

110TH CONGRESS
2^D SESSION

S. 2932

AN ACT

To amend the Public Health Service Act to reauthorize the poison center national toll-free number, national media campaign, and grant program to provide assistance for poison prevention, sustain the funding of poison centers, and enhance the public health of people of the United States.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Poison Center Sup-
5 port, Enhancement, and Awareness Act of 2008”.

6 **SEC. 2. FINDINGS.**

7 Congress makes the following findings:

8 (1) Poison control centers are the primary de-
9 fense of the United States against injury and deaths
10 from poisoning. Twenty-four hours a day, the gen-
11 eral public as well as health care practitioners con-
12 tact their local poison control centers for help in di-
13 agnosing and treating victims of poisoning. In 2007,
14 more than 4,000,000 calls were managed by poison
15 control centers providing ready and direct access for
16 all people of the United States, including many un-
17 derserved populations in the United States, with
18 vital emergency public health information and re-
19 sponse.

20 (2) Poisoning is the second most common form
21 of unintentional death in the United States. In any
22 given year, there will be between 3,000,000 and
23 5,000,000 poison exposures. Sixty percent of these
24 exposures will involve children under the age of 6
25 who are exposed to toxins in their home. Poisoning

1 accounts for 285,000 hospitalizations, 1,200,000
2 days of acute hospital care, and more than 26,000
3 fatalities in 2005.

4 (3) In 2008, the Harvard Injury Control Re-
5 search Center reported that poisonings from acci-
6 dents and unknown circumstances more than tripled
7 in rate since 1990. In 2005, the last year for which
8 data are available, 26,858 people died from acci-
9 dental or unknown poisonings. This represents an
10 increase of 20,000 since 1990 and an increase of
11 2,400 between 2004 and 2005. Fatalities from poi-
12 soning are increasing in the United States in near
13 epidemic proportions. The funding of programs to
14 reverse this trend is needed now more than ever.

15 (4) In 2004, The Institute of Medicine of the
16 National Academy of Sciences recommended that
17 “Congress should amend the current Poison Control
18 Center Enhancement and Awareness Act Amend-
19 ments of 2003 to provide sufficient funding to sup-
20 port the proposed Poison Prevention and Control
21 System with its national network of poison centers.
22 Support for the core activities at the current level of
23 service is estimated to require more than \$100 mil-
24 lion annually.”.

1 (5) Sustaining the funding structure and in-
2 creasing accessibility to poison control centers will
3 promote the utilization of poison control centers and
4 reduce the inappropriate use of emergency medical
5 services and other more costly health care services.
6 The 2004 Institute of Medicine Report to Congress
7 determined that for every \$1 invested in the Na-
8 tion's poison control centers \$7 of health care costs
9 are saved. In 2005, direct Federal health care pro-
10 gram savings totaled in excess of \$525,000,000 as
11 the result of poison control center public health serv-
12 ices.

13 (6) More than 30 percent of the cost savings
14 and financial benefits of the Nation's network of poi-
15 son control centers are realized annually by Federal
16 health care programs (estimated to be more than
17 \$1,000,000,000), yet Federal funding support (as
18 demonstrated by the annual authorization of
19 \$30,100,000 in Public Law 108–194) comprises less
20 than 11 percent of the annual network expenditures
21 of poison centers.

22 (7) Real-time data collected from the Nation's
23 certified poison control centers can be an important
24 source of information for the detection, monitoring,

1 and response for contamination of the air, water,
2 pharmaceutical, or food supply.

3 (8) In the event of a terrorist event, poison con-
4 trol centers will be relied upon as a critical source
5 for accurate medical information and public health
6 emergency response concerning the treatment of pa-
7 tients who have had an exposure to a chemical, radi-
8 ological, or biological agent.

9 **SEC. 3. REAUTHORIZATION OF POISON CONTROL CENTERS**
