110TH CONGRESS 1ST SESSION

H. R. 685

To amend the Social Security Act to eliminate the 5-month waiting period for Social Security disability and the 24-month waiting period for Medicare benefits in the cases of individuals with disabling burn injuries.

IN THE HOUSE OF REPRESENTATIVES

January 24, 2007

Mr. Neal of Massachusetts introduced the following bill; which was referred to the Committee on Ways and Means

A BILL

To amend the Social Security Act to eliminate the 5-month waiting period for Social Security disability and the 24-month waiting period for Medicare benefits in the cases of individuals with disabling burn injuries.

- 1 Be it enacted by the Senate and House of Representa-
- 2 tives of the United States of America in Congress assembled,
- 3 SECTION 1. SHORT TITLE.
- 4 This Act may be cited as the "Social Security and
- 5 Medicare Improved Burn Injury Treatment Access Act of
- 6 2007".
- 7 SEC. 2. FINDINGS.
- 8 Congress makes the following findings:

- 1 (1) Terrorist acts, such as the September 11,
 2 2001 attacks in New York and Washington, D.C.
 3 and attacks in countries throughout the world,
 4 major accidental events, chemical plant explosions,
 5 airplane crashes, and major industrial accidents, result in a substantial number of burn-injured patients.
 - (2) In most major traumatic events, 25 percent to 30 percent of the injured will require burn care treatment. About one-third of those hospitalized in New York on September 11th had severe burn injuries.
 - (3) According to the American Burn Association (ABA), which is the national professional society representing hospitals with burn centers, as well as burn surgeons, nurses, therapists, and other members of the burn care team, there are only 128 burn centers in the United States. The total burnbed capacity at all burn centers in the United States is 1,835 beds. Burn centers in four States have closed, with a loss of several beds, which further diminishes the nation's ability to handle the mass burn casualties that could result from a major terrorist attack.

- (4) Burn centers are a national resource that must be preserved and strengthened as part of the nation's preparedness activities to deal with terrorist attacks or other disasters that would likely lead to mass burn casualties.
 - (5) Based on a study of over 54,000 burn cases over a 20-year period of time, the ABA in its 2002 National Burn Repository Report indicates that 38 percent of burn-injured patients treated in burn centers were uninsured. This high level of uncompensated care threatens the survival of burn centers, the continued existence of which is essential to the emergency preparedness efforts of the United States.
 - (6) Burn injuries are among the most costly to treat and require immediate medical attention.
 - (7) Because of the necessity of providing immediate care in the case of burn injuries, the waiting periods established for Medicare coverage for disabled burn patients should be waived and it is essential for Medicare to reimburse the costs of such burn treatment to ensure the financial survival of burn centers.
