## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ALLEN (for himself and Mr. SANTORUM):

S. 1396. A bill to amend the Investment Company Act of 1940 to provide incentives for small business investment, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

Mr. ALLEN. Mr. President, I am pleased to join with my distinguished colleague, Senator SANTORUM, in introducing the Increased Capital Access for Growing Businesses Act. The legislation would help many small businesses address the challenge of accessing capital as they look to grow, develop and create more jobs.

I would like to share with colleagues in the Senate why this legislation is necessary and desirable to update our securities laws for entrepreneurial small business owners. In 1980, Congress passed legislation, the Small Business Investment Incentive Act, which authorized business development companies, or BDCs, to provide financing to small, developing or financially troubled companies. Congress recognized the importance of small businesses to the U.S. economy and that such businesses may have a more difficult time obtaining needed capital to grow and develop.

BDCs are publicly traded companies that are required to have 70 percent of their assets invested in eligible assets, or eligible portfolio companies, which are generally to be securities of small developing or financially troubled businesses. In 1980, the definition of a small company for the purposes of a BDC's 70 percent of asset category was tied to the Federal Reserve's rules defining marginable securities. At the time, about two-thirds or 8,000 publicly traded companies were not marginable and were therefore eligible investments for BDCs.

However, there was an unintended consequence of tying the definition of small company to those issuers that do not have marginable securities—the margin rules have been changed several times, which significantly reduced the number of public companies in which BDCs could invest. This was obviously

not the original intent of Congress, but the practical impact was that many small, public companies became ineligible to receive BDC financing, even if they could not receive more traditional sources of financing.

Recently, the disqualification of any private company that had issued any debt security has significantly narrowed even further the number of companies that qualify as eligible portfolio companies. Thus, for the first time many companies with no access to the public equity markets cannot access capital through a BDC. These companies are either denied capital access altogether, or are forced to turn to various unregulated sources to meet capital needs. This situation is unfair to the shareholders of BDCs, and unfair to the shareholders of businesses that could grow if only offered capital access opportunities.

That is why this legislation is so important. It will allow more small private and public companies to receive BDC financing and restore the original intent of Congress.

Specifically, the legislation would use a market capitalization standard of \$250 million or less to define what is an eligible portfolio company for BDCs. The \$250 million market capitalization level approximates the number of public companies that Congress originally intended to qualify as eligible BDC assets. I would note that it is also much lower than the market capitalization levels of small cap indexes, such as the S&P SmallCap 600, which uses a market cap of \$300 million to \$1 billion for a definition of a small company.

This legislation adds no costs or risks to the government or taxpayers. It will simply correct the unintended consequences of current rules and update the securities laws to allow more small businesses to access capital. This will in turn encourage small business growth, job creation and economic expansion.

That is why, earlier this year the House of Representatives unanimously passed similar legislation to modernize U.S. securities laws and allow more small businesses to be eligible for such financing.

I urge my colleagues in the Senate to join me in supporting this common-sense legislation for small businesses in America.

By Mr. LIEBERMAN (for himself, Mrs. CLINTON, Mr. NELSON of Florida, Mr. REED, and Mr. SALAZAR):

S. 1397. A bill to amend title 10, United States Code, to provide for an increase in the minimum end-strength level for active duty personnel for the United States Army, and for other purposes; to the Committee on Armed Services.

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1397

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

**SECTION 1. SHORT TITLE.**

This Act may be cited as the "United States Army Relief Act of 2005".

**SEC. 2. FINDINGS.**

Congress makes the following findings:

(1) The 2004 National Military Strategy of the United States assigns the Army the task of operating with the other Armed Forces to provide for homeland defense, deter aggression forward from and in four different regions around the world, conduct military operations in two overlapping but geographically disparate major campaigns, and win decisively in one of those campaigns before shifting focus to the next one.

(2) The Chairman of the Joint Chiefs of Staff, General Richard Myers, has directed that the Army must be able to "win decisively" in one theater, even when it is committed to a number of other contingencies.

(3) While Congress lauds the current efforts by the Administration to reduce demands upon ground forces by continuing to pursue the transformation of the United States military as a whole, the recent experiences of the Army in Iraq serve to underscore the fact that there is, as of yet, no substitute for having sufficient troops to conduct personnel-intensive post-conflict missions.

(4) The current force requirements posed by the ongoing operations in Iraq, Afghanistan, and elsewhere as part of the Global War on Terror are unsustainable for the long term and undermine the ability of the United States military to successfully execute the National Military Strategy.

(5) Although the burden may be a heavy one, we as a nation and as a people must not, will not, shy away from our engagement in world affairs to defend our interests and to defend those who are themselves defenseless.

(6) Our engagement in Afghanistan, Iraq, and the greater Middle East is, as Secretary of State Condoleezza Rice stated, a "generational" one.

(7) Although our commitments in this region—and around the world—are vital, the Army has been "overused" according to the Chief of the United States Army Reserve.

(8) The Army currently has approximately 499,000 active duty troops, and these are backed up by nearly 700,000 members of the Army National Guard and the Army Reserve.

(9) This number is a third less than the force level on hand when the first Persian Gulf War was fought in 1991.

(10) Approximately 150,000 of these troops are in Iraq. Nearly 10,000 troops are in Afghanistan. 1,700 serve in Kosovo. 37,000 serve on the Korean peninsula.

(11) As of 2005 the relationship between the total number of troops and the number of operationally deployed troops has resulted, as the commanding general of the 18th Corps of the Army at Fort Bragg remarked in 2004, in an active-duty force that is "stretched extraordinarily thin."

(12) A former Army Deputy Chief of Staff has stated that in light of the growing operational demands upon it in the strategic environment after September 11, 2001, that the Army "is too small to do its current missions".

(13) That former Army Deputy Chief of Staff further stated that the current size of the Army, coupled with the current demands upon it, has resulted in a loss of "the resiliency to provide either strategic balance—what you need if some other thing flares up—or to be able to give a respite as the troops rotate back from overseas areas where they've been in combat."

(14) In its attempts to fulfill its missions with too few troops, the Army has risked

"damaging" the force significantly or "even breaking it in the next five years", according to a division commander during Operation Desert Storm.

(15) In a December 2004 letter to the Chief of Staff, United States Army, the Chief of the United States Army Reserve wrote that "the current demands" of operations in the Middle East were "spreading the Reserve force too thin" and that his command "was in grave danger" of being unable to meet other missions abroad or domestically, and that the Army Reserve was "rapidly degenerating into a 'broken force'".

(16) The letter referred to in paragraph (15) was intended, the Chief of the United States Army Reserve wrote, not "to sound alarmist . . . [but] . . . to send a clear, distinctive, signal of deepening concern" to his superiors.

(17) In addition to hampering the ability of the Army to successfully complete the missions assigned to it, this "overuse" has significant consequences for domestic homeland security operations.

(18) A disproportionate number of Federal, State, and local first responders are also members of the National Guard or Reserve.

