**NOMINATION OF LTG DAVID H. PETRAEUS,
USA, TO BE GENERAL AND COMMANDER,
MULTINATIONAL FORCES-IRAQ**

TUESDAY, JANUARY 23, 2007

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:36 a.m. in room SR-325, Russell Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Kennedy, Lieberman, Reed, Bill Nelson, Bayh, Clinton, Pryor, Webb, McCaskill, McCain, Warner, Inhofe, Sessions, Collins, Chambliss, Graham, Cornyn, Thune, and Martinez.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Daniel J. Cox, Jr., professional staff member; Evelyn N. Farkas, professional staff member; Michael J. Kuiken, professional staff member; Gerald J. Leeling, counsel; Peter K. Levine, chief counsel; Michael J. McCord, professional staff member; William G.P. Monahan, counsel; and William K. Sutey, professional staff member.

Minority staff members present: Michael V. Kostiw, Republican staff director; William M. Caniano, professional staff member; Ambrose R. Hock, professional staff member; Gregory T. Kiley, professional staff member; David M. Morriss, minority counsel; Lucian L. Niemeyer, professional staff member; Bryan D. Parker, minority investigative counsel; Christopher J. Paul, professional staff member; Lynn F. Rusten, professional staff member; Jill L. Simodejka, research assistant; Robert M. Soofer, professional staff member; Diana G. Tabler, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: David G. Collins, Fletcher L. Cork, and Jessica L. Kingston.

Committee members' assistants present: Joseph Axelrad and Sharon L. Waxman, assistants to Senator Kennedy; Frederick M. Downey, assistant to Senator Lieberman; Elizabeth King, assistant to Senator Reed; Caroline Tess, assistant to Senator Bill Nelson; Todd Rosenblum, assistant to Senator Bayh; Lauren Henry, assistant to Senator Pryor; Gordon I. Peterson and Michael Sozan, assistants to Senator Webb; Nichole M. Distefano, assistant to Senator McCaskill; Richard H. Fontaine, Jr., assistant to Senator McCain; Sandra Luff, assistant to Senator Warner; Jeremy Shull,

assistant to Senator Inhofe; Arch Galloway II, assistant to Senator Sessions; Mark Winter, assistant to Senator Collins; Clyde A. Taylor IV, assistant to Senator Chambliss; Adam G. Brake, assistant to Senator Graham; Lindsey Neas, assistant to Senator Dole; Russell J. Thomasson, assistant to Senator Cornyn; Stuart C. Mallory and Bob Taylor, assistants to Senator Thune; and Brian W. Walsh, assistant to Senator Martinez.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. The hearing will come to order.

General Petraeus' nomination to become the Commander of Multinational Forces-Iraq (MNF-I) may be the single most important command in the Nation's defense establishment. The Nation will entrust him with the operational command and welfare of over 130,000 American servicemembers, many of whom will be deployed in Baghdad in the middle of a protracted and bloody sectarian battle over the future of Iraq. He will take over from General George Casey, who has served in this position since 2004.

General Petraeus is well known to this committee. In July 2004 and again in June 2005, General Petraeus provided the committee valuable insights from his experiences as an infantry division commander during and immediately after the invasion of Iraq and from his tenure as the commander of early U.S. efforts to train and equip Iraqi security forces, experiences that he no doubt will draw heavily upon in the days ahead.

General Petraeus is well-qualified for this command, widely recognized for the depth and the breadth of his education, training, and operational experience. Noteworthy is his recent leadership of the team that wrote the new counterinsurgency manual for the Army and Marine Corps. In addition to our interest in his assessment of current conditions and operations, many of our questions this morning will probe the theory and practice of counterinsurgency and their application in today's Iraq, which is not experiencing a traditional insurgency, but rather a mixture of sectarian violence and an emerging civil war, as well as an insurgency against the government.

Prime Minister Maliki has acknowledged that the crisis in Iraq is a political crisis. President Bush says this troop surge and other increased U.S. commitments are based upon the Iraqi political leaders keeping their pledges to meet benchmarks on the military, political, and economic front. He says this even though Iraqi political leaders have not followed through on their pledges in the past.

Secretary Gates on January 12 described four categories of benchmarks that we would be monitoring. In the first are the military benchmarks, including deployment of effective Iraqi forces into Baghdad and access to all neighborhoods without political interference. In the second category of Secretary Gates are those benchmarks relating to the whole part of the strategy on how effectively Iraqi forces control an area once it is cleared. In the third are benchmarks relating to the economic recovery of a controlled area. In the fourth are benchmarks relating to the Iraqis reaching political compromises on outstanding issues, including provincial elections, power-sharing, and the distribution of oil revenues.

This morning we will probe General Petraeus' assessment of the current situation in Iraq. We will want to understand his views on the importance of the Iraqis meeting their commitments and what pressure are we willing to place on the Iraqi leadership to meet the benchmarks that they have agreed to. We will ask for his assessment of the readiness of U.S. forces in and on their way to Iraq for counterinsurgency operations. We will want to hear how he intends to employ forces that are now surging into Iraq. We will want to know what timeline he has in mind to measure the pace and scope of Iraqi security forces' assumption of the counterinsurgency fight.

We all appreciate General Petraeus' service and his willingness to lead our forces at this critical and dangerous time.

Senator McCain.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you, Mr. Chairman. Mr. Chairman, I want to thank you for your rapid consideration of this nomination. You and your staff have made this possible and I appreciate it very much. I hope we can, at the completion of the testimony today, move quickly forward to the vote on General Petraeus' nomination. But again, I want to thank you for the rapid consideration of this important nomination.

General Petraeus, I join Chairman Levin in welcoming you here today and congratulating you. It is hard to imagine a more important military nomination than that of General David Petraeus. General, you know better than others the stakes in this war, the benefits of success, and the potential catastrophic consequences of failure. You, having literally written the book on counterinsurgency, understand the strategy and tactics that must guide the President's increase in U.S. force levels. You, General, will have great responsibility for the course of future American actions in Iraq.

But to state the obvious, your job will be very difficult. We have made many mistakes in this war. From the initial invasion, we had too few troops in Iraq and we never redressed this deficiency. We played whack-a-mole instead of clearing and holding. We adopted an inadequate and unrealistic light footprint coalition strategy that focused on turning over to Iraqis missions that they were plainly unable to complete.

Administration officials frequently and repeatedly issued unjustifiably optimistic assessments and predictions about the situation in Iraq. We responded ineffectively to the hostile actions of Sunni, Shia, and foreign fighters alike and the vagaries of the Iraqi government.

Somewhat dismaying that only now, after nearly 4 years at war in Iraq, is the United States moving toward a traditional counterinsurgency strategy aimed first at the protection of the Iraqi population and supported by troop levels appropriate to their mission.

Whether the projected surge is sufficient to accomplish all that our leaders will ask of our troops remains an open question in my mind and I look forward, General, to your testimony on this score. But I believe that the fundamental components of the new strategy are needed in Iraq, and that they have been necessary for a long

time. By quelling the violence in Baghdad and with your leadership, improving our training and reinforcement efforts, we will allow the economic and political process to move forward and create a situation which will permit confidence and optimism.

While I believe that this will present a solid chance of success, I would note again that the new plan does not on its own guarantee success. Bringing down the violence in Iraq will help give Prime Minister Maliki and others the political space they need to pursue reconciliation. But it is up to the Iraqis to make these tough decisions. It is absolutely imperative that they seize this opportunity. It may well be their last.

We have needed a new military leadership in Iraq for some time and there is no one in the U.S. military better suited to implement the President's new strategy than General Petraeus. I am confident that you will receive broad support in the Senate, as will Admiral Fallon, who has been nominated as the next head of Central Command. It is absolutely essential that the Senate act promptly on your nomination. I hope that following Senate action the President will direct you to take the next flight to Iraq and assume command. Your role is that important.

If confirmed, this will be your third assignment in Iraq since the war began in March 2003. You led the 101st Airborne Division with great distinction in northern Iraq in 2003. You were later recognized for making significant improvements in the training of the Iraqi security forces after a slow start and missteps during the early months of the Coalition Provisional Authority.

Most recently, as Commander of the U.S. Army's Combined Arms Center at Fort Leavenworth, you led the development of the Army's doctrine for military operations in a counterinsurgency environment. This revised doctrine is designed to merge traditional approaches to counterinsurgency operations with the realities of the 21st century.

Mr. Chairman, in the foreword to the new field manual General Petraeus wrote, "Conducting a successful counterinsurgency campaign requires a flexible, adaptive force led by agile, well-informed, culturally astute leaders." I believe that this committee has just such a leader before it today and that he is someone we can look to for leadership in this, America's final chance to prevail in Iraq.

General, I thank you and your family for the sacrifices you have made and your career of selfless service to our Nation. I look forward to your testimony today.

Chairman LEVIN. Thank you, Senator McCain.
General Petraeus.

**STATEMENT OF LTG DAVID H. PETRAEUS, USA, TO BE
GENERAL AND COMMANDER, MULTINATIONAL FORCES-IRAQ**

General PETRAEUS. Mr. Chairman, Senator McCain, members of the committee:

Thank you for the opportunity to appear before you. I would like to begin this morning by briefly reviewing the situation in Iraq, explaining the change in focus of the new strategy, and discussing the way ahead. This statement is a bit longer than usual, but, as I discussed with you last week, Mr. Chairman, I believe it is impor-

tant that the committee hear it and I appreciate the opportunity to present it.

The situation in Iraq has deteriorated significantly since the bombing this past February of the al-Askari Mosque in Samarra, the third holiest Shia Islamic shrine. The increase in the level of violence since then, fueled by the insurgent and sectarian fighting that spiraled in the wake of the bombing, has made progress in Iraq very difficult and created particularly challenging dynamics in the capital city of Baghdad.

Indeed, many Iraqis in Baghdad today confront life or death, stay or leave decisions on a daily basis. They take risks incalculable to us just to get to work, to educate their children, and to feed their families.

In this environment, Iraq's new government, fourth in 3½ years, has found it difficult to gain traction. Though disappointing, this should not be a surprise. We should recall that after the liberation of Iraq in 2003 every governmental institution in the country collapsed. A society already traumatized by decades of Saddam's brutal rule was thrown into complete turmoil and the effects are still evident throughout the country and in Iraqi society.

Iraq and its new government have been challenged by insurgents, international terrorists, sectarian militias, regional meddling, violent criminals, governmental dysfunction, and corruption. Iraq's security forces and new governmental institutions have struggled in this increasingly threatening environment and the elections that gave us such hope actually intensified sectarian divisions in the population at the expense of the sense of Iraqi identity.

In this exceedingly difficult situation, it has proven very hard for the new government to develop capacity and to address the issues that must be resolved to enable progress.

The escalation of violence in 2006 undermined the coalition strategy and raised the prospect of a failed Iraqi state, an outcome that would be in no group's interest save that of certain extremist organizations and perhaps states in the region that wish Iraq and the United States ill. In truth, no one can predict the impact of a failed Iraq on regional stability, the international economy, the global war on terror, America's standing in the world, and the lives of the Iraqi people.

In response to the deterioration of the situation in Iraq, a new way ahead was developed and announced earlier this month. With implementation of this approach, the mission of MNF-I will be modified, making security of the population, particularly in Baghdad, and in partnership with Iraqi forces, the focus of the military effort. For a military commander, the term "secure" is a clearly defined doctrinal task, meaning to gain control of an area or terrain feature and to protect it from the enemy. Thus, the task will be clear-cut, though difficult. Certainly, upcoming operations will be carried out in full partnership with Iraqi forces, with them in the lead whenever possible and with arm's length when that is not possible.

Transition of Iraqi forces in provinces to Iraqi control will continue to feature prominently in the coalition plan and, as recommended by the Iraqi Study Group, the advisor effort will be substantially reinforced.

The primacy of population security in the capital will mean a greater focus on that task, particularly in the most threatened neighborhoods. This will, of course, require that our unit commanders and their Iraqi counterparts develop a detailed appreciation of the areas in which they will operate, recognizing that they may face a combination of Sunni insurgents, international terrorists, sectarian militias, and violent criminals.

Together with Iraqi forces, a persistent presence in these neighborhoods will be essential. Different approaches will be required in different locations. Whatever the approach, though, the objective will be to achieve sufficient security to provide the space and time for the Iraqi government to come to grips with the tough decisions its members must make to enable Iraq to move forward. In short, it is not just that there will be additional forces in Baghdad. It is what they will do and how they will do it that is important.

Some of the members of this committee have observed that there is no military solution to the problems of Iraq. They are correct. Ultimate success in Iraq will be determined by actions in the Iraqi political and economic arenas on such central issues as governance, the amount of power devolved to the provinces and possibly regions, the distribution of oil revenues, national reconciliation, resolution of sectarian differences, and so on.

Success will also depend on improvements in the capacity of Iraq's ministry, in the provision of basic services, in the establishment of the rule of law, and in economic development. It is, however, exceedingly difficult for the Iraqi government to come to grips with the toughest issues it must resolve while survival is the primary concern of so many in Iraq's capital. For this reason, military action to improve security, while not wholly sufficient to solve Iraq's problems, is certainly necessary, and that is why additional U.S. and Iraqi forces are moving to Baghdad.

The way ahead is designed to be a comprehensive approach. Indeed, the objectives of helping Iraqis increase the capacity of their governmental institutions, putting Iraq's unemployed to work, and improving the lot in life of Iraqi citizens require additional resources, many of which will be Iraqi. In carrying out the non-kinetic elements of the strategy, however, our soldiers, sailors, airmen, marines, and civilians downrange must get all the help they can from all the agencies of our Government.

There is a plan to increase that assistance and it is hugely important. This clearly is the time for the leaders of all our governmental departments to ask how their agencies can contribute to the endeavor in Iraq and to provide all the assistance that they can. Our military is making an enormous commitment in Iraq. We need the rest of the departments to do likewise, to help the Iraqi government get the country and its citizens working and to use Iraq's substantial oil revenues for the benefit of all the Iraqi people.

Having described the general approach, I would like to offer a word on expectations. It will take time for the additional forces to flow to Iraq, time for them to gain an understanding of the areas in which they will operate, time to plan with and get to know their Iraqi partners, time to set conditions for the successful conduct of security operations, and of course time to conduct those operations and then to build on what they achieve.

None of this will be rapid. In fact, the way ahead will be neither quick nor easy, and there undoubtedly will be tough days. We face a determined, adaptable, barbaric enemy. He will try to wait us out. In fact, any such endeavor is a test of wills and there are no guarantees. The only assurance I can give you is that, if confirmed, I will provide MNF-I the best leadership and direction I can muster, I will work to ensure unity of effort with the ambassador and our Iraqi and coalition partners, and I will provide my bosses and you with forthright professional military advice with respect to the missions given to MNF-I and the situation on the ground in Iraq.

In that regard, I would welcome opportunities to provide periodic updates to this body. Beyond that, I want to assure you that should I determine that the new strategy cannot succeed, I will provide such an assessment.

If confirmed, this assignment will be my fourth year or longer deployment since the summer of 2001, three of those to Iraq. My family and I understand what our country has asked of its men and women in uniform and of their families since September 11. In fact, I would like to take this opportunity to thank the American people for their wonderful support in recent years of our men and women in uniform.

Tom Brokaw observed to me one day in northern Iraq that those who have served our Nation since September 11 comprise the new greatest generation. I agree strongly with that observation and I know the members of this committee do, too.

Over the past 15 months I have been privileged to oversee the organizations that educate our Army's leaders, draft our doctrine, capture lessons learned, and help our units prepare for deployment. This assignment has provided me a keen awareness of what we have asked of our soldiers and of their families. In view of that, I applaud the recent announcement to expand our country's ground forces. Our ongoing endeavors in Iraq, Afghanistan, and elsewhere are people-intensive and it is heartening to know that there will be more soldiers and marines to shoulder the load.

I recognize that deploying more forces to Iraq runs counter to efforts to increase the time at home for our troops between deployments. I share concerns about that. However, if we are to carry out the MNF-I mission in accordance with the new strategy, the additional forces that have been directed to move to Iraq will be essential, as will again greatly increased support by our Government's other agencies, additional resources for reconstruction and economic initiatives, and a number of other actions critical to what must be a broad, comprehensive, multifaceted approach to the challenges in Iraq.

Many of the emails I have received in recent weeks have had as their subject line "Congratulations, I think." I understand the message they are conveying. I know how heavy a rucksack I will have to shoulder in Iraq, if confirmed. I am willing to take on the position for which I have been nominated because I believe in serving one's Nation when asked, because I regard it as a distinct honor to be able to soldier again with those who are part of the brotherhood of the close fight, and because I feel an obligation to help the "Shabil Iraq," the vast majority of whom have the same desires of people the world over: security for themselves and their loved ones,

satisfaction of their basic needs, and an opportunity to better their lot in life.

In closing, the situation in Iraq is dire. The stakes are high. There are no easy choices. The way ahead will be very hard. Progress will require determination and difficult U.S. and Iraqi actions especially the latter, as ultimately the outcome will be determined by the Iraqis. But hard is not hopeless. If confirmed, I pledge to do my utmost to lead our wonderful men and women in uniform and those of our coalition partners in Iraq as we endeavor to help the Iraqis make the most of the opportunity our soldiers, sailors, airmen, and marines have given to them.

Thank you very much.

Chairman LEVIN. Thank you, General. Again, we thank you for your service. We thank you for your very eloquent testimony. Thank your family as well for us, if you would.

There are standard questions which we ask of nominees which we will put to you right now. Have you adhered to applicable laws and regulations governing conflicts of interest?

General PETRAEUS. Yes, sir.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

General PETRAEUS. No, sir.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

General PETRAEUS. Yes, sir.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

General PETRAEUS. Yes, sir.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

General PETRAEUS. Yes, sir.

Chairman LEVIN. Will you agree, if confirmed, to appear and testify upon request before this committee?

General PETRAEUS. Yes, sir.

Chairman LEVIN. Do you agree to give your personal views when asked before this committee to do so, even if those views differ from the administration in power?

General PETRAEUS. Yes, sir.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

General PETRAEUS. Yes, sir.

Chairman LEVIN. Thank you.

We will have an 8-minute round to begin with.

General Petraeus, General Casey says that, "the longer that U.S. forces continue to bear the main burden of Iraq's security it lengthens the time that the Government of Iraq has to take the hard decisions about reconciliation and dealing with the militias." General Abizaid said recently, "I believe that more American forces

prevent the Iraqis from taking more responsibility for their own future.”

Do you agree with those two generals?

General PETRAEUS. Sir, my mission will be different than the mission that they had, if confirmed. In fact, I talked to General Abizaid and General Casey both in the past week and they both support the increase in U.S. forces as a way of helping the Iraqi government get the time and space that it needs to be able to come to grips with the difficult decisions that they in fact identified.

Chairman LEVIN. We will ask General Casey when he is before us as to whether or not he still stands with the statement which he has made and which General Abizaid has also made, along the line that the more American forces that we provide the less likely it is that the Iraqis will take responsibility for their own future.

On the question of benchmarks, General, President Bush says that the Iraqis have agreed to meet certain political, economic, and military benchmarks. Are you familiar with the President’s statement?

General PETRAEUS. Yes, sir.

Chairman LEVIN. Have you seen those benchmarks?

General PETRAEUS. Sir, I have not seen lists of them. I am familiar with his statement and of course with the benchmarks that you outlined that Secretary Gates mentioned earlier.

Chairman LEVIN. Have you seen the actual benchmarks that the President referred to?

General PETRAEUS. If you are talking about the slides and the briefing, sir? I am not sure which you are actually referring to.

Chairman LEVIN. The President has referred to benchmarks. He has said that the Iraqis have agreed to benchmarks and that we will hold the Iraqis to those benchmarks. Have you seen the benchmarks the President referred to?

General PETRAEUS. Yes, that is correct. I know what you are talking about sir, in terms of what they have agreed to provide in terms of the military forces in Iraq, money for the reconstruction, money for foreign military sales, and so forth, yes, sir.

Chairman LEVIN. Will you see to it that we get a copy of those benchmarks?

General PETRAEUS. Yes, sir.

[The information referred to follows:]

The requested benchmarks have been provided to the Office of the Secretary of Defense which is coordinating turnover of this information.

JAN 30 2007

THE SECRETARY OF STATE
WASHINGTON

Dear Mr. Chairman:

Thank you for your recent letters regarding the way forward in Iraq and the role of benchmarks for political issues Iraq must solve. The President has also asked that I reply on his behalf to your December 12, 2006, letter to him concerning the importance of announcing a deadline for beginning a phased redeployment from Iraq.

I share your view that the Iraqi Government must meet the goal it has set for itself – establishing a democratic, unified, and secure Iraq. We believe the Iraqi Government understands very well the consequences of failing to make the tough decisions necessary to allow all Iraqis to live in peace and security. President Bush has been clear with Prime Minister Maliki on this score, as have I and other senior officials in discussions with our counterparts. We expect the Prime Minister to follow through on his pledges to the President that he would take difficult decisions.

In his January 10 address, the President stated that after careful consideration he had decided that announcing a phased withdrawal of our combat forces at this time would open the door to a collapse of the Iraqi Government and the country being torn apart. The New Way Forward in Iraq that the President announced on January 10 is designed to help the Government of Iraq to succeed. This strategy has the strong support of General Petraeus and his commanders, and we must give the strategy time to succeed.

On your point about a political solution being critical to long-term success, I also agree. However, with violence in the capital at the levels we have seen since the Samarra attack on February 22, 2006, extremists and terrorists have been able to hold the political process hostage. The President's strategy is designed to dampen the present level of violence in Baghdad and ensure that Iraq's political center has the security and stability it needs to negotiate lasting political accommodations through Iraq's new democratic institutions.

The Honorable
Carl Levin, Chairman,
Committee on Armed Services,
United States Senate.

- 2 -

At the same time, the President has made clear to the Prime Minister and other Iraqi leaders that America's commitment is not open-ended. It is essential that the Government of Iraq -- with our help, but its lead -- set out measurable, achievable goals and objectives on each of three critical, strategic tracks: political, security, and economic. In this regard, Iraq's Policy Committee on National Security agreed upon a set of political, security, and economic benchmarks and an associated timeline in September 2006. These were reaffirmed by the Presidency Council on October 16, 2006, and referenced by the Iraq Study Group; the relevant document (enclosed) was posted at that time on the President of Iraq's website.

Beyond that, as the President said, Prime Minister Maliki made a number of additional commitments including:

- Non-interference in operations of the Iraqi Security Forces;
- Prosecution of all who violate the law, regardless of sect or religion;
- Deployment of three additional Iraqi army brigades to Baghdad; and
- Use of \$10 billion for reconstruction.

We will continually assess Iraq's progress in meeting these commitments as well as other initiatives critical to Iraq's development.

Sincerely,

Condoleezza Rice

Enclosure:

As stated.

UNOFFICIAL TRANSLATION

Notional Political Timeline

September 2006

- Form Constitutional Review Committee
- Approve law on procedures to form regions
- Agree on political timetable
- Approve the law for Independent High Electoral Commission (IHEC)
- Approve the Investment Law

October 2006

- Approve provincial elections law and set date for provincial elections
- Approve a hydrocarbon law

November 2006

- Approve de-Ba'athification law
- Approve provincial council authorities law
- Approve a flag, emblem and national anthem law

December 2006

- Approve Coalition Provisional Authority Order 91 concerning armed forces and militias
- Council of Representatives to address amnesty, militias and other armed formations
- Approve amnesty, militias and other armed formations law

January 2007

- Constitutional Review Committee completes its work

February 2007

- Form independent commissions in accordance with the Constitution

March 2007

- Constitutional amendments referendum (if required)

Chairman LEVIN. Do you agree that we will hold the Iraqi government to the benchmarks that it has announced?

General PETRAEUS. We certainly will to the very best of our ability, sir.

Chairman LEVIN. How are we going to do that? What is the leverage on them?

General PETRAEUS. Sir, there are a number of different ways of leverage. Among them are providing assistance or withholding assistance in various forms of the lines of operation that are pursued in Iraq.

Chairman LEVIN. Do you agree that the success of the strategy is dependent upon the Iraqis carrying out their commitments?

General PETRAEUS. I do, sir.

Chairman LEVIN. Over the last several weeks, we have heard about rhetorical off-ramps that are built into the flow of 21,000 additional troops, which implies that the U.S. commitment is conditional. Secretary Gates said that there is plenty of opportunity before many of the 21,000 additional troops arrive to evaluate, "whether the Iraqis are fulfilling their commitments to us."

Now, a story in this morning's Washington Post indicates that you do not intend to use off-ramps to slow or cancel the deployment of additional U.S. forces to Iraq even if the Iraqis fail to meet their commitments. Is that story true?

General PETRAEUS. No, sir, it is not. I think that was, "a source close to General Petraeus" or something like that. What I would do in the event that the Iraqi benchmarks are not met is obviously discuss that with my boss at Central Command, with the Secretary of Defense, and then, frankly, determine what it is that we are going to do.

Chairman LEVIN. So as of this time, do you know whether the flow of additional forces is conditional upon the Iraqis keeping their political, economic, and military commitments?

General PETRAEUS. Sir, I do not believe that there are specific conditions that are established. I know again that there is certainly a keen awareness of the Iraqis and what it is that they are supposed to do. In fact, General Odierno has reported to me that three to four of the battalions, of the Iraqi commitment, actually are already in Baghdad, and that they came in at something like the 80 percent figure. That includes their leave numbers, however.

Chairman LEVIN. Do you believe that it is important that the Iraqis understand that they need to reach the political settlements which are essential to resolve the sectarian violence and to defeat the hard-core insurgents?

General PETRAEUS. It is very important, sir.

Chairman LEVIN. What forms would that pressure take?

General PETRAEUS. Sir, I think everything from moral suasion in meetings to again either giving additional or withholding assistance.

Chairman LEVIN. Could that also mean providing or not providing parts of the 21,000 troops?

General PETRAEUS. Sir, it could.

Chairman LEVIN. Now, we understand from columnist David Broder and from what you said here this morning that you are willing to provide a regular report every couple weeks on Iraqi progress on meeting the agreed upon benchmarks. Is that accurate?

General PETRAEUS. Sir, I would be happy to provide updates to this body on whatever basis. I would like to make sure it is long enough to make sure it is meaningful and yet certainly short enough so you can keep track of what is going on.

Chairman LEVIN. We appreciate that, and we also want you to not be bogged down with reports. We like them regularly, but we do not want you to be focusing on reporting to us. You have other duties to perform.

General PETRAEUS. Right, sir.

Chairman LEVIN. But we would then expect those regular reports, because for some of us and I think many of us it is critically important that that pressure be felt by the Iraqi government. They have not complied with previous commitments that they have made. I am very doubtful as one Senator that it is likely they are going to carry out the other commitments that they have made. I just think history should make us very dubious about the likelihood that they are going to carry out these critically important commitments in the political area as well as the military and economic area.

But those reports, to the extent that you will make those regularly, will be valuable to us in determining whether or not the Iraqi government is doing what only they can do, which is to work out the settlement of differences and to carry out their commitments.

Reports do not constitute pressure by themselves. They are useful, but simply reporting that Iraqis have failed to achieve a benchmark does not mean much if there are no consequences to that failure. As I said, they have consistently failed to meet their commitments to increase forces in Baghdad, to stay on schedule for the drafting of their constitution, to hold a national reconciliation conference, or disarm the sectarian militias. So consequences need to be clear, real, significant, and used if pressure is going to make a difference in terms of Iraqi behavior. Would you agree with that?

General PETRAEUS. I would, sir.

Chairman LEVIN. General, will U.S. forces have unfettered access and complete freedom of action in all neighborhoods, without Iraqi political interference?

General PETRAEUS. I am told they already do, sir, but it is something I will certainly confirm, if confirmed.

Chairman LEVIN. Who will have the operational and tactical control of U.S. battalions that are partnered with the nine Iraqi brigades in the nine sectors of Baghdad?

General PETRAEUS. U.S. commanders, sir.

Chairman LEVIN. Who will have operational and tactical control of the nine Iraqi brigades themselves?

General PETRAEUS. I believe it is Iraqi commanders, sir, and to ensure unity of effort what General Odierno is already working on in fact is linkages at each of the levels of command, co-located command posts, terms of reference, and so forth.

Chairman LEVIN. What about the U.S. adviser teams that are embedded with Iraqi units that are operating in Baghdad? Who will have operational and tactical control of those teams?

General PETRAEUS. U.S. units, sir.

Chairman LEVIN. Who will be responsible for the force protection of U.S. adviser teams with Iraqi units?

General PETRAEUS. The unit in whose area they are located, sir.

Chairman LEVIN. The U.S. unit?

General PETRAEUS. Yes, sir.

Chairman LEVIN. Thank you.

My time has expired. Thank you.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

General Petraeus, in your view, since you have been intimately involved in Iraq from the beginning, suppose we announce tomor-

row that we would withdraw within 4 to 6 months. What are the results there in Iraq and in the region?

General PETRAEUS. Sir, I think that sectarian groups would obviously begin to stake out their turf, try to expand their turf. They would do that by greatly increased ethnic cleansing. There is the very real possibility of involvement of countries from elsewhere in the region around Iraq entering Iraq to take sides with one or the other groups.

There is the possibility certainly of an international terrorist organization truly getting a grip on some substantial piece of Iraq. There is the possibility of problems in the global economy should in fact this cause a disruption to the flow of oil and a number of other potential outcomes, none of which are positive.

Senator MCCAIN. Eventually there is every likelihood of a scenario of chaos?

General PETRAEUS. Absolutely, yes, sir.

Senator MCCAIN. Suppose we send you over to your new job, General, only we tell you that you cannot have any additional troops. Can you get your job done?

General PETRAEUS. No, sir.

Senator MCCAIN. Suppose that we send you additional troops and we tell those troops that, we support you, but we are convinced that you cannot accomplish your mission and we do not support the mission we are sending you on. What effect does that have on the morale of your troops?

General PETRAEUS. It would not be a beneficial effect, sir. Obviously, a commander would like to go forward with as much flexibility as he can achieve. I was assured yesterday by the Secretary of Defense, by the way, that if we need additional assets, my job is to ask for them. If they are not provided in some case, my job is to tell my boss the risk involved in accomplishing the mission without the assets that are required. At some point, of course, you may have to go back and say that you cannot accomplish the mission because of the assets that have not been provided.

Senator MCCAIN. You are fairly familiar with the Iraqi leadership. You have known these individuals. Based on your experience with them, how effective do you think threats of withdrawal of U.S. troops are in achieving real progress in Iraq?

General PETRAEUS. Sir, there are certain elements in the government that might actually welcome withdrawal. There are others certainly that would fear it greatly. It certainly depends on which side of these various divides they're on. I do not think that the responsible members of that government right now certainly want us to withdraw, and if it is levers that we are after, again withdrawing support from a specific organization or perhaps institution in my experience was more effective in trying to get a desired outcome.

Senator MCCAIN. Based on your knowledge of the Army and its state of readiness, how long do you believe the increased troop levels and tempo of operations can be sustained?

General PETRAEUS. Sir, my understanding is that there are contingency plans being developed to sustain the surge, the increased force levels, if that is required. Having said that, as I mentioned in my opening statement, I am keenly aware of the strain on our

soldiers and marines in particular, and on our families, certainly the other members of the military who are in positions that have been deploying, and it is for that reason that, as I mentioned, I applaud the increase in our ground forces in particular.

Senator MCCAIN. You were a young officer following our defeat in the Vietnam War. Would you contemplate the effects of defeat in Iraq as compared with an additional, very difficult strain on our men and women in the military who are having to serve more than we would want them to?

General PETRAEUS. Sir, obviously what our men and women in the military want to do, I think, is to accomplish their mission and then to come home.

Senator MCCAIN. I am saying it took us a long time to recover from losing the war, did it not?

General PETRAEUS. Yes, sir.

Senator MCCAIN. Do you understand the command and control relationships between the American and Iraqi forces in this new plan? I am very concerned about unity of command.

General PETRAEUS. Sir, I share your concern. Again, on the one hand, though, we have pushed Iraqis to do more, to take charge in many cases, and so we have in fact almost a good news, bad news story. The good news is that the Iraqis are willing to take command in many cases. The bad news is that makes us have to achieve unity of effort rather than unity of command, and that is why we would have to have those relationships all the way up and down, with command posts co-located and so forth to assure that.

Senator MCCAIN. We need to get that sorted out, General.

General PETRAEUS. Yes, sir.

Senator MCCAIN. I know of no successful military operation where you have dual command.

In your judgment, what is a reasonable estimate of the time needed to demonstrate whether such efforts, these efforts, are having success?

General PETRAEUS. Sir, under the current plan as I understand it, the final brigade would be operational in Iraq at the end of May, giving them time to get established, to understand the situation on the ground. Other forces will have already certainly been moving into their areas of operation. I would think that we would have indicators at the least during the late summer of the ability to clear and hold and then build in the Baghdad area and to secure that population.

Senator MCCAIN. Will all five brigades be massed simultaneously or is there some other plan to have all five brigades move more slowly into Baghdad?

General PETRAEUS. Sir, I have not—

Senator MCCAIN. In other words, are you confident that they are getting them over there as quickly as possible?

General PETRAEUS. Sir, I have asked that those forces be moved as rapidly as possible, if I am confirmed.

Senator MCCAIN. Are you confident that they will be?

General PETRAEUS. Sir, the Secretary and the Chairman of the Joint Chiefs said yesterday that they are in fact scrubbing that, if you will, to determine how quickly they can in fact move those forces there.

Senator MCCAIN. You were in Haiti and Bosnia and you are familiar with Kosovo. It took an overwhelming number of military boots on the ground in Kosovo and Bosnia in order to bring about the end of what was basically sectarian violence, Serbs killing Muslims, Muslims or in the case of Kosovo, Albanians, right?

General PETRAEUS. Yes, sir.

Senator MCCAIN. Yet your numbers, by any estimate or formula that you use, you are receiving are either inadequate or bare minimum. Does that concern you?

General PETRAEUS. It does, sir. If you look at the counterinsurgency manual, for example, and you have the 1-to-50 ratio of counterinsurgents to citizens, you would say that, well, for Baghdad's population you should have somewhere around 120,000 security forces. If you add all of the U.S. forces that will be on the ground when we have the full increase in forces, including Special Operations Forces, all the Iraqi forces, military and police, you get to about 85,000. Not all of those are as effective as we might want them to be, particularly in the police side. However, there are tens of thousands of contract security forces and ministerial security forces that do in fact guard facilities and secure institutions and so forth that our forces, coalition or Iraqi forces, would otherwise have to guard and secure, and so that does give me reason to believe that we can accomplish the mission in Baghdad with the additional forces.

Senator MCCAIN. How is the morale?

General PETRAEUS. Sir, the morale is good. Troops in the field take it one day at a time, sometimes one foot in front of the other foot, and continue to move forward to accomplish their mission.

Senator MCCAIN. Thank you very much, Mr. Chairman.

Thank you, General.

Chairman LEVIN. Senator Kennedy.

Senator KENNEDY. Thank you, Mr. Chairman, and welcome, General Petraeus.

General Petraeus, I have concerns about this policy, but I have every intention of voting for you. I think you are an outstanding military officer. Our soldiers really deserve the best and I think they are getting it with your service, even though we have some real reservations, I do, just generally on the policy.

I think Americans really are looking and asking about this timeline, these benchmarks which you referred to and responded to the chairman and also Senator McCain. They are really wondering now, with the announcement by the President about these additional kind of forces, what are the benchmarks and whether they can be met. I know this is an old issue, an old question, and it will be older before I am sure the end of the hearing. But you have talked about late summer in terms of the military aspect. With regard to the security, the President has even indicated in his speech that he believed that all the provinces, he thought, would be secured by the fall.

To establish its authenticity, the Iraqi government plans to take responsibility for security in all of Iraq's provinces by November. That is security. We are talking about the political decisions that have been reached earlier. What are really the benchmarks that

you have established yourself, that they will have to be realized to really know whether we are making progress?

General PETRAEUS. Sir, I have general benchmarks in my mind. Obviously, until I can go over to Iraq, if confirmed, and sit down with the staff over there and work through the specific timing of which battalions and brigade headquarters arrive when, when they expect to get certain decisions to see what Iraqi resources are committed, and so forth, and what timeline.

Senator KENNEDY. I am thinking now in terms of the non-military, I mean of the oil revenue law, the provincial elections, and the demilitarization of the militias. Do you have these benchmarks established now? I think Americans want to know when we are going to expect we can measure some progress. You have been very frank in indicating you would come back to the committee. You have been very frank in indicating that if this does not work as an operation you do not rule out moving in another direction.

But what is the best you can tell the American people as to what would be the benchmarks? You have given it to us with regard to security. Is there any additional information you can give us with regards to reaching the benchmarks on these other items which are so essential, obviously, in terms of the new direction of Iraq?

General PETRAEUS. Sir, I cannot give you dates at this point in time. Again, I can tell you, however, that I have in fact discussed some of this already just in passing with Deputy Prime Minister of Iraq Barham Salih and with others who have called to congratulate me on the nomination.

Senator KENNEDY. You were kind enough to drop off a nice book when you were good enough to visit and I have gotten through a good part of it during the past few days and over the weekend. In that were these words, effectively: "Sometimes, the more force is used the less effective it is. Any use of force produces many effects, not all of which can be foreseen. The more force applied, the greater the chance of collateral damage and mistakes. Using substantial force also increases the opportunity for insurgent propaganda to portray lethal military activities as brutal."

The manual talks about the importance of the decisive battle for the people's minds. Many have argued that the overwhelming military force presence in Iraq actually will inflame the insurgency. What is your view on that?

General PETRAEUS. Sir, I think that at this point in Baghdad the population just wants to be secure and, truthfully, they do not care who does it. They would like it to be legitimate Iraqi security forces that are fair and impartial. I heard, for example, early feedback that a Kurdish unit that has moved into a mixed area in Baghdad was actually received well because in fact they provided some additional security that did not exist before.

Again, if confirmed, that is something I obviously have to see for myself on the ground, to walk the streets, to talk to the people, and to get a sense of that for myself. But that is my personal view right now from afar.

Senator KENNEDY. Some have said, if you have 140,000 troops over there who are not able to gain security, why do you believe an additional 22,000 are likely to gain it?

General PETRAEUS. Sir, to some degree it has to do with how they are used. Again, if the mission is as it is now under the new approach, to focus on the security of the population, then forces must locate with and live with that population, certainly again link arms with Iraqi forces in this particular case, coordinating with all the others that might be in an area as well.

Senator KENNEDY. The idea of tens of thousands of American troops in combat in downtown Baghdad, what is your reaction to whether that really helps win the hearts and minds of the people or whether it is perceived as increasing hostility by American soldiers? How do you measure that? This is also referred to in the book.

General PETRAEUS. Sir, obviously it depends literally on how those forces conduct themselves, how they carry out their missions, if they are both respectful and firm as required. Certainly there will be a need to kill or capture those bad elements that I talked about. On the other hand, what we want to do, of course, is to clear areas as quickly as possible to provide security for them of a persistent nature and then to enable the holding and the building piece that is the real key to achieving the support of the population.

Senator KENNEDY. You have in your manual "Long-term success depends on the people taking charge of their own affairs, consenting to the government's rule." What is the time? The number of soldiers now that are being sent over there, how long are those soldiers going to be sent over there? We have heard words about escalation, we have words of surge. Is this going to be permanent? Is it temporary? What is the time limitation that you can tell us about?

General PETRAEUS. Sir, I do not know what the time limitation is at this point.

Senator KENNEDY. At this point therefore we should assume that they will remain over there until we hear further from you?

General PETRAEUS. As they are needed for that particular mission, yes, sir. Senator, if I could, I think it is important to remember that this particular government, the Prime Minister Maliki government, has only been in office 8 months. They are the fourth Iraqi government in 3½ years and, given the situation in Baghdad, I think it is not wholly surprising that they have had a tough time getting their feet on the ground.

In fact, there are some signs certainly literally in recent days and weeks that there is a stiffer approach.

Senator KENNEDY. I thank you, General. I think many of us are concerned that we have had surges in the past at Najaf, Fallujah, Baghdad, and after the Samarra temple, and they have not been successful, and there is concern, which I share, about the surge at the present time, whether this can really achieve the objectives which you have outlined. But in any event, I appreciate your service. Thank you for your willingness to lead.

General PETRAEUS. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Kennedy.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

General Petraeus, I think I do not recall anyone being so praised by all sides as you have been. I honestly believe you are the right person for this very difficult task before us. I have enjoyed being with you on three different occasions in Iraq and we got the very strong impression that you had a handle on things, and I appreciate what you are about to get into.

Let me voice a concern that I have, and I think that I am not going to ask you to respond to a question unless there is time at the end of my questioning. That is on the justice system that we hear so much about. I know there are several attorneys that will probably be addressing this in questions after I am completed.

But any time a top lieutenant to al-Sadr, one who has been involved in torture, assassinations, and then is just turned loose at the request of the Prime Minister, it is something that bothers me a great deal. I have heard Senator Sessions talk about analogies between Alabama incarcerations and what is happening over there. In Texas, some 170,000 people are incarcerated, while only 28,000 are in Iraq. We know it is a problem that needs to be addressed and if there is time I will ask you a question on that.

But I wanted to first, before doing that, get into the success story of Somalia. The train and equip program there—I had occasion to be in Ethiopia on numerous occasions while they were going through this program, and when they were called upon to go with us into Somalia it was a huge success.

I am wondering if there is anything you can draw on from that success that might have application to what your mission is going to be in Iraq?

General PETRAEUS. Sir, I will certainly look at it. I must be candid and say I have not seen something that is directly transportable so far. Certainly there are ways that the assistance has been provided there that has been unique and useful, I think, but that is something I will certainly look at.

Senator INHOFE. This authorization committee has been very straightforward in coming up with funds for train and equip, but also for the Commanders' Emergency Response Program (CERP). I heard you say in your opening statement, you talked about more resources in the neighborhoods, things that you can do in the neighborhoods. I know that I have talked to General Chiarelli and you about CERP.

Tell us a little bit about how more effective it would be if you have more capability to respond to some of these needs immediately than going through the system that we are more accustomed to?

General PETRAEUS. Sir, in the counterinsurgency field manual there is actually a line in there that says "Money is ammunition," and at certain points money can be the most important ammunition. There are certainly points when real ammunition is the best ammunition, but there are times certainly, once you have done the clear and hold, where you are trying to build, where the most important asset is that ability to help get streets cleaner, connect sewage lines, make small improvements in the lives of people that are very meaningful right off the bat. That has been aided enormously by CERP.

I would like to add, though, that as I have thought about the prospect of going back to Iraq, I have thought that our effort—and in fact there is an effort by the Office of the Secretary of Defense, Paul Brinkley, Deputy Under Secretary for Business Transformation, to pursue this, to either reestablish or build sustainable, self-sustaining small businesses and industries in Iraq as being hugely important. Iraq does enjoy some enormous comparative advantages when it comes to the production of certain types of materials, among them asphalt, fertilizer, of course a variety of petroleum products and so forth, some agricultural products, and I think that we have to look very hard and fund those opportunities that are self-sustained vice those that are just of a Works Progress Administration (WPA)-type nature.

Senator INHOFE. On the WPA-type of deal, it was either you or General Chiarelli who told me about the fact that you had lines into Baghdad neighborhoods, but no grid to bring them in.

General PETRAEUS. That is correct, yes, sir.

Senator INHOFE. So they are climbing up with wire and electrocuting themselves trying to bring it in. This is the type of thing that can be done in my opinion immediately, and I would hope that you would tell us as we develop next year's legislation if you think we need to have more attention to that program, to CERP.

General PETRAEUS. Sir, I certainly will, and I can assure the committee that I also intend to encourage the Iraqi government to use the substantial resources that it has. I have in fact also been in communication with the minister of finance, who is a former colleague there, through an interpreter, to encourage them very strongly to spend the oil revenues that they have. There are reports of as much as \$10 to \$12 billion that is available on the Iraqi side. I think it is very important that they use that and that they use it on the behalf of all Iraqis and not just in one area or another.

Senator INHOFE. That is good.

Senator McCain mentioned the experience in Bosnia. I can remember being up in Tuzla when they said that in terms of the ethnic violence that it would never be resolved, this was early on, and yet it was, as Senator McCain pointed out. So I think it showed in a very difficult area, that is a different culture—I understand that. But if it was resolved there, do you think it can ultimately be resolved in Iraq?

General PETRAEUS. Sir, that is certainly my hope. I must tell you that in my first year, really throughout the first 2½ years in Iraq, my sense was that this was a country in which the divides were actually less than those in Bosnia. Real ethnic hatred is what you find when you read Evo Andrich's book, "The Bridge Over the Drina," and some of the unspeakable acts that were inflicted upon each other in the centuries of ethnic violence in the fault lines in the Balkans.

There is great intermarriage in Iraq, particularly in Baghdad. Unfortunately, in the wake of the Samarra mosque bombing the ethnic divides have grown, and I think it is very important to secure the population, so that we can stop that kind of violence before it spirals farther and so that we do not have to do what hap-

pened in Bosnia, which is wait for the civil war to take place and then to come in.

Senator INHOFE. That is an excellent answer.

Senator McCain also talked about the morale, how is the morale. Your answer was fairly short, but I know from my experience over there that the morale is very good. Is this not reflected in the reenlistment numbers?

General PETRAEUS. Sir, the reenlistment numbers continue to be very substantial, and particularly by those who are in units serving in theater. They continually way outpace the goals for reenlistment. I am really talking on the Army. I believe it is the same situation in the Marine Corps, and that is actually a real heartening, continuing heartening development.

Senator INHOFE. It is. That is something I observed.

With just 1 minute left, let me just mention, in The Early Bird this morning they mentioned four things attributed to your statements: inadequate planning for the liberation, failing to recognize the emerging insurgency, not having enough troops in certain areas, and holding elections in such a way that it was divisive instead of unifying. Are there any one of these four areas that you would like to elaborate on?

General PETRAEUS. The fourth one is not correct, actually. If you look at the advance policy question, what I stated really was something that many other people have recognized and that was merely that the elections had to some degree the opposite effect of what we had hoped for, and that was that because of the voting along sectarian divides that they did not unify the country as much as we had hoped. It had nothing to do with the conduct of the elections. Frankly, I thought the conduct of the elections was admirable in each case and frankly quite heroic by the Iraqis who pulled that off.

Senator INHOFE. Thank you very much, General. I look forward to working with you in this new capacity.

General PETRAEUS. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Inhofe.

Senator Lieberman.

Senator LIEBERMAN. Thank you, Mr. Chairman.

Thank you, General Petraeus. Thank you for your willingness to serve. Your testimony this morning and your answers to our questions have been excellent. You have been candid and confident at the same time. You have been candid about the mistakes that have been made and about the challenges we face, but you have been confident about the way in which we can do better, and I appreciate that.

I also appreciate the fact that you have been to Iraq, that you understand not only its history but its present. There is a temptation, a danger that people just following the news of the suicide bombings and sectarian death squads will assume that everybody in Iraq is involved in sectarian violence or terrorists or the insurgency. You know that is not true. You have testified that it is not, that most of the people of Iraq, the overwhelming majority, as you have said, quite naturally want to live a better and freer life, and the question is whether we can help their government help them do that.

I want to ask you a series of questions which in some sense summarize what you have said, because I think it has been very compelling. General Petraeus, you have said this morning that serious mistakes have been made in the conduct of the war in Iraq since Saddam was overthrown in 2003. Is that right?

General PETRAEUS. That is correct, sir. I did provide a description of those in the advance policy questions.

Senator LIEBERMAN. You have also said that you understand and appreciate the disappointment of the American people and their representatives here in Congress about the lack of progress in the war in Iraq today.

General PETRAEUS. That is correct, sir.

Senator LIEBERMAN. You have also said that you fear that there would be disastrous consequences for Iraq, for the region, for the world economy, and for the United States in the war on terrorism if we exit Iraq prematurely.

General PETRAEUS. Correct, sir.

Senator LIEBERMAN. You have said that you believe this new way ahead for Iraq that has been presented, with military, economic, and political components, is in fact a new and different strategy for Iraq than what has been tried thus far; is that correct?

General PETRAEUS. I believe it is, yes, sir. There are cases in Iraq where this has actually been conducted in the past. Fallujah, which remains to this day since it was liberated and has become one of the better gated communities in that region, is an example of that. Tal Afar is another example, although again we have to continue to watch the hold and build piece on that.

Senator LIEBERMAN. Based on those examples that you have cited and your own expertise in counterinsurgency, am I correct to conclude that you believe that this new way ahead, this new plan for Iraq, can in fact work?

General PETRAEUS. That is correct, sir.

Senator LIEBERMAN. When you say work, I mean diminish the violence being carried out by the enemies of stability and progress in Iraq, so that the Iraqis can achieve a political and economic solution themselves; is that correct?

General PETRAEUS. That is correct, Senator.

Senator LIEBERMAN. You have said, General, in response to questions from Senator Levin, I believe, that you would agree to report regularly, perhaps by video conference, to Members of Congress about the progress or lack of said that you are seeing.

General PETRAEUS. Yes, sir.

Senator LIEBERMAN. In fact, you have said that you would tell us quite directly whether we are succeeding or failing as your mission goes forward; is that correct?

General PETRAEUS. Correct, sir.

Senator LIEBERMAN. You also said, in response to a question from Senator McCain, that adoption of a resolution of disapproval, which is contemplated by our colleagues and probably will be on the Senate floor, disapproval of the new way ahead in Iraq, would not, if I remember your words, have a beneficial effect on our troops in Iraq.

But I want to ask you, what effect would Senate passage of a resolution of disapproval of this new way ahead that you embrace have on our enemies in Iraq?

General PETRAEUS. Sir, as I stated in my opening statement, this is a test of wills at the end of the day, and in that regard, speaking purely as a military commander, if confirmed, albeit one who frankly does understand enormously and treasures the value of free and open debate, free speech, who has put himself in harm's way to protect those great features of our democracy, nonetheless, having said that, a commander in such an endeavor would obviously like the enemy to feel that there is no hope.

Senator LIEBERMAN. A Senate-passed resolution of disapproval for this new strategy in Iraq would give the enemy some encouragement, some clear expression that the American people were divided?

General PETRAEUS. That is correct, sir.

Senator LIEBERMAN. Based on the answers that you have given and on your extraordinary record of service to our country and your expertise in counterinsurgency, that you have literally written the book, and your belief that this new way ahead is in fact different from what we are trying right now, with the exception of the few cities that you cited where it worked, and your testimony that passage of resolutions of disapproval would not have a beneficial effect on our troops and on the enemy, I want to make a plea to my colleagues in the Senate. I understand that the trains are on the legislative track and they are heading toward a collision. But I want to urge my colleagues to consider your testimony this morning and to put the brakes on.

You will, in my opinion, receive unanimous or near-unanimous support, and you should. You deserve it, from this committee and from the Senate. But I fear that a resolution of disapproval will send you over there with us saying you are a good and great general, but we do not agree with what you believe we need to do in Iraq.

So I want to appeal to my colleagues to consider with regard to the resolutions of disapproval or the caps on troops or the cutoff of funds to step back for a moment and give you a chance and the 160,000 American soldiers you will be commanding a chance, perhaps a last chance, to succeed in Iraq. If, God forbid, you are unable to succeed, then there will be plenty of time for the resolutions of disapproval or the other alternatives that have been contemplated.

General Petraeus, I think you are being sent into one of the most challenging and important circumstances that a general in our history has been sent into. I was thinking it may be comparable to when President Truman sent General Matthew Ridgway to Korea to replace General MacArthur when things were bleak, and General Ridgway succeeded.

I pray that you will succeed similarly in Iraq. I believe you can and will succeed similarly in Iraq. I appeal to my colleagues today to give you this chance, again perhaps the last chance, to succeed and avoid the disaster that failure will bring.

All of my colleagues here—and we have different opinions on this question—no one is embracing failure. No one is suggesting defeat.

We have different ways that we believe we can do better. I believe you deserve the opportunity as the general we are going to send over to lead our effort, to carry out this way that you believe can and will succeed.

Thank you, General.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Lieberman.

Senator SESSIONS is next. Thank you.

[Audience interruption.]

Chairman LEVIN. We would appreciate, madam, if you would please sit down. Thank you very much.

Senator SESSIONS.

Senator SESSIONS. Thank you, Mr. Chairman.

Thank you, General Petraeus, for your service, the years that you have spent away from your family serving your country, the efforts that you have expended in Iraq on two different tours. I visited you both when you were with the 101st in Mosul and commanding that unit also in Baghdad when you were training and working toward training those troops.

I do not think there is anyone more experienced on the ground than you. Thank you for being willing to go back again at this critical juncture in our Nation's history.

I would just like to thank Senator Lieberman for his comments. Senator Lieberman voted for this war, as over three-fourths of our Senate did, and he has worked hard to help us be successful. We want you to be successful. I think the comment I would make to my colleagues is that if a resolution is not going to help you be successful, why do we need it? I would just make that comment at this point.

General Petraeus, I would like to ask a few brief questions. A critical part of all of this for the American people is uncertainty about how things are going. I asked Secretary Gates and Chairman of the Joint Chiefs Pace if things got to the point where we could not be successful would they tell us so. You have indicated, I think, in your opening statement that you would. But I would like you to say that, so the American people would know that a person who knows that country, who has written a manual on counter-insurgency, if you believe it cannot be successful you will tell us so we can take a new action?

General PETRAEUS. Sir, I firmly believe that I have an obligation to the great young men and women of our country that are putting themselves in harm's way and certainly to all Americans to tell my boss if I believe that the strategy cannot succeed at some point.

Senator SESSIONS. You would not be going if you did not think there was a realistic opportunity to succeed; is that correct?

General PETRAEUS. That is correct, sir.

Senator SESSIONS. General Petraeus, you talked about walking the streets. You used that phrase. I know you used it when we were in Mosul and visited with you. Do you think it is important for a commander and will you take every effort to determine what is actually happening on the streets and how the Iraqi people are responding to the conditions there, and do you consider that a critical part of your leadership?

General PETRAEUS. I do, sir.

Senator SESSIONS. You have written the counterinsurgency manual and it requires a number of steps and coordinated efforts to occur, but is it not true that a number of things that are necessary for success are required to be done by agencies other than the Department of Defense?

General PETRAEUS. It is, sir, and to perform them with a unity of effort.

Senator SESSIONS. There is a courtesy by departments, that we do not want to be critical of one another and agencies do not do that. But I hope that you will not hesitate to insist that you obtain in a prompt timeframe the resources, the support, whether it be electricity or water or police or jails, that you will ask for even if it means other agencies may take it critically.

General PETRAEUS. Absolutely, sir.

Senator SESSIONS. I think we are in a critical time. I believe the Defense Department fully understands it because their soldiers are at risk every single day. It is a matter of life and death to them, and we have to raise the level of support I think from other agencies and departments of this government.

Now, you have been there. I remember when you explained to us some difficulties, problems, errors that occurred. You talked about the de-Baathification program going so far as to have every professor at the Mosul University be terminated, causing an uproar at the whole university. You also talked about the need for more CERP money, that is the money that a commander could utilize immediately to fix a problem that is needed to be fixed, also gaining credibility for that commander.

Do you think, now that you are going back to command this operation, that you can help eliminate those problems based on your experience, and will you have the support necessary to do so?

General PETRAEUS. Sir, I will certainly do my very best. Just for accuracy's sake, Ambassador Bremer, in fact, gave me the authorization to perform a reconciliation process for Mosul University. There were actually about 120 professors that were affected in that case and we did, in fact, conduct a reconciliation process—no Baath Party members on the committee, judicial oversight, and so forth from the Iraqi side. Unfortunately, and contrary to what he wanted as well, because it was not just de-Baathification, it was also reconciliation that was planned, that was not able to be consummated when we delivered all the paperwork to Baghdad, it was never acted upon.

Senator SESSIONS. You used that word “reconciliation.” You used it when we were introduced to the city council that had been established in Mosul of Kurds, Christians, Shias, and Sunnis, as I recall. Tell us, is reconciliation possible in Iraq?

General PETRAEUS. Sir, it has to be possible for the goals to be achieved in Iraq as they are right now certainly, and we saw examples of that throughout time. We have also seen examples of the hardening of the ethnic differences and sectarian differences, certainly in the wake again of the Samarra bombing throughout the latter part of 2006.

Senator SESSIONS. Senator Inhofe mentioned my concern over the prisons and lack of ability to detain persons that have been arrested there. There is an article in the January-February Military

Review that is consistent with the point I have been making for some months. It notes that added together, 1 in 17 Iraqis are in jail. That is two to three times less than the percentage of people in jail in the United States. Yet the chances of a civilian being killed in Iraq are 20 times greater.

It goes on to note that if you cannot identify the insurgent and you cannot imprison him when you do arrest him, you are not going to prevail. That is a military reality, not an economic or a political one.

I feel strongly that this coordinating among agencies has not occurred sufficiently to get us a justice system that works. Do you share that concern, and if you need additional resources for prisons or courts, will you ask for that?

General PETRAEUS. Sir, I will, and I do believe they are needed. I believe the rule of law has three pillars: police, judicial, and detentions. We have put a great deal of effort into the police. The results have not always been what we have wanted. We need to put considerably additional effort into the judicial side and into the detention side.

As Senator Inhofe mentioned, I think the prison capacity in Iraq is one-sixth that of the State of Texas, and they are not fighting an insurgency.

Senator SESSIONS. General Petraeus, thank you for your leadership. I believe we do have a realistic chance of success in Iraq. I believe changes in our policy were necessary to achieve that. I hope that you will utilize the leadership opportunity you have to insist that you get the support from the various agencies that are necessary to create a comprehensive and successful effort in Iraq.

I would just say to my friend, the President of the United States, whose heart I know is broken by the losses we have suffered, but who believes in the justness of this cause, that more than he would like it will be necessary for him to focus on the other agencies and departments of this government to ensure that they respond immediately to the requirements that you have to be successful. I believe he will do that, but it is going to take more of his personal time than he would like, I am sure his advisers would like him to give. But bureaucracies are not easy to move and in war, speed and decisiveness are key ingredients, and we need that.

Thank you.

General PETRAEUS. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Sessions.

Senator Reed.

Senator REED. Thank you, Mr. Chairman.

Thank you, General Petraeus. In response to the questions that Senator Sessions raised about coordination and also in your own testimony, which is a plea for further support, it is your opinion that the Secretary of State and the Department of State have failed to adequately support military operations in Iraq?

General PETRAEUS. Sir, it is my belief that the overall inter-agency effort needs to be substantially more robust than it is.

Senator REED. Do you have any indication it will?

General PETRAEUS. Sir, that was part of the plan that was laid out by the President. I have talked with some of the individuals involved in establishing that. There is a doubling of the Province Re-

construction Team (PRT) members as one of those areas, and it is certainly something that I will pursue because, as I mentioned, governmental capacity-building in Iraq is hugely important to the comprehensive effort.

Senator REED. General, you served extensively in Iraq. We have all on this committee had the occasion to visit there. But we have heard repeated stories about building up the PRTs without any significant progress in that regard. This seems to me another one of these plans that never seem to get effected.

I think I agree with you. I agree with Senator Sessions. The Department of Defense, military officers, enlisted men and women, have been carrying the burden here without adequate support, and I do not see anything in this plan really that will augment your efforts, which I think undercuts your ability to perform your mission.

Let me go back to the heart of what you are engaged in. Under the counterinsurgency manual which you prepared and you have indicated, 120,000 troops is the doctrinal force size structure. There is about 85,000 troops total, you have indicated. Probably the 50,000 Iraqi forces, if there are 10,000 reliable troops, that is more than I think we can reasonably expect. So I am guessing or speculating you have 40,000 effective troops for a mission that requires 120,000.

So it is your best military advice that this increment of 20,000 American forces is adequate to do this job?

General PETRAEUS. Senator, I believe again that the additional forces, these tens of thousands of contract security forces and ministerial security forces, actually do relieve us of substantial burdens that otherwise coalition or Iraqi forces would have to bear.

Senator REED. General, as I was out there I was shocked. Even Prime Minister Maliki told me that some of these ministerial forces are worse than the insurgents.

General PETRAEUS. Some indeed, yes.

Senator REED. They are disreputable, they are involved with the sectarian killings. I do not know, but does Blackwater work for you now?

General PETRAEUS. Blackwater does not work for me, although they are under contract certainly to a number of organizations. But as you have seen on your trips, for example, the U.S. embassy is guarded by contract guards. My personal security on my last tour was actually contracted out to I think it was a British security firm so that we could free up the military police to secure my own officers who did not have security provided for them.

So again, that frees up our forces and it does that in numerous different places.

Senator REED. General, that situation has existed before this surge. I find it hard to believe that you would give as your best advice to this committee that the differential, probably 40,000 troops in terms of doctrine, is going to be made up by ministerial forces of Iraq that are generally unreliable and by private American contractors or other contractors. Is that the differential that is being made up?

General PETRAEUS. Sir, again the additional U.S. forces will double the number of U.S. forces in Baghdad. The second, of course,

is how they are used. Again, to secure the population those forces have to be in the population and that will be critical.

Senator REED. Let us talk about how they are used. First, as alluded to in other questioning, there is a real question of unity of command. You have a bifurcated command structure. It is the nature of this operation. You have a sovereign state. In any other counterinsurgencies, in Belfast, in Algeria, there was no lack of unity of command. It was essentially part of the country. So that is a problem.

Also, I would like to ask about enablers. One of the problems in any military operation is not so often ground combat forces, it is translators, civil affairs officers, people with the cultural sensitivities you talked about so eloquently. Do you have adequate enablers to do this new mission?

General PETRAEUS. Sir, that I do not know. Again, if confirmed, that is high on my list, to determine if we have not just those enablers, but also all the combat support and combat service support elements that you will recall from your own service are so critical to enabling the soldier who is on point.

Senator REED. We are presenting this strategy as a new forward with a new plan, and a key element as you indicate that you are not quite sure we have those forces in place or can generate those forces.

General PETRAEUS. Sir, I have talked to General Odierno about this. Not to be presumptive, but in fact when people consulted me, in my current position, during the development of the strategy General Odierno assured me that they had been looking very hard at the enablers and that they think that they are going to be okay generally in the combat service support arena.

But again, that is something I have to confirm for myself, if confirmed, and once I get on the ground.

Senator REED. Let me also ask, because this new tactical approach, this new strategic approach, has potential benefits, but it also has inherent difficulties. You will disperse American forces to small groups. You will have to supply those forces. The most significant attack against our forces are improvised explosive devices (IEDs) against convoys, which means you will be multiplying the convoys in Baghdad, exposing more of them to attack. Is that a fair estimate of the risks?

General PETRAEUS. There is certainly risk. Obviously, as we disperse soldiers you always want to make sure that they are capable over anything that they could confront out there. But certainly there will be soldiers literally on the road. There will be soldiers on the streets and so forth.

Senator REED. The other issue, General, that has come up, I was out last fall. I talked to General Miegs, U.S. Army (Retired), and I talked to many other commanders on the ground, and they said in 6 months this situation will resolve itself one way or the other. Your timeframe for deployment takes you, as you indicate, to May when you will get your troops in country. You have a lot of work to do to prepare the battle space, to move the troops in.

We seem to be pushing quite close to that 6-month window, for what it is worth, before you will actually start taking concerted ef-

fective action on the ground. Just in terms of timing, is that accurate?

General PETRAEUS. Sir, again, I really need to get into the plan with Lieutenant General Odierno and to see how the forces will be employed. I think you have to wait until you have a certain critical mass of forces on the ground to take action so that you do not do the whack-a-mole and all we do is go into this neighborhood and then go into that neighborhood. So that you want to start with a certain degree of critical mass. I do not know that that degree is all five brigades having to be there and completely set before you begin operations.

Senator REED. In response to Senator McCain's question about what happens if we announce some type of withdrawal, you indicated that sectarian groups have been staking out turf. Are they doing that now?

General PETRAEUS. In some cases they certainly are, yes, sir. Certainly along the fault lines in threatened neighborhoods that has been taking place.

Senator REED. That is likely to accelerate or decelerate, regardless of what we do?

General PETRAEUS. Sir, I think if we secure the neighborhoods that that will decelerate.

Senator REED. But at this point it seems to you to be progressing rapidly?

General PETRAEUS. No, sir, I am not so sure. Again, it is hard from this distance to get the real granularity of what is going on. There clearly is additional ethnic displacement, soft ethnic cleansing, whatever term you want to use. How prevalent that is is hard again for me at this distance.

Senator REED. You mentioned ethnic cleansing. That I think is happening and the description of whether it is deliberate, part of a plan, or just spontaneous is something you will, I presume, determine when you get out there on the ground.

The other issue you raised is the involvement of other countries. There is a significant involvement of the regional countries there now, and one of the things that seems perplexing to me is that there are leading figures in this government that have close, long-time ties to Iran. I think that will continue regardless of what you are able to do on the ground, I presume.

General PETRAEUS. It certainly presents challenges if in fact it manifests itself in resisting actions against those who are helping the enemies of the new Iraq, not just of the coalition forces but the enemies of the new Iraq, in Iraq. As you are well aware, there have been actions against Iranian elements in Iraq, and again that will be one of the challenges that we will have to come to grips with, and those ties clearly complicate matters.

Senator REED. One final point. One of the consequences of what you do, regardless of the ultimate level of success—and I wish you success because the lives of a lot of young Americans are in your hands and you know that, and you will perform I think magnificently taking care of those troops. But we could unwittingly be entrenching a government in Baghdad that has close and continuing ties with Iran. That is a distinct possibility.

General PETRAEUS. Sir, I would have to do literally a leadership profile of that to make a reasonable assessment of that. My understanding is that Prime Minister Maliki certainly is under pressure in respects with that, but that he has also pushed back as well. So again, once I get on the ground, if confirmed, and can sort out these various dynamics and influences and how firm they are, then we can move forward.

Senator REED. Thank you.

General PETRAEUS. Thank you, sir.

Chairman LEVIN. Thank you, Senator Reed.

Senator Collins.

Senator COLLINS. Thank you, Mr. Chairman.

General Petraeus, first let me echo the sentiments of everyone here, that I am so grateful that you have agreed to undertake this enormous challenge. I have great confidence in you personally and I hope that you succeed.

General PETRAEUS. Thank you, Senator.

Senator COLLINS. I have read a very interesting article that you wrote on counterinsurgency that was published a year ago in the *Military Review*. You offered 14 observations based on your previous tours of duty. As I look at those observations, observations that I think are insightful and that I agree with, I conclude that they are not consistent with the new strategy that we are about to embark on.

Your first observation, you quote Lieutenant Colonel T.E. Lawrence, British Army (1888–1935)—also known as “Lawrence of Arabia” in August 1917 and you say: “Do not try to do too much with your own hands.” You talk about the need for the Iraqis to step up to the plate. I worry that the strategy that we are about to pursue in this country relieves pressure on the Iraqis to do what must be done and that we are making the mistake that you caution against.

There is a big question here of what comes first. Do you need to provide the additional troops and the security in order to give Maliki and other Iraqi leaders the space to do the political moves that need to be undertaken, or in fact are you lessening the possibility they are going to do that? If Iraqi leaders had more fully integrated the Sunni minority into the government, if they had passed an oil distribution law that distributed the revenues more equitably, if they had amended the constitution, if they had held provincial elections, would we be where we are today?

General PETRAEUS. We would not, Senator. What you described really has been truly an intellectual tension, frankly, about the mission in Iraq all along. You do have in the back of your mind always the wisdom of Lawrence of Arabia about not trying to do too much with your own hands. We used to say what we want to do is we want to help the Iraqis get up on their feet, we want to be near them, we want to back them up. But there are times when they start to wobble and the question is when do you move back in and provide assistance.

In the wake of the bombing of the Samarra mosque and the violence that escalated throughout the latter part of 2006, I think we have arrived at a point where in fact we do need to help them a bit more in providing security in particular, with arms linked, with

them in forward, in front, wherever we can, for the Baghdad population in particular.

Again, this of course is the fourth government in 3½ years and I think at times we probably have had expectations that were greater than they might have been, given the challenges. But I remember living through each of these transitions, and you would get a new government in and it seemed as if they were already facing an election for the next government or the next constitutional referendum or what have you. It has been very difficult for them.

They do now have the permanent government, the elected government. It has only been in office for 8 months. It has been a very violent 8 months in a period of enormous pressure on the leadership of Iraq. They do now have, according to Deputy Prime Minister Barham Salih, the oil law nearing completion. There has been progress, incremental progress to be sure.

So again, I think you very accurately captured truthfully the intellectual tension between the fear that our presence retards progress, holds it back, or that our presence can help. I do believe at this point that our presence can help and is needed.

Senator COLLINS. Your second observation is that: "A liberating force must act quickly because every army of liberation has a half-life beyond which it turns into an army of occupation." Again, this insight seems right on the money to me.

When I was in Iraq with several of my colleagues last month, we had a very interesting presentation by one of the British commanders in Basra. He described a declining consent line. He said originally when the coalition forces arrived that they were welcomed, but over time their presence has become resented and less and less tolerated.

You talk about this being a race against the clock, but I wonder if the clock has already run out, if we are already perceived by the vast majority of Iraqis not as liberators any more, but as occupiers.

General PETRAEUS. That is another great question, Senator. First, I would start by saying that every area of Iraq is different and unique, and that in some areas, interestingly, areas where we came to be seen as an army of occupation, we might now once again be seen as an army of liberation because we help provide the degree of security that has been lacking in their lives.

So I think it is important again to put your finger on the pulse of that neighborhood, of that muhallah, that district, that province, and then to act in accordance with that. The area in which the British are located, of course, is a much more cohesive area. It is a very predominantly Shia Iraqi area, and it is an area where, although there are certainly all kinds of internal differences and challenges, the Iraqis generally feel like they can get on without us over time, and that is why of course the British contingent has gradually been drawing down in Basra and the other southern, southeastern provinces.

Senator COLLINS. But that is why the British commander's observations were so interesting to me. That is not an area where you have Sunni versus Shiite. It is a Shia area. Yet, despite that, we are seeing less and less tolerance for the presence of foreign forces, and that concerns me.

General PETRAEUS. I think that is understandable, Senator, if I may, because if you think about again any country that has another army on its soil, again at some point tires of that. That is really the essence of what that lesson was. In truth, what it was really getting at is that when you get into one of these things you have to know exactly what your transition plans are. You have to have the stability and reconstruction organizations, resources, concepts, and principles already in your back pocket as you go downrange.

Senator COLLINS. Finally, I have to comment on your answer to my very dear friend, Senator Lieberman, about the impact of the passage of a resolution and whether that would, I believe the words were, demonstrate to the enemy that the American people are divided. General, the American people are not divided in support of our troops. The American people are not divided in wishing you all the success in the world despite our disagreement with the strategy.

I must say that the resolution that I have been working on with Senator Ben Nelson and Senator Warner is very clear in expressing support for our troops. I do not think it is going to come as any surprise to the enemy that the American people are in fact deeply divided over this strategy, but nothing divides us in our common support of the brave men and women who are fighting in Iraq, and nothing divides us in our common support, that we hope we are wrong and that this strategy is a success, and we wish you well as you undertake this very dangerous and difficult mission.

General PETRAEUS. Thank you very much, Senator.

If I could just add, I very much appreciate Congress' critical oversight responsibilities, I truly do, and I understand those very much as a student and as a one-time political science professor.

Senator COLLINS. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Collins.

Senator Bill Nelson.

Senator BILL NELSON. I think that point of view is very important, Senator Collins, to get across, because the way the questions were framed before would cast some doubt on those of us who would support Senator Warner's resolution. Certainly we hope and pray for success, but obviously the American people are divided about the conduct of this war. Is it any wonder? We were not told the truth about weapons of mass destruction, nor about troop strengths, nor about the cost of the war, nor about the sectarian violence. So is it any wonder that there is a huge division of opinion about the conduct of this war? That is the point that we are trying to get at here.

Now, you are going to be confirmed. Your reputation obviously precedes you and we hope and pray for your leadership being a success. There is a lot at stake for this country. I appreciate what you shared with me in our private visit.

I want to ask four questions for the record. When you come to testify before us again with the civilian leadership at your side, will you be silent if your civilian leaders provide false or misleading information?

General PETRAEUS. No, sir.

Senator BILL NELSON. Thank you for that.

In 2004, you wrote an optimistic article about the progress of the Iraqi troop training. You praised their progress and how you were expecting their performance in the field. Well, those expectations were not fulfilled. For example, you cited in this article 100,000 Iraqi police and soldiers as trained and equipped, with tens of thousands more in the pipeline. It is 2½ years later. How many Iraqi soldiers and police are trained and equipped today, General?

General PETRAEUS. Sir, my understanding from the latest report of the Multinational Security Transition Commander-Iraq is that there are 325,000 or so that have completed the training, that met the requirement to be called trained, and have the basic equipment that we agreed upon as the metric to be called equipped.

Senator BILL NELSON. Are they reliable?

General PETRAEUS. They are not all reliable, sir. Again, and in fairness, if I could, in that article I also qualified it and pointed out the many challenges that were being faced in that mission as well. I tried to be quite realistic while also giving an accurate assessment again of those particular metrics which we subsequently developed into the more rigorous assessment, transitional readiness assessment and so forth.

Senator BILL NELSON. Can you put a percentage on it that are reliable?

General PETRAEUS. Sir, I cannot from this divide. I literally have only that particular report that was sent to me.

Senator BILL NELSON. Let me tell you about a conversation I had with our Ambassador Khalilzad and General Casey. They both said—this was back before Christmas—that they would not support a surge unless there is a specific plan for success, and the ambassador even said, and I quote, that he did not want more American kids wasting their lives unless he had “a high degree of confidence in the plan.”

Do you have a high degree of confidence in this plan?

General PETRAEUS. Sir, I believe this plan can succeed if in fact all of those enablers and all the rest of the assistance is in fact provided. As I have mentioned several times here today, I am determined to make sure that people know that we have that. Again, in my periodic updates to this body I will be happy to report whether that has been forthcoming or not.

Senator BILL NELSON. Thank you for that.

My last question is, earlier in your testimony you stated that morale of our troops is high, something to that effect. You may have said good.

General PETRAEUS. I think “good” is actually the statement, yes, sir.

Senator BILL NELSON. Okay. We had a surge earlier this past summer and I am quoting from a Washington Post story on July 27. Army Staff Sergeant Jose Sistos said, “Think of what you hate most about your job, then think of doing what you hate most for 5 straight hours every single day, sometimes twice a day, in 120 degree heat. Then ask how morale is.”

Another member of that team, Specialist Tim Ivy, as quoted in the Washington Post said: “Honestly, it just feels like we are driv-

ing around waiting to get blown up. That is the most honest answer that I could give you," said the specialist.

General PETRAEUS. Sir, I remember that story.

Senator BILL NELSON. How do you respond?

General PETRAEUS. I would like to respond to that. First of all, there is nothing easy about wearing body armor and kevlar in harm's way in 125 degree temperatures. It is hard physically, it is hard mentally. It is a grind and it becomes a "Groundhog Day" existence. In fact, there were some units that had groundhog coins that they handed out as unit coins to commemorate that type of existence.

On the other hand, the reenlistment rates, particularly in theater, continue to remain so far above the requirements that clearly there is some sense among those soldiers that serving their country is something that they want to continue to do. They want to continue to serve in units with the individuals on their right and left that they have soldiered with.

So again, nothing easy about it. By the way, the driving around waiting to get blown up is something that, certainly there is driving around in a population protection strategy. There has to be. But there needs to be a purpose to the presence of those soldiers in those neighborhoods and it is to secure those neighborhoods and that should be the objective, as opposed to perhaps living outside the neighborhood and entering it a couple of times a day with a vehicular patrol, in which case a soldier could feel that he is doing what that soldier told the reporter.

Senator BILL NELSON. Godspeed, General.

General PETRAEUS. Thank you, sir.

Chairman LEVIN. Thank you very much, Senator Nelson.

Senator Graham.

Senator GRAHAM. Thank you, Mr. Chairman.

General, is it fair to say that one of the reasons that we have the highest rate of reenlistment among those who have served in Iraq is that they believe it is part of the global struggle, the war on terror?

General PETRAEUS. Sir, I think again there are a lot of reasons why someone raises his or her hand again and again. I mentioned a couple of them, a sense that you are serving a cause that is larger than self, serving one's country. I personally have always felt that the reason that I stayed in and many others have stayed in is because we like the people we do what we do with. We feel privileged to be around those who have these same concepts of selfless service, the Army values that we embrace—the other services have the same—and that is in fact a hugely important reason.

I would add certainly that the improvements that have been made in quality of life—you are never going to get rich wearing the uniform, but this body and our Congress and various administrations have over the years certainly made it so that at least it is a reasonable quality of life for our soldiers and for their families. We should never forget that we enlist the soldier, but it is the family that we often reenlist.

Senator GRAHAM. You are going back for the third time or the fourth time? Third time?

General PETRAEUS. Sir, it is the third time to Iraq. It is the fourth year or longer deployment since 2001. The first one of those was in Bosnia from 2001 to 2002.

Senator GRAHAM. Do you believe that Iraq affects the overall war on terror or not?

General PETRAEUS. I do, sir. Clearly there are elements of the greater al-Qaeda network of international extremists that want something very different than the Iraq that most Iraqis want and want something very different in that region and in the world.

Senator GRAHAM. Who bombed the Golden Mosque?

General PETRAEUS. Sir, I believe that it was from this extremist group. It may again have been insurgent elements, but certainly those who obviously did not want the new Iraq to succeed and wanted to ignite sectarian violence. If I could add, I think that there is some of that going on right now. I think they see the increases in forces. I think they see perhaps the Iraqi government showing some toughness. I think that they want to derail that before it gets any momentum.

Senator GRAHAM. That was part of Zarqawi's hope before he was killed, to create a sectarian war; is that correct?

General PETRAEUS. Sir, that is correct.

Senator GRAHAM. Now, when it comes to trying to evaluate what to do and why we are doing whatever course we chart, I just want to associate myself with Senator Lieberman. No matter how well-intentioned, a resolution being opposed to this new strategy is a vote of no confidence in you. No matter how well-intentioned, the enemy will see it as a weakened resolve. No matter how well-intentioned, those people going to fight this war are going to say, well, I am going, but Congress says good luck but you are going to lose.

I just hope we understand that. I think it is the global struggle, and if you think it is Vietnam, if you really believe we are in Vietnam, you should cut off funding. Not one other person should die in this cause. Not one American should lose a limb. No one should get hurt and we should come home tomorrow.

General, is this Vietnam?

General PETRAEUS. Sir, Vietnam was Vietnam. As a student of lessons of history and someone who did a dissertation that focused on those, every case is unique, and Iraq is Iraq. It has lots of problems. There are a few of them that are certainly related or similar to those in Vietnam. There are a lot that are very different. I truly think that we have to be sensitive to the uniqueness of each situation.

Senator GRAHAM. Let me ask you this. The consequences of losing in Vietnam compared to a failed state in Iraq, how would you compare the two in terms of our overall national security?

General PETRAEUS. I think there is really no telling what could happen if Iraq fails. I explained some of the potential consequences of that, in a region that is hugely important to the rest of the world, on a fault line really between perhaps moderates and extremists, not just between different faiths within Islam and different ethnic groups, in a very volatile region.

Senator GRAHAM. Who is the biggest winner? Name some winners of a failed state in Iraq?

General PETRAEUS. Certainly al Qaeda, the greater al Qaeda network, states that embrace extremist ideologies, those states who wish the United States and perhaps the western world ill.

Senator GRAHAM. Would Iran be a big winner if you had a failed state in Iraq?

General PETRAEUS. Sir, it certainly could be. There are some who say that Iran could. I think perhaps they are torn, actually, because it could actually cause some real consequences for their own population.

Senator GRAHAM. Does Iran want a democracy in Iraq?

General PETRAEUS. I do not believe they do. Certainly, if I could add to the previous one, I do not mean to imply that Iran has not been meddling in Iraq, nor that it has not been providing training, sophisticated improvised explosives and other devices that have created casualties and huge problems in Iraq.

Senator GRAHAM. I am going to make a statement and see if you agree with it: One of the biggest nightmares of the dictatorship in Syria and the theocracy in Iran is to have a functioning democracy in Iraq. It threatens their regimes.

General PETRAEUS. I think that is true, sir. It would obviously depend on what that—

Senator GRAHAM. Do you believe it is remotely possible to have a democracy with this level of violence in Iraq?

General PETRAEUS. I think it is very challenging, sir.

Senator GRAHAM. Some resolutions say that we go to Anbar but we leave Baghdad alone, that we do not put any troops in Baghdad. On my last trip to Iraq we met with a citizens group made up of Sunnis, Shias, I think a Kurdish person was there—I cannot remember—but they were all Baghdad residents. The one thing they told every member of our delegation is, if you leave there will be a bloodbath in Baghdad. Do you agree with that?

General PETRAEUS. I do, sir.

Senator GRAHAM. So if there is a bloodbath in Baghdad, are we going to sit on the sidelines and watch it happen? Is that in our national interest?

General PETRAEUS. Sir, that is not our strategy at this time.

Senator GRAHAM. Can you have a functioning democracy where the capital itself is not secure?

General PETRAEUS. No, sir.

Senator GRAHAM. General, when it comes time to do what you are going to be required to do, one of those things you are going to have to do unfortunately is tell some loved ones that their family member was killed as part of this surge. What are you going to tell them?

General PETRAEUS. Sir, I am going to tell them that they served their country admirably in a mission that I believe is honorable. I have had to do this before, obviously, and it is the toughest duty of any leader.

Senator GRAHAM. IEDs, that is the biggest threat to our troops. 70 percent of our casualties are from IEDs, is that correct?

General PETRAEUS. I believe that is correct, yes, sir.

Senator GRAHAM. Let me if I can very quickly explain how the new surge may affect that. One group of people involved in the

IEDs are people without a job and they do it for the money; is that correct?

General PETRAEUS. That is correct, sir.

Senator GRAHAM. So if you could improve the economy and have jobs available to people other than being in the IED business, hopefully that over time would help. That is part of the surge, right, create a better economy?

General PETRAEUS. That is correct, and it also could reduce the militias.

Senator GRAHAM. Second, there is another component to this. If the person down the street who was caught putting an IED in the ground to kill Iraqi troops and American troops, if they went to jail for 30 years or got executed that might deter IEDs; is that correct?

General PETRAEUS. Correct.

Senator GRAHAM. That is part of the surge.

Would you consider suggesting to your Iraqi counterparts to create a military tribunal to handle these type crimes?

General PETRAEUS. I would, sir.

Senator GRAHAM. Finally, an increased double capacity, a military surge doubling the combat capability to hold areas cleared, the hope would be to put pressure on the IED makers militarily, economically, and under the rule of law, to go after them, so you are not driving around waiting to get blown up.

When we go, are the gloves off? Are we going to go wherever we need to go and get wherever we need to get to fight and win this war?

General PETRAEUS. Absolutely, sir.

Senator GRAHAM. Thank you.

Chairman LEVIN. Thank you, Senator Graham.

Senator Clinton.

Senator CLINTON. Thank you, Mr. Chairman.

Thank you very much for your lifetime of service and taking on this very difficult assignment. I want to begin by associating my remarks with those of Senator Collins. We are in a dire situation, using your adjective, in part because Congress was supine under the Republican majority, failing to conduct oversight and demanding accountability, and because the President and his team, particularly the former Secretary of Defense, refused to adapt to the changing circumstances on the ground.

If this hearing were being held 3 years ago, I would have a much higher degree of optimism. It has nothing to do with the loyalty, the warrior skills, and the leadership of our men and women in uniform. It has everything to do with the years of lost opportunities and the failures of the Iraqis to step up and take responsibility for their own future.

It appears also, General, that the strategy that is being put forward inspires skepticism for good reason. Your manual, the Army-Marine Corps Counterinsurgency Manual, as we have already discussed, not only suggests a minimum force level of approximately 120,000, but the manual places great importance on building up internal institutions and training to provide security.

This escalation, despite the rhetoric about other goals, places primary emphasis on American military involvement, not Iraqi institutions. The manual makes clear the interconnections of political

and military progress, that one cannot be achieved without the other.

I have been quite gratified to hear all the positive references to Bosnia in this hearing. I can remember very well in 2001 and 2002 hearing nothing but derision about nation-building and about peacekeeping and about sufficient levels of force going in to back up whatever the political objectives might be.

You will take on a difficult role in Iraq at a time of peril, based on your leadership and expertise. But what those of us who are issuing resolutions and statements of disapproval fear is that you are being sent to administer a policy that frankly does not reflect your experience or advice or the experience and advice of our most recent example in dealing with ethnic violence, namely Bosnia.

You wrote the book, General, but the policy is not by the book. You are being asked to square the circle, to find a military solution to a political crisis. I among others on this committee have put forward ideas about disapproving the escalation, not because we in any way embrace failure or defeat, but because we are trying to get the attention of our government and the Government of Iraq.

On my recent trip to Iraq along with Senator Bayh, our interaction with the Prime Minister and his team did not inspire confidence. What I, speaking for myself, am attempting to do is to send a very clear message to the Iraqi government that they cannot rely on the blood and treasure of America any longer, that we are not going to go into Baghdad and embed our young men and women in very dangerous neighborhoods where we cannot possibly provide force protection because they will not step up and do what everyone knows they must do for themselves.

I very sincerely but wholeheartedly disagree with those who are trying to once again up the rhetoric about our position in Iraq instead of taking a hard look about what will actually on the ground change the behavior and actions of this Iraqi government.

In the absence of the kind of political full-court press that we put on in Bosnia—when I landed in Tuzla, I was briefed by Russians, French, Germans, and Americans. We had an international force, an international commitment. We had brought people to the point where they understood that success there was essential to their national security. I see nothing coming from this administration that it is willing to pursue such a policy now. They will not talk to bad people and it is bad people you talk to in order to try to further political goals, not your friends. They will not put the kind of pressure on a consistent basis on the government that is required in order to change their behavior.

I have said that I would never cut money for our troops when they are in harm's way, but I sure would threaten to cut money for the Iraqi troops and for the security for the Iraqi leadership. I do not know how else to get their attention.

But one thing I am particularly concerned about is the failure of security for our troops. The incident in Kharbala over the weekend is scary. It raises questions that we do not have answers to.

So let me, beyond my statement of joining in the comments with Senator Collins and rejecting those of our other friends on the panel who think that statements of disapproval are somehow going to undermine our effort when I think they will send the clearest

message—we know this policy is going forward. We know the troops are moving. We know that we are not likely to stop this escalation. But we are going to do everything we can to send a message to our government and the Iraqi government that they had better change, because the enemy we are confronting is adaptable, it is intelligent, it learns. It got a hold of our military uniforms, went through those gates after having cleared all those police checkpoints, killed five of our soldiers in a meeting talking about security in Iraq.

I do not believe that we are playing with a team on the other side that understands the stakes as we described them. So one thing I would ask, General, is please do everything you can to get additional security. The Humvees are turning into deathtraps, as we see the sophistication of the IEDs. We do not have enough of the mine protection vehicles, we have not even ordered enough, and we have not put them into the theater.

If we are going to put these soldiers and marines into these very exposed positions, which this strategy calls for, please come to us, ask for whatever you need to try to provide maximum protection. I disapprove of the policy. I think it is a dead end. It continues the blank check. But if we are going to do it, then let us make sure we have every possible piece of equipment and resource necessary to protect these young men and women that we are asking to go out and put this policy forward, when we are not doing the political side of the equation that is necessary to maximize the chance for their safety and success.

General PETRAEUS. I will do that, Senator.

Chairman LEVIN. Thank you, Senator Clinton.

Senator Chambliss.

Senator CHAMBLISS. Thank you, Mr. Chairman.

General, you obviously have a great challenge in front of you. Having visited with you on the ground in Iraq on a couple of different occasions, watching you in action as you train the Iraqi troops and the Iraqi security police, I have all the confidence in the world that you are the right general at the right time to be going on this mission. Had you personally attracted the attention of the enemy and had this change in direction not attracted the attention of the enemy, I do not think we would have seen the statements coming out of al Qaeda that we have seen in the last couple of days. So I think the challenge is there, but, as I say, I am very confident that you are going to be up to it.

One comment I have made about this change in strategy from day 1 is that my support of the change would be only if the additional troops had a specific mission and at the time that mission is completed that those troops are redeployed. Now, I asked that question to Secretary Gates and General Pace a couple of weeks ago, if that is in fact the mission. Is it your understanding that those are the directions which you have relative to the increase in the troops?

General PETRAEUS. Sir, in my discussion with the Secretary of Defense yesterday he made it very clear that I should ask for what we need to accomplish any mission that is given to us, and of course you want to redeploy forces when they are no longer needed

for a mission. That is about as good as I can answer that particular question.

Senator CHAMBLISS. This plan that is described as a change in strategy actually was in part developed by the Iraqi leadership, is that not correct?

General PETRAEUS. Sir, I have not been in on the planning in Baghdad and I am not in a position to comment on that. I have talked to General Odierno about aspects of the plan, but I did not ask him specifically the level of Iraqi involvement in it. I do know that the Iraqi headquarters for the Baghdad security operation is relatively new. The commander, as I think you know, was just appointed a few weeks ago. So I am not sure how much specific input that particular headquarters has had in this plan to date.

But again, obviously once I get on the ground, if confirmed, that is something I would have to dig into.

Senator CHAMBLISS. I say that because Secretary Gates responded affirmatively to that question the other day. The reason I start with that is that I have some real concerns about the leadership in Iraq and their capability of carrying out their plans. While I disagree with my distinguished colleague from New York that this is going to require purely a political resolution, you are not a political person; you are a military person, and it is going to require a political resolution and a military resolution. Otherwise we do not need to send you over there.

I think we have to have confidence that the Iraqi leadership politically as well as militarily is going to be able to do what they say they are going to be able to do.

Now, I want to ask you two questions about that. First of all, knowing what you know about the political leadership in Iraq, do you have confidence that they are willing to make the commitment that they have said they are going to make to make sure that we can accomplish this mission that you have been given?

Second, you have been on the ground training Iraqi troops. You have been living amongst them, so to speak, for two different 12-month deployments. Do you have confidence that the Iraqi military can step up and do finally what we have been anticipating and hoping that they would do for the entire period of time that we have been inside of Iraq?

General PETRAEUS. Sir, in response to those questions, having not been in Iraq for some 16 months, and although I do know and have worked with a number of the Iraqi leaders in this government, I do not know Prime Minister Maliki personally, and I will have to determine for myself. We will obviously have to have a number of close meetings and develop a relationship.

That support from the Iraqi government is absolutely critical. As you mentioned, military force is necessary but not sufficient. The sufficient piece is the additional political component, and again that is something that I will have to determine the presence of as I get on the ground.

The same, frankly, with the Iraqi security forces. Again, having been out of Iraq for 16 months, one of the tasks I will have to undertake is in fact to assess their state at this point in time. The fact is that they have received reasonable training and they have received reasonable equipping. Both of those can always be im-

proved and the equipment does need to get more robust over time, although they have received thousands of up-armored Humvees to my understanding, as an example.

But what I will have to do again is to determine the will component of this. Military forces, to be effective have skill and will, and what we will have to determine is the presence of both. But the will component will be the most important.

Senator CHAMBLISS. One issue that I have had relative to this ongoing conflict is the fact that I have been disappointed that from an intelligence-gathering standpoint we have not in my opinion achieved the results that we should have been achieving at this point in time. I am pleased to see that you have already been down to Fort Gordon in the last few days to see what we are doing there relative to supporting the war in Iraq, and we are doing some great things.

But in comparing the level of intelligence that the 101st Airborne Division received in Mosul during your tenure as commander versus the level of intelligence that Task Force Olympia received after you departed, you noted that the lack of intelligence Task Force Olympia received played a significant role in the decreasing security situation in Mosul. I would appreciate your elaborating on why intelligence decreased under Task Force Olympia, what lessons MNF-I learned in this situation, and how these lessons are being incorporated in the current operations and intelligence activities.

General PETRAEUS. Sir, the 101st Airborne Division had its habitual division military intelligence battalion at that time, which is a very robust structure. We were fortunate to have partners from all of the intelligence agencies in our government and to have special mission unit elements working with us as well.

We were also fortunate to have a number of individuals who had served in Bosnia, where we created a joint interagency task force for counterterrorism, and that is really what you are doing when you are conducting targeted operations in a counterinsurgency environment. Putting all of that together when the insurgents did make a push in the area, and once we were able to get a grip on that push, our analysts were able to provide actionable intelligence that was very good. In one night alone, for example, simultaneously we took down 35 different sites at 2 o'clock in the morning in Mosul. Another time, we did 25 sites simultaneously, just in that one city, and in many cases there were others outside the city that we did simultaneously as well.

The night we did the 35, we got 23 of the individuals that we were after, with one shot fired. Most of those were knocks on the door rather than blowing the door down. That was the level of the refinement of both the process and the resourcing that we had at that time.

Task Force Olympia was not an existing organization. It was taken out of the I Corps headquarters at Fort Lewis, Washington, the tactical command post of that corps headquarters, and they did not have the normal robust military intelligence battalion that we had supporting them. We did anticipate problems with this, frankly, and did raise concerns about that. It took months for those to materialize, but in the wake of the assassination of the governor some 5 or 6 months after we left in a very fractious political proc-

ess that resulted in Sunni Arabs, many of them, walking away from the province council table, the insurgents were able to start putting roots down again.

As that happened, the intelligence elements of Task Force Olympia were not able to generate the same amount of actionable intelligence. You then enter into a spiral where, because there is more insurgent presence, there is greater intimidation of local security forces and your intelligence agents, your human intelligence agents, which means less intelligence, which means less effective raids, which means more bad guys, and you can see it spirals downward until in fact it did implode in November during the operation in Fallujah the enemy opened up a new front up in Mosul, building on the infrastructure that they had been able to establish there and also building on the fact that they had been able over time to intimidate very severely the police in Mosul in particular and their leadership.

That is really what I was getting at with that particular case. So it was both a substantially reduced amount of the intelligence analysis capability that was so important when we were conducting our operations and to some degree there was less of the joint inter-agency task force capability as well because that headquarters was not as robust as a division headquarters either.

I did feel at the time that they took over that they could maintain the security situation because of actually tens of thousands of Iraqi forces that were trained during our time. In fact, these forces did prove themselves in April 2004 when the rest of the country really experienced very substantial difficulties. But over time, as that spiral began, particularly in the late summer of 2004, it became increasingly difficult to keep pulling the roots out as fast as the bad guys were putting the roots down.

Senator CHAMBLISS. Thank you, General. As you accept this challenge, obviously our best wishes go to you for a huge success. Thank you.

General PETRAEUS. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Chambliss.

Senator Pryor.

Senator PRYOR. Thank you, Mr. Chairman.

General Petraeus, I want to say on the front end that I support your nomination very enthusiastically.

General PETRAEUS. Thank you, sir.

Senator PRYOR. I think you are the right person for this. I have concerns, as we have discussed previously, about the surge or the augmentation, whatever you want to call it. Basically, I have three basic concerns. We have talked about these before, but first is the practicalities, and that is where you get into the thousand questions about where do our troops come from, how does it impact the National Guard component, and training and equipment. There is literally a thousand questions there that I have concerns about.

Second is, I am concerned that our best U.S. military minds are divided on this surge strategy. Again, I am basing that on press reports and just reading a lot of retired people mostly and their thoughts and their impressions of what the best next step is.

The third concern I have is I am very concerned that there is insufficient Iraqi buy-in. My sense is that this is not worth doing un-

less the Iraqis buy into this strategy because I think fundamentally that is what we are talking about here, is the Iraqi government, the leadership, military police, et cetera. They have to take over and take responsibility for their country, and we need to over time give that responsibility to them. I think most Americans would like us to do that sooner rather than later.

You have mentioned in some of your comments and just what you have said in the past several days that your perception is basically there is now a changed mission in Iraq. Is that fair?

General PETRAEUS. It certainly is, a change in mission where the focus will be on the security of the population as the foremost objective and transition is not foremost. Really, throughout much of 2006 transition has of course been foremost and frankly, I thought for a very long time myself that that was the right approach to take as well. It was in the wake of the violence, of course, of the fall of this last year and the winter that has proven to be undermined as the way ahead.

Senator PRYOR. Let me follow up on one of Senator Kennedy's questions a few moments ago when he asked about benchmarks. You said you had a set of general benchmarks in your mind, but it would take time to develop more specific and more particular benchmarks. I think that is a fair understanding of what you said.

My follow-up question on that is, it seems to me that the circumstances in Iraq have changed considerably over the last year, and as you are coming up with your set of firm benchmarks that we can measure success or failure using your benchmarks, what happens if the circumstances are continually changing and how much time do you need to get to the benchmarks so we can measure how successful we are being there?

General PETRAEUS. Senator, some of the benchmarks I think perhaps will exist on my arrival, if confirmed. Among those might be schedules of Iraqi troop deployments and the like. Some of those I think are fairly straightforward. I think it is more difficult when you get into some of the very difficult issues that the Iraqi government will have to come to grips with in determining what is the level of process toward decisions on some of these very challenging issues that obviously have to be resolved for Iraq to move forward in the direction that everyone hopes it will move.

Senator PRYOR. That is one reason I have confidence in you, because I know that you are very focused on that and you are going to do your dead level best to make sure that you have a handle on the progress we are making, if we are making progress, and where we are not, trying to take steps to fix that.

In the manual that has been talked about today, the counterinsurgency manual, in fact the Arkansas Democrat-Gazette editorial page quoted a section of that today or several sections, and it said that: "Victory is achieved when the populace consents to the government's legitimacy and stops actively and passively supporting the insurgency." I think clearly that is a good definition of victory.

But what I would ask you to do, this is about keeping Congress more informed than in years past. If you can help us measure how we are moving toward victory, if you can give us objective criteria

that we can look at where we can measure if we are actually progressing the way we want to progress.

So whatever those metrics are, whatever those statistics are, you are going to have to help us do that, because one of the frustrations I think I have had is that it has been very difficult for me to gauge whether we are moving forward or whether we are losing ground in Iraq.

Also in your counterinsurgency manual, you give an equation there that says there should be one counterinsurgent for every 50 inhabitants. I am wondering about the numbers in Baghdad. I believe Baghdad is about 6 million. Are we at that number, that 1 to 50 ratio? Are we there? Will we be there with the surge?

General PETRAEUS. Senator, we will. If you lump together all of the existing U.S. forces and forces to deploy, existing Iraqi forces and forces to deploy, you get to about 85,000. Certainly not all those are equal. Some are much better than others.

You then should add in tens of thousands of additional forces that are over there that provide, of all things, contract security for our embassy. Myself, I was secured by contract security in my last tour there, and that frees up uniformed forces to perform other missions and those have to be factored in as well. The same with the ministerial security forces, acknowledging certainly that some of those ministerial security forces are part of the problem instead of part of the solution. But they do in fact secure, again, facilities and infrastructure that would otherwise have to be secured by U.S. or Iraqi forces.

Senator PRYOR. Just for the sake of clarity, when you talk about a counterinsurgent are you talking about anybody that is on our side? I mean, it could be the Iraqi police, obviously the Iraqi army, obviously other Iraqi security forces?

General PETRAEUS. That is correct, Senator.

Senator PRYOR. But it could also be contractors?

General PETRAEUS. If they are performing security functions, yes, sir.

Senator PRYOR. So it is whoever it may be, just as long as they are performing security functions?

General PETRAEUS. Yes, sir. Again, if you will, that is sort of a modern evolution of counterinsurgency strategy, if you will, because certainly in Malaya and other places there were not contract security elements in those days, although they certainly counted their governmental security elements like the ministerial security forces.

Senator PRYOR. What happens if you get in there and the Iraqi forces, whether they be a police unit or a brigade, whatever size it may be, what if they just fail to meet the obligations that they have? What if they either just do not show up or they just do not perform well? My suspicion is you will find them performing unevenly from area to area.

General PETRAEUS. Yes, sir.

Senator PRYOR. What do you do when they do not meet the standard?

General PETRAEUS. There will be some of that, there is no question. In those cases we will have to go to their bosses and demand

corrective action. That is easier said than done. But it is something that we will have to do.

In my last tour in Iraq, on one occasion I went to the minister of interior and told him that we had withdrawn all logistical, funding, and equipment support for a particular element in the Baghdad police force and that would remain withdrawn until certain individuals who we caught mistreating detainees were apprehended and dealt with, and those individuals were apprehended and dealt with.

Senator PRYOR. I just had one follow-up question to what Senator Bill Nelson asked a few moments ago. I think his question—I wrote it down; I think I have it right—Will you be silent if your civilian leaders provide false or misleading information? I think that is what he said, and you said, no, you would not remain silent, which is the right answer.

But if you find yourself in that situation where you have civilian leadership in this country that is not providing accurate and true information, what will you do?

General PETRAEUS. Sir, I will provide accurate and true information. I think the committee ought to know that. I would be very happy to stay on the banks of the Missouri River at Fort Leavenworth, Kansas, instead of going back to the banks of the Euphrates River, and I am doing this out of a sense of service, again to those great young men and women who are over there, and because this is what the military does.

But this is not about being beholden to anyone. This is not about, again, being aligned with any party or anyone else. I will give you my best professional military advice, and if people do not like it, then they can find someone else to give better professional military advice.

Senator PRYOR. I think that is why you are the right guy for the job.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Pryor.

Before we call on Senator Thune, let me just follow up on something that Senator Pryor said and give the Defense Department notice of a request that we are going to insist be complied with. It has to do with the benchmarks issue or the measurements which Senator Pryor made reference to. Back in November when the question of benchmarks came up, we asked both Secretaries of Defense and State, for copies of the benchmarks that were referred to by the President. The President has said specifically that we will hold the Iraqi government to the benchmarks it has announced.

We asked again. When we did not get those benchmarks, we asked the Secretary of Defense. We got a letter back from the Secretary of Defense on December 4th saying that the request for the benchmarks would be referred to the State Department. We have written the State Department again, Secretary Rice, saying we want the benchmarks. This was a January 16th letter.

Now, we are determined that we are going to get the benchmarks which the President says that the Iraqi government has announced it will follow. We are determined we are going to get those. I do not want to hold up your nomination. Nobody does. We are going to speed your nomination as quickly as we can because we think

that it should be speeded up, for all the reasons you have heard here today.

But there must be representatives here of the Defense Department and the State Department. Whether there are or not, we are going to make it clear that we are going to find a way to get copies of those benchmarks that you say you saw on slides. Now, I made reference in the letters just to political benchmarks, but we are going to insist—and I use the word “insist” and I think this will be a bipartisan insistence; this is not a partisan issue. This is information this committee is entitled to, that Congress is entitled to. I am looking at you, but I am talking to the people at the Defense Department and the State Department who are within earshot here.

We are going to insist that we get copies of the benchmarks on the political, economic, and military aspects that have been agreed to by the Iraqi government, which the President has said he is going to insist that they comply with.

Senator Thune.

Senator THUNE. Thank you, Mr. Chairman.

General, thank you for being here today. Thank you for your extraordinary service to our country and for your willingness to undertake a very challenging and difficult task.

I want to follow up. You answered in response to a question Senator McCain asked earlier today about what would happen if the United States were to leave Iraq now or follow the advice of some up here and that is to begin withdrawing. You mentioned some of the things, ethnic cleansing, other countries interferring, terrorist groups moving in, disruptions in the flow of oil, a whole lot of consequences of that step or that action.

What I would like to have you do if you could is expand a little bit on that answer in terms of what it would mean to the United States and to our security interests, because I think too often people here in this country do not understand or make the connection between what is happening over there and what that means to national security here at home for the United States. Could you just expand on that answer a little bit and what the implications could be for people here at home and why this fight is so important, not just to that region but to U.S. interests?

General PETRAEUS. Sir, there is a number of broad categories, if you will, that I think deserve mention. One of those certainly is the potential—and all of these are potentials. As I said in my opening statement, no one really knows the consequences of a failed Iraqi state. But certainly regional instability could be a result of that if surrounding countries felt that they had to enter Iraq for some reason or other to safeguard one ethnic group or another.

Were some portion of Iraq to become truly a terrorist training camp, and the potential certainly exists for that in places like Anbar Province and other areas that are under more of the insurgent control, obviously that is a much shorter trip to countries of friends in that region, to other western countries, and to the United States than from other possible camps, say in the Afghan-Pakistan border regions or something like that.

I think you do have to consider U.S. standing in the world, if you will. I think that is an important factor. I think, as you mentioned

the international economy, one does not know if the oil flow would be disrupted, but certainly were that to happen, were there again to be regional instability that erupted, again there is the potential that that could erupt—that could degrade the availability of the energy resources in that area, the oil and natural gas.

Again, no one really knows what these consequences truly would be. They are all potential, and they all are certainly worrisome.

Senator THUNE. Let me ask you, if I could, a follow-up question that has been posed a couple of times this morning, I think first by Senator Lieberman and a couple of others on the panel. It has to do with these resolutions that get put on the Senate floor, that I think in many cases are designed to respond to political conditions here at home rather than to conditions on the ground in Iraq. If thought were being given to the effect on the troops and the conditions on the ground in Iraq, I do not think you would probably see as many of these resolutions floating around here on Capitol Hill, and I know that they do not have the force of law when you are talking about a non-binding resolution. I think the real opportunity here for Congress to have a say in this, if they wanted to, would be with respect to the purse and the power that we have in terms of appropriations. At least nobody evidently wants to take that step.

But these resolutions are symbolic, in that I think they send a signal and a message to our troops. They obviously are perceived around the world as having some meaning. I do not happen to believe that our troops make the distinction between support for them and a lack of support for their mission. Would you comment on that as well, just as a follow-up to the questions that have been asked earlier?

General PETRAEUS. Sir, again, I am not a politician. I am a guy who wears a uniform and has for 32 years plus. I am, however, very sensitive, as I mentioned before, to Congress' responsibilities in terms of oversight, accountability, and so forth. I understand also very much the frustration of the American people, of Congress, frankly of all of us, with the situation in Iraq.

I think, however, putting on the uniform and as a prospective commander, if confirmed, that the question has to be, I guess at least that I would ask myself, what message will the enemy take from this, what message will the soldiers and I take from it?

If I could, I would just really like to leave it at that, because, candidly, there are a number of resolutions out there, without actually getting into details, which I would just as soon avoid anyway, frankly, learning that mine fields are best avoided and gone around rather than walked through on some occasions. I would like to leave that one there, Senator.

Senator THUNE. A very diplomatic answer. But I come back to that point because I think that the questions that have been asked earlier—what is most important in the debate that is occurring up here right now, in my view at least, is the impact that it has on the men and women who are wearing the uniform. You are a career military officer, someone who works day in and day out with the troops. Those of us who are up here obviously have constituencies back home that we respond to and clearly many of these

messages or resolutions are directed or targeted at some of those constituencies, who have a sense of frustration about this war.

But it seems to me that the bottom line concern that we have to have is that our troops understand that we are committed to them and support them and want to make sure that they have every opportunity to be victorious, to complete the mission. That is what soldiers do. I am very concerned about the mixed messages that are sent by statements that are made here, not so much again as they are directed to constituencies back in the States, but more importantly what impact that has on the men and women who are carrying out this responsibility in the theater where they could be in harm's way.

What about the issue of the borders? There has been a lot made about Syria, Iran, troops coming in, foreign fighters. What steps are we taking to cut that off and what more can we do?

General PETRAEUS. Sir, that is not a subject that I have discussed in any detail at all, again, with General Odierno. Again, I was truly trying to avoid any kind of presumptive behavior, although at one point when I was being asked about—during the development of the strategy I thought that I did have to talk to our operational commander on the ground and confirm that his troops-to-task analysis did require all five of the brigades and the two additional battalions in Anbar Province, which he said that it did.

I do know that he shares the concern over the borders. We have very briefly discussed it in passing. But I do not know at this point in time what the plans are to strengthen the defenses, the security, along the Iranian border and along the Syrian border in particular.

Senator THUNE. I see, Mr. Chairman, my time has expired. Thank you.

Chairman LEVIN. Thank you, Senator Thune.

Senator Webb.

Senator WEBB. Thank you, Mr. Chairman.

General, I am sorry I missed a good amount of your question and answer period. I was here for your testimony. I had two other hearings I had to go to.

