## H. Res. 1022

## In the House of Representatives, U. S.,

May 21, 2008.

- Whereas an estimated 536,000 women die during pregnancy and childbirth every year which is equivalent to one death every minute;
- Whereas an estimated 15 percent of pregnancies and childbirths involve unpredictable and often life-threatening complications that require emergency care;
- Whereas girls under 15 are estimated to be 5 times more likely to die during childbirth than women in their 20s;
- Whereas nearly all these deaths are preventable;
- Whereas survival rates greatly depend upon the distance and time a woman must travel to get skilled emergency medical care;
- Whereas care by skilled birth attendants, nurses, midwives, or doctors during pregnancy and childbirth, including emergency services, and care for mothers and newborns is essential;
- Whereas the poorer the household, the greater the risk of maternal death, and 99 percent of maternal deaths occur in developing countries;

- Whereas newborns whose mothers die of any cause are 3 to 10 times more likely to die within 2 years than those whose mothers survive;
- Whereas more than 1,000,000 children are left motherless and vulnerable every year;
- Whereas young girls are often pulled from school and required to fill their lost mother's roles;
- Whereas a mother's death lowers family income and productivity which affects the entire community;
- Whereas in countries with similar levels of economic development, maternal mortality is highest where women's status is lowest;
- Whereas the United States ranks 41st among 171 countries in the latest UN list ranking maternal mortality;
- Whereas the overall United States maternal mortality ratio is now 11 deaths per 100,000 live births, one of the highest rates among industrialized nations;
- Whereas United States maternal deaths have remained roughly stable since 1982 and have not declined significantly since then;
- Whereas the Centers for Disease Control estimates that the true level of United States maternal deaths may be 1.3 to 3 times higher than the reported rate; and
- Whereas ethnic and racial disparities in maternal mortality rates persist and in the United States maternal mortality among black women is almost four times the rate among non-Hispanic white women: Now, therefore, be it
  - Resolved, That the House of Representatives—

- (1) affirms its commitment to promoting maternal health and child survival both at home and abroad through greater international investment and participation; and
- (2) recognizes maternal health and child survival as fundamental to the well-being of families and societies, and to global development and prosperity.

Attest:

Clerk.