(19) At a time of strain for large municipalities struggling to secure their infrastructure against the threat of terrorism, the drain on available personnel as well as budgets is unacceptable.

(20) An increase of the end-strength of the Army is in the best interests of the people of the United States and their interests abroad, and is consistent with the duties and obligations of Congress as set forth in the Constitution.

(21) An increase of 100,000 troops over the permanently authorized level for the Army for fiscal year 2004 of 482,000 troops will provide a long-term, lasting solution to the current operational constraints and future mission requirements of the Army.

(22) Progress was made toward that solution when Congress authorized an increase of 20,000 troops in the end-strength of the Army for fiscal year 2005 in the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375).

(23) An increase in the permanent authorized end-strength for the Army of 80,000 troops is required to meet the 100,000-troop increase level that will provide a lasting, long-term solution to personnel problems currently being experienced by the Army.

(24) This number will equip the Army with sufficient personnel so that it may not only engage in a stabilization operation like Iraq, but so that it may do so while maintaining optimal troop rotation schedules.

(25) This conclusion is supported by the November 2003 testimony of the Director of the Congressional Budget Office, Douglas Holtz-Eakin, before the Committee on Armed Services of the House of Representatives.

**SEC. 3. INCREASE IN END-STRENGTH FOR THE ARMY.**

Section 691 of title 10, United States Code, is amended by adding at the end the following new subsection:

"(e) Notwithstanding subsection (b)(1), the authorization for the number of members of the Army at the end of each fiscal year as follows shall be not less than the number specified for such fiscal year:

"(1) Fiscal year 2006, 522,400.

"(2) Fiscal year 2007, 542,400.

"(3) Fiscal year 2008, 562,400.

"(4) Fiscal year 2009, 582,400.

"(5) Any fiscal year after fiscal year 2009, 582,400."

By Mr. FEINGOLD:

S. 1398. A bill to provide more rigorous requirements with respect to

ethics and lobbying; to the Committee on Homeland Security and Government Affairs.

**TITLE I—ENHANCING LOBBYING DISCLOSURE**

Section 101: Requires lobbying disclosure reports to be filed quarterly rather than semiannually and adjusts monetary thresholds accordingly.

Section 102: Requires lobbying disclosure reports to be filed in electronic form.

Section 103: Directs the Secretary of the Senate and the Clerk of the House of Representatives to create a searchable, sortable, and downloadable public database that contains the information disclosed in lobbying disclosure reports.

Section 104: Requires registered lobbyists to provide, in the section of their quarterly reports in which the issues or bills on which they lobbied are listed, the names of all senior executive branch officials and Members of Congress who they communicated with orally and the dates on which such communications occurred.

Section 105: Mandates that registered lobbyists must disclose all past executive and congressional employment, not just such employment during the two years prior to making a lobbying contact.

Section 106: Requires lobbyists to disclose in their quarterly reports how much they spent on grassroots lobbying efforts.

Section 107: Provides more transparency for lobbying coalitions, by requiring such organizations to disclose those individuals or entities whose total contribution to the association in connection with lobbying activities exceeds \$10,000. Certain tax-exempt associations are not covered by this new requirement.

Section 108: Doubles the penalty for failing to comply with lobbying disclosure requirements from \$50,000 to \$100,000.

**TITLE II—SLOWING THE REVOLVING DOOR**

Section 201: Amends 18 U.S.C. §207, the section of the criminal code that provides restrictions on lobbying by former executive and legislative branch employees, to establish the following restrictions:

1. Senior executive employees, those paid at 86.5 percent of level II of the Executive Schedule are prohibited from making communications or appearances with the intent to influence any employee of their former agencies for two years. The current "cooling off period" is one year.

2. Very senior executive employees, the Vice President and those paid at level I of the Executive Schedule, such as cabinet officers and heads of agencies, are prohibited from engaging in "lobbying activities," as defined in section 3, subsection 7 of the Lobbying Disclosure Act of 1995, for a two-year period; with respect to their former agency or to any employee currently paid under the Executive Schedule. Under the LDA, lobbying activities include not only direct lobbying contacts, but activities such as providing advice, strategy, or preparation in connection with such contacts.

3. Members of Congress are prohibited from engaging in lobbying activities relating to either House of Congress for two years. This will prevent a former member from directing or managing a lobbying campaign while avoiding personal lobbying contacts.

4. Senior congressional staff, those making 75 percent of a Member's salary, are prohibited from making appearances or communications with the intent to influence any employee of the House of Congress that formerly employed them for two years. Current law prohibits contacts with the former employing office or committee for only one year.

Section 202: Requires the establishment of uniform regulations regarding the standards

by which waivers on seeking employment by executive branch officials are granted and requires the Executive branch to publish waivers that have been granted within three business days.

Section 203: Requires Members to publicly disclose within three days any negotiations with prospective employers in which a conflict of interest or the appearance of a conflict of interest exists.

Section 204: Establishes stiffer penalties for an employee of either House of Congress who uses his or her official capacity to influence an employment decision or practice of any private or public entity, except for the Congress itself.

Section 205: Reaffirms that any employee of either House may not take official action on the basis of a prospect for personal gain.

Section 206: Eliminates any benefits or privileges generally granted by the House or Senate to former Members, such as gym membership or floor privileges, for those former Members who are registered lobbyists.

#### TITLE III—CURBING EXCESSES IN PRIVATELY FUNDED TRAVEL AND LOBBYIST GIFTS

Section 301: Amends the ethics rules to require all congressional employees to obtain a certification from any party that pays for transportation or lodging permitted by the gift rules that the trip was not planned, organized, arranged, or financed by a registered lobbyist and that no registered lobbyists will participate in or attend the trip.

Section 302: Amends the gift rule to require Senators and staff to publicly disclose information on any flight on a corporate jet and requires Senators to reimburse the owner of a corporate jet at the charter rate, instead of first class airfare as is currently permitted. Also requires campaigns to pay for the use of corporate jets at the charter rate. Current FEC regulations allow campaigns to pay first class airfare if the flight is between cities where commercial service is available.

Section 303: Establishes maximum civil fines of \$100,000, \$300,000, and \$500,000 for the first, second, and third false travel certifications, respectively.

Section 304: Amends the ethics rules to require Members to provide more detailed descriptions of all meetings, tours, events, and outings during travel paid for by private entities under the gift rules.

Section 305: Directs House and Senate Ethics Committees to develop and revise guidelines on what constitute "reasonable expenses" or "reasonable expenditures" during privately funded travel.

Section 306: Prohibits registered lobbyists from giving gifts to Members of Congress or congressional employees. Exceptions are provided for gifts from relatives and personal friends, campaign contributions, informational materials, and items of nominal value.

Section 307: Amends the House and Senate ethics rules to prohibit Members from accepting gifts from registered lobbyists not permitted by Section 306.

