind, and 1 percent from solar technologies.

The RPS focuses on that 2.2 percent of our generation, mandates an increase to 10 percent and essentially imposes a 1.5 cent per kilowatt hour tax on an increasing percentage of each year’s retail sales of electricity. If electric utilities do not build new renewable facilities and have to purchase all their credits from the federal government to meet the RPS mandate, the total cost of the inflation-adjusted RPS proposal is an estimated $190.8 billion in nominal dollars.

That is a worst case scenario estimate, but we must consider that risk when we are deciding whether this gamble on renewable resource mandate is the right thing to do. This proposal is a gamble not worth taking.

Mandating a Federal Renewable Portfolio Standard is an ill advised means of increasing renewable resource use. Any effort to legislate on renewable generation requires realistic targets and due deference to States’ rights to make decisions suited to best serve their citizens’ needs.

The proposed Federal Renewable Portfolio Standard fails to recognize these principles.

States should definitely encourage their electric utilities to offer retail customers electricity from green energy to the extent it is available and encourage investment in renewable development. Most importantly, States should be afforded the right to develop their own RPS approaches without Federal interference.

States are best able to determine appropriate fuel types, societal costs, consumer protections, and requirements to meet Federal and State environmental regulations.

Today, 19 States and the District of Columbia have their own RPS programs. Others should be afforded the same right to develop an RPS without Federal interference.

The proposed RPS amendment penalizes those States that have already acted to establish a renewable program by requiring them to replace their State program with a new Federal program.

This amendment rewards certain regions at the expense of others. Solar has limited application east of the Mississippi, wind almost no application in the southeast, and virtually all geothermal is located in the West.

We cannot ignore the reality that utilities in some regions cannot meet a renewable mandate because they are not blessed with ample renewable resources.

To ignore this would be to require these States to buy credits, forcing many consumers to pay for power they never receive, and would result in massive interregional cash transfers.

Utilities that do not have access to new renewable assets will wind up paying 1.5 cents per kilowatt hour and receive no power—their customers will pay a tax with no benefit and this could have significant costs to establishing competitive markets and to low income consumers where such markets do not exist.

Each State should decide for itself and its own residents the optimal mix of renewable and alternative energy sources.

I certainly advocate state policy makers coordinating choices to maximize regional efficiencies, but I do not support instituting a one-size-fits-all national plan.

States have historically had control over the fuel choices and resource development decisions. Past federal endeavors to meddle in fuel choice mandates have resulted in disasters.

Any effort to legislate on Renewable Portfolio Standards requires due deference to States’ rights to make decisions suited to best serve their citizens’ needs. This amendment fails to provide that deference.
Another problem with this RPS amendment is that it mandates an arbitrary quota for some renewable energy resources without any justification as to why only a limited set of renewable resources are included as eligible.

At a hearing held by the Energy Committee in March 2005, Dr. Nogee with the Union of Concerned Scientists was asked a Question about the effect an RPM on production from wind power. He explained that 80% of the RPS requirements would likely be met by new wind generation. Mandating mostly wind power when wind power is not mostly available around the country is poor public policy.

Some claim that an RPS would help address emission problems. I don’t think that the goal of this RPS amendment is to help lower emissions at all. If the RPS was truly a device to help lower emissions, then shouldn’t companies receive credits for environmental improvement expenditures, like pollution control equipment? The proposed amendment does not include such credits.

If cleaner energy was truly the goal of the RPS amendment, why isn’t coal gasification technology or nuclear power credited?

The Energy Information Administration has noted that an RPS will ‘‘have little impact on sulfur dioxide, SO or nitrogen oxide, NO emission levels. If the goal of the RPS was truly to lower emissions, then a broader array of our renewable technologies—particularly clean coal and nuclear—should have been included in the category of resources.

For similar reasons, I don’t think that the RPS can be legitimately justified as a means to help diversify our fuel needs or reduce dependence on foreign resources. If that were the case, a greater diversity of renewable resources should have been included in the category of resources.

More effective and efficient solutions to this problem are available. In response to concerns with over dependence on foreign resources, we should focus our efforts on:

Nuclear power—which is one of our cleanest fuel resources;

Oil and natural gas from Alaska and other regions of the United States;

Coal of which we have abundant reserves;

New hydroelectric generation—which have zero emissions.

If renewable resources are to become a greater contributor to our power sector, then competitive market forces should be allowed to operate. In order to facilitate the diverse technologies, transmission must be available.

One of the barriers to entry for renewable development is the lack of transmission capacity to transmit electricity generated from remote areas long distances.

Before mandating fuel choice, we need to address the real need for improved transmission capacity. A number of the electricity title’s provisions are directed at accomplishing this goal.

Renewable energy should be encouraged in a reasonable, effective manner. To that end, there are already extensive Federal and State subsidies in place as well as tax credits that I support.

We all support renewables—what we should not support is Federal command and control of the market in the guise of help for renewables. Senator Craig is right to speak on this issue before we vote.

Mr. CRAIG. I am happy to speak.

Mr. DOMENICI. I yield to Senator Craig to manage time, and then when he leaves, he will give that to the Senator from Tennessee.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN, Mr. President, I yield 5 minutes to Senator JEFFORDS.

The PRESIDING OFFICER. The Senator is recognized for 5 minutes.

Mr. JEFFORDS. I ask unanimous consent to deliver my remarks from my seat.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEFFORDS. Mr. President, today I speak on Senator Bingaman’s amendment to set a national goal to obtain 10 percent of our Nation’s electricity from renewable resources. I support this idea. In fact, I have filed an amendment to go one step further—requiring 20 percent renewables by the year 2020.

America needs a national commitment to encourage clean domestic sources of renewable energy. I have been in the Congress for 30 years. I have seen the Nation make tremendous advances in areas ranging from medicine to the Internet. I have even witnessed the Red Sox win the World Series. Yet the Nation literally remains dependent on many of the same power sources as when I first was elected to Congress in 1974.

When I think of the next 30 years, I envision an America where clean domestic renewable energy sources are an integral part of our Nation’s electricity generation. As the ranking member of the Senate Committee on Environment and Public Works, obtaining 10 percent of our country’s electricity from a renewable energy represents the modest end of what we could achieve. Let me explain.

Currently, renewable energy accounts for a little over 2 percent of U.S. electricity generation. But the United States has the technical capacity to generate 4.5 times its current electricity needs from renewable energy resources. The potential is there, but we have to give it the assistance of market incentives, as we have traditionally done for our more established fuel sources.

I urge my colleagues to again demonstrate our strong commitment to renewables and support the Bingaman amendment.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. GRAHAM). Who yields time?

The Senator from Idaho.

Mr. CRAIG. Mr. President, I yield myself such time as I may consume.

Mr. President, in speaking to the Bingaman amendment, I believe renewable energy resources are an important part of our energy portfolio. I think any of us could argue they are not. I also believe all consumers should have the opportunity to purchase green power if they so choose.

But I must tell you, I strongly oppose including a nationwide mandatory renewable portfolio standard in this Energy bill. Adoption of this amendment, in my opinion, would increase consumer electrical bills at a time when we want to do exactly the opposite by the very legislation that is on the floor. This would have a particularly negative consequence for those who can least afford it, such as the working poor and the elderly living on fixed incomes.

For many regions of the country not blessed with renewable energy wealth, or resources, this RPS mandate would essentially result in a huge wealth transfer payment from consumers to Federal Government or to renewable energy generators located in other areas of the country. In essence, if you say to all States, you must meet this standard, and you by your physical presence on the globe cannot, you are not blessed with wind—and later on I will show this is dominantly for that purpose—then you will pay the price.

Adoption of this amendment would conflict with the RPS programs that have already been adopted in the way that I think a good energy policy to evolve that was, within the State and within the State structure. Twenty States already have developed renewable resource policies and implemented...
You would think, with that kind of glowing announcement, the environmentalists would strongly support that approach. The answer is quite obvious—they do not. Many of them are up in arms organizing and moving against this very proposed idea. A coalition has been formed and it has spent massive amounts of money in expensive campaigns to stop the wind farm project. They are talking about it as if it were an “Exxon Valdez” crisis or disaster because of what it would do to the character of Nantucket Sound. “Not in my back yard.”

Well, then, let’s go to Vermont. A possible Vermont wind farm located on the mountaintops around East Haven is drawing local opposition. A “large, diverse, well-organized citizens group” is fighting the project and doesn’t believe that wind energy has a place in Vermont. Well, wait a moment. Vermont is one of the most environmentally pure States in the Nation, by their own admission. And yet wind is being opposed as the least environmentally benign form of energy production. The “Montpelier Times” reported on the East Haven wind farm’s future. Vermonters are saying it loudly and saying it clearly: Wind turbines have no power away from the turbine. No, no. The park manager of the Appalachian National Scenic Trail wrote to a Maine newspaper that the project “would be an ‘in your face’ facility for long stretches of the Appalachian Trail.”

The debate goes on. But in Maine they are saying, as they said in Massachusetts and as they said in Vermont: Not in my back yard.

Well, let’s go to Virginia, then. How about Highland County in Virginia? They are strongly opposing a wind turbine project 3 years after it was proposed. The project proposes construction of 18 to 20 wind turbines. More than 500 people attended a May hearing on the project. About two-thirds of the Highland County residents signed a petition against the project.

But what does the amendment do? It says that it better be in everybody’s back yard or you are going to get taxed for it so it can be built somewhere else.

In Kansas, landowners and environmentalists fall victim to NIMBYISM when the plans call for wind turbines to be built in their back yard. Apparently, wind turbines are fine in theory as long as the alleged proponents cannot see it in their back yard. Interestingly, wind development is fighting the project and doesn’t believe that wind energy has a place in Kansas. The Apostle Islands in Wisconsin will be the recipient of wind turbines.

Well, let’s go to Texas. The Texas wind energy projection seems wildly, even naively, optimistic to me. Why? Because a wind turbine is just as vulnerable as any other energy facility to a localized disease in our country called “NIMBYISM.”

And the fewer wind projects that are built, the more the RPS mandate ends up being just a new Federal energy tax that consumers will pay on traditional sources of energy, such as nuclear, coal, and natural gas.

Dollars will just be transferred from consumers’ pockets to the U.S. Department of Energy to buy renewable energy credits so utilities can meet these RPS standards.

Even self-proclaimed environmentalists fall victim to NIMBYISM when the plans call for wind turbines to be built in their back yard. Apparently, wind turbines are fine in theory as long as the alleged proponents cannot see them.

Let’s look at what has really happened when wind developers announced plans to build wind energy facilities.

Nantucket Sound: A wind energy firm announced plans to install 130 wind turbines—one-third to one-half mile apart, more than 6 miles off the coast of Hyannis in Nantucket Sound. This project has been in the works for several years. The Massachusetts energy facilities siting board, in May, finally approved construction of two 18-mile transmission cables that would link the wind turbines to the shore.

The wind farms would provide Cape Codders with roughly 15 percent of their energy and New England with about 5 percent of its total energy needs. The power would come without air emissions or using a single barrel of Middle East oil.
that State. Unfortunately, about 1,000 megawatts of wind capacity was built in west Texas on the wrong side of a transmission constraint. Got the turbines, can produce the power, can’t transmit it to where the people are. As a result, a lot of that wind power has been stranded.

The regional coordinator responsible for maintaining reliability of the Texas transmission grid has stated that “the sparse transmission system in the area has required almost daily limits on the output of resources to keep within transmission operating limits.”

Maybe we can build all of the wind power we need in North Dakota. It has been called the Saudi Arabia of wind potential. I know the Senators of that State are strong supporters of this RPS mandate. Unfortunately, according to the North American Electric Reliability Council, the reliability region in which North Dakota is located is monitoring 31 transmission constraints already within the grid of that region.

The NERC 2005 Summer Assessment Report states that “these constraints can limit [power] imports and exports,” and the story goes on.

Now you can see why I suggest—and I hope that support the idea—that States do it on their own as it fits their needs. But when we create a national mandate on a renewable portfolio, and it is restrictive to the character of the region or the capacity of the region, we are taxing one area against another. That simply is not good public policy. I don’t think it ever takes us where we want to go.

What we crafted in our Energy and Natural Resources Committee and is now on the Senate floor as a very important piece of legislation took into consideration all of what we thought was important and right. It is a bipartisan piece of legislation. I hope the amendment that I have spoken to—and that we are voting on—is adopted by the Senate. It simply does not fit. It will not bring us where all of us want to go, and that is to greater sources, cleaner sources, reliable sources, a mix of sources, in our energy production for this country. I hope my colleagues will reject the amendment. I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I yield the floor to the Senator from Colorado, Mr. SALAZAR.

Mr. SALAZAR. Mr. President, I rise in support of Senator BINGAMAN’s amendment, the renewable energy standard or, as we have come to know it, the renewable portfolio standard. When we consider the imperative with which we deal today in the Senate, we are talking about whether we can get the United States to energy independence, whether we can set America free from being held hostage to the importation of oil from political不稳定 and overtly hostile regions of the world. We are talking about reducing our dependence on foreign oil so that we can reduce the threat of oil price shocks and bring our economy the energy security that it needs. That is the story that the Bingaman amendment, which would require that 10 percent of our electric generation come from renewable sources by 2020, is a very modest goal for us to have. Indeed, the experts around this country who talk to us about energy say if we have the will and the courage, we could get up to a much higher amount than 10 percent by 2020. They will tell you that we could get to 40 percent within probably 15 years, 20 years, to 2025. So the proposal that is currently being considered under this amendment is a modest proposal that moves us in the right direction.

In my own State of Colorado, in this last election in 2004, there was a proposal considered by the voters of our State. That proposal on an RPS was adopted by a strong majority of the people of Colorado. What it requires us to do is to get to a point where we have produced 15 percent of our energy by the year 2020. Fifteen percent of the energy of Colorado will come from renewable sources by the year 2020. The Bingaman amendment has a more modest goal at only 10 percent by 2020. If we can do that amount of renewable energy and meet that standard in my State by 2015, there is no doubt that we can do that with the amendment that Senator BINGAMAN has offered. My view is that setting America free from its overdependence on Saudi and Venezuelan oil is an imperative for our national security and for our economic growth. To increase efficiency, we must invest in renewable energy resources, we must develop new technologies, and we must pursue a balanced approach to developing domestic energy. This bill does much of that. The amendment that is currently on the floor of the Senate will help us move even further forward on those goals.

The oil savings provision that is already in the Senate Energy bill represents some measure of independence from foreign oil. But it is, frankly, not enough. I am encouraged by the strong show of support for the Cantwell amendment to raise that bar even further. I am proud to be a co-sponsor of her amendment. I believe we need to do more to achieve oil energy savings. But the grave problems we face with respect to long-term domestic supplies of oil are only part of the story. Even if domestic reserves of oil are limitless, the way we use hydrocarbons is jeopardizing our way of life. Sooner or later—and I prefer sooner—the people of our great country must embrace the energy challenges of the 21st century and figure out how to produce clean and abundant energy from domestic sources that do not produce carbon or other greenhouse gases and that do not incur the economic penalties of intermittent supply from politically unstable and overtly hostile regions of the world. Although we have been encouraging progress in the development of new carbon-free technologies, there is still a lot of work for us to do. Earlier this year I visited the National Renewable Energy Laboratory in Golden, CO, and saw some of the cutting-edge technologies that the scientists there have advanced with respect to wind energy. I saw solar energy collection cells that could double as 20-year roofing shingles and some of the most advanced solar technologies America has developed.

Today we produce only about 8 percent of our electric power needs from renewable energy sources, and most of that is hydro. As a result, the total or 6 percent—comes from hydro-power. By contrast, the two most common sources of renewable—solar energy and wind power—account for less than 1 percent of the total electric power produced.

Why do these sources of renewable energy account for such a small fraction of our electric energy needs, even after three decades of effort? There are at least three reasons to that question. One of those reasons is technology. Another reason is economic. Both of those are closely related. As new energy technologies have advanced and solar panels and wind turbines have become more efficient, the relative cost of generating electric power from these energy sources has declined. Despite these impressive growth rates, however, and despite decades of research and development, these new energy technologies still suffer from serious drawbacks. Hydrogen fuel cells, despite their promise, are still many times more expensive than an internal combustion engine, and they will require several more decades of research and development to be competitive. Likewise solar power, even after three decades of research and development, still costs five times as much as coal-fired power. Moreover, there are inherent limits in the quality of the sun’s light and the efficiency of these new technologies. These limits, more than anything else, explain why the growth of renewable energy has been limited. We must be guided by the realities of these technologies. These technologies promise, are still many times more expensive than an internal combustion engine, and they will require several more decades of research and development to be competitive.
legislation that would begin to level the playing field and provide tax and other incentives for renewable energy sources. Today the Finance Committee is marking up its tax title which will extend the production tax credit for certain renewable energy sources. Those incentives are extremely important for these relatively immature power industries.

Americans across the country recognize that renewable energy is an important part of our future. And they recognize that Government should be doing more to promote this type of energy. I stand with Americans who have that point of view.

On Tuesday, the White House released a statement that they do not support any kind of renewable portfolio standard. Here is one case where the President and I differ in a fundamental way. I believe the Energy bill should be a way to move us away from foreign oil, away from pollution and towards independence. I do not understand the reason the President is on the other side of this issue. The United States needs to take substantial steps forward with renewable energy. Colorado and all of the West is positioned to be America's innovation hub of the future. That is why the Federal standard of renewable energy development, which Senator BINGAMAN has proposed, is so important. Investing in these nascent technologies now will significantly increase our ability to produce energy from renewable resources.

But it is just as important for the U.S. Congress to establish a Federal standard, an achievable goal of producing a minimum amount of electric power from renewable energy sources, to establish uniform national goals and an active credit trading market based on those goals.

Other benefits of Senator BINGAMAN’s renewable energy standard are the following: First, similar to Colorado’s 10 percent by 2015 is aggressive enough to stimulate the market and produce widespread and rural economic benefits. Secondly, a 10-percent RPS by 2020 will help reduce natural gas prices by reducing demand for electricity generated from natural gas powerplants. Studies show that consumers will save $9.1 billion on their natural gas bills and $4.4 billion on their electricity bills between now and 2020, for a total savings of $13.5 billion. And third, renewable energy technologies create more jobs, nearly twice as many as in traditional fossil fuel industries. The Bingaman amendment would create about 58,000 new jobs a year for America.

This kind of commonsense approach is something that the American people expect all of us. Let me say two final things with respect to the RPS. First, it is going to create a problem for industry and for this reason I have a haphazard patch of RPSs around the States as they are adopted State by State. Therefore, it would make more sense to have a national standard so that industry can recognize it has to live up to one standard.

Finally, I suggest that to make renewable energy a significant part of our energy portfolio is something that makes common sense because of the national economic security issues that we face. For the economic opportunities that it will bring to rural America, and because of the fact that we need to deal with this issue that is creating so many problems for us around the world, especially with over-reliance on oil in the Middle East.

I yield the floor. The PRESIDING OFFICER (Mr. MARTINEZ). Who yields time?

Mr. BINGAMAN. Mr. President, I will defer to Senator DOMENICI if he wants to do something at this point.

Mr. DOMENICI. Yes. This has been cleared with both sides.

I ask unanimous consent that at 2:15 today, the Senate proceed to a vote in relation to the Cantwell amendment, which I will be opposed to. Here is the reason for the changes that are at the desk, which we have seen. I further ask that following that vote, the Senate proceed to a vote in relation to the Bingaman amendment; provided further, that no second amendment be directed to either amendment prior to the votes; and finally, prior to the vote on the Cantwell amendment, there be 30 minutes of debate equally divided in the usual form.

Before the Chair rules, I note that there is no provision for wrap-up debate on the Bingaman amendment.

Mr. BINGAMAN. Mr. President, we would like 2 minutes equally divided prior to the vote on the Bingaman amendment. I guess there is no need for 2 minutes before Cantwell because they have a period of time before theirs, but 2 minutes equally divided would be appreciated.

Mr. DOMENICI. I ask that that be added to the unanimous consent agreement.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. DOMENICI. I yield the floor.

Mr. BINGAMAN. Mr. President, I yield 10 minutes to Senator DORGAN from North Dakota.

The PRESIDING OFFICER. The Senator from North Dakota is recognized.

Mr. DORGAN. Mr. President, first I thank the Chairman for this amendment. I support the amendment. It advances, improves and strengthens the underlying energy bill. I know that the term “renewable portfolio standard”—we have talked about that—is not necessarily something everybody understands. Much of what we do in the Senate sounds like a foreign language. Renewable portfolio standard. I think what this is is an American-made amendment, a home-grown energy amendment. It says what we ought to do. It lays out a charge and decide we are going to move in a different direction.

My colleague said, and other colleagues have said, yes, we are going to continue to use coal, oil and natural gas, and I support that. We must continue to use fossil fuels. We also need to understand that we are increasingly dependent upon a supply of oil that comes from under the sands of the Middle East. A very small part of the world has an inventory of a very substantial part of the oil resources that exist in the world. To be helplessly addicted to that oil—foreign sources of oil—makes no sense. So as we develop a new energy bill, I think we did an excellent job in the Energy Committee. I have complimented Senator DOMENICI and Senator BINGAMAN at some length about that. We have produced a bipartisan piece of legislation and brought it to the floor.

During the debate in committee, we recognized that we would reserve this amendment for the floor of the Senate and debate it here on the floor. Again, I call this the home-grown energy, or an American-made energy amendment.

I let me use a picture to make a point. This happens to be a photograph of a wind turbine just south of Minot, ND. We actually two wind turbines that sit on a hill south of Minot. North Dakota is a wonderful State. I am enormously proud to represent North Dakota. We happen to be fifth in the 50 States in native forest lands. Translations are dead last in trees. It is a great State. We happen to be dead last in trees. We put up a wind turbine here and there, and we like it because we are also a State that has more wind than almost any State in the Nation. We are dead last in trees. We are first in wind—some say especially when I am at home on the weekends.

The Department of Energy says that North Dakota, among all of the States, is the “Saudi Arabia of wind.” We have more potential to develop wind energy than anywhere in America. So this wind turbine is south of Minot, ND. I happen to have had a role in this wind turbine because we on the Appropriations Committee put money in for the air base to buy green power. Eight air bases are buying green power. Two of these wind turbines went up, and they are supplying wind energy to an air base. Incidentally, these turbines are named. The two south of Minot are Willy and Wally. I am not able to determine at first glance whether this is Willy or Wally. They are essentially twins. We care a lot about them and this turbine is an example of the new technology—much more efficient technology—which you can take energy from the wind and turn it into electricity.

In the long term, I think we will be able to take energy from that wind, turn it into a hydrogen fuel-cell vehicle. What a wonderful thing for this country. Then drive back and forth to oil from Saudi Arabia, Iraq, Venezuela, or Kuwait. Maybe we can shed that addiction.
As we begin to talk about energy in the future, we have all talked about natural gas and the increased use of natural gas as a result of both our country and industry wanting to have cleaner burning fuels. Now we are realizing that we have enough natural gas to keep up with use and we now are beginning to talk about how much natural gas we will import into this country. The demand for natural gas continues to increase rather substantially. We are talking about new LNG and we might also have other debates on the floor of the Senate about global warming, about CO2, about all of these related issues.

This amendment moves us in the right direction in several areas. It makes a lot of sense. I hope at the end of this discussion we will have sent a message to the country and to the world that, while this is a good bill that came out of committee, we have improved it. This amendment moves us well down the road to a substantial improvement with respect to our energy future.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. One minute.

Mr. DORGAN. Mr. President, we will have other debates of consequence on this issue. Yesterday, we had a big idea, which said let’s reduce our dependency on foreign oil by 40 percent in the next 20 years. We had people stand up and say, oh, my gosh, we cannot do that; what are you thinking about?

We went to the Moon in 10 years. If we can go to the Moon in 10 years, we ought to be able to find a way to reduce our foreign oil in 20 years. Of course we can do that. I am tired of the can’t-doers around here. Let’s have some of the can-doers decide to affect the destiny of this country’s energy future. Our country’s economic future, our children’s ability to find jobs, our economy’s ability to expand, and our ability to remain a world economic power depends on energy. When the tank runs dry, this economy goes belly up.

This amendment provides an opportunity for us to move in a slightly different direction—toward home-grown energy, American made—believing in ourselves, taking control and taking charge. I support this amendment. I hope the Senate will give it very broad support.

I yield the floor.

The PRESIDING OFFICER. The Senator from Tennessee is recognized.

Mr. ALEXANDER. Mr. President, I am trying to do is harness energy we can produce. Using 100 kilowatt hours of wind power each month is the equivalent of planting one-half acre of trees, or not driving 2,400 miles. Think of that. Put up a turbine—by the way, I understand the turbines didn’t use to be so efficient. We had to have much more of a boost and incentive. Now they are highly efficient. Put up one of these turbines and use the wind to produce electricity. Use the wind to turn that turbine to produce the electricity. And 100 kilowatt-hours—incentively, this is probably 10 times that; this is about a megawatt. But 100 kilowatt hours is the equivalent of planting a half acre of trees or not driving 2,400 miles. That is the savings in energy.

This amendment will also reduce electric sector carbon dioxide emissions by 7.5 percent. That is a great result and we also have other debates on the floor of the Senate about global warming, about CO2, about all of these related issues.

This amendment moves us in the right direction in several areas. It makes a lot of sense. I hope at the end of this discussion we will have sent a message to the country and to the world that, while this is a good bill that came out of committee, we have improved it. This amendment moves us well down the road to a substantial improvement with respect to our energy future.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. One minute.

Mr. DORGAN. Mr. President, we will have other debates of consequence on this issue. Yesterday, we had a big idea, which said let’s reduce our dependency on foreign oil by 40 percent in the next 20 years. We had people stand up and say, oh, my gosh, we cannot do that; what are you thinking about?

We went to the Moon in 10 years. If we can go to the Moon in 10 years, we ought to be able to find a way to reduce our foreign oil in 20 years. Of course we can do that. I am tired of the can’t-doers around here. Let’s have some of the can-doers decide to affect the destiny of this country’s energy future. Our country’s economic future, our children’s ability to find jobs, our economy’s ability to expand, and our ability to remain a world economic power depends on energy. When the tank runs dry, this economy goes belly up.

This amendment provides an opportunity for us to move in a slightly different direction—toward home-grown energy, American made—believing in ourselves, taking control and taking charge. I support this amendment. I hope the Senate will give it very broad support.

I yield the floor.

The PRESIDING OFFICER. The Senator from Tennessee is recognized.

Mr. ALEXANDER. Mr. President, I am trying to do is harness energy we can produce. Using 100 kilowatt hours of wind power each month is the equivalent of planting one-half acre of trees, or not driving 2,400 miles. Think of that. Put up a turbine—by the way, I understand the turbines didn’t use to be so efficient. We had to have much more of a boost and incentive. Now they are highly efficient. This amendment moves us in the right direction in several areas. It makes a lot of sense. I hope at the end of this discussion we will have sent a message to the country and to the world that, while this is a good bill that came out of committee, we have improved it. This amendment moves us well down the road to a substantial improvement with respect to our energy future.
live, if the utilities produce what they are more likely to produce, they will produce electricity using nuclear power, which is carbon free, and coal. I am told that today the cost of nuclear, after it is built, is 1 cent per kilowatt hour, coal is 2 cents, natural gas is 4.8 cents, wind is 4.8 cents, and if the preferred methods in the Bingaman legislation all cost more. In other words, this is an order to Tennessee and Florida to not do what we would normally do but do this limited number of automobiles to Tennessee. I know that aluminum is made from electricity, an electrolysis process. If these electric rates go up too much, those jobs go overseas. They would be gone by 2020 and 2025 if we put in an $18 billion increase in electric rates.

You may assume that natural gas will go down to $5 a unit. It is $7 today. Or it might not go down to $5 a unit. But it looks to me, under this man-date, the only way electric rates can go is up.

Also, the EIA letter says there is no appreciable decrease in NO<sub>x</sub> to clean the air, no appreciable decrease in sulfur dioxide to clean the air, and the price of natural gas does not go down. By the way 2025, according to the Energy Information Administration, the price of natural gas is $4.79, with an RPS or without it.

What we have before us is a proposal to select out a very few nice sounding ideas and say let’s charge the rate-payers of America $18 billion to put them in and hope the price of natural gas goes down over 20 years to offset it. That is what we are saying. We are assuming during all that time there is no growth in power. Why would we be over here even talking about spending $18 billion to create tens of thousands of new gigantic windmills to run the American economy and spending $1 billion to produce by 2025 one-fifth of 1 percent of our total electricity in solar? That is what this would do. Why don’t we do something that we know would create large amounts of carbon-free electricity?

I can go to that list. We know that nuclear comes 70 percent of our carbon-free electricity. For those who care about global warming—and I am one Senator who does—I do not want to rely on windmills and solar energy that produces one-fifth of 1 percent of our total needs to get us where we need to go in terms of carbon-free energy.

So why don’t we take this money, if we have it, and accelerate advanced nuclear powerplants, accelerate carbon capture and sequestration, spend a reasonable amount on solar, accelerate coal gasification powerplants, accelerate conservation and energy efficiency. That is the way you have carbon-free air—conservation, nuclear power, coal gasification, and carbon sequestration, not tens of thousands of windmills.

I am not anxious to go home to Ten- nessee and say: We are worried about the Japanese and the Indonesians taking our jobs and buying up the oil reserves, we are worried about our clean air, gasoline prices are high, natural gas prices are at a record high, and our solution: tens of thousands of windmills.

The Senator from New Mexico said there are many things that can be done, but the EIA letter which he cites has an estimate of what the effect of this mandate would be. It could be more or less, but this is what it says. It says we will have 35,100 new gigantic windmills. That is a lot. We have 6,700 today, and we will have 35,000 new windmills.

Let me take an example of these wind turbines. There is one nuclear powerclear in America today and that is at Browns Ferry. It is about 2,000 megawatts. If you had 2,000 1-megawatt wind turbines, that would spread over an area two times the size of the City of Knox- ville, TN. The Senator from North Dakota has an estimate of what the effect of this mandate would be. It could be more or less, but this is what it says. It says we will have 35,100 new gigantic windmills. That is a lot. We have 6,700 today, and we will have 35,000 new windmills.

The Senator from North Dakota mentioned he had gotten a nice subsidy for his two big wind turbines in North Dakota. Well, that is terrific. So now they have three subsidies to build these two giant windmills. We committed $2 billion of taxpayers’ money—that is such a preposterous number for this country. We cannot make it $2 billion of taxpayer money over the next 5 years for windmills. The Finance Com- mittee suggested another billion. This mandate would, by causing those who cannot produce enough wind to write a check to the Government, be yet another subsidy, and if you know the Senator from North Dakota, you can get a third subsidy to build windmills. Why don’t we get the same amount of interest in conservation, nuclear power, coal gasification, and carbon sequestration and really clean up the air? There is one last point I would like to make, and I will be through. The Senator from Idaho talked about the landscape a little bit. I think solar power is terrific. I have an amendment to the Senate from North Dakota to expand solar-produced power. Production tax credits have gone all to wind and left out solar power. Biomass has a great future.

I guess because in the eye of the beholder, but I had always thought that the great American outdoors was one of the most essential parts of our char-acter.

Egypt has its pyramids, Italy has its art, England has its history, and we have the great American outdoors. I do not think it is right for us to subsidize the building of these gigantic machines which are twice as tall as a football stadium and extend from 10-yard line to 10-yard line that can be seen for 20 miles away and destroy the American landscape when there is no real purpose for it. At the same time, we have unreasonable, massive subsidies to the de-vlopers to do it.

I hope we will defeat this amend-ment, and that is a part of the reason. I will not be through looking at these subsidies for wind power before we get through. I do not think any of us should be embarrassed that it is not right to destroy and scar the American landscape by building these what I believe are public nuisances when instead we could be producing carbon-free en-ergy by conservation, nuclear power, coal gasification, and carbon sequestra-

This is an $18 billion increase to the ratepayers of America. Maybe you be-lieve that the lower price of natural gas in 20 years will make up for that. I would not count on it.

REgIONAL CaPACITY

Mr. NELSON of Florida. Mr. Presi-dent, energy diversification is impor-tant to the future of our country; and for that reason, the distinguished rank-ing member of the Energy Committee has proposed an amendment to require 10 percent of our electricity to be pro-duced from renewable resources by 2020. However, for those regions of the country that do not have the capacity to greatly increase renewable resources in their State, a financial hardship may result through no fault of their own. My State of Florida is one of the States that will have difficulty meet-ing the standards because the geologi-cal, climatic and topographical condi-tions make it impossible to harness certain forms of renewable energy like wind and hydropower. Furthermore, the Energy Information Administra-tion concludes that Florida’s energy technical potential for renewable en-ergy is 8 percent. Currently, Florida has 1.8 percent in existing renewables; and more than 50 percent of that 1.8 percent comes from municipal solid waste, a form of renewable energy not included in the definition of “new re-newable energy” in the mem-ber’s amendment. For these reasons, I have expressed my concerns to Senator BINGAMAN. While I remain supportive of expanding the use of renewable en-ergy supplies, I would prefer an ap-proach that recognizes the regional dif-ferences in the ability of States to meet a renewable portfolio standard. An RPS standard cannot be rigid, it must be flexible.

Mr. BINGAMAN. I appreciate the concern of my colleague from Florida. As you know, I am committed to a renewable portfolio standard because the increased use of renewables can ease natural gas price volatility and
decrease our dependence on fossil fuels and foreign imports. Having said that, differences do exist from region to region and State to State with regard to renewable energy potential. I would like to extend an offer to Senator Nelson or whoever is going to work in conference to find a method that will enable a renewable standard to accomplish the goal of increasing renewables while recognizing the legitimate differences among States. I acknowledge that municipally owned utilities play a large role in Florida’s renewable potential and I would be willing to recognize that potential as part of our discussions in the conference. I believe we can find a way to help each State include a renewable standard as part of their overall energy production, and I am committed to working with Senator Nelson to accomplish this.

Mr. Nelson of Florida. I want to thank Senator Bingaman for his work on this amendment and his commitment to work in conference to address my concerns with the renewable energy standard specifically. I look forward to working together on this important provision.

Mr. Talent. Mr. President, I rise in opposition to amendment No. 791, Senator Bingaman’s amendment which would require a mandatory renewable portfolio standard, or “RPS.” I am a big supporter of new, clean forms of energy. I am convinced that we cannot become energy independent without making renewable energy resources an important part of our energy mix.

I also believe that each region of the country has something to offer to meet this country’s clean energy needs, but what each region has to offer is not the same. For that simple reason, I oppose including a nationwide, mandatory renewable portfolio standard in this energy bill.

In particular, for many regions of the country not blessed with renewable energy resources, this RPS mandate would result in a huge wealth transfer payment from consumers to the Federal Government or to renewable energy generators located in other areas of the country. The amendment ignores the reality that some regions of the country simply do not have the amount of renewable resources demanded by this amendment.

The leading advocate for wind power, the American Wind Energy Association, lists my home State of Missouri as the 20th best State for wind energy potential. That would seem to imply that Missouri would have no trouble meeting a 10 percent RPS with wind energy.

However, the detailed studies done by the National Renewable Energy Laboratory show that the wind Missouri does have is of insufficient power and consistency for utility grade wind turbine applications. In other words, the utilities in Missouri cannot build windmills in the State to meet an RPS. There’s just no wind to make them turn.

Missouri is not the only State that finds itself unable to use wind, the one renewable resource that RPS proponents do not dispute is central to meeting the proposed requirement. The wind resource map prepared by the National Renewable Energy Laboratory shows that the entire southeastern region of the country has virtually no wind potential. Those States are even worse off than Missouri. Moreover, large areas of the upper midwest have marginal wind potential. Unless plan to build wind farms in the Great Lakes, and I don’t think any of us expect that to happen.

So if not wind, what else might be used? The proposed amendment lists a limited number of forms of renewable energy that meet the requirement—solar, wind, geothermal energy, ocean energy, biomass, landfill gas, or incremental hydropower.

My State has just a little bit of hydropower, though under Mr. Bingaman’s proposal, existing hydropower, though clearly a renewable resource and one of the very cleanest and cheapest sources of electricity, inexplicably does not count. All of the hydropower in the Pacific Northwest also does not count under this proposal.

My State also has a generator that burns tire chips. Every tire that is burned to make electricity is one less that will be tossed into our overburdened landfills. That is certainly something we should encourage, but are tires considered renewable? I do not see us driving cars without tires anytime soon. Nevertheless, tire chips do not count, either.

The National Renewable Energy Laboratory has also found that Missouri does not have utility-scale geothermal, solar, or fuelwood biomass resources, either. So what do I tell my homestates utilities that they should use to meet this RPS requirement?

This morning, Sen. Bingaman acknowledged that many States do not have access to the best renewable resources. He recognized that wind, solar, and geothermal resources are generally concentrated in western States. These are the major sources of clean, renewable power. He suggested that, no matter, another renewable—biomass—is available in every State. What he did not tell you, however, is that you can not just toss switchgrass or other biomass into a boiler and churn out electricity.

Biomass is not generally used to make electricity today, and its use is not without substantial costs. It must be thoroughly dried before burning. That requires lots of space and energy for drying and, obviously, it can not be stored outside in a heap like coal. Building a drying and storage facility to process and store the mountain of biomass it would take to meet an RPS does not just add on more cost of money. There would also be a cost to gather and transport these materials from the hundreds of acres it would take to grow sufficient biomass just to equal a couple of tons of coal. Plus, there is a substantial cost to consumers for utilities to modify their boilers to co-fire or blend biomass fuel. And, on top of this, burning biomass may leave the utility with additional cost to comply with the Clean Air Act.

Proponents of a mandatory RPS say, “Just buy wind power from wind generators in other States.” Sounds easy enough, but how do we get that power from those States? Windmills have to be built where the wind is. These locations are usually remote and far from our cities where the electricity is most needed. In most every instance, there is insufficient transmission capacity to move that power to where it is needed. And at $1 to $3 million a mile, new transmission does not come cheaply, nor is it easy to get all of the necessary approvals to get it built. So I am not ready to say I can count on economically transmitting wind power to Missouri.

Moreover, wind turbines are just as susceptible to fierce local opposition as any other energy facility proposed near population centers. Senator Alexander has highlighted how large and intrusive each of these wind turbines are. And while one on the horizon may be interesting, it will take hundreds of them on that horizon to meet a 10 percent RPS requirement. I do not know that this is how any of us want to meet our Nation’s energy needs, if we can even get that many wind turbines built.

What is the result if this wind energy does not get built or can not be deliverred? This RPS amendment will end up being nothing more than a new energy tax on consumers who depend on traditional fuels for their electricity. Higher energy costs, particularly those that result in a wealth transfer payment from our constituents to the Department of Energy, is not good energy policy.

Utilities in my State already voluntarily offer the green power that they have available to their customers if they prefer to buy green. They are adding wind generators where they can—For example, Kansas City Power and Light is adding up to 200 megawatts of wind power in Kansas. This is about as much as they have found feasible to produce there. But this does not even come close to meeting a 10-percent RPS requirement.

According to EIA, total electricity sold in 2002 by the Missouri utilities that would have to meet the proposed RPS was 47,378,256 megawatt-hours, meaning Missouri utilities would have to produce 4.7 million megawatt-hours of renewable electricity, and this amount will only grow, as electricity demand has increased in recent years by nearly 5 percent.

KCP&L’s 200 megawatts of wind energy capacity will translate into no more than 584,000 megawatt-hours of wind energy, assuming the energy is available 1/2 of all hours of the year, far
June 16, 2005

Congressional Record — Senate

S6689

short of the 4.7 million megawatt-hours that a 10-percent RPS requirement would demand. Even on a capacity rather than energy basis, the 200 megawatts would only equate to 5 percent of KCP&L’s current generating capacity of 4,000 megawatts. KCP&L estimates that to meet the RPS requirement it would face with wind energy, it would need as much as 450 megawatts of wind. This equates to about 297 wind turbines, each of which needs at least 60 acres of land, meaning it would need over 18,000 acres of land to meet the RPS requirement. KCP&L estimates the total cost of complying with the RPS proposal to be between $400 and $500 million. And that’s just one utility that serves just a portion of Missouri.

Today, the cost of all types of energy is at unacceptably high levels. Adoption of this amendment would increase consumers’ electric bills, since if a utility cannot meet the standard, it would be required to purchase credits at 1.5 cents per kilowatt-hour.

Missouri’s average retail rate for electricity is around 6 cents per kilowatt-hour, making the RPS amount to a 25-percent increase in cost to Missouri consumers for this portion of their electricity needs. This would have particularly negative consequences for those who can least afford it, such as the working poor and the elderly living on fixed incomes.

This is just a wealth transfer from States with little renewable resources to those with a lot. We do not do this for any other source of electricity—States with low cost coal or hydro-power do not subsidize States that rely on higher cost fuels such as natural gas. Why should we have some States subsidize others to promote a selective fuel for producing electricity? At 1.5 cents per kilowatt-hour, this could cost Missouri consumers as much as $71 million a year.

Such a large sum of money would be better spent in shoring up our Nation’s transmission grid or pursuing other clean energy sources. Missouri utilities are voluntarily spending hundreds of millions of dollars pursuing clean coal technology to take advantage of the natural resource that is readily and economically available to Missouri, just as other States are doing what they can with the resources they have available, whether that is coal, natural gas, wind, biomass, or other forms of energy such as nuclear.

Utilities are also spending hundreds of millions of dollars to retrofit their plants to remove NOX, SO2, and mercury from emissions and may be subject to CO2 reductions as well. KCP&L alone is spending $280 million to meet emission reduction goals.

Adding a tax to support renewables in other regions of the country is an excessive burden on this critical industry that needs to be focused on improving the transmission grid to increase reliability. This transmission investment is needed to improve the existing grid, not to extend the grid to remote locations where wind turbines must be placed, far from where the electricity is used.

States that have renewable resources in sufficient quantity have already invested and adopted renewable portfolio standards tailored to the resources of the State. Not surprisingly, adoption of this amendment would conflict with the RPS programs adopted by 20 States that have different eligible renewable resources and implement timetables.

Even some of these States with their own RPS will not be able to meet this mandatory proposal. Of the 20 States with portfolio requirements, only 13 of them have set a standard high enough to meet the proposed 10-percent Federal standard by 2020. Some of 13 that meet the 10-percent threshold may still fail simply because their definition of renewable energy doesn’t meet what would be the national standard definition. Time will tell.

For example, Arizona is in the process of increasing its renewable target to 15 percent by 2020, exceeding the proposed Federal standard in the amendment. I expect that Arizona will implement its program in a manner that makes the most of the State’s solar potential in the long-term.

I do not believe that the proposed Federal standard would work. I have concerns that any other State fully achieve their clean energy and efficiency goals. I also understand that the penalty for noncompliance with the proposed Federal standard is significantly lower than the incremental cost of bringing new elements on line. While I do not believe the intent of this amendment is to impose an energy tax on consumers, I think that could be the economic reality in many circumstances.

My colleague from Tennessee has argued persuasively that this Federal RPS is primarily a wind-power bill. I was interested to read in a fact sheet from the Union of Concerned Scientists that, to achieve this 10-percent Federal RPS, we would need to build almost 55,000 new wind turbines. That is an enormous number. I suspect that the potential adverse environmental effect such a massive construction project have not been studied. In fact, it has already been suggested that in the rush to build these wind turbines we need to subsidize wind to the practical exclusion of other renewables.

The need for energy sustainability and cost-effectiveness does influence my opposition to this amendment. What we need to do, what we must do, is enact a mandatory cap and trade program for greenhouse gas reduction and let the market drive the technology. A Federal RPS would stand in sharp contrast to the market-based solutions in the Climate Stewardship and Innovation Act, which Senator Lieberman and I introduced last month. That legislation would promote clean and efficient energy technologies

Short of the 4.7 million megawatt-hours that a 10-percent RPS requirement would demand. Even on a capacity rather then energy basis, the 200 megawatts would only equate to 5 percent of KCP&L’s current generating capacity of 4,000 megawatts. KCP&L estimates that to meet the RPS requirement it would face with wind energy, it would need as much as 450 megawatts of wind. This equates to about 297 wind turbines, each of which needs at least 60 acres of land, meaning it would need over 18,000 acres of land to meet the RPS requirement. KCP&L estimates the total cost of complying with the RPS proposal to be between $400 and $500 million. And that’s just one utility that serves just a portion of Missouri.

Today, the cost of all types of energy is at unacceptably high levels. Adoption of this amendment would increase consumers’ electric bills, since if a utility cannot meet the standard, it would be required to purchase credits at 1.5 cents per kilowatt-hour.

Missouri’s average retail rate for electricity is around 6 cents per kilowatt-hour, making the RPS amount to a 25-percent increase in cost to Missouri consumers for this portion of their electricity needs. This would have particularly negative consequences for those who can least afford it, such as the working poor and the elderly living on fixed incomes.

This is just a wealth transfer from States with little renewable resources to those with a lot. We do not do this for any other source of electricity—States with low cost coal or hydro-power do not subsidize States that rely on higher cost fuels such as natural gas. Why should we have some States subsidize others to promote a selective fuel for producing electricity? At 1.5 cents per kilowatt-hour, this could cost Missouri consumers as much as $71 million a year.

Utilities are also spending hundreds of millions of dollars to retrofit their plants to remove NOX, SO2, and mercury from emissions and may be subject to CO2 reductions as well. KCP&L alone is spending $280 million to meet emission reduction goals.

Adding a tax to support renewables in other regions of the country is an excessive burden on this critical industry that needs to be focused on improving the transmission grid to increase reliability. This transmission investment is needed to improve the existing grid, not to extend the grid to remote locations where wind turbines must be placed, far from where the electricity is used.

States that have renewable resources in sufficient quantity have already invested and adopted renewable portfolio standards tailored to the resources of the State. Not surprisingly, adoption of this amendment would conflict with the RPS programs adopted by 20 States that have different eligible renewable resources and implement timetables.

Even some of these States with their own RPS will not be able to meet this mandatory proposal. Of the 20 States with portfolio requirements, only 13 of them have set a standard high enough to meet the proposed 10-percent Federal standard by 2020. Some of 13 that meet the 10-percent threshold may still fail simply because their definition of renewable energy doesn’t meet what would be the national standard definition. Time will tell.

For example, Arizona is in the process of increasing its renewable target to 15 percent by 2020, exceeding the proposed Federal standard in the amendment. I expect that Arizona will implement its program in a manner that makes the most of the State’s solar potential in the long-term.

I do not believe that the proposed Federal standard would work. I have concerns that any other State fully achieve their clean energy and efficiency goals. I also understand that the penalty for noncompliance with the proposed Federal standard is significantly lower than the incremental cost of bringing new elements on line. While I do not believe the intent of this amendment is to impose an energy tax on consumers, I think that could be the economic reality in many circumstances.

My colleague from Tennessee has argued persuasively that this Federal RPS is primarily a wind-power bill. I was interested to read in a fact sheet from the Union of Concerned Scientists that, to achieve this 10-percent Federal RPS, we would need to build almost 55,000 new wind turbines. That is an enormous number. I suspect that the potential adverse environmental effect such a massive construction project have not been studied. In fact, it has already been suggested that in the rush to build these wind turbines we need to subsidize wind to the practical exclusion of other renewables.

The need for energy sustainability and cost-effectiveness does influence my opposition to this amendment. What we need to do, what we must do, is enact a mandatory cap and trade program for greenhouse gas reduction and let the market drive the technology. A Federal RPS would stand in sharp contrast to the market-based solutions in the Climate Stewardship and Innovation Act, which Senator Lieberman and I introduced last month. That legislation would promote clean and efficient energy technologies
Mr. President, I support the amendment offered by the Senator from New Mexico, Mr. BINGAMAN. This amendment is a breach of fresh air in a bill that is filled with many stale concepts regarding our approach to this nation’s energy policy. I am proud to be a cosponsor of this amendment.

Producing a significant amount of our electricity from renewable sources is not a concept for the future. It is a real possibility that exists today using solar, wind, tidal, gas from landfills, and biomass. In fact, 19 States around the country are using these renewable sources of energy to steer their States towards a future of clean, sustainable energy use.

In the State of Illinois and in many other States, enacting this standard is a no-brainer. This winter, Illinois Governor Blagojevich announced a plan to adopt a renewable portfolio standard requiring Illinois electric utilities to provide 8 percent renewable energy as part of their overall power mix by 2012. This bold vision will make Illinois the second biggest wind power State in the country by 2012. The city of Chicago also has a strong commitment to using renewable sources of energy and is already planning to surpass a 10 percent contribution from renewables in its electricity stream and achieve a 20 percent goal.

In the 18 other States where renewable portfolio standards have been successfully adopted, innovations in electricity generation have flourished at virtually no cost to the consumer. Just imagine what would happen to this industry of the future if we enacted a Federal standard. And, here is the best news: According to the Union of Concerned Scientists, a 10 percent renewable portfolio standard on the Federal level would not add a single penny to consumers’ bills.

Introducing renewable electricity into the mix of electricity generation also brings us a measure of physical security. By creating geographically dispersed sources of energy generation, we are providing ourselves with greater electricity security by providing smaller targets for those who are trying to disrupt the transport of combustible materials. This is smart policy at a time when we must be vigilant about homeland security.

Our country’s demand for electricity is expected to continue growing for decades to come. Enacting a renewable portfolio standard ensures that clean technologies will help us meet that enlarged demand, while not offsetting the importance of investing in clean technologies in other energy production methods, especially coal. Coal will undoubtedly play a role in our energy portfolio for years to come, and I look forward to a vigorous debate on how we can best assist the utility industry in employing clean coal technologies.

Abraham Lincoln once said: “I am a firm believer in the people. If given the truth, they can be depended upon to meet any national crises. The great point is to get the truth first.” The real facts are that without forward-thinking amendments such as this one, the energy bill is not going to bring us independence from the 20th century mindset of energy production. Let us give the American public this public bill of rights to meet our national energy crisis before it gets worse.

The PRESIDING OFFICER. The Senator from New Mexico, Mr. BINGAMAN, Mr. President, I am informed that the Senator from Michigan and the Senator from Washington want to interrupt the remainder of our debate on the Bingaman amendment in order to discuss and do a modification of the Cantwell amendment. I ask unanimous consent that they be yielded whatever time they need to accomplish that and it not count against the Bingaman amendment.

The PRESIDING OFFICER (Mr. BURR). Without objection, it is so ordered. The Senator from Washington.

AMENDMENT NO. 784, AS MODIFIED

Ms. CANTWELL. Mr. President, I ask unanimous consent to set aside the pending amendment and I call up amendment No. 784 and send a modification to the desk.

The PRESIDING OFFICER. The amendment is pending.

The amendment is so modified. The amendment (No. 784), as modified, is as follows:

Beginning on page 120, strike line 23 and all that follows through page 122, line 14, and insert the following:

SEC. 151. REDUCTION OF DEPENDENCE ON IMPORTED PETROLEUM.

(a) FINDINGS.—Congress finds that—
(A) during the period beginning January 1, 2005, and ending April 30, 2005, the United States imported an estimated average of 13,056,000 barrels of oil per day; and
(B) the United States is projected to import 19,130,000 barrels of oil per day in 2025;
(2) technology solutions already exist to dramatically increase the productivity of the United States energy supply;
(3) energy conservation measures can improve the economic competitiveness of the United States and lessen energy costs for families in the United States;
(4) United States dependence on foreign energy imports leaves the United States vulnerable to energy supply shocks and reliant on the willingness of other countries to provide sufficient supplies of oil; and
(5) while only 3 percent of proven oil reserves are located in territory controlled by the United States, advances in fossil fuel extraction techniques and technologies could increase United States energy supplies; and
(b) GOAL.—It is a goal of the United States to reduce by 40 percent the amount of foreign oil projected to be imported during calendar year 2025 in the reference case contained in the report of the Energy Information Administration entitled "Annual Energy Outlook 2005";
(c) MEASURES TO REDUCE IMPORT DEPENDENCE.—
(1) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, and every two years thereafter, the President shall—
(A) develop and implement measures to reduce dependence on foreign petroleum imports of the United States by reducing petroleum in end-uses throughout the economy of the United States sufficient to reduce total demand for petroleum in the United States by 1,000,000 barrels per day from the amount projected for calendar year 2015; and
(B) implement measures under paragraph (1) under existing authorities of the appropriate Federal agencies, as determined by the President.
(2) REQUIREMENTS.—In developing measures under paragraph (1), the President shall—
(A) ensure continued reliable and affordable energy for the United States, consistent with the creation of economic growth and maintaining the international competitiveness of United States businesses, including the manufacturing sector; and
(B) implement measures under paragraph (1) under existing authorities of the appropriate Federal agencies, as determined by the President.
(3) PROJECTIONS.—The projections for total petroleum demand for the United States under paragraph (1) shall be those contained in the Reference Case in the report of the Energy Information Administration entitled "Annual Energy Outlook 2005".
(d) REPORT.—
(1) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, and annually thereafter, the President shall submit to Congress a report, based on the most recent edition of the Annual Energy Outlook published by the Energy Administration, assessing the progress made by the United States toward the goal of reducing dependence on imported petroleum sources by 2025.
(2) CONTENTS.—The report under paragraph (1) shall—
(A) identify the status of efforts to meet the goal described in subsection (b); and
(B) assess the effectiveness of any measure implemented under subsection (c) during the previous fiscal year in meeting the goal described in subsection (c) as well as
(C) describe plans to develop additional measures to meet the goal.
(e) SAVINGS CLAUSE.—Nothing in this section precludes the President from requesting additional authorities to achieve the targets set in subsection (c).

Ms. CANTWELL. Mr. President, I know the Senator from Michigan has
given a great deal of thought to this issue and to the modified amendment, and I yield the floor to him.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I thank our friend from Michigan for moving this modification. This is a very important modification from my perspective. But for this modification, the language of the amendment would propose that the goals that are set forth—which are only goals but the absence of them are goals—would need to be achieved by implementing measures ‘‘under existing authorities of the Federal agencies.’’

That is the language which is in 151(c)(2)(B) of the amendment. That is lines 8 and 9 on page 4 of the amendment.

Now, that is very problematic language and unacceptable language because if we are going to achieve the goals set forth, if we have any chance of doing so, it would have to be with significant changes in our authorities—for instance, in the tax incentives which would be so essential in order to achieve a reduction in imports of oil. There is no way I can see or that many others can see that without achieving the kinds of reductions that are hoped for without significant tax incentives being put into the law—tax incentives that do not now exist.

There are some existing authorities and additional tax incentives, but they do not come close to what they must be if we are going to reduce the amount of imported oil that we use. So it is important to me that the existing authorities language either be removed or superseded in this amendment so that the President could seek and we could grant, if we so chose, new authority, additional authorities, new tax incentives, for instance, to move to new technologies. That is the effect of the modification to the amendment that was sent to the desk, which reads:

Nothing in this section precludes the President from requesting additional authorities to achieve the targets in subsection (c).

So that change seems to be very essential since there is no practical way that these goals can be met. In my book—or the short-term goals of one million barrels per day or the long-term goals of 7.64 million barrels per day—unless there are changes in our tax structure and the other authorities that we provide in the executive branch. This savings clause now makes it clear that both as to the short-term and the long-term goal for savings, there is no limit in the amendment to using existing authorities but rather additional authorities can be sought by the President.

I thank the Senator from Washington for making that change. In the colloquy between myself and the Senator from Washington, it makes clear that the amendment does not assume or require changes in technologies or CAFE standards or anything else. It is technology neutral. According to this colloquy, the amendment does not assume or propose an increase in CAFE standards. All of the other potential changes, technologically, that could help get us to where we want to go, including the Cantwell amendment, are important, hybrid technologies, hydrogen technologies—it does not put those specific technologies in place, either requiring them or, of course, not precluding them because this technology neutral. That becomes critically important because, again, without those technologies there is no way we can achieve these goals. But there is no effort in this amendment to identify the specific technologies or the mechanisms by which these goals would be achieved. Particularly important, obviously, is the language that states that the amendment does not assume or propose an increase in CAFE standards, and another part of the colloquy makes it clear that the amendment neither presupposes regulatory changes to the CAFE system and that is not part of this amendment.

So the colloquy will speak for itself. It is a lot longer than I have just summed up. In significant part, the colloquy makes it clear in terms of what the amendment does and what it does not do.

I thank the Senator from Washington for working out this colloquy with me. It provides a very significant part of this amendment. This is a very important amendment from my perspective. Ms. CANTWELL. Because the amendment is technology-neutral and simply lays out a vision, accelerated ethanol production and use is not specifically assumed. However, there is no question that biofuels can play an important role in reducing our reliance on OPEC, as I believe the President will do. Ms. CANTWELL. Because the amendment is technology-neutral and simply lays out a vision, accelerated ethanol production and use is not specifically assumed. However, there is no question that biofuels can play an important role in reducing our reliance on OPEC, as I believe the President will do. Ms. CANTWELL. This amendment is designed to accomplish a vision that the United States should be self-sufficient in its transportation energy needs. It simply lays out a vision that the United States should attempt to achieve over the course of the next 20 years. The only assumption underlying this amendment is that the United States has the ingenuity and imagination to achieve and meet the rising demands that a growing energy economy will place on our economy. The amendment neither presupposes regulatory changes to the CAFE system and that is not part of this amendment.

So the colloquy will speak for itself. It is a lot longer than I have just summed up. In significant part, the colloquy makes it clear in terms of what the amendment does and what it does not do.

I thank the Senator from Washington for working out this colloquy with me. It provides a very significant part of this amendment. This is a very important amendment from my perspective.
tools the U.S. can use to achieve the goal, additional biodiesel production is not explicitly assumed by the Cantwell amendment.

Mr. LEVIN. Does the amendment assume an increase in the use of diesel engine technology?

Ms. CANTWELL. While advances in diesel engine technology are another potential tool for accelerating oil savings, they are not specifically assumed nor mandated by the Cantwell amendment.

Mr. LEVIN. Does the amendment assume a major increase in the use of hybrid electric vehicle technology?

Ms. CANTWELL. Because the amendment lays out a vision rather than mandating specific measures, increased hybrid use is not specifically assumed. However, some have estimated that growth in the hybrid vehicle market can achieve oil savings of up to 2 million barrels a day by 2015, 10 years before the Cantwell amendment’s ultimate goal. Taken together, biofuels production and growth in the market for hybrid vehicles could provide more than two-thirds of the energy security goal established by the Cantwell amendment.

Mr. LEVIN. Does the amendment assume a major shift to use of renewable hydrogen and fuel cell vehicles?

Ms. CANTWELL. There is no question that hydrogen provides another potential pathway to achieving substantial reductions in U.S. dependence on foreign oil. However, because the technology remains at a relatively early stage in its development, no specific estimates exist for the economic and energy efficiencies this technology may provide. It is not specifically assumed by the Cantwell amendment.

Mr. LEVIN. Does the amendment assume an increase in tax incentives to encourage use of advanced technologies?

Ms. CANTWELL. Certainly, tax incentives can help spur the development of markets for advanced technologies, and help expand the choices available to American consumers. But these are not specified or assumed within the Cantwell amendment.

Mr. LEVIN. Does the amendment assume regulatory changes in how the CAFE system works?

Ms. CANTWELL. The amendment neither assumes nor proposes regulatory changes to the CAFE system. I view expanding the efforts of the existing CAFE program as beyond the scope of this amendment, which lays out a national vision for reducing American dependence on foreign oil imports. Certainly any changes to the CAFE system’s regulatory regime would require additional legislative action, action that is not assumed in the Cantwell amendment.

Mr. LEVIN. Does the amendment assume regulatory changes that would allow for greater use of diesel technology?

Ms. CANTWELL. Certain other nations have begun the transition to more wide-spread use of diesel technology, and initiatives or programs in this regard may ultimately be consistent with the Cantwell amendment. But they are neither specifically assumed nor required.

Mr. LEVIN. Does the amendment assume the President to have the authority to provide other new authorities to the President?

Ms. CANTWELL. The Cantwell amendment establishes a national goal. As such, it directs the President to design and implement measures designed to help achieve the goal, and assumes that, if the President deems his existing authorities insufficient, he will propose to Congress legislation or recommendations that would help achieve the amendment’s energy security target. At that time, it would be up to Congress to consider the merits of the President’s proposals, via the typical legislative process.

Mr. LEVIN. Does the amendment assume that there are adequate “existing authorities” of Federal and state agencies to meet the goal of saving 7.64 million barrels of oil per day by 2025?

Ms. CANTWELL. The amendment assumes that the President has at his disposal adequate authority to develop and implement measures that will help achieve the goal of reducing imports on foreign oil. However, the amendment is technology-neutral and establishes a 20-year vision. As such, it is difficult to predict with any specificity what direction the administration may take, and whether issues may arise that require additional legislation or Congressional action. For example, if biofuels begin to displace a significantly larger portion of petroleum-based fuels in the United States, certain infrastructure-related barriers may arise that require additional authority or Congressional action. Similarly, there are certain to be issues associated with infrastructure, interoperability and international technology standards associated with the development of hydrogen fuel cells. Because the Cantwell amendment is a call to accelerate the development of alternatives to petroleum-based fuel, yet does not purport to choose technology winners and losers, it is premature to speculate on whether additional authorities or Congressional action may be required. However, it does assume that proposals to expand the range of tools available to the President to achieve the Cantwell amendment’s goals will be considered through the normal channels of Congressional debate and approval.

Mr. LEVIN. Does this amendment set a goal of reducing imported oil or reducing overall use of fossil fuel?

Ms. CANTWELL. The goal of this amendment is to reduce our foreign oil imports and exposure to the uncertainties of world oil markets. Because of the geologic realities of the way in which oil reserves are distributed throughout the world, increased demand for oil will result in a growing dependence on imports. While the U.S. is situated on just 3 percent of the world’s reserves, the Middle East is home to two-thirds, with a full quarter located in just one country, Saudi Arabia. In order to curb our growing reliance on imports, it is thus necessary to reduce demand for petroleum itself, across all sectors of the economy.

Mr. LEVIN. To achieve the one million barrels of oil a day in savings required by 2015, must the President use existing authorities, or can the President seek additional authority?

Ms. CANTWELL. There is nothing in this amendment that precludes the President from requesting additional legal authority to achieve the target for 2015. Certainly, any legislative proposal or recommendations from the President would be considered by Congress, through the typical legislative process. Rather, the provision in (c)(2)(B) is intended to make clear that this amendment, on its face, does not grant the President any broad, new additional authorities not previously contemplated.

Mr. LEVIN. If the President can seek additional authority to meet the requirement to save 1 million barrels of oil a day, would the President be willing to modify the amendment to make that clear?

Ms. CANTWELL. Yes.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I ask how much time remains on the Bingaman amendment.

The PRESIDING OFFICER. The Senator from New Mexico has just under 23 minutes. The majority side has 10 minutes 40 seconds.

AMENDMENT NO. 791

Mr. BINGAMAN. Mr. President, I will take part of the time remaining for me to respond to a few of the points made by my good friend from Tennessee and clarify the effect of this amendment as best we understand it. Contrary to what a person might believe by listening to a lot of the debate today, this is not an amendment just about windmills. This is an amendment about trying to stimulate the development of a range of technologies, solar technologies, biomass technologies, wind technologies, clearly, and get the cost of producing electricity from those different technologies down to a more reasonable level. That is the purpose of the legislation.

My good friend from Tennessee says that in his opinion, based on his understanding of the position the Energy Information Agency has taken, this would result in an increase in electricity rates, or electric rates. He reads their analysis and their recent report in a totally different way than I do. It is very clear this does not mean an increase in electricity rates. It causes a decrease. It is clear it does not cause an increase in gas prices. It causes a decrease. It is clear it does not cost the electric power sector more. It costs the other sectors of the economy rather than it otherwise would be spending.

Let me talk about this $18 billion he continues to refer to. It does say in
their report that from 2005 to 2025, the renewable portfolio standard has a cumulative total cost to the electric power sector of about $13 billion. Now, that is true. Then it goes down a couple of sentences further on. It says, the cumulative expenditures for natural gas and electricity by all end use sectors taken together will decrease by $22.6 billion. So what it is basically saying is if this amendment is adopted, which I hope very much it will be, there will, in fact, have to be more investment in the sector by the electric power generation companies, in these alternative fuel generation technologies, these alternative energy sources. But it will be more than offset by what they save in fossil fuels and what they save in investment in those other areas.

As far as rates are concerned, it is very clear in this language, and I will read this again. It says: “Compared to the reference case.” That means with the amendment—“The cumulative residential expenditures on electricity from 2005 to 2025 are $2.7 billion lower”—that is with the amendment—“while the cumulative residential expenditures on natural gas are $2.9 billion lower with the amendment.” Residential expenditures it is talking about. These are the rates payers that we all represent in our individual States. They are saying that, if this amendment is adopted, it is going to be cheaper for them to pay their electricity bills in the future because, frankly, this will take some of the pressure off the price of natural gas. That is very much to be desired.

Let me read further from their report. They say: “The increase in renewable generation”—which is contemplated by this amendment—“will lead to lower coal and natural gas generation. By 2025, coal generation is reduced by 5 percent, natural gas generation reduced by over 5 percent from their respective reference case levels.” That is from the level that it would be if we didn’t adopt this amendment.

So in my view, this is a very substantial improvement. This legislation, this amendment will be a substantial improvement to the underlying bill which I think is a very good bill. I do not disagree with anything the Senator from Tennessee says is let’s give an extra impetus to coal production. All of that is in the underlying bill. What this amendment says is let’s give an extra impetus to renewable power so that we can get all of the benefit from renewable power that it is reasonable for us to achieve over the next couple of decades.

That is the essence of the purpose of the amendment. I think that is what the effect of the amendment will be. We have had the good fortune of passing this amendment before in the Senate. I hope very much we can pass it again this time. It will strengthen the bill, it will persuade the American people that we are trying to move this country in a different direction, as far as its energy future is concerned.

We are not satisfied with saying that current technologies are adequate. We are not satisfied with saying the current mix of energy sources is adequate. We are trying to get back to more use of American ingenuity and creativity to produce energy that we do not have to import from somewhere else in the world.

I hope my colleagues will support this amendment. We will have a chance to summarize very briefly the reasons for the amendment. I will have a chance, and my colleague from Tennessee will have a chance, to argue the other side of that argument before we have the vote. As I understand our agreement now, the Senator from Washington is going to have an opportunity to summarize the merits of his amendment. That vote will occur, I believe, at 2:15. Then, after that, we will have the vote on this RPS amendment and in the underlying bill does because it is so important that we understand what the implications are for competition from alternative fuels.

I welcome that. I think it is about time that America make an investment in alternative fuels and about time we give consumers a choice when it comes to the demand and supply of oil in the future and not continue to be held hostage by foreign governments.

I would like to review for my colleagues what exactly the Cantwell amendment does because it is important that we understand what the underlying bill does and what our challenges are as a country going forward. In 1973, we were importing only 28 percent of our demand—our U.S. demand—for oil. We were importing 28 percent of what we used as a country.

Today, we are at 58 percent, a huge jump, a huge dependency by the United States on a foreign source to provide us an oil supply. If we look at the countries involved and I look at the instability in the Middle East, I don’t want to be 58 percent reliant on foreign sources of oil. I want American ingenuity to be a driver in what we can provide to the American people in driving down the cost of energy.

If we do nothing, in 2025, the United States will be importing 68 percent; nearly 70 percent of our oil supply will come from abroad. Who in their right mind thinks that 70 percent dependence on foreign oil is wise economically, to our national security, or internationally as we have to deal with international competition? Why would...
we want to be almost 70-percent reliant on foreign entities for something that is the backbone of our economy—energy?

I am offering a simple amendment. My amendment simply says by 2025, instead of relying on foreign sources for 68 percent of our supply, we bring that down to 56 percent. That is not much of a change. We are at 58 percent today, and we want to go down to 56 percent. That is a modest goal.

It is hard because our amendment assumes the growth and demand that will happen as our Nation grows. That is why we have to assume in 2025 we will be at 68 percent, and we want to see a serious reduction. That is the way my amendment is crafted.

The underlying bill says we are currently at 58 percent and let's reduce our consumption of foreign oil by 1 million barrels a day. One million barrels a day by 2015 still has us importing 60 percent of our oil supply from foreign sources. In 2015, instead of consuming 58 percent of our oil supply from foreign sources, we would be at 60 percent. The underlying bill says we are currently at 58 percent and let's reduce our consumption of foreign oil by 1 million barrels a day. One million barrels a day by 2015 still has us importing 60 percent of our oil supply from foreign sources. In 2015, instead of consuming 58 percent of our oil supply from foreign sources, we would be at 60 percent.

The underlying goal in the bill does nothing to get us off our overreliance on foreign oil. It is the status quo and a burden. It is too timid in responding to what has been a gouging of the American consumer on gas prices.

This debate we have just had for the last couple of hours is interesting because, as we all know, and my colleagues have said, they refuse to support a mandate. They do not want to have a mandate in this bill. I am not proposing a mandate. It is interesting: Some Members do not support mandates. They do not even support goals. The American people deserve, on something as important as our national security and economic livelihood, to have this Senate, in transportation and energy policy, set a goal to get off our overreliance on foreign oil. Are my colleagues just going to continue to put an energy goal in legislation that makes us more dependent on foreign oil than we are today?

I have pointed out that the goals we have are doable. My amendment does not say specifically how or what the mandate is. We have simply said, that from various studies, we know we can get the savings my amendment calls for in a goal. Here are a variety of studies, we know we can achieve because just giving lip service to this idea of a goal of getting off overreliance on foreign oil? Or are we willing to set a goal and do something about it?