I want you to know I appreciate your diplomacy as it regards my colleague Senator Thune's question. The issue of the attitudes of people who are serving is in my view not wholly appropriate to the political debate. You and I had a discussion about that when you visited me. I think there are a number of polls out there. There was a poll last year during the campaign that showed more than 70 percent of the troops in Iraq believe we should be out within a year. There is a poll in the Service Times fairly recently that showed a majority of the people in the military no longer support the approach of this administration in terms of how the war should be fought. I think we up here and the senior military are the fiduciaries of the goodwill and the service of those people, and it is not always appropriate to be bringing them so directly into the process.

I also would like to say for the record that so many of these predictions that are being bandied about regarding the implications of a withdrawal, first of all, I think play to the worst case scenario of a precipitous withdrawal. The others, for instance an increase in terrorist activity, decrease in the United States standing around the world, and effect on the United States economy, the empower-

ment of Iran, are the exact conditions that many of us who were warning against going into Iraq were making, which would occur as a result, and in some cases have. I just think that is something that should be said for the record.

In your testimony, when you talked about your measures of success you mentioned the rule of law, and one of the strongest feelings that I have is that law and order is the first stepping-stone toward some sort of success here, but we have to go toward a point where law and order is being administered by the Iraqis, through the Iraqis, on behalf of the Iraqis. Otherwise you get a situation similar to Northern Ireland years ago, and just the notion of a British soldier on the street was enough to inflame the emotions of a lot of people over there.

That goes to one of the concerns that I have about the way that this strategy is being articulated. It is one thing to talk about the measurements of success, but I think what we really need to hear is a clear articulation of end point. My belief is that in terms of our national strategy with Iraq the successful end point would be a time when there are no longer United States combat forces on the streets of Iraq. Would you agree with that objective?

General PETRAEUS. Senator, I would. I think the condition the rest of the country is in would obviously pertain as well. If you achieved no more troops in Iraq but the whole thing just came apart at the seams, then I am not sure that that would be the objective that you would want to strive for.

Senator WEBB. The removal of combat troops from the streets of Iraq?

General PETRAEUS. Certainly, over time that is where you want to be, yes, sir, again assuming that there is security on those streets in Iraq and that we have enabled and helped the Iraqis to get to that.

Senator WEBB. Right, but that would be a doable articulation of where we want to end up?

General PETRAEUS. That is certainly where we want to end up militarily, yes, sir.

Senator WEBB. I have another question regarding the training of Iraqi forces, and this is just a question from having participated in the Vietnam War and watching some very fine South Vietnamese soldiers get in many cases culturally conflicted by the type of training that the United States was bringing to them, and having spent time in Lebanon as a journalist and watching the difficulty that they had trying to build up a Lebanese army with all the difficult factions very similar to Iraq.

General PETRAEUS. Right.

Senator WEBB. The question that I have is really asking for your observation, having done this. To what extent are these Iraqi forces less capable because of the training that they have not received from the Americans and to what extent are they less capable because of a lack of motivation, for instance a fear of affiliating with the central government that is so weak, or cultural issues, those sorts of things?

General PETRAEUS. I think it is probably more the latter than the former, in truth. I think that over time we did build a respectable training and equipping program. It was relatively comparable

to what we do for our own soldiers. Over time we have built institutions—military academy, staff colleges, basic training academies, branch schools, and all the rest—and again, this really does come back to the heart of the issue, as I mentioned in my opening statement, that there is not a military solution, there is a political solution. Military force is, again, necessary but not sufficient, and getting to that will component of this equation, what you talk about, who are we fighting for, what are we fighting for, is crucially important in this case, and that is again the ultimate kind of resolution of the problems in Iraq.

Senator WEBB. Do you see that there is any sort of stigma associated to Iraqi units that are directly affiliating with Americans in different parts of the Iraqi society?

General PETRAEUS. Sir, again I would have to march my way around the country, but I do not really think that is the case. We have very small, relatively small, embedded teams, partnership programs, throughout the country with the military. I am not sure the same can be said of the police, which is a wholly different issue because they obviously are local. They come from the local neighborhood, and if you have a situation in which intimidation sets in over time, of course, then there can be a problem of affiliation between them and what can be seen, again, in some of those areas as occupiers.

You have seen it, I know, in Anbar Province, where it has gone back and forth, and right now there appears to be a trend in the positive direction where sheiks are stepping up and they do want to be affiliated with and supported by the U.S. Marines and Army forces who are in Anbar Province. That was not the case as little as perhaps 6 months ago or certainly before that.

So again, I think you really have to look around the country, and I think we have to be very sensitive and, frankly, nuanced in how we operate in those different areas.

Senator WEBB. I wish you well and I look forward to hearing your observations after you hit the ground.

General PETRAEUS. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Webb.

Senator Warner.

Senator WARNER. Thank you, Mr. Chairman.

General, I would like to state unequivocally that I have great admiration personally for you and your professional accomplishments, and I express my thanks to you for leaving the banks of the Missouri and be willing to return, and do so out of a sense of deep patriotism and love for this Nation and the forces that you will eventually command.

If you succeed, and I hope you do, fervently I hope you do, you will have earned rightfully the gratitude of the people of this country, and indeed the people of much of the world, because hopefully that would bring stability to this government and allow it to exercise the full range of sovereignty.

But I have to tell you, and this is personal, I go back 35, 36, 37 years, when as Secretary of the Navy, I sat at that very table where you are in this very room on a number of occasions and in other rooms of this Congress, trying to explain, since I was a part of the civilian structure, governmental structure directing that war.

I heard the crossfire in the questions and in the debates, and this hearing today brought it all back.

There is no real parallel to the conflicts as such that we are experiencing today, but there is this situation of the Nation pulling back. How well I remember, with my friend Jim Webb here and John McCain bravely in uniform in those days, how they came back home to a public that did not greet them with the warmth, the respect, and the thanks that they deserved.

But today it is quite different. This whole Nation is in support of the men and women of the Armed Forces. I say to you I think every member of this committee—and I know every one of them well, on that side of the aisle, on this side of the aisle, having had the privilege of occupying that chair for some 6 years—we are not a division here today of patriots who support the troops and those who are making statements and working on resolutions that could be translated as aiding and abetting the enemy.

We are trying to exercise the fundamental responsibilities of our democracy and how this Nation has two coequal branches of the government, each bearing its own responsibilities.

I hope that this colloquy has not entrapped you into some responses that you might later regret. I wonder if you would just give me the assurance that you will go back and examine this transcript as to what you replied with respect to certain of these questions and review it, because we want you to succeed and I am not sure just how the reporting will come out of this hearing, nor at this moment am I fully able to judge how the people across this land seeing this hearing through the lens of that camera will interpret it.

But in defense of those colleagues—and I am one and I accept full responsibility for what I did yesterday in leading an effort with my distinguished colleagues, Senators Collins and Ben Nelson of this committee, in putting forth a resolution. But we did so in response to the President's comments to the Nation on the 10th of this month, and I read from his transcript:

“In the days ahead, my national security team will fully brief Congress on the new strategy. If members have improvements that can be made, we will make them. If circumstances change, we will adjust. Honorable people have different views and they will voice their criticisms. It is fair to hold our views up to the scrutiny of all involved and have a responsibility to explain how the path they propose would be more likely to succeed.”

Since we just put in our resolution late yesterday—and we did so not to have a confrontation with the President, but following his advice we had some recommendations, which he may or may not accept. They were expressed by heartfelt beliefs held by the three of us and we think other members of the Senate.

I feel that we have performed our duty as we see it and that time will tell. We purposely did not file it. I am getting technical here. We put it in the record, but it is not filed before the Senate, and we will withhold any further action on our resolution until the Foreign Relations Committee, which has primary jurisdiction, reviews certain resolutions before it and responsible to the floor of the Senate. Then and at that time will we consider whether or not we should make any changes and whether we submit it as a resolution

as a substitute for that promulgated by the Foreign Relations Committee.

I just urge you to go back and look at that, because I am very proud of this committee and I do not want an impression, certainly among the Armed Forces, that we are not all steadfast behind them, and that sort of a misimpression could create the very forces that I witnessed when I was in that chair and saw America pull back and eventually the funding problem, which I hope we never experience here as a means by which to exercise the authority of our equal branch, Congress.

Now, let us proceed to my point here. This resolution we put in looked at options that the President might consider using a force level somewhat less than the 20,500. We fully support, inferentially, the force levels the President wants to send to Anbar. There we are directly in combat with al Qaeda, which is so fundamental to this whole war on terrorism throughout the globe. But we looked at also the means by which the benchmarks could be made very clear to the American public most important and to Congress, and as you direct the operation, which will be sequenced, the first section of Baghdad that you begin to work the plan on, let us see if the Iraqis indeed reported for duty in full force, as the plan envisions, indeed took the lead, as they say, in the fight, which is primarily sectarian violence, and that the political structure will not try and abrogate the decisions made by the field commanders, both U.S. and Iraqi, as they move forward with the plan. Those are very critical to the success.

In my understanding—and you have been very forthright—you have not helped develop this plan. It has been entrusted to those commanders in country, understandably. But you in a sense, if confirmed, and in the written letter that you advised the President, you are accepting the responsibility to implement that plan. So I take my comments to my colleagues a step further and say, if there comes a time when you feel there should be a change to the plan and hopefully, as we recommend to the President, a lesser force level of U.S. forces is possible, you will address that to your superiors, the Secretary of Defense, the Chairman of the Joint Chiefs, and hopefully implement that.

Am I correct in that?

General PETRAEUS. That is correct, Senator.

Senator WARNER. Now, finally this question of the sectarian violence which concerns me greatly. The root causes of that violence are almost incomprehensible. Here we have through great sacrifice of life and limb and an enormous sum of funds, not only the United States but coalition forces, given this nation its sovereignty, and all we ask in return is it take the full reins of sovereignty and exercise it.

My concern is why do we need to put such a heavy emphasis of U.S. forces into Baghdad when we have trained 188,000 Iraqi military? Why should they not take the preponderance of the responsibility to cope with the sectarian violence? They can understand the language. They have some comprehension of the root causes why a Sunni and a Shia who have lived side by side for many years are now at each other's throats and seek only to kill and destroy one another.

Why could not our forces be redeployed into areas where those 188,000 Iraqis are geographically in other regions and withdraw the Iraqi forces from those regions and put them into Baghdad to carry forward this mission, which is important, very important, to bring down, hopefully, lower that level, so that the people of Baghdad have some quality of life, so that the government has some sense of personal security and governmental security, so they can carry out the functions of sovereignty?

Those are the issues that we bring to you. Do you have a thought on that? Why could we not simply utilize the Iraqis to fight this sectarian violence and not the American GIs?

General PETRAEUS. Yes, sir. Sir, first of all, I think that the effort in Iraq, in Baghdad, will be predominantly Iraqi. I think that as we total up numbers of forces and various contributions that they will far outnumber U.S. forces in the Baghdad security plan. They are in fact moving forces from other places in the country where the troops-to-task situation allow that to happen. I happened to meet last night with the Iraqi chief of defense staff, their chairman of the joint chiefs of staff, General Babakar Zabbari, who is a long-time comrade starting up in northern Iraq, where he commanded the Pesh Merga that helped us liberate northern Iraq. He then eventually was elevated to be his country's senior military officer.

He stated that they are training additional forces—I believe it was in the order of 25,000 or 30,000 additional military forces—that will also be used to augment the elements that are going to Baghdad. Again, he also echoed what I mentioned earlier, that the initial battalions are actually in Baghdad, according to General Odierno as well, and are starting to get set again to contribute to that operation.

Senator WARNER. If they fail to live up to their commitments—and I hope they do not—if they fail to meet the benchmarks of the initial phases of the Baghdad operation, are you prepared to come back to your superiors, indeed the President and the Secretary of Defense and others, and say, we should not go forward until somehow we get not only the assurance but the actuality of their participating in successive phases of this Baghdad operation?

General PETRAEUS. I am prepared to do that, Senator.

Senator WARNER. I thank you. I wish you good luck and I wish you have success.

General PETRAEUS. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Warner.

Senator Bayh.

Senator BAYH. Thank you, Mr. Chairman.

I would like to begin by saying, Senator Warner, how appropriate and moving I thought your opening comments were.

There has been a lot of commentary at this hearing this morning about the morale of the troops and about the need to defeat our adversaries. I think the best thing we can do to support the morale of our troops and defeat our adversaries is to have a policy that maximizes our chances for success. It would be ironic indeed if we remain silent in furtherance of a false unity, in deference to a policy unlikely to succeed. I do not see what that would do for either the morale of our troops or to defeat our adversaries. So, particu-

larly from your side of the aisle, I thought your comments were absolutely appropriate and indeed moving.

Senator WARNER. I thank the Senator.

Senator BAYH. General, I would like to follow up on that for a moment. I think Senator Webb was also right, being a military man, not to want to drag those of you in uniform into political debates. So I am not going to ask you about specific resolutions or all that kind of thing. But the issue of troop morale is something that you are an expert on and that has been raised here today. So I would like to ask you very plainly: Does a hearing like this, with the diversity of opinion that has been expressed here, undermine the morale of our troops?

General PETRAEUS. Senator, I seriously doubt that our troops are sitting watching C-SPAN 3 in Iraq right now.

Senator BAYH. Further testimony to the intelligence of our military men and women. [Laughter.]

General PETRAEUS. Sir, I do not know how much attention they are paying to this debate.

Senator BAYH. Well, the issue has been raised. It is a philosophical question, not a political one, but it is important because every American, as Senator Warner was saying, cares about the morale of our troops. So does diversity of opinion in our society about the right thing to do in Iraq, that maximizes our chances for success, does a healthy debate about the right course that maximizes our chance of this turning out well, does the freedom inherent to a democracy, does that make us weak?

General PETRAEUS. Sir, I think I stated earlier how important I think free and open debate and the marketplace of ideas and all the other great qualities that our country has achieved are in fact to our country. I think some of the soldiers will be out there saying, yeah, go get them. Some will be saying, what is that all about. Some will just keep their head down and go about their mission.

Senator BAYH. So what you are saying, General, is that our men and women who wear the uniform really are a lot like Americans back at home? They have diverse opinions, too.

General PETRAEUS. Sir, that is where they come from.

Senator BAYH. They are probably sophisticated enough to take all this in and accept it for whatever it is worth.

General PETRAEUS. Sir, I think that is an accurate statement.

Senator BAYH. I thought so and I am glad to hear you say that.

What is behind a lot of this—and you heard some of this also, I have heard there are concerns about micromanaging, and I think the Vice President said the other day you cannot run a war by committee. But there is a lot of history here—I think you have alluded to some of it—a history of mistakes by the civilian leadership, a history of the Iraqis, who you quite accurately indicated and it was universally the opinion that Senator Clinton and I heard when we were in Iraq that the Iraqis are essential to the success of this mission and yet they have been too often unable or unwilling to step up and do their part. There is that history we bring to this.

So to deal with both the mismanagement of this on our civilian side here and the lack of resolve on the part of the Iraqis there, many of us feel that it is our responsibility now to step up and to

provide better direction to this whole thing. That is what you hear going on.

So with that by way of background, you said a couple of interesting things that I think were both accurate, but I would like to combine them in a little bit different way. At one point in your testimony you said you thought that at the bottom of all this at its essence it was a test of wills; is that correct?

General PETRAEUS. Sir, that is correct. I think any such endeavor is a test of wills at some point with the enemy. Now, there are many factors in the test.

Senator BAYH. This is what I would like to get to. I think that statement is correct, but I want to combine it with another statement that you have made and I hear repeatedly from our military men and women, which is, look, no matter how long we stay or how hard we fight or how much we spend or how many of us die, it is ultimately up to them.

I think what you were about to say is it is not only a test of our will, that is a part of it, but it is also fundamentally a test of the Iraqis' intentions, whether they are willing and able to do what it takes ultimately to make this successful. Is that not also true?

General PETRAEUS. It is, and I have made that point, of course, several times today. This is at the end of the day up to the Iraqis.

Senator BAYH. I would like to ask a couple questions about that, because my strong impression is that the American people are willing to be constant and strong in support of a policy they believe is likely to work, but they can also understand when things are not working too well and when a change of course is in order, and that is when they begin to hesitate and withdraw their support.

So the questions I would like to ask today get to the heart of what do the Iraqis intend, why should we have confidence in them, and what steps can we take to maximize the chances that they will do what is in their own interests and maximize the chances that our efforts there will succeed in helping them.

I would like to get to what Senator Levin mentioned to you a couple of times. You have spoken about consequences. We have talked about benchmarks and timelines, but ultimately there have to be consequences. Otherwise I am afraid the Iraqis will not take us seriously and the American people will conclude without consequences this really is more of the same.

You spoke generally about, if things are not going so well we will have to look at what we can do for them and what we might withhold from them. That is a pretty general statement. Can you be more specific than that, because I am afraid without more specifics—

General PETRAEUS. Certainly, yes, sir. I can give examples of in fact what I did in the past. As the Multinational Security Transition Command-Iraq commander, the train and equip program commander, there was a case toward the end of my time in command where leaders of the major crimes unit in Baghdad were found mistreating detainees. So I went to the minister of defense with the evidence of this and announced that we were withdrawing all financial, logistical, adviser, and equipment support for that element until he arrested and tried those individuals. He did do that, and

we then over time resumed the assistance that we were providing to them. That is an example of that.

There are positive reinforcements, if you will. The Iraqi special operations force brigade is arguably the best special operations unit in the entire region. They are among the most experienced. They are the ones in many cases who have been conducting the operations in recent weeks and months to go after some of the senior leaders of the Jaysh al-Mahdi, Moqtada al-Sadr's militia, and they have done so well that we continually reinforce that with increasingly better, more capable equipment, better facilities, better quality of life, a special operations bonus, and so forth.

So again, there are two ways of going at that and those are examples of those.

Senator BAYH. Those are the kind of specific consequences we are looking for, but that deals with the military side of things and a lot of this is going to depend on the Iraqi political leadership.

General PETRAEUS. Correct.

Senator BAYH. Which, when Senator Clinton and I met with the Prime Minister last week, he said to us what I understand is essentially what he said to the President last November, which is: Look, we do not want your brave soldiers dying here, either; I want you to leave Baghdad. Just give us heavier weapons, you guys withdraw to the periphery, and let us do what we need to do.

Now we have adopted a policy diametrically opposite to that. Why does he have such a different opinion about what needs to be done to secure Baghdad?

General PETRAEUS. Sir, I have not had a chance to talk to Prime Minister Maliki. I do not know what his view on this is. I had actually been told that he had supported it after conversations with the President.

I do not know. I will have to determine, if confirmed, once I get on the ground.

Senator BAYH. I think when you do talk to him, General, you will find that he will. When I pressed him and I said, "well, do you then think that our policy of adding more troops is the wrong one?" He started backing up and he said, "well, that is not exactly"—but you could tell what he really meant. If he had first choice, he would be doing things differently there.

The reason that is important to me is that I am looking for some insight into is he willing to do what needs to be done here. How can we ask them to make different political decisions in support of a policy they may not really embrace?

Let me give you a couple of other examples just quickly. We arrest people affiliated with Iran, Iranian agents, sometimes we think implicated in the explosive devices that are killing Americans. The message from the Iranian government is that we have to let them go. He has publicly resisted the setting of benchmarks and yet he endorses the steps that need to be undertaken. Well, if you really endorse the steps that need to be undertaken, why would you resist being held publicly accountable?

All that leads me to wonder, do they really have it in them to make the hard decisions that need to be done? So my question to you is, with the situation about the Iranians, his resistance to

benchmarks, and all that kind of thing, what leads you to be confident of these people?

General PETRAEUS. There have been some reasonably positive developments in recent weeks actually where they have hung tough, have not released one of the very senior Moqtada al-Sadr affiliates, where their forces have reported, where there are developments in Anbar Province and so forth. But again, I am with you in the fact that only time will tell, Senator. If confirmed, I need to get back to a country that I have not been to in 16 months and determine what the will is.

As I mentioned earlier, if I detect that they do not want it as much as we want it, I will report that to my boss.

Senator BAYH. That is why Senator Levin and I and others keep getting back to the notion of consequences, because all too often in the past they have said the right things, but they have not done the right things, what has led us to question the strategy of constantly reassuring them to try and build up their confidence so that they will have the security to do the difficult things. It has led some of us to conclude that perhaps a different approach to encouraging them to do the difficult things is in order.

So my time has expired, but my last question to you is, you said that, I think the words that you used were, "that the responsible elements among the Iraqis did not want us to leave." I think that is what I heard you say, "the responsible elements did not want us to leave."

General PETRAEUS. There are thousands, actually tens of thousands, of Iraqis who have died actually defending their country, far more than our soldiers, each of which is a tragedy for that family.

Senator BAYH. Here is my parting question, and again it is by way of trying to figure out: What can we do to get them to do what is in their own best interests here, what needs to be done? So if you are telling me that the responsible Iraqis do not want us to leave precipitously, but at the same time you then said that if we talk about redeployment that would have an adverse consequence on them, so my question to you is: If they want us to stay, but then we say, look, if you do not do the right things we may not be able to stay, why would that not lead them to do the things necessary to getting us to do what you are telling us they want us to do, which is to remain long enough for them to make a go of it?

How can we hold those two thoughts at the same time? They want something, but when we tell them we may take it away it does not have an impact on their thinking.

General PETRAEUS. Their challenge right now, Senator, I believe is that they are in a capital city that is insecure, in which citizens make life or death decisions on a daily basis, just trying to get to work, get their kids to school, get some food. You cannot come to grips with the tough decisions that a government has to resolve in a situation like that. Their security forces have not been able to deal with the rise in violence in the wake of the bombing of the mosque in Samarra, which unleashed a tremendous amount of tit for tat and back and forth violence. The objective is to get a grip on that, to provide improved security, to give the Iraqi government the space and the time to come to grips with these political decisions that will ultimately carry them forward.

Senator BAYH. General, I support your nomination and I wish you well.

General PETRAEUS. Thank you very much, Senator.

Chairman LEVIN. Thank you, Senator Bayh.

Now, after Senators Martinez and McCaskill there will be a second round. The amount of time will not be as long as 8 minutes, but we will work through lunch. Do you have a problem with that?

General PETRAEUS. No, sir.

Chairman LEVIN. Or do you need a break for other purposes?

General PETRAEUS. No; ready to go, sir.

Chairman LEVIN. Thank you.

Senator Martinez.

Senator MARTINEZ. Good morning, General. Congratulations on your nomination and thank you for your distinguished service and your willingness to undertake this very difficult assignment. I know I echo what all others have said, but I have never heard such unanimous praise here today and in other quarters of your service, your capacity, and your capability. So I thank you for your service and for your willingness to undertake this very difficult task.

Chairman LEVIN. Senator Martinez, forgive me for interrupting. But while we have as many folks with us as possible, I just want to inform all of us that the committee will be conducting a hearing next Tuesday, January 30, to consider the nomination of Admiral William Fallon to be Commander, U.S. Central Command, and will be conducting a hearing on Thursday, February 1, to consider the nomination of General George Casey to be Chief of Staff of the Army. I did talk about these dates with Senator McCain, so he knew those two dates would be used.

Forgive the interruption, but I wanted to get that out.

Senator MARTINEZ. Getting back to the topic at hand, obviously the new plan for Iraq comes after months and months of political commentary and debate, much as has been discussed here today in the open democracy that we are, for there to be a different plan, a change in Iraqi policy. Now we do have a new plan for Iraq.

My understanding of the plan is that it is not just an increase in the number of troops, which I might point out when accomplished will not put us at a level of troops in Iraq which is even equal to the highest number we have had in the course of this effort; is that correct? I mean, our troop levels in Iraq have gone up and down.

General PETRAEUS. They have. I believe that there have been periods when we have had more than we will have at the end of this particular increase.

Senator MARTINEZ. The focus has been on the troop levels, but there actually are more issues related to this new plan than just an increase in troops. To be clear now, the troops that are going into Baghdad are not going as American forces at the front end. My understanding from the President's explanation of this new plan is that the Iraqis will be at the front and that they will not be taking a back seat; they will be in the front and center.

My understanding further is that troops have already begun to move into Baghdad and that the Maliki government has carried out the first benchmark, which is will the Iraqi troops report, and they have begun to report; is that correct?

General PETRAEUS. The initial elements, yes, sir. Again, I want to be clear that not all, but their schedule is not for all of them to be there by any stretch of the imagination either.

Senator MARTINEZ. But they have begun to be there?

General PETRAEUS. They have indeed, yes, sir.

Senator MARTINEZ. Second, that there are political as well as economic development, reconstruction elements to this plan.

General PETRAEUS. That is correct.

Senator MARTINEZ. Those are equally important and in fact you have emphasized, as I would emphasize, the fact that there needs to be a political settlement among the Iraqis the distribution of the oil revenues, amendments to the constitution. Those are important things.

General PETRAEUS. Correct, sir.

Senator MARTINEZ. So when some here might say that in fact we need a political settlement, we are all in agreement that there needs to be a political solution to the problems in Iraq. The question really is, can these political solutions take place in the midst of chaos, killing, and everyday violence at levels that are really unsustainable and unimaginable. So it seems to me that it is logical to suggest that we have to dampen down the violence so that we can give an opportunity for there to be a political settlement and an environment conducive to a political settlement. Secondly, it would seem to me to be fairly difficult to be involved in the business of reconstruction, water, sewer, electricity, garbage pick-up, et cetera, when you in fact have a chaotic and disruptive situation. So it seems to me, frankly, no different than it would be in an American city if all of a sudden we had lawlessness and a breakdown in the rule of law. It would be rather difficult to have economic development programs in a neighborhood.

General PETRAEUS. Correct.

Senator MARTINEZ. One of the issues that has troubled me since I was in Baghdad in October was the fact that I saw a serious political division among those who are attempting to run the Iraqi government. Particularly, I was troubled by the fact that some ministries seem to be under the political control of Moqtada al-Sadr and that those ministries, particularly the ministry of health, are not only not cooperative, but would not even meet with Americans, would not even discuss the issues of the day with Americans.

Is there any sign or any indication that you have or do you share my concern that it would be impossible for us to see a united Iraqi government until issues like that are resolved?

General PETRAEUS. I share your concern, Senator.

Senator MARTINEZ. I have heard it repeatedly said by other distinguished Members of the Senate that the generals do not support this plan. Again, when the President was explaining this plan to me and others, he mentioned that General Casey has had a hand in the development of this plan. My understanding is clearly that you do support this plan and believe it has a reasonable chance of success.

General PETRAEUS. That is correct, sir.

Senator MARTINEZ. So when some would say that generals do not support it, I suppose one can find generals who might not support it, particularly maybe a retired general. But those of you in charge

with carrying out the mission do believe that it has a reasonable chance of success?

General PETRAEUS. That is correct, Senator.

Senator MARTINEZ. General—and I will conclude with this, Mr. Chairman—I have heard the importance of the Senate debate, that the Senate is a democratic institution where we all have a high degree of responsibility, and also I think sometimes an elevated self-importance. But I also have heard something that I find disturbing here today, which is the suggestion that civilian leaders of our Department of Defense at a time of war would either give knowingly false or misleading testimony to this Congress. I find that request of the General to stand up and speak to that issue to be frankly unnecessary. Just like I do not besmirch the opinions of those in the Senate who might differ with this current plan or question their patriotism, I also think it is unnecessary to question the veracity or the seriousness of purpose, the integrity or the honor of the people that we have confirmed to be the civilian leadership in the Department of Defense. I just found that troubling and not in keeping with the level of discourse that the colleague from Virginia was expressing about the issues of the day.

I too believe that if someone disapproves of this plan and believes it is a dead end that they too then have a responsibility to seek to stop the action and not just send a message. I think it calls for further and stronger action than just a message.

General, I wish you well. I believe, like you do, that this is a plan that has a reasonable chance of success. I agree and believe, like you do, that the consequences of failure in Iraq are serious and would do great harm to our Nation. So my best hopes and I know those of this Nation go with you in your new mission, and look forward to working with you to help you succeed as we all try to succeed in this very difficult struggle, but one which I think is inextricably tied to the overall global war on terror. I thank you for your patience today.

General PETRAEUS. Thank you, Senator.

Chairman LEVIN. Thank you very much, Senator Martinez.

Senator McCaskill.

Senator MCCASKILL. Thank you, Mr. Chairman.

I first have to comment on the irony of those who are critical of any resolutions that are being brought forward concerning this latest plan in Iraq. We are ostensibly spending hundreds of billions of dollars and sacrificing the most precious lives imaginable in this cause, to build a democracy. In November, I think something much stronger than a resolution came forth from this country. It was not a Senate resolution. It was an election, and that election confirmed the strong foundation we have in this country for the democratic process.

I think expressing our opinions through resolutions is exactly what keeps this institution and the people we represent living in a wonderful country because of the democratic institutions. I think it is ironic that we would criticize those resolutions in light of the fact that they merely reflect what the elections did in this country, and that was say to the government: We think what you are doing is not working and it is not what we think this country should be doing. So I wanted to comment on that irony.

I also wanted to talk to you a little bit, General. First of all, you and I had a chance to visit, and we will miss you on the banks of the Missouri.

General PETRAEUS. Even if it is on the wrong bank? [Laughter.]

Senator MCCASKILL. Even though you are on the Kansas side. We will not go into that. We certainly claim Leavenworth in the greater Kansas City area and know the kind of work you have done at Leavenworth. I noticed your wife in the paper the other day working on the task force over in Topeka on the payday loan issue; please, thank her for that work with Governor Sebelius.

General PETRAEUS. I will, Senator.

Senator MCCASKILL. I read in the paper this morning about Company C of the 2nd Battalion, 12th Cavalry Regiment, that is in Gazaliyah and they have begun this work and there are 105 of them there, and this article talked about that they had a firefight the other night and, instead of moving on to another patrol, they stayed because they are there defending what is now their home. They have set up base there and they will be operating out of this neighborhood, a very dangerous neighborhood, where there is the fighting between the Sunnis and the Shia.

This article was very troubling to me for several reasons. I think one, it was on a human level where it discussed one of your observations of soldiering in Iraq in the Military Review article that Senator Collins referred to, I also read, and one of it was that you cannot do too much with your own hands. This article points out that right now our American military find themselves as jailers, doctors, construction workers, garbage men, guardians, and detectives. It points out with specificity that there is a young 4-year-old girl that was brought into the base and the reason she was brought there, she was terribly ill, was because her parents did not want her taken to the nearby hospital because it was Shiite and they feared that their entire family would be killed while their daughter's life was being saved in this hospital. So as a result, our medic, our military medic, was caring for this 4-year-old girl.

Now, I think that brings home in a way that we cannot talk about in terms of military protocol the incredible, huge nature, the enormity in every sense of the word, of this problem. I think the part of the article that was most troubling to me was when they talked about "the soldiers also got their first glimpse of the green Iraqi forces who will share their mission and eventually, they hope, take it over. The soldiers talked about them with a mixture of bemusement, disdain, and mistrust."

"You could talk about partnership, but you would be lying," said one soldier who asked that his name not be used for fear of punishment by his superiors."

When I read your article on counterinsurgency and your observations, no fewer than 6 of the 14 lessons learned deal directly with what we have talked about primarily in this hearing this morning, and that is what else is working over there besides the excellent work of the American military? What I would ask of you is your willingness to be very aggressive to report back on these six requirements that you state that are necessary to effectively fight counterinsurgency. I am going to briefly go through those six for the record:

“One, do not try to do too much with your own hands.”

“Two, increasing the number of stakeholders is critical to success.”

Number seven, the third one, “Everyone must do nation-building.”

“Help build institutions, not just units.”

Another one: “Success in a counterinsurgency requires more than just military operations.”

Finally: “Ultimate success depends on local leaders.” That one really kind of sticks in my craw because that is where the rubber is going to meet the road in this plan. It is terribly unfair what you are being asked to do and what our military is being asked to do, because basically we are asking you to succeed basically ignoring six of your own lessons because they are not there now. We do not have the local leaders there. If we did we would not be getting the mixed signals we are getting from Maliki and we would see more confidence that our military would have in the green forces that ostensibly are going to be leading this.

I would like you to comment on what this soldier said and the fear I have that what we are going to hear in Washington is never going to match what really is happening on the ground in Iraq.

General PETRAEUS. First of all, in that case—again, you were reading an article. I did read that article this morning. It does not strike me as the application of, if you will, the objective plan when it is fully developed and when we have substantially more forces on the ground, in a case where you learn about the area in which you are going to operate, plan with the Iraqi forces with whom you will partner, determine how it is that you are going to secure that area, go in, do clear it, again understand the businesses, the local leaders, whatever else it is, the sectarian tensions and so forth, and then in fact ensure the security of that area so that you can do the hold and the build phases.

Certainly those subset of the observations from my own time soldiering in Iraq are observations that inform me as I contemplate going back over there, if confirmed. There are others actually that are also important in this. Again, the way we carry this out is hugely important so that you do not have just a company that is an outpost in an area that does not have perhaps adequate security, although it sounds to me as if the one thing they did do was certainly prepare their force protection for 3 days before they occupied that location.

So that is the first observation that I would offer. The second is, again as I have pledged several times already today, if I think that they do not want it as much as we do, at some point I will tell my boss that and I will tell you that if it happens to come in one of our updates or something.

Senator McCASKILL. I do not have any time left, but let me briefly also talk a little bit about the money, the CERP. I discussed this with Secretary Gates and General Pace when they were here. The CERP I think is important, but the problem I have with it, it is a little bit good money after bad. We have spent so much money trying to build and so much of what we have spent—I will not even get into the incredible problems of contracting and no accountability. I will not even put on the auditor’s hat here.

I am just talking about how much that we have actually done that has been destroyed after we did it and the fact that if the Iraqi military is going to stand on its own and be lead in this that they should be the ones distributing CERP funds, not the American military.

Are you aware of any plans to train the green forces, the Iraqi forces, to begin to distribute some of the \$10 billion in surpluses that the Iraqi government has to begin winning the hearts and minds of the people especially in these mixed neighborhoods, that they can look to the Iraqi military as a fair place to try to build neighborhoods regardless of what area of town they are in?

General PETRAEUS. I have actually heard that discussed. I do not know of plans to do that, though. Again, my discussions with folks over there have really been limited to just getting that amount of information that I needed to provide input when I was consulted during the development of the new strategy.

I think it is something that is very worthy of consideration. I think that certainly again they have to spend their money. One of the reasons we have to have a comprehensive effort is to help them build the capacity to spend their money, because they have not been able to spend all that they have on behalf of the Iraqi people.

If I could, with respect to CERP, CERP is great for the WPA types of programs, but we will also look very hard for self-sustaining types of businesses and industries and so forth that we can either help revive or build as well. I think those are very important in this endeavor, so that you do not just pay to have the streets cleaned again, which is a notable accomplishment, but again 6 months from now if you do not achieve what you need to achieve with the ministry of public works you will be back where you were before.

Senator MCCASKILL. Thank you and we all wish you, not just Godspeed, but success and health.

General PETRAEUS. Thank you, Senator.

Chairman LEVIN. Thank you, Senator McCaskill.

General, I think everybody in Congress and every American wants us to succeed, wants to maximize the chances of success. The question is how best do we do that. There is no difference, however, between people on that issue. So it seems to me for you or others to say how important it is for us to succeed, that is the point, which is that the course that we have been on is a course towards failure. The question is how do you change course. The importance of changing course, how do you maximize the chances of success. Are you with me so far?

General PETRAEUS. I am, Senator.

Chairman LEVIN. The next question then is how do you change course once you decide that the course you are on is not working, despite those claims of the Vice President that the insurgency was in its last throes—that was a couple years ago—despite the claim of the President just a few months ago that we are absolutely winning in Iraq, when it is clear now that even he acknowledges we are not winning in Iraq.

So for folks who talk about just we cannot fail, as though somehow or other that automatically means that we follow the President, it seems to me there is a totally illogical conclusion. We have

been following the President's course. It has been a course that has led us towards failure and the President did not recognize that apparently until after the American people told him that.

So success is our goal and the question is how. There are two different approaches towards that. One is increased military commitment, that somehow or other giving the Iraqis more breathing space will make it more likely that they will reach a political settlement. The other approach is, no, they have had plenty of breathing space, 3½ years; they need pressure. They need to be told that it is not an open-ended commitment, as the President finally said, at least rhetorically, that it is not an open-ended commitment, that they must reach a political settlement if this thing is going to be resolved.

Now, does additional military presence contribute to the Iraqis reaching a political settlement or does embedding our troops in neighborhoods, number one, create a lot more targets, and does it take the Iraqis off the hook? Does it tell the Iraqis that we are going to increase our military presence, does that tell the Iraqis that somehow or other their future is in our hands rather than their own? That is an honest debate, it seems to me, which is the heart of the matter here.

So far would you agree with that?

General PETRAEUS. Yes, sir.

Chairman LEVIN. So it is not a disagreement over whether it is important to succeed. It is not a disagreement over whether failure is going to hurt in a whole host of ways. The question is what are the Iraqis going to read into increased American presence in their neighborhoods? What will they take from that?

Now, my understanding is the Prime Minister of Iraq went to Jordan and proposed to our President that the Iraqis take over the security of Baghdad. Is that your understanding?

General PETRAEUS. Sir, I have heard press reports of that. I do not have firsthand knowledge of that.

Chairman LEVIN. Have the Iraqis asked us for more American troops? I know they are supporting the President.

General PETRAEUS. Sir, I do not know.

Chairman LEVIN. You do not know if they have asked us for more?

General PETRAEUS. I do not, no, sir.

Chairman LEVIN. All right. One of the many things that our troops deserve, it seems to me, beside all the equipment, all the training, everything we can give them to succeed, support for their families, it seems to me that one of the things that our troops deserve is our honest assessments, and that they make a distinction between supporting them and supporting the policies of the administration. Would you agree with that?

General PETRAEUS. Yes.

Chairman LEVIN. They make a distinction, because I have met with the troops I do not know how many times now in Iraq and I tell them, look, I have been a critic going in, I have been a critic of the way this thing has been run, but, folks, you have the support of every Member of Congress. We are not cutting your funding. We are going to support you as long as you are there. The question is how do we succeed so you can come home. That is the question.

General PETRAEUS. Right.

Chairman LEVIN. They welcome an honest debate. I have gotten so many letters and comments from troops saying, this is worthy of your debate, you are making an honest assessment, keep at it. So many of our troops have said that, and you have heard about public opinion polls so far.

I just want to make sure that you are not intending to be interpreted as supporting a resolution or opposing a resolution, number one, by your testimony. Is that correct?

General PETRAEUS. That is correct, sir.

Chairman LEVIN. Number two, that you acknowledge that the goal of those who want to put pressure on the Iraqi leadership to step up and reach political settlements, is it the same goal that you have, which is that political settlement and political settlement alone by the Iraqis is our ultimate way of providing security and success in Iraq?

General PETRAEUS. Correct, Senator.

Chairman LEVIN. Okay. Can we have a functioning democracy in Iraq without political leaders in Iraq making the compromises that they need to make?

General PETRAEUS. No, sir.

Chairman LEVIN. You made a reference to the fact that there has been incremental progress recently, that there has been apparently a draft of a—

General PETRAEUS. A couple of encouraging signs, I think would be a way to characterize it, sir.

Chairman LEVIN. That would be on the political front in terms of reaching apparently a draft on the oil revenue?

General PETRAEUS. A draft on the oil revenues, yes, sir.

Chairman LEVIN. So that they have been able to make at least that incremental progress without a surge; is that correct?

General PETRAEUS. That is correct, sir.

Chairman LEVIN. President Talabani of Iraq has said that American troops are going to be there as long as the Iraqis want us there. Is that accurate? Should that be our decision, not their decision, as to how long?

General PETRAEUS. I wonder if he—yes, sir.

Chairman LEVIN. Are you familiar with that?

General PETRAEUS. I am not, sir.

Chairman LEVIN. All right. Is it our goal to pacify the militias or just to disarm them? Not “just”; let me restate that because it is not just to disarm. Is it our goal to pacify Baghdad or to disarm the militias, or both?

General PETRAEUS. Sir, the security in Baghdad can only be achieved by any extralegal individuals being off the streets. So it does not matter if they are international extremists, insurgents, Sunni Arab insurgents, violent criminals, militia members, or what have you. They all are those who violate the idea that the Iraqi government has the legitimate use of force.

Chairman LEVIN. If the militias merely reduce their visibility in Baghdad or move their operations to areas where Iraqi and U.S. forces are not present in strength, does that accomplish our goal?

General PETRAEUS. No, sir. In fact, there has been substantial discussion about the follow-on, the disarmament, the demobilization, and the reintegration (DDR) of various militia elements.

Chairman LEVIN. Prime Minister Maliki has asserted that U.S. refusal to provide the Iraqi security forces with weapons and equipment hurt their ability to secure Baghdad. Do you agree with that?

General PETRAEUS. Sir, I need to look at that. I did actually look over the weekend at the list of weapons and equipment that has been provided by the U.S. and bought with Iraqi money as well. It is actually quite substantial at this point. There is certainly the need for more and as they do in fact train more obviously there will be an additional requirement for equipment.

There is a requirement for more robust and additional armor protection and heavier weaponry for some of their elements. But we have actually provided quite substantial weaponry so far.

Chairman LEVIN. Would you let us know about your assessment on that?

General PETRAEUS. I will, sir.

Chairman LEVIN. Because that is quite a statement, when we have the Prime Minister of Iraq saying that the problem is that we have not given them the equipment so that they could secure Baghdad. That is quite an allegation.

General PETRAEUS. Sir, they have actually committed \$1.5 billion to foreign military sales actually with the U.S., for what that is worth, and that should enable them also. This, I am told, will be the first year in which they spend more in their defense budget than we spend in our train and equip budget.

Chairman LEVIN. Are you going to plan for the redeployment from Iraq of U.S. forces beyond the surge as just part of the planning process?

General PETRAEUS. Sir, obviously you have to have contingencies. You are always looking at what you are doing. So the answer to that would obviously be yes.

Chairman LEVIN. With that qualification and understanding.

General PETRAEUS. Yes, sir.

Chairman LEVIN. Finally, I want you to go back in time. We have spent I think all of this morning pretty much talking about where we are at and where we are going, the differences that exist on that issue or those issues. I want you to go back to the time when Ambassador Bremer decided to disband the Iraqi army and to also deBaathify to the extent that he did.

Did you agree, if you can put yourself back in time, with those decisions?

General PETRAEUS. Sir, I would like to qualify it. I will say no, but I would like to qualify it, because there is really some nuance to this. Ambassador Bremer is actually correct when he says, first of all, they had already disestablished themselves by and large. They had not done what in fact one of the assumptions, or at least you would hope that a number of them would remain in their own barracks, safeguard their equipment, turn the turrets or their tanks over to the rear, and just wait to be partners with us. That did not materialize and unfortunately a lot of their stuff was looted as they went out the door.

So there was really not a formally constituted military at that time, although it certainly could reassemble. It did reassemble. The challenge—and beyond that, it had vast numbers of very high-ranking officers. Arguably, it was to some degree Saddam's jobs program for very senior officers. In Nineveh Province alone, there were 1,100 brigadier generals and above, for example, although there was only one army corps.

Having said that, the challenge was of course with this army that Iraq perhaps did not need in the long-term was now unemployed. It was really the issue of how long it took to announce the stipends, the follow-on opportunities for them, how they would be able to feed their families, and again what their future held, and to some degree a degree of disrespect, frankly, for an institution that in the Iraqis' eyes was perhaps the one institution that had been the least corrupted. I am talking about the military now, not the Special Republican Guards or some of these other organizations.

That period between the announcement of the disestablishment and the announcement of stipends, was roughly 5 weeks or so. That was a difficult period in Iraq. All of the military commanders in Iraq at that time registered their concerns, because in fact the former Iraqi military did assemble and it made their views very clearly known, and eventually those turned into riots and eventually some were actually killed outside the Green Zone and so forth before the stipends were announced.

Crowds are a very big challenge when you are in an endeavor like that and you really do not like to see crowds because someone can shoot out of a crowd and then you have a real force protection issue on your hands, and that did in fact materialize during that time, and arguably that may have been where some of the initial elements of the insurgency began to gain strength.

With respect to the deBaathification policy, clearly Iraq had to have a deBaathification policy. There is no question about that. Ambassador Bremer did intend for there to be not just deBaathification, but in fact exceptions to that policy in substantial numbers that would amount to reconciliation.

In fact, when I had a conversation with him in Mosul in the summer of 2003 he gave the 101st the authority to allow the Iraqis to conduct a reconciliation process, for which we did provide judicial oversight. That was conducted initially for Mosul University and then some of the others. The key there was to get the paperwork down to Baghdad to the deBaathification committee, and unfortunately a process that had a fair degree of rigor to it—I think it was less than 60 percent would have been fully "reconciled," and none of them would have gone to leadership positions. I had already personally fired the higher level Baath official who was the head of the university. But for these individuals, say 120 or so professors, many of whom were educated in western universities, which is one reason they had to be Baath Party members, to go overseas.

So that was a real challenge, and all the military commanders did register their concerns during that time, because it was a period when obviously many of those affected were Sunni Arab, perhaps most, although there were Shia in the fold as well. But in the areas where most of the U.S. commanders were, that affected

Sunni Arabs, and that obviously caused significant challenges for us.

Chairman LEVIN. Our commanders then registered their concerns about that policy?

General PETRAEUS. Yes, sir.

Chairman LEVIN. In the way you have discussed?

General PETRAEUS. Yes, sir.

Chairman LEVIN. Thank you.

General PETRAEUS. Again, to be fair, there was an intent to do reconciliation. Ambassador Bremer himself has on several occasions noted that he had intended to do that, wanted to do that, and was just not able to get it done because of the committee.

Chairman LEVIN. Of what?

General PETRAEUS. The deBaathification committee of the Iraqi Governing Council.

Chairman LEVIN. Who was head of that committee?

General PETRAEUS. I think it was Ahmed Chalabi, sir.

Chairman LEVIN. Senator Lieberman.

Senator LIEBERMAN. Thank you, Mr. Chairman.

Thank you, General Petraeus. Your testimony has been very impressive. I must say that I was particularly impressed when, after 4 hours in the chair, Senator Levin offered you a chance for a personal break and you said it was not necessary. That is impressive. I am going to try to be brief.

I do want to first generally respond to something Senator Levin said and agree with him, in case there is any misimpression. The two of us have disagreed on some of the policies we have followed in Iraq, and we disagree today. But one thing we agree on is that both of us are looking for a way to succeed in Iraq. We just have different paths that we think will work better. I would say that is true of all the members of this committee, and I would add that insofar as some sensitivity was expressed earlier I am sure all the members of the committee support our troops who are there and would not do anything to oppose them.

Having said that, what I did earlier was two things. One is that, in response to questions Senator McCain and I asked about the possible impact of a Senate resolution of disapproval, I thought you were clear, which is that you really did not say much about the impact on the morale of the troops. You said in the negative almost, that you could not imagine there would be a beneficial effect. You did not say anything about a negative effect.

With regard to the impact of a resolution of disapproval on our enemies, you, I thought, expressed concern that in a war like this, which is in good part a test of wills, that it might give them hope. Clearly that is not the intention of the sponsors in the Senate of such a resolution, but that is part of what we have to ask ourselves, what are the consequences.

I made a different kind of plea to my colleagues here, and I repeat it, which is now at the end of this hearing everyone has expressed great respect for you, appreciation that you are taking on this mission, and as far as I could hear everyone on this committee is going to support your nomination. Yet, one question that I do remember—I did not ask it—you were asked whether you thought you could be successful in your new command without the addi-

tional troops provided and the additional economic and interagency support, political support, that the plan offers, and you said no.

So I worry that we are both going to confirm you and yet we are going to pass a resolution that says we are not in favor of what you need to succeed. Of course, the resolution will not cut off that aid, so that in a way is the reassuring part of it.

That is why I ask my colleagues again to think about holding back a while on such resolutions, to give you a chance to implement what you have said, and I believe most would agree, is a different policy, a new approach, in the dire circumstances that you will find in Iraq, because, as I think all of us agree on this committee certainly, the consequences of failure really I believe will be, some would say could be, disastrous for the United States, for Iraq, for the Middle East, for the war on terrorism, and for the world economy.

I want to just ask you two or three brief questions. The first is, I do want to thank you for resisting the temptation that some of my colleagues offered to you to offer pledges based on time. We will know by X date. I think the more honest and really responsive answer you gave was that you will report to us regularly and you will tell us regularly how it is going and what is working and what is not, and then we will make the judgments accordingly.

Two brief questions about what you will find. The deployment plan envisions the early deployment of three Army brigades and the alert of three more Army brigades to follow. Some have asked, why not all six at once? I am not going to ask you that question. I am just going to ask you if when you get there you find that you need more than the three brigades more quickly, is it fair to assume that you will request that expedited deployment of those troops?

General PETRAEUS. Sir, actually I have told the Chairman of the Joint Chiefs and the Secretary of Defense that we should flow all five brigades and the two battalions for Anbar Province as quickly as we can.

Senator LIEBERMAN. That is great. Thank you.

The second question is similar. Obviously, you know that there was great concern here in Congress and among the American people about what was seen in the earlier stages of the conflict in Iraq as inadequate troop protection equipment. As we send in these additional 21,000 American troops, I assume we can count on you to let us know and your superiors know immediately whether enough equipment is coming along with them, including, of course, troop protection equipment?

General PETRAEUS. Sir, I will.

Chairman LEVIN. A final question. I wish that this was not just on C-SPAN 3, but on evening television, for the American people to see more broadly, because I do think, while your testimony is before this committee, you have answered today for members of the committee a lot of the questions that are in the minds of the American people. Look, they are disappointed with what they see. We are all disappointed. You are disappointed.

So the question that I think they would ask you: Is it worth it to now send 21,000 more troops? Is it possible to succeed? But the more specific question I want to ask, because I hear this all the

time: the Shia and Sunni Muslims have been fighting each other for more than a millennium. Why do we think we can possibly end this fighting? Why would we send more of our troops now, according to this new way forward, into the middle of that kind of violence, which is now called sectarian violence?

General PETRAEUS. First of all, there are countries in that region where there are one or the other majority. Iraq itself does have a history of actual substantial intermarriage, not just getting along well together. Unfortunately, some of the violence, some of the developments, again in particular in the wake of the bombing of the Askari mosque in February of this past year, in a sense magnified the sectarian divides that in some cases were nowhere near as large. That does give me hope that in fact Sunni, Shia, Kurd, Yizzidi, Shabback, Turkoman, Christian, and all of the other elements of Iraq can, in fact, get along together. It will not be easy, but if we could get them to where they are shouting instead of shooting that would be a very substantial improvement.

Senator LIEBERMAN. Thank you very much. Godspeed.

General PETRAEUS. Thank you, sir.

Chairman LEVIN. General, just to clarify the issue of the pace of the 21,000 troop deployment.

General PETRAEUS. Yes, sir.

Chairman LEVIN. The National Security Adviser, Mr. Hadley, suggested that the pace will depend a lot on the Iraqis performing. Secretary Gates said there will be plenty of opportunity before many of the 21,000 additional troops arrive to evaluate, "whether the Iraqis are fulfilling their commitments to us."

I believe it was the Chairman of the Joint Chiefs who talked about off-ramps, in other words turning off the 21,000 flow somewhere in the middle, suggesting that that would depend upon whether the Iraqis come through with their commitments.

You seem to take a very different approach. Do you differ from Secretary Gates when he says that there is going to be plenty of opportunity, which is a plus, before many of the 21,000 additional troops arrive to evaluate, "whether the Iraqis are fulfilling their commitments to us"?

General PETRAEUS. No, sir, I do not. What I stated was that as the military commander who is given a mission, that is a different mission, to improve security in Baghdad for the population, what I have told the Chairman and the Secretary is that I would like to get those forces on the ground as quickly as possible. That is not, I do not think, contradictory with anything that they have said that is a force generation process issue.

Whether I come back to them at some point and somehow have so much of a sense that perhaps they are not living up to their side of the bargain, that we want to call a time out, I think that is a different issue actually from what you have to plan, what you have to assume when you are planning, and also what a commander asks for to try to improve the chances of success.

Chairman LEVIN. On that question of a time out, that is a time out that you might consider calling for under the circumstances? Is that right, given what you said this morning?

General PETRAEUS. Yes, sir.

Chairman LEVIN. I am not saying you are going to call for a time out.

General PETRAEUS. Right, sure.

Chairman LEVIN. I am saying you will consider calling for a time out. You want to leave that possibility open depending on whether the Iraqis carry out their commitments?

General PETRAEUS. That is correct, sir.

Chairman LEVIN. All of which points to the value of pressure on the Iraqis; would you agree with that?

General PETRAEUS. I would, sir.

Chairman LEVIN. I welcome Senator Lieberman's comments, by the way. The only thing I think, it is right when you get to the end of your suggestion about what you need to succeed, and those of us who disagree that a deeper military involvement is not what you need to succeed, it is not because we do not want the Iraqis to succeed or us to succeed. It is because we believe it is up to the Iraqis to reach a political settlement and only then can there be a chance of success in Iraq.

That represents the issue, whether or not more military presence and involvement promote that goal of Iraqis achieving political settlement or not. That is where the difference is and, although you I think there is value in additional troops, that basically is a mission which has been given to you, is that correct?

General PETRAEUS. That is correct, Mr. Chairman.

Chairman LEVIN. You have not decided that is the right policy. You agree with the policy, but the policy decision was not yours; is that correct?

General PETRAEUS. That is correct, Mr. Chairman.

Chairman LEVIN. The letters that I referred to before asking for the benchmarks, the series of letters, we will make part of the record at this time. I want to clarify two things: one, that we talked about both benchmarks and timelines, because apparently the Iraqis have agreed on both. But whether that is true, whether it is just the benchmarks and not the timelines, whatever the Iraqis have agreed to in that regard we want to see.

Two, it is not just, as the letters refer to, the benchmarks for a political process; it is also benchmarks which they have agreed to on military commitments of theirs, on economic, financial commitments of theirs, as well as on political commitments that they have not yet carried out.

November 14, 2006

The Honorable Condoleezza Rice
 U.S. Department of State
 2201 C Street, N.W.
 Washington, DC 20520

Dear Madam Secretary:

The top priority for the coming months must be finding a way forward to change course in Iraq. U.S. policy must include urging the Iraqis to make the necessary political compromises, which only they can make, to preserve Iraq as a nation. Our military commanders have made clear there is no military solution; only a political solution can restore security in Iraq.

The Administration announced last month that Iraqi leaders had agreed to a timeline and benchmarks for a political process over the coming months. On October 25, 2006, President Bush stated that the Administration and the Iraqi Government were developing benchmarks for determining whether the "hard decisions necessary to achieve peace" were being made. Earlier, on October 24, 2006, Ambassador Zalmay Khalilzad stated that Iraqi leaders had agreed to a timeline for making the hard decisions on outstanding issues and that President Talibani had made those commitments public. According to Ambassador Khalilzad and General Casey, these included enactment of an oil law for sharing resources; a constitutional amendment on power-sharing that would guarantee democratic rights and equality to all Iraqis; reforming the de-Ba'athification Commission; and increasing the credibility and capability of Iraqi forces. However, on October 25, 2006, Iraqi Prime Minister Maliki stated publicly that no timetable has been set.

Please provide the agreed timeline and benchmarks (or the U.S. proposal for such) of political issues to be resolved by the Iraqi Government in the coming months. This information will be essential to the Congress' consideration of a way ahead on Iraq.

Thank you for your assistance.

Sincerely,

 Carl Levin

January 16, 2007

The Honorable Condoleezza Rice
 U.S. Department of State
 2201 C Street, N.W.
 Washington, DC 20510

Dear Madam Secretary:

On November 14, 2006 I sent you a letter (attached) asking that you provide the agreed timeline and benchmarks (or the U.S. proposal for such) of political issues to be resolved by the Iraqi Government in the coming months. At that time I requested the same from Secretary Rumsfeld. On December 4, I heard from Under Secretary of Defense Edelman that the State Department had received my letter and had agreed to respond on behalf of the Administration. I have yet to hear from the State Department in this regard.

As I stated in my first letter, this information will be essential to the Congress' consideration of a way ahead on Iraq. Now that the President has announced his new strategy for Iraq, this information is even more vital. I am very disappointed that two months have gone by and you have not responded to my initial request. In view of the passage of time and the importance of this issue, I expect to receive the timeline and benchmarks by the end of this week.

Sincerely,

Carl Levin
 Chairman

WASHINGTON, DC 20510-6050

January 25, 2007

The Honorable Condoleezza Rice
Secretary of State
Department of State
2201 C Street, N.W.
Washington, DC 20510

Dear Madam Secretary:

On November 14, 2006 Senator Levin sent you a letter (attached) asking that you provide the agreed timeline and benchmarks (or the U.S. proposal for such) of political issues to be resolved by the Iraqi Government in the coming months. At that time he also requested the same from Secretary Rumsfeld. On December 4, he heard from Under Secretary of Defense Edelman that the State Department had received his letter and had agreed to respond on behalf of the Administration. Having not heard from the State Department for two months, Senator Levin again wrote to you (attached) on January 16, 2007 reiterating his request and noting his expectation that you would be courteous enough to respond by the end of last week. Unfortunately, you have not done so, which necessitates yet another request.

In his January 10 address to the nation on his new strategy for Iraq, President Bush said that "America will hold the Iraqi government to the benchmarks it has announced." It is essential that Congress have the information on those benchmarks to comprehensively consider as it addresses the way ahead in Iraq. It is both baffling and disturbing that the Administration will not provide the timeline and benchmarks, and it is our joint expectation that you will do so promptly, and by the end of this week at the latest. If the benchmarks to which the President referred include additional commitments beyond those initially agreed to by the Iraqi government, then our expectation is that you will make that clear in your response, and will clearly indicate which are new commitments.

Sincerely,

John McCain
Ranking Member

Carl Levin
Chairman

Attachments

Chairman LEVIN. General, you have been very strong, steadfast in staying with us this morning. I am sure there would have been moments when you would have liked to have a few minutes off, not because the questions were too difficult for you to handle, but for other, more personal reasons. But in any event, we thank you for your sticking with us here so we could conclude this hearing in good order.

We will now stand adjourned and we will do our very best to get your nomination to a vote of this committee just as quickly as we possibly can. We thank you again and we now stand adjourned.

[Whereupon, at 1:36 p.m., the committee adjourned.]

[Prepared questions submitted to LTG David H. Petraeus, USA, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. The integration of joint capabilities under the Goldwater-Nichols Act has been a success. Our military forces are more interoperable today than they ever have been in our Nation's history. This achievement has been remarkable. The next step is to ensure the ability of the military and civilian departments to work closely together. Counterinsurgency warfare requires a total commitment of the government—both military and civilian agencies—and unity of effort is crucial to success.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. One of the most pressing needs is for the creation of interagency doctrine for the prosecution of counterinsurgency and stability operations. The State Department Bureau of Political-Military Affairs has taken initial steps toward this end. During a conference hosted jointly by State and the Office of the Secretary of Defense, I proposed several actions that could help foster greater interagency capacity, and I recently seconded two majors from Fort Leavenworth (awaiting the start of the next School of Advanced Military Studies course) to the State Department to work this issue. Beyond development of doctrine in this area, there is discussion on creating an interagency Center for Complex Operations, which would be an intellectual clearinghouse for ideas and best practices in the many facets of irregular warfare. This appears to be a low-cost, but high-payoff, action that the committee should consider supporting.

DUTIES

Question. What is your understanding of the duties and functions of the Commander, Multinational Forces-Iraq (MNF-I)?

Answer. The Commanding General (CG) of MNF-I commands forces within Iraq and is the senior military representative to the U.S. Chief of Mission. MNF-I is a Combined Joint Task Force under Operational Control (OPCON) to the Commander of U.S. Central Command (CENTCOM). MNF-I conducts operations in support of the Government of Iraq, U.S. Mission and other international organizations. The CG exercises Tactical Control (TACON) of non-U.S. Coalition Forces and OPCON of the Multinational Corps-Iraq (MNC-I) and the Multinational Security Transition Command-Iraq (MNSTC-I). This is a strategic level command.

Question. What are the differences between the duties and functions of the Commander, MNF-I and the Commander, MNC-I?

Answer. The Commanding General of MNC-I is the senior operational level commander in Iraq. He directly commands forces conducting operations to restore order and security in Iraq.

The commander of the MNF-I has a wider responsibility which covers strategic issues and the political/military interface, working with the U.S. Ambassador and Government of Iraq to integrate all aspects of the campaign such as security, governance, economic development, communication, and transition.

Question. What background and experience, including joint duty assignments, do you possess that you believe qualify you to perform these duties?

Answer. I believe that I have a good background for the duties of MNF-I CG, if confirmed. First, I have, of course, served in Iraq for some 2½ years and have a

good understanding of the country, its government, and many of its leaders from all factions. Second, I have had a number of joint assignments at relatively high level—as a temporary duty Special Assistant to Commander in Chief, Allied Forces Southern Europe (North Atlantic Treaty Organization (NATO)), as Military Assistant to the Supreme Allied Command, Europe (NATO), as Operations Chief of the United Nations (UN) Force in Haiti, as Executive Assistant to the Chairman, Joint Chiefs of Staff (CJCS), as Assistant Chief of Staff, Operations of SFOR in Bosnia, and, of course, as the Commander of MNSTC-I and the NATO Training Mission in Iraq. Third, I believe I have a reasonably solid academic/intellectual background, having studied, as well as served in, major combat operations, counterinsurgency operations, peacekeeping operations, and peace enforcement operations. Most recently, in my current position, I oversaw the development of the new Army/Marine Corps manual on counterinsurgency and also oversaw changes to other Army doctrinal manuals, our leader development programs, our combat training centers, and a variety of other activities that support the preparation of our leaders and units for deployment to Iraq. Finally, I believe I understand the requirements of strategic-level leadership, which is what, after all, MNF-I is all about.

Question. Do you believe that there are any steps that you need to take to enhance your ability to perform the duties of the Commander, MNF-I?

Answer. Yes, and I will complete them before deploying, if confirmed. In particular, I need to establish initial personal relationships with the members of the JCS I don't know (I have done this with the Vice CJCS and CJCS and key Joint Staff members already); get briefings on the interagency's support for the important "non-kinetic" aspects of the new way ahead; meet again with the Secretary of Defense and President—and certain interagency leaders; and discuss Iraq with several leaders of the intelligence community with whom I have not yet been able to meet. The most important, frankly, is getting an understanding of the level of interagency support that will be forthcoming. That will obviously be key to the comprehensive approach that is essential in Iraq.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges that will confront the next Commander, MNF-I?

Answer. There are many challenges in Iraq, but I would point out four of particular concern. The top challenge is providing the security necessary to reduce the cycle of violence in Iraq today. This will be a difficult mission and time is not on our side. We must focus on population security, particularly in Baghdad, to give the Iraqi government the breathing space it needs to become more effective. The second challenge is continuing the development of capable Iraqi security forces (ISFs), relatively free of ethnic and sectarian bias. The Iraqi Army has made much progress, but is uneven, and the police remain a challenge. The third challenge is the integration of the interagency effort to ensure that progress is made along all lines of operation—not just security, but economic, governance, and the rule of law as well. That is related to the fourth challenge, and that is the lack of capacity of the Iraqi government. Iraq has enormous natural resources and potential wealth. However, to take advantage of its blessings, not only must security be improved, but critical national issues must be resolved by the Iraqis, on issues such as national reconciliation, the devolution of power below Baghdad, the distribution of oil wealth, and so on. Only through unity of effort of all—coalition and Iraqi, military and civilian—can we bring the full weight of our effort to bear on the difficult situation in Iraq.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. Population security is the top priority. We must clear and hold the neighborhoods of Baghdad to break the cycle of violence that is preventing political progress in Iraq. We can only do this by establishing persistent presence—coalition, as well as Iraqi—in Iraqi neighborhoods. I plan to ensure that some of our forces locate in the neighborhoods they protect and that they fight closely linked with their Iraqi counterparts—with the Iraqis in the lead whenever possible—to secure the population.

I will also work to improve the capability of the ISFs by augmenting the size and capabilities of the embedded transition teams that advise these forces. Beyond this, I will enhance the partnership between U.S. units and Iraqi units, which increases the operating capabilities of both forces. The Iraqi units have greater cultural awareness and linguistic capabilities, while U.S. forces bring greater military capabilities to the battlefield. Iraqi and U.S. elements are more effective at population security and preparing for gradual transition when working together.

To improve interagency cooperation, I applaud the recent efforts to embed the Provincial Reconstruction Teams (PRTs) in the Brigade Combat Team (BCT) headquarters (HQs) for those provinces in which BCTs are the senior HQs, or in the division headquarters in areas where they are the senior HQs in a province. This will provide a synergy that will significantly enhance our ability to conduct stability and reconstruction operations in Iraq.

I will do all that I can, in partnership with the Ambassador, to ensure that our interagency is doing all possible to help develop capacity in the Iraqi government and to enable it to come to grips with the tough issues it must resolve.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Commander, MNF-I?

Answer. As the military commander, my broad priorities would support the development of an Iraqi state that is a stable, reasonably representative democracy that respects the rights of all Iraqis and can provide for its own security, with Iraqi security institutions that act professionally and according to the interests of all Iraqi people. My more immediate priorities would address the challenges that MNF-I faces today—security of the population to enable political progress, enhancement of ISFs capabilities to provide the Iraqi government a monopoly on the use of force, support for effective interagency cooperation to bring the full weight of our national resources to bear on the problem, and assistance to interagency elements as they work to help the Iraqi government build capacity and resolve the tough issues it confronts. Other priorities would include countering the threats posed by Iranian and Syrian meddling in Iraq, and the continued mission of dismantling terrorist networks and killing or capturing those who refuse to accept a unified, stable Iraq.

LESSONS LEARNED

Question. What were the major lessons you learned in your previous Iraq tours, both leading a division and leading the effort to establish, train, and equip security forces, that are the most applicable to the duties you are about to assume?

Answer. Perhaps the best way to answer this is to attach an article I wrote upon returning from Iraq after my last tour there. In it, I laid out the lessons I learned in the form of 14 observations, noted below; they are still valid, though they obviously require nuanced application depending on the specific situation in each case (which is explained in the article). The article attached explains them in detail.

1. "Do not try to do too much with your own hands."
2. Act quickly, because every Army of liberation has a half-life.
3. Money is ammunition.
4. Increasing the number of stakeholders is critical to success.
5. Analyze "costs and benefits" before each operation.
6. Intelligence is the key to success.
7. Everyone must do nation-building.
8. Help build institutions, not just units.
9. Cultural awareness is a force multiplier.
10. Success in a counterinsurgency requires more than just military operations.
11. Ultimate success depends on local leaders.
12. Remember the strategic corporals and strategic lieutenants.
13. There is no substitute for flexible, adaptable leaders.
14. A leader's most important task is to set the right tone.

Learning Counterinsurgency: Observations from Soldiering in Iraq

Lieutenant General David H. Petraeus, U.S. Army

Iraqi Soldiers of the 1st Battalion, 2d Brigade, 1st Iraqi Infantry Division conduct search operations in Fallujah, Iraq, 9 December 2005.

THE ARMY HAS LEARNED a great deal in Iraq and Afghanistan about the conduct of counterinsurgency operations, and we must continue to learn all that we can from our experiences in those countries.

The insurgencies in Iraq and Afghanistan were not, in truth, the wars for which we were best prepared in 2001; however, they are the wars we are fighting and they clearly are the kind of wars we must master. America's overwhelming conventional military superiority makes it unlikely that future enemies will confront us head on. Rather, they will attack us asymmetrically, avoiding our strengths—firepower,

maneuver, technology—and come at us and our partners the way the insurgents do in Iraq and Afghanistan. It is imperative, therefore, that we continue to learn from our experiences in those countries, both to succeed in those endeavors and to prepare for the future.

Soldiers and Observations

Writing down observations and lessons learned is a time-honored tradition of Soldiers. Most of us have done this to varying degrees, and we then reflect on and share what we've jotted down after returning from the latest training exercise, mission, or deployment. Such activities are of obvious importance in helping us learn from our own experiences and from those of others.

In an effort to foster learning as an organization, the Army institutionalized the process of collection, evaluation, and dissemination of observations, insights, and lessons some 20 years ago with the formation of the Center for Army Lessons Learned.¹ In subsequent years, the other military services and the Joint Forces Command followed suit, forming their own lessons learned centers. More recently, the Internet and other knowledge-management tools have sped the processes of collection, evaluation, and dissemination enormously. Numerous products have already been issued since the beginning of our operations in Afghanistan and Iraq, and most of us have found these products of considerable value as we've prepared for deployments and reviewed how different units grappled with challenges our elements were about to face.

For all their considerable worth, the institutional structures for capturing lessons are still dependent on Soldiers' thoughts and reflections. And Soldiers have continued to record their own observations, particularly in recent years as we have engaged in so many important operations. Indeed, my own pen and notebook were always handy while soldiering in Iraq, where I commanded the 101st Airborne Division during our first year there (during the fight to Baghdad and the division's subsequent operations in Iraq's four northern provinces), and where, during most of the subsequent year-and-a-half, I helped with the so-called "train and equip" mission, conducting an assessment in the spring of 2004 of the Iraqi Security Forces after their poor performance in early April

COUNTERINSURGENCY

Observations from Soldiering in Iraq

1. "Do not try to do too much with your own hands."
2. Act quickly, because every Army of liberation has a half-life.
3. Money is ammunition.
4. Increasing the number of stakeholders is critical to success.
5. Analyze "costs and benefits" before each operation.
6. Intelligence is the key to success.
7. Everyone must do nation-building.
8. Help build institutions, not just units.
9. Cultural awareness is a force multiplier.
10. Success in a counterinsurgency requires more than just military operations.
11. Ultimate success depends on local leaders.
12. Remember the strategic corporals and strategic lieutenants.

14. A leader's most important task is to set the right tone.

2004, and then serving as the first commander of the Multi-National Security Transition Command-Iraq and the NATO Training Mission-Iraq.

What follows is the distillation of a number of observations jotted down during that time. Some of these observations are specific to soldiering in Iraq, but the rest speak to the broader challenge of conducting counterinsurgency operations in a vastly different culture than our own. I offer 14 of those observations here in the hope that others will find them of assistance as they prepare to serve in Iraq or Afghanistan or in similar missions in the years ahead.

Fourteen Observations

Observation Number 1 is "Do not try to do too much with your own hands." T.E. Lawrence offered this wise counsel in an article published in *The Arab Bulletin* in August 1917. Continuing, he wrote: "Better the Arabs do it tolerably than that you do it perfectly. It is their war, and you are to help them, not win it for them. Actually, also, under the very odd conditions of Arabia, your practical work will not be as good as, perhaps, you think it is. It may take them longer and it may not be as good as you think, but if it is theirs, it will be better."²

Lawrence's guidance is as relevant in the 21st century as it was in his own time in the Middle East during World War I. Like much good advice, however, it is sometimes easier to put forward than it is to follow. Our Army is blessed with highly motivated sol-

diers who pride themselves on being action oriented. We celebrate a "can do" spirit, believe in taking the initiative, and want to get on with business. Yet, despite the discomfort in trying to follow Lawrence's advice by not doing too much with our own hands, such an approach is absolutely critical to success in a situation like that in Iraq. Indeed, many of our units recognized early on that it was important that we not just perform tasks for the Iraqis, but that we help our Iraqi partners, over time enabling them to accomplish tasks on their own with less and less assistance from us.

Empowering Iraqis to do the job themselves has, in fact, become the essence of our strategy—and

such an approach is particularly applicable in Iraq. Despite suffering for decades under Saddam, Iraq still has considerable human capital, with the remnants of an educated middle class, a number of budding entrepreneurs, and many talented leaders. Moreover, the Iraqis, of course, know the situation and people far better than we ever can, and unleashing their productivity is essential to rebuilding infrastructure and institutions. Our experience, for example, in helping the Iraqi military reestablish its staff colleges and branch-specific schools has been that, once a good Iraqi leader is established as the head of the school, he can take it from there, albeit with some degree of continued Coalition assistance. The same has been true in many other areas, including in helping establish certain Army units (such as the Iraqi

An Iraqi public order brigade soldier after graduating from the police academy in the Muthana Zayuna District of Baghdad, Iraq, 9 January 2006.

During a recognition ceremony held in the Baghdad Convention Center on 9 January 2004, an Iraqi working for the Civil Defense Corps petitions the Coalition for compensation for all the wounded Iraqis and widows.

Army's 9th Division (Mechanized), based north of Baghdad at Taji, and the 8th Division, which has units in 5 provinces south of Baghdad) and police academies (such as the one in Hillah, run completely by Iraqis for well over 6 months). Indeed, our ability to assist rather than do has evolved considerably since the transition of sovereignty at the end of late June 2004 and even more so since the elections of 30 January 2005. I do not, to be sure, want to downplay in the least the amount of work still to be done or the daunting challenges that lie ahead; rather, I simply want to emphasize the importance of empowering, enabling, and assisting the Iraqis, an approach that figures prominently in our strategy in that country.

Observation Number 2 is that, in a situation like Iraq, the liberating force must *act quickly*, because every Army of liberation has a half-life beyond which it turns into an Army of occupation. The length of this half-life is tied to the perceptions of the populace about the impact of the liberating force's activities. From the moment a force enters a country, its leaders must keep this in mind, striving to meet the expectations of the liberated in what becomes a race against the clock.

This race against the clock in Iraq has been complicated by the extremely high expectations of the Iraqi people, their pride in their own abilities, and their reluctant admission that they needed help from Americans, in particular.³ Recognizing this, those of us on the ground at the outset did all that we could with the resources available early on to help the people, to repair the damage done by military operations and looting, to rebuild infrastructure, and to restore basic services as quickly as possible—in effect, helping extend the half-life of the Army of liberation. Even while carrying out such activities, however, we were keenly aware that sooner or later,

the people would begin to view us as an Army of occupation. Over time, the local citizenry would feel that we were not doing enough or were not moving as quickly as desired, would see us damage property and hurt innocent civilians in the course of operations, and would resent the inconveniences and intrusion of checkpoints, low helicopter flights, and other military activities. The accumulation of these perceptions, coupled with the natural pride of Iraqis and resentment that their country, so blessed in natural resources, had to rely on outsiders, would eventually result in us being seen less as liberators and more as occupiers. That has, of course, been the case to varying degrees in much of Iraq.

The obvious implication of this is that such endeavors—especially in situations like those in Iraq—are a race against the clock to achieve as quickly as possible the expectations of those liberated. And, again, those expectations, in the case of Iraqi citizens, have always been very high indeed.⁴

Iraqi workers hired to build steps beside the Research Triangle Institute Center in Dhi Qar Province, An Nasiriyah, Iraq, 10 January 2004.

Observation Number 3 is that, in an endeavor like that in Iraq, *money is ammunition*. In fact, depending on the situation, money can be more important than real ammunition—and that has often been the case in Iraq since early April 2003 when Saddam's regime collapsed and the focus rapidly shifted to reconstruction, economic revival, and restoration of basic services. Once money is available, the challenge is to spend it effectively and quickly to rapidly achieve measurable results. This leads to a related observation that the money needs to be provided as soon as pos-

COUNTERINSURGENCY

sible to the organizations that have the capability and capacity to spend it in such a manner.

So-called "CERP" (Commander's Emergency Reconstruction Program) funds—funds created by the Coalition Provisional Authority with captured Iraqi money in response to requests from units for funds that could be put to use quickly and with minimal red tape—proved very important in Iraq in the late spring and summer of 2003. These funds enabled units on the ground

to complete thousands of small projects that were, despite their low cost, of enormous importance to local citizens.³ Village schools, for example, could be repaired and refurbished by less than \$10,000 at that time, and units like the 101st Airborne Division carried out hundreds of school repairs alone. Other projects funded by CERP in our area included refurbishment of Mosul University, repairs to the Justice Center, numerous road projects, countless water projects, refurbishment of cement and asphalt factories, repair of a massive irrigation system, support for local elections, digging of dozens of wells, repair of police stations, repair of an oil refinery, purchase of uniforms and equipment for Iraqi forces, construction of small Iraqi Army training and operating bases, repairs to parks and swimming pools, support for youth soccer teams, creation of employment programs, refurbishment of medical facilities, creation of a central Iraqi detention facility, establishment of a small business loan program, and countless other small initiatives that made big differences in the lives of the Iraqis we were trying to help.

The success of the CERP concept led Congress to appropriate additional CERP dollars in the fall of 2003, and additional appropriations have continued ever since. Most commanders would agree, in fact, that CERP dollars have been of enormous value to the effort in Iraq (and in Afghanistan, to which the concept migrated in 2003 as well).

Beyond being provided money, those organizations with the capacity and capability to put it to use must also be given reasonable flexibility in how they spend at least a portion of the money, so that it can be used to address emerging needs—which are inevitable. This is particularly important in the case of appropriated funds. The recognition of this need guided our requests for resources for the Iraqi Security Forces "train and equip" mission, and the result

Conference of the Entrepreneur Business Professionals of Iraq hosted by the 354th Civil Affairs Brigade on 20 September 2003. More than 200 young business professionals between the ages of 21 and 35 participated in lectures and working groups on topics related to creating and managing businesses in a global economy.

was a substantial amount of flexibility in the 2005 supplemental funding measure that has served that mission very well, especially as our new organization achieved the capability and capacity needed to rapidly put to use the resources allocated to it.⁴

Observation Number 4 reminds us that *increasing the number of stakeholders is critical to success*. This insight emerged several months into our time in Iraq as we began to realize that

more important than our winning Iraqi hearts and minds was doing all that we could to ensure that as many Iraqis as possible felt a stake in the success of the new Iraq. Now, I do not want to downplay the importance of winning hearts and minds for the Coalition, as that extends the half-life I described earlier, something that is of obvious desirability. But more important was the idea of Iraqis wanting the new Iraq to succeed. Over time, in fact, we began asking, when considering new initiatives, projects, or programs, whether they would help increase the number of Iraqis who felt they had a stake in the country's success. This guided us well during the time that the 101st Airborne Division was in northern Iraq and again during a variety of initiatives pursued as part of the effort to help Iraq reestablish its security forces. And it is this concept, of course, that undoubtedly is behind the reported efforts of the U.S. Ambassador in Iraq to encourage Shi'ia and Kurdish political leaders in Iraq to reach out to Sunni Arab leaders and to encourage them to help the new Iraq succeed.

The essence of **Observation Number 5**—that we should *analyze costs and benefits of operations before each operation*—is captured in a question we developed over time and used to ask before the conduct of operations: "Will this operation," we asked, "take more bad guys off the street than it creates by the way it is conducted?" If the answer to that question was, "No," then we took a very hard look at the operation before proceeding.

In 1986, General John Galvin, then Commander in Chief of the U.S. Southern Command (which was supporting the counterinsurgency effort in El Salvador), described the challenge captured in this observation very effectively: "The . . . burden on the military institution is large. Not only must it subdue an armed

Soldiers assigned to the 101st Airborne Division (Air Assault) look on as a tube-launched optically-tracked wire-guided (TOW) missile penetrates a building where Uday and Qusay Hussein, the sons of Saddam Hussein, barricaded themselves.

adversary while attempting to provide security to the civilian population, it must also avoid furthering the insurgents' cause. If, for example, the military's actions in killing 50 guerrillas cause 200 previously uncommitted citizens to join the insurgent cause, the use of force will have been counterproductive.⁷⁷

To be sure, there are occasions when one should be willing to take more risk relative to this question. One example was the 101st Airborne Division operation to capture or kill Uday and Qusay. In that case, we ended up firing well over a dozen antitank missiles into the house they were occupying (knowing that all the family members were safely out of it) after Uday and Qusay refused our call to surrender and wounded three of our soldiers during two attempts to capture them.⁸

In the main, however, we sought to carry out operations in a way that minimized the chances of creating more enemies than we captured or killed. The idea was to try to end each day with fewer enemies than we had when it started. Thus we preferred targeted operations rather than sweeps, and as soon as possible after completion of an operation, we explained to the citizens in the affected areas what we'd done and why we did it.

This should not be taken to indicate that we were the least bit reluctant about going after the Saddamists, terrorists, or insurgents; in fact, the opposite was the case. In one night in Mosul alone, for example, we hit 35 targets simultaneously, getting 23 of those we were after, with only one or two shots fired and most of the operations requiring only a knock on a door, vice blowing it down. Such operations obviously depended on a sophisticated intelligence structure, one largely based on human intelligence sources and very similar to the Joint Interagency Task Forces for Counter-Terrorism that were established in various locations after 9/11.

That, logically, leads to **Observation Number 6**, which holds that *intelligence is the key to success*.

It is, after all, detailed, actionable intelligence that enables "cordon and knock" operations and precludes large sweeps that often prove counterproductive. Developing such intelligence, however, is not easy. Substantial assets at the local (i.e., division or brigade) level are required to develop human intelligence networks and gather sufficiently precise information to allow targeted operations. For us, precise information generally meant a 10-digit grid for the target's location, a photo of the entry point, a reasonable description of the target, and directions to the target's location, as well as other information on the neighborhood, the target site, and the target himself. Gathering this information is hard; considerable intelligence and operational assets are required, all of which must be pulled together to focus (and deconflict) the collection, analytical, and operational efforts. But it is precisely this type of approach that is essential to preventing terrorists and insurgents from putting down roots in an area and starting the process of intimidation and disruption that can result in a catastrophic downward spiral.

Observation Number 7, which springs from the fact that Civil Affairs are not enough when undertaking huge reconstruction and nation-building efforts, is that *everyone must do nation-building*. This should not be taken to indicate that I have anything but the greatest of respect for our Civil

101st Airborne troopers deliver computer equipment to Iraq's Mosul University, 21 May 2003. The equipment was donated by the Division's 159th Aviation Brigade.

Affairs personnel—because I hold them in very high regard. I have personally watched them work wonders in Central America, Haiti, the Balkans, and, of course, Iraq. Rather, my point is that when undertaking industrial-strength reconstruction on the scale of that in Iraq, Civil Affairs forces alone will not suffice; every unit must be involved.

Reopening the University of Mosul brought this home to those of us in the 101st Airborne Division in the spring of 2003. A symbol of considerable national pride, the University had graduated well over a hun-

COUNTERINSURGENCY

dred thousand students since its establishment in 1967. Shortly after the seating of the interim Governor and Province Council in Nineveh Province in early May 2003, the Council's members established completion of the school year at the University as among their top priorities. We thus took a quick trip through the University to assess the extent of the damage and to discuss reopening with the Chancellor. We then huddled with our Civil Affairs Battalion Commander to chart a way ahead, but we quickly found that, although the talent inherent in the Battalion's education team was impressive, its members were relatively junior in rank and its size (numbering less than an infantry squad) was simply not enough to help the Iraqis repair and reopen a heavily-looted institution of over 75 buildings, some 4,500 staff and faculty, and approximately 30-35,000 students. The mission, and the education team, therefore, went to one of the two aviation brigades of the 101st Airborne Division, a brigade that clearly did not have "Rebuild Foreign Academic Institutions" in its mission essential task list. What the brigade did have, however, was a senior commander and staff, as well as numerous subordinate units with commanders and staffs, who collectively added up to considerable organizational capacity and capability.

Seeing this approach work with Mosul University, we quickly adopted the same approach in virtually every area—assigning a unit or element the responsibility for assisting each of the Iraqi Ministries' activities in northern Iraq and also for linking with key Iraqi leaders. For example, our Signal Battalion incorporated the Civil Affairs Battalion's communications team and worked with the Ministry of Telecommunications element in northern Iraq, helping reestablish the local telecommunications structure, including assisting with a deal that brought a satellite downlink to the central switch and linked Mosul with

the international phone system, producing a profit for the province (subscribers bore all the costs). Our Chaplain and his team linked with the Ministry of Religious Affairs, the Engineer Battalion with the Ministry of Public Works, the Division Support Command with the Ministry of Youth and Sports, the Corps Support Group with the Ministry of Education, the Military Police Battalion with the Ministry of Interior (Police), our Surgeon and his team with the Ministry of Health, our Staff Judge Advocate with Ministry of Justice officials, our Fire Support Element with the Ministry of Oil, and so on. In fact, we lined up a unit or staff section with every ministry element and with all the key leaders and officials in our AOR, and our subordinate units did the same in their areas of responsibility. By the time we were done, everyone and every element, not just Civil Affairs units, was engaged in nation-building.

Observation Number 8, recognition of the need to *help build institutions, not just units*, came from the Coalition mission of helping Iraq reestablish its security forces. We initially focused primarily on developing combat units—Army and Police battalions and brigade headquarters—as well as individual police. While those are what Iraq desperately needed to help in the achievement of security, for the long term there was also a critical need to help rebuild the institutions that support the units and police in the field—the ministries, the admin and logistical support units, the professional military education systems, admin policies and procedures, and the training organizations. In fact, lack of ministry capability and capacity can undermine the development of the battalions, brigades, and divisions, if the ministries, for example, don't pay the soldiers or police on time, use political rather than professional criteria in picking leaders, or fail

"Cultural awareness is a force multiplier." COL Michael Linnington, commander, 187th Infantry Regiment, 101st Airborne Division (Air Assault), and the Deputy Governor of Nineveh meet with tribal leaders of Tallafar, Iraq.

to pay contractors as required for services provided. This lesson underscored for us the importance of providing sufficient advisors and mentors to assist with the development of the security ministries and their elements, just as we provided advisor teams with each battalion and each brigade and division headquarters.⁹

Observation Number 9, cultural awareness is a force multiplier, reflects our recognition that knowledge of the cultural "terrain" can be as important as, and sometimes even more important than, knowledge of the geographic terrain. This observation acknowledges that the people are, in many respects, the decisive terrain, and that we must study that terrain in the same way that we have always studied the geographic terrain.

Working in another culture is enormously difficult if one doesn't understand the ethnic groups, tribes, religious elements, political parties, and other social groupings—and their respective viewpoints; the relationships among the various groups; governmental structures and processes; local and regional history; and, of course, local and national leaders. Understanding of such cultural aspects is essential if one is to help the people build stable political, social, and economic institutions. Indeed, this is as

much a matter of common sense as operational necessity. Beyond the intellectual need for the specific knowledge about the environment in which one is working, it is also clear that people, in general, are more likely to cooperate if those who have power over them respect the culture that gives them a sense of identity and self-worth.

In truth, many of us did a lot of "discovery learning" about such features of Iraq in the early months of our time there. And those who learned the quickest—and who also mastered some "survival Arabic"—were, not surprisingly, the most effective in developing productive relationships with local leaders and citizens and achieved the most progress in helping establish security, local governance, economic activity, and basic services. The importance of cultural awareness has, in fact, been widely recognized in the U.S. Army and the other services, and it is critical that we continue the progress that has been made in this area

in our exercises, military schools, doctrine, and so on.¹⁰

Observation Number 10 is a statement of the obvious, fully recognized by those operating in Iraq, but it is one worth recalling nonetheless. It is that *success in a counterinsurgency requires more than just military operations*. Counterinsurgency strategies must also in-

"Success means acting across the full spectrum of operations." U.S. military assists in local Iraqi election.

COUNTERINSURGENCY

clude, above all, efforts to establish a political environment that helps reduce support for the insurgents and undermines the attraction of whatever ideology they may espouse.¹¹ In certain Sunni Arab regions of Iraq, establishing such a political environment is likely of greater importance than military operations, since the right political initiatives might undermine the sanctuary and assistance provided to the insurgents. Beyond the political arena, other important factors are economic recovery (which reduces unemployment, a serious challenge in Iraq that leads some out-of-work Iraqis to be guns for hire), education (which opens up employment possibilities and access to information from outside one's normal circles), diplomatic initiatives (in particular, working with neighboring states through which foreign fighters transit), improvement in the provision of basic services, and so on. In fact, the campaign plan developed in 2005 by the Multinational Force-Iraq and the U.S. Embassy with Iraqi and Coalition leaders addresses each of these issues.

Observation Number 11—ultimate success depends on local leaders—

is a natural reflection of Iraqi sovereignty and acknowledges that success in Iraq is, as time passes, increasingly dependent on Iraqi leaders—at four levels:

- Leaders at the national level working together, reaching across party and sectarian lines to keep the country unified, rejecting short-term expedient solutions such as the use of militias, and pursuing initiatives to give more of a stake in the success of the new Iraq to those who feel left out;
- Leaders in the ministries building the capability and capacity necessary to use the tremendous resources Iraq has efficiently, transparently, honestly, and effectively;
- Leaders at the province level resisting temptations to pursue winner-take-all politics and resisting the urge to politicize the local police and other security forces; and
- Leaders in the Security Forces staying out of politics, providing courageous, competent leadership to their units, implementing policies that are fair to all members of their forces, and fostering loyalty to their Army or Police band of brothers rather than to specific tribes, ethnic groups, political parties, or local militias.

Iraqi leaders are, in short, the real key to the new Iraq, and we thus need to continue to do all that we can to enable them.

Observation Number 12 is the admonition to *remember the strategic corporals and strategic lieutenants*, the relatively junior commissioned or noncommissioned officers who often have to make huge decisions, sometimes with life-or-death as well as strategic consequences, in the blink of an eye.

Commanders have two major obligations to these junior leaders: first, to do everything possible to train them before deployment for the various situations they will face, particularly for the most challenging and ambiguous ones; and, second, once deployed, to try to shape situations to minimize the cases in which they have to make those hugely important decisions extremely quickly.

The best example of the latter is what we do to help ensure that, when establishing hasty checkpoints, our strategic corporals are provided sufficient training and adequate means to stop a vehicle speeding toward them without having to put a bullet through the windshield. This is, in truth, easier said than it is done in the often chaotic situations that arise during a fast-moving operation in such a challenging security

environment. But there are some actions we can take to try to ensure that our young leaders have adequate time to make the toughest of calls—decisions that, if not right, again, can have strategic consequences.

My next-to-last observation, **Number 13**, is that *there is no substitute for flexible, adaptable leaders*. The key to many of our successes in Iraq, in fact, has been leaders—

especially young leaders—who have risen to the occasion and taken on tasks for which they'd had little or no training,¹² and who have demonstrated enormous initiative, innovativeness, determination, and courage.¹³ Such leaders have repeatedly been the essential ingredient in many of the achievements in Iraq. And fostering the development of others like them clearly is critical to the further development of our Army and our military.¹⁴

My final observation, **Number 14**, underscores that, especially in counterinsurgency operations, *a leader's most important task is to set the right tone*. This is, admittedly, another statement of the obvious, but one that nonetheless needs to be highlighted given its tremendous importance. Setting the right tone and communicating that tone to his subordinate leaders and troopers are absolutely critical for every leader at every level, especially in an endeavor like that in Iraq.

If, for example, a commander clearly emphasizes so-called kinetic operations over non-kinetic operations,

"Success depends on local leaders."

SGT Joshua Rogers, of Charlie Company, 2d Battalion, 3d Infantry Regiment, 3d Brigade, 2d Infantry Division Stryker Brigade Combat Team (SBCT), speaks with an Iraqi man in Mosul, on 3 July 2004. Charlie Company was participating in Mutual Security 2, an operation in which the Iraqi police and the Iraqi National Guard were conducting a town cordon and knock, while 2-3 Infantry provided blocking positions for the outer cordon.

his subordinates will do likewise. As a result, they may thus be less inclined to seize opportunities for the nation-building aspects of the campaign. In fact, even in the 101st Airborne Division, which prided itself on its attention to nation-building, there were a few mid-level commanders early on whose hearts really weren't into performing civil affairs tasks, assisting with reconstruction, developing relationships with local citizens, or helping establish local governance. To use the jargon of Iraq at that time, they didn't "get it." In such cases, the commanders above them quickly established that nation-building activities were not optional and would be pursued with equal enthusiasm to raids and other offensive operations.

Setting the right tone ethically is another hugely important task. If leaders fail to get this right, winking at the mistreatment of detainees or at manhandling of citizens, for example, the result can be a sense in the unit that "anything goes." Nothing can be more destructive in an element than such a sense.

In truth, regardless of the leader's tone, most units in Iraq have had to deal with cases in which mistakes have been made in these areas, where young leaders in very frustrating situations, often after having suffered very tough casualties, took missteps. The key in these situations is for leaders to ensure that appropriate action is taken in the wake of such incidents, that standards are clearly articulated and reinforced, that remedial training is conducted, and that supervision is exercised to try to preclude recurrences.

It is hard to imagine a tougher environment than that in some of the areas in Iraq. Frustrations, anger,

and resentment can run high in such situations. That recognition underscores, again, the importance of commanders at every level working hard to get the tone right and to communicate it throughout their units.

Implications

These are, again, 14 observations from soldiering in Iraq for most of the first 2-1/2 years of our involvement there. Although I presented them as discrete lessons, many are inextricably related. These observations carry with them a number of implications for our effort in Iraq (and for our Army as well, as I have noted in some of the footnotes).¹⁵

It goes without saying that success in Iraq—which clearly is important not just for Iraq, but for the entire Middle East region and for our own country—will require continued military operations and support for the ongoing development of Iraqi Security Forces.

Success will also require continued assistance and resources for the development of the emerging political, economic, and social institutions in Iraq—efforts in which Ambassador Zalmay Khalilzad and General George Casey and their teams have been engaged with their Iraqi counterparts and have been working very hard.

Lastly, success will require time, determination, and resilience, keeping in mind that following the elections held in mid-December 2005, several months will likely be required for the new government—the fourth in an 18-month period—to be established

COUNTERINSURGENCY

MG David Petraeus and COL Ben Hodges with Arab and Kurdish leaders at a ribbon-cutting ceremony marking the reconstruction of a Kurd-Arab village south of Mosul, 2003.

and functional. The insurgents and extremists did all that they could to derail the preparations for the constitutional referendum in mid-October and the elections in mid-December. Although they were ineffective in each case, they undoubtedly will try to disrupt the establishment of the new government—and the upcoming provincial elections—as well. As Generals John Abizaid and George Casey made clear in their testimony on Capitol Hill in September 2005, however, there is a strategy—developed in close coordination with those in the U.S. Embassy in Baghdad and with our inter-agency, Coalition, and Iraqi partners—that addresses the insurgency, Iraqi Security Forces, and the other relevant areas. And there has been substantial progress in a number of areas. Nonetheless, nothing is ever easy in Iraq and a great deal of hard work and many challenges clearly lie ahead.¹⁰

The first 6 months of 2006 thus will be of enormous importance, with the efforts of Iraqi leaders being especially significant during this period as a new government is seated and the new constitution enters into force. It will be essential that we do all that we can to support Iraq's leaders as they endeavor to make the most of the opportunity our Soldiers have given them.

Conclusion

In a 1986 article titled "Uncomfortable Wars: Toward a New Paradigm," General John R. Galvin

observed that "[a]n officer's effectiveness and chance for success, now and in the future, depend not only on his character, knowledge, and skills, but also, and more than ever before, on his ability to understand the changing environment of conflict."¹¹ General Galvin's words were relevant then, but they are even more applicable today. Conducting counterinsurgency operations in a vastly different culture is exceedingly complex.

Later, in the same article, noting that we in the military typically have our noses to the grindstone and that we often live a somewhat cloistered existence, General Galvin counseled: "Let us get our young leaders away from the grindstone now and then, and encourage them to reflect on developments outside the fortress-cloister. Only then will they develop into leaders capable of adapting to the changed environment of warfare and able to fashion a new paradigm that addresses all the dimensions of the conflicts that may lie ahead."¹²

Given the current situation, General Galvin's advice again appears very wise indeed. And it is my hope that, as we all take time to lift our noses from the grindstone and look beyond the confines of our current assignments, the observations provided here will help foster useful discussion on our ongoing endeavors and on how we should approach similar conflicts in the future—conflicts that are likely to be the norm, rather than the exception, in the 21st century. **MR**

NOTES

1. The Center for Army Lessons Learned website can be found at <http://call.army.mil>.

2. T.E. Lawrence: "Twenty-Seven Articles," Arab Bulletin (20 August 1917). Known popularly as "Lawrence of Arabia," T.E. Lawrence developed an incomparable degree of what we now call "cultural awareness" during his time working with Arab tribes and armies, and many of his 27 articles ring as true today as they did in his day. A website with the articles can be found at www.pbs.org/lawrenceofarabia/vol/lawfare.html. A good overview of Lawrence's thinking, including his six fundamental principles of insurgency, can be found in "T.E. Lawrence and the Mind of an Insurgent," *Army* (July 2005): 31-37.

3. I should note that this has been much less the case in Afghanistan where, because the expectations of the people were so low and the abhorrence of the Taliban and further civil war was so great, the Afghan people remain grateful to Coalition forces and other organizations for all that is done for them. Needless to say, the relative permissiveness of the security situation in Afghanistan has also helped a great deal and made it possible for nongovernmental organizations to operate on a much wider and freer basis than is possible in Iraq. In short, the different context in Afghanistan has meant that the half-life of the Army of liberation there has been considerably longer than that in Iraq.

4. In fact, we often contended with what came to be known as the "Man on the Moon Challenge"—i.e., the expectation of ordinary Iraqis that soldiers from a country that could put a man on the moon and overthrow Saddam in a matter of weeks should also be able, with considerable ease, to provide each Iraqi a job, 24-hour electrical service, and so on.

5. The military units on the ground in Iraq have generally had considerable capability to carry out reconstruction and nation-building tasks. During its time in northern Iraq, for example, the 101st Airborne Division had 4 engineer battalions (including, for a period, even a well-drilling detachment), an engineer group headquarters (which is designed to carry out assessment, design, contracting, and quality assurance tasks), 2 civil affairs battalions, 9 infantry battalions, 4 artillery battalions (most of which were "out of battery" and performed reconstruction tasks), a sizable logistical support command (generally about 6 battalions, including transportation, fuel storage, supply, maintenance, food service, movement control, warehousing, and even water purification units), a military police battalion (with attached police and corrections training detachments), a signal battalion, an air defense battalion (which helped train Iraqi forces), a field hospital, a number of contracting officers and officers authorized to carry large sums of money, an air traffic control element, some 9 aviation battalions (with approximately 250 helicopters), a number of chaplain teams, and more than 25 military lawyers (who can be of enormous assistance in resolving a host of problems when conducting rule-building). Except in the area of aviation assets, the 4th Infantry Division and the 1st Armored Division, the two other major Army units in Iraq in the summer of 2003, had even more assets than the 101st.

6. The FY 2005 Defense Budget and Supplemental Funding Measures approved by Congress provided some \$5.2 billion for the Iraq Security Force's train, equip, advise, and rebuild effort, just as significant, it was appropriated in just three categories—Ministry of Defense, Ministry of Interior, and Quick Reaction Funds—thereby minimizing substantially the need for reprogramming actions.

7. General John R. Galvin, "Uncomfortable Wars: Toward a New Paradigm," *Parameters*, 16 no. 4 (Winter 1986): 6.

8. As soon as the "kinetic" part of that operation was complete, we moved into the neighborhood with engineers, civil affairs teams, lawyers, officers with money and security elements. We subsequently repaired any damage that might conceivably have been caused by the operation, and completely removed all traces of the house in which Ubay and Qusay were located, as the missiles had rendered it structurally unsound and we didn't want any reminders left of the two brothers.

9. Over time, and as the effort to train and equip Iraqi combat units gathered momentum, the Multinational Security Transition Command-Iraq placed greater and greater emphasis on helping with the development of the Ministries of Defense and Interior, especially after the mission to advise the Ministries' leaders was shifted to the Command from the Embassy's Iraq Reconstruction Management Office in the Fall of 2005. It is now one of the Command's top priorities.

10. The Army, for example, has incorporated scenarios that place a premium on cultural awareness into its major exercises at the National Training Center and Joint Readiness Training Center. It has stressed the importance of cultural awareness

throughout the process of preparing units for deployments to Iraq and Afghanistan and in a comprehensive approach adopted by the U.S. Army Training and Doctrine Command. As part of this effort, language tools have been developed: e.g., the Rosetta Stone program available through Army Knowledge Online, and language training will be required: e.g., of Command and General Staff College students during their 2d and 3d semesters. Doctrinal manuals are being modified to recognize the importance of cultural awareness, and instruction in various commissioned and noncommissioned officer courses has been added as well. The Center for Army Lessons Learned has published a number of documents to assist as well. The U.S. Marine Corps has pursued similar initiatives and is, in fact, partnering with the Army in the development of a new Counterinsurgency Field Manual.

11. David Galula's classic work, *Counterinsurgency Warfare: Theory and Practice* (St. Petersburg, FL: Hailer Publishing, 2005), is particularly instructive on this point. See, for example, his discussion on pages 89-93.

12. As I noted in a previous footnote, preparation of leaders and units for deployment to Iraq or Afghanistan now typically includes extensive preparation for the kind of "non-kinetic" operations our leaders are called on to perform, with the preparation period culminating in a brigade combat team mission rehearsal exercise at either the National Training Center or the Joint Readiness Training Center. At each Center, units conduct missions similar to those they'll perform when deployed and do so in an environment that includes villages, Iraqi American role players, "suicide bombers," "insurgents," the need to work with local leaders and local security forces, etc. At the next higher level, the preparation of division and corps headquarters culminates in the conduct of a mission rehearsal exercise conducted jointly by the Battle Command Training Program and Joint Warfighting Center. This exercise also strives to replicate—in a command post exercise format driven by a computer simulation—the missions, challenges, and context the unit will find once deployed.

13. A great piece that highlights the work being done by young leaders in Iraq is Robert Kaplan's "The Future of America—in Iraq," *Latimes.com*, 24 December 2005. Another is the video presentation used by Army Chief of Staff General Peter J. Schoomaker, "Pentathlon Leader," ICT Ted Wiley, which recounts Lieutenant Wiley's fascinating experiences in the first Stryker unit to operate in Iraq as they fought and conducted nation-building operations throughout much of the country, often transitioning from one to the other very rapidly, changing missions and reorganizing while on the move, and covering considerable distances in short periods of time.

14. In fact, the U.S. Army is currently in the final stages of an important study of the education and training of leaders, one objective of which is to identify additional programs and initiatives that can help produce the kind of flexible, adaptable leaders who have done well in Iraq and Afghanistan. Among the issues being examined is how to provide experiences for our leaders that take them out of their "comfort zone." For many of us, attending a civilian graduate school provided such an experience, and the Army's recent decision to expand graduate school opportunities for officers is thus a great initiative. For a provocative assessment of the challenges the U.S. Army faces, see the article by U.K. Brigadier Nigel Aylwin-Foster, "Changing the Army for Counterinsurgency Operations," *Military Review* (November-December 2005): 2-15.

15. The Department of Defense (DOD) formally recognized the implications of current operations as well, issuing DOD Directive 3000.05 on 29 November 2005, "Military Support for Stability, Security, Transition, and Reconstruction Operations," which establishes DOD policy and assigns responsibilities within DOD for planning, training, and preparing to conduct and support stability operations. This is a significant action that is already spurring action in a host of different areas. A copy can be found at www.dtic.mil/whs/directives/correspondence/300005.htm.

16. A brief assessment of the current situation and the strategy for the way ahead is in Ambassador Zalmay Khalilzad's "The Challenges Before Us," *Wall Street Journal*, 9 January 2006, 12.

17. Galvin, 7. One of the Army's true soldier-statesman-scholars, General Galvin was serving as the Commander in Chief of U.S. Southern Command at the time he wrote this article. In that position, he oversaw the conduct of a number of operations in El Salvador and elsewhere in Central and South America, and it was in that context that he wrote this enduring piece. He subsequently served as the Supreme Allied Commander, Europe, and following retirement, was the Dean of the Fletcher School of Law and Diplomacy at Tufts University, Medford, Massachusetts.

18. End.

Lieutenant General David H. Petraeus, U.S. Army, took command of the Combined Arms Center and Fort Leavenworth, Kansas, in October 2005. He also serves as the Commandant of the Command and General Staff College and as Deputy Commander for Combined Arms of the U.S. Army Training and Doctrine Command. LTG Petraeus commanded the 101st Airborne Division (Air Assault) in Iraq during the first year of Operation Iraqi Freedom, returning to the United States with the Division in mid-February 2004. He returned to Iraq for several weeks in April and May 2004 to assess the Iraqi Security Forces, and he subsequently returned in early June 2004 to serve as the first commander of the Multi-National Security Transition Command-Iraq, the position he held until September 2005. In late 2004, he also became the first commander of the NATO Training Mission-Iraq. Prior to his tour with the 101st, he served for a year as the Assistant Chief of Staff for Operations of the NATO Stabilization Force in Bosnia. A graduate of the U.S. Military Academy, LTG Petraeus earned M.P.A. and Ph.D. degrees from Princeton University's Woodrow Wilson School of Public and International Affairs.

Question. During your prior combat tours of duty in Iraq, were there any incidents of which you were aware within your command of alleged detainee abuse or abuse of civilians?

Answer. There was one specific case of alleged detainee abuse in the 101st Airborne that was brought to my level. It was a few months into our time in Mosul (and prompted us to establish clear standards relatively early on), and did not involve death or serious injury. I took action in that case, which included a general officer letter of reprimand and relief of the senior individual involved and lesser ac-

tion against others. We very quickly then issued clear instructions to all elements in the 101st Airborne Division Task Force that all detainees would be treated in accordance with the Geneva Convention, ensured refresher education in what that meant, began a process of inspecting all detention facilities in the Division at least weekly, and started a process of having the Red Cross representative in the area and Ninevah Province Council members (including an Imam) visit our facilities on a regular basis, as well.

There was also at least one case of mistreatment of a civilian that I recall—in which a small element improperly confiscated a vehicle from a local citizen who was stopped at a checkpoint, with the element leader then not being forthright about the incident during subsequent inquiries. (The civilian was not physically mistreated.) We formally investigated, took nonjudicial action under UCMJ against those involved, and compensated the citizen.

There were numerous other cases of damage incidental to operations for which we compensated the citizens affected.

As the MSNTC-I Commander, we did not operate detention facilities; however, some of the Iraqi units we advised did do that, and we had serious challenges in a few of those in the summer of 2005 before I left Iraq. In each case, we documented possible cases of mistreatment, shared the evidence with the Minister of Interior and MNF-I HQs, helped the Minister and respective Iraqi units conduct remedial training, and, in at least one case, withdrew all financial/equipment/advisor support for an element (in that case due to actions by several leaders of the Baghdad Major Crimes unit) until individuals were removed and/or disciplined.

Question. If so, please explain the circumstances and describe the actions that you took in response to these incidents?

Answer. Answered above.

U.S. MISTAKES

Question. What do you consider to be the most significant mistakes the U.S. has made to date in Iraq?

Answer. First, there were a number of assumptions and assessments that did not bear out. Prominent among them was the assumption that Iraqis would remain in their barracks and ministry facilities and resume their functions as soon as interim governmental structures were in place. That obviously did not transpire. The assessment of the Iraqi infrastructure did not capture how fragile and abysmally maintained it was (and this challenge, of course, was compounded by looting). Additionally, although most Iraqis did, in fact, greet us as liberators (and that was true even in most Sunni Arab areas), there was an underestimation of the degree of resistance that would develop as, inevitably, a Shiite majority government began to emerge and the Sunni Arabs, especially, the Saddamists, realized that the days of their dominating Iraq were over. Sunni Arab resistance was also fueled by other actions noted below.

Beyond that, as noted recently by President Bush, there were a number of situations that did not develop as was envisioned:

- There was the feeling that elections would enhance the Iraqi sense of nationalism. Instead, the elections hardened sectarian positions as Iraqis voted largely based on ethnic and sectarian group identity.
- There was an underestimation of the security challenges in Iraq, particularly in 2006 in the wake of the bombing of the mosque in Samara, coupled with an over-estimation of our ability to create new security institutions following the disbandment of the ISFs—which was not helped by the planning issues described below.
- It repeatedly took us time to recognize changes in the security environment and to react to them. What began as an insurgency has morphed into a conflict that includes insurgent attacks, terrorism, sectarian violence, and violent crime. Our responses have had to continue to evolve in response, but that has not always been easy.

A number of mistakes were made by both political and military leaders during the course of Operation Iraqi Freedom:

- The very slow (if that) execution of the reconciliation component of de-Baathification left tens of thousands of former Baath Party members (many of them Sunni Arabs, but also some Shiite) feeling that they had no future opportunities in, or reason to support, the new Iraq. To be fair to CPA, Ambassador Bremer intended to execute reconciliation (or exceptions to the de-Baathification order) and gave me permission, e.g., to do so on a trial basis in Ninevah Province; however, when we submitted the results of the reconciliation commission conducted for Mosul University and subsequent re-

quests for exception generated by Iraqi processes with judicial oversight, no action was taken on them by the de-Baathification committee in Baghdad. As realization set in among those affected that there was to be no reconciliation, we could feel support for the new Iraq ebbing in Sunni Arab majority areas.