#### TITLE IV—OVERSIGHT OF ETHICS AND LOBBYING

Section 401: Requires the Comptroller General to review the effectiveness of lobbying oversight and to issue semiannual reports on the topic.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

(1) improve the compliance by lobbyists with the requirements of that Act; and

(2) provide the Clerk and the Secretary with the resources and authorities needed for effective oversight and enforcement of that Act.

Mr FEINGOLD. Mr. President, today I will introduce the Lobbying and Ethics Reform Act of 2005. This bill builds on similar legislation that was introduced in the House by Representatives MARTY MEEHAN and RAHM EMMANUEL.

I have long believed that to truly serve our constituents well, we must reduce the impact of big money on the legislative process. I have devoted a great deal of time over the years to reforming our campaign finance laws. With the enactment of the Bipartisan Campaign Reform Act in 2002, we took several important, and I believe successful, steps to reduce the influence of special interests and return some measure of power to the American people.

But campaign contributions are only part of the story. In fact, during recent election cycles, the amount spent on lobbying members of Congress once they are elected has been more than double the amount spent on getting them elected in the first place. Yet lobbyists and the lobbying industry remain partly in the shadows, even after the significant improvements to the disclosure laws enacted in 1995. Ten years later, the weaknesses of that law have become apparent, as have the weaknesses in the congressional gift rules that we passed around the same time. Recent scandals involving lobbyists have made very clear that if this body is to be responsive to the people, not just a narrow set of special interests, we must strengthen the disclosure rules governing the lobbying industry and close loopholes in the gift rules.

The lobbying industry continues to grow at a startling rate. According to the Center for Public Integrity, over

three billion dollars were spent on lobbying in 2004, nearly double the amount spent just six years earlier. This dramatic increase in lobbying expenditures has led to an equally dramatic growth in the number of registered lobbyists. A story in the Washington Post from June of this year reports that there are currently more than 34,750 registered lobbyists, which represents a 100% increase from 2000. Not surprisingly, a few powerful industries account for much of this growth. In the last six years, the pharmaceutical industry alone has spent over three quarters of a billion dollars on lobbying, enough to finance over 3,000 professional lobbyists. The insurance industry is not far behind. During this same period, insurance companies spent over 600 million dollars and employed over 2,000 lobbyists.

Despite the growing presence of lobbyists on Capitol Hill, and despite the improvements made in the 1995 law, regulation of the lobbying industry remains inadequate. The Senate office in charge of overseeing lobbying disclosure reports employs fewer than 20 people, and the equivalent House office employs fewer than 35. Compare these numbers to the Federal Election Commission, which many people believe is itself understaffed, but which has a staff of nearly 400 to oversee and enforce campaign finance laws.

Given these numbers, it should not come as a shock that oversight of the booming lobbying industry is not what we would like it to be. In the past six years alone, over 300 individuals and companies lobbied without registering first. One in five lobbying companies failed to file required disclosure forms. And the Center for Public Integrity reports that over 14,000 disclosure documents that should have been filed are not available, including documents relating to 49 of the top 50 lobbying firms.

When the disclosure requirements are not enforced, it can only be expected that they and other rules relating to lobbying will not be followed. In the last six months, we have seen a number of stories in the press detailing the increasingly cozy relationship between lobbyists and certain members of Congress. We have seen stories of lobbyists funding international junkets for members, their families, and their staff, which include days on famous golf courses and nights in luxurious resorts. We have seen stories of members and their staff accepting lavish gifts and expensive meals from lobbyists. And we have seen stories of lobbyists providing members with free access to their companies' or clients' corporate jets so that they can fly in comfort from fundraiser to fundraiser.

But the enticements offered by lobbyists are not all quite so exotic indeed, many lobbyists merely offer plum positions in their K Street offices. According to a 2005 report, more than 2200 former federal government employees were registered as federal lobbyists be-

tween 1998 and 2004. Of those, more than 200 were former members of Congress. In fact, Public Citizen reports that nearly half of all members returning to the private sector accept positions in the lobbying industry. For congressional employees, the prospect of receiving lobbying positions, which often pay several times more than their current jobs, can easily create conflicts of interest and may affect the decisions they make in their official capacity.

The problems with oversight of the lobbying industry are systemic and they are troubling. Even the minimal disclosure requirements of the Lobbying Disclosure Act are often ignored because lobbyists know they will not be penalized. The revolving door between the Hill and K Street spins faster than ever. And flaws in the gift rules are allowing handouts from lobbyists to rapidly increase the influence of special interests at the expense of the average citizen. I am told that it is not uncommon for lobbyists to perch themselves at the end of a bar and buy drinks for any congressional staffer who comes by. This is permissible under the Senate's current gift rules, and it shouldn't be. Lobbyists complain about pressure—if not outright blatant requests—from Members and congressional staff to pay for their food and drinks. Clearly, there is plenty of blame to go around.

My bill addresses these concerns in four ways. First, my bill makes the lobbying process more transparent by enhancing the specificity, frequency, and accessibility of lobbying disclosure reports. The bill would require these periodic reports filed by lobbyists to identify the members of Congress with whom they met, divulge all past senior-level legislative or executive branch employment, and separate out and report the amount of money spent on grassroots lobbying efforts. Lobbyists would have to file these reports on a quarterly, rather than a semiannual, basis. And the bill would require the Secretary of the Senate and the Clerk of the House to make these reports available in a searchable database that would allow the public to gather information on lobbyists quickly and efficiently. The bill also requires the disclosure of entities that contribute large sums of money to lobbying coalitions. And it doubles the civil penalty for knowingly failing to file lobbying reports or filing false information.

Second, this bill should slow the revolving door between Congress and the lobbying industry. It establishes a two-year waiting period for members, senior staff, and senior executive personnel to participate in lobbying. During this cooling-off period, members and senior executive personnel would be prohibited from engaging in all lobbying activities, including developing strategy for or directing a lobbying campaign. Staff would be forbidden from making direct contact with any members or staff who work in the

House of Congress that used to employ them, rather than just the former employing office, as the law now requires.

The revolving door provisions in my bill would also require members of Congress to publicly disclose their intent to seek outside employment if a conflict of interest exists. They prohibit members of Congress from taking official actions to influence the employment decisions of outside entities on the basis of partisan affiliation. And they affirm that no member should take official action based on the prospect for personal gain. The bill also prohibits registered lobbyists from taking advantage of special advantages such as gym membership, floor privileges, or access to certain areas of the Capitol that are offered to former Members of Congress.

Third, my bill addresses the growing problem of privately funded travel and lobbyist gifts. Before sponsoring a trip for a member or staff, an organization must certify that the trip was not financed or organized by a registered lobbyist and that lobbyists will not participate in or attend the trip. After returning from the trip, the Member or staff must provide a detailed itinerary and description of expenses. My bill also creates a complete ban on lobbyists providing gifts to members and staff and on members accepting gifts from registered lobbyists. Those who file false certifications or fail to observe these rules will be subject to stiff penalties.