I ask my colleagues, if you do not want mandates and you do not want goals and you do not want to get off our overreliance on foreign oil by setting a milestone or coming up with a goal or statement, what is it that you want? What is in the underlying bill in 2015 that is going to do that? Is it a tax on it so that it is on a more level playing field with what sugar-based ethanol in the United States costs. To me, the Brazilians have come up with something.

Mr. DURBIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURBIN. Mr. President, I am sure many people have been following closely the debate on the Energy bill, an 800-page bill that is trying to set the energy policy for America. It is an important piece of legislation we have debated for several years. It has so many different sections involved in all the aspects of energy. It has as its goal making certain that America has enough energy to fuel its economy, making certain that we use that energy in a responsible fashion so it does not create pollution that would cause environmental harm. These are some of the basic elements of what we are trying to achieve here.

But the pending amendment we have before us comes to a basic conclusion that I think most Americans agree with. America cannot be a safer and more secure nation in the future if we are more dependent on foreign oil. The more we have to depend on Saudi Arabia and Kuwait and other countries to send their oil to us, the less secure we are. The more independent we are in terms of our own energy needs and production, the stronger we are as a nation.

In 1973, we imported 28 percent of the oil we consumed. Today, 32 years later, we are importing 58 percent, more than double. We are that much more dependent on foreign countries to provide us with oil, which means two obvious things. If the OPEC cartel should decide they want to restrict the oil they will produce, prices will go up in the United States. Reduce the supply, and the price goes up. It is a basic law of economics. And they have done it. You have seen it at the gas pump.

When the OPEC cartel sits down and tries to figure out "how can we make the maximum profit?" they do not shed tears for American families and consumers and businesses. They try to figure out how they can make the maximum profit on the oil they have in the ground. They have the vast majority of the oil resources in the world today.

The second thing we know is that if you want to keep oil prices low in the American economy, you may consider attacking the United States, but it may be a lot simpler to attack our oil supplies coming into the United States. If, God forbid, they could interrupt those oil supplies coming into the United States, it would really create a dangerous situation.

So the more dependent we are on that foreign oil, the less secure we are when it comes to the price of energy and the availability of energy. You would think that one of the things we would try to do as part of a national energy policy is to think ahead 10 years, 20 years, "How can we reduce our dependence on foreign oil?" since most people agree that would be a good thing.

Well, there is one provision in the bill which suggests that over the next 10 years we would reduce our demand for foreign oil by 1 million barrels a day.

That is about 6 or 7 percent of the total amount that is being consumed each day in the United States, but it is a step forward over the last 30 years. It is something the Senate agreed on 99 to 1. So over 10 years we will think of strategies which will reduce our dependence on foreign oil at least a million barrels a day. That is in the bill. It is a good provision.

Two days ago, President Bush sent a letter to us and said: You keep that provision in the bill, and I will veto the bill. Stop and think: Why? Why wouldn't the President want us to use imported oil? If we do not reduce our dependence on foreign oil? It makes no sense. It is a tax on our economy. It is a question of national security. But, in fact, that is what the White House said. If you put a provision in here to reduce our dependence on foreign oil by 1 million barrels a day over the next 10 years, I will veto the bill.

I don't understand. In fact, I think the President has it exactly wrong. We should be even more ambitious and more innovative in our view toward this challenge.

Senator CANTWELL has an amendment now pending that will be voted on soon. Her amendment says: Keep to that goal over the next 10 years, but over 20 years, let us reduce our dependence on foreign oil by 40 percent of what we anticipate. So what does it mean? Fifty-eight percent of the oil we used in 20 years, it will be 68 percent. More than two-thirds of the oil we use will come from overseas. If we adopt the Cantwell amendment, it will go down to 56 percent of the oil we use in 20 years being imported. It is still a lot. It is still a lot in mind, the economy is going to grow. Energy needs are going to grow. We are going to find ways to work together to reduce dependence on foreign oil.

I would think most families and people who think about our environment and think about our economy would applaud the idea of setting this as a national goal, a challenge to the President, to Congress, and to the American people. Find ways to reduce our dependence on foreign oil. It will make us stronger as a nation. It will make our economy stronger. Instead of sending billions of dollars overseas to the Saudi oil princes, the money comes into the United States, to get in our own economy, building businesses, helping people prosper and create jobs.

Sadly, there is resistance to this amendment, the idea of setting this goal. There are those who say: Don't set such goals. Leave it alone. Don't touch it.

How could you possibly draw that conclusion from the current situation?
Left untouched, we will continue to be dependent on foreign oil and our economy will suffer.

How do you reach a goal of reducing dependence on foreign oil by 40 percent over the next 20 years? There is a variety of ways to do this. One of the ways in this bill to do it—some large, some small. Some have to do with the most basic thing, the tires on our automobiles. Replacement tires give more fuel efficiency and reduce the oil consumption and dependence on foreign oil. Are the tires on these trucks—have you ever gone by a truck stop? They are all over my State of Illinois. There are lines and lines of these tractors with trailers behind them with the engines running constantly, around the clock, idling engines burning up oil just to keep that engine alive and ready to perform when the driver comes out and is ready to go. There is a provision in this bill that talks about smarter ways to do that. Is there a way to use an electric engine to keep that tractor in a position where it can go into service and not be burning all this fuel while the driver is in eating dinner, for example?

These are simple things which, when added up over the course of our economy, can make a difference. There are many ways to address this. They come down to three basic things we can do. First is conservation. I just gave you two examples of conservation, the ways to reduce the use of energy and water, much performance in the way we want from the vehicles we use and the vehicles we drive. The second is alternative fuels. What can we use instead of the oil that now is being imported, 58 percent of it from overseas? This bill talks about it. It talks about ethanol. What is ethanol? An alcohol fuel is made from things such as corn and cellulose that can, in fact, create more independence in our economy.

Senator CANTWELL tells the story that a long time, 10 or 15 years ago, imported 80 percent of its oil and said as a nation: We can’t continue to prosper if we are so dependent on imported oil. They set out on a national goal of reducing dependence on foreign oil. They are now down to 11 percent. They have done it. They are choosing alternative fuels. That is included in this bill, the concept of alcohol fuels. It can be done. So alternative fuels—ethanol, biodiesel—are practical alternatives to importing more oil.

The third, of course, is to find environmentally responsible ways for more exploration. There is a limit to where that will take us. The United States owns about 3 percent of the known oil resources in the world. We consume 25 percent of all the oil in the world, and 80 percent of that is consumed each day. So even if we were able in an environmentally responsible way to take every drop of oil out of the ground, you could see it is not going to sustain our economy. We are going to be dependent on foreign sources. Despite this challenge and despite the obvious ways to meet it in this bill, there are some who have come to the floor—and on the other side of the aisle, particularly—and have argued against setting this goal of lessening our over-reliance on foreign oil. One of the arguments they make is: If you do this, you are going to have to have more fuel-efficient cars and trucks, as if that is something that can only be done in America. Why would we avoid that?

Take a look at Ford Motor Company. They had a huge advertising drive to tell us about their new Ford Escape hybrid. You have heard of this Ford hybrid, 30 or 50 or 100,000 made, they are trying to sell. Is that car, they couldn’t make it fast enough. I think Ford produced about 20,000. There were some 50,000 people who wanted to buy it. They liked the idea, a small SUV that has an electric engine as part of it that is going to get better gas mileage. Ford was moving in the right direction. I know about this because my wife and I decided to buy one. We like it. I wish it got better mileage than it does, but we didn’t make any great sacrifice in our way of life. We have done it. We’ve spent a couple thousand dollars to buy it. Yet we have a more environmentally responsible, energy-responsible vehicle.

The other side of the aisle argues we shouldn’t even suggest to American consumers to change their buying habits. I will bet if Detroit or any other company started producing more and more energy-efficient vehicles, more and more Americans would be interested, not only because it reduces the cost at the gas station, but because it is good for the environment. Why wouldn’t you want to do that? Why would you want to knowingly drive something that is more polluting and uses more energy or more gasoline?

The American consumers would, in fact, gravitate toward those automobiles as they did toward the Ford Escape hybrid. They like the idea. It is a good concept. The other side says: You don’t want to tell people they have to go out and buy that. If they want to buy the heaviest, least fuel-efficient SUVs, you can’t stand in their way. I suppose that is true, but we will pay a price for it. By buying and driving inefficient vehicles over and over, it not only costs more at the pump and makes our country more dependent, it draws us into the Middle Eastern problems. Witness 150,000 American soldiers now risking their lives today in that part of the world.

The cost of aviation fuel has gone up so substantially that airlines really that planes is a good thing economically. It is certainly a good thing from a security viewpoint. It is a good thing in terms of our future as a nation.

I believe we are up to the challenge. Most of the critics of the Cantwell amendment say it just can’t be done. Don’t challenge America. America can’t rise to the challenge. We can’t possibly in 20 years figure out a way to do this. Those naysayers have no place in the American tradition. We have done it before. We can do it again. When President Franklin Roosevelt needed an atomic bomb to end World War II, he created the Manhattan project and got the job done. When John Kennedy came to the Presidency in 1960, he said: We will put a man on the Moon. And in 9 years, it happened. He challenged America, and we rose to the challenge. We can rise to the challenge, and we must. Otherwise, we will continue to be dependent on foreign sources of oil.

When I consider some of the challenges we face, I see a loss of jobs. It troubles me. In the State of Illinois, 150,000 manufacturing jobs in the last several years have been lost. I don’t know if these jobs are ever coming back. I have been to Galesburg and places around our State where good-paying jobs have disappeared. A lot of them have gone to China. China has one of the fastest growing economies in the world.

We just had a little presentation in the other room. The CEO of General Electric Energy was there. He said China is in a position to dominate the world energy scene in the next 30 years, that in 10 years China will have 30 percent of the electric generating capacity in the world. China’s economy is no longer a closed, backward, Communist economy. It is an exploding, expanding economy. And whatever it is that is taking jobs away from the United States.

There are two things we ought to think about: The Chinese have fuel efficiency standards for their vehicles higher than the United States. They know they don’t have the energy in their own country. They are trying to find the most fuel-efficient vehicles to move their economy forward and they are thinking about the future. Are we? Is the United States thinking about the future and the cost of fuel inefficiency, or the cost of dependence upon foreign oil?

The second point is this. If we are in a position of competing with China for foreign oil, since they have to import it, we have to ask ourselves what is more competition for a limited supply? The price goes up. So $50 a barrel oil today may be $100 a barrel 5 or 10 years from now. Look at what $50 a barrel oil has meant to you and your family and our economy. Filled up lately? Taken a look at what it costs? It has gone up dramatically in a short period of time to fill your car or truck. Talk about the airlines and their future lately? The cost of aviation fuel has gone up so much that what was once a way to travel is now a way to go in bankruptcy, or facing it. That is at $50 a barrel. What happens when we reach $100 a barrel? What will it mean to the future of these same companies?

If we don’t take a serious look at our energy future, sadly, we are going to leave ourselves vulnerable to competition from China, with higher costs for the basics to keep moving. Senator CANTWELL’s amendment is a challenge, but one we should accept. As this President ends his term in office, another President will be selected. Whatever party will come in and see the same national goal: Reduce our dependence on foreign oil. It will call for work and
dedication. We have risen to that challenge time and time again. There is no reason we cannot rise to it today.

I impress upon my colleagues the absolute necessity to reduce America's dependence on foreign oil. This is not an argument we have absent-mindedly dismissed in favor of this or that. It is something we must do. It is imperative we impress upon America that setting a national goal of reducing our dependence upon foreign oil is a national priority and in the best interests of the American people. I believe when we send a message abroad and there are serious about changing the future and the track we are on, people will join us in that effort. The best and brightest minds in our country will rise to the challenge.

When we go back to our States and constituents and they ask what we have done in Washington to address the growing threat to our oil supply posed by the emerging markets in China and India, and the high gasoline prices, we can take pride in the fact that the Cantwell amendment is helping to clear it up and show the rest of the world that America is charting a new course for our Nation's future. Opponents have argued we cannot do it, we don't have the smarts or the technology; they weep, they curse and do nothing. I disagree. There is technology available today, let alone advancements that may come over the next 20 years, that will reduce our dependence on foreign oil. We, as leaders in this country, must signal that we won't let the future of America fall into the hands of foreign governments that own the oil supply of this world. Many of these governments are politically unstable and they don't promote the same values we do in the United States. The uncertainty of that alliance for our future oil should be enough to give us pause.

Security experts, economists, foreign policy analysts, scientists know the terrorist organizations want to target the United States, that they can target the supply of our energy and threaten our economy. This is an amendment about national security, economic security, and the belief that America, with the right leadership and vision, will rise to the challenge, as we have so often done in the past.

We can use American ingenuity, innovation, and genius to reduce the growing strangehold the foreign governments that are supplying oil to the United States have on America's future. I encourage colleagues on both sides to embrace this challenge. Don't run from it, don't be afraid of it. It is about the future of our country.

I yield the floor to the PRESIDING OFFICER (Mr. Alexander). The Senator from North Carolina is recognized.

Mr. BURR. Mr. President, I am glad I stayed on the floor because I was a little concerned we didn't hear Senator CANTWELL describe her amendment. Senator DURBIN helped to clear it up for me in the fact that if we cut trucks off at the truckstop and if all the American people take the tires that are on their car now and we change those to new tires, we can eliminate a million barrels of oil. It is incredibly easy. It is unreal, but if you hear people say that, it's possible as something that is easy to accomplish.

I rise in opposition to the Senator's amendment because I believe one of the responsibilities we have as Members of the Senate is to, in fact, pass legislation that is reasonable for the American people, legislation that is technologically possible to achieve—even if we stretch technology and we push technology, and even if we were to create a "Manhattan Energy project." The reality is that some of the individual who find in this chamber and claim this is easily achievable are the same ones who for the last decade have blocked domestic exploration, which is crucial to less reliance on foreign oil. I believe every American agrees with me that we want to become less reliant on imported oil, but it is not just for national security. It is for job security. When we talk about policies on this floor that affect the cost of manufacturers, we are not talking about the jobs our constituents have, about the manufacturers who used to compete domestically within North Carolina or within the South- east, or within this country, and now compete with our rates, we meet. Of this year's group of graduates from college, 20 percent of them will compete for a job with someone they will never meet and who will never live in this country because technology allows us to do it. It will be incredible when technology gets to that point, that it won't take government pushing it and saying implement it; it will implement itself because it brings efficiencies and savings to the marketplace.

I think, as the occupant of the chair does, as we have gone through the creation of this energy bill, we have pushed technology and we have brought those minds into the committee in a bipartisan way and said: "Tell us where this can go over the next decade." We have truly tried in this legislation to create a blueprint for the American people and for the American economy, one that makes sense, one that will be technologically possible and how it will affect our competitive- ness in this country and internationally. At the end of the day, if we do anything that forces American business to be at a competitive disadvan- tage, we have done a disservice to the American worker, who is the recipient of that business.

We need to vote against the Cantwell amendment. We need to tell the American people we have an energy policy. And if we believe that policy will lead us down the road to new technologies this year, next year, 10 years from now, it may be that 20 years from now we are all driving hybrid cars. I happen to believe that technology will make the hybrid car, 20 years from now, probably obsolete; there will be a new technology out there. But I am confident of one thing: You cannot push the mileage standards of automobiles further than where technology will allow; that is where we are placing the bar. Don't try to reach a little too far, cause, in fact, an unintended consequence on the other side.

We will also have an opportunity to vote on Senator BINGAMAN's amendment on a renewable portfolio standard. I know the Senator from New Mexico is passionate about it.

I want to correct something that Senator CANTWELL said. She said—and she is from Washington—that hydro- electric power makes up a majority of their electricity generation today, and she is right. The unfortunate thing is, hydroelectric power is not considered a renewable source of electricity unless it is new hydro. It's incredible, the history we have in this country of hydroelectric generation, but we do not consider that to be a "renewable source of electricity." The only way hydro would qualify under a renewable portfolio standard is if it is new hydro.

For those of us in the Southeast of the United States who for years have used electricity generated by hydro plants to compliment our coal-fired generation facilities or our nuclear facilities, we have understood for some time what made up a portfolio, and we assumed part of it was made up of what we considered to be renewable-hydroelectric power.

At 50 years old and now in my 11th year in Congress, I am reminded that hydroelectric power is not renewable, that water is not a renewable sub- stance. It is crazy it is not included. If we did include hydroelectric generation, North Carolina would in all likelihood hit the 10 percent mandate required in this amendment. I believe the Pre- siding Officer would hit the 10 percent possibly in Tennessee today. But the reality is we are being asked to accept a renewable portfolio standard that does not even include the generation of electricity with hydro. It does not re- quire that rural electric cooperatives that generate electricity participate in the renewable portfolio. We are asking our electric co-ops account for a sizeable amount of the electricity generated in this country on an annual basis, but they are not included. We just want to place it on the backs of the ratepayers of investor-owned utilities.

I support our amendment to a State that is rich with investor-owned utilities, but it is rich in electric co-ops and municipal power, probably richer than any State in the country. I defend them, but I do not believe if we put a burden like this on our ratepayers of the investor-owned utilities that we should leave anybody out and say they should be unaffected.
The fact is, what they have tried to do is put the cost of the renewable portfolio standard on the backs of one slice of electric generation, and that is the ratepayers of investor-owned utilities. They know if it extended to electric co-ops, there would be no way for this amendment to pass. There would be opposition on both sides of the aisle, on every level of our desks to this amendment.

The fact is, today we are here because we need to defeat the Bingaman amendment, a renewable portfolio standard, but we also need to defeat the Cantwell amendment. She said it is not a mandate but a goal, a goal that we cannot achieve today based upon available technology and one we ought not put into this bill, in fact, because it is unachievable.

I thank the Presiding Officer, and I yield the floor.

Mr. OBAMA. Mr. President, I rise today in support of the amendment offered from Washington, and Ms. CANTWELL. I am proud to be submitting this amendment.

Forty-four years ago, John F. Kennedy challenged America to put a man on the moon by the end of the 1960s. A bipartisan coalition in Congress joined with Presidents Kennedy, Johnson, and Nixon to make this a reality.

Today, we are considering a similarly bold challenge to the Nation—to reduce America’s dependence on foreign oil by 40 percent by 2025. This is not less important, no less laudable, and no less worthy of bipartisan support, Presidential leadership, and national commitment.

The bill before us purports to offer a comprehensive energy solution for the future. But, as currently drafted, the bill does nothing more than lead us down the same dangerous and unsustainable path that we have been traveling for the last several decades. Unless we reverse course, we will continue putting our economic well-being and national security at the mercy of unstable foreign governments.

Some will argue that the goals and standards set in the amendment are unrealistic and unattainable. I do not agree with these naysayers. When President Kennedy announced his challenge in 1961, he said the following: “This decision demands a major national commitment of scientific and technical manpower, material and facilities each year. This will require the total mobilization of their diversion from other important activities where they are already thinly spread. It means a degree of dedication, organization and discipline which have not always characterized our research and development efforts.”

Likewise, meeting the requirements of the Senator’s amendment will require a similar commitment. But I believe the task before us is much simpler than the one that faced President Kennedy, because we already know how to decrease our reliance on foreign oil. A smart energy policy that focuses on a greater commitment to technology, including hybrid and hydrogen fuel cell technologies, renewable energy and greater efficiency can take us a long way, if not the entire way, to the goal proposed by the Senator from Washington.

As difficult as it may be, we must try to meet the goal set forth in this amendment. Otherwise off-shore oil will cast us as a country if we just threw up our hands and admitted defeat.

The people I meet on my travels around Illinois are ready for the challenge. They are tired of giving their hard-earned dollars to foreign governments in the form of record-high gasoline prices. They are tired of seeing their foreign policy being influenced by America’s insatiable need for Middle East oil. They are looking to their leaders for innovative, bipartisan leadership. If we lay down the challenge in this amendment, I have every reason to believe that the American people will rise up to meet it—much like they met a similar challenge 40 years ago.

In 1962, President Kennedy traveled to Rice University to speak about the challenge that he had laid down the year before. He stated: “Surely the opening vistas of space promise high returns as high as the reward. So it is not surprising that some would have us stay where we are a little longer, to rest, to wait. But this city of Houston, this State of Texas, this country of the U.S. was not built to rest, to wait. But this country of the U.S. was not built by those who waited and rested and wished to look behind them.”

When it comes to our energy policy, we are long past the point of waiting and resting and looking behind us. I urge my colleagues to support the amendment offered by the Senator from Washington.

Mr. BAUCUS. Mr. President, I would like to briefly explain why I support Senator CANTWELL’s oil savings amendment to H.R. 6, the Energy bill. First, Senator CANTWELL’s amendment sets a goal for the United States of reducing our dependence on foreign sources of oil by 4 percent by 2025. I do not understand how anyone could argue that it is not in this Nation’s best interests to advance energy security and reduce our dependence on unreliable and undemocratic regimes abroad. We all like to talk about energy independence, but our efforts in that direction are lacking, as evidenced by the rapid growth in our dependence on oil imports that is projected to continue well into the future.

I think Senator CANTWELL’s amendment sets a worthy target that we can all work together to achieve.

Second, we have not always been the greatest economy to certainly achieve this goal in a way that not only reduces our reliance on foreign oil but spurs new innovation and economic growth, without penalizing any sector of our economy. This amendment is not a backdoor effort to dramatically increase Corporate Average Fuel Economy standards, which I would not support. As modified it allows the President the flexibility to achieve the oil savings through a variety of means, including increased investments and incentives for hybrid vehicles, other advanced technologies or increased use of biofuels like ethanol and biodiesel.

Additionally, if the President is having difficulty reaching the goal, he or she need only reduce our dependence on foreign oil to the maximum extent practicable, and must ensure reliable and affordable energy for the country, and maintain a healthy economy with strong job growth.

This is a fair and sensible amendment that I support.

Mr. LEVIN. Mr. President, I support the goals for reducing this Nation’s dependence on foreign oil that are embodied in the Cantwell amendment. We need to strive for energy independence, and I believe it is time to take bold steps toward reducing our oil consumption. Our policies have long ignored the problem of U.S. dependence on foreign oil, and we remain as vulnerable to oil supply disruptions today as we have been for decades. Taking the steps necessary to reduce our dependence on foreign oil is a critical objective for this country.

I have long supported a broad array of Federal efforts to meet this objective. I believe that we need a long-term, comprehensive energy plan, and I have supported initiatives that will increase our domestic energy supplies in a responsible manner and provide consumers with affordable and reliable energy. What is more is included in this bill that will help take important steps in this direction—particularly those provisions of this bill that address energy efficiency and renewable energy and will lead us toward greater uses of alternative fuels such as ethanol and biodiesel.

I have also long advocated Federal efforts that will lead to revolutionary breakthroughs in automotive technology. As many of my colleagues have said, we need a level playing field. This is similar to the effort of a previous generation to put a man on the moon. I believe we need our own moon shot in the area of automotive technology to develop alternatives to petroleum and to make more efficient use of all forms of energy.

We need a significantly larger effort than anything on the drawing boards. We need to put greater Federal resources into work on breakthrough technologies such as hybrid vehicles, advanced batteries, advanced clean diesel, and fuel cells—that will provide potentially dramatic increases in vehicle fuel economy and help us...
move toward making this Nation less dependent on foreign oil and reducing our emissions of greenhouse gases.

Federal Government investment is also essential not only in research and development but as a mechanism to push the market and acceptance of advanced technologies. For example, expanding the requirements for the Federal Government to purchase advanced technology vehicles will help provide a market for advanced technologies. We also must have far greater tax incentives for advanced technologies than have been proposed to date.

I believe the goals for reducing our dependence on foreign oil in the Cantwell amendment can be met by taking bold actions in the areas I have mentioned and without relying on increases in Corporate Average Fuel Economy standards. Higher CAFE standards will not produce real results—they will only exacerbate the inherent features of the CAFE system that give an unfair competitive advantage to foreign auto manufacturers and have contributed to the loss of manufacturing jobs in this country. Senator CANTWELL and the sponsors of this amendment have pressured the Senate and her amendment was modified so that there are no policy assumptions in this amendment that will increase CAFE standards. The goals of this amendment are laudable, and some of them, such as fuel efficiency after the modification can be achieved with new authorities, tax incentives for instance, and do not rely on use of existing authorities—I can now support the amendment.

Mr. MCCAIN. Mr. President, I strongly support the objective of Senator CANTWELL’s amendment. It is difficult to disagree with legislation that proposes to achieve the important goal of reducing our dependence on foreign oil. Unfortunately, the amendment is an exercise in setting expectations without establishing how they will be met. As such, I cannot support it.

Mr. REID. Mr. President, I strongly believe we must be more proactive in reducing our dependence on foreign oil, and Senator CANTWELL’s amendment is a great start to accomplishing that goal. The current path we are on is detrimental to numerous facets of our economy, environment and national security. This is due to the ongoing instability in the Middle East, which is where the vast majority of our oil comes from, and coupled with the environmental problems associated with the use of fossil fuels. At present, petroleum imports account for fully one-half of our national oil use and one-third of our trade deficit. In addition, the use of oil and other fossil fuels contributes to global climate change, air pollution, and acid rain.

In order to achieve this ambitious plan we will have to implement many comprehensive energy saving policies. Many people believe this amendment down the road could raise fuel efficiency standards on automobiles. There are many energy policies we need to pursue this ambitious goal. In the past I have not supported raising CAFE standards and I do not believe this amendment would require such a change. In order to make this plan successful we need to support development of alternative energy, such as ethanol, hybrid vehicle technology and others.

I have long believed that our Nation must implement a sensible national energy policy which emphasizes greater energy conservation and efficiency, as well as the development of renewable resources. Simply put, we cannot continue to rely on imported oil to meet such a large part of our Nation’s energy needs and that is why I support Senator CANTWELL’s amendment to the energy bill.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DODD. I thank the Chair. (The remarks of Mr. Dodd are printed in today’s RECORD under “Morning Business.”)

The PRESIDING OFFICER. All remaining time is controlled by the majority.

Mr. DODD. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McC. Mr. President, I will use leader time or, if no one is going to use their time, I will just use whatever is available.

The PRESIDING OFFICER. The Senator may proceed.

Mr. McC. If someone from the majority wants to speak, I will be happy to provide the overview for a few minutes for whatever few minutes I may have.

I first want to thank Senator BINGAMAN for his leadership on the renewable energy issue. He has always been there. It is also important to mention Senator Jeffords. Senator Jeffords has been so stalwart. I remember an Energy and Water bill that Senator DOMENICI and I did in years past. We did not put enough renewable in there and Senator Jeffords brought amendments to the floor and fought us on this on the Senate floor. He has been a stalwart.

In this particular instance, the leader has been Senator BINGAMAN, and I appreciate very much the work he has done.

There is no question in my mind that we must harness the brilliance of the Sun, the strength of the wind, and the heat of the Earth to provide renewable energy for our Nation. There are many reasons our Nation needs to develop more renewable energy. It can power our homes and businesses without polluting the air we breathe or the water we drink. Renewable energy will protect consumers from wild price swings by providing steady, reliable sources of energy. There is a reason we call the famous geothermal geyser Old Faithful, and that is because renewable energy is as old as the wind, as durable as the Sun, and as constant as the Earth.

Renewable energy will bolster our national security because it is made in the USA. The supply cannot be manipulated by any foreign power. Scientists have said, for example, the Nevada Test Site where we have detonated about 1,000 nuclear weapons, one could put a nuclear power that would supply the whole Nation with electricity.

We do not have that, of course. We have no solar energy at the Nevada...
Test Site, but it is an example of what can be done.

Finally, renewable energy creates jobs, often in rural areas that need them the most. Nevada is a perfect example. Most of our geothermal energy is in rural Nevada. The steam has been coming from the ground in those places since man started coming there. When the pioneers came across Nevada, one of the places they would come after leaving the area that is now Utah is this dry, barren desert. The best thing they would see is water in a place near Gerlach, NV. The first few pioneers, immigrants, and their animals went into that water. They did not do that very often. They could not do it because it would kill them. It was boiling water. As thirsty as they were, they would have to siphon the water down and cool it.

It is still there, the same hot water, the same steam coming from areas around Gerlach. There is tremendous potential for renewable energy. In 2002 and 2003, the Senate passed the renewable energy electricity standard requiring that 10 percent of the electricity sold by utilities be generated from renewable energy sources. We should do no less this year. It would be even better if we could match our friends in Europe and achieve 20 percent.

Other nations have been developing renewable energy resources at a much faster rate than the United States. In 1960, Nevada produced 90 percent of the world’s wind power. Today, it is less than 25 percent. Germany now has the lead in wind energy; Japan in solar energy. We have an opportunity to regain the position as a world leader in renewable energy. In the United States today we get about 2 percent of our electricity from renewable energy sources, such as wind, solar, geothermal, and biomass. That is a paltry sum. The potential is there for a much greater supply.

The renewable electricity standard and the production tax credit are critical to growth of renewable energy in America. The State of Nevada is blessed with enough geothermal energy to generate one-third of the needs of Nevada today, but geothermal supply is only about 2 percent of our power. I am happy that Nevada has adopted one of the most aggressive renewable portfolio standards in the Nation. We set a goal of generating 15 percent of our electric power with renewable energy by the year 2013. Our legislature is to be commended. They did that 2 years ago.

Developing these resources will protect our environment, will help consumers, and will create jobs in our State. Nevada cannot meet its renewable energy goal of 15 percent by 2013, then the Nation certainly should be able to meet a goal of 10 percent by 2020.

Many States are blessed with abundant supplies of renewable energy resources. Twenty-one States have already adopted renewable electricity standards. If we consider environ-

mental and health effects, the real costs of energy become more apparent, and we see the renewable energy is a winner. A national renewable electricity standard by 2020 will also spur nearly $80 billion in new capital investment and $5 billion in new property taxes revenues to communities.

Let’s never lose sight of the fact that renewable energy sources are domestic sources of energy and using them instead of foreign sources contributes to our energy security. The best thing we would see is water in a place near Gerlach, NV. If we consider environmental standards. If we consider environ-

ment and health effects, the real costs of energy become more apparent, and we see the renewable energy is a winner. A national renewable electricity standard by 2020 will also spur nearly $80 billion in new capital investment and $5 billion in new property taxes revenues to communities.

The amendment (No. 791) was agreed to.

Mr. DORGAN. I move to reconsider the vote, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Parliamentary inquiry, Mr. President. Are we, under regular order, scheduled to move on to another amendment?

The PRESIDING OFFICER. There is no amendment pending at this time.

Mr. DOMENICI. Mr. President, I understand the distinguished Senator from Georgia would like to engage in a colloquy with myself, the distinguished Senator from New Mexico.

Mr. CHAMBLISS. Mr. President, I yield back to the Senator from Georgia and the Senator from Oregon. The Senator from Georgia does have a comment relative to this issue, and I yield to the Senator from Oregon.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. CHAMBLISS. Mr. President, I rise in hope that the chairman of the Energy and Natural Resources Committee, the Senator from New Mexico, will engage in a colloquy with myself, as well as Senator SMITH of Oregon, regarding some concerns we have about the renewable portfolio standard amendment.

While I support the development of renewable energy and other clean energy resources, I believe that each region of the country has the ability to develop these resources in a variety of ways. In fact, at least 21 States already have a State RPS, and many other States have programs to promote renewable energy, all of this being accomplished without a Federal mandate.

The problem with the RPS amendment is that it imposes a one-size-fits-all mandate on the whole country without regard for whether the requirement is technologically or economically feasible. Not every State or region has the same amount of renewable energy available to comply with the rigid 10-percent RPS mandate the amendment would impose. As a result, utilities in States that do not have enough renewable energy will need to comply with the RPS mandate by purchasing credits at a cost of 1½ cents per kilowatt hour. Mr. President, 1½ cents may not sound like a lot of money, but when it is multiplied by the number of kilowatts needed to comply with a 10-percent RPS by 2020, it can add up to billions of dollars—billions of dollars in what should be called a tax on consumers. I call it a tax because that is essentially what it is. It is dollars that will come out of the pockets of consumers and go straight to the Federal Government. That makes no sense at all.

If the Government wants more renewable energy, it does not make sense to take billions of dollars away from consumers in a region simply because they do not have access to adequate renewable resources at a reasonable cost. If there must be an RPS provision in this Energy bill—and I do not believe it is necessary—it must, at a minimum, allow more flexibility for each State and region.

I ask that the distinguished chairman commit to work with me in the conference to modify the provision to allow greater flexibility and to protect consumers from unnecessary cost increases. In particular, I ask that we work together to address the regional issues inherent in any such provision and ensure that States that do not have the technological capabilities to comply with the RPS mandate are not penalized. I note that even many supporters of a Federal RPS mandate recognize the need for State-by-State flexibility.

The Senator from Oregon does have a comment relative to this issue, and I yield to the Senator from Oregon.

Mr. CHAMBLISS. Mr. President, I thank the chairman for his comments, and I look forward to working with him.

Mr. DOMENICI. I yield the floor.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. AKAKA. Mr. President, I rise today with a profound sense of optimism and appreciation. We have not enacted a comprehensive energy bill since 1992. Many programs need reauthorization and many need revision. Programs and demonstrations must be updated to today's and tomorrow's energy parameters.

I have long said that the Nation needs a comprehensive blueprint for an energy policy that will take us in advanced directions, away from dependence on declining reserves of fossil fuel and foreign sources of oil. We need a policy which will reconcile growth and energy conservation in our transportation, manufacturing, utility, and consumer sectors across the Nation. We need to bring down the high costs of electricity and gasoline for the country, particularly in my State of Hawaii, and pursue greater energy independence from petroleum products.

S. 10, the Energy Policy Act of 2005, provides the best opportunity that I have seen in years. As a senior member of the Senate Committee on Energy and Natural Resources, I am familiar with cutting-edge technologies and approaches to generating energy. I was closely involved in crafting several parts of this energy bill—legislation that contains three bills that I have introduced, and a hydrogen title that was crafted with the leadership of Senators DORGAN, GRAHAM, and myself as members of the Senate Hydrogen and Fuel Cell Caucus. I have contributed to the comprehensive energy bills in 2001 and in 2005.

I wish to thank both Senators from New Mexico for their leadership and hard work in bridging many regional
differences in this comprehensive bill, while still keeping in mind the overall vision for an energy bill. The Energy Committee, under the leadership of Senators DOMENICI and BINGAMAN, held a series of structured hearings that were well attended by a broad spectrum of industry, environmental groups, non-profits, and small businesses. Senator DOMENICI and Senator BINGAMAN are to be commended for keeping an open mind about the potential for new energy sources and the balance of renewable and fossil fuels, science and research and development. In sum, this is a balanced energy bill.

The energy policies that we address in this legislation cover a vast range of authorities and a patchwork of unry regional alliances. This translates to an enormous challenge, and I appreciate Senator DOMENICI and Senator BINGAMAN’s hard work and the work of their staffs. I want to compliment them on crafting an energy bill that will have a broad impact on the States with special “off-grid” energy needs such as Alaska, my state of Hawaii, and insular territories and commonwealths.

I support this bill and voted for it in our Committee. The bill is well-balanced between renewable energy production, energy efficiency provisions, oil and gas technologies, electricity provisions, and alternate and visionary sources of energy such as hydrogen. The bill addresses the Nation’s Research and Development for energy technologies, something that we must continue doing to remain leaders in the world, as global demand for energy increases. The last title of the bill, Title Fourteen, provides much-needed incentives for innovative technologies, through loan guarantees for new energy facilities and projects.

I greatly appreciate the inclusion of title VIII, the Hydrogen title, I am an original co-sponsor of S. 665, the Hydrogen and Fuel Cell Technology Act of 2005, and worked with Senators DORGAN, GRAHAM, and other members of the Hydrogen Caucus to craft this bill, which is included in S. 10. The bill reauthorizes and amends the Spark M. Matsunaga Hydrogen Research, Development, and Demonstration Act of 1990, which has been the basic authority for Federal hydrogen programs for the last 20 years. Reauthorization of the Matsunaga Act is badly needed. But I have been working toward that goal for several years. The bill provides for robust R&D for hydrogen fuel cells. It includes a provision to enhance sources of renewable fuels and biofuels for hydro- gen production among its R&D priorities, which is very important for isolated areas such as Pacific islands and rural areas across the Nation.

In addition to the R&D section, the bill includes hydrogen fuel cell demonstration programs for vehicles and for national parks, remote island areas, and on Indian tribal land. The bill authorizes system demonstrations, including distributed energy systems that incorporate renewable hydrogen production and off-grid electricity production. In other words, the bill includes a broad range of hydrogen energy applications that will reach out to rural communities and lower income families, hospitals, military facilities, not solely vehicles and infrastructure. It recognizes the importance of developing hydrogen from renewable sources and demonstration projects for stationary and distributed energy systems in remote areas and lands.

I am pleased that the bill contains my request for an energy study in Hawaii. I thank Senators DOMENICI and BINGAMAN for including my bill, S. 436, the Hawaii Energy Study bill. Hawaii is uniquely dependent on crude oil for its energy sources. Before we invest in a different energy mix and infrastructure, we need to make transparent all the dynamics between fuels, generating electricity, and the consequences of the directions we choose.

The bill directs the Secretary of Energy to assess the short- and long-term prospects of oil supply disruptions and price volatility and their impacts on Hawaii, and to assess the economic re- quirements and technology needs for replacing the use of electricity from residual fuel and re- fined products consumed for transportation needs of Hawaii. In Hawaii, the costs of gasoline, electricity, and jet fuel are intertwined in an intricate re- lationship between the same feedstock, and changes in the use of one can potentially drive con- sumer prices up or down.

Although we approved an ethanol title yesterday, I would like to add a few words on the topic of the ethanol mandate. First, I would like to extend my appreciation to Senators TALENT and JOHNSON, and their staff, who have shown great leadership in working with committee members to understand the need for a challenge to the Federal ethanol mandate. I am particu- larly sensitive to States’ needs with re- spect to renewable fuels and renewable energy. In Hawaii and other remote areas we lack the ability to produce ethanol. We would like to have that ability to free us from importing eth- anol and the rising price of crude oil.

Hawaii has had the highest gasoline prices in the Nation over the last 10 years. We also have a State mandate to increase the ethanol blend. Also the State must take action to ensure the control and safe disposal of those sources.

The energy bill also includes S. 711, a bill I introduced with Senator MUR- kowski to reauthorize the methane hy- drate program at the Department of Energy. Hydrates are important—the U.S. has enormous hydrate resources, perhaps as much as a quarter of the world’s gas hydrates. As increased de- mand draws down natural gas reserves, we must look to additional sources, such as hydrates, for the future. The bill includes a robust methane hy- drates program that includes the rec- ommendations of the National Re- search Council’s study on the program and future of methane hydrates. We still have much work ahead of us. The bill does not include fuel economy standards which significantly increase the fuel efficiency of automobiles and are a vital component of a comprehen- sive energy policy. The American peo- ple want to spend less money on gaso- line, be less dependent on foreign oil, address the issue of climate change, and breathe cleaner air. Strong fuel economy standards help provide some safety measures and the Department of Energy. The bill does not include mandates which significantly increase the fuel efficiency of automobiles and are a vital component of a comprehen- sive energy policy. The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI], for himself and Mr. BINGMAN, proposes an amendment numbered 794.

The amendment is as follows:

On page 10, strike lines 5 through 8 and insert the following:

(1) conduct an assessment (in cooperation with industry, standards development organizations, and other entities, as appropriate) of whether the current voluntary consensus standards and rating systems for high performance buildings are consistent with the research and demonstration activities of the Department;

(2) determine if additional research is required, based on the findings of the assessment;

(3) recommend steps for the Secretary to accelerate the development of voluntary consensus-based standards for high performance buildings that are based on the findings of the assessment.

(a) GRANT AND TECHNICAL ASSISTANCE PROGRAM.—Consistent with subsection (b), the National Institute of Building Sciences shall establish a grant and technical assistance program to support the development of voluntary consensus-based standards for high performance buildings.

(b) CONTENTS.—In completing the study, the Secretary shall submit to Congress a report describing the findings, conclusions, and recommendations of the study under subsection (a).

(c) REPORT.—Not later than 18 months after the date of enactment of this Act, the Secretary shall submit to Congress a report describing the findings, conclusions, and recommendations of the study under subsection (a).

(d) Effective Date.—This section takes effect on October 1, 2006.
place that has been supportive of alternative energy. We are moving in the direction toward all of those things that promote efficiency. New Jersey is the east coast hub for oil refining, for the chemical industry. We are doing our part in growing and sustaining the Nation’s energy resources.

But risking and exploiting our shore, to do that is a step too far. I repeat, it is a step too far, risking what I think no one wants if it were related to their economy, their people's quality of life, their people's needs.

I am not the only Senator who has concerns about amendments to this bill that will weaken the moratorium. I have been in contact with a number of coastal State Senators. We will have a letter that speaks against any changes to the current OCS moratorium. My concern about some of the provisions of the bill, including the inventory provision, and following states of opt out of the current OCS moratoria or provide for revenue-sharing as an incentive for states to opt out of the moratoria. Allowing States to opt out would be detrimental to States’ neighbors. This is an argument long understood and argued by Florida, New Jersey’s coast is obviously very close to other States. Tides move across state borders and fisheries don’t recognize state borders. One State’s choice could end up being detrimental to another.

We have ample reason to say that coastal states ought to be concerned about this issue. In fact, we have, for planning purposes, divided up the country into planning areas. The Mid-Atlantic and the North Atlantic OCS Planning Area extend from North Carolina to Maine, is of most concern to New Jersey. But I understand the same arguments from everyone else in every other planning area. Water does not recognize the borders we have established in a political contest. We need to protect the offshore moratoria so that we can protect our beaches and our shores as we go forward.

Mr. President I have here a bipartisan, bicameral ‘Dear Colleague’ letter from almost every member of the New Jersey Congressional Delegation that expresses the concern of those who represent New Jersey that this moratoria be sustained. I also have a bipartisan letter signed by over 100 Members of the House of Representatives, both sides of the aisle, stating their strong support for the legislative moratoria on activity in submerged lands of the Outer Continental Shelf. I ask unanimous consent that these two letters be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Hon. Peter Domenci, Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, DC.

Hon. Jeff Bingaman, Ranking Member, Committee on Energy and Natural Resources, U.S. Senate, Washington, DC.

DEAR CHAIRMAN and RANKING MEMBER: We are writing to express our strong opposition to any amendments to the Senate Energy bill that would weaken or destroy the 24-year moratoria on drilling in the Outer Continental Shelf (OCS). As we understand, you have agreed not to vote for any amendments that alter the current OCS moratoria with respect to submerged lands off Florida’s coast.

While drilling activity off the Florida coast will be protected, we are deeply concerned that this agreement leaves the coasts of our States vulnerable to amendments that would weaken the moratoria on other areas of the Outer Continental Shelf.

As senators of coastal states whose economies and environments are in serious danger should the OCS moratoria be weakened in any way, we will oppose any provision that would threaten the moratoria, including amendments allowing States to opt out of the OCS moratoria on the Florida’s coast should be protected, we are deeply concerned that this agreement leaves the coasts of our States vulnerable to amendments that would weaken the moratoria on other areas of the Outer Continental Shelf.

As senators of coastal states whose environments and economies would be in serious danger should the OCS moratoria be weakened in any way, we will oppose any provision that would threaten the moratoria, including amendments allowing States to opt out of the OCS moratoria or provide for revenue-sharing as an incentive for States to opt out of the moratoria.

We are liking your commitment to oppose any amendments that endanger the moratoria which represent the entire Outer Continental Shelf. As you know, Congress has infused language protecting the current OCS moratoria in annual appropriations bills since 1982. In addition, President George H.W. Bush declared a leasing moratorium on many OCS areas and President Clinton issued a memorandum to the Secretary of the Interior to continue the moratorium through 2012 and included additional OCS areas.
Michaud, Madeleine Bordallo, Ginny Brown-Waite, Jay Inslee, Frank LoBiondo, Rob Simmons, Mark Foley, Jim Langevin, Ed Case, Jim McGovern, Sherman Alexie, Chris Smith, Dennis Cardoza, Frank Pallone, Jr., G.K. Butterfield, Tom Feeney.

Peter Stark, Robert Wexler, Anna Eshoo, Zoe Lofgren, Katherine Harris, Mary Nagler, Carolyn Maloney, Alcee Hastings, Mike Honda, Hilda Solis, Grace Napolitano, Mark Kennedy, Brian Baird, Susan Davis, Sam Farr, Clay Shaw, Christopher Shays, Rush Holt, Betty McCollum, Ellen Tauscher.

Mr. LAUTENBERG. Mr. President, this is a big deal for the State of New Jersey. It is for any- one who is exposed to the coast and has a tremendous amount of industry and tourism that is the livelihood of those individuals who live near the shore. We can avoid the conflict as it relates to the overall energy policy. But it is the Responsibility of those who are to de- fend the interests of our State, to stand up firmly to protect our econ- omy, to protect our environment, to protect our quality of life. We do not need this conflict with regard to this bill.

I hope my colleagues will keep that in mind in the days ahead. Otherwise, there will be those who have to fight in ways that are not our preferred approach especially when we would like to get a bipartisan energy bill to go forward.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. LAUTENBERG. Mr. President, first let me say to my friend and col- league from New Jersey how much I admire his commitment to our State and to the things that protect our envi- ronment and our well-being. I am very proud of Senator CORZINE. I have mixed feelings about whether I want him to win the race in New Jersey because it is nice to have a hometown boy around.

I join Senator CORZINE in this at- tempt to protect our State from being affected by drilling for oil off our shore line. When I was a boy, I had occasion to spend time at the New Jersey shore.

It was, for me, a matter of almost para-disisal value to be able to get to that shore and never think about whether we were going to step on plastics, need- nies, oil spills, or anything like that. It was so much a part of our culture that to change it in any way that we do not have to is an act of poor judgment.

The top of the list, as far as we are concerned, is the New Jersey shore. We call it “the shore.” In the summertime, few things are better than a day at the beach, watching your grand-children play in the surf or go out on a fishing boat or learn something about marine life. We have seen times when a spill occurs how it spoils an en- tire area.

We are at a time now where in des- peration we are searching for ways to make up for our profligate use of oil. We are looking around, trying to find ways to substitute for the bad judg- ment we used for so many years, for letting it go into our cars to meet standards for oil consumption or gas consumption.

Hurting our environment, having oil ruin our most delicate and precious re- sources. It is just not right.

If one wants to fish or walk along the boardwalk, those from New Jersey go to the shore. If you want an evening’s recreation, you go to the shore. It is the coast. It is part of what we think of as the periphery of our State: 127 miles of shore line, the major economic engine for New Jersey. Tourism, as we heard from my col- league, is a $30-billion industry and supports hundreds of thousand of jobs. Seventy percent of all the State’s tourism revenues originate at the shores. Our shores are very important to us. But it goes beyond the economy. It goes beyond all kinds of things that one might think. When you look at the marine ecology, when you see what happens with clam beds or shellfish beds, we cannot fish them any more be- cause of contamination, because of tox- ins. Those affect our everyday lives.

For 35 States in this country, the coast is at our door, the shore is right there for us—for 35 coastal States. Of course, it includes the States in the Great Lakes area. They too have an in- terest in protecting their waters. So when anyone proposes something that could put our shores at risk, we take it very seriously.

Of course, that brings us to the bill we are currently considering. There has been a great deal of discussion about violating our longstanding prohi- bition against offshore drilling by al- lowing States to opt out of the morato- rium. Now, what would that mean? We recently had a spill in the Delaware Bay. I live in New Jersey. Is it any worse for New Jersey than it did to Pennsylvania or Delaware? It damaged all of them.

Delaware? It damaged all of them. Did it do more damage to New Jersey than it did to Pennsylvania or Delaware? It damaged all of them. Oceans know no boundaries, unless we put up a seawall that extends beyond the borders of our State way out into the ocean and say: OK, you can drill on that side but not the other.

I see the majority leader and Demo- cratic leader looking at me so wist- fully, and I wonder if it is in admira- tion or whether it is something else they had in mind.

Mr. REID. Admiration.

Mr. FRIST. Will the Senator yield?

Mr. LAUTENBERG. I yield, provided I do not lose the floor.

Mr. FRIST. Mr. President, we will have a very short colloquy here as to what to expect over the next several days. It will take 3 or 4 minutes.

Mr. President, Senators have been asking about the schedule for the after- noon, tomorrow, and Monday. First of all, let me congratulate the chairman and ranking member. We are making good progress. The fact that we do not have a lot of amendments flowing out tonight or a lot of requests even for to- morrow or Monday is a good sign. That, coupled with the fact we made substantial progress, leaves me very optimistic. We dealt with ethanol and oil consumption. So we are making progress.

I will come back to what we are going to have to do next week. We will remain in session this afternoon for Members to offer additional energy-rel- ated amendments. However, if the amendment requires a rolloc vote, we consider that for purposes of schedule. That is because of the schedule of tomorrow. We will have no further rolloc votes today. After our business today, we will re- turn to the bill on Monday.

I want to put our colleagues on notice that if it looks as though there is any question about finishing this bill Thursday or Friday of next week—I have told Senators on our side of the aisle to expect votes on Friday, but we are going to complete this bill next week. There is absolutely no doubt about that. I do want to put our colleagues on notice that I likely will file cloture on Wednesday. And that is not even a veiled threat at all, but it demon- strates the importance on behalf of our leadership, working with the Democratic leader, that we need to move ahead now and that we will finish this bill next week.

Finally, it is also our intention on the Bolton nomination to reconsider the cloture vote on Monday evening. I mentioned earlier that we might do that today, but discussions have con- tinued, constructive discussions have continued over the course of yesterday and over the course of today, and that being the case, we have elected to have that vote on Monday evening.

That vote will likely occur—I have not talked specifically with the Demo- cratic leader—around 6 o’clock. There- fore, Senators should be present for that important vote.

I would ask if he concurs that we must finish this bill next week. And that is why, indeed, I mentioned we
may have to file cloture, if we do not make continued progress.

Mr. REID. Mr. President, the two managers of the bill are here. They are ready to take amendments. All amendments cannot be offered next week. When these bills are disposed of, there is always: I am not quite ready; I will do it tomorrow or next week. That time has arrived. We have worked through some very difficult amendments this week—three extremely difficult amendments. They are disposed of now. They were complicated, they were difficult in the eyes of many.

As I see it, Mr. Leader, I think the big issue left, in major scope, is the global warming issue. A number of Senators on both sides are concerned about this. I would hope that an amendment would be offered Monday when we come in, debate this however long it takes, within a reasonable period of time, and dispose of it, maybe Tuesday. I just think it is time we move on.

I think what the majority leader has outlined, in consultation with me, is extremely good; that we are going to finish this bill next week. And no one has been jammed on time. It has been a hard week because there have been funerals and events that have taken some of our time, but we have worked our way through that.

I think it would be good for the country that they see we are now legislating. We have had a number of problems earlier in the year. Those are over. And now the leader has said he wishes to pass a couple of appropriations bills before we leave in August. That would set a good tone. The Appropriations Committee met today. That work has been done. The bill is ready to bring to the floor.

So I hope we can move forward. There is a tentative agreement—it is not finalized in any written form yet, but it is; I worked with the distinguished majority leader now for a couple weeks. There is an issue that is before the country, and that is stem cell research. We are going to try to work out something on that so we do not have a bunch of side issues coming up on the legislation we have. We have had a number of important meetings, and I think we are at a point soon where we can arrive at some way to dispose of this at a time certain.

We have other issues that we have talked about the Hawaiian bill and China. These are all in the RECORD that we have to bring those up at a specified time. So we have our plates full. And I would acknowledge we probably might have to do some of this next Friday.

Mr. FRIST. Mr. President, I think the House of Representatives is extremely clear in the terms of the plans: No more rollcall votes today. We will have a pro forma session tomorrow. We expect people to continue today to offer amendments to bring them forward on Monday as well.

We will have a rollcall vote on the Bolton nomination, to reconsider the cloture vote on the Bolton nomination, at 6 o’clock on Monday. We will complete the Energy bill next week. And then we will turn to the appropriations bills, as we had planned.

Mr. REID. If the Senator will yield, I also think it is true. I have another file on this bill it would create a bipartisan basis. I think you would have an equal number of Democrats and Republicans signing that cloture motion. And I think that it is really important for this body that we do that on occasion.

The PRESIDING OFFICER (Mr. CHAFEE). The Senator from New Jersey.

Mr. LAUTENBERG. Mr. President, the point I was making just a few minutes ago was that we ought not permit States to opt out of this moratorium, this prohibition against offshore drilling because what happens in a neighboring State, whether it is Delaware or Maryland or Connecticut or Massachusetts, affects what happens in my State very often. The same is true on the Pacific side of things. The same is true for the Gulf of Mexico. You cannot simply say: Let a State do the drilling. They may be more interested in the income than in the protection of the environment. But we are not. I can’t emphasize strongly enough the importance of protecting the sensitive marine areas off the New Jersey coast and other coastal States.

For more than two decades, both Democratic and Republican administrations have respected the moratorium on leasing and preleasing activities on the Outer Continental Shelf. But now we are talking about doing away with this protection. It would be foolish and shortsighted. One only needs to look at the list of accidents at sea and see what happened to neighboring States or neighboring communities not at all connected to the place where the accident happened. We just ought not permit it.

The Department of Interior’s Minerals Management Service estimated in the year 2000 that the waters off New Jersey might hold enough oil to supply the nation for 17 years. What does it mean in the scheme of things? Ten days of oil and run the risk of destroying marine life and a culture that is associated with coastal States? It is a part of our lives. Heaven forbid that it changes from being part of our daily lives.

Do we want to risk hundreds of thousands of jobs for 10 days? I don’t think so. Do we want to risk changing the culture of our society, our coastal society? I don’t think so.

The people of New Jersey and the residents of all coastal States do not want oil and gas rigs marring their treasured beaches and fishing grounds. The occupants of all coastal States that would incur the disadvantage of oil spills cannot be minimized.

I was chairman of the Transportation Subcommittee of Appropriations about 15 years ago when the Exxon Valdez ran aground. Because I had Coastal Guard on my subcommittee, I took the opportunity to get up to the place where the vessel was floundering within 3 days after it ran aground. It was in some way kind of a mystical allure. You could see the sheen on the water. You can imagine what it looks like, but all of its menace at the same time. I saw brave people from our Department of Interior and Fish and Wildlife getting off on those tiny islands with helicopters and small boats and taking the oiled birds out and cleaning them up one by one wherever they could. It was devastating. I visited there at that time. I find out that today, 16 years later, that disaster is still taking a toll on the environment.

When I take my grandchildren to the beach, I don’t want them to discover oil underneath a rock, as one still does in the area where the Exxon Valdez ran aground. I don’t want them to see birds or mammals sickened by their inabilities to breathe properly as a result of a coating of oil. I don’t want to hear about the coral destruction that provides the nutritional base for our fish and marine life.

The Exxon Valdez spill was one of the largest oil spills we have suffered, and it was only one of many. According to the Department of Interior, 3 million gallons of oil spilled from offshore operations in 73 incidents between 1980 and 1999. It is an average of about four incidents a year, more than 40,000 gallons of oil per spill. That is more than enough oil to ruin a beach town’s tourist season for years to come.

We cannot afford to damage our shorelines—and we should not be asked to do it—to the marine life that inhabits our coastal waters. That has been good to us. It supplies us with the seas and the water and the land and the mountains. We ought to try as much as possible to keep that intact.

Ending the moratorium in any State completely undermines the position our Nation has upheld for many decades. It clearly undercuts the stated wishes of coastal States that would incur the
The greatest damage. The United States needs new sources of energy. I agree with that. But where have we been in these past years as the consumption of oil increased? Buying it from people who aren’t even friends of ours, but who are always asking us to protect them from military problems. Many of those states we know have been accused of and it has been established that they support terrorists who fight against us. Did that cause us to say: Hey, we ought to change things? No. It didn’t. We asked bigger and bigger oil companies to drill use more gas and let the devil take the high road. It ought not be that way. The United States needs new sources of energy.

Fortunately, our Nation has many energy sources that are vastly under-utilized. One of those sources for finding our way out of this mess is to continue to invest in alternative methods for producing energy in universities and research institutes. We can bolster our 21st Century economy and energy security without drilling offshore. A day at the beach should mean fun, clean water, natural beauty, not oil slicks or drilling rigs. We need to keep the existing prohibition on offshore drilling in place. That is what Senator Corzine and Senator BILL NELSON and other Senators from coastal States and I intend to do.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

Mr. SALAZAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. SALAZAR. Mr. President, I rise to discuss the Energy bill. Before starting my remarks, I want to once again thank Senator DOMENICI and Ranking Member NELSON and other Senators from the Land of Enchantment, working so well together on such an important issue.

I also want to reiterate my thanks to their key staff, Alex Flint, Judy Pensabene, Lisa Epifani, Bob Simon, and Sam Fowler. Without the work of the staff, we would not have gotten to the point in this legislation where we are today.

I also want to congratulate Senator BINGAMAN and his staff on their successful inclusion of the RPS amendment. They have done this Nation a great favor.

The Nation has a real problem. When I look at the issues that face America today, I believe the two most significant domestic issues facing America, America’s families and America’s businesses are health care and the energy crisis. As a member of the Senate Energy and Natural Resources Committee, this Chamber is addressing the challenge of energy.

The problem can be described in lots of different ways, but it is, in fact, an emergency. In the 1970s, our Nation imported about one-third of our oil needs. Many of us still remember then-President Jimmy Carter talking about the OPEC oil embargo and talking about the energy independence of America being the moral equivalent of war. Yet, in the past 30 years, we have seen continuing reliance and dependence on foreign oil so that today 58 percent of the oil we need is being imported. By 2020, we will be importing 70 percent more of our oil.

So, America’s dependence is the world’s oil supplies but has only 3 percent of the global reserves. Currently, OPEC member countries produce about 40 percent of the world’s oil and hold 80 percent of the proven global reserves, and 85 percent of those reserves are in the greater Middle East, including countries that are not particularly friendly to the United States: Iran, Iraq, and Saudi Arabia. Twenty-two percent of the world’s oil is in the hands of state sponsors of terrorism and under U.S. U.N. sanctions, and only 9 percent of the world’s oil is in the hands of countries ranked “free.”

We are importing more oil at a time when other growing nations continue to increase their imports of oil, including China, which is exponentially increasing its oil demand and imports. China’s oil imports were up 30 percent from the previous year, making it the world’s No. 2 petroleum consumer only a year after the United States, and there is no end in sight in terms of how this nation of 1.3 billion people will continue to import oil from other places around the world.

Experts predict China’s large and rapidly growing demand for oil will have serious implications for United States oil prices and supplies. Fully one-quarter of the U.S. trade deficit today is associated with oil imports, and we have continued to grow on our overreliance on foreign oil. It is incredible for me to take a look at the statistics with respect to American vehicles. American vehicles today get fewer miles per gallon than they did in 1990.

What that tells us is this Nation has not taken the energy crisis we currently have in a series enough fashion. It is an imperative for us to do so, and this energy bill we are considering today in this Chamber, our response to try to make sure we live up to the challenges we face in America today.

In my view, the answer to the energy crisis we face is that we must do everything we can to set America free from its overdependence on the importation of foreign oil. Indeed, leading American conservatives and progressive organizations, both Republicans, Democrats, and Independents alike, have come forward with a concern about the security implications of and America’s growing dependence on foreign oil. These groups have formed a coalition called Set America Free. We should embrace the Set America Free agenda as an imperative for America for energy independence and security.

Since most of the oil and the overwhelming source of known oil reserves lie in one specific region of the world, the Middle East, our national security is held hostage to the whims of despotic or increasingly unstable regions. Ominously, the money we pay for foreign oil helps pay for the activities of extremists and terrorists who hate the United States and the West in general. We need only to recall the horrors of 9/11 to know this hatred is real. Even worse, the money pit grows deeper because as the world consumes more oil that oil becomes more expensive and the money that keeps some of those regimes in place gets more and more concentrated. So America is held hostage in a tighter and tighter grip.

There is only one way for us to fix this. America must embrace an imperative of energy independence and security. We have set America Free.

This energy bill, which is a bipartisan bill, is a good first step. This energy bill that is before the Senate takes some very important steps: an important step in energy conservation, a step that means we work with what we have; an important step in embracing a new ethic of renewable energy for the 21st century, which will help us grow our own energy resources in our country; an important step in developing new technologies that will help us address the energy demands of our Nation and, also importantly, balanced development of existing fuel supplies. These are important steps to lead us to the goal of energy independence and security.

I want to review each of those steps briefly. First, conservation. Energy efficiency is the cheapest, cleanest, and quickest way for our country to extend its energy supplies and to begin to tackle the alarming increases in energy prices we have witnessed in the past few years.

This is far cheaper than any other form of energy, and for a good reason. Energy efficiency is not subject to transmission losses, and it is not subject to fluctuations in the price of fossil fuels or the availability of a renewable resource.

The Energy bill contains a number of very good provisions for conservation. It’s best example is the historically significant new tax credits for use of water savings in congressional buildings so that we in Congress can tell the rest of the Nation that we also will walk the walk on conservation. It establishes new conservation goals on energy-efficient buildings and agencies all over the country. This is significant, for one of the Nation’s largest if not the largest landlords is the Federal Government.

It extends the energy savings performance contracts, for 10 years. These contracts are an excellent mechanism by which the Federal Government is guaranteed to save money
and save energy, savings that can be passed on directly to the taxpayers of America.

The program provides private financing of energy-saving improvements for Federal buildings.

The Senate Energy bill also authorizes or extends energy assistance for State programs, such as weatherization assistance, energy-efficient appliance rebate programs, and grants to States and local governments to create more energy-efficient buildings.

The Senate Energy bill also sets energy efficiency standards for exit signs, for lamps, certain transformers, traffic signals, heaters, lamps, refrigerators and freezers, air conditioners, washing machines, dehumidifiers, commercial ice makers, pedestrian signals, mercury vapor light ballasts, and pre-rinse spray valves. The energy portions of this legislation are a strong indication of the direction in which this country has to head, and that is to be more efficient with the fuel resources that are available for us.

Second, renewable energy—renewable energy is a great opportunity for the United States of America in the 21st century.

Ethanol and biodiesel are both young industries and the world needs more of them. The use of 8 billion gallons of ethanol and biodiesel to be available for us.

The Energy bill directs the Secretary of Energy to compile a detailed inventory of the Nation’s renewable energy resources, and also establishes a renewable fuels standard. I am particularly proud of the people of Lamar, CO. Their efforts to produce clean, renewable energy are a great service to the entire Front Range of Colorado. The efforts in Lamar literally keep the lights on.

This morning, in our Denver Post in Colorado, they talked about the town’s efforts to make their voices heard on the Senate floor. I assure you, Mr. President, and all of the people in Lamar, we hear you, and we thank you for your support for renewable energy.

The Energy bill directs the Secretary of Energy to compile a detailed inventory of the Nation’s renewable energy resources, and also establishes a renewable fuels standard. I am proud to be a cosponsor of the renewable fuels standard provision of the Senate Energy bill.

This amendment calls for 8 billion gallons of ethanol and biodiesel to be produced in America by 2022. This amendment is good for America and good for the environment.

Growing our own transportation fuels directly reduces our dependence on foreign oil. It not only reduces our dependence on foreign oil now, it promises to reduce our imports even more in the near future. The production and use of 8 billion gallons of ethanol and biodiesel by 2012 will displace more than 2 billion barrels of crude oil, and it will reduce the outflow of dollars to foreign oil producers by more than $60 billion.

An important provision of this renewable fuel standard is that it provides incentives for the development of cellulosic ethanol. Current methods of producing ethanol have an energy return of about 35 percent, but cellulosic ethanol, which will soon become economically feasible, will provide as much as 500 percent energy return.

And once we are at that point, we will be on the edge of a brand new frontier for domestic biofuel production.

Finally, ethanol and biodiesel are good for the environment. Net carbon dioxide emissions from these fuels are lower than from fossil fuels, because the carbon released during combustion was taken out of the air by the agricultural crops in the first place.

Ethanol and biodiesel are both young industries, but I believe that these biofuels are essential to our energy future, and the farmers of Colorado believe that they are a key component of that future. And truth be told, I simply like the idea of growing and harvesting our transportation fuels. It seems to me that this is a true way forward for America.

Third, Technology. The energy bill also includes provisions for the development of Integrated Gasification Combined Cycle plants—IGCC, commonly referred to as gasification. Using this technology, we can extract energy from coal in a much more environmentally responsible way than the pulverized coal plants in use today. IGCC significantly reduces mercury, sulfur, and nitrogen emissions. It uses our most abundant natural resource—coal. And it can be used to fake a synthetic natural gas, which means coal can help drive down the price of natural gas. IGCC can also be used to make fertilizer—fertilizer is normally made from natural gas. The fertilizer industry has been shutting its doors in America, and fertilizer prices have been going up ever since our natural gas prices became so high. IGCC also offers modest gains in efficiency today, and the potential for great gains tomorrow.

I think that the steps the energy bill takes towards developing IGCC are good ones. And I it comes at a crucial time.

Although the bill contains good provisions to move forward with gasification for electrical energy production, it does not yet have the necessary incentives for reducing gasoline consumption by motor vehicles.

There are about 800 million cars in active use worldwide. By 2050, as cars become more common in China and India, it will be 3.25 billion.

In America alone, two-thirds of U.S. oil consumption is due to the transportation sector. Two-thirds of the amount would be an important contribution to what must be a national priority: lessening our dependence on foreign oil.

Oil shale development has failed in the past due to technical, environmental and economic problems. If we are to successfully develop oil shale we must follow the principle of sustainability; a marathon, not a sprint. Sustainability will focus on the long-term development of oil shale. The development must take place in cooperation with States and local communities. The development must be based on sound economics. We must make sure we have developed oil shale in an environmentally responsible manner.

I am cautiously optimistic that the future of oil shale will include its contribution to lessening the dangerous dependence of the United States on foreign oil. If we do not rise to meet this opportunity, we will only have ourselves to blame when in the years...
ahead we look back and wonder what we might have done better to set America free.

There is a component of the energy challenge we face which must be addressed and on which there will be further discussion in this Senate in the days ahead, and that is the issue of climate change. Climate change is happening. The scientists of America agree that climate change is here and that we must address it. The business community of America comes together with companies like Shell, as much as Dukak and Bush. They say we must address this issue.

As we move forward in the days ahead to complete our work on the energy legislation, it is my hope that we include provisions that address the issue of carbon emissions and global warming.

In conclusion, let me say that when I think back to the greatest generation of time, just like many of my colleagues in this Senate, I think back to my father and my mother, part of that ‘greatest generation’ of World War II, where they knew that anything was possible in America and no challenge was too high or too steep to climb as an American nation. That was truly the unique spirit of the American people.

Today, when we face the crisis we are in with our overdependence on foreign oil and our energy crisis, it requires the same kind of spirit we saw in that generation. It requires the kind of leadership and courage we saw with people such as Abraham Lincoln, who staked the life of the Nation over the Civil War and resulted in the 13th, 14th, and 15th amendments and forever changed our Nation. It requires the leadership and vision and courage of someone such as Franklin Roosevelt, who could lead us through the Depression and prepare us to win World War II. It requires the kind of leadership and vision and courage we saw with people such as John Fitzgerald Kennedy, who could lead us through the Depression and prepare us to win World War II. It requires the kind of leadership and vision and courage that position.

My formula for doing that is largely representative of the bill that was reported to 1 by 1. First, conservation and efficiency. I heard the Senator talk about that. Second, new supplies of natural gas, such as liquefied natural gas down for farmers, for homeowners, and for businesses. To do that, unfortunately, we will have to import liquefied natural gas for the next few years. Otherwise, we will be exporting jobs. We can either import some gas or export the jobs, one or the other—that is going to be our choice—so we have an adequate and substantial supply of low-cost American-produced clean energy. We must act aggressively move on nuclear power, and we aggressively need to—and I believe there is a consensus on this—we aggressively need to explore the best technology for clean coal gasification and to make that work best to see if we can find a way to capture the carbon that is produced and put it in the ground. If we are able to do that, then we will have enough clean energy to run this economy and keep our jobs here as well as set an environmentally good example for the rest of the world. I hope that is the path we are on.

I salute the Senator for his contributions.

Mr. SALAZAR. Will the Senator yield?

Mr. ALEXANDER. Of course.

Mr. SALAZAR. Mr. President, I wish to provide a note of commendation for the junior Senator from Tennessee. We have long known his work as Governor of Tennessee. We have had good and bad on behalf of land and water issues. It was through his leadership and the leadership of both Democrat and Republican colleagues on the Senate Energy and Natural Resources Committee that we were able to accomplish what is only seldom done in Washington, DC; that is, the production of a bipartisan piece of legislation that is a very good beginning for energy policy framework for the 21st century. I acknowledge the great contributions to that effort on the part of Senator Voinovich and all the members of the Energy Committee. I thank the Senator.

I yield the floor.

Mr. CORZINE. Mr. President, I first thank Chairman DOMENICI and the ranking member, Senator BINGAMAN, as well as both of their staffs on the Energy Committee for all of their hard work on preparing an energy bill. Their leadership has allowed us to come together to develop a comprehensive energy policy that is paramount to our Nation’s future national and economic security.

With reservation on some issues, I supported the Energy Committee bill. The Senator from Colorado is new to this, I wish to add, but I believe—I believe—of anyone in the territory we now call the United States of America.
percent of total State employment, generates more than $16.6 billion in wages, and brings in more than $5.5 billion in tax revenues to the State.