- Disbanding the Iraqi army (which was, to be sure, an army that Iraq did not need in the long-term as it had vastly more senior officers than were remotely required and was more of a jobs program than a competent military force) without simultaneously announcing a stipend and pension program for those in the Army, the future plan for Iraq's defense forces, and provisions for joining those forces undoubtedly created tens of thousands of former soldiers and officers who were angry, feeling disrespected, and worried about how they would feed their families. (The stipend plan was eventually announced some 5 weeks after the disestablishment was announced, but it did not cover senior officers, who remained, therefore, influential critics of the new Iraq.) This action likely fueled, at least in part, the early growth of the insurgency and anti-coalition feeling.
- We took too long to recognize the growing insurgency and to take steps to counter it, though we did eventually come to grips with it.
- We took too long to develop the concepts and structures needed to build effective ISFs to assist in providing security to the Iraqi people.
- Misconduct at Abu Gharyb and in other less sensational, but still damaging cases, inflamed the insurgency and damaged the credibility of coalition forces in Iraq, in the region, and around the world.
- We obviously had inadequate plans, concepts, organizations, resources, and policies for the conduct of Phase IV (stability and reconstruction) operations; consequently, we were slow to move into Phase IV operations.
- We had, for the first 15 months or more in Iraq, an inadequate military structure. With hindsight, it is clear that it took too long to transform V Corps HQs into Commander, Joint Task Force-7 (CJTF-7) HQs, and that even when we had CJTF-7 HQs, it was not capable of looking both up and down (i.e. performing both political-military/strategic functions and serving as the senior operational headquarters for counterinsurgency and stability operations). Moreover, it is clear that we should have built what eventually became MNSTC-I HQs and the TF-34 HQs (which oversees detainee/interrogation operations) much sooner, along with the other organizations that were eventually established (e.g., the Gulf Region Corps of Engineer HQs).
- Although not a problem in the 101st Airborne Division area of responsibility (AOR) during my time as 101st commander, it is clear that in certain other AORs there were more tasks than troops—especially in Anbar Province for at least the first year and likely in other areas as well.
- Finally, the strategy pursued in the wake of the bombing of the Al Askariya Mosque in Samarra in February 2006 was unable to arrest the spiraling violence and rise of harmful sectarian activities. Repeated operations in Baghdad, in particular, to clear, hold, and build did not prove durable due to lack of sufficient Iraqi and coalition forces for the hold phase of the operations.

Question. Which of these mistakes, if any, are still having an impact, with which you will have to deal, if confirmed?

Answer. We continue to feel the effects of many of the issues stated above. If confirmed, I intend to work with the U.S. Ambassador to gain traction on a number of levels—security for the Iraqi people, establishment of effective local governance and economic development that will create stakeholders in the new Iraq, reconciliation, the continued establishment of effective ISFs, and establishment of rule of law to ensure effective justice to all Iraqis.

MOSUL

Question. When you commanded your division in Mosul in 2003 the city appeared to be relatively quiet and stable. That changed considerably in 2004 and later.

Why do you believe that happened?

Answer. The situation in Mosul deteriorated significantly about 9 months after the 101st Airborne Division departed from Iraq. There were several reasons for this development. First, the insurgents made a concerted effort to open a new front as it became clear that the Coalition was going to conduct operations to clear Fallujah in the fall of 2004. Second, the Sunni Arab governor of Ninevah Province was assassinated in late June 2004 (the night of the transition of sovereignty, while on the road to Baghdad, south of Ninevah Province). In the fractious political process that

followed, many of the Sunni Arabs left the provincial council in protest over the way the replacement governor was selected. This left a Sunni Arab majority province without adequate Sunni Arab representation in the provincial council. Undoubtedly, this led to some of them and their followers no longer supporting the new Iraq and some others likely tacitly or actively supporting the insurgents as they sought to put roots down in Ninevah and began a concerted campaign of intimidation of Sunni Arabs who supported the new Iraq. Third, many level-4 Baath Party members lost hope over time that they would ever have a role in the new Iraq due to stalling over reconciliation in Baghdad, despite the special exemption given to the 101st Airborne Division by Ambassador Bremer in the late summer of 2003 to conduct a special reconciliation process in Ninevah Province and Ambassador Bremer's encouragement to all to use the exception process in the CPA order. Finally, the forces that replaced the 101st Airborne Division—called Task Force Olympia—were only a little over one-third the size of the 101st Airborne (though they started out about half our size), had many fewer helicopters and other enablers, and one of their battalions was subsequently taken frequently to be used as the CJTF-7 Reserve. At the time TF Olympia replaced us in late January/early February, I believed its forces would be sufficient to secure Ninevah Province due to the presence of the tens of thousands of ISFs we had recruited, trained, and equipped, and with whom we operated closely on a daily basis. That was borne out by the Iraqis' performance during the uprisings in April 2004 when Mosul was one of the few places in Iraq where Iraqi forces did well. Over time, however, the Iraqi forces slowly deteriorated following the Governor's assassination, as the insurgents mounted a brutal campaign of intimidation. Ultimately, that degraded their effectiveness and began a spiral downward that didn't end until during the Fallujah operation in November 2004, during which a concerted attack in Mosul revealed the police to be completely intimidated and ineffective, and overwhelmed many of the Iraqi Army elements, as well. (Regretably, although both BG Ham and I repeatedly requested replacement of the once-aggressive Police Chief in the fall of 2004, the Minister of Interior was never willing to take that action, despite clear signs that the Chief and his family had been severely attacked and intimidated.) Finally, and perhaps most importantly, Task Force Olympia's HQs lacked the same robust intelligence structure that the 101st Airborne Division possessed, which proved a serious shortfall in the intelligence-intensive business of counterinsurgency warfare. Where the 101st Airborne had largely been able to generate the precise intelligence that helped us tear out the "roots" of the insurgents almost as fast as they were established, this proved more challenging, particularly over time, for Task Force Olympia.

ROLE IN DEVELOPMENT OF THE NEW IRAQ STRATEGY

Question. What role, if any, did you play in the development of the new Iraq strategy recently announced by the President?

Answer. I met with the Secretary of Defense a couple of days after he took office and before he left for his first trip to Iraq, and we discussed the situation there during that meeting. We subsequently talked after his trip, as well. I also talked to the CJCS several times during this period, noting that a population security emphasis, in Baghdad in particular, was necessary to help the Iraqis gain the time/space for the tough decisions they faced and discussing the general force levels that were likely to be required. As the strategy was refined, I talked on several occasions to LTG Ray Odierno to confirm that his troop-to-task analysis required the force levels that are part of the new strategy, and I relayed my support for those levels to the CJCS and the Secretary. I also supported the additional emphasis on the advisory effort and the additional resources for the reconstruction effort (both in terms of funding and personnel for PRTs and governmental ministry capacity development).

IRAQI ARMY REINFORCEMENTS

Question. The Iraqi government has agreed to send an additional three Iraqi Army brigades to Baghdad, two of which will apparently be predominately Kurdish. Do you know why Kurdish units were selected?

Answer. Iraqi Ground Forces Command (IGFC) and MNC-I made the decision to deploy the two predominantly Kurdish battalions to support the Baghdad Security Plan primarily based upon the low threat levels in their original assigned areas of responsibility, the readiness levels of the units involved during their time as elements of the IGFC, and the desire to involve these relatively well-trained units in the effort to establish security in the capital city.

Question. Do you believe that Kurdish units will be more effective than other units in enhancing security in Baghdad? Why?

Answer. I have confidence in the expected performance of these units, though there are likely to be challenges due to language issues (few of their enlisted soldiers speak Arabic) and, possibly, due to operating away from predominantly Kurdish areas for the first time (though some of the battalions did serve in mixed-ethnic areas in the vicinity of Mosul). In considering other factors, there has been little in the way of corruption or other sectarian issues reported in these units. Additionally, because of their combat experience and predominantly Kurdish soldiers, there tends to be a higher level of unit cohesion in these formations. Because of their home locations, there is a lower likelihood these units will have issues with infiltration by anti-governmental entities. Finally, commanders involved in training these units, as well as their coalition advisors, assess that they are unlikely to be biased when conducting operations in the locations to which they are being assigned.

Question. How do you believe Sunni or Shiite Arabs will react to Kurdish troops in their neighborhoods?

Answer. I believe that in the end all parties will accept the presence of these forces in an effort to secure Baghdad. Initial feedback from a Lieutenant Colonel on the ground with whom I correspond is that one of the first battalions to arrive has been welcomed as it has brought improved security—though it is obviously still very early on in this effort.

MNF-I considered several aspects prior to making the decision to use these Kurdish-based forces. For example, MNF-I studied whether both the Sunni and Shiite leaders would consider this an attempt by Kurdish entities to expand their influence. While there have been some statements by radical Shiite leaders and some reservations offered by Sunnis, the assessment is that the people of Baghdad will adopt a wait-and-see position. In the end, if security is enhanced, all parties will benefit and likely will be grateful.

Question. How do you believe the Mahdi Army will react to Kurdish troops entering Sadr City?

Answer. I believe the reaction in Sadr City to any security forces, not just Kurdish ones (and it is not clear that Kurdish forces will operate in Sadr City), will vary depending upon the perception of the mission, size, and composition of forces, duration of operations, and response of key Shiite leaders.

This is, however, a very dynamic period, and actions taken in Sadr City will have to be carefully considered. While it is possible Muqtada al-Sadr will respond with harsh rhetoric that could escalate into violence, there is also the possibility that political engagement by Prime Minister Nouri al-Maliki will result in a tense, but calm entry of Iraqi forces into Sadr City. As a leader within the Shiite community, Muqtada al-Sadr must demonstrate the willingness to act constitutionally, responsibly, and within the rule of law, regardless of what kind of ISFs are involved. Having said this, again, any actions involving Sadr City will be very sensitive and will require considerable thought and preparation.

Question. What is your understanding of how Iraqi brigades which are predominantly Sunni or Shiite will be deployed—i.e., among their own sect or the other?

Answer. ISFs will be assigned areas of operations throughout Baghdad without regard to sectarian composition of the units. Brigades of the 6th and 9th Iraqi Divisions, each of which have a mix of Shiite and Sunni personnel (though predominantly Shiite in their makeup) will be employed in all nine administrative districts of the city. It is true that some districts in the city are predominantly Shiite, while others are predominantly Sunni. However, U.S. Army battalions will be partnered with these Iraqi brigades to reinforce the practice that all security forces operate in a professional, disciplined, and ethical manner, and in accordance with the rule of law, international humanitarian norms, and recognized international standards for enforcement and protection of human rights.

Question. What are the implications either way?

Answer. It is important to ensure no particular sect feels persecuted by the deployment of any ISF in their neighborhood. The partnering of a U.S. battalion with each ISF brigade will ensure that sectarian divisions and mistrust are kept to a minimum.

COMMAND AND CONTROL

Question. What do you understand to be the command and control relationships between American and Iraqi forces in the new Baghdad security plan?

Answer. This is an exceedingly important issue. Getting the relationship between our forces and the ISFs right is critical to operating together. At its simplest, U.S. commanders will command and retain OPCON of U.S. forces; Iraqi commanders will command Iraqi forces and exercise OPCON over them once transitioned from the tactical control of U.S. forces (this has taken place for the 6th Division and in the

case of many other Iraqi units in recent months). If confirmed, I intend to ensure that there is very close cooperation between U.S. and Iraqi headquarters to ensure unity of effort, careful coordination of operations, and clear knowledge of what each force is doing. Of necessity, this will include Iraqi and U.S. Special Operations Forces and Police Forces as well. As I understand it, the Baghdad plan is to be an Iraqi Plan, devised by the Iraqis in consultation with, and supported by, MNF-I and MNC-I, and U.S. forces, under the command of U.S. commanders, will act in support of the Iraqi effort to establish security in Baghdad.

Question. Do you have any concerns?

Answer. Yes. MNF-I and MNC-I will need to carefully work out liaison arrangements, colocation of command posts, terms of reference that delineate respective responsibilities for various combat, combat support, and combat service support activities, communications to support all of this, and so forth. Having said this, coalition forces have been working with ISFs for some time and have developed an understanding of the relationships involved, and they will use that experience to inform the actions to be taken in this case.

CONFRONTING THE MILITIAS

Question. Based on your knowledge, is the Iraqi government taking the steps it must to confront and control the militias?

Answer. Militias and armed groups are a challenge with which MNF-I and the Iraqi government must contend. One reason the Iraqi government has not confronted militias in a meaningful way is that, regrettably, they fill a security need. Another reason is that some political parties derive their political strength from their militias, which provide both security and allow for the provision of basic services to the people.

Article 9 of the Iraqi Constitution prohibits militias and stipulates that “the Iraqi armed forces and security services will be composed of the components of the Iraqi people with due consideration given to their balance and representation without discrimination or exclusion. They shall be subject to the control of the civilian authority, shall defend Iraq, shall not be used as an instrument to oppress the Iraqi people, shall not interfere in political affairs, and shall have no role in the transfer of authority.” In short, the security forces of Iraq must be professional and apolitical, and they must have a monopoly on the legitimate use of force.

Once ISFs, backed by coalition forces, gain control of Baghdad and provide security to the people, the need for militias to protect local areas will cease to provide a justification for their existence. The Iraqi government can then work to execute a comprehensive disarmament, disbandment, and reintegration (DDR) program. Recent reports indicate that Prime Minister Maliki understands the need to deal with the militias.

Question. What role would you expect to play on this issue, if confirmed?

Answer. Iraqi government intermediaries, coalition leaders, and U.S. Embassy Baghdad personnel are involved in discussions to provide opportunities for militia groups to enter into a DDR process. If confirmed, I would support and be involved in these efforts.

Question. Under what circumstances, if any, would you recommend that American troops enter Sadr City?

Answer. American troops enter Sadr City regularly in response to operational needs. These operations are likely to continue. As the ISFs transition into a leading role, I would expect to see a more prominent ISF presence in Sadr City and, as part of that, it is likely American troops will also be present, but principally in a supporting role and to ensure full situational awareness of the actions of the Iraqi forces.

Question. In your judgment, how effective will the addition of more U.S. troops be in securing Baghdad if Prime Minister Maliki continues to allow militias to exist and operate?

Answer. Prime Minister Maliki has indicated a willingness to deal with militias and this effort will be of central importance in securing Baghdad. Additional U.S. troops will be important in the overall effort by providing the necessary capacity to continue with clearing insurgent forces from contested areas while also partnering with Iraqi Army and Iraqi Police in order to bolster their capability to prevent sectarian violence, whether on the part of militias, terrorists, or insurgent groups.

COUNTERINSURGENCY DOCTRINE

Question. According to the new counterinsurgency manual, “20 (soldiers or police forces) per 1,000 residents” is often considered the minimum troop density required for effective counterinsurgency operations. Baghdad alone, according to doctrine, requires a force of 120,000–130,000 personnel to meet the minimum requirement.

However, when the planned increase in U.S. and Iraqi forces is complete, Baghdad would only have about 80,000 security forces.

Do you believe that 80,000 U.S. and Iraqi troops is sufficient and if so, why? What is your understanding of the status and adequacy of the risk assessment and mitigation plan associated with this deviation from doctrine?

Answer. Forces currently in or moving to Baghdad should be sufficient to conduct effective counterinsurgency operations given the anticipated political-military situation and planned phased operations.

Answer. The recommended force ratio is a "rule of thumb," distilled for simplicity's sake from numerous complex cases of counterinsurgency operations. These cases may differ significantly in terms of geography, urbanization, or enemy strength.

The counterinsurgency doctrine clearly states that host nation police and army forces are a key part of the equation, as are special operating forces and other security elements. Baghdad is a city of roughly 6 million people, so a 1:50 ratio of security forces to population would be equal to roughly 120,000 counterinsurgents. Iraqi Army, Police, and Special Operations Forces, together with the U.S. forces currently on the ground or deploying to Baghdad in the months ahead, total approximately 85,000—though, to be sure, not all of those are of the same levels of effectiveness, and some of the police undoubtedly are of limited effectiveness. However, we do not necessarily have to secure every part of Baghdad at once—this can be done in stages—and will have to be done that way given the way the forces are expected to flow into Iraq. Beyond that, tens of thousands of ministry security forces and tens of thousands of civilian (often third country) contracted guard forces protect key sites in Baghdad (including, for example, the U.S. Embassy, MNSTC-I HQs, the Ministry of Oil, etc.) that MNF-I and the Iraqi government would otherwise have to detail soldiers or police to protect. These forces, again, number in the tens of thousands—and although by no means all are of high capability and some are undoubtedly compromised, they do secure hundreds of sites that otherwise would require coalition or Iraqi military or police forces. Thus, with the addition of all five U.S. brigades under orders to reinforce Baghdad and the ISFs either in Baghdad or headed to the city, there should be sufficient military forces available to achieve our objective of securing Baghdad.

LENGTH OF IRAQI INSURGENCY

Question. General Casey has said that 20th century counterinsurgency efforts typically lasted 9 years.

Do you believe the counterinsurgency campaign in Iraq could last as long as 9 years, or even longer?

Answer. I agree with General Casey that the counterinsurgency campaign in Iraq will continue for some time, but its duration will depend on a variety of factors that about which it is very difficult to make judgments. What I am clear about, however, is that the Government of Iraq must ultimately win this fight, with coalition forces in a supporting role. Thus, while it is possible that the counterinsurgency campaign in Iraq could, indeed, last 9 years or more, that should not be taken to imply that U.S. forces would be involved in substantial numbers for the duration of that period.

COMBAT SERVICE SUPPORT

Question. With the expected increase of U.S. troop levels in Iraq by over 20,000, do you believe there is sufficient combat service support in place or will that have to be augmented as well?

Answer. Generally, BCTs have their own combat service support units to sustain their soldiers and equipment; however, I am sure that one of the tasks being undertaken by MNC-I in recent weeks has been determination of requirements for any additional combat service support elements above brigade level. This will be an area on which I will focus following arrival in Iraq, if I am confirmed. Should additional so-called enablers be needed, I will request them.

Question. If so, by how much?

Answer. MNF-I reports that it has a mature theater base in place and does not anticipate a large requirement for augmentation of combat service support capabilities.

Question. Do you see any problems with the extent of reliance of U.S. forces in Iraq on contractor support?

Answer. No. The Army has always benefited from contracted non-military support in one form or another, though that reliance has grown substantially in recent years. Contractors allow the military a great deal of flexibility to meet sustainment and life support requirements; they also help with security in some cases. They

must be well-integrated, but over time MNF-I has developed mechanisms to ensure synchronization of contractor support and military activities.

SUSTAINMENT

Question. Based on your knowledge of the Army and its state of readiness, how long do you believe the increased troop levels and operations tempo can be sustained?

Answer. My personal sense is that the Army is stretched and is straining; however, the Army is making plans to sustain increased troop levels should that be required. Nonetheless, the strain on the Active and Reserve components is clear. Soldiers in some units are returning to Iraq in a year or less, and that is obviously difficult for them and their families, and it makes preparation of units challenging as well. My own family is well-acquainted with this challenge, as my return to Iraq, if confirmed, will be my fourth year-or-longer deployment since 2001. Reset of equipment is also a challenge—though additional funds received recently should help the Army considerably to meet the demand, though it is likely to take some time to ramp up the depots fully. Having said that, as MNF-I commander, it would be beyond my brief to determine the overall health of the Army and Marine Corps—though it would be something about which I would be concerned. It would be my job to determine the troops and resources required to accomplish the mission in Iraq, and to inform the CENTCOM commander and Secretary of Defense of those requirements. It is more appropriate for the Joint Staff and the Services to determine how long we can sustain a surge. I am encouraged, however, by Secretary of Defense Gates' announcement that the end strength of our Army and Marine Corps will be increased. Clearly, the conflict in Iraq has been hard on our ground forces, and I support the Secretary's efforts to ensure we have the forces needed we need for what are frequently very people-intensive operations.

STATE OF TRAINING AND EQUIPPING OF IRAQI SECURITY FORCES

Question. What is your understanding of the state of training and equipping of ISFs?

Answer. My understanding is that, with some exceptions, the Iraqi Objective Counterinsurgency (COIN) Force and Iraqi Objective Civil Security Force (totaling approximately 325,000 personnel) were issued 100 percent of their pacing items of equipment (i.e. their most important items) and that 100 percent of their personnel were trained. The exceptions are for the remaining portions of the Navy and the Air Force and approximately 2,000 support troops, all of which have significantly longer training timelines and specialized training requirements. The Objective COIN Force units do, however, face challenges in sufficient fill of leaders, who take a long time to develop, and in development of higher-level staff skills and intelligence elements, which also take time to develop. The Iraqi government is addressing these shortfalls through a combination of former commissioned and noncommissioned officer (NCO) recalls and prospective policies to accelerate promotion to corporal and sergeant for recruits with requisite levels of civilian education. The ISFs have also experienced attrition due to combat losses and absences over the last 18 months. To address this attrition, MNSTC-I and the Iraqi government are generating some 30,000 replacements, 18,000 of which will address the attrition that has occurred over the last year and half, and another 12,000 to bring these units to 110 percent to address the effects of Iraqi leave policies and to provide some personnel flexibility to unit commanders. Over 6,500 of these soldiers have graduated and joined the force and the second cycle of almost 8,000 will graduate shortly.

Question. What concerns do you have about the ability of those units to participate in the implementation of the new Baghdad security plan?

Answer. Iraqi units, at all levels, continue to perform well when partnered with coalition forces. An immature logistics system, a shortage of mid-grade leadership, and the ultimate loyalty of select units/leaders remain my primary concerns. These concerns are currently being addressed through continued development of the ISF logistical structure, coalition force emergency logistical support, partner relationships between Iraqi and coalition force units (which are being strengthened), embedding of Transition (Advisor) Teams in Iraqi units down to at least the battalion level, and a variety of actions to foster loyalty and professionalism like a soldier's creed, oaths of office, a Center for Ethics and Leadership, the Iraqi Military Academy, the Staff Colleges, and so on.

FORCE PROTECTION

Question. The new Baghdad security plan apparently envisions American units being colocated with Iraqi units spread out over approximately 30 mini-bases throughout Baghdad.

In general, how could you, as Commander, MNF-I, accommodate and protect those forces and the forces which would have to resupply them on a daily basis?

Answer. As explained to me, under the Baghdad Security Plan, coalition forces will establish Joint Security Stations (JSSs) with the Iraqi Army, Iraqi Police, and the Iraqi National Police. The stations will be strategically positioned throughout the city to accommodate dispersed, joint patrols, and to provide CENTCOM and control hubs that ultimately feed back into the Baghdad Security Command. The establishment of JSSs will include enhancing force protection and developing essential sustainment and life support. Many of the JSSs are located at existing Iraqi Police Stations, but will require vulnerability assessments prior to occupation by coalition forces. Based on these assessments the necessary force protection enhancements will be completed to mitigate the risks of attack. Force protection enhancements will include improvements such as entry control points, external barriers to redirect traffic flows and/or reinforce perimeters, increased protection from indirect fires, and guard posts/towers where required. Additionally, robust Quick Reaction Forces, as well as redundant and secure communications with parent Forward Operating Bases and with coalition patrols operating in the area, will enhance the force protection posture of each JSS.

Sustainment of our forces will be just as critical as their protection. Coalition forces patrolling from JSSs will have adequate levels of food, fuel, water, medical supplies, and ammunition on hand to preserve their combat capability. The JSSs will be resupplied as the forces rotate into and out of the primary Forward Operating Bases (FOBs), rather than through daily resupply convoys. Essentially, the forces operating out of a JSS will be self-sustaining for their period of operations, with replacements arriving with their own requisite supplies as forces rotate. The basic, enduring life support packages at each JSS might include tents, generators, and environmental control units which will be positioned within the site's perimeter.

Question. What is your understanding of whether the security plan requires the contracting of additional U.S. bases and facilities?

Answer. Current planning does not anticipate the requirement to reopen previously transferred FOBs or the creation of new ones. MNF-I is using space on existing FOBs that have the capacity for the first three reinforcing BCTs, with basing requirements for the remaining two currently under development.

MILITARY TRANSITION TEAMS

Question. Do you believe that the size, structure, number, and operating procedures for U.S. Military and Police Transition Teams embedded with ISFs need to be changed in any way?

Answer. Yes. There is unquestionable linkage between ISF progression and the embedded transition team program. Despite the success achieved by the embedding of transition teams, the current Military Transition Team (MTT) size is insufficient to meet all operational requirements and permit an optimum level of support. The commander of MNC-I has initiated a plan to enhance MTTs to increase their effectiveness. Based on conditions within each multinational division (MND) area of responsibility, primarily relating to levels of violence and ISF capacity for independent operations, MTTs are being augmented by assets controlled by the respective MND Commanders. U.S. BCTs are the primary resource providers for these enhancements. Enhanced MTTs have the ability to advise ISF units down to company level.

The current size, structure, and number of Police Transition Teams (PTT) is appropriate for the missions they are assigned. There are three different types of PTTs: station, district, and provincial. The nucleus of all PTTs is a military police squad with additional U.S. Army personnel added at the district and provincial level. Because of the mission and scope of responsibility of an Iraqi Police provincial directorate, the typical PTT working at that level is larger and includes additional military and civilian members who possess other specialties and expertise such as operations, personnel, logistics, and maintenance management. The other two key and essential components of all PTTs are interpreters and International Police Liaison Officers (IPLOs). Multinational Corps-Iraq is currently providing PTTs at a ratio of one for every three police stations, one for every two police districts, and one for every one provincial police directorate. The current operating procedures have resulted in clear visibility on the effectiveness and capabilities of Iraqi Police, from station through provincial level, and helped improve the Iraqi Police ability to

conduct basic law and order missions. Upon arrival in Iraq, if confirmed, I will assess this again to see if augmentation is required.

Question. What do you recommend?

Answer. Throughout Iraq, the enhancement of the baseline MTTs will continue based on an assessment of the security situation in each MND area of responsibility. The estimate provided to me by the MNF-I staff is that it will take 6–12 months to move to enhanced MTTs throughout Iraq. Continuing and expanding the transition team program over time will energize ISF progression and eventually facilitate a change in relationship as the embedded transition teams move more toward the advising role and less toward mentoring or even, to a degree, leading.

The current ratio of PTTs at the station, district, and provincial levels is adequate, but we also need to relocate some PTTs from provinces that have moved to Provincial Iraqi Control to provinces that have not achieved Provincial Iraqi Control. IPLOs and interpreters are absolutely essential to successful PTT operations. MNC-I continues to have difficulty recruiting and fielding new interpreters; additional emphasis and incentives need to be established to retain the qualified interpreters we currently employ. Additionally, if the IPLO program is ended too soon, the lack of this law enforcement expertise and experience would have a significant and adverse impact. A recommendation for making the IPLO program even better is to recruit law enforcement experts from other Middle Eastern nations (such as Jordan, Egypt, Kuwait, Saudi Arabia, etc.) into the program.

Question. What is your understanding of how the Army and Marine Corps are ensuring that U.S. troops are properly trained for this duty, to include dissemination of “lessons learned” to incoming teams?

Answer. Only qualified officers and NCOs are chosen to fill these critical positions, based upon their grade, skill, and experience match, balanced with dwell time. To facilitate and synchronize this effort, Army, Air Force, and Navy “external” transition team training was consolidated and is now conducted at Fort Riley, Kansas by the 1st Infantry Division. The two-star commander there, his staff, and a BCT now execute the full spectrum of tasks required to man, train, and equip external transition teams. The Marines are running a similar program at Twentynine Palms, CA. Transition team training is based on seven core competencies—combat skills, force protection, team support processes, technical and tactical training, advisor skills, counterinsurgency operations, and understanding the culture (which alone encompasses about 50 hours of training to empower the teams’ abilities to forge a positive relationship with their Iraqi counterpart). The lessons learned process is critical and is integrated before, during, and after a team embeds with an ISF unit. Throughout training, team members are in communication with the team they will replace so they may exchange information, pass back these lessons, and learn about their Iraqi unit prior to deployment. Additionally, programs like Fort Riley (60 days), Camp Buehring (Kuwait, 6 days), and the Phoenix Academy (Taji, Iraq, 8 days) undergo continuous review so that the training can remain relevant by adapting the training model as necessary based on input from the field and changing conditions in theater. Once in theater, teams execute a 60-day assessment of the training they received in preparation for their assignment as advisors, complete a formal end of tour assessment to codify lessons learned, and an assessment of the transition between their team and the follow-on team. The Iraq Assistance Group (IAG) has also compiled transition team lessons learned on the IAG website for all transition teams to utilize. The Combat Studies Institute and Center for Army Lessons Learned have captured lessons on transition team operations and techniques and published them as well.

The Military Police Brigade fully sources the PTTs and provides RSOI, implementation, execution, and mission oversight of the PTT Program. The brigade brings a cohesive and organic element to training, resourcing, and equipping PTTs which are actually military police squads already trained for law enforcement skills. These MP units are trained at home station to perform this mission. These teams are embedded with IPLOs who are trained, hired, and managed by the State Department. Host nation police building and training is a doctrinal military police mission. Experiences and lessons learned at Panama, Haiti, Somalia, Bosnia, and Kosovo all contribute to continued mission development and application. Lessons learned and up-to-date TTPs are disseminated back to the deploying units through direct contact with units on the ground, Pre-Deployment Site Survey (PDSS), Mission Readiness Exercise (MRX), and then Relief-In-Place (RIP) Program during which the MP Brigade conducts a PTT certification. Additionally, lessons learned are disseminated through the Center for Army Lessons Learned Website, Senior Leader forums (many virtual), the Battle Command Training Program COIN Seminars, combat training center mission rehearsal exercises, the Joint Center for International Security Force Assistance, and doctrine development efforts.

Question. If confirmed, what would you recommend in this regard?

Answer. First, it is necessary to retain the core transition team and ensure it continues to receive the best possible training in preparation for its mission of mentoring and advising the ISF unit. This core structure is the expertise upon which additional enhancement is placed. They are the subject matter experts within the transition team. Second, as conditions on the ground permit, I would expedite the enhancement of transition teams to capitalize on their contributions toward ISF development. This must be done in a manner that also balances other operational requirements, which will lessen as the levels of violence become more manageable for the ISF. Furthermore, leaders should direct the widest dissemination of lessons learned by our teams. The team in training as well as any team in theater must be alerted to newly developed tactics, techniques, and procedures that are proving successful in application. This is done through the Center for Army Lessons Learned, the Combat Studies Institute, and the Joint Center for International Security Force Assistance at Fort Leavenworth, among other agencies.

DETAINEE TREATMENT STANDARDS

Question. Do you agree with the policy set forth in the July 7, 2006 memorandum issued by Deputy Secretary of Defense England stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Convention?

Answer. Yes. The standards outlined in Common Article 3 should be the standard for U.S. and coalition forces to adhere to in regards to the handling of detainees at all levels. In fact, as I noted in responding to one of the earlier questions, after an early case of detainee mistreatment, I directed that detainees in the 101st Airborne Division area of responsibility would be handled in accordance with the Geneva Convention, as those were the standards our soldiers understood.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes. I believe having one interrogation standard outlined in one document adds clarity. The new FM clearly articulates what is and what is not authorized and effectively identifies methods to ensure accountability.

Question. Do you share the view of the Judge Advocates General that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts?

Answer. Yes.

Question. You oversaw the issuance of a new Army doctrine on counterinsurgency operations. Do you believe it is consistent with effective counterinsurgency operations for U.S. forces to comply fully with the requirements of Common Article 3 of the Geneva Convention?

Answer. Yes. We can conduct effective interrogation and detention in wartime in a counterinsurgency environment and comply with the requirements outlined in Common Article 3; in fact, we had international human rights organizations participate in the COIN Seminar we hosted to discuss a very early draft of the manual. That conference, in fact, was co-hosted by Harvard's Carr Center for Human Rights.

IRAQ STATE-OWNED ENTERPRISES

Question. What is your understanding of the status of Department of Defense efforts to help restart Iraqi state-owned enterprises to increase employment in Iraq?

Answer. When the Task Force to Improve Business and Stability Operations-Iraq (TF BSO) arrived in Iraq, it expected to find a Soviet-style, aging State-Owned Enterprise (SOE) industrial base that was grossly uncompetitive. First-hand evaluations, however, reveal that some of these factories possess modern—even automated—equipment, and are capable of producing materials and manufactured goods that would be competitive in both Iraqi and world markets. Some facilities have deteriorated or suffered from a lack of recapitalization, and require varying amounts of refurbishment. Other SOEs are simply obsolete, either because they produce materials or finished goods for which there is little or no demand, or because they require cost-prohibitive investment prior to restarting operations. SOEs traditionally employ large numbers of Iraqis. Their closure still requires that the Government of Iraq address manpower costs, principally through retraining programs and job placement assistance. TF BSO is not advocating U.S. Government investment in Iraqi factories, and is committed to the long-term policy of economic privatization.

Beyond this, having helped Iraqi industries reestablish cement plants, small refineries, and asphalt plants, among others, while commanding the 101st Airborne Division, my view is that there are numerous industries that could be reestablished—ideally with Iraqi funds—and could be self-sustaining, as they enjoy a comparative advantage in some factor of production (e.g., Iraq has vast sulfur reserves, reportedly the largest in the world, which would be used to refine high-grade sulfur for industrial purposes and production of fertilizer; Iraq also has large deposits of “sour crude” that are ideal for asphalt production). I strongly support encouraging such initiatives.

Question. If so, what is your view of these efforts?

Answer. I strongly support the efforts of this task force. TF BSO is assessing Ministry of Industry and Minerals (MIM) SOEs as well as private factories. MIM is responsible for approximately 56 of the 190 or so SOEs nationwide. These 56 SOEs have approximately 200 factories. Within the 56 MIM SOEs, TF BSO has assessed 25 of these and is working closely with Deputy Prime Minister Salih and the MIM to revitalize the existing Iraqi industry base. Where competitive industrial capacity exists, TF BSO and DOD will do everything they can to support the ministries, the factories, and provincial leadership to restart operations, re-employing as many current workers as circumstances permit. Several of the SOEs visited are in relatively good shape and can be restarted with minimal investment in power restoration. Initial efforts identified 10 large factories, from Baghdad through Al Anbar Province, where \$6 million provided by the Iraqi government can restart operations and reemploy 11,000 workers. The products that these facilities generate will help to meet local and DOD demands, and have the potential to serve broader U.S. and global markets.

SPECIAL INSPECTOR GENERAL

Question. The Special Inspector General for Iraqi Reconstruction (SIGIR) conducts comprehensive audits, inspections, and investigations which are valuable to Congress.

If confirmed, what steps would you take to support the audits, inspections, and investigations conducted by the SIGIR?

Question. The SIGIR reports provide valuable insight to the Force Commander, the Ambassador, and officials in Washington. I supported the activities of the SIGIR as MNSTC-I Commander and, if confirmed, I will support them as the commander of MNF-I. I should note that I also supported the activities of the Government Accountability Office during my time in Iraq and following return to the U.S., and I also invited the Army Audit Agency to audit activities of the 101st Airborne and MNSTC-I on two or three occasions while I was in Iraq.

MENTAL HEALTH ASSESSMENTS IN THEATER

Question. The Army’s Mental Health Advisory Team (MHAT) has made three separate assessments over the past several years detailing the immediate effects of combat on mental health conditions of U.S. soldiers deployed to Iraq. The most recent study, MHAT III, found that multiple deployers reported experiencing higher levels of acute stress, and that overall levels of combat stressors are increasing. These types of reports lend support to the fact that increasing numbers of troops are returning from duty in Iraq with Post Traumatic Stress Disorder (PTSD), depression, and other mental health issues.

What is your understanding of the key findings of the previous mental health assessments, actions taken by the Army to address key findings, and the effect of such actions?

Answer. The MHAT assessments looked at morale, mental health staffing, access to mental health care, stress from multiple deployments, and leadership issues. The general findings from the studies showed that multiple deployments and longer deployments were by far the leading factors that increased the incidence of mental health issues. The studies recommended redistribution of mental health staff to provide better coverage and the development of a suicide prevention program within theater.

The MHAT 4 study completed in October 2006 showed that the staffing was better, which improved access to mental health care for troops. In August 2006, the MNF-I Surgeon published behavioral health guidelines, which implemented recommendations from the MHAT III study. These included the establishment of a multi-disciplinary Suicide Prevention Committee, whose purpose is to address theater-specific issues related to military member suicides.

In addition there is a mental health web site for commanders on the MNF-I portal and there are mandatory pre- and post-deployment mental health assessments

and reassessments (3–6 months post deployment). MNF–I has also created a working group consisting of G1 personnel, CID agents, chaplains, surgeons, and mental health professionals that meets not less than quarterly to assess the status of mental health in the AOR.

Question. If confirmed, would you support continuous mental health assessments of the U.S. forces in Iraq?

Answer. Yes.

Question. Do you have any views on how to best address the mental health needs of our troops, in terms of both prevention and treatment?

Answer. As explained above, I believe we are doing a considerable amount to support the mental health of the force in Iraq; having said that, we must continue to re-examine whether we are doing all that we can in this critical area. Iraq is a war zone and we can diminish but not eliminate mental health problems. MNF–I has the assets and capabilities to provide prevention measures and treatment throughout Iraq, to include teams that periodically perform outreach at main bases and remote sites to identify potential issues. If confirmed, I will monitor this area closely.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Commander, MNF–I?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR DANIEL K. AKAKA

IRAN AND SYRIA

1. Senator AKAKA. Lieutenant General Petraeus, during the President's address to the Nation, he asserted that succeeding in Iraq also required defending its territorial integrity. He stated that Iran was providing material support for attacks on our troops, that we will interrupt the flow of support from Iran and Syria, and that we will seek out and destroy the networks providing advanced weaponry and training to our enemies in Iraq. I am concerned about how this will be done, and what potential it creates for a regional escalation. In particular, I want to make sure we have adequately planned for protecting our troops in the event of a regional escalation. I note that the recent deployment of another carrier strike group to the Persian Gulf area and the nomination of a Navy Admiral to head U.S. Central Command which seems to indicate an expansion of military focus beyond Iraq and Afghanistan. What do you believe is the potential for our efforts to interrupt the flow of support from Iran and Syria to cause an escalation to a regional conflict?

General PETRAEUS. One of our broad priorities in Iraq will include countering the threats posed by Iranian and Syrian support to extremists in Iraq, along with the continued mission of dismantling terrorist networks in the country.

Multinational Force-Iraq (MNF–I) works closely with the developing Iraqi border security forces to interdict the trafficking of foreign fighters, weapons, explosives, and other contraband across the borders of Iraq. I will work closely with the Ambassador as he and the diplomatic community pursue actions to disrupt influence from external sources, while simultaneously working to prevent potential escalation.

MNF–I continues to take measures to ensure our troops' protection from all identified threats, and we are keeping a close eye on evolving threats, both from within Iraq and from neighboring countries.

2. Senator AKAKA. Lieutenant General Petraeus, in your opinion, does the lack of diplomatic engagement with Iran and Syria increase the risk of an escalation?

General PETRAEUS. With respect, the conduct of diplomatic engagement with Iran and Syria is beyond my purview, though I have discussed ongoing and contemplated actions with various members of the State Department, and I know that they are carefully weighing the pros and cons of various initiatives.

3. Senator AKAKA. Lieutenant General Petraeus, have specific plans been developed to protect our troops if it does escalate?

General PETRAEUS. As I noted earlier, we constantly assess how to improve the force protection posture of our troops, while simultaneously working to ensure mission accomplishment. We have examined and continue to examine potential threats from all quarters, including greater outside involvement in Iraq, and we take appropriate measures in response—including constant upgrading of personal protective equipment, addition of surveillance assets, improvements to vehicular protection, improved weaponry, and so on.

NEW STRATEGY

4. Senator AKAKA. Lieutenant General Petraeus, it is my understanding that you are one of the Army's leading authorities on counterinsurgency. As such, I'm interested in your evaluation of the new strategy for the surge. Specifically, would you suggest any additional actions that were excluded from the new strategy (e.g., seek additional troops or other forms of assistance from our allies, coalition partners, or Iraq's neighboring nations)?

General PETRAEUS. The Army's new counterinsurgency manual makes clear that security of the population must be the priority in a situation like that in Iraq—and it will be our priority as we conduct the surge. We must, together with our Iraqi partners, clear, control, and retain the neighborhoods of Baghdad to break the cycle of violence that is preventing political progress in Iraq. We can only do this by establishing persistent presence—coalition, as well as Iraqi—in Iraqi neighborhoods. I plan to ensure that a portion of our forces locate in the neighborhoods they protect and that they carry out operations closely linked with their Iraqi counterparts—with the Iraqis in the lead whenever possible—to secure the population.

The enemies we face are adaptive and as requirements change, I will request additional support (the accelerated arrival of the 3d Infantry Division Headquarters is a result of this), if needed, and clearly outline the various risks to our strategy. We will also work closely with our interagency, coalition, and Iraqi partners to set the conditions for success in Iraq.

5. Senator AKAKA. Lieutenant General Petraeus, would you suggest improvements to any of the tactics that are included in the new strategy?

General PETRAEUS. I am pleased with the changes our military is making in training, manning, and equipping the force to fight this kind of conflict. Two big changes are being asked of our forces under this new strategy—the expanded use of enhanced and embedded transition teams and the renewed emphasis on positioning forces in the neighborhoods among the people. Our military has done a good job with the collection and dissemination of lessons learned and the practice of the latest tactics, techniques, and procedures in our training centers as troops prepare to deploy. Our troops and leaders are prepared for the implementation of the new strategy, though we undoubtedly will continue to learn as we carry out the new operations—and we plan to share lessons throughout the force as we do.

6. Senator AKAKA. Lieutenant General Petraeus, you recently were interviewed by Spiegel magazine, a German periodical. During the interview, you stated that much of counterinsurgency operations is counter-intuitive. You further called counterinsurgency operations “war at the graduate level” and “thinking man's warfare.” You also said that we want our young officers to think, not memorize, because they cannot kill their way out of an insurgency. You indicated that you have to take out the elements that will never reconcile with the new government, or with the system, but then try to win over the rest of the population. This part is not done with tanks and rifles. How well-trained are the junior officers and troops in the counterinsurgency doctrine?

General PETRAEUS. Over the past 15 months, I have been privileged to oversee the organizations that educate our Army's leaders, draft our doctrine, capture lessons learned, and help our units prepare for deployment.

Our small unit leaders are increasingly well-trained for counterinsurgency warfare. The Army and Marine Corps' professional military educational institutions have institutionalized the new counterinsurgency doctrine recently published in Field Manual 3-24 (that process began well before the manual was finally published, based on articles and lessons learned). Furthermore, our combat training centers now focus on counterinsurgency operations during unit mission rehearsal exercises. Leaders are further honed by counterinsurgency seminars and training conducted in the United States, Kuwait, and at the Taji Counterinsurgency Center for Excellence in Iraq. This training has made our junior leaders and soldiers better prepared for counterinsurgency warfare and more adaptive to the situations they will face in Iraq. Learning continues, however, and the Center for Army Lessons Learned, Asymmetric Warfare Group, and other elements facilitate the collection and distribution of lessons that we continue to capture.

7. Senator AKAKA. Lieutenant General Petraeus, how prepared are they to implement the President's new strategy for the surge?

General PETRAEUS. Our officers and troops are well-trained, well-equipped, and ready for the tactics asked of them in this new strategy—though it will represent a change in operating style for some units, and we will continue to learn new lessons as we carry out the surge.

8. Senator AKAKA. Lieutenant General Petraeus, how well-trained are the Iraqi security forces (ISFs) in counterinsurgency doctrine?

General PETRAEUS. The ISFs have made solid gains in professionalism and capability over the past 3 years, though they still have a long way to go in certain elements. They are especially effective when operating in concert with coalition forces at population security. The Iraqi units obviously have greater cultural awareness and linguistic capabilities, while U.S. forces bring greater military capabilities to the battlefield.

9. Senator AKAKA. Lieutenant General Petraeus, given that the new strategy for the surge is heavily reliant on the Iraqis leading the security efforts, how can we be sure that they have correctly identified "the elements that will never reconcile with the new government" and will not just be utilizing their position to eliminate dissenters?

General PETRAEUS. In fact, there is work to be done in this area, and I have discussed it with the Prime Minister and the Ministers of Defense and Interior. Actions have already been taken against a number of leaders and units shown to be using their positions for sectarian purposes, and more will be taken—increasingly by Iraqi officials and elements. While we are generally encouraged by the slow growth in professionalism of the ISFs, we believe that a very robust partnering of coalition forces with the Iraqi Army and National Police elements will prevent any such sectarian bias in their application of force as we help the Iraqi government identify elements and leaders who need to be removed and, in some cases, brought to justice.

QUESTIONS SUBMITTED BY SENATOR BEN NELSON

PRESIDENT'S NEW PLAN

10. Senator BEN NELSON. Lieutenant General Petraeus, obviously, a drop in violence is a benchmark, but that can be temporary as we have seen in Iraq. What should policymakers specifically be looking to see on the ground in Baghdad over the next 6 months with the President's new plan?

General PETRAEUS. A reduction in violence as part of improving security for the people clearly is the top indicator. Over time, that is one that must be seen. But it will take time. We may or may not see a significant drop in violence at the beginning of the operation, but the key is the long-term improvement of security, public confidence, basic services, economic development, and government capacity. We will not eliminate violence from the streets of Baghdad on our watch, but we must help the Iraqis reduce the level of violence, intimidation of the populations of various neighborhoods, and so on. I believe that over a period of months there will be a reduction of violence, although it will be uneven and will differ from area to area. This achievement is nonetheless critical to allowing the other elements of national power to come to bear on the problem in Baghdad and Iraq as a whole, and for Iraq to resolve the political issues that are the true solution to its long-term problems.

11. Senator BEN NELSON. Lieutenant General Petraeus, how long will it be before the committee can be notified of the results of the plan?

General PETRAEUS. It will take several months at the least. That allows for the time for the additional forces to flow to Iraq, time for them to gain an understanding of the areas in which they will operate, time to plan with and get to know their Iraqi partners, time to set conditions for the successful conduct of security operations, and, of course, time to conduct those operations and then to build on what they achieve. Success, again, will occur over a period of months, not weeks or days.

None of this, in fact, will be rapid. The way ahead will be neither quick nor easy, and there undoubtedly will be tough days. We face a determined, adaptable, and barbaric enemy. MNF-I will work closely with our Iraqi ISF partners to secure the population and help to facilitate the enhancement of quality of life for the citizens, and I do believe we can do that. I will provide periodic updates when requested.

12. Senator BEN NELSON. Lieutenant General Petraeus, if the plan is tried, attempted, and is not successful, will you come back to Congress and explain what happened and why?

General PETRAEUS. I will provide you with forthright, professional military advice with respect to the missions given to MNF-I and the situation on the ground in Iraq. Should I determine that new strategy cannot succeed, I will provide such an assessment.

MILITIAS

13. Senator BEN NELSON. Lieutenant General Petraeus, in my opinion, Iraq will not long survive as a nation with armed militias roaming the streets of Baghdad. We know the profound impact armed militias have had in Israel and Lebanon. I am, to say the least, skeptical about the Prime Minister's desire to take on Moqtada al-Sadr's Mahdi army. Does Prime Minister Maliki have the will to engage Shia militias?

General PETRAEUS. I have already begun, together with the Ambassador, developing a relationship with Prime Minister Maliki. My early impression is that he is genuinely concerned with the future of Iraq and not just the interests of his sect or political coalition. He does appear to want to be Prime Minister for all Iraqis and has taken steps that confirm this. That is critical, as the Iraqi government dealing fairly with all sects and ethnic groups is critical for long-term political and military success. I will work closely with the Prime Minister and his commanders to help them enforce the law and secure the population. Prime Minister Maliki has already taken steps in this direction by ensuring that there are no safe havens in Iraq, and insurgents, terrorists, and criminals will be dealt with in accordance with the law regardless of sect or ethnicity.

14. Senator BEN NELSON. Lieutenant General Petraeus, if a decision is made not to engage Sadr at this time, what could that mean when American forces leave?

General PETRAEUS. I will work with the Iraqi government to engage all organizations within Iraqi society who are genuinely amenable to political negotiation and accommodation. A lasting peace can only be secured by the creation of a political compact that encompasses all parties willing to join such an enterprise. Those organizations that refuse to recognize the legitimacy of the government of Iraq will be neutralized to the extent that they will be unable to interfere with the governance of the country.

15. Senator BEN NELSON. Lieutenant General Petraeus, is it a good idea to leave an armed militia in Iraq's capital?

General PETRAEUS. No. We want to see an Iraq in which the government, through its established and regulated police and army, maintains a monopoly on the possession and use of organized armed force.

16. Senator BEN NELSON. Lieutenant General Petraeus, could you see a scenario where the military and al-Sadr's militia work together to further cleanse Baghdad of their Sunni presence?

General PETRAEUS. That is obviously one of the scenarios the surge is intended to prevent.

IRAQI SECURITY FORCES

17. Senator BEN NELSON. Lieutenant General Petraeus, in your estimation, how many troops do ISFs have that are trained and capable of undertaking the President's new plan?

General PETRAEUS. Iraqi Army, Police, and Special Operations Forces, together with the U.S. forces currently on the ground or deploying to Baghdad (and this is Baghdad-centric) in the months ahead, will total some 85,000—though, to be sure, not all of those are of the same levels of effectiveness. I have emphasized to the Iraqi government the necessity of ensuring that these forces deploy at 100 percent strength, and the Ministry of Defense is taking action to ensure that this happens. It did not, with some of the earlier deployers. With the addition of all five U.S. brigades under orders to reinforce Baghdad and the ISFs either in Baghdad or headed to the city, there should be sufficient military forces available to achieve our objective of securing Baghdad, which will improve security and set the conditions for U.S. Government and Iraqi government advances in the decisive areas of governance, economic development, and Rule of Law.

18. Senator BEN NELSON. Lieutenant General Petraeus, what confidence do you have in the capacity of these troops to both “clear” and “hold”?

General PETRAEUS. I believe this plan can succeed. We have to change the long-standing paradigm of clearing a neighborhood and then moving on in favor of a constant and active presence among the people. This will be a change for both coalition and Iraqi forces, but I am confident that they will adapt and perform admirably.

The ISFs have received reasonable training and they've received reasonable equipping. Leadership on the ground with the soldiers and policemen will make the difference and we are seeing an increase in the professionalism, confidence, and capability of Iraqi leaders.

19. Senator BEN NELSON. Lieutenant General Petraeus, do you believe the Iraqis have accepted this plan as their own and not simply an American plan?

General PETRAEUS. Yes.

 QUESTIONS SUBMITTED BY SENATOR JIM WEBB

ACCOUNTABILITY

20. Senator WEBB. Lieutenant General Petraeus, you have stated that “money is ammunition” in Iraq; do you agree that immediate, full accountability is essential for money already appropriated and spent?

General PETRAEUS. Depending on the situation, money can be more important than ammunition in the counterinsurgency fight. Once money is available, the challenge is to spend it effectively and quickly to rapidly achieve measurable results. Money needs to be provided as soon as possible to the organizations that have the capability and capacity to spend it in such a manner. At the same time, the American public rightfully deserves to know that its funds are spent carefully and transparently. I believe that we have the processes in place to use money for its intended purposes without compromising the trust and confidence of the United States taxpayer. In the past, I personally requested assistance from teams of auditors from the Army Audit Agency. I also supported the activities of the Special Inspector General for Iraq Reconstruction (SIGIR), Department of Defense Inspector General (DOD IG), and Government Accountability Office (GAO), and overseen corrective measures when areas needing improvement have been identified. I met with the SIGIR and DOD IG in Washington, in fact, and pledged continued support to them.

21. Senator WEBB. Lieutenant General Petraeus, if so, how will you assist this committee in providing such accountability and in assuring transparency in ongoing projects?

General PETRAEUS. We have fiscal oversight processes in place now in MNF-I. For example, the SIGIR reports provide valuable insight to the Force Commander, the Ambassador, and officials in Washington. Again, I supported the activities of the SIGIR as Multinational Security Transition Command-Iraq (MNSTC-I) Commander and I will support them as the Commander of MNF-I. I should note that I also supported the activities of the GAO during my time in Iraq and following return to the U.S., and I also invited the Army Audit Agency to audit activities of the 101st Airborne and MNSTC-I on two or three occasions while I was in Iraq. It is important that Congress and the American people have confidence that we are diligently expending funds allocated to us.

QUESTIONS SUBMITTED BY SENATOR ELIZABETH DOLE

COOPERATION

22. Senator DOLE. Lieutenant General Petraeus, one of your predecessors, LTG Peter Chiarelli, has stressed the need for unity of command. Would you explain your views on the issue, first at it relates to the need for greater cooperation between the U.S. Ambassador and the Commander of the MNF-Is, than was the case with your predecessors, and then link those thoughts with the need for greater unity of effort both between U.S. organizations, primarily DOD and the State Department, and then with the Iraqi government.

General PETRAEUS. Only through unity of effort of all—coalition and Iraqi, military and civilian—can we bring the full weight of our effort to bear on the difficult situation in Iraq. You have my commitment that I will work closely with the Ambassador to fully coordinate our actions in Iraq. Only through the full application of all elements of national power, through the various agencies, will we have the chance to achieve success.

Our military is making an enormous commitment in Iraq. The integration of joint capabilities under the Goldwater-Nichols Act has been a success. Our military forces are more interoperable today than they ever have been in our Nation's history. This achievement is impressive. Over time, we need the rest of the departments to do likewise, to help the Iraqi government get the country and its citizens working, and to use Iraq's substantial oil revenues for the benefit of all the Iraqi people.

The next step is to ensure the ability of the military and civilian departments to work closely together. Counterinsurgency warfare requires a total commitment of the government—both military and civilian agencies—and unity of effort is crucial to success. Integration of the interagency effort to ensure that progress is made along all lines-of-operation—not just security, but economic, governance, and the rule of law as well—is a significant challenge. I applaud the recent efforts to embed the Provincial Reconstruction Teams in the Brigade Combat Team (BCT) headquarters for those provinces in which BCTs are the senior headquarters, or in the division headquarters in areas where they are the senior headquarters in a province. This will provide a synergy that will significantly enhance our ability to conduct stability and reconstruction operations in Iraq.

I will do all that I can, in partnership with the Ambassador, to ensure that our interagency is doing all possible to help develop capacity in the Iraqi government and to enable it to come to grips with the tough issues it must resolve.

SUNNI/SHIITE RELATIONS

23. Senator DOLE. Lieutenant General Petraeus, do you agree with the testimony of General Keane, U.S. Army (Retired), on January 25 that the catalyst that drives sectarian violence in Iraq is Sunni violence against the Shiite population?

General PETRAEUS. This is a very complicated situation. Sunni violence against Shia is just one aspect of violence in Iraq. There is also the continuing al Qaeda terrorism. Shia violence against Sunnis plays a part, as does Shia on Shia violence. Organized criminal violence is also an unsettling factor. To place full responsibility on the Sunnis misrepresents the complex threat environment in Iraq, though some of the catalysts for sectarian violence (such as the Samarra mosque bombing) were earned out by Sunni extremists.

24. Senator DOLE. Lieutenant General Petraeus, what is your plan for the deployment of forces across targeted neighborhoods in Baghdad so as to avoid, to the fullest extent possible, any appearance of bias toward either Sunnis or Shiites?

General PETRAEUS. ISFs will be assigned areas of operations throughout Baghdad without regard to sectarian composition of the units. Brigades of the 6th and 9th Iraqi Divisions, each of which have a mix of Shia and Sunni personnel (though predominantly Shia in their makeup) will be employed in all nine administrative districts of the city. It is true that some districts in the city are predominantly Shia, while others are predominantly Sunni. However, U.S. Army battalions will be partnered with these Iraqi brigades to reinforce the practice that all security forces operate in a professional, disciplined, and ethical manner, and in accordance with the rule of law, international humanitarian norms, and recognized international standards for enforcement and protection of human rights.

It is important to ensure no particular sect feels persecuted by the deployment of any ISF in their neighborhood. The partnering of a U.S. battalion with each ISF brigade will ensure that sectarian divisions and mistrust are kept to a minimum.

[The nomination reference of LTG David H. Petraeus, USA, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 16, 2007.

Ordered, that the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the United States Army to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be General.

LTG David H. Petraeus, 1960.

[The biographical sketch of LTG David H. Petraeus, USA, which was transmitted to the committee at the time the nomination was referred, follows:]

RÉSUMÉ OF SERVICE CAREER OF LTG DAVID H. PETRAEUS, USA

Source of commissioned service: USMA.

Military schools attended:

Infantry Officer Basic and Advanced Courses,
Armor Officer Advanced Course,
United States Army Command and General Staff College,
Senior Service College Fellowship—Georgetown University.

Educational degrees:

United States Military Academy—BS—No Major.
Princeton University—MPA—International Relations.
Princeton University—PHD—International Relations.

Foreign language(s): None recorded.

Promotions:

	Dates of appointment
2LT	5 Jun 74
1LT	5 Jun 76
CPT	8 Aug 78
MAJ	1 Aug 85
LTC	1 Apr 91
COL	1 Sep 95
BG	1 Jan 00
MG	1 Jan 03
LTG	18 May 04

Major duty assignments:

From	To	Assignment
May 75	Jan 79	Platoon Leader, C Company, later S-4 (Logistics), later S-1 (Personnel), 509th Airborne Battalion Combat Team, Vicenza, Italy.
Jan 79	Jul 79	Assistant S-3 (Operations), 2d Brigade, 24th Infantry Division (Mechanized), Fort Stewart, GA.
Jul 79	May 81	Commander, A Company, later S-3 (Operations), 2d Battalion, 19th Infantry, 24th Infantry Division (Mechanized), Fort Stewart, GA.
May 81	May 82	Aide-de-Camp to the Division Commander, 24th Infantry Division (Mechanized), Fort Stewart, GA.
May 82	Jun 83	Student, Command and General Staff Officer Course, Fort Leavenworth, KS.
Jun 83	Jun 85	Student, Princeton University, Princeton, NJ.
Jul 85	Jun 87	Instructor, later Assistant Professor, Department of Social Sciences, United States Military Academy, West Point, NY.
Jun 87	Jun 88	Military Assistant to the Supreme Allied Commander Europe, Supreme Headquarters, Allied Powers Europe, Belgium.

From	To	Assignment
Jun 88	Aug 89	S-3 (Operations), 2d Battalion, 30th Infantry, later 1st Brigade, 3d Infantry Division (Mechanized), United States Army Europe, Germany.
Aug 89	Aug 91	Aide/Assistant Executive Officer to the Chief of Staff, United States Army, Washington, DC.
Aug 91	Jul 93	Commander, 3d Battalion, 187th Infantry, 101st Airborne Division (Air Assault), Fort Campbell, KY.
Jul 93	Jul 94	G-3 (Operations)/Director of Plans, Training, and Mobilization, 101st Airborne Division (Air Assault), Fort Campbell, KY.
Aug 94	Jan 95	Senior Service College Fellow, Georgetown University, Washington, DC.
Jan 95	Jun 95	Chief Operations Officer, U.N. Mission in Haiti, Operation Uphold Democracy, Haiti.
Jun 95	Jun 97	Commander, 1st Brigade, 82d Airborne Division, Fort Bragg, NC.
Jun 97	Sep 97	Executive Assistant to the Director of the Joint Staff, The Joint Staff, Washington, DC.
Oct 97	Aug 99	Executive Assistant to the Chairman, Joint Chiefs of Staff, Office of the Joint Chiefs of Staff, Washington, DC.
Aug 99	Jul 00	Assistant Division Commander (Operations), 82d Airborne Division, Fort Bragg, North Carolina and Commanding General, Combined Joint Task Force-Kuwait, Operation Desert Spring, Kuwait.
Jul 00	Aug 00	Acting Commanding General, 82d Airborne Division, Fort Bragg, NC.
Aug 00	Jun 01	Chief of Staff, XVIII Airborne Corps, Fort Bragg, NC.
Jun 01	Jun 02	Assistant Chief of Staff for Operations, SFOR and Deputy Commander, United States Joint Interagency Counterterrorism Task Force, Operation Joint Forge, Sarajevo, Bosnia-Herzegovina.
Jul 02	May 04	Commanding General, 101st Airborne Division (Air Assault) and Fort Campbell, Fort Campbell, KY, and Operation Iraqi Freedom, Iraq.
May 04	Sep 05	Commander, Multinational Security Transition Command-Iraq/Commander, NATO Training Mission-Iraq, Operation Iraqi Freedom, Iraq.

Summary of joint assignments:

	Dates	Rank
Military Assistant to the Supreme Allied Commander Europe, Supreme Headquarters, Allied Powers Europe, Belgium (Cumulative Joint Credit).	Jun 87–Jun 88	Major
Chief Operations Officer, U.N. Mission in Haiti, Operation Uphold Democracy, Haiti (No Joint Credit).	Jan 95–Jun 95	Lieutenant Colonel
Executive Assistant to the Director, The Joint Staff, later Executive Assistant to the Chairman, Joint Chiefs of Staff, Washington, DC.	Jun 97–Aug 99	Colonel
Commanding General, Combined Joint Task Force-Kuwait, Operation Desert Spring, Kuwait (No Joint Credit).	Aug 99–Sep 99	Colonel
Assistant Chief of Staff for Operations, SFOR and Deputy Commander, United States Joint Interagency Counter-Terrorism Task Force, Operation Joint Forge, Sarajevo, Bosnia-Herzegovina (No joint credit).	Jun 01–Jun 02	Brigadier General
Commander, Multinational Security Transition Command-Iraq/Commander, NATO Training Mission-Iraq, Operation Iraqi Freedom, Iraq.	May 04–Sep 05	Lieutenant General

 Army Commendation Medal (with two Oak Leaf Clusters)
 Joint Service Achievement Medal
 Army Achievement Medal
 Combat Action Badge
 Expert Infantryman Badge
 Master Parachutist Badge
 Air Assault Badge
 Ranger Tab
 Joint Chiefs of Staff Identification Badge
 Army Staff Identification Badge

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details

the biographical, financial, and other information of the nominee. The form executed by LTG David H. Petraeus, USA, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228
Washington, DC 20510-6050
(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM
BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
David H. Petraeus.
2. **Position to which nominated:**
Commander, Multinational Force-Iraq, Operation Iraqi Freedom.
3. **Date of nomination:**
16 Jan. 2007.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
7 November 1952; Cornwall on Hudson, New York.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Hollister Knowlton Petraeus.
7. **Names and ages of children:**
Anne, 24; Stephen, 20.
8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.
None.
9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
None.
10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Council on Foreign Relations.
Association of the United States Army.
Association of Graduates, United States Military Academy.
82d Airborne Division Association.
101st Airborne Division Association.
504th Parachute Infantry Regiment Association.
Static Line Association.
555th Parachute Infantry Regiment Association.
187th Infantry Regiment Association.

SHAPE Alumni Association.
 7th Armored Division Association.
 Princeton Alumni Association.
 United States Parachute Association.
 Command and General Staff Foundation.

11. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

None.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify before any duly constituted committee of the Senate?
 Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

DAVID H. PETRAEUS.

This 16th day of January, 2007.

[The nomination of LTG David H. Petraeus, USA, was reported to the Senate by Chairman Levin on January 24, 2007, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on January 26, 2007.]

**NOMINATION OF ADM WILLIAM J. FALLON,
USN, FOR REAPPOINTMENT TO THE GRADE
OF ADMIRAL AND TO BE COMMANDER,
UNITED STATES CENTRAL COMMAND**

TUESDAY, JANUARY 30, 2007

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:30 a.m. in room SD-106, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Kennedy, Lieberman, Reed, Akaka, Bill Nelson, Bayh, Clinton, Webb, McCaskill, McCain, Warner, Inhofe, Sessions, Collins, Chambliss, Graham, Dole, Cornyn, Thune, and Martinez.

Committee staff members present: Richard D. DeBobes, staff director; Christine E. Cowart, chief clerk; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Daniel J. Cox, Jr., professional staff member; Madelyn R. Creedon, counsel, Evelyn N. Farkas, professional staff member; Creighton Greene, professional staff member; Michael J. Kuiken, professional staff member; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; William G.P. Monahan, counsel; Michael J. Noblet, research assistant; and Arun A. Seraphin, professional staff member.

Minority staff members present: Michael V. Kostiw, Republican staff director; William M. Caniano, professional staff member; Ambrose R. Hock, professional staff member; Gregory T. Kiley, professional staff member; Derek J. Maurer, professional staff member; Lucian L. Niemeyer, professional staff member; Christopher J. Paul, professional staff member; Lynn F. Rusten, professional staff member; Robert M. Soofer, professional staff member; Sean G. Stackley, professional staff member; and Diana G. Tabler, professional staff member.

Staff assistants present: David G. Collins and Fletcher L. Cork.

Committee members' assistants present: Sharon L. Waxman, assistant to Senator Kennedy; Frederick M. Downey, assistant to Senator Lieberman; Elizabeth King, assistant to Senator Reed; Darcie Tokioka, assistant to Senator Akaka; Caroline Tess, assistant to Senator Bill Nelson; Benjamin Rinaker, assistant to Senator Ben Nelson; Todd Rosenblum, assistant to Senator Bayh; Andrew Shapiro, assistant to Senator Clinton; Gordon I. Peterson and Michael L. Sozan, assistants to Senator Webb; Nichole M. Distefano,

assistant to Senator McCaskill; Vince Piperni and Jeremy Shull, assistants to Senator Inhofe, Mark J. Winter, assistant to Senator Collins; Clyde A. Taylor IV, assistant to Senator Chambliss; Adam G. Brake, assistant to Senator Graham; Lindsey Neas, assistant to Senator Dole; Stuart C. Mallory, assistant to Senator Thune; and Brian W. Walsh, assistant to Senator Martinez.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody.

Today, we welcome Admiral William J. Fallon, USN, the President's nominee for Commander, U.S. Central Command (CENTCOM). Admiral Fallon has distinguished himself in service to our country for over 39 years in a number of challenging and important assignments, including 24 years in naval aviation, logging over 4,800 flight hours, and then a succession of staff and command positions, culminating as the current Commander, U.S. Pacific Command (PACOM).

We're particularly grateful for Admiral Fallon's willingness to take on another, and probably the most challenging assignment of all as the CENTCOM Commander, following in the footsteps of General John Abizaid. One of the critical attributes that any geographic combatant commander must have is an ability to understand the geopolitical context of the region, as well as the political dynamics internal to the countries that comprise the region.

In his current assignment as Commander of the U.S. PACOM, Admiral Fallon has exhibited a keen understanding of political dynamics, successfully building renewed military-to-military relationships with China and Indonesia, two of the most important countries in the Pacific. His demonstrated ability in this regard will serve this Nation well when dealing with the complex politics of the Persian Gulf and understanding the interactions between the use of force and political dynamics in Iraq.

While the situation in Iraq will no doubt demand a large degree of his attention and time, the challenges in the CENTCOM area of responsibility (AOR) are diverse, difficult, and, at times, seemingly intractable. They're also of immense importance to the security of this Nation. The U.S. CENTCOM is the U.S. military's most challenging combatant command. The threats the U.S. faces in the CENTCOM AOR go far beyond Iraq and Afghanistan. Iran, Syria, Lebanon, Somalia, and the Horn of Africa, among other locations, also pose significant potential threats to the United States. As the top military commander in this unstable region of the world, Congress and the President will be relying heavily on Admiral Fallon's advice.

The challenges in the CENTCOM AOR are complex and inter-related. As the Iraq Study Group stated, Iraq cannot be addressed effectively in isolation from other major regional issues, interests, and unresolved conflicts. His predecessor in the position to which Admiral Fallon has been nominated, General Abizaid, testified to this committee on August 3, 2006, saying, "Iraq sits at the center of the broader regional problem." General Abizaid made a similar point in December, when he said, "You have to internationalize the problem. You have to attack it diplomatically, geostrategically. You can't just apply a microscope on a particular problem in downtown

Baghdad and a particular problem in downtown Kabul and say that, somehow or another, if you throw enough military forces at it, then you're going to solve the broader issues in the region of extremism."

This broader struggle against violent extremism extending throughout the region poses a significant challenge for the next Commander of U.S. CENTCOM. Ambassador John Negroponte, the Director of the National Intelligence (DNI), testified before the Senate Select Committee on Intelligence that al Qaeda remains the greatest terrorist threat to our security interests and those of our allies. He said that al Qaeda is operating from secure hideouts in Pakistan, developing stronger operational relationships that radiate throughout the Middle East, Northern Africa, and Europe. Ambassador Negroponte has also warned of the growing shadow of Iranian influence in the Middle East region. Iranian support for Shia militias in Iraq, their backing of Hezbollah in Lebanon, possible Iranian influence with Shiites in western Afghanistan, and Iran's ongoing pursuit of a nuclear capability all pose risks to regional security and to international security. The next CENTCOM Commander will need to provide straightforward, independent advice on the most effective course of action for deterring Iran's attempts to acquire nuclear weapons and to dominate its neighbors, and the likely consequences of escalating tensions with Iran.

Syria also poses a challenge to security in the region. Recently renewed violence in Lebanon is yet another example of the negative impact that Syria, as well as Iran, appears to be having on stability in the region.

Over the last month, the CENTCOM footprint in Djibouti has gone from largely unknown to the newest public front in the global war on terror. Two recent air strikes by AC-130 gunships in southern Somalia have highlighted a depth of U.S. concern for the potential impact of threats emanating from a highly unstable failed state. DNI Negroponte, in fact, in testimony before the House Select Committee on Intelligence, said that al Qaeda remains determined to exploit the turmoil in Somalia.

But, of course, the two great threats, Afghanistan and Iraq, are what we'll probably spend most of our time on this morning and what Admiral Fallon will be spending, no doubt, most of his time on. The rising threat of a resurgent Taliban and al Qaeda in Afghanistan: over the past year, there's been a dramatic rise in violence, particularly in the southern and eastern regions of the country, and military experts anticipate a spring offensive by the Taliban that is likely to be even more violent. International efforts to combat opium production, a major source of insurgent funding, are failing, with opium production in Afghanistan at record levels. U.S. and the North Atlantic Treaty Organization (NATO) commanders in Afghanistan have indicated that additional troops are needed for the mission; and yet, the NATO-led International Security Assistance Force (ISAF) remains about 15 percent short of the troop and equipment levels that NATO leaders have agreed to provide. In addition, ISAF operations are hindered by national caveats imposed by some NATO members on the movement or use of their troops in theater. The next CENTCOM Commander will have to

work to overcome these challenges, and others, to ensure success in Afghanistan.

The most daunting challenge will be Iraq. Admiral Fallon will be called upon to execute the President's new strategy in Iraq. President Bush's new approach is predominantly a military strategy, although Prime Minister Maliki himself has said that the only solution is a political solution, and that's a sentiment that was expressed, as well, by our current top commanders, General George Casey and General Abizaid.

Admiral Fallon will have to determine how to pressure Iraqi political leaders to make the political compromises essential to a political solution. It will be most interesting hearing whether he intends to do so; and, if so, how. The Iraqi leaders made commitments about modifications to their constitution, taking over responsibility for security, only to break those commitments; and, so far, without consequences.

Admiral, we again thank you for your tremendous devotion to this Nation, and your service to our Nation. We thank your family, as well, for their support.

I now call upon Senator McCain.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you very much, Mr. Chairman.

I join the chairman in congratulating you, Admiral Fallon, on your nomination in this very important responsibility and in these very difficult times. You bring nearly 4 decades of military experience to the challenge America faces, and obviously your performance at PACOM is the reason why you are here before us today and taking on these new responsibilities.

I think the chairman has covered the challenges that we face, and, while I would just like to re-emphasize, in Afghanistan, General Karl Eikenberry said, on January 16, "It's going to be a violent spring, and we're going to have violence into this summer." Obviously our attention is focused on Iraq, but I think that it's very clear that there's going to be a very difficult time in Afghanistan very soon. One of the areas that you are going to need to work on is to get our allies to participate, not only in numbers, but also in terms of mission. Many of our allies who are there in Afghanistan are so restricted in their activities that they are far from as useful as they can be.

On January 10, the President proposed a new strategy for Iraq that has economic, diplomatic, and military components. We all have a new team of Secretary of Defense, senior military commanders, and a new Ambassador in Iraq. These are positive developments in a situation that can best be described as dire. This war has been mishandled. No one doubts that mistakes have been made in Iraq, and no one disagrees that the consequences of a failed state there are potentially catastrophic.

Admiral Fallon, the chairman will ask you one of the routine questions that we ask nominees to positions of higher command, and that is, "If asked your personal opinion, you will give a candid assessment." I have to tell you, this committee did not get candid assessments in the past. I view that with deep regret, because I

think the American people and their representatives deserved better.

I want you to emphatically assure Chairman Levin when he asks you that question, that you will, indeed, give us your candid and best assessment of the situation. Too often, administration officials came before this committee and the American people and painted a rosy scenario, when it was not there. Yesterday, you and I, and Senator Clinton, were in San Antonio, and one of the most moving experiences of my life was to watch these young, brave soldiers who have been so badly injured and made such enormous sacrifice before us in that audience. We owe them more and better leadership and a better strategy than we have provided them with in the past, Admiral.

This is probably our last opportunity, this change in strategy, to salvage a very difficult situation. I hope you know, and will tell this committee, how difficult and arduous this task will be because of the hole that we have dug for ourselves, to a very large degree.

I, again, congratulate you. We look forward to working with you. I don't think we can have a better person to fill this position of enormous responsibility.

I thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Chairman LEVIN. Now, a quorum is present, we're going to take this opportunity to consider the committee funding resolution and the committee rules.

The funding resolution is consistent with, and follows, the guidelines which have been stipulated in a January 18 letter from the Chairman and Ranking Member of the Rules Committee and the Joint Leadership Agreement on Committee Funding of January 12. It has been reviewed by majority and minority staff. I understand it is acceptable to everybody.

Is there a motion to favorably report the funding resolution?

Senator KENNEDY. So moved.

Chairman LEVIN. Second?

Senator REED. Second.

Chairman LEVIN. All in favor, say aye. [A chorus of ayes.]

The resolution is agreed to.

On the rules, the proposed committee rules are identical to the committee rules from the 109th Congress, but for a single change. The Senate Rules provide that not less than one-third of the members of a committee constitute a quorum for the purpose of doing business. Because our committee has increased in size from 24 to 25 members, the proposed rules have been changed to reflect a quorum of 9 members rather than 8. Otherwise, these rules remain the same as they were in the 109th Congress.

They have been reviewed by majority and minority staff. I understand they are acceptable to everybody.

Is there a motion to approve the proposed rules?

Senator KENNEDY. So moved.

Chairman LEVIN. Second?

Senator REED. Second.

Chairman LEVIN. All in favor, say aye. [A chorus of ayes.]

The rules are approved.

110TH CONGRESS
1ST SESSION

S. RES.

Authorizing expenditures by the Committee on Armed Services.

IN THE SENATE OF THE UNITED STATES

Mr. LEVIN submitted the following resolution; which was referred to the
Committee on

RESOLUTION

Authorizing expenditures by the Committee on Armed
Services.

1 *Resolved*, That in carrying out its powers, duties, and
2 functions under the Standing Rules of the Senate, in ac-
3 cordance with its jurisdiction under rule XXV of such
4 rules, including holding hearings, reporting such hearings,
5 and making investigations as authorized by paragraphs 1
6 and 8 of rule XXVI of the Standing Rules of the Senate,
7 the Committee on Armed Services is authorized from
8 March 1, 2007, through September 30, 2007; October 1,
9 2007, through September 30, 2008; and October 1, 2008,
10 through February 28, 2009, in its discretion (1) to make
11 expenditures from the contingent fund of the Senate, (2)

1 to employ personnel, and (3) with the prior consent of the
2 Government department or agency concerned and the
3 Committee on Rules and Administration, to use on a reim-
4 bursable or nonreimbursable basis the services of per-
5 sonnel of any such department or agency.

6 SEC. 2. (a) The expenses of the Committee on Armed
7 Services for the period March 1, 2007, through September
8 30, 2007, under this Resolution shall not exceed
9 \$4,073,254, of which amount—

10 (1) not to exceed \$75,000 may be expended for
11 the procurement of the services of individual consult-
12 ants, or organizations thereof (as authorized by sec-
13 tion 202(i) of the Legislative Reorganization Act of
14 1946, as amended); and

15 (2) not to exceed \$30,000 may be expended for
16 the training of the professional staff of such com-
17 mittee (under procedures specified by section 202(j)
18 of the Legislative Reorganization Act of 1946).

19 (b) For the period October 1, 2007, through Sep-
20 tember 30, 2008, expenses of the Committee on Armed
21 Services under this Resolution shall not exceed
22 \$7,139,800, of which amount—

23 (1) not to exceed \$80,000 may be expended for
24 the procurement of the services of individual consult-
25 ants, or organizations thereof (as authorized by sec-

1 tion 202(i) of the Legislative Reorganization Act of
2 1946, as amended); and

3 (2) not to exceed \$30,000 may be expended for
4 the training of the professional staff of such com-
5 mittee (under the procedures specified by section
6 202(j) of the Legislative Reorganization Act of
7 1946).

8 (c) For the period October 1, 2008, through Feb-
9 ruary 28, 2009, expenses of the Committee on Armed
10 Services under this Resolution shall not exceed
11 \$3,032,712, of which amount—

12 (1) not to exceed \$50,000 may be expended for
13 the procurement of the services of individual consult-
14 ants, or organizations thereof (as authorized by sec-
15 tion 202(i) of the Legislative Reorganization Act of
16 1946, as amended); and

17 (2) not to exceed \$30,000 may be expended for
18 the training of the professional staff of such com-
19 mittee (under the procedures specified by section
20 202(j) of the Legislative Reorganization Act of
21 1946).

22 SEC. 3. Expenses of the Committee on Armed Serv-
23 ices under this Resolution shall be paid from the contin-
24 gent fund of the Senate upon vouchers approved by the

1 chairman of the committee, except that vouchers shall not
2 be required—

3 (1) for the disbursement of salaries of employ-
4 ees paid at an annual rate;

5 (2) for the payment of telecommunications pro-
6 vided by the Office of the Sergeant at Arms and
7 Doorkeeper, United States Senate;

8 (3) for the payment of stationery supplies pur-
9 chased through the Keeper of the Stationery, United
10 States Senate;

11 (4) for payments to the Postmaster, United
12 States Senate;

13 (5) for the payment of metered charges on
14 copying equipment provided by the Office of the Ser-
15 geant at Arms and Doorkeeper, United States Sen-
16 ate;

17 (6) for the payment of Senate Recording and
18 Photographic Services; or

19 (7) for payment of franked and mass mail costs
20 by the Sergeant at Arms and Doorkeeper, United
21 States Senate.

22 SEC. 4. There are authorized such sums as may be
23 necessary for agency contributions related to the com-
24 pensation of employees of the Committee on Armed Serv-
25 ices from March 1, 2007, through September 30, 2007;

1 October 1, 2007, through September 30, 2008; and Octo-
2 ber 1, 2008, through February 28, 2009, to be paid from
3 the Appropriations account for “EXPENSES OF INQUIRIES
4 AND INVESTIGATIONS”.

Committee on Armed Services
Rules of Procedure

1. **REGULAR MEETING DAY.** The Committee shall meet at least once a month when Congress is in session. The regular meeting days of the Committee shall be Tuesday and Thursday, unless the Chairman, after consultation with the Ranking Minority Member, directs otherwise.
2. **ADDITIONAL MEETINGS.** The Chairman, after consultation with the Ranking Minority Member, may call such additional meetings as he deems necessary.
3. **SPECIAL MEETINGS.** Special meetings of the Committee may be called by a majority of the members of the Committee in accordance with paragraph 3 of Rule XXVI of the Standing Rules of the Senate.
4. **OPEN MEETINGS.** Each meeting of the Committee, or any subcommittee thereof, including meetings to conduct hearings, shall be open to the public, except that a meeting or series of meetings by the Committee or a subcommittee thereof on the same subject for a period of no more than fourteen (14) calendar days may be closed to the public on a motion made and seconded to go into closed session to discuss only whether the matters enumerated below in clauses (a) through (f) would require the meeting to be closed, followed immediately by a record vote in open session by a majority of the members of the Committee or subcommittee when it is determined that the matters to be discussed or the testimony to be taken at such meeting or meetings:
 - (a) will disclose matters necessary to be kept secret in the interests of national defense or the confidential conduct of the foreign relations of the United States;
 - (b) will relate solely to matters of Committee staff personnel or internal staff management or procedure;
 - (c) will tend to charge an individual with a crime or misconduct, to disgrace or injure the professional standing of an individual, or otherwise to expose an individual to public contempt or obloquy or will represent a clearly unwarranted invasion of the privacy of an individual;
 - (d) will disclose the identity of any informer or law enforcement agent or will disclose any information relating to the investigation or prosecution of a criminal offense that is required to be kept secret in the interests of effective law enforcement;
 - (e) will disclose information relating to the trade secrets or financial or commercial information pertaining specifically to a given person if:
 - (1) an Act of Congress requires the information to be kept confidential by Government officers and employees; or
 - (2) the information has been obtained by the Government on a confidential basis, other than through an application by such person for a specific Government financial or other benefit, and is required to be kept secret in order to prevent undue injury to the competitive position of such person; or
 - (f) may divulge matters required to be kept confidential under other provisions of law or

Government regulations.

5. **PRESIDING OFFICER.** The Chairman shall preside at all meetings and hearings of the Committee except that in his absence the Ranking Majority Member present at the meeting or hearing shall preside unless by majority vote the Committee provides otherwise.

6. **QUORUM.** (a) A majority of the members of the Committee are required to be actually present to report a matter or measure from the Committee. (See Standing Rules of the Senate 26.7(a)(1)).

(b) Except as provided in subsections (a) and (c), and other than for the conduct of hearings, nine members of the Committee, including one member of the minority party; or a majority of the members of the Committee, shall constitute a quorum for the transaction of such business as may be considered by the Committee.

(c) Three members of the Committee, one of whom shall be a member of the minority party, shall constitute a quorum for the purpose of taking sworn testimony, unless otherwise ordered by a majority of the full Committee.

(d) Proxy votes may not be considered for the purpose of establishing a quorum.

7. **PROXY VOTING.** Proxy voting shall be allowed on all measures and matters before the Committee. The vote by proxy of any member of the Committee may be counted for the purpose of reporting any measure or matter to the Senate if the absent member casting such vote has been informed of the matter on which the member is being recorded and has affirmatively requested that he or she be so recorded. Proxy must be given in writing.

8. **ANNOUNCEMENT OF VOTES.** The results of all roll call votes taken in any meeting of the Committee on any measure, or amendment thereto, shall be announced in the Committee report, unless previously announced by the Committee. The announcement shall include a tabulation of the votes cast in favor and votes cast in opposition to each such measure and amendment by each member of the Committee who was present at such meeting. The Chairman, after consultation with the Ranking Minority Member, may hold open a roll call vote on any measure or matter which is before the Committee until no later than midnight of the day on which the Committee votes on such measure or matter.

9. **SUBPOENAS.** Subpoenas for attendance of witnesses and for the production of memoranda, documents, records, and the like may be issued, after consultation with the Ranking Minority Member, by the Chairman or any other member designated by the Chairman, but only when authorized by a majority of the members of the Committee. The subpoena shall briefly state the matter to which the witness is expected to testify or the documents to be produced.

10. **HEARINGS.** (a) Public notice shall be given of the date, place and subject matter of any hearing to be held by the Committee, or any subcommittee thereof, at least 1 week in advance of such hearing, unless the Committee or subcommittee determines that good cause exists for beginning such hearings at an earlier time.

(b) Hearings may be initiated only by the specified authorization of the Committee or subcommittee.

(c) Hearings shall be held only in the District of Columbia unless specifically authorized to be held elsewhere by a majority vote of the Committee or subcommittee conducting such hearings.

(d) The Chairman of the Committee or subcommittee shall consult with the Ranking Minority Member thereof before naming witnesses for a hearing.

(e) Witnesses appearing before the Committee shall file with the clerk of the Committee a written statement of their proposed testimony prior to the hearing at which they are to appear unless the Chairman and the Ranking Minority Member determine that there is good cause not to file such a statement. Witnesses testifying on behalf of the Administration shall furnish an additional 50 copies of their statement to the Committee. All statements must be received by the Committee at least 48 hours (not including weekends or holidays) before the hearing.

(f) Confidential testimony taken or confidential material presented in a closed hearing of the Committee or subcommittee or any report of the proceedings of such hearing shall not be made public in whole or in part or by way of summary unless authorized by a majority vote of the Committee or subcommittee.

(g) Any witness summoned to give testimony or evidence at a public or closed hearing of the Committee or subcommittee may be accompanied by counsel of his own choosing who shall be permitted at all times during such hearing to advise such witness of his legal rights.

(h) Witnesses providing unsworn testimony to the Committee may be given a transcript of such testimony for the purpose of making minor grammatical corrections. Such witnesses will not, however, be permitted to alter the substance of their testimony. Any question involving such corrections shall be decided by the Chairman.

11. NOMINATIONS. Unless otherwise ordered by the Committee, nominations referred to the Committee shall be held for at least seven (7) days before being voted on by the Committee. Each member of the Committee shall be furnished a copy of all nominations referred to the Committee.

12. REAL PROPERTY TRANSACTIONS. Each member of the Committee shall be furnished with a copy of the proposals of the Secretaries of the Army, Navy, and Air Force, submitted pursuant to 10 U.S.C. 2662 and with a copy of the proposals of the Director of the Federal Emergency Management Agency, submitted pursuant to 50 U.S.C. App. 2285, regarding the proposed acquisition or disposition of property of an estimated price or rental of more than \$50,000. Any member of the Committee objecting to or requesting information on a proposed acquisition or disposal shall communicate his objection or request to the Chairman of the Committee within thirty (30) days from the date of submission.

13. LEGISLATIVE CALENDAR. (a) The clerk of the Committee shall keep a printed calendar for the information of each Committee member showing the bills introduced and referred to the Committee and the status of such bills. Such calendar shall be revised from time to time to show pertinent changes in such bills, the current status thereof, and new bills introduced and referred to

the Committee. A copy of each new revision shall be furnished to each member of the Committee.

(b) Unless otherwise ordered, measures referred to the Committee shall be referred by the clerk of the Committee to the appropriate department or agency of the Government for reports thereon.

14. Except as otherwise specified herein, the Standing Rules of the Senate shall govern the actions of the Committee. Each subcommittee of the Committee is part of the Committee, and is therefore subject to the Committee's rules so far as applicable.

15. POWERS AND DUTIES OF SUBCOMMITTEES. Each subcommittee is authorized to meet, hold hearings, receive evidence, and report to the full Committee on all matters referred to it. Subcommittee chairmen, after consultation with Ranking Minority Members of the subcommittees, shall set dates for hearings and meetings of their respective subcommittees after consultation with the Chairman and other subcommittee chairmen with a view toward avoiding simultaneous scheduling of full Committee and subcommittee meetings or hearings whenever possible.

Chairman LEVIN. Admiral Fallon, welcome again and please proceed.

STATEMENT OF ADM WILLIAM J. FALLON, USN, FOR RE-APPOINTMENT TO THE GRADE OF ADMIRAL AND TO BE COMMANDER, UNITED STATES CENTRAL COMMAND

Admiral FALLON. Mr. Chairman, Senator McCain, Senator Warner, Senator Kennedy, and distinguished members of the committee, good morning, and thank you for this opportunity to appear before you.

I'm honored by the confidence of the President and the Secretary of Defense in nominating me for this position, but I am under no illusion regarding the magnitude of the tasks and the challenges we face in this region of the world. From Beirut to Kashmir, conflict and areas of instability abound; yet, as you well know, this region, with some 630 million people, the cradle of Western Civilization, is of critical importance to our Nation and the world.

Last week, General David Petraeus provided a detailed evaluation of the situation in Iraq. I concur in his assessment, and I recognize this as the top priority for CENTCOM attention. The situation in Iraq is serious and clearly in need of new and different actions.

Earlier this month, President Bush outlined a new way forward for the United States in Iraq. General Petraeus described refocusing on the Iraqi population as the center of attention for security.

The situation in Iraq will not be resolved solely through military means. Security is but one aspect of what must be a comprehensive effort to address not only this issue, but economic development and a reinvigorated participatory political process in Iraq by Iraqis. In developing these new initiatives, we will need major and sustained assistance from other government agencies, and I would welcome volunteers, particularly in the areas of political and economic development.

The situation in Afghanistan, although much improved from the days of Taliban rule, is fragile. The Government of Afghanistan, with ISAF support, has made significant progress, but faces a resurgence of Taliban activity, particularly in the southern part of the country. Other security challenges include Lebanon, the Horn

of Africa, with several nations facing internal unrest and insurgent activity. Iranian support for terrorism and sectarian violence beyond its borders and its pursuit of nuclear capability is destabilizing and troubling.

In addressing these and other challenges in the region, I would, if confirmed, solicit the opinions and suggestions of our allies and partners in the region and the world. There is no doubt that other nations in the region could be helpful with this situation in Iraq.

I truly believe that most people in Afghanistan and Iraq seek peace and an opportunity to enjoy a decent life for themselves and their families. It has been my experience in the Asia-Pacific region that progress in advancing the aspirations and desires of people require stability and security. American military forces and their civilian counterparts have been performing superbly in their efforts to provide these essential needs in Iraq, Afghanistan, and elsewhere. I am humbled by their service, dedication, courage, and sacrifice. It would be my high honor to serve in CENTCOM with these great Americans and our coalition partners.

I believe the situation in Iraq can be turned around. But time is short. There are no guarantees, but you can depend on me for my best effort. I pray for God's help, and I draw confidence in the indomitable spirit and skilled dedication of our service men and women.

Thank you for your support.

Chairman LEVIN. Admiral, thank you.

Now, the standard questions which Senator McCain has referred to.

Have you adhered to applicable laws and regulations governing conflicts of interest?

Admiral FALLON. Yes, sir.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Admiral FALLON. I have not.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record and hearings?

Admiral FALLON. I will.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Admiral FALLON. I will.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Admiral FALLON. They will.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify, upon request, before this committee?

Admiral FALLON. I do.

Chairman LEVIN. This is the question which Senator McCain referred to; it means a great deal to us. We're deadly serious about it. We are about all the questions, but this one really becomes more and more important as we look at the recent history. Do you agree to give your personal views, when asked before this committee to do so, even if those views differ from the administration in power?

Admiral FALLON. Yes, sir, I do.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good-faith delay or denial in providing such documents?

Admiral FALLON. Yes, sir.

Chairman LEVIN. Thank you, Admiral. For starters, we'll do a 6-minute round of questions on an early-bird basis.

Admiral, there is not just a question of 21,000 troops that are going to go to Iraq under the President's new policy, but there's also a different strategy for those troops. They will be holding Baghdad neighborhoods, not just inserted, not just clearing, but then remaining and holding neighborhoods in that city, presumably with Iraqi units, if they do what they've not done so far, which is to carry out their commitments to move into neighborhoods. They will be operating under 30-or-so mini bases in platoon- or company-sized units.

How do you foresee preventing incidences such as recently happened in Karbala, where five American soldiers were abducted and then killed while in a meeting with Iraqi security forces in a supposedly secure compound? In other words, our troops are going to be inserted into the most difficult areas imaginable, right into the neighborhoods, right in the face of the Iraqis. How are we going to avoid the increased risks that are created by that kind of face-to-face presence?

Admiral FALLON. Senator, there's clearly going to be an increased risk in this area. I've spoken with General Petraeus. I have a lot to learn, much research to do, and a lot of dialogue yet to go on so that I have a better understanding of the detail of his intentions. I believe that he's going to need some time, when he gets on the ground out there, to sort this out.

But it seems pretty obvious to me that what we have been doing has not been working. We have not been getting the results that we desire, and we clearly have to do something different. There is a significant body of evidence that indicates that approaching an insurgency such as we are facing now—and that wasn't the case several years ago in Iraq, but it's clearly the case now—there's a body of evidence that indicates that to be successful in this endeavor, historically you've had to get in amongst the population to convince them that you really care about them and that you are able to provide security on-scene rather than just passing through an area.

I can give you my experience in the Asia-Pacific region. We have some ongoing insurgencies in Southeast Asia, as you're well aware. In the Philippines, there's been significant progress, particularly recently. Our approach to action in the Philippines to combat the insurgencies that are ongoing there has been multipronged; in fact, very similar to what has been outlined for us to pursue in Iraq. It involves being down with the armed forces with whom we're working. In the Pacific, it's with the Philippine armed forces. In Iraq, we're going to have to get with theirs. It involves getting our people in front of the population so that they can see that they're engaged and give them confidence.

Chairman LEVIN. Didn't we intentionally keep our people out, away from the smaller units?

Admiral FALLON. In the Philippines, we have kept our people away from those small units going into combat, but an essential part of the security desire down there was to, in fact, engage with the population in a broad base of humanitarian engineering activities, so they actually see our people regularly.

Chairman LEVIN. Was there an interface as directly, as intimately, in the Philippines with the population, as it true in Baghdad?

Admiral FALLON. The situation is not nearly as dangerous, obviously, in Sulu as it is in Baghdad.

Chairman LEVIN. General Abizaid testified in November that he has talked with all the divisional commanders, with General Casey and General Martin Dempsey. They all talked together. He asked them whether or not, if we brought in more American troops now, does it add considerably to our ability to achieve success in Iraq? They all said no. He went on to explain—and this is General Abizaid, just a few months ago—"It's easy for the Iraqis to rely upon us to do this work. I believe that more American forces prevent the Iraqis from doing more, from taking more responsibility for their own future."

Have you spoken with General Abizaid?

Admiral FALLON. I've spoken with General Abizaid, but not on this subject.

Chairman LEVIN. Do you agree with his testimony on that subject?

Admiral FALLON. I don't know, Senator, but I'll give you my opinion and assessment. What we've been doing is not working, and we need to be doing, it seems to me, something different. General Petraeus has outlined, in extensive detail before you, a proposal to try to enhance stability and security in Baghdad and the rest of Iraq, and I would be anxious, if confirmed, to work with him to try and implement this. General Petraeus has, in our discussions, made very clear to me that this will require more troops. I don't know how many troops. Frankly, I aim to find out and have my own opinions.

Chairman LEVIN. Thank you. One of the issues on the number of troops was the testimony that we've received about off-ramps, that, as these brigades move in, perhaps one a month, or whatever the rate turns out to be, that there are off-ramps, that we don't have to continue that flow, if the Iraqis do not carry out their commitments.

Stephen Hadley, the National Security Advisor, said U.S. force increases will be "pay-as-you-go, depending a lot on the Iraqis performing."

Secretary Gates said there's plenty of opportunity before many of the 21,000 additional troops arrive to evaluate, "whether the Iraqis are fulfilling their commitments to us."

General Pace told us the Iraqis must "put action behind their words. Our flow of forces will allow us to modify what we do next."

Now, what is the policy, do you know, in terms of off-ramps? Is this policy subject to change, as our brigades go in, if the Iraqis are not carrying out their commitments, as we've been assured before

this committee? Even General Petraeus, when he was here, said that he wanted all five brigades in Iraq as quickly as possible. He did say that. But then, he said their flow, not “would be,” could be tied to Iraqi military, political, or economic progress. What do you understand the policy to be? Could this flow change? Could it be slowed down, stopped, if the Iraqis do not carry out the commitment? My operative word there is, “could it” be slowed down?

Admiral FALLON. Senator, I have not gotten into the details of these plans. I have a full-time job in PACOM, and I’ve tried to stay away from the details of CENTCOM until such time as I might be confirmed; then I intend to dive into it.

General Petraeus, in our meeting before he left, indicated that he thought he needed these additional troops. I do not know the details of how he plans to use them. I’m sure he’s going to have to consult with his generals on the ground once he gets into position, and then figure it out. I’d be happy to take that question and come back to you, if it’s appropriate, at a later time.

Chairman LEVIN. If you would let us know, for the record, what is your understanding specifically on that issue, we would appreciate it.

[The information referred to follows:]

There is no policy on troop deployment and redeployment in correlation to Iraqi military, political, and economic progress/failure. Troop deployments and redeployments are based upon missions (requirements, needs, and conditions), the situation, the enemy, commander recommendations, and requests.

Chairman LEVIN. I’m surprised that you don’t have that understanding going in, frankly. This is a policy issue which has been decided, presumably, by the policymakers.

Admiral FALLON. Yes, but I’m——

Chairman LEVIN. Nonetheless, if you say you don’t know the policy in that regard, we have to take that as your answer.

Admiral FALLON. If I could, just a comment. I’m not sure that you can have a policy plan ahead of time that would dictate the intricacies of what forces move into what areas for what tasks.

Chairman LEVIN. I’m sure that’s not true, either, but you could have a policy which says that we can modify this as these brigades show up if the Iraqis have not carried out their commitments. Could modify.

Admiral FALLON. Sure.

Chairman LEVIN. That’s certainly, it seems to me, a credible policy.

Admiral FALLON. Seems pretty reasonable to me, sir. Obviously, as we’re making modifications to what we’ve been doing in Iraq now, I would expect we’d do the same thing in the future.

Chairman LEVIN. Senator McCain.

Admiral FALLON. Thank you.

Senator MCCAIN. Thank you, Mr. Chairman.

I want to go back to Afghanistan for a second. We have plans to increase our troop strength there by some 2,500. Have you gotten into this issue enough to have a handle on how serious this spring is going to be and what’s going to be required?

Admiral FALLON. No, Senator, I’ve been watching from a distance, just reading news reports. I have not talked with General

Eikenberry about this, although I've asked to have him come back through the Pacific, on his way back home, to get a better insight.

Senator MCCAIN. What is your degree of confidence that the Iraqi Government and military are up to the task that we are now embarking on in this new strategy?

Admiral FALLON. Critical question, particularly in the political arena, and I don't have an assessment of that. I have not personally met any of the civilian political leadership in Iraq. I do have some knowledge of the Iraqi military, albeit just a slice, from a couple of visits to PACOM base forces that are serving in Iraq. I was out there last month to see some of them. My initial assessment is that there are some good troops and some that need a lot of work. There are some leaders that have impressed me as people that understood and "got it," and were effective, and others that are probably less so. I would speculate—a danger here—that that's not a dissimilar situation throughout the country.

The challenge I see is identifying those leaders that are going to be effective, those units that are trained, or can be trained, to do what needs to be done and to encourage them to pick up the load. If this is not successful, then we're going to have problems.

But all of this is a backdrop to the kind of political backbone and tough decisionmaking that I believe is required of the leadership in Baghdad.

I think, to be fair to them, they have a tough row to hoe. This is not like, as you know much better than I, our country. In my reading, going back to 2003, we have hundreds of good ideas of things that we would like to see in Iraq that are more reflective of the kind of society and process that we enjoy here. It seems to me that we probably erred in our assessment of the ability of these people to take on all of these tasks at the same time. It seems to me that one of the things in the back of my mind that I'd like to get answered is to meet with the people that have been working this issue, particularly our ambassadors, our diplomats, to get an assessment of what's realistic and what's practical. Maybe we ought to redefine the goals here a bit and do something that's more realistic, in terms of getting some progress, and then maybe take on the other things later.

Senator MCCAIN. Again, we would like a realistic assessment of the situation. On numerous occasions in the past, witnesses have told us that the training and equipping of the Iraqi military was going just fine.

Admiral FALLON. One of the challenges—and this is not unique to the situation in Iraq; I think we face it in all aspects of our lives—we tend to assess things in ways that are—you used the comment, or I think Senator Levin used the "rosy" word before—in terms that will not hurt people's feelings, that will—whatever. The fact of the matter is, of all places, we need candid assessments, and you'll get them from me.

Senator MCCAIN. I believe, Admiral, that it will be difficult, in the short-term, to determine the progress of the military side of this equation. I think it's going to be difficult. It has taken us 3½ years, at least, to get into the dire situation that we are in today. But I do agree with Senator Levin that there are certain benchmarks that we could expect the Iraqi Government to comply with,

such as disarming individual militias, the number of Iraqi military that will actually be deployed in Baghdad alongside ours. As you may remember, in the past they promised six brigades, and only two battalions showed up. Also legislation to ensure that the oil resources benefit the Sunni, as well as the Shia. In other words, I think that we could know fairly soon whether we are going to have an Iraqi government that is truly committed to this overall process. Would you agree with that?

Admiral FALLON. Senator, I think there's an obvious need to have actions taken by the Government of Iraq to get on their—shouldn't use the word "timeline," because I've never actually seen a timeline, but they have stated a number of these objectives; you've enumerated a couple of these now—and it's pretty clear to me that they have to take these steps or we're not going to be effective in the security business. It seems to me that, again, from my glancing visit through that country last month, there is a lack of confidence among the other sects—other than the Shia—within this country, of the desire of the government to actually address issues in the entire country. So, it seems to me—again, from a distance; and this is politics—that an essential foundation to making progress in this country is for that government to step up and start making some of these tough decisions. I recognize it's difficult. There's a lot of baggage in the legacy, which you're well aware of. But unless this begins to happen, I doubt that we're going to be effective in the military arena.

Senator MCCAIN. I read, with some interest, the remarks of the Iranian Ambassador, the last few days, and there are many who think we ought to begin "a dialogue" with the Iranians. Do you have any view on that issue?

Admiral FALLON. Senator, I think that Iranian activity, particularly regarding Iraq, has not been helpful, to date. I would welcome steps by the Iraqi government that would indicate that they are interested in long-term—

Senator MCCAIN. You mean the Iranian Government.

Admiral FALLON. I'm sorry, Iranian Government—that would indicate they really are interested in helping the situation. To date, I haven't seen that. I think we need to see some of those kinds of steps, again, then over to the political and diplomatic arena to see what can be done.

Senator MCCAIN. I thank you, Admiral.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Next would be Senator Clinton.

Senator CLINTON. Thank you, Mr. Chairman.

Welcome, Admiral, and welcome to your family. We are very pleased to have you before this committee, and I thank you for your years of distinguished service to our country.

I know that you are in the process of confirmation, and that it may be difficult to give specific answers to some of these questions, because you're not yet confirmed, and you haven't had the opportunity to really get a firsthand view for yourself. But, if I could, Admiral, one of the issues that concerns me, and, I think, other members of this committee, regards the lack of unity of command for the Iraqi and U.S. forces that will be operating in and around

Baghdad. In fact, we've heard, from retired General Jack Keane and General Petraeus, their concerns about what this means. I'm having trouble getting to the bottom of this, because General Petraeus sounded somewhat surprised about it and reflected some of his concerns, and General Keane, who apparently was very active in helping to devise the plan the President has put forth, also said that it was very dangerous and frustrating not to have unity of command.

Can you shed any light on this decision for our committee?

Admiral FALLON. Senator, not yet, but this is clearly a very significant, critical item. We have to know exactly who's reporting to whom, for what purposes. I would expect that General Petraeus will have this at the top of his list when he gets out there. There are ways to do this but we have to make sure that the lines are straight if we're going to be effective.

Senator CLINTON. I would appreciate that. I welcome the openness that both you and General Petraeus have exhibited to the committee, and I hope that we could hear from both of you in short order about this. I hope we can hear that it has been fixed, because some of these stories coming out of the fighting on Haifa Street, the recent large engagement near Najaf, have certainly raised serious questions about the Iraqi military's capacity to take actions which we thought they were capable of. Certainly, we don't want to put our young men and women into harm's way with that level of confusion.

Second, Admiral, I asked General Petraeus—this was really more of a plea; some have characterized it as a prayer—that we not send our new troops into Baghdad without being fully equipped and ready. There have been a number of articles in the last week, and there is one today in the Washington Post, about how equipment for the added troops is lacking. We are short thousands of vehicles, armor kits, and other equipment. We do not have the capacity to quickly turn around that equipment. In fact, Lieutenant General Speakes has said that we're going to have to be, pretty much improvising, trying to share equipment, which I find deeply troubling. I'm also concerned that the United States has agreed to sell 600 up-armored Humvees to Iraq this year for its security forces, and, again, quoting General Speakes, saying that "such sales better not be at the expense of the American soldier or marine." Again, Admiral, do you know anything yet about whether or not we're going to have the equipment for these additional combat brigades?

Admiral FALLON. Senator, I do not know the details of that. I can tell you that, in PACOM, there's been a request made for us to look at the equipment that we have in this region and to send some of it to the Middle East, equipment that might be appropriate to soldiers and marines that are headed in that direction.

I know, from my experience, that the units are not all equipped in the same manner, particularly the Army units, which have a diverse background. Some are light infantry, some are heavier, and they have different types and varieties of vehicles.

I found it interesting, from a professional side, when I was in Iraq, as I traveled around the country recently, to note the differences between the units. The thought occurred to me that it would be interesting—and I'd like to find out the answers of just

how one goes about using these different equipment sets in different situations—as we rotate troops from one area to another, how effective they are, and so forth. So, I have it in the back of my mind, and would like to take this up with General Petraeus to do an assessment of what essential things are necessary to put our people in the best possible position. We'll do that as soon as we get there.

Senator CLINTON. I appreciate that, Admiral, and I would hope, perhaps, that the committee would send a very clear message to Secretary Gates and the Pentagon that we want that assessment done as quickly as possible, and that whatever actions need to be taken in order to provide the necessary equipment be done so. I know every one of us doesn't want to hear stories about continuing lack of equipment costing American lives and injuries such as those we saw yesterday when we were both at San Antonio.

Finally, Admiral, this question about the diplomatic aspect of this assignment that you've undertaken is one that I'm very interested in, because we all know there's no military solution. There's no military solution in Iraq, and there's no military solution in Afghanistan. How do you see your role, and what tools do we have at our disposal, on the one hand, to try to assess and rein in Iranian influence in the region, and, on the other end of your AOR, to create better relations and working conditions between Pakistan and Afghanistan? Could you just briefly respond to those, please?

Admiral FALLON. Senator, very interesting area, I wouldn't presume to dive too deeply into this pool yet, because I don't know enough detail. But a couple of observations from the outside:

There's a lot that isn't being done. In fact, I see an awful lot of sitting, watching, by the neighborhood, and it's high time that changed. I would be very anxious to try to engage, and intend to engage, with our Department of State, Secretary Rice and her folks, to have a full understanding of this, and then maybe we can figure out, collectively, how to proceed.

Regarding Pakistan/Afghanistan, having been operating on the other side of the boundary, if you would, between theaters, I've had a chance to watch the Indian/Pakistan dynamic now for a couple of years. I see change, and it's for the better. I believe that this change could potentially be very helpful to the situation in Afghanistan, and perhaps even in Iraq, as Pakistan and India slowly are taking steps to reduce tension along the border in Kashmir.

By the way, it's pretty fascinating, and a shame for the world, I believe, to note that there are almost 1.5 million troops facing each other along this border. But steps are being taken in the right direction, and I think the potential to have tensions continue to ease ought to give us some opportunities to perhaps have the Paks do even more than they're doing. They've done a phenomenal amount in this war on terror, but I think things could be done that would be additionally helpful in Afghanistan. The Indian ties to Iran and their energy needs, and ties in other places in the region, I think, could potentially be exploited. I'll be anxious to talk with our State Department colleagues and to see what might be done in this area.

Thank you, Senator.

Chairman LEVIN. Thank you, Senator Clinton, and thank you, also, for raising the equipment issue. I just talked to Senator McCain, we will be sending a letter to the Secretary of Defense this afternoon the matter that you raise and some of the other equipment studies, the shortfall studies which have been forthcoming. So, thank you for raising that.

Admiral FALLON. Senator, if I could put a p.s. on the equipment thing, there's a reality today that this is a fast-moving issue, in that the enemy that we face, particularly in Iraq, is very adaptive, very skilled at observing and changing their tactics and procedures. So, equipment that was, we thought, pretty effective in protecting our troops just a matter of months ago is now being, in fact, challenged by some of the techniques and devices over there. I'm learning, as we go in, that this is a fast-moving ball game and we'll have to be adaptable to try to stay ahead of it. Thank you, sir.

Chairman LEVIN. That's fine, but I think the equipment that Senator Clinton's talking is equipment that we know is needed by the troops that are going in.

Admiral FALLON. I understand.

Chairman LEVIN. Thank you.

Senator Warner.

Senator WARNER. Thank you, Mr. Chairman.