Finally, the bill seeks to strengthen oversight of lobbying disclosure. A GAO report showing the old lobbying law passed in the 1940s was largely ignored and rarely enforced was an important impetus to passing the Lobbying Disclosure Act in 1995. The bill requires the Comptroller General to report to Congress twice annually on the state of the enforcement of the rules. These reports will help us determine if further improvements in the laws are necessary.

These measures are not crafted as a knee-jerk response to the recent spate of troubling revelations about the relationships between certain members of Congress and the lobbying industry. Instead, this bill addresses systemic problems with the rules governing lobbyists. It has been a decade since the Lobbying Disclosure Act and new gift rules were passed and we now know that some of these rules are no longer sufficient to regulate a growing and evolving lobbying industry. It is now time for us to act again. I urge my colleagues to support this bill.

I ask unanimous consent that the text of the bill and a section by section analysis be printed in the RECORD.

By Mr. CHAFEE (for himself,  
Mrs. CLINTON, Mr. INHOFE, and  
Mr. JEFFORDS):

S. 1400. A bill to amend the Federal Water Pollution Control Act and the Safe Drinking Water Act to improve water and wastewater infrastructure in

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Mr. GREGG. Mr. President, sustained military operations in Afghanistan and Iraq have brought to light another example of how outdated and burdensome government policies can punish generous employers. Employers that continue to pay their employees now on active duty in the uniformed services are experiencing tax and pension difficulties that are discouraging this pro-worker, patriotic gesture. Apparently, when it comes to companies showing their respect for their employees called to serve, there is special meaning to the old cliché “no good deed goes unpunished.”

The National Committee for Employer Support for the Guard and Reserve, a nationwide association, reports that thousands of employers across the

country have signed a pledge of support and have gone above and beyond the requirements of the law in support of their National Guard and Reserve employees. This includes many of our Nation's largest and most reputable corporations, including 3M, McDonalds, Wal-Mart, Home Depot, Liberty Mutual and many others. These commendable companies provide reservist employees who are on active duty with “differential pay” that makes up the difference between their military stipend and civilian salary.

In New Hampshire, some of the most remarkable stories of corporate patriotism can be found. BAE Systems of Nashua has 110 people serving in the Guard and Reserves, 11 of whom are currently deployed overseas. They provide differential pay to all their called-up employees and continuing access to benefits to family members. The company even provides a stipend to make up the lost pay of active duty spouses of company employees when the spouse's employer is not able to provide differential pay.

Consider also the account of Mr. Marian Noronha, Chairman and Founder of Turbocam, a manufacturer based in Dover, New Hampshire. An immigrant from India, Mr. Noronha has not only provided his employees with differential pay and continued family health benefits, but has also extended to each of his activated employees a \$10,000 line of credit. His active duty reservist and Guard employees have used this money to, among other things, purchase personal computers so their families can communicate with them while they are overseas. Several other New Hampshire private-sector companies, including Hitchiner Manufacturing Company in Milford, have exemplary records when it comes to dealing with reservist employees.

Under current law, employers of reservists and guardsmen called up for active duty are required to treat them as if they are on a leave of absence under the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA). The Act does not require employers to pay reservists who are on active duty. But as I have pointed out, many employers pay the reservists the difference between their military stipends and their regular salaries. Some employers provide this “differential pay” for up to three years. For employee convenience, many of these companies also allow deductions from the differential payment for contributions to their 401(k) retirement plans.

The conflict arises, however, because a 1969 IRS Revenue Ruling considers the employment relationship terminated when active duty begins. This ruling prevents employers from treating the differential pay as wages for income tax purposes, resulting in unexpected tax bills at the end of the year for these military personnel. Further, the contributions made to the worker's retirement account potentially invali-

date, disqualify, the employer's entire retirement plan which could make all amounts immediately taxable to plan participants and the employer.

The Uniformed Services Differential Pay Protection Act that I am introducing today clarifies that differential wage payments are to be treated as wages to current employees for income tax purposes and that retirement plan contributions are permissible. The bill does the following:

Differential wage payments would be treated as wages for income tax withholding purposes and reported on the worker's W-2 form. This means that active duty personnel will not be hit with end-of-the-year tax bills.

No New Taxes: The legislation does not change present law, and deferral wage payments will not be subject to Social Security and unemployment compensation taxes.

Definition: “Differential wage payments” are defined to mean any payment which: 1. is made by an employer to an individual while he or she is on active duty for a period of more than 30 days, and 2. represents all or a portion of the wages the individual would have received from the employer if he or she were performing service for the employer.

An individual receiving differential wage payments would continue to be treated as an employee for purposes of the rules applicable to qualified retirement plans, removing the threat that contributions on his or her behalf would invalidate the employer's entire plan.

Distributions Protected: Clarifying language is included to ensure that individuals would continue to be permitted to take distributions from their accounts when they leave their jobs for active duty. Thus, the right to receive distributions will be preserved even though individuals are treated as current employees for contribution purposes. The bill includes a prohibition on making elective deferrals or employee contributions for six months after receiving a distribution.

Satisfying Nondiscrimination Rules: In order to avoid disruptions in retirement savings plans and to remove disincentives, employers could disregard contributions to retirement savings accounts based on differential wage payments for nondiscrimination testing purposes, provided that such payments are available to all mobilized employees on reasonably equivalent terms.

In summary, the Uniformed Services Differential Pay Protection Act upholds the principle that employers should not be penalized for their generosity towards our Nation's reservists and members of the National Guard.

By Mr. WYDEN:

S. 1403. A bill to amend title XVIII of the Social Security Act to extend reasonable cost contracts under medicare; to the Committee on Finance.

Mr. WYDEN. Mr. President, when Congress passed the Medicare Modernization Act, Medicare cost contracts

were kept as a health plan option for seniors. However, Congress also limited the ability of cost contracts to operate in areas if a Medicare Advantage plan decided to offer service in that area and stayed for a year.

Medicare cost contracts are plans that offer more benefits than basic Medicare and are often available in areas in which Medicare Advantage plans are not offered. Many of the thousands of Oregonians who have cost contract plans are in rural Oregon, where there are few options for care. The legislation I am introducing today, "The Medicare Cost Contract Extension and Refinement Act of 2005", would allow seniors to keep their cost contracts longer even if a Medicare Advantage plan is offered. The bill also adds more consumer protection provisions that are similar to those already in law for Medicare Advantage plans. I believe that it is not only important to ensure seniors have choices, but that they can keep the choice that works best for them as well. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1404. A bill to clarify that terminal development grants remain in effect under certain conditions; to the Committee on Commerce, Science, and Transportation.

Mr. BOND. Mr. President, I rise today to introduce legislation that will allow for the continued expansion of non-primary hub airports across the country.

The simple fact of the matter is that demand for commercial air service in and out of many of these smaller non-primary hub airports is far exceeding the current operational capacity at these airports. Expanded airfield and terminal capacity at these airports are desperately needed to meet the growing demand for air service in these high growth communities.