Any drilling or even the threat of drilling poses a real threat to New Jersey’s environment, economy, and way of life. New Jersey is a State that already holds its own in supporting energy production and refining for the Nation.

We have three nuclear power plants, many additional power plants, support sitting of an LNG terminal, and we are debating wind alternatives. And New Jersey is the East Coast hub for oil refining. We are growing our energy businesses. But risking and exploiting our shore is a step too far.

I am not the only Senator who has concerns about the amendments to this energy bill that would weaken the OCS moratoria. I have been in contact with many coastal State Senators who agree that this bill must not include any provisions to undermine the moratoria.

My concern is reinforced by the inventory provision already included in the underlying bill. I am strongly opposed to this provision and voted against it during committee markup.

I continue to oppose a moratorium on a slippery slope toward the eventual drilling off the New Jersey coast and other areas currently under the OCS moratoria and possibly exposing our beaches and fisheries to unnecessary risks from adjacent locals.

Give the minimal benefit and significant downside of drilling off the coast of New Jersey, I do not believe it is worth threatening over 800,000 New Jersey jobs to recover what the Minerals Management Service estimated in 2000 to be 196 million barrels of oil, only enough to last the country barely 10 days. The MMS also estimated in the RECORD.

In comparison, areas off the Gulf of Mexico already open to drilling contain 18.9 billion barrels of oil and 258.3 trillion cubic feet of natural gas.

As you can see, we appear dangerously close to the beginning of the breakup of the OCS moratoria. This should not occur, and I am prepared to fight any amendment promoting a weakening of the moratoria. These actions are as threatening to New Jersey’s economy as killing ethanol is for corn growing States.

I am also prepared to fight any amendment that would provide a revocable leasing moratorium on any OCS areas to opt out of the moratoria. There is much that is good in this bill and many good amendments to be considered, especially those offered by Senator Cantwell and Senator Bingaman.

I have sent a bipartisan, bicameral Dear Colleague letter from the New Jersey delegation expressing our concern with the inventory included in this bill, as well as these moratoria-threatening amendments I have been discussing. I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONGRESS OF THE UNITED STATES,
WASHINGTON, D.C.
June 16, 2005

DEAR COLLEAGUE: We are writing to express our strong opposition to a provision in the Senate Energy Bill that directs the Department of Energy to prepare a multi-year potential oil and natural gas resources in the entire Outer Continental Shelf, including areas off of the New Jersey coast.

This provision is an attempt to undermine the Outer Continental Shelf moratorium. We are deeply troubled by a provision that Congress has included annually in appropriations bills to prevent leasing, preleasing, and related activities in most areas of the Outer Continental Shelf. Since 1982, a statutory moratorium on leasing activities off the coast of New Jersey was reenacted until 2012. As you know, President George W. Bush declared a leasing moratorium on many OCS areas on June 26, 1990 under the OCS Lands Act. On June 12, 1998, President Clinton used the same authority to issue a memorandum to the Secretary of the Interior that extended the moratorium through 2012 and included additional OCS areas.

In addition, this provision in the Energy Bill would allow the use of seismic surveys, data cores, samplers, and other exploration technologies, all of which would leave these areas vulnerable to oil spills, drilling discharges and damage to coastal wetlands. The people of New Jersey and other residents of States along the Atlantic Coast, do not want oil or gas rigs anywhere near their shores, beaches, or wetlands. Such drilling poses serious threats not only to our environment, but to our economy, which depends heavily on tourism along our shore.

Coastal tourism is New Jersey’s second-largest industry, and the New Jersey Shore is one of the fastest-growing regions in the country. According to the New Jersey Department of Environmental Protection, the Garden State generates more than $3 billion in spending, directly and indirectly supports more than 38,000 jobs, more than 20 percent of total State employment, generates more than $17.6 billion in wages, and brings in more than $5.5 billion in tax revenues to the State.

Considering the minimal benefit and significant downside of drilling off the coast of New Jersey, we do not believe it is worth threatening over 800,000 New Jersey jobs to recover what the Minerals Management Service (MMS) estimated in 2000 to be 196 million barrels of oil, only enough to last the country barely ten days. The MMS also estimated in 2000 a renewed leasing moratorium of further federal foot of natural gas for the entire Mid-Atlantic region.

In comparison, areas of the Gulf of Mexico already open to drilling contain 18.9 billion barrels of oil and 258.3 trillion cubic feet of natural gas.

In addition, we will also work to fight against any provision that would allow states to opt out of the OCS moratorium. If a state chooses to opt out of the moratorium, it would be impossible for nearby states to protect their coastlines from accidents that could happen as a result of drilling.

We will take every step to oppose any provision that would weaken the OCS moratorium. We ask you to join us in our efforts to protect our nation’s precious coastlines, marine ecosystems and ocean waters.

Sincerely,
Jon Corzine, Frank B. Lautenberg,
Frank Pallone, Jr., Frank A. LoBiondo,
Jim Saxton, Robert Menendez,
Patrick J. McNulty, Paye, Steven R. Rothman,
Bill Pascrell, Jr., Robert E. Andrews,
Bush, R.P. Frelinghuysen.

Mr. CORZINE, Mr. President, I am also circulating a letter that has already been signed by many coastal Senators and I expect will be signed by all Senators that expresses our firm resolve that any amendments that threaten the OCS moratoria in any way is unacceptable.

Finally, I have a bipartisan letter has been signed by over 60 Members of the House of Representatives stating their strong support for the current legislative moratorium on new mineral leasing activity on submerged lands of the Outer Continental Shelf. I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONGRESS OF THE UNITED STATES,
WASHINGTON, DC.
April 29, 2005

Hon. CHARLES TAYLOR
Chairman, Subcommittee on Interior and Environment, Committee on Appropriations, Rayburn House Office Building, Washingto, DC

Hon. RUPERT DICKS
Ranking Member, Subcommittee on Interior and Environment, Committee on Appropriations, Longworth House Office Building, Washingto, DC

DEAR CHAIRMAN TAYLOR AND RANKING MEMBER DICKS: We are writing to express our strong support for the bipartisan legislative moratorium on new mineral leasing activity on submerged lands of the Outer Continental Shelf (OCS). We are deeply appreciative of the leadership your subcommittee has shown on this issue over the years and hope to work with you this year to continue this vital protection.

The legislative moratorium language prohibits the use of federal funds for offshore leasing, preleasing and other oil and gas drilling-related activities in moratoria areas, enhancing protection of these areas from oil and gas development. As you know, in 1990 President George H.W. Bush signed an executive memorandum placing a ten-year moratorium on new leasing on the OCS. In 1998, this moratorium was renewed by President Bill Clinton and extended until 2012. As you know, President George W. Bush endorsed the moratorium in his 2005 budget. These actions have all been met with public acclaim and as necessary steps to preserve the economic and environmental value of our nation’s coasts.
authority on this issue. Therefore, we respectfully urge you to include the OCS moratorium language in the fiscal year 2006 Interior and Environment Appropriations legislation. Specifically, we ask you to use the language in Sections 107, 108 and 109, Division E, Department of the Interior and Related Agencies of the fiscal year 2005 Consolidated Appropriations Act (P.L. 109-10). These sections restrict oil and gas activities within the OCS in the Georges Bank-North Atlantic planning area, Mid-Atlantic and South Atlantic planning area, Eastern Gulf of Mexico planning area, Northern, Southern and Central California planning areas, and Washington and Oregon planning area.

I am encouraging the Subcommittee to support this important provision, which represents over 20 years of bipartisan agreement on the importance of protecting the environmentally and economically valuable coastal areas of the United States. Thank you for your consideration of this request.

Sincerely,

Lois Capps, Randy ‘Duke’ Cunningham, Jeff Miller, Jim Davis, Michael Mikhail, Madeleine Bordallo, Ginny Brown-Welsh, Frank Lautenberg, Rob Simmons, Mark Foley, Jim Langevin, Ed Case, Jim McGovern, Sherrill Brown, Chris Smith, Dennis Cardin, Solomon Ortiz, Jr., G.K. Butterfield, Tom Feeney.

Barbara Lee, Dennis Moore, Raúl Grijalva, Chris Van Hollen, Rahm Emanuel, Nick Rahall, Loretta Sanchez, Debbie Wasserman-Schultz, Ric Schuknecht, Lovett Sánchez, Tom Allen, Anthony Weiner, Jan Schakowsky, Brad Sherman, Jim McDermott, Kendrick Meek, Bob Etheridge, Dale Kildee, George Miller, Donald Payne, Tom Lantos, Earl Blumenauer, Maxine Waters.

Mr. CORZINE. Mr. President, these letters indicate the bipartisan, bicameral support to protect the current OCS moratoria. Moving in the direction of lifting the moratoria will bring unnecessary opposition to the overall objective.

Residents of coastal States should not have to fear the specter of oil rigs off their beaches. Again, I thank the Chair and ranking member for their leadership, and I look forward to working with them. I hope they will join me in protecting our precious coastlines.

MORNING BUSINESS

Mr. ALEXANDER. I ask unanimous consent that the time for morning business with Senators permitted after I speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALEXANDER. I ask unanimous consent that I may bring in a few boxes of regulations about which I am going to speak on higher education.

The PRESIDING OFFICER (Mr. Burr). Without objection, it is so ordered.

(The remarks of Mr. ALEXANDER pertaining to the introduction of S. 1261 are located in today’s RECORD under “Statements on Introduced Bills and Joint Resolutions.”)

The PRESIDING OFFICER. The Senator from Kansas.

WOMEN IN IRAN

Mr. BROWNBACK. Mr. President, a big event is taking place in another country tomorrow. The Iranian elections are going to take place for the presidency and the National Assembly. This is a bogus election. The people of Iran are not having a fair choice. A number of people are calling for a boycott of elections in Iran, which is unusual for us but not for them, because the whole slate of those who have been nominated has been selected by the ruling council of Iran.

If you were even going to be on the ballot, you had to have been selected by the ruling council. So there may be eight people running for president; some have dropped out, others added in. They all had to be appointed, actually, to be candidates.

I wanted to draw this point to the body that there is not just a nuclear crisis going on, there is a human crisis that is taking place in that country. These elections that will be reported on are not elections. They are appointments that are taking place. It is in many respects a fairly porous society, and yet there are severe restrictions placed on freedom of speech, on press, assembly, association, and religion.

The U.S. Commission on International Religious Freedom has concluded that the government of Iran engages in or tolerates systematic, ongoing, and egregious violations of religious freedom, including prolonged detention and executions based primarily or entirely upon religion of the accused. I just met with members of the Baha’i faith who talked about the severe persecution of the Baha’i in Iran.

But the specific item I wanted to point out even prior to this election is the gender apartheid that takes place in Iran. I received this recently from the Alliance for Iranian Women.

The Alliance for Iranian Women reported that the testimony of a woman in Iran is worth half that of a man in court. The blood money paid to the family of a female crime victim is half the sum paid for a man. A married woman must obtain the written consent of her husband before traveling outside the country.

In his book, Ayatollah Khomeini requires that young girls should be married before they reach the age of puberty. A woman does not have the right to divorce her husband, but a man can divorce his wife anytime he wishes and without her knowledge. A man is allowed to marry four wives and have as many temporary wives as he wishes and may end the contract at any time with a temporary wife on a temporary marriage. Temporary marriage is often viewed as the Islamic Republic’s way of sanctioning male promiscuity outside of marriage. Mothers do not get custody of their children when husbands divorce them. A widow does not get the custody of her children after the death of her husband. The children will be given to the parental grandparents, and a mother has no visitation. If the husband has no family, the mullah of the community takes custody of the child. Daughters get half the inheritance than that of their sons.

I point this gender apartheid out because when I heard this I was stunned. I wanted other Members of the body to realize this is taking place. The greater focus of what is taking place in Iran has been primarily on nuclear weapons development. But there is a humanitarian and a human crisis and certainly a human rights crisis in that country.

I have come here shortly before the Iranian presidential elections. These elections hold no hope of change for the people of Iran. They are elections that will be boycotted and protested, and they are elections that have been manipulated by the supreme leader and the council of guardians. Just last week women in Iran staged a sit-in to protest the disqualification of women from running in the elections.

The people of Iran want change. That change will not come through these elections. But it will come through internal, strong demonstrations, and it will come through strong international support for the very people who protest and boycott these elections.

Iran has a young and vibrant base that, with the support of the international community, could promote major change in Iran and the region. I encourage the Iranian-American community to unite, build strong coalitions to further promote democracy and fundamental respect for human rights in Iran. I encourage this body to support democracy building, civil society building in and for Iran.

I encourage other Members to continue to speak up on behalf of the oppressed in Iran and voice strong support for the people who so desperately want to see democracy flourish.

This is a key issue and a timely one. These elections are taking place soon. People need to know this is a bogus set of elections.
I yield the floor.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. WARNER. Mr. President, may I inquire of the Presiding Officer of the order to speak as in morning business for about 10 minutes.

The PRESIDING OFFICER. The Senator is informed that we are in morning business. The Senator is recognized for up to 10 minutes.

GUANTANAMO

Mr. WARNER. Mr. President, yesterday, apparently, on the floor of the Senate and elsewhere, certain statements were made with regard to the American service personnel serving in Guantanamo. I am now paraphrasing what was reported in the Washington Times of June 16, when it is alleged that in this article on the floor of the Senate, this statement was made:

If I read this to you and did not tell you that it was an FBI agent describing what Americans had done to prisoners in their control, you would most certainly believe this must have been done by Nazis. Soviets in their gulags, or some mad regime—Pol Pot or some equivalent of that. This was the account of Americans in the treatment of prisoners.

Mr. President, as you can see by this shock of gray hair, I have lived now these 78-plus years, and I remember these periods of history that were cited on the floor of the Senate yesterday very well. I see the leader standing. Does he wish to be recognized?

Mr. MCCONNELL. Mr. President, I say to my friend from Virginia, I was inclined to ask the Senator a question, if it will not interrupt his train of thought.

Mr. WARNER. Not at all.

Mr. MCCONNELL. I was listening carefully to my friend from Virginia, and I gathered he was equating what happened in Guantanamo to Pol Pot or some equivalent of that. My recollection—I just ask the Senator from Virginia if his recollection is similar to mine—Pol Pot murdered 1 to 2 million of his fellow countrymen.

Mr. WARNER. Mr. President, the Senator is correct. In World War II, with which I was going to commence my remarks in that context, I served at the very end. As a 17- or 18-year-old sailor, I was simply in a training command but remember that period of history very vividly.

All through my early years, prior to going into the Navy, late in the fall of 1944 and starting active service in 1945, the whole of this country was consumed with that frightful conflict in which, at the hands of Nazis, some 9 million people perished, 6 million of whom were of the Jewish faith. It is just extraordinary.

I was deeply disturbed by these comments to try to draw any analogy whatsoever to that period of history.

Then, following the Soviet gulags, I served as Secretary of the Navy during the height of the Cold War for some 5 years in the Pentagon and actually had a great deal of work with the Soviet Union at that period of time in the context of that threatening situation of the Cold War.

There is just no relationship to this. I was astonished. I did not want to let the Sun go down on this day without conveying to the Senate my own historical perspective and the danger that loose comments such as that—comparisons which have no basis in history—and should do harm to men and women serving wherever they are in the world today in this war on terrorism because this is the type of thing that is picked up and utilized by press antithetical to the interests of the United States and distorted in their own way.

It has to be addressed. I was prepared to do that.

Mr. MCCONNELL. Mr. President, may I ask the Senator one other question?

Mr. WARNER. Yes.

Mr. MCCONNELL. The Senator from Virginia mentioned the gulags in the Soviet period. It is my recollection—correct me if I am wrong—that up to 20 million people were murdered during that period from 1930 to 1950.

Mr. WARNER. Yes. I do not have the accurate figures. I know Stalin had purged part of his country for no other reason than he just wanted to get rid of the people by the millions. The gulags came into focus primarily during the latter chapter of the Soviet Union when people disappeared by the tens of thousands into these encampments, never to be heard from again. It is not a chapter which Russia today looks back on with any pride at all.

I feel every day that I get up, and I hear of the casualties of our brave men and women, be they in Afghanistan, Iraq or occasionally in other areas of the world—I say is what it is that we can do in this Chamber, what is that we, as citizens, can do to bring them home safely? They are making enormous sacrifices together with their family to go into harm’s way to protect us here at home from the threat of terrorism.

Mr. MCCONNELL. Mr. President, I thank my friend from Virginia for clearing up any notion anyone might have that anything the United States is involved in, in incarcerating prisoners, would be in any way related to experiences such as those carried out by the Nazis or by the Russians during the Stalin period.

Mr. WARNER. I feel very strongly about that. I really feel so strongly, I say to the distinguished leader of our party, that I feel apologies are in order to the men and women of the Armed Forces. I do not ask it for myself. But I feel these young men and women, all of whom are volunteers, all of whom have gone into harm’s way and who are bearing the brunt of the present conflict, that these allegations have absolutely no basis in fact with history. I regret they occurred.
which I remember very well as a young man and as Secretary of the Navy during the period of the Vietnam era and Pol Pot. There is no comparison. Not one incarcerated individual at Guantanamo has lost his or her life. Not one.

In sharp contrast to those mentioned above and elsewhere in the history of this world, our Nation should look with pride as to how the Department of Defense has specifically addressed each of the grievances. They have allowed any number of us to come down there. It is in that narrative who have come down there.

There are courts-martial being considered for some at this point in time. In other words, when wrongs are done, we carefully, methodically address them, giving due process to those who are under suspicion for having committed offenses.

Given time, this entire situation at Guantanamo will be spelled out fully to the public. If there are individuals who have done wrong, they will be held accountable.

I come back to the central theme that I have is these young men and women serving all over the world in uniform today and, indeed, members of our diplomatic corps, members of other Governments serving in harm’s way, we have to think of them when issues are raised such as they were raised yesterday.

I understand the Senator wishes to address a question to the Senator from Virginia.

The PRESIDING OFFICER. The time of the Senator from Virginia has expired.

Mr. WARNER. I ask unanimous consent that my time may be continued without limitation at this time.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The Senator from Illinois.

Mr. DURBIN. Mr. President, if I understand the rules of the Senate, I am supposed to address the Senator in the form of a question, and that makes it impossible for me to make a statement at this point.

Mr. WARNER. Mr. President, I do not wish to create a parliamentary situation that precludes the Senator from expressing himself in any way that he wishes. I understood the Senator was about to ask a question. I will withdraw that. I will finish my statement, if I may, and then I will yield the floor.

To equate actions of the men and women in the Armed Forces, proudly serving in uniform and thereby representing this Government of the United States with regard to their services down there in Guantanamo, maintaining the detainees, to the genocidal acts of murder and repression of the Nazis or Soviet gulags or Pol Pot is insulting to our men and women in uniform who are fighting for the safety of all of us at home and, indeed, our friends and allies. To the contrary, completely unlike the repressive regimes of the Nazis—and I was moved to come down here because I think there are only a few of us around who lived during that period of time and were able to fully absorb the frightful consequences of that worldwide conflict. We had 16 million men and women of the U.S. military in uniform at that time. I just think that there is absolutely no comparison that that chapter of history brought upon mankind by means of death to this situation we have, which is under investigation.

I was assured by the Secretary of Defense— I did not need the assurance because I knew it would be the case—that we will account for any wrongs that have been done under the due process of our system. The Department of Defense and others have investigated this situation and made known a series of facts at this time.

I yield the floor.

The PRESIDING OFFICER. The Senator from Virginia has expired.

Mr. DURBIN. Mr. President, my staff contacted me to alert me that several of my colleagues had come to the Senate floor to address statements that I made on the floor on June 14, 2005. Those statements related to the treatment of prisoners at Guantanamo. The Department of Defense has specifically addressed each of the grievances. They have allowed any number of us to come down there. It is in that narrative who have come down there.

Because it is so graphic in its nature, but I felt that in fairness, so that the record would be complete, I had to read it.

Because there have been allusions made to statements made by me, I believe it is appropriate to read it again so that my colleagues who may not have reflected on it will have a chance to do so. Let me read this report from an agent of the Federal Bureau of Investigation about the treatment of prisoners at Guantanamo. The Department of Defense has specifically addressed each of the grievances. They have allowed any number of us to come down there.

When you read some of the graphic descriptions of what has occurred here—I almost hesitate to put them in the record, and yet they have to be added to this debate. Let me read to you what the FBI agent said. And I quote from his report.

This is a quote:

On a couple of occasions—

Let me underline that, on a couple of occasions—

I entered interview rooms to find a detainee chained hand and foot in a fetal position to the floor, with no chair, food or water. Most times they urinated or defecated on themselves, and had no concern for 18-24 hours or more. On one occasion, the air conditioning had been turned down so far and the temperature was so cold in the room, detainees were barefoot and wearing only paper underwear, shivering with cold. . . . On another occasion, the [air conditioner] had been turned off, making the temperature in the unventilated room well over 100 degrees. The detainee was almost unconscious on the floor, with a pile of hair next to him. He had apparently been literally pulling his hair out through the night. On another occasion, it was the temperature unbearably hot, but extremely loud rap music was being played in the room, and had been since the day before, with the detainee chained hand and foot in the fetal position on the tile floor.

And then I said:

If I read this to you and did not tell you that it was an FBI agent describing what Americans had done to prisoners in their control, you would most certainly believe this must have been done by Nazis, Soviets in their gulags, or some mad regime—Pol Pot or others—that was so horrid for human beings. Sadly, that is not the case. This was the action of Americans in the treatment of their prisoners.

I have heard my colleagues and others in the press suggest that I have said our soldiers could be compared to Nazis. I would say to the chairman of the Armed Services Committee, I do not even know whether the interrogator involved was an American soldier or others—that is not the case. To suggest that I am criticizing American servicemen—I am not. I do not know who was responsible for this, but the FBI agent made this report. To suggest that I was attributing all of the sins and all the horrors and barbarism of Nazi Germany or the Soviet Republic or Pol Pot to Americans is totally unfair. I was attributing this form of interrogation to repressive regimes such as those that I noted.

I believe that the Senator from Virginia, whom I respect very much, would have to say, if this, indeed, occurred, it does not represent American values. It does not represent what our country stands for. It is not the sort of conduct we would ever condone. I would hope the Senator from Virginia would agree with that. That was the point I was making.

Now, sadly, we have a situation where some in the rightwing media are saying that I have been insulting men and women in uniform. Nothing could be further from the truth. I respect our men and women in uniform. I have spent many hours, as I am sure the Senator from Virginia has, at funeral services of the servicemen who have been returned from Iraq and Afghanistan, writing notes to their families, and calling them personally. It breaks my heart every day to pick up the newspaper and hear of another death. The total this morning is 1,710. To suggest that, absolutely no comparison to what the men and women serving in uniform—nothing could be further from the truth.
Mr. WARNER. Mr. President, if the Senator will yield.
Mr. DURBIN. I will be happy to yield for a question.
Mr. WARNER. You are reading from a report of one of our investigative committees where there is no verification of the accuracy of that report. You take it at face value. I pointed out—and I discussed it with Secretary Rumsfeld—this allegation of the FBI agent, together with a lot of other facts, is now being carefully scrutinized under our established judicial process.
I trained as a lawyer and many years as a prosecutor and dealt with the Bureau. I have the highest respect for them. But I do not accept at face value everything they put down on paper until I make certain it can be corroborated and substantiated.
For you to have come to the floor with just that fragment of a report and then unleash the words “the Nazis,” unleash the word “gulag;” unleash the words “Pol Pot.” I don’t know how many remember that chapter—it seems to me that was the greatest error in judgment, and it leaves open to the press of the world to take those three extraordinary chapters in world history and try to equate it with what has taken place allegedly at Guantanamo.
I am perfectly willing to be a part of as much of an investigation as the Senate should perform and will in my committee. But I am not going to come to the floor with just one report in hand and begin to impugn the actions of those in charge, namely, the uniformed personnel, at this time. We should allow matters of this type to be very carefully examined before we jump to a conclusion.
Mr. DURBIN. If I can respond to the Senator from Virginia, I do not have a copy with me—perhaps my staff can give it to me—of the memo from the FBI.
Mr. WARNER. Could we inquire of the Senator as to the use of this memo on the floor? Is that consistent with the practices of this body as regards
Mr. DURBIN. I would say this memorandum was not obtained from any classified sources.
Mr. WARNER. I do not know how it came into your possession.
Mr. DURBIN. May I say to the Senator from Virginia what we are dealing with, in terms of these interrogation techniques, was a letter, as I understand it—let me make certain I am clear—to General Ryder, on July 14, 2004, almost a year ago—almost a year ago. I have not heard a single person from this administration say this is in any way false or inaccurate. Certainly, if it were true, we would have heard that, would we not, long ago?
Mr. WARNER. I ask the Senator, is it to be treated as a public document or is it part of an investigative process which—ordinarily the materials used in the course of an investigation are accorded certain privileges.
Mr. DURBIN. I say to the Senator from Virginia, I was informed by my staff this was released by a Freedom of Information Act disclosure by our Government.
Mr. WARNER. I thank the Senator. Mr. DURBIN. So I don’t believe there is any question about its authenticity but I think it being in the position of our Government. In terms of the content of the document, almost a year has passed since this was written, and if it were clearly wrong, inaccurate on its face, would the Senator from Virginia not expect the administration to have made that clear by now?
Mr. WARNER. Mr. President, my understanding is it is currently under investigation and being carefully scrutinized in the context of another series of documents. Until the administration has had the opportunity to complete the investigation and make their own assessment of the allegations, it seems to me premature to render judgment.
Mr. DURBIN. I would say to the chairman of the Armed Services Committee, whom I respect very much, what I described was the interrogation techniques approved by this administration, in the extreme. There was nothing in this description here, from that letter of the FBI agent of investigation, which was different than the interrogation rules of engagement which had already been spelled out—already spelled out.
So here is what we have. A letter sent to General Ryder almost a year ago, released under the Freedom of Information Act, with specifics related to the interrogation of prisoners which are consistent with the very rules of interrogation which Secretary Rumsfeld had approved in a memo.
So I do not believe that coming to the floor and disclosing this information is an element of surprise. The administration has known it for almost a year. I do not believe there is any question of this being declassified. I had it presented under the Freedom of Information Act. And it certainly is not, sadly, beyond the realm of possibility because the very techniques that were described in here were the techniques approved by the administration.
The PRESIDING OFFICER (Ms. Murkowski). The time of the Senator has expired.
Mr. DURBIN. I ask unanimous consent for 5 additional minutes.
Mr. MCCONNELL. Will the Senator yield for a question?
Mr. DURBIN. I will be happy to yield to the Senator from Kentucky.
Mr. MCCONNELL. My concern was not the words of the FBI agent, but the words of the Senator from Illinois. I believe I heard the Senator repeat today—let me ask the Senator if in fact this is what he meant to say—because I heard him yesterday. I think the Senator from Illinois, I believe I heard the Senator repeat today—that let me ask the Senator if in fact this is what he meant to say because I heard him yesterday or the day before, which I believe the Senator repeated today.
was curious if the Senator does stand by his own words, not the words of the FBI agent, which I believe were:

If I read this to you and did not tell you that it was a FBI agent describing what Americans had done to prisoners in their custody, I most certainly believe that this must have been done by the Nazis, Soviets in their gulags, or some mad regime, Pol Pot or others, that had no concern for human dignity. Frankly, that is not the case. This was the action of Americans in the treatment of their prisoners.

So my question of the Senator is not the words of the FBI agent but the words of the Senator from Illinois, Mr. DURBIN. Does the Senator from Illinois stand by these words, comparing the action of Americans in the treatment of their prisoners to the Nazis, Soviets in their gulags, or Pol Pot or others?

Mr. DURBIN. I would say, in response to the Senator from Kentucky, in this particular incident that I read, from an FBI agent describing in detail the methods that were used on prisoners, was I trying to say: Isn’t this the kind of thing that we see from repressive regimes?

Yes, this is the kind of thing that we expect from a repressive regime. We do not expect it from the United States. I hope the Senator from Kentucky would not expect that.

Mr. MCCONNELL. Will the Senator yield?

Mr. DURBIN. Yes.

Mr. MCCONNELL. Is the Senator aware that a Pol Pot murderer, 1 to 2 million of his fellow countrymen, the Nazis murdered 6 to 9 million men, women, and children, mainly Jews, and the Soviets, in their gulags, murdered some estimated 20 million people over a 20-year period between 1930 and 1950?

My observation, obviously, is this a fair comparison?

Mr. DURBIN. The comparison related to interrogation techniques. It is clear, and I will stand by the record, that the horrors visited on humanity by those regimes were far greater than these interrogation techniques. But the point I was trying to make was, what do we visualize when we hear of this kind of interrogation technique?

I say to the Senator from Kentucky, I visualize regimes like those described. Did they do more? Did they do worse? Of course they did. The point I was trying to make was, what do we visualize when we hear of this kind of interrogation technique?

Mr. MCCONNELL. So the Senator thinks this is a fair comparison?

Mr. DURBIN. It is a comparison in the form of interrogation that a repressive regime goes too far, that a democracy never reaches that extreme. But to say that I am in any way diminishing the other horrors brought on by these regimes is plain wrong. Those are different elements completely.

Mr. MCCONNELL. If the Senator will yield, again, I go back on my own recollections, those three examples the Senator used. I don’t know what interrogation took place. Perhaps if we go into the sinews of history there were some, but what the world recognized from those three examples the Senator used, they were death camps—I repeat, death camps—where, as my colleague from Kentucky very accurately said, millions of people were exterminated. It is doubtful they were ever often asked their names.

To say that the allegations of a single FBI agent mentioned in an unconfirmed, uncorroborated report were designed to raise the question in the Senate to raising the allegation that whatever persons of the uniformed military, as referred to in that report—albeit, uncorroborated, unsubstantiated report—are to be equated with those three chapters in world history is just a most grievous misjudgment on the Senator’s part, and one I think is deserving of apologizing to the men and women in uniform.

Mr. DURBIN. Let me say this to the Senator in response. I have said clearly in the Senate, and obviously the Senator does not accept it, but I will say it again: There were horrors beyond interrogation techniques committed by those three regimes. That is clear.

But I want to say to the Senator from Virginia, does he even accept the premise or possibility that this happened at Guantanamo?

Mr. WARNER. I would say, Madam President, I served as assistant U.S. attorney for 5 years and dealt with the FBI all the time. I have very high regard for that service. But the Senator knows full well that is just an investigative report by one agent. It is under investigation by the Bureau and the Department of Defense—at this time in the context of many other pieces of evidence.

One cannot come to this great forum, which is viewed the world over as one which is known for trying to assert the standards which we have stood by as a Nation, then I don’t believe we are responsible in our duties. I don’t believe we showed good judgment in ignoring what is happening, what happened at Abu Ghraib, what may be happening, based on this FBI memo, at Guantanamo Bay.

That is part of our responsibility, as difficult as it may be for the administration to accept.

Mr. DURBIN. Madam President, the use of the words “due process” by the Senator from Virginia was restricted to due process that is taking place with regard to allegations in that report and others according to the actions of either military personnel or civilian personnel under the clear supervision and jurisdiction of the Department of Defense. That was my use of due process.

It is a separate issue as to the due process of the detainee, the Senator is correct. That is a matter that should be openly discussed, is being discussed, and will be reviewed by this Chamber.
I come back again, and I just conclude—I see there are other Senators waiting to speak—we have to be extraordinarily careful in our remarks in the Senate as they relate to the safety of our people because this series of statements the Senate has made, factual references to chapters of history, can be manipulated by other people throughout the world to their advantage. That is my deep concern.

Mr. MCCONNELL. I have just one final question, very briefly.

Mr. REID. That is my happy time to yield.

Mr. MCCONNELL. I want to make sure I understand this correctly: Is it my understanding that my good friend from Illinois stands by his own words, because he read them again today, and it is his view that even if this allegation from this one FBI agent were true—and as the Senator from Virginia has pointed out is being investigated—even assuming this allegation from this one FBI agent were true, the Senator from Illinois still believes that could be correctly equated to the treatment by the Nazis, by the Soviets in the gulags, and by the Pol Pot regime?

Is that an accurate description of that, even assuming this one allegation is proven to be true?

Mr. DURBIN. What I have said is, if you were asked, without being told where this might have occurred, as I said here directly in the RECORD, you might conclude that it was done by one of the regimes because that was the kind of heavy-handed tactics they used, the kind of inhumane treatment in which they engaged. You would be surprised to learn that according to the FBI, it was something that occurred at Guantanamo in a facility under the control of the United States of America.

Madam President, let me conclude by saying that I know there is some sensitivity on this issue relating to Guantanamo in the hearing yesterday. I can tell it from the response today. But I continue to believe the United States should hold itself to the highest standards when it comes to the interrogation of prisoners, that we should never countenance in any way, shape, or form, the torture of prisoners we have seen in other countries by other governments in history.

That was the point I was trying to make, and it is a point I still stand by. Secretary of State Colin Powell was right when he criticized the change of interrogation techniques by this administration and said it does not reflect well on the United States, torture does not produce good information, and that we would pay a price, sadly, in terms of public opinion, because we were engaged in that kind of conduct. His premonition or his prophecy has turned out to be accurate. That was the point I made.

Madam President, I yield the floor.

The PRESIDING OFFICER. The Democratic leader.

Mr. REID. It is amazing to me, Madam President, the more the popularity of the President plummets, the more the people downtown try to play this game “I gotcha.” Families are attacked, reputations are impugned, bogus, baseless statements are made. The attacks by the very noisy noise machine of the far right never stop, and they often benefit from more information in the last few weeks with the numbers on the President dealing with Social Security, the unpopularity of the efforts made to spend 2 months on judges, five people, basically.

Is that your understanding that the White House, Why? Because this country is in trouble for lots of reasons, only one of which is Iraq. In the last 48 hours, 11 American soldiers have been killed in Iraq. Scores of Iraqis have been killed in the same period of time. I do not know—I do not know if anyone—knows—the death and destruction that is taking place in Iraq as we speak. We focus on the dead. The dead American soldiers are on page A28 of the newspapers. They do not even make the front section. We do not know because we are not focusing on the blind, the maimed from that war.

But that is only one of our problems we are not focusing on. Health care: 45 million Americans without health care. Have we spent 5 minutes this year talking about health care? No. No. We have been spending time on five judges.

Have we spent any time about what is happening in our public school systems around this country? No. Not a single minute. The average age of a public school in America is approaching 50 years. The Leave No Child Behind Act is leaving kids behind in Nevada and all over this country.

The environment is something we do not even talk about anymore because global warming does not exist in the minds of the people at the White House.

Do we spend any time here talking about the devastating deficit that is affecting people in my little town of Searchlight and all over the country? No. This administration took over with a surplus in the trillions. We now have approached a $7 trillion debt in this country.

So this is all an attempt to distract us from the issues before us. Rather than spending time on my friend, the distinguished Senator from Illinois, whom I have known for going on 23 years, and whether he was right or wrong in his role as chairman of the Armed Services Committee. He is my friend. He is a Southern gentleman, and I care for him a great deal. He is the person who loves to talk about issues, whether it is an issue dealing with energy, as we have talked about here for a few days—the first real substantive issue we have dealt with, really, in the House of Representatives—whether it is on the Senate floor or whether it is any of the other issues I have spoken about here: the deficit, education, the environment, health care.

Nothing is being talked about. But he cares about those issues deeply. I would hope we can turn down the noise machine downtown a little bit and understand the American people want to focus on issues, issues important to them. They are tired of this “gotcha” game because they don't get you; it is just an attempt to divert attention from the issues before this country.

The PRESIDING OFFICER. The Senator from West Virginia.

FATHER'S DAY

Mr. BYRD. Madam President, on Sunday, June 19, the Nation will honor fathers with the celebration of Father's Day. Fathers certainly deserve a day to relax and to put aside for a time the heavy burden of work and worries that they carry. Most fathers are, I believe, great worriers. They feel the pressure to perform. They feel the pressure daily to go forth and to battle in conditions over which they have little control. Yet they feel that they must present to their families a facade of mastery. That is, after all, part of the “dad mystique”—the desire of fathers everywhere to be seen as the head of the household, protector for his family. He is, the benevolent provider of all good things, the safe harbor against all harm and all fears.

Today's economic conditions worry most fathers, no matter what their current earning prowess. If they are looking for work or to find a better job, recently reported economic indicators keep them awake at night. Housing prices continue to climb. Hiring is weak. Outsourcing and the offshore movement of jobs create heartburn. Most of all, the Chinese automobile may soon be competing for sales in the United States will create a few ulcers, too, I am sure, as hard-working fathers
wonder how they can compete against Chinese workers making only $2 an hour.

Fathers at the upper end of the pay scale are not immune from such nightmares either. They must still worry about mandates that could rob them overnight of their pensions, stock options, and the rising cost of college education. All fathers feel a sense of growing unease about the spiraling deficits, the uncertain future of Social Security, the weakening of American competitiveness, and the high price of international conflict. What kind of future are they leaving to their children?

On a very personal level, fathers also share common fears. Where are their children? Are they behaving? Are they growing up to be good people? Will the world be good to them in return? I know that fathers, with sons and daughters in the military, carry particularly heavy burdens of worry these days, as well as fathers who are in uniform themselves with families waiting, waiting, and praying for them at home. I hope these fathers know that the prayers of the Nation are with them.

Fathers want the best for their children, which is why they push their children to do their best. To be sure, some fathers have taken this perhaps to unseemly, even dangerous, extremes, as the stories of some “sports dads” will attest. Most fathers want their children to develop a healthy sense of competition, coupled with fairness, to learn to win and to learn to lose graciously, to foster a sense of perseverance that will stand their children in good stead no matter what field of endeavor they play upon.

Fathers want to encourage a good work ethic. They want to encourage good study habits. They want to encourage the character traits of reliability, trustworthiness, and hard work. They want their children to develop a healthy sense of competition, coupled with fairness, to learn to win and to learn to lose graciously, to foster a sense of perseverance that will stand their children in good stead no matter what field of endeavor they play upon.

and dinners, homemade gifts, and, if my family is typical, some gentle teasing. It is a day we show our gratitude, and we remember how important our dads are in our lives.

I was very close to my dad, and I cherish my memories of him.

When I lived in Nashville, I used to drive by my parents’ house everyday on my way to work. And everyday, no matter where I was, I would call to touch base and say hello.

My father was a man of extraordinary kindness and generosity. He was known throughout the community for his good works.

Before he died, he wrote a letter to his grandchildren, passing on his humble wisdom collected over a lifetime. In it, he told them:

- “Be happy in your family life. Your family is the most important thing you can ever have. Love your wife or your husband. Tell your children how great they are. Encourage them. Savor every moment you do.

- “Be happy in your community. Charity is so important. There’s so much good to do in the world and so many different ways to do it.”

He also wrote that,

- “I believe that life is made up of peaks and valleys. But the thing to remember is that the curve is always going up. The next peak is a little higher than the previous peak, the next valley isn’t quite so low.

- “The world is always changing, and that’s a good thing. It’s how you carry yourself in the world that doesn’t change—morality, integrity, empathy, and kindness are the same things in 1919 when I was born, or in 2010 or later when you will be reading this. And that’s a good thing, too.”

I have worked hard to live up to his high ideals and the sterling example he set before us. And I have worked hard to instill these values in my own sons Bryan, Jonathan and Harrison. If I have half succeeded, that is a very good thing.

As we celebrate our fathers this weekend, I also encourage everyone to reflect on the importance of fathers to the social fabric.

The National Fatherhood Initiative, a non-profit devoted to promoting responsible fatherhood, reports that today’s fathers are more present in their children’s lives than ever. Dads in two-parent families spend more time with their children than the previous generation of dads. Research also indicates that today’s fathers are more active and nurturing.

And it has a big impact.

Children with involved, loving fathers—as compared to children without—are more likely to do well in school, have healthy self-esteem, show empathy, and avoid drug use, truancy, and criminal activity. The bottom line is kids do better when their dads are around. For a while America forgot just how important dads are, but now we know in our heads what we have always known in our hearts.

So, to all our Dads, today, Father’s Day, we salute them. Dads on the front line who risk their lives for our freedom. Dads on the home front who go to work everyday to support their families. America honors you as everyday you honor us.

STATEMENTS REGARDING GUANTANAMO

Mr. KYL. Madam President, one of the things I remember that my father taught me—and it has stood me in good stead, though I have not always followed the advice—is to have strong convictions but always to deal in moderation and be reasonable in your approach, to listen to other people and try to be responsible in what you say. In all things, moderation would have applied to the advice he gave me frequently. Again, not to say one should not have strong views, but you can be more effective in communicating those views if you treat people decently, if you listen to what they have to say, and if you express your own views with a degree of humility and moderation. That is something that, sad to say, even in my time in the Senate, I have seen adhered to, sadly, less and less.

Certainly, the Senator from West Virginia sets a standard for all of us in the way that he treats this body, the reverence he has for this institution and, therefore, the care he takes to deal in this body in an appropriate and responsible way, in the great tradition of the body.

I mention that because the coarsening of our language, I suppose, can be expected to be manifested first in the political environment. It certainly has occurred with increasing intensity over the years, though, not just in political campaigns but even on the floor of the Senate and engaged in by colleagues in the Congress as well as pundits and others.

Strong subjects sometimes evoke strong emotions, and perhaps that explains why some of the rhetoric surrounding this discussion of our detention of enemy combatants at Guantanamo Bay has reached such a high-pitched level, to such a high degree of hyperbole and exaggeration—I daresay, in some cases, irresponsible characterizations.

If this were simply a matter of political rhetoric and partisan politics, I suppose that in some senses it could be excused, though it is not helpful. But here the consequences of such language, this over-the-top kind of rhetoric, can actually be detrimental to the effort of the United States that all of us support—certainly to the people we put in harm’s way, our men and women in the military, and the other services that are helping us to fight the war on terror.

This is why it distresses me to hear the characterizations of American activities and Americans as being equated with some of the worst actors in the history of mankind—phrases thrown around apparently, somewhat thoughtlessly, without due regard for the consequences, when enemies of the United States seize on the flimsiest of things to take to the streets and riot and kill each other.

The unfortunate reporting of Newsweek Magazine—which turned out not to be true—regarding desecration of the Holy Koran caused Muslims in the thousands—to riot and cause harm to each other. I believe there were at least three deaths that resulted, if I am not mistaken.

Words have consequences, and when Americans speak in irresponsible terms the actions of the people who are simply trying to do their best in trying circumstances, in ways that denigrate their motives, denigrate their actions, and that call into question the entire character of America, because of these actions, it is irresponsible. And it should not be engaged in, especially it should not be countenanced by Members of this body or the Congress, certainly not engaged in by leaders in this body. Yet, sad to say, we all have heard in the last few days this kind of language.

I will get back to that in a moment. Let me go back and try to provide some perspective about this entire debate about Guantanamo Bay.

Guantanamo Bay is a place where the United States Government has had a lease from the Cuban Government for a long time and spent about $150 million to build a prison facility to house many of the people who had been detained in the war on terrorism, primarily people who were on the battlefields of Afghanistan, there being no facilities adequate in Afghanistan.

It is a place that was designed to be able to accommodate people of different cultures. It is significantly managed by Americans who have a significant degree of medical background and training in the culture of Islam in order to ensure that the people there are treated as humanely as possible under the circumstances and with due regard for not only their human rights but their faith as well.

This country need apologize to no one in the way that over the years we have tried to adhere to human rights standards and treat people of faith appropriately. Certainly the stories—and I say “stories” because in most cases, they are mere allegations that are untrue—of treatment of people at Guantanamo Bay have raised the interest of the Holy Koran caused Muslims in the United States to be true—regarding desecration of the Holy Koran.

The unfortunate reporting of Newsweek Magazine has been so out of step that it resulted, if I am not mistaken.

Words have consequences, and when we speak in irresponsible terms.

The unfortunate reporting of Newsweek Magazine has been so out of step that it resulted, if I am not mistaken.

Words have consequences, and when we speak in irresponsible terms.
With all of this attention, I think the very small number of specific complaints that have been investigated and found to have any merit at all—something like five in number—is a testament to the commitment of the United States to adhere to standards of decency and humanity when dealing with people.

Who are these people? These are the worst of the worst. We do not have the time or the ability to round up people and lock them up just for the sake of it; it is too costly. Over 10,000 people have been captured in this war against the terrorists. Something like 520 are at Guantanamo Bay. These are the people who are the bombmakers, the bodyguards of Osama bin Laden, the financiers, the plotters, the people who have been sent out to be assassins, to be suicide bombers. These are the worst of the worst, the killers who, if let go, will return to their killing.

Since the detentions at Guantanamo Bay, the United States Supreme Court has said there is one right that these detainees have, and that is a right to have their status determined, even through a habeas corpus petition, which in the United States means a right to have their status determined, the appropriateness of your being detained. The Supreme Court did not hold they have a right to a trial, that they have a right to be charged with anything, that they have a right to a particular kind of legal proceeding. Simply, they have a right to have their status reviewed by an appropriate tribunal.

And since then, their status has been reviewed, every one of them. There is a process by which it is reviewed annually to determine whether they not only are still appropriately held, but whether they need to be held, whether they pose a threat.

In this period of time, a dozen of these detainees—many were released, some have already been recaptured on the battlefield. They went right back to killing Americans.

This is why prisoners of war are detained when captured, and it has thus been throughout modern history. In World War II, for example, we have all seen the movies and read about the internment camps of Germans and Japanese and, of course, the way Americans were held as POWs as well. With the rare exception the people at the very top of the Nazi Government and a few of the Nazi generals, the German POWs were not charged with crimes or tried for those crimes. They were simply held in these camps until the end of the war.

A couple of these camps were in Arizona. I know an Arizona physician who went through one of these camps, I believe in Nebraska. When he got out, he decided he liked America a whole lot and became a renowned physician in Phoenix. These were places that people were held until the end of the war so they could not go back to fighting against Americans. That is precisely the primary purpose of Guantanamo Bay.

For the worst of the worst, the people we do not want to go back fighting against us or committing terror against anyone else, we have to have a place to do that. I must say, in a debate with the senior Senator from Vermont last night on television—and he and I disagreed generally about this issue—he acknowledged this is not about Guantánamo Bay, but about where to have a place to hold these people, and I agree with that proposition. Some have even suggested we close this brand-new facility. If you close it, where are you going to put them? Would you like to take one of the military bases that is being closed in your State and make it available for these detainees? Maybe that is the place to detain them. I do not think so.

The issue is not closing Guantánamo Bay. I think it is, frankly, criticism of the American Government and leaders of the American Government. Some people do it for partisan political purposes. Others do it, to bring down certain people. Others, frankly, have a disregard for this country and are quick to criticize the United States.

But look at some of the specific charges. One of them is these people are being held in limbo. They are not being held in limbo any more than any other prisoner of war or enemy combatant has been held in the past. They are being held until the conflict is over so they do not go back to fighting us again.

Then they demand to know of the general and admiral who were before the Senate Judiciary Committee yesterday when we held a hearing on this: Well, how long are they going to be detained? We demand to know. We do not know how long the war is going to last. Senator, I demand to know. Will it be forever? For ever and a day, forever, will they be detained forever?

These are pretty silly questions, if you ask me. We do not want to detain these people. We would like not to have to do it. We would like to bring the war to a close, but until it is safe to release them, they are not going to be released, not unless we are going to jeopardize the service people and others who are subject to terrorism. So let’s get back to reason and solid logic here.

And why are we treating these people possibly a little bit differently than other prisoners of wars have been treated? The answer is they are not prisoners of war. That does not mean we do not treat them humanely and in accordance with the Geneva Conventions.

That is another charge, that we violated the Geneva Conventions. No, we have not. No, we have not. The United States adheres to the Geneva Conventions, and we have not violated them, and we do not intend to. Enemy combatants are not entitled to the protection of the Geneva accords to which prisoners of war are entitled.

The reason for the Geneva accords for the POWs is we want to reward people who adhere to the laws of war. What does that mean? They fight for a country, they wear the uniform of that country, they adhere themselves to the rules of war. In the case of terrorists, that does not apply. They do not fight for a country, they fight for a cause. They do not wear a uniform. They do not fight by the rules of war. They kill innocent people indiscriminately. That defines their modus operandi. That is their preferred action.

That is why they are enemy combatants, not prisoners of war. So we would not have to accord them any standards of treatment except that we are the United States of America and we say, and the President has said and Secretary Rumsfeld and everyone else in the Government has said, for the United States of America it is inappropriate to deal with these people humanely, and we will not violate the Geneva accords.

So even though they are not entitled to all of the rights of prisoners of war, there are standards that have been established and have been adhered to. In the few situations in which there is an allegation that maybe those standards might have been violated in some small way, the people have been held responsible who have violated the standards. I think there have been five cases of dealing inappropriately with the Koran at Guantánamo Bay, not having both hands on it at once or not having a white glove when one was dealing with a prisoner. It is that kind of violation.

This kind of thing has been compared by some to Pol Pot and Nazi Germany and the Soviet gulag and the human rights abuses that the United Nations complaints about each year. These comparisons are not apt. They are not responsible. They are not appropriate. They do not even begin to appropriately describe the kind of conduct that our people have engaged in and the crimes against humanity that were referred to. To even think of them in the same sense is unthinkable.

What about the question about charging them? There is a suggestion they should either be charged or released. Well, this is not a fishing contest. This is not catch and release. This is serious. This is war. When somebody is trying to kill you and you can detain them, you do it. The alternative is, obviously, if you kill them, you kill them. But hopefully you do not have to kill them; you can detain them, and you can put them in a place that, until the end of the war, is safe for them and safe for you.

For those who have committed war crimes, we have the right to charging them with such crimes, and there is a special tribunal set up to try them for those crimes, and they can be tried. Now, there are cases in the courts of appeal right now that are helping to define the parameters of those trials and until that is very clear those will not proceed, but that is the way we will deal with those cases.
So for those that can be tried, obviously we will do that, but that is a very small percentage. There is no point in charging prisoners of war or enemy combatants with anything because the whole point of their being held is to prevent them from going back to war against you.

The final purpose for this detention is intelligence gathering. We have found that human intelligence is the best intelligence and that the highest percentage of human intelligence is the interrogation that has occurred here and elsewhere that has led us to learn a lot about the techniques of the terrorists, their plans, the names of others, and other important information that has helped us save lives. So the point of this detention is to save lives, to keep people from killing us, and to get information that will help us to prevent future killing. That is an appropriate purpose of Guantanamo.

So the irresponsible language, when they seem to leap to conclude that the United States must have done wrong simply because a lawyer or some group or a prisoner has alleged abuse—and by the way, remember that the al-Qaeda training includes a manual in how to allege that they are being abused as a prisoner, as a detainee. They are supposed to allege abuse, and they do. So let us not jump to the conclusion that any al-Qaeda terrorist who alleges abuse at Guantanamo must be right and all of the Americans, from the President on down, must be wrong. I like to put my chances on Americans trying to do the right thing. We will make mistakes, but we will try to correct those mistakes and punish those responsible. In the meantime, I think the benefit of the doubt goes to those people whom we have given a very hard job to do.

"To get back to my original point, the use of irresponsible language, irresponsible charges has consequences. It can hurt those people that we put in harm’s way by turning international public opinion against the United States. When responsible American officials make irresponsible charges, all the world listens. When they listen, sometimes they react very badly. It does our cause no good when—as some of my colleagues have said, this is all about winning the hearts and minds of the Muslim world. There is a great deal of truth there. We must do good in this battle to denigrate our own actions in a way that is calculated to or one must know will inflame the passions of terrorists and others around the world that support the terrorists. It does no good to this ultimate goal of winning hearts and minds to unduly criticize America, Americans and American leaders for actions that are nothing more than what any Nation has the right to do when it captures people who have been engaged in combat or terrorism against it.

I urge my colleagues to keep this issue in perspective, to understand the reason we detain people, to understand the impact of irresponsible language, to tone down the rhetoric, understand that the President and all acting on his behalf are trying their very best to do what we want them to do, and at the end of the day, this is all about winning the war on terror, saving American lives and moving on to a more peaceful world.

Mr. Frist. Madam President, in the past few weeks a number of allegations have been leveled against the Guantánamo detention center. There have been some legitimate questions about the treatment of detainees, which is fair and responsible. The United States is governed by the rule of law. And it is proper for the Senate, in its oversight role, to ask the executive branch about such matters and make sure the interests of our constituencies and the Nation are being properly addressed.

That being said, in many cases, the allegations that have been made recently have been false, distorted or misreported. Newsweek, as we are all too familiar, erroneously reported that an American soldier flushed a Koran down a toilet. That report, which was later withdrawn, resulted in widespread protests and the deaths of several individuals. When the facts came out, we learned that, in the 3 years that Gitmo has been in operation, there have only been 5 cases of " mishandling" of the Koran by our military staff.

In those few instances where mistakes were made—and people do make mistakes—the accused and persons were held accountable.

We also learned that the prisoners themselves had abused the Koran 15 times, in some cases, reportedly, to implicate our soldiers in a religious crime.

Multiple inquiries have found that the detainees at Guantánamo are being treated in accordance with the Geneva Conventions and U.S. law. They are well fed and well housed. They have access to legal counsel. They have access to medical care. They have access to religious chaplains, and even psychological counseling if they request it.

Some might say they are living in more luxury and safety than our soldiers and marines fighting the terrorists in Afghanistan and Iraq. Our service men and women in the field usually eat cold, packaged meals; sleep in crude living areas without beds; and often wonder if they will live to see another day, all in the cause of promoting freedom and democracy and defending our country.

One thing is for sure, the detainees are enemy combatants who were picked up off the battlefields of Afghanistan and elsewhere. They are hardened terrorists and have pledged their lives to jihad, the death of Americans, and the destruction of our country.

They are being held at Guantánamo so they don’t kill more Americans, either at home or abroad. They are being held at Guantánamo so that we can question them, so that we can prevent their colleagues from committing more terrorist acts.

The intelligence we have learned about the terrorists, their networks, their plans, and so on, has been a treasure trove that has saved lives and is helping us win the war on terror.

Personally, I am convinced that Guantánamo is humbly and fairly serving its much needed purpose. And I am also convinced that if we closed the Camp there wouldn’t be a lot of difference to the terrorists who hate us and murdered 3,000 innocent American citizens before Guantánamo or the war on terror was ever conceived.

And it will make no difference to those who have agitated and protested against American policy from the very start.

We can debate whether Guantánamo helps us save lives and win the war on terror. But what I can’t stomach are the comparisons being made between Guantánamo and some of the most egregious symbols in the history of mankind.

I am referring to the remarks of Ambassador International officials that compared the U.S.-run Guantánamo to the Soviet gulag.

I am referring to the International Committee of the Red Cross official who reportedly compared U.S. soldiers to Nazis.

And, regrettably, I am referring to a Senate colleague who, this week, called Guantánamo a " death camp" and drew parallels to Hitler’s Germany, Stalin’s gulags, and Pol Pot’s killing fields.

This was a heinous comparison against our country, and against the brave men and women who have taken great care to treat the captured terrorists with more respect than they would ever have received in any point in human history.

It is reported that nearly 9 million people were killed by Adolf Hitler; about 20.7 million were killed in the Soviet gulags from 1929-1953; and over 1.5 million people were killed in Cambodia from 1975 to 1979.

And there is no need to recount the brutal torture and manner in which many of these people died, most of whom, if not all, were innocent people.

Do we know how many people have been killed at Guantánamo? Zero. That’s right: zero people.

And yet we have members of this body who have come to the Senate floor to level the most egregious of charges against our troops in Iraq, and charge the United States with crimes against humanity. To accuse our sons and daughters, who are serving proudly to keep killers from the battlefield, with committing genocide and war crimes is unforgivable.

It is wrong to make these comparisons; it is wrong to suggest such things. It is unfair to our military; it is unfair to the American people; and it is unfair to this body. This is wrong and it is the worst form of demagoguery.

It is anti-American and only fuels the animus of our enemies who are constantly searching for ways to portray

CONGRESSIONAL RECORD — SENATE

S6721

our great country and our people as anti-Muslim, anti-Arab. It is this type of language that they use to recruit others to be car bombers; suicide attackers; hostage takers; and full-fledged jihadists.

It is darkly ironic that those who want to close Guantanamo for the sake of public diplomacy are themselves wreaking great damage to our public diplomacy by floating outlandish and slanderous allegations. It is not right. We can, and should, have serious debates about legitimate policy questions. But comparing our Nation, our Government and our military to the regimes of Hitler’s Germany, Stalin’s Soviet Russia, and Pol Pot’s Cambodia is the height of irresponsibility.

Frankly, I think it demands an apology to our service men and women, and to all others in our Government who are working hard every day to stop the terrorists, prevent attacks on our homeland, and to win the war on terrorism. We are fighting a war. And young men and women are out in the field, risking their lives. For their sake, the toxic rhetoric must stop.

CMA FESTIVAL

Mr. FRIST. Madam President, Nashville, TN is home to some of the best music in the world. Last weekend, I had the pleasure of being back home during the 2005 Country Music Association Festival—“Country Music’s Biggest Party.”

More than 130,000 country music lovers from around the world came to hear their favorite stars perform for the 4-day extravaganza. The energy is electric.

From legendary artists like Kenny Rogers and Dolly Parton, to new talents like Sarah Evans, Rascal Flats, and Gretchen Wilson, more than 400 country music stars perform over 70 hours of artistry.

Not only are fans treated to the best country music, but they get to meet their favorite stars up close and personal at the Fan Fair Exhibit Hall where performers sign autographs and mingle with the crowd.

This year, fans were treated to the first ever Music Festival Kick-Off parade in downtown, and a spectacular fireworks display, Sunday night, at the Coliseum. In just 4 days, the festival generated more than $30 million for the local economy.

The CMA Festival has become a Nashville institution, joining the Grand Ole Opry and the Ryman Auditorium as symbols of our rich musical traditions.

Nashville’s thriving music scene has also attracted another festival called Bonaroo—a 4-day event that brings more than 75,000 music lovers to Manchester, TN. The event showcases a wide variety of music including rock, jazz and bluegrass.

This year, more than 80 bands participated, including: the Allman Brothers; Dave Matthews; and Alison Krauss.

In just 4 years, Bonaroo has become America’s premier rock festival.

Tennessee is truly a musical mecca. And it has launched some of the biggest careers in music history, including: Elvis Presley; Hank Williams; Johnny Cash; Loretta Lynn; B.B. King; and Garth Brooks, one of the biggest selling popular music artists of all time.

I’m proud and blessed to be from this extraordinary place, and I am proud to be from Nashville, “Music City USA.”

OBSTRUCTIONISTS

Mr. LAUTENBERG. Madam President, on Tuesday—for the record, today is Thursday—President Bush gave a speech in which he complained that Democrats are obstructionists because we are not accepting his entire agenda.

The President also said that we say no to everything to him and I watched him on TV. But look at all the things he says no to. President Bush said no to Tony Blair when the Prime Minister was here to ask for more help for Africa, to help with AIDS, hunger, and loan reduction. He said no.

President Bush says no to kids with juvenile diabetes, autism, or other childhood diseases, when they ask to be permitted to do stem cell research to see if we can prevent those diseases from plaguing your children for life.

President Bush said no to parents and teachers who want education fully funded.

President Bush said no to a real Patients’ Bill of Rights.

President Bush said no to making polluters pay for Superfund environmental cleanups, a program that has been very successful. I was author of the second iteration of Superfund in 1996. It was a program that needed some time to get going. But now we can look at lots of sites that have been cleaned up and are put to useful purposes that don’t threaten children or families who live in the area. President Bush said no to making the polluters pay. He said no to paying the taxpayers pay for the cleanup problems the polluters created.

President Bush said no to getting tough with the Saudi Arabians, so we can really bring down oil prices. The Saudis said no to our proposal to ask for help in keeping oil prices down. Look what has happened to oil prices. I remember so vividly in the last Presidential campaign, when Senator Kerry challenged President Bush. The thing that came out of the White House—the statement most clearly was: If Senator Kerry becomes President, you are going to see taxes on oil prices. If you want to see taxes on oil prices, just look at what happened. The only difference is these taxes are being paid to Saudi Arabia, a country that is not friendly to the United States. But the public is paying for it. Gasoline has gone from $1.20 to, in some places, $2.50, which I paid recently. I don’t hear the President saying no to them when they call and say they want help from us.

And the President calls us the obstructionists? I find that label very ironic. What if you oppose any of President Bush’s policies, you are an obstructionist. Frankly, in a democratic Nation, that is unacceptable. It is a disastrous line of thinking. In my view, if you don’t like challenge, if you don’t like debate, then you don’t like democracy. This is not a nation where we have a dictator. There should not be a time when simply because the President of the United States thinks it is a good idea that we avoid debate or challenge that we should. No, not on your life. That is how we get ideas and how we challenge the public in this country to say something about the programs in which we are engaged.

The President says: If you don’t like my programs, then you are an obstructionist.

Tell that to the people whose pensions are fading in front of their eyes. Tell that to the people who work 25, 30 years for a company and see their jobs ended, without the prospect of coming anywhere near the salary they were earning. No, he doesn’t say no to the people he ought to say no to. The President proposed the other day—yesterday—that the tax rate that has done us so much good is something he wants to support. If he would say no to that—so that the wealthiest among us don’t go ahead and wait for their airplanes to be delivered after 3 years. If you order a private airplane—a $25 million or $30 million airplane—if you want to buy one, sorry, there is a line. If you want large yachts, 100 to 200 feet, you have to wait 2 years. What a pity it is for those rich guys to have to pay their share of taxes. I am one of those who have been so fortunate in America. I created a business that got to be very big, along with two other friends who grew up in the poor neighborhood in which I lived. I am more than willing to pay more taxes because, if I do that, I have more money left.

I wish the President of the United States would say no to those people and yes to the people struggling to make a living; yes to the kids who cannot afford to pay for college tuition; and yes to the people who want education fully funded. Democrats are obstructionists because we should. No, not on your life. That is how we get ideas and how we challenge the public in this country to say something about the programs in which we are engaged.

Our constituents elected us to represent them and their viewpoints in the Senate. One thing I knew when I came to this Senate—now over 20 years ago—I wasn’t elected by all the Republicans, by a long shot. I am not even sure I was elected by all of the Democrats. But I won. When I stood and took my oath, I never thought once
that I don’t have to pay attention to those who did not vote for me—the Republicans, typically. When I won this seat and the responsibility, I accepted the responsibility, and I had an obligation to every citizen in my State and the country to listen to them and try to understand their needs. That is what you get in a democracy. You get the opportunity to represent all of the people. It is not just the rubberstamp of the President’s initiatives. Our Constitution created the Senate as a check on Presidential power. The Founding Fathers created the Senate in order to obstruct the President, when necessary.

Mr. President, throughout history, so-called obstructionists have been the champions of democracy. Looking at these photos of people like this who resisted tyranny, are they obstructionists? Are the people who stood up against tyranny in so many other countries obstructionists? Are they people who are fighting for a cause, or are they obstructionists? This picture looks like Boston. Can those people be called obstructionists as they tried to defend their city? I don’t think so. If we look further, there were people who disagreed with some of the Founding Fathers’ views, who obstructed the King of England with our Declaration of Independence. It was a pretty good idea, one would have to assume. There was another time when an obstructionist stood up with incredible courage; her name was Rosa Parks. She obstructed immoral rules in her State, and in the picture you see her being fingerprinted before she goes to jail. Obstructionist? There was a former Republican Senator, Margaret Chase Smith. She spoke so eloquently in 1950 in the Senate in order to obstruct the tactics of Senator Joe McCarthy, with his belligerence and his kind of approach. Is that an obstructionist or is that a heroine? Women fought for the right to vote. The young women who are here tonight cannot think about times like that. Imagine a woman not being allowed to vote. Were they obstructionists?

Mr. President, the signs in the picture say, “How long must women wait for liberty?” And ‘Mr. President, what will you do for woman suffrage, for the right to vote?” Yes, they obstructed immorality.

So obstructionism, per se, is not an evil force if you are on the side of the people.

I say here today, in light of our democracy’s heritage of productive obstructionism, I will be proud to obstruct some of President Bush’s proposals this year.

I agree that we should obstruct the President’s plan to privatize Social Security and throw our retirement security into the stock market. I will be happy to obstruct those. If people want to take a chance, if they want to gamble, they should go to Atlantic City or Las Vegas, but do not do it with your pension because when you need it, it is liable not to be there.

A few months ago the President presented an unrealistic and flawed budget proposal. I hope to obstruct many items in the President’s misguided budget proposal. For example, I hope to obstruct Bush’s plan to cut Medicaid by $60 billion over 10 years and the cuts in the clinic at diagnosis. About 7,000 in 100,000 of our Nation’s most vulnerable populations. They need that help for their health and for their families. I am not going to stand by and not obstruct those cuts.

President Bush wants to take health care away from lower income families and lower income senior citizens. Is there any compassion there? I do not think so.

If we look at Amtrak, the Nation’s premier rail service, the President wants to leave it without money, zero fund Amtrak, shut down the system. You better believe I am going to be there to obstruct that plan whenever I can. Shut down the system that took 25 billion riders to their destinations last year?

The President also wants to slash community development programs. He proposes cutting funding to these programs by more than a third. Nearly $1 billion will of communities across the country. I want to obstruct that.

In regard to protecting our homeland, President Bush has proposed reducing homeland security block grants, cutting them by $235 million. America’s soil, America’s land, it is a second front in this war against terrorism, and our soldiers are paying a price for their flight there, a terrible price, because the President said no to having enough soldiers to do that job right from the beginning. There are great generals who now reflect on the mission and say: We could have used more soldiers there. One very senior general got fired for suggesting we need over 300,000 troops there.

The President said no to them, but he should not say no to having homeland security financed sufficiently to protect our citizens when they go to work, go to school, go to the library, or travel about our country. I hope everyone in this Chamber will obstruct that cut. I would like my colleagues to say no to that.

On the issue of airline travel, President Bush wants to increase the airline passenger tax by $5 for each leg of a flight. A family of four traveling with a layover each way could see their taxes increase by up to $64 for their round trip.

People are already paying too much in airline passenger taxes. I will obstruct, yes, obstruct President Bush’s tax increase.

On our environment, President Bush’s budget cuts environmental and natural resource programs by $2 billion. With child asthma cases increasing and other environmental dangers increasing across the country, why would we reduce environmental protection?

I have a grandson who is 11, and he happens to have asthma. He is the oldest of my 10 grandchildren. He is a very good athlete. But whenever my daughter takes him to compete in a baseball game or a soccer game, she always checks where the nearest emergency room is. And if she wants to have an attack. Childhood asthma is growing in this country by leaps and bounds, and it is because the air is bad and we are not doing enough to clean it up. Asthma and other environmental dangers are increasing. Why would President Bush say no to environmental protection? President Bush, I do not know why you want to obstruct funding for those programs.

Obstructionism is all that separates democracy from dictatorship. Sometimes obstruction is necessary, and in the case of President Bush’s agenda, it deserves a healthy amount of obstruction. I hope my colleagues on this floor, regardless of party, will look at each of the President’s and say: Remember that President Bush obstructed funding for teaching, for schools, for stem cell research, for research on Parkinson’s or Alzheimer’s. Remember, he obstructed funding for those programs. He took care of the rich, who are only getting richer.

If you looked in the New York Times about 2 weeks ago, there was an article about how the richest in this country are leaving the rich behind, about how 90 percent of the people in this country who work to keep these families together own only 10 percent of the assets of the country, and it is just the reverse on the top side.

In the case of President Bush’s agenda, it deserves a healthy amount of obstruction, and I hope the people in this Chamber have the courage to stand up and say: No, I obstruct those terrible cuts and that mean, unhelpful disposition to make it tougher for hard-working families in this country to be able to support themselves, their children, and their needs.

BOLTON NOMINATION

Mr. DODD. Madam President, last evening, something rather extraordinary happened in the waning minutes of the session. My very good friend from Kansas, the distinguished chairman of the Intelligence Committee, took the floor to discuss the Bolton nomination—an issue, I say to my colleagues, no one wants to be resolved more quickly than the Senator from Connecticut. I have been involved in this for two straight months. The Presiding Officer and I are both on the Committee on Foreign Relations. This goes back to April 11, the day we had hearings. My hope is that we can resolve this matter sooner rather than later.

Last night, my friend from Kansas took the floor and announced that he knew what names the members of the Senate Foreign Relations Committee were concerned about when dealing
June 16, 2005

CONGRESSIONAL RECORD — SENATE
S6723

with the Bolton nomination. This is the matter of the intercepts Mr. Bolton requested—some 10 of them—invoking 19 names of U.S. citizens, Americans, on those 10 intercepts. We made the request earlier on to allow the chairman and member of the Intelligence Committee, as well as the chairman and ranking member of the Foreign Relations Committee, to review the raw data on those 10 intercepts to determine whether there were any associated with Mr. Bolton’s desire to see those intercepts, since there has been a basis of information concerning efforts by Mr. Bolton to intimidate a number of people within the intelligence community—both the intelligence and research division of the State Department, as well as the CIA—concerning certain intelligence conclusions. Therefore, it is a matter of concern to many of us on the committee to have an opportunity to review whether there has been any further intimidation.

I offered initially that we have the four Senators I mentioned review the matter rejected by the Administration. I then suggested why not just submit the names we are interested in and have the Intelligence Director inform us as to whether those names were part of the intercepts. If they were not, end of matter. If they were, we might want to proceed further to determine why those names were sought out. That was also rejected because the number of names requested to be reviewed was some 36 names. The reason for the request for 36 names is because we had no idea specifically what these 10 intercepts involved. We were even denied a synopsis of what may be involved. We were flying in the dark about this information.