Thank you, Admiral. Nice to meet with you again. I've had the privilege of working with you and knowing you for many years. I thank your family for joining you on this arduous task ahead of you.

I'd like to say just a word about General Abizaid. He served 3½ years in this position, came before this committee many times. There's been some suggestions that perhaps we have not, as a committee, received candid assessments from some of our witnesses, and I concur in that. But I think, in General Abizaid's case, he has been very forthcoming. I think he deserves a lot of credit—and his family—for that contribution that he made in this most difficult situation for these many years.

Clearly, in your testimony today and that of General Petraeus, each of you have distanced yourself from the plan, as announced by the President on January 20. That's understandable, because both of you had your respective jobs—you, in the Pacific; he, here in the United States—and the plan was largely drawn up by those individuals—from General Abizaid, General Casey, and others—in the current positions that they hold. Juxtaposed against that is your own comment to the effect that you see there's clear requirement for new and different actions.

Now, the team that put the plan together are now moving out, and you're moving in and being handed this plan. I just hope that you will exercise your authority and responsibility to the President and the Chairman of the Joint Chiefs of Staff to point out those areas in this plan which you feel needs flexibility, options that can be pursued other than the rigidity of just 20,000 new troops right into the face of sectarian violence. Some of us here on this committee, and others—a group of 10, bipartisan—have tried to respond to the President's request for suggestions, and we have provided those suggestions in the form of saying, “Mr. President, look at all options by which you may not need that full complement, and, Mr.

President, look carefully at the rules of engagement, such that we minimize the injection of the U.S. GI right into the crossfire of sectarian violence.”

We are reading about a successful operation, north of Najaf, where the Iraqi forces clearly, I think, took the lead and eliminated a substantial enemy. That’s the good news. The bad news is that fight was precipitated by religious quarrels between Iraqis, Sunni and Shia and others, that go back over a thousand years. Our group of 10, in making recommendations, simply say that the Iraqi forces, by virtue of their knowledge of the language, their knowledge of the culture, are far better qualified to try and go in and resolve that type of sectarian violence. I hope that you will take our suggestions in the spirit of not trying to embolden the enemy, but to conscientiously point out where we can take actions to save lives, and particularly those of our American GIs.

In no way do we try to cut forces, withdraw, set timetables. It’s simply, “Look at the options.” In there, we point out, also, the questions about the chain of command which was raised here by our colleague. I urge you to go back and look at the colloquy that I had with General Keane in this room last Friday in which we explored that very carefully. He, the former Vice Chief of the Army, clearly pointed out grave concerns that he and others have. I asked him, could he show any precedent whereby the United States forces, which always operated on a unified chain of command under American officers—have we ever tried to go into this joint operation, where there’s going to be Iraqi commander and American commander at the top and all the way down to the company level? We do not want fingerpointing if a action goes wrong between the American and the Iraqi, saying whose fault it was. That has to be clarified.

Finally, I point out, I think you have unique abilities to go into this very sensitive and equally important, if not greater important area, with regard to Iran. I support the President in his statements, of recent, of firmness of commitment to resolve that situation. But I say to you, drawn on the experience of how we maintained a ring of deterrence around the Soviet Union in the Cold War. I think the use of force in that situation is a very last resort. Should we not engage other countries in performing a ring of deterrence? Initially, that ring could be the age-old doctrine of seapower, what we call battleship diplomacy, the presence of our two carriers. Why should not the European nations send a ship or two to also add to the strength of the signal we’re trying to send to that country that we’re not going to permit them to go forward with nuclear power? I urge you to look at the history of NATO, its success in curtailing the Cold War, and use that as the initial steps to the extent that any military action should be used, because we have to curtail it. Does that have any interest or appeal to you, that concept?

Admiral FALLON. Senator, the whole idea is most appealing, because we have plenty to do right now with active combat operations ongoing in Iraq and Afghanistan. It’s clear to me that, to date, the Iranians have not been playing a constructive role in addressing any of these, and, in fact, are challenging us in other areas. I’ll be very anxious to work with our allies, friends, and colleagues around

the world, and open to any and every idea in how we might approach this situation.

Senator WARNER. I think it's important. I draw your attention to a New York Times article, of January 30, in which they say, "The administration says that European governments provided \$18 billion in loan guarantees for Iran in 2005." It's to their interest, as well as it is to the United States interest, to contain that country with regard to its aggressiveness and potentiality in building nuclear weapons.

My time is up.

Chairman LEVIN. Thank you, Senator Warner. As to the references made to benchmarks, I'm going to put in the record at this time a letter that Senator McCain and I wrote to Secretary Rice last week insisting that the benchmarks that the President referred to in his January 10 address to the Nation and that the Iraqi Government has agreed to be provided. If these benchmarks are not received by the end of today, Senator McCain and I will be consulting on what will be the next step to obtain these benchmarks. This is not something that you, Admiral, are going to be able to deal with. This isn't an assignment for you. I'm just saying publicly that these benchmarks now have been requested three times and have not been received. The letter, as well as earlier letters of mine, will be made part of the record.

Dear Madam Secretary:

The top priority for the coming months must be finding a way forward to change course in Iraq. U.S. policy must include urging the Iraqis to make the necessary political compromises, which only they can make, to preserve Iraq as a nation. Our military commanders have made clear there is no military solution; only a political solution can restore security in Iraq.

The Administration announced last month that Iraqi leaders had agreed to a timeline and benchmarks for a political process over the coming months. On October 25, 2006, President Bush stated that the Administration and the Iraqi Government were developing benchmarks for determining whether the "hard decisions necessary to achieve peace" were being made. Earlier, on October 24, 2006, Ambassador Zalmay Khalilzad stated that Iraqi leaders had agreed to a timeline for making the hard decisions on outstanding issues and that President Talibani had made those commitments public. According to Ambassador Khalilzad and General Casey, these included enactment of an oil law for sharing resources; a constitutional amendment on power-sharing that would guarantee democratic rights and equality to all Iraqis; reforming the de-Ba'athification Commission; and increasing the credibility and capability of Iraqi forces. However, on October 25, 2006, Iraqi Prime Minister Maliki stated publicly that no timetable has been set.

Please provide the agreed timeline and benchmarks (or the U.S. proposal for such) of political issues to be resolved by the Iraqi Government in the coming months. This information will be essential to the Congress' consideration of a way ahead on Iraq.

Thank you for your assistance.

Sincerely,

Carl Levin

 Washington, DC 20510

Dear Madam Secretary:

On November 14, 2006 I sent you a letter (attached) asking that you provide the agreed timeline and benchmarks (or the U.S. proposal for such) of political issues to be resolved by the Iraqi Government in the coming months. At that time I requested the same from Secretary Rumsfeld. On December 4, I heard from Under Secretary of Defense Edelman that the State Department had received my letter and had agreed to respond on behalf of the Administration. I have yet to hear from the State Department in this regard.

As I stated in my first letter, this information will be essential to the Congress' consideration of a way ahead on Iraq. Now that the President has announced his new strategy for Iraq, this information is even more vital. I am very disappointed that two months have gone by and you have not responded to my initial request. In view of the passage of time and the importance of this issue, I expect to receive the timeline and benchmarks by the end of this week.

Sincerely,

Carl Levin
 Chairman

CARL LEVIN, MICHIGAN, CHAIRMAN

EDWARD M. KENNEDY, MASSACHUSETTS	JOHN MCCAIN, ARIZONA

United States Senate
COMMITTEE ON ARMED SERVICES
WASHINGTON, DC 20510-6050

January 25, 2007

The Honorable Condoleezza Rice
Secretary of State
Department of State
2201 C Street, N.W.
Washington, DC 20510

Dear Madam Secretary:

On November 14, 2006 Senator Levin sent you a letter (attached) asking that you provide the agreed timeline and benchmarks (or the U.S. proposal for such) of political issues to be resolved by the Iraqi Government in the coming months. At that time he also requested the same from Secretary Rumsfeld. On December 4, he heard from Under Secretary of Defense Edelman that the State Department had received his letter and had agreed to respond on behalf of the Administration. Having not heard from the State Department for two months, Senator Levin again wrote to you (attached) on January 16, 2007 reiterating his request and noting his expectation that you would be courteous enough to respond by the end of last week. Unfortunately, you have not done so, which necessitates yet another request.

In his January 10 address to the nation on his new strategy for Iraq, President Bush said that "America will hold the Iraqi government to the benchmarks it has announced." It is essential that Congress have the information on those benchmarks to comprehensively consider as it addresses the way ahead in Iraq. It is both baffling and disturbing that the Administration will not provide the timeline and benchmarks, and it is our joint expectation that you will do so promptly, and by the end of this week at the latest. If the benchmarks to which the President referred include additional commitments beyond those initially agreed to by the Iraqi government, then our expectation is that you will make that clear in your response, and will clearly indicate which are new commitments.

Sincerely,

John McCain
Ranking Member

Chairman LEVIN. I will call next on Senator Reed.

Senator REED. Thank you very much, Mr. Chairman.

Welcome, Admiral. Good luck as you engage in some very serious and responsible challenges in CENTCOM.

When you look at the plan that you're about to implement with General Petraeus, on paper it could be made to work if you have the right assumptions. One of those assumptions is that you're going to get all the support you need from the State Department, the Department of Agriculture, the Justice Department, and the U.S. Agency for International Development (AID). I don't think

that's a very good assumption, since we have never gotten that, in the last 3 years. How many real extra bodies are going out to accompany these 20,000 extra troops and civilian agencies?

Admiral FALLON. Senator, I don't know. I am aware—

Senator REED. Isn't that important for you to know, sir?

Admiral FALLON. I intend to find out. It's clear that we will have to have agreement between the interagency on formulating the appropriate human resources to go address this problem. I do not have that kind of detail. I've not engaged in that conversation.

Senator REED. Admiral, I appreciate that, but the new strategy sounds a lot like the old strategy to me. We were going to clear, hold, and build. The President was talking about that 2 years ago. We had examples of this in Tal Afar and other places, and we were clearing. The question was, could we hold? Maybe we can hold now, but the build part never seemed to arrive.

Admiral FALLON. Absolutely critical. If we're going to be successful, we have to have the follow-up economic activity and development to enable these people to stand on their own feet. It doesn't happen, then it's not going to work.

Senator REED. Again, General—Admiral—excuse me, forgive me my background. [Laughter.]

I'm projecting. Forgive me.

Admiral FALLON. Yes, sir.

Senator REED. We've gone down this road so many times. We've heard—and I don't think this is a question of lack of candor, this is a question of people saying, "If I get all I need, I can do this." We never get what we need on the nonkinetic side of the equation.

Admiral FALLON. Senator, if I could, a couple of thoughts. One, in my experience, we're always asking for more than we'll usually get, and we'll have to figure out how to do the best we can. But I think that the situation here is that clearly the President recognizes the need for change in this situation in Iraq. He's made some decisions. Some of those decisions involve military forces and leadership positions. He's asked, through the Secretary, for me to be considered for this position. General Petraeus has already been here. These are part of the resources being applied. I think we need—General Petraeus, myself, if I'm confirmed—to sit down with our colleagues in the interagencies and to figure out the details of these plans, which I am not aware, but very anxious to get into, because it seems to me that if I'm supposed to be the CENTCOM Commander, we clearly have to have an understanding and be joined at the hip in what we agree is the way to go forward. We are not there yet. We are going to need some time to figure out the steps and to lay this out in the kind of detail that's going to actually give us some results.

Senator REED. Let me also suggest some other areas that are more directly within your purview. This strategy implies a significant increase of translators, a significant increase of civil affairs officers. What we've heard, in terms of this surge, is 20,000 combat brigades. The question is, where are these translators coming from? If you're going to send—and I'd go back to Senator Levin's comments—you're sending a platoon of young Americans into the middle of the neighborhood, from all over this country, and they cannot speak to their neighbors, you're just asking for trouble. How many

translators? Again, Admiral, out of the last 3 years, whenever you talked to a senior commander out there, and you ask him, "What do you need?"—it was never, "Give me some more combat brigades." It's "Give me translators, give me AID people, give me agriculture people." It was "gimme, gimme," but nothing ever happened.

Admiral FALLON. I'll be at the head of that list, because, unlike General Abizaid, I am not fluent in Arabic, and so, I'm going to need some help, as well. I recognize this is a big challenge.

Senator REED. As I look at this proposal, there are some obvious shortcomings that we know about right now and we haven't reconciled. Yet, we're touting this as the last best chance that this will work, "We wargamed it on the ground, we have everything we need." I don't think we have everything we need. The issue that Senator Warner raised about unity of command, and General Keane, who spoke to that it is a grave concern. It's an obvious flaw, or an obvious shortcoming in this plan, we know of right now, and yet, we're embarking into this situation.

I was trying to think—you might be able to help me—is there an applicable example of a significant urban insurgency that was successfully defeated with a divided command? I can't think—Algeria, with the French? Belfast, the British were in charge. I can't think of any other significant urban insurgencies.

Admiral FALLON. Senator, you, better than most, understand the necessity for having clean and clearly recognizable chain of command, and if you could allow us some time to figure out the details of this plan, there's a lot of talk about "the plan, the plan." In my mind, we have a plan when we have the details for each level in the chain of command to carry out the specific functions that are going to be necessary to achieve success. I have not even begun to see a significant outline of that, so I need to do some work. If confirmed, it'll be a prime order of business.

Thank you, sir.

Senator REED. Admiral, your patriotism serving the Nation is remarkable. You are well qualified to assume a very daunting task. I would associate myself with Senator Warner's comments about General Abizaid. I think he, also, gave himself to the last measure to serve this country.

The final point I'd make is, you need time, but time is quickly running out. It's not what we're doing, it's what the American people are doing. They have listened for 3 years, and they have formed very strong conclusions, which don't allow you much time at all.

Admiral FALLON. I understand, sir.

Senator REED. Thank you.

Admiral FALLON. Thank you.

Chairman LEVIN. Thank you, Senator Reed.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

Admiral Fallon, everyone's been blowing smoke at you. You've had a great career. You and I have fought together, for 3 years, what I called the Battle of Vieques, and you were there at the time. I do believe that resulted in a lack of unified training that we weren't able to keep that live range open. I just wanted to publicly thank you for the leadership you showed. You had the Pace-Fallon

report, and you stayed in there and did everything you could. I enjoyed those 3 years of battling on your side.

As we look from this point forward, I think it might be worthwhile—no one has asked you this—you'll be working with General Petraeus, and you could take a number of different approaches. You could take the 30,000-foot view and largely defer to General Petraeus on Iraqi matters, or would you anticipate having more of a hands-on approach? How do you think you'll work with General Petraeus?

Admiral FALLON. I look forward to working with General Petraeus. We have not had an extensive history together, but I've been anxious to work with him. I have followed his career. I've read some of his work. I think he basically has a very firm understanding of what's required, plus he has this extensive experience.

We have different jobs and different responsibilities, Senator. General Petraeus is going to be our commander of the multinational forces on the ground for Iraq. I view my responsibilities as much wider than that. I have a strong obligation to support him and his work, and will do that to the maximum extent possible. But it seems to me that there's an expectation that I be working outside the borders of Iraq to try to get the neighborhood, for example, to help us, and to continue to work these other issues, like Afghanistan.

I'd be looking to work in a complementary manner, but, I'll tell you, I'd love to stay up here, but I'm not going to hesitate to dive down and to ask the tough questions—love to stay up here, but I'm not going to hesitate to ask the tough questions if I don't think we're getting results, and that's the key thing that's missing in this entire program, of late, is the results that are absolutely necessary if we're going to be able to wrap this up and get our troops back.

Senator INHOFE. Since we have shorter rounds than we normally have, for the record I'd like to have you look into the successes. We've been real big on the train-and-equip program here, and it's been very successful. I think probably the best model for that would have been us with the Ethiopians and how they came along to Somalia in a very successful operation. I'd like to have you think about that and maybe, for the record, respond as to what lessons we have learned there that might be worth getting into.

[The information referred to follows:]

The United States military has provided training and equipment to Ethiopia and other countries in the Horn of Africa (HOA) that have been integral partners in the global war on terrorism. While difficult to quantify, this security cooperation and the resulting strong bilateral relationship contributed positively to Ethiopia's operations in its recent military intervention in Somalia. However, it is the close Ethiopian-U.S. military relationship which substantiates the potential benefit of regional security cooperation programs (e.g. International Military Education and Training and Foreign Military Financing with Ethiopia, Kenya, and other HOA partners). The United States should continue to train and equip forces partnering with the U.S. in order to further their military's training professionalism and capabilities, while supporting the global war on terrorism. U.S. theater security cooperation programs require increased priority, emphasis, and support in order to promote similar successful cooperation stories, and further U.S. national security interests in the HOA.

Senator INHOFE. I would also say, even though this would be more General Petraeus than you, but on the CERP program, there's been a consistency of the combatant commanders and everyone, from the bottom to the top, that that is a program where we

can get a lot more for our money if we give greater authority in the field to use that program.

General Keane, when he was here last week, he talked about the same thing, on the troop levels in Afghanistan. It's kind of interesting to me, because I've been over there 12 times—my last trip was with General Jones in Afghanistan. It was my clear view, at that time, that the military part of that was pretty near over, and now it's the rebuilding and assisting in that type of thing. Have you had a chance to look into where we are right now and to assess whether or not we do need to have—that you would agree with General Keane that we need to have enhancement of the troop level in Afghanistan?

Admiral FALLON. I don't have a fair enough assessment to give you an honest answer. I can give you impressions from my last visit. I saw things that were really good. I saw security in some areas that looked like it had the situation under control. I saw political activity. I saw functioning governments in some areas. But everything that I've heard from reports that I've read indicates that we need a pretty significant push now on the economic side to move this country along.

Senator INHOFE. I think some of the questions asked of you might not be totally fair, in that you've been in PACOM. This is new to you. You don't have all the answers. On the other hand, there could be an advantage to that. You don't go in with a prejudiced perspective. I know when I was there, and talked to people like Abdul Jazim, Dr. Rubaie, and Prime Minister Maliki.

Do you have any outside impression as to whether you think that the Prime Minister is going to change his behavior from the past?

Admiral FALLON. I don't know, Senator. I haven't met him. I look forward to it.

Senator INHOFE. All right. Senator Clinton brought up this thing about the up-armor. You mentioned something about PACOM might have equipment that could be used over there. The fact that you recognize this is a moving target, it's a changing game, and what was appropriate 6 months ago may not be appropriate now. I think it's very important that you do take an assessment of what is in the other commands that can be transferred there, and also try to evaluate what is going to be needed there. I think you have indicated you will be doing that.

Finally, Admiral Fallon, I was critical, back during the Clinton administration, when I expected that the North Koreans had a lot greater delivery capability for missiles than everybody else did, and I asked—in writing, in a letter—and I'm going from memory now—I think it was August 20, 1998, as to, when would it be that the North Koreans would have the capability of reaching the United States with a multistage rocket? The answer came back: between 5 and 10 years. Seven days later, on August 28, 1998, they fired one that had that capability. Now, this morning, in the Early Bird, it says that North Korea and Iran are cooperating in developing long-range weapons, and it says Iran is likely to develop capability of reaching the United States before 2015. To me, that's not very well informed, and it wouldn't be that long.

How concerned are you over this relationship between North Korea and Iran and their potential capability, in terms of having long-range weapons that could reach the United States?

Admiral FALLON. Senator, I'd note that, although the North Koreans tried that launch in 1998, they also tried another one last year, still unsuccessful, which is some measure of consolation, I'd expect, although they appear to be pushing very hard to achieve this capability. There's no doubt that there's been an interaction between North Korea and Iran, in exchanging technology.

It seems to me that the scrutiny of the world has greatly intensified on North Korea, particularly in this past year, and so, we're all watching very carefully to try to mitigate any attempt to proliferate technology that they may have. I don't know what the timelines are. I haven't studied the Iranian situation to the extent that I have the North Korean. The North Koreans are clearly threatening in their capabilities to their neighbors, not yet to us. We're going to have to watch it, and I'll be anxious to learn more about the Iranians.

Senator INHOFE. Thank you, Admiral. My time is expired. But I have every confidence that the team of Fallon and Petraeus will be very successful.

Thank you.

Admiral FALLON. Thank you, sir.

Chairman LEVIN. Thank you, Senator Inhofe.

Senator Akaka.

Senator AKAKA. Thank you very much, Mr. Chairman.

Admiral Fallon, aloha and welcome to the Hill and to the U.S. Senate. I also want to add my aloha and welcome to Mary and the family here, gathered and to tell you folks that you've been a great family for Hawaii and for our Nation. Admiral, you've served us so well as PACOM Commander, and I look forward to your confirmation here.

I think that it is fitting, on this day, the 145th anniversary of the launching of the Navy's first ironclad warship, the U.S.S. *Monitor*—that, if confirmed by the Senate, Admiral, you will be the first Navy admiral to command the United States Central Command. This speaks well of your leadership in the Pacific and Asia and of your accomplishments as an officer in our Nation's military. I thank you for your nearly 40 years of dedicated service already to our country. I also want to say thank you to Mary, too, because without her support, it would have been very difficult for you and for us.

Admiral, I have some questions that I want to ask you. CENTCOM has never been commanded by a Navy flag officer in its entire history. Your nomination by the administration is, I guess you can look at it, somewhat unique. It raises the question of, why now, in the war on terror, during a time when we have two ground conflicts ongoing simultaneously in the CENTCOM AOR, is a Navy admiral the best choice to head CENTCOM? So, my question, Admiral Fallon, to you is, did Secretary Gates or any other administration officer explain to you the reasoning behind their decision to nominate you to be the next Commander of CENTCOM? If so, what was their basis? If not, why do you believe that you are

the best choice for the job, given the current operational environment in the CENTCOM AOR?

Admiral?

Admiral FALLON. Senator, in my conversation with Secretary Gates, the color of my uniform wasn't the issue. I believe that what they're looking for is someone with experience, which I have been fortunate to have acquired in these 40 years, and someone who is already familiar with the workings of a regional command and the requirements of that position. We have very highly-qualified ground officers, Army officers, that are designated to lead our forces in both Iraq and Afghanistan, and I believe that the administration is looking for someone with experience and a willingness to work with these people.

I've found, in the Pacific, that the opportunity to engage with nations throughout the region was beneficial to moving us forward in the areas of security and stability, and I look forward to doing the same thing in CENTCOM.

Senator AKAKA. Thank you.

From what you've done in the Pacific—for me, there's no question, I'm proud of you and what you've done, and know that you can deal with the situations that are ahead of us.

Admiral, the New York Times published an article on Sunday describing an ambitious plan outlined by the Iranian Ambassador to Baghdad. Specifically, Iran plans to greatly expand its economic and military ties with Iraq, including an Iranian National Bank branch in the heart of the capital. News reports yesterday described the President's response. Specifically, he was quoted as saying that, "We will respond firmly." If Tehran escalates its military actions in Iraq and threatens American forces or Iraqi citizens, I'm concerned about the possibility of the Iraq conflict as escalating to a regional conflict. I am particularly concerned, because the administration is not engaging the Iranians in diplomatic discussions, which may limit our "firm" response to military options only. In this January 10 speech regarding the surge, the President stated that we will, "interrupt the flow of support from Iran and Syrian," and that we will seek out and destroy the networks providing advanced weaponry and training to our enemies in Iraq. It is clear, from this committee's discussion with Secretary Gates and General Petraeus, that the U.S. does not have sufficient troop levels in Iraq to secure the borders from Iran and Syria while maintaining our counterinsurgency activities in Baghdad and Anbar.

Admiral, do you believe that we can interrupt Iranian and Syrian support from within the borders of Iraq? What options do you believe our military has to provide the firm response to Iran indicated by the President without causing an escalation to a regional conflict?

Admiral FALLON. Senator, as I stated earlier, I believe that the Iranians have yet to play a really constructive role in the Iraqi situation. There's a lot of history here. You're certainly aware of the Shia relationship in southern Iraq with the Iranians. Yet, from what I've read and been led to believe, this is not a totally onesided issue, that, in fact, there are many people that have historically recognized Iraq as a separate entity than Iran, and so forth.

Regarding the insurgency, if we're going to be effective in quelling the violence and establishing some sense of stability, we're going to have to move to isolate these insurgents and the militias from their supplies of weapons and other materials. How we're going to do that remains to be seen, to me. I'm going to have to work with General Petraeus and our commanders to figure out how to make an effective strategy, and then implement this to get the results we want on the ground.

But it seems to me, in the entire approach to Iran, that we'll be looking for help from the region, and to look at the full range of options that are open to us diplomatically and every other way.

Thank you, Senator.

Senator AKAKA. Thank you very much, Admiral. My time is expired.

Chairman LEVIN. Thank you, Senator Akaka.

Senator DOLE.

Senator DOLE. Admiral Fallon, let me once again welcome you to this committee, and your family, as well, and thank you for your outstanding service to our country. I look forward to working with you in the months and years ahead.

What do you believe are Iran's military and political intentions in the region, particularly regarding the Persian Gulf and the Straits of Hormuz? Do you believe that one of Iran's long-term objectives is to control the flow of oil through the strait?

Admiral FALLON. Senator, it's difficult for me to ascertain what's in the minds of the leadership in Tehran in this regard. We can only make judgments, I believe, based on the behavior that we've seen to date. They have not been helpful in Iraq, and it seems to me that, in the region, as they grow their military capabilities, we're going to have to pay close attention to what they do and what they may bring to the table.

Now, the U.S. has been, as you well know, playing a significant role in this part of the world for many decades. I believe it's in our interest to remain engaged in this region.

My historical discussions with our allies and cooperating nations in this region indicate a longstanding concern about Iranian intentions and their influence in the Gulf. It seems to me that, based on my read of their military hardware acquisitions and development of tactics and so forth, that they are posturing themselves with the capability to attempt to deny us the ability to operate in this vicinity.

But I would note that this is not a one-sided situation, in that Iran is, I believe, critically dependent on its exports of petroleum products for its economic vitality, and those exports, of course, go through the same Strait of Hormuz that they would potentially seek to deny us access to.

So, it seems to me that there are lots of issues here, there are many things that ought to be considered as we approach our engagement in the region. I'll be very anxious to, particularly, consult with the Gulf-region nations to see what's new, what's learned, because it's been a number of years since I actually engaged in this area.

Senator DOLE. What do you consider to be the implications for the United States, for our allies in the region, if the President's lat-

est deployment fails, if Iraq descends into civil war? Could you also reflect on implications for Lebanon, Israel, Jordan, the Gulf states, Afghanistan, and Pakistan?

Admiral FALLON. You've given me a long list of challenges here to deal with.

Senator DOLE. Right. It's a broad question.

Admiral FALLON. I believe there are relationships between many of these, in a number of areas. I don't know exactly what the timelines are, but I believe that we have a real challenge and very little time to start effecting results on the ground. But it's been my experience that if one can actually see results in an effort, that people tend to key in on those results and take heart and move forward. Nowhere has this been more apparent to me than recently in the southern Philippines, where the longtime engagement of the U.S. in helping the Philippine Government and the Armed Forces in trying to build their capabilities and in working with the population, has been slowly but surely gaining success, and now, with the recent military successes of the Philippine army, you can almost see this thing start to really gain momentum.

The key thing, in my mind, is to arrest this continuing spiral of violence, to start making some steps in a positive direction, and then we'll have to assess, on a regular basis—honestly assess where we are and see how we move forward. I don't think there's any magic here. I don't have any idea what the timelines may be, how many months or weeks it's going to take, but it's very clear that we have to do something different. We have a prescription for a number of capabilities that we're going to bring together, and hopefully we'll come up with the right recipe here to start making progress.

Senator DOLE. Let me ask you, in Afghanistan, about the opium trade, the profiting that's occurring, immensely profitable, for the Taliban, at this point, actively engaged in this area. Eradication, obviously, is the necessary first step, but it has to be complemented by other programs so that Afghan farmers can make a living, so that they have sufficient long-term security to ensure that they're not terrorized into replanting these drug-producing crops.

The President's proposal calls for about \$10.6 billion. Is this sufficient to both cover the increased security issue, as well as the necessity of the alternative crop programs? Could you just comment on how you see this situation?

Admiral FALLON. Senator, to be honest, I don't have the details. I will tell you that, from my most recent visit there, I got a sense, at least in the eastern part of the country, that there was a governing structure, an Afghan governing structure, that was in place. It was young. It was immature. They were keen to develop themselves in economic ways that were not reliant upon the drug trade. I believe this is a real challenge with lots of issues. There's a tradition here that goes back many centuries for this kind of activity. I'll be very curious to see what options we may have available. It seems to me that there's a reasonable degree of security in most areas, except the south, and if that's the case, then a strong economic injection of realistic activities would be what's really needed here. But I'll be happy to get back to you after I get a better assessment of the situation.

Senator DOLE. Thank you very much.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Dole.

Senator Kennedy.

Senator KENNEDY. Thank you.

Thank you, Admiral Fallon, for your service.

Mr. Chairman, I'd appreciate being included on the letter about the equipment for those that are going to be deployed abroad.

Chairman LEVIN. We'd be happy to do that.

Senator KENNEDY. Admiral, as has been mentioned during the course of the questioning, Iran has become an increasingly more powerful player in the Middle East, but its nuclear ambitions and support for international terrorism are a threat to the regional stability and to our national security, and the question is what to do about it. Senator Akaka mentioned the President said, on January 10, that Iran is providing material support for attacks on American troops and that we'd disrupt the attacks, destroy the networks providing weapons and training to our enemies, and the next day we raided the Iranian Government office in Iraq. Last week, President Bush authorized U.S. forces in Iraq to kill or capture Iranian operatives inside Iraq. Yesterday, the President further raised the temperature by saying if Iran escalates its military actions in Iraq to the detriment of our troops and/or innocent Iraqi people, we'll respond firmly.

Some have suggested that your nomination, because you'd be the first naval officer to hold this command, plus the fact that the U.S. recently sent an additional aircraft carrier battle group to the Gulf, might be a sign the administration is preparing for military action against Iran. I certainly hope this is not the case. Obviously, Congress must be involved in any decision to broaden war to Iran.

Have you been asked to update war plans for Iran?

Admiral FALLON. No, sir. In fact, I'm not familiar with any of the CENTCOM plans.

Senator KENNEDY. You'd brief the committee, the chair or the ranking member, if you were asked to do so?

Admiral FALLON. Senator, I'd be happy to come back and answer questions you might have.

Senator KENNEDY. Okay.

You were well known, during the years in PACOM, for dialogue with countries in the region. As Pacific Commander, you gave a speech in Beijing, where you talked about the need to increase our interactions with China. You said, "If we're open with one another, if we share information and ideas, I think my experience has been, the tendency is to reduce anxiety, to reduce the fears of the unknown and the suspicions that come from lack of knowledge and doubt." Do you see merit to that approach in CENTCOM?

Admiral FALLON. Yes, sir, Senator. To the extent that we can understand better the thoughts and actions of others reduces substantially, in my experience, the danger of miscalculation. So, I strongly endorse that approach.

Senator KENNEDY. Would you include Iran in that, as well?

Admiral FALLON. I think that in the Iranian situation, I have to get a better assessment of exactly where we stand.

Senator KENNEDY. But you don't exclude that possibility.

Admiral FALLON. I wouldn't exclude that.

Senator KENNEDY. Yes.

Admiral FALLON. I'd note that, in China, for example, we had extensive interaction in almost every other area, aside from mil-to-mil, so we had a strong foundation. I'm not quite sure where we stand with Iran and those other areas.

Senator KENNEDY. Has the President told you not to talk to the Iranians?

Admiral FALLON. He has not.

Senator KENNEDY. I think, as you point out, there's no dialogue—exchange of information that would seem to—we would lack the opportunity, I think, to get the true motivations.

Can you tell us what is your assessment of the Iranian naval capabilities, and how the U.S. would neutralize these capabilities?

Admiral FALLON. My understanding of their capabilities is that they are trying to grow an anti-access force that I believe would be intended to try to deny us access to the Gulf, if a situation arose that they might feel compelled to do that. We are well aware of their capability.

Senator KENNEDY. Could you elaborate a little bit on the anti-access? What does that mean in layman's terms?

Admiral FALLON. They are well aware that the United States Navy, all of our forces—and, in fact, we operate jointly, as you well know, in all of our endeavors today. We have very strong capabilities in many areas. My read of Iranian investment and training activities tells me that they are aware of our strike capabilities, for example, they're aware of our aircraft carrier and submarine strengths, and that they would try to come up with ways to neutralize us, or keep us as far away as they could from the scene of action.

Senator KENNEDY. Do you believe that they have the ability to close the Straits of Hormuz?

Admiral FALLON. I would be happy to take that one for the record. Maybe we could have that in a closed hearing.

Senator KENNEDY. Okay.

[The information referred to follows:]

Iran continues to spend a significant portion of its defense budget on naval forces. Iran's strategy in part centers on their ability to control and/or close the Strait of Hormuz. In addition, Iran maintains the capability to interdict sea lanes of communication throughout the Arabian Gulf and selectively target one or more Gulf countries' off-shore infrastructure, commercial transit lanes, and anchorages throughout the region.

Iran maintains a large inventory of naval mines, an expanding coastal defense force equipped with a mix of Chinese manufactured anti-ship cruise missile launchers, an extensive mix of high speed fast attack craft equipped with torpedoes and anti-ship cruise missiles and at least 3,000 smaller patrol boats equipped with a mix of heavy machine guns, rocket propelled grenade launchers, shoulder launched surface-to-air missile launchers, and anti-tank guided missiles. Iranian leaders likely realize their naval forces cannot win a conventional force-on-force naval engagement with U.S. naval forces, and have therefore developed a strategy that uses their geographic advantage to put into play a layered defense strategy that relies on waves of near-simultaneous attacks against maritime targets to overwhelm the defenses of the target.

Given Iran's current naval forces capability, Iran could attempt to temporarily close the Strait of Hormuz for a short period, principally using naval mines and coastal defense forces.

By regional standards, Iran has a well-equipped and professional navy. Diplomacy and deterrence are our primary means of maintaining access through the Strait of

Hormuz. Should our relationship with Iran deteriorate to the point of hostilities, we are capable of neutralizing the military threat to U.S. naval vessels and preserving access through the strait for commercial traffic.

Senator KENNEDY. Finally, Admiral, there was a reference to an earlier question that was about benchmarks and reaching a time-frame for benchmarks. Could you comment on that? Do you think it's necessary to have measurable benchmarks and timetables set, and, if those benchmarks are not met, that they have consequences? Or do you believe that this should be open-ended in terms of reaching benchmarks?

Admiral FALLON. Senator, clearly, not open-ended. I'm not sure that's the right term. I've heard this now for the last week, since I've been in town.

Senator KENNEDY. Okay.

Admiral FALLON. We have to see progress. We're going to have to assess the steps. For example, the Iraqi Government has a significant list of actions that they have stated their intention to implement. I'd sure like to see some of these occur.

Senator KENNEDY. Okay. Thank you very much.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Kennedy.

I believe Senator Thune is next.

Senator Thune.

Senator THUNE. Thank you, Mr. Chairman.

Admiral, thank you for a lifetime of service to your country, and thank you, as well, for undertaking what is yet another challenging task so vital to the security interests of the United States.

During the first Gulf war, you commanded a carrier air wing on the U.S.S. *Theodore Roosevelt*. Since you've previously commanded combat operations in the Gulf region, can you comment on how you believe the CENTCOM AOR has changed since Operation Desert Storm?

Admiral FALLON. First of all, Senator, the boundaries have changed. There are other nations now in the CENTCOM area that were not part of the AOR before, so it's a broader domain, probably more challenges, certainly more active issues ongoing now than were the focus of attention at that time. I will be very interested to getting, now, to the next couple of layers down to see exactly what people are thinking about and why they're thinking in those matters, as I get out there. But lots of changes, of course. There are still lots of historical issues that remain, from my understanding, and I'll be anxious to get into these and see what we can do to improve, collectively, the security of this area.

Senator THUNE. Do you think that an increased naval presence in the region will act as a force multiplier to our ground forces there?

Admiral FALLON. That'll be something I'll be interested to find out. My understanding today is that the majority of the activities and the capabilities that are being used are ground. But I would note that I've seen news reports, have not seen any intelligence reports this last couple of days, but it's my understanding, at least from the news media assessments, that air support was used. The extent to which this is the case and what's necessary, I just don't know. I'll have to wait until I get there.

Senator THUNE. Do you think that the Navy can maintain a two-carrier presence in the region indefinitely without overstretching the Navy?

Admiral FALLON. I don't know. I think I'd go back and have the Chief of Naval Operations (CNO) field that question. I can tell you that I'm an advocate of the flexibility of our forces, particularly our maritime and air forces, that we ought to use these in ways to achieve multiple goals, not just deterrence, which is clearly one of the objectives here, but to engage in the regions in which we operate, to help support our alliances and our relationships with people. At the same time, we gain valuable experience for our own people in training in different areas. So I think I would let the CNO handle that one, as far as an internal Navy issue goes.

Senator THUNE. One of the things that you had said in your answer to the advance policy questions regarding your assessment of the current situation facing the United States in Iraq, you stated that, "Sectarian-motivated violence now inhibits political progress, effective governance, and economic development. Many other factors, including poor infrastructure, corruption, and lack of experience at governance, have exacerbated widespread mistrust between sectarian groups within Iraq."

Do you believe that the situation, as you've described it, can improve if the current security situation in Iraq remains as it is?

Admiral FALLON. Unlikely.

Senator THUNE. If confirmed as CENTCOM Commander, do you believe that the Iraqi security forces will benefit from an increased U.S. troop presence, thereby helping them to secure Baghdad and lay the foundation for a proper withdrawal of American troops from Iraq?

Admiral FALLON. Senator, I think that's a really complex equation, and what I am very interested in finding out is the extent to which these Iraqi troops are really capable and are willing, and have the leadership, to stand up and actually do the things that we would like to have them do. Numbers are interesting, but it's what they get for results that matter. So, I'll be very curious—part of the proposal, as I understand it, is to also substantially ramp up the number of U.S. embeds in training for these forces. I'm anxious, if confirmed, to have my own assessment of how we really stand with these forces. I suspect we're going to see a wide range of capability and competence. Clearly, the intention is to raise that level of competency to the maximum extent possible so that we can do what we really desire to do here.

Senator THUNE. It's been stated that America's commitment is not open-ended. What do you think the consequences should be if the Iraqi Government fails to step up and follow through on its promises?

Admiral FALLON. I think those are questions that are probably best left to the political and diplomatic levels, but I will make a couple of observations.

I am anxious to see the kind of demonstrated leadership that I believe is essential for the Iraqi Government to make progress with its people, but I'm also sensitive to the fact that this is a very challenging situation to put someone in, to have a nation newly emerging from decades of totalitarian abuse, if you would, from a leader-

ship that was corrupt and very damaging to individuals and organizations.

There is—my understanding—little in the way of tradition. There's very little in the history here that lends itself to the kinds of expectations we would like to have from a pluralistic democratic society. I am not a particularly patient man. You could probably get some verification of that from my staff and from my family. But I believe that in this situation, we're going to have to have some degree of willingness to give them some time. Nonetheless, we have to see some action, we have to get some results.

Senator THUNE. We are anxious, Admiral, to get you confirmed and over there so you can begin to make those assessments and undertake this very important responsibility. Thank you, again, for your service, and we look forward to moving you through the process.

Thank you, Mr. Chairman.

Admiral FALLON. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Thune.

Senator Webb.

Senator WEBB. Thank you, Mr. Chairman.

Admiral, I want to congratulate you and your family for all the sacrifices that you've made and for this new assignment, and also express my condolences that you will soon be relocating from Hawaii, which probably the best command that anyone can have.

Admiral FALLON. Yes, sir.

Senator WEBB. You have a remarkable diversity of experiences you are bringing to the table here. You have a lot of operational experience, you have time in the other building over there, you have a lot of experience working with Congress, and, most importantly, you have high-level command experience. I want you to know at the outset that I've been really impressed with the depth and the quality of your answers. I intend to support you fully.

I have a couple of questions that I would like to put to you.

First, you've spent a good bit of your career operationally deployed as a naval aviator. You know the costs of deployment on family life and just the wear and tear on individuals. There are people who are calling this situation a new strategy. I've said, a number of times, I don't believe that. I can't see a new strategy here, in terms of national strategy. What I see is a sort of an operational adjustment. The possibility here is that we're going to end up with continued deployment cycles until the situation can be figured out. We're working from a pretty fixed baseline, particularly of soldiers and marines, of people that are available, and units that are available, for these tasks. On the one hand, the increase of our troop levels, in the short term, is going to put additional strain on the Army and the Marine Corps force structure; in the mid-term, particularly, it is going to place a hardship on the rotational cycles of units, possibly even further down the line. I couple that with a concern that's been stated many times on the Foreign Relations Committee and in this committee as we've had these hearings over the last month, that was also stated in the Iraq Study Group Report, that adding more American troops "could conceivably worsen those aspects of the security problem that are fed by the view that the United States presence is intended to be a long-term occupa-

tion.” So, on the one hand, we have the wear and tear on the troops, and on the other, we have the perceptions in Iraq that might actually cause this to be a countervailing influence. I’m wondering if you have any comments about that.

Admiral FALLON. Senator, I certainly share your concerns, particularly regarding the impact on our forces. I’ve watched this very carefully from my current position, because we, as you well know, have been rotating Pacific-based forces, particularly Marine and Army forces, into the CENTCOM region. So, I stay very close to our commanders, and then make my own assessments, as well. While the Army and Marine Corps have different constructs in the way they approach their combat units and their people, there is a common denominator here, and that is the mid-level leadership, both enlisted and officer, is in the mode now of repetitive visits to Iraq and Afghanistan. There is certainly some tremendously good experience being gained, but I am highly sensitive to the wear and tear on them, and their families, in particular.

Clearly, this is not going to be something that we would like to continue for an extended period of time. I will tell you that I’m going to watch it very closely. Again, I believe that the potential for success in Iraq—and I truly believe that we can be successful, or I wouldn’t take this job—a lot of this depends on our ability to actually use the resources in an effective manner. The numbers, again, interesting, but doesn’t really tell the tale.

What are we really going to do with these people, and how are we going to measure the results, seems to me to be the real issue here.

Senator WEBB. You have earned a reputation, and you’ve increased that reputation over the past hour or so, as someone who is willing to pursue diplomatic approaches, not in the sense of backing away from military issues, such as deterrence, but as someone who’s willing to work to develop the right kind of harmonious relationships, or at least reduce the level of hostility in relationships. You’ve done that with China, you’ve done that, to a certain extent, with North Korea. I would like to point out, we did engage Iran, as everyone knows, after the initial invasion of Afghanistan. We brought them into the formula when we were looking at the formation of the Karzai government. It also should be pointed out that the Iraqi Government itself is engaging Iran. You’ve made a few statements in the recent past about wanting to encourage Iran to play a constructive role.

An overwhelming percentage of the people who have testified in the Foreign Relations Committee, and a good percentage of the people who have testified here, the experts on the region, say that, in terms of a true national strategy here, unless we have a robust diplomatic effort of some sort that goes hand in hand with what we’re doing, we’re not going to reach a solution to this problem that will increase the stability of the region and do the other things that we want to do.

How are you looking at that, in terms of Syria and Iran?

Admiral FALLON. Philosophically, I believe in having all the cards available to put on the table, as the potential might exist to play them. My approach to PACOM was to go and ask questions and listen extensively to every voice that I could find that I

thought had the experience and wisdom to provide me some good advice before I set out on a project to try to help us engage in a manner that might be useful on security and stability. I'd like to pursue the same thing in the Middle East. I have a lot to learn. It seems to me that we make progress when we are willing to be open and to use every means at our disposal to try to achieve the ends. But this, of course, requires reciprocal actions from the other parties. I don't know the extent to which those endeavors have been undertaken in the Middle East, but I am very anxious to find out and to try to play a constructive role in that.

Obviously, we have a Department of State that is the lead entity for diplomatic engagement with nations. We're seeing that play out in the Pacific, with Korea, for example. But there are roles that we, as military commanders, can play, as well, and I'll be anxious to have a conversation with the Secretary of State and her principals in this matter so we can see what the right way ahead is.

Senator WEBB. I appreciate your answers, and wish you good luck.

Admiral FALLON. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Webb.

Senator Martinez.

Senator MARTINEZ. Mr. Chairman, thank you very much.

Good morning, Admiral. I thought I might differ with my colleague from Virginia on something or another, but I never thought I would differ more deeply than to suggest that you now have a hardship assignment, being stationed in Tampa, Florida. I want to welcome you and your family to our State, and I know, on behalf of Governor Charlie Crist, we're delighted that you'll be coming, upon your confirmation. I do trust and hope that, during your time there, if there's anything we can do to make your stay better, or your mission easier to accomplish, that you will not hesitate to call on us. We consider Tampa to be a welcoming and friendly place. I know you know our State. You've been in Jacksonville before, and we look forward to having you.

Recently, I had the opportunity to speak to a high-ranking official of the Iraqi Government, in fact, a couple of days ago—and one of the things that he stressed with me was the regret of the lack of, and the need for, a security agreement with the United States Government, between the Iraqi and the U.S. Governments. Apparently, to his way of thinking, it is essential for there to be such an agreement in place, for the Government of Iraq to then fully be able to carry out the type of things that we anticipate that they should be doing in this new way forward. Are you aware of the status of that? If not, would you address that issue, upon taking your command?

Admiral FALLON. Senator, I don't have any knowledge of it, but I'd be happy to take a look at it, if confirmed.

Senator MARTINEZ. Perhaps you and General Petraeus could look at that. I did not realize that this was an issue, but I—

Admiral FALLON. It's probably not surprising, since we're basically starting from the ground floor and building a defense and security structure in that country.

Senator MARTINEZ. I think the concern was the lack of flexibility for them to be able to act and direct their own forces, and things of that nature.

Admiral, turning us to Afghanistan, and, of course, to Iraq, as well—the Provincial Reconstruction Teams (PRTs) seems to be a key part of our strategy of reconstruction and rebuilding, which I think is so essential to political acquiescence, and, I think, particularly in southern Afghanistan, this is of great importance. I was wondering whether you have faith in these PRTs and this approach, and what you might do to enhance their success?

Admiral FALLON. Thank you, Senator. I'll be anxious to get more detailed understanding of what they've been able to accomplish. It seems to me that it's a great idea. It looks terrific on paper. I've actually visited with a couple of these PRT entities in Iraq and Afghanistan. It seems to me that this is an issue, in fact, that I'd like to discuss with General Petraeus, because I think that the effectiveness of these PRTs is going to be significantly related to the degree of security of the environment in which they operate. If you were able to maximize the capabilities of the individuals that are assigned to these teams, then we need to ensure that they're actually being able to engage in the population issues that are desired.

So, I don't have enough detail yet. I'm favorably inclined to this kind of a construct, and look forward to finding out how we're really doing.

Senator MARTINEZ. One of the issues in Afghanistan, of course, under NATO command, is the commitment of our NATO partners to doing all that is necessary. I know the chairman, in his opening remarks, touched upon the limitations upon the use of some of our allies forces. How will you be addressing that issue?

Admiral FALLON. That's one area in which I do have significant experience, having worked with NATO and been a commander in NATO before, and spent a couple of years in the policy shop, working in and out of Brussels. There's some phenomenal goodness that's come out of the NATO alliance, and I'll tell you frankly that I've learned a lot from our NATO allies. But it is challenging to have an operational construct in which you have a long list of caveats that our commanders have to deal with. I don't know enough yet to really be making any public statements on it. I'll be interested to consult with our folks in Afghanistan. I think there's a tremendous amount of goodness in having the NATO nations step up and to be a part of the solution in Afghanistan. Exactly how we figure out how to optimize this contribution is probably a challenge that we need to undertake. But I do have familiarity with the process and a pretty good understanding of the background and how nations work together in this alliance, so I'll look forward to working with them.

Senator MARTINEZ. On the issue of Iran, I understand that there's been some concern raised by the President's comments; however, I find them to be consistent with the responsibilities of the Commander in Chief. I think what he said was that if Iran operatives are causing harm and death to our troops, that we will deal with them forcefully and that we will come after them and arrest them or otherwise deal with them. Do you find anything troubling about that policy? Does it immediately suggest some more ag-

gressive actions against Iran, other than dealing with their incursions into Iraq and creating conditions that will cause harm to our troops?

Admiral FALLON. Seems to me we need to take every step that's reasonable in the circumstances to try to provide this atmosphere of security and stability. The Iranian international behavior has drawn the attention and response from the international community. This isn't, I believe, just the President seeing a problem with this country's behavior, the leadership in this country's behavior. These are issues that I'm anxious to get a better understanding of, particularly as it pertains to activity inside of Iraq, and to work, to the maximum extent possible, to try and find the right solutions.

Senator MARTINEZ. Admiral, my time is expired, but I want to thank you for your service, your family's sacrifice, and your willingness to undertake this difficult assignment, and wish you well.

Thank you.

Admiral FALLON. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Martinez.

Senator Lieberman.

Senator LIEBERMAN. Thank you, Mr. Chairman.

Admiral Fallon, thank you. It's great to be able to listen to you today. I must say—you couldn't see this, because you were looking at the committee—when you said that you're not a patient man, I would describe the response of your family as a benign smile, which is to say, I think they agreed with that, but, nonetheless, continue to love you. [Laughter.]

That's a good way to go off to this assignment. We're going to need your impatience here, as well as the thoughtfulness that you've shown the committee this morning.

Earlier, in response to a question from one of my colleagues, you, I think, gave an interesting and important answer about the extent to which, as I heard it—and I want you to confirm whether I heard it right—you would be involved in what might be called the day-to-day command of Multi-National Forces in Iraq. I thought I heard you say—and, of course, that's General Petraeus's job; obviously, you'd be watching what's happening, asking questions, as presumably you would with General McNeill, when he takes over the NATO forces and American forces, because you have a lot else to do in that AOR. Did I hear you right?

Admiral FALLON. I believe you did, from your description of my comments. I have a regional responsibility, and will be working hard in those lanes. I will rely on our commanders in the field, the subordinate commanders, to carry out their jobs. But I believe that's the responsibility of command to make sure that I understand what they're doing and how they're doing it. The key issue for me and for this Nation in Iraq is to be getting results. So, those are the kinds of questions I'm going to be asking and the expectations that I'll have for General Petraeus and other commanders are that they have a plan, they understand what we're trying to do, and they can show me—the term “benchmarks” has been used here—I'd like to see a plan of action and milestones to actually get somewhere, and I will be tracking those results. To the extent that I have to be engaged with them on a day-to-day level, I will, to assure me, give me the confidence so that I can come back and assure

the leadership of this Nation that we're actually making progress in the endeavors we've undertaken.

Senator LIEBERMAN. I appreciate that answer. Personally, I believe it's the right one. We have good commanders on the ground that we've sent there. Obviously, you have broad responsibilities in the region. It seems to me—and I think no matter how we feel, particularly about what's happening in Iraq now here on this panel, and what we think should happen, that most everybody agrees that what's happening in Iraq has regional implications and, I would say, is part of a larger regional conflict playing out. So, to the extent that you have time to deal with that regionally throughout CENTCOM, the Middle East generally, which, as you've said, has always been an area of priority concern for American foreign policy interested in stability, both politically and because of the economic importance to our country, of oil, and now facing an enemy of the larger war against Islamist extremism and terrorism, an enemy which has, generally speaking, emerged from that region, I think it's critically important that you have the time to help our Nation make progress on those larger concerns.

I want to ask this question. It has struck me, at various times when I've traveled around to meet our commanders on different commands, that, in a way that most people don't appreciate, PACOM from which you've come, but also CENTCOM to which you're going—the military leader that we put in charge there is, in my ways, the most prominent American representative in the region. Sometimes people call for a special representative to the Middle East. I think you're going to be the special representative to the Middle East. I appreciated, before, what you said, in response to another colleague's question, that you would be consulting with the State Department and the Secretary of State, because I think—and I base this with appreciation on the good work, military-to-military, but also military-to-governmental leaders in the region that you've done in PACOM—that you have the potential to help us make progress, not only in our military relations, but in our diplomatic relations, with our allies and others in the region. I just wanted to ask you whether, as you go off, you consider that to be one of your priorities.

Admiral FALLON. Senator, thank you for your confidence. I'll be happy to play any role that would be constructive in this area. In the Pacific, the far Pacific and Asia are, of course, a long way from Washington, D.C., and so, we have the opportunity to engage, to a greater extent, probably than might be the case in other areas that are closer to the U.S.

There's also a longstanding tradition of good work by many of my predecessors out there who have established relationships and expectations with these nations that continue to this day. So, it was a real joy to actually get out and visit these countries, and not just the military people, but their political, diplomatic leaders, as well, and to get folks to engage on issues of common concern. It's worked out there, and I've seen it work in other areas. I'll be anxious to do whatever I can, and to play as helpful a role as possible here in this region, as well.

Senator LIEBERMAN. I think there is an enormous role that you can play. The fact is that in many parts of the world where people

on the ground may not have friendly thoughts toward us, generally, today, unfortunately, they continue to have a lot of respect and appreciation for the American military. Your ability to build on that in your relations with the indigenous militaries in the region, but also with the political leadership, I think can be very important at this critical moment in our relations with the command you're about to take.

I thank you very much, and wish you all the blessings as you go forward with your family.

Admiral FALLON. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Lieberman.

Senator Graham.

Senator GRAHAM. Thank you, Mr. Chairman.

Admiral, we do all wish you well. Just the 30,000-foot view of things—and if you've been asked these questions before, I apologize—but from the big things, in terms of this new command that you're taking on, General Petraeus said that he believed that Iraq was part of the overall war on terror, that it was a central battle-front. Do you concur in that?

Admiral FALLON. Yes, sir, I certainly do.

Senator GRAHAM. So, the outcome in Iraq would affect the overall war on terror positively or negatively. It's not a neutral event. You agree?

Admiral FALLON. Absolutely not.

Senator GRAHAM. Okay. There's a debate here on the role of Congress as to what we should do and how we should do it, and that's part of democracy. General Petraeus said that a resolution passed by Congress disapproving of the mission that he's about to embark on, in his opinion, would be detrimental to morale. What's your opinion?

Admiral FALLON. Senator, I think these issues are being discussed in the political realm, and I'd prefer to keep them there. I'll be honest with you, I haven't even looked at the wording of any of these proposals. I have a very significant military task to do, if confirmed, and I'd much prefer to focus on that activity to try to effect some results that we could all be happy with.

Senator GRAHAM. Is Iraq winnable, militarily?

Admiral FALLON. Not militarily. But could this situation in Iraq be turned around? I firmly believe it can, if we have the engagement of the capabilities that are necessary to help—

Senator GRAHAM. I agree, we're not seeking a military victory in Iraq, we're trying to turn around the situation, in terms of security. That's the goal, right?

Admiral FALLON. Security and stability, so that the government has a chance to stand up on its own. But this is not a "do this, and then maybe you can do this."

Senator GRAHAM. What would be "winning" in Iraq?

Admiral FALLON. I don't know what "winning" is. This is one of the things that I'd be working with the Secretary of Defense and the Secretary of State to lay out, with our subordinate commanders. But it seems to me that what we're trying to do here is to give this young government an opportunity to be representative of its people and to govern this country in a manner that people could be happy.

Senator GRAHAM. Can I suggest what “winning” might be? That you have a stable, functioning democracy in Iraq out of the ashes of a dictatorship that’s an ally in the war on terror, where women have a robust role in society? Would that be a good definition of “winning”?

Admiral FALLON. I think there are a lot of aspects there that would be pretty positive, sir.

Senator GRAHAM. Okay. Could you envision a democracy emerging in Iraq with this level of violence at the current state?

Admiral FALLON. I would have two comments. One, clearly not much in the way of progress is going to occur with the current levels of violence and instability, but I think that we would probably be wise to temper our expectations here, that the likelihood that Iraq is suddenly going to turn into something that looks close to what we enjoy here in this country is going to be a long time coming. But, first things first. Get some stability and security for the people and then——

Senator GRAHAM. Well, that’s the question. What is the first thing first? Is the first thing for us to start withdrawing, so the Iraqis will step up to the plate and do more? Or is the first thing to help the Iraqis get control of the violence so they can solve their problems politically? What’s your view of the first thing?

Admiral FALLON. My view is that there are several first things, but there’s a fundamental understanding of——

Senator GRAHAM. Well, what’s the first of the first things?

Admiral FALLON. We have help to increase security and stability in that country.

Senator GRAHAM. That’s going to take, partially, military involvement.

Admiral FALLON. Sure.

Senator GRAHAM. Let’s walk through the whole idea of the surge. It’s on more than one front. The 21,500 troops are designed to help provide a better security environment militarily, is that correct?

Admiral FALLON. The troops that are going in are to try to enable us to effect a different operational construct on the ground. As General Petraeus outlined in his visit here last week, the idea is to try——

Senator GRAHAM. What does that mean? We’re trying to send more troops to help the Iraqis control the violence, with them out front. We’re having a better ability to hold. Is that correct?

Admiral FALLON. Some of the Iraqis have demonstrated an ability to be effective, and some have not. It’s a work in progress.

Senator GRAHAM. The problem we’re trying to send troops to correct is the ability to hold once we clear. Is that correct?

Admiral FALLON. If we are to be effective, we have to be able to secure some of these neighborhoods and some of these areas in the country so that the processes of democracy have a chance to succeed.

Senator GRAHAM. Do you think troops being sent in can help accomplish that goal?

Admiral FALLON. Yes, sir.

Senator GRAHAM. Okay. The other thing that we’re trying to surge is economic ability of the country. Unemployment in Baghdad is at almost 40 percent in some regions. Part of the strategy

is to create jobs so people will not be tempted to take money from militias to attack our troops. Is that correct?

Admiral FALLON. Yes, sir.

Senator GRAHAM. Okay. Another part of the strategy is to have a rule of law so that any group, regardless of background, if they engage in actions against our troops or to topple the government, they will pay a heavy price. Is that correct?

Admiral FALLON. My understanding is that aspect of society, government in Iraq, is very poorly developed.

Senator GRAHAM. So, we need to develop along three fronts: a better rule of law, a better economy, and a better security environment. That's the plan of the surge, right, on three fronts?

Admiral FALLON. Senator, I think there are many tasks in Iraq, and the biggest challenge right now is to get the level of violence down, to establish baseline security that will enable us to move forward on some of these other areas.

Senator GRAHAM. You would support sending more troops to accomplish that goal?

Admiral FALLON. I don't know how many troops are going to be necessary to effect the outcome that we want, but General Petraeus, in my conversations with him, communicated that he believes he needs these troops now to get moving—

Senator GRAHAM. If he said he needed more, you would support him?

Admiral FALLON. I don't know, sir. I haven't been there yet, and I'm not in a position to make that judgment.

Senator GRAHAM. Well, is his judgment about 21,500—does it make sense to you?

Admiral FALLON. I will better be able to give you an informed answer when I understand the situation better.

Senator GRAHAM. From the Iranian point of view, if you were informed, early on in your tenure here, that there was a sanctuary being provided by the Iranian Government for terrorists who are killing American soldiers and military personnel in Iraq, is that in our National interest to allow that sanctuary to continue?

Admiral FALLON. That doesn't sound like a good idea to me. It's one of the things that I'll be interested in learning if I get the opportunity to get the intel briefs from CENTCOM.

Senator GRAHAM. Finally, last question, from the Iranian point of view, do you consider, based on what you know now, that the Iranian involvement in Iraq is counterproductive to developing a democracy in Iraq?

Admiral FALLON. Senator, I'm not sure what the Iranian viewpoint is here, but it seems to me that, from my observations from the outside, that we have not seen a constructive role in Iraq from Iran. I would be interested to find out if, in fact, this is the case or not.

Senator GRAHAM. Good luck, Admiral.

Admiral FALLON. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Graham.

Senator Bill Nelson.

Senator BILL NELSON. Admiral, you can tell by the comments that have been made that there is a difference of opinion on this committee as to the effectiveness of the President's decision on an

additional 21,000 troops. Senator Warner mentioned that there are 10 Senators that have joined him. I am one of the 10. It is my personal feeling that the 21,000 troops, most of which are to go into Baghdad, will not help in the middle of the situation of sectarian violence that we find, which Senator Warner correctly noted, goes back a thousand years. It actually goes back almost 1,500 years, right after the death of Mohammed, when his son-in-law split off, and that became the Shiite sect, born of rebellion and revenge. It's been going on ever since. It's going on there right now.

I want you to know how much I appreciate your candor and your openmindedness in approaching this, because good intentioned, well-informed Senators at this table have a different opinion about this. Personally, I think that additional troops in Anbar province would help. The Marine generals there convinced me that it would help. But not in Baghdad, and certainly not 20,000. Maybe 200,000, maybe 300,000 in Baghdad, but not 20,000.

So, I approach my comments and my questions with that as a background. I also want to say that this Senator, along with several others, including numbers that have mentioned it here today, appreciate the candor with which General Abizaid has come to that table over and over again. Personally, I hate to see him step down. But he has given his full measure in a very difficult situation. As I said to General Petraeus, I would say to you, Godspeed, Admiral, as you embark on this enormously important duty, taking over, with the goal of stabilizing Iraq.

I appreciate the fact that you took a risk stepping out, with regard to China. What can we expect with regard to Iran? What kind of reach-out? I know you can't answer it, but just, kind of, give me a flavor of your attitude as we approach this difficult thing and in that Baker-Hamilton Report—and, by the way, they are testifying this afternoon to our Senate Foreign Relations Committee. They said an aggressive diplomatic effort in the entire region, including Syria and Iran.

But give me the state of your mind, if you would.

Admiral FALLON. Senator, I will be very anxious to consult with colleagues in the Department of State and in the region to gain a better appreciation than I have of the situation in Iraq. But I believe that there are some significant differences, just right off the bat, in the situation I encountered in China. First and foremost, I believe, is the extent to which the relationship between the U.S. and China had developed on many fronts prior to my arrival. In fact, there were things that we were able to do in our engagement that had been done by some predecessors. My understanding, from this vantage point, of the situation in Iran is that we are not at that level at all. There is activity that's occurred on the part of the Iranian government that has been seen by the international community as not only not helpful in the region, but in the world, and particularly in regard to the potential to develop nuclear weapons.

So, I believe we have to be cautious and careful in our approaches to this country, but I am quite anxious to find out, to the best of my ability, the lay of the land, and then work with colleagues at State to see what the best way forward is.

Senator BILL NELSON. Thank you for your comments, and thank you for your openmindedness.

I want to ask you about the training and equipping of Iraqi troops. I don't want to concentrate on just the number of Iraqi troops trained, but, rather, your assessment of how reliable they are. The reason I want to raise this issue with you is that I raised this with General Petraeus. The number, 325,000 had been thrown out in an answer to my question from General Petraeus. I asked, "Are they reliable?" He said, "They are not all reliable, sir," and then went on to modify and qualify that. Then I said, "Well, can you put a percentage on it of how many of them are reliable?" He says, "Sir, I cannot, from this divide." Can you give us any sense of what you think that we would have some greater degree of comfort with regard to a plan that the President has of going into Baghdad, on a dual command structure in the operation of "clear" and then "hold," before you ever get to "build," having the Iraqi army and the U.S. military side by side?

Admiral FALLON. Senator, I'd go back, first, to a comment on dual command structure. I have no idea what the structure is that the ground commanders over there have in mind, but whatever it is, it has to be one in which we can effectively employ our forces and we have the confidence that we can safeguard their well-being.

I cannot tell you, with any degree of accuracy, what percentage of troops, or what the numbers are, that are effective. I believe that this is pretty judgmental, it's pretty subjective, in my opinion, my experience, and it's one that I am very anxious to gain an appreciation for from our ground commanders.

I've always been someone who felt more comfortable in smaller numbers of very effective capabilities than a large number of whatever is decorating the landscape. So, I will be very interested in trying to find out where we really stand with these forces.

Because we're going to depend on them to carry the water. This is the objective here, is to turn this over to them so they can effectively safeguard their country.

Senator BILL NELSON. Mr. Chairman, I want to make one other comment.

It's hard for me to understand how we can come to the table and support a surge that is predicated on the fact of the reliability of the Iraqi army, when nobody can answer if, in fact, the Iraqi army is reliable, and that we're asking 20,000 more Americans to go in there to fight alongside Iraqi troops, when we, in fact, don't know. Nobody has been able to answer. These are questions that Senator Warner, Senator Levin, and I and others have been asking.

I'll just finish, Mr. Chairman. How would you go about measuring the reliability of the Iraqi troops?

Admiral FALLON. Senator, from my experience, we observe them training. This is how we measure and conduct our assessments of our own troops. We watch them in their training, and then we put them in situations in which we can actually see them perform, and then we make an assessment of their ability to measure up to the expectations that we have. I would expect to have our commanders doing the exact same thing with the Iraqi forces, with an understanding that, first and foremost, these are Iraqi forces working for an Iraqi command structure and Iraqi Government. I think this is an issue in which we have to be a little careful, here, about putting pretty heavy fingerprints. Certainly, we have to have confidence

that the security structure in Iraq is going to be able to carry its end of the bargain up, or clearly we're not going to be successful.

Senator BILL NELSON. In the spirit of candor, you will come back to us and report on your measurement of whether or not they're reliable.

Admiral FALLON. Yes, sir.

Chairman LEVIN. Thank you, Senator Nelson.

Senator Chambliss.

Senator CHAMBLISS. Thank you very much, Mr. Chairman.

Admiral, welcome to the committee today, and thank you for being the great soldier that you are. We appreciate your service to our country and your taking on this very daunting challenge which you have ahead of you at CENTCOM. But knowing that you spent—although it be a very brief time at Glenco, we know that you're well trained to take on this task ahead of you.

Admiral FALLON. Five years in "Albenny," too, sir.

Senator CHAMBLISS. "Albenny," huh? I can tell you were, when you say it that way.

First of all, let me just say that I think you're going to be working with another truly great American in General Petraeus, and this is going to be the first time in a while that we've had a Navy CENTCOM Commander and an Army general in theater. Any dynamics there that you think are advantageous to us, from the standpoint of having two branches represented?

Admiral FALLON. I think you have tremendous potential for synergy. General Petraeus, widely respected for his expertise and thoughtful approach to land warfare, and I've been operating in a different environment, but anxious to collaborate in any way we can.

Senator CHAMBLISS. Good.

I just have one question for you, and it really relates to Afghanistan. Last week, I had the privilege of meeting with the Assistant Minister of Defense for Afghanistan, Mr. Mohibullah. While he discussed the progress of the Afghan national army is making in growing and training their forces, he reiterated to me the importance of a strong and continuous commitment by the United States to the security of Afghanistan. At the same time, one of his priorities is to train and equip Afghan forces in order to lessen the Afghans' reliance on U.S. forces.

I believe that this is an extremely important priority, since, in the end, it's the Afghan forces who can best defend and secure Afghanistan, and because U.S. forces are increasingly stretched thin due to commitments in Iraq, as well as elsewhere. I'd appreciate you discussing, a little bit, how the United States and NATO forces in Afghanistan are partnering with the Afghan army to facilitate this training and equipping, and explain what you will do to ensure that this training proceeds as quickly and efficiently as possible.

Admiral FALLON. Senator, I am also anxious to get into this and find out the details. I don't have the appreciation I'd like for this. I'm told that the Afghan national army is making progress, and not just in numbers, but in competence. The anecdotes that I hear from our people are pretty favorable. We have more work to do with the police, but I think I can understand that.

So, I'll be anxious to see just how we're doing, and I'd be happy to report back to you when I have an assessment of that.

Senator CHAMBLISS. Thank you very much.

Mr. Chairman, that's all I have.

Chairman LEVIN. Thank you very much.

Senator McCaskill.

Senator MCCASKILL. Thank you.

Like others, I want to thank you for your service, and thank your family.

I am very aware, as I think many Americans are at this point, of the serious problems that we have in the area of acquisition and contracting in Iraq. Frankly, I sat in on a hearing last week in a subcommittee of this committee, where I realized that this problem is not limited to the conflict in Iraq, that there are serious and significant issues with the way the Department of Defense is purchasing and contracting for services.

Who should be held accountable within the military when there is serious problems with the way money is being misspent or in cases of actual fraud and bribery?

Admiral FALLON. Senator, I'm not familiar with the details of this issue. We hold commanders accountable. In my experience, the responsible individuals measure up to our expectations, and particularly the applicable laws and regulations, and, if they don't, then they pay the consequence.

Senator MCCASKILL. I guess what I'm trying to get at is we're not in a moneymaking operation in the Government. There is no bottom-line pressure. We don't need to worry about whether we're making a profit. So, the only way we have of controlling the way money is spent is who's held accountable. I'm beginning to get information that is just, frankly, mind-numbing about the lack of accountability within the Department of Defense as it relates to problems with acquisition and purchasing. An example of the Inspector General's (IG) warning that they are violating the Antideficiency Act, and then they did it a hundred more times, after warned by the IG that what they were doing, in terms of the way they were purchasing things, was violating the law. I understand the rub between urgent and compelling, and you want to go quickly and get necessary equipment. I think what I'm worried about is that I noticed, over the weekend, somebody was found guilty of bribery, the person who was in charge of comptroller on the ground with the Provisional Reconstruction Authority in Iraq, and evidently, a couple of Reserve officers were co-conspirators. But when does it move up the food chain? I took the seat of an American figure in history that had a favorite saying about "The buck stops here." Where does the buck stop for these problems? Who, within the military command, takes responsibility for the problems beneath their command as it relates to acquisition and contracts?

Admiral FALLON. Ma'am, my experience, if I'm the responsible commander, I'll take responsibility for it. I don't know any detail of the accusations or of the issues. I'll be happy to try to find out. I believe that it's a key component of our responsibility, as leaders, to be accountable, to be efficient, as well as effective, with the resources that the American people, the taxpayers of this country, give to us. I think there should be little doubt in the minds of our

commanders that they're going to be held accountable for that, and I'd be happy to look into it, if you'd give me some specifics.

Senator MCCASKILL. Are you aware of any time under your command while you've been serving your country—so well, by the way, in many different capacities—are you ever aware of anyone under your command being found either administratively or legally liable under the Antideficiency Act?

Admiral FALLON. I don't think I can answer that question honestly without a little bit of research.

Senator MCCASKILL. Okay. As it relates to the rub, when it comes to that—and that is, equipment for the men and women who are serving us—I want to briefly tell you a true story.

Last February, there was an article in the Monett, MO, newspaper about this community coming together because a young National Guard member who was serving in Iraq had written home and asked his mom to go down to the local tool and die shop. He said, "Mom, we've gotten the armor for vehicles over here in our unit, but we don't have any tools to put them on. Would you see if the man that owns the local tool and die shop would send us the tools we need to put the armor on our vehicles?" After that was published a lot of people at Monett were really proud of what they had done, because, of course, they sent them the tools to put the armor on their vehicles. My sister and I went down to the basement and dug out the letters from my dad, who served in World War II in Europe, and he wrote home for peanut brittle and for new socks. He didn't write home for tools to put the armor on his vehicle.

With the National Guard being stretched as they are, and with all the stories we've read of equipment they're leaving behind that is no longer operable, how are we taking steps to make sure that we don't have these young men and women having to write home for the tools to put the armor on their vehicle?

Admiral FALLON. Ma'am, all I can tell you is that, if I'm confirmed, I'll do everything in my power to ensure that our forces are the best-equipped, best-trained, and best-prepared to conduct the operations we ask them to do.

Senator MCCASKILL. In terms of before a Guard or Reserve unit is sent over, is there some internal process that would help me understand that someone has to check off that all the equipment they need is ready and available before they're sent? Or is it, you send them and then try to figure it out later?

Admiral FALLON. No, that's certainly not the way it is. There are all kinds of processes that are in place to try to make sure that we have the appropriate equipment and so forth. But I think a reality of life is that there are going to be many issues and many cases of desires for things, and the ability of the system, if you would, be it the Army or the other Services or the Guard, to meet those demands is something that has to be worked and negotiated. I think, my experience, one of the challenges of command is to try to determine what the appropriate balance is between the desire and the need. I can tell you from my experience, there's an endless desire. If I listened to all the demands that were asked of me, there's not enough money in the world to cover these things.

Senator MCCASKILL. Sure.

Admiral FALLON. So, you, I would hope, would rely on the judgment and experience of those in command to try to make the best determination as to where we are with these things.

I can tell you that, if I get out into this command, I'll certainly be happy to be take a look at it, and would make it a priority, to the best of my ability, to make sure that our folks are as well prepared as we can make them for whatever we ask them to do.

Senator MCCASKILL. I would appreciate it if you would try to follow up with the committee and with my office about the question I asked about violations of the Antideficiency Act and what accountability there is.

[The information referred to follows:]

While reporting and remedial action of Antideficiency Act (ADA) violations are the purview of the Services under title 10, I am committed to ensuring component commanders meet their fiscal responsibilities. Also, understand this committee requested ADA violation data from the Office of the Secretary of Defense Comptroller during her February 6, 2006, testimony, thus defer to her response on the number of violations.

Senator MCCASKILL. Second, I didn't have time for this, but I would like to know, and, once again, this could be in a follow-up later. Is there a plan for what happens if this doesn't work, if the Iraqi brigades don't show up, if the police personnel don't stand up, if this is not successful—is there a plan, going forward?

[The information referred to follows:]

Adjustments to our force posture and strategy are conditioned based. As we identify changes to both the friendly and enemy situation, modifications and adaptations to our tactical plans will be made and should be expected. As the Iraqi's deploy forces to the Baghdad area, we will be able to evaluate their effectiveness and progress. Simultaneously, we will continually evaluate our effectiveness on the ground. Our contingency planning for the way forward will be based on such assessments and we will adjust our plans accordingly.

Senator MCCASKILL. I think you've been very candid today. I think we all value that highly. Thank you. I think you've done a great job today, and I wish you the very best and safety.

Admiral FALLON. Thank you, Senator.

Chairman LEVIN. Thank you, Senator McCaskill.

Senator SESSIONS.

Senator SESSIONS. Thank you, Chairman Levin.

Admiral Fallon, you've had, by all accounts, an excellent tenure in the Pacific. You've been out on that blue water, and now you have some brown sand to spend your time on. It'll be quite a change, I think. But your abilities are well recognized. You're known as a strong leader, a person who's willing to stand up, say what he believes, and insist that things happen that ought to happen, and when they should happen.

I know the equipment situation is not perfect, but I don't believe any military has ever been better equipped, better supplied than this one has. In this very distant theater, and very hostile, and remote areas, I'm sure there have been some times when equipment and things were not what we needed.

They're entitled to the best equipment, the best strategy—that's important, a good strategy—and execution of that strategy. My former Deputy Attorney General in Alabama, General Richard Allen, a retired Army Reserve general, used to quote Patton as say-

ing—I think it was like this—“A poor plan violently executed today is better than a good plan tomorrow.”

What I want to tell you is that there is an intense interest in this area. We do not have a lot of time. When General Petraeus says, “I need this kind of equipment, I need the State Department to do this, I need improvement on electricity, or I need more this or that,” I mean, somebody has to get it. The time is short. This is a matter of high national importance, important for the national security of this country, our foreign policy, our credibility as a Nation, and our safety, that we be successful in Iraq. I still believe firmly that is a realistic possibility that we can achieve. But we don’t have much time, and we don’t need to wait around a lot of time.

First let me ask you—I know you’ve talked with General Petraeus, and he spoke to me, and I asked him about you, and he was very complimentary of you. Since he’s going back now for his third tour, he has helped train the Iraqi army. He knows, I assume, almost all of their leaders personally. Do you think you have the kind of relationship that can be effective? How can you help him be effective in Iraq?

Admiral FALLON. Senator, I’ll look forward to working with General Petraeus. We have only recently met and had several conversations, not nearly enough to be where we want to be, but, hopefully, in due course, that’ll occur.

I think we’re tremendously advantaged having his experience on the ground. His successive tours over there, although clearly very demanding on himself, and, particularly, his family, should give him the insight to be able to pretty quickly assess where we are, because he’s seen this now from several years back, the year before last, and now today. I would think this would be immensely valuable as we try to really find out where we are.

I hope to be of assistance to him, using my experience in other areas and in this region of the world, as well, to try to put his work in Iraq in the perspective of the region. I think that, while he’s going to be hard at work inside the country, working those details, I might be of benefit to him around the periphery to try to set the conditions that might be favorable for him to execute his actions inside the country.

Senator SESSIONS. I think that’s a good answer, and it has potential to be a good relationship, and I hope that you will work on that.

Senator Reed and, I think, a number of Senators on both sides of the aisle, have been concerned about the interagency process. In one of our briefings, I asked, about the State Department, who’s in charge of economic development, and the answer is the State Department. Who’s in charge of infrastructure improvement? The answer, fundamentally, is the State Department. Who’s in charge of intergovernmental relations? The answer is the State Department. Who’s in charge of building a court system? Justice and State. Who’s in charge of a lot of these things? Other departments and agencies. All of those matters I just mentioned, would you not agree, are critical to a stable and peaceful Iraq—improvement in those areas?

Admiral FALLON. Senator, of course. We need to make progress in each of these areas. I can tell you, from my experience in the Pacific, we had what I consider a terrific working relationship with the Department of State—with our Ambassadors in the region, with Secretary Christopher Hill, the East Asia Pacific Assistant Secretary. We worked issues every day, from a regional perspective, individual ambassadors working within the countries, to try to work with each other to set the conditions to enable us to be successful. I could probably spend half an hour on that.

Senator SESSIONS. I'm not demeaning the State Department.

I'm just talking about this problem. You're going in an area, and we need things done now. We don't need to be waiting for months and months to get negotiations and go through some bureaucratic process to get a power plant in some area of Iraq that's critical to gaining stability for the local mayor, who wants to be on our side, and we have to ask it, and it goes around, and, a year later, it occurs. I'm pretty worried about that. Frankly, the State and the other departments, who also need to contribute more, are having a hard time getting people to come. They're not as willing to go out in dangerous areas as the military is. So, I think some of the matters need to be turned over to the military, more than perhaps in the past, and that the other agencies of our Government need to be more responsive to the legitimate needs of our soldiers, who are placing their lives at risk.

Are you willing to use the courage and determination that you're famous for to stand up for our soldiers there, to make sure this whole interagency process works, and, if need be, call the President of the United States? He's in charge of this thing. He's the one that can direct any agency to do anything to make these things happen.

Admiral FALLON. Yes, sir, and I believe he's anxious to do whatever is necessary to enable us to achieve success. We're going to work this, hard. Recognize the need to have these folks, but also recognize that the military is an expeditionary organization, we're geared to working overseas and at long distances. The Department of State certainly is not, except in their ambassadors. But I recognize the issue. We're going to do everything we can.

Senator SESSIONS. It's something to work on. But, for example, if you conclude that we need 2 to 3 times the number of prison bed spaces as I believe we do in the immediate future, and probably 5 to 10 times in the long term, will you push the bureaucracy to get moving on it? Because, truthfully, we have a catch-and-release policy there now, catching dangerous people and releasing them, because there's no way to get them housed. Are you willing to take an aggressive action on that if need be?

Admiral FALLON. You bet, sir.

Senator SESSIONS. You've also confronted the question of missile defense in the Pacific with North Korea. Now we see the danger with the Iranians, who move that up. I think you've said that our defenses for missile defense capabilities should keep pace with the threat. It seems that the threat is stepping up its pace. Do you think that we need to keep pace with that as we develop our defense budgets?

Admiral FALLON. Yes, sir, Senator. I believe we need to stay ahead of the power curve, and I believe we've made substantial

progress in this country, in the past year, in missile defense. We might want to discuss that in a different setting. But there's been a lot of progress made, and a lot of lessons that we've learned in the Pacific, that I think would be applicable here, in other regions of the world, as well.

Senator SESSIONS. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Sessions.

We'll have a 3-minute second round.

Admiral, in the advance policy questions, you were asked, "What do you believe will induce Iraqi political leaders to make the political compromises necessary for a political solution?" What leverage does the U.S. have in this regard? Your answer, "Current levels of suffering experienced by the Iraqi population should motivate the political leaders to make progress."

Admiral, that hasn't happened. They've had 3½ years-plus of suffering. It hasn't motivated the Iraqi political leaders to make the compromises, which everybody says are essential to be made if there's going to be an end to the violence. I don't know of anybody, no matter what side of this issue they are, or who does not say there must be a political solution if there's going to be an end to the violence. The Iraqis have not reached those political compromises. It seems to me what pressure will be put on them and will make them reach those compromises is the issue which divides so many of us. But I don't think your answer, frankly, is satisfactory, "The suffering experienced by the Iraqi population should motivate the leaders." Of course it should, but it hasn't. So, my question is, what other leverage, since that hasn't worked, does the U.S. have in this regard?

Admiral FALLON. Senator Levin, you're aware that the Iraqi Government has outlined a series of steps that have been called benchmarks in some quarters—

Chairman LEVIN. Most of which they've not taken.

Admiral FALLON. —and they need to take these steps.

Chairman LEVIN. But what's the leverage?

Admiral FALLON. We need to hold them accountable.

Chairman LEVIN. How?

Admiral FALLON. By, I believe, having a very firm dialogue with the leadership. Some of that, I believe, has already occurred. We have given them some time—

Chairman LEVIN. What are the consequences if they fail again?

Admiral FALLON. If there's no progress, then I don't believe we're going to be successful in the military actions. There has to be a commensurate movement forward in political background that's going to give these people the confidence that they can actually effectively move forward as a country.

Chairman LEVIN. How important, Admiral, are clear, real, significant consequences on the Iraqi politicians if they fail to keep these military commitments, political commitments, and economic commitments? Must there be clear, real, significant consequences that they understand will follow, if they continue to fail to keep their commitments?

Admiral FALLON. Senator, I believe that there will have to be a firm understanding that we are not in an open-ended situation where we're just going to sit around and wait forever for things to

happen. But I also believe that it's not going to be particularly constructive right now to tape an edict of a number of actions and give deadlines. I believe in giving them some time. How much time? I don't know. But time is running out. Clearly, I think there's a pretty broad understanding, certainly in my mind and others that I've talked to, that they are going to need to take actions.

Chairman LEVIN. Let me just ask if you agree with General Richard Zilmer, who's the commanding general of our Multi-National Force-West in Iraq—a Marine general, and head of the 1st Marine Expeditionary Force. He responded to a question the other day about the impact on morale of discussions of various resolutions in the U.S. Senate. I'm not asking you to comment on the resolutions. You've indicated, I think, very properly, may I say, that you're not going to get involved in the political side of the debate. You're going to focus on the military missions. Here's what he said, though, about morale, which is very much a matter within your concern. He was asked, "Is there an impact on morale about these—all these debates that are going on?" "Well," he said, "between television and all the rest, and the Internet—marines, sailors, and soldiers, they know what's going on, not only in the United States, but around the world, so they have an opportunity to see and view the news, as anyone else does." He said that, "Yes, we understand there's a debate back home about the direction of the war and where it's going." He says, "But the morale remains very high out here. Our marines understand what their mission is. We watch what happens back home, but I'm not concerned about losing sight of the focus." Then he said, "I'm very comfortable that, despite the debate that goes on back there, our folks over here are staying true to the mission."

Have you heard anything to the contrary?

Admiral FALLON. I'm not familiar with that statement. I can only tell you, Senator, what I observe from my interaction with our forces there. As General Zilmer is said to have indicated, they are very focused on their mission. I think the things that affect their morale most directly are their confidence in one another, in the training they've received, and, most importantly, their ability to be successful in their mission. If they feel that they're actually making progress, then their morale is going to be good. If they feel that they are being given necessary tools to accomplish their mission and—be they equipment and otherwise—if they feel that they're being led by competent, responsible leaders, then their morale is going to be good. So, my observation was that, in most of the places that I visited, my assessment was that our people were feeling that they had the tools and that they were working hard. I think it's our responsibility, as leaders, to give them these necessary capabilities so that they can be successful.

Chairman LEVIN. Thank you, Admiral.

Senator Warner.

Senator WARNER. Thank you very much, Mr. Chairman.

Admiral, I looked at your distinguished biography and the sentence in here, "Admiral Fallon began his naval aviation service flying in an RA-5C Vigilante with a combat deployment to Vietnam." That was about the time that I was in the Pentagon, as you recall, and you were a young lieutenant JG about that time?

Admiral FALLON. Yes, sir.

Senator WARNER. Both of us remember very clearly the tragic circumstances here at home of the American public pulling back of giving the support of the people to the men and women of the Armed Forces. I think it was misfortune. A lot of your generation, when they got back home, having served courageously and at enormous sacrifice, did not return to the welcome arms that they were entitled to. Today, it's quite different. I find the American people are solidly behind our uniformed members and their families, the greatest respect and the heartfelt feelings for the losses and the sacrifices, and the respect the families have for what their service-persons are doing. So, it's a changed situation. But I think it's essential that we continue to work with the American public so that they better understand what are our goals, and are they realistic, and how those young people are going to be employed in the new strategy.

Today, I have to say, with the greatest respect—I've been privileged here, with my dear friend Carl Levin, 29 years on this committee, with many officers coming before us in engagements of our forces overseas and the problems associated, and when I add that to my own years in the Pentagon, having been associated with fine persons like yourself, it's a continuing learning experience for me. I learn greatly from each day of the association with the men and women in uniform. My sincere respect and affection for them is just there, and always will be. But the point I wish to make is that I think you've handled yourself today with a seasoned wisdom that you've gained through these many years, and you very carefully stuck to the role of a military professional, and, no matter the questions that were put to you, no matter the political differences we have—and I respect my colleagues on both sides of the arguments—you steadfastly did not let yourself get entrapped into that political discussion. You clearly impressed upon this committee, and, indeed, the Senate, and, I think, the public that have followed this hearing, you're going out to this job with the experience we need for that new CENTCOM Commander, with an open mind and a willingness to look at all aspects of it and to recognize that the buck stops on your desk, no matter how many fine subordinate commanders you have—the buck stops on your desk. You've shown the flexibility, the openness of mind, to look at the plan as it now is, and to decide what is best to achieve the mission.

As I say, my concern is on this question of the unified chain of command, not departing from time-tested tradition. My concern rests with the American GIs being injected into these situations which go back, as we say, 1,400 years in disagreements. I have no disrespect for the Muslim religion, but it is hard to understand and follow, and how, today, Muslim is falling upon Muslim with the animosity and the bitterness that leads to the killing and the instability.

I wish General Petraeus the very best. I'm reassured by your coming as the overall boss, that you will infuse into your command that seasoned wisdom that you have, and that, together, collectively, you can work on this plan and try and make it work, but make it work in such a way as more and more responsibility goes to the Iraqis, as recommended by the Baker-Hamilton Commission.

I do hope that you've had an opportunity to look through this. Their reports, and what they're done, and how you assess particularly their recommendations with regard to the diplomatic offensive that we have to take in that region, bring those countries of that region together, because the adverse effects—and I totally agree with the President—a loss of this situation will implode that region into such strife that it will impact not only the region, but the entire world, and peace, stability, and the ability of the free nations to do what we can to eliminate this terrorism, which is on the growth, unfortunately, and spreading.

I wish you well, but I would just want to remind people that you bring to this office—and I commend the President for selecting you—the depth of wisdom that you've exhibited here today, and you will work with your commanders to get the violence down, but hopefully to do it in such a way that more and more of the Iraqis take the lead—that's a phrase we haven't heard in this debate—take the lead, which means getting out there in front. They understand the language, they understand the culture. Our youngsters are doing the best to support them to take that lead. To that extent, I hope we could lower the level of Americans involved directly in that Baghdad situation. There are 6 to 7 million people, and there's only so much a military force of an additional 20,000, if we have to put the whole complement in there, can do together with the Iraqis, unless the Iraqis step up and continue to augment their participation.

We have trained, over a period of 2½ years, at an enormous expense to this country, upwards of 200,000 of these individuals. What perplexes me, why they can't take over the principal responsibility, and that our rules of engagement can be drawn up in such a way as if they're charged with the sectarian violence. In al Anbar, our resolution says, "Mr. President, you're correct, full force," because there we're engaged with al Qaeda, the very organization that precipitated the problems that we're experiencing in that region today.

I thank you very much, but, Mr. Chairman, I believe this is an opportunity for our committee to get on record your concerns about a very important development in our overall national security, and that is now the recognized capability of China to interdict satellites above. We have a tremendous dependence on the use of our satellites for a variety of reasons, and now there's concrete evidence that they have the capability, from a ground station to that high altitude, to bring down and incapacitate those missiles. Those hearing devices that we have up there, the platforms that are so essential to our overall security—can you just give us a general assessment of that situation and how best we are going to cope with it in the future?

Chairman LEVIN. I wonder, Senator Warner, if he could do that for the record, because we are at the tail end of a vote here now, and I want to give Senator Sessions a few minutes.

Senator WARNER. Well, I guess you're right.

[The information referred to follows:]

As you are no doubt aware, China's action evoked strong protests from other countries with space-based assets, and rightfully so. This event is being perceived as a major setback for international space cooperation which over the years has yielded

enormous benefit to the world in the commercial and scientific arenas. Unfortunately, this event is reminiscent of the "Cold War" thinking that fueled the arms races of that period of history and is counterproductive to future cooperation programs and objectives. How we should react to this development must be decided upon after intense national-level study and in collaboration with the international community.

Senator WARNER. Could I impose, Mr. Chairman, by suggesting that your letter that you received from the Secretary of State on the matter of benchmarks—I'm all in favor of benchmarks, but if we try, here in Congress, to legislate too many benchmarks, really beyond the assessment of the Secretary of State, who has the principal responsibility, we could force this Government to go tilt, and we'd better know what's going to take their place if it goes tilt, because I'm not one to sign on to this as the last step, this augmentation in Baghdad, the last chance. I come back to the President's phrase, "We cannot let this region implode." So, if, for some reason, this program in Baghdad is not successful, we have to press on with some other program, and I hope that we don't gravitate—Congress—to such a detailed outline of benchmarks and the consequences—there should be consequences for failure, but I don't want those consequences so heavy that they could literally topple this government, because we don't know what might come along and replace it.

Chairman LEVIN. We'll have more to say about the Secretary of State's letter later.

Senator SESSIONS.

Senator SESSIONS. Thank you.

Admiral Fallon, as I understand the difficulty we have in Iraq in achieving a political settlement which ultimately what we need and will be essential, as Senator Levin has so ably and often pointed out, but sometimes it's hard to reach an agreement if one side or the other feels like they're winning or making progress through violence and military action. General Keane suggested that some intelligence indicated that the Sunnis thought they were prevailing, that they were winning. Then it's hard to negotiate, is it not, with them? That to really achieve a negotiated political settlement in which this new government participates in an effective way, we have to have a certain level of security and stability for that to occur in. Is that sort of the challenge we have here?

Admiral FALLON. Senator, you know certainly better than I that the business of politics is about compromise. The level of violence, particularly recently, in Iraq, I can't believe that this is encouraging any one of the factions to think that they're winning, because clearly people are losing lives and an awful lot of blood and treasure along with it.

If this endeavor of a pluralistic democratic entity in Baghdad is going to survive, it's going to require political courage and leadership, I believe, to stand up and make decisions that can be helpful to people. It's going to be tough, because they all have baggage. The degree to which any of them believes they're winning now is pretty much of a stretch.

Senator SESSIONS. It's obvious, from our perspective, they're all losing, the whole country and the region is losing, and it's sad, beyond belief. But insurgencies oftentimes are willing to persist for years, as long as they think they are making some progress toward

goals. All I'm saying to you is, you have to have somebody to negotiate with, you have to have somebody to have agreements with, and if they're now prepared to sit down with you and negotiate effectively, I'm not sure we need to blame it all on the existing government and the Shia majority, when they are being consistently attacked by the Sunni/al Qaeda/Baathist group. That's why my understanding is that we have to maintain a military presence now to try to stabilize the area so these negotiations can occur.

Admiral FALLON. Yes, sir. There's lots of bad and lots of blame to spread around. My suggestion would be—if I were in a position to have a discussion with the leaders in Iraq—would be to do their best to leave as much of the past behind and just focus on the potential and the consequences if they fail to take this opportunity and step forward.

Senator SESSIONS. I think that's correct. Of course, I believe, in Colombia, for example, it became pretty clear that oppressing the Revolutionary Armed Forces of Colombia aggressively with military force was the only way that it was going to reach some sort of peaceful settlement in Colombia. I think they've made progress by increasing their military effort. We wish that wouldn't happen, we wish we could talk our way out of all of these things, but sometimes people are so determined that it takes military force, unfortunately.

Thank you.

Chairman LEVIN. Thank you, Senator Sessions.

Admiral, thank you. We wish you all the best. We thank you and your family. We will hope, now, that we'll be able to report this nomination quickly and get this to the floor. You're well qualified. I think all have expressed our support of you. Your candor and your objectivity is important to us. We're going to continue to rely and count on that. We just wish you the best of luck.

Admiral FALLON. Thank you very much, Senator.

Chairman LEVIN. The hearing is adjourned.

[Whereupon, at 12:27 p.m., the committee adjourned.]

[Prepared questions submitted to ADM William J. Fallon, USN, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I have no recommendations for amending Goldwater-Nichols at this time. However, if confirmed, I would not hesitate to offer proposals in the future that I would consider helpful.

Question. Do you believe that the role of the combatant commanders under the Goldwater-Nichols legislation is appropriate and the policies and processes in existence allow that role to be fulfilled?

Answer. Yes.

Question. Do you see a need for any change in those roles, with regard to the resource allocation process or otherwise?

Answer. No.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander, U.S. Central Command (CENTCOM) to the following offices:

The Under Secretaries of Defense.

Answer. Commander, U.S. CENTCOM coordinates and exchanges information with the Under Secretaries of Defense as needed to set and meet U.S. CENTCOM priorities and requirements for support.

Question. The Assistant Secretaries of Defense.

Answer. Commander, U.S. CENTCOM coordinates and exchanges information with the Assistant Secretaries of Defense as needed to set and meet U.S. CENTCOM priorities and requirements for support.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman is the principal military advisor to the President, National Security Council, and Secretary of Defense. Section 163 of title 10, U.S.C., allows communication between the President or the Secretary of Defense and the combatant commanders to flow through the Chairman. As is custom and traditional practice, and as instructed by the Unified Command Plan, I would normally communicate with the Secretary through the Chairman of the Joint Chiefs of Staff.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. I would communicate with and coordinate with the Vice Chairman of the Joint Chiefs of Staff as required and in the absence of the Chairman of the Joint Chiefs of Staff.

Question. The Director of the Joint Staff.

Answer. I would also communicate and coordinate with the Director as necessary and expect the Deputy Commander, U.S. CENTCOM or Chief of Staff, U.S. CENTCOM would communicate regularly with the Director of the Joint Staff.

Question. The Secretaries of the Military Departments.

Answer. The Secretaries of the military departments are responsible for the administration and support of forces assigned to the combatant commands. Commander, U.S. CENTCOM coordinates closely with the secretaries to ensure that requirements to organize, train, and equip CENTCOM forces are met.

Question. The Service Chiefs.

Answer. Commander, U.S. CENTCOM communicates and exchanges information with the Service Chiefs of Staff to support their responsibility for organizing, training, and equipping forces. Successful execution of the U.S. CENTCOM mission responsibilities requires close coordination with the Service Chiefs. If confirmed, I intend to work closely with the Service Chiefs of Staff to understand their service capabilities and to effectively employ those capabilities in executing the U.S. CENTCOM mission.

Question. The other combatant commanders.

Answer. Commander, U.S. CENTCOM maintains close relationships with the other combatant commanders. These relationships are critical to the execution of our National Military Strategy, and are characterized by mutual support, frequent contact, and productive exchanges of information on key issues.

Question. The U.S. Ambassador to Iraq.

Answer. I would necessarily have a close working relationship with the U.S. Ambassador to Iraq in order to ensure unity of effort between U.S. military and all other U.S. Government activities in Iraq.

QUALIFICATIONS

Question. If confirmed, you will be entering this important position at a critical time for the U.S. CENTCOM.

What background and experience do you have that you believe qualifies you for this position?

Answer. I have benefited from a broad range of assignments during my nearly 40 years in uniform, from tactical to operational command, and have considerable experience with joint and coalition operations, including combat operations. I was privileged to command Carrier Air Wing Eight in U.S.S. *Theodore Roosevelt* in 1991 during Operation Desert Storm. In 1995, as a flag officer, I served as Commander, Carrier Group Eight and Commander, Battle Force, U.S. Sixth Fleet during North Atlantic Treaty Organization (NATO) Operation Deliberate Force in Bosnia. During these operations, I worked closely with joint U.S. and combined forces in planning, coordinating, and executing sustained combat operations. I also served as Deputy Director for Operations, Joint Task Force Southwest Asia in Riyadh, Saudi Arabia, directing air operations in the Iraqi No-Fly Zones. I have additional experience in joint and combined planning and operations at both the operational and strategic levels through assignments as Assistant Chief of Staff, Plans and Policy, for the NATO Supreme Allied Commander, Atlantic and as Deputy Commander and Chief of Staff for the U.S. Atlantic Fleet and the former U.S. Atlantic Command, the predecessor to U.S. Joint Forces Command. For nearly 3 years, I served as Commander, U.S. Second Fleet and NATO Striking Fleet Atlantic, working directly with all U.S. armed services as well as those of our NATO allies in training and in developing and testing joint and combined tactics for the entire spectrum of combat operations. As Vice Chief of Naval Operations from 2000 to 2003, I worked in close cooperation with OSD, the Joint Staff, and the other armed services developing transformational strategies and joint requirements. As Commander, U.S. Fleet Forces Command and U.S. Atlantic Fleet from October 2003 to February 2005, I served as Naval Component Commander to U.S. Joint Forces Command, and supported U.S. Northern Command and U.S. Strategic Command. In my current assignment as Commander, U.S. Pacific Command (PACOM), I have gained extensive experience in the largest combatant command AOR, with more than 60 percent of the world's population and four of the five largest economic GDPs. This area has presented several challenges, including the maintenance of sensitive alliances, insurgencies in southeast Asia, the situation in North Korea, and the U.S. relationship with the People's Republic of China. The widely varied opportunities I have had during my career have given me a deep appreciation of, and experience with, all branches of our Armed Forces, the interagency, and many of our allies and partners.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Commander, U.S. CENTCOM?

Answer.

- Combatting the insurgencies in Iraq and Afghanistan and directing the restoration of security and stability in these nations.
- Countering the extremist threat which destabilizes governments in the region, commits attacks on the U.S. and numerous other nations, and continues to threaten the U.S. Homeland.
- The relationship with Iran and its support to insurgents and destabilizing activities in regional nations.
- Protecting vital lines of commerce in the region.
- Continuing instability and humanitarian crises in Africa.

Question. If confirmed, what plans do you have for addressing these challenges? Specifically, I intend to:

- Support U.S. national interests and policies.
- Work closely with our ambassadors and military commanders in Iraq and Afghanistan to address the critical need for security and stability in these countries.
- Work in close consultation with U.S. agencies and military commanders, and with our friends in the region to develop a clear understanding and appreciation of U.S. national interests and the issues facing the Nations in the U.S. CENTCOM region.
- Signal the strong resolve of the United States to protect its national interests and to enhance regional stability.
- Posture U.S. forces to deploy and respond rapidly to regional security concerns.

MOST SERIOUS PROBLEMS

Question. What do you consider to be the most serious problems in the performance of the functions of Commander, U.S. CENTCOM?

Answer. Clearly, the most serious problems are the ongoing combat operations in Iraq and Afghanistan.

Question. What management actions and timelines would you establish to address these problems?

Answer. My intention is to gain a full appreciation of the situation in the region as quickly as possible and then to provide appropriate direction and guidance to our military forces.

IRAQ

Question. What is your assessment of the current situation facing the United States in Iraq?

Answer. Significant progress has been made in developing Iraqi security forces and governing institutions since the collapse of the Saddam Hussein regime. The Iraqi people have approved a new constitution and elected a permanent, multi-party government. The Iraqi government has recognized the requirement for security and has identified steps to improve the prospects for political reconciliation and economic growth.

However, the insurgent bombing of the Al Askariya Mosque in February 2006 reversed the momentum that followed the successful Iraqi elections. Sectarian-motivated violence now inhibits political progress, effective governance, and economic development. Many other factors, including poor infrastructure, corruption, and lack of experience at governance have exacerbated widespread mistrust between sectarian groups within Iraq.

Levels of violence perpetuated by al Qaeda terrorists, insurgents aligned with the previous regime and competing sectarian death squads have increased steadily during the past year. Al Qaeda operatives and their allies target U.S. and Iraqi security forces and innocent civilians in an effort to discredit the U.S. and Iraqi governments and incite sectarian violence wherever possible. Their goal is instability and chaos. Other insurgents and sectarian entities are pursuing their own murderous agendas, receiving support from within Iran and Syria.

Although growing in number and confidence, much of the Iraqi security force has not yet demonstrated an ability to stand on its own in the face of multiple onslaughts to stability. U.S. military strategy of having the Iraqi security forces lead most of the security effort has not been as successful as anticipated.

Question. From your perspective, what are the top lessons learned from our experience in Iraq?

Answer. U.S. forces in Iraq remain disciplined, spirited, and adaptable in the face of difficult battlefield conditions. Our forces have been training and have partnered with Iraqi security forces to establish a secure environment for the newly elected government of Iraq. This endeavor has proven more challenging than expected with many assumptions either incorrectly drawn or unfulfilled. Securing the stability of the country has been more difficult than anticipated. Our ability to correctly assess the political, economic, and security situation in Iraq has been lacking. While successful in clearing areas of insurgent and terrorist activity, we have relearned the need to hold these areas secure until Iraqi security forces and local political and economic activity have provided essential confidence to the population.

Question. What do you consider to be the most significant mistakes the U.S. has made to date in Iraq? Which of these do you believe are still having an impact?

Answer. President Bush, in his 10 January address to the Nation, highlighted the key mistakes:

- Miscalculating that initial elections would bring Iraqis together;
- Believing that as we trained Iraqi security forces, we could accomplish our mission with fewer U.S. troops;
- Underestimating the ability of al Qaeda and Sunni insurgents to provoke sectarian conflict; and
- Failing to anticipate the extent of the response of radical Shia elements and death squads.

The issues cited here are still effecting the situation but actions are underway by the Iraqi and U.S. Governments to address them.

Question. What do you believe are the most important steps that the United States needs to take in Iraq?

Answer. The most important step we need to take in Iraq is to work with the Iraqi government to improve security. We also need to facilitate economic and infrastructure development while helping the Iraqis establish and maintain a viable representative political process.

Question. What role, if any, did you play in the development of the new Iraq strategy recently announced by the President?

Answer. In my position as Commander U.S. PACOM, I have not directly participated in the development of the new Iraq strategy.

Question. Do you believe that there is a purely military solution in Iraq, or must the solution be primarily a political one?

Answer. Although the military effort is critical to progress, a successful Iraq strategy will require coordinated economic, diplomatic, and political as well as security development.

Question. Do you believe that political compromise among Iraqi political leaders is a necessary condition for a political solution?

Answer. A successful political process requires compromise. The three principal factions in Iraq must find a way to cooperate on essential issues.

Question. Do you believe that quelling the current level of violence is a necessary condition for a political solution?

Answer. Substantially reducing the level of sectarian violence is essential to facilitate improved political process.

Question. What do you believe will induce Iraqi political leaders to make the political compromises necessary for a political solution? What leverage does the U.S. have in this regard?

Answer. Current levels of suffering experienced by the Iraqi population should motivate the political leaders to make progress. President Bush has clearly stated the need for a partnership between Prime Minister Maliki, Iraqi moderates, and the United States where all parties are clear on expectations and responsibilities. The Iraqi government has cited a number of actions it considers essential to national political progress. We should carefully monitor and assess the progress in these actions.

Question. What do you see as a reasonable estimate of the time it will take to demonstrate success in securing Baghdad?

Answer. I would not speculate on the amount of time or levels of success which might be possible from my current position. But the urgent need to make progress is obvious.

Question. In the fiscal year 2007 Defense Authorization and Appropriation Acts Congress prohibited the use of funds to seek permanent bases in Iraq or to control the oil resources of Iraq.

Do you agree that it is not and should not be the policy of the United States to seek permanent basing of U.S. forces in Iraq or to exercise control over Iraq's oil resources?

Answer. Yes.

Question. If you agree, what are your views on the construction of any additional facilities inside Iraq for use by our military forces?

Answer. Operational commanders may request construction of temporary sites to facilitate necessary operations, and I would give appropriate consideration to such requests.

Question. For the past several years, the Army and Marine Corps have had separate areas of responsibility in Iraq, with Marine forces assigned to the Anbar province. The two services have different logistics systems, and the Combined Forces Land Component Command (CFLCC) appears to now focus almost exclusively on Army requirements.

Do you believe the Army and Marine Corps forces operating in Iraq have an appropriate degree of jointness?

Answer. From observation during my visits to Iraq and through discussion with various commanders, I believe the Army and Marine Corps forces operating in Iraq have demonstrated an adequate degree of Joint cooperation, both operationally and logistically. The 3rd Army Headquarters serves both as the CFLCC and as the Army Forces (ARFOR) command with title 10 logistics responsibilities. As the ARFOR Commander, 3rd Army conducts joint and combined logistics operations, including support for Marine Expeditionary Unit rotations. At the tactical level, an Army Brigade Combat Team is deployed with the Marine Expeditionary Force operating in Anbar Province. An Army Corps Support Group, also deployed to Anbar Province, integrates logistic support for Marine units within the Theater Logistics Architecture. If confirmed, I will assess all aspects of jointness and ensure collaboration on operational and logistic matters between the Services.

Question. Do you see any problems with the extent of reliance of U.S. forces in Iraq on contractor support?

Answer. I do not have sufficient knowledge to address this question.

AFGHANISTAN

Question. More than 4 years after securing a military victory against the Taliban and al Qaeda in Afghanistan, that nation remains a place with areas of unrest.

What is your assessment of the current situation in Afghanistan?

Answer. Much progress has been achieved in Afghanistan. The expansion of the International Security and Assistance Force and transition of the counterinsurgency mission to NATO command are positive steps. The resurgence of the Taliban in some areas of the country is a concern and must be addressed if political progress and economic development are to be sustained.

Question. What is the status of efforts to develop and field an effective Afghan Army and national police force?

Answer. The Afghan National Army (ANA) is becoming more professional and growing in confidence. As of this month, approximately 32,000 of the 70,000 planned ANA soldiers have received training and equipment and now routinely engage the enemy alongside U.S. and coalition forces.

More than 60,000 of the planned 82,000 Ministry of the Interior police officers have received training and equipment. Although they are not as professional or capable as the ANA, improvement has been noted. Continued focus on Afghan Police training and education will be critical to the future of Afghanistan, and close attention must be paid to ensure progress is being made in the effectiveness of the force.

Question. In your view, what additional military or other assistance is required to ensure the transition of Afghanistan to a stable, democratic, and economically viable nation?

Answer. Continued military assistance to expand security will be the critical enabler of success. Support to the ANA and police must continue as well as economic assistance and expanding good governance throughout Afghanistan.

Question. In October 2006, British LTG Richards, Commander of the NATO International Security Assistance Force (ISAF) mission in Afghanistan, warned that coalition forces may be running out of time to show measurable progress in Afghanistan. He stated that if there is no progress in improving conditions for the Afghani people, they may choose "the rotten future offered by the Taliban" over the hopeful future which coalition forces have taken too long to deliver.

Do you agree with LTG Richards' assessment that coalition forces have a limited window of opportunity in which to show improvements in the lives of the Afghani people?

Answer. I would not speculate on the resilience of the Afghan people, although I would note they have endured the trauma of war for almost 30 years.

Question. What steps do you believe coalition forces can take to improve the lives of the Afghani people in the near term?

Answer. We should strive to provide enhanced security in areas where the Provincial Reconstruction Teams and international aid agencies are assisting reconstruction efforts. We should look for economic development opportunities to offset the opium production.

We should support ISAF Afghan Development Zone (ADZ) initiatives, with security efforts in key regions setting conditions for reconstruction and governance. ADZs complement the Afghan Government's National Development Strategy for security, governance, rule of law, and human rights, and economic and social development. This overarching strategy deserves our support.

Question. Military intelligence officials have stated that Taliban and al Qaeda attacks across the Afghan-Pakistan border have increased fourfold since September when the Pakistan Government signed an agreement with tribal elders in the border region ceding control over some border areas in western Pakistan.

What more can be done to prevent cross border incursions by the Taliban and al Qaeda from Pakistan into Afghanistan?