The Springfield/Branson Metropolitan Area in Southwest Missouri is a classic example of one of these high growth communities where demand for air service is exceeding the current operational capacity of area's primary regional airport.

The city of Springfield is the economic hub for 26 Missouri Counties with a population of approximately 1 million people. Over the last 10 years, the population of the Springfield area has increased by more than twice the annual growth rate experienced by the State of Missouri.

The Springfield metropolitan workforce has grown by more than 27 percent the past 10 years, and is projected to grow by 18 percent over the next ten years. Annual regional tourism accounts for over 2.2 million visitors in Springfield and over 7 million annual visitors to the booming Branson area.

Because of the tremendous growth in this region, demand for an air service in and out of the Springfield/Branson Regional Airport is soaring. The current airport is experiencing great difficulty in trying to keep up with the growing demand for air service in this region. The capacity at the current airport is virtually at its maximum.

The FAA has already approved the Springfield Regional Airport Master Plan and completed an environmental assessment for this plan. So far, the FAA has invested over \$7 million in the planning and design for this project. Further funding for this project will be needed to fund the expansion of air-side apron, runways, taxiways and limited eligible components of the terminal.

In order to ensure that this essential project goes forward and that previous Federal tax dollars are not wasted, I am introducing legislation that will clarify the status of the Springfield Regional Airport as a non-hub primary airport.

This legislation states that if the status of a non-hub primary airport changes to a small hub primary airport at a time when the airport has already received FAA discretionary funds for a terminal development project—and this project is not yet completed—then the project shall remain eligible for funding from the discretionary fund and the small airport fund to pay costs allowable under section 47110(d) of Title 49. Such an airport project will remain eligible for these funds for three fiscal years after the start of construction of the project, or, if the Secretary determines that a further extension of eligibility is justified, until the project is completed.

This legislation will ensure that the ongoing expansion projects of smaller airports across the country will continue in order to accommodate the growing demand for additional airfield and terminal capacity at these airports.

By Mr. NELSON of Nebraska (for himself, Mr. SANTORUM, and Mr. CORZINE):

S. 1405. A bill to extend the 50 percent compliance threshold used to determine whether a hospital or unit of a hospital is an inpatient rehabilitation facility and to establish the National Advisory Council on Medical Rehabilitation; to the Committee on Finance.

Mr. NELSON of Nebraska. Mr. President, today I am introducing the "Preserving Patient Access to Inpatient Rehabilitation Hospitals Act of 2005" to make changes to a rule issued by the Centers for Medicare and Medicaid Services, (CMS) that would threaten the ability of rehabilitation hospitals to continue to provide critical care.

In my home State of Nebraska, Madonna Rehabilitation Hospital in Lincoln is a nationally-recognized premier rehabilitation facility that offers specialized programs and services for those who have suffered brain injuries, strokes, spinal cord injuries, and other rehabilitating injuries. If this rule is not updated, Madonna would not be able to offer the same critical care to its patients as it currently does.

When CMS first looked at whether facilities would qualify as an inpatient rehabilitation facility (IRF), a list of criteria was created to determine eligibility. The criteria, generally referred to as the "75 Percent Rule," were first established in 1984. Initially ten categories were given. When the Rule was revised last year, three categories were added. To qualify as an IRF under the 75 Percent Rule, 75 percent of a facility's patients must be receiving treatment in one of these specified conditions.

On its face, it appeared that CMS expanded the Rule last year by increasing the number of conditions from 10 to 13 and giving facilities a phase-in period to adjust to the changes. Initially the threshold for compliance was set at 50 percent for the first year and continues to rise until it reaches 75 percent in July 2007.

Facilities are struggling to even meet the 50 percent compliance rate in part because the expansion of categories is illusory. The rule will, by CMS' own estimate, shift thousands of patients—both Medicare and non-Medicare—into alternative care settings that may be inappropriate. CMS projected a patient loss of 1,170 admissions in FY 2005. A recent Moran Company report showed that in the first year alone, hospitals have been forced to deny care to between 25,000–40,000 patients to maintain compliance with the new 75 Percent Rule. By the fourth year of the Rule, IRFs will be forced to turn away one out of every three patients in order to operate as a rehabilitation hospital or unit.

My legislation will ensure that patients across America will continue to have access to the rehabilitative care they need, and that experts in this community are organized to advise and make recommendations to Congress and the appropriate Federal agencies based on the realities and challenges facing the rehabilitative field today and in the future. The legislation provides an additional two years at the 50 percent threshold to give facilities additional time to adjust to the new categories and sets up a commission to advise Federal agencies on rehabilitative care and what categories are appropriate to be included in the 75 Percent Rule.

I am pleased that many prestigious organizations have joined me in supporting the legislation. The American Hospital Association, the American Academy of Physical Medicine and Rehabilitation, the Federation of American Hospitals, the American Medical

Rehabilitation Providers Association and numerous other associations and advocacy groups have endorsed the legislation. Just as I have heard from patients and medical providers who have experienced problems with this Rule, the members of these associations are also witnessing the devastating effect the Rule is having on those who need this critical care. In addition, Senator SANTORUM is co-sponsoring this bipartisan effort.

I urge my colleagues to support this legislation, and I look forward to its passage.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

By Mr. CORNYN:

S. 1406. A bill to protect American workers and responders by ensuring the continued commercial availability of respirators and to establish rules governing product liability actions against manufacturers and sellers of respirators; to the Committee on the Judiciary.

Mr. CORNYN. Mr. President, I rise today to introduce the "Respirator Access Assurance Act of 2005." This legislation is not a complex or lengthy proposal, but it is critically important for our men and women in uniform, our first responders, and the American public as we continue to wage the war on terror. It is designed to protect the companies that manufacture respirators from abusive litigation—the very respirators that we need for protection against life-threatening environmental hazards and contaminants.

Even as we continue today to debate important appropriations legislation for the Department of Homeland Security, the many American manufacturers and sellers of one of the types of equipment necessary in the war on terror and for our first responders generally—respirators—are being forced by misdirected litigation to decide whether to abandon that market.

Since the year 2000, American respirator manufacturers have experienced an avalanche of mass lawsuits in which thousands of plaintiffs claim they suffered lung damage from respirators because of defective designs and/or failure to provide adequate warnings. Between 2000 and 2004, well over 300,000 individual claims have been

filed against major respirator manufacturers. Many of these people show no symptoms of illness.

Respirator manufacturers are included among dozens of defendants in these lawsuits, despite some very important facts. First, respirators don't cause lung disease—employers are legally responsible for providing the right respirator to an employee for the environment in which the employee will be working. Respirator manufacturers have no role in that decision. Second, respirators are 100 percent regulated by the U.S. Government. The National Institute for Occupational Safety and Health, or NIOSH, sets the design standards for respirators, tests every product in its own labs, approves all warning labels, and monitors the manufacturing process to be sure respirators meet the standards for which they were designed.

Perhaps most troubling is the extent to which these claims track very closely with the recent explosion of asbestos and silicosis claims. Recently, a number of ethical questions surrounding many of these claims have come to light.

