A BILL

To authorize funding for eligible joint ventures between United States and Israeli businesses and academic persons, to establish the International Energy Advisory Board, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “United States-Israel
5 Energy Cooperation Act”.

6 **SEC. 2. FINDINGS.**

7 Congress finds that—

8 (1) it is in the highest national security inter-
9 ests of the United States to ensure secure access to
10 reliable energy sources;

11 (2) the United States relies heavily on the for-
12 eign supply of crude oil to meet the energy needs of
13 the United States, currently importing 58 percent of
14 the total oil requirements of the United States, of
15 which 45 percent comes from member states of the
16 Organization of Petroleum Exporting Countries
17 (OPEC);

18 (3) revenues from the sale of oil by some of
19 these countries directly or indirectly provide funding
20 for terrorism and propaganda hostile to the values
21 of the United States and the West;

22 (4) in the past, these countries have manipu-
23 lated the dependence of the United States on the oil
24 supplies of these countries to exert undue influence
25 on United States policy, as during the embargo of

1 OPEC during 1973 on the sale of oil to the United
2 States, which became a major factor in the ensuing
3 recession;

4 (5) research by the Energy Information Admin-
5 istration of the Department of Energy has shown
6 that the dependence of the United States on foreign
7 oil will increase by 33 percent over the next 20
8 years;

9 (6) a rise in the price of imported oil sufficient
10 to increase gasoline prices by 10 cents per gallon at
11 the pump would result in an additional outflow of
12 \$18,000,000,000 from the United States to oil-ex-
13 porting nations;

14 (7) for economic and national security reasons,
15 the United States should reduce, as soon as prac-
16 ticable, the dependence of the United States on na-
17 tions that do not share the interests and values of
18 the United States;

19 (8) the State of Israel has been a steadfast ally
20 and a close friend of the United States since the cre-
21 ation of Israel in 1948;

22 (9) like the United States, Israel is a democracy
23 that holds civil rights and liberties in the highest re-
24 gard and is a proponent of the democratic values of
25 peace, freedom, and justice;

1 (10) cooperation between the United States and
2 Israel on such projects as the development of the
3 Arrow Missile has resulted in mutual benefits to
4 United States and Israeli security;

5 (11) the special relationship between Israel and
6 the United States has been and continues to be
7 manifested in a variety of jointly-funded cooperative
8 programs in the field of scientific research and de-
9 velopment, such as—

10 (A) the United States-Israel Binational
11 Science Foundation (BSF);

12 (B) the Israel-United States Binational
13 Agricultural Research and Development Fund
14 (BARD); and

15 (C) the Israel-United States Binational In-
16 dustrial Research and Development (BIRD)
17 Foundation;

18 (12) these programs, supported by the match-
19 ing contributions from the Government of Israel and
20 the Government of the United States and directed
21 by key scientists and academics from both countries,
22 have made possible many scientific breakthroughs in
23 the fields of life sciences, medicine, bioengineering,
24 agriculture, biotechnology, communications, and oth-
25 ers;

1 (13) on February 1, 1996, United States Sec-
2 retary of Energy Hazel R. O’Leary and Israeli Min-
3 ister of Energy and Infrastructure Gonen Segev
4 signed the Agreement Between the Department of
5 Energy of the United States of America and the
6 Ministry of Energy and Infrastructure of Israel Con-
7 cerning Energy Cooperation, to establish a frame-
8 work for collaboration between the United States
9 and Israel in energy research and development ac-
10 tivities;

11 (14) the United States and Israeli governments
12 should promote cooperation in a broad range of
13 projects designed to enhance supplies of nonpetro-
14 leum energy for both countries, and to provide for
15 cutting edge research in each country;

16 (15) Israeli scientists and researchers have long
17 been at the forefront of research and development in
18 the field of alternative renewable energy sources;

19 (16) many of the top corporations of the world
20 have recognized the technological and scientific ex-
21 pertise of Israel by locating important research and
22 development facilities in Israel;

23 (17) among the technological breakthroughs
24 made by Israeli scientists and researchers in the
25 field of alternative, renewable energy sources are—

1 (A) the development of a cathode that uses
2 hexavalent iron salts that accept 3 electrons per
3 ion and enable rechargeable batteries to provide
4 3 times as much electricity as existing recharge-
5 able batteries;

6 (B) the development of a technique that
7 vastly increases the efficiency of using solar en-
8 ergy to generate hydrogen for use in energy
9 cells; and

10 (C) the development of a novel membrane
11 used in new and powerful direct-oxidant fuel
12 cells that is capable of competing favorably with
13 hydrogen fuel cells and traditional internal com-
14 bustion engines; and

15 (18) cooperation between the United States and
16 Israel in the field of research and development of al-
17 ternative renewable energy sources would be in the
18 interests of both countries, and both countries stand
19 to gain much from such cooperation.