Answer. If confirmed, I intend to study the situation in Afghanistan and consult with the military leadership there to determine the best way to address this issue.

Question. In your view, should the Pakistan Government be doing more to prevent these cross-border incursions?

Answer. Yes. I believe that more could be done, and I will focus attention on this issue to determine what recommendations I will forward in this regard.

Question. What role do you believe U.S. forces should play?

Answer. We can enhance the capacity of Pakistan's Frontier Corps through our security assistance program. We will continue to provide intelligence support as well.

Question. Afghanistan is in the CENTCOM's area of responsibility (AOR). U.S. European Command (EUCOM) oversees the NATO ISAF force in Afghanistan.

In your view, does this “seam” present any problems for the coordination and effectiveness of the ISAF and Operation Enduring Freedom (OEF) missions in Afghanistan?

Answer. I do not foresee any issues with the CENTCOM–SHAPE Relationship. NATO involvement in Afghanistan has been closely coordinated with CENTCOM. Throughout the process, measures to ensure synergy, maintenance of momentum, and reliable deconfliction of operations were painstakingly considered. I have extensive personal experience with the NATO military and political processes, which should facilitate my interaction and effectiveness with the NATO–CENTCOM relationship.

PAKISTAN

Question. What is your assessment of the current status of U.S.-Pakistan military cooperation?

Answer. U.S.-Pakistan military cooperation has progressively improved since 11 September 2001. We coordinate military activities through a U.S. liaison team in Islamabad and the Pakistani military presence in Tampa, Bahrain, and Afghanistan.

Question. What is your assessment of the level of cooperation we have received from Pakistan in the war on terrorism?

Answer. Pakistan is an effective and vital partner in the war on terror. Pakistan has captured or killed more suspected AQ and Taliban than any other coalition member.

Question. What is your assessment of the current situation with regard to Pakistani-Indian relations?

Answer. Relations between India and Pakistan have improved through confidence building measures and dialogue during the past 2 years. Kashmir remains the core issue, but progress is being realized through incremental steps.

FORMER SOVIET UNION STATES

Question. Several former Soviet states have played roles in supporting the U.S. and coalition forces in the global war on terrorism.

What is your assessment of current U.S. military relationships with these nations, including Uzbekistan, Tajikistan, and Kyrgyzstan?

Answer. Contributions from former Soviet states in Central Asia have been significant and helpful. Uzbekistan, Tajikistan, and Kyrgyzstan have provided basing and overflight from the beginning of the global war on terror. Other former Soviet states including Latvia, Lithuania, Kazakhstan, Ukraine, Georgia, and Estonia have provided troops in support of the coalition in Iraq and Afghanistan.

The U.S. military relationship with many of the former Soviet states continues to develop incrementally. Much of our interaction is focused on building the capacity of these nations to ensure regional stability and security.

Question. What security challenges do you see in this portion of the CENTCOM AOR?

Answer. The security challenges in the Central Asian states are of concern because of the impact of extremism and criminal activity on economic development and the fragility of the governments. Additionally, the harsh environmental legacy of Soviet weapons and industrial programs, combined with severely restricted supplies of fresh water, further hobble legitimate economic growth.

IRAN

Question. Ambassador John Negroponte, Director of National Intelligence, recently testified before the Senate Select Intelligence Committee about Iran's growing influence in the Persian Gulf region. He stated, “Under the Ahmadinejad government, Iran is enhancing its ability to project its military power, primarily with ballistic missiles and naval power—with the goal of dominating the Gulf region and deterring potential adversaries.”

Do you agree with Ambassador Negroponte's assessment to the Senate Select Intelligence Committee regarding Iran's goals in the region?

Answer. Yes. In addition to these conventional means, Iran is attempting to enhance its power through asymmetric means, such as support to international terrorism and the pursuit of a nuclear weapons capability.

Question. What options do you believe are available to the United States to counter Iran's growing influence in the region?

Answer. We should continue to work through the United Nations Security Council to enjoin the Iranian regime to halt its enrichment of uranium and its pursuit of nuclear weapons.

We should continue to develop a regional security framework with our partners in the Gulf to deter Iranian aggression and protect our common interests. This framework can include security assistance, missile defense, joint exercises, and information sharing.

Question. What is the view of U.S. allies in the region with regard to the threat posed by Iran?

Answer. If confirmed, I intend to speak with our allies in the region about this issue. From my perspective as PACOM commander, I sense that our allies in the region are more concerned about the potential threat posed by Iran now than at any time since the Iran-Iraq War.

Question. What is your assessment of the prospects for political reform in Iran?

Answer. Iran's political system is slowly changing as its people increasingly participate in representative processes. However, the unelected institutions of the Iranian regime are well entrenched, hold the preponderance of political power in Iran, and control of Iran's military forces and intelligence services.

Question. Do you believe that a protracted deployment of U.S. troops in Iraq, if the situation on the ground in Iraq does not improve, could strengthen Iran's influence in the region?

Answer. The protracted deployment of U.S. forces in Iraq would not necessarily strengthen Iran's influence in the region.

IRAQI REFUGEES

Question. The United Nations estimates that approximately 2.3 million Iraqis have fled the violence in their country; 1.8 million have fled to surrounding countries, while some 500,000 have vacated their homes for safer areas within Iraq.

What is your assessment of the refugee crisis in Iraq?

Answer. There are some refugee problems inside Iraq, and the United Nations High Commissioner for Refugees is currently working the situation in the Northern Kurdistan Region. A greater refugee challenge exists in neighboring countries, which are dealing with the situation with their own resources and the support of the International Community. Once Iraq is stable and secure, I believe that a majority will return. The larger problem in Iraq is Internally Displaced Persons who affect regional demographics and pose a potential threat to long-term security and stability.

Question. Beyond working to improve the security environment in Iraq, do you believe that the U.S. military should play a role in addressing this crisis?

Answer. The U.S. military's role in providing humanitarian relief for these persons will depend on the needs of the mission in Iraq and the availability of U.S. forces.

HORN OF AFRICA

Question. One of CENTCOM's significant sub-regions is the Horn of Africa (HOA). Until a new African Command is stood up, CENTCOM will continue to be responsible for this region, which will likely experience continued instability and humanitarian crisis as demonstrated by recent events in Somalia.

What is the strategic importance of this region to the United States?

Answer. HOA sits astride one of the most critical sea lines of communication in the world. It is imperative that we maintain freedom of navigation to ensure strategic maritime access to the CENTCOM AOR and freedom of movement of oceanborne commerce. We must remain engaged in HOA to deny terrorist organizations the ability to operate freely by building host nation capacities and governance capability to reduce ungoverned spaces. Commander, Joint Task Force-HOA has been engaged with key partner countries in the area, conducting humanitarian and civil military operations, as well as building host nation capabilities.

Question. Over the last few weeks, the U.S. military has had a very public presence in Somalia.

What is your understanding of the U.S. Government's policy for Somalia and how U.S. military action there supports that policy?

Answer. The U.S. has three principal goals in Somalia: 1) support the establishment of a stable government based on genuine national reconciliation; 2) promote security and stability on the ground; and 3) respond to the humanitarian needs of the Somali people.

AFRICA COMMAND

Question. Over the last year or so, the U.S. Government has mobilized more of its resources to focus on the strategic importance of Africa. The Department of Defense has played an important role through two Combatant Commands—EUCOM

via the Trans Sahara Counterterrorism Program and CENTCOM via the creation of the Combined Joint Task Force—HOA. There are 53 countries in Africa—42 are in the EUCOM AOR and 11 are in the CENTCOM AOR.

Do you support the proposal to create a new unified command for Africa and to transfer responsibility for operations in the HOA to that new command?

Answer. Yes. If confirmed as Commander, USCENTCOM, I will support the standup of AFRICOM by doing whatever we can to implement this new command.

Question. What impact would such a transfer have on the conduct of antiterrorism and other operations in that region?

Answer. I would not anticipate any degradation in our antiterrorism efforts.

Question. What will you do to ensure a smooth transition and to manage the seams between CENTCOM and the new African Command?

Answer. To ensure a smooth transition, AFRICOM will be established incrementally with the support of EUCOM, which is responsible for military operations in most of Africa. This phased approach should minimize turnover concerns as mission sets are transferred from EUCOM, CENTCOM, and PACOM to AFRICOM.

With respect to seams between CENTCOM and AFRICOM, we will manage these situations through direct coordination between commands, just as we have done previously with EUCOM and continue to do with PACOM.

DETAINEE TREATMENT STANDARDS

Question. Do you agree with the policy set forth in the July 7, 2006 memorandum issued by Deputy Secretary of Defense England stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2–22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. Do you share the view of the Judge Advocates General that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts?

Answer. I believe that we should pay careful attention to ensuring that standards for detainee treatment comply fully with the law and reflect American values. We also should be aware of the risk that the manner in which we treat our own detainees may have an effect on the manner in which U.S. soldiers, sailors, airmen, and marines are treated should they be captured in future conflicts. U.S. Armed Forces policy is to treat all detainees, no matter their status, humanely and in accordance with the law of war. However, as you well know, the enemy we are currently fighting in Afghanistan and Iraq have repeatedly demonstrated their absolute disregard for the law of war, including the provisions of Common Article 3.

Question. Do you believe it is consistent with effective counterinsurgency operations for U.S. forces to comply fully with the requirements of Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. How will you ensure that U.S. forces in the CENTCOM AOR comply with the standards in the Army Field Manual, the DOD Directive, and applicable requirements of U.S. and international law regarding detention and interrogation operations?

Answer. I will continue to emphasize law of war training and specific training for those involved in interrogation. I will also ensure U.S. operational commanders comply with all applicable regulations and law, including the Detainee Treatment Act of 2005.

SCIENTIFIC ADVISORS FOR COMBATANT COMMANDERS

Question. Scientific advisors to combatant commanders have been effectively utilized as a means of technology transition and providing operators' solutions to warfighter challenges.

If confirmed, how would your command make use of the technical expertise available in the Services and their laboratories in order to provide scientific and technical advice to the warfighters?

Answer. If confirmed, I will task the Science Advisor to work closely with the broader scientific community—particularly the Service laboratories and the Office of

the Director, Defense Research and Engineering—to ensure that U.S. CENTCOM benefits from the best technical advice our Nation has to offer. Routine interaction with these organizations would also help U.S. CENTCOM shape the Department's research and development effort to match up with command requirements.

BANDWIDTH ON THE BATTLEFIELD

Question. Unmanned assets, such as persistent unmanned aerial vehicles, require tremendous bandwidth capacity. Command and control, blue force tracking and movement of intelligence products also use significant amounts of bandwidth.

What challenges do you anticipate in fully utilizing these important assets with the limited bandwidth currently available to the warfighter?

Answer. The chief challenge is efficiently managing the bandwidth to achieve maximum impact from intelligence, surveillance, and reconnaissance capabilities.

Question. What is your assessment of the bandwidth available during Operation Iraqi Freedom (OIF)?

Answer. My initial assessment is that bandwidth is sufficient for intelligence product dissemination and situational awareness. However, as the requirement for additional full-motion video ISR assets and other bandwidth intensive systems come online, the current bandwidth could become a limiting factor, but I would push hard for increased efficiency of utilization.

MISSILE AND WEAPONS OF MASS DESTRUCTION THREATS

Question. Iran continues to develop short- and medium-range ballistic missiles and could develop ballistic missiles capable of reaching the United States in the relatively near-term. The Intelligence Community assesses that Iran could test such a missile later this decade and will “likely” pose an ICBM threat to the United States by 2015. Iran also has a significant naval presence in the Persian Gulf, and shore-based antiship cruise missiles. The Intelligence Community also assesses that Iran is actively pursuing weapons of mass destruction (WMD), and could have nuclear weapons within the decade.

How do you evaluate Iran's current capability to use ballistic missiles and WMD against U.S. forces, allies and friends, and what is your projection of Iran's future capabilities?

Answer. Iran can employ ballistic missiles up to 1,300 km with little/no advance warning and with greater accuracy and effectiveness than Iraq demonstrated in 1991 and 2003. Iran has expanded ballistic missile forces and capabilities, but remains dependent on foreign technical support. Tehran can employ CW via missile, artillery, and aerial weapons, although it is unclear if a standing CW stockpile exists. Iran is unlikely to produce enough fissile material for a nuclear weapon until mid-next decade.

Question. How do you evaluate Iran's cruise missile capabilities, and Iran's ability to threaten U.S. naval forces and commercial shipping in the Persian Gulf, the Straits of Hormuz, and the Arabian Sea?

Answer. Iran can threaten undefended commercial shipping and create a tactically challenging environment for naval forces in constrained waters of the Strait of Hormuz and the Gulf region. However, Iran also has operational and tactical weaknesses that can be effectively exploited by U.S. forces.

Question. If confirmed, how would you protect the troops and allies under your command from these threats?

Answer. After consulting with select nations in the CENTCOM AOR and confirming their support, I would use a combination of U.S. and Coalition Ballistic Missile Defense and Early Warning (EW) capabilities to protect both U.S. and Coalition critical military and geopolitical assets.

SEXUAL ASSAULT

Question. If confirmed as Commander, U.S. CENTCOM, you will be responsible for ensuring compliance with DOD policies on prevention of and response to sexual assaults throughout the CENTCOM AOR.

What lessons did you learn in implementation of sexual assault training, reporting protocols and command awareness during your tour as Commander, U.S. PACOM, that can be applied in the U.S. CENTCOM?

Answer. As PACOM Commander, I observed that training—both pre-deployment and response personnel training—is essential in preventing and effectively responding to allegations and incidents of sexual assault. Additionally, I believe that the Department of Defense Sexual Assault Prevention Program has provided commanders clear, proactive sexual assault response protocols.

Question. What are the unique issues that you believe need to be addressed to ensure that policies on prevention, reporting, medical treatment and victim support are available in the operational environments of Iraq and Afghanistan?

Answer. We should maintain sexual assault awareness in the operational environment by conducting recurring in-theater training. We should also continue to ensure that supplies, trained personnel, and transportation resources are readily accessible and available to deployed personnel.

Question. If confirmed, how would you assess the current adequacy of such resources in the CENTCOM AOR?

Answer. If confirmed, I would ensure that CENTCOM sexual assault policy and practice align with current Department of Defense policies as prescribed in DODD 6495 and DODI 6495. I would maintain command emphasis on these policies and the Sexual Assault Prevention Program.

MENTAL HEALTH IN THEATER

Question. The Army's Mental Health Advisory Team (MHAT) has made three separate assessments over the past several years detailing the immediate effects of combat on mental health conditions of U.S. soldiers deployed to Iraq. The most recent study, MHAT III, found that multiple deployers reported experiencing higher levels of acute stress, and that overall levels of combat stressors are increasing. These types of reports lend support to the fact that increasing numbers of troops are returning from duty in Iraq with Post-Traumatic Stress Disorder, depression, and other mental health issues.

Please summarize for the committee your understanding of the key findings of each of the previous mental health assessments, actions taken to address key findings in each, and the effect of such actions.

Answer. I understand these studies concluded that multiple or long deployments can lead to increased incidents of mental health issues. The level of combat and quality of noncommissioned officer leadership directly affect servicemembers' mental health. The Military Services have established an array of assessment, prevention, and treatment programs that provide mental health support before, during, and after deployments.

I understand that CENTCOM policy requires pre- and post-deployment mental health assessments and reassessments. MNF-I has created an expert working group to assess the status of mental health in the AOR. CENTCOM has also redistributed mental health staff to provide better coverage for deployed personnel.

Question. If confirmed, would you support continuous mental health assessments of the U.S. forces in Iraq, to include naval forces on the ground?

Answer. Yes.

Question. Do you have any thoughts on how we can best address the mental health needs of our troops and their families, in terms of both prevention and treatment?

Answer. We must continue to re-examine whether we are doing all we should to meet the mental health needs of deployed personnel. Where possible, I will work with the Service Chiefs to ensure they have adequate programs and support systems at their respective installations to support servicemembers and their families back home.

Question. If confirmed, will you request additional behavioral health resources from all three Services, if needed, to meet the needs of current and future units deployed to Iraq?

Answer. Yes. If additional Mental Health Forces are requested in support of OIF/OEF and global war on terrorism, I will work with the Joint Staff and the Global Force Manager, Joint Forces Command, for additional mental health resources.

Question. The DOD Mental Health Task Force recently received testimony that the U.S. military does not have enough adequately trained mental health professionals to meet the growing needs for mental health support in the military.

Do you share this concern about the adequacy of mental health professionals to support members of the Armed Forces, especially those in deployed and operational environments, and their families?

Answer. I am always concerned about the welfare of our servicemembers, our DOD civilians, and their families. If confirmed, I would expect commanders to leverage all resources—morale, welfare, religious support, and family support programs as well as health professionals—to meet the mental health needs of our servicemembers and their families. I believe that if additional capabilities were needed in the CENTCOM AOR, the Services would provide them.

Question. As commander of the U.S. PACOM, what steps have you taken to ensure adequate mental health support for deployed military members and their families?

Answer. As PACOM Commander, I have worked with my subordinate commanders to regularly assess our mental health requirements and the adequacy of available mental health resources.

Question. If confirmed, what steps would you take to ensure the adequacy of mental health support and resources in the CENTCOM AOR both in general, and specifically in combat zones?

Answer. The mental health of deployed forces in theater is a major responsibility of the leadership of the Armed Forces. It is a responsibility to the individual soldier, sailor, airman, and marine, to the fighting force as a whole, to their families, and to the Nation. The military Services have in place a broad array of assessment, prevention, and treatment programs. Medical conditions that may limit or disqualify deployed servicemembers are continually assessed, while screening, assessment, and educational programs take place across the entire deployment cycle. A spectrum of prevention, stress control, and mental health care is available in theater. Pre- and post-deployment health assessments are conducted. Each branch of Service has specific combat stress and deployment mental health support programs available before, during, and after the deployment cycle. These provide support tailored to the Service's mission and risk factors their personnel might face. In addition, cross-functional planning teams bring together subject matter experts from across the Services, the Joint Staff, and DOD.

I support a very robust program of mental health prevention, assessment, and treatment. I have not had an opportunity to be briefed on the Army's MHAT assessments, nor to develop a specific action plan to address any needed strengthening of the current program. If I am confirmed, I will look to both our health care professionals and command leadership to help me assess the needs, and will seek support from the military and civilian leadership of the Department. If I am confirmed and if I determine additional mental health professionals are needed in theater, I will ask for them.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. I agree.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. I agree.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Commander, U.S. CENTCOM?

Answer. I agree.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. I agree.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. I intend to cooperate fully with Congress to ensure an appropriate and timely response from U.S. CENTCOM to all congressional requests.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR HILLARY RODHAM CLINTON

LEVERAGE ON IRAQI LEADERS

1. Senator CLINTON. Admiral Fallon, Iraqi political leaders have demonstrated little progress in decreasing the increased levels of sectarian violence over the past year. On page 9, of responses provided to the advance policy questions, specifically

“What do you believe will induce Iraqi political leaders to make the political compromises necessary for a political solution? What leverage does the U.S. have in this regard?” The answer provided stated, “Current levels of suffering experienced by the Iraqi population should motivate the political leaders to make progress.” Does the U.S. have any other leverage over the Iraqi political leaders?

Admiral FALLON. There are a number of economic, political, and military options that could offer a degree of leverage. General Petraeus is working directly with officials in the Government of Iraq to ascertain the best combination of U.S. policies to expedite national reconciliation.

2. Senator CLINTON. Admiral Fallon, many of us believe that beginning a phased redeployment of U.S. troops from Iraq will force the Iraqis to make the tough political compromises to make progress. Do you think adjustments in our force levels offer potential leverage with the Iraqis?

Admiral FALLON. The Government of Iraq is under tremendous pressure from the U.S. Government and the Iraqi people to produce tangible results. Decreasing our troop levels at this time would weaken Prime Minister Maliki and embolden the insurgents.

Although our support for the Government of Iraq is not open ended, it is imperative that we provide Prime Minister Maliki and his government time and space to establish the institutions of governance, after decades of totalitarian rule.

PRIVATE CONTRACTORS

3. Senator CLINTON. Admiral Fallon, many of us on the Committee have been concerned about the extent to which we have relied on private contractors in Iraq. On page 10, of responses provided to the advance policy questions, specifically “Do you see any problems with the extent of reliance of U.S. forces in Iraq on contractor support?” The answer provided stated, “I do not have sufficient knowledge to address this question.” Will you look into this issue once you are confirmed?

Admiral FALLON. Yes.

IRAQI GOVERNMENT LEGITIMACY

4. Senator CLINTON. Admiral Fallon, a main tenet of counterinsurgency doctrine is that victory is achieved when the populace consents to the government's legitimacy and stops their active and passive support to the insurgency. Do you believe that the current government in Baghdad is currently governing in a way that enhances its legitimacy?

Admiral FALLON. Yes, the current government is focused on quickly restoring basic services to increase populace support. Establishing reasonable security is of primary importance in this endeavor.

5. Senator CLINTON. Admiral Fallon, is the fighting in Baghdad the result of an insurgency or a sectarian civil war?

Admiral FALLON. Iraqi society's growing polarization, the persistent weakness of the security forces and the state in general, and all sides' ready recourse to violence are collectively driving an increase in communal and insurgent violence and political extremism. Unless efforts to reverse these conditions show measurable progress during the coming 12 to 18 months, we assess that the overall security situation will continue to deteriorate at rates comparable to the latter part of 2006.

Extremists—most notably the Sunni jihadist group al Qaeda in Iraq and Shia oppositionist Jaysh al-Mahdi (JAM)—continue to act as very effective accelerators for what has become a self-sustaining inter-sectarian struggle between Shia and Sunnis.

The Intelligence Community judges that the term “civil war” does not adequately capture the complexity of the conflict in Iraq, which includes extensive Shia-on-Shia violence, al Qaeda and Sunni insurgent attacks on coalition forces, and widespread criminally motivated violence. Nonetheless, the term “civil war” accurately describes key elements of the Iraqi conflict, including the hardening of ethno-sectarian identities, a sea change in the character of the violence, ethno-sectarian mobilization, and population displacements.”

6. Senator CLINTON. Admiral Fallon, how will you tailor the best practices of counterinsurgency to quell the continued sectarian blood letting?

Admiral FALLON. I will provide General Petraeus the strategic guidance and resources he needs to execute an effective counterinsurgency campaign. General

Petraeus and I will continuously assess the progress and adjust as required to ensure success. Additionally, I will work in concert with the State Department to remove outside support for insurgents and militias in Iraq.

IRAN'S STRATEGIC POSITION

7. Senator CLINTON. Admiral Fallon, the Washington Post published an article on January 30, 2007 about Iran's ascendance titled "With Iran Ascendant, U.S. is Seen at Fault: Arab Allies in Region Feeling Pressure." It points out that prior to our invasion of Iraq, Iran was bordered by two unfriendly countries, Iraq and Afghanistan, but now seems to be ascendant in the region. What is your evaluation of Iran's strategic position in the region since the U.S. invasion of Iraq in 2002?

Admiral FALLON. Iran is actively seeking to expand influence in the region. Coincidentally, the fall of the Taliban and Saddam regimes removed a strategic counterweight to Iranian influence. However, regional nations with U.S. support are working together diplomatically to reduce this influence. Additionally, the security and stability provided by the U.S. military presence serves to counter balance Iran's military power.

8. Senator CLINTON. Admiral Fallon, do you have an opinion as to the desirability of the U.S. engaging in a dialogue with Iran about their activities in Iraq? About the Iranian nuclear program?

Admiral FALLON. Engaging Iran is a policy decision. President Bush and Secretary of State Rice have offered to hold talks with Iran's leaders on Iraq, regional security, and nuclear issues, after they suspend uranium enrichment. Engagement and dialog with Iran to discuss Iraq would be desirable if Iran demonstrates a willingness to support international efforts to stabilize Iraq.

In regards to the Iranian nuclear program, the international community, with the adoption of U.N. Security Council Resolution 1737, clearly agreed that the world does not want a nuclear-armed Iran. U.S. Central Command (CENTCOM) continues to engage with regional partners to facilitate counterproliferation activities and enhancement of regional security.

QUESTION SUBMITTED BY SENATOR JOHN MCCAIN

SEA-BASED BALLISTIC MISSILE DEFENSE

9. Senator MCCAIN. Admiral Fallon, as U.S. Pacific Command (PACOM) Commander, you are aware that the Department of Defense plans to equip 18 Pacific Fleet Aegis-class destroyers and cruisers by 2010 with a sea-based ballistic missile defense capability to defend against the ballistic missile threat posed by North Korea. In your response to an advance policy question, you write: "Iran can employ ballistic missiles up to 1,300 kilometers with little/no advance warning and with greater accuracy and effectiveness than Iraq demonstrated in 1991 and 2003." Given your recognition of the ballistic missile threat posed by Iran, would it not make strategic sense to accelerate efforts to similarly equip our Aegis ships in and near the CENTCOM area of responsibility with a ballistic missile defense capability?

Admiral FALLON. Yes.

[The nomination reference of ADM William J. Fallon, USN, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 16, 2007.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the United States Navy to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be Admiral

ADM William J. Fallon, 0304.

TRANSCRIPT OF NAVAL SERVICE FOR ADM WILLIAM JOSEPH FALLON, USN

30 December 1944 - Born in East Orange, New Jersey.
 16 September 1963 - Midshipman, U.S. Naval Reserve, Naval Reserve Officers Training Corps.
 15 May 1967 - Ensign to rank from 7 June 1967.
 01 July 1968 - Lieutenant (junior grade).
 01 July 1970 - Lieutenant.
 01 July 1976 - Lieutenant Commander.
 01 April 1982 - Commander.
 01 September 1988 - Captain.
 23 August 1993 - Designated Rear Admiral (lower half) while serving in billets commensurate with that grade.
 01 October 1994 - Rear Admiral (lower half).
 01 January 1997 - Rear Admiral.
 20 September 1996 - Vice Admiral.
 06 October 2000 - Designated Admiral while serving in billets commensurate with that grade.
 01 November 2000 - Admiral, service continuous to date.

Assignments and Duties:

	From	To
Naval Air Basic Training Command, U.S. Naval Air Station, Pensacola, FL (DUINS)	May 1967	Nov. 1967
U.S. Naval Air Technical Center, Glynco, GA (DUINS)	Nov. 1967	Dec. 1967
U.S. Naval Station, New York, NY	Dec. 1967	Jan. 1968
Reconnaissance Attack Squadron THREE (DUINS)	Jan. 1968	Dec. 1968
Naval Justice School (DUINS)	Dec. 1968	Feb. 1969
Reconnaissance Attack Squadron FIVE, (Reconnaissance Attack Navigator)	Feb. 1969	Oct. 1970
Commander, Reconnaissance Attack Wing ONE, (Administrative Officer)	Oct. 1970	July 1972
Staff, Commander Fleet Air, Jacksonville, FL (Flag Lieutenant/Flag Secretary)	July 1972	July 1973
DEP COMNA V AIRLANTTACAIR (Aide/Administrative Officer)	July 1973	June 1974
Attack Squadron FOUR TWO (DUINS)	June 1974	Dec. 1974
Attack Squadron SEVEN FIVE (Avionics/Armament Officer/Training Officer)	Dec. 1974	July 1977
Naval War College (DUINS)	July 1977	July 1978
Attack Squadron FOUR TWO (DUINS)	July 1978	Oct. 1978
Attack Squadron SIX FIVE (Operations Officer/Executive Assistant)	Oct. 1978	Feb. 1981
Commander, Operational Test and Evaluation Force (Operational Test Coordinator of Attack Weapons Systems)	Feb. 1981	July 1982
Attack Squadron FOUR TWO (DUINS)	July 1982	Nov. 1982
XO, Attack Squadron SIX FIVE	Nov. 1982	May 1984
CO, Attack Squadron SIX FIVE	May 1984	Sep. 1985
Commander, Naval Air Force, U.S. Atlantic Fleet (DUINS)	Sep. 1985	Dec. 1985
Carrier Air Wing EIGHT (Deputy Air Wing Commander)	Jan. 1986	July 1987
Commander, Naval Air Force, U.S. Atlantic Fleet (Air Wing Training and Readiness Officer)	July 1987	Jan. 1989
Commander, Medium Attack Wing ONE	Jan. 1989	Feb. 1990
Commander, Carrier Air Wing EIGHT	Mar. 1990	Aug. 1991
National Defense University (DUINS)	Aug. 1991	June 1992
Office of the CNO (Deputy Director, Aviation Plans and Requirements Branch) (N880B)	July 1992	Sep. 1993
Commander, Joint Task Force Southwest Asia (Deputy Staff Operations Officer, J-3)	Aug. 1992	Nov. 1992
SACLANT (Assistant Chief of Staff for Plans and Policy)	Sep. 1993	June 1995
Commander, Carrier Group EIGHT	June 1995	Feb. 1996
COMLANTFLT (Deputy and Chief of Staff)	Feb. 1996	Sep. 1996
U.S. Atlantic Command (Deputy Commander in Chief and Chief of Staff)	Sep. 1996	Nov. 1997
Commander, SECOND Fleet/Commander, Striking Fleet Atlantic	Nov. 1997	Oct. 2000
Vice Chief of Naval Operations	Oct. 2000	Oct. 2003
Commander, U.S. Atlantic Fleet and Commander, Fleet Forces Command	Oct. 2003	Feb. 2005
Commander, U.S. Pacific Command	Feb. 2005	To date

Medals and awards:

Defense Superior Service Medal
 Legion of Merit with three Gold Stars
 Bronze Star Medal with Combat "V"
 Meritorious Service Medal with two Gold Stars
 Air Medal with Bronze Numeral "6", Gold Star, and Combat "V"
 Navy and Marine Corps Commendation Medal with one Gold Star, and Combat "V"
 Navy and Marine Corps Achievement Medal

Joint Meritorious Unit Award
 Navy Unit Commendation with two Bronze Stars
 Meritorious Unit Commendation with one Bronze Star
 Navy "E" Ribbon with two Es
 Navy Expeditionary Medal with one Bronze Star
 National Defense Service Medal with one Bronze Star
 Armed Forces Expeditionary Medal with two Bronze Stars
 Vietnam Service Medal with two Bronze Stars
 Southwest Asia Service Medal with two Bronze Stars
 Sea Service Deployment Ribbon with one Silver Star
 NATO Medal
 Republic of Vietnam Gallantry Cross Unit Citation
 Republic of Vietnam Campaign Medal with Device
 Kuwait Liberation Medal with Device (Saudi Arabia)
 Kuwait Liberation Medal (Kuwait)

Special qualifications:

BA (Social Science) Villanova University, 1967
 MA (International Studies) Old Dominion University, 1982
 Graduate of Naval War College, 1978
 Graduate of National War College, 1992
 Designated Naval Flight Officer, 1967
 Designated Joint Specialty Officer, 1995
 Language Qualifications: French (Knowledge)

Personal data:

Wife: Mary Elizabeth Trapp of Scarsdale, New York
 Children: Susan K. Fallon (Daughter), Born: 1 March 1971.
 Barbara L. Fallon (Daughter), Born: 21 November 1973.
 William P. Fallon (Son), Born: 31 July 1976.
 Christina A. Fallon (Daughter), Born: 4 March 1983.

Summary of joint duty assignments:

Assignment	Dates	Rank
*Commander, Carrier Air Wing EIGHT	Jan. 91–Apr. 91	Capt.
SACLANT (Assistant Chief of Staff for Plans and Policy)	Sep. 93–June 1995	RDML
USCINCLANT (Deputy Commander in Chief and Chief of Staff)	Sep. 96–Nov. 97	VADM
Commander, SECOND Fleet/Commander, Striking Fleet Atlantic	Nov. 97–Oct. 00	VADM
Commander, U.S. Pacific Command	Feb. 05–to date	ADM

* Desert Storm

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by ADM William J. Fallon, USN, in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
William J. Fallon.
2. **Position to which nominated:**
Commander, United States Central Command.
3. **Date of nomination:**
16 January 2007.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
30 December 1944; East Orange, New Jersey.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Mary E. Trapp Fallon.
7. **Names and ages of children:**
Susan K. Fallon, 35; Barbara L. Fallon, 33; William P. Fallon, 30; and Christina A. Fallon, 23.
8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.
None.
9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational, or other institution.
Occidental College Golbal Affairs Advisory Board.
10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
American Automobile Association
American Meteorological Society
Army & Navy Club
Association of Naval Aviation
Deer Run Condominium Owners Association Board (Big Sky, MT)
Bishopsgate (Virginia Beach, VA) Civic League
Hampton Roads World Affairs Council
Knights of Columbus
Mercedes Benz Club of America
National Geographic Society
National War College Alumni Association
Navy Federal Credit Union
Old Dominion University Alumni Association
Smithsonian Institute
Our Lady Star of the Sea (VA Beach, VA) Catholic School Board
Tailhook Association
U.S. Naval Institute
Veterans of Foreign Affairs
Villanova University Alumni Association
Villanova University Varsity Club
Villanova University Wildcat Club.
11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.
Villanova University Alumni Loyalty Award
Old Dominion University Distinguished Alumnus Award
Naval War College Distinguished Alumnus Award
Camden Catholic High School Distinguished Alumnus Award
Business Executives for National Security Eisenhower Award
USO of Philadelphia/South Jersey Liberty Award.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify before any duly constituted committee of the Senate?
Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?
Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ADM WILLIAM J. FALLON, USN.

This 17th day of January, 2007.

[The nomination of ADM William J. Fallon, USN, was reported to the Senate by Chairman Levin on February 6, 2007, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on February 7, 2007.]

**NOMINATION OF GEN GEORGE W. CASEY, JR.,
USA, FOR REAPPOINTMENT TO THE GRADE
OF GENERAL AND TO BE CHIEF OF STAFF,
UNITED STATES ARMY**

THURSDAY, FEBRUARY 1, 2007

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:33 a.m. in room SR-325, Russell Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Lieberman, Reed, Bill Nelson, E. Benjamin Nelson, Bayh, Clinton, Pryor, Webb, McCaskill, McCain, Warner, Inhofe, Sessions, Collins, Chambliss, Graham, Dole, Cornyn, Thune, and Martinez.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Jonathan D. Clark, counsel; Daniel J. Cox, Jr., professional staff member; Michael J. Kuiken, professional staff member; Gerald J. Leeling, counsel; Peter K. Levine, chief counsel; Michael J. McCord, professional staff member; William G.P. Monahan, counsel; Michael J. Noblet, research assistant; Arun A. Seraphin, professional staff member; and William K. Sutey, professional staff member.

Minority staff members present: Michael V. Kostiw, Republican staff director; William M. Caniano, professional staff member; Ambrose R. Hock, professional staff member; Gregory T. Kiley, professional staff member; Derek J. Maurer, minority counsel; David M. Morriss, minority counsel; Lucian L. Niemeyer, professional staff member; Christopher J. Paul, professional staff member; Lynn F. Rusten, professional staff member; Sean G. Stackley, professional staff member; Diana G. Tabler, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Micah H. Harris and Jessica L. Kingston.

Committee members' assistants present: Joseph Axelrad, assistant to Senator Kennedy; Frederick M. Downey, assistant to Senator Lieberman; Elizabeth King, assistant to Senator Reed; Caroline Tess, assistant to Senator Bill Nelson; Eric Pierce, assistant to Senator Ben Nelson; Todd Rosenblum, assistant to Senator Bayh; Andrew Shapiro, assistant to Senator Clinton; Lauren Henry, assistant to Senator Pryor; Gordon I. Peterson and Michael Sozan, assistants to Senator Webb; Nichole M. Distefano, assistant to Sen-

ator McCaskill; Richard H. Fontaine, Jr., assistant to Senator McCain; John A. Bonsell and Jeremy Shull, assistants to Senator Inhofe; Arch Galloway II, assistant to Senator Sessions; Mark Winter, assistant to Senator Collins; Clyde A. Taylor IV, assistant to Senator Chambliss; Adam G. Brake, assistant to Senator Graham; Lindsey Neas, assistant to Senator Dole; Russell J. Thomasson, assistant to Senator Cornyn; Stuart C. Mallory and Bob Taylor, assistants to Senator Thune; and Brian W. Walsh, assistant to Senator Martinez.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning. Today we welcome General George Casey, the President's nominee to replace General Peter Schoomaker as the Chief of Staff of the United States Army. We are also pleased to welcome General Casey's family, who we will ask him to introduce in a moment, and we all know just how vitally important families are to the men and women who serve in the military and we thank them for their service as well as you for your service, General.

General Casey is well known to members of this committee and to the American people as Commanding General, Multi-National Forces-Iraq (MNF-I), in which capacity he has served for over 2½ years. Prior to that command he was Vice Chief of Staff of the Army, which was preceded by an assignment as Director of the Joint Staff, and before that as Director of Strategy, Plans and Policy, J5, on the Joint Staff.

General Casey is an infantryman, having commanded at all levels up to and including division command. As an assistant division commander he served in Bosnia and earlier in his career he served in Cairo as an United Nations (U.N.) military observer with the U.N. Truce Supervision Organization. He also served a tour of duty as a congressional liaison officer.

As commander in Iraq, General Casey is of course identified with the administration's Iraq strategy. His focus was on training and equipping Iraqi security forces to bring them as quickly as possible to a level where they could relieve American forces from the burden of providing the security that Iraqis should be providing for themselves.

In this strategy, he was joined by his boss, U.S. Central Command Commander General John Abizaid, and his subordinate, the corps commander, Lieutenant General Peter Chiarelli. General Casey put it this way, "The longer we in the United States forces continue to bear the main burden of Iraq's security, it lengthens the time that the Government of Iraq has to take the hard decisions about reconciliation and dealing with the militias. The other thing is that they can continue to blame us for all of Iraq's problems, which are at base their problems."

General Casey and other commanders had to deal with the consequences of the myriad of flawed policies, including having insufficient forces at the outset of the operation, failing to properly plan for the postwar stability operations, disbanding the Iraqi army, and an overly extensive de-Baathification program, to name but a few. How well he carried out his responsibilities will be one of the topics this morning.

We also need to understand what role he played in the development of the new strategy and his expectations for the new approach, what has changed that he now apparently believes that more U.S. troops will help reduce sectarian violence when he did not seem to believe that before, how would he deal with the sectarian militias if they are going underground and hiding weapons instead of directly confronting coalition forces in the short term; what are their future goals; how long is it expected that they will stay underground; should coalition forces seek to disarm the Mahdi Army so they cannot come out from underground at a later time; what are his concerns about the lack of unity of command between U.S. and Iraqi forces; what should be done about it; who will really be taking the lead down at the small unit level in the neighborhoods; and how will the U.S. platoons and companies living with and operating with the Iraqi security forces in these small neighborhood minibases not become involved in violent interface with Iraqis; what benchmarks would he be looking for to determine whether Iraqi commitments are being kept; if the Iraqi government fails to deploy the additional units to Baghdad according to the benchmarks to which it has agreed, what does he believe should be the consequences; what progress has there been on Iraqi leaders meeting the political commitments they have made; and does he believe there should be consequences for failures to meet those commitments?

We also need to inquire as to how long General Casey believes the increased troop level can be sustained by an army whose non-deployed units are suffering from significant readiness problems, as has been testified to by the current Chief of Staff, as well as to what he considers to be his greatest challenges should he be confirmed as the next Army Chief of Staff.

Again, we welcome you, General. We look forward to your testimony.

I now call upon Senator McCain.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you, Mr. Chairman.

General Casey, welcome. I am grateful for your extraordinary service and personal sacrifice throughout your career. In addition, I would like to express my appreciation to your family for their support of your service, as well as the support they have provided to the men and women in uniform and their families.

You have been nominated to be the 37th Chief of Staff of the Army. The ranks of previous Army chiefs of staff are filled with such distinguished officers as General of the Armies John J. Pershing, George C. Marshall, Dwight D. Eisenhower, and Omar N. Bradley, as well as General J. Lawton Collins, Matthew B. Ridgway, and Maxwell D. Taylor. This nomination is a great honor and an even greater responsibility.

While I do not in any way question your honor, your patriotism, or your service to our country, I do question some of the decisions and judgments you have made over the past 2½ years as Commander of MNF-I. During that time things have gotten markedly and progressively worse and the situation in Iraq can now best be

described as dire and deteriorating. I regret that our window of opportunity to reverse momentum may be closing.

The bombing of the Golden Mosque in Samarra last February sparked sectarian violence throughout Iraq and Baghdad in particular. Yet in the face of this dramatic change in the Iraqi security environment, our military strategy remained essentially unchanged. Instead of conducting a traditional counterinsurgency campaign, our troops focused on training and equipping Iraqis, hoping in vain that they could do the job.

After repeated elections and political events demonstrated that the democratic process would not on its own bring down the level of violence, our troops did not begin focusing on protecting the population. Instead, coalition and Iraqi forces launched Operation Together Forward in June 2006. This operation, aimed at securing Baghdad, failed. Yet the coalition launched Operation Together Forward 2 in August in a very similar fashion. The result, predictably, was a similar failure.

The result of these and other missteps have been unprecedented levels of violence in Iraq and a pervasive lack of security that inhibits political and economic activity. In the 3½ years after the initial invasion, we finally turn toward a strategy that implements all three elements of the clear, hold, and build approach, focuses on protecting the population, and is carried out by, I hope, a sufficient number of additional U.S. forces.

I am not certain five additional brigades in Baghdad and one more in Anbar Province are sufficient to do the job. I am certain, however, that the job cannot be done with just two additional brigades, as you, General Casey, had advocated.

General Casey, you were one of the individuals who has been the architects of U.S. military strategy in Iraq over the last 2 years. While there are very pressing questions about the future of the Army, you will of course in this hearing be asked to review the mistakes in American strategy in Iraq during your command, how the previous Iraq strategy was formulated, why it failed, why there were not changes sooner, and the lessons that were learned. You will also be asked to comment on progress in training and equipping the Iraqi security forces, to include your previous statements about their readiness. In addition, you will be asked to respond to questions about the President's new strategy, to include the troop increase and the command and control of American forces in Baghdad.

You should expect questions about your role in planning and execution of the initial invasion of Iraq and post-Saddam Iraq, while you were assigned to key positions on the Joint Staff in the Pentagon from 2002 to 2004. You will need to explain why your assessment of the situation in Iraq has differed so radically from that of most observers and why your predictions of future success have been so unrealistically rosy.

During my trip to Iraq in early 2005, you predicted a significant decline in violence over the remainder of the year as the democratic process took hold and as more Iraqi troops were trained. One year later during another visit to Iraq, I heard nearly the same predictions, with the time line simply pushed back by a year. In December during a trip that several other Senators and I made to

Iraq, you stated that we were winning in Iraq and that every day we are making progress toward meeting our strategic objectives.

Just this month, you predicted publicly that there would be progress, "gradually over the next 60 to 80 days," and that people in Baghdad would probably feel safe in their neighborhoods by the summer.

In light of these remarks and decisions, I have expressed serious concerns about your nomination as Chief of Staff of the Army. My strong reservations persist. I look forward to your testimony.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

General Casey, would you please proceed with your opening statement.

STATEMENT OF GEN GEORGE W. CASEY, JR., USA, FOR RE-APPOINTMENT TO THE GRADE OF GENERAL AND TO BE CHIEF OF STAFF, UNITED STATES ARMY

General CASEY. I will, Senator. Thank you very much.

Good morning, Mr. Chairman, Senator McCain, distinguished Senators. Thank you for the opportunity to testify before you today on my nomination to serve as the Army Chief of Staff. I am honored that the President nominated me to this important post and I thank you for considering the nomination.

I also want to thank the members of the committee for the support they have provided to America's Army over the past years. We could not do what we are doing around the globe today without your support, so thank you for that.

Let me begin by paying tribute to our troops and their families, the real heroes of the war on terror and the campaign in Iraq. The American people should be tremendously proud and grateful of the magnificent job the men and women of their Armed Forces are doing in a tough and demanding environment in Iraq. Over 3,000 men and women have given their lives to build a new Iraq, to bring liberty and democracy to 27 million Iraqis, and to ensure security for the United States of America. They will not be forgotten.

I also want to acknowledge the families who make tremendous sacrifices on behalf of their loved ones a half a world away. They shoulder a heavy burden and we are blessed with their unwavering support. Courage is not reserved for the battlefield.

I especially want to thank my bride of 36 years, Sheila, for her courage, grace, and support over the last 2½ years. She, like all our families of our deployed men and women, epitomizes the core values of duty and selfless service. So let me just say thank you, dear. My wife Sheila. [Applause.]

My son, Ryan, and his wife, Laura; my son, Sean; and my brother-in-law, Dick O'Brien. That is the family.

Mr. Chairman, I would like to assure you that I have thought hard about what it means to be the Chief of Staff of the Army and want to assure you that I am aware of the tremendous responsibilities associated with this office. I firmly believe in the Army's vision to remain the world's preeminent land power, relevant and ready to meet the challenges of the 21st century.

In Iraq I have been in the unique position to watch a transformed Army deal with the challenges of 21st century warfare and

I would like to share with you just three preliminary thoughts. First, the quality of the men and women of the U.S. Army are the best that I have seen in 36 years in service. They blend intellect, drive, compassion, courage, and commitment to succeed daily in a very difficult environment. Our soldiers and families are our most precious resource and they will be my top priority.

Second, I see the power of the Army's transformation on the streets of Iraq every day. The enhanced capabilities of the modular units allow them to handle the complexities of the Iraqi environment. If I am confirmed you should expect to see continuity in the transformation initiatives that General Peter Schoomaker has put into action.

Third, the men and women of the Army National Guard and the Army Reserve have been indispensable to our efforts in Iraq and we must contemplate and implement policies and procedures that recognize two facts: one, that we are approaching a point where about half of our Guard and Reserve soldiers will be combat veterans; and two, we require the continued participation of the Guard and Reserve in our operations around the world. While I know the Army has been aggressively working these issues, Guard and Reserve issues will have my full attention.

I have seen our Army at war in the 21st century and believe my experience in that regard will be valuable to the Army. I am also conscious that Iraq is not the only future and as Chief of Staff of the Army, I will take a broader view.

Next, Mr. Chairman, I would like just to say a few words about Iraq. Just 2½ years ago, Iraq was totally dependent on coalition forces for security. Today Iraqis are poised to assume responsibility for their own security by the end of 2007, still with some level of support from us. The path that brought us to this point has not been easy, but it has been part of a concerted effort to build an Iraq that can secure, sustain, and govern itself.

Sectarian violence is the greatest threat to Iraq's ability to accomplish this objective and to move forward. Since February with the bombing of the al-Askari Mosque in Samarra, the sectarian violence in Iraq has greatly complicated our ability to accomplish our strategic objectives. It makes it harder for the population, traumatized by 3 decades under Saddam Hussein, to make the compromises necessary to equitably resolve what is the fundamental conflict in Iraq, the division of political and economic power among Iraqis.

This is a challenge we can help them address, but one they must ultimately resolve themselves. I continue to firmly believe that enduring strategic success in Iraq must be achieved by Iraqis.

I know there are questions in people's minds about where I stand on troop levels, particularly with respect to the most recent deployment of troops to Baghdad. There are no questions in my mind. I can tell you that I have been doing what I told you I would do 2½ years ago at my confirmation hearing. I told you I would ask for the troops I believed I required to accomplish the mission and I believe I have.

Over the course of the mission I have asked for and received more troops at least six times: in support of the operation in Fallujah in late 2004; in support of the January 2005 elections; to

implement the transition team, the embed concept, in the spring of 2005; to support the October referendum and December elections in 2005; to support the Baghdad security plan in 2006; and again in December 2006 to reinforce Iraqi efforts in Baghdad. I have also sent troops home once, following the December 2005 elections as a result of improvements in the Iraqi security forces over the course of the year.

Now, with respect to my most recent request for forces, the planning began in November shortly after we changed out the Baghdad division. There was a normal rotation of divisions in Baghdad in the middle of November. The corps commander and I at that time sat down with the new commander and gave him our intent and told him to take a blank sheet of paper and tell us what it would take to help the Iraqis restore stability in their capital.

This is part of a continuous assessment process that we have ongoing there. We are constantly looking at how we are doing, what we should be doing differently.

Around the same time, the Iraqis came forward with their own approach, and together we developed the coordinated plan that we are now implementing. My commanders told me that they needed two brigades to implement this plan and I asked for those forces. At the same time we worked with the Iraqi prime minister to ensure that there was political commitment to the Baghdad effort.

In a series of addresses following his meeting with the President in Amman and continuing through his Army Day address on January 6, Prime Minister Maliki announced the political commitments that we were looking for. We will continue to monitor the delivery on these commitments, but so far the results have been heartening.

Now, some will ask, why cannot the Iraqi security forces do this by themselves? The Iraqi security forces are 2½ years into a 3½-year developmental process. They are not quite ready to assume security responsibility in Baghdad or Iraq. But they are increasingly ready and willing to take the lead in these security operations with our support.

They are also challenged by sectarian tensions and actions that have shaken the confidence of some of their populations in their security forces. For the Iraqis to successfully assume and sustain the security responsibility, their security forces must emerge as the dominant security force in the country. To do this, political and militia influence over the security forces must be eliminated and levels of sectarian violence, particularly in the capital, must be brought down substantially, brought down to the point where the people in Baghdad can feel safe in their neighborhoods.

This is what we are working toward in Baghdad. It will take time and the Iraqis do need our help.

What we and the Iraqis are doing in Iraq is a hard, tough business. Fighting this type of campaign while rebuilding a dilapidated infrastructure, building a representative government where none existed before, and reconciling ethnic and sectarian differences makes it even more difficult and complex. The struggle in Iraq is winnable, but it will, as I have said before this committee, take patience and will.

Mr. Chairman, in closing I would like to go back to the Army. I am a soldier. My roots are in the Army and I know the pride of

wearing this uniform. You can say I have been part of the Army all my life. I was born in an Army hospital in Japan where my father was a member of the occupation forces. I am an Army brat that went to four high schools in three countries. Sheila and the boys grew up in the Army and my youngest son joined the Army Reserve as a private at age 34 because he too wanted to serve.

I have devoted my life to the Army. I took hard jobs around the world because they were important to our country. I must admit I am amazed when I hear comments to the effect that I am being nominated as a reward. Mr. Chairman, the members of the committee know full well the challenges and the multitude of challenges facing the Army over the next 4 years. Service as Army Chief of Staff is not a reward; it is a duty. It is about service and it is about personal commitment to the men and women of the United States Army.

If confirmed, I acknowledge the hard work ahead to maintain our position as the greatest army on the planet. I will need and ask for your help, and I pledge to work in partnership with you, Mr. Chairman, and the rest of the members of the committee and to consult with you frequently and candidly.

Thank you for your attention. I look forward to taking your questions.

Chairman LEVIN. General, thank you.

We have a series of standard questions which we ask of all nominees. First, have you adhered to applicable laws and regulations governing conflicts of interest?

General CASEY. I have.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

General CASEY. I have not.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

General CASEY. I will.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

General CASEY. I will.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

General CASEY. They will.

Chairman LEVIN. Do you agree if confirmed to appear and testify upon request before this committee?

General CASEY. I will.

Chairman LEVIN. Do you agree to give your personal views when asked before this committee to do so, even if those views differ from the administration?

General CASEY. I will.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

General CASEY. I will.

Chairman LEVIN. Thank you.

We will have a 6-minute first round of questions.

General, we understand you support the President's strategy, the new strategy which involves a surge of troops into Iraq. You were asked for your recommendation and you apparently recommended two brigades, as you just testified to, based on your commander's recommendations to you?

General CASEY. That is correct.

Chairman LEVIN. We asked General Abizaid back in November of last year when he appeared before this committee whether we needed more troops or he supported more troops going to Iraq. He said that he met with every divisional commander, General Casey, the Corps Commander, General Dempsey, "We all talked together and I said, in your professional opinion if you were to bring in more American troops now does it add considerably to our ability to achieve success in Iraq? They all said no, and the reason is because we want Iraqis to do more. It is easy for the Iraqis to rely upon us to do this work. I believe that more American forces prevent the Iraqis from doing more, from taking more responsibility for their own future."

General Abizaid said that he spoke to you and that his opinion reflected your opinion and that of all the other commanders. Was that true when he said it?

General CASEY. I am not exactly sure when in November it was, but it was.

Chairman LEVIN. So you have changed your view since November?

General CASEY. As I described in my opening testimony, Senator, in mid-November was when the reevaluation of the plan was taking place. I suspect John and I talked before that. That does reflect my general view on additional U.S. forces in Iraq.

Chairman LEVIN. It reflects a general view, but then there was some kind of a reevaluation which took place in mid-November?

General CASEY. That is right, Senator. We are constantly re-evaluating how we are doing and what we need.

Chairman LEVIN. But that position that General Abizaid stated was your position when you spoke to him in early November presumably still remains your general view?

General CASEY. That is correct.

Chairman LEVIN. If that is your general view, what has changed? Why are you modifying your general view for this surge?

General CASEY. What has changed, Senator, is several things. One, the development of a plan, a new plan that was conceived by the Iraqis and worked in concert with us. So there is a plan that laid out requirements for those forces. So just to say do you need more forces is one thing. To say do you need more forces to execute this plan is quite another. We do need two additional brigades to implement that plan.

Chairman LEVIN. The Iraqis came in with a plan that said they did not want any additional American forces inside of Baghdad; is that not true? That was their plan that was presented to the President in Amman?

General CASEY. I think that is a misunderstanding. I have read those newspaper reports. That was not the case. I was in Amman and that issue was never raised.

Chairman LEVIN. So the Iraqis did not say that they did not seek American forces in Amman?

General CASEY. They did not.

Chairman LEVIN. Did they seek American forces in Baghdad?

General CASEY. There was not a large, long discussion about the plan that they presented. They basically passed it across the table and there was actually quite a short discussion.

Chairman LEVIN. Did the plan that they passed across the table include additional American troops?

General CASEY. It broadly identified the requirement for additional troops. I do not believe that it specified Iraqi or coalition. Now, for Prime Minister Maliki, he would generally rather not have additional coalition forces. That is his position. But he has listened to recommendations from his commander and from me about the need for these forces and he is accepting those forces on an as-needed basis.

Chairman LEVIN. Basically he felt that more security forces were needed inside Baghdad? He did not specify that any coalition forces would be needed as part of that, but it came from you and others that if there are going to be additional forces inside of Baghdad that coalition forces would be needed to provide some supplementary support; is that fair?

General CASEY. That is fair, Senator.

Chairman LEVIN. There is an article in this morning's Miami Herald which says the following: Jafari, when he was prime minister, recollected some meetings with U.S. officials and he said that in the meetings held twice a week he urged coalition forces to take action against the militias. In attendance, he said, were Army General George Casey, then the top U.S. commander in Iraq, the U.S. ambassador, the British ambassador, and a British general.

Jafari said he asked the officials to force police and army recruits to pledge loyalty to the government and to consider a military strike against the militias while they were still isolated from the public. "They were not cooperating with us," Jafari said.

A former Jafari aide said he believed U.S. officials did not take action because they did not want to get involved in a political dispute between Jafari's Dawa Party and the Supreme Council for the Islamic Revolution in Iraq, Iraq's largest Shiite political party.

Was that request made of you by Jafari when he was prime minister and is it true that we rejected that request, and if so for what reason?

General CASEY. I just want to make sure I have the specific request right. Could you please repeat what he said?

Chairman LEVIN. He asked officials—that is you; you are the only named one by name; he mentioned the ambassador and so forth. But by name he said that he asked you and the others to, "force"—this is not a quote. This is the article that says this: that Jafari asked you to force police and army recruits to pledge loyalty to the government and to consider a military strike against the militias while they were still isolated from the public. Jafari then is quoted as saying "They"—you—"were not cooperating with us."

Could you comment on that?

General CASEY. I have not seen the article, Senator, but there is some strongly revisionist history going on there by the former prime minister.

Chairman LEVIN. Strongly? I am sorry?

General CASEY. Revisionist history going on there by the former prime minister.

I do not recall the request to force the police and army to pledge, but we have done that several times over the course of the last year both in the army and in the police, where the soldiers and the police have taken a loyalty pledge to the government. But I do not remember getting that request from the prime minister.

Quite the contrary to him asking me to make a military strike, which I do not ever recall him asking me to take any action, particularly a military strike against militia, that government was an impediment to our action against the militia. He was working very hard on the political side of things to keep the Sadrists under control. But frankly, I went to him with a group several times to get him to take action and allow us to take military action against the militia, and was denied.

We had difficulty getting him to even issue a statement on a weapons ban that his police and army officers wanted so that they could enforce the weapons ban on the streets of Iraq. He dragged his feet on that.

Chairman LEVIN. Thank you, General.

Senator McCain.

Senator MCCAIN. General Casey, I was interested in your opening statement, which continues to be optimistic. In recent days the Secretary of Defense, the Chairman of the Joint Chiefs of Staff, and General Abizaid's designated successor Admiral Fallon have all stated we are not winning and we had a failed strategy. Now, those are clearcut statements for the record.

Do you agree with that assessment?

General CASEY. Do I agree that we have a failed strategy?

Senator MCCAIN. We had a failed policy and we are not winning.

General CASEY. Senator, I do not agree that we have a failed policy. I believe the President's new strategy will enhance the policy that we have.

Senator MCCAIN. So you view this change in strategy as just an enhancement of the previous policy?

General CASEY. It is a significant shift, but I believe it will be an enhancement over the current policy. The policy of training and equipping Iraqi security forces and gradually passing security responsibility to them as they are ready is still an important element of the current strategy and it is part of the Amman agreement.

Senator MCCAIN. So you disagree with the Secretary of Defense, the Chairman of the Joint Chiefs of Staff, and Admiral Fallon that we had a failed policy?

General CASEY. I do, Senator. I do not believe that the current policy has failed.

Senator MCCAIN. I would like to give you a quote. There are many quotes, but one I would be interested in your response to. A Pentagon press conference on December 16, 2004, "My view of winning is that we are broadly on track to accomplishing our objec-

tives, with Iraqi security forces that are capable of maintaining domestic order and denying Iraq as a safe haven for terror, I believe we are on track to get there by December 2005.”

Was that statement accurate that you made in 2004?

General CASEY. I do not recall the specifics of—

Senator MCCAIN. I have given you a direct quote from your statement.

General CASEY. It said that what would be ready by the end of 2005?

Senator MCCAIN. “My view of winning is that we are broadly on track to accomplishing our objectives. With Iraqi security forces that are capable of maintaining domestic order and denying Iraq as a safe haven for terror, and I believe we are on track to get there by December 2005.”

You made that statement in December 2004.

General CASEY. That obviously has not panned out. We have projections that we work on with the development of the security forces. Again, I do not remember the context of that, but the institutional aspects of building these security forces has always been programmed to take longer than that. So I am not quite sure what I was focusing on there. But it obviously has not panned out, Senator.

Senator MCCAIN. I do not want to belabor it, but there is a series of quotes. As short a time ago as October 11, 2006, “‘The idea that the country is aflame in sectarian violence is just not right,’ Casey said. ‘I do not subscribe to the civil war idea.’”

September 30, 2005: “We have a strategy and a plan for success in Iraq and we are broadly on track in achieving our goals.”

General Casey, almost everybody that I know that has testified before this committee and talked to, has said we had a failed policy, we are not winning; those are the judgments, and “serious mistakes were made.” That is in the comments made by the President of the United States.

Last year, in the month of December, we had the third highest number of American servicemen deaths in Iraq, as you well know.

Do you believe that this job, this change in strategy or, as you call it the new job, can be done with less than five brigades that General Petraeus says he needs?

General CASEY. I believe that the job in Baghdad as it is designed now can be done with less than that. But having the flexibility to have the other three brigades on a deployment cycle gives General Petraeus great flexibility. It allows him to make assessments on whether the plan is working or not and to either reinforce success, maintain momentum, or put more forces in a place where the plans are not working.

I believe that this five brigade plan gives great flexibility to General Petraeus at a very important time in the mission.

Senator MCCAIN. This is a time when almost all of our major concerns and military experts’ major concern is whether five brigades are enough, and a very short time ago you simply asked for two brigades. We just have a fundamental disagreement, General Casey, with facts on the ground and with what has happened in Iraq over now one of the longest wars in our history and where we are today.

I believe it is abundantly clear that we are at a point in Iraq where we are going to have to succeed within in the coming months or we are going to have to experience catastrophic consequences associated with it. It took us a long time to get where we are today. I do not believe that from the beginning when General Shinseki's testimony before this committee was repudiated and he was removed from his job because he said we needed a sufficient number of troops that would have done the job, throughout we have paid a very heavy price in American blood and treasure in what the Secretary of Defense, the Chairman of the Joint Chiefs of Staff, and the new Commander of Central Command (CENTCOM) say is a "failed policy."

I regret that we were not given better and more accurate information as these past years unfolded.

I could ask you to respond to an abundance of quotes I have here in front of me that painted a very optimistic and rosy scenario, which did not comport in the view of many of us with the actual conditions on the ground and that many of us who greatly feared that we would be in the critical situation that we are in today.

So General, as I say, I do not question your honorable service. I have the most respect for you, your family, and their service to our Nation. I question seriously the judgment that was employed in your execution of your responsibilities in Iraq. We have paid a very heavy price in American blood and treasure because of what is now agreed to by literally everyone is a failed policy.

I would be very happy to hear your response, General.

General CASEY. Senator, I do not think there is any question that the situation in the center of the country, particularly in the capital, is bad, and we are working very hard to rectify that. As I mentioned in my opening statement, the bombing of the al-Askari Mosque in February added a completely new dimension to our challenges in Iraq, and dealing with the sectarian violence and helping the Iraqis deal with sectarian violence has been a very significant challenge.

As I also mentioned, the country will not be able to move forward with their security forces and it will not be able to move forward politically or economically until they come to grips with that situation.

I recognize we have a fundamental disagreement and in my mind the question has always been should we do it or should they do it. "It" being restore security. What I have tried to do in my time there is strike the right balance that allowed the Iraqi security forces and the government to keep moving forward, but at the same time having enough coalition presence there so that we could get the job done.

The situation in the capital, as you point out, is not good. It requires additional forces and I believe the flow plan to support that puts the forces in the right position and gives General Petraeus great flexibility.

Senator MCCAIN. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Senator Lieberman.

Senator LIEBERMAN. Thank you, Mr. Chairman.

General Casey, good morning. Let me pick up on something you said to Senator McCain, which is that you do not agree that our policy in Iraq has been a failure. I want to ask you why you think it has not been a failure.

General CASEY. The policy that I have been following has always been designed to do two things: to bring the insurgents and terrorists, the levels of violence, down to levels that could be contained by increasingly capable Iraqi security forces. That is happening in the better part of the country. It is not happening in Baghdad. It is not happening in Anbar. It is not happening in Diyala Province.

Senator LIEBERMAN. So you would say—and do not let me put words in your mouth—that while there have been failures, disappointments, in Baghdad as of today, that the policy that you followed has succeeded in other parts of Iraq?

General CASEY. There are three provinces in southern Iraq that are already under provincial Iraqi control. The fight that took place earlier this week in Najaf Province took place in a province that was under Iraqi control.

Senator LIEBERMAN. Right.

General CASEY. It worked just like we had laid out in the memorandums of understanding. The police found it. It was too much for them. They called the Iraqi army. The Iraqi army came, it was too much for them, they called us. But the Iraqis dealt with it with our support.

There are three provinces in the north, the Kurdish provinces, that once they resolve some disagreements with the government over budget they will also fall under Iraqi control, and other provinces are projected over the course of the rest of this year to assume responsibility for their own security.

That process is working. It is working slowly, but it is working.

Senator LIEBERMAN. So if you were asked a different kind of question, which is whether you believe the situation in Iraq is deteriorating, is it fair to say that you would say it is not deteriorating in most of the country, but is in Baghdad?

General CASEY. I would say the situation is definitely deteriorating in Baghdad, in the center of the country. It is not necessarily deteriorating across Iraq. I want to say 14 of the 18 provinces have 10 or less incidents of violence a day. Baghdad has 30 or 40 incidents a day, to give you some comparison.

The levels of violence in the capital are significant. Now, it is the capital of the country and we should not discount the impact that not being able to control their capital has on the government and has on the rest of the country. That is really our challenge.

Senator LIEBERMAN. Am I correct to conclude from what you have said earlier this morning that you support the new military, economic, and political plan for Iraq as the President has announced it?

General CASEY. I do, Senator, and I was consulted on that. I participated in the development of the strategy.

Senator LIEBERMAN. Do you believe that it will succeed?

General CASEY. I believe that it can work.

Senator LIEBERMAN. Right.

General CASEY. As I have said, in war there are no guarantees. But this plan, I believe it is the appropriate strategy and it has the

appropriate levels of resources attached to it. So I believe the plan can work.

Senator LIEBERMAN. I presume you are saying that you believe it has a higher probability of working than any other plan you have heard described?

General CASEY. That is a fair statement, Senator.

Senator LIEBERMAN. One of the other alternatives being discussed by some of our colleagues is to mandate the beginning of a withdrawal within a set period of months. How would you evaluate that as an alternative path to success in Iraq?

General CASEY. As the commander, I would resist any type of mandated timetables that would limit my flexibility to deal with the situation on the ground.

Senator LIEBERMAN. Do you fear that if we in fact began to withdraw that the situation in Iraq would deteriorate even further, in other words withdraw on a deadline as opposed to based on improved conditions there?

General CASEY. As I said, I do not believe that a mandated timetable not tied to conditions on the ground would be helpful. My sense is people on the ground would take advantage of that.

Senator LIEBERMAN. Understood.

Let me ask you a few questions actually about the job for which you are being nominated, Chief of Staff of the Army. Would you say, based on the Army's involvement in Iraq and other circumstances, that the U.S. Army today is broken?

General CASEY. No, Senator, I would not. I came in the Army 36 years ago and I saw a broken Army. The first platoon I walked into as a lieutenant in my first assignment in Germany had nine people in it and four of those people were pending discharge. We did not have money to train, we did not have money to fix our vehicles.

I can remember guys painting over bumper numbers, the vehicle identification number on a vehicle, because they only had one that worked and when they had an inspection they changed the number and take that vehicle up because it was the only one that worked. It was broken badly.

Senator LIEBERMAN. But it is not now?

General CASEY. I see in Iraq every day a splendid Army. Now, I know that General Schoomaker has problems with the forces yet to deploy and some of the strategic elements that will deploy later, but from what I see in Iraq, Senator, the Army is far from broken.

Senator LIEBERMAN. I agree with you, of course. It is the best in the world, and I believe the best we have ever had.

I want to ask you a final question about the increase in end strength that the President and Secretary Gates are recommending to take the Army up to 540,000. Is that adequate?

General CASEY. Senator, in the short time I have been back and plugged into Army issues, I am being told by the Army Staff that that is in fact adequate now. However, they have an analysis process that they repeatedly run and they will continue to look at whether it is sufficient to meet their needs over time. But right now I am being told it is sufficient.

Senator LIEBERMAN. My time is up. Thank you, General Casey.

Chairman LEVIN. Thank you, Senator Lieberman.

Senator Warner.

Senator WARNER. General Casey, thank you for reciting your commitment personally and that of your family to the United States Army. You did not make reference to your father and the fact that he was a very brave soldier. He was a two-star general commanding the First Infantry Division in Vietnam and lost his life in the line of duty. I think it is important that we look at the total of the individual that is before us today and that is an important factor, because you have to inspire. One of your major responsibilities as the Chief of Staff of the Army is to inspire your people, to set the example to continue on so that America can enjoy the finest Army of any in the world.

I want to go back to your comments just now about your participation in this new plan and particularly the comments of my colleagues, which are accurate, about the ever-widening circle of individuals talking about a failed policy, certainly during calendar year 2006. Having served in the Pentagon myself as a part of the civilian team, I know full well how under our Constitution ever since George Washington civilians are in charge of our military. They devise the policy, they issue the orders, and our military individuals carry out those orders, or at times I have seen senior officers respectfully disagree and, frankly, resign rather than carry out a policy which they feel is wrong.

I judge that the policy and the orders that you carried out were consistent with those traditions and that you were given orders, and in this instance we should bear in mind that you were subordinate to CENTCOM Commander, General John Abizaid, whom I have a great deal of confidence in as a military commander. Is that not correct?

General CASEY. That is correct, Senator.

Senator WARNER. That he in turn received his orders from the President, transmitted in some respects through the Chairman of the Joint Chiefs; is that not correct?

General CASEY. That is correct, Senator.

Senator WARNER. Now, did you feel free at any time to reach out and question the orders that you were given to carry out?

General CASEY. I did, Senator. In fact, there was a strong dialogue about the policy between both our civilian leadership and General Abizaid and myself. I believe in the policy that I am implementing, Senator Warner. Did I not believe in it, I would have taken other actions, as you suggested.

Senator WARNER. It seems to me that as we assess the accountability for the past that where—and I think you today indicated you accept your share of the responsibility—

General CASEY. I do.

Senator WARNER.—an equal if not a greater share falls upon the civilians that devised the policy and issued the orders.

Now, we come down to this very critical point you made here, and I copied it down pretty carefully. You said that when you were working on the new strategy, the plan enunciated by the President on January 10, that you felt two brigades; I expect you changed that to “brigades”—were sufficient to carry it out, with an augmentation of the marines of a battalion or two in Anbar; is that correct?

General CASEY. That is correct. I do not want to put too fine a point on this, but what you are talking about, are requirements for the Baghdad security plan.

Senator WARNER. That is correct.

General CASEY. I would differentiate that from the President's strategy. But the Baghdad plan is part of that strategy.

Senator WARNER. At what point did you say to someone that you need two more brigades and an additional battalion in Anbar? Was it not a part of the planning phases of the January 10 plan or was it separate?

General CASEY. Around right before Christmas is when I asked for the additional forces.

Senator WARNER. Was it to implement the plan that the President announced or a plan that you were devising with regard to increasing the level of security in Baghdad?

General CASEY. The latter, Senator. It was asked for because of the Baghdad security plan.

Senator WARNER. I see. So it was a part of your input into the thinking for a new plan to raise the level of security in Baghdad?

General CASEY. That is correct, Senator.

Senator WARNER. Then you say: "well, I recognize that if you give the higher figure which is in the plan now, 20,500, that would give the new commander more flexibility." Had you remained as the commander would not you have wanted the additional flexibility of the additional increments of two more brigades?

General CASEY. I would have welcomed the flexibility of having access to three more brigades if I remained there.

Senator WARNER. But why did you not ask for the full complement of the four to five brigades, rather than just the two? Could it have been because of your concern and that of General Abizaid that the bringing on of additional troops was going into the face of a rising resentment among the Iraqi people for more and more troops?

General CASEY. Senator, my general belief is I did not want to bring one more American soldier into Iraq than was necessary to accomplish the mission. So what I asked for was the two brigades and the ability to maintain a reserve in Kuwait in case I needed additional flexibility.

Senator WARNER. All right. Let me go to the question of the extent we can use the trained Iraqi forces—and that training was done largely during your 2½ years—or turn in and bring in more U.S. forces, it is a constant balance. That is where, speaking for myself and I think some others who have associated with me on a resolution, we urge the President to look at all options to charge the Iraqis with a greater and greater degree of the new plan in Baghdad.

They understand the language. They understand the culture and are better able to cope with this sectarian violence, which is so difficult to comprehend, and the killing. Why are we not putting greater emphasis on the utilization of Iraqi forces and less on the U.S. GI being put into that cauldron of terror generated by mistrust between the Iraqis and the Sunnis that goes back 1,400 years?

General CASEY. I would say, Senator, that we are relying more on the Iraqis and forcing the Iraqis to take a more leading role in resolving the situation in Baghdad. They came up with the plan. They will lead the plan. I agree with you, they are much better at understanding what is going on on the streets of their own country than our soldiers are.

One of the challenges we have, though, I mentioned in my opening statement. It is the confidence of all the population in the different elements of their security forces. Largely, the Sunni population of Baghdad do not trust the police. So one of the schemes that will be used as part of this plan is joint manning with police, army, and coalition forces to do that. That is where the coalition comes in, because when they see us operating with the Iraqi police particularly the population has a greater level of confidence that the forces will treat them properly.

Senator WARNER. My time is up. My hope and my prayers are this plan succeeds, but it succeeds by a greater and greater reliance on the Iraqi forces and we will not have to use the full 20,500 Americans to implement this. Let the Iraqis step forward. We have trained them for 2½ years, invested a lot of time and money, and they should be the ones that carry the burden in Baghdad.

General CASEY. They are willing to do that.

Chairman LEVIN. Thank you, Senator Warner.

Senator Ben Nelson.

Senator BEN NELSON. Thank you, Mr. Chairman.

General Casey, thank you for your many years of service and your family's service to our Nation.

Over the last 2 years I have been advocating benchmarks, measurable goals, to measure progress in Iraq. I know you have heard me say this previously. What benchmarks does General Petraeus need now to measure the military progress that we hope to be made in Iraq? What goals and how will we measure that?

You have your own view about whether we have been successful in Iraq and you have stated that. You have General Jack Keane saying something different and others also saying it is a failed policy. How can we get something clear going in with a new plan, would that be benchmarks? How would we measure them and how could we tell whether they are a success and to what degree a success?

General CASEY. That is something that we have been working already in Baghdad here and I will just run down a few points. These are the things that we are thinking about as important elements to measure so that we can get some sense of progress.

First of all, pretty simply a reduction in the lawlessness and the level of sectarian killings. We track that over time and I will say that over the last 5 or 6 weeks we actually have seen a gradual downturn in sectarian incidents. Now, there has been an upturn in the high profile attacks, the car bombs and suicide attacks. But in general there has been a downturn over the last 5 or 6 weeks.

Second, we set as a goal, as I mentioned in my opening statement, we want to continue to work the security situation in Baghdad with the Iraqis until the people of Baghdad can feel safe in their neighborhood. We are seeing a systematic effort, primarily by the Shia militia, to move Sunni population out of mixed neighbor-

hoods. We see it to a smaller scale in the Sunni neighborhoods. We have to help the Iraqis reverse that.

Third, we believe that the Iraqi security forces have to emerge as the dominant security force with the confidence of the people of Baghdad. We measure that by polls over time and by our observations.

Fourth, we think there needs to be improvement in the basic needs in Baghdad, we and the Iraqis are supporting economic plans to raise the level of services.

Fifth, we think it is important to turn the population against violence in general, and we measure that, their feelings on that, through polls.

Finally, we think it is important that political and religious leaders actively engage in efforts to lessen the tensions, and so we would measure that by the active engagement of the leaders.

So those are some of the metrics that we are thinking about, using, and will use to measure progress in Baghdad.

Senator BEN NELSON. With this plan, this looks like these are now conditions for staying. I have been advocating conditions for staying as opposed to dates for withdrawal or mandated troop reductions or other programs of that kind. If we measure against these benchmarks that you just identified and we are not succeeding, are there consequences or is it just the opportunity to now change plans and come with a new plan?

Are these benchmarks conditions for staying or are they just benchmarks for evaluating a plan?

General CASEY. Senator, I am sorry. I am not quite sure what you mean about conditions for staying.

Senator BEN NELSON. If these benchmarks all end up with a failing grade do we just change the plan or do we begin to say, these are conditions now for leaving. In other words, I understand you have to modify plans along the way. Are we just modifying the plan along the way or are there true consequences if the Iraqis do not step forward, if they do not stand up their forces, if they cannot quell the violence in their neighborhoods, if they cannot take the lead? Do we consider that just the consequences that mean we will have to change the plan or does it mean we begin to think about withdrawing?

General CASEY. I understand now, Senator. The metrics I described to you are metrics to measure progress in the plan. They are not anything beyond that. Now, you ask are there consequences of the plan not progressing or the Iraqis not meeting their commitments. That is a political judgment that we would work with the government.

We review these metrics. We review these metrics with the government and tell them what they are doing or not doing as a means of continuing to move the plan forward.

Senator BEN NELSON. We understand the problem that any democracy or attempted democracy has with militias involved in their military or in their government. If the Iraqis are unwilling to move forward in Sadr City against Moqutada al-Sadr and the Mahdi Army, would that be a pretty good indication that the plan is not succeeding or would that be a reason to believe that maybe our commitment to Iraq should be reevaluated?

General CASEY. It is a hypothetical, Senator, but if we were denied access to Sadr City, I would consider that a significant breach in the commitments that the prime minister has already made and we would have to have serious discussions with the government.

Senator BEN NELSON. But have we not already been denied access to certain political leaders? Have we not already been denied access to take certain actions against the militias or other instances where they have told us no for political reasons or for other reasons?

General CASEY. In the past they have, Senator. But I will tell you, in the past probably 2 months we have not been denied access to any target and the prime minister is doing what he said he was going to do. He was going to target everyone who is breaking the law.

Senator BEN NELSON. Have we asked for access to the Mahdi Army and al-Sadr?

General CASEY. We are actively working our plans for Sadr City with the Iraqis.

Senator BEN NELSON. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Nelson.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

Let me first say how difficult this is because it seems as if each time I have been in the area of responsibility (AOR), which has been 12 times, I have come back with great success stories. I can remember when General Madhi Hashim took over in Fallujah. He, at one time, was Saddam Hussein's brigade commander and became really very close and enamored with our Marines up there, and they have done a great job. In fact, he later on was moved down to Baghdad to perform security there. I can remember a trip shortly after that where this general was in charge of, I believe, the entire eastern one-third of Baghdad. We did not have any of our boots on the ground. The security was all provided by the Iraqis. Yet, after that it changed.

I agree with Senator Warner, as everyone agrees, that we want to get to the point where these guys can take care of their own security.

We have seen it moving around. But I want to spend my time on a couple of the real serious problems we have in the new job, if you are confirmed, that you will be facing. First one—and you cannot wait until the change of command on this one because it is critical today and I think the most critical thing that you better be thinking about. I know that General Peter Schoomaker is. I had dinner with him a couple nights ago. He is most concerned about that, and that is the required implementation of the base realignment and closure (BRAC) that we passed.

It is interesting for me to bring this up because I was one of those who was opposed to having this BRAC round. The reason, General Casey, is because I said on the Senate floor: Yes, it may be true that this BRAC round will save \$20 billion, but that is not going to be immediate. It is going to cost us money in the mean time.

Now, the Continuing Resolution (CR) that the majority has, and hopefully the Democrats will massage this a little bit and correct

this problem, shorts the account for military construction under the BRAC by \$3.1 billion. Now, in the event that that is not done, can you explain the implementation or the problems that we are going to be facing if we do not properly fund that BRAC account in terms of our troops' rotation and the things that will not be done as a result of that shortage of \$3.1 billion?

General CASEY. I could not talk about the specifics of that, but as you suggest a cut of that magnitude would have a huge impact on our ability to manage the installations across the Army, at a time when we are rotating soldiers back and forth to combat zones. But I have not been into the specifics on that.

Senator INHOFE. I think it is time that you are. What I would like to ask you is by tomorrow, have for the record an outline of the problems that you will be facing in your new job, if you are confirmed, if we do not adequately fund that BRAC account. I do not know how you are going to do it. How can you plan in the future?

Right now we have come up with good plans to start rotating troops and bringing them back. We have very carefully designed this as to what the housing is going to be, and how we are going to implement that. That is going to be a serious problem.

So I would like to have that—after you have consulted with General Schoomaker and other people—so I can be talking about this. [The information referred to follows:]

Executive Summary

FY07 Continuing Resolution Impacts to the Army

- Army will not begin ~\$2.0 B of our BRAC program which is a key enabler to grow and position the Army
- This leaves more than half of our FY07 BRAC program (56%) unexecutable

FY07 Continuing Resolution Consequences for the Army

- Operational Impact on the Training, Mobilization, and Deployment of Forces in support of the Global War on Terrorism
- Unravels the Army's synchronized stationing and BRAC plan – ***puts growth of the Army, stationing, and BRAC at risk***
- Delays transformation of Reserve Component – ***has operational consequences*** –
- Breaks the Nation's obligation to provide Soldiers and Families adequate quality of life – ***affects the All Volunteer Force***
- Delays capital investment and inhibits economic development – ***affects local jobs and growth across the U.S. (over 80,000 jobs)***
- Limits predictability and military construction acquisition efficiencies – ***results in higher construction costs***

Operational & QOL Impacts

- Examples of FY 07 BRAC with urgent operational links
 - ✓ Training Ranges, Command & Control, Training Barracks – 19 projects (~\$560M) including training facilities at Fort Bliss; maneuver training at Fort Benning; Air Defense Artillery at Fort Sill; and Battlefield Trauma Lab at Fort Sam Houston.
 - ✓ Cannot start Communications/Electronics RD&E Ctr Ph 1 at APG (to close Fort Monmouth and support GWOT) (\$145M)
 - ✓ Cannot start on Human Resources Command at Fort Knox; Recruiting facilities at Redstone Arsenal; Power Projection Platform at Fort Riley or other operational projects at Shaw AFB, Benning, Leavenworth (~225M)
 - ✓ Armed Forces Reserve Centers - 27 projects (~\$700M) in 16 states
- Examples of FY07 BRAC QOL requirements – 8 projects (\$60M)
 - ✓ Youth and Child Development Centers, Benning, Riley, Bliss, Sam Houston
 - ✓ Dental Clinics, Bliss, Sam Houston
 - ✓ Medical Clinic at Riley
- All fiscal year 2007 BRAC projects and follow-on MILCON (2008-2013) are synchronized with modular force build, operational rotations, BRAC, and GDPR

Capital Investment and Economic Development Impacts

- FY 07 MILCON delayed totals ~\$2.0B capital investment
- Affects economic investment and jobs in 19 States
- The Association of General Contractors report that for every \$1B in construction 40,000 direct and indirect jobs are created
- Delaying 56% of FY 07 BRAC military construction to FY 08 will increase aggregate cost by at least \$40M due to inflation

FY 07 MILCON Program Details by Appropriation

Appropriation	# of Projects	(\$000)	Cannot Execute	(\$000)
Base Realignment and Closure (BCA05)	75	3,005,832	61	2,012,000

Senator INHOFE. Now, of all the jobs, the tough jobs, I know you had the toughest job in the world over there, but for right now I would like to have you forget about that and think about the job that you would be facing as the Chief. You have title 10 respon-

sibilities as the Chief to provide the required troops and equipment. You have the BRAC problem that we are talking about now.

If I wanted to discourage you, I would remind you that the Army is facing equipment hurdles in bringing the troop surge to Iraq. It needs 1,500 more up-armored trucks. The Army is going to have to draw on prepositioned stocks and it will take months, probably the summer, to outfit the new vehicles. I had some conversations with General Schoomaker recently.

I want to read something from his testimony before this committee. He said: "To meet combatant commanders' immediate needs, we pulled equipment from across the force to equip the soldiers deploying in harm's way. This practice, which we are continuing today, increases risk of our next-to-deploy units. It limits our ability to respond to emerging strategic contingencies."

The Army National Guard right now has only 40 percent of their required equipment. Then we have the Future Combat System (FCS), and every time we need money we move that FCS to the right and delay its implementation. Until we finish that, we are sending our kids out to battle in equipment that is not as good as our potential adversaries could have.

These are huge problems. I am not going to ask you to solve the problems this morning, but I would just like to have you address: What background and unique characteristics do you have to meet these, these really critical problems that you will be facing?

General CASEY. Thank you, Senator.

These are the basic resource modernization challenges and trade-offs that I think that I faced as the Vice Chief of Staff of the Army when we were working on the FCS system back then.

Senator INHOFE. You have always been a real strong supporter of that. I am talking about from this point forward with these new competitions for funds; how are we going to do this and you have already said, in the previous position that you held you did face these problems.

General CASEY. Right. It is standard operational requirements: strategy, modernization, and resources. One of my jobs as the Chief of Staff of the Army will be to strike the appropriate balance between current demands and current readiness and our ability, as you suggest, to field the type of force that we are going to need in the next decade. That I think in a nutshell is what I will be doing as the Chief of Staff of the Army.

Senator INHOFE. I appreciate that. So if you would for the record bring back what I was asking for tomorrow, that would be very helpful to me and to many of us on this panel, bringing to the surface the serious problem that is there.

I would say, in response to that last question that I asked you, that it is going to be a real tough job and I think you are the man for the job. Thank you for your service.

General CASEY. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Inhofe.

Senator Clinton.

Senator CLINTON. Thank you, Mr. Chairman, and thanks to you, General Casey, for your years of service, and thanks also to your family because they have served along with you, and we are grateful to all of you.

I want to follow up on the line of questioning Senator Inhofe was pursuing because I have been concerned about the readiness level of units being deployed to Iraq, and in last year's National Defense Authorization Bill, I authored an amendment that was included in the final act, that would require the Government Accountability Office to conduct a comprehensive assessment of the readiness of our ground forces within the Army and Marine Corps no later than June 1 of this year.

But even before that report is completed, there have been a series of disturbing reports that our troops do not have the equipment they need as they are being deployed to Iraq. At a January 23, House Armed Services Committee hearing, General Schoomaker stated, "We are in a dangerous, uncertain, and unpredictable time," and reiterated his concerns about the readiness levels of non-deployed combat units.

Five combat brigade teams are deploying to Iraq to support the proposed escalation of U.S. forces there. These units are part of the pool of nondeployed combat units. General, I want to ask a series of questions that follow up on our conversation yesterday in my office, because I know this is a grave concern to you and to all of us.

Are you at this point able to assert with a 100-percent level of confidence to this committee that every soldier being deployed to Iraq as part of this escalation will have all the necessary personal equipment?

General CASEY. Senator, that is my goal and I know that is General Pete Schoomaker's goal, and we work very hard to ensure that that happens.

Senator CLINTON. Can you similarly assure us that every soldier being deployed as part of this escalation will receive all the necessary training for this dangerous assignment?

General CASEY. Again, that is the objective that both General Schoomaker and I have stated to our organizations.

Senator CLINTON. Finally, will each and every soldier being deployed as part of this escalation have all the necessary force protection available to them to perform their mission?

General CASEY. As I mentioned to you yesterday, I gave that guidance several weeks ago, that that would in fact be the case.

Senator CLINTON. Now, according to yesterday's Business Week summary of a new Department of Defense (DOD) Inspector General (IG) report, the IG is concerned that the U.S. military has failed to adequately equip soldiers in Iraq and Afghanistan, especially for nontraditional duties such as training Iraqi security forces and handling detainees.

The equipment shortages were attributed to basic management failures among military commanders in Iraq and Afghanistan. U.S. CENTCOM lacks standard policies for requesting and tracking equipment requirements for units to perform their duties.

General, have you seen this IG's report?

General CASEY. I have not, Senator.

Senator CLINTON. Mr. Chairman, I would like to ask that the committee request a copy of the IG's report that was referred to in the Business Week story and that it be made available to the committee as soon as possible.

Chairman LEVIN. It will be requested and will be shared with everybody.

Senator CLINTON. General, as commander of U.S. forces in Iraq were you aware of the IG's investigation?

General CASEY. This is the Special Inspector General for Iraq Reconstruction's (SIGIR) report?

Senator CLINTON. Yes.

General CASEY. I am aware of a continuing IG process going on. I was not aware of this specific investigation. I know they are out there all the time doing a range of investigations.

Senator CLINTON. Do you know if any member of your command cooperated with this particular report?

General CASEY. I do not, but I assume they do because they routinely work with the SIGIRs in doing that reports.

Senator CLINTON. Could you report back to the committee what you find about the level of cooperation with this report, please?

General CASEY. I will, Senator.

[The information referred to follows:]

The information requested was provided by General Casey on February 16, 2007, in the attached letter.

REPLY TO
ATTENTION OF

DEPARTMENT OF THE ARMY
1777 NORTH KENT STREET, SUITE 5413
ARLINGTON, VA 22209

February 16, 2007

The Honorable Hillary Clinton
The United States Senate
Washington, DC 20510

Dear Senator Clinton:

During my testimony before the Senate Armed Services Committee on February 1, 2007, you asked that I provide you feedback on the level of cooperation provided by the Multi-National Forces Iraq to the Department of Defense Audit team that visited Iraq in June 2006 to determine if Soldiers deploying to Iraq had been equipped in accordance with mission requirements.

The team conducted a ten day assessment at Camp Victory in Baghdad and at Logistical Support Area Anaconda in Balad. They were provided unit readiness reports, property records and a broad cross section of combat and support Soldiers to interview.

On behalf of all our service members and Coalition partners, thank you and the Committee for your continued steadfast support to our mission in Iraq.

Sincerely,

George W. Casey, Jr.
General, United States Army

Senator CLINTON. Thank you.

Are you aware of the problems that are apparently cited in this report, as set forth in press accounts of it?

General CASEY. I am not. I am actually a little surprised. I think you said it was the equipping of transition teams, I spend a lot of personal time making sure that these teams have the best equipment because they operate relatively independently, and we have gone to great lengths to make sure they have the equipment. I go up and talk to each group as they come through and I have not heard any mention of the transition teams being shortchanged on equipment.

Chairman LEVIN. Senator Clinton, if I could just interrupt. We did receive that IG report that you referred to, apparently last night, and it is now in our files. It is classified Secret, so when you read it if there are parts of it that you feel should be declassified we will make those requests.

Sorry for the interruption.

Senator CLINTON. No. I would appreciate that, Mr. Chairman, because earlier this week I questioned Admiral Fallon about an article in the Washington Post titled "Equipment for Added Troops Is Lacking, New Iraq Forces Must Make Do, Officials Say." Mr. Chairman, I would like that article to become a part of the record of this hearing as well.

Chairman LEVIN. It will be part of the record.

Equipment For Added Troops Is Lacking

New Iraq Forces Must Make Do, Officials Say

By Ann Scott Tyson
Washington Post Staff Writer
Tuesday, January 30, 2007; A12

Boosting U.S. troop levels in Iraq by 21,500 would create major logistical hurdles for the Army and Marine Corps, which are short thousands of vehicles, armor kits and other equipment needed to supply the extra forces, U.S. officials said.

The increase would also further degrade the readiness of U.S.-based ground forces, hampering their ability to respond quickly, fully trained and well equipped in the case of other military contingencies around the world and increasing the risk of U.S. casualties, according to Army and Marine Corps leaders.

"The response would be slower than we might like, we would not have all of the equipment sets that ordinarily would be the case, and there is certainly risk associated with that," the Marine Corps commandant, Gen. James Conway, told the House Armed Services Committee last week.

President Bush's plan to send five additional U.S. combat brigades into Iraq has left the Army and Marines scrambling to ensure that the troops could be supported with the necessary armored vehicles, jamming devices, radios and other gear, as well as lodging and other logistics.

Trucks are in particularly short supply. For example, the Army would need 1,500 specially outfitted -- known as "up-armored" -- 2 1/2-ton and five-ton trucks in Iraq for the incoming units, said Lt. Gen. Stephen Speakes, the Army's deputy chief of staff for force development.

"We don't have the [armor] kits, and we don't have the trucks," Speakes said in an interview. He said it will take the Army months, probably until summer, to supply and outfit the additional trucks. As a result, he said, combat units flowing into Iraq would have to share the trucks assigned to units now there, leading to increased use and maintenance.

Speakes said that although another type of vehicle -- the up-armored Humvee -- continues to be in short supply Army-wide, there would be "adequate" numbers for incoming forces, and each brigade would receive 400 fully outfitted Humvees. But he said that to meet the need, the Army would have to draw down pre-positioned stocks that would then not be available for other contingencies.

Still, U.S. commanders privately expressed doubts that Iraq-bound units would receive a full complement of Humvees. "It's inevitable that that has to happen, unless five brigades of up-armored Humvees fall out of the sky," one senior Army official said of the feared shortfall. He expects that some units would have to rely more heavily on Bradley Fighting Vehicles and tanks that, although highly protective, are intimidating and therefore less effective for many counterinsurgency missions.

Adding to the crunch, the U.S. government has agreed to sell 600 up-armored Humvees to Iraq this year for its security forces. Such sales "better not be at the expense of the American soldier or Marine," Speakes told defense reporters recently, saying U.S. military needs must take priority.

Living facilities in Iraq are another concern for the additional troops, who would be concentrated in Baghdad, Army officials said. The U.S. military has closed or handed over to Iraqi forces about half of the 110 bases established there after the U.S.-led invasion in 2003. Decisions are being made on where to base incoming units in Baghdad, but it is likely that, at least in the short term, they would be placed in existing facilities, officials said.

Lt. Gen. David H. Petraeus, the new top U.S. commander in Iraq, has requested that additional combat brigades move into Iraq as quickly as possible. But accelerated deployments would mean less time for units to train and fill out their ranks. Brigades are required to have an aggregate number of soldiers before deploying but may still face shortages of specific ranks and job skills.

Meanwhile, the demand for thousands more U.S. forces in both Iraq and Afghanistan is worsening the readiness of units in the United States, depleting their equipment and time to train, Army officials said. "We can fulfill the national strategy, but it will take more time and it will also take us increased casualties to do the job," Speakes said.

Army Chief of Staff Peter J. Schoomaker testified last week before the House Armed Services Committee that, regarding readiness, "my concerns are increased over what they were in June."

"To meet combatant commanders' immediate wartime needs, we pooled equipment from across the force to equip soldiers deploying in harm's way," he said. "This practice, which we are continuing today, increases risk for our next-to-deploy units and limits our ability to respond to emerging strategic contingencies."

Schoomaker called for additional funding to fix "holes in the force" and "break the historical cycle of unpreparedness."

The equipment shortages are pronounced in Army National Guard units, which have, on average, 40 percent of their required equipment, according to Army data. Senior Pentagon and Army officials say they expect to have to involuntarily mobilize some National Guard combat brigades earlier than planned to relieve active-duty forces. But the Guard as a whole is not expected to return to minimum equipment levels until 2013, Army figures show.

The Army seeks to increase its permanent active-duty ranks by 65,000 soldiers by 2012, creating six new combat brigades at a total estimated cost of \$70 billion.

Senator CLINTON. After the hearing, the chairman and ranking member sent a letter to Secretary Gates asking about the readiness of our troops. In that article were very specific and disturbing questions from Lieutenant General Stephen Speakes and others about the lack of equipment, the lack of readiness. Among the concerns were the proper level of armor for vehicles, prepositioned sets issued in Kuwait are the add-on armor type and do not provide adequate protection, insufficient add-on armor kits for logistics trucks and prime movers, insufficient and incomplete electronic countermeasure devices designed to defeat improvised explosive devices, insufficient force protection materials for the outposts we are building in Baghdad and throughout Anbar Province, insufficient training sets of equipment and vehicles at home station for units to train on in preparation for deployments.

I am very concerned that we are pursuing a policy that, regardless of what one thinks about it or how one evaluates its chances for success, certainly raises the fears that so many of our young men and women are going to be put into very dangerous situations in neighborhoods in Baghdad, dependent upon their Iraqi counterparts who may or may not be reliable. Mr. Chairman, I believe that because of these disturbing reports about equipment shortages we should as we begin to debate the Warner-Levin proposal include provisions that require that adequate equipment and training be mandated so that we do not send any young American into this dangerous mission without knowing that they are as well-prepared, as ready and equipped as they deserve to be to try to fulfill this mission.

General CASEY. I do not think anyone feels stronger about that than I do, Senator.

Senator CLINTON. Thank you, General.

Chairman LEVIN. Thank you, Senator Clinton.

Senator Chambliss, going according to the list that I have is always a little bit awkward, but we have an early bird rule and I just follow what our clerk tells me, is the earliest birds get the worm.

Senator CHAMBLISS. I do think Senator Sessions was here before I was, Mr. Chairman. I am happy to go, but he was here.

Senator SESSIONS. I was here when you gaveled this hearing.

Chairman LEVIN. I am going to call on Senator Sessions. If you would share this with Senator Sessions. Unhappily, you are not even listed on here. Our clerk is going to get a raise—get a rise out of me. [Laughter.]

Thank you, and I appreciate that very much, Senator Chambliss. Senator Sessions, forgive the error.

Senator SESSIONS. Thank you, Senator Chambliss. You are very gracious as always.

Let me just ask you this, General Casey. You have been leading men in combat for some time now. As Chief of Staff of the Army, will you take every effort and utilize every power you have to ensure those soldiers when they hit the ground in Iraq are properly equipped and supported?

General CASEY. And trained, I will.

Senator SESSIONS. With regard to the soldiers that are going there, they are fully equipped with their \$17,000-plus worth of equipment and all that goes for each soldier; is that right?

General CASEY. Yes.

Senator SESSIONS. We had testimony the other day that two or three of the brigades would be ready to go fully equipped and a couple of brigades may lack some uparmored vehicles or transport vehicles and that they were working on that. But if you can confirm you will utilize every power you have to make sure those brigades are fully equipped?

General CASEY. I will, Senator. In fact, I gave instructions several weeks ago in Iraq that we would not bring anybody in who was not prepared.

Senator SESSIONS. So if they do not send them to you properly equipped you are not going to put them on the street?

General CASEY. Right.

Senator SESSIONS. General Casey, thank you for your leadership and service to our Nation for 37 years. You were born in an Army hospital in occupied Japan, son of an Army man. I do not know if he was an officer or not. My father served in occupied Japan and I guess one of the great things in the history of the world is MacArthur and our military's efforts to create a prosperous, free Japan today. It is one of the great things that happened in our world. We have invested a lot of effort now in trying to bring Iraq to some such level as that. That would be our dream.

You now have a son in the military. So I know that many of us are frustrated about troop levels and strategies and plans. I would just say this. I liked it a while ago when you said you did not want to ask for one more soldier to be sent to Iraq than you believed was absolutely needed. I think that is where most of the American people are. That is where the people are who are dubious of this war. That is where the people are who support our efforts, like I do.

I do not want to send a single person there that is not necessary. I want to add this in as part of my thanks to you. You were Vice Chief of Staff of the United States Army. They asked you to go to Iraq for 18 months to deal with the challenges there. You accepted that responsibility. You went and you have stayed now 30 months away from your family, giving your every waking moment to a successful policy there. I thank you for that.

I cannot see how that can do anything but help you be a more effective, sensitive, knowledgeable Chief of Staff of the Army. So I think I wanted to say that.

General CASEY. Thank you, Senator.

Senator SESSIONS. I think it was a general in the German army that said few strategies exist beyond the first shot of the war. Things change. They really change rapidly, do they not, in an asymmetrical insurgency type situation we are facing in Iraq?

General CASEY. They do, Senator. It is interesting, the threat has changed three times in the 2½ years I have been there at my level, and at the tactical level it changes faster than that.

Senator SESSIONS. General Petraeus wrote the counterinsurgency manual. It is filled with so many subtleties and demands on the military to alter and change tactics, strategies, and initiatives constantly in a struggle like this, would it not?

General CASEY. It is. In fact, in the summer of 2005 I was getting a sense that our soldiers were not really effectively applying what counterinsurgency doctrine that we have, and I sent a team out to check. What they came back and said is, they generally understand it, but not everybody has all the tools, and if the commander gets it, the unit gets it. So we established a counterinsurgency academy in Iraq where every brigade commander brings his battalion and company commanders through a week-long course to work on the subtleties and the nuances of counterinsurgency operations inside Iraq. It has proved very effective. Over 5,000 leaders have actually been through that course already and we are expanding it now to bring Iraqis in so that they can pick up the counterinsurgency operations.

Senator SESSIONS. General Abizaid in a private conversation several years ago in Iraq on a C-130 when only the two of us could hear one another, and hardly that, explained to me his personal be-

lief as to why we ought not to bring in more troops than necessary to do the job. There is a real tension there and you have touched it. I do not know, maybe Senator McCain is right. I do not know.

But I have always adhered to his view, and I think you share it, that we want to keep the pressure on the Iraqis to step up their capability so it is their country and their nation that they are defending. If you bring in too much support it could erode or lessen the pressure on them to assume responsibility.

Is that part of your analysis?

General CASEY. That is exactly right. I saw this in Bosnia myself as a brigadier general. I remember watching myself going out and trying to solve the problems of Bosnia and as a result my sense was that they became dependent on us and they did less.

Senator SESSIONS. What about the Lawrence of Arabia quote? What is that? Can you recall that for us?

General CASEY. "Better they do it imperfectly with their own hands than you do it perfectly with yours." I use that quote with each of the classes in the counterinsurgency academy.

Senator SESSIONS. He was expert in the Arab culture, and that is I think good advice.

It has been a struggle and it has been tough, and we are disappointed that it has not gone smoother. We all wish it had. But war requires leadership. Leaders make hard decisions. They accept responsibility for their decisions and we live with those decisions. You have made some tough decisions. I think you have done a good job. But whether or not we agree or disagree with every decision you have made, I believe we can all agree that your career as Vice Chief of the Army and this experience now, 30 months extended tour in Iraq, will help you to be even more effective as Chief of Staff of the Army, and I intend to support you.

General CASEY. Thank you, Senator.

Senator SESSIONS. My time is up.

Chairman LEVIN. Thank you, Senator Sessions, and I again apologize for the mistake here.

Senator Webb.

Senator WEBB. Thank you, Mr. Chairman. I apologize for having had to step out. I am trying to be in two places at once this morning. We had a Foreign Relations Committee hearing as well.

General, I want to express my best wishes to you and to your family. My congratulations to you and my appreciation for the service that you have given. I would like in several different ways to associate myself with the comments that my fellow Senator from Virginia made. I do not think it is a consequence of the honor of representing Virginia so much as the fact that we both served in the Marine Corps, we both had the privilege of serving in that Pentagon as Secretary of the Navy, and I think it brings a little bit different focus on some of the questions that have been asked of you this morning.

I think that a few of the questions that have been asked of you—I am not going to ask you to comment on this, but I think it bears saying—are evidence that your situation this morning represents the classic conundrum of military service at the highest level. In this administration it has not been unheard of for officers who spoke too loudly very often to have lost their jobs, and at the same

time to speak too softly often causes the military leader in historical situations rather than the civilian boss to be blamed when things go wrong.

I believe strongly that military leaders should be held accountable, but certainly in this situation today from a lot of people's perspectives, including my own, the consequences of what I believe has been a failed strategy should be shared at a far higher level.

I have a question with respect to your assumption of your new responsibilities that I would like to ask of you, and it relates to the fact that we currently have an estimated 100,000 civilian contractors working in Iraq. On the one hand, I have heard comments from many senior military leaders that clearly we could not do it without them—I hear this over and over again—because of force structure deficiencies that have been built into the end strength levels, particularly in the Army.

At the same time, I have a concern about the cost of these people and also the accountability that pertains to this concept of, for lack of a better phrase, renting an army. This is a rent-an-army out there. The costs in many ways are obvious, particularly in the short-term. There are so many stories of individuals leaving Active Duty who are making maybe \$20,000 and they can go over and work for five to nine times that and doing quasi-military work in the same country, pretty much doing the same kinds of things.

The notion of accountability is deeply troubling. I am not aware of any cases where misconduct—and I am not talking about the contracting situation, which we are trying to get our arms around, but human misconduct—shooting Iraqis out in the villages, these sorts of things. I am not aware of any incident where that sort of misconduct has been brought to proper justice. There may be. There may be one or two, but I am not aware of it.

So my question really is, would it not be better for this country if those tasks, particularly the quasi-military gun-fighting task, were being performed by Active-Duty military soldiers, in terms of cost and accountability?

General CASEY. In terms of cost, I am not sure, Senator. We talked yesterday on this, the notion of what is the long-term cost to take a soldier, bring him in, train him to do this logistical task, and take care of his family, when you compare that to the cost of the logistics contract. I have not seen the figures on the cost-benefit on that.

Senator WEBB. I would be interested in having those as you assume your new job. I think it is something worthy of discussion on the costs.

General CASEY. I think the other part of this, though, it is important that these contractors are used for logistics type skills and not necessarily the combat skills I think you mentioned there earlier. We have I want to say about 20,000 armed security contractors there that we have worked with and coordinate with. Those are the ones that we have to watch very carefully.

Senator WEBB. Another factor in this, and it does go into the way that our force structure levels have oscillated and the way that they are going to now, is the disruption of the rotational cycles and the hardship that puts on planning, on morale, particularly in the

mid-term, of the Army and the Marine Corps to continue operating in Iraq. Do you have a comment on that?

General CASEY. By disruption in the rotation cycles, you mean extensions?

Senator WEBB. Extensions and accelerating deployments. We ideally want a two for one, let us say, cycle and we have been operating on one for ones, and I know the new Commandant has mentioned he very much wants to get back to a two to one for a lot of reasons, including morale.

General CASEY. I think it is clear that those extensions and accelerations place additional stress on the force. I do not think there is any question about that. I believe that is exactly what this increase in Army end strength is designed to alleviate. That will not happen overnight. It takes a while to build those forces.

But I think it is interesting. I have already seen a brigade, one of these transformed brigades, that did not exist when I was the Vice Chief of the Army, has already been to Iraq and left. So it is not a long-term process, but it does take some time.

Senator WEBB. I am certainly hopeful that we can reduce the force structure so that we can have a different discussion regarding the end strength numbers that have been proposed. But certainly in the short-term we have a real problem here.

If I may—my time has expired—I would just like to say one other thing. I would like again to associate myself with something that Senator Warner said and express my gratitude to your father for the service that he gave our country and for all of us to remember that he did give his life in service to our country.

I grew up in the military as well. When you were sitting there talking about your schools, I counted. I put on a piece of paper, I went to nine schools in 5 years at one point traveling around in the career military. I know what that does to a family, and you and your family have my gratitude. Thank you very much.

General CASEY. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Webb.

I think Senators Warner and Webb speak for all of us in referring to your father for his service and the way in which you have continued that tradition. It is important that we all recognize that legacy and that gift which he gave to his country.

General CASEY. Thank you.

Chairman LEVIN. Senator Chambliss.

Senator CHAMBLISS. Thank you, Mr. Chairman.

As Mr. Webb was saying, he spent 5 years and went to nine schools. Senator Graham said he spent 9 years in the fifth grade. [Laughter.]

Chairman LEVIN. Do you want equal time, Senator Graham? You can have equal time if you need that. [Laughter.]

Senator GRAHAM. I cannot rebut it. [Laughter.]

Senator CHAMBLISS. General Casey, first of all let me just echo the sentiments of all of us in thanking you and your family for the terrific commitment that you have all made to the service to our country and to tell you how much we appreciate that commitment. I know it is a family commitment, too. It is not just you. You are correct, without the support of your wife and your sons you would not be where you are today. So we do appreciate that.

General, what is the role of the Army Chief of Staff in the decisionmaking process concerning the war in Iraq today?

General CASEY. As the Army Chief of Staff, I would sit as a member of the Joint Chiefs and have a direct role in formulating military advice to the Secretary of Defense and to the President.

Senator CHAMBLISS. So is there a difference in what you would do as Chief of Staff relative to the war inside of Iraq and outside of Iraq?

General CASEY. If I think I understand the direction here, Senator, inside Iraq I would be looking primarily inside Iraq and looking at the appropriate strategies to apply in Iraq. As a member of the Joint Chiefs, I believe I would be looking at a broader context and how the war in Iraq fit broadly into our overall security strategies of the United States.

Senator CHAMBLISS. You have been Commander of the MNF-I for 2½ years. We cannot say that it has been a successful 2½ years. The situation over there is very dire right now. What do you bring to the table as potentially the next Chief of Staff of the Army that you did not bring to the table as Commander of the MNF-I?

General CASEY. That is a good question, Senator. I agree with you, the situation in Iraq is certainly not where I thought it would be when I was going out the door, and I am no more comfortable with the situation in Iraq than you or anybody else is.

I will tell you that the experience I have gained in 2½ years in a very difficult environment has seasoned me in ways I probably do not even fully understand now. I have had to deal at the highest levels of our Government. I have mentored three Iraqi prime ministers in political-military interactions. I have dealt with three different ambassadors, four coalition corps commanders.

I have learned an awful lot about strategic leadership and I believe that will help me greatly as the Chief of Staff of the Army. I mentioned some of the more narrow insights that I received in terms of people, transformation, and Guard and Reserve matters. But I think the big thing that I will bring back from Iraq is the seasoning and strategic leadership skills that I gained over 2½ years.

Senator CHAMBLISS. General, you and I have had a couple of private conversations about troop strength in Iraq, and obviously you did not think we needed additional troops early on and you have now come to the realization that you think we do. At a press conference in October 2006 when you were asked if more troops are needed, "Maybe, and, as I have said all along, if we do I will ask for the troops that I need, both coalition and Iraqis."

Now, some time after October 2006 into November-December, apparently you concurred in the fact that an additional two brigades originally were needed. The President has made a decision to send an additional four brigades into Iraq and you concur in that decision. Take me through that process. What changed your mind? How do you decide now that you concur, that in October we did not need troops, November we need two brigades, now you agree we need four brigades?