In my home State of Texas, a Federal court in Corpus Christi under the watch of Judge Janis Graham Jack, has been trying to sort out a few thousand of these cases. That Multi-District Litigation has turned up evidence of fraud—in Judge Jack's words—"great red flags of fraud," and highlights attempts by some to recycle plaintiffs who have already recovered in asbestos litigation by claiming they also have silicosis, which is a virtual medical impossibility.

Just today, the Wall Street Journal ran an editorial highlighting this "tort scam." As it points out, "Judge Jack not only blasted nearly everyone of the 10,000 silicosis claims in front of her court, she documented the fraudulent means by which lawyers, doctors, and screening companies had manufactured the claims." She said, "These diagnoses were about litigation rather than health care . . . these diagnoses were manufactured for money."

I ask unanimous consent that the Wall Street Journal editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, July 14, 2005]

THE SILICOSIS SHERIFF

If the criminal investigation of class-action titan Milberg Weiss is anything to go by, prosecutors may finally be starting to hold the trial bar accountable for its legal abuses. Another good sign is that a separate federal grand jury, this one in New York, is investigating the ringleaders of the latest tort scam, silicosis.

Much of the credit for pointing the grand jury toward this corruption goes to Texas federal Judge Janis Graham Jack, who last month put the brakes on the silicosis machine with an extraordinary 249-page decision. Judge Jack not only blasted nearly every one of the 10,000 silicosis claims in front of her court, she documented the fraud-

ulent means by which lawyers, doctors and screening companies had manufactured the claims. "These diagnoses were about litigation rather than health care," wrote Judge Jack. "These diagnoses were manufactured for money."

Perfectly said, and we only wish the fearless judge had been around to render a similar verdict back when the asbestos blob got rolling. It was that juggernaut, largely blessed by the courts, that first allowed trial lawyers to co-opt doctors to create millions of phony claims and extort billions out of corporate defendants. Encouraged by this success, the trial bar revved up the same machinery for silicosis, an occupational lung disease that can be fatal but has been in decline for decades.

It was the fact of this decline that got Judge Jack's attention. A former nurse, she couldn't understand how a disease that causes on average fewer than 200 deaths annually in the U.S. had suddenly resulted in more than 20,000 claims from Mississippi and surrounding states. To get to the bottom of the suits against some 250 companies, the Clinton appointee held 20 months of pretrial proceedings. What she found was a gigantic attempted swindle.

Her first discovery was that, of the more than 9,000 plaintiffs who supplied more information about their "disease," 99% had been diagnosed with silicosis by the same nine doctors. These physicians had been retained by law firms or by "screening companies" that do mass X-rays on behalf of law firms searching for plaintiffs. When these physicians were deposed, they all but admitted they took their orders from the lawyers and screening firms.

Which explains why none of them took a medical history, while others never even saw their patients. One doctor signed blank forms for the screening company and let his secretary fill out the diagnoses. Yet another performed 1,239 diagnostic evaluations in 72 hours—less than four minutes apiece. Dr. George Martindale, who diagnosed 3,617 patients with silicosis, admitted that he didn't even know the criteria for diagnosing the disease and had simply included in each of his reports a paragraph provided by the screening company.

Another shocker was that more than 65% of the silica plaintiffs had previously been plaintiffs in an asbestos suit, even though it is close to clinically impossible to have both asbestosis and silicosis. Digging deeper, the judge found that many of the same doctors had ginned up the same patients for both asbestos and silicosis cases. One doctor, Ray Harron, received nearly \$5 million from 1996-2004 from a leading screening company, N&M, and has supplied thousands of silicosis diagnoses, and at least 52,000 asbestos-related diagnoses.

Representatives from N&M admitted in court that they had no medical training and that their company has never had a medical director. They confirmed that law firms often set the criteria for the silicosis screening process, and that the screening companies were paid by the volume of people who ultimately joined a lawsuit. As N&M owner Heath Mason testified, his business depended on doing "large numbers."

Judge Jack reserved her most severe criticism for the lawyers, noting that statistics alone should have shown that their case defied "all medical knowledge and logic," and that by bringing it regardless they had exhibited a "reckless disregard of the duty owed to the court." She required the Houston firm of O'Quinn, Laminack & Pirtle to pay the defendants' \$825,000 in legal fees, and ordered sanctions. She also made clear she was on to the tort bar's tactics, noting that the "clear motivation" was "to inflate the

number of plaintiffs and overwhelm the defendants and the judicial system.”

Judge Jack did not shy away from the word “fraud” in her courtroom, and clearly someone at the Justice Department has been paying attention. A Manhattan grand jury is now investigating at least one of the screening companies, and subpoenas have gone out to at least two of the doctors involved.

Which shows how large a public service Judge Jack has performed. She could easily have followed other judges and accepted these mass claims at face value. Instead, she dug into the individual claims and found the corruption underneath. In doing so, she has not only stalled the entire silicosis scam, she’s opened the door to probing millions of asbestos claims that have come before. The lawyers could attempt to retry their dismissed claims in state court, though amid a grand jury probe they might prefer that this whole issue go away.

Over the years, too many judges have allowed tort lawyers to hijack their courtrooms to perpetrate legal fraud. Judge Jack is showing what good comes when judges truly care about justice.

This level of fraud must be brought to the attention of the American people. The extent to which this type of behavior is the norm rather than the exception is troubling, to say the least. And the breadth of this abuse extends so far now that it endangers the manufacturing of masks for the American people—and people through the world for that matter—who need to protect themselves from airborne contaminants. Thousands of lawsuits have been directed toward these manufacturers—largely indiscriminately.

Many of these cases might someday be dismissed or settled for a few hundred dollars to avoid protracted litigation, but the costs of getting to that point are enormous. Respirator companies have already incurred millions of dollars in litigation and settlement costs, and even after years of arguing in multiple State and local courts they still face hundreds of thousands of individual claims. The costs of this litigation burden are both unjustified and destructive.

Most of the net income these companies receive from respirator sales is being eaten up in litigation costs. Some respirator companies have already decided it is not worth it and have stopped selling in the commercial market, and others are contemplating the same thing. If U.S. manufacturers drop out of the market, those who need respirators will have to use imports, which may be of lower quality and less reliable, or use nothing at all. In either case we are letting this unfounded litigation burden pose additional risk to millions of Americans who need these devices to do their jobs and protect themselves, and all of us, from untold harm.

That is why I am introducing this legislation today. The Act provides respirator manufacturers with protection from the legal costs associated with defending claims for which the manufacturers should bear no liability. It provides that a respirator manufacturer may not be subject to any claim for defective design or warning relating to a

respirator or any claim based on such an allegation if the respirator has received NIOSH approval, and the respirator complied with the NIOSH-approved design and labeling in effect on the date of manufacture. This protection would continue notwithstanding a subsequent action by NIOSH to modify, supercede, or withdraw the approval. In addition, we have taken extra measures to clarify that there are exceptions in the Act that would permit liability to be imposed if the initial approval was obtained through fraud, misrepresentation, or bribery.