At any rate, my colleague and friend from Kansas proceeded to say he was familiar with what the six or seven names would be that we should be interested in. As a result, he proceeded to publicly name five of the seven individuals. Not surprisingly, he also announced he consulted with Director Negroponte, who informed my friend that none of the names Senator Roberts provided to the administration were among the names Mr. Bolton and his staff were given by the National Security Agency.

What is remarkable about what happened last evening is that the Senator from Kansas is not a member of the Senate Intelligence Committees, the committee of jurisdiction with respect to the Bolton nomination. The Senator did not participate in more than 10 hours of hearings on the nomination. I sincerely doubt whether our colleague from Kansas to provide any input to the list that was settled upon.

I do believe we owe our colleague from Kansas a debt of gratitude, because the administration has at least now accepted the principle of cross-checking names against the list of names reviewed by Mr. Bolton. If the administration, in a matter of hours can cross-check seven names offered up by Senator Roberts, chairman of the Intelligence Committee, why is it a problem to cross-check the 36 names we have drawn up based on our own participation in the 10 hours of committee hearings and review of over 1,000 pages of interview?

We are on a fishing expedition here at all to derail the Bolton nomination. We have not opened the State Department phonebook and selected names at random. There is a very specific rationale for each of the names on the list of 36 developed as a result of 10 hours of hearings, 1,000 pages of transcripts, and some 30 interviews.

The report of Mr. Bolton’s hearing quite clearly and starkly paints a picture of an administration ideology determined to have his own way. We know what he tried to do with the underlings at the State Department and CIA—that is not in debate—who dared resist his efforts to endorse as the Intelligence Committee, why is it a problem to cross-check the 36 names we have drawn up based on our own participation in the 10 hours of committee hearings and review of over 1,000 pages of interview?

TOBACCO

Mr. KENNEDY. Mr. President, this morning’s reports on the Justice Department’s tobacco case are deeply disturbing for all Americans concerned about the health of their children. The Justice Department memos obtained by prosecutors show that high-level Bush administration political appointees overruled professional lawyers in the case in slashing damages the tobacco companies would be required to pay. There is no clearer example of this administration’s view that Government should come first and real people last. Whether it is global warming or Iraq or tobacco, their view is that the facts
should never be allowed to get in the way of their rightwing politics.

There are few initiatives that would have a greater impact on the health of our children than smoking prevention. No parent in America ever says, ‘I hope my child grows up to be a smoker.’ Parents know that every child we prevent from smoking will have a healthier, fuller, happier life.

That is what this lawsuit was all about—requiring big tobacco companies to pay for antismoking programs. I urge the President to agree to the Justice Department's compromise with his Justice Department. They made a political decision to back big tobacco. Now the President should make the responsible decision to back America's families.

If the tobacco companies do not pay for their misdeeds, then our families will pay with more cancer, more illness, and shortened lives.

From a public interest perspective, the worst thing would be for the Justice Department to compromise with the tobacco companies based upon the weak and inadequate demand that DOJ made to the court last week. At this point, we have far more confidence that the court will do the right thing than the Justice Department will do the right thing. The court has the authority to look beyond the Justice recommendations and to order strong remedies based on the evidence presented at the trial. We should let the court decide.

AGAINST RACE-BASED GOVERNMENT IN HAWAII, PART III

Mr. KYL. Madam. President, I rise today to ask unanimous consent that the RECORD following my present remarks be printed in the RECORD following my present remarks.

The PRESIDING OFFICER. Without objection, it is ordered.

Mr. KYL. This history is in the appendix to “Hawaii Divided Against Itself Cannot Stand,” an analysis of the 1893 apology resolution and S. 1477, the Native Hawaiian Government Reorganization Act, that was prepared by constitutional scholar Bruce Fein. I have previously introduced earlier parts of that analysis into the RECORD—this is the third and final installment.

The appendix to Mr. Fein’s analysis carefully explains the nature of the Hawaiian monarchy, its evolution toward constitutional democracy, the attempt by the last monarch to undercut those reforms and compromise the judiciary, and the actors involved in stopping that monarch and establishing a democratic republic. This account is a useful antidote to the tendentious blame-America narrative provided in the 1993 apology resolution. The truth is much more nuanced than the resolution’s ‘‘Whites vs. Natives” account. The real story is about a multiracial constitutional monarchy slowly evolving toward democratic norms and equal rights—a process whose final step was the admission of Hawaii as a State in the Union. That step was approved in 1959 by 94 percent of Hawaii’s voters—large majorities of non-Natives and Natives alike.

The Native Hawaiian Government Act would undo that step—Hawaii’s admission to the Union as a unified people and State. Indeed, it would even undo the progress made under the Ka-mehameha monarchy. That constitutional monarchy was not a monoracial institution in the modern sense, but one that included all races. This bill would create, for the first time in Hawaii since the early 19th century, a government of one race only. This is not progress.

I urge my colleagues to read Mr. Fein’s history, and to ask themselves why we would want to undo the achievements of past generations of Hawaiians by enacting S. 1477 and creating a race-based government in Hawaii.

EXHIBIT 1

(From the Grassroot Institute of Hawaii, Jan. 1, 2005)

Appendix

The apology issued by the United States Congress in 1893 to the Native Hawaiians for the "illegal" overthrow of the Hawaiian monarchy and its annexation to the United States is riddled with historical inaccuracies.

The resolution, authored by the Committee of Safety, the political juggernaut that deposed Queen Lili’uokalani, "represented American and European sugar planters, descendants of missionaries, and financiers." The language fails to disclose that deposed Queen Lili’uokalani, "rep-...
and live as the white people do." The following year, 1820, the first American missionaries arrived in Hawaii. Soon after, Kaahumanu took charge of Christianity and made the Hawaiian Kingdom the first nation in the world to adopt Christianity. These changing factors in the colony's religion, culture, and governance of Hawaii were the work of the Native Hawaiians themselves.

All under the leadership of the Native Hawaiian monarchy. The Apology Resolution decries the imperialist tendencies of the United States and the disfranchisement of the native Hawaiians remained contentious on the monarchy's good graces. Several attempts to inject the Ten Commandments into the civil code of King Kamehameha III actually banned Catholic missionaries for a time.

The Hawaiian monarchy had gained interna-
tional recognition by the reign of King Ka-
mehameha III. The child kingly power of his regent, Kaahumanu, who remained the de facto ruler until her death in 1832. While the regency yielded significant changes to Hawaiian common law, including the introduc-
tion of jury trials, King Kamehameha III af-
fected a seismic shift toward democracy when he produced the Constitution of 1840. The bill of rights included the following:

The Apology Resolution also casts United States pressure on the Provisional Government claiming that "But for the notable role of William McKinley in Congress boasting Native Hawaiian ancestry, five out of ten elected Delegates to Congress boasted Native Hawaiian descent. He repeated that the troops when called upon to depose King Kalakaua and install a minority embarked on an ill-fated effort to depose King Lunalilo and King Kalakaua. The Hawaiian monarchy itself instigated democracy, property rights, and a system of common law into Hawaiian society. The annexation did not alter those institutions.

The Constitution of 1887 extended democracy to the selection of nobility, reduced the arbitrary power of the King, stipulated that only the legislature could approve constitutional changes, and mandated that no cabinet minister could be dismissed without the legislature's consent. While the King signed the new constitution under pressure from a militia group, the Honolulu Rifles, the net effect of the revisions provided Hawaiian citizens with a more democratic government.

Many native Hawaiians expressed concern over this "interventionist" policy, fearing that the government's ability to protect life and property would not take sides with either the Liberal Party, but would protect American life and property.

Members of the American Bill of Rights, and mandated that any state legislature disband or depose the King, ceding power to his regent, Kaahumanu, who remained the de facto ruler until her death in 1832. Many native Hawaiians expressed concern over this "interventionist" policy, fearing that the government's ability to protect life and property would not take sides with either the Liberal Party, but would protect American life and property.

Members of the American Bill of Rights, and mandated that any state legislature disband or depose the King, ceding power to his regent, Kaahumanu, who remained the de facto ruler until her death in 1832. While the regency yielded significant changes to Hawaiian common law, including the introduction of jury trials, King Kamehameha III affected a seismic shift toward democracy when he produced the Constitution of 1840. The bill of rights included the following:

The Apology Resolution also casts United States pressure on the Provisional Government claiming that "But for the notable role of William McKinley in Congress boasting Native Hawaiian ancestry, five out of ten elected Delegates to Congress boasted Native Hawaiian descent. He repeated that the troops when called upon to depose King Kalakaua and install a minority embarked on an ill-fated effort to depose King Lunalilo and King Kalakaua. The Hawaiian monarchy itself instigated democracy, property rights, and a system of common law into Hawaiian society. The annexation did not alter those institutions.

The Constitution of 1887 extended democracy to the selection of nobility, reduced the arbitrary power of the King, stipulated that only the legislature could approve constitutional changes, and mandated that no cabinet minister could be dismissed without the legislature's consent. While the King signed the new constitution under pressure from a militia group, the Honolulu Rifles, the net effect of the revisions provided Hawaiian citizens with a more democratic government.

Many native Hawaiians expressed concern over this "interventionist" policy, fearing that the government's ability to protect life and property would not take sides with either the Liberal Party, but would protect American life and property.
of many peoples who, blended together on a
benign basis of political and race equality,
combine to form the Kingdom of Hawaii . . ." The Akaka Bill would thus represent a
wretched regression in race relations that
would occasion equally wretched ills.

JUNETEENTH INDEPENDENCE DAY

Mr. OBAMA. Madam President, I was
pleased to join the Senator from
Michigan, Senator LEVIN, in submit-
ting a resolution on the Juneteenth
Independence Day.

I have heard people ask, “Why cele-
brate Juneteenth?” We have so many
holidays and remembrances already—
why add more history to the calendar?

But of course, Juneteenth is not just
about celebrating history. It is about
learning from it. Just like the day
when the greatest civil rights leader of
our time was born or the day when we
finally gave African Americans a ballot
and a voice. Juneteenth is a day when
we can look back on a time when ev-
everyday Americans faced the most
daurant challenges and the slightest
odds and still persevered. When they
said “we shall overcome,” and they did.
When their history is told by so many
for so long finally led to the victory of
freedom over servitude; of independ-
ence over enslavement.

Juneteenth is a day that allows us to
remember that America is still the
place where anything is possible. It has
been that place in the past, and it can
be that place in the future when it
comes to the challenges we have yet to
meet.

And so when we think of those chal-
enges—when we think of the injus-
tice we still face and the miles we have left
to march—when we think of the mil-
ions without health care, the children
without good schools, the families
without jobs, and the disparities that
still exist between black and white,
rich and poor, educated and uneduce-
thed—we think about all these
challenges, we can also think
“Juneteenth.”

We can think of a day when the word
began to spread from town to planta-
tion to city to farm that after more
than a hundred years of slavery, mil-
ions were now free. That after so
many hopeless days and years of de-
spair, the impossible was now truth;
the shackles were now broken and a
new day was finally here.

In the memory of this day, I believe
we can find hope for all the trying days
we have yet to face as a people and as
a nation. And as we continue to over-
come, we will continue to celebrate
those victories as historical markers
that give future generations the same
hope we have today.

I commend Senator LEVIN for his
longtime leadership on civil rights
issues and urge my colleagues to sup-
port this resolution.

Mr. KERRY. Mr. President, I wish to
recognize the upcoming Juneteenth
celebration that will occur this Sun-
day, June 19, 2005. This celebration

commemorates the end of slavery
throughout the United States. Al-
though the Emancipation Procla-
mation was issued on January 1, 1863,
the information had not been passed to
the most rural parts of the South until
some two and a half years later when
General Gordon Granger entered Gal-
veston, TX on June 19, 1865, and issued
the proclamation, officially freeing the
town.

There are a number of theories to ex-
plain why it took so long for the mes-
sage of freedom to reach many slaves
throughout the South. While there is
yet to be a definitive explanation for
the delay, as we continue to recognize
the importance of this date, we can be
assured that scholars will continue to
research this part of our Nation’s his-
tory.

Annual Juneteenth celebrations have
long been a part of our Nation’s his-
tory. Although they were held in the
years immediately following 1865, they
were not popular in the Jim Crow-era
South. In fact, they were banned from
public property, and, in order to con-
tinue the celebrations, churches
throughout the South held fundraisers
to sponsor Juneteenth events. This was
common until the Great Depression,
when people could no longer afford the
necessities of everyday life, let alone
celebrations of our past. At the same
time, in many public schools, teachers
often focused discussion on the day of
the Emancipation Proclamation, even
though it has immediate impact for
slaves in many parts of the South.
Thus, there was limited recognition
of the importance of Juneteenth until the
Texas legislature recognized it as an
official holiday on January 1, 1980.

This weekend we recognize this im-
portant celebration. In so doing, we
take time to reflect on the evil of slav-
ery. This is a time to learn from the
past and to redouble our efforts to en-
sure that the values of freedom and lib-
erty in this country are afforded to all
its citizens. Juneteenth is a day for ref-
lection, for prayer and for hope that
our country will continue to grow to-
gether in the spirit of liberty, equality
and justice.

I am proud to honor the 140th com-
memoration of the African American
emancipation day, Juneteenth, June
19, 1865.

HEROES AMONG US” AWARD

RECIPIENTS

Mr. KENNEDY. Mr. President, all of
us in New England are proud of the
Boston Celtics. They led the Atlantic
Division of the NBA this season, but
they are also leaders in the commu-
nity. Each year, the Celtics honor out-
standing persons in New England as
“Heroes Among Us”—men and women
who have made an especially signifi-
cant impact on the lives of others.

The award, now in its 8th year, recog-
nizes men and women who stand tall in
their commitment to their community.

The extraordinary achievements of the
honorees this year include: saving lives,
sacrificing for others, overcoming ob-
comings to achieve goals, and lifelong
commitments to improving the lives of
those around them. The winners
include persons of all ages and all
colors—life-saving community leaders,
founders of nonprofit community
organizations, members of the clergy, and
many others.

At home games during this season,
the Celtics and their fans salute the ef-
forts of an honoree in a special prese-
tation on the basketball court. So far,
over 300 individuals have received the
“Heroes Among Us” award.

The award has become one of the
most widely recognized honors in New
England. I commend each of the hon-
orees for the 2004–2005 season, and I ask
unanimous consent that their names
and communities be printed in the
RECORD.

There being no objection, the mate-
rial was ordered to be printed in the
RECORD as follows:

Bill Amino, Scituate, RI
Mattie Arkord, Brighton, MA
Suzin Bartley, Milton, MA
Boston MedFlight, Bedford, MA
Keyes Casanova, Boston, MA
Mike Cataruzolo, Watertown, MA
Marisol Chalas, Lynn, MA
Erika Ebbel, Cambridge, MA
Jini Fairley, Dorchester, MA
Judi Fanger, Needham, MA
Autumn Faucher, Pelham, NH
Students from Fenway High School, Boston, MA
Sue Fitzsimmons, Wellesley, MA
Officer Steven Fogg, Waltham, MA
Lauren Fox, Brookline, MA
Gladys Aquino Gaines, Andover, MA
Sue Annino, Scituate, RI

men: Jack Bryant, Cohasset, MA; James
McLaurin, Weymouth, MA; Enoch
Woodhouse, Boston, MA
Nancy Tyler Schoen, Franklin, MA
Steven Vellicci, Jr., Tyngsboro, MA

NOMINATION OF THOMAS

GRIFFITH

Mr. BIDEN. Madam President, I ask
unanimous consent to have printed in
CONGRESSIONAL RECORD — SENATE S6727

June 16, 2005

the RECORD my statement on the nomination of Thomas Griffith.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

RECOGNITION OF ECONOMIC EDUCATION ACHIEVEMENTS

- MR. AKAKA. Mr. President, I want to recognize the achievements of several individuals from Hawaii who have excelled in an area that is very dear to me, the area of economic education.

First is Lance Suzuki, a teacher at Maryknoll High School in Hawaii. For his AP Economics class he developed a new and very innovative piece of curriculum that was designed to involve the students in learning economics. This lesson is called “What Does 2 Trillion Dollars Buy?” where students participate in learning the political side of the economy as well as how the federal budget is developed and approved by the Congress. For this lesson, he was recognized by the NASDAQ Stock Market Educational Foundation, Inc. and the National Council on Economic Education as the Grand Winner of their 2005 National Award.

Economic education is very important to our nation. Commercial marketing continues to target younger audiences—not just teenagers, but young children—to become consumers and in some cases provide them with easy access to lines of credit. We must ensure that our students have the necessary tools for sound financial decision making. Lance Suzuki’s curriculum achieves this important goal. Not only will his students and school benefit, but all of us will gain from the innovative efforts of Lance Suzuki. I am proud that a teacher in my home State of Hawaii has been recognized with this prestigious award for expanding economic education.

I also wish to congratulate a group from Iolani School. They are students Justin Van Etten, Lara Malins, Tyler Mizumoto and Reed Ayabe, and their coach, Col. Richard Rankin. These four students and their team were selected by the Richard T. Farrell Foundation to participate in the Top Iolani School Economics Team. On May 23, 2005, they won the 2005 National Economics Challenge, a competition that started out with 34,000 teams nationwide. The future of our country depends on our students, and I am pleased to know that Hawaii is turning out such successful young people. I earnestly congratulate them for their achievements.

I have been very active in working to address economic and financial illiteracy in the United States. I have introduced legislation including the Mutual Fund Transparency Act, the College Literacy in Financial Education Act, and the enacted Excellence in Economic Education Act. We must strive for better economic and financial literacy, which, in turn, will result in stronger families, better-functioning markets, and a more prosperous future for our nation.

It is a critical time for citizens to be literate in economic issues. More than ever, the need for leadership in the classroom is foremost and the involvement of students is paramount. Lance Suzuki and the Iolani Economics Team are role models for our country and I am proud to extend my sincere congratulations and appreciation for their hard work.

RECOGNIZING JULIA DYER

- MR. ALLEN. Mr. President, today I am pleased to recognize Julia Dyer, a teacher at Albemarle High School in Charlottesville, VA, who is one of eight finalists for the Richard T. Farrell Teacher of Merit Award for outstanding success in teaching history.

The Richard T. Farrell Award is presented each year to a teacher who employs innovative and creative teaching methods in and out of the classroom. The teacher must participate in the National History Day program, develop and use creative teaching methods to help students’ understanding of history, and help them make exciting discoveries about the past, show exemplary commitment to helping students develop their awareness of history and recognize their achievements.

Ms. Dyer is being recognized for her dedication to the National History Day program and her success with improving history education. She has been involved in helping students participate in National History Day for over 20 years. Ms. Dyer has a unique ability to take a classroom curriculum and personalize it for each student. And, most impressively, she continues to have an impact on students even after they have left her classroom.

As a former Governor who implemented academic standards for Virginia’s students in a broad range of subjects, including history, I am especially pleased that we have outstanding women like Julia teaching in our schools. I commend Julia on her selection for this award and applaud her dedication to her students, the improvement of the educational process and the teaching of our common history. With dedicated teachers like Julia Dyer, I know the students in Virginia, and indeed across America, have a bright future.
As a student at Yale University, President George H.W. Bush played in the College World Series in Kalamazoo, MI, in 1948, 2 years before the games found their permanent home in Omaha.

In 2001, President George W. Bush came to Omaha to throw out the first pitch at Johnny Rosenblatt Stadium. The stadium, named in honor of a former Omaha mayor and avid baseball fan, serves as the home ballpark for the Omaha Royals, which is the Pacific Coast League AAA farm team of the Kansas City Royals.

Since the College World Series came to Omaha in 1950, there have been 799 games played at Rosenblatt Stadium with 5,692,950 fans in attendance. The attendance shows remarkable growth from that first year when fewer than 18,000 fans showed up for the entire series. Today, the average attendance for the entire 10-day event approaches 230,000 with an average per-session attendance of nearly 23,000.

Credit for this phenomenal success story goes to College World Series of Omaha, Inc., a nonprofit organization which has captured the imagination of the people of Omaha, its business leaders, city officials and volunteers.

We are often asked by fans that follow their teams here and are attending their first College World Series, “Why Omaha?” The answer is easy. The entire city rolls out the red carpet for visiting teams and their supporters. Baseball fans from throughout the Omaha area, fill the stadium for each game. They cheer all participating teams equally, making players, families and fans from other parts of the country feel welcome. Even when hometown favorites, the Nebraska Cornhuskers or Creighton Bluejays make it to the series, fans continue to cheer for teams coming from other States.

Many Omaha supporters take time off from work during the 10-day event, tailgate on the stadium grounds and attend games each day. They will often wait in line all night to buy tickets which remain low in price despite sellouts and the fact that games are telecast nationwide on ESPN and ESPN2. A book of 50 general admission tickets sells for $50. Even box seats for ESPN2. A book of 50 general admission tickets sells for $50. Even box seats for

SOL M. LINOWITZ

- Mr. SARBANES. Mr. President, when Sol M. Linowitz led recently, at the age of 91, this country lost a distinguished citizen and his family lost a loving, wise and generous husband, father, brother and grandfather. Those who had the privilege of working with him—and there are many of us—lost a colleague and wise counselor and, above all, a dear friend.

It says much about Sol Linowitz that he opened his 1985 memoir, The Making of a Public Man, with a citation from Justice Oliver Wendell Holmes, Jr.: “It is required of a man that he should share the passion and action of his time at peril of being judged not to have lived.” That is precisely what Sol did over the course of what his brother, Bob Linowitz, described to me—Sol’s “exemplary and productive life.” Indeed, it can be said of Sol Linowitz that almost from his birth in 1913 until his death earlier this year, he reflected in his own life the highest ideals, aspirations and achievements of 20th-century America.

Sol Linowitz was the eldest of Joseph and Rose Linowitz’s four sons. Both his parents had come to this country as adolescents from what was then the Russian empire. They met and married in this country, settling in Trenton, NJ, and raising their family there. Of his parents Sol has written simply but eloquently: they “were not highly educated people; they had come across the ocean . . . bringing their hopes and little more than a raggle taggle.” From his parents he received the priceless gift of principles by which to live his own life: the fundamental importance of education; values taught by example, not rhetoric; people helping others in need. He grew up in a neighborhood of families similar to his own, except that they had come from Ireland, and Italy and in an earlier time and under different conditions, from Africa. He could see that his parents’ ideals—most of all loved and trusted this country.”

The strength of advice from a high school teacher and a modest scholarship, Sol Linowitz went to Hamilton College, where he went on to become the Class of 1935 Salutatorian. Advice from a distinguished Hamilton alumnus, Elihu Root, led him to law school; when he told Root that he was thinking of becoming a rabbi or studying law, Root replied: “Become a lawyer. I have found that a lawyer needs twice as much of the minister or the rabbi.” Once again, this time at Cornell Law School, he rose to the top of his class, finishing first and serving as

editor-in-chief of the Cornell Law Quarterly. A number of his law-school friends, like Senator Edmund Muskie and Secretary of State William Rogers, went on to become eminent public servants and practitioners of the law. John F. Kennedy wrote with great admiration in his memoir of the Cornell experience—“the most significant social contact” of his years at Cornell was Toni Zimmerman, a Cornell student. All who knew Toni Zimmerman Linowitz would certainly agree. Sol and Toni were married for 65 years.

Sol chose to practice law in Rochester with the small family firm of Sutherland and Sutherland. Following government and military service during World War II, he and Toni returned to Rochester. Sol resumed his law practice. At the same time, he entered into the sustained engagement in community and national affairs that was to illuminate his entire life.

Sol Linowitz’s commitment to public service extended far beyond his government service, which began with his OAS ambassadorship, in 1969. He found and extraordinary range of opportunities to serve. For many years he was a trustee of Hamilton College and of Cornell University, which had both served him so well—and also of Johns Hopkins University, in Baltimore, and the University of Rochester, and the Eastman School of Music, in Rochester. He was chairman of the Jewish Theological Seminary of America. He served as president of the National Urban League. He was a co-founder of the International Executive Service Committee, in 1964, and the founder of the InterAmerican Dialogue, in 1962. He was an advisor to three U.S. Presidents, and was President Carter’s representative in the Israel-Egypt negotiations following the Camp David Accord.

With Ambassador Ellsworth Bunker, Sol Linowitz led the U.S. team that negotiated the Panama Canal Treaties. It has been reported that years later Sol said of this daunting challenge, “In retrospect, I’d have to say that assignment was probably the most difficult and the most challenging of my life. It is also the accomplishment of which I am most proud.” Sol had reason to take pride in his actual accomplishment. The treaties were brilliantly drafted and negotiated. They put an end to a growing source of friction in U.S. relations not just with Panama but with all of Latin America, and assured the continued smooth operation of the Canal.

It was in my capacity as a manager of the floor debate over the Senate’s advice and consent to the treaties that I worked closely with Sol Linowitz. I always got to know him well. He was an extraordinarily skillful diplomat, an honorable and dedicated public servant. He was also a person of singular intelligence, integrity, and human compassion. It was my privilege to consider him a friend.

Sol opened his memoir with the quotation cited above from Justice Oliver Wendell Holmes, Jr. In closing, he...
turned to Archibald MacLeish. MacLeish, he noted, “once said that ‘America is promises,’ but these promises have not been kept equally to all. Those of us for whom the most extravagant promises of this land have become a reality are, I think, required to seek appropriate expressions of their gratitude.” Sol Linowitz never ceased to find opportunities to express his gratitude. Again and again over the course of his long and productive life, he found innumerable ways to make our nation a better place for all its people.

At a memorial service at Adas Israel Congregation on March 29, 2005, Sol Linowitz was remembered in a series of moving tributes from members of his family, friends and colleagues. Every tribute reminded us yet again how deeply the loss of Sol Linowitz is felt. He was “a man comfortable with himself, and thus everyone was comfortable with him,” said Jim Lehrer. “He asked questions and then he listened to the answers.” Bernard Kalb observed, “Sol Linowitz may have been the president of Xerox but no one has yet succeeded in making a copy of Sol.” Mr. President, I ask that the tribute remind us yet again how important he was to all of us.

Mr. President, I ask that the record be printed in the RECORD.

The service follows.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Memorial Service
Rabbi Jeffrey A. Wohlgber

We begin with a poem:

To the living, death is a wound. It's name is grief, it's companion loneliness. But death belongs to life
As night belongs to day
But death belongs to life
As shadow belongs to substance
As the fallen leaf belongs to the tree
So does death belong to life.

Death is normal and natural, it is part of reality—we know that. And yet, when it comes, it takes someone close to us, when it takes someone, that is beloved we are somehow not ready and unprepared no matter what we know, no matter what we think, no matter what the age of the person who is gone. This is the difference between intellect and emotion.

So we gather to mourn and to eulogize and to share memories, vignettes and strength as we come together for Sol Linowitz. There is a void in your lives, an unfillable hole for which we feel unprepared.

We have all lost someone precious, a man who was extraordinary, quite unique and very special. Your loss is shared by many of us. Not merely because we knew Sol or because he had done something for us, but because of what he’s done for all including many who never knew him, and yet what we know, is how funny he was, how wise counsel. No matter what was going on. You said that after dealing with family he was ready to deal with anything and it made him a great negotiator. And so there is a great deal of pride, pleasure and strength that we shared as you gave each other mutual support.

Long after the violin is set aside the music plays on. The battle fought, the victory won. Enter the martyr's joy. The pain of death is past. Life's long warfare closed at last. May thy soul now rest in peace.

May the memory and name of Sol Linowitz bring comfort to all who hold it dear.

Junk Linowitz

Hello and welcome. On behalf of my family I want to thank everyone for being here. It means a lot to us. My name is June Linowitz and it is my honor to speak on behalf of my sisters—Anne, Jan, and Ronni. What I'm going to say is the result of the conversations with my sisters. I assume that other speakers this afternoon will discuss my dad as diplomat, humanitarian, businessman and sage. I just want to talk about our dad, my dad. Implying this discussion is, of course, our mother Toni Linowitz. My parents were married for 65 years and had a remarkable marriage. Many of you knew my dad. My parents were married for 65 years and had a remarkable marriage. They were each the other's closest friends and confidantes. They created a home filled with love—a warm home filled with love. They were each the other's closest friends and confidantes. They created a home filled with love—a warm home filled with love.

My parents were married for 65 years and had a remarkable marriage. They were each the other's closest friends and confidantes. They created a home filled with love—a warm home filled with love.

Long after the violin is set aside the music plays on. The battle fought, the victory won. Enter the martyr's joy. The pain of death is past. Life's long warfare closed at last. May thy soul now rest in peace.

May the memory and name of Sol Linowitz bring comfort to all who hold it dear.
and I am hoping and praying that we’ll find that true too. Because we miss our dad a lot.

RONNI LINOWITZ JOLLIES

I am honored to be here today, as one of Sol Linowitz’s daughters, to speak about our father. My sister June spoke so well about the wonderful father he was to the four of us. I think you know of some of his tremendous accomplishments, truly made the world a better place. I want to share with you a conversation that I had with him that will give you a different perspective about the kind of person he was.

I called him one Sunday morning—about 15 years ago, although I remember it clearly—and asked him if I could come talk to him about something that was bothering me. Without hesitation, he instantly said, “Yes, of course. Your mother and I will be here all afternoon so come on over.” He had a certain excitement in his voice; he loved to talk about things that were deep, or meaningful, and he loved to help you to work through a problem and find solutions.

I came over that afternoon and went up to the den. I talked to both mom and dad for a while, and then my dad and I went to talk. When I came into the study, I could see that my dad was doing a kind of ‘‘up’’ for our talk; he had cleared off his desk, except for a big yellow legal pad and a pen. He was prepared to do what he always did: talk to anyone I had not known; to listen. And I was lucky enough to be listened to by the wisest person I will ever know in my life.

So, I began to talk: I went over the most important things in my life, because I knew that those things all would have an impact on what was bothering me; I talked about my marriage, my kids, my job, my synagogue, my close friends. I talked about the balance I was seeking to find as I lived my life.

Then I got to the issue at hand: “Dad,” I said, “. . . I’ve been really struggling with this: I hope you don’t think this is silly, but . . . I don’t think I’m making a difference in the world. I just don’t feel like I’m doing enough.

If I weren’t here tomorrow, have I left a mark?

Have I made the world a better place?

I don’t think I’m doing as much as I can to make a difference.

I looked at him and started with what I knew the answer to. “Being a mom is one of the most important jobs you’ll ever have. . . . your teaching is such a gift.” We went back and forth about a few things, but it just didn’t feel right.

“You know, Dad, this may just be due to having someone as amazing as you as a father. I mean our dinner conversations were a little unusual. I grew up hearing about world peace, solving world hunger, starting new companies, building new organizations! Maybe I just have to come to terms with it: I don’t know if the organizations that I’m working with will still be here years from now. No one can know that. So I also worry if I’m really doing enough in this world.

Then he stopped and just looked at me and said, “So I’m going to tell you about something that was bothering me. ‘Every day I try to do things. Sometimes I’m not able to do it, but I always try. 2 things.’”

I may know I’m ill, so I’ll send some flowers and write a note. Or I may know someone who has just lost a loved one, so I’ll write something meaningful and look for a quote that I may have that may bring them some comfort.

It could be that I just went out to a concert, saw a play, or an art exhibit and I was touched by it and I wanted to write something and say thank you.

As he was talking, I drifted off and thought about all of the notes I had received from my dad over the years—the notes telling me how great he thought I was in that play or how much he enjoyed having me at that Passover sedor or how he always sent me flowers on my birthday or the cards he sent me thinking of you and wondered how many of you have received a note or two from my father.

He then continued, “I try to do two things like that every day that are reaching out to someone who I can either appreciate or help or comfort or just say I love you to. Those things I try to do every day give me a feeling that I’m making a difference in the world and I find them very fulfilling—perhaps more fulfilling than any of the other things that I’m doing on a much grander scale.

Today, as I look at the people who are here—some of you may be here because you respect my father and admire his many public accomplishments—but I’ll bet that most of you are here because you loved him. Maybe he touched you in a very personal and meaningful way that made you appreciate him. Maybe you were a part of his ‘‘2things.’’

That is what I think made our Dad, Sol Linowitz, the truly amazing man that he was.

And as we all think about his life and as we try to think about ways we can remember him, it is those things that he did—2 things—2 things for people we know in your own lives that might make them feel comforted or loved or appreciated, and we can think about Sol Linowitz every time we do that. And truly, I can’t think of anything that would make him happier than knowing that the people he touched throughout his life are remembering him by doing kind things for others.

We have all been blessed by knowing Sol Linowitz.

WILLIAM BRODY

Some years back, John Updike wrote a short poem, titled ‘‘Perfection Wasted,’’ which begins with these words:

And another regrettable thing about death is the ceasing of your own brand of magic,

which took a whole life to develop and market—

Ambassador Linowitz’s life was so long, and so chock-full of marvelous adventures, that his own brand of magic was, as a result, inexpressibly unique.

Of course, there were many stories. Who could ever forget the time he came home from a helicopter and flew out to the LBJ ranch in the middle of the night.

Which is a story that says more, perhaps, about Sol Linowitz, than about Lyndon Johnson.

When some of Ambassador Linowitz’s stature and renown dies, the articles in the New York Times and the Washington Post have a favorite epithet they like to use: he or she was ‘‘an advisor to presidents.’’ This signifies that these people were not only powerful, but also sagacious. That they had what was to share.

This was doubly true of Sol Linowitz, who shared his insights not only with United States presidents, but also, for many, many years with the presidents and the lucky few colleges and universities. I count myself as extremely fortunate to have been among that group, as were presidents Dan Nathans, Bill Richardson and Steven Muller, before me at Johns Hopkins, and the presidents at Cornell University, Hamilton College, the University or Rochester and the Eastman School of Music, where he also served as a trustee and advisor.

We were fortunate in one respect because of Sol’s often shrewd analysis and penetrating insights. When Back had awarded Ambassador Linowitz the Presidential Medal of Freedom in 1996, he said, “Receiving advice from Sol Linowitz . . . is like getting trumpet lessons from the angel Gabriel.” And he was right.

Sol was the quintessential Renaissance man: distinguished lawyer, businessman and statesman, part-Rabbi, part-psychiatrist. Sol was an accomplished violinist. But above all, he was a true scholar. His passion for learning enhanced the depth of his wisdom, compassion and insight into people’s behavior. And to this day, I have never met anyone other than Sol who had given a college seminar address at commencement in Latin.

Sol Linowitz truly admired and valued higher education. He was a champion of universities and colleges. I believe that what we do is not only important, but it also serves a higher cause. Later
Betrayed Profession, his cry of anguish at the desecration and corruption of lawyering. I told him I would help him on this book only on his promise that when the book was published, as it was then, he would join the 1922 F Street Club who would no longer smile at him when he walked through the door. Instead, they had to tear down the F Street Club.

Especially when dealing with questions of urban blight, social justice, hunger and the obligations of successful businesses, which he did from leadership positions. Sol could slip into the trite and true, but he had a gift of expression and an occasionally puckish irreverence. My favorite Linowitz line was his last as the executive director of the World Trade organization, which had saved Xerox from the bear-hug of IBM by telling IBM that there wasn’t going to be any mass demand forcopying machines. In the Xerox case, Sol said, “invention was the mother of necessity.”

Having pulled off the near miracle of negotiating the Panama Canal Treaty and selling it to the Senate, Sol was lured by Jimmy Carter after the first Camp David accord to take charge of closing the deal with Anwar Sadat and Menachim Begin. He hung on his own to call and ask how a book was coming or to say, “people talk to me.” And so they did: Sadat and Menachim Begin asked, and Sol replied, “Exactly”—but Ronald Reagan and Alexander Haig thought it best to let the Middle East stew alone. Still, a young man at 67, went back to the practice of law and the chairing of civic organizations.

One thought he would always be around, to call and ask how a book was coming or to tell me what great things he’d heard my wife was doing as the American executive director of the IMF, to which she had been appointed in part because he had hired Lloyd Bentsen on her behalf. “You know,” he’d say, “people talk to me.” And so they did: this city is far too precious to be restored by talking with Sol. His lesson was that straightforwardness can get you there. Of course nobody is always around, and Sol wouldn’t have it any other way. You have to get out of the way and make room for the next crowd. But there won’t be a Sol Linowitz in the next crowd; there was only one of those.

R. ROBERT LINOWES

We are here today to say good-bye and pay tribute to a great human being—Sol Myron Linowitz.

As most of you know, Sol was my brother. He was also my closest friend and confidant. I admired Sol for many reasons. He lived an expansive, his thoughts seemed to be unconfined by self-interest, and responsive to the problem. And generous. Sol was a great man, but also—it is not a common combination of traits in one guy. He was always looking for nice things to say about someone, and even when he couldn’t find any—which happened—he remained reluctant to speak ill of anyone.

I worked with him on his memoirs and again only a dozen years ago on his book The

I received a number of those calls to be of assistance. He had an unparalleled sense of humor, and his story-telling and quips were memorable. He was much sought after as a speaker. As most of you know, Sol was my brother. He was also my closest friend and confidant. I admired Sol for many reasons. He lived an expansive, his thoughts seemed to be unconfined by self-interest, and responsive to the problem. And generous. The name of that outstanding entertainment enterprise was Chick Lynn and his Chickadees. Sol never included that in his bio.

Sol and Toni were married 67 years and it remained the same from start to finish. Toni committed and dedicated herself completely to him, and Sol to her. Toni rarely left his side the last year of his life while he was in failing health.

Sol loved his four daughters and their husbands. He regarded them as sons-in-law, but rather as sons. His grandchildren were the light of his life. He suffered terribly at the tragedy endured by Judy.

Many people strive to leave this world a better place than when they entered it. Sol was one of those who actually did. For this, we all owe him a debt of gratitude.

All of us have been most fortunate to have had the opportunity to know Sol and to love him. All of us have benefited from that relationship. All of us will sorely miss him. The world has lost a great man, and I have lost my best friend.

Closing Prayer
Rabbi Wohlgem and Hazzan Temma Greenberg
Exalted, compassionate God, Grant infinite rest, in your sheltering Presence, Among the holy and the pure, To the soul of Sol Linowitz Who has gone to his eternal home. Merciful One, we ask that our loved one find perfect peace in Your eternal embrace. May he know his life is beloved, And may he rest in peace. And let us say: Amen.

AIDS

• Mr. SMITH. Mr. President, I discuss the recent announcement by the Centers for Disease Control and Prevention that the number of Americans living with HIV has now surpassed 1 million. An estimated 1,039 million to 1,185 million people nationwide were HIV-positive as of December 2003, an increase over the estimated 850,000 to 950,000 cases at the end of 2002. While the number of cases of HIV in my state of Oregon is small relative to other states, Oregon still saw an 85 percent increase in the number of cases between 2002 and 2003. Not since the height of the AIDS epidemic in the 1980s has there been so many Americans living with this terrible disease.

The latest estimate reveals both our success and failure at combating this disease. On a positive note, the increase reflects the significant advances in antiretroviral drug therapy that have allowed persons diagnosed with HIV to live longer, healthier lives. On the other hand it also reflects our shortcomings in preventing the spread of this disease. Despite the Federal government’s goal to cut in half the number of new HIV cases each year, the figure continues to hold steady at about 40,000—the same rate of infection as in the 1990s. Moreover, some researchers believe that the number of new infections may actually be as high as 60,000 a year.

To be fair, responsibility for reducing the spread of HIV does not rest solely with the Federal government. According to the CDC, those at highest risk of contracting HIV have become far too complacent in their behavior, particularly as it relates to the practice of safe sex. Nevertheless, there is much the Federal government can do to help stem the spread of HIV.

One way to reduce the number of new HIV cases is to ensure that those infected with HIV have access to treatment. Such treatments not only prevent individuals from developing full-blown AIDS, but also significantly lower the risk of transmitting the disease to others. Unfortunately, the cost of these treatments is prohibitive, especially for those who are uninsured or underinsured. For this reason, it is critical that Congress reauthorize and bolster the Ryan White Care Act this year. Among other things, the act includes the vitally important AIDS Drug Assistance Program, ADAP, which helps low-income and uninsured HIV/AIDS patients afford their costly drug treatments. An estimated 150,000 people—30 percent of all Americans receiving treatment—currently receive their care through ADAP. Even with this program, however, States and local communities are overwhelmed. That is why I am requesting that Congress provide an additional $300 million for ADAP for the 2006 fiscal year.

As successful as ADAP has been, critical gaps in our approach to HIV treatment and prevention remain. For example, HIV positive individuals have access to treatment under Medicaid only after they have developed full-blown AIDS. To remedy this flaw, I introduced the Early Treatment for HIV Act, ETHA, S. 311, with Senator Hillary Clinton. By providing access to HIV therapies before such persons develop AIDS, ETHA would reduce overall Medicaid costs and, as important, reduce the likelihood of additional infection.

By reducing the amount of virus in the bloodstream, early access to HIV therapies is a key factor in helping curb infectiousness and reducing HIV transmission. Strengthening ADAP and enacting ETHA will help put us on the right track to providing both adequate treatment for those with HIV, as well as reducing the number of new HIV cases.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Ms. Evans, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages for Science, the Departments of Justice, and Commerce, and related agencies for the fiscal year ending September 30, 2006, and for other purposes.

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 12:22 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the Speaker of the House of Representatives has signed the following enrolled bill:

S. 665. An act to amend the Agricultural Credit Act of 1987 to reauthorize State mediation programs.

The enrolled bill was signed subsequently by the President pro tempore (Mr. Stevens).

At 6:23 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 2862. An act making appropriations for Science, the Departments of State, Justice, and Commerce, and related agencies for the fiscal year ending September 30, 2006, and for other purposes.

MEASURES REFERRED

The following bills were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 1042. An act to amend the Federal Credit Union Act to clarify the definition of net worth under certain circumstances for purposes of the promulgation authority of the National Credit Union Administration Board, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 2862. An act making appropriations for Science, the Departments of State, Justice, and Commerce, and related agencies for the fiscal year ending September 30, 2006, and for other purposes; to the Committee on Appropriations.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-67 A joint memorial adopted by the Legislature of the State of Washington relative to the importation of Canadian beef and the reestablishment of export markets for United States beef; to the Committee on Agriculture, Nutrition, and Forestry.

SENATE JOINT MEMORIAL 810

Whereas, On January 4, 2005, the United States Department of Agriculture proposed a rule to reopen on March 7, 2005, the United States border to the importation of Canadian live cattle and processed beef products; and

Whereas, On January 11, 2005, Canada announced that yet another cow in Alberta tested positive for bovine spongiform encephalopathy (BSE); and

Whereas, The United States Department of Agriculture has dispatched a technical team to Canada to investigate the circumstances that resulted in this additional infection including effective enforcement by Canada of the 1997 ruminant-to-ruminant feed ban; and

Whereas, The only incident in the United States where a cow tested positive with BSE
was on December 23, 2003, and that animal originated in Canada and unfortunately was shipped into Washington State; and

Whereas, The severe ramifications caused by this single case of BSE have threatened many foreign markets to beef produced within the United States; and

Whereas, All 50 states have been made in reestablishing trust with ourAsian trading partners, many of these bans to the import of beef from the United States continue in effect for fourteen months after this single incident; and

Whereas, Even though the United States has commenced a major BSE testing program designed to reduce the number of states have been detected to have BSE, once these foreign markets are closed, they have remained closed for prolonged periods of time; and

WHEREAS, Consumers in the United States continue to have confidence in beef produced in the United States and maintaining the safety of food supplies is the paramount concern to state and federal government officials; and

Whereas, Reestablishing trust with our trading partners and reopening export markets is of paramount importance to the American beef industry; and

WHEREAS, On February 25, 2005, the United States Department of Agriculture announced the results of the “science-based” decision to adopt the rule to lift the ban on importation of Canadian beef, which a temporary injunction was immediately issued against the United States Department of Agriculture decision by a federal district court on February 26, 2005, and for which the United States Senate approved on March 3, 2005, Senate Joint Resolution 4 to nullify the United States Department of Agriculture rule: Now, Therefore, in the name of and in the right of the United States, the Secretary of the United States Department of Agriculture: (1) Reaffirm to the Congress and the courts that the rule to lift the limited ban on importation of Canadian beef is based on sound scientific proof that consumer safety and animal health in the United States will be maintained; and (2) redouble its efforts to swiftly and successfully conclude negotiations with our trading partners to reestablish critical export markets for United States beef based on the same sound science, be it

Resolved, That copies of this memorial be immediately transmitted to the Honorable George W. Bush, President of the United States, the Secretary of the United States Department of Agriculture, Mike Johanns, the President of the United States Senate, the Speaker of the House of Representatives, and each member of Congress from the State of Washington.

POM-89. A resolution adopted by the General Assembly of the State of Ohio relative to the exclusion of the Youngstown Joint Air Reserve Station in Vienna Township, Ohio, from being added to the list of base closures for the Base Realignment and Closure process; to the Committee on Armed Services.

(SENATE CONCURRENT RESOLUTION NUMBER 11)

WHEREAS, The Youngstown Joint Air Reserve Station in Vienna Township, Ohio, is the home of the 910th Airlift Wing and supports national objectives by providing mission-ready C-130 airlift forces, state-of-the-art C-130 aerial spray capability, and a premier air reserve station with modern facilities. Part of its mission is to host a Navy-Marine Corps Reserve Center; and

WHEREAS, In addition to its mission, 910th Airlift Wing participates in a variety of community events, including the unit’s “Pilot for a Day” program; and

WHEREAS, Congress authorized a new round of the Base Realignment and Closure process (BRAC) to occur this year, which has the potential to affect the Youngstown Air Reserve Station and the air and space communities that support the station; and

WHEREAS, The Youngstown Joint Air Reserve Station is a key asset to the Youngstown community, having approximately 1,300 drilling members in the 910th Airlift Wing and hosting approximately 40 Naval and Marine Corps reservists. Now, Therefore, the 126th General Assembly of the State of Ohio supports the Youngstown Joint Air Reserve Station and firmly believes that the Station should not be included in the Defense Base Closure and Realignment Commission’s list of proposed installations to be closed, as it is a valuable asset to the state of Ohio and the defense of our nation, and memorializes Congress to take appropriate action so that this station is not included in the Commission’s closure list; and be it further

Resolved, That the Clerk of the Senate transmit duly authenticated copies of this resolution to the President of the United States, the Secretary of Defense of the United States, the members of the Ohio Congressional delegation, the Speaker and Clerk of the United States House of Representatives, the President Pro Tempore and the Secretary of the United States Senate, and the news media of Ohio.

POM-90. A resolution adopted by the General Assembly of the State of Ohio relative to the exclusion of the Wright-Patterson Air Force Base from the list of base closures for the Base Realignment and Closure process; to the Committee on Armed Services.

(SENATE CONCURRENT RESOLUTION NUMBER 11)

WHEREAS, Wright-Patterson Air Force Base is one of the largest and most complex air bases in the United States, having a wide range of missions, including handling many diverse defense-related activities and developing the weapons systems of the future; and

WHEREAS, Wright-Patterson Air Force Base is the birthplace of aeronautics and is a leading aerospace research site for the Air Force, as the base includes the Air Force Research Laboratory, the foremost aeronautical and aerospace research organization in the Air Force; and

WHEREAS, Thousands of students train each year at the Air Force Institute of Technology and millions of people visit the Air Force Museum, both of which are located at the base, and both aid in the economy of the region; and

WHEREAS, Wright-Patterson Air Force Base is the fifth largest employer in Ohio, employing approximately 22,000 people, and the
closure of this base would have a devastating economic impact in the local community and the state; and

Whereas, Congress authorized a new round of the Base Realignment and Closure process (BRAC) to occur this year, which has the potential to affect Wright-Patterson Air Force Base and the surrounding communities that support it;

Resolved, That the 128th General Assembly of the State of Ohio supports Wright-Patterson Air Force Base and firmly believes that the base should not be included in the Defense Base Closure and Realignment Commission’s list of proposed bases to be closed, as it is the only base in the state of Ohio and the defense of our nation, and memorializes Congress to take appropriate action so that this base is not included in the Commission's list; and be it further

Resolved, That the Clerk of the Senate transmit duly authenticated copies of this resolution to the President of the United States, the Secretary of Defense of the United States, the members of the Ohio Congressional delegation, the Speaker and Clerk of the United States House of Representatives, the Pro Tempore and the Secretary of the United States Senate, and the news media of Ohio.

POM–91. A resolution adopted by the General Assembly of the State of Ohio relative to the funding of the Joint Systems Manufacturing Center in Lima, Ohio through the Base Realignment and Closure process; to the Committee on Armed Services.

(SENATE CONCURRENT RESOLUTION NUMBER 7)

Whereas, The Joint Systems Manufacturing Center in Lima, Ohio, formally known as the Lima Tank Plant, produces a variety of armed combat vehicles and defense systems for the Army, Navy, and Marine Corps; and

Whereas, The Joint Systems Manufacturing Center is the only tank production facility in the United States and has the largest machining and fabrication product envelope in the United States Department of Defense; and

Whereas, Congress authorized a new round of the Base Realignment and Closure process to occur this year, which has the potential to affect the Joint Systems Manufacturing Center and the community of Lima that supports the Center; and

Whereas, The Joint Systems Manufacturing Center employs approximately 700 individuals and has an annual economic impact of $1 billion, and therefore,

Resolved, That the 128th General Assembly of the State of Ohio supports the Joint Systems Manufacturing Center in Lima, Ohio, and memorializes Congress to take appropriate action so that funding to the Center is not reduced through the Base Realignment and Closure process; and be it further

Resolved, That the Clerk of the Senate transmit duly authenticated copies of this resolution to the President of the United States, the Secretary of Defense of the United States, the members of the Ohio Congressional delegation, the Speaker and Clerk of the United States House of Representatives, the President Pro Tempore and the Secretary of the United States Senate, and the news media of Ohio.

POM–92. A joint resolution adopted by the Legislature of the State of California relative to the Lemoore Military Operations Area (MOA) Initiative; to the Committee on Armed Services.

RESOLVED, That the 126th General Assembly of the State of California, jointly, That the Legislature of the State of California urges the President and the Congress of the United States to support the preservation of the Lemoore Military Operations Area, for joint use by military aircraft from both the Naval Air Station Lemoore and the California Air National Guard, Fresno; and be it further

Resolved, That the California Legislature requests that the Federal Aviation Administration approve the creation of the Lemoore MOA as quickly as possible and that the California Congressional delegation pursue all efforts to ensure that the Lemoore MOA is established; and be it further

Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, each Senator and Representative from California in the Congress of the United States, the Administrator of the Federal Aviation Administration, the Secretary of Defense, the Secretary of the Navy, the Secretary of the Air Force, and both author for appropriate distribution.

POM–93. A resolution adopted by the House of Representatives of the Legislature of the State of Hawaii relative to Federal Community Block Grant Funding for fiscal year 2005; to the Committee on Banking, Housing, and Urban Affairs.

HOUSE RESOLUTION

Whereas, the Federal Community Development Block Grant Program (Program) was established with the National Housing Act of 1949 (Pub. L. 86–278, 64 Stat. 382); and

Whereas, the Program provides annual grants on a formula basis to many different types of grantees through several programs to: (1) Entitlement Communities, which provides annual grants on a formula basis to entitled cities and counties to develop viable urban communities by providing decent housing and a suitable living environment and by expanding economic opportunities, principally for low- and moderate-income persons; (2) State Administered Community Development Block Grant, which awards grants to States to carry out development activities in participating States that develop annual funding priorities and criteria for selecting projects; (3) Disaster Recovery Assistance, in which HUD provides grants to four designated areas, including American Samoa, Guam, the Northern Mariana Islands, and the Virgin Islands; (4) Insular Areas Block Grant Program, which allows Program entitlement communities to apply for a guarantee, and is available to Program non-entitlement communities if its state agrees to pledge the block grant funds necessary to secure the loan; (4) Department of Housing and Urban Development-Administered Small Cities Program for non-entitlement areas in the State of Hawaii directly administered by HUD’s Hawaii State Office in Honolulu; (5) Insular Areas Program, which provides grants to four designated areas, including American Samoa, Guam, the Northern Mariana Islands, and the Virgin Islands; (6) Disaster Recovery Assistance, in which HUD provides flexible grants to help cities, counties, and states recover from disasters declared by the President, especially in low-income areas, subject to availability of supplemental appropriations; (7) Colonias, which allows Texas, Arizona, California, New Mexico, and certain other areas to receive up to ten percent of their state Program funds for use in colonias; and (8) Renewal Communities/Enterprise Zone Programs, a program with an innovative approach to revitalization, bringing communities together through...
WHEREAS, the rise and scope of federal credit institutions has changed significantly since the first credit unions were formed in the early 1900's;

WHEREAS, the cooperative credit union movement in America began as a cooperative effort to serve the productive and provident needs of its members; (2) Prevents or eliminates competition or elimination of slums or blight; and (3) Community development needs have a particular urgency because existing conditions pose an immediate threat to the health or welfare of the community; and

WHEREAS, the Program works largely without fanfare or recognition to ensure decent affordable housing for all, to provide services to the most vulnerable in our communities, and to create jobs and expand business opportunities; and

WHEREAS, the Program is an important tool in helping local governments tackle the most serious challenges facing their communities and has made a difference in the lives of millions of people living in communities all across this country; and

WHEREAS, the fiscal year 2006 budget offered by the Administration eliminates the Program in its entirety by combining it along with 17 other programs into two new programs, reducing funding for the consolidated programs to $4,700,000,000 and transferring them to the Department of Commerce, which has no experience in community development; and

WHEREAS, the City and County of Honolulu, the counties of Hawaii, Maui, and Kauai all receive Program grants from HUD and have used the grants to provide a plethora of much-needed services and programs that have benefited low- and moderate-income household across the State; and

WHEREAS, elimination of the Program has been denounced by the United States Conference of Mayors, National Association of Counties, National Association of Housing and Redevelopment Officials, National League of Cities, National Community Development Association, and Local Initiatives Support Corporation; Now, therefore, be it

Resolved by the House of Representatives of the Territory of Hawaii, Regular Session of 2005, That the Legislature expresses its strong support of the Program and urges the United States Congress to restore and continue funding of the Program as proposed by the Bush Administration in the fiscal year 2006 federal budget and to support its restoration into the HUD budget at its current funding level of $4,700,000,000; and be it further

Resolved, That certified copies of this Resolution be transmitted to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives, members of Hawaii's Congressional delegation, HUD Assistant Secretary for Public and Indian Housing, the Governor, and mayor of each county.

POM-94. A joint resolution adopted by the House of the Legislature of the State of Utah relative to financial institutions; to the Committee on Banking, Housing, and Urban Affairs.

HOUSE JOINT RESOLUTION 1

WHEREAS, the financial institution industry is a critical part of Utah's economy; and

WHEREAS, the state is benefitted by and relies upon a diversity of financial institutions within the state, including the existence of a strong credit union industry and a healthy commercial bank industry; and

WHEREAS, nationally, the competitive environment for banks and credit unions has changed significantly since the first credit union funds were formed in the early 1900's;

WHEREAS, the federal credit union network is rooted in the Federal Credit Union Act of 1934, as amended over the years; and

WHEREAS, the City and County of Honolulu, the counties of Hawaii, Maui, and Kauai all receive Program grants from HUD and have used the grants to provide a plethora of much-needed services and programs that have benefited low- and moderate-income household across the State; and

WHEREAS, if proposed by the Bush Administration eliminates the Program in its entirety by combining it along with 17 other programs into two new programs, reducing funding for the consolidated programs to $4,700,000,000 and transferring them to the Department of Commerce, which has no experience in community development; and

WHEREAS, the City and County of Honolulu, the counties of Hawaii, Maui, and Kauai all receive Program grants from HUD and have used the grants to provide a plethora of much-needed services and programs that have benefited low- and moderate-income household across the State; and

WHEREAS, all activities must meet one of the following national objectives to be eligible for the Program: (1) Benefit low- and moderate-income persons; (2) Prevent or eliminate slums or blight; and (3) Community development needs have a particular urgency because existing conditions pose an immediate threat to the health or welfare of the community; and

WHEREAS, the Program works largely without fanfare or recognition to ensure decent affordable housing for all, to provide services to the most vulnerable in our communities, and to create jobs and expand business opportunities; and

WHEREAS, the Program is an important tool in helping local governments tackle the most serious challenges facing their communities and has made a difference in the lives of millions of people living in communities all across this country; and

WHEREAS, the fiscal year 2006 budget offered by the Administration eliminates the Program in its entirety by combining it along with 17 other programs into two new programs, reducing funding for the consolidated programs to $4,700,000,000 and transferring them to the Department of Commerce, which has no experience in community development; and

WHEREAS, the City and County of Honolulu, the counties of Hawaii, Maui, and Kauai all receive Program grants from HUD and have used the grants to provide a plethora of much-needed services and programs that have benefited low- and moderate-income household across the State; and

WHEREAS, elimination of the Program has been denounced by the United States Conference of Mayors, National Association of Counties, National Association of Housing and Redevelopment Officials, National League of Cities, National Community Development Association, and Local Initiatives Support Corporation; Now, therefore, be it

Resolved by the House of Representatives of the Territory of Hawaii, Regular Session of 2005, That the Legislature expresses its strong support of the Program and urges the United States Congress to restore and continue funding of the Program as proposed by the Bush Administration in the fiscal year 2006 federal budget and to support its restoration into the HUD budget at its current funding level of $4,700,000,000; and be it further

Resolved, That certified copies of this Resolution be transmitted to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives, members of Hawaii's Congressional delegation, HUD Assistant Secretary for Public and Indian Housing, the Governor, and mayor of each county.
Resolved, That the Senate urges Congres s to fully and carefully consider the principles, policies, circumstances, and conditions, identified and referenced in this resolution and promptly act as needed in order to remedy the same; and be it further

Resolved, That the Senate urges Congress to fully and carefully consider the principles, policies, circumstances, and conditions, identified and referenced in this resolution and promptly act as needed in order to remedy the same; and be it further

Resolved, That the Senate urges Congress to fully and carefully consider the principles, policies, circumstances, and conditions, identified and referenced in this resolution and promptly act as needed in order to remedy the same; and be it further

Resolved, That Congress in determining monies provided by the state to the federal government for programs, including education programs, take into account revenues that may be lost to the state as a result of federal tax policy and regulations, therefore, to the financial institutions; and be it further

POM–95. A concurrent resolution adopted by the United States Congress and the Utah Division of Wildlife Resources, the Utah Division of Forestry, the Utah Department of Agriculture and Food, the Utah Quality Commission, the Utah Division of Fish and Wildlife, the Trust for Public Land, and the members of Utah's congressional delegation.

POM–96. A concurrent resolution adopted by the United States Congress and the Utah Division of Wildlife Resources, the Utah Division of Forestry, the Utah Department of Agriculture and Food, the Utah Quality Commission, the Utah Division of Fish and Wildlife, the Trust for Public Land, and the members of Utah's congressional delegation.

POM–97. A resolution adopted by the Senate relative to the sale of violent video games to children; to the Committee on Commerce, Science, and Transportation.

SENATE RESOLUTION NO. 33

Whereas, all peoples have sought to advance their knowledge of the Earth and the universe; and whereas, on January 14, 2004, President George W. Bush announced a new vision for United States space exploration, with the goal of returning humans to the moon within the decade and ensuring human presence across the solar system; and whereas, the President’s fiscal year 2006 budget request for NASA is $1 billion higher than the previous year’s request and would redirect $11 billion in the existing funding to provide a total of $12 billion over five years to help address the space exploration vision; and be it further

Resolved, That the Senate of the State of Utah expresses support for returning humans to the moon and pursuing human exploration of Mars and the solar system; and be it further

Resolved, That the Senate supports continued funding of human space flight, Earth Science, and other programs, as well as continued funding of the space-related Shuttle Booster Program; and be it further

Resolved, That the Board of Governors of the United States Congress to enact and fully fund the proposed budget for the Space Exploration Program as submitted in the 2005 budget request for the United States and the state of Utah to remain leaders in the exploration and the development of space; and be it further

Resolved, That a copy of this resolution be sent to the President of the United States, the Majority Leader of the United States Senate, the Speaker of the United States House of Representatives, NASA, and the members of Utah’s congressional delegation.

POM–95. A concurrent resolution adopted by the Utah House of Representatives and the Utah Division of Wildlife Resources, the Utah Division of Forestry, the Utah Department of Agriculture and Food, the Utah Quality Commission, the Utah Division of Fish and Wildlife, the Trust for Public Land, and the members of Utah’s congressional delegation.

POM–96. A joint resolution adopted by the Utah House of Representatives and the Utah Division of Wildlife Resources, the Utah Division of Forestry, the Utah Department of Agriculture and Food, the Utah Quality Commission, the Utah Division of Fish and Wildlife, the Trust for Public Land, and the members of Utah’s congressional delegation.

POM–97. A resolution adopted by the Senate relative to the sale of violent video games to children; to the Committee on Commerce, Science, and Transportation.

Whereas, Americans have grown increasingly alarmed about youth violence. Inspired in part by violent media images, for too many of our children are committing violent crimes; and

Whereas, Numerous medical organizations, including the American Medical Association and the American Psychological Association, as well as law enforcement agencies such as the Federal Bureau of Investigation, have concluded that viewing entertainment violence can lead to an increase in aggressive attitudes, values, and behaviors, particularly in children. Recent academic literature corroborates the findings of earlier studies that demonstrate exposure to violent video games produces aggressive behavior in children and young people; and

Whereas, Violent, point-and-shoot video games are such effective combat simulators that law enforcement agencies in the United States and the state of Utah to remain leaders in the exploration and the development of space; and be it further

Resolved, That a copy of this resolution be sent to the President of the United States, the Majority Leader of the United States Senate, the Speaker of the United States House of Representatives, NASA, and the members of Utah’s congressional delegation.
Resolved, That copies of this resolution be transmitted to the President of the United States Senate, the Speaker of the United States House of Representatives, and the members of the Michigan congressional delegation.

POM-98. A Senate Concurrent Resolution adopted by the General Assembly of the State of Ohio relative to the exclusion of the NASA John H. Glenn Research Center and the Defense Finance Accounting Services Center in Cleveland, Ohio, from the list of base closures to the Base Realignment and Closure Committee in Commerce, Science, and Transportation.

Whereas, the NASA John H. Glenn Research Center at Lewis Field in Cleveland, Ohio, is one of NASA’s ten field offices, working to meet NASA’s goals of understanding and protecting our home planet, exploring the universe and searching for life, and inspiring the next generation of explorers; and

Whereas, The focus of the Glenn Research Center is on research related to exploration systems; it leads NASA in fields of microgravity science and works in partnership with universities, national laboratories, industry, safety, and security, to protect the environment, and to explore the universe. The Center also serves as the center of U.S. aeronautics research, which is important to NASA’s goals to promote economic growth and national security and have safe, superior, and environmentally compatible civil and military aircraft propulsion systems; and

Whereas, Congress authorized a new round of the Base Realignment and Closure process (BRAC) to occur this year, which has the potential to affect the NASA Glenn Research Center and the community of Cleveland that supports the Center; and

Whereas, The Glenn Research Center employs approximately 3,300 individuals, and the employment of these individuals and the economic impact of the Center, along with the Center’s research, make the Center a vital installation to Cleveland, the state of Ohio, and the nation; and

Whereas, The Defense Finance Accounting Services Center in Cleveland efficiently provides payroll services for military and civilian personnel serving our country; and

Whereas, The Defense Finance Accounting Services Center is a vital part of Greater Cleveland’s economy, providing employment to 1,200 persons; and

Whereas, The Base Realignment and Closure Process has the potential to affect the Defense Finance Accounting Services Center and the community of Cleveland that supports the Center: Now, therefore, be it

Resolved, That the 128th General Assembly of the State of Ohio supports the NASA John H. Glenn Research Center and the Defense Finance Accounting Services Center, and firmly believes that neither Center should be included in the Defense Base Closure and Realignment Commission’s list of proposed bases to be closed, as both are valuable assets to the state of Ohio and the defense of our nation. Therefore, Congress in the Michigan congressional delegation shall take appropriate action so that neither Center is included in the Commission’s closure list; and be it further

Resolved, That the Clerk of the Senate transmit duly authenticated copies of this resolution to the President of the United States Senate, the Speaker of the United States House of Representatives, in the name of the Senate of the United States, the members of the Ohio Congressional delegation, the Speaker and Clerk of the United States House of Representatives, in the name of the House of Representatives, to the President of the United States, the members of the Ohio Congressional delegation, the Speaker and Clerk of the United States House of Representatives, and the Secretary of the United States Senate, and the news media of Ohio.

As a condition of obtaining congressional approval for the construction of the CAP, Arizona accepted a limitation on its water entitlement that effectively gives the state the right to water in times of need in exchange for commitment on the part of the federal government to augment Colorado River water supplies to Arizona.

Whereas, CAP provides one-third of Arizona’s renewable water supplies and without this water, the many cities, towns, Indian communities and agricultural water users of Arizona would face critical water supply shortages.

Whereas, the Yuma desalting plant was constructed by the federal government pursuant to the Colorado River Salinity Control Act to treat water for delivery to Mexico in satisfaction of United States treaty obligations, but the United States has failed to operate the desalting plant, thus causing the loss of more than one hundred thousand acre feet of water annually from Lake Mead; and

Whereas, the lack of adequate regulatory storage facilities in the Colorado River system above the Mexican border has resulted in the continuing overdelivery of water to Mexico further reducing the amount available to meet the needs of California, Nevada and Arizona and increasing the risk of shortage.

Wherefore your memorialist, the House of Representatives of the State of Arizona, the Senate concurring, prays:

1. That the Congress of the United States take such actions, including enacting legislation and appropriating funds, as are required to construct or improve regulatory storage facilities in the lower Colorado River system, operate the Yuma desalting plant and augment the flow of the Colorado River to protect Arizona’s Colorado River water supplies which would face critical water supply shortages; and

2. That the Secretary of the State of the State of Arizona transmit copies of this Memorial to the President of the United States Senate, the Speaker of the United States House of Representatives and each Member of Congress from the State of Arizona.

POM-101. A joint memorial adopted by the Congress of the United States relative to the establishment of the Ice Age National Geologic Trail and the Committee on Energy and Natural Resources.

Whereas, The Ice Age Floods Study of Alternatives and Environmental Assessment recommends that the “Ice Age Floods National Geologic Trail” be established by the Congress of the United States of America to follow the flood’s pathways; and

Whereas, The floods are responsible for shaping a fascinating landscape that spans much of Washington State from its eastern border to the Pacific Ocean; and

Whereas, The landscape and its natural history will be drawn to the professionals, scientists, and tourists, which stimulate interest in the region and benefit local economies; and

Whereas, Many floods’ resources are on public lands and can be viewed from existing public roadways; and

Whereas, The envisioned trail is to be a public-private partnership coordinated by the National Park Service; and

Whereas, The Study of Alternatives recommends that no more than 25 acres be acquired by the National Park Service for use in the trail; Now, therefore, Your Memorialists respectfully recommend establishment of the Ice Age Floods National Geologic Trail; and further be it

CONGRESSIONAL RECORD — SENATE
S6737

June 16, 2005
Resolved, That copies of this Memorial be immediately transmitted to the Honorable George W. Bush, President of the United States, the President of the United States Senate, the Speaker of the House of Representatives, and each member of Congress from the State of Washington.

POM–102. A joint memorial adopted by the Legislature of the State of Washington relative to the rejection of the proposal to transition the Bonneville Power Administration from cost-based rates to market-based rates; to the Committee on Energy and Natural Resources.

SUBSTITUTE SENATE JOINT MEMORIAL S16JN5
 Whereas, The Bonneville Power Administration supplies seventy percent of the electrical power consumed in the state of Washington; and
 Whereas, Currently and since its creation the rate structure was established so that power has been based upon recovery of its costs; and
 Whereas, The ratepayers of the Pacific Northwest and West Coast have paid those costs in their entirety through their rates; and
 Whereas, The Pacific Northwest region has experienced a nearly fifty percent increase in wholesale power rates since the energy crisis of 2001–2002; and
 Whereas, The President’s proposed fiscal year 2006 budget would transition the Bonneville Power Administration from cost-based rates to market-based rates; and
 Whereas, The Office of Management and Budget has estimated that such change would result in an estimated increase of one hundred dollars per year for each Pacific Northwest ratepayer; and
 Whereas, This budget proposal would cost the Northwest region four hundred eighty million dollars next year and two and one-half billion dollars over three years; and
 Whereas, The first argument to justify these increased rates is that the ratepayers of the Pacific Northwest are being subsidized by the federal government, is not well-founded in light of the fact that all of the Bonneville Power Administration’s costs, including repayment of debt at market-based interest rates to the United States Treasury, are recovered from ratepayers, primarily individual and business entities in the Pacific Northwest; and
 Whereas, The argument to justify these increases is that of further facilitating Bonneville’s debt repayment to the United States Treasury, are not well-founded in light of Bonneville’s success in recent years in repayment of its debt, despite the sale of power at cost and during difficult economic times; and
 Whereas, This proposal if enacted would essentially result in a one hundred percent increase in power rates over a seven-year period, which will severely harm the region’s businesses and industries, as well as the residents of the region; and
 Whereas, The administration’s additional budget proposal to increase the types of transactions that would count against the Bonneville Power Administration’s authorized debt limit would negatively impact the Bonneville Power Administration’s ability to upgrade existing or build new vital infrastructure; and
 Whereas, This proposal would lead to further limiting investment in an already constrained transmission system which could result in electricity shortages and decreased reliability: Now, Therefore, Your Memorialists respectfully pray that the proposal to transition the Bonneville Power Administration from cost-based rates to market-based rates, as expressed in the President’s fiscal year 2006 budget proposal, be rejected; and furthermore, your memorialists respectfully pray that the proposal to add additional transactions for inclusion into the Bonneville Power Administration’s authorized debt limit be defeated.