General CASEY. I laid a little bit of that out in my opening testimony, Senator, but let me just review the bidding. We are constantly looking at the situation in Baghdad, looking for ways to im-

prove it. In the middle of November, the Baghdad division changed and we had a new commander in there, so it was an opportunity for us to take a fresh look at the situation with a new set of eyes.

I sat down with him and the corps commander and said: Take a blank piece of paper and look at this hard and tell us what you need to help the Iraqis stabilize their capital. At the same time, the Iraqis came forward with their plan, and this is the plan for nine districts with an Iraqi brigade and a coalition battalion in each district. We worked that with the Iraqis and have continued to develop that over time.

As my commanders and the Iraqis worked that plan, they came back and said: We are two brigades short; we need two additional coalition brigades and three Iraqi brigades to make this plan work. That evolution went from about the middle of November until the latter part of December, and right before Christmas I asked for the additional two brigades.

Now, there were three other brigades that were offered and they were flowing on a time line that allowed us to make assessments on whether or not they would be needed. As I said, my bias is that I do not want to bring one more soldier in there than we need. I was okay with having those forces basically in reserve to be called forward if necessary. Now that I am leaving, having those forces in reserve and prepared to come I think gives General Petraeus, the new commander there, great flexibility to do what he thinks he needs to do. He will probably look at things differently than I do.

That is how my thinking has evolved. But I always again go back to my base case, which is I do not want to bring one more American soldier or marine in there than I think we need to do the job.

Senator CHAMBLISS. If General Petraeus comes to you as the Army Chief of Staff and said, I need additional assets, including additional troops, if we are truly going to be successful in this operation, are you going to give them to him?

General CASEY. I will, Senator. In fact, I will tell him the same thing that Pete Schoomaker told me when I went to Iraq 2½ years ago, and that was: Ask for what you need; we will figure it out.

Senator CHAMBLISS. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Chambliss.

Senator McCaskill.

Senator McCASKILL. Thank you, Mr. Chairman.

We are now aware that about \$38 billion of taxpayer money has been spent on what was proposed to be a reconstruction effort in Iraq. I think it would be kind to say that most analyses of those expenditures would indicate that all or most of it appears to not have been effectively used, since if you look at the measures of electricity produced and oil and the stocks of gasoline, are at all-time low levels.

Since you were there, General Casey, I am frustrated by what I have learned from the IG's report in terms of contracting processes at DOD. I am even more frustrated at the idea that we have spent \$38 billion while the Iraqis are sitting with surpluses that they "are unable to spend appropriately."

Can you give us a ground view of how we could have made this large a mistake in terms of the moneys that have been spent and

ended up with the kind of failure we have had in terms of meaningful reconstruction?

General CASEY. I have not seen the report that you are mentioning here, Senator. The reconstruction effort has, no question, been challenging and we worked very hard with the Iraq Reconstruction Management Office, the ambassador, and our engineers to ensure that the money that was allocated for the reconstruction of Iraq was appropriately spent. That, as you suggest, has not always been the case.

The other issue that you mentioned is a challenge, and that is the Iraqis' ability to spend their own money. It is a combination of poor or nonexistent contracting procedures and fear of corruption. The result has been that we have to do some fairly significant work with them, particularly on the security side, to get them, to help them, spend their money. The work that Lieutenant General Robert Dempsey has done getting a foreign military sales program going for them allows us to spend their money and it lessens some of the burden on that.

When I got there there were less than 250 of the Iraq Reconstruction Fund projects started. We have now started over 3,000 of the 3,400 projects as part of that. But I think probably about 75 percent of those things are done and the rest of them will be done here over time.

It is a tough environment both in terms of contracting and in terms of getting the appropriate materials for the projects to be done and then to secure the sites.

Senator MCCASKILL. Perhaps we are just getting all the bad news and we are not getting any of the good news on reconstruction. But I think it would be important for this committee to know your view of what successes there have been. I am frustrated that the person who is supposed to help Iraq spend their \$10 billion they have made supposedly a commitment to spend under this new strategy, that that person was selected the day before the plan was announced by the State Department.

It is a little unfair for me to be questioning you in this regard because I think the military has done an incredible job. But I keep hearing that it is the economic infrastructure and the political infrastructure that is going to make the difference in terms of long-term success in this country, and it appears to me that we are so focused on what we are doing militarily that we are—and I hate to be flippant, but from what I have read I am not sure we are the right people to advise the Iraqis on how to spend their money, if we spent \$38 billion and we cannot point to any success in terms of improvement of the infrastructure.

I would like your input on that as you take your new position because we know there is going to be more money asked of the American people in this regard, and I think we need to be able to explain to them how that many billions of dollars could have been spent with some real horror stories, and how we can possibly chase that money with more money until we have more assurances that there is going to be meaningful progress made. I would really appreciate your input on that as you take this position.

General CASEY. Thank you, Senator. Your point that the progress on the economic and political fronts must accompany military and

security progress is exactly right. They all must go forward together, as you point out.

Senator McCASKILL. The other area I wanted to ask you about briefly before my time expires is about recruitment. We have another incident that has occurred in St. Louis that I believe will be made public in the coming weeks, about inappropriate things being said by recruitment officers to potential recruits about the potential danger and other things. I know there has been some national stories in this regard.

Could you address the pressures that the Army feels about recruitment and what you think you can do to make sure that there are not any abuses occurring in the recruitment process?

General CASEY. I am not aware of the specific incident that you are talking about. My sense is we are doing fairly well in all three components in recruiting. Everyone met their December objectives. The Army and the National Guard are ahead for the fiscal year in terms of recruiting and the Reserves are about 90 percent of where they need to be for the year.

Recruiting is always a tough challenge and there are always pressures there. You raise a good point. I am sure that the Army has quality control measures to ensure that those pressures do not cause people to overstep their bounds, as you suggest has happened in St. Louis.

Senator McCASKILL. I think you are going to see this around the country, unfortunately, General, or fortunately, depending on your perspective, that these news outlets are going to be sending hidden cameras in to record recruitment conversations, and when there are things said that are inappropriate, I think they are going to become very high profile.

I support the President's call for a larger active military and I understand that is going to mean there is a great deal of recruitment pressure, hopefully, as far as the eye can see. I think as we face those pressures to increase the size of our military, I think it is really important that you get a handle on what is being said person to person in these recruitment appointments and make sure that there are not any young men or women that are being misled.

Thank you very much.

General CASEY. Thank you.

Chairman LEVIN. Thank you, Senator McCaskill.

Senator Graham.

Senator GRAHAM. Thank you very much, Mr. Chairman.

General, my compliments to you and your family for a very long career of distinguished service. But this is about a war that cannot be lost, and it is almost like I am hearing two different wars being described here. When you hear General Petraeus testify and Admiral Fallon, there is a general belief—let me just put it this way. General Petraeus said: "Senator Graham, this is not double down; this is all in." Do you agree with that?

General CASEY. It is not double down, it is all in?

Senator GRAHAM. All in. This new policy is all in. This is our last best chance to get this right.

General CASEY. I agree with that. As I described in my opening testimony, the Iraqis are in a position to assume responsibility for

their security by the end of the year if we can get the sectarian situation in the capital under control.

Senator GRAHAM. The point I am trying to make has nothing to do with the Iraqis. To all of my colleagues who believe we cannot lose in Iraq, this is our last chance. The public is going to break against us big time.

The Army is broken. You have asked for more troops to clean out Fallujah and Fallujah got reoccupied. There has never been a willingness on your part during your time as commander in Iraq to accept the idea that maybe General Eric Shinseki was right. Was General Shinseki right?

General CASEY. My boss, General Abizaid, has said he agrees with that, and he was there on the ground——

Senator GRAHAM. For 2½ years everybody that has come before us has fought the idea that General Shinseki was right. Everybody that has come before in the last 2½ years, including General Abizaid, says the Army is doing fine, and December 14, 2006, General Schoomaker went to the House and said the Army is broken.

This is the last best chance and the question is, the last hand to be played, should you play it? Have you been fighting for the last 2½ years a counterinsurgency campaign in Iraq?

General CASEY. We have, Senator. In fact, in August 2004 when we first came in, Ambassador John Negroponte and I——

Senator GRAHAM. Have you had the troop levels consistent with a counterinsurgency program as described by General Petraeus for the last 2½ years?

General CASEY. We have. It varies with the security situation around the country, and we have had the ratios that we needed when we needed them. Fallujah is a good example. I guess I question your——

Senator GRAHAM. Could I go to Fallujah tomorrow? Could I go downtown to Fallujah tomorrow as a Senator?

General CASEY. You could.

Senator GRAHAM. I asked to go and they would not let me.

General CASEY. I actually took Senator Robb down there. If you had asked me I would have——

Senator GRAHAM. I asked to go to Ramadi and they would not let me.

General CASEY. Ramadi is a little tougher, Senator.

Senator GRAHAM. The point I am trying to make is it is clear to me that we have never had the force levels to be claiming we have been fighting a counterinsurgency.

What percentage of the population is contained in the four provinces that are out of control in Iraq?

General CASEY. I would not characterize the provinces as out of control in Iraq. Baghdad and Anbar are very difficult. Diyala and Sal-a-Din are not out of control.

Senator GRAHAM. What percentage of the country would it be impossible for an American to walk down the street without being afraid of getting shot at or killed?

General CASEY. Probably, about half actually, Senator.

Senator GRAHAM. Well, here we are 2½ years later. Half the country, no American can walk down the street. We are talking about sending 21,500 more as our last best chance. I asked why

21,500. I have been told that is all we have, that if we wanted to send 50,000 we could not get them. Is that true?

General CASEY. I do not know that to be true, Senator. I have not heard that.

Senator GRAHAM. That is something we need to know from the Chief of Staff of the Army. I believe that is all we have. The reason we are not sending 31,500 is we just cannot get them.

I share Senator Warner's view, I do not know if this is going to work or not. But I know now we are in a mess and this is the last best chance. The question I have is, the advice you have given—I mean, you are saying we need more troops because the Iraqis have changed their plan. I have never been told by an Iraqi prime ministerial official that they want 21,500 more troops. Have you?

General CASEY. No, I have not, Senator.

Senator GRAHAM. No further questions.

Chairman LEVIN. Thank you, Senator Graham.

Senator Bill Nelson.

Senator BILL NELSON. Senator Graham, no one would say that General Shinseki was right because Secretary of Defense Donald Rumsfeld was not going to let them say that. You and I come to the same conclusion, that there is nothing magic about the 21,000, it ought to be a lot more. I suspect what you have just said is correct, that we do not have the ability to produce a lot more.

But the question for me is will this 21,000, 17,000 of which will go into Baghdad, will it do any good? I personally believe that the troops going into Anbar will do some good, and I was convinced by the Marine generals there that was the case.

But it is a sad commentary, and I did not plan to say this, but you certainly laid the groundwork, that when we have a career 35-year general as the head of the Army and he gives an honest and straightforward answer to Senator Levin in front of this committee, to occupy how many troops and how long do you need, he said "Several hundred thousand for several years." Of course, I think what is concerning Senator Graham is the fact over the last several years that nobody in the uniformed military would challenge the Secretary of Defense.

General, you have my admiration for your career and as I look at your little family back there they have sacrificed, and yet it is an honor also for them in this public service that people give in the service to their country.

I wanted to ask, since so much of the success of this plan is predicated on the fact that the Iraqi army is going to be reliable, I have asked and other Senators have asked all of the witnesses that have come here—Secretary Gates, General Petraeus, Admiral Fallon—is the Iraqi army reliable and how much? No one has given a straight answer and, as you and I talked in my office, I indicated that I was going to ask you that question.

Would you share for us what you think about the reliability?

General CASEY. As I said yesterday, Senator, it is a mixed bag and there are good units that are fairly reliable and there are other units that are less reliable. About a couple of months ago I directed that we add a reliability index to the normal monthly readiness report. For some time now we have been doing a readiness report with the Iraqis on their units—the people, equipment, training,

those standard things. What we were not getting was your point. We were not getting at the reliability.

What we were finding is you could have all your people, you can have all your weapons, your vehicles can all work, but if we cannot depend on you it is a different problem. I have yet to get my first report back on that, Senator. But I think your point is exactly right.

Senator BILL NELSON. Let me run this by you then. I have checked and I have it in writing that what I am about to state is unclassified. A senior officer on the Joint Staff with significant military experience has testified to the Senate that, of the 325,000 Iraqi army and police, that about 130,000 are actually army trained and equipped, and of that 130,000 half of them approximately are geographically located and half of them, or about 65,000, are nationally recruited and more reliable; and that of that 65,000, they are expecting, of the Iraqi army, 30,000 to be in Baghdad.

That same senior officer, when I asked the question how many are reliable, gave an astoundingly high percentage of 80 percent of that 30,000 in Baghdad.

Your comments?

General CASEY. 80 percent in Baghdad reliable of those forces, that does not strike me as an unrealistically high number. Knowing the units that we have in Baghdad on the army side, that is probably about right.

Just on the point on geographically located units versus nationally recruited, what we have, I think people know, that 5 of the 10 Iraqi divisions are the former National Guard units that were recruited locally, and they are fairly reliable in their local areas. But what we have found, when we wanted to move them someplace else we have had challenges with them. The Iraqis have put in a deployability scheme where they work their way through this, and we have actually seen that that has made a difference.

The other ones, the nationally recruited ones, as you say or as you suggest, they are more mobile, but I guess what I am going to say is it is not a reliability issue just because the one happens to be geographic and one happens not to be.

Senator BILL NELSON. You can understand the concern that we have when we ask over and over on a plan that is predicated on the reliability of the Iraqi forces, putting more of our men and women in Baghdad in a combat situation, where in the doctrine of clear, hold, and build that you are going to clear with the Iraqi forces and it is going to be more Iraqi forces than American forces that will go in and clear an area. So naturally we as the Senate Armed Services Committee need to know what is the professional military's judgment of what is the reliability of those forces that are going in.

Yet we cannot get anybody to give us a consistent or even an answer. Would you please do that when you have taken over the reins as Chief of Staff?

General CASEY. I will actually do it before that. I will give you some feedback from the reliability assessment that I have asked for from my units.

Senator BILL NELSON. Twenty percent unreliable, if those statements by this senior officer are correct. Then report back to us, why is it that they are unreliable? Do they not show up? Are they criminals? Have they been infiltrated by the militia? Of course, that is a high number and would certainly undermine the mission of the Iraqi army in Baghdad.

General CASEY. I would not get fixed on 80 percent. I do not know where he got that number. I said it did not strike me as artificially high. The reasons you mentioned why people would be unreliable are exactly right, and if you add poor leadership to that you would have about the four or five things that make these units unreliable.

The fact of the matter is, and one of the reasons we are partnering these coalition units with the Iraqi units, is they fight better when they are with us. We have demonstrated that time and time again. So we put a little steel in their spine when they are standing next to an American soldier or an American marine.

Senator BILL NELSON. General, over and over this committee we have been told by the Secretary of Defense that he had hundreds of thousands that were trained and equipped Iraqi army that were reliable. That was incorrect information, and that leads us to this point. What we want is the truth and we will look forward to receiving that from you.

[The information referred to follows:]

The information requested was provided by General Casey on February 16, 2007, in the attached letter.

REPLY TO
ATTENTION OF

DEPARTMENT OF THE ARMY
1777 NORTH KENT STREET, SUITE 6413
ARLINGTON, VA 22209

February 16, 2007

The Honorable Bill Nelson
The United States Senate
Washington, DC 20510

Dear Senator Nelson:

During my testimony before the Senate Armed Services Committee on February 1, 2007, you asked that I provide a reliability assessment of the Iraqi Security Forces to the Committee.

A subjective assessment of the reliability of Iraqi Security Forces was completed in January; however, the results are incomplete. The command will continue to mature the reliability assessment process and will provide results when available.

On behalf of all our service members and Coalition partners, thank you and the Committee for your continued steadfast support to our mission in Iraq.

Sincerely,

George W. Casey, Jr.
General, United States Army

General CASEY. Thank you.

Chairman LEVIN. Thank you, Senator Nelson.

Senator Dole.

Senator DOLE. General Casey, let me also thank you and your family for your outstanding service to our country, and I look forward to our continued work together in the future.

The Congressional Budget Office in its most recent long-term assessment of the DOD budget estimates that the shortfall between anticipated funding levels and what is required is a minimum of an additional \$52 billion per year across the Future Years Defense Program and well out into the future. My understanding of the fiscal year 2008 budget request at this point is that the top-line figure keeps pace with inflation, but there is no real growth.

Given the cost of the war, the cost of reset, the cost of increasing active duty end strength, the cost of developing and procuring FCSs, it is apparent that there is an appreciable risk, measure of risk, in the budget. What areas of the Army budget give you the greatest reason for concern as we look out over the next few years?

General CASEY. I will rapidly expend my knowledge on this, so I will give you just a couple of thoughts, Senator. I think my greatest concern is our ability to equip, provide the soldiers that are deploying with the best equipment in time for their training, so that they can be successful in whatever combat mission they are going on.

I think the second main concern I have is the reset, the recapitalization of the force as it comes back out of Iraq. We need to ensure that we have an appropriate level of funding so that we can fix what we have that is broken.

Then, as Senator Inhofe was talking about earlier, we cannot take our eye off modernization and the FCSs. So I will balance the challenges of near-term readiness with long-term modernization over time. But those are the three things I think that come to mind.

I will add one more and that is having enough money to ensure that we provide the soldiers and families of the Army who are going through this very difficult and stressful period with a quality of life befitting them.

Senator DOLE. I am a strong proponent of increasing the Active Duty Army's end strength. This increase is necessary to have the forces to respond to major regional threats, to meet critical homeland security, defense, and peacekeeping needs, and to accommodate the increasing number of long-term deployments connected with the war on terror.

Every brigade in the North Carolina-based 82nd Airborne Division has deployed three times since the fall of 2001. In short, today's high operational tempo is driving home the point that end strength is too low. The next Army Chief of Staff will confront difficult budgetary pressures. Give me your assurance that you will not jettison the proposal to increase Army end strength in pursuit of funds to pay for other pressing needs.

General CASEY. I will certainly work to sustain the new end strength addition here. I guess never say never, Senator, but I agree with you that we need to increase that end strength and we need to build the forces that will come from that end strength for exactly the reasons that you suggest.

Senator DOLE. North Carolina is home to the Joint Special Operations Command, the Army Special Operations Command, and the new Marine Special Operations Command. I as much as anyone want our special forces to grow, but we need to grow the forces in a manner that does not sacrifice quality in pursuit of quantity. Would you share with us your thoughts regarding the expansion of the special operations community over the next several years and particularly the pace of that expansion?

General CASEY. I could not comment on the specifics of the plan, Senator. But I can tell you that working with the special forces in the past 2½ years in Iraq and watching the value that they bring to these types of counterinsurgency missions that we will be facing here in the 21st century, I am a big proponent of special forces myself.

We have been working on this for a while and, again as you suggest, increasing the size of these forces without impacting their quality and the experience that they have is critical. But I could not tell you now what the specifics of the Army's plan are for growing the special forces.

Senator DOLE. Let me ask one other question. The United States has enormous resources and expertise in a number of non-DOD departments and agencies that could be better utilized to help us achieve our national security objectives in Iraq, Afghanistan, and

elsewhere. It is fair to say that today most, if not all, national security objectives pursued by the United States are fundamentally interagency in nature. Do you believe it is time for Congress to consider Goldwater-Nichols II type legislation to improve interagency coordination?

General CASEY. I think it is something that ought to be looked at. You are exactly right. I have watched this now in Bosnia, I have watched it in Kosovo, and I have watched it in Iraq, and it really is an area where we keep relearning the same lessons again. I think some type of program that would leverage the skills from across all of the interagency in a sustained way I think would be very helpful to us all.

Every time we have done it we have said we will never do this again and so we forget the lessons, and then we do it again. I think your notion is exactly right.

Senator DOLE. Thank you, General Casey. Thank you, Mr. Chairman.

Senator REED [presiding]. General Casey, Senator Levin has indicated I am the next in order.

First, let me thank you for your devoted service to the Army and the Nation and that of your family. We appreciate it and respect it. You are someone who has inspired a lot of soldiers with your dedication and I thank you for that.

You assumed command in Iraq in 2005, is that correct?

General CASEY. July 1, 2004.

Senator REED. 2004, excuse me. At that time, I think you could properly say that you were assigned to manage some of the consequences of failure: insufficient forces—many of my colleagues have spoken about that—despite General Shinseki's prescient comments to this committee; a de-Baathification policy that alienated the Sunnis; an Abu Ghraib incident which further endangered our status in that region and in that country; emerging sectarian violence, which was already evident when you took command.

I think the record should show that as you assumed this command there were significant and serious failures already with our approach and endeavor in Iraq. The policy and the strategy that I understood that you were pursuing based upon the President's comments was described as clear, hold, and build; is that an accurate description?

General CASEY. It is, Senator.

Senator REED. Let us try to take that apart. Clearing was done on numerous occasions by American forces, operating sometimes with Iraqi security forces. But there has been criticism lately that the Iraqi security forces were incapable of holding terrain and we had insufficient forces to do that. Is that a valid criticism of the strategy?

General CASEY. Not necessarily. In Baghdad it is probably a valid criticism. The August Baghdad plan where we went in and cleared focus areas, as we called them, specific areas of Baghdad where the sectarian strife was the greatest, we went in and cleared those, established basically a perimeter around them, and then gradually backed ourselves out as the Iraqi security forces were more able to take charge.

By and large, they did not prove capable of holding onto those areas without continued support from us.

Senator REED. Did you inform the Secretary of Defense and the President that aspect of the strategy was not working at that time?

General CASEY. I told them that the holding on the focus areas was not working. In fact, now that you are asking me about it, I recall specifically saying that we were having challenges with the reliability of the Iraqi security forces in the focus areas. So yes, I did.

Senator REED. Did they direct in any way or did you request an increase in forces, American forces? How were you preparing to compensate for this noted deficiency?

General CASEY. As we looked at the sectarian violence over time, we asked for more forces in the June time period as we saw a spike in the sectarian violence, and that is when the Stryker Brigade was extended and we basically put two more brigades into Baghdad.

What we did not get when we put those forces in was the political commitment from the Iraqis to target anyone who is breaking the law, not to have any safe havens, not to have political influence on the security forces, the commitments that Maliki has since made and is delivering on. That was the difference, and I was reluctant throughout the fall to ask for additional forces when I knew I did not have the political commitment of the Iraqis to let us do our jobs.

Senator REED. What you seem to be saying, General, is that in terms of the decisive factor it is not the size of our forces there, but the political commitment of the Iraqi government, and that with adequate political commitment our forces are either adequate or do not require significant increase; is that fair?

General CASEY. I think that is a fair statement. In counter-insurgency operations, the political and the military have to go forward together.

Senator REED. Let me take on the third leg of this strategy, build. I would note, as you probably might be aware, that yesterday the SIGIR essentially examined the Iraqi government and said all the ministries are dysfunctional, with some exceptions. You are responsible for two of these ministries, interior and defense. My experience is that they are probably more capable than the others.

But the other responsibilities are borne by the Department of State. Have you communicated at all to the President the inability of other government agencies to complement this policy?

General CASEY. We talk about that regularly. I think one of the things that has caused us problems is the fact that the government has changed three times in 2 years, and so we are on our third set of ministers right now and third set of ministries. So the growth of the ministries has not been straight line. As a matter of fact, it has been sporadic.

Senator REED. What I find puzzling is that if the strategy is clear, hold, and build and it has been evident, not only yesterday but ever since we have been there, that the Iraqi government is dysfunctional, our complementary agencies—Agency for International Development, Departments of State, Justice, Agriculture, and Treasury—have not provided the resources necessary, why did this not—and you communicated it to the President—why did this

not cause a reevaluation of our strategy by the President and the Secretary of Defense?

General CASEY. I think what you are seeing in the President's—

Senator REED. We are seeing it after an election. We are not seeing it a year ago or 2 years ago, when in fact on the ground this was evident.

General CASEY. One of the other things I have seen with the three governments is it takes everybody about 6 months to get their legs under them and start governing. These folks are not experienced ministers. They have not served in government before. So it takes them a while to understand and develop their governing skills.

Maliki's government did not take over until about May 20 and he did not get his defense ministers until early June. Now we are talking maybe 8 months that he has been in charge. They make, what I have seen, in most of the ministries gradual progress. There are others that are just so corrupt they are not going to make any progress.

Senator REED. My time has expired, but I understand, and I think you feel the same way, is—and we say it repeatedly, but the question is do we mean it—that a military strategy alone without a functional Iraqi government and without the support of non-DOD agencies cannot effectively prevail in Iraq. Is that accurate?

General CASEY. That is accurate.

Senator REED. I have not seen a lot of commitment outside of DOD to succeeding in Iraq. This government is still dysfunctional and, as you point out, some of these problems are beyond the next 6 months or a year because it is corruption, it is political advantage, it is the existential struggle between Shia and Sunnis, that are not resolved by a consultant from McKinsey.

I just wonder again—I do not wonder now, after this dialogue—but that clear, hold, and build never was a strategy that was working because we were not building, and this strategy of a surge I think is probably compromised by the same factors.

General CASEY. The clear, hold, and build has worked for us locally, in Fallujah for example. The build phase takes a long time because of the inefficiencies within the different ministries, but it has worked for us locally.

Senator REED. My time is up. One point if I may. I have traveled out, as you have, to Fallujah a number of times, and the times I have been there there has been one State Department officer out there trying to make this happen, a 36, 37-year-old, brave, courageous State Department official.

General CASEY. Dale Weston.

Senator REED. Dale.

General CASEY. He is a fine young man, yes.

Senator REED. He has needed help for 2 or 3 years and it has not arrived.

Thank you.

General CASEY. There is actually a Provincial Reconstruction Team (PRT) out in Anbar that is part of that effort.

Chairman LEVIN [presiding]. Thank you, Senator Reed.

Senator Thune.

Senator THUNE. General, let me echo what has been said repeatedly here and express my appreciation for your service to your country under extraordinarily difficult circumstances, and also to your family. I recall running into your wife at a function almost 2 years ago and at that time she was anxiously awaiting your arrival back here, and then it was extended. So I know there is a tremendous sacrifice on the part of your family as well, and we appreciate what your commitment and dedication to this country and its national security entails for your family as well.

Chairman LEVIN. Senator Thune, I hate to interrupt you. The roll call vote has begun. I think you will have time to finish your questions.

Senator THUNE. Right.

Chairman LEVIN. Are you going to be able to stay? If you could turn this then over to Senator Bayh after your time is up, and then I will be back by the time you are done. Thank you and sorry for the interruption.

Senator THUNE. Thank you.

I agree with some of what my colleague from Rhode Island just said. I think a critical component in the clear, hold, and build strategy is the build part of it, and my impression is, having visited Iraq several times, that is a component that has been very deficient in terms of our strategy. I believe the same thing has been true to some degree in Afghanistan, having visited there.

I have been over to Iraq several times. I have visited with you there in theater, as well as when you have been in front of this committee. One of the things that we often hear in front of this committee is about the Sunni and Shia extremists. I mentioned this to you in a private meeting, that it seems to me at least that a lot of times people forget when we talk about the duration of this fight how things have changed and how we have had to adapt to the changes on the ground.

There was a lot of talk a little over a year ago about being able to transition out and start pulling our troops out, and then the Samarra mosque was bombed in February 2006 and everything changed. The paradigm changed entirely and the sectarian piece of this puzzle began to really rage and has ever since.

I think oftentimes we forget that we would like to see progress. I think we were seeing some progress up to that point. But the scenario has changed entirely.

There has been a lot of focus on Sunni and Shia extremists. Based on your last 2½ years in Iraq, is there a growing concern among the moderate population of Baghdad and Iraq, both Sunni and Shia, that time is not on their side and that it is in their best interest to secure the future before it descends further? Do you see a sense of urgency among the moderate elements in the country?

General CASEY. Senator, there is no question that the moderate elements would like to see the country move forward. But what we are seeing is—and Baghdad is a great example of this—you have the extremists on both sides attacking each other's populations, and that creates fear and intimidation among the moderates, that makes them unwilling to compromise until they see that they have some chance of surviving this.

That is why it is so important now to bring security, to help the Iraqis bring security to Baghdad, so that we can get on with the rest of the progress.

Senator THUNE. You have probably spent more time with the prime minister than anybody else in the military, or DOD for that matter. What is your assessment of his reliability and do you believe that, despite these sectarian differences, he has the commitment level now to see this through?

My impression at least in the last visit over there is that they are getting it, they understand that the clock is working against them, that public support in the States, that our willingness to continue to provide military support to their effort is on the wane. What is your sense about his level of commitment?

General CASEY. I think the prime minister is committed to bringing stability to Baghdad and to the rest of the country. As we agreed on the Baghdad security plan and agreed on the Iraqi commander for that, there was no question in my mind that he did not understand that this was the last best chance to succeed.

So I put him in the very-committed-to-this column. As I mentioned earlier, he made a range of commitments in several speeches and he is delivering so far on those commitments.

Senator THUNE. So much of what this strategy, its success, depends upon his commitment as well as the commitment of the military there. It seems to me at least that they are stepping up. So far what we are seeing, I am encouraged by that, as you are as well. But the real focus, of course, is security in Baghdad and the willingness of the Iraqi military and the Iraqi political leadership to take on these militias and do what needs to be done to bring that kind of security.

Do you think—and I know this question has been batted around a lot here this morning and for the past several weeks—that with the force, the additional troop strength that we are bringing into Baghdad, that we can get this done? The question is could you use 30,000 or 50,000? I know you have had a lot of input in the formulation of this current plan.

I guess I just want to hear you say that, your assessment of whether we can get it done with this number.

General CASEY. I believe we can, Senator. I believe that the commitment, the political commitment of the Iraqi government to the success of this plan, is probably more important right now than the additional troops. But I believe that with the troops that are in the pipeline this plan can work.

Senator THUNE. I am out of time Mr. Chairman, I have a question which I will submit for the record, and I know that Senator Bayh probably wants to get in here before the vote.

I appreciate your answers. Our hopes and prayers are with our troops and our efforts, and with your leadership. The other challenge that we face is the Army transitions, both in doctrine and equipment, from a Cold War posture to a more lethal and agile force, which this current conflict has certainly shown a light on the need for. I will submit those for the record and I thank you again for your service.

I yield back my time.

General CASEY. Thank you, Senator.

Senator BAYH [presiding]. General, thank you for being here today. I am going to have to run to make this vote. I just have three quick questions. I will just move through them very rapidly.

I think what you have heard here today is everyone expressed their admiration for you as an individual and for your family and for your family's service. The problem that we face, the dilemma in some of our minds, is that the policy in Iraq has gone terribly wrong and there needs to be some accountability for that, and who is responsible. That is the question that many are asking. Are you responsible or are others responsible for some of the mistakes that have been made?

So my first question to you is, were you given everything by the civilian leadership that you requested to make this policy that you devised a success?

General CASEY. I was, Senator. All of the requests that I talked about earlier in my opening statement were filled by the Department. I would just like to say, you are exactly right. I am responsible for the military aspects of this campaign and to the extent that people have problems with the way that has been conducted I am the one who is responsible.

Senator BAYH. Were you in a position of actually authoring the policy or implementing a policy derived in large part by others, specifically the Secretary of Defense?

General CASEY. We shaped the policy in Iraq and worked it up and presented it to the chain of command. The Secretary of Defense and the President discussed it and it was then given back to us.

Senator BAYH. Was it altered in material part by the civilian leadership or did they adopt your policy pretty much as you presented it to them?

General CASEY. I would not say it was adopted pretty much as presented, but it was hard questions asked, adjustments made. I would not say it was rubber stamped, if that is where you are going.

Senator BAYH. Well, but they did not put constraints upon your policy that prevented you from doing what you thought needed to be done? It was your policy?

General CASEY. It was in fact my strategy.

Senator BAYH. Your strategy.

General CASEY. My strategy, better word.

As I said to Senator Warner earlier, if I disagreed with that I would have done something completely different.

Senator BAYH. I think Senator Warner asked questions about that.

Here is part of the dilemma that we face as well, General. Many have felt that the civilian leadership has made some tragic errors in judgment. Under our system we cannot replace some of those civilians, particularly the Vice President and the President of the United States. So we have to ensure that those under the civilian leadership are competent, wise, and are willing to differ with the civilian leadership when that is in the best interests of the United States.

So my final question to you, and then just one brief comment before I have to go, is can you give us an example of where you dif-

ferred with the civilian leadership and were willing to speak out and say, look, this just is not right, you need to take a different course here? I know in the military chain of command it is a difficult thing because you have obligations to follow orders and that kind of thing. But I guess what I am looking for here is some sense of independence, of your willingness to speak your own mind and not just take direction from on high, given the fact that many of us have concluded that the civilian leadership has not pursued a very wise course here.

General CASEY. An example of, as you said, differing with civilian leadership was on the PRTs. General Abizaid and I felt very strongly that these things were necessary if we were going to build the capacity at the provincial level so that the provinces could succeed. Others in the Department disagreed with that and did not want to go forward with that. But General Abizaid and I continued to work through the Department and with the ambassador and the Department of State and we ultimately prevailed and gained the PRTs.

I will say I was heard, Senator. I do not feel like I was constrained in any way from expressing my opinion, and I did. The strategy that I articulated here today is my strategy and I believe in it. It may not have produced the results on the timelines that people expected or wanted, but I do believe that it has laid the foundation for our ultimate success in Iraq. But it was mine.

Senator BAYH. I appreciate your candor in that regard. It is not uncommon around this town that people try and deny responsibility or shift responsibility, so I appreciate your willingness to accept responsibility.

My final comment has to do with something that Senator Clinton mentioned, and it is not a question so much as it is just an observation. One of the most shameless things that has happened in the course of this undertaking was that incident in—I cannot remember whether it was Kuwait or Baghdad; maybe it was Kuwait—involving the hillbilly armor, where the soldiers had to stand up and say, look, we have to find scrap metal to weld onto the side of our vehicles. So some of these reports that she alluded to and some others were, it looks like there may be a shortage of uparmored Humvees and other things.

We just cannot allow this to happen again. I personally, since I have taken an interest in the Humvees, have asked the Pentagon over and over again, do we have enough, are we doing enough. Frankly, they were just dropping the ball on this. Now, it is understandable, although lamentable, maybe once. But it is not acceptable when it happens over and over and over again. So I really encourage you to get to the bottom of this.

Then there is just one last observation. There is a report that says, “Adding to the crunch, the U.S. Government has agreed to sell 600 uparmored Humvees to Iraq this year for its security forces. Such sales ‘better not be at the expense of the American soldier or marine,’ Speakes”—you know who I am referring to—“told defense reporters recently.”

Look, if there is a shortage our guys have to come first, right?

General CASEY. They do. They do. But the flip side of that coin is the Iraqi security forces are out there on the street fighting themselves.

Senator BAYH. You have to be candid and aggressive in telling us what you need. Frankly, the Pentagon, for reasons that just mystify me, was saying they had enough when it was pretty clear they did not have enough. So let us know what is really necessary and we will provide it.

General CASEY. Thank you, Senator. I will.

Senator BAYH. Thank you, General.

Senator WARNER [presiding]. Senator, you have about a minute to make the vote. I am going to miss it because I think staying here is more important than the vote.

I listened carefully over the last few days about comments made by a number of colleagues with respect to the very serious questions that are facing us today. On a weekend talk show a colleague said the following: "I say this is the last chance for the Iraqis to step up and do their part." This morning a colleague said this is the "last best chance."

In the resolution that I put before the Senate I drew on the President's comments. This is paraphrasing what I believed he said and something I firmly believe and support the President in this conclusion. The resolution says "The Senate believes a failed state in Iraq would present a threat to regional and world peace and the long-term security interests of the United States are best served by an Iraq that can sustain, govern, and defend itself and serve as an ally in the war against extremism."

I said clearly in here I support the President. I find those statements clash. I am hopeful that General Petraeus can carry forward with the plan. I think the plan could be modified to employ fewer than 21,500 troops and place greater emphasis on the Iraqis carrying the burden of elevating the security, improving it in Baghdad, that security being the consequence of ever-increasing sectarian violence. I have already made that speech.

If that plan for some reason does not measure up to the goals of success, I have to believe that prudent military commanders such as yourself have a follow-on situation to support the President's goal as I enunciated. Can you advise the committee as to the state of that planning and to the extent you can such elements of such a plan that you can share without violating any classification?

General CASEY. The contingency planning that is going on now is for the employment of the last three brigades, and so the planners are actively looking at what happens if we do not get security in this district of Baghdad and so they are working through that right now.

Senator WARNER. Can you speak up a little louder?

General CASEY. They are working through those things right now at the tactical level.

What I said earlier was that the political commitment of the Iraqis is more important here than the additional troops. So that has to come and it has to be sustained. So one of the things that I will be working with the ambassador on and I know he is already working on is to not only sustain the level of political commitment we have, but to move forward with reconciliation efforts so that we

gradually bring the different ethnic and sectarian groups together and get on with building a representative government that respects all of their rights.

Senator WARNER. But do you agree with the President with regard to we have to have a measure of success, we cannot let this government fail?

General CASEY. I do. We definitely need to support this government.

Senator WARNER. Fine.

General CASEY. They have to bring something to the table as well, and they are doing that.

Senator WARNER. I understand the contingencies. I fully appreciate the importance of the Iraqi government living up to its commitments in benchmarks and in other ways. I do not question that. I draw on Senator Reed's point, and I brought this up in earlier hearings of this committee this past week. A chain is no stronger than its weakest link and you have three, I think really four—it is the political commitments of the Iraqi government to be fulfilled; it is the other departments and agencies of our Government that have to fulfill; it is the military plan; and it is the diplomatic plan.

So it is all four links and really the failure of one could bring down the total. Would that not be correct?

General CASEY. I agree with that, Senator. All four of those things need to go forward together.

Senator WARNER. Then I come back. You can assure the committee that there is some fallback if this Baghdad surge concept in nine areas does not meet whatever goals that you as the commander have set, and that this would not be the last chance, this campaign in Baghdad?

General CASEY. I think that is a fair way to put it. I do not think it is the absolute last chance, but it certainly is the best chance right now that we have.

Senator WARNER. Then you and I are in concurrence that we cannot portray to our brave forces that have made these enormous sacrifices that in any way our will is going to waver to carry forward as best we can to achieve that measure of success that the President has set forth here.

I come to another issue that has caused this Senator great concern. It has been my privilege to have had some long association with the U.S. military. My own career in uniform is very modest and of little consequence, but I have had the benefit of learning through these years of my association with the military. I am concerned about this concept of the dual command structure for, let us call it, the Baghdad plan as announced by the President.

In his announcement he made reference to the Iraqis will have a commander, a senior commander, in each of the nine provinces, and presumably a commander above each of the nine Iraqi commanders; that the United States will likewise have a chain of command in each province. As I understand it you will have a battalion level force assigned with, working in support of, the Iraqi forces, which hopefully will be on the point, and they have their reporting chain of command.

My concern is when you have this duality, dual concept, that you come down to the company level and the Iraqi company commander

or platoon commander in all probability is saying that this mission we have before us, we have to maneuver to the left, the American platoon commander says, oh no, my calculations, we have to maneuver to the right. If whichever they follow does not succeed then you precipitate a finger-pointing right down at the tactical level between two commanders who exercised their best judgment.

Is that a potential that could occur under this plan and what assurances do we have that that will not happen?

General CASEY. Senator, if you put two military guys in a room they are going to disagree on tactics. So I do not think there is any question that, what you are describing could happen.

But let me take you back to the beginning on this thing. There is a parallel chain of command and, as you know better than anyone, U.S. forces operate under U.S. command and that will happen. Now, the command structure for the Iraqis is a significant improvement over what we have been working on with them in the past iterations of the Baghdad security plan. It finally gets unity of effort of the Iraqi army and the Iraqi police and the national police under a single commander.

The way they have set it up is there is a Baghdad commander, there are two commanders, one for each side of the river, and then there are nine district commanders. In that district, each district, will be an Iraqi brigadier. All of the Iraqi security forces, the local police, the national police, and army, will report to that one commander. That is a big difference.

It is not a natural thing, I think, for police and the military to work together. There has always been friction in that with the Iraqis. This is a great step forward. I have been working for some months here and I have told my subordinate commanders, I want to be able to put my finger on a map of Baghdad and I want you to be able to tell me who, what Iraqi, is responsible for security in that area. We can do that now and that is important.

Now, your concerns are correct ones. They come from the, okay, how do the Americans and the Iraqis work together. At each level from General Ray Odierno, the Baghdad commander, to General Fill with the two district commanders, to the brigade commander and the battalion commander in each of the districts, they are partnered at every level and they work very closely together. We still have our transition teams working with these Iraqis.

Senator WARNER. The embedded, the embedded.

General CASEY. I am sorry, the embedded.

Senator WARNER. Correct.

General CASEY. So they are linked and have close liaison at every level. I just talked to General Odierno this morning. He was out visiting with each of his commanders and they are comfortable with the arrangements that are being worked out.

Senator WARNER. Heretofore we have had a unified command of the American structure and you are assuring me that has not been changed?

General CASEY. No, it absolutely has not changed.

Senator WARNER. The American GI is accountable for the orders he gets from the American chain of command right up to your successor; is that correct?

General CASEY. That is correct, Senator.

Senator WARNER. Now, therefore that has been the way we have operated in Iraq and more or less we have devised the plan by which the joint operations to the extent we have had them with the Iraqi forces have been carried out.

General CASEY. That started to change in September as we gradually returned Iraqi forces from my operational control to Iraqi operational control. In September, you may recall we stood up the ground force command, that headquarters is now directing Iraqi operations.

Senator WARNER. In our meeting in my office here a day or so ago, I urged that you look at the testimony of General Keane, former Vice Chief of the United States Army, now retired, a very valued and knowledgeable individual. He had concern with this plan. Did you read that testimony?

General CASEY. I did.

Senator WARNER. You read the colloquy that I had with him?

General CASEY. Yes.

Senator WARNER. He concluded that he is going to urge General Petraeus once he takes over to get this thing straightened out. Now, can you translate for us what that means and what you hope to achieve, because I also asked General Keane, did he know of any precedent where our forces operating with others have had the type of command structure that this new strategy plan of the President as announced on the 10th envisions. He said he did not know of a precedent.

General CASEY. My sense is—and I probably need to talk to Jack, but my sense was from reading that is Jack did not have all the details of how this was going to actually be implemented. It is a non-standard arrangement.

Senator WARNER. You are breaking new ground.

General CASEY. We have been. Actually, we have been operating in smaller operations like this around Iraq for some time. As we are transitioning to Iraqi security force lead, there are non-standard arrangements as we go through the transition period, and that is really kind of what is happening now.

Senator WARNER. Is there not an element of risk now that is somewhat greater for our forces operating with the Iraqis? Unfortunately, we continue to get more factual evidence that the Iraqi forces, some components are not ready to do certain things. Yet we are going forward in reliance on their professional capability. I am just wondering, does this chain of command increase in any way the risk of the American GI participating in these operations?

General CASEY. I do not think so. As I said, General Odierno was out. He has visited all the brigade commanders in Baghdad and had the conversation with them, and he reported to me this morning that he is comfortable with this arrangement.

Now, is it as good as having everybody lined up and working for us? No. There will be more friction than that. But I do not think that it significantly increases the risk to our forces.

Senator WARNER. My time is up. Colleague, why do you not just take charge?

Senator CORNYN [presiding]. General Casey, thank you very much—

General CASEY. If we all leave before they come back, I will buy you both coffee. [Laughter.]

Senator CORNYN. I appreciate your patience, but more than that I appreciate your service to our country. As I told you in my office, as a military brat myself I understand the impact of the service by the uniformed member on families, and I appreciate your family being here with you today and the support they have given you in allowing you to perform so well in the service of your country.

I want to ask you about the Iraqis. One of the earliest signs we will see if the Iraqis are living up to their commitment is whether they are providing additional forces as promised. What has been the experience? Have they followed through on their promises or have they been lacking in follow-through?

General CASEY. They are in the process of following through on those promises. They are actually pretty close to being on schedule, pretty close to being on schedule with the deployment of the brigades to Baghdad. I think we are now, with two of the three brigade headquarters and four of the seven battalions have moved to Baghdad.

Now, they are coming in with the range of 55 to 65 percent strength because of people they left back. We are working with them to increase the strength of the forces that they have in Baghdad. But they are delivering so far on what they said they would do.

Chairman LEVIN [presiding]. Senator Cornyn, forgive the interruption, but I understand there is a second vote on now, if I am correct. Is that correct? I would ask you, when you are done would you recess, because we will come back into session. There are more questions to be asked.

Senator CORNYN. Certainly.

Chairman LEVIN. Thank you.

Senator CORNYN. Thank you, Mr. Chairman.

I believe you said earlier when it came to the prime minister's commitment to take on lawbreakers without regard to ethnicity or religious affiliation that for the last 2 months at least you have seen a commitment by the Iraqi government to take on all lawbreakers and those who are exacting violence against the population. Did I hear that correctly?

General CASEY. You heard that correctly, Senator.

Senator CORNYN. I read with some interest an article in this morning's Washington Post. It was excerpted from your written comments, but the headline of it said "General: Shiite Militia Leaders Leaving Baghdad Strongholds." From what this article suggests—and I would like for you to confirm it or explain it—it is the threat even of our building our forces and not only clearing but actually holding areas that are currently occupied by militias and others seeking to generate chaos there, it is even the threat of force is causing the Shiite militias to actually leave some of these areas, and it is having an impact.

Could you explain how that is possible or what your understanding is?

General CASEY. This is a phenomenon that we saw in August as well. Just the announcement of the extension of the Stryker Brigade had a dampening effect on the levels of sectarian violence.

The same thing is happening again. Actually, it has been a combination of things this time. As we have announced the deployment of the additional troops, we have seen, as I said, in about 5 or 6 weeks a downward trend in ethnosectarian incidents.

The other thing that has been happening, though, is we have been putting strong military pressure on the death squads and the death squads' leadership, and we have in fact picked up five or six of their key leaders here in the last several weeks. So that has had a big impact on them.

The newspaper I think is reporting on reports from us that we are actually seeing some of these senior leaders move out of Sadr City and into safer places. That is good news, bad news. We will continue to target them wherever they might go within Iraq.

Senator CORNYN. The bad news portion would be if they would simply lay low somewhere else and then come back once perhaps the forces were not deployed there to hold the area and come back and do the same old thing again?

General CASEY. Right. That has been one of the challenges with the militia. They blend away. They do not stand and fight. They see us coming, they just blend into the background.

Senator CORNYN. General Casey, I do not want to embroil you in the political debates here in Congress and I promise you I will not do that. But I will ask your professional military judgment if in fact in this test of wills, as General Petraeus has called it, the enemy sees us lacking in will or believes we will not follow through on our commitments to not only clear areas in Baghdad but hold them, to allow the building to go forward, what sort of consequences, practical consequences, does that have to a commander on the ground?

General CASEY. If the enemy sees that we are not following through on our commitments?

Senator CORNYN. If the enemy believes that, notwithstanding our statements, that we ultimately, that Washington, that the political leadership, says we do not believe we can win, so we are not going to follow through, what kind of consequences does that have as a practical matter on the ground?

General CASEY. It certainly strengthens the enemy and with the particular enemy that we are dealing with, I think they would use it with their information campaigns as a recruiting tool. I have already seen it starting to come out, that the Americans are beaten, they are defeated, come to Iraq now if you want to be involved in beating the Americans.

Senator CORNYN. You have seen that, used that for their own propaganda pieces?

General CASEY. I have seen it in the al Qaeda propaganda.

Senator CORNYN. Some have suggested that we continue to fight the insurgency in al Anbar, but not send reinforcements to deal with the Shia militias in Baghdad. What would be your military assessment of the impact of such a plan?

General CASEY. As I have said throughout the course of the hearing today, Senator, we have to help the Iraqis secure Baghdad if the country is going to go forward and if they are going to credibly assume responsibility for their security this year. We have to lower the levels of sectarian violence in their capital. We have to help

them do that. So that is, in my view, a much higher priority than what is going on in Anbar.

Now, Anbar is important because al Qaeda is trying to establish a safe haven there from which they can export terror, and we have enough forces to keep the pressure on both in Baghdad and in Anbar.

Senator CORNYN. If we fail to send additional reinforcements to deal with the Shia militia and the ethnic violence, is it your military judgment that our chances of success would be markedly diminished?

General CASEY. Absolutely. In Baghdad it is not just Shia militia. It is both Sunni and Shia extremists, and we have to deal with both and we need the forces in both Baghdad and Anbar.

Senator CORNYN. Let me ask you just a last question, about the consequences of our leaving Iraq before the Iraqis are able to sustain, govern, and defend themselves. Some have suggested that regional conflict would almost surely ensue, with Iranian Shia taking advantage of the opportunity to support the Shia in Iraq to the detriment of the Sunnis, perhaps engage in even greater ethnic cleansing against the Sunnis, perhaps then precipitating an entry by the Saudis and other Sunni-majority countries to come in and protect the Sunnis.

That is one of the suggestions that I have heard. The other is that Iraq could well become another failed state and thus a platform for terrorist organizations like al Qaeda to train, recruit, and launch future terrorist attacks.

In your view are either one or both of those plausible outcomes if in fact we leave Iraq before it is able to sustain, govern, and defend itself?

General CASEY. I think both are entirely plausible.

Senator CORNYN. Thank you very much.

Senator COLLINS [presiding]. Thank you.

General Casey, first let me explain that I ran into Chairman Levin, who told me to go ahead and proceed with my questions. So for the next 10 minutes I get to be chairman of the Senate Armed Services Committee, a position I have always coveted. [Laughter.]

General CASEY. I will make you the same offer I made Senator Cornyn. If we both leave now before they come back, I will buy you coffee. [Laughter.]

Senator COLLINS. No such luck. [Laughter.]

Let me, however, start with my very sincere appreciation for your dedicated service to your country and to the United States Army.

I want to bring up three issues with you today. The first is the impact of the war in Iraq and Afghanistan on our National Guard and reservists. Just last week former Secretary of Defense William Perry testified before this committee that the agreement with our citizen-soldiers had been shattered. Similarly, the adjutant general of the Maine National Guard has expressed to me grave concern about the impact of the recent change in policy that says that National Guard forces may now be involuntarily mobilized more often than once every 5 years. He has stated that if the 24-month, total month policy changes and Maine National Guard troops are involuntarily called up for a second time or in a few cases a third time

in support of operations in Iraq and Afghanistan, that the Maine National Guard will not be able to sustain its current force structure, and he is very worried about the impact on recruitment and retention.

General Casey, I have had two members of my own staff called up, so I know personally the impact this has on employers, on families, and on the citizen-soldiers themselves.

Are we not asking too much of our National Guard? That is my first question to you, and a related question: Are you concerned about the long-term impact on retention and recruitment of our National Guard members that this policy will have?

General CASEY. It is certainly something that warrants all of our attention, Senator. I would agree with you on that. The numbers on recruiting and retention for the Guard seem to be right now okay, but we certainly keep our eyes on the impacts of this change in policy.

As I mentioned in my opening testimony, one of the three things I would make a priority as the Chief of Staff of the Army is the Guard and Reserve. I know the Army is working on it, but as the Vice Chief we were working on building a system that would get the Guard units more predictability in what they were doing and to leverage the fact that almost half of them now are going to be combat veterans and they do not need to have 90 to 120 of post-mobilization training. We have to be smarter about how we treat them and how we use them so that when we do have to call them up, we have maximum time on mission and minimum time on preparation, so there is less time away from their families.

Lots to do here, and I very much agree with your base point that we need to watch the impact of this policy change here on recruiting and retention.

Senator COLLINS. Should we also be looking at improving the benefits for National Guard and reservists? For example, I am thinking of the educational benefits under the Montgomery GI Bill. Should we try to more thoroughly align the benefits for Guard members to make them more parallel with Active Duty, given the increased demands that we are making on them?

General CASEY. I definitely think that is something to be looked at, but I think you know the resource tradeoffs of those. But I think that is exactly right. Benefits as incentives to continued service in the Guard, I think that needs to be looked at.

Senator COLLINS. General, the second issue that I want to bring up to you is one that we discussed in my office yesterday. That is my tremendous concern about reports that we will be sending troops into Iraq without adequate protection and equipment. I want to follow up on the line of questioning that some of our members have already raised with you.

It actually was not a report by the Special Inspector General on current troops' equipment. It was the unclassified executive summary of an audit done by DOD's own IG. It is dated January 25 of this year, so it is a very new report. It is titled "Equipment Status of Deployed Forces Within U.S. Central Command."

The findings of this audit trouble me greatly. The IG performed the audit to determine whether units deployed to Iraq and Afghanistan were equipped in accordance with mission requirements. The

IG's office received responses from approximately 1,100 servicemembers, so this was a significant sample, and its report states that these individuals, "experienced shortages of force protection equipment such as up-armored vehicles, electronic countermeasure devices, crew-served weapons, and communications equipment." As a result, servicemembers were not always equipped to effectively complete their missions.

This troubles me terribly. I think it is simply wrong for us to send troops into harm's way without fully equipping them, without giving them uparmored vehicles. I understand why in the early days of the war this was a problem and many of us worked very hard to increase funding for up-armored Humvees, for example. But I do not understand why this is still a problem, according to the DOD IG, and I am extremely concerned that if it is a problem for some troops serving now that we are not prepared to fully equip the troops that will soon be on their way.

General CASEY. I agree with you, Senator. I have not seen the report, but I am concerned about what you just read to me. When I get back tomorrow I will take a hard look at that and find out what the heck is going on, because I have not heard in my visits to the units complaints about equipment shortages, in fact quite the contrary. So it needs some looking into.

Senator COLLINS. It does. You and I discussed the equipment for troops on their way to Iraq or who will soon be on their way to Iraq, and I was pleased for your assurances that this is a high priority for you and that you have already in fact issued a directive to ensure that the troops do not go if they are not equipped.

But here is a report from DOD's own IG that says that current troops do not have what they need. So I would ask you to look at this report and to report back to the committee on your findings, because this really is troubling. It is such an obligation.

General CASEY. I have a long airplane ride.

Senator COLLINS. So you have plenty of time to look into it.

[The information referred to follows:]

The information requested was provided by General Casey on February 16, 2007, in the attached letter.

REPLY TO
ATTENTION OF

DEPARTMENT OF THE ARMY
1777 NORTH KENT STREET, SUITE 5413
ARLINGTON, VA 22209

February 16, 2007

The Honorable Susan Collins
The United States Senate
Washington, DC 20510

Dear Senator Collins:

During my testimony before the Senate Armed Services Committee on February 1, 2007, you asked that I provide the Committee feedback on the Department of Defense Inspector General report dated January 25, 2007 entitled "Equipping Status of Deployed Soldiers within the US Central Command."

Only five issues in the report were specific to the Multi National Forces - Iraq. In each case, the appropriate corrective action has been taken. Ensuring that all deploying Soldiers have the proper equipment necessary to accomplish their mission has been, and will remain, one of my highest priorities.

On behalf of all our service members and Coalition partners, thank you and the Committee for your continued steadfast support to our mission in Iraq.

Sincerely,

George V. Casey, Jr.
General, United States Army

Senator COLLINS. Finally, General, you have said many times that you do not want to send one more American soldier to Iraq than is necessary to perform the mission. You have also very candidly testified that when you looked at the Baghdad security plan you asked for two brigades and that is what you felt was adequate. You have also, however, said today that you support the President's plan for five brigades. Does that not violate your principle, based on your earlier assessment that only two brigades are needed, that you should not send one more American soldier to Iraq than is necessary?

General CASEY. Not really, because, as I said, in my mind the other three brigades should be called forward after an assessment has been made of the situation on the ground and whether or not there has been success in the mission in the Baghdad area. So it is one thing to say all five brigades are going into Baghdad. It is another to say you have two, we have a decision point here for the third; we will assess to see what is going on, if we need it we will bring it in, if not we will not. The same thing for the fourth, the same thing for the fifth.

So I think the way the force flow is arranged gives the new commander lots of flexibility to either use the forces based on his assessment of the need or not use the forces.

Senator COLLINS. I understand your deferring to the new commander, to General Petraeus's view. But I need to ask you outright, if you were still in Iraq would you be happy with just two brigades?

General CASEY. I would still want a reserve that I could call forward if things did not work out the way we had hoped or to take advantage of an opportunity that presented itself.

Senator COLLINS. But you would start out with two brigades? That assessment has not changed?

General CASEY. That is where we are, that is right.

Senator COLLINS. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN [presiding]. Thank you.

Senator Warner had to cut short his questions because of the vote, so I am going to call on Senator Warner.

Senator WARNER. Thank you, Mr. Chairman. Mr. Chairman, I have received information that the National Intelligence Estimate (NIE), which was in some large part generated by members of this committee, will soon be released in a classified form and made available to the committee. For those following the hearings, that is the evaluation of a subject by our entire Intelligence Community. This particular one is to be focused on Iraq.

General, were you asked to make a contribution to that NIE? I am just going to talk process.

General CASEY. I have seen the executive summary and offered comments.

Senator WARNER. That is fine. All I want to know is that you were a part of the process and you had an opportunity to get your evaluation in before it went into final print, I presume?

General CASEY. I did.

Senator WARNER. Thank you very much, because that is an important document. I suggest, Mr. Chairman, that it be put in S-407 of the Capitol where traditionally we—or wherever—and we urge members to read that, because in the context of this very important broad issue before the Senate today and certainly into the next week, I think it would be valuable to get the assessment of the Intelligence Community about their own evaluation of the situation in Iraq today and most particularly Baghdad.

Now, General, the Congress of the United States over many years has funded the National War College, the Navy War College, and Carlisle Barracks. We also have this new command now that studies the overall operations of our forces, that is located down in Virginia, the one that Admiral Edmund Giambastiani put together.

Do you have any knowledge of the traditional practice of wargaming plans having been done in those various forums, wargaming being, for those that are following the hearing, where you establish an A team, a B team, or a blue team, a red team, and they try to assess the likelihood of success of the plan or what modifications should be made to the plan? In other words, it is a professional good exchange. It is very important we do it in many situations.

Do you have knowledge of it having been done in the preparation of this plan as enunciated by the President on 10 January?

General CASEY. I do not have any knowledge one way or the other, Senator.

Senator WARNER. All right. I have to tell you, there is testimony in the record by other witnesses before this committee that teams were sent to your AOR for the purposes of conducting such an evaluation. I accept your answer you do not have knowledge, which means you certainly did not see any work product. But I would ask that the record be left open so that you can go back into your command and see what, if any, type of wargaming might have been done.

General CASEY. Oh, I thought you were speaking of war colleges and Joint Forces Command.

Senator WARNER. In other words, Congress funds a whole number of military institutions for the purpose of doing wargaming, to make assessments of the likelihood of success of a plan or how a plan should be modified.

General CASEY. We routinely do it in our planning process. I would be surprised if that was not done in Iraq.

Senator WARNER. Well then, was it done within your command? Did you have a sort of a structure that looked at the plan as it was unfolding and presumably just before the President announced it to determine on a professional basis between young men and women officers looking at it and giving their best judgment as to the strength of the plan, the likelihood of success, or the likelihood it would not succeed unless certain corrections are made?

General CASEY. The actual wargaming of the Baghdad plan would have been done at the corps level. You are asking me whether we wargamed the overall strategy. No, we did not.

Senator WARNER. All right. So it would have to be done up at corps level and that would be General Abizaid?

General CASEY. General Odierno.

Senator WARNER. Odierno.

General CASEY. It is a tactical level plan.

Senator WARNER. He is a subordinate commander to you, is he?

General CASEY. Right.

Senator WARNER. So you do not know whether he did it and what the results?

General CASEY. I cannot tell you conclusively he did it. I tell you that we do wargaming as part of all of our planning. I would be surprised if some level of wargaming was not done, but I cannot tell you conclusively that it was.

Senator WARNER. All right. Could you then supply that for the record?

General CASEY. I will.

[The information referred to follows:]

During my testimony before the Senate Armed Services Committee on 1 February 2007 you asked if we had done any wargaming as part of the formal planning process used to develop the current Baghdad security plan. I replied that during operational planning we routinely conduct such wargaming and that I would confirm for you that we had.

The Multi-National Corp-Iraq conducted a detailed wargame from 22–24 December 2006 to examine several courses of action. They followed that up on 24 December with a course of action brief to the commander that included the results of the

wargaming. The commander used the results of that wargaming as he developed his operations order.

On behalf of all our servicemembers and coalition partners, thank you and the committee for your continued steadfast support to our mission in Iraq.

Senator WARNER. In September 2006—and Chairman Levin, it was just before you and I made that trip together in the region in October, and we visited the Marines, you will recall. While it was classified, I think I can make reference to in September 2006 the Washington Post reported that “The chief of intelligence of the Marine Corps in Iraq filed a report concluding that the prospects for securing Anbar Province are dim.”

That report was classified, so I will not ask you to comment on it. But we actually had the opportunity to have a colloquy with that colonel and his commanding officer and others. I then asked questions about al Anbar.

What is the state today of the power of the al Qaeda elements of this insurgency? Is it growing? Is it strengthening? Do we have sufficient forces in your judgment to repress that organization?

General CASEY. I would say that the strength of al Qaeda in Anbar Province is diminishing. I talked to General Zumer, the commander in Anbar, right before I left. He told me that for the first time since the war there are Iraqi police in every district in Anbar Province. That is a big step. They have had very good success recruiting police. They have trained over 9,000 police, on their way to about 14,000 police.

So that is a big success. The real major success has come on the political level with a group of tribal leaders who banded together and started to take on al Qaeda on their own, and then, with the assistance of Prime Minister Maliki, they were able to merge some of these leaders into the provincial council run by the governor. So when this report, the intelligence report you spoke of, there was not a political track in Anbar. There is now. There were not many police in Anbar. There are now.

Senator WARNER. But as a part of your plan, that is the January 10 plan which you worked on, you do recommend additional forces in al Anbar?

General CASEY. I did.

Senator WARNER. Was that for the purpose of further diminishing the influence of al Qaeda?

General CASEY. Absolutely, it was to maintain the momentum that they already had. I actually went out there in October. I was getting a briefing from the commander in Ramadi and he was describing what was happening. I said: “It looks like you have an opportunity here; what could you do with another battalion?” He said: “I could clean out Ramadi.” So we asked for the Marine Expeditionary Unit and brought it in in November, and he has used that. These other units now are to backfill that Marine Expeditionary Unit so that we maintain pressure on these guys throughout Anbar Province.

Senator WARNER. My final question. You in the earlier responses described really the enormity of your task as the Multi-National Commander. Among it was dealing with, I think you said, three successive prime ministers; is that correct?

General CASEY. It is, Senator.

Senator WARNER. We have an ambassador there. I am trying to determine the degree of responsibility that you have with respect to the political side. Remember we said this new plan has four components. One of them is dealing with the Iraqi government.

Is under the new plan there to be more State Department officials, more emphasis put on the ambassadorial role to deal with that? Or is your successor to continue to have to find time apart from his military responsibilities to handle much of the intergovernmental relationships?

General CASEY. Ambassador Zol Kollazaid handles the political business with the prime minister. What I work with him is the political-military aspects: what type of commitments do I need from the prime minister to support the military plan? What do I need from the government in terms of economic support for the plan? Those are the types of interactions that I have. I do not get involved in the strictly political stuff. Zol takes care of that.

Senator WARNER. So if, for example, in the forthcoming Baghdad surge campaign, the Iraqis fail to keep their commitments, benchmarks as we call them, and the most specific one and the one which I have included in my resolution, and you have alluded to it today, it is that commitment that no longer will the political structure of the prime minister and his subordinates be reaching out and telling tactical commanders, this is what you will have to do, and then calling up and saying, what you have already done on your own initiative, undo it and pull back.

Whose responsibility will it be to make sure and certain that the Iraqis are living up to that and other benchmarks? Is it the United States ambassador, now filled by another individual, a very able person—I have dealt with him through the years—and his team, or is it back on the commanding officer of the MNF—I, your successor?

General CASEY. I would look after the military aspects. For example, if we had a call to a unit to undo something that was done, I would get that report back up to my chain and Zol and I would go see the prime minister.

Senator WARNER. He is now to be succeeded by another individual?

General CASEY. Right.

So basically, Senator, I would deal with the military commitments, and I have a system already set up for monitoring those. Zol would deal with the political commitments.

Senator WARNER. Then if that fails it is part of your responsibility and the failure of those commitments by the Iraqi political structure then would fall in other words, the buck stops on your desk and not the State Department?

General CASEY. For example, if they did not deliver on a commitment to pass the electoral law or to pass the oil law, that is Zol's business.

Senator WARNER. Correct.

General CASEY. If they are not delivering on their commitment not to allow safe havens and are restricting our operations in an area, that is on me. So we work it together.

Senator WARNER. Now, that last phrase is important, you “work it together.” So you are really working in partnership with the U.S. ambassador?

General CASEY. Oh, absolutely.

Senator WARNER. I see. I would think that primary responsibility for the enforcement of those benchmarks should be primarily with the Secretary of State and her ambassadors. I think you should think through and have some clarification.

General CASEY. The benchmarks absolutely fall under Zol’s purview. Again, it is the military-related commitments that I keep an eye on.

Senator WARNER. There I think you would be in the role of an expert adviser to the United States ambassador, rather than one that—

General CASEY. What happens is we go over together.

Senator WARNER. All right. All I am saying is there could be a subsequent assessment of what went right and what went wrong here, and I think that having again unified commands with various responsibilities, whether it is on the diplomatic side or it is on the military side, would be beneficial.

I thank the chair.

Chairman LEVIN. Thank you very much, Senator Warner.

General, the Iraqis have agreed to benchmarks before, is that not correct?

General CASEY. They did.

Chairman LEVIN. Did they not agree in October to benchmarks?

General CASEY. September-October, I think you are right.

Chairman LEVIN. Did they live up to those benchmarks?

General CASEY. Not in all cases.

Chairman LEVIN. How about in most cases?

General CASEY. They did, they made progress on some things.

Chairman LEVIN. Did they deny that they had agreed to benchmarks? Let me read—

General CASEY. I think there was some discussion by the prime minister that he—

Chairman LEVIN. Some discussion? He flat out—according to the Washington Post on October 25, “Maliki lashed out today at the United States, saying his popularly elected government would not bend to U.S.-imposed benchmarks,” and denied that he had agreed to the benchmarks. Were you aware of that?

General CASEY. I am aware of that—

Chairman LEVIN. No, but is it true that he denied that he agreed to them?

General CASEY. It is.

Chairman LEVIN. Does that not make you nervous, when he did agree to them and then a day later or 2 days later denies that he agreed to them?

General CASEY. I do not know that he did agree with them. Other members of the presidency council—they have this policy council for national security and that was the group that it was discussed with. I do not know whether the prime minister was actually there or not.

Chairman LEVIN. I see. So when Khalilzad said “Iraqi leaders have agreed to a time line for making the hard decisions needed

to resolve these issues”—that is his quote—you are not sure that Maliki was involved among the Iraqi leaders that had agreed?

General CASEY. I am not, but Zol would know that.

Chairman LEVIN. All right, so you are not sure that Maliki ever agreed to the ones that everybody else says he agreed to?

General CASEY. I am not.

Chairman LEVIN. Okay, that is fair. That is a straight answer.

We have talked a little bit about what General Shinseki said here about needing more troops and about the way he was treated. Do you have any feelings about the way he was treated after he spoke honestly about his opinion?

General CASEY. I do not think he was treated well.

Chairman LEVIN. You have indicated on a number of occasions that your efforts were thwarted by Iraqi leaders.

By the way, I could not agree with you more relative to Shinseki. I think he was treated miserably and that message I think was an insult to everybody in uniform. But I will leave it at that. You gave me an answer which is perfectly consistent with what I just said, although perhaps not as purple in its prose.

General, you have indicated this morning that you raised a number of problems when, a number of times you were thwarted, more accurately when Prime Minister Jafari objected to something you were trying to get done and Prime Minister Maliki I believe did not insist that his troops act without political interference, indeed involved himself. He would not allow certain things to happen.

You objected to that because you were trying to make things happen. Did you tell your chain of command? Did you take that to the higher level in those cases and tell either General Abizaid or the Chairman of the Joint Chiefs or whoever you would have been reporting to, probably General Abizaid, that you were having those problems?

General CASEY. Yes. I would not write a report or something, but in my discussions with them, which were frequent, I would highlight the difficulties I was having. But I will tell you, Senator, I have watched Prime Minister Maliki grow over the last 8 months and over the last several months there have been no restrictions on what we are doing. That has changed over time and I think changed for the positive.

Chairman LEVIN. You were asked in your prehearing questions what were the most significant mistakes the United States has made to date in Iraq, and you had quite a long list of mistakes. You did not list among those mistakes some of the most commonly agreed to mistakes. I will not say that everyone has agreed to these, but these have been noted and they are significant.

General CASEY. I kind of stuck to the things on my watch.

Chairman LEVIN. I see.

General CASEY. I tried not to go back to the beginning.

Chairman LEVIN. One of the things which has affected you was the disbandment of the Iraqi army. That was before your watch, but nonetheless, do you have any feelings about that action as to whether that was a wise course, to not bring the Iraqi army back from their homes? Not the top level officers, but most of the people who were in the army. Was that a mistake in your judgment?

General CASEY. Looking back, the Iraqi army was suspect to 80 percent of the country, the Kurds and the Shia.

Chairman LEVIN. Even though the Shia made up most of the army?

General CASEY. Right, but it was the leadership.

Chairman LEVIN. The leadership was suspect. I am talking about 80 percent of the army, not the leaders.

General CASEY. Right.

Chairman LEVIN. The people who were thrown out of work with guns and no pay.

General CASEY. I understand.

Chairman LEVIN. Was that a mistake?

General CASEY. I cannot talk to the timing of how it was done, but my sense is something would have had to have been done with that Iraqi army that was the instrument of repression by the Saddam Hussein regime. The other thing I will tell you—

Chairman LEVIN. Would the removal of the top leadership have sent the right signal?

General CASEY. It certainly could have.

Chairman LEVIN. What about the de-Baathification program? Did it go too far?

General CASEY. It did. It still is.

Chairman LEVIN. What about the failure to adequately plan for the occupation, looking at a worst case scenario or a more complex occupation? Was that a mistake?

General CASEY. It certainly was, and it was compounded by the execution.

Chairman LEVIN. Now, what the President himself said is that he had a choice to make—he just said this a couple weeks ago—“to do what we were doing, and one could define that maybe a slow failure, or change what we were doing.” So the President has described what was happening before he made his change of strategy—regardless of whether we think it was a significant change or not; that is not the point at the moment—he defined what was happening as, “maybe a slow failure,” and that we needed to change strategy.

Do you agree with that description of what was happening?

General CASEY. Slow failure? Do I agree that Iraq was moving toward a slow failure?

Chairman LEVIN. That maybe what was happening—I am using the President’s exact words because he did not say it was. He said maybe was a slow failure. You have said that you did not think it was a failure. I am asking you, since the President described what was happening as “maybe a slow failure,” do you—

General CASEY. It is not lost on me that the Commander in Chief was not satisfied with what was going on.

Chairman LEVIN. But his description—even he came to the point after all these years of not having what everybody wanted, which is success in Iraq, he finally described mistakes were made, and then he said, yes, one could define that, doing what we are doing, as “maybe a slow failure.”

I am just wondering whether you would agree with that.

General CASEY. I actually do not see it as slow failure. I actually see it as slow progress.

Chairman LEVIN. All right. My time is up and I think Senator Sessions is next. Senator Sessions, we did not pass over you this time.

Senator WARNER. Senator, would you yield just for a moment?

Senator SESSIONS. I would be pleased to.

Senator WARNER. I want to catch this last vote.

General, I have been here throughout this hearing and it has been a good tough one and a thorough one. But your testimony today has reinforced my earlier opinion when I arrived here at the beginning this morning that you are the President's choice for Chief of Staff of the Army. The institution of the Army is really involved in this, that wonderful institutional tradition of the Army, and you will have my support.

General CASEY. Thank you very much, Senator.

Chairman LEVIN. Thank you.

Senator SESSIONS. General Casey, I am not comfortable with this insistence on trying to work the word "failure" into what is happening. I think we are all uneasy. I think the American people are uneasy. They are troubled. Things have not gone as well as we would like, and you have said that several times. But "failure" suggests a doomed event, and you have been through that now 30 months. You have worked with the Iraqi government and I am sure have been frustrated many times on the difference of cultural responses and the different leaderships they have had there and all.

Do you feel like under the plan that has been proposed and we intend to carry out that we can be successful in Iraq?

General CASEY. I do. I believe, as I said in my testimony, the situation in Iraq is winnable. It is very winnable. It is hard, though.

Senator SESSIONS. It is hard and it is slow, and there are good days and bad days, good months and bad months. Would you say it that way?

General CASEY. There are.

Senator SESSIONS. Senators Levin and Warner and I, and I believe Mark Pryor, were in Ramadi. We were briefed by the Marine colonel, intelligence officer in the command, and we were troubled by the reports that we got at that time. I had the opportunity to talk with General Peter Pace, the Chairman of the Joint Chiefs, last night for a good while and I asked him about that. He said that same briefer briefed him several months later and had seen some significant steps for progress being made. You seem to be saying the same thing.

So in this kind of counterinsurgency operation that we are in, is it not a mistake to go into any one particular area of the country at a given day, whether it is up or down, and try to express a total evaluation of our entire effort?

General CASEY. Absolutely. One of the things that I do that most people do not is I look at the whole country and I travel about the whole country. I have been to every province, visit the units there. I get assessments from the guys and gals that are out there on the ground dealing with the Iraqis every day.

A lot of what comes out of Iraq is Baghdad-centric and it comes out of the Green Zone, and you really have to get out and around Iraq to get a full appreciation of what is going on there. Again, I am not sugar-coating the situation in Baghdad. It is bad.

Senator SESSIONS. You do agree that since such a large percentage of the population is there and it is the capital, that Baghdad must be secured? That is a critical event for us right now?

General CASEY. It is, Senator.

Senator SESSIONS. We have around 23,000 troops in Afghanistan. They have almost the same population as Iraq. I think a lot of us hoped that we could keep the numbers down. But Iraq has turned out to be more complex and difficult and more violent and it has required us to maintain troops longer than I would have liked. Hopefully, this will be a surge that can lead to progress and we can get back on the path that you tried to get us on, which is a downward drawing of our troops and continuing to push up the Iraqi troops.

I am concerned, General Casey, about our prison and law enforcement system there. To follow up on Senator Warner's comment first, if we need more prison beds to place people who have been convicted and arrested by Iraqi forces, is that the U.S. military or is that the State Department ambassador's role to find the money for that?

General CASEY. That is the State Department.

Senator SESSIONS. If we need to create a new trial system, which I strongly think should be a military trial system, because we are in such a state of disorder, and try those people who are threats against the state in an Iraqi military court system, would that be the State Department's responsibility to get such a court system up or the military?

General CASEY. The State Department is responsible for the rule of law and for assisting the Iraqis in developing the rule of law institutions.

Senator SESSIONS. They bring in the Department of Justice and others?

General CASEY. Yes.

Senator SESSIONS. I just want to tell you, I am not happy with that. I do not think we have gotten nearly far enough along. As I have noted, we have one-ninth as many bed spaces and prisoners in custody in Iraq per capita as we have in Alabama. I saw another military writer in a military journal write that on a per capita basis there was about six times as many in prison in Vietnam during that conflict.

It just indicates, objectively looked at, that we have a lot of dangerous people out there, and if they are not arrested, apprehended, and removed, then you cannot have credibility in a city like Baghdad. They need to know that when somebody bad is caught they are gone, it is not a revolving door.

Are you aware of the complaints in that regard and will you take steps as Chief of Staff to support efforts to improve the law enforcement system there?

General CASEY. In Iraq?

Senator SESSIONS. Yes.

General CASEY. We work closely with the embassy on the rule of law program. As you suggest, it is something that needs an awful lot more work.

Senator SESSIONS. General Casey, that is what we hear over and over again. But it is your soldiers that are out there day after day

being shot at, sometimes by the same people that were caught and released. I am glad you say it is the State Department's responsibility, but really it is the United States' responsibility. It is our soldiers there, our policy that we need to execute.

I guess I want you to say that you will break some china if need be to get this thing moving, if we have to get on the State Department or have it transferred to the military to get it done.

General CASEY. I will.

Senator SESSIONS. That is good.

General CASEY. Can I just say, though, that we also have our own detention system where we have about 15,000 Iraqis, and that does not operate in a catch and release program, and we are actually expanding our capacity by another 4,000 or 5,000 so that we can continue to hold the Iraqi security detainees and not have to put them back out on the street. So we work that and watch that very closely.

Senator SESSIONS. One final brief question. Prime Minister Maliki is elected. He is a politician like we are. He has constituencies. His people have pride and he has some pride. Would you say we want him to assume responsibility, we want him to declare it is his responsibility to run Iraq, and we ought to be somewhat sympathetic and understanding if he takes the position he does not need help and his people can do it?

You express that better than I. But I sense a tension there between his desire to be a strong leader for his country and to create an independent Iraq that is not run by the United States, at the same time they are just not able to do everything there.

General CASEY. I would say that that is an accurate description of his desires. He does want to be in charge, not only of the government but of his security forces, and we are working with him to enable him to do that. But that is a good thing. That is a good thing.

Senator SESSIONS. Thank you.

Chairman LEVIN. Senator Sessions, thank you.

Senator Reed.

Senator REED. Thank you, General. It has been a long morning, but I have a couple of points I would like to raise with you.

In your written submission you suggest that, in response to our operations in Baghdad, that the Shia militias would likely lie low, perhaps at the behest of their colleagues in the government, who have been urging them to do that, but that the Sunnis would tend to hunker down in the neighborhoods because they are connected to the neighborhoods, which raises I think in my mind at least the question that the effect of our operations or the perception of our operations at least initially would be that we are conducting generally attacks against Sunni forces at the behest of the Shia government, which could be exploited and, frankly, the opposition has been much more adroit than we have in the information warfare, as a way of showing us that we have thrown our lot in with the Shia, we are attacking the Sunnis.

That I think will harden the resistance in the Sunni community to reconciliation and it certainly will create a regional dynamic where Sunni governments, sympathizers in the region might be compelled to, if not enter, at least to provide increased support.

Is that a concern of yours?

General CASEY. It is a concern and it is something that both we and the Iraqis are concerned about. That is part of the prime minister's commitment, is evenhanded enforcement of the law against anyone who breaks it. So we are working with the Iraqi planners to ensure that the operations that are conducted are conducted in a balanced fashion.

Senator REED. But it seems again, and I tend to agree with your assessment of the likely at least initial reaction, that the Shia militia are deliberately avoiding contact with us. If the Sunnis are in such position where they can—and you and I have both had conversations with the prime minister and when you talk about the insurgency it is a Sunni insurgency. The sectarian violence is something that does not register as forcefully in his mind as it does in ours. It is a Sunni insurgency, and we are going after that Sunni insurgency. Those are literally his words to me.

I think this is potentially a very serious consequence of this operation. But let me ask you an additional question. Let us assume there is a period of remission, but the cancer still exists. The cancer is militias, both Sunni and Shia, with the capacity to quickly assume the battle. The other part of the cancer I think is a dysfunctional Iraqi government, not just its security services but its whole governmental apparatus.

If we do have this period of remission, what do we do? Is that a justification to withdraw forces, or do we have to continue to stay there at a very substantial force level because these capacities still exist? The bottom line is, how long do you think we will be keeping roughly 140,000 troops in Iraq, but more precisely 20,000-plus, 30,000 American forces in Baghdad, maneuver forces? I am not talking about anything but maneuver forces.

General CASEY. I mentioned the metrics earlier about we have some ways of trying to figure out are we making progress in Baghdad or are we not. There certainly is a chance that people will leave town, lie low. What I said in my opening testimony is for this to be successful the Iraqi security forces have to emerge as the dominant security force. So in addition to the security operations, in addition to establishing these bases that will maintain, allow them to maintain security force presence in these areas to prevent a return, it also needs to be worked on the political side to remove political support from the militia.

So that takes time. Now, my sense is, as I have said publicly, we will start seeing an impact in 60 days or so, I think. One way or the other, we will start seeing an impact. Assuming things continue to progress positively, it will probably be the end of the summer before Baghdad is at a level of security that people are more inclined to feel comfortable with.

What happens with respect to our forces after that, it is up to somebody else to figure out. But I would look at the results on the ground and decide what I needed and what I did not need.

Senator REED. Just a final comment. One of the unfortunate aspects of this whole operation is what progress we have made has been reversed in some cases. I think, as you suggested, before the Samarra bombing we thought we had made real progress, that things were going our way, and then it was quickly and suddenly

reversed. That is a concern I have going forward, that we might get a remission, but unless we make fundamental changes—and I think what you also suggested is that—and this goes I think to the focus of the difference between your approach and those who have criticized you, is that, at what point will the Iraqi forces be capable of taking a lead and sustaining that leadership.

In the past you have thought they were and it turned out that they did not have that capacity, or at least that is the perception. I think going forward that is going to be one of the critical issues that we all have to address. You will not be doing that job. You will be Chief of Staff of the Army. But I think we will be still considering that issue.

I do not know if you have a final comment, but I thank you for your patience and your testimony.

General CASEY. Thank you.

Chairman LEVIN. General, I think you have said that a political settlement is essential if there is going to be an end to the violence in Iraq; is that fair? Does that represent your view?

General CASEY. Political reconciliation, yes.

Chairman LEVIN. Right. That is going to require an agreement on power sharing, resource sharing, autonomy issues, on the political side.

General CASEY. Right.

Chairman LEVIN. Is that correct?

General CASEY. That is where those benchmarks come from.

Chairman LEVIN. Right.

General CASEY. Those benchmarks are the key political agreements they have to happen.

Chairman LEVIN. Those are benchmarks, those promises have been made long ago. There was supposed to be a commission which would look at proposed changes to the constitution that was supposed to come into existence 90 days after the assembly took office; is that not correct?

General CASEY. They formed the commission. The commission is meeting, I am told.

Chairman LEVIN. Have they followed their benchmark for reporting to the assembly, do you know?

General CASEY. I think my recollection is there is a benchmark coming up here in January.

Chairman LEVIN. For reporting to the assembly?

General CASEY. I believe so. I think they have 4 months to come back.

Chairman LEVIN. I think the original law of Iraq was that 90 days after they took office they were supposed to report back in 4 months, 120 days after, that they were supposed to report back. That was not met, is that accurate? They did not do that in 120 days?

General CASEY. They are reporting back I think about 4 months after they formed the commission.

Chairman LEVIN. But not 4 months after the assembly was created; is that correct?

General CASEY. I think that is right.

Chairman LEVIN. You have talked about the training and you made a couple references here, one to the length of time it was sup-

posed to take to train the Iraqi security forces. You said this was a 3-year program at one point, but that does not mean that for each of the troops in the Iraqi security forces it would be a 3-year training program. It is like a 6-week training program.

General CASEY. Exactly. I am speaking about the institutions of the military and police forces.

Chairman LEVIN. All right. But in terms of the numbers that have been trained and equipped to take the lead, that number is now at?

General CASEY. Over 300,000.

Chairman LEVIN. 300,000.

General CASEY. About 330,000.

Chairman LEVIN. About half of those are army?

General CASEY. 135,000 army, 190,000 police.

Chairman LEVIN. So 135,000 army are now trained and equipped and 190,000 police are now trained and equipped?

General CASEY. We have trained 135,000 army soldiers and equipped them. Okay, now, of that group—both army and police, there have been 26,000 Iraqi security forces that we have trained that are killed or wounded to the point where they cannot work.

Chairman LEVIN. So there is 130,000 roughly army that have been—

General CASEY. Been through the country.

Chairman LEVIN. Through our program.

General CASEY. Right.

Chairman LEVIN. Trained, equipped, and ready to take the lead, theoretically?

General CASEY. No.

Chairman LEVIN. No?

General CASEY. Three steps. Trained and equipped: they are formed, they are given their uniforms, they are organized into units, and they have had some basic level of training, step one. Step two, in the lead: They begin to function with our transition teams and they grow as units so that they get to the point where they can do counterinsurgency operations with our support. Step three: independence.

Chairman LEVIN. Now, step two; how many of the 135,000 have finished step two?

General CASEY. We look at units.

Chairman LEVIN. How many units?

General CASEY. Right now, 8 out of 10 divisions are in the lead. I want to say 30 out of 36 brigades, and probably 90 or so of the 112 battalions are in the lead.

Chairman LEVIN. So now translate that into people? Roughly how many of the 135,000 are in those units you just described that are in the lead, roughly?

General CASEY. Right. What I will do is I will take off the air force and the navy, and so I would say probably around 120,000.

Chairman LEVIN. 120,000, okay.

General CASEY. That is a SWAG, but—

Chairman LEVIN. No, that is fine.

You have indicated that the piece of paper which was delivered by Mr. Maliki to our President in Amman probably did not say that

they needed American troops; they probably would have said they needed additional or they needed troops; is that correct?

General CASEY. That is my recollection.

Chairman LEVIN. Why would he not have used those troops that you just referred to that were trained and equipped to do the Baghdad job? Or did he, or do you not know?

General CASEY. No, he did. But the rest of the country still requires security forces, and we are drawing——

Chairman LEVIN. But the rest of the country is pacified more. You said the big problem is Baghdad. Why would he not move enough troops to Baghdad to do what needs to be done in Baghdad since the rest of the country is calmer?

General CASEY. He is doing that, and he has moved two brigades, moving another brigade from the west, from the north, into Baghdad.

Chairman LEVIN. So how many troops of his would then be in Baghdad after he makes the move?

General CASEY. Of his?

Chairman LEVIN. Yes.

General CASEY. Total I would say somewhere between 60,000 and 70,000.

Chairman LEVIN. Which leaves about another how many, 60,000 that are trained and equipped and able to take the lead?

General CASEY. Armed forces throughout the rest of the country?

Chairman LEVIN. Right.

General CASEY. Ballpark.

Chairman LEVIN. What we are going to do is request the White House to tell us what apparently you are not sure of, which is whether Maliki was more specific as to whether he wanted or did not want American troops to be part of the Baghdad operation. You said you think he just said troops in that piece of paper that he dropped——

General CASEY. But I think I also said that he leans toward not wanting to have to bring in more coalition forces, and when we have gone to him in this particular case with his commanders and the ministers and said, this is what we need for this mission, he has said okay.

Chairman LEVIN. This is what we need.

General CASEY. Right.

Chairman LEVIN. This is what we need. What America needs?

General CASEY. We collectively, Iraqis and coalition forces, three Iraqi, two coalition.

Chairman LEVIN. Then he accepted that?

General CASEY. He accepted that.

Chairman LEVIN. But that was our proposal?

General CASEY. That was a joint proposal from the Iraqi ministers and us.

Chairman LEVIN. You got together with the Iraqi ministers and then went to the prime minister and made a statement to him that, we believe this mission requires coalition forces?

General CASEY. That is correct.

Chairman LEVIN. Would you say the Iraqi military that were involved in the statement to the prime minister were persuaded of that? Did they initiate the idea or did we initiate the idea?

General CASEY. It came out of our planning, but they accepted and even endorsed the idea.

Chairman LEVIN. So it came out of our—I will not repeat what you said. I think that addresses the question in an adequate way.

My time is up. Senator SESSIONS.

Senator SESSIONS. No, thank you.

Chairman LEVIN. I think the only other question that I have—

General CASEY. Do I have Dan Cox to thank for all these questions? [Laughter.]

Chairman LEVIN. No. No, he shares the load. [Laughter.]

Senator SESSIONS. While you are looking—

Chairman LEVIN. Yes.

Senator SESSIONS. To follow up now on our soldiers and what they have there, you have issued orders—I believe it is you—that Humvees and vehicles should not be outside protected areas that are not up-armored to specifications; is that correct?

General CASEY. That is correct, sir.

Senator SESSIONS. Is any soldier being sent out on patrol or duty without kevlar, the vests that they have, the equipment that they are authorized and expected to have?

General CASEY. I hope not.

Senator SESSIONS. That would be against policy and procedure?

General CASEY. Absolutely.

Senator SESSIONS. You believe you have in theater sufficient equipment and that day after day when they are out there doing their duty they have the specified equipment, protective gear, and that kind of thing? I guess I want to say to American mothers and fathers and family members, we keep hearing this talk about shortage of equipment. Can you tell us, are they not pretty well-equipped?

General CASEY. They are very well-equipped. The discussion today about this report about a lack of equipment is not something that I have heard as I have gone out and visited the soldiers, and I rarely if ever get comments from soldiers about things they do not have, and I ask.

Senator SESSIONS. If you become Chief of Staff, do you understand it is your responsibility to make sure that equipment—ultimately it is your responsibility to see that equipment gets to the soldier in the field so that General Petraeus or whoever is commanding them can have it if they need it?

General CASEY. I do.

Senator SESSIONS. You will accept that responsibility?

General CASEY. I go after it hard.

Senator SESSIONS. I know we have shortages here and there, but I do believe that when I have been there that the equipment is there and we have done a pretty darn good job of doing it in a very distant, difficult land.

General CASEY. I think so, too.

Chairman LEVIN. This is a question which Senator Reed raised and I want to just press you a little bit harder on it. That has to do with the militias going underground, which apparently they are going to do, and taking their arms with them. Is that troubling for you?

General CASEY. It is something we have to watch. As I said, before we go the militias are going to have to be dealt with, and we need to deal with them in a security way and in a political way. But at the end of the day the Iraqi security forces have to be the dominant force in Iraq, and right now they are not, without our help.

Chairman LEVIN. Can they be dealt with without dealing with the political issues which are there?

General CASEY. No. They can, but it would be much more violent.

Chairman LEVIN. Do you agree that there is usefulness to political pressure being placed on the Iraqi leaders to reach settlements?

General CASEY. Absolutely. But if I could comment on that, it is not just Prime Minister Maliki that people need to pressure. There is a political base in the United Alliance that is very responsible for the policies that he is following. So pressure along a range of leaders from Iraq is in my view much more productive than just squeezing the prime minister.

Chairman LEVIN. No, I agree. That is why I always say Iraqi political leaders, not just the prime minister. But that is a necessary ingredient if there is going to be a solution in your opinion?

General CASEY. It is. The other thing that I think it was useful in pushing Iraqi leaders toward a reconciliation, is the discussion about accountability. Saddam Hussein was just hung for his crimes against the people of Iraq. But thousands of Iraqis have died over the past year at the hands of death squads. There has to be an accountability for that, too, and I think the Iraqi political leaders need to understand that.

Chairman LEVIN. Senator Sessions, I think, has focused on what is essential if there is going to be accountability, which is that there not be a catch and release program. We thank him for his leadership in this area. He has really focused on something that is important in terms of accountability and justice being dispensed in Iraq.

General, unless there are additional questions, we will stand adjourned. We thank you for your stamina. I know it is nothing probably in terms of your experience wearing that uniform; this stamina is probably pretty mild, at least in terms of how much time you sat there. But in any event, we thank you for your service and we thank again your family.

General CASEY. Thank you very much, Senator.

Chairman LEVIN. We will stand adjourned.

[Whereupon, at 1:34 p.m., the committee adjourned.]

[Prepared questions submitted to GEN George W. Casey, Jr., USA, by Chairman Levin prior to the hearing with answers supplied follows:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense (DOD) Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff (JCS). These reforms have also vastly improved cooperation between the Services and the com-

batant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? Answer. Goldwater-Nichols has significantly improved our ability to conduct joint operations. I have no specific recommendations for modifying the act itself.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. There is good reason to consider the development of Goldwater-Nichols Act-like legislation to delineate roles and responsibilities of Federal agencies in support of contingency operations.

Question. Do you believe that the role of the chiefs of staff under the Goldwater-Nichols legislation is appropriate and the policies and processes in existence allow that role to be fulfilled?

Answer. Yes.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the commanders of the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Chief of Staff of the Army to the following offices:

Secretary of Defense.

Answer. The Secretary of Defense, as the head of DOD and the principal assistant to the President in all matters relating to DOD, issues guidance and direction to the military departments. If confirmed, I will be responsible to the Secretary of Defense and his Deputy, through the Secretary of the Army, for the operation of the Army in accordance with such directives. As a member of the JCS, I will serve as a military adviser to the Secretary of Defense, as appropriate. I will cooperate fully with the Secretary of Defense to ensure that the Army properly implements the policies established by the Office of the Secretary of Defense (OSD). In coordination with the Secretary of the Army, I will communicate with the Secretary of Defense in articulating the views of the Army.

Question. The Under Secretaries of Defense.

Answer. Acting on behalf of the Secretary of Defense, the Under Secretaries perform responsibilities that require them, from time to time, to issue guidance—and in the case of the Under Secretary of Defense for Acquisition, Technology, and Logistics, direction—to the military departments. If confirmed, in coordination with the Secretary of the Army, I will communicate with the Under Secretaries in articulating the views of the Army. I will work closely with them to ensure that the Army is administered in accordance with the guidance and direction issued by OSD.

Question. The Assistant Secretaries of Defense.

Answer. The Assistant Secretaries of Defense have functional responsibilities that, from time to time, require the issuance of guidance to the military departments. If confirmed, I will, in coordination with the Secretary of the Army, communicate with the Assistant Secretaries of Defense in articulating the views of the Army. I will cooperate fully with them to ensure that the Army is administered in accordance with guidance promulgated by OSD.

Question. The Chairman of JCS.

Answer. The Chairman of JCS is the principal military adviser to the President, the National Security Council, and the Secretary of Defense. Subject to the authority, direction, and control of the President and the Secretary of Defense, the Chairman plans the strategic direction and contingency operations of the Armed Forces; advises the Secretary of Defense on requirements, programs, and budgets identified by the commanders of the combatant commands; develops doctrine for the joint employment of the Armed Forces; reports on assignment of functions (or roles and missions) to the Armed Forces; provides for representation of the United States on the Military Staff Committee of the United Nations; and performs such other duties as may be prescribed by law or by the President or Secretary of Defense.

In conjunction with the other members of the Joint Chiefs, the Chief of Staff of the Army assists the Chairman in providing military advice to the President, the National Security Council, and the Secretary of Defense. If confirmed, as a member of JCS, it would be my duty to provide frank and timely advice and opinions to the Chairman to assist him in his performance of these responsibilities. If confirmed, in addition, upon request, I will as a member of JCS provide my individual military advice to the President, the National Security Council, and the Secretary of Defense. As appropriate, I will provide advice in addition to or in disagreement with that of

the Chairman. I will establish and maintain a close and professional relationship with the Chairman and will communicate directly and openly with him on policy matters involving the Army and the Armed Forces as a whole.

Question. The Vice Chairman of JCS.

Answer. The Vice Chairman of JCS assists the Chairman in providing military advice to the Secretary of Defense and the President. If confirmed as a member of the Joints Chiefs of Staff, it would be my duty to ensure that the Vice Chairman is provided my frank views and opinions to assist him in his performance of his responsibilities.

Question. The Secretary of the Army.

Answer. If confirmed, my relationship with the Secretary of the Army would be close, direct, and supportive. My responsibilities would also involve communicating the Army Staff's plans to the Secretary of the Army and supervising the implementation of the Secretary's decisions through the Army Staff and Army commands and agencies. In this capacity, my actions would be subject to the authority, direction, and control of the Secretary of the Army. In my capacity as a member of JCS, I would also be responsible for appropriately informing the Secretary of the Army about conclusions reached by JCS and about significant military operations, to the extent such action does not impair independence in the performance of duties as member of JCS. I anticipate that I would at all times work closely and in concert with the Secretary of the Army to establish the best policies for the Army in light of national interests.

Question. The Under Secretary of the Army.

Answer. The Under Secretary of the Army is the Secretary's principal civilian assistant and performs such duties and exercises such powers as the Secretary of the Army prescribes. His responsibilities require him, from time to time, to issue guidance and direction to the Army Staff. If confirmed, I will be responsible to the Secretary of the Army, and to the Under Secretary through the Secretary of the Army, for the operation of the Army in accordance with such directives. I will cooperate fully with the Under Secretary of the Army to ensure that the policies established by the Office of the Secretary of the Army are properly implemented. I will communicate openly and directly with the Under Secretary of the Army in articulating the views of the Army Staff, Army commands, and Army agencies.

Question. The Assistant Secretaries of the Army.

Answer. The Assistant Secretaries of the Army have functional responsibilities that, from time to time, require the issuance of guidance to the Army Staff and to the Army as a whole. If confirmed, I will establish and maintain close, professional relationships with each of the Assistant Secretaries to foster an environment of cooperative teamwork between the Army Staff and the Army Secretariat as we deal together with the day-to-day management and long-range planning requirements facing the Army.

Question. The General Counsel of the Army.

Answer. The General Counsel is the chief legal officer of the Department of the Army. His duties include coordinating legal and policy advice to all members of the Department regarding matters of interest to the Secretariat, as well as determining the position of the Army on any legal questions or procedures other than military justice matters assigned to The Judge Advocate General. If confirmed, I will establish and maintain a close, professional relationship with the General Counsel to assist him in the performance of these important duties.

Question. The Judge Advocate General of the Army.

Answer. The Judge Advocate General serves as the Chief of Staff's principal legal advisor. He provides legal advice concerning the organization, powers, duties, functions and administrative procedures of the Army. The Judge Advocate General also advises the Chief of Staff on military justice matters, environmental law, international law issues arising from deployment of U.S. forces overseas and implementation of the DOD Law of War Program. The Chief of Staff does not appoint The Judge Advocate General, and does not have the personal authority to remove him. This enables the The Judge Advocate General to provide independent legal advice to the Chief of Staff.

Question. The Chiefs of Staff of the other Services.

Answer. If confirmed, as a member of JCS, it would be my duty to engage in frank and timely exchanges of advice and opinions with my fellow Service Chiefs in their roles as members of JCS. I look forward to developing strong working relationships with these colleagues, many of whom I know from previous service.

Question. The combatant commanders.

Answer. Subject to the direction of the President, the combatant commanders perform their duties under the authority, direction, and control of the Secretary of Defense, and are directly responsible to the Secretary of Defense for the preparedness

of their commands to carry out missions assigned to them. As directed by the Secretary of Defense, the military department secretaries assign all forces under their jurisdiction, except those forces necessary to perform the missions of the military departments, to the combatant commands to perform missions assigned to those commands. In addition, subject to the authority, direction, and control of the Secretary of Defense and the authority of combatant commanders under title 10, U.C.S., section 164(c), the military department secretaries are responsible for administering and supporting the forces that they assign to a combatant command. If confirmed, I will cooperate fully with the combatant commanders in performing these administrative and support responsibilities. I will establish close, professional relationships with the combatant commanders and communicate directly and openly with them on matters involving the Department of the Army and Army forces and personnel assigned to or supporting these commands.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I have a fundamental grounding and practical experience in Army, joint, and coalition organizations from the tactical through the strategic level. I spent 21 years in the Army learning my craft in tactical organizations or tactically-focused schooling including one-third of that time in command of soldiers and numerous training and operational deployments. I served in a variety of command and staff positions where I gained experience in strategic and combined operations including a tour as a military observer in the United Nations Truce Supervision Organization in Jerusalem, a tour of duty in the Army's Office of Legislative Liaison, service on Army, Joint Forces Command, and the Joint Staffs, and as Commander of the Multinational Force Iraq deployed in Iraq for the last 30 months. I also served as the Vice Chief of Staff, Army, and I believe this has provided me broad knowledge, experience, and insight into the business of running the Army in support of the requirements of the national security strategy. In particular my tour of duty in Iraq has caused me to recognize the quality of our service men and women and the need to focus on them and their families if we are to sustain the magnificent force we have today.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Chief of Staff of the Army?

Answer. Growing the Army by 65,000 over 5 years in a manner that balances current warfighting requirements, responsible allocation of resources, and future strategic needs.

- Recruiting and retaining quality soldiers, civilians, and families.
- Resetting units, equipment, and personnel following deployment so they can respond to strategic requirements as rapidly as possible.
- Maintaining readiness appropriate to mission requirements while continuing to fight a war on terror.
- Balancing future investment strategies with resource realities.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, my first priority will be to get out and assess the situation first-hand by talking to soldiers, civilians, and families as well as the combatant commanders they serve.

My second priority will be to develop effective plans to maintain our position as the finest Army in the world in a manner consistent with future requirements and resources. I intend to work closely with appropriate agencies in both executive and legislative branches to develop and execute these plans.

MOST SERIOUS PROBLEMS

Question. What do you consider to be the most serious problems in the performance of the functions of the Chief of Staff of the Army?

Answer. Management of an Army at war while preparing that Army for the long-term challenges of the global war on terror, as well as for as-yet unforeseen requirements in service to the Nation in the future.

Question. What management actions and time lines would you establish to address these problems?

Answer. If confirmed, I will work closely with the other Joint Chiefs, the Secretary of the Army and, through him, the Secretary of Defense to quickly develop balanced and realistic approaches to solving these problems.

VISION FOR THE FUTURE

Question. What is your vision for the Army of the future?

Answer. The current Army Vision is well-accepted and relevant. If confirmed, I intend to assess the current state of the Army and its expected operating environment in the future; identify major issues, challenges, and opportunities; assess existing plans and programs; and confirm if current initiatives conform to the proper strategic direction. Where I believe change is warranted, I will, in consultation with the Secretary of the Army, propose refinement and/or resource reallocation.

Question. What roles do you believe the Army should play in contingency, humanitarian, and peace operations?

Answer. The Army provides relevant and ready forces to the combatant commanders and it develops soldiers, leaders, equipment, and organizations for the future. To do this the Army must be resourced appropriately to accomplish these tasks consistent with the strategic direction of the Nation's civilian leadership.

Question. Do you see any unnecessary redundancy between Army and Marine Corps ground combat forces, particularly between Army light divisions and Marine Corps divisions?

Answer. No. The entire DOD force structure must be looked at in terms of combatant commander requirements. Infantry Brigade Combat Teams (IBCTs) provide capabilities as unique to the Army as U.S. Marine Corps formations do for the Marines. Some IBCTs are specially trained in airborne operations, others through habitual association with assault helicopter organizations, are specially trained for air assault operations. At the same time, U.S. Marine Corps forces are specially trained for amphibious operations.

ARMY ROLE IN THE JOINT FORCE

Question. The U.S. military fights as a joint force and strives to achieve realistic training for military operations. The Army provides trained and equipped forces for joint military operations.

How do you believe the Army can best contribute to improved joint military capabilities while preserving its service unique capabilities and culture?

Answer. The Army exists to serve the American people, to protect vital national interests, and to fulfill national military obligations. The Army's title 10 responsibility to the Nation is to provide responsive and ready land power—the best manned, trained, equipped, and led forces this Nation can produce—to combatant commanders in support of national strategies. It is also charged with providing combat enabling capabilities and support to facilitate the other Services to accomplish their missions. The Army brings to the fight several capabilities to improve joint warfighting effectiveness.

First and foremost, the Army deploys and employs Army soldiers—boots-on-the-ground (BOG)—a clear demonstration of our Nation's resolve to protect and defend its national interests and protect the interests of our allies. Over the past 4 years, the Army has become more expeditionary, changing from its traditional divisional structure to a modular brigade-based force. This change has been extraordinary; particularly given the global force demand and the fact that we have essentially been developing and institutionalizing these capabilities while we are at war. This change is producing a rapidly deployable, power projection Army that is part of a joint team. It is of unprecedented campaign quality, with agile and adaptive leaders that are comfortable executing throughout the entire spectrum of conflict. The Army is able to achieve decisive outcomes across the full spectrum of operations. It is characterized by strategic agility, mobility, speed, survivability, lethality, sustainability, and network enabled situation awareness and connectivity. Recent operations validate that the Army either possesses the right capabilities, or is developing the right capabilities and capacities, to complement and balance the joint force. The Army is forward looking—a “learning” and adaptive organization that is focused on producing future capabilities to support Joint Force Commanders. Army capabilities ensure tactical and operational networked interoperability with the U.S. Marine Corps, as well as the interdependence on seamless air and naval fires and joint close air support. Army logistics systems have and will continue to provide superb campaign quality support to multiple services. Our future force combat systems are being designed to maximize interdependencies and interoperability requirements based on lessons learned and future operating concepts developed by the Joint Planning Community. Army systems and capabilities will enable us to seamlessly integrate with other Services to address traditional, irregular, catastrophic, and disruptive threats to our Nation and achieve desired outcomes.

Our modular formations provide the joint force with the right mix of light, medium and heavy Brigade Combat Teams (BCTs) as well as the key enabling forces.

The Army will also continue to invest heavily in Special Forces, and is aggressively providing these forces today to joint commanders for worldwide employment. Army transformation improves the capabilities of soldiers engaged in the long war against terrorism and improves the capability of the joint force to defend the homeland, deter conflict in critical regions, respond promptly to small-scale contingencies, and swiftly defeat the enemy in major combat operations—all designed to support the needs of the combatant commanders and our Nation.

JOINT EXPERIMENTATION

Question. The Army has conducted a wide range of experiments to identify the path forward toward a digitized force, but has done much less with regard to transformation to the Objective Force. In the arena of joint experimentation, while the Army has participated in a few joint experimentation activities over the last couple years, it is clear that more joint experimentation is necessary to meet future operational challenges.

What is your view of the need for joint experimentation and how do you see the Army participating in future joint experimentation activities as we move further into the 21st century?

Answer. There is no question as to the need for joint experimentation; our National Security Strategy clearly establishes our method of employing coherently joint forces to achieve our security objectives. The Army fully engages with the U.S. Joint Forces Command (JFCOM) in the planning, development, execution, and assessment of experiments—examples include the cosponsored Unified Quest wargame as well as the Urban Resolve series of experiments. In the latter case, the Army recently embedded our major annual concept development experiment—Omni Fusion—within JFCOM's Urban Resolve experiment. We also devote significant effort to conduct even our smaller scale experiments with a robust joint context. The Army also partners with JFCOM in the area of interagency and multinational experimentation. In support of the latter, we have developed or are developing project arrangements with our key multinational partners to enable full participation in our experimentation programs.

Question. Do you believe that Army experimentation has been sufficient in support of transformation to the Objective Force?

Answer. Yes, the Army has conducted a great deal of experimentation over the last several years. These include: technical prototype experiments such as the C⁴ISR On the Move Test Bed annual experiments and a vast array of Advanced Concept Technology Demonstrations; field experiments such as the Air Assault Expeditionary Force and those conducted by the Unit of Action Maneuver Battle Lab; large scale live, virtual, and constructive experiments, specifically, the annual OMNI Fusion experiments. The Army continues to increase its experimentation capabilities as we stand up our latest experimentation asset, the Army Evaluation Task Force, which will be available for conducting future FCS experiments.

MISSILE DEFENSE

Question. Do you consider missile defense to be one of the Army's core missions?

Answer. Yes, I consider missile defense to be one of the Army's core missions and competencies—as it has been for 51 years. As the world's preeminent land power, providing land-based missile defense to the homeland, our deployed forces, and our friends and allies is an essential core capability the Army provides our Nation. It supports the President's direction in NSPD-23. The Army presently operates two ballistic missile defense capabilities—the Patriot Advance Capability-3 system and the Ground-based Midcourse Defense system—and we will continue to expand our role as additional capabilities are deployed such as the Theater High-Altitude Area Defense system.

Question. What is your view of the proper relationship between the Army and the Missile Defense Agency (MDA)?

Answer. I view the relationship between the Army and the MDA as a critical partnership in a unique mission area in the defense of our Nation. The Army, through our Strategic Command (STRATCOM) Army Service Component Command, and in coordination with STRATCOM, plays a key role in representing the warfighters' missile defense required capabilities to the MDA. This input helps to define and frame the missile defense capabilities that the defense of our homeland, our deployed forces, our friends, and allies require. In general, the MDA should be a supporting agency to each of the Services.

Question. What do you think the Army's responsibilities are or should be with respect to development, procurement, and operation of missile defense systems?

Answer. The Army provides land warfighting capabilities, including force and asset protection, to the combatant commanders. These enduring responsibilities result in the Army serving as a principal contributor to the development, procurement, doctrine, operational integration, execution, and assessment of land-based missile defense capabilities. The Army has a strong history over the past half century of assisting in the development of missile defense technologies and systems including the current Exoatmospheric Kill Vehicle (EKV) used as the interceptor on the currently fielded Ground-Based Interceptors (GBIs) and the Multiple-Kill Vehicle that will replace the EKV on the GBIs when fielded.

