2<sup>D</sup> SESSION

# H. RES. 1386

Expressing support for the designation of a National Prader-Willi Awareness Month to raise awareness and promote research into this challenging disorder.

---

IN THE HOUSE OF REPRESENTATIVES

JULY 29, 2008

Mr. ROYCE (for himself and Ms. HARMAN) submitted the following resolution;  
which was referred to the Committee on Energy and Commerce

---

## RESOLUTION

Expressing support for the designation of a National Prader-Willi Awareness Month to raise awareness and promote research into this challenging disorder.

Whereas Prader-Willi syndrome is a complex genetic disorder that occurs in approximately 1 out of every 15,000 births, and is the most commonly known genetic cause of life-threatening obesity;

Whereas Prader-Willi syndrome affects males and females with equal frequency and affects all races and ethnicities;

Whereas Prader-Willi syndrome causes an extreme and insatiable appetite, often resulting in morbid obesity, which is the major cause of death for individuals with the syndrome;

Whereas Prader-Willi syndrome also causes cognitive and learning disabilities, and behavioral difficulties, such as obsessive-compulsive disorder and difficulty controlling emotions;

Whereas the hunger, metabolic, and behavioral characteristics of Prader-Willi syndrome force affected individuals to require constant and lifelong supervision in a controlled environment;

Whereas studies have shown that there is a high morbidity and mortality rate for individuals with Prader-Willi syndrome;

Whereas there is no known cure for Prader-Willi syndrome;

Whereas early diagnosis of Prader-Willi syndrome allows families to access treatment, intervention services, and support from health professionals, advocacy organizations, and other families who are dealing with the syndrome;

Whereas recently discovered treatments, such as human growth hormone, are improving the quality of life for individuals with the syndrome and offer new hope to families, many difficult symptoms associated with Prader-Willi Symptoms remain untreated;

Whereas increased research into Prader-Willi syndrome can lead to a better understanding of the disorder, more effective treatments, and an eventual cure for Prader-Willi syndrome;

Whereas increased research into Prader-Willi syndrome is likely to improve our understanding of common public health concerns, including childhood obesity and mental health; and

Whereas advocacy organizations have designated May as Prader-Willi Awareness Month: Now, therefore, be it

1       *Resolved*, That the House of Representatives—

2               (1) supports raising awareness and educating  
3       the public about Prader-Willi syndrome;

4               (2) applauds the efforts of advocates and orga-  
5       nizations that encourage awareness, promote re-  
6       search, provide education, support and hope to those  
7       impacted by Prader-Willi syndrome;

8               (3) recognizes the commitment of parents, fam-  
9       ilies, researchers, health professionals, and others  
10      dedicated to finding an effective treatment and even-  
11      tual cure for Prader-Willi syndrome;

12              (4) supports increased funding for research into  
13      the causes, treatment, and cure for Prader-Willi syn-  
14      drome; and

15              (5) expresses support for the designation of a  
16      National Prader-Willi Awareness Month.