POM–103. A concurrent resolution adopted by the Legislature of the State of Utah relative to approving the Utah recreational land exchange; to the Committee on Energy and Natural Resources.

Whereas, The legislature of the state of Utah has an important role in reviewing land exchange proposals between subdivisions of the state and the United States; Whereas, The School and Institutional Trust Lands Administration is seeking federal legislation authorizing the state of Utah to exchange up to 40,000 acres of state school and institutional trust lands and mineral interests for up to 40,000 acres of federal lands and mineral interests; Whereas, This proposal would exchange state school and institutional trust lands that are currently scattered and, in many cases, surrounded by federal lands for consolidated, more efficiently managed and administered for the benefit of the trust land beneficiaries; Whereas, The proposed exchange would also help preserve lands with significant scenic and recreational values within the Colorado River corridor, the vicinity of Dinosaur National Monument, and the Book Cliffs, benefiting local economies and that of the state as a whole; and
 Whereas, The proposed exchange is in the best interests of the citizens of Utah: Now, therefore, be it
 Resolved, That the legislature of the state of Utah, the Governor concurring therein, support the proposed land exchange between the state of Utah and the United States government; and be it further
 Resolved, That the legislature and the Governor request that the United States Congress enact laws authorizing the Secretary of the Interior to take all necessary actions to complete this exchange; and be it further
 Resolved, That a copy of this resolution be sent to the United States Secretary of the Interior, the United States President, the United States Congress, the Governor of the State of Utah, the State School and Institutional Trust Lands Administration, and to the members of Utah’s congressional delegation.

POM–104. A concurrent resolution adopted by the Legislature of the State of Utah relative to the opposition of nuclear testing; to the Committee on Energy and Natural Resources.

Whereas, nuclear testing began at the Federal Government’s Nevada Test Site in 1951; Whereas, according to the United States Department of Energy’s Nevada Operations Office, 45 of the 515 announced nuclear weapons tests at the Federal Government’s Nevada Test Site would verify the axiom that those who have suffered so much, to do all in its power to ensure that the lingering wounds from nuclear testing are not reopened to afflict both current and future generations: Now, therefore, be it
 Resolved, That the Legislature of the State of Utah, the Governor concurring therein, strongly urge that the United States Government not resume nuclear testing at its Federal Government’s Nevada Test Site; and be it further
 Resolved, That a copy of this resolution be sent to the President of the United States, the Speaker of the House of Representatives, the Majority Leader of the United States Senate, Downwinders, Inc., and the members of Utah’s congressional delegation.

POM–105. A joint resolution adopted by the Legislature of the State of Utah relative to oil and gas drilling and exploration; to the Committee on Energy and Natural Resources.

Whereas, significant reserves of oil have been discovered in Utah; Whereas, many investors are working through the steps to obtain oil and gas leases sold in the state, 50 percent of the proceeds of which are to be returned to the state; Whereas, although the September 2004 oil and gas lease sales were the largest in Utah history; Whereas, oil and gas drilling and exploration; to the Federal Government’s Nevada Test Site in the 2001 General Session, the 54th Legislature of the State of Utah expressed the desire of the people of Utah’s oil and gas producing counties, those who are battling downwinder-related diseases now, and for those who have lost loved ones because of nuclear testing; Whereas, the legislation would exchange 48,000 acres of state school land for federal lands in Sweetwater County, Wyoming; Whereas, the School and Institutional Trust Lands Administration; Whereas, the legislation would exchange up to 48,000 acres of state school and institutional trust lands for federal lands in Sweetwater County, Wyoming; Whereas, the legislation would exchange state school and institutional trust lands that are currently scattered and, in many cases, surrounded by federal lands for consolidated, more efficiently managed and administered for the benefit of the trust land beneficiaries; Whereas, the proposed exchange would also help preserve lands with significant scenic and recreational values within the Colorado River corridor, the vicinity of Dinosaur National Monument, and the Book Cliffs, benefiting local economies and that of the state as a whole; and
 Whereas, the proposed exchange is in the best interests of the citizens of Utah: Now, therefore, be it
 Resolved, That the first argument to justify these increased rates is that the ratepayers of the Pacific Northwest are being subsidized by the federal government, is not well-founded in light of the fact that all of the Bonneville Power Administration’s costs, including repayment of debt at market-based interest rates to the United States Treasury, are recovered from ratepayers, primarily individual and business entities in the Pacific Northwest; and
 Whereas, The second argument to justify these increases is that of further facilitating Bonneville’s debt repayment to the United States Treasury, are not well-founded in light of Bonneville’s success in recent years in repayment of its debt, despite the sale of power at cost and during difficult economic times; and
 Whereas, This proposal if enacted would essentially result in a one hundred percent increase in power rates over a seven-year period, which will severely harm the region’s businesses and industries, as well as the residents of the region; and
 Whereas, The administration’s additional budget proposal to increase the types of transactions that would count against the Bonneville Power Administration’s authorized debt limit would negatively impact the Bonneville Power Administration’s ability to upgrade existing or build new vital infrastructure; and
 Whereas, This proposal would lead to further limiting investment in an already constrained transmission system which could result in electricity shortages and decreased reliability: Now, Therefore, Your Memorialists respectfully pray that the proposal to transition the Bonneville Power Administration from cost-based rates to market-based rates, as expressed in the President’s fiscal year 2006 budget proposal, be rejected; and furthermore, your memorialists respectfully pray that the proposal to add additional transactions for inclusion into the Bonneville Power Administration’s authorized debt limit be defeated.

Whereas, The Bonneville Power Administration supplies seventy percent of the electrical power consumed in the state of Washington; and
 Whereas, Currently and since its creation the rate structure was established so that power has been based upon recovery of its costs; and
 Whereas, The ratepayers of the Pacific Northwest and West Coast have paid those costs in their entirety through their rates; and
 Whereas, The Pacific Northwest region has experienced a nearly fifty percent increase in wholesale power rates since the energy crisis of 2001–2002; and
 Whereas, The President’s proposed fiscal year 2006 budget would transition the Bonneville Power Administration from cost-based rates to market-based rates; and
 Whereas, The Office of Management and Budget has estimated that such change would result in an estimated increase of one hundred dollars per year for each Pacific Northwest ratepayer; and
 Whereas, This budget proposal would cost the Northwest region four hundred eighty million dollars next year and two and one-half billion dollars over three years; and
 Whereas, The first argument to justify these increased rates, that the ratepayers of the Pacific Northwest are being subsidized by the federal government, is not well-founded in light of the fact that all of the Bonneville Power Administration’s costs, including repayment of debt at market-based interest rates to the United States Treasury, are recovered from ratepayers, primarily individual and business entities in the Pacific Northwest; and
 Whereas, The second argument to justify these increases is that of further facilitating Bonneville’s debt repayment to the United States Treasury, are not well-founded in light of Bonneville’s success in recent years in repayment of its debt, despite the sale of power at cost and during difficult economic times; and

Now, Therefore, Your Memorialists respectfully pray that the proposal to add additional transactions for inclusion into the Bonneville Power Administration’s authorized debt limit be defeated.
new information on wilderness characteristics of the land;

Whereas, every parcel available as part of an oil or gas lease is scrutinized prior to the sale to ensure that it can be offered compliant with, among others, the National Environmental Policy Act, the Endangered Species Act, and the National Historic Preservation Act;

Whereas, to protect other resources, numerous stipulations and stringent requirements are placed on the oil and gas leases that are permitted by the Bureau of Land Management’s time is taken up with addressing protests of the sales of oil and gas leases;

Whereas, millions of dollars that could be invested in the state are being held pending the outcome of these lawsuits;

Whereas, individuals and companies who have purchased oil and gas leases in Utah are contemplating a purchase are greatly concerned with how long their funds have remained tied up in a system that is not performing its intended purpose;

Whereas, protests should be addressed up to the time that the oil and gas leases are awarded, then be should be unless an error has been made in the plain language of the lease; and

Whereas, unless concerns with the oil and gas lease process are resolved, many potential investors in Utah oil and gas leases will choose to do business in other states, costing the state much needed revenues: Now, therefore, be it

Resolved, That the Legislature of the state of Utah urges the Congress and the members of Utah’s congressional delegation to take legislative steps necessary to address Utah’s oil and gas drilling and exploration lease issuance problems; and be it further

Resolved, That the Legislature of the state of Utah urges that Congress and Utah’s delegation act decisively to end the legal delays caused by individuals and groups who are not a party to the sale of an oil and gas lease; and be it further

Resolved, That a copy of this resolution be sent to the Majority Leader of the United States Senate, the Speaker of the United States House of Representatives, the Deputy Director of the Bureau of Land Management, and to the members of Utah’s congressional delegation.

POM-106. A concurrent memorial adopted by the Senate of the Legislature of the State of Arizona relative to the reform of the endangered species act; to the Committee on Environment and Public Works.

SENATE CONCURRENT MEMORIAL 1002

Whereas, since its enactment thirty years ago, the Endangered Species Act has created unreasonable regulatory burdens for property owners while failing to help many species; and

Whereas, the House Resource Committee of Congress held public hearings in this session that would change the existing law by requiring peer review before a species could be listed as endangered and by allowing critical habitat to be considered for species only when “practicable”; and

Whereas, these bills now require passage by the full House and the Senate in order to become law; and

Whereas, the Western Governors Association has long supported legislation that would reform the Endangered Species Act to protect the rights of property owners while continuing to meet its intended purpose of recovering species.

Whereas, the Memorialist, the Senate of the State of Arizona, the House of Representatives concurring, pray:

1. That the Congress of the United States take steps to enact legislation that would reform the Endangered Species Act to protect property owners while meeting its intended purpose of recovering species.

2. That the Secretary of State of the State of Arizona transmit copies of this Memorial to the President of the United States, the Speaker of the United States House of Representatives and each Member of Congress from the State of Arizona.

(AMENDED HOUSE RESOLUTION NUMBER 21)

Whereas, although the nation’s air quality has improved since 1970’s, pollutants such as sulfur dioxide, nitrogen oxide, and mercury continue at levels that cause environmental and public health concerns; and whereas, the United States Environmental Protection Agency has established stricter National Ambient Air Quality Standards for ozone, most recently for ozone and particulate matter; and

Whereas, currently, 474 counties, including 33 in Ohio, are in nonattainment with the ozone standard and 22 in Ohio, are in nonattainment with the particulate matter standard. Nonattainment designations place a significant burden on state and local officials which must develop plans to reduce emissions and come into attainment by a specified date; and

Whereas, in order to ensure that the states have the most effective means of attaining the new standards, the Clear Skies Act of 2005 (S. 131) has been introduced in the United States Senate. This legislation not only is based on the successful Acid Rain Program, it also incorporates a multi-emissions approach that takes advantage of the benefits that would result from controlling multiple pollutants at the same time; and

Whereas, the Clear Skies Act balances environmental, economic, and economic needs. For example, it requires power plants to reduce emissions of sulfur dioxide, nitrogen oxide, and mercury by 70% by 2018 and allows the nation to continue burning coal, our largest and most abundant and low-cost energy source, while improving our nation’s air quality: Now, therefore, be it

Resolved, That the Clerk of the House of Representatives transmit duly authenticated copies of this resolution to the President of the United States, the President Pro Tempore and Secretary of the United States Senate, the Speaker and Clerk of the United States House of Representatives, the members of the Ohio Congressional delegation, and the news media of Ohio.

POM-108. A joint memorial adopted by the Senate of the Legislature of the State of Ohio relative to Social Security reform; to the Committee on Finance.

SENATE JOINT MEMORIAL 8014

Whereas, In August 1935, when Franklin Delano Roosevelt signed into law the Social Security program, he asserted that the fundamental purpose of the initiative was to “give some measure of protection to the average citizen and his family against the loss of a breadwinner and against a poverty ridden old age;” and

Whereas, Today, seventy years later, about 48 million Americans—both retired workers and those who are inactive—receive modest checks from Social Security; and

Whereas, This modest support continues to be a bulwark against the indignities of poverty for millions of Americans; and

Whereas, Social Security is now widely recognized by the public as one of the most successful programs in our nation’s history, guaranteeing as it does, to all Americans, today and tomorrow, a basic standard of living; and

Whereas, It is being argued that Social Security should be privatized by diverting payroll taxes from current beneficiaries to private investment accounts; and

Whereas, Such reforms are likely to require the federal government to borrow near $180 billion from the Social Security trust fund each year, or to $150 billion per year for ten years, to finance the transfer to create new private accounts; and

In addition to adding to the already significant federal debt, this proposal would partially replace guaranteed benefits with ones that expose millions of retired Americans to the ups and downs of the stock market: Now, therefore, Your Memorialists respectfully request that the Congress and the Administration reject the current effort to privatize Social Security and instead engage in an open dialogue with the American public to arrive at a sensible solution that preserves the original intent of Franklin Delano Roosevelt, making Social Security an insurance fail-safe for the aged and disabled and a complement to every individual’s ability to invest in the private market on their own; and be it

Resolved, That copies of this Memorial be immediately transmitted to the Honorable George W. Bush, President of the United States, the President of the United States Senate, the Speaker of the House of Representatives, and each member of Congress from the State of Washington.

POM-109. A concurrent memorial adopted by the Senate of the Legislature of the State of Arizona relative to Social Security reform; to the Committee on Finance.

SENATE CONCURRENT MEMORIAL 1003

Whereas, Social Security is the foundation of retirement income for most Americans; and

Whereas, preserving and strengthening the long-term viability of Social Security is a vital national priority and is essential for the future security of today’s working Americans current and future retirees and their families; and

Whereas, Social Security faces significant fiscal and demographic pressures; and

Whereas, the nonpartisan Office of the Chief Actuary at the Social Security Administra- tion reports that:

The number of workers paying taxes to support each Social Security beneficiary has dropped from 16.5 in 1950 to 3.3 in 2002; within a generation there will be only two workers to support each retiree which will substantially increase the financial burden on American workers; and

Without structural reform, the Social Security system, beginning in 2018, will pay out more in benefits than it will collect in taxes.

Whereas, Without structural reform, the Social Security trust fund will be exhausted in 2042 and Social Security tax revenue in 2042 will
only cover seventy-three per cent of promised benefits, and will decrease to sixty-eight per cent by 2078.

5. Without structural reform, future Congresses may have to raise payroll taxes fifty per cent over the next seventy-five years to pay full benefits on time, resulting in payroll tax rates of as much as 16.9 per cent by 2042 and 18.2 per cent by 2078.

6. Without structural reform, Social Security’s total cash shortfall over the next seventy-five years is estimated to be more than $23,000,000,000,000 in constant 2004 dollars or $3,700,000,000,000 measured in present value terms; and

7. Absent structural reforms, spending on Social Security will increase from 4.3 per cent of gross domestic product in 2004 to 6.6 per cent in 2078; and

Whereas, the Congressional Budget Office, the Government Accountability Office, the Congressional Research Service, the Chairman of the Federal Reserve Board and the President’s Commission to Strengthen Social Security have all warned that failure to enact fiscally responsible Social Security reform quickly will result in one or more of the following: 1. Higher tax rates; 2. Lower Social Security benefit levels; 3. Increased federal debt or less spending on other federal programs;

Whereas your memorialist, the Senate of the State of Arizona, the House of Representatives concurring, prays:

1. That the President, the Congress and the American people, including seniors, workers, women, minorities and disabled persons, should work together at the earliest opportunity to enact legislation to achieve a solvent and permanently sustainable Social Security system.

2. That Social Security reform must:
   (a) Protect current and near retirees from any cut in Social Security benefits.
   (b) Reduce the pressure on future taxpayers and on other budgetary priorities.
   (c) Provide benefit levels that adequately reflect individual contributions to the Social Security system.
   (d) Preserve and strengthen the safety net for vulnerable populations including the disabled and survivors.

4. That the Secretary of State of the State of Arizona transmit copies of this Memorial to the President of the United States Senate, the Speaker of the United States House of Representatives and each Member of Congress from the State of Arizona.

POM-110. A concurrent memorial adopted by the House of Representatives of the Congress of the State of Arizona relative to the United States entering into the Free Trade Area of the Americas; to the Committee on Finance.

HOUSE CONCURRENT MEMORIAL 2006

Whereas, the United States has always been the world leader in pushing for free trade, which is a hallmark of our capitalistic economy; and

Whereas, both the World Trade Organization (WTO) and the North American Free Trade Agreement (NAFTA), through the use of trade tribunals, now claim the sovereign right to overrule decisions of American courts and make awards to foreign businesses for violations of trade agreements; and

Whereas, the United States is considering entering into a new thirty-four member Free Trade Area of the Americas (FTAA) in 2005. Whereas your memorialist, the House of Representatives of the State of Arizona, the Senate concurring prays:

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. GREGG, from the Committee on Appropriations, with amendment in the nature of a substitute:

By Mr. DOMENICI, from the Committee on Appropriations, with amendment in the nature of a substitute:

H.R. 2419. An act providing appropriations for energy and water development for the fiscal year ending September 30, 2006, and for other purposes (Rept. No. 109-84).

By Mr. SPECTER, from the Select Committee on Intelligence, without amendment:

S. 1296. An original bill to permanently authorize certain provisions of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act of 2001, to reauthorize a provision of the Intelligence Reform and Terrorist Prevention Act of 2004, to clarify certain definitions in the Foreign Intelligence Surveillance Act of 1978, to provide additional investigative tools necessary to protect the nation’s security, and for other purposes (Rept. No. 109-85).

By Mr. SPECTER, from the Committee on the Judiciary, without amendment:

S. 491. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to expand the definition of firefighter to include apprentices and trainees, regardless of age or duty limitations.

By Mr. SPECTER, from the Committee on the Judiciary, with amendments:

S. 552. A bill to create a fair and efficient system to recover damages from victims for bodily injury caused by asbestos exposure, and for other purposes.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. LUGAR for the Committee on Foreign Relations:

Richard J. Griffin, of Virginia, to be an Assistant Secretary of State (Diplomatic Security).

By Mr. SPECTER for the Committee on the Judiciary:

Alice S. Fisher, of Virginia, to be an Assistant Attorney General.

By Mr. DOMENICI for the Committee on the Judiciary:

Alice S. Fisher, of Virginia, to be an Assistant Attorney General.

*Nomination was reported with recommendation that it be confirmed subject to the nominee’s commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

(Nominations without an asterisk were reported with the recommendation that they be confirmed.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mrs. DOLE:

S. 2154. A bill to suspend temporarily the duty on nitrocatechol; to the Committee on Finance.

By Mr. VOINOVICH (for himself, Mr. AKAKA, Ms. COLLINS, Mr. DURBIN, and Mr. STEVENS):

S. 1255. A bill to amend the Internal Revenue Code of 1986 to exclude from gross income amounts paid on behalf of Federal employees and members of the Armed Forces on active duty under Federal student loan repayment programs; to the Committee on Finance.

By Mr. BIDEN:

S. 1256. A bill to require the Secretary of Homeland Security to develop regulations regarding the transportation of extremely hazardous materials, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. SPECTER (for himself and Mr. LUTCHENBERG):

S. 1257. A bill to amend title 28, United States Code, to clarify when the United States may bring private rights of actions against foreign states for certain terrorist acts, and for other purposes; to the Committee on the Judiciary.

By Mr. CHAMBLISS:

S. 1258. A bill to designate the building located at 493 Auburn Avenue N.E., in Atlanta, Georgia, as the “John Lewis Civil Rights Institute”; to the Committee on Environment and Public Works.

By Mr. SALAZAR:

S. 1259. A bill to amend title 38, United States Code, to extend the requirement for reports from the Secretary of Veterans Affairs on the disposition of cases recommended to the Secretary for equitable relief due to administrative error and to provide improved benefits and procedures for the transition of member of the Armed Forces from combat zones to noncombat zones and for the transition of veterans from service in the Armed Forces to civilian life; to the Committee on Veterans’ Affairs.

By Mr. VIETTI:

S. 1260. A bill to make technical corrections to the Indian Gaming Regulatory Act, and for other purposes; to the Committee on Indian Affairs.

By Mr. ALEXANDER:

S. 1261. A bill to simplify access to financial aid and access to information on college costs, to provide for more learning and less reporting, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. FRIST (for himself, Mrs. CLINTON, Mr. MARTINEZ, Mr. BINGAMAN, Mr. TALENT, Mr. MIKULSKI, Mr. THUNE, and Mr. ORMAN):

S. 1262. A bill to reduce healthcare costs, improve efficiency, and improve healthcare quality through the development of a nationwide interoperable health information technology system, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. BOND:

S. 1263. A bill to amend the Small Business Act to establish eligibility requirements for loans concerning, to provide for the Small Business Innovation Research Program; to the Committee on Small Business and Entrepreneurship.

By Mr. CORZINE (for himself, Mrs. CLINTON, Mrs. MURRAY, Mr. LAUTENBERG, Mrs. BOXER, Ms. CANTWELL, Mr.
KENNEDY, Mr. INOUYE, and Mr. KERRY:
S. 1264. A bill to provide for the provision by hospitals of emergency contraceptives to women, and post-exposure prophylaxis for sexually transmitted disease to individuals, who are survivors of sexual assault; to the Committee on Health, Education, Labor, and Pensions.

By Mr. VINOVIICH (for himself, Mr. CARPER, Mrs. CLINTON, Mr. ISAKSON, Mrs. HUTCHISON, Mrs. FEINSTEIN, Mr. INHOFFE, and Mr. JEFFORDS):
S. 1265. A bill to make grants and loans available to States and other organizations to strengthen the economy, public health, and environment of the United States by reducing emissions from diesel engines; to the Committee on Environment and Public Works.

By Mr. ROBERTS:
S. 1266. An original bill to permanently authorize certain provisions of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001, to reauthorize a provision of the Intelligence Reform and Terrorism Prevention Act of 2004, to clarify certain definitions in the Foreign Intelligence Surveillance Act of 1978, to provide additional investigative tools necessary to protect the national security, and for other purposes; from the Select Committee on Intelligence; placed on the calendar.

By Mr. RINGAMAN:
S. 1267. A bill to amend title IV of the Higher Education Act of 1965 to reauthorize the Gaining Early Awareness and Readiness for Undergraduate Programs, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS
The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BROWNBACK (for himself and Mr. MCCAIN):
S. Res. 172. A resolution affirming the importance of a national weekend of prayer for the victims of genocide and crimes against humanity, and expressing the sense of the Senate that July 15 through 17, 2005, should be designated as a national weekend of prayer and reflection for Darfur; to the Committee on the Judiciary.

By Mr. KENNEDY (for himself, Ms. FEINSTEIN, Mr. MCCAIN, Mr. LEAHY, and Mr. LEVIN):
S. Res. 173. A resolution expressing support for the Good Friday Agreement of 1998 as the end of the conflict in Northern Ireland; to the Committee on Foreign Relations.

By Mr. MCCONNELL (for himself, Mrs. FEINSTEIN, Mr. MCCAIN, Mr. FRIST, Mr. LUGAR, and Mr. REID):
S. Res. 174. A resolution recognizing Burmese democracy activist and Nobel Peace laureate Aung San Suu Kyi as a symbol of the struggle for freedom in Burma, considered and agreed to.

By Mr. LEVIN (for himself and Ms. FEINSTEIN):
S. Res. 175. A resolution commending the University of Michigan softball team for winning the National Collegiate Athletic Association Division I Championship on June 8, 2005; considered and agreed to.

ADDITIONAL COSPONSORS
S. 37
At the request of Mrs. FEINSTEIN, the name of the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 37, a bill to extend the special postage stamp for breast cancer research for 2 years.

S. 398
At the request of Mr. SANTORUM, the name of the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 398, a bill to amend the Internal Revenue Code of 1986 to expand the expensing of environmental remediation costs.

S. 441
At the request of Mr. SANTORUM, the name of the Senator from Alabama (Mr. SESSIONS) was added as a cosponsor of S. 441, a bill to amend the Internal Revenue Code of 1986 to make permanent the classification of a motorsports entertainment complex.

S. 473
At the request of Ms. CANTWELL, the name of the Senator from Louisiana (Ms. LANDRIEU) was added as a cosponsor of S. 473, a bill to amend the Public Health Service Act to promote and improve the allied health professions.

S. 642
At the request of Mr. FRIST, the name of the Senator from New Mexico (Mr. DOMENICI) was added as a cosponsor of S. 642, a bill to support certain national youth organizations, including the Boy Scouts of America, and for other purposes.

S. 662
At the request of Ms. COLLINS, the name of the Senator from Virginia (Mr. ALLEN) was added as a cosponsor of S. 662, a bill to reform the postal laws of the United States.

S. 661
At the request of Mr. HATCH, the name of the Senator from North Carolina (Mrs. DOLE) was added as a cosponsor of S. 661, a bill to amend the Public Health Service Act to establish a National Cord Blood Stem Cell Bank Network to prepare, store, and distribute human umbilical cord blood stem cells for the treatment of patients and to support peer-reviewed research using such cells.

S. 772
At the request of Mr. CORNYN, the name of the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 772, a bill to amend the Internal Revenue Code of 1986 to expand workplace health incentives by equalizing the tax consequences of employee athletic facility use.

S. 889
At the request of Mr. REED, his name was added as a cosponsor of S. 889, a bill to amend title 49, United States Code, to require phased increases in the fuel efficiency standards applicable to light trucks, to require fuel economy standards for automobiles up to 10,000 pounds gross vehicle weight, to increase the fuel economy of the Federal fleet of vehicles, and for other purposes.

S. 914
At the request of Mr. ALLARD, the name of the Senator from Virginia (Mr. ALLEN) was added as a cosponsor of S. 914, a bill to amend the Public Health Service Act to establish a competitive grant program to build capacity in veterinary medical education and expand the workforce of veterinarians engaged in public health practice and bio-medical research.

S. 962
At the request of Mr. GRASSLEY, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 962, a bill to amend the Internal Revenue Code of 1986 to allow a credit to holders of qualified bonds issued to finance certain energy projects, and for other purposes.

S. 1076
At the request of Mr. TALENT, the name of the Senator from Illinois (Mr. OBAMA) was added as a cosponsor of S. 1076, a bill to amend the Internal Revenue Code of 1986 to extend the excise tax and income tax credits for the production of biodiesel.

S. 1152
At the request of Mr. KYL, the name of the Senator from Ohio (Mr. VINOVIICH) was added as a cosponsor of S. 1152, a bill to amend title XVIII of the Social Security Act to provide for a minimum update for physicians' services for 2006 and 2007.

S. 1219
At the request of Mr. KERRY, the names of the Senator from New York (Mrs. CLINTON) and the Senator from Illinois (Mr. DURBIN) were added as cosponsors of S. 1219, a bill to amend title XVIII of the Social Security Act to eliminate discriminatory copayment rates for outpatient psychiatric services under the Medicare Program.

S. 1153
At the request of Mr. BUNNING, the name of the Senator from Virginia (Mr. DAVIS) was added as a cosponsor of S. 1153, a bill to provide Federal financial incentives for deployment of advanced coal-based generation technologies.

S. 1159
At the request of Mr. BIDEN, the names of the Senator from New Mexico (Mr. BINGAMAN), the Senator from Maryland (Ms. MIKULSKI), the Senator from Rhode Island (Mr. CHAFFEE), the Senator from New Jersey (Mr. CORZINE), the Senator from South Dakota (Mr. JOHNSON) and the Senator from Massachusetts (Mr. KERRY) were added as cosponsors of S. 1159, a bill to reauthorize the Violence Against Women Act of 1994.

S. 1244
At the request of Mr. GRASSLEY, the name of the Senator from Maine (Ms. COLLINS) was added as a cosponsor of S. 1244, a bill to amend the Internal Revenue Code of 1986 to allow individuals a deduction for qualified long-term care insurance premiums, use of such insurance under cafeteria plans and flexible spending arrangements, and a credit for individuals with long-term needs.
**AMENDMENT NO. 788**

At the request of Mr. DeWeine, the names of the Senator from New York (Mr. Schumer), the Senator from Oregon (Ms. Brown), the Senator from Illinois (Mr. Durbin), the Senator from Iowa (Mr. Harkin), the Senator from South Carolina (Mr. Graham), the Senator from Massachusetts (Mr. Kennedy), and the Senator from New Jersey (Mr. Lautenberg) were added as cosponsors of amendment No. 788 intended to be proposed to H.R. 6, a bill Reserved.

**STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS**

By Mr. Voinovich (for himself, Mr. Akaka, Ms. Collins, Mr. Durbin, and Mr. Stevens):

S. 1255. A bill to amend the Internal Revenue Code to exclude from gross income amounts paid on behalf of Federal employees and members of the Armed Forces on active duty under Federal student loan repayment programs; to the Committee on Finance.

Mr. Voinovich. Mr. President, today I rise to introduce the Generating Opportunity by Forgiving Educational Debt (GOFEDS) Act of 2005. This legislation is a modestly expanded version of a bill I introduced in the 108th Congress.

Current law authorizes Federal agencies to pay student loans up to $10,000 a year with a cumulative cap of $60,000, but the incentive is taxed. Known as GOFEDS, this bill would amend the Federal tax code and allow the Federal Government’s student loan repayment programs to be offered on a tax-free basis.

In recent years, many educational institutions have established programs that repay a portion of the student loan debt their graduates owe. These programs are designed to encourage students to seek jobs with government or non-profit organizations that cannot pay salaries commensurate with the private sector upon graduation. Under current law, the amounts these institutions disburse as student loan repayment are not taxed as income, provided the recipients choose to work for the government or non-profit organizations.

Unfortunately, the Federal Tax Code does not treat the Federal Government’s loan repayment programs in the same way, considering such loan repayment as taxable income to the employee. As a result, the net benefit of any such program is reduced by the amount of tax that the individual has to pay on it. This bill would amend the tax code so that the Government does not continue to undermine its own loan repayment recruitment incentive. This change will help Federal agencies recruit and retain well-qualified graduates.

This Congress, I have expanded GOFEDS to our military because recent reports indicate that all four services missed their recruiting goals last year. Unfortunately, military recruiters’ levels are now at a 30-year low. Under GOFEDS, military education loan programs, like the Active-Duty Loan Repayment Program will be offered on a tax-free basis.

With more than half of the Federal workforce eligible for retirement in the next 5 years and surveys showing that fewer Americans find government services attractive, the need for this legislation is even more necessary. I believe the cost of this bill is minimal, but its potential impact is great. I urge all of my colleagues to support this legislation and I am confident that it can be enacted this year.

I ask unanimous consent that the text of the bill be printed in the RECORD. There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1255

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

**SECTION 1. SHORT TITLE.**

This Act may be cited as the "Generating Opportunity by Forgiving Educational Debt for Service Act of 2005."

**SEC. 2. EXCLUSION FOR STUDENT LOAN REPAYMENTS BY THE FEDERAL GOVERNMENT.**

(a) EXCLUSION FROM GROSS INCOME.—Section 108(f) of the Internal Revenue Code of 1986 (relating to student loans) is amended by adding at the end the following:

"(23) any payment excluded from gross income under section 108(f)(5) of the Internal Revenue Code of 1986 (relating to student loan repayments by the Federal Government)."

(b) EXCLUSION FROM WAGES.—(1) In general.—Section 108(f)(5) of the Internal Revenue Code of 1986 (relating to student loan repayments by the Federal Government) is amended by adding at the end the following:

"(5) Any payment excluded from gross income under section 108(f)(5) of the Internal Revenue Code of 1986 (relating to student loan repayments by the Federal Government) shall be included in the gross income of such individual under—

(A) if such payment is received by an individual to whom section 510(e)(2), chapter 109, or chapter 1609 of title 10, United States Code, applies, in accordance with section 108(f)(5) of such title; or

(B) if such payment is received by an individual to whom section 510(e)(2), chapter 109, or chapter 1609 of title 10, United States Code, does not apply, under section 108(f)(5) of the Internal Revenue Code of 1986 (relating to student loan repayments by the Federal Government)."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to payments made on or after the date of enactment of this Act in taxable years ending after such date.
By Mr. BIDEN:
S. 256. A bill to require the Secretary of Homeland Security to develop regulations regarding the transportation of extremely hazardous materials, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. BIDEN. Mr. President, I rise today to introduce the Hazardous Materials Vulnerability Reduction Act of 2005. It is regretful that I am introducing this legislation, as the Department of Homeland Security has all of the legal authorities necessary to undertake the steps set out in this legislation. However, nearly 4 years after September 11, the Department of Homeland Security is still not doing its job. Quite frankly, officials at the Department of Homeland Security are either unaware, or even worse, they are purposely ignoring a grave threat to our cities. Hazardous materials being transported by 90-ton rail tankers has been described as a "uniquely dangerous" threat—comparable only to a nuclear or biological attack. According to the Department of Homeland Security and the Department of Transportation, hazardous materials pose special risks during transportation because their uncontrolled release can endanger significant numbers of people. In addition, there have been countless reports of lax security along the urban area near I–395, where the rail travels. Nevertheless, the administration has done nothing to reduce this threat. The legislation that I am introducing today will require the Department of Homeland Security to develop a comprehensive, risk-based strategy for reducing the threat of a terrorist attack on extremely hazardous materials in our Nation's high-threat cities. The steps set out in this legislation should have been taken years ago, but it is clear that the Department of Homeland Security will not act without the Congress or my colleagues will join me in passing this legislation to require them to act.

Within just a few miles of where we stand right now, rail tankers carrying the world's most dangerous chemicals are being transported over tracks that are not sufficiently safeguarded or monitored. According to Richard A. Falkenrath, a former homeland security adviser to President Bush, this threat out "as acutely vulnerable as a uniquely dangerous threat." The Environmental Protection Agency estimates that in an urban area this toxic cloud could extend 14 miles. Can you imagine the psychological impact of a toxic cloud of poisonous gas expanding and moving slowly over one of our major metropolitan areas—leaving death and chaos in its path?

This threat and the lack of action by the Department of Homeland Security has led many city officials to consider local legislation to ban shipments of hazardous materials. Right now, a dispute between the District of Columbia and Maryland over the transportation of dangerous materials joined by the Bush administration is being litigated in Federal courts. Other cities, such as Philadelphia and Boston are considering similar action. As a former county executive, I am sympathetic to the plight of local officials, and they should certainly be allowed to exercise their police powers in appropriate situations. I believe, and I am sure most local officials would agree, that it would be better to have a national, comprehensive policy on this issue. This is simply too important to have a patchwork strategy. The Department of Homeland Security should have already done this. Unfortunately, they have not, and this legislation will require the Department to take some basic, fundamental steps to enhance safety for the American people.

The legislation that I am introducing requires the Department of Homeland Security to issue regulations establishing national standards for rail security. The Department of Homeland Security will be subjected to this regulation. Finally, the bill will provide $100 million to the Department of Homeland Security to work with State and local officials, the rail industry and other stakeholders to develop a strategy for rerouting a small fraction of the most dangerous materials away from our most threatened areas. It is estimated that only 5 percent of all hazardous materials shipped by rail will be subjected to this regulation. Finally, the bill will provide $100 million to the National Labor College to provide further training for rail workers.

I realize that the rail industry has invested considerable amounts of its own money to enhance security since September 11, and this legislation is not an indictment of their efforts. I have been pushing to get more Federal funding for rail security for years, but this plea has fallen on deaf ears within the administration. I realize that we cannot eliminate every conceivable risk, but we will certainly not help the war on terror fighting the war on terror and our Nation's law enforcement agencies are on high alert, the least that we should do
is ensure that we have a national strategy for handling a threat that is comparable in scope to a nuclear or biological attack. I will close by again referring to the grave warning set out in the study by the Naval Research Laboratory—"100,000 people could be seriously harmed or even killed in the first half hour" of an attack. The danger is simply too great to ignore, and I ask my colleagues to join me in passing this critical legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1256

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; FINDINGS.

(a) SHORT TITLE—This Act may be cited as the "Hazardous Materials Vulnerability Reduction Act of 2005".

(b) FINDINGS.—Congress makes the following findings:

(1) Congress has specifically given the Department of Homeland Security, working in conjunction with the Department of Transportation and other Federal agencies, the primary authority for the security of the United States transportation sector, including passenger and freight rail.

(2) This authority includes the responsibility to protect American citizens from terrorist incidents related to the transport by rail or by other means of hazardous materials.

(3) Federal agencies have determined that hazardous materials can be used as tools of destruction and terror and that extremely hazardous materials are particularly vulnerable to sabotage or misuse during transport.

(4) The Federal Bureau of Investigation and the Central Intelligence Agency have found evidence suggesting that chemical tankers used to transport and store extremely hazardous chemicals have been targeted by terrorist groups.

(5) Rail shipments of extremely hazardous materials are often routed through highly attractive targets and densely populated areas, including within a few miles of the White House and United States Capitol.

(6) According to security experts, certain extremely hazardous materials present a mass casualty terrorist potential rivaled only by nuclear or biological devices; certain acts of bioterrorism, and the collapse of large occupied buildings.

(7) A report by the Chlorine Institute found that a 90-ton rail tanker, if successfully targeted by an explosive device, could cause a catastrophic release of an extremely hazardous material, creating a toxic cloud 40 miles long and 10 miles wide.

(8) The Environmental Protection Agency estimates that in an urban area a toxic cloud could extend for 14 miles.

(9) The United States Naval Research Laboratories concluded that a toxic plume of this type, created while there was a public event on the National Mall, could kill or injure up to 100,000 people in less than 30 minutes.

(10) According to security experts, rail shipments of extremely hazardous materials are particularly vulnerable and dangerous, however the Federal Government has made no material reduction in the inherent vulnerability of hazardous chemical targets inside the United States.

(11) While the safety record related to rail shipments of hazardous materials is very good, recent accidental releases of extremely hazardous materials in rural South Carolina and San Antonio, Texas, demonstrate the fatal danger posed by extremely hazardous materials.

(12) Security experts have determined that re-routing these rail shipments is the only way to immediately eliminate this danger in high threat corridors which currently put hundreds of thousands of people at risk.

(13) Security experts have determined that the primary benefit of re-routing the shipment of extremely hazardous materials is a reduction in the number of people that would be exposed to the deadly impact of the release due to an attack, and the principal cost would be the additional operating expense associated with possible increase inhaul for the shipment of extremely hazardous materials.

(14) Less than 5 percent of all hazardous materials shipped by rail will meet the definition of extremely hazardous materials under this Act.

SEC. 2. DEFINITIONS.

In this Act, the following definitions apply:

(1) EXTREMELY HAZARDOUS MATERIAL.—The term "extremely hazardous material" means any chemical, toxic, or other material being shipped or stored in quantities or conditions that represent an acute health threat or have a high likelihood of causing injuries, casualties, or economic damage if successfully targeted by terrorist attack, including materials that—

(A) are—

(i) toxic by inhalation;

(ii) extremely flammable; or

(iii) highly explosive;

(B) contain high level nuclear waste; or

(C) are otherwise designated by the Secretary as extremely hazardous materials.

(2) HIGH THREAT CORRIDOR.—

(A) IN GENERAL.—The term "high threat corridor" means a geographic area that has been designated by the Secretary as particularly vulnerable to damage from the release of extremely hazardous materials, including—

(i) large populations centers;

(ii) areas important to national security;

(iii) areas that terrorists may be particularly likely to target;

(iv) any other area designated by the Secretary as vulnerable to damage from the rail shipment or storage of extremely hazardous materials.

(B) OTHER AREAS.—

(i) IN GENERAL.—Any city that is not designated as a high threat corridor under subparagraph (A) may file a petition with the Secretary to be so designated.

(ii) PROCEDURE.—The Secretary shall establish, by rule, regulation, or order, procedures for petitions under clause (i), including—

(A) designating the local official eligible to file a petition;

(B) establishing the criteria a city shall include in a petition;

(C) allowing a city to submit evidence supporting its petition; and

(D) requiring the Secretary to rule on the petition not later than 60 days after the date of submission of the petition.

(iii) NOTICE.—The Secretary’s decision regarding any petition under clause (i) shall be communicated to the requesting city, the Governor of the State in which the city is located, and the Senators and Members of the House of Representatives that represent the State in which the city is located.

(iv) REQUIREMENTS.—The term "require" means the Secretary of Homeland Security or the Secretary of Transportation.

(3) STORAGE.—The term "storage" means any temporary or long-term storage of extremely hazardous materials in rail tankers or any other medium utilized to transport extremely hazardous materials by rail.

SEC. 3. REGULATIONS FOR TRANSPORT OF EXTREMELY HAZARDOUS MATERIALS.

(a) PURPOSES OF REGULATIONS.—The regulations issued under this section shall establish a national, risk-based policy for extremely hazardous materials transported by rail or being stored. To the extent the Secretary determines appropriate, the regulations issued under this section shall be consistent with other Federal, State, and local regulations and international agreements relating to shipping or storing extremely hazardous materials.

(b) ISSUANCE OF REGULATIONS.—Not later than 90 days after the date of enactment of this Act, the Secretary shall issue, after notice and opportunity for comment, regulations concerning the rail shipment and storage of extremely hazardous materials by owners and operators of railroads. In developing such regulations, the Secretary shall consult with other Federal, State, and local government entities, security experts, representatives of the hazardous materials rail shipping industry, labor unions representing persons who work with hazardous materials in the rail shipping industry, and other interested persons, including private sector interest groups.

(c) REQUIREMENTS.—The regulations issued under this section shall—

(1) include a list of the high threat corridors designated by the Secretary;

(2) contain the criteria used by the Secretary to determine whether an area qualifies as a high threat corridor;

(3) include a list of extremely hazardous materials;

(4) establish protocols for owners and operators of railroads transporting extremely hazardous materials regarding notifying all governors, mayors, and other designated officials and local emergency responders in a high threat corridor of the quantity and type of extremely hazardous materials that are transported by rail through the high threat corridor;

(5) require reports regarding the transport by railroad of extremely hazardous materials by the Secretary to local governmental officials designated by the Secretary, and the Local Emergency Planning Committees established under the Emergency Planning and Community Right to Know Act of 1986 (42 U.S.C. 11001 et seq.);

(6) establish protocols for the coordination of Federal, State, and local law enforcement authorities in creating a plan to respond to a terrorist attack, sabotage, or accident involving a rail shipment of extremely hazardous materials that causes the release of such materials;

(7) require that any rail shipment containing extremely hazardous materials be rerouted around any high threat corridor; and

(8) establish standards for the Secretary to grant exceptions to the re-routing requirements under paragraph (7).

(d) HIGH THREAT CORRIDORS.—

(1) IN GENERAL.—The criteria under subsection (c)(2) for determining whether an area qualifies as a high threat corridor may be the same criteria used for the distribution of funds under the Urban Area Security Initiative for Fiscal Year 2004.

(2) INITIAL LIST.—If the Secretary is unable to complete the review necessary to determine which areas should be designated as high threat corridors within 90 days after the date of enactment of this Act, the initial list shall be the cities that receive funding under the Urban Area Security Initiative Program in Fiscal Year 2004.

(e) EXTREMELY HAZARDOUS MATERIALS LIST.—If the Secretary is unable to complete
the review necessary to determine which materials should be designated extremely hazardous materials under subsection (c)(3) within 90 days of the date of enactment of this Act and shall include: (1) explosives classified as Class 1, Division 1.1, or Class 1, Division 1.2, under section 173.2 of title 49, Code of Federal Regulations, in a quantity greater than 1,000 kilograms; (2) flammable gasses classified as Class 2, Division 2.1, under section 173.2 of title 49, Code of Federal Regulations, in a quantity greater than 10,000 liters; (3) poisonous classified as Class 2, Division 2.3, under section 173.2 of title 49, Code of Federal Regulations, in a quantity greater than 500 liters; (4) other than gases, classified as Class A, Division 1.4, and Class B, Division 1.2, under section 173.2 of title 49, Code of Federal Regulations, in a quantity greater than 1,000 kilograms; and (5) anhydrous ammonia classified as Class 2, Division 2.2, under section 173.2 of title 49, Code of Federal Regulations, in a quantity greater than 1,000 kilograms.

(f) NOTIFICATION.—(1) IN GENERAL.—The protocols under subsection (c)(4) shall establish the required frequency of reporting by an owner and operator of a railroad to the Secretary to the Secretary to the Department of Homeland Security, and other designated officials and local emergency responders in a high threat corridor.

(2) REPORTS TO SECRETARY.—The protocols under subsection (c)(4) shall require owners and operators of railroad to make annual reports to the Secretary regarding the handling, transportation, and storage of extremely hazardous materials, and to make quarterly updates if there has been any significant change in the type, quantity, or frequency of shipments.

(g) REPORTS.—(1) IN GENERAL.—The Secretary shall make an annual report to local governmental officials and Local Emergency Planning Committees under subsection (c)(5).

(2) CONTENTS.—Each report made under subsection (c)(5) shall incorporate information from the reports under subsection (c)(4) and shall include—

(A) a good-fact estimate of the total number of extremely hazardous materials shipped through or stored in each metropolitan statistical area; and

(B) if a release from a railroad carrying or storing extremely hazardous materials is likely to harm persons or property beyond the property of the owner or operator of the railroad, a risk management plan that provides—

(i) a hazard assessment of the potential effects of a release of the extremely hazardous materials, including—

(1) an analysis of the potential release quantities; and

(ii) a determination of the downwind effects, including the potential exposures to affected communities; and

(iii) a program to prevent a release of extremely hazardous materials, including—

(1) security precautions; (2) monitoring programs; and

(3) employee training measures utilized; and

(iv) an emergency response program that provides for specific actions to be taken in response to the release of an extremely hazardous material, including procedures for informing affected communities, State, and local agencies responsible for responding to the release of an extremely hazardous material.

(h) TRANSPORTATION AND STORAGE OF EXTREMELY HAZARDOUS MATERIALS THROUGH HIGH THREAT CORRIDORS.—

(1) IN GENERAL.—The standards for the Secretary to the Department of Homeland Security under subsection (c)(8) shall require a finding of special circumstances by the Secretary, including that—

(A) the shipment originates in or is destined to the high threat corridor; and

(B) there is no practical alternate route; and

(C) there is an unanticipated, temporary emergency that threatens the lives of people in the high threat corridor; or

(D) there would be no harm to persons or property beyond the property of the owner or operator of the railroad in the event of a successful terrorist attack on the shipment.

(2) PRACTICAL ALTERNATE ROUTES.—Whether a shipper must utilize an interchange agreement or terminate a lease in the event of a high threat corridor, or

(D) there would be no harm to persons or property beyond the property of the owner or operator of the railroad in the event of a successful terrorist attack on the shipment.

(i) REPORTS.—(1) IN GENERAL.—Not later than 90 days after the date of enactment of this Act, the Secretary shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate, the Committee on Homeland Security and Governmental Affairs of the House of Representatives, and the Committee on Homeland Security and Governmental Affairs of the Select Committee on Intelligence of the Senate, the Committee on Homeland Security and Governmental Affairs of the Select Committee on Intelligence of the House of Representatives, the following:

(A) an estimate of the potential release impacts, including the potential exposures to affected communities; and

(B) if a release from a railroad carrying or storing extremely hazardous materials is likely to harm persons or property beyond the property of the owner or operator of the railroad, a risk management plan that provides—

(i) a hazard assessment of the potential release quantities; and

(ii) a determination of the downwind effects, including the potential exposures to affected communities; and

(iii) a program to prevent a release of extremely hazardous materials, including—

(1) security precautions; (2) monitoring programs; and

(3) employee training measures utilized; and

(iv) an emergency response program that provides for specific actions to be taken in response to the release of an extremely hazardous material, including procedures for informing affected communities, State, and local agencies responsible for responding to the release of an extremely hazardous material.

(j) SECURITY PRECAUTIONS.—The Secretary to the Department of Homeland Security shall, in a quantity greater than 1,000 kilograms; and

(k) PHYSICAL SECURITY.—(1) IN GENERAL.—Not later than 90 days after the date of enactment of this Act, the Secretary shall submit a report to Congress describing the findings of the study conducted under this subsection, which shall include recommendations and cost estimates for securing shipments of extremely hazardous materials.

(2) MATTERS STUDIED.—The study conducted under this subsection shall include the evaluation of—

(A) whether safer alternatives to 90-ton rail tankers exist; and

(B) the feasibility of requiring chemical shippers of extremely hazardous materials to electronically track the movement of all shipments of extremely hazardous materials and report this information to the Department of Homeland Security on an ongoing basis as such shipments are transported; and

(C) the feasibility of utilizing finger-print based access controls for all chemical conveyances.

(3) REPORTING.—Not later than 180 days after the date of enactment of this Act, the Secretary shall submit a report to Congress describing the findings of the study conducted under this subsection, which shall include recommendations and cost estimates for securing shipments of extremely hazardous materials.

(k) PHYSICAL SECURITY.—(1) IN GENERAL.—Not later than 90 days after the date of enactment of this Act, the Secretary shall submit a report to Congress describing the findings of the study conducted under this subsection, which shall include recommendations and cost estimates for securing shipments of extremely hazardous materials.

(2) MATTERS STUDIED.—The study conducted under this subsection shall consider whether it is feasible to electronically track the movement of tank cars, additional security force personnel, surveillance technologies, barriers, and methods to minimize delays during shipping.

(3) REPORTING.—Not later than 180 days after the date of enactment of this Act, the
Secretary shall submit a report to Congress describing the findings of the study conducted under this subsection, which shall contain recommendations and cost estimates for securing shipments of extremely hazardous materials.

(c) LAID OFF TRACK STORAGE ARRANGEMENTS.—

(1) IN GENERAL.—Not later than 90 days after enactment of this Act, the Secretary shall conduct a study of available alternatives to storing extremely hazardous materials in or on leased track facilities.

(2) MATTERS STUDIED.—The study conducted under this subsection shall—

(A) evaluate the extent of the use of leased track facilities for the storage of extremely hazardous materials; and

(B) assess means to limit the consequences of an attack on extremely hazardous materials stored on leased track facilities to nearby communities.

(d) REPORT.—Not later than 180 days after the date of enactment of this Act, the Secretary shall submit a report to Congress describing the findings of the study conducted under this subsection, which shall contain recommendations and cost estimates for securing shipments of extremely hazardous materials.

SEC. 6. WHISTLEBLOWER PROTECTION

(a) PROHIBITION AGAINST DISCRIMINATION.—No owner or operator of a railroad may discharge or otherwise discriminate against any employee with respect to compensation, terms, conditions, or privileges of employment because the employee (or any person acting pursuant to the request of the employee) provided information to the Secretary, the Attorney General, or any Federal supervisory agency regarding a possible violation of law or regulation.

(b) ENFORCEMENT.—Any employee or former employee who believes that such employee has been discharged or discriminated against in violation of subsection (a) may bring a civil action in a United States court-ordered damages against state sponsors of terrorism.

(c) REMEDIES.—If the district court determines that a violation has occurred, the court shall provide the person who allegedly violated this Act—

(A) written notice of the proposed order; and

(B) the opportunity to request, not later than 30 days after the date on which the person received the notice, a hearing on the proposed order.

(d) PROCEDURES.—Not later than 90 days after the date of enactment of this Act, the Secretary shall issue regulations establishing procedures for administrative hearings and the appropriate review of penalties issued under this subsection, including establishing deadlines.

By Mr. SPECTER (for himself and Mr. LAUTENBERG):

S. 1257. A bill to amend title 28, United States Code, to clarify that persons may bring private rights of action against foreign states for certain terrorist acts, and for other purposes; to the Committee on the Judiciary.

Mr. SPECTER. Mr. President, along with my colleague, Senator LAUTENBERG, I am introducing the Justice for Victims of Corrupt Foreign Officials Act of 2005, to establish a private right of action against a foreign terroristic government for certain terrorist acts. This legislation clarifies a private right of action, in Federal courts, for U.S. citizens against state sponsors of terrorism. It is easier for victims of such acts to collect court-ordered damages against state-sponsors of terrorism. The specific provisions of the legislation have been drafted to harmonize existing statutory law with the recent decision by the District of Columbia circuit in Cicippio-Puleo v. Islamic Republic of Iran, 353 F.3d 1024, 1032-33 (D.C. Cir. 2004), which held that “neither 28 U.S.C. §1605(a)(7) nor the Flatow Amendment to the Foreign Sovereign Immunities Act, nor the two considered in tandem, creates a private right of action against a foreign government.” 353 F.3d 1024, 1032-33 (D.C. Cir. 2004). This bill will permit the families of the brave servicemen who served in Iraq and Afghanistan and their families deserve not only a day in court but also the ability to recover damages from these terrorist states that commit, direct, or materially support terrorist acts against American citizens and their families. This bill corrects a flaw in the United States code that allows foreign terrorist governments who have murdered or maimed their loved ones.

The second section of the bill eliminating many of the barriers which have prevented U.S. citizens from collecting on court ordered damages against state sponsors of terrorism. The bill does this by changing the legal standard of the Banecc doctrine from day to day-managerial control to those under the beneficial ownership of the state. The Supreme Court enunciated the so-called Banecc doctrine in First Nat’l City Bank v. Banco Nacional de Exterior de Cuba, 462 U.S. 611, 626-27, 1983. In this case, the U.S. Supreme Court created a presumption against a party that seeks to satisfy an outstanding judgment against a foreign government by bringing to court the assets of the government. This section of the bill will ease the burden on the families of victims of terrorism by permitting them to attach the hidden assets of terrorist states held within the United States.

On October 23, 2004, in Philadelphia, I was privileged to take part in a memorial service held in honor of the servicemen killed in the 1983 Beirut attack. Some of the family members of those killed attended the event. Their moving comments about how they had been denied the ability to seek legal redress, despite clear findings implicating Iran in this attack, will remain etched in my memory. It is vitally important to victims’ families that they have a private right of action against the state sponsor itself, not just against its officials, employees, or agents acting in their official capacity. These victims and their families deserve not only a day in court but also the ability to recover damages from these terrorist states that commit, direct, or materially support terrorist acts against American citizens and their families. This bill corrects a flaw in the United States code that allows foreign terrorist governments who have murdered or maimed their loved ones.
bill. I yield the floor. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1257

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CLARIFICATION OF PRIVATE RIGHT OF ACTION AGAINST TERRORIST STATES; DAMAGES.

(a) RIGHT OF ACTION.—Section 1605 of title 28, United States Code, is amended—

(1) in subsection (f), in the first sentence, by inserting “or (h)” after “subsection (a)(7)”;

and

(2) by adding at the end the following:

“(h) certain actions against foreign states; employees, or agents of foreign states.—

“(1) CAUSE OF ACTION.—

“(A) cause of action.—A foreign state designated as a state sponsor of terrorism under section 6(j) of the Export Administration Act of 1979 (50 U.S.C. App. 2405(j)) or section 620A of the Foreign Assistance Act of 1961 (22 U.S.C. 2371) is immune, official, employee, or agent of such a foreign state, shall be liable to a national of the United States (as that term is defined in section 1605(a)(22)) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(22)) or the national’s legal representative for personal injury or death caused by an act or omission of that foreign state, official, employee, or agent while acting within the scope of his or her office, employment, or agency, for which the courts of the United States may maintain jurisdiction under subsection (a)(7) for money damages. The removal of a foreign state from designation as a state sponsor of terrorism under section 6(j) of the Export Administration Act of 1979 (50 U.S.C. App. 2405(j)), section 620A of the Foreign Assistance Act of 1961 (22 U.S.C. 2371), or other provision of law shall not terminate a cause of action arising under this subparagraph during the period of such designation.

(B) discovery.—The provisions of subsection (a)(7) apply to actions brought under subparagraph (A).

(C) nationality of claimant.—No action shall be maintained under subparagraph (A) arising against a foreign state, official, employee, or agent if the claimant is neither the claimant nor the victim was a national of the United States (as that term is defined in section 1605(a)(22)) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(22)) if such defendant is an agency or instrumentality of a foreign state, or its official, employee, or agent.

(2) DAMAGES.—In an action brought under paragraph (1), if the claimant is neither a national of the United States, nor a national of a country with which the United States is at war, the plaintiff shall be entitled to judgment in accordance with the laws of such foreign country.

(3) Damages.—In an action brought under paragraph (1), if the claimant is neither a national of the United States, nor an official, employee, or agent of a foreign state, the foreign state, its official, employee, or agent, as the case may be, may be held liable for a money judgment, which may include economic damages, damages for pain and suffering, or, notwithstanding section 1606, punitive damages. In all actions brought under paragraph (1), a foreign state shall be vicariously liable for the actions of its officials, employees, or agents.

(D) appeals.—An appeal in the courts of the United States in an action brought under paragraph (1) may be made—

(A) solely from a final decision under section 1605, and then only if filed with the clerk of the district court within 10 days after the entry of such final decision; and

(B) in the case of an appeal from an order denying the immunity of a foreign state, a political subdivision thereof, or an agency of

in instrumentality of a foreign state, only if filed under section 1392 of this title.

SEC. 2. PROPERTY SUBJECT TO ATTACHMENT EXECUTION.

Section 1610 of title 28, United States Code, is amended by adding at the end the following:

“(g) property interests in certain actions.—

“(1) in general.—A property interest of a foreign state or an instrumentality of a foreign state, against which a judgment is entered under subsection (a)(7) or (h) of section 1605, including a property interest that is a separate juridical entity, is subject to execution upon that judgment as provided in this section, regardless of—

(A) the level of economic control over the property interest by the government of the foreign state;

(B) whether the profits of the property interest go to that government;

(C) the level of control by which officials of that government manage the property interest or otherwise control its daily affairs;

(D) whether that government is the real beneficiary of the conduct of the property interest; or

(E) whether establishing the property interest as a separate entity would entitle the foreign state to benefits in United States courts while avoiding its obligations.

“(2) United States sovereign immunity in applicable.—Any property interest of a foreign state, or agency or instrumentality of a foreign state, against which a judgment is entered under subsection (a)(7) or (h) of section 1605 and that government interest is regulated by the United States Government by reason of action taken against that foreign state under the Trading With the Enemy Act or the International Emergency Economic Powers Act.”

SEC. 3. APPOINTMENT OF SPECIAL MASTERS.

(a) Victims of Crime Act.—Section 1404(c) of the Victims of Crime Act of 1984 (42 U.S.C. 10603c(a)(3)) is amended by striking “December 21, 1988, with respect to which an investigation or”, and inserting “October 23, 1988, and ending 60 days after the date of the enactment of this Act.”

(b) Justice for Marines.—The Attorney General shall transfer, from funds available under section 6(j) of the Export Administration Act of 1979 (42 U.S.C. 5124), to the Administrator of the United States Steel Corporation, amounts necessary to fund the program of the Victims of Crime Act of 1984 (42 U.S.C. 10603c), to the Administrator of the United States Steel Corporation for the District of Columbia such funds as may be required to carry out the orders of United States District Judge Royce C. Lamberth apppointing Special Masters in the matter of Peterson, et al v. The Islamic Republic of Iran, Case No. 01CV02094 (RCL).

SEC. 4. LIS PENENDS.

(a) Lien.—In every action filed in a United States district court in which jurisdiction is alleged under subsection (a)(7) or (h) of section 1605 of title 28, United States Code, the filing of a notice of pending action pursuant to such subsection, to which is attached a copy of the complaint filed in the action, shall have the effect of establishing a lien on his pendents upon any real property or tangible personal property located within that judicial district that is titled in the name of any defendant, or titled in the name of any entity controlled by any such defendant interest, and notating listing those controlled entities. A notice of pending action pursuant to subsection (a)(7) or (b) of section 1605 of title 28, United States Code, shall be filed by the clerk of the district court in the same manner as any pending action and shall be indexed by listing all defendants and all entities listed as controlled by any defendant.

(b) Enforcement.—Liens established by request of subsection (a) shall be enforceable as provided in chapter 111 of title 28, United States Code.

SEC. 5. APPLICABILITY.

(a) in general.—The amendments made by this Act apply to any claim for which a foreign state is not immune under subsection (a)(7) or (h) of section 1605 of title 28, United States Code, are in effect, and shall remain in effect, for 10 years after the date of the enactment of this Act.

(b) Prior causes of action.—In the case of any action that—

(1) was brought in a timely manner but was dismissed before the enactment of this Act for failure to state a cause of action, and

(2) would be cognizable by reason of the amendments made by this Act, the 10-year limitation period provided under section 1605(f) of title 28, United States Code, shall be tolled during the period beginning on the date upon which the action was first brought and ending 60 days after the date of the enactment of this Act.

By Mr. CHAMBLISS.

S. 1258. A bill to designate the building located at 490 Auburn Avenue, N.E., in Atlanta, Georgia, as the “John Lewis Civil Rights Institute”; to the Committee on Environment and Public Works.

By Mr. CHAMBLISS. Mr. President, I rise today to honor a man who has been at the front of our country’s fight for civil rights. Born a son of sharecroppers in Troy, AL, JOHNNY grew up to become one of the leading proponents fighting on the frontlines of the civil rights movement.

JOHN grew up listening to speeches from the Reverend Martin Luther King Jr., and observing many courageous acts, such as the Montgomery bus boycott. Throughout his life, LEWIS could no longer stand idly by while others suffered for his sake. He was motivated to become an active participant in these historical events. From organizing peaceful demonstrations, to riding in the fronts of buses, LEWIS was a key leader and played a dynamic role in the civil rights movement.

From 1963-1966 LEWIS served as chair of the Student Nonviolent Coordinating Committee. In 1965 LEWIS was named one of the Big Six Civil Rights leaders, alongside Martin Luther King Jr., James Farmer, Roy Wilkins, Whitney Young, and A. Phillip Randolph.

In August 1963, JOHN LEWIS was a keynote speaker at the momentous March on Washington where Martin Luther King Jr. gave his “I Have a Dream” speech. On March 7, 1965, LEWIS helped the now pivotal voting rights march from Selma to Montgomery, AL. Sustaining physical injuries for the principles he believed in, JOHN remained steadfast in his commitment to protect human rights in the United States. The violent reactions in Alabama state troopers that day sparked an outcry and

Mr. President, as a congressman, statesman, humanitarian, the Nation has benefited greatly from the lifelong contributions of JOHN LEWIS. I am proud to introduce legislation honoring JOHN LEWIS.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1258

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. JOHN LEWIS CIVIL RIGHTS INSTITUTE.

(a) DESIGNATION.—The building located at 493 Auburn Avenue, N.E., in Atlanta, Georgia, shall be known and designated as the "John Lewis Civil Rights Institute".

(b) REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the building referred to in subsection (a) shall be deemed to be a reference to the John Lewis Civil Rights Institute.

By Mr. ALEXANDER:

S. 1261. A bill to simplify access to financial aid and access to information on campus, to provide for students to learn and not report, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Mr. ALEXANDER. Mr. President, in case the President may be wondering, and I asked consent about this, these are 7,000 regulations. We have 6,000 autonomous institutions of higher education in the United States, colleges and universities.

The Presiding Officer comes from the State that has some of the finest colleges and universities anywhere in America. I will not begin to name them because there are so many of them I might leave one out. Every single college or university, public or private, in North Carolina, Tennessee, or Colorado which has students with Federal grants or loans gets all of these boxes this year. These are the Federal regulations under title IV of the Higher Education Act that somebody at the smallest college or the biggest university must wade through in order to help students have Federal grants and Federal loans. The Federal grant and Federal loans are one of the great success stories of the United States of America. I will talk about that.

Mr. President, 60 percent of our college students and university students at those 6,000 public and private and profit and nonprofit institutes of higher education, 60 percent of them have a Federal grant or loan to help pay for college. That has increased over the last 4 or 5 years about 10 times faster—9 times faster—than State funding for higher education.

But my goal today, in my remarks and in the bill I am introducing, is to make it easier for them to go through these documents. And then, on the other hand, to make it easier for our colleges and universities to comply with all these rules and regulations. I would like for them to be spending their time and their money helping our students move forward, spending their time and their money reporting to us what they are doing.

That is the purpose of what I want to do today. I am introducing the Higher Education Student and Deregulation Act of 2005, a bill that does what I just described. It will help students get access to available financial resources. Second, it will reduce the burden on colleges and universities imposed by Federal regulations so they can devote more of their time doing what they are meant to do: provide the highest quality postsecondary education in the world. And third, it will ensure that the autonomy and independence of our 6,000 institutions of higher education are preserved.

I am delighted I am able to interrupt the energy debate to talk about higher education because I think while it sounds like we are shifting gears, they really go together. If I am looking at the country and I had to take an exam this minute about the two greatest issues facing the United States of America, I would say, No. 1, terrorism, and, No. 2, competitiveness. "Competitiveness" a big word, meaning: How are we going to win? How are we going to keep our standard of living in this country when we have 5 or 6 percent of the people in the world, and yet we produce a third of all the money, consume 25 percent of all the energy? And China and India and Singapore and Malaysia, not to mention Japan and Europe, are saying: Wait a minute. Our brains are as good as those American brains. A lot of our students have been going to the United States, creating jobs for those Americans. In fact, 2,000,000 people are here in this country today, basically improving our standard of living by their work here. So we are in a very competitive time. Just as we have been saying in energy, here comes China, here comes Malaysia, here comes India buying up the oil reserves, driving up the price. Here comes Germany and other parts of the world with lower natural gas prices than we have. And our jobs are going toward them.

The other thing we could do to ensure our good jobs and to keep our higher standard of living is to focus on our brainpower. The great advantages the United States of America has had since World War II have been our low cost, reliable supply and access to energy, our science and technology edge, and our educational institutions. There are so many examples of that.

Mrs. KAY BAILEY HUTCHISON, the senior Senator from Texas, and our major—[TALKING]—had a little session in the leader's office last year. They invited the former Brazilian President Fernando Henrique Cardoso, He was concluding his residency at the Library of Congress. I remember after he had said what he had to say, we asked our questions.

Senator HUTCHISON asked of President Cardoso: Mr. President, what is the one thing you are going to remember about the United States from your stay here at the Library of Congress that you will take with you back to your country of Brazil? Without a moment's hesitation, he said: The American university, the greatness and the autonomy of the American university.

I will tell you another story. A few years ago, I was asked to be the president of the University of Tennessee. It was 1988. I was asked to sort of become chairman of the board of the university for 8 years as Governor, and I appointed a lot of the trustees, but I was not a skilled university president. So I sought out David Gardner, the president of the University of California, which I regard, with all respect to North Carolina, at least at that time, to be the outstanding public university in America and perhaps one of the best in the world.

I went to David Gardner: Why is the University of California so good? Without a moment's hesitation, he said: First, autonomy. When California created the university—they created four branches of government—legislative, executive, judicial, and then the University of California. He said: Fundamentally, they give us the money, and then our board and we decide how to spend it. Our autonomy has permitted us to do things, not set very high standards. And then he said the third thing was the large amount of Federal dollars that follows students to the educational institution of their choice.

So autonomy, excellence, and choice—Federal dollars following students to the schools of their choice. That is how David Gardner explained the California model for excellence in higher education.

That model has worked for our country since the GI bill for veterans was enacted in 1944. I have wondered many times how we were fortunate enough to have decided to do it in the way they did it. This was for the veterans. It was the end of World War II. There were college presidents who were very upset about the idea of giving the veterans money and just telling them to go wherever they wanted to go to college. President of the University of Chicago said it would make the University of Chicago a hobo's jungle. But we know what it did. We had veterans coming back and taking their GI bill. Many of them took it to Catholic high schools and other schools because they had not finished high school. But they went wherever they wanted to, to any accredited institution. They went to Yeshiva. They went to Vanderbilt. They went to the historically Black colleges and universities across America—Harvard. It did not matter. If it was accredited, they chose the institution.
The same formula was applied when the Pell grants were created by this Congress in honor of Senator Pell, who was a former Member of this body; as is true with Senator Stafford and the Stafford loans. Instead of giving those grants and loans to the University of North Carolina or the University of Tennessee, they went to the student. The student then said: Well, I will decide where I want to go. I may want to go to Rhodes College, or I may want to go to Lenore Rhyne or I may want to go to Yeshiva or Howard. They go where they want to go.

Because of that, we now have 6,000 autonomous institutions around the country. Many of them are nonprofit. Many of them are for profit. Eighty percent of our students go to public institutions, but 20 percent go to private institutions. Because it is a marketplace, 6,000 institutions, and some are, in other words, because it is a marketplace, we have been able to adapt to a changing world that now has different subjects, different standards, a more global environment, and students who are, by and large, much more have different needs than they did before.

I have not had that kind of marketplace of colleges and universities, we would be stuck in the mud, and we would have former President Cardoso of Brazil talking so well about our colleges and universities.

We do not just have some of the best colleges and universities in the world; we have almost all of them. And the rest of the world knows that. We do not have 572,000 foreign students studying in our country this year because we made them come, or even because we give them scholarships. They pay to come for the most part. They are the brightest students in most of these countries. And 60 percent of our postdoctoral students are from overseas. Half our students in computer and engineering graduate programs are from overseas. And 70 percent of our students in computer and engineering graduate programs are from overseas.

Why I suggest the "best buy" list—a list of the 100 schools with the greatest availability of scholarships for students who want to expend their education and study year-round the students who want to expend their education and study year-round the schools with the lowest tuition and required fees, with the greatest availability of scholarships and grants. In other words, this would help parents and students decide where they could get the biggest bang for their buck.