This is a simple bill that will not cost the government a penny, will not deprive any deserving plaintiff of the right to sue those who may have caused him or her harm, and will assure that this vital industry continues to be an American industry for a long time to come.

I look forward to working with my colleagues to move this proposal forward.

Mr. President, I ask unanimous consent that an article from the Houston Chronicle be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Houston Chronicle, July 1, 2005]  
FEDERAL JUDGE THROWS OUT THOUSANDS OF  
SILICA DIAGNOSES

CORPUS CHRISTI.—A federal judge has recommended throwing out all but one of about 10,000 diagnoses of the lung ailment silicosis that were used in lawsuits against industrial companies, ruling that doctors “manufactured” findings of the disease in hundreds of cases.

U.S. District Judge Janis Graham Jack’s scathing 249-page opinion, signed Thursday, finds that the diagnoses are inadmissible in court. The bulk of the cases originate in Mississippi, and Jack sent them back to the state courts along with her report. She threw out the approximately 100 Texas cases that she felt she had jurisdiction over.

Jack’s ruling also orders sanctions against Houston law firm O’Quinn, Laminack & Pirtle, which brought roughly 2,000 of the suits. Lawyers from the firm did not immediately return a call for comment today.

A doctor testifying before Jack in December withdrew thousands of his diagnoses, saying he only briefly scanned X-rays to give what he thought was a second opinion on the degenerative diseases caused by inhaling quartz dust.

His withdrawal, made during consolidated pretrial proceedings for lawsuits from several states, prompted Jack to order every doctor and “screening company” to back up the diagnoses in the lawsuits. More doctors withdrew their diagnoses, and after hearings in February Jack said she sensed “red flags of fraud” in the way plaintiffs were recruited. “These diagnoses were driven by neither health nor justice,” Jack wrote in her opinion Thursday. “They were manufactured for money.”

Danny Mulholland, a Mississippi-based defense attorney for Ingersoll-Rand Co. and other companies, said the opinion was “historic” in an age where law firms recruit plaintiffs with billboards and television ads.

“I think the way litigation has been done, and particularly mass tort litigation, changed with the February hearings which culminated in this order,” he said. “We’ll have to go back in state court and win there,

but we expect to, based on what Judge Jack has found.”

By Mr. NELSON of Florida (for himself and Mrs. CLINTON):

S. 1407. A bill to provide grants to States and local governments to assess the effectiveness of sexual predator electronic monitoring programs; to the Committee on the Judiciary.

Mr. NELSON of Florida. Mr. President, I rise today on behalf of myself and Senator HILLARY RODHAM CLINTON of New York, to introduce the Jessica Lunsford and Sarah Lunde Act. This bill will provide grants for State and local governments to purchase the technology they need to enhance monitoring of sexual predators.

This bill and the grants it provides are named after two young girls from Florida, Jessica Lunsford and Sarah Lunde, who were both murdered by convicted sex offenders. As the Lunsford and Lunde families mourned these two beautiful girls, the Nation grieved with them. We are all united in our desire to make sure that everything can be done to prevent this from ever happening again. I hope this bill will serve as a living memorial to Jessica Lunsford and Sarah Lunde, and serve as some comfort to their families, as the grants in their names provided in this bill will allow law enforcement to help prevent other families from suffering similar tragedies.

Jessica Lunsford of Homosassa, FL, was a nine-year-old girl abducted from her home, raped, and then buried alive by a convicted sex offender who lived 150 feet from her home. Law enforcement had lost track of her confessed murderer and did not know that he worked at the nearby school that Jessica attended, despite his being a registered sex offender. A few weeks following the news of this tragedy, 13-year-old Sarah Lunde of Ruskin, FL, was murdered by her mother’s ex-boyfriend. He is also a convicted sex offender.

The Jessica Lunsford and Sarah Lunde grants provided for in this bill will allow States and local government to purchase electronic monitoring systems, like global positioning systems, that will provide law enforcement with real time information on the whereabouts of sex offenders released from prison to within 10 feet of their location. Law enforcement will be able to restrict the movements of sex offenders by programming these systems to alert authorities if a sex offender goes to a park, amusement park, elementary school or other areas determined to be off-limits. The ankle-bracelets used to monitor their movement are tamper proof and will alert law enforcement in the event that an offender has removed it so law enforcement can immediately act to apprehend the offender.

In the United States there are an estimated 380,000 registered sex offenders, although thousands have disappeared, according to authorities. We have over

30,000 of these sex offenders in the State of Florida. In response to the recent tragedies in Florida, Idaho, and North Dakota, several States have enacted stronger laws to protect our children from sex predators. In Florida, for example, the legislature passed a law that will provide tougher sentences for child sex offenders, and aid law enforcement in effectively monitoring those sex offenders. This law will require sex offenders, released back into our communities, to wear a bracelet that will have a global positioning system track them.

I applaud the initiative by Florida, and other States seeking to pass similar laws, and I believe that it is important that there is an appropriate Federal response that will be supportive of the States and local governments that are addressing this problem. To be effective, tough laws on these sexual predators of children must be properly funded, and I believe these tough laws being passed by state legislatures are worth properly funding when they will protect our children.

The Jessica Lunsford and Sarah Lunde Act will support State and local governments that, like Florida, are attempting to protect their children by providing greater monitoring tools for law enforcement. This bill will provide a total of \$30 million in grants to States to help implement State laws to get tougher on sex offenders released back into their communities with electronic monitoring technology. The bill will provide for \$10 million in grants for fiscal years 2006 through 2008. The bill then directs the Attorney General to provide a report to Congress assessing the effectiveness of the program and making recommendations as to future funding levels.

There are no silver bullets to stop sexual predators from preying on our children, but I believe that tough laws, such as the new Florida statute, are going to go a long way in preventing sex offenders from re-offending.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

By Mr. SMITH (for himself, Mr. NELSON of Florida, Mr. STEVENS, Mr. INOUE, Mr. MCCAIN, and Mr. PRYOR):

S. 1408. A bill to strengthen data protection and safeguards, require data breach notification, and further prevent identity theft; to the Committee on Commerce, Science, and Transportation.

Mr. SMITH. Mr. President, I rise today with Senators BILL NELSON, STEVENS, INOUE, MCCAIN, and PRYOR to introduce the Identity Theft Protection Act of 2005. The introduction of this bill has been a bipartisan effort and I thank my colleagues on the Senate Commerce Committee for helping to negotiate a fair and balanced bill.

Identity theft is one of the fastest growing crimes in America. It is estimated that over 10 million Americans are victims of some form of identity theft each year. The total cost of this crime approaches \$50 billion per year, with the average loss from the misuse of a victim's personal information being almost \$5,000. In 2004 alone, consumers who were victims of ID theft spent a total of 297 million hours resolving problems that arose from the crime.