MILITARY OPERATIONS IN IRAQ

Question. What do you consider to be the most significant mistakes the U.S. has made to date in Iraq?

Answer. As articulated by the President of the United States, there are a number of areas that did not turn out as envisioned.

Question. There was the feeling that Iraqi elections would bring a sense of nationalism for all of the population and would bring the Iraqi's together. Unfortunately, the results seem to have promoted increased sectarian divisions within the country instead.

We underestimated the ability of al Qaeda in Iraq (AQI) and Sunni insurgents to provoke sectarian conflict and failed to preempt the attack against the Golden Mosque in Samarra.

We thought that as more Iraqi security forces (ISFs) were trained and equipped, we would be able to gradually shift ever increasing security responsibilities to them and thus reduce our forces proportionately. This is occurring slower than we originally projected.

We were slow to anticipate the extent of the radical Shia death squads.

We did not have enough Iraqi and coalition forces to continue to secure neighborhoods that had been previously cleared of terrorists and insurgents.

We allowed too many restrictions to be placed upon our forces.

Which are still having an impact?

Answer. The impact focused efforts by both Shia death squads and AQI and Sunni insurgents to provoke sectarian violence is still being felt in the greater Baghdad area. The Prime Minister's recent commitments to provide additional ISFs, enforce the law against all violators, not to allow safe havens, and to eliminate political interference should ensure the conditions exist to successfully provide security for the capital while reducing sectarian violence.

Question. You have said that 20th century counterinsurgency efforts typically lasted 9 years.

Do you believe the counterinsurgency campaign in Iraq could last as long as 9 years? Could it last even longer?

Answer. Counterinsurgency is an extremely complex form of warfare that, at its core, is a struggle for the support of the population. Progress is measured by effects, not time. I agree that the counterinsurgency campaign in Iraq will continue for some time.

"SURGE" OF U.S. TROOPS IN IRAQ

Question. What is your best estimate of how much the surge in troops the President has proposed is going to cost the Army during fiscal year 2007?

Answer. I understand that Army commands and supporting agencies are working now to refine initial estimates. Several major factors are still in play, including additional equipment requirements and final determination of the support force mix, that may be needed to support additional combat brigades. It will also be necessary to augment theater support capabilities to provide for the increased Army and Marine Corps presence.

Question. Can the Army deploy an additional five brigades to Iraq with only about 21,000 additional people, or will additional military, civilian, or contractor support personnel be required on top of the direct increase of 21,000 military personnel?

Answer. BCTs are designed to deploy and join an existing command and control structure already established for employment in a theater of war. This is the case with the five BCTs committed for the force increase in Iraq. However, given the nature of the counterinsurgency mission, there are certain additional combat support and combat service support capabilities required to enable fully the commitment of the additional brigades. These capabilities include logistical enablers, intelligence assets, military police, and a command/control node. Based on the current mature base of support already in theater, additional civilian and contractor personnel required should be minimal.

Question. Given the Army's state of readiness, how long do you believe the increased troop levels and operations tempo can be sustained?

Answer. Over the past 4 years the troop levels in Iraq have varied based on conditions on the ground, and we have experienced surge periods before. In December 2004, 20 BCTs provided enhanced security for national elections and again in November 2005, when 19 BCTs enabled the final round of national elections. The current effort to provide five additional BCTs and enablers from the Army represents an additional conditions-based force increase. This effort cannot be indefinitely sustained without increased resources and policy support.

Question. Have you done any planning for the redeployment from Iraq of U.S. forces beyond the surge?

Answer. I believe the Army can sustain the increased force levels in Iraq through the remainder of this fiscal year. We've extended several units in Iraq beyond their scheduled rotation dates and we've returned units to Iraq with less than 12 months at home station in order to meet the requirements on the ground. However, this pace exacts a toll on the force—on equipment, on soldiers, and on their families. As the President announced, an end strength increase will help; we'll be able to field additional BCTs over time. Additionally, we'll continually review and adjust our force generation model to ensure no soldier deploys without the proper training and equipment. The Reserve component (RC) is invaluable as a part of the total force, and I believe recent policy changes on mobilization timelines will also enhance overall readiness.

Question. What are the stages you would envision in such a redeployment?

Answer. When conditions permit and requirements call for fewer BCTs, we would adjust the force flow to redeploy those units whose tours had been extended, while meeting BOG durations (of 1 year) for other deployed units. We would also support dwell times (of 1 year) for units available to deploy from continental United States (CONUS) back into Iraq. I would additionally make a priority of either keeping a brigade in a Reserve status in Kuwait or keeping a brigade in a heightened alert status, prepared to deploy from CONUS, which would give the commander the flexibility needed to address an unexpected escalation of violence. If the requirement for fewer brigades came to pass, we would redeploy forces, or hold forces in CONUS, until we achieved the required number of brigades needed in Iraq. We would also reduce in an appropriate manner combat support, combat service support, headquarters strengths, and contractors. We would shrink our basing footprint to meet the needs of the operational commander. All of this would be a deliberate process synchronized with the transfer of security responsibility to the Iraqis.

Question. In testimony on January 23, Lieutenant General David Petraeus, nominated to become Commander, Multi-National Force-Iraq, said that he would prefer to accelerate the flow of the five additional combat brigades to Iraq as quickly as possible. The current plan calls for the deployment of roughly one brigade per month through May.

Do you believe that this acceleration of the flow is practicable? By how much can it reasonably be accelerated?

Answer. The Army has rotated forces into the Central Command (CENTCOM) area of responsibility (AOR) for the past 5 years. Infrastructure and procedures in the AOR, enhanced over time, enable the timely deployment of forces. The Army continuously plans force rotation and prepares next to deploy forces. As such, the BCTs designated to deploy this spring have been preparing for the past 8 to 10 months and are approaching full mission readiness. Accelerating the deployment of these BCTs decreases preparation and training time by 45 to 60 days. As we accelerate, we will not send soldiers without proper training and the best equipment possible. Even with the short timeframe to execute this mission, the Army will be able to execute this reinforcement; and all of the BCTs will receive required training and equipment prior to employment in theater. Further, no accelerated BCT will fall below a 1:1 deployment to dwell ratio. The current schedule of accelerated deployments is feasible and the Army today is on track to meet the required arrival dates established by the theater commander for all four remaining BCTs. The theater commander will decide on any new requirement to further accelerate the force flow. The current plan of deployments represents the most practicable acceleration. The lead time required to provide each BCT with an appropriate mission rehearsal exercise (MRE) precludes deploying faster without increasing risk. U.S. Army Forces Command continues to refine training and equipping schedules to maximize unit readiness for deployment and counterinsurgency operations.

Question. What are the most acute manning, training, equipping, and transportation problems that you see in trying to accelerate the deployment of all five brigades?

Answer. All five BCTs will deploy manned, trained, and equipped to perform their mission. The Army will not deploy any BCTs that are not ready for combat. The Army will deploy all five brigades fully manned. All five BCTs will be trained to perform their assigned mission. The greatest training challenge is available training time prior to deployment. The Army is accelerating the execution of some of the MREs. The Army will use a combination of organic unit equipment, TPE, APS stocks, and cross-leveling to equip the deploying BCTs. All will be equipped to perform their mission before they enter Iraq. The most acute equipping challenge is add-on armor for medium and heavy tactical wheeled vehicles. Units will cross-level as an interim solution until new production can fill the complete requirement. If I am confirmed, I will work to ensure that no soldier deploys to Iraq without adequate force protection equipment. The increased demand for operational equipment will have a longer-term impact on the Army's equipment retrograde and reset program.

Question. In your view, could accelerating the "surge" of forces reduce our leverage with the Iraqi leaders to keep their military, political, and economic commitments?

Answer. No, it should not. The Government of Iraq is eager to assume greater security responsibility from the coalition and understands the need to make military, political, and economic gains during this period to maintain positive momentum and continue the decrease in violence. The increased flexibility to support Iraqi led stability operations provided by the increased force level of U.S. forces can help establish the conditions necessary for the political process to go forward.

Question. Do you believe that quelling the current level of violence is a necessary condition for a political solution in Iraq?

Answer. Reducing the levels of sectarian violence in the capital is key to our efforts to stabilize Iraq. The central challenge facing us is how we can best apply all of the elements of power to break the cycle of sectarian violence; this must be resolved for us to succeed. Reduction in violence will set the conditions for reconciliation to occur which will, in turn, set the stage for transition of security responsibility to the Government of Iraq and the adaptation of coalition presence within the country.

Question. Do you believe that it is feasible for current and projected U.S. forces in Iraq, in conjunction with available Iraqi forces, to achieve this objective?

Answer. I believe this plan can work. I believe the ISFs, in conjunction with U.S. forces assistance, can achieve stability in Iraq. The increase in U.S. forces is a key piece of our new strategy to secure Baghdad. These additional forces will work alongside the ISF to help the Iraqis secure neighborhoods, protect the local population, and ensure that the Iraqi forces left behind are capable of providing the security that Baghdad needs for recovery and reconciliation. Additionally, Prime Minister Maliki has given us his pledge that political or sectarian interference will not limit Iraqi and American forces in pursuing all those who break the law.

IRAQI SECURITY FORCES

Question. For more than 2 years, you have served as Commander, Multi-National Forces-Iraq. Prime Minister Maliki asserted that U.S. refusal to provide the ISFs with weapons and equipment hurt their ability to secure Baghdad.

Do you agree with the Prime Minister's assertion?

Answer. No, and we have recently briefed him on the status of equipping his forces. We've entered into an agreement on the size, equipment, and capabilities of the ISF with each of Iraq's three governments and met the obligations consistent with those agreements. We have adequately trained and equipped a 325,000-man security force which I believe will become capable of defending Iraq from internal threats.

Question. What is your view of the state of training and equipping of ISFs and whether they have what they need to meet the military commitments of the Iraqi leaders?

Answer. The objective counterinsurgency and civil security forces are adequately sized, balanced, and equipped to counter Iraq's internal threat with our support. With continued training and experience they will be capable of independent counterinsurgency operations.

Question. What concerns, if any, do you have about the ability of those units to participate in the execution of the new Baghdad security plan?

Answer. The ISF have demonstrated their increasing capability at the tactical level; however, the synchronization of unit movements, the application of enablers such as aviation and intelligence systems, and the ability to work the full spectrum required to include civil-military operations require additional training. I remain

concerned about the reliability of some of the local and national police. We will watch them carefully.

Question. The Iraqi government has agreed to send an additional three Iraqi Army brigades to Baghdad, two of which will apparently be predominately Kurdish. What is your understanding of why Kurdish units were selected?

Answer. The forces assigned to each/any operational area, including Baghdad, are determined by a deliberate planning/estimate process. The level of forces currently identified for operations in Baghdad are assessed as being what is required for the tasks, when balanced, militarily and politically, against the need for forces elsewhere within Iraq. This decision is made by the Prime Minister (and Commander in Chief) informed by his principal advisors; both Iraqi and coalition.

Question. Do you believe that these units have a greater loyalty to the central government than other units?

Answer. I believe these units are loyal to the central government.

Question. How do you believe Sunni or Shia Arabs are likely to react to Kurdish troops in their neighborhoods?

Answer. All parties will accept the use of Kurdish forces. In the end, if stability is enhanced, the central government will be seen as providing a secure environment, and this is what all sides desire.

Question. How do you believe the Mahdi Army is likely to react to Kurdish troops entering Sadr City?

Answer. It is not clear Kurdish units will enter Sadr City as part of the Baghdad security plan. If they were to do so, the reaction in Sadr City would likely vary, depending upon the perception of the mission, size and composition of forces used, duration of operations, and reaction to the political situation of the moment.

Question. What is your understanding of where Iraqi brigades that are predominantly Sunni or Shia are likely to be deployed—among their own sect or the other? What do you see as the implications either way?

Answer. The forces that will be employed in Baghdad are a mixture of ethnic groups and religious sects. It is one of the tenets of the Baghdad security plan that ISF in general must gain the trust and confidence of the Iraqi people. Therefore, it is the intention of Lieutenant Aboud to intermingle all components of the ISF so that together they can be seen as a positive force in providing security.

Question. The performance of the Iraqi government has been uneven. The new way forward calls for the ISFs to do more, especially in Baghdad.

Are you personally confident that the ISFs can meet this challenge?

Answer. I believe the ISF can meet this challenge with our support.

Question. Do you believe Prime Minister Maliki can achieve the benchmarks that the President has discussed? Have you seen those benchmarks? If so, please describe them for the committee?

Answer. I believe that Prime Minister Maliki will sincerely and aggressively try to achieve the benchmarks. He has also made commitments to ensure the ISF and coalition have the freedoms of action and authority to accomplish their mission.

1. Military commander given all authorities to execute his plan.
2. No political interference in security.
3. No militia controlling local security.
4. Even handed enforcement of the law.
5. No safe havens.

Question. In October 2006, the Special Inspector General for Iraqi Reconstruction released three reports. One found that nearly one of every 25 weapons the U.S. military bought for ISFs was missing. A second report found that “significant challenges remain that put at risk” the U.S. military’s goal of transferring all logistics operations to the Iraqi defense ministry by the end of 2007.

Are you familiar with these reports?

Answer. Yes.

Question. What actions if any have you taken in response to their findings?

Answer. We have had a very positive and productive relationship with many organizations that have helped us assess the status of the train and equip mission to include the Government Accountability Office, SIGIR, and DOD Inspector General. In every case, the recommendations of these groups have been acted upon, and accountability continues to improve. We believe that it is both our aspiration and the aspiration of the MoD and MoI to be largely self-reliant in logistics by the end of 2007 and the 2007 ISF budget is adequate to the task; however, our ability to achieve that is assessed monthly and adapted as necessary.

U.S. OPERATIONS WITH ISFS

Question. What is your understanding of the command and control relationships between American and Iraqi forces in the new Baghdad security plan?

Answer. U.S. forces will operate under U.S. command and support ISF operations in each of the nine districts of Baghdad. They will work closely with the sector brigade commander who will have command of all ISFs in that sector.

Question. Do you have any concerns about these relationships?

Answer. I believe these relationships are adequate but will require close coordination and liaison. The fact that the majority of forces operating in Baghdad have been working together for sometime should assist these relationships. In order to mitigate against potential problems close liaison will be required at all levels of command.

Question. The new Baghdad security plan apparently envisions American units being co-located with Iraqi units spread out over approximately 30 mini-bases throughout Baghdad.

What is your understanding of how those forces and the forces which will have to resupply them on a daily basis will be protected?

Answer. Under the Baghdad security plan, coalition forces will establish Joint Security Stations with the Iraqi Army, Iraqi Police, and the Iraqi National Police. The stations are strategically positioned throughout the city to accommodate dispersed, joint patrols, and to provide a CENTCOM and control hub. The establishment of Joint Security Stations includes enhancing force protection and developing essential sustainment and life support packages at each Joint Security Station. Many of the Joint Security Stations are located at existing Iraqi Police Stations. Force protection enhancements will include improvements such as entry control points, external barriers to redirect traffic flows and/or reinforce perimeters, increased protection from indirect fires, and guard posts/towers where required.

Question. What changes, if any, would you recommend in the size, structure, number, or operating procedures for U.S. forces embedded with ISFs?

Answer. There is unquestionable linkage between ISF progression and the embedded Transition Team program. The current Transition Team size is insufficient to permit an optimum level of advisement to their respective ISF unit. In recognition of this, Multi-National Forces-Iraq has initiated the enhancement of transition teams to increase their effectiveness while balancing other operational requirements. Based on conditions within each MND's AOR, primarily relating to the levels of violence and ISF capacity for independent operations, transition teams are undergoing enhancement.

THE MILITIAS AND THE INSURGENTS

Question. What are your views on how the Iraqi government should confront the militias?

Answer. There are numerous militias in Iraq; each has its own goals and motivations. The Iraqi government must make clear that armed groups operating outside the law will not be tolerated. As some militia members will not be interested in reconciling with the Iraqi government, the ISFs will have to deal with them militarily or treat them as criminal elements. In order to deal effectively with these illegal armed groups, the Iraqi government should also engage in substantive dialogue with militia leaders in order to identify their motivations and concerns. The Iraqi government must also provide for militia members in order that they might support their families while being fully reintegrated into civil society.

Question. Do you believe that the Iraqi government is likely to do so in a timely manner?

Answer. The Iraqi government is already confronting militias in order to curtail sectarian violence. As ISFs gain strength and confidence, their ability to confront the militias will improve as well. Success against one group could have a cascading positive effect, and place additional pressure on other illegal armed groups to terminate hostilities. However, success against militias will not be achieved on our timetable, but on Iraq's.

Question. How effective do you believe the addition of more U.S. troops will be in securing Baghdad if the Iraqi government fails to take effective, timely action to confront the militias?

Answer. Absent a concerted effort by the Iraqi government to curtail militia activity, an increase in U.S. troop strength may reduce sectarian violence in the short-term, but at the cost of increased attacks against coalition forces and reduced confidence in the capabilities and trustworthiness of the ISFs.

Question. There have been some recent news reports that the Shiite political elite are advising Moqtada al Sadr to "lay low"—much as was done after confrontations

with the U.S. military in Najaf in 2004, and that he and his militia are heeding that call. The fear is that they will simply re-emerge after the so-called surge of U.S. troops is over.

Do you believe this is a real concern, and if so, what should be done about it?

Answer. Shia political and religious leaders are advising Muqtada al-Sadr to rein in his militia and play a constructive role in the political process. These warnings are coming from individuals Sadr respects—and who themselves have concluded past mistakes should not be repeated. Furthermore, we have seen what we assess to be a qualitative difference in the Iraqi government's willingness to take on extremist elements—including al-Sadr's militia.

A situation where al-Sadr's militia attempted to resurge after "laying low" would clearly present a challenge the Iraqi government would need to confront, which is why our current operations must focus on having the ISF emerge as the dominant security force in the country.

Question. What are your views on whether American troops should enter Sadr City, and if so, under what circumstances?

Answer. If we are to provide security for the people of Iraq it is important that we do not allow safe havens for militias or terrorists. As a result American troops already regularly enter Sadr City when operational needs dictate it. I expect this to continue in the future and anticipate that, as further progress is made, American troops will be stationed in Sadr City alongside Iraqi Army and Iraqi NP units.

Question. How do you believe the Mahdi Army or the Iraqi residents of Sadr City would react to American troops entering Sadr City and staying there?

Answer. American troops already enter Sadr City regularly in response to operational needs, which is likely to continue. The Mahdi Army largely follows Muqtada al-Sadr's current public directives to refrain from directly engaging coalition forces entering Sadr City or other predominately Shia neighborhoods in Baghdad. Though we are still assessing the sincerity of recent statements by Sadr City leaders supporting the Baghdad security plan, it is a positive sign residents are willing to work with the Iraqi government to improve their security.

Question. Do you expect to see Sunni insurgents and Shia militia members leaving Baghdad as a result of increased U.S. and Iraqi troop presence?

Answer. We are already seeing it. Sunni extremists such as AQI will likely replicate their response to previous security operations. Their leadership is likely to relocate outside the immediate area of Baghdad to areas northwest and south of Baghdad, leaving lower level fighters in the city to continue high-profile attacks when and where possible against civilians, Shia militias, ISFs, and coalition forces. Sunni resistance fighters are locally based and will attempt to go to ground within their general areas, preparing for future operations following coalition forces departure. We have seen numerous indications Shia militia leaders will leave, or have already left, Sadr City to avoid capture by Iraqi and coalition security forces. The effectiveness of recent detainment operations is likely causing these actions.

Question. If so, do you believe that this could result in a higher level of violence in the rest of the country?

Answer. Robust security operations in Baghdad and a resulting movement of antagonists and weapons into the Baghdad belt areas could result in heightened levels of confrontation in these urban belts. It is unlikely the limited displacement of insurgents and Shia militia from Baghdad will cause a significant increase in violence in other areas of Iraq. Baghdad is the center of gravity. The movement of fighters to foment violence in other areas would diminish capabilities focused on the central struggle. However, to mitigate pressure on militias and extremists in Baghdad and the surrounding areas, other elements within these organizations may increase attacks along the southern lines of communications.

Question. What are your views on how we should address that possibility?

Answer. This is an operational consideration that is addressed in contingency planning prior to commencing operations. Since any significant increase in violence is unlikely to spread beyond the areas surrounding Baghdad, the key is to control lines of communications into and out of Baghdad and as well as to secure the main supply routes, especially those to the south. Increased use of Iraqi Army and national police to protect the lines of communications and establishment of regional reaction forces to respond to threats external to Baghdad are prudent measures to implement. A number of other options could be used to counter the dispersion of violence to areas surrounding the city. These include exerting positive control over entry-exit points and increased patrolling and intelligence collection in areas of concern.

STRATEGIC RISK

Question. Do you believe that the extended pace and scope of operations in Iraq and Afghanistan create higher levels of strategic risk for the United States based on the availability of trained and ready forces for other contingencies?

Answer. A fundamental challenge impacting Army readiness and strategic depth is the need to establish a proper balance between strategy and resources. Current demands exceed the strategy outlined in the Quadrennial Defense Review (QDR) and exceed the resources provided to execute the QDR-based strategy. While the U.S. Army can still meet its commitments in support of approved contingency plans, our concern is with our capacity to provide sufficient next to deploy forces capable of surging to meet other contingency requirements as they arise and to deter potential aggressors. The immediate challenge lies in the readiness of these currently non-deployed, next to deploy forces. The Army's requirements, particularly to reset, recapitalize, and replace damaged equipment must be fully funded to restore the strategic depth of our Army necessary to respond decisively to potential strategic contingencies. Full, timely, and predictable funding is critical for the Army to sustain the growing global commitments of our force. The recent decision to grow our ground forces and to assure access to the Reserve component will increase the strategic depth to sustain the high levels of demand for Army forces. The size of our Army has a deterrent effect on potential enemies.

If so, how would you characterize the increase in strategic risk in terms of the Army's ability to mobilize, deploy, and employ a force for a new contingency? In your view, is this level of risk acceptable?

Answer. The current pace of operations has reduced the time between deployments, exacerbated equipment shortfalls that impact nondeployed forces and pre-positioned stocks, and degraded training for full spectrum operations. Currently, Army units focus their training on preparing for counterinsurgency operations. To meet combatant commander's immediate wartime needs, the Army is pooling equipment from across the force to equip soldiers deploying into harm's way. This practice continues today, increasing risk to our next to deploy forces and limits our ability to respond to emerging strategic contingencies. The Army continues efforts to operationalize the Reserve component, which includes a large portion of the Army's key enabling capabilities, to improve our ability to respond to new contingencies. Fully and continuously integrating the Reserve and National Guard balanced capabilities into ongoing operations is critical to our effectiveness and enhances the readiness of non-deployed forces by allowing more time to reset, re-equip, and conduct full spectrum training in order to be prepared for contingency operations at home and abroad. The Department is updating Reserve governance and employment policies in accordance with the Secretary of Defense's new mobilization policy, to allow for greater access to these forces. These policy goals include managing mobilization on a unit, instead of an individual, basis. The recently completed Chairman's Risk Assessment provides specific detail to the strategic risk of the military in meeting the National Military Strategy and risk mitigation efforts.

Question. What is the impact of the decision to increase Army forces committed to Iraq on our ability to meet our security obligations in other parts of the world?

Answer. Increasing force commitment to Iraq does have an impact on our capabilities. However, that the Army still has combat capability and will meet its obligations, clearly, we must plan for and address future challenges in this dangerous and uncertain time. I agree with General Schoomaker's concern about our strategic depth and assessment against many of our contingency plans—it could take longer to execute some of those plans in terms of the timelines that are expected. In such cases, joint capabilities will mitigate those ground force capabilities delayed by the force generation timelines. The approved increase in Army end strength, though not a near-term solution, will help restore this capacity and provide us with a deterrent capability. It should also be noted that the enemies that we face are not ours alone, they threaten many others as well. As such, the Army and the DOD are working hard to build the security capacity of willing partners, through its security cooperation efforts, which in the long-term should enable regional deterrence and greater self defense.

Question. How and over what period of time, in your view, will increases to Army end strength reduce or mitigate this risk?

Answer. I would refer you to the Chairman's Risk Assessment for the specifics which are classified. However, as has been publicly announced, the recent decisions by the President and Secretary of Defense to grow our ground forces and to assure access to all components of our force will help to establish the balanced inventory required to meet and sustain demand for Army forces. It will require time and resources to man, train, and equip this force. We must continue to leverage through

building partnership capacity and security cooperation efforts, the development of the security capacity of our global partners. The current plan calls for increasing the size of the Active Army. The complete benefit of this growth will not be realized until the 2012 timeframe. The Army plans to increase both BCTs and key enabling units in our Active component (AC), Army National Guard, and Army Reserve. This growth will expand our rotational pool to 76 BCTs and more than 200 enabling organizations in the operational force of the total Army. Our goal is to provide a continuous supply of BCTs to meet approved global commitments. Our immediate challenge lies in the readiness of the next to deploy and surge forces. Generating whole, cohesive units that are fully manned, trained, and equipped will ensure that they are fully ready for the strategic and operational demands of the combatant commander. This will require a national commitment to sustain predictable resourcing over time and to build our force in a balanced, coordinated fashion while providing adequately for the needs of our All-Volunteer soldiers and their families.

Question. What additional actions, in your view, are necessary to reduce or mitigate this strategic risk?

Answer. Congressional support for increased total obligation authority for the Army and timely wartime supplemental funding remain key elements of reducing strategic risk. Expansion of the Army, continued transformation, assured access to the Reserve components, recapitalization, and increased funding are some of the key means essential to reducing overall strategic risk. We must be able to harness the other elements of national power to shape the strategic environment and reduce the likelihood of crisis. Fully resourcing our security cooperation activities, increasing the security capacity of strategic partners, strengthening our unity of effort within our interagency, and improving and increasing our Nation's expeditionary advisory and assistance capabilities are also essential to mitigate strategic risk.

ROTATION CYCLES/SCHEDULES

Question. The Active Army's ratio of time spent deployed to time at home station is already approaching 1:1—that is for each year deployed a soldier spends 1 year at home station. The Active Army objective is 1:2 where soldiers can expect to be home for 2 years for each year deployed. The Reserve component objective is 1.5 where soldiers can expect to be home for 5 years for each year deployed. Despite the desired deployed to “dwell” ratio, the increase in forces committed to Iraq is likely to drive this ratio even higher.

What impact do you expect the proposed troop surge in Iraq to have on the so-called “dwell time” of Army soldiers? Is it possible that this surge could drive the Army past the 1:1 level?

Answer. Over the past 5 years very few units have not met the 1:1 ratio between rotations, though the Army minimum goal for Active component units at surge is a 1:2 ratio and objective steady state goal it is a 1:3 ratio. Currently, most Active component BCTs as well as combat support and combat service support are averaging about 1:1. Reserve component units have mostly been mobilized only once, so Army National Guard and for Army Reserve rotation goals have not been exceeded. Ultimately, the decision rests with the theater commander to determine his requirements. I understand that the Army is finalizing the force rotation set for the rest of this year and for 2008 in order to ensure that we continue to provide the required capabilities to the combatant commanders. No units in the plus-up will break the 1:1 rotation level. For the Operation Iraqi Freedom (OIF)/Operation Enduring Freedom (OEF) force rotations for fiscal years 2007–2009, the recent change in mobilization policy for the Reserve component begins to provide to the Army predictable access to required capabilities. During the implementation to resume proportional contributions to the theater some units, particularly Active component BCTs, certain Active component enabling capabilities (military police, engineers, and others) and Reserve component military police and engineers, will be asked to rotate at a ratio that exceeds policy goals. The Army will identify these units as soon as possible in order to maximize time for their training, manning, and equipping. The Army will deploy only trained and ready units.

Question. How do you think a deployed to dwell ratio of 1:1 is likely to impact the readiness of deployed and non-deployed units?

Answer. When units redeploy from Iraq and Afghanistan, their reset periods at home station are truncated due to the short time before they redeploy next. It increases the challenge to ensure units are reset and trained for their next deployment equipment and people. Stress is increased on soldiers and families.

Question. What is your assessment of the impact of the decision to increase Army end strength on the rotation schedule and how long will it take for this impact to make a difference?

Answer. The decision puts us on a path to enhance the depth and breadth of capabilities, yet will require several years, considerable resources, and a sustained national commitment to bring it to fruition. Although it will not immediately alleviate strategic risk as we assess it today, it will better posture us to meet sustained levels of force deployment for the long war. If we grow the Army to 547,000 Active/358,000 ARNG/206,000 USAR; have recurrent, assured access to the Reserve component, rotate at surge with the Active component at 1:2 and the Reserve component at 1:4 with a 12-month Reserve component mobilization (9-month BOG), the Army will be able to generate about the same capacity as with today's programmed force by fiscal year 2013.

Question. How will the proposed surge impact the ability of the Army National Guard to respond to homeland security and other disaster response missions?

Answer. It is my belief that the surge will not materially impact on the ability of the Army National Guard to respond to missions here at home. The surge is composed primarily of Active component units. One National Guard BCT (1-34th MNARNG) already deployed in theater was extended 120 days as part of the surge but will return home this August. The Guard will continue to be able to support the Southwest Border Mission. The Chief, National Guard Bureau, together with the Army leadership, has committed to the goal of having at least 50 percent of a Governor's National Guard forces available to respond to State missions.

EQUIPMENT AVAILABILITY

Question. Both deploying and non-deploying Active component and Reserve component Army units are training without all their required equipment. Deploying units do not receive some of their equipment until late in their pre-deployment training cycle or as they arrive in theater.

In your view, is deploying additional brigades to Iraq likely to increase the strain on maintenance systems and further reduce equipment availability for training?

Answer. I would agree that additional brigades will increase workload, but we have demonstrated we have the depth of capacity to meet requirements. With adequate funding and lead time, we can leverage our organic capability, public and private partnerships, and contracts to meet these requirements.

Question. Do you believe that the Army has enough equipment to fully support the pre-deployment training and operations of surging units?

Answer. The Army's number one priority, and one that I would maintain if I am confirmed, is to ensure soldiers going into the warfight have the equipment they need. Units will use a combination of organic unit equipment, theater provided equipment, Army prepositioned stocks, and cross-leveling to equip the deploying BCTs.

Question. What do you see as the critical equipment shortfalls for training and operations?

Answer. Due to theater requirements, some equipment is unavailable for units to train with prior to deployment. The most common shortfall occurs with force protection equipment, where equipping solutions are developed to meet specific theater threats, and production of these items go straight into theater to meet demand.

Question. In terms of shortfalls for training items, some key pieces of equipment include uparmored HMMWVs, engineer route clearing equipment, and counter rocket artillery and mortar fire system. In terms of shortfalls for operations, all units are fully equipped to meet operational demands.

What steps would you take, if confirmed, to address these shortfalls and ensure that units have what they need to train and operate?

Answer. The most important element of ensuring units have what they need is ensuring sufficient, predictable, stable funding. Stable and predictable budgets that are enacted early with distribution of both base and bridge supplemental funding within 30 days of the start of the fiscal year allow us to deliver the right equipment, on-time.

EQUIPMENT REPAIR/RESET

Question. Congress provided the Army with \$17 billion in fiscal year 2007 to help with the reset of non-deployed forces and accelerate the repair and replacement of equipment.

What impact do you expect the increased funding to have on the readiness of our ground forces, and how soon do you expect to see this impact?

Answer. Based on what I know now, I believe equipping the force will take time. We must fill the historical holes in our force, transform the Army, and modernize. The \$17.1 billion has a minor impact on equipment on hand quantities, and the procurement dollars provided pay back the Reserve component for equipment left in

theater and to replace battle losses. The \$17.1 billion has the greatest impact on the equipment serviceability status which is realized when depot and field level reset is completed during the 180 day reset window for redeploying units.

Further, as the \$17.1 billion for reset was available at the beginning of the fiscal year, the Army was able to synchronize resources, people, and materiel to align with the flow of equipment from returning units into the reset process. For instance, timely funding has allowed depots to order parts in advance of equipment arrival, thus speeding the reset process.

Question. Is it your understanding that our repair depots are operating at full capacity to meet rebuild and repair requirements for reset?

Answer. Executing the \$17.1 billion reset program does not exceed the maximum capacity of our depots. I understand that the Army's depots have the capacity and are on track to execute all funding associated with the reset dollars.

As the \$17.1 billion for reset was available at the beginning of the fiscal year, the Army was able to synchronize resources, people, and materiel to align with the flow of equipment from returning units into the reset process. For instance, timely funding has allowed depots to order parts in advance of equipment arrival, thus speeding the reset process.

The Army's organic depots have steadily increased their capability while simultaneously increasing efficiencies. For example, Red River Army Depot, will see work increase from 400 items a month in October 2006 to 700 a month in September 2007. The Anniston Army Depot will increase from 1,000 items a month in October 2006 to 3,000 per month in September 2007.

Question. What additional steps do you believe could be taken to increase the Army's capacity to fix its equipment and make it available for operations and training?

Answer. As I indicated previously, I believe that the most important element of ensuring units have what they need is ensuring we have sufficient, predictable, stable, funding. Stable and predictable budgets that are enacted early with distribution of both base and bridge supplemental funding within 30 days of the start of the fiscal year allow us to deliver the right equipment, on-time. The Army needs continued congressional help in passing the 2007 main supplemental funding early this spring to properly sustain the Army.

Question. What impact do you believe the President's proposal to send an additional five brigades to Iraq is likely to have on the pool of equipment available for non-deployed units to train with at home?

Answer. The additional brigades will increase the need for equipment as units intensify training for deployment. Some of the deploying units will take equipment with them which will require the Army to realign available equipment for non-deploying units to train with. The Army will need to better manage the equipment to ensure proper distribution.

Question. What impact is it likely to have on the ability of Army National Guard units to respond to homeland security and disaster relief missions?

Answer. This increase in deployed forces could only affect the Army National Guard's ability to respond to homeland security and disaster relief missions to the degree that we deploy Army National Guard units. I understand that the Army does not plan to transfer any Army National Guard equipment to other components. However, as demonstrated with last season's hurricane preparedness, the Army can provide necessary disaster support through mutual aid compacts, equipment loans, and forces from the Active component and Army Reserve components.

RESERVE DEPLOYMENT AND MOBILIZATION

Question. In recent years, Reserve Force management policies and systems have been characterized as "inefficient and rigid" and readiness levels have been adversely affected by equipment stay-behind, cross-leveling, and reset policies.

What are your views about the optimal role for the Reserve component forces in meeting combat missions?

Answer. Today's Strategic Contemporary Operating Environment (COE) has mandated a transition of the Reserve components of our Army from a Strategic Reserve to an integrated, vital, and resourced Operational Force. Since September 11, the Reserve component has been used judiciously and prudently in support of the global war on terror, both here and abroad, and will continue to help meet the global force requirements given the Army.

Question. What is your opinion about the sufficiency of current Reserve Force management policies?

Answer. The changes in Reserve component mobilization policy will facilitate consistent access to Reserve component units. Most importantly, these changes will also

provide greater predictability of deployments for our soldiers, their families, and employers.

Question. Do you support assigning any support missions exclusively to the Reserve?

Answer. No. The Reserve component will be routinely assigned directed missions as part of ARFORGEN. The first days of any conflict or contingency response pretty much demands an Active component course of action. Support capabilities are needed across both the Active components and Reserve components. The distribution of what capabilities exist in what components will be the result of carefully developed and coordinated plans.

LOW DENSITY/HIGH DEMAND FORCES

Question. In your professional judgment, how would you address the Army's management of low density units such as military police, civil affairs, and others which are in extremely high demand in this new strategic environment?

Answer. The Army is aggressively rebalancing its formations to reduce structure we do not need, mitigate high-demand/low-density shortfalls, and redistributing soldiers to increase the size of the operating force by reducing the Institutional Army. We've identified well over 100,000 of capabilities to rebalance and have already rebalanced over 57,000 of that. I understand that the Army plans to reduce the Institutional Army from over 104,000 in fiscal year 2003 to 80,000 by fiscal year 2013. The Army must, however, maintain Institutional capacity to generate and sustain the force growth. As a result, we've reduced armor, field artillery, and headquarters to grow the capabilities that you've identified: infantry, special forces, civil affairs, psyops, MPs, MI, engineers. Just as importantly, the Army is changing the way it develops leaders and trains soldiers. The Army is building pentathletes who can operate in an ambiguous environment and perform a broader range of tasks in addition to their core competencies. They are much more culturally aware, the Army has emphasized language proficiency, moreover broadening our leader's experience through advanced civilian schooling. The cumulative effects of this are leaders equally adept at non-kinetic solutions.

Question. Are there functional changes among the Active components and Reserve components that you believe should be made?

Answer. The Army must continue to balance the force across all three components and maintain recurrent, assured access to the Reserves. Our Reserve components are now an integral part of our operational force. They are organized in modular formations and will be manned, trained, and equipped to deploy. I believe our Army is better integrated today than we have been for a long time. The Army will continue to grow the modular force across all three components to build strategic depth; provide rotational capability for steady state levels; and bring a campaign quality to our Army that will meet the global strategic demands of the long war.

ARMY READINESS

Question. On January 23, General Schoomaker testified before the House Armed Services Committee that Army readiness was even worse now than it was last June. He said: "I testified in June that I had concerns about the strategic depth of the Army. That was about 7 months ago. Since that time, we have increased stress on the Army. We are using the supplemental funding to reset the Army as fast as we can but, there's latency in delivery. We have it moving very quickly, but the delivery is yet to be taken. So my concerns are increased over what they were in June, in terms of what the pressure is on our force, both in terms of dwell time, in terms of equippage, in terms of time available to train and all the rest of it."

Do you share General Schoomaker's assessment that Army readiness has declined over the past 6 months?

Answer. Yes, I do. The forces in theater are the best trained, best led, and best equipped before crossing the berm to execute the combat missions which they have been assigned. However, ensuring units in theater are properly resourced and trained has come at the expense of those units that are not deployed. To meet the combatant commander's immediate needs we have pooled equipment from across the force. Although absolutely necessary to support soldiers deploying into harm's way, this practice has increased the un-readiness in our next-to-deploy forces and limits our ability to respond to emerging strategic contingencies. The 2007 supplemental will arrest the decline of the readiness in the force that General Schoomaker described. However, since that time operational demand has obviously increased and only serves to accentuate the fact that operational demand still exceeds strategy, which still exceeds resources.

Question. To what degree would the proposed surge exacerbate the readiness problems identified by General Schoomaker?

Answer. Intuitively, this increase in demand will exacerbate the stress on soldiers, leaders, families, and equipment. Any shortfalls for units which are deploying will be met using our "pooling concept" to ensure these units can meet their operational missions. More importantly, to actually achieve the surge force levels we must not only accelerate the deployment of five BCTs, but must also extend five BCTs already in Iraq. Finally, the Army must pull forward the deployment of five future BCTs to replace the BCTs that were accelerated in the rotation plans.

Question. Do you believe the current state of Army readiness is acceptable?

Answer. I am concerned that the operational demand continues to exceed the QDR strategy and available resources. America's Army remains at war and we will be fighting this war for the foreseeable future.

Question. How do you see the war in Iraq and operations in Afghanistan impacting the readiness of Army forces that may be called upon to respond to an attack or other incident or disaster inside the United States?

Answer. It is my understanding that the National Guard Bureau, working with the Governors and State Adjutants General, have identified the baseline equipment requirements so each State's units are capable of meeting their homeland defense and homeland security requirements. Additionally, the Army leadership has request \$20 billion over the program to ensure the Army National Guard is properly equipped to respond to an attack or other incident or disaster inside the United States.

PERMANENT BASES IN IRAQ

Question. Last year's defense authorization and appropriation acts prohibited the use of funds to establish permanent bases in Iraq.

Do you agree with that prohibition, or do you think the United States should reserve the right to seek permanent basing of U.S. forces in Iraq?

Answer. Yes, I agree with the Iraq basing prohibition on permanent facilities.

Question. If you agree, what are your views on the construction of any additional facilities inside Iraq for use by our military forces?

Answer. All current U.S. funded facilities and infrastructure for coalition forces in Iraq are of temporary construction, as directed by CENTCOM policy. It is built to a "good enough" standard which I have consistently instructed all OIF commands and construction agents to implement. The plus up of forces may require the construction of additional facilities. If necessary, these will be temporary in nature and built to the same "good enough" standard.

JOINTNESS OF ARMY-MARINE CORPS OPERATIONS

Question. For the past several years, the Army and Marine Corps have had separate areas of responsibility in Iraq, with Marine forces assigned to the Anbar province.

Do you believe the Army and Marine Corps forces operating in Iraq have an appropriate degree of jointness?

Answer. Unequivocally yes, U.S. and coalition forces are planning and conducting joint operations everyday spanning from the platoon to MNF-I level throughout Iraq. Fundamental to all military operations is a clear delineation of three dimensional boundaries. While the land boundaries of MND-W may appear to specify a Marine only operation, I assure you they operate jointly incorporating multiple USA BCTs, USAF CAS and multiple Service and Interagency Special Operations Forces and Information, Surveillance, and Reconnaissance assets.

END STRENGTH INCREASES

Question. The President recently announced the administration's intent to increase the Army's end strength by 65,000 soldiers. First, the administration intends to make permanent the 30,000 temporary increase in end strength now in effect. Second, the administration intends to add 35,000 new soldiers over the next 5 years, including an additional 6,000 new soldiers in 2007; 7,000 additional new soldiers per year through 2011; and 1,000 additional new soldiers in 2012.

What is your understanding of why the Department is now proposing a permanent increase in end strength that it has resisted in the recent past?

Answer. General Schoomaker asked for permission to grow by 30,000 and Congress supported it. The Army has taken advantage of that temporary authority given in National Defense Authorization Act (NDAA) for Fiscal Year 2005 to grow its Active Force by 30,000—we are currently at 505.4k and are now on a ramp toward 518,000 by the end of fiscal year 2007. The Army has received considerable

support to execute current operations, to reset our forces, to rebalance our components, and to build a modular Army. However, the demand has exceeded both the “supply” posited in the strategy, and the resources provided. We will need continued support to close the gap between requirements and resources, particularly as we maintain an extraordinarily high operational pace while growing the Army. The decision by the President and the Secretary of Defense to grow the ground forces will build the strategic depth and capacity necessary to meet the global demands of the long war.

Question. In your view, are the administration’s proposed end strength increases achievable in the timeframe stated?

Answer. Yes. The Army will get to 518,000 in the Active component by the end of fiscal year 2007. I understand that the Army will be able to meet a recruiting goal of 80,000, and the additional Military Occupation Skill goal of over 3,000. The Army will grow by at least 7,000 each year over the next 5 years on a ramp to achieve an end strength of 547,400 by fiscal year 2012.

Question. Is it your understanding that these increases are consistent with the Army’s requests?

Answer. Yes, this end strength increase is consistent with the Army’s request, particularly with respect to growth in its operating force.

Question. To what extent do you believe the Army will have to rely on stop loss to achieve the increases in end strength?

Answer. The Army does not rely on stop loss to achieve the strength increase. We use targeted stop loss to ensure unit cohesiveness in combat zones. Approximately 1 percent of the total force is affected by stop loss and only for a finite time period. It is my judgment that we’ll need to rely on targeted stop loss at least in the near-term. I understand the Army is currently reviewing its use of stop loss at the request of Secretary Gates. The Department’s initial assessment is that accessions of 1,500 per year will be needed if targeted stop loss is terminated.

Question. Has the Army conducted a comprehensive and forward-looking assessment of its end strength requirements? If so, please describe the assessment, its assumptions, and its conclusions.

Answer. I am confident that the Army has been and will continue to be forward looking in determining its force structure. We have a mature analytical process that’s based on strategic direction from the National Military Strategy, from OSD, and the Joint Staff. It builds toward future requirements at the end of the program and beyond. The process is adaptive, however, to rebalance capabilities to meet operational demands. The underlying assumption was the requirement to fight two major combat operations, nearly simultaneously with one a win—decisively; and the other a swiftly defeat the effort. During QDR it was determined that a force designed to support 70 BCTs was sufficient. This enabled the Army to provide 18–19 BCTs per rotation to meet global demands.

The recent assessment by the Joint Staff that the Army’s enduring requirement to provide up to 23 BCTs to meet strategic, global demand requires continued growth to 76 BCTs and the growth of requisite combat, combat support, and combat service support units to provide operational and strategic flexibility. This capacity is needed to sustain the long war.

Question. What is your understanding of the estimated steady-state annual costs of increasing the Army’s end strength to 547,400 as proposed by the administration?

Answer. My best estimate is \$8.2 billion, which includes both the increased cost to military pay and operations and maintenance.

Question. Historically, increasing operating and personnel costs often crowd out spending for modernization programs.

If confirmed as Chief of Staff, would you be prepared to recommend curtailing or cancelling modernization programs to pay for this increase in end strength?

Answer. If I am confirmed, my role as Chief of Staff will be to provide ready forces to combatant commanders. Those forces must be ready today and in the future. My commitment is to apply my judgment to maintain that balance and provide ready forces consistent with resources provided.

Question. If not, where do you anticipate the additional resources would come from?

Answer. If confirmed, my role as Chief of Staff is to provide ready forces to combatant commanders. Those forces must be ready today and in the future. My commitment is to apply my judgment to maintain that balance and provide ready forces consistent with resources provided.

Question. Do you believe that this end strength increase would continue to be needed even if our deployment of troops to Iraq ends or is significantly reduced, or do you believe that this increase is driven in significant measure by our troop requirements in Iraq?

Answer. I believe that the end strength increase must continue. The future security environment is dangerous and uncertain and the Nation must continue support to the long war; increase commitment to security cooperation; increase deterrence in key areas of the world; reduce the deployment stress on the force; and to fully prepare for future challenges. Both the superior capabilities and the size of the force combine to enable sustained global engagement, deterrence, and response in order to fully protect national interests, prevent aggression, and prevail when called upon. The Army Campaign plan to develop and field capable units and systems is producing the optimum mix of land capabilities for the joint force; it is both affordable and essential for the Nation in order to win the war today and prepare for an uncertain future. Joint ground forces are proving to be the primary military instrument for creating favorable and enduring security conditions in many crisis regions around the world. Presence, or BOG, sends a message of commitment and intent to our potential adversaries. Since 1989, the Army has supported 43 joint operations, many of which require a continuous rotation of forces to support our allies and attain the desired national strategic effects.

The Army is on a very much needed acceleration plan to grow six new BCTs and enabling organizations in our Active component and other key enabling organizations in our Army National Guard and Army Reserve. This will expand our rotational pool to 76 BCTs and more than 200 enabling organizations in the operational force of the total Army. Our goal is to provide a continuous supply of BCTs and key enabling capabilities to meet approved global commitments. Today, the Nation has over 258,000 American soldiers deployed in 89 countries engaged in deterrence operations, theater security cooperation, and joint and multi-national operations in support of national strategic objectives. Joint ground forces bear the heaviest burden fighting simultaneous campaigns, primarily in Afghanistan and Iraq. Over 740,000 Active and Reserve soldiers have served overseas in support of the Nation's war on terrorism. Active component BCTs deploy to combat at a rate of 1 year deployed for 1 year training at home station. This accelerated pace of deployment is 1 full year faster than the Army's surge goal of 1 year deployed for 2 years training at home station and 2 years faster than our sustainable steady state rate. We must reduce this stress on the force by building our strategic depth. The end strength increase, coupled with assured Reserve component access is critical to achieve a steady state that affords predictability and sustainable deployment effort for our soldiers. Completion of the 76 BCT and 200 plus enabling units will provide a sustainable supply of military capabilities that meet the requirements of worldwide Joint Force Commanders now and in the future.

RECRUITING

Question. The ability of the Army to recruit highly qualified young men and women is influenced by many factors and is critical to the success of the All-Volunteer Force.

What do you consider to be the most important elements of successful recruiting for the Army?

Answer. The most important elements for recruiting success are the support of the Nation's citizens and Congress in providing the soldiers and resources required to maintain our ability to guard our freedom against those who desire otherwise. Successful recruiting for the Army requires us to recruit qualified men and women in the numbers required to man our units.

Question. What are the Army's recruiting goals for fiscal years 2007 and 2008? Have these goals been adjusted in light of the increased end strength?

Answer. The recruiting missions for fiscal years 2007 and 2008 will remain 80,000. In fiscal year 2007, we have an additional requirement to support the acceleration of two BCTs. We anticipate this MOS precision requirement will result in a mission over-achievement of 3,000 to 4,000. Given the current planning assumptions and manpower models, these recruiting goals support the increased end strength goal for 2012.

Question. What is your assessment of the Army's ability to reach its Active-Duty recruiting goal in fiscal years 2007 and 2008?

Answer. Recruiting an All-Volunteer Force will continue to be a challenge due to high employment rates, the improving economy, the decreasing qualified market, and the war. Given continued congressional support and funding, however, the Army can achieve the mission.

Question. Is it your understanding that the Army will have to change its enlistment standards to achieve these recruiting goals?

Answer. The ability to meet and maintain the DOD quality marks (90 percent HSDG/60 percent Mental Category I-III/A <4 percent Category IV) in the current

and future recruiting market will be the greater challenge. The Army has and will continue to implement measures to reduce this challenge through programs and policies that lower attrition rates, increase the potential market, and utilize creative incentives. However, the Army will only enlist soldiers who are qualified and volunteer to serve this Nation.

Question. What is your view about the appropriate assignment and overall numbers, if any, of “Category IV” recruits in the Army, i.e., those individuals who score below the 31st percentile on the Armed Forces Qualification Test?

Answer. As with all recruits, the Army assigns “Category IV” recruits to military occupational specialties that they are qualified to fill. The Category IV issue is a question of “trainability”. The Army has and will continue to implement measures to reduce this challenge and prepare all soldiers for future combat and duty requirements. These soldiers, when properly trained and led, are fully capable of supporting and defending the Nation. I do not see the Army exceeding the current DOD standard of 4 percent even though the congressional limit is 20 percent.

Question. What is your understanding of trends in the Army with respect to incidents of recruiter sexual misconduct with potential recruits?

Answer. Any recruiter misconduct is unacceptable. Recruiters are the first to contact this country’s most sacred and precious resource—the men and women who volunteer to serve in the Armed Forces of this great country. Sexual misconduct, with or without consent, is not and never has been acceptable. We will continue to take the appropriate action against those few who believe that they can use their position for personal gain. We have zero tolerance for this type of conduct. The recruiting leadership reviews reports of recruiter conduct and establishes policies to prevent this and other forms of misconduct.

Question. If confirmed, what actions, if any, would you take to prevent such incidents?

Answer. Sexual misconduct in the recruiting process or in the Army is unacceptable—as it is in the rest of American society. For the Army, the consequences can be far more damaging to unit effectiveness; commanders at all levels through values based education and corrective action to enforce the standards. If I am confirmed, I will act to implement policies that decrease the possibilities of this type of misconduct. I support the use of all processes, administrative and judicial, against those who willingly choose to commit these acts of misconduct.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. In the aftermath of the attacks of September 11, 2001, the National Guard and Reserves have experienced their largest and most sustained employment since World War II. Numerous problems have been identified in the past in the planning and procedures for mobilization and demobilization, including inadequate health screening and medical readiness monitoring, antiquated pay systems, limited transitional assistance programs upon demobilization, and medical holdovers.

What is your assessment of advances made in improving mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. Mobilization processes are vastly improved since 2001. The Army has automated its mobilization request process. These efforts are responsible for alerts/notifications that are occurring 90–180 days in advance of mobilization and ensure that individual orders are in the hands of soldiers at least 45 days prior to their mobilization date. The objective of the Army in ARFORGEN FOC is that units will be alerted 1 year in advance of possible mobilization. The recent change in Reserve component mobilization policy will enable unit versus individual mobilization and enhance cohesion. There are now significant efforts that are underway to move a great deal of training from a post-mobilization timeframe to the left of the mobilization date. This will require additional training and resources to be made available to Reserve component units in the year prior to a potential mobilization.

Question. What do you consider to be the most significant enduring changes to the organization and policies affecting the Reserve components aimed at ensuring their readiness for future mobilization requirements?

Answer. A key to success for ensuring our Reserve components are ready for future mobilizations is to provide sufficient equipment and resources, especially in the year prior to mobilization. With Congress’ continued assistance, the Army can provide Reserve component forces that are in a higher state of readiness upon mobilization to execute missions around the world.

INDIVIDUAL READY RESERVE RECALL POLICY

Question. A July 2006 report by the Center for Strategic and International Studies (CSIS) recommended that the Army revitalize its Individual Ready Reserve

(IRR) program by culling existing IRR databases and ensuring that the Army has valid contact information on IRR members who may be recalled to serve.

What has the Army done to clarify the mobilization policy that applies to both officer and enlisted members of the IRR?

Answer. The Army's concept plan for increased IRR readiness centers on the IRR Transformation Plan which was approved for execution in November 2005 by the Secretary of the Army. Programmed initiatives are:

- Changing the culture of the IRR,
- Managing individual expectations, and
- Improving readiness reporting.

Additionally, the execution of a DOD IRR Decision Point Policy mandates the removal, within 2 years, of IRR officers who have fulfilled their Military Service Obligation (MSO) unless they positively elect to remain in the IRR. To date approximately 4,000 or more soldiers have been transferred to the inactive status list and ultimately separated. Culling these programmed initiatives and aligning the IRR with the Army Force Generation Model—Reset/Train; Ready; Available, adds more predictability in mobilization rotations. These model enforces positive contact, refresher training as individual skills degrade, and ensures the deployable readiness of the IW.

Question. What has the Army done to update its IRR mobilization database?

Answer. The Army has two primary transformation initiatives which are data reconciliation and establishing a control IRR population. These initiatives address methods to reset the force by conducting a systematic screening of all data records; determine disposition of individuals; and process for final resolution those soldiers who no longer have further potential for useful military service if mobilized by a recommendation for separation. The Human Resources Command processed over 17,000 existing bad addresses through a credit bureau agency to provide last known addresses of soldiers. Additionally, the Human Resources Command has identified non-mobilization assets that includes soldiers passed over for promotion, with security violations, physical disqualifications, documented hardship, and adverse characterizations of service. Where appropriate, these soldiers are being separated. Through these efforts the current IRR population of 82,000 has been reduced by 25 percent and could potentially be reduced down to approximately 60,000 soldiers.

SUPPORT FOR SEVERELY WOUNDED SOLDIERS

Question. Improved body armor and combat casualty care have enabled many thousands of soldiers to survive wounds received in OIF and OEF. As a result far more soldiers survive with injuries which, in previous conflicts, would have resulted in death.

What are your views on the Army's commitment and responsibility for severely injured members and their families?

Answer. Our Army is committed to and accepts the responsibility for our severely wounded warriors and their families. In April 2004, the Army established the U.S. Army Wounded Warrior (AW2) program. AW2's guiding principle is part of our Army's Warrior Ethos, "I Will Never Leave a Fallen Comrade".

Wounded warriors who are not part of the AW2 program have access to robust resources and an array of support, from our hospitals, the Army Career and Alumni Program, Army Emergency Relief, Veterans Affairs, and a myriad of community support programs. These great American heroes will also benefit from the recently opened Center for the Intrepid at Brooke Army Medical Center, Fort Sam Houston, TX.

Our Army is committed, and I am personally committed, to caring for our severely wounded warriors and their families who have sacrificed selflessly for our Army and our Nation.

Question. What suggestions do you have for improving the Army's support for severely wounded soldiers?

Answer. The AW2 program has grown and will continue to expand as needed to accommodate our wounded warriors, placing more soldier Family Management Specialists in Military Medical Treatment Facilities and Veterans Affairs Medical Centers as the need arises. I believe that the Army must continue to make this a high priority and if I am confirmed, I will work to ensure it is resourced appropriately.

The AW2 program began with 2 soldier family management specialists and now currently has 43 on board. The AW2 program has a soldier family management specialist at 16 Veterans Affairs Medical Centers and at 8 military medical treatment facilities. Two more soldiers family management specialists are planned at other military medical treatment facilities and five more are planned at additional Veterans Affairs Medical Center.

Question. Section 588 of the NDAA for Fiscal Year 2005 contains a provision intended to ensure that other than appropriate medical review and physical disability evaluation, there should be no barrier in policy or law to an opportunity for a highly motivated member to return to Active-Duty following rehabilitation from injuries incurred in military service.

How would you assess the Army's compliance with this provision to date?

Answer. Our Army supports the provisions of NDAA 2005 regarding allowing our highly motivated wounded warriors to return to serve on Active-Duty.

We recognize the value of keeping the expertise and experience of our severely wounded warriors in our Army. We have made business process and regulatory changes to assist these highly motivated warriors to stay in the fight. The first priority for our severely wounded warriors and their families is their recovery and rehabilitation. After treatment, our warriors are afforded the opportunity to remain on Active-Duty, should they so desire.

The Army develops a 5-year plan that encompasses all aspects of the severely wounded warrior's life and career such as: location of assignment, professional schools, duties, and health care access for their particular needs—focused on a professionally and personally fulfilling career.

Question. If confirmed, would you continue to support the efforts of members who wish to return to Active-Duty following recovery and rehabilitation from injuries received in military service?

Answer. Support for our wounded warriors is and would remain a top priority. We take care of our wounded heroes. The AW2 program's vision is that our wounded warriors and their families become self sufficient, contributing members of our communities; living and espousing the Warrior Ethos, knowing our Army and Nation remembers.

MENTAL HEALTH ASSESSMENTS IN IRAQ

Question. The Army's mental health assessment teams have completed three comprehensive assessments of the immediate effects of combat on mental health conditions of U.S. soldiers in the Iraq theater. The most recent study, MHAT III, found that overall levels of combat stressors are increasing. In sum, increasing numbers of troops are returning with post-traumatic stress disorder (PTSD), depression, and other mental health issues. According to the Army's MHAT III report, the Armed Forces Medical Examiner also reported 22 suicides by Army soldiers in Iraq in calendar year 2005—a rate nearly twice that reported for the previous year.

What do you see as the greatest challenges being faced by the Army in terms of identifying and meeting mental health needs of soldiers and their families?

Answer. I understand that the Army has implemented most of the recommendations of the MHAT reports, including the further redistribution of mental health staff to provide uniform coverage and the further development of suicide prevention efforts in theater. However several challenges remain. We need to ensure access to care, and reduce stigma associated with behavioral health treatment. Availability of mental health professionals remains a national problem and this shortage effects the Army's ability to recruit and retain these professionals and it effects TRICARE's ability to expand networks of civilian mental health providers. Training our soldiers, leaders, and families on the long-term signs of stress-related behavioral disorders is the best way to combat stigma and ensure that soldiers who need help seek help. If confirmed, I would fully support the development of innovative training programs for soldiers, families, and leaders that address this important issue.

Question. If confirmed, what specific actions would you take to ensure the adequacy of mental health resources both in the theater and in CONUS for U.S. soldiers and their families?

Answer. If confirmed, I would continue to support the existing programs developed by the Army and DOD. The Army Deputy Chief of Staff for Personnel (DCSPER) and The Army Surgeon General (TSG) share responsibility for the prevention and screening for PTSD for both Active component and Reserve component soldiers. The DCSPER manages the Deployment Cycle Support Program aimed at soldiers and family members and TSG has policy oversight of the Combat and Operational Stress Control program aimed at soldiers serving in the global war on terror. TSG also has command responsibility for behavioral health services at Army medical treatment facilities around the world providing treatment for all Army beneficiaries. I also will continue to support the continued development and expansion of new programs such as Battlemind training and the Respect.MIL program. Battlemind provides scenario-based training for soldiers and families in all phases of the deployment cycle. Respect.MIL trains primary care providers to diagnose PTSD and other combat stress problems and manage treatment of those disorders

in the primary care clinic, improving access and further reducing the stigma associated with seeking behavioral health care.

Question. According to the MHAT III study, fewer soldiers report that they received sufficient training to identify other soldiers at risk for suicide.

If confirmed, what actions will you take to reassess the adequacy of suicide prevention programs within the Army?

Answer. An updated suicide prevention program has already been implemented, which has numerous initiatives. The DCSPER is revising suicide prevention training and planning in direct response to this MHAT finding. There will be specific education provided during initial entry training and throughout the soldier's tenure in the Army. If confirmed, I will continue to support these initiatives. One of the major emphases of the revised training is the importance of taking care of one's buddies. Small unit leaders must encourage help-seeking behaviors, recognize warning signs of suicidal behavior, and refer for care if needed. The most common motives for suicide in our soldiers are difficulties in intimate relationships, and occupational/legal/financial difficulties. Leaders must consider a referral to the chaplains, combat stress control teams or other behavioral health specialists anytime they see a soldier struggling with these problems.

Question. Based on your experience in theater, what additional resources do you think are necessary to prevent suicides in the Army?

Answer. The Army's senior leaders are already behind the push to decrease stigma and improve access to behavioral health care. However, there is no simple solution to decreasing the suicide rate. Army's behavioral health providers are very busy, but they rely on soldiers seeking help or the soldier's buddies or chain of command recognizing symptoms and intervening to get the soldier help. Our health care providers are supplemented by chaplains, counselors, and TRICARE network providers. The Army needs to keep doing everything possible to recruit and retain military behavioral healthcare providers and seeking additional authorities to enhance retention when necessary. If confirmed, I would also encourage civilian providers to join the TRICARE network to demonstrate their support for the sacrifices our soldiers and families make on behalf of the Nation.

OFFICER SHORTAGES

Question. A report issued by the Congressional Research Service (CRS) in July 2006 found that the Army projects an officer shortage of nearly 3,000 in fiscal year 2007, with the most acute shortfalls in the grades of captain and major with 11 to 17 years of service. Unless corrective action is taken, CRS found that shortages will persist through 2013 unless accessions are increased and retention improves.

What is your understanding of the reasons for the current shortfall, and what steps is the Army taking to meet this mid-career officer shortfall?

Answer. The current shortfall of officers is a result of the rapid increase in force structure (modularity and end strength increases). Since 2002, the Army has grown over 8,000 officer positions; roughly 88 percent of this growth is in the ranks of senior captain and major. Since it takes 10 years to grow/develop a major, to grow the officer force we need to retain more of our "best and brightest" officers and increase our officer accessions.

Question. If confirmed, what actions would you take to ensure adequate numbers of highly qualified captains and majors are serving on Active-Duty over the next 10 years?

Answer. The Army is continuing to explore other options for retaining more of our best officers. Some of these options include offering captains who are completing their initial Active-Duty service an officer critical skills retention bonus of \$20,000 in exchange of 4-years of Active-Duty service. The Army is also preparing policy to implement provisions in existing law that will enable lieutenant colonels and colonels to serve an additional 5-years past their Mandatory Retirement Date (MRD) as long as they haven't reach age 62. The Army expects this policy to be published within the next couple of months and is confident that it will be able to meet future manning needs.

MEDICAL PERSONNEL RECRUITING AND RETENTION

Question. The Army is facing significant shortages in critically needed medical personnel in both Active components and Reserve components. The committee is concerned that growing medical support requirements, caused by the stand-up of BCTs, potential growth of the Army, and surge requirements in theater, will compound the already serious challenges faced in recruitment and retention of medical, dental, nurse, and behavioral health personnel. Moreover, the committee under-

stands that the Army continues to direct conversion of military medical billets to civilian or contractor billets.

Will you assure the committee that, if confirmed, you will undertake a comprehensive review of the medical support requirements for the Army, incorporating all new requirements for 2008 and beyond?

Answer. I fully support a quality medical force that can meet the Army's medical readiness requirements and can maintain our commitment of quality health care for Army families and retirees. If confirmed, I will support a comprehensive assessment of current Army manpower strategies on medical military/civilian conversion to ensure these plans remain relevant to bolstering Army operational readiness, and further, are in sync with plans to grow Army end strength.

Question. What policy and/or legislative initiatives do you think are necessary in order to ensure that the Army can continue to fulfill medical support requirements as its mission and end-strength grow?

Answer. Critical to our success are adequate and appropriate funding for necessary recruitment programs such as Active and Reserve Health Professions Loan Repayment Program, Health Professions Scholarship Program, Specialized Training Assistance Program, Medical and Dental School Stipend Program, and the other Accession Bonus programs all of which we have current legislative authority. As we develop Army wide initiatives to retain our quality and battle hardened soldiers, we must ensure that the Army Medical Department requirements are met. Elimination or modification of the 8-year MSO, replaced with a more flexible MSO scale, will assist us in the recruiting efforts of qualified medical professionals. We need a comprehensive review of the Medical Special Pays and should consider restructuring our current system to include all health care providers. This will be fundamental toward eliminating the shortages experienced in our Dental and Nurse Corps. Legislative initiatives which provide greater flexibility to transfer between Army components must be explored and enhanced. This is especially true with regard to the currently required scrolling process. The current process has created impediments to the rapid accession of health care professionals into all components of our force. Our civilian workforce has become increasingly important as the medical force is reshaped. Adequate and appropriate funding is needed to support the backfill of converted military billets.

NATIONAL SECURITY PERSONNEL SYSTEM

Question. Congress enacted broad changes in the DOD civilian personnel system in 2004 to provide the Department with more flexible tools for the management of its civilian workforce in support of our national security. Although the Department is presently enjoined from implementation of a new labor-relations system, the Department is planning to move ahead in the implementation of a new pay-for-performance system for its non-union employees.

Based on your experience, what are the critical factors for successful implementation of a total transformation of workforce policies and rules, including performance-based pay?

Answer. Among the factors I consider critical are leadership commitment and support and an educated and knowledgeable workforce. The Army must focus on a pay for performance system that is consistent, fair, equitable, and recognizes our top performers. The Army has successfully completed the first performance management payout which has demonstrated a clear linkage between employee performance and organizational goals. The Army's approach includes an incremental deployment schedule that allows supervisors and employees to be adequately trained and the application of lessons learned from earlier workforce conversions. If I am confirmed, I am committed to ensuring that the Army workforce is trained and ready for this new system.

Question. If confirmed, how would you monitor the acceptance of the National Security Personnel System (NSPS) and what role would you expect to play in managing the NSPS implementation in the Army?

Answer. I strongly support the need for transformation in civilian management—particularly pay for performance—and will set that tone for the leadership in the Army as we implement NSPS. The Army has established an NSPS Program Management Office that recommends Army NSPS policy, provides guidance, monitors implementation, and will keep me informed of progress and any issues that require my attention. In addition to the inclusion of NSPS-specific questions in Army's annual workforce survey, on-site evaluations to assess program effectiveness are being performed which will provide additional implementation feedback and lessons learned. Finally, Army is leading the way in the monitoring of NSPS DOD-wide. Our Civilian Personnel Evaluation Agency has been designated by DOD to evaluate

the NSPS performance management system for deployment to the entire Department.

MANAGEMENT AND DEVELOPMENT OF THE SENIOR EXECUTIVE SERVICE

Question. The transformation of the Armed Forces has brought with it an increasing realization of the importance of efficient and forward thinking management of senior executives.

What is your vision for the management and development of the Army senior executive workforce, especially in the critically important areas of acquisition, financial management, and the scientific and technical fields?

Answer. I support the Secretary of the Army's approach to Senior Executive Service (SES) management within the Army and share his vision of a senior civilian workforce that possesses a broad background of experiences that will have prepared them to move between positions to meet the continually changing mission needs of the Army. I recognize the value of our senior workforce, and if I am confirmed, I will be committed to providing for the professional development and management of civilian executives in ways similar to the management of Army General Officer Corps. If I am confirmed, I would support the Secretary's goals to strengthen the senior executive corps contributions to leadership team and to promote and sustain high morale and esprit de corps within our civilian workforce.

SEXUAL ASSAULT

Question. On February 25, 2004, the Senate Armed Services Committee Subcommittee on Personnel conducted a hearing on policies and programs of the DOD for preventing and responding to incidents of sexual assault in the Armed Forces at which the Service Vice Chiefs endorsed a "zero tolerance" standard. Subsequently, in response to congressional direction, the Department developed a comprehensive set of policies and procedures aimed at improving prevention of and response to incidents of sexual assaults, including appropriate resources and care for victims of sexual assault.

What is your understanding of the practices currently in use in the Army to ensure awareness of and tracking of the disposition of reported sexual assaults?

Answer. Since 2004, the Army has implemented a comprehensive Sexual Assault Prevention and Response Program. A key element of this program is the awareness training developed and taught at every level of the Army's institutional training—from initial entry to the Army War College. Additionally, unit refresher training is an annual requirement for all Army units. Also, as part of this program, the Army collects and analyzes selected sexual assault incident data, which is provided for quarterly and annual reports to DOD for consolidation into the Secretary of Defense annual report to Congress.

Question. What progress has been made in ensuring that adequate numbers of sexual assault victim advocates are available in Army units worldwide?

Answer. The Army has taken significant steps to improve the assistance to victims of all sexual assaults, with enhanced recognition of the special circumstances that apply to deployments. A key element of the Army's Sexual Assault Prevention and Response Program is the victim advocacy component which is led by Sexual Assault Response Coordinators (SARCs) at every Army installation. These SARCs are supported by a cadre of full-time, professional Victim Advocates or appointed Unit Victim Advocates (UVA) who interact directly with victims of sexual assault.

Additionally, Deployable SARCs (DSARCs) and UVA provide advocacy services in a deployed environment. DSARCs are soldiers trained and responsible for coordinating the sexual assault prevention and response program (as a collateral duty) in a specified area of a deployed theater. Army policy requires one deployable SARC at each brigade level unit and higher echelon. UVA are soldiers trained to provide victim advocacy as a collateral duty while deployed. Army policy requires two UVA for each battalion sized unit.

Question. If confirmed, what oversight role would you expect to play?

Answer. If confirmed, I will ensure compliance with established policies and procedures at all levels of command, including those in the Army National Guard and U.S. Army Reserves.

RELIGIOUS PRACTICES IN THE ARMY

Question. What is your assessment of policies within the Army aimed at ensuring religious tolerance and respect?

Answer. I believe that Army regulations provide commanders and other leaders ample guidance regarding the free exercise of religion, religious tolerance, and respect in the Army. AR 600-20, Army Command policy; AR 165-1, Chaplain Activi-

ties in the United States Army; and DOD directive 1300.17, Accommodation of Religious Practices Within the Military Services, provide detailed guidance on the important responsibilities of commanders and leaders in this regard. It is my understanding that these policies are consistent with the Constitution and I believe they foster religious tolerance and respect within our Army.

WOMEN IN COMBAT

Question. Section 541 of the NDAA for Fiscal Year 2006 required the Secretary of Defense to report to Congress on his review of the current and future implementation of the policy regarding assignment of women in combat. In conducting the review, the Secretary of Defense is directed to closely examine Army unit modularization efforts and associated personnel assignment policies to ensure their compliance with the DOD policy on women in combat that has been in effect since 1994.

What is your view of the appropriate combat role for female soldiers on the modern battlefield?

Answer. The study requested by Congress and underway within the DOD will help the Department understand the implications for, and feasibility of, current policies regarding women in combat, particularly in view of the Army's transformation to a modular force and the irregular, non-linear nature of battlefields associated with today's conflicts.

It is my understanding that the Army's transformation to modular units is expected to be based on the current policy concerning the assignment of women. Women have and will continue to be an integral part of our Army team, performing exceptionally well in all specialties and positions open to them. Women make up about 14 percent of the Active Army, 23 percent of the Army Reserve, and 13 percent of the Army National Guard. Approximately 10 percent of the forces deployed in support of the global war on terrorism are women soldiers. Today, almost 13,000 women soldiers—10 percent of the force—are serving in Iraq and Afghanistan.

These women, like their male counterparts and the Army's civilians, are serving honorably, selflessly, and courageously. If confirmed, I would ensure that the Army complies with laws and regulations in this matter.

Question. In your opinion, is the current and planned future Army personnel assignment policy for women consistent with the DOD ground combat exclusion policy in effect since October 1994?

Answer. The Army completed a thorough review of our policy late in 2005. The Secretary of the Army determined that our policy is consistent with that of DOD. I agree with the Secretary's assessment.

Question. How do you anticipate you will participate in the review of the policy required by section 541?

Answer. The OSD has undertaken to complete the comprehensive review requests by this committee and Congress. It is an important study of complex issues critical to the Department. The Army will support the OSD to complete this review. The Army, DOD, and Congress must work closely together on this issue. If confirmed, I will endeavor to provide the Secretary with cogent advice regarding implementation of this policy. If in the future the Army determines that there is a need to seek a change to the policy, I will, if confirmed, comply fully with all notification requirements in title 10, U.S.C.

FOREIGN LANGUAGE TRANSFORMATION ROADMAP

Question. A Foreign Language Transformation Roadmap announced by the Department on March 30, 2005, directed a series of actions aimed at transforming the Department's foreign language capabilities, to include revision of policy and doctrine, building a capabilities based requirements process, and enhancing foreign language capability for both military and civilian personnel.

What is your understanding of steps being taken within the Army to achieve the goals of the Defense Language Transformation roadmap?

Answer. The Army is actively engaged in all 43 tasks identified in the Defense Language Transformation Roadmap and has undertaken many initiatives to achieve the roadmap goals of: 1) Create Foundational Language and Regional Area Expertise; 2) Create the Capacity to Surge; 3) Establish a Cadre of Language Professionals and Address Language Requirements at Lower Skill Levels; and 4) Establish a Process to Track the Accession and Career Progression of Military Personnel with Language Skill and Foreign Area Officers.

Question. What is your assessment of an appropriate time frame within which results can be realized in this critical area?

Answer. The Army is already achieving results as envisioned in the Defense Language Transformation Roadmap. Pinpointing the time frame when we will fully realize all of the goals of the roadmap is difficult to do with precision, since language training takes time, and many of the roadmap initiatives are dependent on availability of adequate resources. The Army is improving the number, quality, and management of its foreign language speakers, and actively pursuing programs which provide all soldiers appropriate linguistic skills to support current operations. Much has been accomplished but there is more to be done—within available resources and operational requirements, we are taking the appropriate steps to achieve the results envisioned in the Defense Language Transformation Roadmap in the shortest time possible.

MILITARY QUALITY OF LIFE

Question. In May 2004 the Department published its first Quadrennial Quality of Life Review, which articulated a compact with military families on key quality of life factors, such as family support, child care, education, health care, and morale, welfare, and recreation services.

How do you perceive the relationship between quality of life and your own top priorities for recruitment, retention, and readiness of Army personnel?

Answer. Strengthening the mental, physical, spiritual, and material condition of our soldiers, civilians, and their families enables them to achieve their individual goals while balancing the demanding institutional needs of today's expeditionary Army. The well-being of our people and their quality of life are my top priorities.

Army Well-Being and Quality of Life programs are extensive. They range from pay and compensation, medical, and morale, welfare, and recreation (MWR) to housing and family readiness programs. Our recruiting efforts must be competitive with private industry. Our ability to reach out and gain access to our young men and women is critical. The retention of each soldier is directly related to the value of their achievements and maintaining the vital support of their families. As we bring our soldiers and their units to their peak readiness, we must enable the readiness of our Army families.

Question. If confirmed, what steps would you take to assess the adequacy of family support programs for both the Active components and Reserve components?

Answer. The adequacy of family support programs is assessed annually by Installation Status Report Services rating. In addition, the Active component accreditation program ensures that Active component centers worldwide maintain the level of quality performance specified in the MWR program standards set by the MWR Board of Directors. The family support programs are also assessed using customer feedback at the installation level and through the MWR Needs and Leisure Survey.

The Multi-Component Family Support Network, a seamless array of family support services accessed by the soldier and family—Active, Guard, and Reserve, regardless of their geographical location, will also be significant means of collecting customer feedback and improving support programs.

In addition, each year, the Active Army, Army National Guard, and Army Reserve will assess requirements for global war on terror funding and request the additional funds as necessary.

Question. What actions do you think are necessary in order to support best practices for support of family members of deployed forces, and would you attempt to replicate such practices throughout the Army?

Answer. There are many programs and support systems that I categorize as best practices. Deployment Cycle Support (DCS) is a comprehensive process that ensures soldiers, DA civilians, and their families are better prepared and sustained through the deployment cycle. It provides a means to identify soldiers, DA civilians, and families who may need assistance with the challenges inherent with extended deployments. The goal of the DCS process is to facilitate soldier, DA civilian, and family well-being throughout the deployment cycle. Services for DA civilians and families are integrated in every stage of the process, and they are highly encouraged to take advantage of resources provided.

The Army Information Line is an integrated system consisting of a toll-free phone service, a dynamic Web presence, and on-line publications. This system provides accurate information, useful resources, and problem resolution tailored for Army soldiers and their families to include the extended families of our soldiers. This service includes a Web presence (Our Survivors) uniquely configured to support the survivors of our fallen soldiers. An experienced staff answers the Army information line and provides responses to inquiries received through the Army Families Online Web site (www.armyfamiliesonline.org).

A great example is the Strong Bonds Program administered by our chaplains. The Chaplain Corps gives our soldiers and families the skills needed to thrive in Army life by conducting a series of marriage strengthening retreats and training events. Recognizing that even our single soldiers are in or are beginning relationships, in fiscal year 2005 this program was expanded to provide training to single soldiers in how to build life-long relationships. In fiscal year 2006 the chaplains led over 600 of these events attended by nearly 25,000 soldiers and family members in all Army components. This and other family support programs represent a solid network that allows our soldiers to build great lives and effectively serve their country through full careers.

Question. In your view, what progress has been made, and what actions need to be taken in the Army to provide increased employment opportunities for military spouses?

Answer. The Army continues to work with the Nation's business community to support spouse employment opportunities. Since 2003, the Army has signed statements of support with 18 Fortune 500 companies. These firms pledged their best efforts to increase employment opportunities for our spouses by connecting them to new and existing jobs, portable jobs, and other methods of pursuing lifetime career goals. During the past 2 years, these companies have employed over 11,000 Army spouses.

RESOURCE ALLOCATION AND ACQUISITION PROCESSES

Question. Are you familiar with the Army's resource allocation and acquisition processes?

Answer. Yes, I have familiarity with and played a role in the PPBE process during my tenure as the Vice Chief of Staff of the Army.

Question. What recommendations, if any, do you have for improving those processes?

Answer. QDR 06 continued us on the path of linking resources to joint capabilities. The Army provides a variety of capabilities to joint forces, and I look forward to working with OSD and the Joint Staff to continue improvement of management by capability portfolio as noted in the QDR 2006 report.

Question. Do you see a need for any change in the role played by the Army Chief of Staff in the resource allocation and acquisition processes?

Answer. If I am confirmed, my role as CSA is to recommend balanced allocation of resources to provide ready forces today and for future challenges. While specific processes within OSD continue to evolve, my role in focusing on readiness of forces remains constant.

ARMY SCIENCE AND TECHNOLOGY

Question. The Army invests in science and technology (S&T) programs to develop advanced capabilities to support current operations and future Army systems. The Army's budget request has included a declining level of investment in S&T programs over each of the last 4 fiscal years.

What do you see as the role that Army S&T programs will play in continuing to develop capabilities for current and future Army systems?

Answer. The Army's S&T program is the investment that the Army makes in our future soldiers. This program must be adaptable and responsive to our soldiers in the field. The Army's S&T strategy should be to pursue technologies that will enable the future force while simultaneously seizing opportunities to enhance the current force.

Question. Do you believe that the Army should increase its level of investment in S&T programs?

Answer. The Army's planned S&T investments will mature and demonstrate the key technologies needed to give our soldiers the best possible equipment now and in the future. Given the current environment and priorities, I believe our level of investment is appropriate.

Question. What metrics will you use to judge the value of Army S&T programs?

Answer. The real value of S&T programs is measured in the increased capability of the force achieved when new technologies are inserted into systems and equipment. While programs are still in S&T, we use the standard Technology Readiness Levels (TRLs) to determine when technologies are mature enough to transition.

Question. What role should Army laboratories play in supporting current operations and in developing new capabilities to support Army missions?

Answer. From my vantage point, I believe that the S&T community can support current operations in three ways. First, soldiers are benefiting today from technologies that emerged from past investments. Second, the Army should exploit tran-

sition opportunities by accelerating mature technologies from ongoing S&T efforts. Third, we should also seek to leverage the expertise of our scientists and engineers to develop solutions to unforeseen problems encountered during current operations. To enhance the current force, Army S&T should provide limited quantities of advanced technology prototypes to our soldiers deployed to the current fight.

Question. How will you ensure that weapon systems and other technologies that are fielded by the Army are adequately operationally tested?

Answer. The Army should not field systems that are not safety-certified nor rigorously tested in an operational environment. Current systems undergo an operational evaluation conducted by an independent organization that reports to the Army Chief of Staff. These evaluations ensure first that every system fielded to our soldiers is safe to use, and then provide an assessment of system effectiveness, suitability, and survivability. If I am confirmed, I would work with the Army testing community to ensure vigorous compliance with applicable testing standards, including those set forth in Army Regulation, AR 70-1, Army Acquisition Policy, and DOD Directive 5000.1, The Defense Acquisition System. I would also work closely with the Army acquisition workforce, to ensure weapons systems are tested and determined to be suitable, feasible, safe, and validated to meet the current threat.

Question. Are you satisfied with the acquisition community's ability to address the operational needs of deployed forces?

Answer. Yes, from my experience it takes more than the acquisition community to quickly respond to our soldiers' needs in a wartime environment. The Army is addressing those needs through a process of requirements validation, funding allocation, and acquisition activities. The Army has streamlined the acquisition process by reducing the time required to validate requirements, approve funds, and develop solutions to meet those requirements. This change in culture has required all facets of the acquisition process—requirements, resources, development, test, production, and fieldings—to reduce the time necessary to complete their tasks. For example, the Army has addressed our soldiers' need for better Individual Body Armor capability. It was quickly validated as a requirement and prioritized for funding to ensure successful systems development and procurement. To date, the Army has fielded seven versions of the Individual Body Armor Suite, each better than the last.

Question. What recommendations would you have to speed the ability for the Army to provide operational forces with the specific systems and other capabilities that they request?

Answer. If I am confirmed, I will continuously monitor the process from requirements generation, funding, and through the acquisition process, to provide the soldiers what they need as quickly as we can in a safe, feasible, suitable, manner within acceptable risk tolerance. The Army needs to closely examine the emerging threats and operational requirements of soldiers in theater. I would continue the Army's commitment to providing our troops the best equipment possible and work with industry partners to pursue research development and procurement of the most advanced capabilities available. Finally, I would ensure that the Army does not purchase or field any system that is not proven, tested, and validated as operationally ready and safe.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Chief of Staff, Army?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted com-

mittee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR DANIEL K. AKAKA

CONTRACT SECURITY FORCES

1. Senator AKAKA. General Casey, if confirmed as the Army Chief of Staff, one of your responsibilities will be to provide independent military advice to the Secretary of Defense, the President, and Congress. As such, I am interested in your views regarding reliance on contractor security forces in Baghdad. When General Petraeus testified before this committee last week, he indicated that he thought the surge troop levels would be sufficient even though they are significantly less than the levels recommended by the Army's counterinsurgency doctrine. General Petraeus reasoned that because there are tens of thousands of civilian contract security forces protecting key sites in Baghdad, the Multi-National Force-Iraq and the Iraqi government would not have to detail resources to protect these sites. Thus, the addition of all five U.S. brigades under orders to reinforce Baghdad and the Iraqi Security Forces either in Baghdad or headed to the city should provide sufficient military forces to achieve our objective of securing Baghdad. Since you are the General who is probably most familiar with the current situation in Baghdad, can you tell us your assessment of how much we can rely on contract security forces to support our new mission of making Baghdad more secure? In your answer, please address the level of operational and tactical control we have on these contractors, as well as how well-equipped and well-trained they are.

General CASEY. We rely on coalition forces and Iraqi security forces to make Baghdad more secure. They are the ones patrolling the neighborhoods, interacting with the population, manning the checkpoints, and responding to crises. Contract security personnel support this effort by protecting certain fixed sites and key personnel. Their service is important in the overall effort. They are trained and equipped by the respective contractor firms. Control is exercised by their supervisory structure which is guided by the tenets of the agreed upon contract. My impression has been that they are prepared for their tasks and that they perform well.

2. Senator AKAKA. General Casey, what are the rules of engagement for the contract security forces relative to insurgents?

General CASEY. [Deleted.]

3. Senator AKAKA. General Casey, how likely are these contract security forces to become primary targets for the insurgency as we implement the President's strategy?

General CASEY. I do not believe it is likely that, as we implement the President's strategy, contract security forces will become primary targets for the insurgency. Ongoing counterinsurgency operations in Baghdad and elsewhere in Iraq are designed to reduce levels of violence. Over time, I would anticipate that we will see gradually improving conditions with reductions in sectarian violence and attacks on coalition forces. Contract security personnel accept certain risks inherent in their responsibilities but they are no greater than those run by members of the coalition forces or the Iraqi security forces. They are trained and equipped for their missions where they apply risk mitigation based on their experience and their understanding of the complex environment. I believe they will continue to face dangerous situations and periodic attacks, but I do not see them becoming the primary target of the insurgents.

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 16, 2007.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment as the Chief of Staff, United States Army, and appointment to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., sections 3033 and 601:

To be General

George W. Casey, Jr., 1204.

[The biographical sketch of GEN George W. Casey, Jr., USA, which was transmitted to the committee at the time the nomination was referred, follows:]

RÉSUMÉ OF SERVICE CAREER OF GEN GEORGE W. CASEY, JR., USA

Source of commissioned service: ROTC.

Military schools attended:

Infantry Officer Basic and Advanced Course
Armed Forces Staff College
Senior Service College Fellowship—The Atlantic Council

Educational degrees:

Georgetown University—BS—International Relations
University of Denver—MA—International Relations

Foreign language(s): None recorded.

Promotions:

	Dates of Appointment
2LT	21 Oct. 70
1LT	21 Oct. 71
CPT	21 Oct. 74
MAJ	6 Sep. 80
LTC	1 Aug. 85
COL	1 May 91
BG	1 Jul. 96
MG	1 Sep. 99
LTG	31 Oct. 01
GEN	1 Dec. 03

Major duty assignments:

From	To	Assignment
Apr. 71	Sep. 72 ...	Mortar Platoon Leader, later Liaison Officer, Headquarters and Headquarters Company, 2d Battalion, 509th Infantry (Airborne), 8th Infantry Division, United States Army Europe, Germany.
Sep. 72	Jun. 73 ...	Platoon Leader, A Company, 2d Battalion 509th Infantry (Airborne), 8th Infantry Division, United States Army Europe, Germany.
Jun. 73	Oct. 74 ...	Mortar Platoon Leader, later Executive Officer, A Company, 1st Battalion, 509th Infantry (Airborne), United States Army Southern European Task Force, Italy.
Oct. 74	Dec. 75 ...	Student, Ranger School and Infantry Officer Advanced Course, United States Army Infantry School, Fort Benning, GA.
Dec. 75	Apr. 77 ...	Assistant S-4 (Logistics), later S-4, 1st Battalion, 11th Infantry, 4th Infantry Division (Mechanized), Fort Carson, CO.
Apr. 77	Apr. 78 ...	Commander, C Company, 1st Battalion, 11th Infantry, 4th Infantry Division (Mechanized), Fort Carson, CO.
Apr. 78	Dec. 78 ...	Commander, Combat Support Company, 1st Battalion, 11th Infantry Division (Mechanized), Fort Carson, CO.
Dec. 78	May 80 ...	Student, International Studies, University of Denver, Denver, CO.
Jan. 80	Jan. 81 ...	Student, Armed Forces Staff College, Norfolk, VA.

From	To	Assignment
Feb. 81	Feb. 82 ...	Department of Defense Military Observer, United States Military Observer Group, United Nations Truce Supervision Organization, Jerusalem.
Feb. 82	Feb. 84 ...	S-3 (Operations), later Executive Officer, 1st Battalion, 10th Infantry, 4th Infantry Division (Mechanized), Fort Carson, CO.
Feb. 84	May 85 ...	Secretary of the General Staff, 4th Infantry Division (Mechanized), Fort Carson, CO.
Jul. 85	Jul. 87 ...	Commander, 1st Battalion, 10th Infantry, 4th Infantry Division (Mechanized), Fort Carson, CO.
Aug. 87	Jul. 88	Student, United States Army Senior Service College Fellowship, The Atlantic Council, Washington, DC.
Jul. 88	Dec. 89 ...	Congressional Program Coordinator, Office of the Chief of Legislative Liaison, Washington, DC.
Dec. 89	Jun. 91 ...	Special Assistant to the Chief of Staff, Army, Washington, DC.
Aug. 91	May 93 ...	Chief of Staff, 1st Cavalry Division, Fort Hood, TX.
May 93	Mar. 95 ...	Commander, 3d Brigade, 1st Cavalry Division, Fort Hood, TX.
Mar. 95	Jul. 96	Assistant Chief of Staff, G-3 (Operations), later Chief of Staff, V Corps, United States Army, Europe and Seventh Army, Germany and Operation Joint Endeavor, Hungary.
Jul. 96	Aug. 97 ..	Assistant Division Commander (Maneuver), later Assistant Division Commander (Support), 1st Armored Division, United States Army, Europe and Seventh Army, Germany and Task Force Eagle, Operation Joint Endeavor Bosnia-Herzegovina.
Aug. 97	Jun. 99 ...	Deputy Director for Politico-Military Affairs, J-5, The Joint Staff, Washington, DC.
Jul. 99	Jul. 01	Commanding General, 1st Armored Division, United States Army Europe and Seventh Army, Germany.
Jul. 01	Oct. 01 ...	Commander, Joint Warfighting Center/Director, Joint Training, J-7, United States Joint Forces Command, Suffolk, VA.
Oct. 01	Oct. 03 ...	Director, Strategic Plans and Policy, J-5, later Director, The Joint Staff, Washington, DC.
Oct. 03	Jun. 04 ...	Vice Chief of Staff, United States Army, Washington, DC.

Summary of joint assignments:

	Dates	Grade
Department of Defense Military Observer, United States Military Observer Group, United Nations Truce Supervision Organization, Jerusalem (no joint credit)	Feb. 81–Feb. 82 ...	Major
Deputy Director for Politico-Military Affairs J-5, The Joint Staff, Washington, DC	Aug. 97–Jun. 99 ...	Brigadier General
Commander, Joint Warfighting Center/Director Joint Training, J-7, United States Joint Forces Command, Suffolk, VA (no joint credit)	Jul. 01–Oct. 01	Major General
Director, Strategic Plans and Policy, J-5, The Joint Staff, Washington, DC	Oct. 01–Jan. 03	Lieutenant General
Director, The Joint Staff, Washington, DC	Jan. 03–Oct. 03	Lieutenant General
Commander, Multi-National Force-Iraq, Operation Iraqi Freedom, Iraq	Jul. 04–Present	General

U.S. decorations and badges:

Defense Distinguished Service Medal (with Oak Leaf Cluster)
 Distinguished Service Medal (with Oak Leaf Cluster)
 Legion of Merit (with two Oak Leaf Clusters)
 Defense Meritorious Service Medal
 Meritorious Service Medal
 Army Commendation Medal (with Oak Leaf Cluster)
 Army Achievement Medal (with Oak Leaf Cluster)
 Expert Infantryman Badge
 Master Parachutist Badge
 Parachutist Badge
 Ranger Tab
 Joint Chiefs of Staff Identification Badge
 Army Staff Identification Badge

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by GEN George W. Casey, Jr., USA, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

George W. Casey, Jr.

2. **Position to which nominated:**

Chief of Staff, U.S. Army.

3. **Date of nomination:**

January 16, 2007.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

22/07/48, Sendai, Japan.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Sheila Lynch Casey.

7. **Names and ages of children:**

Sean Patrick Casey, 35; Ryan Michael Casey, 34.

8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

There are no positions other than those listed in the service record extract provided to the committee by the executive branch.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational, or other institution.

None.

10. **Memberships:** List all memberships and offices held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Association of the United States Army.

11. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

There are no honors or awards other than those listed on the service record extract provided to the committee by the executive branch.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

I do.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

I do.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

GEORGE W. CASEY, JR.

This 15th day of January, 2007.

[The nomination of GEN George W. Casey, Jr., USA, was reported to the Senate by Chairman Levin on February 6, 2007, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on February 8, 2007.]

TO CONSIDER THE NOMINATIONS OF ADM WILLIAM J. FALLON, USN, FOR REAPPOINTMENT TO THE GRADE OF ADMIRAL AND TO BE COMMANDER, U.S. CENTRAL COMMAND; GEN GEORGE W. CASEY, JR., USA, FOR REAPPOINTMENT TO THE GRADE OF GENERAL AND TO BE CHIEF OF STAFF OF THE ARMY; AND TO VOTE ON PENDING MILITARY NOMINATIONS

TUESDAY, FEBRUARY 6, 2007

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 10:13 a.m. in room SH-216, Hart Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Kennedy, Byrd, Reed, E. Benjamin Nelson, Webb, McCaskill, McCain, Warner, Sessions, Collins, Ensign, Chambliss, Dole, Thune, and Martinez.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearing clerk.

Majority staff members present: Jonathan D. Clark, minority counsel; Daniel J. Cox, Jr., professional staff member; Evelyn N. Farkas, professional staff member; Richard W. Fieldhouse, professional staff member; Creighton Greene, professional staff member; Michael J. Kuiken, professional staff member; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; Michael J. McCord, professional staff member; William G.P. Monahan, counsel; and Michael J. Noblet, research assistant.

Minority staff members present: Michael V. Kostiw, Republican staff director; William M. Caniano, professional staff member; Gregory T. Kiley, professional staff member; Derek J. Maurer, professional staff member; David M. Morriss, minority counsel; Lucian L. Niemeyer, professional staff member; Christopher J. Paul, professional staff member; Lynn F. Rusten, professional staff member; Sean G. Stackley, professional staff member; Diana G. Tabler, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: David G. Collins, Fletcher L. Cork, and Jessica L. Kingston.

Committee members' assistants present: Sharon L. Waxman, assistant to Senator Kennedy; Frederick M. Downey, assistant to

Senator Lieberman; Elizabeth King, assistant to Senator Reed; Caroline Tess, assistant to Senator Bill Nelson; Eric Pierce and Benjamin Rinaker, assistants to Senator Ben Nelson; Todd Rosenblum, assistant to Senator Bayh; Andrew Shapiro, assistant to Senator Clinton; Lauren Henry, assistant to Senator Pryor; Gordon I. Peterson, assistant to Senator Webb; Nichole M. Distefano, assistant to Senator McCaskill; Sandra Luff, assistant to Senator Warner; Arch Galloway II, assistant to Senator Sessions; Mark J. Winter, assistant to Senator Collins; D'Arcy Grisier, assistant to Senator Ensign; Clyde A. Taylor IV, assistant to Senator Chambliss; Adam G. Brake, assistant to Senator Graham; Lindsey Neas, assistant to Senator Dole; Russell J. Thomasson, assistant to Senator Cornyn; and Stuart C. Mallory and Bob Taylor, assistants to Senator Thune.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. We have a quorum, and I ask the committee now—and we've all been notified—to consider the nominations of 2 general officer nominations and a list of 37 pending military nominations.

First, I ask the committee to consider the nomination of Admiral William Fallon for reappointment to the grade of admiral and to be Commander, U.S. Central Command. Admiral Fallon testified before the committee on his nomination last Tuesday.

Is there a motion to favorably report Admiral Fallon's nomination?

Senator KENNEDY. So move.

Chairman LEVIN. Is there a second?

Senator MCCAIN. Second.

Chairman LEVIN. The Clerk will call the roll.

The CLERK. Mr. Kennedy?

Senator KENNEDY. Aye.

The CLERK Mr. Byrd?

Senator BYRD. Aye.

The CLERK. Mr. Lieberman? [No response.]

Mr. Reed?

Senator REED. Aye.

The CLERK. Mr. Akaka? [No response.]

Mr. Nelson of Florida? [No response.]

Mr. Nelson of Nebraska?

Senator BEN NELSON. Aye.

The CLERK. Mr. Bayh? [No response.]

Mrs. Clinton? [No response.]

Mr. Pryor? [No response.]

Mr. Webb?

Senator WEBB. Aye.

The CLERK. Mrs. McCaskill?

Senator MCCASKILL. Aye.

The CLERK. Mr. McCain?

Senator MCCAIN. Aye.

The CLERK. Mr. Warner?

Senator WARNER. Aye.

The CLERK. Mr. Inhofe? [No response.]

Mr. Sessions?

Senator SESSIONS. Aye.
 The CLERK. Ms. Collins?
 Senator COLLINS. Aye.
 The CLERK. Mr. Ensign?
 Senator ENSIGN. Aye.
 The CLERK. Mr. Chambliss?
 Senator CHAMBLISS. Aye.
 The CLERK. Mr. Graham? [No response.]
 Mrs. Dole?
 Senator DOLE. Aye.
 The CLERK. Mr. Cornyn? [No response.]
 Mr. Thune?
 Senator THUNE. Aye.
 The CLERK. Mr. Martinez?
 Senator MARTINEZ. Aye.
 The CLERK. Mr. Chairman?
 Chairman LEVIN. Aye.
 The CLERK. Sixteen ayes, no nays.
 Chairman LEVIN. The motion carries, 16 to 0, and the record will be kept open for the others. The motion carries.
 Next, I ask the committee to consider the nomination of General George Casey for reappointment to the grade of general and to be Chief of Staff of the Army.
 Is there a motion to favorably report General Casey's nomination to the Senate?
 Senator KENNEDY. So move.
 Chairman LEVIN. Second?
 Senator COLLINS. Second.
 Chairman LEVIN. Clerk will call the roll.
 The CLERK. Mr. Kennedy?
 Senator KENNEDY. Aye.
 The CLERK. Mr. Byrd?
 Senator BYRD. Aye.
 The CLERK. Mr. Lieberman? [No response.]
 Mr. Reed?
 Senator REED. Aye.
 The CLERK. Mr. Akaka? [No response.]
 Mr. Nelson of Florida? [No response.]
 The CLERK. Mr. Nelson of Nebraska?
 Senator BEN NELSON. Aye.
 The CLERK. Mr. Bayh? [No response.]
 Mrs. Clinton? [No response.]
 Mr. Pryor? [No response.]
 Mr. Webb?
 Senator WEBB. Aye.
 The CLERK. Mrs. McCaskill?
 Senator MCCASKILL. Aye.
 The CLERK. Mr. McCain?
 Senator MCCAIN. No.
 The CLERK. Mr. Warner?
 Senator WARNER. Aye.
 The CLERK. Mr. Inhofe? [No response.]
 Mr. Sessions?
 Senator SESSIONS. Aye.

The CLERK. Ms. Collins?
 Senator COLLINS. Aye.
 The CLERK. Mr. Ensign?
 Senator ENSIGN. No.
 The CLERK. Mr. Chambliss?
 Senator CHAMBLISS. No.
 The CLERK. Mr. Graham? [No response.]
 Mrs. Dole?
 Senator DOLE. Aye.
 The CLERK. Mr. Cornyn? [No response.]
 Mr. Thune?
 Senator THUNE. Aye.
 The CLERK. Mr. Martinez?
 Senator MARTINEZ. Aye.
 The CLERK. Mr. Chairman?
 Chairman LEVIN. Aye.
 The CLERK. Mr. Lieberman?
 Senator LIEBERMAN. Aye.
 The CLERK. Fourteen ayes, three nays.
 Chairman LEVIN. Fourteen ayes, three nays, the motion carries.
 The record will be kept open for those who are missing. The motion
 will be favorably reported.
 Finally, I ask the committee to consider a list of 37 pending mili-
 tary nominations.
 Is there a motion to favorably report those 37 nominations?
 Senator KENNEDY. So move.
 Chairman LEVIN. Second?
 Senator WARNER. Second.
 Chairman LEVIN. Is there a second?
 Senator WARNER. Second.
 Chairman LEVIN. All in favor, say aye. [A chorus of ayes.]
 Opposed, no. [No response.]
 The ayes have it, the motion carries.
 Thank you all.
 [The list of nominations considered and approved by the commit-
 tee follows:]

MILITARY NOMINATIONS PENDING WITH THE SENATE ARMED SERVICES COMMITTEE
 WHICH ARE PROPOSED FOR THE COMMITTEE'S CONSIDERATION ON FEBRUARY 6, 2007.

1. GEN George W. Casey, Jr., USA, to be general and Chief of Staff, U.S. Army (Reference No. 177).
 2. ADM William J. Fallon, USN, to be admiral and Commander, U.S. Central Command (Reference No. 181).
 3. LTG James M. Dubik, USA, to be lieutenant general and Commander, Multi-National Security Transition Command-Iraq and Commander, NATO Training Mission-Iraq, U.S. Central Command (Reference No. 179).
 4. BG Thomas W. Travis, USAF, to be major general (Reference No. 195).
 5. Col. David H. Cyr, USAF, to be brigadier general (Reference No. 196).
 6. Col. Douglas J. Robb, USAF, to be brigadier general (Reference No. 197).
 7. In the Air Force Reserve, there are 16 appointments to the grade of major general and below (list begins with Frank J. Casserino) (Reference No. 198).

- Total: 39.

[Whereupon, at 10:15 a.m., the executive session adjourned.]

TO CONSIDER CERTAIN PENDING MILITARY NOMINATIONS

TUESDAY, FEBRUARY 27, 2007

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 10:54 a.m. in room SH-216, Hart Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Lieberman, Akaka, Bill Nelson, Bayh, Pryor, Webb, Warner, Inhofe, Sessions, Collins, Graham, Thune, and Martinez.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Evelyn N. Farkas, professional staff member; Richard W. Fieldhouse, professional staff member; Gerald J. Leeling, counsel; Thomas K. McConnell, professional staff member; William G.P. Monahan, counsel; and Michael J. Noblet, research assistant.

Minority staff members present: Michael V. Kostiw, Republican staff director; William M. Caniano, professional staff member; Derek J. Maurer, minority counsel; David M. Morriss, minority counsel; Lynn F. Rusten, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Fletcher L. Cork, Micah H. Harris, and Jessica L. Kingston.

Committee members' assistants present: Joseph Axelrad and Sharon L. Waxman, assistants to Senator Kennedy; James Tuite, assistant to Senator Byrd; Frederick M. Downey, assistant to Senator Lieberman; Elizabeth King, assistant to Senator Reed; Richard Kessler and Darcie Tokioka, assistants to Senator Akaka; Sherry Davich and Caroline Tess, assistants to Senator Bill Nelson; Todd Rosenblum, assistant to Senator Bayh; Andrew Shapiro, assistant to Senator Clinton; Lauren Henry, assistant to Senator Pryor; Gordon I. Peterson, assistant to Senator Webb; John A. Bonsell, assistant to Senator Inhofe; Arch Galloway II, assistant to Senator Sessions; Mark J. Winter, assistant to Senator Collins; Adam G. Brake, assistant to Senator Graham; Lindsey Neas, assistant to Senator Dole; Stuart C. Mallory, assistant to Senator Thune; and Brian W. Walsh, assistant to Senator Martinez.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. We now have a quorum, so I would ask my colleagues to consider a list of 1,281 pending military nominations.

They have all been before the committee the required length of time. We know of no objection to any of them. Is there a motion to favorably report these 1,281 military nominations to the Senate?

Senator THUNE. So moved.

Chairman LEVIN. A second?

Senator INHOFE. Second.

Chairman LEVIN. All in favor say aye. [A chorus of ayes.]

Opposed, no? [No response.]

The ayes have it. The motion carries.

[The list of nominations considered and approved by the committee follows:]

MILITARY NOMINATIONS PENDING WITH THE SENATE ARMED SERVICES COMMITTEE
WHICH ARE PROPOSED FOR THE COMMITTEE'S CONSIDERATION ON FEBRUARY 27,
2007.

1. In the Marine Corps there are 11 appointments to be brigadier general (list begins with David H. Berger) (Reference No. 189).
2. In the Air Force Reserve there are 30 appointments to the grade of major general and below (list begins with Shelby G. Bryant) (Reference No. 210).
3. Col. Tracy L. Garrett, USMCR to be brigadier general (Reference No. 214).
4. In the Air Force there are 14 appointments to the grade of colonel (list begins with Gino L. Auteri) (Reference No. 216).
5. In the Air Force there are 15 appointments to the grade of colonel (list begins with Brian E. Bergeron) (Reference No. 217).
6. In the Air Force there are 35 appointments to the grade of colonel (list begins with Brian D. Affleck) (Reference No. 218).
7. In the Air Force there are 24 appointments to the grade of lieutenant colonel (list begins with William R. Baez) (Reference No. 219).

THURSDAY, MARCH 8, 2007

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:35 a.m. in room SH-216, Hart Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Bill Nelson, Pryor, Webb, Warner, Inhofe, Sessions, and Thune.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Joseph M. Bryan, professional staff member; Evelyn N. Farkas, professional staff member; Richard W. Fieldhouse, professional staff member; Peter K. Levine, general counsel; and Michael J. McCord, professional staff member.

Minority staff members present: Michael V. Kostiw, Republican staff director; William M. Caniano, professional staff member; Derek J. Maurer, minority counsel; Lucian L. Niemeyer, professional staff member; Christopher J. Paul, professional staff member; Lynn F. Rusten, professional staff member; Robert M. Soofer, professional staff member; Sean G. Stackley, professional staff member; Diana G. Tabler, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Fletcher L. Cork and Kevin A. Cronin.

Committee members' assistants present: Frederick M. Downey, assistant to Senator Lieberman; Christopher Caple, Sherry Davich, and Caroline Tess, assistants to Senator Bill Nelson; Todd Rosenblum, assistant to Senator Bayh; Jennifer Park, Gordon I. Peterson, and Michael Sozan, assistants to Senator Webb; Sandra Luff, assistant to Senator Warner; Jeremy Shull, assistant to Senator Inhofe; Mark J. Winter, assistant to Senator Collins; Clyde A. Taylor IV, assistant to Senator Chambliss; and Stuart C. Mallory, assistant to Senator Thune.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. Today, the committee considers the nominations of three distinguished senior military officers: Admiral Timothy Keating, the nominee for Commander, U.S. Pacific Command (PACOM); General Victor Renuart, the nominee for Commander, U.S. Northern Command (NORTHCOM) and Commander, North American Aerospace Defense Command (NORAD); and General Robert Van Antwerp, the nominee for Chief of Engineers and Commanding General of the U.S. Army Corps of Engineers. We welcome each of you, congratulate you, and we also welcome your families, who we will ask you—those of you who have family members with you—to introduce them later on because we know that the long hours and the hard work that is put in by our senior military officials requires commitment and sacrifice not only from those officials and from our nominees, but also from their family members, and we greatly appreciate their willingness to bear and share your burden and responsibility.

Each of our nominees has served his country in the military for more than 30 years. Admiral Keating has served as Commander of the Fifth Fleet, Director of the Joint Staff, and Commander of U.S. NORTHCOM. General Renuart has flown more than 60 combat missions, has served as Director for Strategic Plans and Policy on the Joint Staff, and Senior Military Assistant to the Secretary of Defense. General Van Antwerp has served as Assistant Chief of Staff of the Army for Installation Management and Commandant of the U.S. Army Engineers School at Fort Leonard Wood. He has an even higher qualification, however. He is a native Michigander who grew up in Benton Harbor and St. Joseph and received his master's degree in engineering from the University of Michigan.

If confirmed, each of our nominees will be responsible for helping the Department of Defense (DOD) face critical challenges. Admiral Keating, if confirmed, will take command of U.S. PACOM, the command which encompasses nearly 60 percent of the world's population and over half of the Earth's surface and includes six of the largest military forces, several of the biggest economies, and the two largest Muslim and democratic countries. This assignment comes at a time when we face complex challenges from China and North Korea as well as the continuing threat of terrorism in Indonesia, the Philippines, and elsewhere in the region.

General Renuart, if confirmed, will take over U.S. NORTHCOM, the command which was established after September 11, 2001, to provide for the defense of the United States and, when directed by the President or the Secretary of Defense, for providing military support to civil authorities. The mission of this command includes

responding to natural disasters like Hurricane Katrina and man-made disasters such as incidents involving weapons of mass destruction here at home.

Finally, General Van Antwerp will assume command of the Army Corps of Engineers. This command is responsible for both military works, including contracting for Iraq reconstruction, and civil works, such as repairing levees that have been damaged, destroyed, or unacceptably maintained in New Orleans and elsewhere.