The third thing we can do is make sure there is more information. That is why I suggest the "best buy" list—a list of the 100 schools with the lowest tuition and required fees, with the greatest availability of scholarships and grants. In other words, this would help parents and students decide where they could get the biggest bang for their buck.

Many of the ideas that are in our legislation came from the Advisory Committee on Student Financial Assistance. Senator Gregg, when he was chairman, and I invited them to work on this. They did a terrific job and they came up with 10 recommendations, 8 of which are in this bill, and I believe they have no cost to the budget.

The other area and my final comments have to do with the other side of the ledger. While we are making it easier for students to get financial aid, we should work to relieve the regulatory burden on colleges and universities represented by these boxes of 7,000 regulations that contain all the forms any college or university in Florida or Tennessee or North Carolina would receive this year to fill out. Thanks to the last two rounds of reauthorizing the Higher Education Act,
there are today more than 7,000 regulations associated with the title IV student aid program. With the exception of the Consumer Product Safety Commission and the Federal Trade Commission, every Federal agency is involved in regulating some aspect of higher education. That is incredible and it is absolutely ridiculous.

In 1997, Gerhard Casper, the president of Stanford University, said Stanford spends 7 cents out of every tuition dollar on compliance with government regulations. This has only gotten worse in the last 9 years. We need to ease the burden. For example, under the Higher Education Act, universities are required to report how many full-time employees have dental insurance, whether the university is a member of a national athletic association, and the number of meals that are in a "board" charge. Colleges are required to hand every student a paper in-State voter registration form and cannot use modern technology, such as Web sites, to register students, which would actually reach more students. We are giving university staff busy work to do when they ought to be helping students.

Here is another example. When a major chemical company such as DuPont produces 55-gallon containers of a potentially hazardous waste, we require DuPont to report on how all that waste is disposed and ensure that it is done in a certain manner. This is a good regulation and idea, in my mind. However, we are applying the same regulation and paperwork to a chemistry class at a college that might produce half a test tube of the same substance.

Mr. President, I don’t know about the presiding officer, the Senator from Florida, and I now see the Senator from Virginia; I suspect that when we all go back to our States and speak to our Lincoln Day dinners, or when the Democrats go to the Jefferson Day dinners, they will say the one thing we need to do once we pass these laws is to have more oversight and ease the burden of regulation. When I say that, I get a big round of applause, because at home people don’t think we get any smarter when we fly to Washington, DC, each week. They think it would be absurd to know there are 7,000 regulations governing college grants and loans, and that Stanford University spends 7 cents out of—and this is a private university—$1 dollar paying for the cost of Government regulations.

One reason we have an increased interest in regulating is because there are a great many Members of Congress, as well as people in the country, who worry about rising tuition costs. I worry about those, too. When I was Governor of Tennessee, we used to have a deal with the students. The State will pay 70 percent of the cost, and you pay 30 percent, and if we raise your tuition, we will raise the State contribution. Today, I am embarrassed, and I think it is important for us to know that. Tuition is not going up because the Federal Government is failing to do its job. Over the last 4 years, Pell grants, work-study, scholarships all gone up about 30 percent. At the same time, over the last 4 years, State spending for higher education is up 3.6 percent. I will say that again. This is according to various educational institutions, including the National Center for Education Policy, Illinois State University. In fiscal year 2001, there was a 3.4 percent increase in State funding for higher education. In 2002, there was a 1.2-percent decrease; in the next year, 2003, it’s 3.4 percent increase. Last year, there was a 3.8-percent increase—3.6 over the 4 years.

So what our colleges and universities are feeling, and what our students are feeling, is decreased State support for higher education. One reason they are feeling that is because we have not given States the tools to control the growth in Medicaid spending. So in Tennessee, Florida, Virginia, and other States, our colleges and universities are hurting because the Governors and legislatures are spending the dollars that ought to be going for excellence in universities. They are spending it on huge increases in Medicaid costs. That is part of our responsibility, too.

So I come to the floor today to introduce the Higher Education Simplification and Deregulation Act of 2005. I invite my colleagues to join me in it. We will be marking up a Higher Education Authorization Act next month. It affects 60 percent of the college students in the United States. I am sure we are going to continue to fund those grants and loans, as we have from here, but we also need to do two other things. One of them is in here, and that is not to get busy regulating more colleges and universities. We should be deregulating. The other thing we should do, which is not a part of this bill, is to keep our commitment to the Governors and that, before the fall of this year, we should give them the legislative tools they need—and I believe also relief from Federal court consent decrees, which are outdated—so they can manage the growth of Medicaid spending, so that in turn we can continue to support higher education.

Our energy bill and our higher education bill are at the forefront of our policies to keep our jobs and our competitiveness.

Here’s another example: If you grab a pint bottle of rubbing alcohol from your bathroom and take it to a university laboratory, it will immediately fall under the regulation and scrutiny of six different regulatory agencies:

1. the air quality management district,
2. the sewer district,
3. OSHA,
4. the local fire department,
5. the county environmental health department,
6. the state hazardous waste agency.

While all of these are not directly governed by federal regulations, many are responding to them, and we should do our part to reduce this type of burden. In one instance, a prestigious institution in the Midwest was visited by the EPA and a bottle of dishwashing soap was found in a lab near a sink. The institution was fined for improper handling of the soap because the label was not still attached to the bottle. Even worse, the institution had to pay to have the soap analyzed to document that it was not hazardous. Colleges are in the business of teaching students, not sending meaningless paperwork to the federal government. To fix this problem, my legislation would establish an expert panel to review federal regulations applicable to colleges and universities and make recommendations to the Secretary of Education and the Congress on how some of these regulations could be streamlined or eliminated. The bill would also assist institutions in complying with all these regulations. By requiring the Department to develop a compliance calendar outlining specific deadlines for paperwork submissions.

In those cases where there is already clarity about how to deal with regulations, I believe this bill will accelerate the “negotiated rulemaking process,” a process whereby university representatives negotiate new regulations with the Department. Today this process can drag on for years, imposing costs along the way due to uncertainty over a final outcome for the rule. Under my bill, that process would have a one-year deadline. To give schools a chance to adjust to newly agreed regulations, institutions of higher education would be provided with a minimum of at least 270 days between the publication of any final regulations or guidance and the initiation of data collection related to new disclosure requirements.

It would also reinstate provisions to allow schools with a low “cohort default rate,” meaning that less than 10 percent of their students fail to pay all their loans back on time, the option of distributing loan money to students right at the beginning of the year rather than waiting a month or spacing the money out over the period of a year. This is important since students incur many expenses up front during their education and need the flexibility to pay for fees, books, and other costs. Mr. President, since the end of World War II, our system of higher education has been unmatched around the globe. According to the Institute of Higher Education at Shanghai University, more than half the world’s top 100 universities are in the United States.

But our lead is slipping. During a trip to Europe, I discovered that Chancellor Schroeder of Germany is putting a strong emphasis on reforming his country’s university system to mirror—and even eclipse—ours. Even our British prime minister Tony Blair is overhauling his nation’s system because he sees a growing gap between the quality
of American and British universities. Authorities in India and especially China are working harder than ever to improve the quality of education in their own countries and keep their brightest minds from leaving their countries. Australia and Canada are making great progress, and, for the first time, we have witnessed a decline in graduate student enrollment. The Council on Graduate Schools estimated foreign applications to graduate programs in the U.S. were down this year by five percent.

This greater competition means that not only do we find it harder than ever to attract foreign students, but our graduates will find it harder to compete for top-paying jobs in the global economy since they will be competing against talented, well-educated individuals from around the world.

Now is the time to fine-tune our own system of higher education and restore its greatest strengths: generous financial aid, world class students, autonomy, and high standards. Generous support is most effective when students can access it with a minimum of hassle and with maximum flexibility to apply it to their accredited program. Freedom from onerous federal control over government allows colleges and universities to quickly adjust to the needs of their students and focus on teaching and research. High standards are the natural result of a competitive system where our schools compete among each other for students.

My bill restores the pillars of our higher education system and gives us the ability to move forward with confidence in the twenty-first century. I urge my colleagues to join me in this effort.

Mr. ALEXANDER. Mr. President, I ask unanimous consent to have printed in the RECORD a summary of the Higher Education Simplification and Deregulation Act of 2005.

The second lets schools with low cohort default rates below 10 percent to disburse a loan in a single installment rather than in multiple disbursements over the year.

The second lets schools with low cohort default rates waive the requirement that loan disbursements of a first-time borrower loan be withheld for thirty days so that these students can purchase books and supplies, pay housing costs, and meet other expenses.

(1) Application of Change of Ownership to non-profit institutions
The Department of Education applies provisions concerning change of institutional ownership to nonprofit institutions, despite clear expression of contrary congressional intent, so the common understanding that nonprofit institutions do not have owners. This places unnecessary burdens on institutions, and may act as a deterrent to governance changes necessary to make institutions more efficient and effective.

(2) Disclosure of Foreign Gifts

Where an institution receives a foreign gift in excess of $250,000 they must report it to the federal government. This data is publicly available in the annual reports prepared by every college and university and is carefully monitored for public institutions by state governments. The Department of Education reports that it never gets public requests for this information. Institutions will no longer be required to provide this information to the federal government, but make it publicly available on an annual basis.

By Mr. FRIST (for himself, Mrs. CLINTON, Mr. MARTINEZ, Mr. BINGAMAN, Mr. TALENT, Ms. MIKULSKI, Mr. THUNE, and Mr. ONOYELO)

S. 1262. A bill to reduce healthcare costs, improve efficiency, and improve healthcare quality through the development of a nation-wide interoperable health information technology system, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Mr. FRIST. Mr. President, this morning I am pleased to be joined on the floor by my distinguished colleague from the State of New York. Together we share an important goal to improve health care quality and reduce costs through the use of health information technology tools.

I had the wonderful opportunity of spending 20 years as a physician and as a heart surgeon before coming to this body. Like most physicians, I wanted to and, in fact, did use the very latest, most advanced technology, anything that could possibly, in my practice, make my patients live a healthier life, a better life, a more comfortable life.

But amidst the artificial heart assist devices, the lasers that are used to remove lesions in the windpipe or the trachea, CT scan machines, x-rays, digital x-rays, digital thermometers, doctors today, unfortunately, for the most part, keep patient records the very same way I did 10 years ago and, indeed, almost exactly as my dad did 60 years ago as he practiced medicine, and that is handwritten on paper in manila folders stored in the storements of clinics or doctors’ offices or hospitals.

It is amazing because we design hospitals, structures on computers today, and architecture needs to be a key part of our health care system. We have nearly 6,000 hospitals all over the country. Our health care system is enormous, yes, but it is dangerously fragmented. Even a small efficiency improvement can greatly reduce cost and improve quality, and there is plenty of room for improvement.

Mrs. CLINTON. Mr. President, I wish to express my appreciation to Senator FRIST for his leadership on this issue because we certainly do need to bring our health care system out of the information dark ages. I am pleased to be introducing this legislation today with the majority leader. It is a priority for both of us, and I look forward to continuing our partnership to move this legislation through the legislative process.

For several years, I have been promoting the adoption of health information technology as a means to improve our health care system and bring it into the 21st century. I introduced health quality and information technology legislation in 2003 to jump-start the conversation on health IT. I am very pleased that I have had the opportunity now to work with the majority leader for more than a year on realizing what we believe would work, that would enable patients, physicians, nurses, hospitals—all—to have access electronically in a privacy-protected way to health information.

We have a lot of challenges facing us in health care. We have a long way to go to achieve the goal of expanding access to quality, affordable health care for all Americans. But creating a health information technology infrastructure needs to be a key part of achieving our health care goals because we are facing an escalating health care crisis.

Information technology has radically changed business and other aspects of our lives. It is time to use it to bring our health sector into the information age.

Currently, the health industry spends 2 to 3 percent of its revenues on information technology, compared to roughly 12 percent in industries such as finance or banking. That is why you can go to an ATM and go to any place in the world and access money from your bank account.

But despite evidence that greater investments could yield returns, we have not put in place the necessary infrastructure to facilitate the necessary investment in an interoperable health information technology and quality infrastructure.

Mr. FRIST. Mr. President, this needs to change and it must change. We must establish an interoperable privacy-protected electronic medical record for every American who wants one. Working together, our Nation can confront these challenges, and we can build an interoperable national health information technology system. We know it will save lives. We know it will save money. It will improve quality and it will lead to huge measurable progress in the medical field, in the health field. And for the first time, we can root out some of the enormous problems as a result of the underinvestment in health information technology. No industry is as important to our economy as health care as it spends so little on information technology. Our Nation has nearly 900,000 doctors and over 2.8 million nurses. Americans visit a doctor 900 million times per year. We have nearly 6,000 hospitals all over the country. Our health care system is enormous, yes, but it is dangerously fragmented. Even a small efficiency improvement can greatly reduce cost and improve quality, and there is plenty of room for improvement.

Doctors write over 2 billion prescriptions each year by hand. With all respect to my doctors, some are unclear or even illegible. Handwritten prescriptions filled incorrectly result in as many as 7,000 deaths each year because we do not have access to a fail-safe system so that providing the prescription electronically, which also would trigger a response if it was interacting with another drug the patient was taking, is not yet available.

With that data, it is difficult, sometimes even impossible, to track the quality of care patients receive. We cannot reward good providers or work to improve those who provide inferior care.

Widening health care disparities really are a growing problem in our society. It is especially important because every moment that a doctor or a nurse spends with a patient is precious. For every hour that they spend with a patient, they spend one-half hour filling out those forms by hand. So we can save time, we can save money, and we can make it clear that this information will be easily electronically transportable where it is needed.

Mr. FRIST. The problem is enormous and the problem is real. So what are we going to do about it? Senator CLINTON and I propose three concrete steps to remedy these problems and establish a fully interoperable information technology. First, we must establish standards for electronic medical records. Sharing data effectively requires more than just that fiber optic
June 16, 2005

CONGRESSIONAL RECORD — SENATE

S6753

cable, more than those Internet con-
nections. It requires standards and
laws that make it possible to exchange
medical information in a privacy-pro-
tected way throughout our Nation.
The Government should not impose
these private initiatives, but it has a
duty, and indeed it has an
obligation, to lead the way. Medicare,
Medicaid, SCHIP, the Indian Health
Service, and other Federal programs
should lead the way and establish elec-
tronic health records for all of their
clients.

The Veterans’ Administration al-
ready leads the way with interoperable
systems, but we need to get the VA to
be able to talk to the Department of
Defense.

Mrs. CLINTON. That is absolutely
the case, especially as we tragically
know so many young people who have
been injured in Iraq or Afghanistan
move from the DOD to the VA. We
have to have a better system so that
they can talk to each other, they can
operate in the

Secondly, we believe our legislation
should work to reduce barriers and fa-
cilitate the electronic exchange of
health information among providers in
a secure way to improve health care
quality and meet community
needs. When communities come
together, as is beginning to happen all
over the country, the Federal Govern-
ment should help them implement an
interoperable electronic medical rec-
dar system.

Interoperable sounds like a confusing
word, but it means they can talk to
each other, they can operate in the
same overall system and do it in a way
that complies with national standards.

To speed up this process, we propose
spending a total of $600 million—$125
million a year, over 5 years—to begin
the work of rolling out interoperable
electronic medical records systems
around the Nation.

Finally, we must use the data we col-
collect to focus intensely on improving
the quality of health care. Our medical
system, which is, and deserves to be,
the envy of the world, still suffers from
enormous and un pardonable disparities
in the quality of care. Health IT will be
a tool to help our dedicated health care
professionals improve care, and effi-
ciently, so that they spend more time
at the bedside, more time at the office
visit, and less on paperwork.

Through this legislation, we will
begin to collect consistent data on the
quality of health care delivered in
America. As the largest health care
payer in the country, the Federal Gov-
ernment has a responsibility to begin
that process of collecting data on its
own health care programs and share it
with the public. Then, with this data,
we can begin to move to a health care
system that actually rewards providers
who give their patients superior care.

Mr. FRIST. Mr. President, as we talk
about these systems and standards and
words such as interoperability, which,
as the Senator from New York said,
does mean being able to connect it all
together, people who are listening
must ask: Well, how in the world do
these electronic health records and the
appropriate use of that data bring con-
crete benefits to them as individuals
and to their families?

First, it will reduce waste and ineffi-
ciency in the system. It only makes
sense that fragmented systems, with
no interconnectivity at all, have inher-
ent inefficiencies and waste. That is
moved aside. That has a very direct
impact on lower costs, making health
care more affordable and thus available
for people broadly.

It improves quality. Right now we
know that medical errors occur. Too
many medical errors occur in our
health care system today. By the appli-
cation of technology, we can move
those medical errors aside. They will
not occur and that improves quality.

They will empower patients. It gives
that individual who is listening right
now the knowledge and power to be
that partner who can drive our health
system where choices can be made,
where the focus is on the patient, that
is provider friendly, that is driven by
information and choice and empower-
ment to make that choice.

They will protect patient privacy and
promote the secure exchange of life-
saving health information. It is spelled
out in the legislation. It is going to be
privacy protected.

For the first time, they will seamlessly
integrate this advancement in health
information technology with quality
measures, with quality ad-
vancements, harmonizing and inte-
grating them in a way that simply has
not been done in the past.

This proposal brings together people,
as we can see, from across the political
spectrum, and it will unlock the poten-
tial of medical information technology
for all Americans.

Mrs. CLINTON. I am delighted to be
working on this very important na-
tional initiative with the majority
leader because we are at a pivotal mo-
ment. Pockets of innovation and in-
vestment are developing all over the
country. In my State, places like Roch-
ester, NY, and in the majority leader’s
State, the Tri-Cities region of Ten-
nessee, health care providers, employ-
ers and community groups are begin-
n ing the process of building a health
information technology network. That
is exactly where we need to be—a con-
tinuous readout not just of the paper
and of the EKG but the result actually
read by the box.

I have been able to see huge progress
in my own life and watching my dad’s
practice and my practice. Now we need
to see all of that sort of progress con-
densed, applied not just to the tech-
nology but to the collection of infor-
mation, the promotion of electronic
health records, and the appropriate
sharing of that information which is
the most effective part of progress we
are going to see. We are going to see it
come alive on the Senate floor and with
the House and work
in concert with the President of the United States to make sure that the great advantages, in terms of lowering costs, getting rid of inefficiencies, and promoting quality will be realized.

The bill that we will shortly introduce is for all Americans. It provides that important backbone and critical building block for a better, a stronger, and a more responsive health care system.

Again, I thank my distinguished colleague from New York. We urge all of our colleagues to look at this bill and support this bill. With this legislation, there is no doubt in my mind that we will, yes, help save money and help save time, but most importantly we will save lives.

I ask unanimous consent that the text of the bill we will shortly send to the desk be printed in the RECORD.

Mr. President, I am proud to join Senators Frist and Clinton in introducing the Health Technology to Enhance Quality Act of 2005.

Our national health care system is in crisis. Forty-five million Americans are left behind, millions more costs rise. Health care costs are increasing at almost double digit rates. Millions of Americans are suffering, and dying, from diseases such as diabetes or AIDS that could have been prevented or delayed for many years. And the chance of Americans receiving the right care, at the right time and for the right reason is no greater than the flip of a coin.

These health care issues are varied and complex, as are the solutions. But, as one of my constituents advised, it is time for us in the Congress to put on our hard hats, pick up our tool belts and get to work fixing our broken health care system.

One place to start is by bringing the health care system into the 21st century. In our lifetimes, we have seen some of the greatest advances in the history of technology and the sharing of information. Yet, in our health care system, too much care is still provided with a pen and paper. Too much information about patients is not shared between doctors or readily available to them in the first place. And providers too often do not have the information to know what care has worked most effectively and efficiently to make patients healthy.

Mistakes are easily made—medical errors alone kill up to 98,000 people a year, more people than the number who die from AIDS each year. Every transaction you make at a bank now costs them less than a penny. Yet, because we have not updated technology in the rest of the health care industry, a single transaction still costs up to $25—not one dime of which goes toward improving the quality of our health care.

The Health Technology to Enhance Quality Act of 2005 is going to help bring the health care system into the 21st century. This bill will lead to the development and implementation of health information technology standards and measures interoperability of health information systems. The legislation codifies the Office of National Coordinator for Information Technology and establishes standards for the electronic exchange of health information. The bill also provides grant funding to support development of health information technology infrastructure as well as measurement of the quality of care provided to patients.

This legislation will help our health care system take a huge step forward. A vote for the Health TEQ Act is a vote for health care that is safe, effective, and affordable. I urge my colleagues to join us in passing this bill quickly.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1362

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Health Technology to Enhance Quality Act of 2005” or the “Health TEQ Act of 2005.”

TITLE I—HEALTH INFORMATION TECHNOLOGY STANDARDS ADOPTION AND INFRASTRUCTURE DEVELOPMENT

SEC. 101. ESTABLISHMENT OF NATIONAL COORDINATOR; RECOMMENDATION, ADOPTION, AND IMPLEMENTATION OF HEALTH INFORMATION ELECTRONIC EXCHANGE STANDARDS.

The Public Health Service Act (42 U.S.C. 201 et seq.) is amended by adding at the end the following:

“TITLE XXIX—HEALTH INFORMATION TECHNOLOGY.

“SEC. 2901. DEFINITIONS.

“(1) GROUP HEALTH PLAN.—The term ‘group health plan’ has the meaning giving that term in section 2791.

“(2) HEALTHCARE PROVIDER.—The term ‘healthcare provider’ means a hospital, skilled nursing facility, home health agency, and a physician practice, as defined in section 1861(s)(4) of the Social Security Act, a physician (as defined in section 1861(r)(1) of the Social Security Act), a hospital, a pharmacy, a laboratory, and any other category of facility or clinician determined appropriate by the Secretary.

“(3) HEALTH INFORMATION.—The term ‘health information’ means any information, recorded in any form or medium, that relates to the past, present, or future physical or mental health or condition of an individual, the provision of healthcare to an individual, or the past, present, or future payment for the provision of healthcare to an individual.

“(4) HEALTH INSURANCE ISSUER.—The term ‘health insurance issuer’ has the meaning given that term in section 2791.

“(5) LABORATORY.—The term ‘laboratory’ has the meaning given that term in section 331.

“(6) PHARMACIST.—The term ‘pharmacist’ has the meaning given that term in section 804 of the Federal Food, Drug, and Cosmetic Act.

“SEC. 2902. OFFICE OF THE NATIONAL COORDINATOR FOR HEALTH INFORMATION TECHNOLOGY.

“(a) OFFICE OF NATIONAL HEALTH INFORMATION TECHNOLOGY.—There is established within the Office of the Secretary an Office of the National Coordinator of Health Information Technology (referred to in this section as the ‘Office’). The Office shall be headed by a National Coordinator who shall be appointed by the President in consultation with the Secretary and shall report directly to the Secretary.

“(b) PURPOSE.—It shall be the purpose of the Office to carry out programs and activities to develop a nationwide interoperable health information technology infrastructure that—

“(1) improves healthcare quality, reduces medical errors, and advances the delivery of patient-centered medical care;

“(2) reduces healthcare costs resulting from inefficiency, medical errors, inappropriate care, and inconvenience to patients;

“(3) ensures that appropriate information to help guide medical decisions is available at the time and place of care;

“(4) promotes a more effective marketplace, greater competition, and increased choice through the wider availability of accurate information on healthcare costs, quality, and outcomes;

“(5) improves the coordination of care and information among hospitals, laboratories, physician offices, and other entities through and effective infrastructure for the secure and authorized exchange of healthcare information;

“(6) improves public health reporting and facilitates the early identification and rapid response to public health threats and emergencies, including bioterror events and infectious disease outbreaks;

“(7) facilitates health research;

“(8) enables that patients’ health information is secure and protected.

“(c) DUTIES OF NATIONAL COORDINATOR.—(1) IN GENERAL.—The National Coordinator shall—

“(A) facilitate the adoption of a national set of the electronic exchange of health information;

“(B) serve as the principal advisor to the Secretary on the development, application, and use of health information technology, and coordinate and oversee the health information technology programs of the Department;

“(C) ensure the adoption and implementation of standards for the electronic exchange of health information, including coordinating the activities of the Standards Working Group under section 2903;

“(D) carry out activities related to the electronic exchange of health information that reduce cost and improve healthcare quality for the Department;

“(E) ensure that health information technology policy and programs of the Department are coordinated with those of relevant federal and international commissions (including Federal commissions) with a goal of avoiding duplication of efforts and of helping to ensure that each agency undertakes health information technology activities primarily within the areas of its greatest expertise and technical capability;

“(F) to the extent permitted by law, coordinate outreach and information dissemination by the relevant executive branch agencies (including Federal commissions) with public and
private parties of interest, including consumers, payers, employers, hospitals and other healthcare providers, physicians, community health centers, laboratories, vendors and other stakeholders;

"(G) advise the President regarding specific Federal health information technology programs; and

"(H) in addition to the reports described under paragraph (2).

"(2) REPORTS TO CONGRESS.—The National Coordinator shall submit to Congress, on an annual basis, a report that describes—

"(A) specific steps that have been taken to facilitate the adoption of a nationwide system for the electronic exchange of health information;

"(B) barriers to the adoption of such a nationwide system; and

"(C) strategies and actions to achieve full implementation of such a nationwide system.

"(d) DETAIL OF FEDERAL EMPLOYEES.—

"(1) IN GENERAL.—Upon the request of the National Coordinator, the head of any Federal agency is authorized to detail, with or without reimbursement from the Office, any of the personnel of such agency to the Office to carry out its duties under this section.

"(2) EFFECT OF DETAIL.—Any such detail shall—

"(A) not interrupt or otherwise affect the civil service status or privileges of the Federal employee; and

"(B) in addition to any other staff of the Department employed by the National Coordinator.

"(3) ACCEPTANCE OF DETAILERS.—Notwithstanding any other provision of law, the Office may accept detailed personnel from other Federal agencies without regard to whether the agency described under paragraph (1) is reimbursed.

"(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out the activities of the Office under this section for each of fiscal years 2006 through 2010.

**SEC. 2903. COLLABORATIVE PROCESS FOR THE RECOMMENDATION, ADOPTION AND IMPLEMENTATION OF HEALTH INFORMATION STANDARDS.**

"(a) ESTABLISHMENT OF WORKING GROUP.—Not later than 60 days after the date of enactment of this title, the National Coordinator, in consultation with the Director of the National Institute of Standards and Technology (referred to in this section as the ‘Director’), shall establish a permanent Electronic Health Information Standards Development Working Group (referred to in this title as the ‘Standards Working Group’).

"(b) COMPOSITION.—The Standards Working Group shall be composed of—

"(1) the National Coordinator, who shall serve as the chairperson of the Standards Working Group;

"(2) the Director;

"(3) representatives of the relevant Federal agencies and departments, as selected by the Secretary in consultation with the National Coordinator; representatives of the Department of Veterans Affairs, the Department of Defense, the Office of Management and Budget, the Department of Homeland Security, and the Environmental Protection Agency;

"(4) private entities accredited by the American National Standards Institute, as selected by the National Coordinator;

"(5) representatives, as selected by the National Coordinator—

"(A) who are leaders in health plans or other health insurance issuers;

"(B) of healthcare provider organizations;

"(C) with expertise in health information security;

"(D) with expertise in health information privacy;

"(E) with experience in healthcare quality and patient safety, including those with experience in utilizing health information technology to improve healthcare quality and patient safety;

"(F) of consumer and patient organizations;

"(G) of employers;

"(H) with experience in data exchange; and

"(I) with experience in developing health information technology standards and new health information technology;

"(j) representatives as determined by the National Coordinator in consultation with the Secretary;

"(k) STANDARDS ADOPTED.—On the date of enactment of this title, the Secretary and the Standards Working Group shall deem as adopted, for use by the Secretary and private entities, the standards adopted by the Consolidated Health Informatics Initiative prior to such date of enactment.

"(2) DUTIES.—

"(1) FIRST YEAR REVIEW.—Not later than 1 year after the date of enactment of this title, the Standards Working Group shall—

"(A) review existing standards (including content and communication, and security standards) for the electronic exchange of health information, including such standards deemed adopted under subsection (c);

"(B) identify deficiencies and omissions in such existing standards;

"(C) identity duplications and omissions in existing standards, and recommend modifications to such standards necessary; and

"(D) submit a report to the Secretary recommending for adoption by such Secretary and private entities—

"(i) modifications to the standards deemed adopted under subsection (c); and

"(ii) any additional standards reviewed pursuant to this paragraph.

"(2) OCCURRENCE.—Beginning 1 year after the date of enactment of this title, and on an ongoing basis thereafter, the Standards Working Group shall—

"(A) review existing standards (including content, communication, and security standards) for the electronic exchange of health information, including such standards adopted by the Secretary under subsections (c) and (e);

"(B) identify deficiencies and omissions in such existing standards;

"(C) identity duplications and omissions in existing standards, and recommend modifications to such standards necessary; and

"(D) submit reports to the Secretary recommending for adoption by such Secretary and private entities—

"(i) modifications to any existing standards; and

"(ii) any additional standards reviewed pursuant to this paragraph.

"(3) LIMITATION.—The standards described under this subsection shall not include any standards developed pursuant to the Health Insurance Portability and Accountability Act of 1996.

"(e) ADOPTION BY SECRETARY.—Not later than 1 year after the receipt of a report from the Standards Working Group under this paragraph, the Secretary, shall review and provide for the adoption by the Federal Government of any modification or standard recommended in such report.

"(f) VOLUNTARY ADOPTION.—Any standards adopted by the Secretary under this section shall be voluntary for private entities.

"(g) IMPLEMENTATION OF FACA.—

"(1) IN GENERAL.—The Federal Advisory Committee Act (5 U.S.C. App.) shall apply to the Standards Working Group established under this subsection before the date of enactment of this title.

"(2) LIMITATION.—Notwithstanding paragraph (1), the 2-year termination date under section 14 of the Federal Advisory Committee Act shall not apply to the Standards Working Group.

**SEC. 2904. IMPLEMENTATION AND CERTIFICATION OF HEALTH INFORMATION STANDARDS.**

"(a) IMPLEMENTATION.—

"(1) IN GENERAL.—The Secretary, in consultation with the National Coordinator and the Director of the National Institute of Standards and Technology, shall develop criteria to ensure uniform and consistent implementation of any standards for the electronic exchange of health information voluntarily adopted by private entities in technical conformance with such standards adopted under this title.

"(2) IMPLEMENTATION ASSISTANCE.—The Secretary may recognize a private entity or entities to assist private entities in the implementation of the standards adopted under this title.

"(b) CERTIFICATION.—

"(1) IN GENERAL.—The Secretary, in consultation with the National Coordinator and the Director of the National Institute of Standards and Technology shall develop criteria to certify that, for public and private purposes, private entities shall be in compliance with any standard for the electronic exchange of health information adopted under this title and have maintained such compliance in technical conformance with such standard.

"(2) CERTIFICATION ASSISTANCE.—The Secretary may recognize a private entity or entities to assist in the certification described under paragraph (1).

"(c) DELEGATION AUTHORITY.—The Secretary may delegate the development of the criteria under subsection (a) and (b) to a private entity.

**SEC. 2905. AUTHORITY FOR COORDINATION AND SPENDING.**

"(a) IN GENERAL.—The Secretary acting through the National Coordinator—

"(1) shall direct and coordinate—

"(A) Federal spending related to the development, adoption, and implementation of standards for the electronic exchange of health information; and

"(B) the adoption of the recommendations submitted to such Secretary by the Standards Working Group established under section 2903; and

"(2) may utilize the entities recognized under subsection (4) to provide assistance and certification related to the implementation of the standards adopted by the Secretary under this title.

"(b) LIMITATION.—

"(1) IN GENERAL.—Notwithstanding any other provision of law, no Federal agency shall expend Federal funds for the purchase of hardware, software, or support services for the purpose of implementing a standard related to the electronic exchange of health information that is not a standard adopted by the Secretary under section 2903.

**SEC. 102. ENCOURAGING SECURE EXCHANGE OF HEALTH INFORMATION.**

"(a) STUDY AND GRANT PROGRAMS RELATED TO STATE HEALTH INFORMATION LAWS AND PRACTICES.—

"(1) IN GENERAL.—The Secretary of Health and Human Services shall carry out, or contract with a private entity to carry out, a study that examines—

"(2) EFFECTIVE DATE.—The limitation under paragraph (1) shall take effect not later than 1 year after the adoption by the Secretary of such standards under section 2903.
(i) the variation among State laws and practices that relate to the privacy, confidentiality, and security of health information;
(ii) how such variation among State laws and practices may impact the electronic exchange of health information (as defined in section 2901 of the Public Health Service Act) (as added by section 101)—
   (I) among the States;
   (II) between the States and the Federal Government; and
   (III) among private entities; and
(iii) how such laws and practices may be harmonized to permit the secure electronic exchange of health information.

(8) RECOMMENDATIONS.—Not later than 1 year after the date of enactment of this Act, the Secretary shall submit to Congress a report that—
   (i) describes the results of the study carried out under subparagraph (A); and
   (ii) makes recommendations based on the results of such study.

(9) SECURE EXCHANGE OF HEALTH INFORMATION; INCENTIVE GRANTS.—Title XXIX of the Public Health Service Act (as added by section 101) is further amended by adding at the end the following:

   SEC. 2906. SECURE EXCHANGE OF HEALTH INFORMATION; INCENTIVE GRANTS.
   (a) IN GENERAL.—The Secretary may award competitive grants to eligible entities in order to carry out programs under which such States cooperate with other States to develop and implement State policies that will facilitate the exchange of health information utilizing the standards adopted under section 2903—
      (1) among the States;
      (2) between the States and the Federal Government; and
      (3) among private entities.
   (b) PRIORITY.—In awarding grants under subsection (a), the Secretary shall give priority to States that provide assurance that any funding awarded under such a grant shall be used to harmonize privacy laws and practices between the States, the States and the Federal Government, and among private entities related to the privacy, confidentiality, and security of health information.

   (c) PROVISIONS OF INFORMATION.—The Secretary shall disseminate information regarding the efficacy of efforts of a recipient of a grant under this section.
   (d) COSTS OF INSURANCE.—The Secretary may provide technical assistance to recipients of a grant under this section.

   (e) AUTHORIZATION OF APPROPRIATIONS.—For carrying out the purposes of this section, there are authorized to be appropriated such sums as may be necessary for each of the fiscal years 2006 through 2010.

   (f) STUDY AND GRANT PROGRAMS RELATED TO STATE LICENSURE LAWS.—
      (1) STUDY OF STATE LICENSURE LAWS.—
         (A) IN GENERAL.—The Secretary shall carry out a study to determine whether a recipient of a grant under subsection (a) has implemented a technology plan that includes a strategy that includes initiatives to implement the regional or local health information plan.
         (B) REPORT AND RECOMMENDATIONS.—Not later than 1 year after the date of enactment of this Act, the Secretary shall submit to Congress a report that—
            (i) describes the results of the study carried out under subparagraph (A); and
            (ii) makes recommendations to States regarding the harmonization of State laws based on the results of such study.
      (2) REAUTHORIZATION OF INCENTIVE GRANTS RELATING TO THE HEALTH INFORMATION PORTABILITY AND ACCOUTABILITY ACT OF 1996.—Title XXIX of the Public Health Service Act (42 U.S.C. 254c-18(b)) is amended by striking “2002 through 2006” and inserting “2006 through 2010”.

   (g) HIPAA APPLICATION TO ELECTRONIC HEALTH INFORMATION.—Title XXIX of the Public Health Service Act (as added by section 101) is further amended by adding at the end the following:

   SEC. 2907. APPLICABILITY OF PRIVACY AND SECURITY REGULATIONS.
   (1)_privacy regulations.—Title XXIX of the Public Health Service Act (as added by section 101) is amended by adding at the end the following:
   (2) Security regulations.—Title XXIX of the Public Health Service Act (as added by section 101) is further amended by adding at the end the following:

   SEC. 2908. GRANTS FOR THE IMPLEMENTATION OF REGIONAL OR LOCAL HEALTH INFORMATION TECHNOLOGY PLANS.
   (a) IN GENERAL.—The Secretary, in consultation with the National Coordinator, may award competitive grants to eligible entities in order to implement the regional or local health information plans to improve healthcare quality and efficiency through the electronic exchange of health information pursuant to the standards, protocols, and other requirements adopted by the Secretary under sections 2903 and 2910.
   (b) ELIGIBILITY.—To be eligible to receive a grant under subsection (a) an entity shall—
      (1) demonstrate financial need to the Secretary;
      (2) demonstrate that one of its principal missions or purposes is to use information technology to improve healthcare quality and efficiency;
      (3) adopt bylaws, memoranda of understanding, or other documents that demonstrate that the governance structure and decisionmaking processes of such entity allow for participation on an ongoing basis by multiple stakeholders within a community, including—
         (A) physicians (as defined in section 1861(r)(1) of the Social Security Act), including physicians that provide services to low income and underserved populations;
         (B) hospitals (including hospitals that provide services to low income and underserved populations);
         (C) group health plans or other health insurance issuers;
         (D) health centers (as defined in section 330(b));
         (E) health centers (as defined in section 1861(aa)(4) of the Social Security Act);
         (F) Federally qualified health centers;
         (G) employers; and
         (H) any other healthcare providers or other entities, as determined appropriate by the Secretary;
      (4) adopt nondiscrimination and conflict of interest policies that demonstrate a commitment to open, fair, and nondiscriminatory participation in the development of the health information plan by all stakeholders; adopt the national health information technology standards adopted by the Secretary under section 2903;
      (5) facilitate the electronic exchange of health information within the local or regional area and among local and regional areas;
      (6) prepare and submit to the Secretary an application in accordance with subsection (c); and
      (7) agree to provide matching funds in accordance with subsection (e).
   (c) APPLICATION.—
      (1) IN GENERAL.—To be eligible to receive a grant under subsection (a), an entity shall submit to the Secretary an application at such time, in such manner, and containing such information as the Secretary may require.
      (2) REQUIRED INFORMATION.—At a minimum, an application submitted under this subsection shall include—
         (A) clearly identified short-term and long-term objectives of the regional or local health information plan;
         (B) a technology plan that complies with the standards adopted under section 2903 and that includes a descriptive and reasoned estimate of the costs of implementing the plan, including the use of healthcare quality measures adopted under section 2910;
         (C) a governance plan that defines the manner in which the stakeholders shall work together on an ongoing basis; and
         (D) an analysis that describes provisions to encourage the implementation of the electronic exchange of health information by all physicians, including single physician practices, small physician groups participating in the health information plan;
      (3) A strategy that includes initiatives to improve healthcare quality and efficiency, including the use of healthcare quality measures adopted under section 2910;
      (4) A plan to ensure the privacy and security of personal health information that is consistent with Federal and State law;
      (5) A governance plan that defines the manner in which the stakeholders shall work together on an ongoing basis; and
      (6) The sustainability of the plan.
   (d) FUNDING.—Amounts received under a grant under subsection (a) shall be used to establish and implement a regional
to an entity or individual for developing, implementing, operating, or facilitating the electronic exchange of health information (as defined in section 2901 of the Public Health Service Act); or the purpose of—

(A) DEFINITION OF PERMITTED SUPPORT.—

In this section, the term ‘permitted support’ means the provision of, or funding used exclusively for, any equipment, item, information, right, license, intellectual property, software, or service, regardless of whether any such support may have utility or value to the network for any purpose beyond the exchange of health information and, for purposes of this section, shall replace, to the extent practicable and appropriate, any duplicative or redundant existing measurement and reporting activities currently utilized by Federal healthcare programs, including those in titles XVIII, XIX, and XXI of the Social Security Act.

(b) CONDITIONS.—In establishing the guidelines under subsection (a), the Secretary shall establish conditions on such arrangements consistent with the purposes of—

(1) improving healthcare quality;

(2) reducing medical errors;

(3) reducing healthcare costs;

(4) improving the coordination of care; and

(5) streamlining administrative processes; and

(6) promoting transparency and competition.

TITLE III—ADOPTION, IMPLEMENTATION, AND USE OF HEALTHCARE QUALITY MEASURES

SEC. 301. STANDARDIZED MEASURES.

(a) In general.—The Secretary, the Secretary of Defense, the Secretary of Veterans Affairs, and any other head of relevant Federal agencies as determined appropriate by the President (in this section as the ‘Secretary’) shall adopt, on an ongoing basis, uniform healthcare quality measures to assess the effectiveness, timeliness, patient centeredness, efficiency, and safety of care delivered by healthcare providers across Federal healthcare programs, including those in titles XVIII, XIX, and XXI of the Social Security Act.

(b) Review of measures adopted.—The Secretary shall conduct an ongoing review of the measures adopted under paragraph (1).

(2) Existing activity—notwithstanding any other provision of law, the measures and reporting activities described in subsection (a) of this section shall replace, to the extent practicable and appropriate, any duplicative or redundant existing measurement and reporting activities currently utilized by Federal healthcare programs, including those in titles XVIII, XIX, and XXI of the Social Security Act.

(c) Priority measures.—

(1) In general.—In determining the measures to be adopted under subsection (a), and the timing of any such adoption, the Secretary shall give priority to—

(A) measures with the greatest potential impact for improving the quality and efficiency of care provided under Federal programs;

(B) measures that may be rapidly implemented by group health plans, health insurance issuers, physicians, hospitals, nursing homes, long-term care providers, and other providers; and

(C) measures which may inform healthcare decisions made by consumers and patients.

(2) National quality forum measures; quality of care indicators.—To the extent determined feasible and appropriate by the Secretary, the Secretary may give priority to—

(A) measures endorsed by the National Quality Forum, subject to compliance with the amendments made by the National Technology Transfer and Advancement Act of 1995; and

(B) indicators relating to the quality of care data submitted to the Secretary by hospitals, group health plans, and health insurance issuers (as defined in section 2791 of the Public Health Service Act (42 U.S.C. 300gg-91)) and between healthcare providers and other providers (as defined in section 2901 of such Act) as added by section 101) in accordance with subsection (b).

(3) Existing activities.—Notwithstanding any other provision of law, the Secretary shall establish conditions on such arrangements consistent with the purposes of—

(1) improving healthcare quality;

(2) reducing medical errors;

(3) reducing healthcare costs;

(4) improving the coordination of care; and

(5) streamlining administrative processes; and

(6) promoting transparency and competition.

SEC. 302. EXCEPTION FOR THE PROVISION OF PERMITTED SUPPORT.

(a) Exemptions from criminal penalties.—Section 1128B(b) of the Social Security Act (42 U.S.C. 1320a–7b(b)(3)) is amended—

(1) in paragraph (3)—

(A) in subparagraph (G), by striking ‘‘and’’ at the end; and

(B) in subparagraph (H), as added by section 6757 of the Omnibus Reconciliation Act of 1990 (Public Law 101–508) (as added by section 101), by moving such subparagraph 2 ems to the left;

(ii) by striking the period at the end and inserting ‘‘; and’’;

(ii) by striking the period at the end and inserting ‘‘; and’’; and

(E) by adding at the end the following:

(1) subject to paragraph (4), the provision, with the following exceptions, of any permitted support (as defined in paragraph (4)(A) and subject to the conditions in paragraph (4)(B))

SEC. 303. GROUP PURCHASING.

(a) In general.—Not later than 1 year after the date of enactment of this Act, the Secretary shall establish a safe harbor for group purchasing of hardware, software, and support services for the electronic exchange of health information in compliance with section 2903 of the Public Health Service Act (42 U.S.C. 300gg-91(ii)) for group health plans, health insurers, physicians, hospitals, and post-acute care providers;

(b) Conditions.—In establishing the safe harbor under subsection (a), the Secretary shall establish conditions on such safe harbor consistent with the purposes of—

(1) improving healthcare quality;

(2) reducing medical errors;

(3) reducing healthcare costs;

(4) improving the coordination of care; and

(5) streamlining administrative processes; and

(6) promoting transparency and competition.

SEC. 304. PERMISSIBLE ARRANGEMENTS.

(a) In general.—Not later than 1 year after the date of enactment of this Act and notwithstanding any other provision of law, the Secretary shall establish guidelines in compliance with section 2903 of the Public Health Service Act that permit certain arrangements between group health plans and health insurance issuers (as defined in section 2791 of the Public Health Service Act (42 U.S.C. 300gg-91)) and between healthcare providers and other providers (as defined in section 2901 of such Act) as added by section 101) in accordance with subsection (b).

(b) Conditions.—In establishing the guidelines under subsection (a), the Secretary shall establish conditions on such arrangements consistent with the purposes of—

(1) improving healthcare quality;

(2) reducing medical errors;

(3) reducing healthcare costs;

(4) improving the coordination of care; and

(5) streamlining administrative processes; and

(6) promoting transparency and competition.
and health insurance issuers, providers, purchasers, consumer organizations, and entities receiving a grant under section 2908, to—

(A) encourage the use of the healthcare quality standards adopted by the Secretary under this section; and

(B) foster uniformity between the healthcare quality measures utilized in Federal programs and private entities.

(2) USE OF MEASURES.—The measures adopted by the Secretaries under this section may apply in one or more disease areas and across public health officials, researchers, and other appropriate individuals and entities, the Secretaries and other relevant agencies shall provide for the aggregation, analysis, and dissemination of quality measures collected under this section. Nothing in this section shall be construed as modifying the privacy standards under the Health Insurance Portability and Accountability Act of 1996 (Public Law 104–191).

(e) EVALUATIONS.—

(1) TOTAL ACHIEVEMENT OF USE.—The Secretary shall ensure the ongoing evaluation of the use of the healthcare quality measures adopted under this section.

(2) EVALUATION.—

(A) IN GENERAL.—The Secretary shall, directly or indirectly through a contract with another entity, conduct an evaluation of the collaborative efforts of the Secretaries to adopt uniform healthcare quality measures and reporting requirements for federally supported healthcare delivery programs as required under this section.

(B) REPORT.—Not later than 2 years after the date of enactment of this title, the Secretary shall submit a report to Congress and the Comptroller General of the United States that includes—

(I) a detailed description of—

(aa) the total amount expended from the Trust Funds (amounts expended as a result of the provisions of this subsection during the previous year compared to the total amount that would have been expended from the Trust Funds during the year if this subsection had not been enacted);

(bb) the projections of the total amount that will be expended from the Trust Funds to include all amounts that will be expended as a result of the provisions of this subsection during the year in which the report is submitted compared to the total amount that would have been expended from the Trust Funds during the year if this subsection had not been enacted; and

(cc) specify the steps (if any) that the Secretary will take pursuant to subparagraph (D) to ensure that the limitation described in subparagraph (B) will not be violated; and

(II) a certification from the Chief Actuary of the Centers for Medicare & Medicaid Services that the descriptions under items (aa), (bb), and (cc) of subclause (I) are reasonable, accurate, and based on generally accepted actuarial and statistical methodologies, including that the steps described in subclause (I)(cc) will be adequate to avoid violating the limitation described in subparagraph (B).

(D) APPLICATION OF LIMITATION.—If the Secretary determines that the provisions of this subsection will result in the limitation described in subparagraph (B) being violated in any year, the Secretary shall take appropriate steps to reduce spending that is occurring by reason of such provisions, including through reducing the scope, site, and duration of the pilot project.

(F) AUTHORITY.—The Secretary shall make necessary spending adjustments under the Medicare programs so the limitation described in subparagraph (B) is not violated in any year.

(2) S AVER.—In authorizing such waivers, the Secretary shall waive any provisions of title XI or XIX of the Social Security Act that would otherwise prevent a State from establishing a value based purchasing program in accordance with paragraph (1).

(g) QUALITY INFORMATION SHARING.—

(1) REVIEW OF MEDICARE CLAIMS DATA.—(A) PROCEDURES.—In order to improve the quality and efficiency of items and services furnished to Medicare beneficiaries under title XVIII of the Social Security Act, the Secretary shall establish a program to review claims data submitted under such title with respect to items and services furnished or ordered by physicians.

(B) USE OF MOST RECENT MEDICARE CLAIMS DATA.—In conducting the review under subparagraph (A), the Secretary shall use the most recent claims data that is available to the Secretary.

(2) SHARING OF DATA.—Beginning in 2006, the Secretary shall periodically provide physicians with comparative information on the performance of items and services under such title XVIII based upon the review of claims data under paragraph (1).

SEC. 303. QUALITY IMPROVEMENT ORGANIZATION ASSISTANCE.

(a) IN GENERAL.—Section 151(a) of the Social Security Act (42 U.S.C. 1320c–3(a)) is amended by adding at the end the following:

"(18) The organization shall assist, at such time and in such manner as the Secretary may require, inatics of the trust funds under section 2901 of the Public Health Service Act, and向上游的改进和健康服务质量的提高。这种改进和提高可以通过实施电子交换的健康信息，以及通过改善服务的效率和质量来实现。这项改进将有助于提高我们的医疗保健系统的效率和有效性，从而确保患者能够得到更好的医疗保健。"
participants in the Small Business Innovation Research—SBIR—program. Prior to the SBA’s decision, the SBIR program was an example of a highly successful Federal initiative to encourage economic growth and innovation in the biotechnology industry by funding the early development and startup stages of a company.

Traditionally, to qualify for an SBIR grant a small business applicant had to meet two requirements: one, that the company have less than 500 employees; and two, that the business be 51 percent owned by one or more individuals. Now, according to the SBA, the term “individuals” means natural persons only, whereas for the past 20 years the term individual has included venture-capital companies. As a result, biotech companies backed by venture-capital funding in Missouri and throughout our Nation, who are on the cutting edge of science, can no longer participate in the program.

The biotech industry is like no other in the world because it takes such a long span of time and intense capital expenditures to bring a successful product to market. In fact, according to a study completed by the Tufts Center for the Study of Drug Development, it takes roughly 10-15 years and $800 million for a company to bring just one product to market. As you can imagine, the industry’s entrepreneurs are seeking financial assistance wherever they can find it.

For the past 20 years, the SBIR program has been a catalyst for developing our Nation’s most successful biotechnology companies. In addition to these important government grants, venture capital funding plays a vital role in the financial support of these same companies. The strength of our biotechnology industry is a direct result of government grants and venture capital working together.

However, some argue that a biotech firm with a majority venture capital backing is a large business. This is simply a bogus conclusion. Venture capital firms solely invest in biotech start-ups for the possibility of a future innovation and financial return and generally do not seek to take control over the management functions or day-to-day operations of the company. Venture capital firms that seek to invest in small biotech businesses do not, simply by their investment, turn a small company into a large business. These are legitimate, small, start-up businesses. Let’s not punish them.

Instead, we must work together to avoid stifling innovation. Let me be clear. Our impact today will foster cures and medicines tomorrow that were once thought to be inconceivable. However, the industry cannot do it alone. We must nurture biotechnology and help the industry grow for the future of our economy and for our well-being.

This bill that I am introducing today will do just that. It will ensure that the biotechnology industry has access to SBIR grants, as it has had for 20 years. It will level the playing field to ensure that SBIR grants are given to small businesses based on fruitful science and nothing else. This is still a young and fragile industry, and we are on the cusp of great scientific advances. However, there will be profound consequences if biotechnology companies continue to be excluded from the SBIR program.

Mr. President, I seek unanimous consent that text of the bill be in printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1283

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Save America’s Biotechnology Innovative Research Act of 2005” or “SBIR Act.”

SEC. 2. ELIGIBILITY FOR PARTICIPATION IN SMALL BUSINESS INNOVATION RESEARCH PROGRAM.

(a) In general.—Section 9 of the Small Business Act (15 U.S.C. 638) is amended by adding at the end the following new subsection:

“(x) ELIGIBILITY FOR PARTICIPATION IN SBIR PROGRAM.—

(1) In general.—To be eligible to receive an award under the SBIR program, a business concern—

(A) shall have not more than 500 employees; and

(B) shall be owned in accordance with one of the ownership requirements described in paragraph (2).

(2) OWNERSHIP REQUIREMENTS.—The ownership requirements referred to in paragraph (1) are the following:

(A) The business concern is—

(i) at least 51 percent owned and controlled by one or more individuals (or eligible venture capital companies, which are citizens of or permanent resident aliens in the United States); and

(ii) not more than 49 percent owned and controlled by a single eligible venture capital company (or group of commonly-controlled eligible venture capital companies).

(B) The business concern is at least 51 percent owned and controlled by another business concern that is itself at least 51 percent owned and controlled by individuals who are citizens or permanent resident aliens in the United States.

(C) The business concern is a joint venture in which each entity to which the joint venturemeets one of the ownership requirements under this paragraph.

(3) EMPLOYEE DEFINED.—For purposes of paragraph (1)(A), the term ‘employee’ means an individual employed by the business concern and does not include—

(A) an individual employed by an eligible venture capital company providing financing to the business concern; or

(B) an individual employed by any entity in which the eligible venture capital company is invested other than that business concern.

(4) TREATMENT OF OTHER FORMS OF OWNERSHIP.—

(A) STOCK OPTION OWNERSHIP.—For purposes of this subsection, in the case of a business concern owned in whole or in part by an employee stock option plan, each stock trustee or plan member shall be deemed to be an owner.

(B) TRUST OWNERSHIP.—For purposes of this subsection, in the case of a business concern owned in whole or in part by a trust, each trustee or trust beneficiary shall be deemed to be an owner.

(5) EXCEPTION FOR START-UP CONCERNS.—Notwithstanding paragraphs (1) through (4), any business concern that is a start-up concern shall be eligible to receive funding under the SBIR program.

(6) Exception.—Section 9(e) of the Small Business Act (15 U.S.C. 638(e)) is amended by adding at the end the following new paragraphs:

“(g) The term ‘eligible venture capital company’ means a business concern—

“(A) that—

(i) is a Venture Capital Operating Company, as that term is defined in regulations promulgated by the Secretary of Labor; or

(ii) is an entity that—

(I) is registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.); or

(II) is an investment company, as defined in section 3(c)(14) of such Act (15 U.S.C. 80a-3(c)(14)), which is not registered under such Act because it is beneficially owned by less than 100 persons; and

(B) that is not controlled by any business concern that is not a small business concern within the meaning of section 3.

(10) The term ‘start-up concern’ means a business concern that—

(A) is for at least 2 of the 3 preceding fiscal years had—

(i) sales of not more than $3,000,000; or

(ii) no positive cash flow from operations; and

(B) is not formed to acquire any business concern other than a small business concern that meets the requirement under subparagraph (A).

(c) REGULATIONS.—Before the date that is 90 days after the date of the enactment of this Act, the Administrator of the Small Business Administration shall—

(1) in accordance with the exceptions to public rulemaking under section 553(b)(A) and (B) of title 5, United States Code, promulgate regulations to implement the provisions of this Act;

(2) publish in the Federal Register a notification of the changes in eligibility for participation in the Small Business Innovation Research program made by this Act; and

(3) communicate such changes to Federal agencies that award grants under the Small Business Innovation Research program.

(d) EFFECTIVE DATE.—The amendments made by this Act shall apply with respect to each business concern under the Small Business Innovation Research program on or after the date of the enactment of this Act.

By Mr. CORZINE (for himself, Mrs. CLINTON, Mrs. MURRAY, Mr. LAUTENBERG, Mrs. BOXER, Ms. CANTWELL, Mr. KENNEDY, Mr. INOUYE, and Mr. KERRY):

S. 1264. A bill to provide for the provision by hospitals of emergency contraceptives to women, and post-exposure prophylaxis for sexually transmitted disease to individuals, who are survivors of sexual assault; to the Committee on Health, Education, Labor, and Pensions.

Mr. CORZINE. Mr. President, I rise today to introduce the Compassionate Assistance for Rape Emergencies Act. In the United States, more than 300,000 women are raped each year, and an estimated 25,000 to 32,000 become pregnant as a result. That is why I am introducing the Compassionate Assistance Act.
in Rape Emergencies Act, or CARE Act.

This bill will ensure that women who are survivors of sexual assault have access to the medical care they need, including emergency contraception. Emergency contraception reduces a woman’s risk of becoming pregnant by up to 89 percent when taken within 72 hours of the assault. I want to be clear: emergency contraception does not end a pregnancy. Instead, emergency contraception works before a pregnancy can occur.

There is widespread consensus in the medical community that emergency contraception is safe and effective. Yet, New Jersey is one of only six States that legally require all medical providers to offer this care to rape survivors. Before this law, one-third of New Jersey’s hospitals did not provide this vital medication. New Jersey’s law should be the national standard. The bill would require that all hospitals that receive Federal funding offer information and access to emergency contraception for victims of rape.

In January of this year, along with 21 Senators, wrote a letter to the Department of Justice asking that they include information about emergency contraception in their national protocol for sexual assault hospital examinations. But they did not. In all 141 pages, the protocol fails to provide sexual assault victims with access to this needed information and treatment. The protocol also denies the door open for health care professionals to decide whether or not to discuss certain treatment options. Today, I want to close that door.

In order to provide comprehensive medical care, hospitals must also provide quick access to preventative medication that helps protect victims of sexual assault from potentially fatal sexually transmitted diseases, such as HIV and hepatitis B. We have an obligation to protect sexual assault victims from these life threatening infections.

We must not sit idly by while so many sexual assault survivors are deprived of the medical care they need and deserve. Once these survivors seek treatment we ought to make sure that they get the treatment they need. Ideology should never stand between patients and the care they deserve.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1264

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Compassionate Assistance for Rape Emergencies Act”.

SEC. 2. FINDINGS.

The Congress finds as follows:

(1) It is estimated that 25,000 to 32,000 women become pregnant each year as a result of rape or incest. An estimated 22,000 of these pregnancies could be prevented if rape survivors had timely access to emergency contraception.

(2) A 1996 study of rape-related pregnancies (published in the American Journal of Obstetrics and Gynecology) found that 50 percent of the pregnancies described in paragraph (1) ended in abortion.

(3) Surveys have shown that many hospitals do not routinely provide emergency contraception to women seeking treatment after being sexually assaulted.

(4) The risk of pregnancy after sexual assault has been estimated to be 4.7 percent in surveys of rape victims infected by some form of contraception at the time of the attack.

(5) The Food and Drug Administration has declared emergency contraception to be safe and effective in preventing unintended pregnancy, reducing the risk by as much as 89 percent if taken within days of unprotected intercourse and up to 95 percent if taken in the first 24 hours.

(6) Medical research strongly indicates that the sooner emergency contraception is administered, the likelihood of preventing unintended pregnancy.

(7) In light of the safety and effectiveness of emergency contraceptive pills, both the American Medical Association and the American College of Obstetricians and Gynecologists have endorsed more widespread availability of such pills. They also recommend that women be provided emergency contraception for six patients after a sexual assault should be considered the standard of care.

(8) Approximately 30 percent of American women of reproductive age are unaware of the availability of emergency contraception.

(9) New data from a survey of women having abortions estimates that 51,000 abortions were prevented by use of emergency contraception in 2000 and that increased use of emergency contraception accounted for 43 percent of the decrease in total abortions between 1994 and 2000.

(10) It is essential that all hospitals that provide emergency medical treatment provide emergency contraception as a treatement option to any woman who has been sexuually assaulted.

(11) It is essential that all hospitals that provide emergency medical treatment provide emergency contraception as a treatment option to any woman who has been sexually assaulted, so that she may prevent an unintended pregnancy.

(12) Victims of sexual assault are at increased risk of contracting sexually transmitted diseases.

(13) Some sexually-transmitted infections cannot be reliably cured if treatment is delayed, and may result in high morbidity and mortality. HIV has killed over 520,000 Americans, and the Centers for Disease Control and Prevention currently estimates that over 1,000,000 Americans are infected with the virus. Even modern drug treatment has failed to cure infected individuals. Nearly 80,000 Americans die of hepatitis B each year, with some individuals unable to fully recover. An estimated 1,250,000 Americans remain chronically infected with the hepatitis B virus and at present, one in five of these may expect to die of liver failure.

(14) It is possible to prevent some sexually transmitted diseases by treating an exposed individual promptly. The use of post-exposure prophylaxis using antiretroviral drugs has been demonstrated to effectively prevent the establishment of HIV infection. Hepatitis B can be prevented by the injection of a single dose of hepatitis B vaccine on the day of exposure and a booster on day one week after exposure. The Centers for Disease Control and Prevention has recommended risk evaluation and post-exposure treatment for victims of sexual assault. For such individuals, immediate treatment is the only means to prevent a life threatening infection.

(15) It is essential that all hospitals that provide emergency medical treatment provide risk assessment and treatment for the sexually transmitted infections to minimize the harm to victims of sexual assault.

SEC. 3. SURVIVORS OF SEXUAL ASSAULT; PROVIDING CONTRACEPTIVES WITHOUT CHARGE.

(a) IN GENERAL.—Federal funds may not be provided to a hospital under any health-related program, unless the hospital meets the conditions specified in subsection (b) in the case of an individual—

(1) who presents at the hospital and states that she is a victim of sexual assault, or is accompanied to the hospital by another individual who declares that the first individual is a victim of a sexual assault; and

(2) who presents at the hospital and whom hospital personnel have reason to believe is a victim of sexual assault.

(b) ASSISTANCE FOR VICTIMS.—The conditions specified in this subsection regarding a hospital and a woman described in subsection (a) are as follows:

(1) The hospital promptly provides the woman with medically and factually accurate and unbiased written and oral information about emergency contraception, including information explaining that—

(A) emergency contraception has been approved by the Food and Drug Administration as safe and effective in preventing pregnancy after unprotected intercourse or contraceptive failure if taken in a timely manner, and is more effective the sooner it is taken; and

(B) emergency contraception does not cause an abortion and cannot interrupt an established pregnancy.

(2) The hospital promptly offers emergency contraception to the woman, and promptly provides such contraception to her at the hospital on her request.

(3) The information provided pursuant to paragraph (1) is in clear and concise language, is readily comprehensible, and meets such conditions regarding the provision of the information in languages other than English as the Secretary may establish.

(4) The services described in paragraphs (1) through (3) are not denied because of the income of the woman to pay for the services.

SEC. 4. PREVENTION OF TRANSMISSIBLE DISEASE.

(a) IN GENERAL.—No hospital shall receive Federal funds under any program which provides risk assessment, counseling, and treatment as required under this section to a survivor of sexual assault described in subsection (b).

(b) SURVIVORS OF SEXUAL ASSAULT.—An individual is a survivor of a sexual assault as described in this subsection if the individual—

(1) presents at the hospital and declares that the individual is a victim of sexual assault, or the individual is accompanied to the hospital by another individual who declares that the first individual is a victim of a sexual assault; or

(2) presents at the hospital and hospital personnel have reason to believe the individual is a victim of sexual assault.

(c) REQUIREMENT FOR RISK ASSESSMENT, COUNSELING, AND TREATMENT.—The following services are required by any hospital to a hospital described in subsection (a):

(1) RISK ASSESSMENT.—A hospital shall promptly provide a survivor of a sexual assault with an assessment of the individual’s risk for contracting sexually transmitted infections as described in paragraph (2)(A), which shall be conducted by a licensed medical professional and based upon the individual’s risk for contracting sexually transmitted infections.

(A) Available information regarding the assault as well as the subsequent findings from
medical examination and any tests that may be conducted; and
(B) established standards of risk assessment which shall include consideration of any risk factors established by the Centers for Disease Control and Prevention, and may also incorporate findings of peer-reviewed clinical studies and appropriate research utilizing non-human primate models of infection.

(2) COUNSELING.—A hospital shall provide a survivor of a sexual assault with advice, provided by a licensed medical professional, concerning—
(A) significantly prevalent sexually transmissible infections for which effective post-exposure prophylaxis exists, and for which the deferral of treatment would either significantly reduce treatment efficacy or would pose substantial risk to the individual’s health; and
(B) the requirement that prophylactic treatment for infections as described in subparagraph (A) shall be provided to the individual upon request, regardless of the ability of the individual to pay for such treatment.

(3) TREATMENT.—A hospital shall provide a survivor of a sexual assault, upon request, with prophylactic treatment for infections described in paragraph (2)(A).

(4) ABILITY TO PAY.—The services described in paragraphs (1) through (3) shall not be denied in whole or in part because of the inability of the individual involved to pay for the services.

(5) LANGUAGE.—Any information provided pursuant to this subsection shall be clear and easy to understand, comprehensible, and meet such conditions regarding the provision of the information in languages other than English as the Secretary may establish.

(d) PROHIBITION OF CONSTRUCTION.—Nothing in this section shall be construed to—
(1) require that a hospital provide prophylactic treatment for a victim of a sexual assault for a 30-day evaluation according to criteria adopted by the Centers for Disease Control and Prevention clearly recommend against the application of post-exposure prophylaxis;
(2) prohibit a hospital from seeking reimbursement for the cost of services provided under this section to the extent that health insurance may reimburse for such services; and
(3) establish a requirement that any victim of sexual assault submit to diagnostic testing for the presence of any infectious disease.

(e) LIMITATION.—Federal funds may not be provided to a hospital under any health-related program unless the hospital complies with the requirements of this section.

SEC. 5. DEFINITIONS.

In this Act:
(1) EMERGENCY CONTRACEPTION.—The term "emergency contraception" means a drug, drug regimen, or device that is—
(A) approved by the Food and Drug Administration to prevent pregnancy; and
(B) is used postcoitally.

(2) HOSPITAL.—The term "hospital" has the meaning given such term in title XVIII of the Social Security Act, including the meaning applicable in such title for purposes of making payments for emergency services to hospitals that do not have agreements in effect under such title. Such term includes a health care facility that is located within, or contracted to, a correctional institution or a post-conviction institutional setting.

(3) LICENSED MEDICAL PROFESSIONAL.—The term “licensed medical professional” means a doctor of medicine, doctor of osteopathy, registered nurse, or registered nurse assistant, or any other healthcare professional determined appropriate by the Secretary.

(4) SECRETARY.—The term "Secretary" means the Secretary of Health and Human Services.

(5) SEXUAL ASSAULT.—
(A) Definition.—The term "sexual assault" means a sexual act (as defined in subparagraphs (A) through (C) of section 2246(2) of title 18, United States Code) where the victim neither gives or lacks the consent to the sexual act.
(B) APPLICATION OF PROVISIONS.—The definition under paragraph (A) shall—
(i) in the case of section 2, apply to males and females, as appropriate; and
(ii) in the case of section 3, apply only to females; and
(iii) in the case of section 4, apply to all individuals.

SEC. 6. EFFECTIVE DATE; AGENCY CRITERIA.

This Act shall take effect upon the expiration of the 180-day period beginning on the date of the enactment of this Act. Not later than 30 days prior to the expiration of such period, the Secretary of Health and Human Services shall publish in the Federal Register criteria for carrying out this Act.

By Mr. VOINOVICH (for himself, Mr. CARPER, Mrs. CLINTON, Mr. ISAKSON, Mrs. HUTCHISON, Mrs. FEINSTEIN, Mr. INHOFE, and Mr. JEFFORDS):
S. 1265. A bill to make grants and loans available to States and other organizations in the economy, public health, and environment of the United States by reducing emissions from diesel engines; to the Committee on Environment and Public Works.

Mr. VOINOVICH. Mr. President, I speak as Chairman of the Environment and Public Works Subcommittee on Clean Air, Climate Change, and Nuclear Security to introduce a landmark, bipartisan piece of legislation—the Diesel Emissions Reduction Act of 2005. This bill is cosponsored by Environment and Public Works Committee Jim INHOFE and ranking member Jim JEFFORDS and Senators Tom CARPER, JOHNNY ISAKSON, HILLARY CLINTON, KAY BAILEY Hutchison, BARBARA FEINSTEIN.

Focused on improving air quality and protecting public health, it would establish voluntary national and state-level grant and loan programs to promote the reduction of diesel emissions. Additionally, the bill would help areas come into attainment for the new air quality standards.

Developed with environmental, industry, and public officials, the legislation complements Environmental Protection Agency, EPA, regulations now being implemented that address diesel fuel and new diesel engines. I am pleased to be joined by a strong and diverse group of organizations and officials: Environmental Defense; Clean Air Task Force; American Lung Association; Sierra Club; Physicians for Social Responsibility; Air Task Force; Union of Concerned Scientists; Ohio Environmental Council; Caterpillar Inc.; Cummins Inc.; Diesel Technology Forum; Emissions Control Technology Association; Associated General Contractors of America; State and Territorial Air Pollution Control Administrators Association; Association of Local Air Pollution Control Officials; Ohio Environmental Protection Agency; Regional Air Pollution Control Agency in Dayton, Ohio; Mid-Ohio Regional Planning Commission.

The cosponsors of this legislation and these groups do not agree on many issues—which is why this bill is so special.

The process for developing this legislation began last year when several of these organizations came in to meet with me. They informed me of the harmful public health impact of diesel emissions. Onroad and nonroad diesel vehicles and engines account for roughly one-half of the nitrogen oxide and particulate matter mobile source emissions nationwide.

I was pleased to hear that the administration had taken strong actions with new diesel fuel and engine regulations, which were developed in a collaborative effort to substantially reduce diesel emissions. However, I was told that the full health benefit would not materialize until federal regulations address new engines and the estimated 11 million existing engines have a long life.

I was pleased that they had a constructive suggestion on how we could address this problem. They informed me of successful grant and loan programs at the State and local level throughout the Nation that were working on a voluntary basis to retrofit diesel engines.

I was also cognizant that the new ozone and particulate matter air quality standards were going into effect and that a voluntary program was needed to help the nation’s 495 and other nonattainment counties—especially those that are in moderate nonattainment like Northeast Ohio.