Every year, the FTC compiles a list of the top 10 categories of fraud-related complaints. Identity theft has topped that list of complaints each of the past 5 years. My own State of Oregon ranks ninth in the Nation for fraud complaints and identity theft.

Data breaches are becoming an increasingly common type of identity

theft that affects millions of consumers nationwide. Last year, there were at least 43 known incidents of security breaches, potentially affecting over 9 million individuals. These breaches range from sloppy record keeping and security procedures by companies to extremely sophisticated online thefts by computer hackers.

Our bipartisan bill ensures that businesses and organizations have the proper security procedures in place to safeguard consumers' sensitive and personal information. This legislation requires any entity that acquires, maintains or utilizes sensitive personal information to have a security program to safeguard such data. Furthermore, we require these entities to verify the credentials of third parties seeking personal and sensitive information and require strict disposal and transfer procedures for such information.

It is imperative that consumers be notified of any potential breach in the security of their personal information. The cost of an incident of identity theft, both in terms of out-of-pocket expense and time spent resolving problems, is significantly smaller if the misuse of the victim's personal information is discovered quickly.

Our bill requires consumer notification if a data breach results in a significant risk of identity theft. Individuals will be notified immediately when any significant breach has occurred. Any breach affecting a minimum of 1,000 individuals also requires the entity to report the breach to the FTC and all the consumer reporting agencies.

We realize that an individual's Social Security Number deserves the utmost security and protection against fraud, manipulation, and theft. To that end, this bill restricts the collection of and access to Social Security Numbers by limiting the solicitation of Social Security Numbers and prohibiting their display on employee and student identification cards.

In addition, our bill will allow consumers to place, lift, and temporarily remove a security freeze on their credit, which would prevent credit from being extended to third parties without authorization from the consumer. We would also pre-empt state law to create uniformity and compliance by businesses and organizations.

Protecting sensitive information is an issue of great importance for all Americans so we are requiring the FTC to establish an Information Working Group comprised of industry participants, consumer groups, and other interested parties to develop best practices to protect sensitive personal information.

Consumers should have confidence when they share their information with others that their information will be protected. At the same time, the ability of legitimate companies to access personal information facilitates commerce and continues to have important benefits to consumers.

We believe our legislation strikes the appropriate balance between ensuring

the continued existence of these critical services and guaranteeing the security of consumer's personal information. I urge my colleagues to co-sponsor this important legislation to protect consumers from future breaches of identity theft.

I ask unanimous consent that the text of legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1408

Mr. STEVENS. Mr. President, I am pleased to join Senators INOUE, SMITH, MCCAIN, NELSON, and PRYOR in introducing a bipartisan bill to address the growing perpetration of identity theft against American consumers. The bipartisan bill, the “Identity Theft Protection Act,” is the product of two Commerce Committee hearings that featured testimony from businesses that aggregate and sell consumer information as a commodity, and the full

Federal Trade Commission, FTC, which recommended much of what is contained in this legislation.

The occurrence of identity theft in the United States has reached epidemic proportions. The incidence of this crime rose 15 percent in 2002, and 80 percent in 2003. The FTC stated in February 2005 that each year nearly 10 million Americans—or roughly 4.6 percent of the domestic adult population—are victimized by identity thieves. The FTC indicates that physical and online identity theft accounted for 39 percent of the more than 635,000 consumer fraud complaints filed last year with the agency. The costs associated with identity theft are enormous. In 2003, the FTC estimated that the losses to businesses and financial institutions due to identity theft totaled \$48 billion, and the out-of-pocket losses to consumers totaled \$5 billion, which does not take into account the average 300 hours spent by victims restoring their good names.

This year alone, there have been at least 43 reported information breaches affecting potentially more than 9 million Americans. This string of data theft has focused the attention of Congress, consumers, and privacy proponents. It has raised questions concerning the business practices of data brokers and whether consumers' personal information is adequately protected from identity thieves. The difficulty of finding solutions to this and other types of identity theft is striking a balance between ensuring adequate security of sensitive personal information while not inhibiting the legitimate free flow of information that is vital to the domestic economy and law enforcement.

The bill that we introduce today will not end all identity theft. No legislation can accomplish that objective. But this bill would require bolstered information safeguards and ensure notification of consumers whose sensitive personal information has been acquired without authorization. More specifically, the bill, among other things, would direct the FTC to develop rules that would require all covered entities that handle sensitive personal information to develop, implement, and maintain appropriate safeguards to protect such information, and provide effective notice to consumers in the event of a breach. The bill would limit the solicitation of Social Security numbers by covered entities, and restrict employers, State agencies, or educational institutions from displaying social security numbers on identification tags for employees and students, and for drivers licenses. The bill also would allow consumers to freeze their credit for a reasonable fee to protect themselves from identity theft, and preempt similar State or local law in an effort to provide a uniform Federal standard rather than a patchwork of widely varying State or local laws.

I look forward to working with my colleagues on legislation that will

mitigate to the greatest extent possible the occurrence of identity theft in this country, but without inhibiting an information sharing system that yields extraordinary benefits to every American.

By Ms. MURKOWSKI:

S. 1409. A bill to amend the Safe Drinking Water Act Amendments of 1996 to modify the grant program to improve sanitation in rural and Native villages in the State of Alaska; to the Committee on Environment and Public Works.

Ms. MURKOWSKI. Mr. President, I rise to introduce a bill that will allow the Environmental Protection Agency to continue to provide grant funding and technical assistance to small, rural communities in Alaska for critical water and sewer projects. These rural communities are only accessible by either aircraft or boat.

This important funding was originally authorized as part of the Safe Drinking Water Act Amendments of 1996 and was reauthorized in 2000. The authorization for this program expires at the end of fiscal year 2005. Every fiscal year, the EPA transfers funding authorized by this program to the State of Alaska's Village Safe Water Program, which is managed by the Alaska Department of Environmental Conservation.

The water and sewer conditions in the villages in Alaska that still need this critical funding rival the conditions in rural communities in third world countries. For example, residents in some villages in Alaska have to go to a central source in the community to get fresh water. This source is usually a well. Instead of flushing toilets, residents have to use a device called a "honeybucket." This device is a large bucket with a toilet seat on top. When the honeybucket is full, it is usually dumped in a lagoon or on land. Sometimes, these dump locations are near sources of drinking water.

The Village Safe Water program has been a success over the years. Many homes in Alaska's rural communities now have plumbing due to funds authorized by this program. However, thirty-three percent of homes in these communities still do not have in-house plumbing. It is unacceptable that the residents of these communities still do not have access to conventional plumbing in their homes in 2005.

Earlier this year, the Office of Management and Budget published a Program Assessment Rating Tool report concerning this program. This report found several deficiencies concerning the administration of this program. However, I have been assured that the EPA and the Alaska Department of Environmental Conservation are working closely together to correct these deficiencies.

It is imperative that we reauthorize this critically important program before the end of this fiscal year. The health and well-being of rural Alaskans is at stake.

I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:
