

The Environmental Restoration Act of 2005 creates incentives for the cleanup of dangerous and unsightly waste coal, or gob, piles by utilizing the waste coal as a domestic energy source. The bill provides transferable tax credits for the clean and safe burning of waste coal as fuel for power generation. The bill will result in the creation of jobs, enhanced energy security, recycled energy recovery from waste coal, and restoration of blighted areas back to productive use.

I want to highlight the environmental benefits of the legislation. This bill will produce electricity with a recycled waste energy resource. It will help clean up abandoned gob piles. There is over one billion tons of waste coal available on the ground today. Land will be restored to green space or productive use. Stream quality will be improved by eliminating sedimentation and acid mine drainage. Electricity will be produced with emissions lower than regulatory requirements. Finally, the need and number of refuse disposal facilities will be reduced.

The bill applies to existing as well as planned and future waste coal processing facilities. Today such facilities exist not only in my State of Pennsylvania, but in Utah, West Virginia and Montana. I hope to see more of these efficient plants developed.

I want to give an example of one of the Pennsylvania facilities that would qualify for credits under my bill—the Beech Hollow Power Project in Washington, Pennsylvania. Beech Hollow is a waste coal-fired power generation facility located in Robinson Township. The project is constructed on a 38-acre site immediately adjacent to a gob pile. The power generated will be transmitted via an interconnection with a transmission line owned by West Penn Power. The project has strong state and local support. There is a 17-year supply of waste fuel for this plant.

Beech Hollow has received all of its state and federal clean air act permits, with the strong support of the Pennsylvania Department of Environmental Protection. By using clean coal technology the plant and will exceed federal emission standards.

Beech Hollow will produce 252,000 kilowatts of net electrical power, derived from clean energy. This will be enough power to supply about 240,000 homes. In addition to the significant environmental benefits associated with the removal of this large source of groundwater contamination, the Beech Hollow Project will also have significant and diverse positive economic impacts throughout the local community. For instance, between construction and operation, it is estimated that the project will generate a total of 7,906 full-time equivalent job years of employment in Pennsylvania.

In the spirit of comprehensive energy policy and energy independence, I urge my colleagues to take a close look at this legislation. It is a prime example of how environmental protection and domestic energy use can go hand in hand.

HONORING DELFORD BOYER

HON. PETER T. KING

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 2005

Mr. KING of New York. Mr. Speaker, I rise today to honor the life of an exceptional man,

Mr. Delford Boyer, who passed away on Tuesday, July 26, 2005. I offer my heartfelt condolences to his wife of 63 years, Dona Boyer, his son and daughter-in-law, Reg and Nancy Boyer, daughter and son-in-law, Jody and Roger Durand, daughter and son-in-law, Jill and Jim Maenner, his beloved grandchildren, Kristin, Molly, Aaron, Nick, Katie, Colin, Joslyn, and Marne and his brother Don and sister Shirley.

He was born in Cheney Nebraska on May 29, 1917 and served as a pilot with the Royal Canadian Air Force and with the U.S. Army Air Force in the China, Burma, India Theater during World War II. He was a recipient of the APTO Ribbon, Victory Medal, one Overseas Bar, Asiatic Pacific Ribbon with two Bronze Stars, Air Medal and Distinguished Flying Cross.

Mr. Speaker, on behalf of a grateful Nation I join all my colleagues today in expressing our sorrow and our thanks for the life and the service of Delford Boyer. His was a life full of love and grace. Words cannot express the grief of those whose lives he touched. He will be missed.

UNSOLVED CIVIL RIGHTS CRIME
ACT

HON. BOB FILNER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 2005

Mr. FILNER. Mr. Speaker, I rise today to introduce the Unsolved Civil Rights Crime Act with Congressman Bennie Thompson. As a former "Freedom Rider" in Mississippi during the 1960s, I have seen first hand the need for this bill.

While most are familiar with the recent prosecution of Edgar Ray Killen his participation in the slayings of Civil Rights workers James Chaney, Michael Schwerner and Andrew Goodman, there are many other cases that aren't as well known or remain unsolved, like Emmett Till. These cases need to be investigated.

We as a Congress have a moral obligation to bring justice to the families of these victims. Furthermore, as a society based on laws, we have a responsibility to ensure that criminals don't go unpunished.

This bill creates a special section within the Civil Rights Division of the Department of Justice to focus specifically on unsolved pre-1970 Civil Rights' homicides. In addition, the bill authorizes up to \$5 million annually for this new section, which will provide States assistance with prosecuting Civil Rights era cases that have grown cold over time.

Unlike many other endeavors that have come before this House to address past racial injustice, this bill goes beyond mere rhetoric and "lip service" and provides an avenue to actually address Civil Rights' crimes.

Our country has come a long way since the 1960s. For example, seven states, since 1989, have reexamined 29 killings from the Civil Rights era, leading to 27 arrests and 22 convictions. However, as most are aware, there are still many unsolved homicides from that time period. And, while we can't go back in time, we can acknowledge our past transgressions and do our best to work towards correcting them.

"Justice delayed" is better than "Justice denied!"

INTRODUCTION OF THE "SAFE
COMMUNITIES ACT OF 2005"

HON. EARL BLUMENAUER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 2005

Mr. BLUMENAUER. Mr. Speaker, an essential component of livable communities is the ability to avoid, withstand and quickly recover from disaster events. Today I am joined by my colleague from Pennsylvania, CURT WELDON, in introducing the Safe Communities Act 2005. This bill will give communities the tools to help them plan for and reduce the impact of disaster events.

The Safe Communities Act will create a new grant program to support state, local and regional planning activities aimed at reducing threats posed by natural and human-caused disasters. Grant-eligible projects include: comprehensive risk assessment and inventory of critical infrastructure, land-use planning for natural hazards and terrorism security, updating building codes and urban design techniques for risk-reduction. The bill will also create a research program to investigate the best practices in comprehensive land use and community planning aimed at reducing threats posed by natural hazards and acts of terror.

The number of people who live in harm's way is expanding dramatically; more properties and more lives are at risk from both natural and human-caused disasters. It is estimated that almost 75 percent of our communities are at risk for some type of natural disaster, be it wildfire, hurricane, flooding, or earthquake. Rising disaster-recovery costs impact us all: taxpayers, the financial services and insurance industry, as well as local communities.

Federal investment in natural disasters should include prevention and mitigation as well as response and recovery. Investment in prevention can save money in the long-term: The World Bank and U.S. Geological Survey have estimated that \$40 billion invested in risk reduction strategies could have saved as much as \$280 billion in worldwide economic losses from disasters in the 1990s—a \$7 return for each dollar invested.

I hope that this bill moves quickly through the legislative process so that the Federal Government can be a good partner to communities to help them prepare for and prevent natural disasters.

40TH ANNIVERSARY OF MEDICARE

HON. JAMES P. MORAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 2005

Mr. MORAN of Virginia. Mr. Speaker, I rise today to celebrate the 40th anniversary of one of our nation's most vital and successful social programs: Medicare. To this day, it remains one of the greatest accomplishments, providing near universal coverage to America's most vulnerable citizens.

Since its inception in 1965, Medicare has drastically reduced the number of Americans