Additionally, I have visited with University of Cincinnati Medical Center doctors—as recently as this month—to discuss their Cincinnati Childhood Allergy and Air Pollution Study. Some of the early results indicate disturbing impacts on the development of children living near highways.

It became clear to me that a national program was needed. We then formed a strong, diverse coalition comprised of environmental, industry, and public officials. The culmination of this work is being revealed today in the Diesel Emissions Reduction Act of 2005.

This legislation would establish voluntary national and State-level grant and loan programs to promote the reduction of diesel emissions. It would authorize $1 billion over 5 years—$200 million annually. Some will claim that this is too much money and others will claim it is not enough—which is probably why it is just right.

We should first recognize that the need for outpaces what is contained in the legislation. This funding is also fiscally responsible as diesel retrofits have proven to be one of the most cost-effective emissions reduction strategies. Furthermore, as a former Governor, I know firsthand that the new air quality standards are a federal mandate on our states and localities—and they need the Federal Government’s help.
This legislation would help bring counties into attainment by encouraging the retrofitting or replacement of diesel engines, substantially reducing diesel emissions and the formation of ozone and particulate matter.

The bill is efficient with the Federal Government spending dollars in several ways. First, 20 percent of the funding would be distributed to States that establish voluntary diesel retrofit programs. Ten percent of the bill’s overall funding would be set aside as an incentive for States to match the Federal dollars being provided. The remaining 70 percent of the program would be administered by the EPA.

Second, the program would focus on nonattainment areas where help is needed the most. Third, it would require at least 50 percent of the Federal program to be used on public fleets since we are talking about public dollars. Fourth, it would place a high priority on the projects that are the most cost effective and affect the most people.

Lastly, the bill would include provisions to help develop new technologies, encourage more action through non-financial incentives, and require EPA to outreach to stakeholders and report on the success of the program.

EPA estimates that this billion dollar program would leverage an additional $500 million leading to a net benefit of almost $20 billion with a reduction of about 70,000 tons of particulate matter. This is a 13 to 1 benefit-cost ratio.

The Diesel Emissions Reduction Act of 2005 enjoys broad bipartisan support, and it is needed desperately. I plan to work with the bill’s cosponsors and the coalition to use every avenue to get it signed into law as soon as possible.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1265

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ‘‘Diesel Emissions Reduction Act of 2005’’.

SECTION 2. DEFINITIONS.

In this Act:

(1) ADMINISTRATOR.—The term ‘‘Administrator’’ means the Administrator of the Environmental Protection Agency.

(2) CERTIFIED ENGINE CONFIGURATION.—The term ‘‘certified engine configuration’’ means a new, rebuilt, or remanufactured engine configuration—

(A) that has been certified or verified by—

(i) the Administrator; or

(ii) the California Air Resources Board;

(B) that meets or is rebuilt or remanufactured to a more stringent set of engine emission standards, as determined by the Administrator; and

(C) in the case of a certified engine configuration involving the replacement of an existing engine on a vehicle, an engine configuration that replaced an engine that was—

(i) removed from the vehicle; and

(ii) returned to the supplier for remanufacturing to a more stringent set of engine emissions standards or for scrapage.

(3) ELIGIBLE ENTITY.—The term ‘‘eligible entity’’ means—

(A) a regional, State, local, or tribal agency with jurisdiction over transportation or air quality; and

(B) a nonprofit organization or institution that—

(i) represents organizations that own or operate diesel fleets; or

(ii) has, as its principal purpose, the promotion of transportation or air quality.

(4) EMERGING TECHNOLOGY.—The term ‘‘emerging technology’’ means a technology that is not certified or verified by the Administrator or the California Air Resources Board but for which an approachable application and test plan has been submitted for verification to the Administrator or the California Air Resources Board.

(5) HEAVY-DUTY TRUCK.—The term ‘‘heavy-duty truck’’ has the meaning given the term ‘‘heavy-duty vehicle’’ in section 202 of the Clean Air Act (42 U.S.C. 7521).

(6) MEDIUM-DUTY TRUCK.—The term ‘‘medium-duty truck’’ has such meaning as determined by the Administrator, including a certified engine configuration—

(A) the Administrator; or

(B) the California Air Resources Board.

SEC. 3. NATIONAL GRANT AND LOAN PROGRAMS.

(a) IN GENERAL.—The Administrator shall use 70 percent of the funds made available to carry out this Act for each fiscal year to provide grants and low-cost revolving loans, as determined by the Administrator, on a competitive basis, to eligible entities to achieve significant reductions in diesel emissions in terms of—

(1) two tons of pollution produced; and

(2) diesel emissions exposure, particularly from fleets operating in areas designated by the Administrator as poor air quality areas.

(b) DISTRIBUTION.—

(1) IN GENERAL.—The Administrator shall distribute funds made available for a fiscal year under this Act in accordance with this section.

(2) FLEETS.—The Administrator shall provide not less than 50 percent of funds available for a fiscal year under this section to eligible entities for the benefit of public fleets.

(c) ENGINE CONFIGURATIONS AND TECHNOLOGIES.—

(A) CERTIFIED ENGINE CONFIGURATIONS AND VERIFIED TECHNOLOGIES.—The Administrator shall provide not less than 90 percent of funds available for a fiscal year under this section to eligible entities for projects using—

(i) a certified engine configuration; or

(ii) a verified technology.

(B) EMERGING TECHNOLOGIES.—

(i) IN GENERAL.—The Administrator shall provide not more than 10 percent of funds available for a fiscal year under this section to eligible entities for the development and commercialization of emerging technologies. The Administrator shall provide not more than 10 percent of funds available for a fiscal year under this section to eligible entities for the development and commercialization of emerging technologies.

(ii) APPLICATION AND TEST PLAN.—To receive funds under clause (i), a manufacturer, in consultation with an eligible entity, shall submit for verification to the Administrator or the California Air Resources Board a test plan for the emerging technology, together with the application under subsection (c).

(iii) AGRICULTURAL VEHICLE.—(1) IN GENERAL.—To receive a grant or loan under this section, an eligible entity shall submit to the Administrator an application at a time and in a manner, and including such information as the Administrator may require.
(b) an idle-reduction program involving a vehicle or equipment described in subpara-
graphs (A) and (B).
(2) REGULATORY PROGRAMS.—Notwithstanding paragraph (1), no grant or loan provided under this section shall be used to fund the costs of emission reductions that are mandated under Federal, State, or local law.

SEC. 4. STATE GRANT AND LOAN PROGRAMS.
(a) In general.—Subject to the availability of funds provided under this Act to support grant and loan programs administered by States that are designed to achieve significant reductions in diesel emissions,
(b) Applications.—The Administrator shall
(1) provide to States guidance for use in applying for grant or loan funds under this section, including information regarding
(A) the forms for applications;
(B) permissible uses of funds received; and
(C) the cost-effectiveness of various emission reduction technologies eligible to be carried out using funds provided under this section; and
(2) establish, for applications described in paragraph (1)
(A) an annual deadline for submission of the applications;
(B) a process by which the Administrator shall approve or disapprove each application; and
(C) a streamlined process by which a State may renew an application described in paragraph (1) for subsequent fiscal years.
(c) Allocation of funds.—
(1) In general.—For each fiscal year, the Administrator shall allocate among States for which applications are approved by the Administrator under subsection (b)(2) funds made available for a fiscal year under this Act to support grant and loan programs administered by States that are designed to achieve significant reductions in diesel emissions.
(2) Allocation.—Using not more than 20 percent of the funds made available for a fiscal year under this Act to support grant and loan programs administered by States that are designed to achieve significant reductions in diesel emissions, the Administrator shall—
(A) carry out this section for a fiscal year, the Administrator shall allocate among States
(B) a streamlined process by which a State may renew an application described in paragraph (1) for subsequent fiscal years.
(c) Allocation of funds.—
(1) In general.—For each fiscal year, the Administrator shall allocate among States for which applications are approved by the Administrator under subsection (b)(2) funds made available to carry out this section for the fiscal year.
(2) Location.—Noting more than 20 percent of the funds made available to carry out this section for a fiscal year, the Administrator shall provide to each State described in paragraph (1) for the fiscal year an allocation of funds that is equal to—
(A) If each of the 50 States qualifies for an allocation, an amount equal to 2 percent of the funds made available to carry out this section; or
(B) if fewer than 50 States qualifies for an allocation, an amount equal to the amount described in paragraph (1) plus an additional amount equal to 20 percent of the funds made available to carry out this section for a fiscal year, the Administrator shall provide to each State described in paragraph (1) for the fiscal year an allocation of funds that is equal to—
(A) If each of the 50 States qualifies for an allocation, an amount equal to 2 percent of the funds made available to carry out this section; or
(B) if fewer than 50 States qualifies for an allocation, an amount equal to the amount described in paragraph (1) plus an additional amount equal to 20 percent of the funds made available to carry out this section for a fiscal year, the Administrator shall provide to the State under paragraph (2) for a fiscal year, the Administrator shall provide to the State for the fiscal year an additional amount equal to 50 percent of the allocation of the State under paragraph (2).
(2) REQUIREMENTS.—A State shall—
(i) pay a matching share required under this Act; and
(ii) shall not be required to provide a matching share for any additional amount received under subparagraph (A).

(4) UNCLAIMED FUNDS.—Any funds that are not claimed by a State for a fiscal year under this subsection shall be used to carry out section 3.
(5) ADMINISTRATION.—Subject to paragraphs (2) and (3) and, to the extent practicable, the Administrator shall submit to Congress a report evaluating the implementation of the programs under this Act.
(6) Inclusions.—The report shall include a description of—
(A) the total number of grant applications received;
(B) each grant or loan made under this Act, including the amount of the grant or loan; and
(C) the estimated air quality benefits, cost-effectiveness, and benefits of the grant and loan programs under this Act;
(7) problems encountered by projects for which a grant or loan is provided under this Act; and
(8) any other information the Administrator considers to be appropriate.

SEC. 5. EVALUATION AND REPORT.
(a) In general.—Not later than 2 years after the date of enactment of this Act and biennially thereafter, the Administrator shall submit to Congress a report evaluating the implementation of the programs under this Act.
(b) Inclusions.—The report shall include a description of—
(1) the total number of grant applications received;
(2) each grant or loan made under this Act, including the amount of the grant or loan;
(3) each project for which a grant or loan is provided under this Act, including the criteria used to select the grant or loan recipients; and
(4) the estimated air quality benefits, cost-effectiveness, and benefits of the grant and loan programs under this Act;
(5) the problems encountered by projects for which a grant or loan is provided under this Act; and
(6) any other information the Administrator considers to be appropriate.

SEC. 6. OUTREACH AND INCENTIVES.
(a) Definition of Eligible Technology.—In this section—
(1) verificated technology; or
(2) an engine configuration; or
(b) Technology Transfer Program.—
(1) In general.—The Administrator shall establish a program under which the Administrator shall—
(A) informs stakeholders of the benefits of eligible technologies; and
(B) develops financial incentives to promote the use of eligible technologies.
(2) Eligible Stakeholders.—Eligible stakeholders under this section include—
(A) equipment owners and operators;
(B) emission control technology manufacturers;
(C) engine and equipment manufacturers;
(D) State and local officials responsible for air quality management;
(E) community organizations; and
(F) public health and environmental organizations.
(b) State Implementation Plans.—The Administrator shall develop appropriate guidance to provide credit to a State for emission reductions in the State created by the use of eligible technologies through the State implementation plan under section 110 of the Clean Air Act (42 U.S.C. 7410).
(c) International Markets.—The Administrator, in coordination with the Depart-
ment of Commerce and industry stakeholders, shall inform foreign countries with air quality problems of the potential of technologies developed or used in the United States to provide emission reductions in those countries.

SEC. 7. EFFECT OF ACT.
Nothing in this Act affects any authority under the Clean Air Act (42 U.S.C. 7401 et seq.) in existence on the date before the date of enactment of this Act.

SEC. 8. AUTHORIZATION OF APPROPRIATIONS.
There is authorized to be appropriated to carry out this Act $200,000,000 for each of fiscal years 2006 through 2010, to remain available until expended.

By Mr. BINGAMAN:
S. 1267. A bill to amend title IV of the Higher Education Act of 1965 to authorize the Gaining Early Awareness and Readiness for Undergraduate Programs, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Mr. BINGAMAN. Mr. President, our country is facing a crisis. Too many of our young people leave high school without the skills necessary to meet the demands of a global economy. According to a recent U.S. Chamber of Commerce survey, 75 percent of employers report severe difficulties when trying to hire qualified workers, with 40 percent of job applicants having poor skills. As many as 3.3 million jobs may be sent overseas in the next 15 years, causing American workers to lose $136 billion in wages. The strength of our economy, and the future of our nation, largely rests on our ability to improve educational opportunities for all of our citizens.

An educated, skilled, and flexible workforce is essential to building a strong and dynamic economy, and, if we are going to maintain our country’s ability to compete in a global economy, we must help prepare young people to meet the demands of the 21st century workforce. I introduce legislation that will ensure more students graduate high school ready for college and the workforce.

Only 68 percent of all students in the U.S. graduate high school on time with a regular diploma. And, the numbers are worse if the student is Hispanic, African American, Native American, has a disability, or is male. Sadly, a recent report indicates that students are dropping out at a younger age, resulting in an even less educated workforce.

For students who graduate with a high school diploma, too few go on directly to college. Astonishingly, only 38 percent of high school freshmen will earn a high school diploma and make the immediate transition to college directly after graduation. In New Mexico, the statistics are pretty staggering. For every 50 ninth graders in New Mexico, only 30 will graduate high school; 18 will enter college; 11 are still enrolled in their sophomore year; and 5.5 graduate from college within 6 years. We must do better.

We also know, unfortunately, that as many as 40 percent of this country’s high school graduates are not prepared to meet the demands of college or a
competitive workforce. A survey of college professors reveals that half of all public school graduates are not adequately prepared to do college-level math or writing.

There is some good news, however: we know what works. Research conducted by the Department of Education shows that the single best predictor of college success is the quality and level of a student’s high school classes. Students who take college prep curricula are less likely to need remedial classes, and are more likely to earn a college degree. In fact, evidence shows that the intensity and quality of high school curriculum is the greatest measure of a student’s degree. Importantly, studies also show that not only do college-bound students benefit from rigorous courses, but that all students benefit from more rigorous coursework. Accordingly, it is critical that all of our young people have access to rigorous coursework in secondary school in order to meet the demands of postsecondary education and a competitive workforce.

Therefore, I introduce legislation that builds on this research and works toward a goal of ensuring that all secondary school students are enrolled in classes that prepare them to excel in college and in the workplace.

The GEAR UP program, Gaining Early Awareness and Readiness for Undergraduate Programs, was first authorized in 1998 and was designed to promote student achievement and access to postsecondary education among low-income students. Since then, GEAR UP grants have served over a million students per year. In my home State of New Mexico, there are six GEAR UP programs that serve thousands of students in many different ways, including by instituting reading and math programs, taking students to college campuses, creating science fairs and technology training seminars, providing career and financial counseling, and many other vital services. And, the individuals who work with GEAR UP programs are some of the most dedicated professionals I have met.

I believe we can build on the successes of GEAR UP to ensure more students leave high school prepared for the academic rigor of college and a competitive workforce. My legislation does not change the fundamental structure of GEAR UP; it maintains States and partnerships as eligible entities. The legislation, however, changes the focus and the types of activities the eligible entities must currently conduct and now be required to provide activities that ensure more students participate in college preparation coursework. Further, my legislation requires the activities to be designed so as to benefit both current students as well as future cohorts of students.

As in current law, partnerships are comprised of school districts, institutions of higher education, and community organizations. The legislation also retains the focus on cohorts of students that exists in current law by requiring grantees to serve one grade level of students, beginning not later than the 7th grade, through the 12th grade. Unlike current law, however, partnerships will now be required to provide activities designed to improve secondary school completion and college enrollment of this cohort of students. The legislation will also require the partners to focus on developing a more rigorous curriculum and on professional development opportunities for teachers of college prep courses. Consequently, future cohorts of students would benefit from the more rigorous curriculum and the professional development available to the teachers.

Partnerships may also engage in a wide variety of other activities permissible under current law, including providing mentoring and advising, creating summer programs at institutions of higher education, providing skills assessment, personal and family counseling, financial aid counseling, and activities designed to foster parent involvement in issues surrounding completion of high school and the attainment of a college education.

The State can play a more effective role in ensuring students graduate high school prepared for college, and accordingly, my legislation requires State grantees to focus on two types of activities. First, the State would be required to provide policy leadership to promote college readiness of students in the State, particularly those who are at risk of dropping out of school and those who are economically disadvantaged. And, second, the State will be required to foster parent involvement in issues surrounding completion of high school and the attainment of a college education.

The State must also ensure that GEAR UP grantees in the state, particularly those who are at risk of dropping out of school, and those who are economically disadvantaged. And, second, the State will be responsible for coordinating and information sharing among all GEAR UP grantees in the state, providing technical assistance and training, disseminating information about best practices, and providing opportunities for eligible partnerships to coordinate their efforts.

This program is so worthwhile, and leadership at the State level is absolutely critical, and accordingly, propose changing the formula to make funds available on a multiyear basis to the State. When appropriations for GEAR UP exceed $400,000,000 per year, one third of the funds will be made available to each State by formula. The remainder of the allocation will go to eligible partnerships on a competitive basis.

We all can agree that it is in our national interest to ensure that all of our students leave high school prepared to meet the demands of the 21st century workforce. This legislation provides an opportunity to systematically change the way our secondary schools prepare all students for college and a competitive workforce. I ask unanimous consent on the text of this bill be printed in the Record.

There being no objection, the bill was ordered to be printed in the Record, as follows:

S. 1297

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Gearing Up for Academic Success Act.”

SEC. 2. GAINING EARLY AWARENESS AND READINESS FOR UNDERGRADUATE PROGRAMS.

Chapter 2 of part A of title IV of the Higher Education Act of 1965 (20 U.S.C. 1070a-21 et seq.) is amended to read as follows:

“CHAPTER 2—GAINING EARLY AWARENESS AND READINESS FOR UNDERGRADUATE PROGRAMS

“SEC. 404A. DEFINITION OF ELIGIBLE ENTITY.

“In this chapter, the term ‘eligible entity’ means—

“(1) a State; or

“(2) a partnership consisting of—

“(A) 1 or more local educational agencies acting on behalf of, or

“(B) 1 or more elementary schools, middle schools, or secondary schools; and

“(C) at least 2 community organizations or entities, such as businesses, professional associations, community-based organizations, philanthropic organizations, State agencies, institutions or agencies sponsoring programs authorized under subpart 4, or other public or private agencies or organizations.

“SEC. 404B. EARLY INTERVENTION AND COLLEGE READINESS PROGRAM AUTHORIZED.

“The Secretary is authorized to award grants in accordance with section 404C to eligible entities described in section 404A(1) to enable the eligible entities to carry out the authorized activities described in section 404Db; and

“(2) to eligible entities described in section 404A(2) to enable the eligible entities to carry out the authorized activities described in section 404Db.

“SEC. 404C. GRANTS TO ELIGIBLE ENTITIES.

“(a) GENERAL RESERVATIONS.—From the amount appropriated under section 404H for a fiscal year the Secretary shall reserve—

“(1) an amount sufficient to continue multiyear grant and scholarship awards made under this chapter prior to the date of enactment of the Gearing Up for Academic Success Act, in accordance with the terms and conditions of such awards; and

“(2) the amount described in section 404G to carry out section 404G.

“(b) COMPETITIVE GRANT AWARDS.—

“(1) IN GENERAL.—If the amount appropriated under section 404H for a fiscal year is less than $400,000,000, the Secretary shall use the amount that remains after reserving funds under subsection (a) to award
grants, on a competitive basis and in accordance with paragraph (2), to eligible entities described in paragraphs (1) and (2) of section 404A to enable the eligible entities to carry out the authorized activities described in section 404D.

(2) DISTRIBUTION OF COMPETITIVE GRANT AWARDS.—From the amount made available under paragraph (1) that remains after reserving funds under subsection (a) for a fiscal year, the Secretary shall—

(A) make available—

(i) $404E as follows:

(1) equal to $400,000,000, then the Secretary shall distribu-
tions and adjust the distribution accordingly.

(2) percentage of the remainder to be used by each Indian tribe that is a member of the Bureau of Indian Affairs to carry out authorized activities described in section 404A(A); and

(B) award the remainder not made available under paragraph (A) to eligible entities described in paragraphs (1) and (2) of section 404A.

(3) SPECIAL RULE.—The Secretary shall annually reevaluate the distribution of funds served under subsection (a)—

(A) 33 percent of the remainder shall be used to award grants, on a competitive basis, to eligible entities described in section 404A(B) to enable the eligible entities to carry out the authorized activities described in section 404D.

(B) formula for determining and adjusting the distribution of funds served under subsection (a) is as follows:

(1) 50 percent of the remainder shall be used to award grants, on a competitive basis, to eligible entities described in section 404A(B) to enable the eligible entities to carry out the authorized activities described in section 404D.

(2) formula for determining and adjusting the distribution of funds served under subsection (a) is as follows:

(i) 50 percent of the remainder shall be used to award grants, on a competitive basis, to eligible entities described in section 404A(B) to enable the eligible entities to carry out the authorized activities described in section 404D.

(C) FORMULA AND COMPETITIVE GRANT AWARDS.—

(1) IN GENERAL.—If the amount appropriated under section 404H for a fiscal year is equal to or greater than $400,000,000, then the Secretary shall use the amount that remains after reserving funds under subsection (a) as follows:

(A) 33 percent of the remainder shall be used to award grants, on a competitive basis, to eligible entities described in section 404A(B) to enable the Bureau of Indian Affairs to carry out authorized activities described in section 404A;

(B) 33 percent of the remainder shall be used to award grants, on a competitive basis, to eligible entities described in section 404A(B) to enable the Bureau of Indian Affairs to carry out authorized activities described in section 404A;

(B) 33 percent of the remainder shall be used to award grants, on a competitive basis, to eligible entities described in section 404A(B) to enable the Bureau of Indian Affairs to carry out authorized activities described in section 404A;

(ii) 50 percent of the remainder shall be used to award grants, on a competitive basis, to eligible entities described in section 404A(B) to enable the Bureau of Indian Affairs to carry out authorized activities described in section 404A;

(2) FORMULA.—

(A) RESERVATIONS.—If the amount appropriated under section 404H is greater than or equal to $400,000,000, then the Secretary shall reserve, in addition to amounts reserved under subsection (a), 1/3 of 1/2 of the amount to be used to award grants to the Bureau of Indian Affairs to carry out authorized activities described in section 404A.

(B) FORMULA.—If the amount appropriated under section 404H is greater than or equal to $400,000,000, then the Secretary shall reserve, in addition to amounts reserved under subsection (a), 1/3 of 1/2 of the amount to be used to award grants to the Bureau of Indian Affairs to carry out authorized activities described in section 404A.

(C) CENSUS DATA.—In allocating funds under paragraph (1), the Secretary shall use the most recent data available from the Bureau of the Census.

(D) DEFINITIONS.—In this paragraph:

(i) The term ‘outlying area’ means the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau.

(ii) The term ‘poverty line’ means the poverty line (as defined by the Office of Management and Budget and revised annually in accordance with section 673(2) of the Community Services Block Grant Act) applicable to a family of the size involved.

(3) STATE.—The term ‘State’ means each of the several States of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

SEC. 404D. AUTHORIZED ACTIVITIES.

(a) USES OF FUNDS FOR PARTNERSHIPS.—

(1) COHORT.

(ii) A general.—The Secretary shall require that eligible entities described in section 404A require the services under this chapter to at least 1 grade level of students, beginning not later than 7th grade, in a participating school that has a 7th grade and in which at least 50 percent of the students enrolled are eligible for a free or reduced-price lunch under the Richard B. Russell National School Lunch Act (or, if an eligible entity determines that the effectiveness of a program, an entire grade level of students, beginning not later than the 7th grade, who receive public housing as defined in section 3(b)(1) of the United States Housing Act of 1937); and

(3) carry out programs and activities designed to ensure the secondary school completion and college enrollment of children at risk of dropping out of school, volunteer and parent involvement, providing former or current scholarship recipients as mentor or peer counselors, skills assessment, personal counseling, family counseling and home visits, and programs and activities that are especially designed for students of limited English proficiency and students with disabilities.

(D) Summer programs for individuals who are in their sophomore or junior year of secondary school or planning to attend an institution of higher education in the succeeding academic year, that—

(i) are carried out by an institution of higher education which has programs of academic year supportive services for disadvantaged students through projects authorized under section 402D or through comparable projects funded by the State or other sources;

(2) MANDATORY ACTIVITIES.—In order to receive a grant under this chapter, an eligible entity described in section 404A shall demonstrate to the satisfaction of the Secretary, in the plan submitted under section 404E that the eligible entity will provide activities designed to ensure the secondary school completion and college enrollment of children at risk of dropping out of school, with a focus on providing access to rigorous core courses and challenging academic standards. Such activities shall be designed so as to ensure systemic change in the school, so that future cohorts of children will benefit as well. Such activities shall include:

(A) enrollment of participating students in a standard college preparation curriculum or, in the case of younger students, in a curriculum that logically articulates with a college preparation curriculum;

(B) professional development opportunities for instructors of college preparation classes;

(C) development of a college preparation curriculum that logically articulates with the college preparation curriculum.

(3) PERMISSIBLE ACTIVITIES.—In addition to the activities described in paragraph (1), an eligible entity described in section 404A may provide other services or supports that are designed to ensure the secondary school completion and college enrollment of children at risk of dropping out of school, such as comprehensive monitoring, counseling, outreach, and supportive services. Examples of activities that meet the requirements of the preceding sentence include the following:

(A) enrollment of participating students in a standard college preparation curriculum that logically articulates with a college preparation curriculum;

(B) professional development opportunities for instructors of college preparation classes;

(C) development of a college preparation curriculum that logically articulates with the college preparation curriculum.

(4) providing activities or information regarding—

(i) fostering and improving parent involvement in—

(A) promoting the advantages of a college education;

(B) academic admission requirements; and

(C) the need to take college preparation courses in high school;

(ii) college admission and achievement tests; and

(B) USE OF FUNDS FOR STATES.—

(i) policy leadership designed to promote the college readiness of students in the State, especially those who are at risk of dropping out of school and those who are economically disadvantaged; and
(B) if there are eligible entities in the State that received a grant under this chapter, services designed to promote coordination and information sharing among all such eligible entities in the State.

(2) PERMISSIBLE ACTIVITIES.—

(A) POLICY LEADERSHIP.—In order to meet the requirements of paragraph (1)(A), an eligible entity described in section 404A(1) may engage in the following activities:

(i) Developing a core curriculum of college preparatory classes that can be adopted by all State secondary schools.

(ii) Facilitating curriculum development in individual schools where needed.

(iii) Creating professional development opportunities for teachers in relation to the core curriculum.

(iv) Facilitating the alignment of kindergarten through grade 12 classes with the requirements for passing college entrance exams, and entering college without the need for remedial courses.

(v) Convening and consulting with groups of individuals and organizations that can provide input and expertise related to clauses (i), (ii), (iii), and (iv).

(vi) Establishing a comprehensive, state-wide database that can be used to track indicators of college readiness, and to track enrollment in and completion of college, among the secondary school students in the State.

(vii) Other activities that will promote the college readiness of students in the State, and who are economically disadvantaged receive and benefit from the proposed activities; and

(viii) A description of the proposed activities that will enhance the college readiness of students in the State;

(C) COORDINATION AND INFORMATION SHARING.—In order to meet the requirements of paragraph (1)(B), an eligible entity described in section 404A(1) may engage in the following activities:

(i) Providing technical assistance and training for eligible entities described in section 404A(2) that receive a grant under this chapter.

(ii) Disseminating information about best practices among eligible entities described in section 404A(2) that receive a grant under this chapter.

(iii) Providing eligible entities described in section 404A(2) that receive a grant under this chapter with opportunities for coordinating and networking.

(iv) Assisting eligible entities described in section 404A(2) that receive a grant under this chapter in adopting a core curriculum and providing professional development opportunities for teachers.

(v) Providing a centralized source of information, regarding college planning, college entrance requirements, and opportunities for financial aid, to students in the State.

(vi) Providing other services that promote the core activities of eligible entities described in section 404A(2) in the State that receive a grant under this chapter.

(C) ALLOWABLE PROVIDERS.—In the case of eligible entities described in section 404A(1), the activities required by this section may be provided by service providers such as community-based organizations, schools, institutions of higher education, public and private agencies, nonprofit and philanthropic organizations, businesses, institutions and agencies sponsoring programs authorized under subpart 4, and other organizations the Secretary determines appropriate.

SEC. 404F. REQUIREMENTS.

(a) GENERAL.—Each eligible entity shall ensure that the activities assisted under this chapter are, to the extent practicable, coordinated with, and complement and enhance—

(1) services under this chapter provided by other eligible entities serving the same school district or State; and

(2) related services under other Federal or non-Federal programs.

(b) DESIGNATION OF FISCAL AGENT.—An eligible entity described in section 404A(2) shall designate an institution of higher education or a local educational agency as the fiscal agent for the eligible entity for purposes of this chapter.

(c) COORDINATORS.—Each eligible entity described in section 404A(2) that receives a grant under this chapter shall have a full-time program coordinator or a part-time program coordinator, whose primary responsibility is to assist such eligible entity in carrying out the authorized activities described in section 404A(1).

(4) DISPLACEMENT.—An eligible entity described in section 404A(2) shall ensure that the activities assisted under this chapter will not displace an employee or eliminate a position at a school assisted under this chapter, including a partial displacement such as a reduction in hours, wages, or employment benefits.

SEC. 404G. EVALUATION AND REPORT.

(a) EVALUATION.—Each eligible entity receiving a grant under this chapter shall annually evaluate the activities assisted under this chapter in accordance with the standards described in subsection (b) and shall submit to the Secretary a copy of such evaluation. The evaluation shall permit service providers to track eligible student progress during the period such students are participating in the activities and shall be consistent with the standards developed by the Secretary pursuant to subsection (b).

(b) EVALUATION STANDARDS.—The Secretary shall prescribe standards for the evaluation described in subsection (a). Such standards shall—

(1) provide for input from eligible entities and service providers; and

(2) ensure that data protocols and procedures are consistent and uniform.

(c) FEDERAL EVALUATION.—In order to evaluate and improve the impact of the activities assisted under this chapter, the Secretary shall, from not more than 0.75 percent of the funds appropriated under section 404H for fiscal year 2005 and any grants, contracts, or cooperative agreements issued under this chapter, contract with an independent evaluator to evaluate the effectiveness of the program and, as appropriate, disseminate the results of the evaluation.

(d) REPORT.—The Secretary shall biennially report to Congress regarding the activities assisted under this chapter, the effectiveness conducted pursuant to this section.

SEC. 404H. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this chapter $600,000,000 for fiscal year 2005 and such sums as may be necessary for each of the 4 succeeding fiscal years."
SUBMITTED Resolutions

Senator Resolution 172—Affirming the Importance of National Weekends of Prayer for the Victims of Genocide and Crimes Against Humanity in Darfur, Sudan, and Expressing the Sense of the Senate That July 15 Through 17, 2005, Should be Designated as a National Weekend of Prayer and Reflection for Darfur

Mr. BROWNBACK (for himself and Mr. CORZINE) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. Res. 172

Whereas, on July 22, 2004, Congress declared that genocide was taking place in Darfur, Sudan;

Whereas, on September 9, 2004, Secretary of State Colin L. Powell testified to the Senate Committee on Foreign Relations that "genocide has been committed in Darfur"; 

Whereas, on February 21, 2004, President George W. Bush stated to the United Nations General Assembly that "the world is witnessing terrible suffering and horrible crimes in the Darfur region of Sudan, crimes any government has concluded are genocide";

Whereas Article 1 of the Convention on the Prevention and Punishment of the Crime of Genocide, done at Paris December 9, 1948, and entered into force January 12, 1951, states that "the contracting parties confirm that genocide, whether committed in time of peace or in time of war, is a crime under international law which they undertake to prevent and to punish";

Whereas fundamental human rights, including the right to freedom of thought, conscience, and religion, are protected in numerous international agreements and declarations;

Whereas the United Nations Security Council, in Security Council Resolution 1591, condemned the "continued violations of the N'djamena Ceasefire Agreement of 8 April 2004 and the additional protocol of 9 November 2004 by all sides in Darfur and the deterioration of the security situation and negative impact this has had on humanitarian assistance efforts";

Whereas scholars estimate that as many as 400,000 have died from violence, hunger and disease since the outbreak of conflict in Darfur began in 2003, and that as many as 10,000 may be dying each month;

Whereas it is estimated that more than 2,000,000 people have been displaced from their homes and remain in camps in Darfur and Chad;

Whereas religious leaders, genocide survivors, and world leaders have expressed grave concern over the continuing atrocities taking place in Darfur; and

Whereas it is appropriate that the people of the United States, leaders and citizens alike, unite in prayer for the people of Darfur and reflect upon the situation in Darfur; Now, therefore, be it

Resolved, That it is the sense of the Senate—

(1) that the weekend of July 15 through 17, 2005, should be designated as a National Week of Prayer and Reflection for Darfur, Sudan; and

(2) to encourage the people of the United States to observe that weekend by praying for an end to the genocide and crimes against humanity and for lasting peace in Darfur, Sudan; and

(3) to urge all churches, synagogues, mosques, and religious institutions in the United States to consider the issue of Darfur in their activities and to observe the National Weekend of Prayer and Reflection with appropriate activities and services.

Senator Resolution 173—Expressing Support for the Good Friday Agreement of 1998 as the Blueprint for Lasting Peace in Northern Ireland

Mr. KENNEDY (for himself, Ms. COLLINS, Mr. DODD, Mr. MCCAIN, Mr. BIDEN, and Mr. LEAHY) submitted the following resolution; which was referred to the Committee on Foreign Relations:

Mr. KENNEDY, Mr. President, Senators COLLINS, DODD, MCCAIN, BIDEN, LEAHY and I are submitting a resolution expressing support for the 1998 Good Friday Agreement as the blueprint for lasting peace in Northern Ireland. All of us are hopeful that a constructive way forward will be found, and the way to do so is by continuing to implement the Good Friday Agreement.

The 1998 agreement was endorsed in a referendum by the overwhelming majority of people in Northern Ireland and in the Republic of Ireland. The parties to the Good Friday Agreement made a clear commitment to "partnership, equality, and mutual respect" as the basis for moving forward to end the long-standing conflict and achieve lasting peace for all the people of Northern Ireland. The parties to the agreement affirmed their "total and absolute commitment to exclusively democratic and peaceful means" to achieve the goal of peace.

Our resolution reiterates the support for the agreement as the way forward for National Ireland; and

(1) to urge the United States Government to continue to strongly support the peace process in Northern Ireland; and

(2) to encourage the people of the United States to observe that weekend by praying for an end to the genocide and crimes against humanity and for lasting peace in Darfur, Sudan; and

(3) to urge all churches, synagogues, mosques, and religious institutions in the United States to consider the issue of Darfur in their activities and to observe the National Weekend of Prayer and Reflection with appropriate activities and services.

Resolved, That—

(1) the Senate reiterates its support for the Good Friday Agreement, signed on April 10, 1998, in Belfast, as the blueprint for lasting peace in Northern Ireland; and

(2) the Senate reiterates its support for the Good Friday Agreement as the way forward.

The Good Friday Agreement is the basis for moving forward in pursuit of lasting peace in Northern Ireland; and

Whereas the parties to the Good Friday Agreement also affirmed their "total and absolute commitment to exclusively democratic and peaceful means" in pursuit of lasting peace in Northern Ireland;

Whereas inclusive power-sharing based on these defining qualities is essential to the viability and advancement of the democratic process in Northern Ireland; and

Whereas paramilitary and criminal activity in a democratic society undermines the trust and confidence that are essential in a political system based on inclusive power-sharing in Northern Ireland;

Whereas the United States Government continues to strongly support the peace process in Northern Ireland; and

Whereas the Good Friday Agreement made a clear commitment to "partnership, equality, and mutual respect" as the basis for moving forward to end the long-standing conflict and achieve lasting peace for all the people of Northern Ireland. The parties to the agreement affirmed their "total and absolute commitment to exclusively democratic and peaceful means" to achieve the goal of peace.

Our resolution reiterates the support for the agreement as the way forward for National Ireland; and

(1) to urge the United States Government to continue to strongly support the Good Friday Agreement as the way forward in the peace process, and have committed themselves to its implementation: Now, therefore, be it

Resolved, That—

(1) the Senate reiterates its support for the Good Friday Agreement, signed on April 10, 1998, in Belfast, as the blueprint for a lasting peace in Northern Ireland; and

(2) it is the sense of the Senate that—

(A) the Irish Republican Army must immediately—

(i) complete the process of decommissioning;

(ii) cease to exist as a paramilitary organization; and

(iii) end its involvement in any way in paramilitary and criminal activity;

(B) the Democratic Unionist Party in Northern Ireland must—

(i) share power with all parties according to the democratic mandate of the Good Friday Agreement; and

(ii) commit to work in good faith with all the institutions of the Good Friday Agreement, which established an inclusive Executive at the North-South Ministerial Council, for the benefit of all the people of Northern Ireland;

Resolved, That—

(1) the Senate reiterates its support for the Good Friday Agreement, signed on April 10, 1998, in Belfast, as the blueprint for a lasting peace in Northern Ireland; and

(2) it is the sense of the Senate that—

(A) the Irish Republican Army must immediately—

(i) complete the process of decommissioning;

(ii) cease to exist as a paramilitary organization; and

(iii) end its involvement in any way in paramilitary and criminal activity;

(B) the Democratic Unionist Party in Northern Ireland must—

(i) share power with all parties according to the democratic mandate of the Good Friday Agreement; and

(ii) commit to work in good faith with all the institutions of the Good Friday Agreement, which established an inclusive Executive at the North-South Ministerial Council, for the benefit of all the people of Northern Ireland;
(C) Sinn Fein must work in good faith with the Police Service of Northern Ireland;
(D) the leadership of Sinn Fein must insist that those responsible for the murder of Rob-
ert MacNeill and those who were witnesses to the murder—
(i) cooperate directly with the Police Ser-
vice of Northern Ireland; and
(ii) be protected fully from any retaliation by the Irish Republican Army; and
(E) the Government of the United Kingdom must—
(i) permanently restore the democratic insti-
tutions of Northern Ireland;
(ii) complete the process of demilitariza-
tion in Northern Ireland; and
(iii) advance security and human rights agendas in Northern Ireland.

SENATE RESOLUTION 174—RECOG-
NIZING BURMESE DEMOCRACY ACTIVIST AND NOBEL PEACE PRIZE LAUREATE AUNG SAN SUU KYI AS A SYMBOL OF THE STRUGGLE FOR FREEDOM IN BURMA

Mr. MCCONNELL (for himself, Mrs. FEINSTEIN, Mr. MCCAIN, Mr. Frist, Mr. LUGAR, and Mr. REID) submitted the following resolution: which was consid-
ered and agreed to:

S. Res. 174
Whereas June 23, 2005 marks the 60th birth-
day of Burmese democracy activist and Nobel Peace Prize Laureate Aung San Suu
Kyi;
Whereas Burma is misruled by the State Peace and Develop-
ment Council, an illegiti-
mate, repressive military junta led by Gen-
eral Than Shwe;
Whereas although the main opposition party in Burma, the National League for Dem-
ocracy, won a landslide victory in national elections in 1990, the State Peace and Devel-
opment Council has refused to honor the re-
sults of that election and peacefully transfer power in Burma;
Whereas the State Peace and Development Council as a matter of policy carries out a campaign of intimidation and violence against the people of Burma and ethnic mi-
norities that includes the use of rape, tor-
ture, and terror;
Whereas hundreds of democracy activists, including Aung San Suu Kyi who is the lead-
er of the National League for Democracy, re-
main imprisoned by the repressive State Peace and Develop-
ment Council; and
Whereas the United Nations and other democratic countries recognize and applaud the dedica-
tion and commitment to freedom demonstrated by Aung San Suu Kyi and the people of Burma: Now, therefore, be it

Resolved, That the Senate—
(1) recognizes Burmese democracy activist and Nobel Peace Prize Laureate Aung San Suu Kyi as a symbol of the spirit and dedica-
tion of the people of Burma who are courage-
ously and nonviolently struggling for free-
dom, human rights, and justice;
(2) calls for the immediate and uncondi-
tional release of Aung San Suu Kyi and all other prisoners of conscience who are held by the State Peace and Develop-
ment Council and the illegitimate, repressive military junta in power in Burma; and
(3) strongly urges Secretary of State Condoleezza Rice to initiate a discussion of the repressive practices of the State Peace and Develop-
ment Council during the 12th As-
sociation of Southeast Asian Nations re-
gional forum and post-ministerial meeting scheduled to take place in Vientiane, Laos on July 29, 2005.

SENATE RESOLUTION 175—COM-
MENDING THE UNIVERSITY OF MICHIGAN SOFTBALL TEAM FOR WINNING THE NATIONAL COLLE-
GIATE ATHLETIC ASSOCIATION DIVISION I CHAMPIONSHIP ON JUNE 6, 2005

Mr. LEVIN (for himself and Ms. STA-
BENOW) submitted the following resolu-
tion: which was considered and agreed to:

S. Res. 175
Whereas the top-ranked University of Michigan softball team defeated the Univer-
sity of California–Los Angeles (UCLA) Bra-
ves in the Women’s College World Series 2 games to 1, becoming only the eighth team to win the National Collegiate Athletic Asso-
ciation (NCAA) Softball Championship and the first Big Ten Conference team to claim a national title in softball or baseball since 1966;
Whereas the University of Michigan soft-
ball team clinched the 2005 Women’s College World Series in an exciting extra-innings game with a 3-run homer in the 10th inning to win 4 to 1;
Whereas the University of Michigan soft-
ball team hit a home run in 57 of 65 games during the 2005 season and is just 1 of 3 schools in NCAA history to hit 100 home runs in a season;
Whereas in 2005, the University of Michi-
gan softball team earned its first Number 1 ranking in school history and won its tenth Big Ten Conference championship and sev-
enth Big Ten Tournament title en route to advancing to its eighth Women’s College World Series;
Whereas the NCAA championship title marks the 52nd national championship for a sports program at the University of Michi-
gan, the second for a women’s sport pro-
gram at Michigan, and the first for a softball program east of the Mississippi River;
Whereas the University of Michigan soft-
ball team mounted an impressive season record of 65 wins and 7 losses;
Whereas Coach Carol Hutchins eclipsed the 900 win mark, capping a stellar 21 year ca-
career in which she has become the most victorious coach in University of Michigan history, currently ranking among the top 10 Division I active coaches, with 990 career wins and a .729 winning percentage;
Whereas 2 University of Michigan softball players, shortstop Jessica Merchant and pitcher Jennie Ritter, were finalists for the USA Softball Collegiate Player of the Year Award;
Whereas a record-tying 8 players from the University of Michigan softball team were named to the Big Ten All-Conference Team, and 6 players were named to the 2005 Academic All-Big Ten Conference Team;
Whereas the University of Michigan soft-
ball team led by the solid coaching of Carol Hutchins, Bonnie Tholl, Jennifer Brundage, and Jennifer Teague;
Whereas players on the University of Michigan softball team included Stephanie Bercaw, Angie Danis, Samantha Findlay, Alessandra Giampaolo, Tiffany Haas, Lauren Talbot, Michelle Teschler, Michelle Weatherdon, Lorilyn Wilson, Stephanie Win-
ter, and Tiffany Worthy; and
(3) directs the Secretary of the Senate to transmit an enrolled copy of this resolution to the University of Michigan athletic de-
partment for appropriate display.

AMENDMENTS SUBMITTED AND PROPOSED

SA 790. Mr. DAYTON submitted an amendment intended to be proposed by him to the bill H.R. 6, Reserved; which was ordered to lie on the table.

SA 791. Mr. HINGAMAN (for himself, Mr. COLEMAN, Mr. JEFFORDS, Ms. COLLINS, Mr. DORGAN, Mrs. FEINSTEIN, Ms. CANTWELL, Mr. REID, Mr. SALAZAR, Mr. OBAMA, Mrs. CLINTON, Mr. KERRY, Mr. LAUTENBERGER, Mr. JOHN-
son, and Ms. SNOWE) proposed an amendment to the bill H.R. 6, supra.

SA 792. Mr. WYDEN (for himself and Mr. DORGAN) submitted an amendment intended to be proposed by him to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 793. Mr. LAUTENBERGER submitted an amendment intended to be proposed by him to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 794. Mr. DOMENICI (for himself and Mr. BINGAMAN) proposed an amendment to the bill H.R. 6, supra.

SA 785. Mr. BAYH submitted an amend-
ment intended to be proposed by him to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 796. Mr. PEINGOLD (for himself and Mr. BROWNBACK) submitted an amendment intended to be proposed by him to the bill H.R. 6, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 790. Mr. DAYTON submitted an amendment intended to be proposed by him to the bill H.R. 6, Reserved; which was ordered to lie on the table; as fol-

SEC. 211. ETHANOL CONTENT OF GASOLINE.
(a) DEFINITIONS.—In this section—
(i) cellulosic biomass ethanol—The term “cellulosic biomass ethanol” means ethanol derived from any lignocellulosic or hemicellulose material that is available on a renewable or recurring basis, including—
(A) dedicated energy crops and trees;
(B) wood and wood residues;
(C) plants;
(D) grasses;
(E) agricultural residues; and
(F) fibers.

(b) WASTE DERIVED ETHANOL.—The term “waste derived ethanol” means ethanol derived from—
(A) animal wastes, including poultry fats and poultry wastes, and other waste mate-
rials, or
(B) municipal solid waste.

(c) ETHANOL.—The term “ethanol” means cellulosic biomass ethanol and waste derived ethanol.

(b) RENEWABLE FUEL PROGRAM.—Notwith-
standing any other provision of law, not later than 1 year after the date of enactment of this section, the Secretary shall promul-
gate regulations ensuring that each gallon of gasoline sold or dispensed to consumers in
the contiguous United States contains 10 percent ethanol by 2015.

SA 1110. Mr. BINGAMAN (for himself, Mr. Coburn, Mr. Jeffords, Ms. Collins, Mr. Dorgan, Mrs. Feinstein, Ms. Cantwell, Mr. Reid, Mr. Salazar, Mr. Obama, Mrs. Clinton, Mr. Kerry, Mr. Lautenberg, Mr. Johnson, and Ms. Snowe) proposed an amendment to the bill H.R. 6, Reserved; as follows:

At 5:43:11 p.m. the following:

Subtitle F—Renewable Portfolio Standard

SEC. 271. RENEWABLE PORTFOLIO STANDARD.

Title VI of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2601 et seq.) is amended by adding at the end the following:

"SEC. 609. FEDERAL RENEWABLE PORTFOLIO STANDARD.

"(a) RENEWABLE ENERGY REQUIREMENT.—

"(1) IN GENERAL.—Each electric utility that operates a major electric generating unit shall—

"(A) generate electric energy using new renewable energy or existing renewable energy; or

"(B) purchase renewable energy credits for the purposes of promoting renewable energy production, including programs that promote technologies that reduce the use of electricity at customer sites such as solar water heating.

"(2) PROCEDURE FOR ASSESSING PENALTY.—

"The Secretary shall assess a civil penalty under this subsection in accordance with the procedures prescribed by section 333(d) of the Energy Policy and Conservation Act of 1974 (42 U.S.C. 6333)."

"(d) STATE RENEWABLE ENERGY ACCOUNT PROGRAM.—

"(1) The Secretary shall establish, not later than December 31, 2008, a State renewable energy account program.

"(2) All money collected by the Secretary from the sale of renewable energy credits and the assessment of civil penalties under this section shall be deposited into the renewable energy account established pursuant to this subsection. The State renewable energy account shall be held by the Secretary and shall not be transferred to the Treasury Department.

"(3) Proceeds deposited in the State renewable energy account shall be used by the Secretary, subject to appropriations, for a program to provide grants to the State agency responsible for developing State energy conservation plans under section 362 of the Energy Policy and Conservation Act (42 U.S.C. 6322) for the purposes of promoting renewable energy production, including programs that promote technologies that reduce the use of electricity at customer sites such as solar water heating.

"(e) RULES.—The Secretary shall issue guidelines and criteria for grants awarded under this program.

"(f) EXEMPTIONS.—This section shall not apply in a calendar year if:

"(1) the total kilowatt-hours of electricity produced from a facility (including a distributed generation facility) using geothermal energy produced from a geothermal deposit within the meaning of section 613(e)(2) of the Internal Revenue Code of 1986); (ii) the average annual kilowatt hours produced at such facility for 5 of the previous 7 calendar years before the date of enactment of this section is greater than 10,000,000 kilowatt hours; or (iii) the average annual kilowatt hours produced at such facility for 5 of the previous 7 calendar years before the date of enactment of this section is greater than 5,000,000 kilowatt hours.

"(g) RULES.—The Secretary shall issue rules implementing this section not later than 1 year after the date of enactment of this section.

"(h) STATE PROGRAMS.—Nothing in this section shall diminish any authority of a State or political subdivision thereof to adopt or enforce any law or regulation respecting energy and the assessment of civil penalties under this section. The Secretary may require States having such renewable energy programs, to, to the maximum extent practicable, facilitate coordination between the Federal program and State programs.

"(i) Definitions.—For purposes of this section:

"(1) BASE AMOUNT OF ELECTRICITY.—The term 'base amount of electricity' means the total amount of electricity generated by a State as described in section 6 of the Federal Portfolio Standard.

"(2) DISTRIBUTED GENERATION.—The term 'distributed generation' means a facility at a customer site.

"(3) EXISTING RENEWABLE ENERGY.—The term 'existing renewable energy' means energy derived from a geothermal deposit (within the meaning of section 613(e)(2) of the Internal Revenue Code of 1986).

"(4) INCREMENTAL GEOTHERMAL PRODUCTION.—

"(A) IN GENERAL.—The term 'incremental geothermal production' means for any year the excess of—

"(i) the total kilowatt-hours of electricity produced at such facility for 5 of the previous 7 calendar years before the date of enactment of this section; or (ii) the average annual kilowatt hours produced at such facility for 5 of the previous 7 calendar years before the date of enactment of this section.

"(B) INCREMENTAL HYDROPOWER.—The term 'incremental hydropower' means additional energy generated as a result of efficiency improvements or capacity additions made on or after the date of enactment of this section or the effective date of an existing applicable State renewable portfolio standard program at a hydroelectric facility that was placed in service before that date. The term does not include additional energy generated as a result of operational changes not directly associated with efficiency improvements or capacity additions. Efficiency improvements and capacity additions are those improvements or additions made on the basis of the same water flow information used to determine a historic average annual

"(2) MEANS OF COMPLIANCE.—An electric utility shall meet the requirements of paragraph (1) by—

"(a) generating electric energy using new renewable energy or existing renewable energy; or

"(b) renewable energy credit trading program.

"(1) Not later than January 1, 2007, the Secretary shall establish a renewable energy credit trading program to permit an electric utility that does not generate or purchase enough electric energy from renewable energy to meet the requirement of this subsection (a) to satisfy such requirements by purchasing sufficient renewable energy credits.

"(2) As part of such program the Secretary shall—

"(A) issue renewable energy credits to generators of electric energy from new renewable energy;

"(B) sell renewable energy credits to electric utilities at the rate of 1.5 cents per kilowatt-hour (as adjusted for inflation under subsection (g));

"(c) sell a kilowatt-hour, including the associated renewable energy credit, shall be used only once for purposes of compliance with this section; and

"(d) allow double credits for generation from facilities on Indian Lands, and triple credits for generation from small renewable distributed generators (meaning those that do not exceed 1 megawatt).

"(3) Credits under paragraph (2)(A) may only be used for compliance with this section for 3 years from the date issued.

"(c) Additional Amounts.

"(1) CIVIL PENALTIES.—Any electric utility that fails to meet the renewable energy requirements of subsection (a) shall be subject to a civil penalty.

"(2) AMOUNT OF PENALTY.—The amount of the civil penalty shall be determined by multiplying the number of kilowatt-hours of electric energy sold to electric consumers in violation of subsection (a) by the greater of 1.5 cents (adjusted for inflation under subsection (g)) or the average market value of renewable energy credits during the year in which the violation occurred.

"(3) MITIGATION OR WAIVER.—The Secretary may mitigate or waive a civil penalty under this subsection if the electric utility was unable to comply with subsection (a) for reasons outside the reasonable control of the utility. The Secretary shall reduce the amount of any penalty determined under paragraph (2) by an amount paid by the electric utility to purchase or enter into a contract with a State renewable energy program to enhance the production of a State renewable energy program if the State requirement is greater than the applicable requirement of subsection (a).

"(4) PROCEDURE FOR ASSESSING PENALTY.—

"The Secretary shall assess a civil penalty under this subsection in accordance with the procedures prescribed by section 333(d) of the Energy Policy and Conservation Act of 1974 (42 U.S.C. 6333).

"(b) STATE PROGRAMS.—Nothing in this section shall diminish any authority of a State or political subdivision thereof to adopt or enforce any law or regulation respecting energy or the assessment of civil penalties under this section. The Secretary may require States having such renewable energy programs, to, to the maximum extent practicable, facilitate coordination between the Federal program and State programs.

"(c) PROCEDURE FOR ASSESSING PENALTY.—

"The Secretary shall assess a civil penalty under this subsection in accordance with the procedures prescribed by section 333(d) of the Energy Policy and Conservation Act of 1974 (42 U.S.C. 6333)."
in accordance with the Consumer Price Index of oil exceeds $58.28 per barrel (adjusted in accordance with the following table; as follows):

(2) RENEWABLE FUEL PROGRAM.—

(A) REGULATIONS.—

(B) APPLICABLE VOLUME.—

For the purpose of subparagraph (A), the applicable volume for any calendar year from 2006 through 2012 shall be determined in accordance with the following table:

### Applicable Volume of Renewable Fuel (in gallons)

<table>

"(B) CALENDAR YEARS 2006 THROUGH 2012.—For the purpose of subparagraph (A), the applicable volume for any calendar year from 2006 through 2012 shall be determined as follows:

1. Calendar year 2006: 0.0 gallons
2. Calendar year 2007: 0.4 gallons
3. Calendar year 2008: 0.8 gallons
4. Calendar year 2009: 1.2 gallons
5. Calendar year 2010: 1.6 gallons
6. Calendar year 2011: 2.0 gallons
7. Calendar year 2012: 2.4 gallons
8. Calendar year 2013: 2.8 gallons

"(C) SMALL REFINERY.—The term ‘small refinery’ means a refinery for which the average aggregate daily crude oil throughput for a calendar year (as determined by dividing the aggregate throughput for the calendar year by the number of days in the calendar year) does not exceed 75,000 barrels.

"(D) WASTE.—The term ‘waste’ means—

1. (i) municipal solid waste (as defined in section 301(f) of the Solid Waste Disposal Act (42 U.S.C. 6966(f)));
2. (ii) sewage sludge (as defined in section 6903(5) of such Act (42 U.S.C. 6943(5)));
3. (iii) solid waste (as defined in section 6903(26) of such Act (42 U.S.C. 6943(26)));
4. (iv) municipal solid waste.

"(E) OTHER ACTIONS.—In carrying out this clause, the Administrator may—

1. (aa) issue regulations under paragraph (1)—
2. (bb) establish applicable percentages under paragraph (3); and
3. (cc) require the area in which renewable fuel is produced or dispensed in a noncontiguous State or territory.

"(F) REQUIREMENT IN CASE OF FAILURE TO PROMULGATE REGULATIONS.—If the Administrator does not promulgate the regulations promulgated under clause (i), the percentage of renewable fuel in gasoline sold or dispensed by consumers in the United States, on a volume basis, shall be 3.2 percent for calendar year 2006.

"(G) APPLICABLE VOLUME.—

1. Calendar years 2006 through 2012.—For the purpose of subparagraph (A), the applicable volume for any calendar years from 2006 through 2012 shall be determined in accordance with the following table:
Paragraph (B)(ii)(I); and

(II) the expected annual rate of future production of renewable fuels, including cellulosic ethanol.

(III) MINIMUM QUANTITY DERIVED FROM CELLULOSIC BIOMASS.—For calendar year 2013 and each calendar year thereafter—

(I) the applicable volume referred to in clause (I) shall contain a minimum of 250,000,000 gallons that are derived from cellulosic biomass; and

(II) the 2.5-to-1 ratio referred to in paragraph (I) shall not apply.

(IV) MINIMUM APPLICABLE VOLUME.—For the purpose of subparagraph (A), the applicable volume for calendar year 2013 and each calendar year thereafter shall be less than the product obtained by multiplying—

(I) the number of gallons of gasoline that the Administrator estimates will be sold or introduced into commerce in the calendar year; and

(II) the ratio that—

(a) 8,000,000,000 gallons of renewable fuel; bears to

(bb) the number of gallons of gasoline sold or introduced into commerce in calendar year 2012.

(E) AVERAGE PERCENTAGES.—

(A) PROVISION OF ESTIMATE OF VOLUMES OF GASOLINE SALES.—Not later than October 31 of each of calendar years 2005 through 2011, the Administrator of the Energy Information Administration shall provide to the Administrator of the Environmental Protection Agency an estimate, with respect to the following calendar year, of the volumes of gasoline projected to be sold or introduced into commerce in the United States.

(B) DETERMINATION OF APPLICABLE PERCENTAGES.—

(I) IN GENERAL.—Not later than November 30 of each of calendar years 2005 through 2012, based on the estimate provided under subparagraph (A), the Administrator of the Environmental Protection Agency shall determine and publish in the Federal Register, with respect to the following calendar year, the requirements referred to in subparagraph (B) that ensure that the requirements of paragraph (2) are met.

(II) REQUIRED ELEMENTS.—The renewable fuel use requirements determined for a calendar year under clause (I) shall—

(1) be applicable to refiners, blenders, and importers, as appropriate;

(2) be expressed in terms of a volume percentage of gasoline sold or introduced into commerce in the United States; and

(III) subject to subparagraph (C)(i), consist of a requirement that applies to all categories of persons specified in subclause (I).

(C) ADJUSTMENTS.—In determining the applicable percentages for a calendar year, the Administrator shall make adjustments—

(i) to prevent the imposition of redundant obligations on any person specified in subparagraph (B)(ii) or (B)(iii); and

(ii) to account for the use of renewable fuel during the previous calendar year by small refiners that are exempt under paragraph (3)

(D) CELULLOSIC BIOMASS ETHANOL.—For the purpose of paragraph (2), 1 gallon of cellulosic biomass ethanol shall be considered to be equivalent to 2.5 gallons of renewable fuel.

(E) CREDIT PROGRAM.—

(A) IN GENERAL.—The regulations promulgated under paragraph (2)(A) shall provide—

(i) for the generation of an appropriate amount of credits by any person that refines, processes, or consumes renewable fuel that contains a quantity of renewable fuel that is greater than the quantity required under paragraph (2); and

(ii) for the generation of an appropriate amount of credits for biodiesel; and

(iii) for the generation of credits by small refiners in accordance with paragraph (9)(C).

(B) USE OF CREDITS.—A person that generates credits under subparagraph (A) may—

(i) sell the credits to the person that has issued the credits to another person, for the purpose of complying with paragraph (2);

(ii) DUPLICATION OF CREDITS.—A credit generated under this paragraph shall be valid to show compliance for the calendar year in which the credit was generated.

(C) DETERMINATION OF APPLICABLE PERCENTAGES.—

(I) IN GENERAL.—For each of calendar years 2006 through 2012, the Administrator of the Environmental Protection Agency, based on the study under subparagraph (C)(i), waive, in whole or in part, the renewable fuel requirement under paragraph (2) in calendar year 2006.

(ii) PROCEDURE.—A waiver under subparagraph (A) shall terminate after 1 year, but may be renewed by the Administrator after consultation with the Secretary of Agriculture and the Secretary of Energy.

(D) STUDY AND WAIVER FOR INITIAL YEAR OF PROGRAM.—

(A) IN GENERAL.—Not later than 180 days after the date of enactment of this paragraph, the Secretary of Energy shall conduct for the Administrator a study assessing whether the renewable fuel requirement under paragraph (2) will likely result in significant adverse impacts on consumers in 2006, on a national, regional, or State basis.

(B) REQUIRED EVALUATIONS.—The study shall evaluate renewable fuel—

(i) supplies and prices;

(ii) blendstock supplies; and

(iii) supply and distribution system capabilities.

(C) RECOMMENDATIONS BY THE SECRETARY.—Based on the results of the study, the Secretary of Energy shall make specific recommendations to the Administrator concerning waiver of the requirements of paragraph (2) in whole or in part to prevent any adverse impacts described in subparagraph (A).

(D) WAIVER.—

(i) IN GENERAL.—Not later than 270 days after the date of enactment of this paragraph, the Administrator shall, if and to the extent recommended by the Secretary of Energy under subparagraph (C), waive, in whole or in part, the renewable fuel requirement under paragraph (2) by reducing the national percentage of renewable fuel required under paragraph (2) in calendar year 2006.

(ii) NO EFFECT ON WAIVER AUTHORITY.—Clause (I) does not preclude the Administrator from waiving the requirements of paragraph (2) in whole or in part, the renewable fuel requirement under paragraph (2) by reducing the national percentage of renewable fuel required under paragraph (2) in calendar year 2006.

(E) SMALL REFINERIES.—

(A) TEMPORARY EXEMPTION.—

(i) IN GENERAL.—The requirements of paragraph (2) shall not apply to small refineries until calendar year 2011.

(ii) PROCEDURE.—The Administrator shall determine whether compliance with the requirements of paragraph (2) would impose a disproportionate economic hardship on small refineries.

(F) STUDY BY SECRETARY OF ENERGY.—In the case of a small refinery that the Secretary of Energy determines under subclause (I) would be
subject to a disproportionate economic hard-ship if required to comply with paragraph (2), the Administrator shall extend the ex-emption under clause (i) for the small refin-ery for a period of not less than 2 additional years.

"(B) Petitions based on disproportionate economic hardship—

"(i) Exception to exemption. — A small re-finery may at any time petition the Adminis-trator for an extension of the exemption under subparagraph (A) for the reason of dis-proportionate economic hardship.

"(ii) Evaluation of petitions. — In evalu-at ing a petition under clause (i), the Adminis-trator, in consultation with the Secretary of Energy, shall conduct a study under subparagraph (A)(ii) and other economic factors.

"(iii) Deadline for action on petitions. — The Administrator shall act on any petition submitted by a small refinery for a hardship exemption not later than 90 days after the date of receipt of the petition.

"(C) Credit program. — If a small refinery notifies the Administrator that the small re-finery waives the exemption under subpara-graph (A), the regulations promulgated under subparagraph (A) shall provide for the generation of credits by the small refinery under paragraph (5) beginning in the cal-endar year following the date of notification.

"(D) Small refinery. — A small refinery shall be subject to the re-quirements of paragraph (2) if the small re-finery notifies the Administrator that the small refinery waives the exemption under subparagraph (A).

"(10) Ethanol market concentration analysis

"(A) Analysis.—

"(i) In general. — Not later than 180 days after the date of enactment of this para-graph, the Administrator shall promulgate regu-lations under subparagraph (A) not later than 90 days after the date of receipt of a notification from a Governor under that subpara-graph.

"(ii) Effective date. — (1) In general. — With respect to an area in a State for which the Governor submits a notification under subparagraph (A), the regulations under that subparagraph shall take effect on the later of—

"(a) the date on which funds are provided to carry out the marketing and sale of ethanol under subsection (b) for the area; or

"(b) the date on which an area is designated as a designated area under subsection (b)."

"(B) Survey of renewable fuel market—

"(i) General. — The Administrator shall, by regulation, apply, in lieu of, or as an alterna-tive to, the market concentration analysis under subparagraph (A)(ii), a survey of the market concentration of the renewable fuel industry, for the purpose of determining if the market concentration of the renewable fuel industry is sufficient to avoid price-setting and other anticompetitive behavior.

"(ii) Scoring. — For the purpose of scoring under subparagraph (A), the Administrator shall use the Herfindahl-Hirschman Index to determine whether there is sufficient competition among industry participants to avoid price-setting and other anticompetitive behavior.

"(C) Exclusion from ethanol waiver.—

"(1) In general. — Upon notification, accompanied by sup-porting documentation, from the Governor of a State that the Reid vapor pressure limitation established by paragraph (4) will in-crease emissions that contribute to air pollu-tion in any area of the State, the Adminis-trator shall, by regulation, apply, in lieu of, the Reid vapor pressure limitation established by paragraph (4), the Reid vapor pres-sure limitation established by paragraph (2)(A) to all fuel blends containing gasoline and 10 percent denatured anhydrous ethanol that are sold, offered for sale, dispensed, supplied, offered for sale, transported, or introduced into commerce in the area during the high ozone season.

"(D) Deadline for promulgation. — The Administrator shall promulgate regulations under subparagraph (A) not later than 90 days after the date of receipt of a notification from a Governor under that subpara-graph.

"(E) Effective date. — (1) In general. — Funds may be provided for the cost of the analysis required under this subsection when the Administrator promulgates the regulations under that subparagraph.

"(2) Survey of renewable fuel market concentration analysis. —

"(A) Analysis.—

"(i) In general. — Funds may be provided for the cost of the analysis under section 202 of the Energy Policy Act of 2005 when the Administrator promulgates the regulations under that subparagraph.

"(ii) Effective date. — Funds may be provided for the cost of the analysis under that subparagraph when the Administrator promulgates the regulations under that subparagraph.

"(B) Survey of renewable fuel concentration analysis.

"(1) In general. — The Administrator may require any refiner, blender, or importer to keep such records and make such reports as the Administrator deems necessary to ensure that the survey conducted under paragraph (1) is accurate.

"(2) Reliance on existing requirements. — To avoid duplicative requirements, in carrying out subparagraph (A), the Administrator may rely, to the maximum ex-tent practicable, on existing data and recordkeeping requirements in effect on the date of enactment of this section.

"(C) Confidentiality. — Activities carried out under this subsection shall be conducted in a manner designed to protect confidential-ity of individual responses.

"(D) Cellulosic biomass ethanol and munici-pal solid waste loan guarantee program.—

"(1) In general. — Funds may be provided for the cost of the analysis under section 202 of the Energy Policy Act of 2005 when the Administrator promulgates the regulations under that subparagraph.

"(2) Demonstration projects. —

"(A) In general. — The Secretary shall issue loan guarantees under this section to carry out not more than 4 projects to com-mercially demonstrate the feasibility and vi-ability of producing cellulosic biomass eth-anol, sucrose-derived ethanol, or cellulosic biomass-derived liquid alternative fuels.

"(B) Design capacity. — Each project shall have a design capacity to produce at least 30,000,000 gallons of cellulosic biomass eth-anol or cellulosic biomass-derived liquid alternative fuels each year.

"(C) Applicant assurances. — An applicant for a loan guarantee under this section shall provide assurances to the Secretary, that—

"(1) the project design has been validated through the operation of a continuous process facility with a cumulative output of at least 30,000,000 gallons of cellulosic biomass eth-anol or cellulosic biomass-derived liquid alternative fuels each year.

"(2) the project has been subject to a full technical review;

"(D) Project selection. —

"(1) Municipal solid waste. — The term municipal solid waste has the meaning given the term 'solid waste' in section 1004 of the Solid Waste Disposal Act (42 U.S.C. 6904).

"(E) Program. — The Secretary shall, by regulation, designate States that meet the criteria for participation in the program established by this subsection.

"(2) Survey of renewable fuel market concentration analysis. —

"(A) In general. — The Administrator shall, by regulation, apply, in lieu of, or as an alterna-tive to, the market concentration analysis under subparagraph (A)(ii), a survey of the market concentration of the renewable fuel industry, for the purpose of determining if the market concentration of the renewable fuel industry is sufficient to avoid price-setting and other anticompetitive behavior.

"(B) Survey of renewable fuel market concentration analysis. —

"(C) Demonstration projects. —

"(1) In general. — Funds may be provided for the cost of the analysis under section 202 of the Energy Policy Act of 2005 when the Administrator promulgates the regulations under that subparagraph.

"(2) Design capacity. — Each project shall have a design capacity to produce at least 30,000,000 gallons of cellulosic biomass eth-anol or cellulosic biomass-derived liquid alternative fuels each year.

"(C) Applicant assurances. — An applicant for a loan guarantee under this section shall provide assurances to the Secretary, that—

"(1) the project design has been validated through the operation of a continuous process facility with a cumulative output of at least 30,000,000 gallons of cellulosic biomass eth-anol or cellulosic biomass-derived liquid alternative fuels each year.

"(2) the project has been subject to a full technical review;

"(D) Project selection. —

"(1) Municipal solid waste. — The term municipal solid waste has the meaning given the term 'solid waste' in section 1004 of the Solid Waste Disposal Act (42 U.S.C. 6904).

"(E) Program. — The Secretary shall, by regulation, designate States that meet the criteria for participation in the program established by this subsection.

"(2) Survey of renewable fuel market concentration analysis. —

"(A) In general. — The Administrator shall, by regulation, apply, in lieu of, or as an alterna-tive to, the market concentration analysis under subparagraph (A)(ii), a survey of the market concentration of the renewable fuel industry, for the purpose of determining if the market concentration of the renewable fuel industry is sufficient to avoid price-setting and other anticompetitive behavior.

"(B) Survey of renewable fuel market concentration analysis. —

"(C) Demonstration projects. —

"(1) In general. — Funds may be provided for the cost of the analysis under section 202 of the Energy Policy Act of 2005 when the Administrator promulgates the regulations under that subparagraph.

"(2) Design capacity. — Each project shall have a design capacity to produce at least 30,000,000 gallons of cellulosic biomass eth-anol or cellulosic biomass-derived liquid alternative fuels each year.

"(C) Applicant assurances. — An applicant for a loan guarantee under this section shall provide assurances to the Secretary, that—

"(1) the project design has been validated through the operation of a continuous process facility with a cumulative output of at least 30,000,000 gallons of cellulosic biomass eth-anol or cellulosic biomass-derived liquid alternative fuels each year.

"(2) the project has been subject to a full technical review;
“(c) the project is covered by adequate project performance guarantees;”

“(d) the project, with the loan guarantee, is economically viable; and”

“(e) there is a reasonable assurance of repayment of the guaranteed loan.”

“(4) LIMITATIONS.—

“(A) MAXIMUM GUARANTEE.—Except as provided in subparagraph (B), a loan guarantee under this section may be issued for up to 80 percent of the estimated cost of a project, but may not exceed $250,000,000 for a project.

“(B) LOAN GUARANTEES FOR 1 OR MORE QUALIFYING PROJECTS.—If the amount made available to carry out this subsection is insufficient to allow the Secretary to make loans or loan guarantees for all or any portion of the projects described in subsection (b), the Secretary shall issue loan guarantees for 1 or more qualifying projects under this section in the order in which the applications for the projects are received by the Secretary.

“(5) EQUITY CONTRIBUTIONS.—To be eligible for a loan guarantee under this section, an applicant for the loan guarantee shall have binding commitments from equity investors to provide an initial equity contribution of at least 20 percent of the total project cost.

“(6) INSUFFICIENT AMOUNTS.—If the amount made available to carry out this section is insufficient to allow the Secretary to make loans or loan guarantees for all or any portion of the projects described in subsection (b), the Secretary shall issue loan guarantees for 1 or more qualifying projects under this section in the order in which the applications for the projects are received by the Secretary.

“(7) APPROVAL.—An application for a loan guarantee under this section shall be approved by the Secretary within 90 days after the application is received or later than 90 days after the application is received by the Secretary.

“(d) AUTHORIZATION OF APPROPRIATIONS FOR RENEWABLE ENERGY.—There is authorized to be appropriated, for a resource center to further develop biorefinery technologies using renewable energy for the production of ethanol at the Center for Biomass-Based Energy at the Mississippi State University and the Oklahoma State University, $4,000,000 for each of fiscal years 2005 through 2007.

“(e) FUEL PRODUCTION RESEARCH AND DEVELOPMENT GRANTS.—

“(1) IN GENERAL.—The Administrator shall provide grants for the research into, and development and implementation of, renewable fuel production technologies in RFG States with low rates of ethanol production, including technologies that result in low rates of production of cellulosic biomass.

“(2) ELIGIBILITY.—

“(A) IN GENERAL.—The entities eligible to receive a grant under this subsection are academic institutions in RFG States, and consortia made up of combinations of academic institutions, industry, State government agencies, or local government agencies in RFG States that have prior experience and capabilities with relevant technologies.

“(B) APPLICATION.—To be eligible to receive a grant under this subsection, an eligible entity shall submit to the Administrator an application in such manner and form, and accompanied by such information, as the Administrator may specify.

“(5) AUTHORIZATION OF APPROPRIATIONS.—

“THERE IS AUTHORIZED TO BE APPROPRIATED TO CARRY OUT THIS SUBSECTION $25,000,000 FOR EACH OF FISCAL YEARS 2006 THROUGH 2010.

“(f) FUEL PRODUCTION CONVERSION ASSISTANCE.—

“(1) IN GENERAL.—The Secretary may provide grants to private or public producers of cellulosic ethanol to assist in the United States to build facilities to produce cellulosic ethanol feedstocks, as defined in paragraph (2), for the production of cellulosic biomass ethanol.

“(2) ELIGIBLE PRODUCTION FACILITIES.—A production facility shall be eligible to receive a grant under this subsection if the production facility—

“(A) is located in the United States; and

“(B) uses cellulosic biomass feedstocks derived from agricultural residues or municipal solid waste.

“(3) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this subsection—

“(A) $250,000,000 for fiscal year 2005; and

“(B) $400,000,000 for fiscal year 2006.”

“(b) RELEASE PREVENTION AND COMPLIANCE.—Subtitle I of the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.) is amended by striking section 9010 and inserting the following:

“SEC. 9010. RELEASE PREVENTION AND COMPLIANCE.

“Funds made available under section 9013(2) from the Leaking Underground Storage Tank Trust Fund may be used for conducting inspections, or for issuing orders or bringing actions under this subtitle—

“(i) by a State (pursuant to section 9003(h)(7)) acting under—

“(A) a program approved under section 9001; and

“(B) State requirements regulating underground storage tanks that are similar or identical to this subtitle, as determined by the Administrator; and

“(ii) by the Administrator, acting under this subtitle or a State program approved under section 9001.”

“(c) TECHNICAL AMENDMENTS.—

“(1) Section 1001 of the Solid Waste Disposal Act (42 U.S.C. prec. 6901) is amended by striking the item relating to section 9010 and inserting the following:

“Sec. 9010. Release prevention and compliance.

“Sec. 9011. Authorization of appropriations.”

“(2) Section 9001(b)(3)(A) of the Solid Waste Disposal Act (42 U.S.C. 6991(b)(3)(A)) is amended by striking “substances” and inserting “substances”.

“(3) Section 9005(b)(1)(A) of the Solid Waste Disposal Act (42 U.S.C. 6995b(1)(A)) is amended by striking “substances” and inserting “substances”.

“(4) Section 9004(a) of the Solid Waste Disposal Act (42 U.S.C. 6994a(a)) is amended in the second sentence by striking “subsection (c) and (d)” and inserting “subsection (a) to” and all that follows and inserting “referred to in subparagraph (A) or (B), or both, of section 9001(c)(2).”

“(5) Section 9006 of the Solid Waste Disposal Act (42 U.S.C. 6996d) is amended—

“(A) in subsection (a), by striking “study taking” and inserting “study, taking”;

“(B) in subsection (b)(1), by striking “relevant” and inserting “relevant”;

“(C) in subsection (b)(4), by striking “Environmental” and inserting “Environment”.

“SEC. 223. RESTRICTIONS ON THE USE OF MTBE.

“(a) FINDINGS.—Congress finds that—

“(1) since 1979, methyl tertiary butyl ether (referred to in this section as "MTBE") has been used nationwide at low levels in gasoline to replace lead as an octane booster or anti-knocking agent;

“(2) Public Law 101–549 (commonly known as the "Clean Air Act Amendments of 1990") (42 U.S.C. 7401 et seq.) established a fuel oxygenate standard under which reformulated gasoline must contain at least 2 percent oxygen by weight;

“(3) at the time of the adoption of the fuel oxygenate standard, Congress was aware that—

“(A) increased use of MTBE could result from the adoption of that standard; and
(B) the use of MTBE would likely be needed to implement that standard; (4) Congress is aware that gasoline and its component additives have leaked from storage tanks, with consequences for water quality; (5) the fuel industry responded to the fuel oxygenate standard established by Public Law 104-54 by making substantial investments in— (A) MTBE production capacity; and (B) systems to deliver MTBE-containing gasoline to the marketplace; (6) when leaked or spilled into the environment, MTBE may cause serious problems of drinking water quality; (7) it is necessary to restrict the use of MTBE has been detected in water sources throughout the United States; (8) MTBE can be detected by smell and taste at low concentrations; and (9) while small quantities of MTBE can render water supplies unpalatable, the precise human health effects of MTBE consumption at low levels are yet unknown as of the date of enactment of this Act; (10) in the report entitled “Achieving Clean Air and Clean Water: The Report of the Blue Ribbon Panel on Oxygenates in Gasoline” and dated September 1999, Congress was urged— (A) to eliminate the fuel oxygenate standard; (B) to greatly reduce use of MTBE; and (C) to maintain the environmental performance of reformulated gasoline; (11) Congress has— (A) reconsidered the relative value of MTBE in gasoline; and (B) decided to eliminate use of MTBE as a fuel additive to gasoline. (12) the timeline for elimination of use of MTBE as a fuel additive must be established in a manner that achieves an appropriate balance of— (A) environmental protection; (B) adequate energy supply; and (C) reasonable fuel prices; and (13) it is appropriate for Congress to provide some limited transition assistance— (A) to merchant producers of MTBE who produced MTBE in response to a market created by the oxygenate requirement contained in the Clean Air Act (42 U.S.C. 7401 et seq.); and (B) for the purpose of mitigating any fuel supply disruption that may result from elimination of a widely-used fuel additive. (b) PURPOSES.—The purposes of this section are— (1) to eliminate use of MTBE as a fuel oxygenate; and (2) to provide assistance to merchant producers of MTBE in making the transition from producing MTBE to producing other fuel additives. (c) AUTHORITY FOR WATER QUALITY PROTECTION FROM FUELS.—Section 211(c) of the Clean Air Act (42 U.S.C. 7545(c)) is amended— (1) in paragraph (1)—(A) by inserting “fuel or fuel additive or” after “Administrator any”; and (B) by striking “air pollution which” and inserting “air pollution, or water pollution, that”; (2) in paragraph (4)(B), by inserting “or water quality protection,” after “emission control,”; and (3) by adding at the end the following: “(5) promulgation of use of MTBE— (A) IN GENERAL.—Subject to subparagraph (E), not later than 4 years after the date of enactment of this paragraph, the use of methyl tertiary butyl ether in motor vehicle fuel in any State other than a State described in subparagraph (C) is prohibited.

(5) restrictions on use of MTBE.— (A) IN GENERAL.—The Administrator shall promulgate regulations to effect the prohibition in subparagraph (A). (B) STATES THAT AUTHORIZE USE.—A State that submits to the Administrator a notice that the State authorizes use of methyl tertiary butyl ether in motor vehicle fuel sold or used in the State shall, not later than 4 years after the date of enactment of this paragraph, the Administrator shall publish in the Federal Register notice each submitted by a State under subparagraph (A). (C) TRACE QUANTITIES.—In carrying out subparagraph (A), the Administrator may take such actions as are necessary to ensure that methane tertiary butyl ether, and its derivatives, is present in motor vehicle fuel in cases that the Administrator determines to be appropriate. (D) MTBE MERCHANT PRODUCER CONVERSION ASSISTANCE.— (A) IN GENERAL.— (i) GRANTS.—The Secretary of Energy, in consultation with the Administrator, may make grants to merchant producers of methyl tertiary butyl ether in the United States to assist the producers in the conversion of eligible production facilities described in subparagraph (C) to the production of— (I) iso-octane or alkanes, unless the Administrator, in consultation with the Secretary of the Interior, determines that transition assistance for the production of iso-octane or alkanes is inconsistent with the criteria specified in subparagraph (B); and (ii) any other fuel additive that meets the criteria specified in subparagraph (B). (B) CRITERIA.—The criteria referred to in subparagraph (A) are that— (I) the fuel additive is consistent with this subsection; (ii) the fuel additive is consistent with this subsection; (ii) the Administrator has not determined that the fuel additive may reasonably be anticipated to endanger public health or the environment; (iii) the fuel additive has been registered and tested, or is being tested, in accordance with the requirements of this section; and (iv) the fuel additive will contribute to replacing quantities of motor vehicle fuel rendered unavailable as a result of paragraph (5). (C) ELIGIBLE PRODUCTION FACILITIES.— A production facility shall be eligible to receive a grant under this paragraph if the production facility has— (1) is located in the United States; and (2) meets the criteria described in this subsection. (D) AUTHORIZATION OF APPROPRIATIONS.— There is authorized to be appropriated to carry out this paragraph $250,000,000 for each of fiscal years 2005 through 2008.. (E) EFFECT ON LAW CONCERNING STATE AUTHORITY.—The amendments made by subsection (c) have no effect on any law enacted or in effect before the date of enactment of this Act concerning the authority of States to limit the production of methyl tertiary butyl ether in motor vehicle fuel. SEC. 224. ELIMINATION OF OXYGEN CONTENT REQUIREMENT FOR REFORMULATED GASOLINE. (a) ELIMINATION.— (1) IN GENERAL.—Section 211(k)(1) of the Clean Air Act (42 U.S.C. 7545(k)(1)) is amended— (A) by striking subparagraph (B); and (B) by redesigning subparagraphs (C) and (D) as subparagaphs (B) and (C), respectively; (2) APPLICABILITY.—The amendments made by paragraph (1) apply— (A) in the case of a State that has received a waiver under section 208(b) of the Clean Air Act (42 U.S.C. 7543(b)), beginning on the date of enactment of this Act; and (B) in the case of any other State, beginning 270 days after the date of enactment of this Act. (b) MAINTENANCE OF TOXIC AIR POLLUTANT EMISSION REDUCTIONS.—Section 211(k)(1) of the Clean Air Act (42 U.S.C. 7545(k)(1)) is amended— (1) by striking “Within 1 year after the enactment of the Clean Air Act Amendments of 1990,” and inserting the following: “(A) IN GENERAL.—Not later than November 15, 1991,”; and (2) by adding at the end the following: “(B) MAINTENANCE OF TOXIC AIR POLLUTANT EMISSIONS REDUCTIONS FROM REFORMULATED GASOLINE.— (1) DEFINITION OF PADD.—In this subparagraph the term ‘PADD’ means the Petroleum Administration for Defense District. “(2) REGULATIONS CONCERNING EMISSIONS OF TOXIC AIR POLLUTANTS.—Not later than 270 days after the date of enactment of this subparagraph, the Administrator shall establish by regulation, for each refinery or importer (other than a refiner or importer in a State that has received a waiver under section 208(b) with respect to gasoline produced for use in that State), standards for toxic air pollutants from use of the reformulated gasoline produced or distributed by the refiner or importer that maintain the reduction of the average annual aggregate emissions of toxic air pollutants for reformulated gasoline produced or distributed by a refiner or importer during calendar years 2001 and 2002 (as determined on the basis of data collected by the Administrator with respect to the refiner or importer). “(3) STANDARDS APPLICABLE TO SPECIFIC REFINERIES OR IMPORTERS.— “(I) APPLICABILITY OF STANDARDS.—For any calendar year, the standards applicable to a refiner or importer under clause (ii) shall apply to the quantity of gasoline produced or distributed by the refiner or importer during the calendar year only to the extent that the quantity is less than or equal to the average annual quantity of reformulated gasoline produced or distributed by the refiner or importer during calendar years 2001 and 2002. “(II) APPLICABILITY OF OTHER STANDARDS.— For any calendar year, the quantity of gasoline produced or distributed by a refiner or importer that is in excess of the quantity subject to subsection (I) shall be subject to standards for emissions of toxic air pollutants in the same manner as provided in paragraph (7).
“(v) Regional Protection of Toxics Reduction Baselines.—

“(I) In General.—Not later than 60 days after the date of enactment of this subparagraph, the Administrator shall publish in the Federal Register a report that specifies, with respect to each calendar year that begins after that date of enactment, the Administrator’s determination under subparagraph (A) that the average annual aggregate emissions of hazardous air pollutants from butanol containing gasoline—

“(aa) identify, to the maximum extent practicable, the reasons for the failure, including the sources, volumes, and characteristics of the reformulated gasoline that contributed to the failure; and

“(bb) promulgate revisions to the regulations promulgated under clause (ii), to take effect not later than 180 days after the date of publication of the report for the calendar year specified in clause (I), shall—

“(1) in paragraph (e), by striking ‘‘may also’’ and inserting ‘‘shall, on a regular basis,’’; and

“(2) in subparagraph (B)(i), by striking ‘‘the reduction of the average annual aggregate emissions of hazardous air pollutants from reformulated gasoline significantly below the national annual average emissions of hazardous air pollutants from all gasoline’’ and inserting ‘‘the reduction achieved during calendar years 2001 and 2002’’.

“(II) In General.—Not later than 4 years after the date of enactment of this paragraph, the Administrator shall publish in the Federal Register a report that specifies, with respect to each calendar year, the Administrator’s determination under subparagraph (A) that the Administrator’s determination under subparagraph (A) shall meet the standards applicable to a refinery or importer made under those regulations.

“(J) Adjustment of Standards.—The Administrator may apply any adjustments to the standards applicable to a refinery or importer under subparagraph (B)(iii)(I) of section 211(k)(1) of the Clean Air Act (as added by subsection (b)(2)), except that—

“(1) the Administrator shall revise the adjustments to be based only on calendar years 2001 and 2002; and

“(ii) an adjustment shall not be made at a level below the average percentage of reductions of emissions of toxic air pollutants for reformulated gasoline supplied to PADD I during calendar years 2001 and 2002; and

“(iii) in the case of an adjustment based on toxic air pollutants from reformulated gasoline—

“(aa) the Administrator may revise the adjustment to take account of the scope of the prohibition on methyl tertiary butyl ether imposed by paragraph (5) of section 211(c) of the Clean Air Act (as added by section 211(c)); and

“(bb) the reduction of the average annual aggregate emissions of toxic air pollutants from reformulated gasoline—

“(AA) the Administrator shall—

“(1) in subparagraph (A), by adding at the end the following:

“‘‘(I) in the case of an adjustment based on previous calendar years, the Administrator shall take into account the reduction achieved during calendar years 2001 and 2002; and

“(ii) in the case of an adjustment based on calendar year, the Administrator shall take into account the reduction achieved during calendar years 2001 and 2002; and

“(iii) in the case of an adjustment based on calendar year, the Administrator shall take into account the reduction achieved during calendar years 2001 and 2002; and

“(bb) the Administrator may revise the adjustment to take account of the scope of the prohibition on methyl tertiary butyl ether imposed by paragraph (5) of section 211(c) of the Clean Air Act (as added by section 211(c)); and

“(II) tertiary amyl methyl ether;

“(III) diisopropyl ether;

“(IV) tert-butyl alcohol;

“(V) ethyl tertiary butyl ether and heavy alcohols, as determined by the Administrator;

“(VI) ethanol;

“(VII) iso-octane; and

“(VIII) alkanes that are not isomers of any of the compounds defined in section 101 of the Higher Education Act of 1965 (20 U.S.C. 1001)).’’.

“SEC. 226. ANALYSES OF MOTOR VEHICLE FUEL CHANGES.

“Section 211 of the Clean Air Act (42 U.S.C. 7545) (as amended by section 205(a)) is amended by inserting after subsection (p) the following:

“(q) Analyses of Motor Vehicle Fuel Changes and Emissions Model.—

“(1) Anti-Racketeering Analysis.—

“(A) Draft Analysis.—Not later than 4 years after the date of enactment of this paragraph, the Administrator shall publish for public comment a draft analysis of the changes in emissions of air pollutants and air quality due to the use of motor vehicle fuel and fuel additives resulting from implementation of the amendments made by the Federal Reformulated Fuels Act of 2005.

“(B) Final Analysis.—After providing a reasonable opportunity for comment but not later than 5 years after the date of enactment of this paragraph, the Administrator shall publish the analysis in final form.

“(2) Emissions Model.—For the purposes of this section, not later than 4 years after the date of enactment of this paragraph, the Administrator shall develop and finalize an emissions model that reflects, to the maximum extent practicable, the effects of gasoline characteristics and components on emissions of pollutants from vehicles in the motor vehicle fleet during calendar year 2007.

“(3) Permeation Effects Study.—

“(A) In General.—Not later than 1 year after the date of enactment of this paragraph, the Administrator shall conduct a study and report to Congress the results of the study, on the effects of ethanol content in gasoline on permeation by which fuel molecules migrate through the elastomeric materials (rubber and plastic parts) that make up the fuel and fuel vapor systems of a motor vehicle.

“(B) Evaporative Emissions.—The study shall include estimates of the increase in total evaporative emissions likely to result from the use of gasoline with ethanol content in a motor vehicle, and the fleet of motor vehicles, due to permeation.’’.

“SEC. 227. ADDITIONAL OPT-IN AREAS UNDER REFORMULATED GASOLINE PROGRAM.

“Section 211(k)(6) of the Clean Air Act (42 U.S.C. 7545(k)(6)) is amended—

“(1) by striking ‘‘(6) OPT-IN AREAS.—(A) Upon’’ and inserting the following:

“(B) OPT-IN AREAS.

“(A) CLASSIFIED AREAS.—

“(i) In General.—(B) After the date of enactment of this paragraph, by striking ‘‘(B)’’ and inserting the following:

“(ii) Effect of Insufficient Domestic Capacity to Produce Reformulated Gasoline.

“(II) In General.—(C) In subparagraph (A)(ii), by striking ‘‘(B)’’ and inserting the following:

“(ii) conduct a study on the effects on public health (including the effects on children, pregnant women, minority or low-income communities, and other sensitive populations), air quality, and water resources of the adjustment for ethanol-blended reformulated gasoline on permeation, the process by which fuel molecules migrate through the elastomeric materials (rubber and plastic parts) that make up the fuel and fuel vapor systems of a motor vehicle,

“(iv) evaporative emissions; and

“(v) use of gasoline with ethanol content in a motor vehicle, and the fleet of motor vehicles, due to permeation.’’.

“SEC. 228. ANALYSES OF MOTOR VEHICLE FUEL CHANGES.

“Section 211 of the Clean Air Act (42 U.S.C. 7545) (as amended by section 205(a)) is amended by inserting after subsection (p) the following:

“(q) Analyses of Motor Vehicle Fuel Changes and Emissions Model.—

“(1) Anti-Racketeering Analysis.—

“(A) Draft Analysis.—Not later than 4 years after the date of enactment of this paragraph, the Administrator shall publish for public comment a draft analysis of the changes in emissions of air pollutants and air quality due to the use of motor vehicle fuel and fuel additives resulting from implementation of the amendments made by the Federal Reformulated Fuels Act of 2005.

“(B) Final Analysis.—After providing a reasonable opportunity for comment but not later than 5 years after the date of enactment of this paragraph, the Administrator shall publish the analysis in final form.

“(2) Emissions Model.—For the purposes of this section, not later than 4 years after the date of enactment of this paragraph, the Administrator shall develop and finalize an emissions model that reflects, to the maximum extent practicable, the effects of gasoline characteristics and components on emissions of pollutants from vehicles in the motor vehicle fleet during calendar year 2007.

“(3) Permeation Effects Study.—

“(A) In General.—Not later than 1 year after the date of enactment of this paragraph, the Administrator shall conduct a study and report to Congress the results of the study, on the effects of ethanol content in gasoline on permeation by which fuel molecules migrate through the elastomeric materials (rubber and plastic parts) that make up the fuel and fuel vapor systems of a motor vehicle.

“(B) Evaporative Emissions.—The study shall include estimates of the increase in total evaporative emissions likely to result from the use of gasoline with ethanol content in a motor vehicle, and the fleet of motor vehicles, due to permeation.’’.
(a) in the first sentence, by striking "sub-
paragraph (A)" and inserting "clause (1)"; and
(b) in the second sentence, by striking "this sec-
tion", inserting "this subparagraph"; and
(c) by adding at the end the following:

"(B) OZONE TRANSPORT REGION.—

"(i) AIRPORT FUELS REQUIREMENTS.—

"(1) IN GENERAL.—Application of the
Secretary of Energy shall jointly conduct a
study of Federal, State, and local require-
ments concerning motor vehicle fuels, in-
cluding—

(A) requirements relating to reformulated
gasoline, volatility (measured in Reid vapor
pressure), oxygenated fuel, and diesel fuel; and
(B) other requirements that vary from
State to State, region to region, or locality
to locality.

(2) REQUIRED ELEMENTS.—The study shall
assess—

(A) the effect of the variety of require-
ments described in paragraph (1) on the sup-
ply, quality, and price of motor vehicles fuels
available to the consumer;

(B) the effect of the requirements described
in paragraph (1) on achievement of—

(i) national, regional, and local air quality
standards and goals; and
(ii) environmental and public
health protection standards and goals (in-
cluding the protection of children, pregnant
women, minority or low-income commu-
nities, and other sensitive populations, and

(C) the effect of Federal, State, and local
motor vehicle fuel regulations, including
multiple motor vehicle fuel requirements, on—

(i) domestic refineries;

(ii) the fuel distribution system; and

(iii) industry investment in new capacity;

(D) the effect of the requirements de-
scribed in paragraph (1) on emissions from
vehicles, refiners, and fuel handling facili-
ties;

(E) the feasibility of developing national or
regional motor vehicle fuel slates for the 48
contiguous States that, while protecting and
improving air quality at the national, re-

gional, and local levels, could—

(i) enhance flexibility in the fuel distribu-
tion infrastructure and improve fuel

(ii) reduce price volatility and costs to
consumers and producers;

(iii) provide increased liquidity to the gas-

line market; and

(iv) improve fuel quality, consistency, and
supply; and

(F) the feasibility of providing incentives,
and the need for the development of national
standards necessary, to promote cleaner
burning motor vehicle fuel.

(2) RECOMMENDATIONS.—

(A) In writing its report the
Secretary of Energy shall—

(i) to improve air quality;

(ii) to reduce costs to consumers and pro-
ducers; and

(iii) to increase supply liquidity.

(B) REQUIRED CONSIDERATIONS.—The rec-
ommendations under subparagraph (A) shall
take into account the need to provide ad-

dance notice of required modifications to re-
finery and fuel distribution systems in order
to ensure an adequate supply of motor vehi-
cle fuel in all States.

(3) CONSULTATION.—In developing the re-
port, the Administrator of the Environ-
mental Protection Agency and the Secretary
of Energy shall consult with—

(A) the Governors of the States;

(B) automobile manufacturers;

(C) State and local air pollution control
regulators;

(D) public health experts;

(E) motor vehicle fuel producers and dis-

crributors; and

(F) the public.
carry out this section $36,000,000, to remain available until expended.

Subtitle B—Insular Energy

SA 794. Mr. DOMENICI (for himself and Mr. BINGAMAN) proposed an amendment to the bill H.R. 6, Reserved; as follows:

On page 10, strike lines 5 through 8 and insert the following:

```
(2) INSTITUTION OF HIGHER EDUCATION.—
(A) IN GENERAL.—The term ‘institution of higher education’ has the meaning given the term in section 101(a) of the Higher Education Act of 1965 (20 U.S.C. 1001(a)).

(B) INCLUSION.—The term ‘institution of higher education’ includes an organization that—

(i) is organized, and at all times thereafter operated, exclusively for the benefit of, or to perform the functions of, or to carry out the functions of 1 or more organizations referred to in subparagraph (A); and

(ii) is operated, supervised, or controlled by or in connection with 1 or more of those organizations.
```
The agenda will be provided when it becomes available today.

Agenda

I. Nominations: Terrence W. Boyle, to be U.S. Circuit Judge for the Fourth Circuit; Rachel Brand, to be an Assistant Attorney General for the Office of Legal Policy; Alice S. Fisher, to be an Assistant Attorney General for the Criminal Division.

II. Bills: S. 291, Christopher Kangas Fallen Firefighter Apprentice Act (Specter, Leahy)

III. Matters: Senate Judiciary Committee Rules.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. CRAIG. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on June 16, 2005, at 3 p.m., to hold a confirmation hearing.

The PRESIDING OFFICER. Without objection, it is so ordered.

PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. CRAIG. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations of the Committee on Homeland Security and Governmental Affairs be authorized to meet on Thursday, June 16, 2005, at 9:30 a.m., for a hearing entitled "Civilian Contractors Who Cheat On Their Taxes And What Should Be Done About It."

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. FRIST. Madam President, I ask unanimous consent that the Senate immediately proceed to executive session to consider the following nominations on today’s executive calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FRIST. Calendar 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, and all nominations on the Secretary’s desk. I further ask unanimous consent that all of the mentioned nominations be confirmed en bloc, the motions to reconsider be laid upon the table, the Senate be immediately notified of the Senate’s action, and the Senate then return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed are as follows:

EXECUTIVE OFFICE OF THE PRESIDENT

Jorge A. Plascencia, of Florida, to be a Member of the Advisory Board for Cuba Broadcasting for a term expiring July 27, 2006.

UNITED STATES ADVISORY COMMISSION ON PUBLIC DIPLOMACY

Jay T. Snyder, of New York, to be a Member of the United States Advisory Commission on Public Diplomacy for a term expiring July 1, 2007. (Reappointment)

OVERSEAS PRIVATE INVESTMENT CORPORATION

Christopher J. Hanley, of Maryland, to be a Member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 2006.

DEPARTMENT OF STATE

Craig Roberts Stapleton, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to France.

Eduardo Aguirre, Jr., of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Spain, and to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to Andorra.

Roger Dwayne Pierce, of Virginia, a Career Member of the Senior Foreign Service, Class of Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Republic of Cape Verde.

Donald E. Booth, of Virginia, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Liberia.

Molly Hering Bordono, of Oregon, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Belgium.

Julie Finley, of the District of Columbia, to be U.S. Representative to the Organization for Security and Cooperation in Europe, with the rank of Ambassador.

Richard J. Griffin, of Virginia, to be Director of the Office of Foreign Missions, and to have the rank of Ambassador during his tenure of service.

Robert Johann Dieter, of Colorado, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Belize.

Zalmay Khalilzad, of Maryland, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Slovakia.

Rodolph M. Vallee, of Vermont, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Czech Republic.

Pamela E. Bridgewater, of Virginia, a Career Member of the Senior Foreign Service,
Mr. FRIST. I ask unanimous consent that the Senate now proceed to the consideration of S. Res. 174, which was submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 174) recognizing Burmese democracy activist and Nobel Peace Prize laureate Aung San Suu Kyi as a symbol of the struggle for freedom in Burma.

The resolution sponsored by Senators MCCONNELL and FEINSTEIN is a resolution celebrating the birthday of Nobel Peace Prize laureate Aung San Suu Kyi as a symbol of the struggle for freedom in Burma.

While many may know of the horrors committed in Burma by the illegitimate State Peace and Development Council, SPDC, and the courage, dignity and determination of Suu Kyi and her compatriots in the face of this repression, some people may be unaware that June 19 marks Suu Kyi's 60th birthday.

I would like nothing more than to pick up the phone and call her in Rangoon to give her best wishes on her birthday. However, I cannot. Nor can anyone else. Suu Kyi remains under house arrest by the SPDC.

In addition to my colleagues in the Unofficial Burma Caucus in the Senate—Senators FEINSTEIN, MCCAIN, FRIST and LUGAR to name but a few—it is important to recognize the expressions of support for Suu Kyi and democracy in Burma by other stalwarts of freedom, including Georgian President Saakashvili, former Czech Republic President Vaclav Havel, former Malaysian Deputy Prime Minister Anwar Ibrahim, and a litany of fellow Nobel Peace Prize recipients. I ask that statements by President Saakashvili and Prime Minister Elbegdorj be printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCONNELL. Let me close by reiterating the call for the immediate and unconditional release of Suu Kyi and all prisoners of conscience in Burma. I urge Secretary of State Rice to encourage regional neighbors and allies to redouble their efforts to support freedom in Burma when she attends the 12th Association of Southeast Asian Nations regional forum, and post-ministerial meetings in Laos.

Happy birthday, Suu Kyi. You continue to be in our thoughts and prayers.

I yield.

STATEMENT IN SUPPORT OF AUNG SAN SUU KYI AND FREEDOM IN BURMA

I want to extend my warm greetings to those attending this important ceremony and most of all to offer my heartfelt support to Nobel Peace Prize laureate Aung San Suu Kyi. It is a tragedy that she could not be celebrating her birthday among her family, friends and the Burmese people. Her continued jailing is a powerful symbol of the strength of Burma's democracy movement and the weakness of those trying to block that country's path to democracy. No authoritarian government can stand against the collective will of a people determined to be free.

Tonight, as darkness settles across Mongolia, we will light a candle to honor the noble, Mongolian democracy activist and Nobel Peace Prize laureate Aung San Suu Kyi as a symbol of the struggle for freedom in Burma.

We in Georgia understand first-hand what it is like to live under tyranny and the sacrifices necessary to gain liberty. Following
the collapse of Soviet rule, Georgians embraced democracy and set about building a new society dedicated to human rights and the rule of law. When our democracy was hijacked, the Georgian people went to the streets and took it back in what is now known as the Rose Revolution. Today, individual freedoms are guaranteed, religious and ethnic minorities are working out at the peace table differences that once threatened our territorial integrity. I am proud to say that democracy is alive and well in Georgia, but our work is far from finished.

It is up to those who are free to join the fight of the oppressed. I know that the winds of freedom blown across Georgia, touched off an Orange Revolution in Ukraine, spawned a Tulip Revolution in Kyrgyzstan, and shook the cedars of Lebanon will someday soon reach Burma. To the millions of Burmese who are imprisoned with Aung San Suu Kyi in their own country, I say this: Doi Yea (Our Cause)! Because your cause is our cause. Wherever freedom-loving people rise up to carry on the legacy of the Rose Revolution, the spirit and support of the Georgian people stand with you.

RECOGNIZING DAW AUNG SAN SUU KYI

Mr. SALAZAR. Madam President, today I may take a moment to recognize a woman on the occasion of her 60 birthday, a woman whose leadership and courage in her home country of Burma inspires the people of that country and the world to continue to fight for democracy and human rights.

Aung San Suu Kyi has devoted her life to fighting for peace in a country whose people live under an oppressive one-party socialist government known as the State Law and Restoration Council, SLORC. This government is responsible for the deaths of thousands of its own people and the unjust imprisonment of untold more. Suu Kyi remains the only detained Nobel Peace Laureate in the world.

Suu Kyi was born in Burma in 1945 to General Aung San, the leader of the Burmese movement for independence from Great Britain. After his group achieved Burmese independence and took control of the government, he was assassinated for his democratic beliefs and practices. Suu Kyi left Burma and moved to India with her mother after she became the Burmese Ambassador to India in 1960. Although Suu Kyi was only 2 when her father was killed, it was his legacy that inspired her to head the National League for Democracy, NLD when she returned to Myanmar after graduating from Oxford University many years later.

Under her leadership, the NLD won the general election in 1990 with a landslide victory. However, the SLORC refused to acknowledge their win and put the elected pro-democracy leaders under house arrest, including Suu Kyi.

Although no longer in prison, Suu Kyi is not allowed to travel freely due to restrictions by the Burmese Government. She will not let the country out of fear of being permanently exiled from her homeland. Her commitment to her people is so enduring that she is willing to forsake seeing her children who live abroad ever again.

Suu Kyi has inspired countless other Burmese supporters and the world to focus global attention on this conflict. In my State of Colorado, for example, many people from that country have relocated to Boulder. One such person is former Burmese princess Inge Sargent who founded the Burma Lifeline. This organization funds refugee camps along the Thai border and works in conjunction with other groups such as the Shan Women Action Network. Inge Sargent was awarded the United Nations International Human Rights Award in 2003.

It is because of brave women like Suu Kyi and the hundreds of people from Burma who have made Colorado their home that Burma has a bright future. Yet the struggle is far from over; these brave leaders will not be free until Suu Kyi’s call for democracy is answered.

Mr. FRIST. I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 174) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. Res. 174

Whereas June 19, 2005 marks the 60th birthday of Burmese democracy activist and Nobel Peace Prize Laureate Aung San Suu Kyi; whereas Burma is misruled by the State Peace and Development Council, an illegitimate, repressive military junta in power in Burma; and whereas June 19, 2005 marks the 60th birthday of Burmese democracy activist and Nobel Peace Prize Laureate Aung San Suu Kyi; whereas Burma is misruled by the State Peace and Development Council, an illegitimate, repressive military junta in power in Burma; and whereas the main opposition party in Burma, the National League for Democracy, won a landslide victory in national elections in 1990, the State Peace and Development Council has refused to honor the results of that election and peacefully transfer power in Burma; whereas the State Peace and Development Council as a matter of policy carries out a campaign of violence and intimidation against the people of Burma and ethnic minorities that includes the use of rape, torture, and terror; whereas hundreds of democracy activists, including Aung San Suu Kyi who is the leader of the National League for Democracy, are imprisoned by the repressive State Peace and Development Council; and whereas the United States and other democratic countries recognize and applaud the dedication and commitment to freedom demonstrated by Aung San Suu Kyi and the people of Burma; now, therefore, be it

Resolved, That

(1) recognizes Burmese democracy activist and Nobel Peace Prize Laureate Aung San Suu Kyi as a symbol of the spirit and dedication of the people of Burma who are courageously and nonviolently struggling for freedom, human rights, and justice; (2) calls for the immediate and unconditional release of Aung San Suu Kyi and all other prisoners of conscience who are held by the State Peace and Development Council, including those imprisoned for their nonviolent opposition to the illegitimate, repressive military junta in power in Burma; and (3) strongly urges Secretary of State Condoleezza Rice to initiate a discussion of the repressive practices of the State Peace and Development Council during the 12th Association of Southeast Asian Nations regional forum and post-ministerial meeting scheduled to take place in Vientiane, Laos on July 29, 2005.

COMMENDING UNIVERSITY OF MICHIGAN’S SOFTBALL TEAM

Mr. FRIST. I ask unanimous consent that the Senate proceed to the immediate consideration of S. Res. 175 submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 175) commending the University of Michigan’s softball team for winning the National Collegiate Athletic Association Division I Championship on June 8, 2005.

There being no objection, the resolution (S. Res. 175) was agreed to.

Mr. LEVIN. Madam President, it is with great pride that I congratulate the University of Michigan Softball Team on winning the 2005 National Championship. The Wolverines completed an improbable season by defeating the two-time defending champion University of California-Los Angeles Bruins two games to one in thrilling fashion capped by a three run home run in the tenth inning of the final game of the 2005 College World Series. This victory marks the first time a team east of the Mississippi River has won this title and cements the University of Michigan program as a true national powerhouse in college softball.

The Wolverines played with superb skill and unbridled determination throughout the season and in the World Series to clinch their first championship, the second National Championship ever for a women’s athletic program at the University of Michigan.

The top ranked Wolverines entered Wednesday night’s game hungry for the final win that would secure their first National Championship trophy. The Wolverines and Bruins split the first two games of the best of three series and locked in a deciding third and final game to determine the ultimate victor. The Wolverines and Bruins ended regulation with the score tied at one run each. The tenth inning would prove pivotal as Samantha Findlay seized this opportunity and hit a three run home run to provide the boost necessary to secure this extra innings win. This grand display of athleticism, coupled with her play throughout the postseason, helped earn Findlay the Women’s College World Series Most Valuable Player Award.

That victory provided the perfect ending to a remarkable season for the
University of Michigan Softball Team. After a 32 game winning streak at the beginning of the season, the Wolverines became the Nation’s top-ranked college softball program for the first time in school history, and they were able to maintain the top ranking for the rest of the season. The Wolverines finished the season with 65 wins and 7 losses, the best record in school history and was one of three schools in NCAA history to hit 100 home runs in a season. Members of the Wolverines have been honored for their efforts both on and off the field. Eight of the team’s 19 members were named to the Big Ten all-conference team, including five on the Big Ten first team. Perhaps even more impressive is that six Wolverine players were named to the spring 2005 Academic All-Big Ten Conference team. The Wolverines’ pitcher, Jennie Ritter, was honored with the Big Ten Pitcher of the Year title and was a finalist for the Amateur Softball Association’s USA Softball Collegiate Player of the Year. A member of the Big Ten second team, Samantha Findlay, earned an award as the Big Ten Freshman of the Year. The 2005 University of Michigan Softball team included Wolverine heroes: Angie DANIS, Samantha Findlay, Alessandra Giampaolo, Tiffany Haas, Lauren Holland, Jennifer Kreinbrink, Grace Leutele, Becky Marx, Jessica Merchant, Rebekah Millan, Nicole Motycka, Jennie Ritter, Lauren Talbot, Michelle Teschler, Michelle Weatherdon, Lorilyn Wilson, Stephanie Winter, and Tiffany Worthy.

This season proved to be an especially memorable one for Head Coach Carol Hutchins for several reasons. Coach Hutchins eclipsed the 900 career win mark during the season, and her 940th win resulted in a championship for the Wolverines. She currently enjoys the distinction of being the most victorious coach in University of Michigan history, and currently ranks among the top ten Division I active coaches in career wins and winning percentage.

As we honor this impressive triumph, I am reminded of the many times I have had the pleasure of congratulating a strong Wolverine team. Michigan can be proud of this most recent success— their fifty-second National Championship in school history. I am proud to join Senator STABENOW in congratulating the University of Michigan Softball Team on winning the 2005 Softball National Championship. I know my Senate colleagues share my admiration of the poise, skill and hard work necessary to achieve this milestone.

Ms. STABENOW. Madam President, I rise today to congratulate the University of Michigan softball team on winning the National Collegiate Athletic Association championship on June 8, 2005.

Coach Carol Hutchins’ team completed a remarkable season last Wednesday on national television when Michigan took a 4-1 lead after freshman first baseman Samantha Findlay hit a three run homer in the 10th inning. The 2005 University of Michigan softball team had a remarkable and historic season. They were recognized mid-season as the top ranked collegiate softball team in America. They went on to win both the Big Ten regular season championship and Big Ten Tournament title and then advanced to their eighth Women’s College World Series appearance, defeating defending champion UCLA Bruins in the three-game series finals.

I am very proud of the women on this University of Michigan team which finished with a school record of 65 wins and 7 losses. Several of Michigan’s players received honors during the season for their spectacular play and at the end of the year for their consistent excellence during the season. In fact, the Women’s College World Series Most Outstanding Player honors went to Samantha Findlay, the first freshman position player to be so recognized. In addition, three Michigan players were nominated for the USA Softball Collegiate Player of the Year, two of which are finalists for the award.

The 2005 University of Michigan softball team was also very exciting to watch because they hit a home run in 57 of 65 games during the 2005 season. They are just one of three schools in NCAA history to hit 100 home runs in a season. The Wolverines ended the season 9-0 with a championship and came out in support of their team all year, setting a single-season home attendance record and bringing in the top five crowds in program history.

Most importantly may be the honor given to six University of Michigan softball players that were named to the spring 2005 Academic All-Big Ten Conference team. I am a strong supporter of women’s athletics and believe that through their participation and accomplishments, women of University of Michigan’s 2005 team were the most accomplished softball team, and all the other women involved in collegiate athletics, provide powerful and very positive messages to girls and young women in our communities.

Mr. FRIST. I ask unanimous consent that the resolution and preamble be agreed to en bloc, the motion to reconsider be laid upon the table, and that any statements relating thereto be printed in the RECORD, without intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 175) was agreed to.

The preamble was agreed to.

The resolution (S. Res. 175) was transmitted to the House of Representatives for appropriate display.

ORDER TO PRINT AS A SENATE DOCUMENT

Mr. FRIST. Madam President, I ask unanimous consent to transmit statements regarding former Senator Exxon be printed as a Senate document, provided that Senators have until the
The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR TUESDAY, JUNE 20, 2005

Mr. FRIST. I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 2 p.m., on Monday, June 20. I further ask that following the prayer and pledge, the morning hour be deemed expired, and the Journal of proceedings be approved to date, the time for the two leaders be reserved, and the Senate then resume consideration of H.R. 6, the Energy bill; provided further that at 5 p.m. on Monday the Senate proceed to executive session for the consideration of Calendar No. 103, John Bolton to be Ambassador to the United Nations; I further ask consent that the time until 6 p.m. be equally divided between the two leaders or their designees and at 6 p.m. the motion to proceed to the motion to reconsider the failed cloture vote be agreed to, the motion to reconsider then be agreed to, and the Senate then proceed to a vote on cloture on the Bolton nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. FRIST. Mr. President, on Monday, the Senate will resume consideration of the Energy bill. We began the Energy bill earlier this week, and we do plan to continue working aggressively on that bill with amendments also Monday afternoon and with the hope that we will be able to debate amendments and set votes in relation to those amendments as needed.

At 6 p.m. on Monday, as we just agreed to, we will vote on a motion to invoke cloture on the Bolton nomination.

With respect to the Energy bill, as we have said again and again, next week will be the final week for consideration. It is vitally important we finally complete action on a national energy policy, and we need to bring this bill to a close soon.

Having said that, as the Democratic leader and I have a colloquy earlier today and pointed out, it may be necessary to file cloture. If so, we will do so, in all likelihood, on Tuesday night to ensure that we finish next week. If that cloture motion is necessary, the vote would not occur until Thursday. Therefore, Members would have ample time to offer and consider their amendments prior to that vote.

ORDER FOR ADJOURNMENT

Mr. FRIST. Mr. President, if there is no further business to come before the Senate, I ask the Senate stand in adjournment under the previous order, following the remarks of Senator Sessions.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Alabama.

THE TREATMENT OF PRISONERS AT GUANTANAMO

Mr. SESSIONS. Mr. President, I heard a good deal of the remarks of the distinguished Senator from Arizona, Mr. KYL, as he discussed the issues surrounding the treatment of prisoners at Guantanamo and the actions of our military. I could not agree with him more. He is one of the Senate’s finest lawyers. He is on the Judiciary Committee, where we just had hearings, and has been involved in these issues for some time. In fact, I serve with him on the Judiciary Committee and am also a Member of the Armed Services Committee.

I would have to say to this body that our Congress has had a total of 29-plus hearings involving the handling of prisoners since the war on terrorism began. I think I have been at most of them. Most of them have been before the Armed Services Committee and Judiciary Committee. We have had a host of these hearings. We have had witnesses and complainants and issues brought up to us time and time again.

Yesterday, at our hearing in Judiciary, I really reached a point where I just felt I had to speak out. It was in the morning before Senator DURBIN made his remarks. But it was something that many felt we needed to address, and more clearly to me: that is, we in this Senate are creating an impression around the world that wholesale violations of human rights are occurring in our prisons, and this is absolutely not true.

Members of our own Congress have suggested and even stated that it is the policy of our country to abuse and violate prisoners’ rights. This is completely false. I do not believe there is any Member of this body who believes that.

The facts are these detainees at Guantanamo are detainees who are being held consistent with the general principles of the Geneva Conventions but are not covered by that convention. As Senator KYL noted, they are not lawful combatants, they are unlawful combatants. They are people who sneak into a country. They do not wear a uniform. They are not part of any state army. Their goal is to kill innocent civilians, men and women and children not involved in a war effort at all. The purpose of the Geneva Conventions is to help one army identify the other army. It is not to encourage those armies not to endanger civilians, but to focus their attention on their enemy and to deal with them. These prisoners are entirely different. They do not qualify for those conventions. But we provide them great protections, anyway.

We have spent $108 million on the prison there at Guantanamo. We are going to spend another $50 million making it even better. I don’t see that that is consistent with who we are. We are not going to spend another $50 million to create a new prison. How would that make us any safer if that were to occur?

Let me share this about the 500 or so prisoners who are there. In the course of this war on terrorism, our country has apprehended 10,000 detainees, individuals who have been captured. Each one has been screened carefully. As a result, approximately 750 have been determined to be unlawful prisoners, to alter what we are doing there and to create a new prison. How would that make us any safer if that were to occur?

war are held until the war is over. You do not turn them loose so they can then re-engage in killing your soldiers. That is the crisis.

When will the war end? I am not sure. So we have people say, they have to all be released. You cannot hold them because this war might go on forever.

Might, might, might. We are talking about now. It has not been going on that long. Most have only been held 1, 2, 3 years. This is not the time to wholesale releasing these people. This battle is tough and hot right now. If you do not believe it, look at what is happening in Iraq and how many are killed by these attacks, surreptitious sneak attacks by roadside bombs in that country. This war is not over. It is ongoing.

We are lucky and have been fortunate that because we were aggressive, we as a nation have not had another attack on our homeland since September 11. But we would like it to continue. We need to be housing a bunch of prisoners that do not amount to a threat to our people.

I will share this. I will not continue too long tonight. I want to share a few facts that are important. We are committed as a nation to high standards of duty in handling those we capture. We need to be careful about it. If someone has committed a crime, let's see them bring it for review and, as I said, 29 plus congressional commissions after commission, review after commission, after investigation after investigation, after complaint after complaint. We have had 10 major commissions and investigations empaneled to review allegations of misconduct. We have had hearings and newspaper articles and investigative reports on TV, that these people who violated the rights of others—those who were tried and convicted and are being sent to jail for long periods of time.

Although none were seriously physically injured, as I recall, they were humiliated and handled in a way unbecoming of an American soldier. Those soldiers have been disciplined severely for their errors, and rightly so. I think it is something we should be proud of.

Do you remember the colonel whose soldiers were under attack? He needed information and to get that, he fired a gun near the Iraqi's head. He did not hurt him in any way. And this terrorist gave information that helped save soldiers' lives. And they cashiered him out of the Army because he was not allowed to use that kind of action. We had a marine officer—who after 9/11 gave up his stock brokerage job to go and serve his country—he be prosecuted, it now appears falsely, by a lower ranking soldier who made complaints against him, a soldier he had referred for action. After full review, they dismissed all charges.

This record is clear. This Government, our Nation, does not tolerate abuse. We have taken strong actions to see that it is not allowed and does not continue. But we have a duty to protect the people of our Nation. These detainees, these terrorists, who are being held, these unlawful combatants present a risk to us.

Some say, we somehow have mad this happen by being aggressive militarily. But I would remind my colleagues that for almost 20 years at Qaida, and groups like that, have been attacking our embassies, our marines, our soldiers—our warships, the USS Cole—around the globe. We had been in a constant state of combat with Saddam Hussein truthfully since the Gulf war in 1991. Up until the actual commencement of the war, we were flying missions to enforce the no-fly zone under the U.N. resolutions. He was firing missiles at our aircraft, and we were dropping bombs on him.

This is a dangerous part of the globe. That is why the Congress, when President Clinton was President, passed a resolution setting the policy of this Government to effect a regime change in Iraq.

So this is what it is all about. It is a dangerous world out there. I want to call on my colleagues, with the greatest sincerity, to be careful what we say. Do not be telling the media, the world, speaking out in ways that suggest it is a policy in the actions of our government or our people.

If prisoners are unlawfully treated, the guards are prosecuted. And the people who did it are prosecuted. It is not our policy to abuse prisoners. It does not happen on a regular basis. We do not tolerate it. We will not tolerate it. We need to apply the rule of law and treat people appropriately.

But when Senators come in hearings and to this floor and make statements in the news media—and when the news media reporters report on these things the story, bad things happen. After the false Koran incident a riot occurred because people in the Middle East believed that was true. They believed what they read in our national news, that we were unfairly or disrespectfully treating the Koran. Whereas in Guantanamo, our guards use gloves. They hold the Koran with both hands, in every way try to treat it in a respectful and considerate manner. And I have shown we are punishing every prisoner there is provided a copy, if they desire.

So this is bad when we create a climate in this body that falsely characterizes our people. Yes, we make mistakes. Yes, if we do, they need to be fixed, and people ought to be punished. And I have shown we are punishing them. But it is wrong and irresponsible, and it places our soldiers whom we have sent in harm's way at greater risk. And when we suggest they are region of the world that we do not respect the faith of Islamic peoples, that we do not treat respectfully the prisoners who we apprehend, and that we are irresponsible, maybe even carrying out activities that are so bad as to be compared with Hitler, Pol Pot, or the Soviet Union. Those irresponsible comments can cost soldiers' lives. We need to be careful about it. If someone has proof of an individual act that amounts to a crime, let's send them bring it for review. Let's have an investigation. If somebody deserves to be prosecuted, let's prosecute them. But if not, quit making these statements. I think we
have had enough hearings. As far as I am concerned, 29-plus is enough.

The military has demonstrated, with all clarity, that they are prepared and willing to honestly and aggressively prosecute wrongdoers. They are also committed to protecting our citizens. They have given their lives, many of them, in that effort. They volunteered to serve in our military. They are the finest military this world has ever known. In the heat of combat they have shown restraint. They have not used heavy weapons, and they have held back in order to be sure innocent civilians are not injured. They do everything they can on a daily basis to reach out to the people in Iraq and Afghanistan, to appeal to their hearts and minds, to encourage them on the road to building a new and better life for themselves and their families. They do the things that Americans have no idea of on a daily basis to try to reach out and reconcile and improve our relationship with the people in that area of the globe.

It is positively damaging to that effort when Members of Congress make the kinds of statements that have been made, when news media outlets, great organs of information, make mistakes, twist, exaggerate, misrepresent things that have occurred. It is not right. We need to show more responsibility. We need to show more discipline. It is not justified. No matter how strongly one feels politically and wants to try to blame the President for all these things, it is not just being heard in this body, it is not just the American people who are hearing criticisms of the President. These comments are being heard throughout the globe. It is not helpful to our efforts to build a better and more peaceful world.

I thank the Chair for the opportunity to say these words, late at night though it is. I believe we are at a point where our Congress needs to improve its behavior. We need to show more restraint. If we do so, this will allow our soldiers to have a better chance to succeed at the difficult mission they have and the one they are working at so ably and so courageously.

I yield the floor.

ADJOURNMENT UNTIL 2 P.M. MONDAY, JUNE 20, 2005

The PRESIDING OFFICER. Under the previous order, the Senate stands adjourned until 2 p.m. on Monday, June 20, 2005.

Thereupon, the Senate, at 7:35 p.m., adjourned until Monday, June 20, 2005, at 2 p.m.

NOMINATIONS

Executive nominations received by the Senate June 16, 2005:

DEPARTMENT OF DEFENSE

JOHN G. GRIMES, OF VIRGINIA, TO BE AN ASSISTANT SECRETARY OF DEFENSE, VICE JOHN F. STENHED.

WAN J. KIM, OF MARYLAND, TO BE AN ASSISTANT ATTORNEY GENERAL, VICE BERNI ACOSTA, RESIGNED.

NATIONAL OCCIDENTAL AND ATMOSPHERIC ADMINISTRATION

FOREIGN SERVICE NOMINATIONS BEGINNING WITH TODD B. AVERY ENDING WITH JOHN P. YORRO, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEAR IN THE CONGRESSIONAL RECORD ON APRIL 3, 2006.

WITHDRAWAL

EXECUTIVE message transmitted by the President to the Senate on June 16, 2005, withdrawing from further Senate consideration the following nominations:

THOMAS V. SKINNER, OF ILLINOIS, TO BE AN ASSISTANT ADMINISTRATOR OF THE ENVIRONMENTAL PROTECTION AGENCY, WHICH WAS SENT TO THE SENATE ON JANUARY 24, 2006.
Highlights

House Committees ordered reported 14 miscellaneous measures, including the following appropriations for Fiscal Year 2006: Legislative Branch; and the Department of Labor, Health and Human Services, Education, and Related Agencies.

Senate

Chamber Action
Routine Proceedings, pages S6669–S6784

Measures Introduced: Fourteen bills and four resolutions were introduced, as follows: S. 1254–1267, and S. Res. 172–175. Pages S6740–41

Measures Reported:

H.R. 2419, making appropriations for energy and water development for the fiscal year ending September 30, 2006, with an amendment in the nature of a substitute. (S. Rept. No. 109–84)

S. 1266, to permanently authorize certain provisions of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act of 2001, to reauthorize a provision of the Intelligence Reform and Terrorism Prevention Act of 2004, to clarify certain definitions in the Foreign Intelligence Surveillance Act of 1978, to provide additional investigative tools necessary to protect the national security. (S. Rept. No. 109–85)

S. 491, to amend the Omnibus Crime Control and Safe Streets Act of 1968 to expand the definition of firefighter to include apprentices and trainees, regardless of age or duty limitations.

S. 852, to create a fair and efficient system to resolve claims of victims for bodily injury caused by asbestos exposure, with amendments. Page S6740

Measures Passed:

Recognizing Aung San Suu Kyi: Senate agreed to S. Res. 174, recognizing Burmese democracy activist and Nobel Peace Prize Laureate Aung San Suu Kyi as a symbol of the struggle for freedom in Burma. Pages S6768, S6780

Commending University of Michigan Softball Team: Senate agreed to S. Res. 175, commending the University of Michigan softball team for winning the National Collegiate Athletic Association Division I Championship on June 8, 2005. Pages S6768, S6780–81

Energy Policy Act: Senate continued consideration of H.R. 6, to ensure jobs for our future with secure, affordable, and reliable energy, taking action on the following amendments proposed thereto:

Adopted:
By 52 yeas to 48 nays (Vote No. 141), Bingaman Amendment No. 791, to establish a renewable portfolio standard. Pages S6673–90, S6692–93, S6700–02

Domenici/Bingaman Amendment No. 794, to make certain improvements to the bill relative to the institution of higher education, high performance building standards, and to provide for a study of overall employment in a hydrogen economy.

Rejected:
By 47 yeas to 53 nays (Vote No. 140), Cantwell Modified Amendment No. 784, to improve the energy security of the United States and reduce United States dependence on foreign oil imports by 40 percent by 2025.

A unanimous-consent agreement was reached providing for further consideration of the bill at 2 p.m., on Monday, June 20, 2005. Page S6782

Nomination—Agreement: A unanimous-consent-time agreement was reached providing for further
consideration of the nomination of John Robert Bolton, of Maryland, to be U.S. Representative to the United Nations, with the rank and status of Ambassador, and the U.S. Representative in the Security Council of the United Nations, at 5 p.m., on Monday, June 20, 2005; that the time until 6 p.m. be equally divided between the Majority Leader and Democratic Leader, or their designees; and that at 6 p.m. the motion to proceed to the motion to reconsider the failed cloture vote be agreed to; the motion to reconsider be agreed to; and the Senate then vote on the motion to invoke cloture on the nomination.

Former Senator Exon Tributes—Agreement: A unanimous-consent agreement was reached providing that the tribute statements regarding former Senator Exon be printed as a Senate document provided that Senators have until the close of business on June 30th, 2005 to submit such statements.

Nominations Confirmed: Senate confirmed the following nominations:
- Jorge A. Plasencia, of Florida, to be a Member of the Advisory Board for Cuba Broadcasting for a term expiring October 27, 2006.
- Jay T. Snyder, of New York, to be a Member of the United States Advisory Commission on Public Diplomacy for a term expiring July 1, 2007.
- Christopher J. Hanley, of Maryland, to be a Member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 2006.
- Craig Roberts Stapleton, of Connecticut, to be Ambassador to France.
- Eduardo Aguirre, Jr., of Texas, to be Ambassador to Spain, and to serve concurrently and without additional compensation as Ambassador to Andorra.
- Roger Dwayne Pierce, of Virginia, to be Ambassador to Republic of Cape Verde.
- Donald E. Booth, of Virginia, to be Ambassador to the Republic of Liberia.
- Molly Hering Bordonaro, of Oregon, to be Ambassador to the Republic of Malta.
- Julie Finley, of the District of Columbia, to be U.S. Representative to the Organization for Security and Cooperation in Europe, with the rank of Ambassador.
- Richard J. Griffin, of Virginia, to be an Assistant Secretary of State (Diplomatic Security).
- Richard J. Griffin, of Virginia, to be Director of the Office of Foreign Missions, and to have the rank of Ambassador during his tenure of service.
- Robert Johann Dieter, of Colorado, to be Ambassador to Belize.
- Zalmay Khalilzad, of Maryland, to be Ambassador to Iraq.
- Rodolphe M. Vallee, of Vermont, to be Ambassador to the Slovak Republic.
- Pamela E. Bridgewater, of Virginia, to be Ambassador to the Republic of Ghana.
- Ann Louise Wagner, of Missouri, to be Ambassador to Luxembourg.
- Terence Patrick McCulley, of Oregon, to be Ambassador to the Republic of Mali.
- Routine lists in the Foreign Service.

Nominations Received: Senate received the following nominations:
- John G. Grimes, of Virginia, to be an Assistant Secretary of Defense.
- Wan J. Kim, of Maryland, to be an Assistant Attorney General.
- 1 Air Force nomination in the rank of general.
- A routine list in the National Oceanic and Atmospheric Administration.

Nominations Withdrawn: Senate received notification of withdrawal of the following nomination:
- Thomas V. Skinner, of Illinois, to be an Assistant Administrator of the Environmental Protection Agency, which was sent to the Senate on January 24, 2005.

Messages From the House:

Measures Referred:

Petitions and Memorials:

Executive Reports of Committees:

Additional Cosponsors:

Statements on Introduced Bills/Resolutions:

Additional Statements:

Amendments Submitted:

Authority for Committees to Meet:

Privilege of the Floor:

Record Votes: Two record votes were taken today. (Total—141)

Adjournment: Senate convened at 9:30 a.m., and adjourned at 7:35 p.m. until 2 p.m., on Monday, June 20, 2005. (For Senate’s program, see the remarks of the Acting Majority Leader in today’s Record on page S6782.)
Committee Meetings

(Committees not listed did not meet)

APPROPRIATIONS: HOMELAND SECURITY/ ENERGY AND WATER DEVELOPMENT

Committee on Appropriations: Committee ordered favorably reported the following bills:

H.R. 2360, making appropriations for the Department of Homeland Security for the fiscal year ending September 30, 2006, with an amendment in the nature of a substitute; and

H.R. 2419, making appropriations for energy and water development for the fiscal year ending September 30, 2006, with an amendment in the nature of a substitute.

MEETING THE HOUSING AND SERVICE NEEDS OF SENIORS ACT

Committee on Banking, Housing, and Urban Affairs: Committee concluded a hearing to examine S. 705, to establish the Interagency Council on Meeting the Housing and Service Needs of Seniors, after receiving testimony from Alphonso R. Jackson, Secretary of Housing and Urban Development; David G. Wood, Director, Financial Markets and Community Investment, Government Accountability Office; Nelda Barnett, AARP, and William T. House of Representatives

Chamber Action

Measures Introduced: 27 public bills, H.R. 2930–2956; and 7 resolutions, H.J. Res. 55; H. Con. Res. 179–180; and H. Res. 324–327 were introduced.

Additional Cosponsors:

Reports Filed: Reports were filed today as follows:

H.R. 394, to direct the Secretary of the Interior to conduct a boundary study to evaluate the significance of the Colonel James Barrett Farm in the Commonwealth of Massachusetts and the suitability and feasibility of its inclusion in the National Park System as part of the Minute Man National Historical Park, amended (H. Rept. 109–135);

H.R. 2123, to reauthorize the Head Start Act to improve the school readiness of disadvantaged children, amended (H. Rept. 109–136);

H.R. 1412, to amend the Ports and Waterways Safety Act to require notification of the Coast Guard regarding obstructions to navigation, amended (H. Rept. 109–137); and

H.R. 280, to facilitate the provision of assistance by the Department of Housing and Urban Development for the cleanup and economic redevelopment of brownfields (H. Rept. 109–138).

Department of Defense Appropriations Act for FY 2006—Rule for Consideration: H. Res. 315, the rule providing for consideration of H.R. 2863, making appropriations for the Department of Defense for the fiscal year ending September 30, 2006, was agreed to by voice vote, after agreeing to order the previous question by a yea-and-nay vote of 223 yeas to 220 nays, Roll No. 269.

Science, State, Justice, and Commerce, and Related Agencies Appropriations Act for FY 2006: The House passed H.R. 2862, making appropriations for Science, the Departments of State, Justice, and Commerce, and related agencies for the fiscal year ending September 30, 2006, by a yea-and-nay vote of 418 yeas to 7 nays, Roll No. 268. The bill was also considered on June 14 and June 15.

Agreed on June 14, to limit further amendments made in order for debate and the time limit for debate on such amendments.

Agreed to:

Markey amendment that prohibits the use of funds in contravention of laws enacted or regulations promulgated to implement the UN Contravention
Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (by a recorded vote of 415 ayes to 8 noes and 1 voting present, Roll No. 261); and

King of Iowa amendment (no. 28 printed in the Congressional Record of June 14) that provides funding for enforcement of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (debated yesterday, June 15 and agreed to by voice vote, a separate vote was requested today and the amendment was agreed to by a recorded vote of 218 ayes to 208 noes, Roll No. 267).

Rejected:

Paul amendment (no. 11 printed in the Congressional Record of June 13) that sought to prohibit the use of funds to pay any U.S. contribution to the U.N. or any affiliated agency of the U.N. (by a recorded vote of 65 ayes to 357 noes, Roll No. 259);

Hefley amendment (no. 4 printed in the Congressional Record of June 13) that sought to reduce overall funding in the bill by 1% (by a recorded vote of 91 ayes to 336 noes, Roll No. 260);

Tancredo amendment (no. 19 printed in the Congressional Record of June 13) that sought to prohibit the use of funds for the State Criminal Alien Assistance Program in contravention of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (by a recorded vote of 204 ayes to 222 noes, Roll No. 262);

Tancredo amendment (no. 18 printed in the Congressional Record of June 13) that sought to prohibit the use of funds to include in any bilateral or multilateral trade agreement any provision that would increase any limitation on the number of aliens authorized to enter the U.S. as a non-immigrant, or as an alien lawfully admitted for permanent residence, or to adjust such status (by a recorded vote of 106 ayes to 322 noes, Roll No. 263);

Jackson-Lee amendment that sought to prohibit funding under Office of Justice Programs—Justice Assistance, for a State Authorizing Agent that has not shared its improvements of criminal justice records with the Attorney General (by a recorded vote of 183 ayes to 244 noes, Roll No. 264);

Moran of Virginia amendment that sought to prohibit the use of funds to pay administrative expenses or compensate an officer or employee of the U.S. in connection with licensing the export of any centerfire .50 caliber rifle to any nongovernmental entity (by a recorded vote of 149 ayes to 278 noes, Roll No. 265); and

Maloney amendment (no. 6 printed in the Congressional Record of June 13) that sought to prohibit the use of funds to enforce any provision of law that prohibits or restricts funding for the United Nations Population Fund (by a recorded vote of 192 ayes to 233 noes, Roll No. 266).

Withdrawn:

Cleaver amendment (no. 2 printed in the Congressional Record of June 13) that was offered and subsequently withdrawn that sought to prohibit the use of funds to process or approve a competition under OMB regulations for services provided by the National Logistics Support Center of the NOAA in Kansas City, Missouri.

H. Res. 314, the rule providing for consideration of the bill was agreed to on June 14.

Agreed to:

Garrett of New Jersey amendment (no. 2 printed in subpart A of part 1 of H. Rept. 109–132) that requires the Comptroller General to submit a report to Congress describing the costs associated with the contracting for and construction of the Geneva, Switzerland, buildings of the World Meteorological Organization and the World Intellectual Property Organization;

Cannon amendment (no. 3 printed in subpart A of part 1 of H. Rept. 109–132) that adds whether the U.N. or any of its specialized agencies have contracted with parties on the U.S. Government’s Excluded Parties List to the report to Congress on the state of the U.N. reforms since 1990;

Mc Cotter amendment (no. 4 printed in subpart A of part 1 of H. Rept. 109–132) that provides that no employee of the U.N. shall be compensated while participating in a domestic election except for voting and acting on behalf of the U.N. in an authorized U.N. mission; makes other provisions regarding employees convicted of crimes involving financial misfeasance, malfeasance, fraud or perjury; and provides that any employee who has contact regarding the internal ongoing operations of the U.N. with any person not employed by the U.N. shall prepare a memorandum of such contact;

Boozman amendment (no. 1 printed in subpart B of part 1 of H. Rept. 109–132) that adds the lifting of restrictions on the secondment of military personnel to serve at the Department of Peacekeeping Operations headquarters in New York to the list of reforms which the U.S. should pursue;
Kline amendment (no. 2 printed in subpart B of part 1 of H. Rept. 109–132) that requires that nothing in the title regarding peacekeeping operations shall be construed as superseding the Uniform Code of Military Justice or operating to affect the surrender of U.S. officials to a foreign country or international tribunal; Pages H4636–38

Smith of New Jersey amendment (no. 2 printed in subpart C of part 1 of H. Rept. 109–132) that calls for the International Atomic Energy Agency to rescind the Small Quantities Protocol; Pages H4639–40

Markey amendment (no. 3 printed in subpart C of part 1 of H. Rept. 109–132) that calls for the President to direct the U.S. Permanent Representative to the IAEA to call for penalties to any State Member that violates or withdraws from the Nonproliferation Treaty by requiring them to return any nuclear materials or technology acquired for peaceful purposes; Pages H4640–41

King of New York amendment (no. 1 printed in subpart A of part 1 of H. Rept. 109–132) that instructs the President to direct the U.S. Permanent Representative to the U.N. to use the voice, vote, and influence of the U.S. to ensure the Secretary General exercises the right and duty to waive immunities of any U.N. official who is under investigation for or is charged with committing a serious criminal offense (by a recorded vote of 405 ayes to 13 noes and 1 voting “present”, Roll No. 270); Pages H4630, H4641–42

Poe amendment (no. 5 printed in subpart A of part 1 of H. Rept. 109–132) that requires the OMB to submit a report to the House International Relations Committee on the U.S. contributions to the U.N. (by a recorded vote of 402 ayes to 14 noes, Roll No. 271); and Pages H4633–34, H4642–43

Cantor amendment (no. 1 printed in subpart C of part 1 of H. Rept. 109–132) that directs the U.S. Permanent Representative to IAEA to ensure that the IAEA Board of Governors adopts a resolution making Iran ineligible to receive any nuclear materials, technology, equipment, or assistance from any IAEA Members State until Iran is in full compliance with the IAEA (by a recorded vote of 411 ayes to 9 noes, Roll No. 272). Pages H4638–39, H4643

H. Res. 319, the rule providing for the consideration of the bill was agreed to by voice vote. Page H

Privileged Resolution: The House agreed to table H. Res. 324, relating to a question of the privileges of the House by a recorded vote of 222 ayes to 191 noes, Roll No. 273. Pages H4644–50