I know that our nominees are up to these challenges. They look forward to assuming these challenges and we look forward to having them answer some of our questions and then hopefully a prompt confirmation by the United States Senate.

Senator Sessions.

Senator SESSIONS. Thank you, Mr. Chairman, and I agree that these are men of extraordinary ability. It is impressive, frankly, to see the educational level and the talent level we have throughout our military. I do not think it has ever been higher, but particularly in our general officers. They have had extraordinary experiences and education.

So I welcome you here. I'm glad to see my former chairman, Senator Warner. I would be pleased to defer to him, but look forward to a few questions, Mr. Chairman. I think all of us are impressed with these nominees and we appreciate your leadership for America.

Chairman LEVIN. Senator Warner, would you like to add anything?

Senator WARNER. No, thank you, Mr. Chairman. I know all these gentlemen quite well and we are fortunate as a Nation to have them and their families make this continued contribution to public service.

Thank you.

Chairman LEVIN. Before I call on you for any opening statement that you each might have and to introduce your families, let me ask you the standard questions which we ask of all nominees.

Have you adhered to applicable laws and regulations governing conflicts of interest?

Admiral KEATING. Yes, sir.

General RENUART. Yes.

General VAN ANTWERP. Yes.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Admiral KEATING. No, sir.

General RENUART. No, sir.

General VAN ANTWERP. No, sir.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Admiral KEATING. Yes, sir.

General RENUART. Yes, sir.

General VAN ANTWERP. Yes, sir.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Admiral KEATING. Yes, sir.

General RENUART. Yes, sir.

General VAN ANTWERP. Yes, sir.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Admiral KEATING. Yes, sir.

General RENUART. Yes, sir.

General VAN ANTWERP. Yes, sir.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Admiral KEATING. Yes, sir.

General RENUART. Yes, sir.

General VAN ANTWERP. Yes, sir.

Chairman LEVIN. Do you agree to give your personal views when asked before this committee to do so, even if those views differ from the administration in power?

Admiral KEATING. Yes, sir.

General RENUART. Yes, sir.

General VAN ANTWERP. Yes, sir.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Admiral KEATING. Yes, sir.

General RENUART. Yes, sir.

General VAN ANTWERP. Yes, sir.

Chairman LEVIN. Thank you.

Now, Admiral Keating, let me call on you for an opening statement and introductions.

Senator WARNER. Mr. Chairman, could I ask that a statement by the distinguished ranking member, Senator McCain, be placed in the record following yours?

Chairman LEVIN. It will be made part of the record. Thank you.
[The prepared statement of Senator McCain follows:]

PREPARED STATEMENT BY SENATOR JOHN MCCAIN

Thank you, Senator Levin. I join you in welcoming Admiral Keating, Lieutenant General Renuart, and Lieutenant General Van Antwerp, and their family members, and congratulating them on their nominations.

Admiral Keating, you have had a distinguished career as a naval aviator, on the Joint Staff, and culminating in your assignment as Commander, U.S. Northern Command (NORTHCOM). Your nomination to be Commander of U.S. Pacific Command (PACOM) comes at a time of great challenge and opportunity in the Pacific area of responsibility. North Korea's nuclear and missile programs continue to pose a threat to its neighbors and to America's interests in East Asia.

Last week's agreement might be a first step on the path to a denuclearized Korean peninsula, but that is far from certain. It is unclear whether North Korea is now truly committed to real verification, a full accounting of all nuclear materials and facilities, both plutonium- and uranium-based, and the full denuclearization that must be the essence of any lasting agreement. As we observe in the weeks ahead whether Pyongyang is taking initial steps toward disarmament and sealing its Yongbyon reactor, let us proceed cautiously. In the meantime, PACOM plays a vital role in providing stability and deterrence in support of this diplomatic effort.

It also plays a critical role in sustaining and expanding the U.S.-Japan strategic alliance, the cornerstone of our security umbrella in northeast Asia. PACOM and the Commander of U.S. Forces Japan must keep up the robust level of dialogue and ensure elements of our relationship, such as the Defense Policy Reform Initiative,

are on track. There are a number of ideas circulating about the ways in which we can strengthen our already robust bilateral ties with Japan, and I'd note that the "Armitage II" report, which was recently released, addresses this in some detail.

With respect to China, if confirmed, you will have the important task of taking the measure of a rapidly modernizing military. Cross-strait relations are relatively calm at the moment, but history suggests that this delicate relationship, which remains at the core of U.S. interests in the region requires our close attention. Beijing's regional and global aspirations are growing, and properly managing this relationship is vital.

Fortunately, the United States does not face these challenges alone. One of the vital responsibilities of the PACOM Commander is to work closely with our key allies in the region—Japan, South Korea, Australia, to name a few—to strengthen bilateral relations and to develop multilateral approaches and responses to the challenges and opportunities that we face in the U.S. PACOM.

General Renuart, you have had an impressive career in the Air Force and in joint assignments, and I congratulate you on your nomination. U.S. NORTHCOM is now looked to as the military command that will defend against another attack on United States soil. If confirmed as Commander of U.S. NORTHCOM, you will be responsible for defending the Nation against attacks by hostile forces and for providing critical support to civil authorities in responding to domestic emergencies, terrorist attacks, and for designated law enforcement activities.

As our Armed Forces contend with a rigorous tempo of operations abroad, the Commander of U.S. NORTHCOM must ensure that the command has the capability to perform its important homeland defense and civil support missions.

General Van Antwerp, the Corps of Engineers is faced with an unprecedented level of interest and pressure from Congress and all Americans in the range of activities this Nation will ask you to carry out over the next 5 years.

In reviewing your answers to this committee in preparation for this hearing, I am struck by the magnitude of your mission—providing emergency repairs to our national levee and dam systems which have suffered from years of neglect; responding to the engineering needs of our military commanders in Iraq and Afghanistan; and providing the facilities and infrastructure required for the United States Army to transform and grow its forces. I trust you will be a Chief of Engineers who will be able to accomplish all this while ensuring a transparent, competitive contracting environment provides our taxpayers with the best value in construction and services.

I thank each of our nominees for their service and look forward to their testimony today.

Chairman LEVIN. Admiral Keating.

STATEMENT OF ADM TIMOTHY J. KEATING, USN, FOR RE-APPOINTMENT TO THE GRADE OF ADMIRAL AND TO BE COMMANDER, UNITED STATES PACIFIC COMMAND

Admiral KEATING. Mr. Chairman, distinguished members of the committee: It is a great honor to be nominated by the President to command the United States Pacific Command and I am grateful for his confidence and I appreciate the opportunity to appear before you this morning.

With me this morning is a woman who brings so much joy to all of our lives, my wife Wanda Lee Keating. Who cannot be with us this morning, our son Daniel, who is an F-18 pilot, lieutenant commander in the Navy down at Virginia Beach, VA. With us, our daughter Julie and her husband, Commander Paul Camardella, he too is an F-18 pilot in Virginia Beach, and their daughter, our granddaughter, Lauren Joy Camardella. My brother Danby Keating is also with us.

Mr. Chairman, I would like to ask our senior enlisted adviser, Sergeant Major Scott Frye, United States Marine Corps, to stand if I could Mr. Chairman, if it pleases you, I would like to recognize Sergeant Major Frye, who will retire at the end of this month, with 32 years of service to his Corps, our command, and our country.

Thank you, Sergeant Major Frye.

Chairman LEVIN. Thank you, Sergeant Major.

Admiral KEATING. In my current role, Mr. Chairman, as Commander of NORAD and NORTHCOM, I would also like to express my appreciation to your committee for your abiding support of our men and women in uniform. During my career I have enjoyed many deployments on our aircraft carriers to the western Pacific and the Indian Ocean. Wanda Lee and I lived in Hawaii during an earlier assignment at PACOM headquarters, and we lived in Japan for over 2 years while I had the privilege of commanding our forward deployed carrier battle group.

During those years I have developed a keen appreciation for the vibrancy and complexity of this vast region. Today the healthy alliances, positive economic trends, and potential for U.S.-led regional cooperation make it clear to all of us that opportunity is abundant in the Pacific.

Japan is a good example of a key United States alliance that benefits our Nation and the region. The U.S.-Japan relationship continues to mature and agreements such as the Defense Policy Review Initiative illustrate the progress we are making.

PACOM's emphasis on the war on terror, on security cooperation with allies and partners, on the readiness and posture of our forward deployed forces, and on our operational plans seems appropriate to me. If confirmed, I intend to use these principles as the foundation during my tenure. I am committed to ensuring the men and women of the command are ready and are resourced to sustain peace and stability in the region and to contribute appropriately to U.S. global commitments.

Finally, Mr. Chairman, if confirmed as Commander of U.S. Pacific Command, I will seek the counsel and insights of our allies, partners, and Members of Congress. I will collaborate with our ambassadors in the region to execute and advance United States policy goals throughout the Asia Pacific theater.

Mr. Chairman, thank you and I look forward to your questions.

Chairman LEVIN. Admiral, thank you. I know how much of her middle name your granddaughter brings to the family. Lauren Joy's middle name I am sure is very appropriate and we are delighted to have your granddaughter and her mother and her grandmother, as well as her grandfather—I never want to leave out grandfathers—here with us this morning.

Admiral KEATING. Thank you.

Chairman LEVIN. General Renuart.

STATEMENT OF LT. GEN. VICTOR E. RENUART, JR., USAF, FOR APPOINTMENT TO BE GENERAL AND TO BE COMMANDER, UNITED STATES NORTHERN COMMAND/COMMANDER, NORTH AMERICAN AEROSPACE DEFENSE COMMAND

General RENUART. Thank you, Mr. Chairman, and members of the committee. I too am honored to be here today as the President's nominee to become Commander, NORAD, and Commander, U.S. NORTHCOM. If confirmed, I look forward to serving in these key critical roles.

I appear before you knowing that the missions of both of these commands are demanding and that challenges are great. Having the homeland as the mission of NORTHCOM and NORAD is truly

a sacred honor and it dictates adherence to the highest standards of vigilance, service, and integrity, and it is expected to be such by all of our citizens all of the time.

Mr. Chairman, I would like to recognize the superb leadership of my good friend, Admiral Tim Keating, NORTHCOM's current commander. He has forged a really great team and leaves a legacy as he completes his tour and, I might add, big shoes to fill.

But I look forward, if confirmed by the committee, to this challenge. My service on the Joint Staff and in the Office of the Secretary of Defense has reinforced the value of close working relationships among the combatant commands, the military Services, defense agencies, the interagency community, this committee, and Members of Congress, and, importantly in this job, the Governors and Adjutants General of the States across our country.

If confirmed, I will join the men and women of NORAD and NORTHCOM in dedicating ourselves to the defense of the homeland. We will continue to work collaboratively with the other combatant commands. We will work closely with our Federal and State partners, our interagency partners, the National Guard, and the countries of Canada and Mexico, with whom we maintain a close relationship. We will continue to train hard to execute our mission and we will work hard to ensure that we never let the country down.

Given the guidance of the President and the Secretary of Defense, it is a very challenging road ahead, but I look forward to the opportunity to travel that road.

Mr. Chairman, I would be remiss if I did not publicly recognize my wife, Jill, present here today, for her nearly 36 years of service to our Nation as a military spouse. We are the proud parents of two sons. Our oldest is a three-tour combat veteran of Afghanistan and Iraq, a combat rescue helicopter crew member; and our younger son has served the Nation for 27 months in the Peace Corps and is currently a medical student at the University of Pennsylvania.

Our military families bear a heavy burden during these difficult times and it is important always that we honor that commitment at every opportunity we have.

Again, Mr. Chairman, thank you very much for the opportunity to appear here today and I look forward to your questions.

Chairman LEVIN. Thank you, General.

General Van Antwerp.

STATEMENT OF LTG ROBERT L. VAN ANTWERP, USA, FOR RE-APPOINTMENT TO THE GRADE OF LIEUTENANT GENERAL AND TO BE CHIEF OF ENGINEERS/COMMANDING GENERAL, UNITED STATES ARMY CORPS OF ENGINEERS

General VAN ANTWERP. Thank you, Mr. Chairman and members of the committee. I, too, am honored to appear before you today as the President's nominee for the Chief of Engineers and the Commanding General of the Corps of Engineers.

This summer, I will have served 35 years as a soldier and as an engineer, 34 of those have been with my wife, Paula. She is not here today because she is with my granddaughter down in Florida. We have five children: two beautiful daughters, Julia and Catherine, and three sons. My oldest son, Jeff, is a major in the Army

at West Point. He is an infantry guy. My next son is Luke and he is a Special Forces captain. Both of them just came out of Iraq recently for combat tours. My youngest son, Rob, is a Purple Heart recipient for what he sustained in combat in Iraq. He is doing well and he is settling near the Fort Campbell area.

I am a registered professional engineer. I commanded an engineer battalion in combat, commanded the Los Angeles District during the Northridge earthquakes and the floods in Arizona, and commanded the South Atlantic Division of the Corps of Engineers. As you mentioned, Mr. Chairman, I was the installation manager for the Army and then I went and commanded one of those installations, so I got to grade my own paper. Finally, right now I am the Commanding General of Accessions Command, so I am responsible for recruiting and initial military training for the Army.

The Nation looks to the Corps to meet the engineering needs of today and have the capability to meet those needs tomorrow. The Corps is deeply engaged, as you are all aware, now rebuilding the vital infrastructure in Iraq and Afghanistan and also in the reconstruction and renovation of the Gulf Coast.

The integrity and professionalism of the Corps is essential to the confidence of the American people. If I am confirmed as Chief of Engineers, I will work closely with the administration, stakeholders, and Congress as I discharge my leadership responsibilities. I look forward to working closely with this committee and with other committees that have oversight in addressing the missions and challenges ahead. If confirmed, I pledge to provide strong and decisive leadership for the Corps in its important civil works and military missions.

Mr. Chairman, that concludes my statement.

Chairman LEVIN. I thank each of you and again your families, particularly those in your family who carry on the military service that you have so nobly and professionally followed in your own lives.

Admiral Keating, let me begin with you. The Quadrennial Defense Review identifies China as a likely competitor. Is it a foregone conclusion that China and the United States would be at odds over security in the Pacific?

Admiral KEATING. I do not think it is a foregone conclusion, Senator.

Chairman LEVIN. How do you believe we could minimize that possible outcome that nobody would like to see?

Admiral KEATING. If confirmed, I would intend to pursue a series of robust engagements with principally the People's Liberation Army of China, not just in terms of frequency but in terms of complexity. We would engage in exercises of some sophistication and frequency and we would pay close attention to the development of their weapons systems and their capabilities, with a weather eye on whether they intend to use those against Taiwan.

Chairman LEVIN. Given the possibility of political or military miscalculation between China and Taiwan, what role do you think the United States military can play in trying to reduce cross-strait tensions?

Admiral KEATING. It goes to the heart of transparency, Mr. Chairman. I would say that if we deal with some frequency at sev-

eral levels with the Chinese, if we exercise with them, all Services, if we ensure they are aware of our capabilities and our intent, I think we will go a long way to defusing potential strife across the Straits of Taiwan.

Chairman LEVIN. Relative to the Philippines, Admiral, our military mission in the southern Philippines since 2001 has been aimed at helping the Philippine military to defeat the Abu Sayyaf group and to deal with other terrorist groups. Your predecessors have assured this committee that, "U.S. participants will not engage in combat," in the Philippines, without prejudice, of course, to their right of self-defense. Are you committed to continuing that policy?

Admiral KEATING. Yes, sir.

Chairman LEVIN. I have one other question on that relative to the Philippines. During hearings before this committee, General Myers, Admiral Fargo, and Admiral Fallon stated that U.S. troops would conduct training at the battalion level and assured us that if there were a decision for U.S. teams to work at the company level that this committee would be notified, and they have kept their word. Is that your intent as well?

Admiral KEATING. Yes, sir.

Chairman LEVIN. Thank you.

Relative to Korea, Admiral, give us your assessment, if you can, from your perspective of the agreement that we apparently reached with North Korea last month?

Admiral KEATING. From what I know, Mr. Chairman, it is positive and beneficial. We need to have the access to verify North Korea is upholding their side of the agreement, if you will. But it appears to be a positive step toward denuclearization of the peninsula, and that would lead to stability and peace on the peninsula and that is a worthwhile goal.

Chairman LEVIN. General Renuart, NORTHCOM has operational responsibility for the ballistic missile defense of the United States. One of the concerns that we have is that deployed ground-based midcourse defense systems show that they are operationally effective and reliable. Do you agree, first of all, that it is essential that any ground-based system be operationally effective and reliable?

General RENUART. Mr. Chairman, yes, sir, I do.

Chairman LEVIN. If you are confirmed and you learn or believe that this system is not operationally effective and reliable, will you take prompt steps to inform the committee?

General RENUART. Yes, sir, I will.

Chairman LEVIN. Do you agree that it is important that we use operationally realistic flight tests to demonstrate the operational capability of the ground-based system?

General RENUART. Yes, sir, I do.

Chairman LEVIN. If confirmed, will you work with the Director of Operational Test and Evaluation to understand his view of the operational capability and any limitations on the ground-based midcourse system?

General RENUART. Mr. Chairman, I will do that.

Chairman LEVIN. One of the problems, General Renuart, that we had before the September 11 terrorist attacks was a lack of information-sharing among relevant Government agencies. Congress addressed this problem in our intelligence reform legislation in 2004

and we want to ensure that information is being shared as needed to protect our Nation against terrorists.

Now, I understand that NORTHCOM withdrew its representative to the National Counterterrorism Center (NCTC) last year because NORTHCOM and the Defense Intelligence Agency (DIA) found that it was just too hard to get information and cooperation from the NCTC. It sounds like an unacceptable situation and it is a problem that would need to be fixed.

If confirmed, how do you plan to address this problem and to ensure that there is good information-sharing and cooperation between NORTHCOM and the NCTC?

General RENUART. Mr. Chairman, thank you for that question because it is critically important that we have the right amount and level of intelligence sharing among all the relevant agencies. I am aware of the move a few months ago to withdraw a portion of the intelligence elements that were assigned from NORTHCOM and the DIA. I am aware also that General Maples, the Director of the DIA, has undertaken now a process to put that back in place, and if confirmed, I will continue to press hard for that because I believe that is critically important. The NCTC really is one of those opportunities we have for transparency among the Intelligence Community.

Chairman LEVIN. Thank you.

My time has expired.

Senator Sessions.

Senator SESSIONS. Admiral Keating, thank you for your service. You were NORTHCOM Commander, which General Renuart will soon be taking over. In that capacity, you had the responsibility to manage and launch, if need be, our ground-based missile defense system; is that correct?

Admiral KEATING. That is correct, sir.

Senator SESSIONS. On July 4, the North Koreans announced or we identified their launch and saw their launches occur, which ended up not to threaten the United States. In your opinion, were we capable of executing a launch of our missile defense system that, had they had a missile that could have reached the United States, we could have knocked that down?

Admiral KEATING. We were capable. We had exercised and we were ready that day, Senator.

Senator SESSIONS. So you were actually prepared to launch, if need be, and had confidence that, even though we were early in the process, had a missile threatened the United States, it could have been knocked down?

Admiral KEATING. It is a small point, Senator. The short answer is yes, sir. I would not have been the authorizing official that day. The Secretary of Defense was on the line with us, so I am confident it would have been his decision. But we were prepared to launch if he had given us the direction.

Senator SESSIONS. Do you think that experience will be valuable to you as you, in the Pacific, deal with the theater missile defense systems that we have on so many of our ships and other areas?

Admiral KEATING. Most assuredly, yes, sir.

Senator SESSIONS. General Renuart, you made a comment about our testing of last year, September I believe, the last major test

that we had. It was a successful operational test. How would you evaluate the complexity of that test and its validity as to establishing that we have a system that will actually work?

General RENUART. Senator, I am far from an expert on the technical aspects, but I was able to observe from my position within the Joint Staff. It is my view that the capabilities of the system evident in that test would allow us, as Admiral Keating mentioned, to be effective against a North Korean type threat.

I think it is important to ensure that if we are going to fully field the system that we ensure that it has the capability to be effective against some variety of threats. Clearly it is not an umbrella and I, if confirmed, will continue to work for an active operational test process as we continue to field the system.

Senator SESSIONS. I agree. I think for a lot of people, they may not have realized just how much good work has been done for quite a number of years that would bring us to the point of being able to knock down an incoming missile. It is hard for most of us to believe that is possible, but once again you say it is. We have seen the tests that have been successful. This last test was a very realistic, whole entire system test. I think that is important.

General Renuart, as NORTHCOM Commander, you explained to me as we chatted about your belief that you need to relate effectively with the National Guard. Would you explain your mission with regard to homeland security and how you envision your relationship with the Guard and Reserve?

General RENUART. Thank you, Senator. I think it is important to understand that in NORTHCOM—its mission principally is to provide support initially to State and Federal agencies as they respond to disasters that might occur throughout the country. But when directed by the President or the Secretary, we could assume a more active role. So it is important to ensure that on a day-to-day basis NORTHCOM has good visibility as the principal combatant command on the readiness of potential forces that could come to it from both the Active and the Reserve component, the command must also understand carefully how the individual States view their capabilities to respond to a disaster or an emergency; and given that information, then maintain a close relationship with the States, the Guard, and the Active component to ensure that we do have the tools to connect, communicate, and be effective.

Senator SESSIONS. Thank you and I look forward to your service and working with you in that regard.

General Van Antwerp, the Corps is an important part of our Nation's defense and really civil strength. You have a tremendous background and I know you are going to be successful in that office. I appreciate the opportunity to chat with you recently. I am glad to know that you do not feel you have a legal mandate to write any new manual at this point and that you understand the sensitivity of the water situation between the three States in the southeast. Our Governors are working hard to get an agreement that would be wonderful, and I believe they can do that and I think it is important that the Corps of Engineers be a neutral but supportive agency in that process. Would you agree with that?

General VAN ANTWERP. I agree, Senator.

Senator SESSIONS. General Van Antwerp, tell me about, briefly if you would, how much the Corps has contributed to Iraq and Afghanistan? I have a very positive impression of their effectiveness. I believe they responded, maybe because of their military association and background, in great ways in those countries, and wonder if there is a possibility in the years to come that we might expand the Corps in a way that could help us in these kind of rebuilding efforts, these nation-building efforts or stability operations that might occur around the world.

Have you had any thoughts about that?

General VAN ANTWERP. Yes, sir, I do agree. I think the Corps has contributed greatly. We have the Gulf Region Division with four different elements of it. We have the northern, central, and southern divisions, and there is an Afghani district. They have done wonderful things. What I know is, of the 4,500 projects in Iraq totaling about \$8 billion, that the Corps has executed 3,400 of those already. Another 900 are in construction and 200 are in planning and design, so moving well on their way to completing those. So the Corps has contributed very much.

To your second part—

Senator SESSIONS. How much of that do you utilize Iraqi or Afghani contractors or workers that you supervise, rather than just do the work yourselves?

General VAN ANTWERP. That is an excellent question. Today about 75 percent of the contracts I am told are with Iraqi contractors and their employees. So the supervision over it is by the Corps of Engineers, but many of the contractors, the majority, are Iraqi contractors today.

Senator SESSIONS. I interrupted you, I think.

General VAN ANTWERP. Senator, I was just going to address the second issue of how do we prepare for this for the future, how do you make sure there are enough emergency management people and people that could respond quickly. I think it means you have to keep the expertise in the Corps to do that, and then you have to have some ability to have people that are tracking and watching that could deploy without degrading the rest of your work that you are doing elsewhere.

I think it is something that we need to look at in the future, for other contingencies how do we have that group of young people that can get there quickly and get it moving on the ground.

Senator SESSIONS. Thank you very much, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Sessions.

Senator Warner.

Senator WARNER. Thank you, Mr. Chairman.

Gentlemen, we have always known that the military families are the ones that provide so many of the young men and women who continue to follow your careers in the military. But I cannot recall, Mr. Chairman, when we have had three before us with more outstanding contributions than each of you men in that. So I again join the chairman and others in commending you and your respective spouses for providing much-needed quality talent for our Armed Forces.

Admiral, it is just a pleasure to see you advance to this position. I think it is no secret for those of us who have had associations

with the United States Navy, it is a tossup between every officer's desire to be in the position to which you have been nominated by the President or Chief of Naval Operations. I will not ask you which you prefer because you are going to get this one. [Laughter.]

Admiral KEATING. My wife has what is called the peanut butter theory, Mr. Secretary. She says: Put peanut butter in your mouth, put your tongue against the peanut butter, and do not talk.

Senator WARNER. That is correct. Good advice.

The chairman asked you some questions on North Korea. I would like to follow up. Apparently the President of South Korea most recently said that the two nations, if this current detente with North Korea goes forward and we are able to achieve the goals that the Six-Party Talks laid down, I mean all the goals, would like to see the exploration of a peace treaty to replace the armistice which has been in effect since 1953. It is hard to believe that for over a half century we have not been able to forge a treaty to once and for all put to rest that conflict.

Have you had an opportunity to explore that, and do you have any initial thoughts on the advisability and how it would impact on the need to continue certain security relationships with South Korea even if a peace treaty were put in place?

Admiral KEATING. Senator, I have not gone into that in any detail with either Admiral Fallon, his staff, or General Bell and his staff. If confirmed, that would be something we would clearly devote considerable interest to if our State Department were able to table the issue. I am hardly opposed to it, but, as you say, we have been in an armistice situation for half a century and it would take some very prudent discussions within our Government and with our allies in South Korea to go forward with such a consideration.

Senator WARNER. I'm going to let Senator Inhofe go ahead of me.

Senator INHOFE. Senator Warner, I appreciate it very much. I just received a notice I have to go to another committee. There are a couple of things real briefly if I could just mention——

Senator WARNER. Go ahead, take your time.

Senator INHOFE. First of all, General Renuart, Senator Sessions was talking before we came in, so I do not know how far you got into this. I have talked to you about this, personally I think one of the greatest responsibilities you are going to have is the ballistic missile defense. I just guess I would ask you if you believe that we are adequately at a level that is a comfort level for you in terms of threats from North Korea, China, Russia, or wherever they might come from?

General RENUART. Senator, I would be careful to say at a comfort level because I am still really just learning all of the breadth of the capability. If confirmed, I would really dive into that in much greater detail. But my initial impression is that, and based on the capabilities that we saw over the July 4 weekend when we had the intention to defend, I think we have a very good capability for the threat we see today, but I think that threat is growing and it is important to continue the testing to ensure that the system when fielded is capable of meeting all the goals.

Senator INHOFE. What I would like, and I know Senator Sessions and maybe some other members of this committee, have always been very interested in this. When you are entrenched, when you

get in there and have a chance for a total evaluation, just come forth, be very honest with us as to what resources you need, because I think that is one of the greatest threats that we have out there.

By the way, Senator Warner and I were talking about all three of you having kids in there and you, General Van Antwerp, with three, and one was injured. We are just very proud of you. To me, I look at the three of you and I think of that as being kind of an American tradition that goes from generation to generation. We are very proud.

With the 92,000 or so increases that are going to be coming in the new combat units, you are going to have to have new support. Are you satisfied with the resources and of being able to accommodate that?

General RENUART. I am sorry, Senator? For me?

Senator INHOFE. No, I am talking about General Van Antwerp right now.

General VAN ANTWERP. Accommodate?

Senator INHOFE. The new responsibilities that come with the increased number of combat units that are going to come with the 92,000 increase.

General VAN ANTWERP. Right. The Army's portion of that is 65,000, and part of that is in our restationing plan. Of course you have to have the facilities and everything that goes with this, and it is very much linked with base realignment and closure as far as movement of people. But we do have a plan for the stationing of all those units and the building of those units through 2012.

Senator INHOFE. I want you to repeat the numbers that you used in response to Senator Sessions' question. I was kind of impressed with that when you talked about the number of projects and the amount of money and where you are with that.

General VAN ANTWERP. This is in Iraq. The Corps was assigned 4,500 projects for the tune of about \$8 billion. Thus far they have completed 3,400 of those projects. Then the rest of them, there are 900 projects that are under construction and another 200 projects that are in some stage of planning and design.

Senator INHOFE. Using the Iraqis for a lot of this work?

General VAN ANTWERP. Right, for about three-quarters of it.

Senator INHOFE. The only other thing I wanted to—and I told General Keating I would do this—we have been very active in both the International Military Education and Training (IMET) program and the section 1206 and 1207 train and equip programs. The IMET program at one time had the restriction on it, which we have now lifted, because we were assuming that the international officers were the ones who were benefiting from such a program. It appears to me as I see people coming over here in droves for training that is the best money that we can spend, particularly in your new area of responsibility.

I would like to know your level of interest with the IMET program and also the train and equip program, because that will continue to be a discussion of this committee.

Admiral KEATING. Senator, we are vitally interested in the IMET program. Since our discussion, we went back and there are over 20 heads of service or chiefs of defense who are in position or who

have recently retired in foreign militaries who have attended just the National War College. That is a dramatic dividend on a relatively small investment. The understanding of tactics, techniques, and capabilities that is developed as those officers attend our school is profound.

As far as train and equip, you have given PACOM the authority, in collaboration with the State Department, to expend money in a fairly short timeline to countries in the particular area of maritime security, Malaysia and Sri Lanka. The benefits of that investment can perhaps be measured by Lloyd's of London reducing premiums for ships transitting the Straits of Malacca from wartime premiums to something below that. We think that is a direct reflection of the investment we have made under section 1206.

Senator INHOFE. I can only say, and I say this also to my friends on the committee, that if we do not really utilize the advantages that come with an IMET program, China is doing it.

Admiral KEATING. Right.

Senator INHOFE. They have an exhaustive program right now that—I would just like to beat them to the punch.

Senator Warner, thank you for allowing me to infringe upon your time.

Senator WARNER. No, not at all. I am going to be here throughout the hearing.

I want to associate myself with my distinguished colleague's support for the IMET program. All of us who have had many years on this committee—and the three here have been here for a couple of decades—recognize as we travel and visit other nations, which is our responsibility, particularly on the Armed Services Committee, how proud some of these foreign officers are to step up and say: I am a product of America's IMET educational system. It is a sense of confidence that we have in that officer and his ability to hopefully strengthen the ties between his nation or her as the case may be, and the United States.

Senator INHOFE. I would say particularly now also in Africa, they are so proud to be a product. It is a great program.

Senator WARNER. Senator, there is no one here that has logged more time traveling in those distressed areas of Africa than you.

Mr. Chairman, I think I will pick up if I may. One of your colleagues appeared, but then disappeared.

Chairman LEVIN. Please.

Senator WARNER. Admiral Keating, your predecessor worked very closely with the committee through the years and we anticipate no less on your part. But one of the things that I always admired was his initiatives to do the proactive approach to advancing U.S.-Chinese military-to-military relations. This is extremely important, particularly as China now is, in a very strong and forceful way, increasing its military capabilities and spreading its influence throughout the world.

I look back on the days when we were dealing in the Cold War and we always had the feeling that the senior military and the Soviet Union at that time were individuals that would carefully think through all options for initiating certain actions, most particularly anything related to the strategic use of those assets. I just hope that you will carry on in that context.

Do you feel there is an opportunity to pick up where he left off and expand?

Admiral KEATING. You bet, Senator. A huge potential here and, if confirmed, we will do our best to capitalize on that opportunity.

Senator WARNER. In the most intense chapters of the Cold War, there was always a sense of confidence in the quality, the ability, and the judgment of the senior military. We simply, at least from my perspective, I do not know that we have that insight into China. There seems to me such a veil of secrecy and withdrawal that it is going to take some forceful initiatives on your part.

Which brings me to, when you and I visited most recently we talked about the history of the Incidents at Sea, the agreement that we have between, in this case, the Navy of the United States and the navy of the former Soviet Union. Currently that agreement is still in effect, because there was a tragic event when we had the clash of the aircraft and that confrontation. Had that framework been in place, I think we would have been able to work our way through that situation more expeditiously, and indeed we may well have prevented it, because that concept of agreement is to recognize the potential and the requirement of both militaries, to do surveillance, but do it in a way that those assets, be they ships or aircraft, are not likely to have actual contact and confrontation.

Will you continue to take a look at that?

Admiral KEATING. Yes, sir. If confirmed, we will undertake an aggressive, but measured and reasonable, approach as we can to the senior military leadership, and not just the senior military leaders, but at as many levels as we can with the Chinese military, and it goes to IMET, so as to develop relationships, an understanding, and a common bond and to continue the exercises that PACOM has underway. They have done two search and rescue exercises within the past couple years. As you say, Senator, those would likely have led to a different outcome of the EP-3 incident if it were to occur now, and it is unlikely that it would occur.

Senator WARNER. General Renuart, this committee had a great deal to do with the establishment of the legislation which created the 55 Weapons of Mass Destruction-Civil Support Teams to ensure that each State and territory of the United States has at least one team. Some of the larger States have more than one. To date 47 of these teams have been certified by DOD as mission capable. States will also depend on the National Guard, the chemical, biological, radiological, nuclear high yield explosive (CBRNE) enhanced weapons response force package, and the CBRNE Enhanced Response Force Package teams available to each in the Federal Emergency Management Agency (FEMA) areas.

You are going to pick up from Admiral Keating and we are fortunate today that he is present, because we know full well of the achievements that he had. But I do hope that you continue to provide strong support for these concepts.

For those following this hearing, all these acronyms are confusing, but these are teams that can come in and work with the local community with regard to the first response on an incident which is hard to ascertain exactly how it imperils the local citizens and the first responders, particularly chemical, biological incidents. It is just not possible for each of the States to have all the complex

equipment that can go in, and can go in on the spot and make the necessary analysis.

So I do hope that is one of your high priorities as you proceed.

General RENUART. Yes, Senator, it will be, and if confirmed, we will continue to pursue the funding and the training and equipping of all of those units.

Senator WARNER. Mr. Chairman, I will return in a second round.

Chairman LEVIN. Thank you.

By the way, Admiral Keating, I think you are probably aware of this fact, that Senator Warner is an expert on literally negotiating agreements and treaties on incidents at sea or otherwise to deconflict or avoid conflict with countries with whom we are truly adversaries. He personally negotiated the Incidents at Sea Treaty with the Soviet Union. I believe he was Secretary of the Navy at that time. It is one of the many proud moments in his career. But if you want some advice as to the wisdom and the methods of such discussions, you are looking at an expert right here.

Admiral KEATING. We are aware, Senator.

Chairman LEVIN. Thank you very much.

Senator WARNER. I thank the chair. Days long past.

Admiral KEATING. The agreement is still in place.

Chairman LEVIN. It was a great moment, and I have been in his office and there is, as I remember, a picture or a plaque on the wall about that event.

Senator NELSON.

Senator BILL NELSON. Thank you, Mr. Chairman.

Generals and Admiral, I enjoyed my visit privately with each one of you and would only reemphasize here in open session some of the things that I had discussed with you when we visited earlier. General Renuart, you know the concerns that we have with regard to the National Guard when there is a major natural disaster such as a hurricane. I can tell you that our Florida Guard is experienced and they know what to do, and NORTHCOM should not be coming in there and telling them what to do, which is part of the problem that we got into over in Louisiana with Hurricane Katrina.

You were very receptive to those ideas about letting the experts make decisions instead of somebody coming in and telling the experts how they should do it and then getting all balled up.

Admiral Keating, you clearly have quite a challenge in your area of responsibility with North Korea, and hopefully the first little step of progress that we have seen is going to bear more fruit. If China will concentrate more, instead of putting a bunch of space debris through their anti-satellites, threatening everybody's satellites, everybody's in the world, and instead concentrate more on using their friendly persuasion with North Korea to at the end of the day do what China wants, which it does not want a nuclearized Korean peninsula, then that is all to the good for the entire world. That is in your bailiwick.

General Van Antwerp, congratulations on your success in recruiting. I hope under these difficult circumstances it is going to continue. Now, of course, you and I visited about the Everglades restoration, which is so critical, not only to Florida but to the delicate environmental balance throughout the world.

I would just point out one other thing that I did not get to point out in our personal conversation. It is particularly acute in Florida, where in the Florida Department of Environmental Protection, they have a permitting process. It is almost exactly a mirror image of the same permitting process of the Army Corps of Engineers. As a result, what you get is a great deal of frustration by someone seeking a permit, that they go through all of this and then they go and do the very same thing with you, and where the two of you administratively can combine the efforts, since at the end of the day what we are trying to do is protect the environment, but make that administrative process an easier one, not a more relaxed one, just a more administratively smooth one.

It is going to take somebody like you making sure that the folks down the line are doing it. Now, your new colonel down there in Florida, Colonel Grosskrueger, is sensitive to this and if you would give some signals from up high on Mount Olympus I think that would be very much appreciated.

The other problem that we have in a growth State like Florida—and by the way, all my colleagues just could not believe it when I told them. I said, “do you know what the number of new registered voters between the two presidential elections are in Florida, between 2000 and 2007?” My colleagues in the Senate could not believe me when I told them it was 3.9 million new registered voters within a 4-year period.

That is the kind of growth that we have going on, and that is just reflective in registered voters. We are getting a net growth of close to 400,000 per year. In 2012, Florida will overtake New York and become the third largest State.

General, you do not have enough people in the Jacksonville District to handle this growth, and as a result there are delays and frustrations. Your people are working just as hard as they can work. They are great public servants. They just need some more in a growth State that is highly environmentally sensitive like Florida.

Mr. Chairman, I had a wonderful visit with all three of them and that would be my additional exclamation point. Thank you.

Chairman LEVIN. Thank you, Senator Nelson.

General VAN ANTWERP. Thank you, Senator.

Chairman LEVIN. Senator Thune.

Senator THUNE. Thank you, Mr. Chairman. I want to thank our distinguished panel for your service to our country and for your continued service and I look forward very much to getting you into these new posts and positions and to the good work that you will do there. Let me just add a couple questions.

Admiral Keating, I would like to follow up on—and this line of questioning maybe has already been pursued this morning, but with regard to China. China is investing a vast amount of resources into its naval capabilities and I am interested in knowing, if confirmed as PACOM commander, what steps you will take to ensure that U.S. forces in the Pacific region can meet these threats, particularly the threat from China’s growing submarine fleet.

Admiral KEATING. Sir, if confirmed, we will continue PACOM’s current policy of paying very close attention to China’s development. In gross numbers it is impressive; in percentage of their

budget, if reports are fairly accurate. They are well behind us technologically. We enjoy significant advantages across the spectrum of defensive and offensive systems.

In particular, undersea warfare is an area of concern. We will pay close attention to it, if confirmed. I have had the pleasure of cruising throughout those waters on considerable regularity in my earlier career, Senator, and I can assure you that we are not unfamiliar with the challenges and we have significant advantages now and we are not going to yield those advantages.

Senator THUNE. A question for General Van Antwerp and this has to do with, there are two divisions dedicated to the war effort. One is the Gulf Region Division, which is focused on rebuilding operations in Iraq, and that was activated in January 2004; and the other is the Afghanistan Engineer District, which was activated in March 2004. One of the many projects the Corps is involved in is the award of several contracts for repair of Iraq's oil infrastructure.

How has that contract that was awarded in 2004 improved the production of oil in Iraq?

General VAN ANTWERP. Senator, I am going to have to study that. That is a great question. I am familiar with the contracts in that, but as far as the improvement that they have made, I will have to take that and get back to you. But I certainly would study that and, if confirmed, that would be a priority, to get into those contracts and what their production is, because in the end game that is what it is all about.

Senator THUNE. I appreciate that and if you could answer it for the record it would be great, because that is such an important part of our success there, making sure that the oil infrastructure is intact, they are able to produce, and then to divide oil revenues in a way that enables each of the various sections of the country to prosper. That clearly is a focus of our strategy there at the current time and I am just curious to know to what extent the work that has been done there may have aided in moving that process along.

[The information referred to follows:]

The purpose of the oil infrastructure program in Iraq was to restore production capability existing prior to Operation Iraqi Freedom. At the beginning of the Iraq Relief and Reconstruction Fund (IRRF) Oil program, a goal of 3 million barrels per day (MBPD) production capacity was set and projects were selected that would support achievement of that goal. Key projects included providing materials for 20 Gas Oil Separation Plants, refurbishment of an offshore export terminal, and an oil well logging and work-over program. This investment of capital, while minimal in terms of what is needed on an annual basis to maintain consistent oil production, has allowed the production of oil and associated gas to be maintained at a reasonable level until Iraq can execute the level of investment required to increase its annual output of crude oil and associated gas.

As the Gulf Region Division Oil Sector Reconstruction program concludes in May 2007, it is my understanding that the 3 MBPD capacity objective will be achieved. However, I also understand that this capacity is not yet reflected in actual crude oil production volume, which is currently in the range of 2.1 MBPD. This is due primarily to the interdiction of a crude oil stabilization plant in the north and repeated interdiction of the Iraq-Turkey export pipeline by insurgents. Even though the capability to produce 3 MBPD is expected to be achieved, actual production will only reach this level when the Government of Iraq is successful in curtailing the insurgent activity that affects the transport of the crude oil out of Iraq.

Senator THUNE. Thank you very much, gentlemen, for your service. I look forward to getting you confirmed.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Thune.

Let me pick up now on a second round of questions. First, General Renuart, one of the lessons from Hurricane Katrina was the need for better planning, coordination, and integration among NORTHCOM, the National Guard, and the Federal and State emergency response agencies in the event of a domestic disaster. We saw delays and confusion among State and Federal officials that made a horrible situation even worse.

How would you have NORTHCOM improve the planning and coordination among the various Federal and State response entities in the event of a domestic disaster, so we do not have a repeat of the post-Katrina problems?

General RENUART. Mr. Chairman, in the aftermath of all that there was a great deal of effort put to the lessons learned process to try to determine where there were seams and gaps among all the participants. I know Admiral Keating had in preparation for last year's hurricane season put in place a very detailed review, a process of creating pre-scripted mission orders, if you will, for all of the responding agencies, prepositioning equipment in key areas in the southeast such that they can be used on short notice and brought to bear.

I think all those efforts are critically important. I know NORTHCOM has just completed a similar preparation process for this hurricane season and, if confirmed, I am completely committed to continuing that effort, with a special effort on the command and control communications such that they are interoperable, not just among the Guard and the Active Force, but among the various Federal agencies who would respond. I do know that there has been some effort in that regard already and we would continue to do that.

Chairman LEVIN. Thank you.

General Van Antwerp, the Army Corps' handling of a large contract with Halliburton for the reconstruction of the Iraqi oil industry has been widely criticized. Before the war, Halliburton was given the assignment to study the Iraqi oil industry without competition under an existing contract. The Army Corps then awarded Halliburton a sole source contract with a value of up to \$7 billion over a period of up to 5 years.

The senior contracting official for the Army Corps was so disturbed by that contract award that she wrote a note on the approval document itself cautioning against extending the contract beyond a 1-year period.

Now, in your responses to pre-hearing questions you agreed that "competition is the very foundation of government contracting and in general the term of a contract awarded under the urgent and compelling exception to competition should not ordinarily exceed the time reasonably required to award a follow-on contract."

A 5-year contract—does that not exceed the "time reasonably required to award a follow-on contract"? Would you make every effort, if confirmed, to ensure that the Corps avoids awarding sole source contracts of comparable duration in the future?

General VAN ANTWERP. Senator, those are great points. As I stated in my response there, I do believe in competition. I think it is

what gives you best value. I think there are times when you need a bridging contract, an early one, but I agree in concept with the timelines established there.

Chairman LEVIN. Established where?

General VAN ANTWERP. Established that it should be a short duration and then as soon as possible and practicable you ought to go and do a competitive bid.

Chairman LEVIN. Thank you.

You stated, General Van Antwerp, in response to the pre-hearing questions, that you were not aware of major failures of the Army Corps contracting for reconstruction and relief in the wake of major hurricanes in 2005. I recognize you are not personally responsible for the particular contracting I am going to ask you about. But there were press reports that described several cases in which work was passed down from the Army Corps to a prime contractor, then to a subcontractor, and then to another subcontractor, with each company charging the government for overhead and profit, before finally reaching the company that would actually do the work.

In one such case the Army Corps reportedly paid a prime contractor \$1.75 per square foot to nail plastic tarps onto damaged roofs in Louisiana. That is \$1.75 a square foot. The prime contractor paid another company, a subcontractor, 75 cents to do that same work, per square foot that is. The subcontractor then paid a third company 35 cents per square foot to do the work, and that subcontractor reportedly paid yet another company 10 cents per square foot to do the work.

In a second such case, the Corps reportedly paid prime contractors up to \$30 a cubic yard to remove debris and the companies that actually performed the work were paid from \$6 to \$10 a cubic yard.

So would you agree that it would be a contracting failure if the Corps paid \$1.75 per square foot for work that cost only 10 cents per square foot to perform?

General VAN ANTWERP. Sir, I would agree in concept with your supposition there. I also believe that if there is proper competition that it will eliminate a lot of that tiering. So again, it goes back to that competition is very important.

Chairman LEVIN. Would you take strong action, if confirmed, to ensure that the Corps does not pay such excessive pass-through charges in the future?

General VAN ANTWERP. I will, sir.

Chairman LEVIN. I just have one additional question and then I will be done. I do not want to go over my time, Senator Warner.

Senator WARNER. Why don't you go ahead?

Chairman LEVIN. Thank you very much. One of the great challenges in the Great Lakes for the Corps is the dredging that is done in the Great Lakes and the significant backlog of dredging that exists. The Corps estimates a backlog of 16 million cubic yards at commercial harbors that need to be dredged and that backlog is expected to cost about \$192 million. It has had real impacts on our shipping. Several freighters have gotten stuck in Great Lakes channels. Ships have had to carry reduced loads and many shipments have just simply ceased altogether.

The dock in Buena Vista Township reported a reduction of 25 percent in ship tonnage. Tugboats have been needed to turn boats around because channels have not been dredged, at a cost of \$15,000 to \$20,000 each week. In one case, a freighter ran aground at Saginaw last year and the ship's rudder was torn off.

This problem stems in part from the way the Corps' budget is prepared using metrics such as cargo tonnage and ship miles. But the performance metrics treat the Great Lakes like a river system, which results in funding inequities. The Corps spent about 5 cents per ton of cargo carried in the Great Lakes. That should be 52 cents per ton, 52 cents per ton of cargo carried in the Great Lakes, but the Missouri River received about \$15 per ton of cargo carried. So that is about 30 times as much per ton for the Missouri River as was the case for tonnage that was carried in the Great Lakes.

Will you take a look at those budgeting guidelines if you are confirmed, to assure equitable funding allocations for the Nation's shipping infrastructure?

General VAN ANTWERP. Yes, Senator, I will.

Chairman LEVIN. I have a couple more questions. Senator Warner, let me turn to you.

Senator WARNER. Why do you not go ahead? I am going to be here for a while.

Chairman LEVIN. Let me try to wind this up. I thought I only had one more, but there were two additional questions I did not realize I had.

The Senate Homeland Security and Governmental Affairs Committee's investigation of Hurricane Katrina found that the problems with the New Orleans hurricane protection system could be attributed in part to "infrastructure elements being designed and maintained by multiple authorities." The team leader of the National Science Foundation's Katrina investigation testified before that committee and stated that "No one is in charge. You have multiple agencies, multiple organizations, some of whom are not on speaking terms with each other, sharing responsibilities for public safety. There is a need to coordinate these things."

General, as Chief of the Engineers, how would you improve the Corps' operation, maintenance, and inspection activities in order to avoid that kind of multiplicity and in order to better protect our people and our investments?

General VAN ANTWERP. Mr. Chairman, I believe firmly in communication. It starts there, and then there needs to be a very fixed responsibility for the asset, and there needs to be joint inspections, so that when you go through and you determine what needs to be done and then you fix responsibility for that and then there is a procedure to determine how it is paid for and what the cost-sharing ratios are.

But a lot more joint work, as you alluded to, and much better communications. I think it will be something that I will definitely get into early on as a priority.

Chairman LEVIN. We have major problems in the Great Lakes and in the Mississippi River watershed from the spread of invasive species. Congress authorized a dispersal barrier demonstration project in the National Invasive Species Act of 1996. It is not the permanent barrier that we need, particularly against a species

called the Asian carp, and so we need to have a permanent protection from that particular invasive species, because it poses huge threats to our fisheries and our ecosystems, and we just have to have a permanent barrier, not just a demonstration barrier.

The health and the economic vitality of the Great Lakes depends on a lot of stakeholders. It is a huge issue for those of us who are in Great Lakes States. The Army Corps plays an essential role in that protection and in that health and economic vitality. I just want to point it out to you. I know that you are sensitive to it because of your background and where you were born and raised. But I just want to just keep that front and center if you would.

General VAN ANTWERP. Yes, Mr. Chairman.

Chairman LEVIN. Finally, my last question has to do with a fund called the Harbor Maintenance Trust Fund. It has a \$3 billion surplus and it is growing every year. Yet there are waterways and small harbors, including harbors of refuge in Michigan, that are silting due to the lack of sufficient funds for dredging, as I have mentioned before. Will you take a look at these budgets and will you make sure that the Office of Management and Budget is aware both of the Harbor Maintenance Trust Fund and of the dredging needs of the Great Lakes when they develop the administration's future budget requests?

General VAN ANTWERP. Yes, sir.

Chairman LEVIN. Senator Webb, you are next, but should I call on Senator Warner?

Senator WEBB. If you would, Mr. Chairman. I will be right with you.

Chairman LEVIN. Thank you.

Senator Warner.

Senator WARNER. Thank you, Mr. Chairman.

Admiral Keating, in your response to the committee's advance questions you very forthrightly, and I stress "forthrightly," addressed a continuing challenge for those who have preceded you and for you, and that is, and I quote your own language, "influencing cross-strait relations between China and Taiwan."

How do you propose to carry on Admiral Fallon's very adroit and skillful handling of that issue, and what would you hope to add to it? Certainly here in Congress at the present time there is complete respect and adherence to the framework of laws we have there and our policy towards the two Chinas, so to speak. But I would like to have for the record your own perspective on this challenge and how you propose to deal with it, because I am, speaking for myself here, very concerned from time to time at some of the rhetoric that emanates from sources that are well known to you and the inflammatory nature of that rhetoric. I would hate to see it spark a conflict.

Admiral KEATING. Senator, if confirmed, those relations and sustaining the calm that appears the pervade today across the Straits of Taiwan will be a principal goal of ours at PACOM. I know you are very familiar with the Taiwan Relations Act. We understand that act.

Senator WARNER. Yes, that is what I was referring to.

Admiral KEATING. Yes, sir. In dealing with the People's Republic of China and with the Government of Taiwan, we would emphasize

that China has to be very careful in the development of offensive weapons. We want to sustain Taiwan's notion of a defensive front from their military capabilities. We would encourage increased dialogue between those two countries on an informal basis, and we are not unaware of the burgeoning economic engine that is trade across the Straits of Taiwan. So we would encourage all those positive signs. We would do our best to make sure that both sides were aware of our close observation of developments, and we would do our best to sustain the harmony that does appear to be the situation across the Straits of Taiwan today.

Senator WARNER. I thank you. I wish you support in that endeavor.

Admiral KEATING. Thank you, sir.

Senator WARNER. General Van Antwerp, I have had the privilege of working with many of your predecessors during the years, and I say this part in humor, but part in reality. You probably have one of the most political appointments to be found in DOD. Looking over your background, which has been a magnificent accomplishment of a professional military man, I suggest you begin to take a tutorial, if you have not already done so, as to how to deal with this.

I have found through the years one of the core problems that arises between Congress, which understandably has a need to be very closely advised with regard to the work that you do, given that so much of that work impacts our States—but you stated in your advance questions—and I always go through these rather carefully. You said as follows: "The integrity of the Corps of Engineers rests on the objectivity, transparency, and scientific validity of its analytical processes."

Let us focus on the word "transparency." It means a sharing with the public, with Congress, and others the nature of your challenges and how you best think you can address it.

General VAN ANTWERP. Senator, I agree with that word. I believe that should be in the communications strategy. We need to let America know of the risks as we are working for the public safety. The problem always is where you identify the risks, until the studies have been finished you do not know the full extent. But I believe in going with as much transparency as you can. In the Army we call it "go ugly early," so you get it out there and get the discussions going. That helps frame a lot of times the solution. So I believe in that transparency.

Senator WARNER. I thank you.

I would like to take a cue from my distinguished colleague's line of questioning here about the Great Lakes. I would like to return to a very simple matter in my State, since we are going to deal with our States here for a little bit. I have been on this committee 29 years and I think about 20 of those years I have been trying to work with the Corps on building a much-needed dam in Virginia. You and I discussed it yesterday, but I would like to put a little bit on the record—which through the years, given the growing nature of that geographic area of Virginia, namely the Newport News area, is absolutely essential to maintain the health and safety of the people of that community, all the people, not just those that live right in particular areas, but a lot of the Indian tribes

that we are very proud to have in our State are co-located there, understandably, and I respect greatly their desire to preserve their heritage. But we still have some lingering problems related to that, which I hope we can resolve.

You have studied a little bit on it and without getting into too many specifics for the future, do you think that project can go forward? Because I think we have in 20 years gotten it to the point where all of the basic steps to be performed by the Corps have been done and done carefully. The environmental steps have been taken care of. Do you project that project can now go forward in the near future?

General VAN ANTWERP. Senator, I believe it can go forward. I think we have to have this engagement strategy with our Indian tribes to make sure we have dealt with their objections and looked for possible mitigations. But I believe everything else is in place, from what I have read, to move forward.

Senator WARNER. Coming back to Admiral Keating and General Renuart, let us talk about the fact that how our law, with regard to the security of our Nation, puts a great deal of emphasis on how in the aftermath of a calamitous terrorist attack or other national catastrophe that the Department of Homeland Security and other State and local agencies have the primary initial responsibility, and NORTHCOM's mission is to provide support to civil authorities when directed by the President or the Secretary of Defense, which means you have to keep a constant assessment of what you have available in the Active and Reserve components of our military to meet these unanticipated and often very quick demands.

As you pass these authorities over to the General, Admiral, fortunately on your watch you have not had a major situation, but we have to always plan for it. Given the extraordinary contribution of the Guard and Reserve in the conflicts in Afghanistan and Iraq, I think it is generally recognized that the Guard and Reserve require some very special consideration in the coming years to first resupply their equipment and second to work on their rotations so that they can continue to be a civilian as well as a military guardsman or reservist.

It has gotten to a critical situation, this Guard and Reserve. As you pass off, perhaps you can address your concept of the criticality. Maybe you are aware of the Commission on the Guard and Reserve and their report. Why do you not start with their report, which seemed to indicate that perhaps as you pass this challenge over to your successor you will have to answer that report.

Admiral KEATING. Yes, sir. I was given the privilege of testifying before Chairman Punaro's committee and I am aware of the report. I have seen the executive summary. I have not read the report in its entirety.

Senator WARNER. Let me read the one sentence here which I find somewhat troubling. The report by the Commission on the roles and missions of the National Guard and Reserve finds that the Commander of NORTHCOM "does not sufficiently advocate for the full range of civil support requirements affecting the National Guard and Reserves."

Why do you not pick up from that?

Admiral KEATING. I disagree with that assessment, Senator. We have on two occasions in the 2 years that I have had the privilege of being at NORTHCOM gone forward with an official submission to DOD, an integrated priority list and a program objective memorandum input for the fiscal year 2008 budget in which we recommended specifically advocacy for certain Guard programs, including their civil support teams and joint headquarters in each State.

So I disagree with that assessment and so testified in my original testimony before Chairman Punaro's committee. We have, as you may know, Senator, a full-time Active-Duty title 10 two-star Air Guardsman as our chief of staff. That billet has always at NORTHCOM been filled by a National Guard or Air Guardsman. We have 5 other flag or general officers who are assigned to our staff and we have over 100 Guardsmen or Air Guardsmen who serve full-time on our staff. I think we are adequately represented and, more importantly, we are critically aware of the importance of a firm understanding of National Guard capabilities and their essential role in executing our military mission of providing support to civil authorities. We are very conscious of it and we support the Guard in many ways on the record and in conversations with the Guard Bureau.

Senator WARNER. I wanted to give you this opportunity to put that in the record.

Admiral KEATING. Thank you, sir.

Senator WARNER. As you pass over these responsibilities, I think we all agree that the criticality of the Guard and Reserve at this time as a consequence of their very courageous and forthcoming contribution to procuring the goals both in Iraq and Afghanistan have left it in some rather unusual circumstances. I am not suggesting it cannot continue to carry out its missions, but it needs help. Given the fact that it needs help, it seems to me that impacts you, General Renuart, as you pick up this responsibility. I hope that one of your first priorities is to fully acquaint yourself with the status of the Guard and Reserve, its ability to respond to orders that you will get from the President and/or Secretary of Defense as a consequence of a catastrophe that the local authorities, State authorities, and the Department of Homeland Security simply cannot deal with and therefore has to look to the resources of DOD. You are the coordinator on that.

Do you have any view?

General RENUART. Senator, thank you for that, and I want to underline the work that Admiral Keating and the staff at NORTHCOM have done advocating for the Guard. If you look at the current supplemental request that is being worked as well as the fiscal year 2008 budget, there is a substantial portion of the budget put in to re-equip some of these shortfalls in the Guard and Reserve.

If confirmed in this position, it will be one of my principal priorities to not only establish a better understanding on my behalf of the requirements for the Guard and Reserve, but to continue to be the strong advocate in the Joint Requirements Oversight Council process for those requirements and to work towards getting them funded and resupplied.

Senator WARNER. One last question, Mr. Chairman. It relates to a subject that I have followed very closely. I will never forget, on September 11, Chairman Levin and I went over to the Pentagon. You remember that day?

Chairman LEVIN. I do indeed.

Senator WARNER. We went down with the Secretary of Defense and the Chairman of the Joint Chiefs into the tank and periodically with the Secretary of Defense we went back to the scene and watched the various elements of first responders dealing with a situation I will never forget as long as I live. Extraordinary bravery and courage.

But we also saw the failure of interoperability between segments of those first responders and other important areas where they were receiving information and instructions. That seems to continue to be somewhat of a problem; is that correct, Admiral, as you step down?

Admiral KEATING. There is work to be done, yes, sir.

Senator WARNER. There is work to be done. Have the two of you had a chance to carefully outline your perspectives on the volume and the nature of that work that has to be done?

Admiral KEATING. We have.

General RENUART. Yes, sir, we have.

Senator WARNER. I find that reassuring, that you will do that, because that has to be the highest priority. The next time you appear before this committee, God willing, if I am back up in this chair that is the first question I am going to ask you, General Renuart: What is the status of that interoperability of communications?

General RENUART. Senator, thank you, and I, if confirmed, look forward to the chance to speak with you further about it.

Senator WARNER. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you.

Senator Webb, I just want to thank Senator Pryor. He technically, a technicality, he was next. I bypassed Senator Webb once and I appreciate Senator Pryor allowing me to call on Senator Webb at this time.

Senator Webb.

Senator WEBB. Thank you, Mr. Chairman. Also I would like to thank my colleague for allowing me a few minutes here.

I would like to first apologize to the witnesses. This is one of these situations, I am on four committees and all four of them called hearings this morning, plus the Leader called a meeting of the new Senators on the budget issue. So I literally had to be five different places at the same time.

I wanted to come by and first of all pay my respects to all of you for the service you have given and to your families for the contributions that you have made. I had the opportunity to have pretty extensive one-on-one visits with Admiral Keating and with General Renuart and most of the questions that concern me were asked in that forum. I am not going to repeat them here. I do not think there is any real necessity to put anything into the record, but I think we all know where the issues are. I have great confidence in both of you in terms of the operational experience that you are

bringing to the positions, which I think is vital in terms of how the American military works.

Admiral Keating, as I said when I met with you, I think you have the position that historically is probably the most revered position for any naval officer. It is not only a position of great historical esteem; also right now it is I think one of the most important positions that anyone could have regarding the future of our country.

One of the things that I have been greatly concerned about as the national attention has become so focused on the Iraqi involvement and the way that we have approached that issue is that we are taking our eye off the ball in terms of where our long-term strategic challenges are. Those are heavily in your region. I have long experience in that region as a military person, as a journalist, as a businessman, and in the Government. I am looking forward to working with you on those issues as a member of this committee and also as a member of the Foreign Relations Committee.

General, I wish you well.

General Van Antwerp, I did not get a chance to visit with you personally. I have examined your credentials and I am obviously going to support you. I have one issue that I would like to address for today to hear your views on, but also as something that I want to mark for the future. I have a great deal of concern about what happened at Hurricane Katrina. When I examine that tragedy, it had three different components to it. One is the potential that we had with proper planning to actually have prevented the failure of the levee system and so much of the catastrophic effect from when the levees broke. The second was the management of the crisis itself. The third is the aftermath, in which I think the Corps of Engineers has done a really marvelous job.

But with respect to planning and also with respect to the next evolution of attempting to prevent a similar situation, I do have some concerns. Maybe you can clarify something for me. I have read in a number of places that the Corps of Engineers was recommending funding levels at far higher levels than actually were put into place with respect to—I do not know what the right engineering term would be, but revitalizing the levee systems. I cannot say repairing them because from what I am reading they were sort of flattening out; but that there was an estimate done by the Corps of Engineers saying that these levee systems needed to be dramatically invigorated. I can choose the word. You see what I mean.

But is that not so, that the Corps of Engineers was warning before this incident that there should be funding for a different sort of approach to the levee system?

General VAN ANTWERP. My understanding, Senator, is that there is a number of design things that were looked at and one of the solutions is what they call a T-wall. You have basically two things you can do. You can spread it out over a larger piece of ground and shape it differently and make it higher, or you can have internal parts of that structure. So I believe you are correct in that. I do not know all the budget figures, but if confirmed I would certainly get into that and look at what we are doing on those repairs.

Senator WEBB. What I would like is to have a better understanding of that. I do not think this is simply retroactive. If you could

provide for us what the recommendations were from the Corps of Engineers with respect to the health of the levee systems in, say, the 6 or 7 years before this incident, because I would like to be able to either validate what I read or understand that it was not true, because what I have been reading is that the Corps of Engineers was specifically warning that a certain level of funding would be necessary in order to preclude what exactly happened.

Just anecdotally, I can tell you—my wife is from New Orleans. We were down there a little less than a year ago. I went down into one of these areas that had been wiped out, where the levee had broken. Everyone has their stories, but it was kind of illuminating to me. I was just trying to find somebody to talk to. Everyone is gone. You had the little trailers out front. I did not want to just impose myself on somebody walking along the street, but I was driving along one of these burned-out areas and I saw a Marine Corps flag in somebody's back yard and I figured, well, that person I could at least open up a discussion with.

There was a gentleman there who had lived in the same house for 51 years and lost everything, gone completely. I asked him during the course of a conversation what his thoughts were about the prevention of this. He told me he had been on one of the commissions for 20 years before this happened and that they had been saying over and over again that these levees were flattening out. So maybe it is this T system you are talking about, but they could measurably see that they were flattening out, and as a result it would be much easier for the water to broach them than they would have been perhaps even at the same height if they were straight, just the angle of flow and this sort of thing.

I really would like to know: (A) what the Corps of Engineers was saying about this. I think this is important for the historical record, and then (B) what are the recommendations now? Because one thing that we have been seeing in terms of the debate is to what extent are these levees going to be rebuilt, to what level of the next hurricane are they going to be able to withstand?

I cannot think of any more important function that you would be doing in your job than helping us make sure we get that right. I would appreciate your thoughts on both of those in as timely a manner as you could provide them for us.

[The information referred to follows:]

The Corps recognized the urgency to complete construction of the ongoing levee projects, as well as the design and approval for new levee projects for the Greater New Orleans Area. The Corps' annual budget request included funding for the ongoing hurricane protection projects. The West Bank and Vicinity Hurricane Protection Project was budgeted annually at a funding level to complete the first level of protection as quickly as possible. The ongoing study to evaluate higher levels of protection in several parishes in southeastern Louisiana was proceeding to the feasibility phase. Several areas were identified for evaluation for raising current levee systems, construction of barriers that may prevent storm surges from moving inland, and wetlands construction and restoration.

The Corps of Engineers is committed to designing and constructing the best hurricane protection system for people and the environment within the resources provided and remains focused on restoring levees and floodwalls to the authorized heights and completing all planned projects in conjunction with the ultimate goal of providing 100-year protection for the system, as directed by Public Law 109-234. Additionally, several measures to provide higher levels of protection are now being reviewed under the Louisiana Coastal Protection and Restoration Act evaluation requested by Congress following Hurricane Katrina. This evaluation includes non-

structural measures and coastal restoration as a way to provide comprehensive hurricane protection.

Senator WEBB. I have run out of time and I wish all of you gentlemen the best in your new positions.

Chairman LEVIN. Thank you, Senator Webb.

Senator Pryor.

Senator PRYOR. Thank you, Mr. Chairman. I apologize for having to be in two places at once, not five places at once like some people here. But anyway, I have had to come and go, and I have not had a chance to listen to all the nominees' answers. But I really appreciate the panel being here today.

General Van Antwerp, let me start with you and follow up on a conversation we had in my office a few days ago. We hear a lot of comments in my office from communities on the Arkansas border riverways about the levee system. Apparently FEMA has come out with this in order to modernize their flood insurance rate maps, they feel like we need to inspect all our levee systems, et cetera, et cetera. This has a huge impact on the cost of that and who bears that cost, and the cities, et cetera, are very concerned about that; and second, on insurance rates for people living in those areas.

Do I understand it correctly that the Corps of Engineers' role in this is to conduct these certifications?

General VAN ANTWERP. That is correct, Senator.

Senator PRYOR. Do you pay for that or do you require the owners of the levees to pay for that?

General VAN ANTWERP. Senator, I am not sure of the answer to that question. It is possible that it could be cost-shared, but I believe it is borne by the Corps. But I will have to reply to you on that.

[The information referred to follows:]

In accordance with Corps of Engineers guidance issued in August 2006 and FEMA regulations, in general, the levee owner is responsible for certifying the levee and paying the associated costs. In this particular instance however, these levees in Arkansas are owned and operated by the Corps of Engineers as part of the Mississippi Rivers and Tributaries project. Therefore, the Corps of Engineers is responsible for certifying and paying the costs, provided that funds are appropriated for this work.

Senator PRYOR. In terms of the evaluation of these levees and also repairing the levees if they need to be repaired, obviously that is very important. It is going to be very difficult the smaller the entity is for them to bear that cost. I am not picking on anybody, but St. Louis probably has a better budget to handle that than, say, Little Rock. Little Rock is going to have a better budget than, say, Russellville, AR, and Russellville is going to have a better budget than just a levee district probably will, all things being equal.

That is something that is very important to us. So as you take this post, I would just encourage you to remember the practical ramifications of this and work with Congress and work with local people on cost-sharing and spreading that cost and making that as painless as possible. Please do that.

The other thing about our transportation needs in this country, when you look out over the future we know right now already that we have a lot of rail corridors that are clogged, overused, and there is a lot of congestion. We also know that our highways are con-

gested with big trucks. By the way, those numbers are fairly alarming, about how many more big trucks will be on the road over the next 20 years. We have seen some statistics on that in the Senate Commerce Committee and it is something that we obviously need to invest in infrastructure there.

We also need to invest in our river infrastructure. This is very important, not just for a State like mine, but really States all over the Union. In fact, Mr. Chairman, you might be interested to know that a few years ago I went to one of our steel mills. We have some steel mills in Arkansas. Most of them, not all but most of them, are on the Mississippi River. What they do is they recycle steel. A few years ago, it was cheaper for them to go to Europe and buy the steel, ship it, barge it up the Mississippi River, and get it to us in Arkansas than it was to pay the freight via rail through Chicago.

It was cheaper to come from Europe on the water than it was rail from Chicago. Obviously, they have a lot of scrap metal in Chicago that we could be using, but they look at the cost.

So having good waterways and that good infrastructure on water, they are very important to the economy of this country. I just wanted to make sure you understood that.

General VAN ANTWERP. I agree. The statistics I have seen is for large growth, both in the navigable waterways, but also in our ports and harbors.

Senator PRYOR. Yes. To me it just seems that we cannot forget about our waterways as we look at infrastructure needs. A lot of the locks and dams are old. They were engineered and built a long time ago. Do you have any sort of plan to modernize those or upgrade those, or are we just going to do that as needed?

General VAN ANTWERP. I understand there has been a comprehensive look and we know what the risks are out there. Of course, in many cases it is a matter of authorization and dollars. But I am told that the Corps has a good understanding of what needs to be repaired and those surveys have been done.

Senator PRYOR. There was plenty of blame to go around after Hurricane Katrina happened and everybody probably shares a little bit of the blame and deserves a little bit of the blame. But one of the groups that was singled out specifically for a lot of blame was the Corps of Engineers and how they designed and did some of their work down in New Orleans and down in the southern Louisiana area.

Do you think that criticism is justified?

General VAN ANTWERP. Senator, I agree, I think, as you take a look back, there is always a lot of contributing factors. In many cases it is projects that were done years and years ago with the best of intentions, things that impacted wetlands or the outlets into the Gulf. Certainly the levees are an integral part. I believe it has to work as a system and so you have to look at all aspects.

It is also a fairly difficult area to construct and there was some settling, from the reports I have read, of some of the levees, which meant that they did not have the height to be able to take the storm as it came, so they really did not provide the 100-year protection. I think we all have a responsibility in that.

Senator PRYOR. The last question I have is, I know you have a huge commitment in Iraq. Given the relatively new commitment

for you in Iraq, do you have the resources necessary to meet your domestic obligations?

General VAN ANTWERP. Since we had our discussion in your office, I have looked into that some. Right now we are doing fine as far as I understand it. Actually, there is still good competition for positions that take critical skills. The longer we go here, there will be impact. We have almost 400 people in Iraq and 160 in Afghanistan, civilians. That is not counting about the 100 military that are there.

That is something we really have to keep our eye on and whether there is another source of those critical skills. You cannot just take anybody and have them supervise a project. They have to know what they are doing. So, if confirmed, I would take a close look at what those skills are and what is in the pipeline to keep those.

Senator PRYOR. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you. Senator Pryor, do you have any additional questions?

Senator PRYOR. I do not. Thank you.

Chairman LEVIN. Thank you.

I have no additional questions. Again we commend you all and we thank you and your families for your service.

We will stand adjourned and hope that we can promptly get to your confirmations.

[Whereupon, at 11:16 a.m., the committee adjourned.]

[Prepared questions submitted to ADM Timothy J. Keating, USN, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I do not see any need to modify the Goldwater-Nichols Act.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I do not see any need to modify the Goldwater-Nichols Act.

DUTIES

Question. What is your understanding of the duties and functions of the Commander, U.S. Pacific Command (PACOM)?

Answer. The Commander, U.S. PACOM is responsible for deterring attacks against the United States and its territories, possessions, and bases, to protect Americans and American interests and, in the event that deterrence fails, to fight and win. The Commander is also responsible for expanding security cooperation with our allies, partners, and friends across the Asia-Pacific region.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. Thirty-six years of military training and experience, to include previous combatant command of the North American Aerospace Defense Command and U.S. Northern Command (NORTHCOM), have prepared me for assuming command of

the U.S. PACOM. During Operation Iraqi Freedom, as Commander, U.S. Naval Forces Central Command, I planned and executed coalition and joint warfighting missions. As Director of the Joint Staff, I have gained invaluable insights into the conduct of joint operations, the duties of a combatant commander, and interagency cooperation. In addition, I gained regional experience as Commander of Carrier Group Five in Yokosuka, Japan and, additionally, on several operational deployments to the Pacific theater.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, U.S. PACOM?

Answer. If confirmed, I intend to take every opportunity to enhance my knowledge of our relationships with our allies and partners across the Pacific. I look forward to engaging with senior leaders within the Department of Defense (DOD), the Department of State, and military and civilian leaders throughout the Asia-Pacific region in order to improve my understanding of U.S. interests in the region.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the commanders of the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander, U.S. PACOM, to the following officials:

The Secretary of Defense.

Answer. The Commander, U.S. PACOM, performs his duties under the authority, direction, and control of the Secretary of Defense. He is directly responsible to the Secretary of Defense for the ability of the Command to carry out its missions.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense performs duties as directed by the Secretary and performs the duties of the Secretary in his absence. The Commander, U.S. PACOM, ensures the Deputy has the information necessary to perform these duties and coordinates with him on major issues.

Question. The Under Secretary of Defense for Policy.

Answer. Under secretaries are key advocates for combatant commands' requirements. The Commander, U.S. PACOM, coordinates and exchanges information with the Under Secretary of Defense for Policy on strategic policy issues involving the Asia-Pacific region.

Question. The Under Secretary of Defense for Intelligence.

Answer. The Commander, U.S. PACOM, coordinates and exchanges information with the Under Secretary of Defense for Intelligence as needed to set and meet the Command's intelligence requirements.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. While the Chairman is not in the chain of command that runs from the President and the Secretary of Defense to combatant commanders, his role as the senior uniformed military advisor is critical. The Commander, U.S. PACOM, supports the chain of command as directed in title 10 and communicates with the Chairman to enable him to perform his duties as the principal military advisor to the President and the Secretary of Defense.

Question. The secretaries of the military departments.

Answer. The secretaries of the military departments are responsible for the administration and support of forces assigned to combatant commands. The Commander, U.S. PACOM, coordinates with the secretaries to ensure that requirements to organize, train, and equip PACOM forces are met.

Question. The Chiefs of Staff of the Services.

Answer. The Commander, U.S. PACOM, communicates and exchanges information with the chiefs of staff of the Services to support their responsibility for organizing, training, and equipping forces. Successful execution of U.S. PACOM's mission responsibilities requires coordination with the Service Chiefs. Like the Chairman, the Service Chiefs are valuable sources of judgment and advice for combatant commanders.

Question. The other combatant commanders.

Answer. The Commander, U.S. PACOM, maintains close relationships with the other combatant commanders. These relationships, which are critical to the execution of our National Military Strategy, are characterized by mutual support, frequent contact, and productive exchanges of information on key issues.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the next Commander, U.S. PACOM?

Answer. Traditional security challenges include ensuring peace and stability on the Korean Peninsula and influencing cross-strait relations between China and Taiwan. We must also address other security issues, especially the threat of terrorism, weapons of mass destruction (WMD) proliferation, and transnational crime such as narcotics and human trafficking and piracy.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will posture our military forces to dissuade, deter, or defeat any potential adversary. I will work with other DOD organizations, agencies of the U.S. Government, and our many friends and allies to assure the region of our strong resolve and lasting commitment to stability, security, and prosperity throughout Asia and the Pacific.

HOMELAND DEFENSE

Question. What is your understanding of the role and responsibility of U.S. PACOM in homeland defense?

Answer. U.S. PACOM's responsibility is to deter attacks against the Homeland as early and as far away as possible, defend the U.S. PACOM domestic area of responsibility (AOR), and work with and provide support to civil authorities when requested. Additionally, U.S. PACOM's homeland defense plan complements and is integrated with planning for the ongoing global war on terrorism, combating WMD, homeland security, and other relevant activities.

Question. What is your understanding of how U.S. PACOM and U.S. NORTHCOM work to ensure that their overlapping missions in this area do not create "seams" that might be exploited by our adversaries and how this process might be improved?

Answer. In October 2003, Commander, U.S. PACOM and Commander, U.S. NORTHCOM signed a Command Arrangement Agreement, to "establish procedures and delineate responsibilities" between the two commands. This agreement also prescribes employment of U.S. PACOM forces in support of U.S. NORTHCOM missions and the control of forces operating in NORTHCOM's AOR. In my experience, the agreement between combatant commands has been highly effective. If confirmed, I intend to continue the close working relationship between the two commands.

Question. What is your assessment of the Regional Maritime Security Initiative, and what steps should be taken to improve upon it?

Answer. The Regional Maritime Security Initiative was developed to foster coordination among participating states to address transnational threats collectively. The themes and goals of the initiative continue to gain momentum in the Asia-Pacific region as the "Global Maritime Partnership." Its effectiveness can be increased through better information sharing and investing the time and effort to improve understanding of the challenges and needs of the partner nations. U.S. PACOM should continue to encourage multilateral and interagency approaches to the challenges.

Question. How could U.S. PACOM forces and expertise contribute to more effective homeland defense capabilities?

Answer. U.S. PACOM's military and intelligence activities in the western approaches to the continental United States contribute to the Nation's active, layered defense and enhance situational awareness. Improving our capabilities in this regard will require continued efforts to collect actionable intelligence, exercise and train our forces, and engage actively with nations of the Asia-Pacific.

GLOBAL DEFENSE POSTURE REVIEW

Question. Perhaps more than in any other combatant command, military exigencies in the U.S. PACOM are subject to the "tyranny of distance" in getting forces to points of conflict.

In your view, how important is the forward basing strategy to the ability of U.S. PACOM to execute its operational contingencies, and did the Global Posture Review appropriately take this into account?

Answer. Forward basing is essential to the U.S. PACOM shaping and warfighting strategy. Forward presence in the AOR assures friends and allies and dissuades potential adversaries. Because posture changes resulting from Global Posture Review shift forces away from a garrison orientation and toward a more flexible force, I believe U.S. PACOM is well-positioned to respond with necessary military forces in the event of crises or contingency.

Question. What do you see as the implications of the proposed global force structure changes with respect to U.S. PACOM's AOR, particularly in Korea and Japan?

Answer. I support alliance transformations currently underway in Japan and the Republic of Korea. In general, I see the changes as effective from a mission perspective and an example of the healthy state of our alliance with both nations.

Question. What impact, if any, do you expect the proposed changes in posture will have on our ability to defend South Korea and Japan, and to react to a crisis in the Taiwan Strait?

Answer. I do not anticipate any reduction in the command's ability to meet commitments to our allies.

Question. The Army is proposing to add 65,000 personnel to its permanent force structure over the course of the Future Years Defense Program, including the creation of six additional active-duty combat brigades. The Marine Corps is proposing to add 27,000 personnel over the same period.

Do you believe that any of these additional personnel and units should be assigned to commands located in the U.S. PACOM's AOR in order to meet PACOM's your requirements?

Answer. The proposals to expand the Army and Marine Corps allow us to reexamine our basing options and ensure that we have the optimum mix of forces to execute the National Military Strategy. If confirmed, I intend to study where force increases in the Pacific theater might be appropriate to enhance mission accomplishment and to share our analysis with DOD.

Question. If so, to what extent do you believe these additional forces should be forward-deployed, as in Korea or Japan, or deployed in the United States, such as Hawaii or Alaska?

Answer. If confirmed, I will study the options and consider the evolving situation in the Pacific, as these expanded forces are brought online. Once I have formed my assessment, I will provide my views to the Secretary of Defense.

NORTH KOREA

Question. North Korea represents one of the greatest near-term threats to U.S. national security interests in Asia.

What is your assessment of the current security situation on the Korean peninsula and the diplomatic efforts to persuade North Korea to verifiably dismantle its nuclear weapons program?

Answer. The missile launches and nuclear test conducted last year underscore the gravity of the North Korean threat. If confirmed, I will support diplomatic efforts to persuade North Korea to dismantle its nuclear weapons program. I am encouraged by the progress made at the Six-Party Talks in Beijing last month. I believe one of the key roles of U.S. PACOM is to work closely with the countries in the region to facilitate the ongoing diplomatic efforts aimed at addressing the threat, while maintaining a credible deterrent posture.

Question. What is your assessment of the threat posed to the United States and its allies by North Korea's ballistic missile and WMD capabilities and the export of those capabilities?

Answer. North Korea's development of WMD and ballistic missile capabilities and potential proliferation pose a serious threat to the U.S. and our allies.

Question. In your view, what, if anything, should be done to strengthen deterrence on the Korean peninsula?

Answer. If confirmed, my focus will be on preserving the strength and resolve of our alliances. We must leverage relationships with other nations in the region to shape the strategic environment aimed at deterring aggression in Northeast Asia.

REPUBLIC OF SOUTH KOREA (ROK)

Question. Since the end of World War II, the U.S.-ROK alliance has been a key pillar of security in the Asia-Pacific region. This relationship is currently undergoing significant change.

What is your understanding of the current U.S. security relationship with South Korea?

Answer. The U.S.-ROK security relationship is an enduring partnership that has been the key to deterrence for over 50 years. Our alliance has evolved to become a global partnership with the ROK military's contributions to the war on terror in Iraq and Afghanistan, and the upcoming deployment of ROK troops in support of the U.N. mission in Lebanon.

Question. If confirmed, what measures, if any, would you take, in conjunction with the Commander, U.S. Forces Korea/Combined Forces Command, to improve the U.S.-South Korean security relationship?

Answer. If confirmed, I will work closely with the Commander of United States Forces Korea/Combined Forces Command to ensure there is no degradation in readiness or deterrence. I will ensure that U.S. PACOM supports the ongoing U.S. Forces Korea transformation initiatives that are vital to enhancing the capabilities of our combined forces and facilitating the eventual transition of wartime operational control to the ROK military.

Question. Do you support expanding the number of personnel assigned to Korea for 2 or 3 years of duty and the number of military and civilian personnel authorized to be accompanied by their dependents for these longer tours of duty?

Answer. I have not yet studied the proposal in detail, particularly with respect to affordability. However, in general, I believe longer tours and more troops having their families accompany them are in the best interests of our alliance and our readiness on the Korean peninsula.

CHINA

Question. Many observers believe that one of the key national security challenges of this century is how to manage China's emergence as a major regional and global economic and military power.

How would you characterize the U.S. security relationship with China?

Answer. From my vantage at NORTHCOM, I was encouraged by China's role in facilitating North Korean return to the Six-Party Talks. I see this as constructive and responsible. I also am aware of the lack of transparency regarding Chinese military modernization, which is a concern.

Question. What is your assessment of the current state of U.S.-China military-to-military relations, and do you favor increased military-to-military contacts with China?

Answer. Our military-to-military relationship is improving in terms of quality and quantity of events. If confirmed, I intend to advocate for an engagement program involving numerous events with measured but increased levels of sophistication. I believe this approach would help us learn more about the People's Liberation Army (PLA), break down barriers to understanding, and reduce potential for conflict.

Question. How do you assess the current cross-Strait relationship, and how can we help to prevent miscalculation by either side?

Answer. I assess the situation as stable. However, I am also mindful miscalculation is possible. If confirmed, I will remain particularly attentive to any military quantitative and qualitative gap between China and Taiwan.

Question. China's economy is growing by as much as 10 percent per year, and China is using that economic growth to fund a substantial military modernization.

In your view, what is China's intent in pursuing such a rapid military modernization?

Answer. I believe it is clear China is seeking capabilities beyond those needed for a Taiwan situation, but the lack of transparency makes intent difficult to discern. If confirmed, I would seek to continue improvements with U.S.-PLA military-to-military interaction to better understand Chinese intentions.

Question. On April 1, 2001, a Chinese jet collided in mid-air with a U.S. Navy EP-3 aircraft endangering the U.S. personnel and resulting in the death of the Chinese pilot.

Describe the steps that have been taken to prevent incidents of this nature in the future. What additional efforts, if any, do you believe may be necessary?

Answer. I understand that under Admiral Fallon's watch, PACOM conducted the first two Search and Rescue Exercises with People's Republic of China (PRC) forces. Such events—which stress language independent protocols, fixed wing maritime patrol craft, and “free play”—increase safety of all sailors and airmen. I recognize this will be a long-term educational process. If confirmed, I would continue similar efforts in the future to expose as many PLA sailors and airmen as possible to these fundamental and inherently stabilizing procedures.

Question. In your view, is there the potential for similar dangerous incidents with China to occur at sea or elsewhere?

Answer. There is always potential, however, I believe it is less likely than in the past.

Question. If confirmed, what steps, if any, would you take to prevent incidents?

Answer. If confirmed, I would consider an international agreement similar to the “Incidents At Sea” protocols we developed with the Soviet Union.

Question. On January 11, 2007, China used a ground-based missile to hit and destroy one of its weather satellites in an anti-satellite test creating considerable space debris and raising serious concerns in the international community.

What is your view of China's purpose in conducting this test?

Answer. I do not know China's purpose. However, the test was unfortunate and inconsistent with their stated peaceful policy. Chinese actions endangered international satellites, which support the world's economy, and created considerable debris that increase the risk to human spaceflight.

Question. What do you see as the implications of this test for the U.S. military, for U.S. national security, and for U.S. interests in space?

Answer. The foremost implication is confirmation that Chinese anti-satellite capabilities can be a threat to international space assets.

Question. What are your views regarding the potential weaponization of space?

Answer. Consistent with U.S. policy and international understandings, I support the rights of states to have unhindered passage through, and operations in space without interference. I also support our ability to defend and protect our space systems.

TAIWAN

Question. What are the priorities, in your view, for U.S. military assistance to Taiwan?

Answer. If confirmed, I will remain fully committed to the U.S. obligation to provide Taiwan with the necessary capabilities for its defense. I would continue to focus on efforts to modernize Taiwan's defensive capability and improve the joint operating capacity of the Taiwan armed forces.

Question. What is your view of the relationship between the type of assistance we offer Taiwan and regional stability?

Answer. PACOM should focus on Taiwan's capability to defend itself and avoid characterizing the Taiwan military's modernization as offensive. A Taiwan that can defend itself enhances regional stability.

REPUBLIC OF THE PHILIPPINES

Question. What is your view of the current state of U.S.-Philippine military-to-military relations?

Answer. Our relationship is good, and our long and consistent military engagement with the Philippines is bearing fruit in the form of Philippine counterterrorism performance and success in the field.

Question. What is your view of the effectiveness of the Special Operation Forces assistance being provided to the Philippine military in its fight against terrorist groups?

Answer. My initial assessment, based on recent successes on the island of Jolo, is the advice and assistance of Special Operations Forces have been effective in helping Philippine Security Forces (PSF) fight local and international terrorist groups over sustained periods in harsh environments.

Question. What measures or guidelines will you employ, if confirmed, to ensure that U.S. personnel do not become involved in combat in the Republic of the Philippines?

Answer. U.S. Forces are not authorized by either the U.S. or the Republic of the Philippines to conduct combat operations in the Republic of the Philippines nor to accompany PSF to locations where contact with the enemy by U.S. forces is anticipated. If confirmed, I will continue to ensure current restrictions prohibiting a combat role for U.S. forces are well understood by our personnel at all levels. I will confirm in place procedures are sufficiently rigorous.

INDONESIA

Question. Indonesia is a key Asian power, and is the largest Muslim country in the world. Consequently, it is important to build on opportunities to improve and expand U.S. relations with Indonesia where possible.

What is your understanding of the extent to which the Indonesian Government is cooperating with the United States in the global war on terrorism?

Answer. The Indonesian Government is cooperating with the United States in the global war on terrorism. President Yudhoyono has enabled Indonesian law enforcement to form a successful counterterrorism center and make important arrests of terrorist operatives. I also view the Indonesia Government's approach to religious tolerance as helpful.

Question. Is it your understanding that the Indonesian Government is cooperating in the investigation into the murder of two American school teachers and one Indonesian school teacher in an ambush in Papua in August 2002?

Answer. Yes.

Question. What is your view of the current state of military-to-military contacts with Indonesia?

Answer. U.S. PACOM military-to-military relations with the Indonesian armed forces continue to mature and improve. U.S. support during the 2004 tsunami and 2006 earthquake responses triggered new engagement opportunities for U.S. PACOM.

Question. Do you favor increased U.S.-Indonesian military-to-military contacts? If so, under what conditions? Why?

Answer. As a democracy with a moderate and modernizing vision of Islam, Indonesia is a natural partner with the U.S. It is important to assist with the development of their military. Engaging in areas of common interest while minding the political landscape, the U.S. and Indonesia can engage in a consistent programmed manner that does not outstrip Indonesia's ability to absorb U.S. assistance.

Question. What is your view of the commitment of the Indonesian military leadership to professionalization of its armed forces, adhering to human rights standards, improving military justice, and cooperating with law enforcement efforts to investigate and prosecute those military personnel accused of human rights abuses?

Answer. I believe the Indonesian military is committed to education and training to improve adherence to human rights standards and enforcement of same.

Question. If confirmed, what would you do to encourage respect for human rights and accountability in the Indonesian military?

Answer. If confirmed, I will ensure U.S. PACOM engagements with the Indonesian military continue to encourage respect for human rights, accountability, leadership development, and legal education. I will also look for opportunities to expand bilateral education exchanges, research grants, and language training to help the present and future elites of the military.

INDIA

Question. What is your view of the current state of the U.S.-India military-to-military relationship?

Answer. President Bush has emphasized the U.S. partnership with India as among the most important in the region. If confirmed, I would seek to complement strategic initiatives with a military-to-military program characterized by increased dialogue and more frequent and sophisticated exchange and exercises.

Question. If confirmed, what specific priorities would you establish for this relationship?

Answer. If confirmed, my priorities for the U.S.-India military-to-military relationship will be increasing the scope of exercises and exploring opportunities for expanded cooperation in peacekeeping, disaster response, and maritime security. Our militaries need to continue to build trust and confidence and become more interoperable. We should establish agreements and procedures that will allow us to build shared doctrine and communications architectures.

Question. What relationship, if any, do you believe exists between the armed groups conducting terrorist attacks in India, and the armed groups conducting attacks in Pakistan and Afghanistan?

Answer. There are reported organizational relationships between armed groups conducting attacks in India and Afghanistan, specifically among Pakistan-based Lashkar-e-Tayyiba (LT/LeT), al Qaeda, and the Taliban. However, I have not sufficiently studied the situation to determine relationships between the groups.

MISSILE DEFENSE

Question. What is your understanding of the current relationship between U.S. PACOM, U.S. NORTHCOM, and U.S. Strategic Command (STRATCOM) with respect to ballistic missile defense deployment and operations?

Answer. Commander, U.S. PACOM supports Commander, U.S. NORTHCOM for defense of the homeland. Commander, U.S. PACOM is also responsible for providing regional missile defense for U.S. forces forward deployed in the U.S. PACOM AOR. Commander, U.S. STRATCOM has overarching responsibility for planning, integrating, and coordinating global ballistic missile defense. U.S. PACOM coordinates with U.S. NORTHCOM and U.S. STRATCOM in the performance of both the regional and global missile defense mission.

Question. What is your understanding of the arrangement whereby Aegis-class destroyers and cruisers of the U.S. Pacific Fleet will be made available, or dedicated, to ballistic missile defense missions, and what impact will this arrangement have on the capability of U.S. PACOM and U.S. Pacific Fleet to fulfill their other missions involving Aegis-class ships?

Commander U.S. PACOM and Commander U.S. NORTHCOM have established clear command relationships regarding Aegis support to the Ballistic Missile Defense mission. Using a system of readiness conditions, both Commanders ensure the Aegis ship requirement is properly managed to support both the missile defense mission and other missions in the Pacific theater.

Over the past year, these relationships have been tested in several challenging real world and exercise scenarios involving regional and homeland missile defense missions.

Question. If confirmed, how would you propose to strike an appropriate balance between missile defense and non-missile defense missions for ships of the U.S. Pacific Fleet (PACFLT)?

Answer. Missile defense is one of many missions tasked to the Commander, PACFLT. If confirmed, I will solicit recommendations from Commander, PACFLT, to posture the U.S. PACFLT to execute the missions we expect the Fleet to perform. Additionally, I will continue U.S. PACOM efforts to integrate Patriot Advance Capabilities-3 (PAC-3), Forward Based X-Band Radar Transportable (FBX-T), and Terminal High Altitude Area Defense (THAAD) to improve theater-wide capability and reduce the reliance on Aegis platforms.

SPECIAL OPERATIONS COMMAND

Question. What is your understanding of the requirements for coordination and cooperation between Special Operations Command (SOCOM) teams working to fulfill the global terrorism mission, U.S. PACOM, and the Ambassadors in the relevant countries?

Answer. Coordination and cooperation between U.S. PACOM, Ambassadors, and SOCOM teams remains essential to success in the global war on terror. Commander, U.S. PACOM, assumes Operational Control (OPCON) of Special Operations Forces once those forces enter the AOR. In all cases, Ambassadors remain responsible for activities in their respective country, to include Theater Security Cooperation activities involving Special Operations Forces. As a result, the military commander exercising OPCON is required to coordinate activities with the respective Ambassador.

Additionally, coordination with U.S. SOCOM and Country Ambassadors continues even after OPCON has been assumed by Commander, U.S. PACOM. In certain circumstances, U.S. SOCOM may retain OPCON of forces conducting specialized missions or crossing geographic combatant commander boundaries.

Question. If confirmed, would you seek to change any aspects of these requirements?

Answer. If confirmed, I do not foresee recommending changes in the current command and support relationships.

Question. Do you see the need for any changes in the assignment and OPCON of Special Operations within the SOCOM area of operations?

Answer. The Commander, U.S. SOCOM developed and the Secretary of Defense recently approved the Global Special Operations Forces Posture initiative, which significantly changes assignment and OPCON of current regionally based Special Operations Forces to a continental United States-based, forward rotational presence model. Commander, U.S. SOCOM, assesses this will provide geographic combatant commanders with better trained Special Operations Forces while maintaining their regional expertise and reducing the current high personnel tempo. At this time, it would be premature for me to recommend changes.

TECHNOLOGY PRIORITIES

Question. U.S. PACOM has been active in the Advanced Concept Technology Development process and currently has several projects on the transition list, including the future tactical truck system and theater effects-based operations.

If confirmed, what steps would you expect to take to make your requirements known to the department's science and technology (S&T) community to ensure the availability of needed equipment and capabilities in the long-term?

Answer. If confirmed, I will support efforts to strengthen the relationship between the command and the S&T community. In so doing, PACOM would help researchers better understand operational problems and the command would gain better insight into solutions maturing through Service efforts. I plan to use the Integrated Priority List as the foundation for these discussions.

JCTDs will continue to be an important part of meeting S&T requirements but I plan to expand the approach. In particular, I will explore new relationships with S&T programs worldwide to meet requirements. I expect these efforts will include cooperative technology development with countries in our AOR; participation of

Services S&T personnel in U.S. PACOM exercises; seminars with laboratories and warfighting centers for direct engagement with planners.

EXERCISES AND TRAINING

Question. What is your assessment of the current U.S. PACOM training and exercise program, including those designed to train personnel for peace and stability operations?

Answer. My initial impression is the U.S. PACOM exercise program has been highly effective as evidenced by successful disaster relief operations, responsive support to war on terror operations in Iraq and Afghanistan, and the improvements in the quality and capacity of regional peace support operations forces through the Global Peace Operations Initiative.

I recognize the importance of a rigorous training and exercise program. In U.S. PACOM, training and exercises will continue to receive emphasis because of their value in maturing U.S. readiness and capabilities and improving our ability to operate with allies and partners in the region.

Question. Do you believe that the PACOM's training and exercise program currently has adequate funding and personnel resources?

Answer. I do not yet have a full appreciation of the funding and resource status of the U.S. PACOM training and exercise program. If confirmed, I will ensure resources are effectively used and advocate for additional resources, when necessary.

Question. What are your views on how the PACOM, in concert with the Joint Forces Command (JFCOM), could improve its training and exercise program, including training and exercises for peace and stability operations?

Answer. I view collaboration with U.S. JFCOM and the continuous assessment such interaction fosters as central to improving the command's training program. I also anticipate the new Pacific Warfighting Center, when integrated into JFCOM's global grid of warfighting centers, will allow PACOM and JFCOM to continue to cooperatively develop transformational training concepts for traditional warfighting as well as peace and stability operations.

PRISONER OF WAR (POW)/MISSING IN ACTION (MIA) ACCOUNTING EFFORTS

Question. The Joint POW/MIA Accounting Command (JPAC), U.S. PACOM, is critical to the recovery and identification of remains of missing military members. Recovery of remains of U.S. servicemembers from World War II, the Korean War, and the Vietnam War continue to be a very high priority.

What is your understanding of the responsibilities of JPAC, U.S. PACOM, and its relationship to the Defense Prisoner of War and Missing Personnel Office?

Answer. JPAC conducts operations to support accounting of personnel unaccounted for as a result of hostile acts. U.S. PACOM provides higher headquarters support and direction, and interface between JPAC and the Joint Staff and Office of the Secretary of Defense. The Defense POW/Missing Personnel Office (DPMO) exercises policy, control, and oversight within DOD. DPMO and JPAC coordinate directly on routine POW/MIA issues.

Question. If confirmed, what steps, if any, would you take to enhance POW/MIA recovery efforts in the AOR of the U.S. PACOM?

Answer. JPAC resources and accounting efforts are focused not only in the PACOM region, but throughout the world. If confirmed, I will encourage full cooperation by the host nations where we conduct POW/MIA activities and continue to reinforce U.S. Government priorities and commitment in our accounting and recovery efforts with leaders of these countries and respective U.S. Ambassadors.

Question. If confirmed, what steps would you take, if any, to assess the adequacy of resources available for this work?

Answer. If confirmed, I will provide JPAC the full support of the U.S. PACOM in the conduct of their mission, and continuously assess the adequacy of resources in the performance of this critical and important mission. I will also ensure existing resources maximize mission accomplishment.

Question. What is your understanding of the status of the report due March 1, 2007, relating to the JPAC, pursuant to Senate Report 109-254?

Answer. I understand the report has been drafted and is currently being staffed. If confirmed, I will review the draft document and will be prepared to provide comment.

QUALITY OF LIFE

Question. Combatant commanders are responsible for establishing and sustaining a high quality of life for military personnel and their families assigned within their AOR.

If confirmed, how would you define and ensure appropriate resources are available for quality of life programs for military members and their families within the U.S. PACOM?

Answer. Quality of life (QoL)/Quality of service (QoS) for our men and women is one of my top priorities.

QoS means providing high quality operating facilities, tools, and information technology necessary for our personnel to execute their missions and achieve their goals. Achieving and sustaining QoL, however, will require both QoS initiatives and a continuous assessment of our facilities and our programs—housing, schools, commissary and exchange services, medical/dental facilities, Morale, Welfare, and Recreation programs/facilities, pay and entitlement programs, and family and childcare programs. If such assessments identify QoS/QoL conditions that are less than our people deserve, I will work with DOD to solicit support and garner required resources to rectify the deficiencies.

Question. What is your view of the challenges associated with global rebasing on the quality of life of members and their families in the U.S. PACOM AOR (including adequate health care services and DOD schools)?

Answer. The biggest challenge will be preserving the QoS/QoL for our service-members and their families while we realign our forces in theater.

Throughout the transition process, we should focus our efforts on maintaining quality housing, DOD schools, commissary and exchange services, medical/dental facilities, higher education, work life, and family and community support programs for our people. We should sustain current levels of service during the transformation 'out' phase and ensure these systems are in place before families arrive in the area.

Question. What steps do you believe need to be taken in Guam to ensure that adequate services are available to U.S. personnel and their dependents?

Answer. As we plan for increased military development in Guam, we must ensure that organizations and agencies that provide services to U.S. personnel and their dependents are included in the planning process, and adequate funding for expansion of these services is provided. The Joint Guam Program Office (JGPO), established by the Deputy Secretary of Defense and tasked with executing this comprehensive redevelopment effort, is leading the planning process and is engaging DOD components and other stakeholders to program and budget for adequate services for U.S. personnel and their dependents in Guam. If confirmed, I will ensure JGPO is fully informed of U.S. PACOM QoS/QoL requirements on Guam.

POLICIES REGARDING SEXUAL ASSAULT

Question. As a result of deficiencies in DOD and Service policies regarding sexual assault in the Armed Forces, the Department and the individual Services are required under section 577 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 to develop comprehensive policies aimed at preventing and responding to sexual assaults involving members of the Armed Forces and ensuring, among other things, appropriate law enforcement, medical, and legal responses, integration of databases to report and track sexual assaults, and development of victim treatment and assistance capabilities.

Question. If confirmed as Commander, U.S. PACOM, what steps would you take to ensure the Army, Navy, Air Force, and Marine Corps forces under your command are appropriately implementing policies aimed at preventing sexual assaults and appropriately responding to victims of sexual assault?

Answer. I am strongly committed to ensuring we make every effort to protect our people from assault and offer direct, consistent, and appropriate responses to victims of sexual assault. If confirmed, I will ensure commanders at all levels continue to implement comprehensive measures to prevent sexual assault, provide responsive care and treatment for victims of sexual assault, and hold accountable those who commit the crime of sexual assault.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Commander, U.S. PACOM?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR DANIEL K. AKAKA

HAWAIIAN SECURITY NEEDS

1. Senator AKAKA. Admiral Keating, the relationship between Pacific Command (PACOM) and Northern Command is somewhat unique when it comes to homeland security. Now that you are nominated to replace Admiral Fallon to be the next Commander of PACOM, what assurances are you able to give me that Hawaii's needs will be met in an emergency situation?

Admiral KEATING. I have designated Joint Task Force Homeland Defense, under the leadership of United States Army Pacific Commander, with responsibility for support of Hawaiian civil authorities. Over the last 18 months the U.S. PACOM plan for support of Hawaiian civil authorities has been exercised three times. Positive feedback from these interactions coupled with the expectation for regular exercises in the future give me confidence our plans for defense support of civil authorities are both current and credible.

2. Senator AKAKA. Admiral Keating, in addition, what plans do you have to ensure that these lines of communications remain open and visible in the future?

Admiral KEATING. Joint Task Force Homeland Defense will continue to conduct monthly meetings to ensure plans and coordination channels are effective. Meeting participants include representatives from the military Services and Federal, State, and local governments.

[The nomination reference of ADM Timothy J. Keating, USN, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
February 7, 2007.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the United States Navy to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be Admiral.

ADM Timothy J. Keating, USN, 8508.

[The biographical sketch of ADM Timothy J. Keating, USN, which was transmitted to the committee at the time the nomination was referred, follows:]

RÉSUMÉ OF CAREER SERVICE OF VADM TIMOTHY J. KEATING, USN

Date and place of birth: November 16, 1948; Dayton, Ohio.

Promotions:

Midshipman, U.S. Naval Academy	28 Jun. 1967
Ensign, U.S. Navy	09 Jun. 1971
Lieutenant (junior grade)	09 Dec. 1972
Lieutenant	01 Jul. 1975
Lieutenant Commander	01 Jun. 1980
Commander	01 Jun. 1986
Captain	01 Sep. 1992
Rear Admiral (lower half)	01 Jul. 1997
Designated Rear Admiral while serving in billets commensurate with that grade	Mar. 1999
Rear Admiral	01 Aug. 2000
Designated Vice Admiral while serving in billets commensurate with that grade	06 Oct. 2000
Vice Admiral	01 Nov. 2000
Designated Admiral while serving in billets commensurate with that grade	21 Oct. 2004
Admiral, service continuous to date	01 Jan. 2005

Assignments and duties:

	From	To
U.S.S. <i>Leonard F. Mason</i> (DD 852) (Assistant Navigator)	Jun. 1971	Jun. 1971
Naval Aviation Schools Command, Naval Air Station, Pensacola, FL (DUINS)	Jan. 1972	May 1972
Training Squadron ONE NINE (DUINS)	Jun. 1972	Sep. 1972
Training Squadron TWO TWO (DUINS)	Sep. 1972	Aug. 1973
Training Squadron TWO TWO (Assistant Schedules/Advanced Jet Flight Instructor)	Aug. 1973	Sep. 1974
Training Wing TWO, NAS Kingsville, TX (Staff Training Records/Stats Officer)	Sep. 1974	Jul. 1975
Attack Squadron ONE SEVEN FOUR (Ready Replacement Officer)	Aug. 1975	Mar. 1976
Attack Squadron EIGHT TWO (Assistant Aircraft Officer)	Mar. 1976	Sep. 1978
Attack Squadron ONE TWO TWO (Landing Signal Officer/Navigation Phase Instructor)	Sep. 1978	May 1980
Commander, Carrier Air Wing ONE FIVE (Landing Signal Officer/Assistant Safety Officer)	May 1980	May 1982
Attack Squadron NINE FOUR (Administrative/Operations/Maintenance Officer)	May 1982	Jul. 1984
Commander, U.S. Pacific Command (Flag Lieutenant)	Aug. 1984	Aug. 1985
Attack Squadron ONE SEVEN FOUR (Replacement Pilot)	Aug. 1985	Nov. 1985
XO, Strike Fighter Squadron EIGHT SEVEN	Nov. 1985	May 1987
CO, Strike Fighter Squadron EIGHT SEVEN	May 1987	Jan. 1989
Commander, Naval Military Personnel Command (Head Aviation LCDR/JO Assignment Branch)	Feb. 1989	Sep. 1990
Commander, Carrier Air Wing ONE SEVEN (Deputy Air Wing Commander)	Jan. 1991	Jul. 1991
Strategic Studies Group Fellow	Aug. 1991	Jun. 1992
CJTF-SWA (Deputy Director of Operations)	Oct. 1992	Dec. 1992
Commander, Carrier Air Wing NINE	Dec. 1992	Nov. 1994
CO, Strike Warfare Center, Fallon, NV	Nov. 1994	Sep. 1995
Bureau of Naval Personnel (Director, Aviation Officer Distribution Division (PERS-43))	Sep. 1995	Aug. 1996
Joint Staff (Deputy Director for Operations (Current Operations)) (J-33)	Aug. 1996	Jun. 1998
Commander, Carrier Group FIVE	Jun. 1998	Oct. 2000
Deputy Chief of Naval Operations (Plans, Policy and Operations) (N3/N5)	Oct. 2000	Jan. 2002
Commander, U.S. Naval Forces, Central Command/Commander, FIFTH Fleet	Feb. 2002	Oct. 2003
Joint Staff (Director)	Oct. 2003	Nov. 2004
Commander, Northern Command/Commander, North American Aerospace Defense Command	Nov. 2004	To Date

Medals and awards:

Defense Distinguished Service Medal with two Oak Leaf Clusters
 Distinguished Service Medal and one Gold Star
 Legion of Merit with three Gold Stars
 Defense Meritorious Service Medal
 Meritorious Service Medal with one Gold Star
 Air Medal with Second and Third Strike/Flight Awards
 Navy and Marine Corps Commendation with Combat "V" and two Gold Stars
 Navy and Marine Corps Achievement Medal with one Silver Star
 Joint Meritorious Unit Award
 Navy Unit Commendation
 Meritorious Unit Commendation with two Bronze Stars
 Navy "E" Ribbon with two "E"s
 Navy Expeditionary Medal
 National Defense Service Medal with two Bronze Stars
 Vietnam Service Medal with three Bronze Stars
 Southwest Asia Service Medal with three Bronze Stars
 Global War on Terrorism Expeditionary Medal
 Global War on Terrorism Service Medal

Humanitarian Service Medal with two Bronze Stars
 Armed Forces Service Medal
 Sea Service Deployment Ribbon with one Silver Star and two Bronze Stars
 Republic of Vietnam Campaign Medal
 Kuwait Liberation Medal
 Pistol Marksmanship Medal with Silver "E"

Special qualifications:

BA (Physics) U.S. Naval Academy, 1971.
 Designated Naval Aviator, 3 August 1973.
 Designated Joint Specialty Officer, 1988.

Personal data:

Wife:

Wanda Lee Keating of Alexandria, VA.

Children:

Daniel Patrick Martin (Stepson); Born: 6 February 1969.

Julie Cathryn Martin Camardella (Stepdaughter); Born: 7 December 1972.

Summary of joint duty assignments:

Assignment	Dates	Rank
Commander, U.S. Pacific Command (Flag Lieutenant)	Aug. 1984–Aug. 1985	LCDR.
Joint Staff (Deputy Director for Operations (Current Operations)) (J-33)	Aug. 1996–Jun. 1998 ..	RDML.
Commander, U.S. Naval Forces, Central Command/Commander, Fifth Fleet	Feb. 2002–Oct. 2003 ..	VADM.
Joint Staff (Director)	Oct. 2003–Oct. 2004 ..	VADM.
Commander, Northern Command/Commander, North American Aerospace Defense Command.	Nov. 2004–To Date	ADM.

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by ADM Timothy J. Keating, USN, in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Timothy John Keating.

2. **Position to which nominated:**

Commander, United States Pacific Command.

3. **Date of nomination:**

7 February 2007.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

16 November 1948; Dayton, Ohio.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Wanda Lee Doerksen Keating.

7. **Names and ages of children:**

Stepson: Daniel Pratt Martin, 38.

Stepdaughter: Julie Cathyn Camardella, 34.

8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational or other institution.

None.

10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Association of Naval Aviation.

11. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

None.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the appendix to this volume. The nominee's answers to Parts B–E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

TIMOTHY J. KEATING.

This 2nd day of February, 2007.

[The nomination of ADM Timothy J. Keating, USN, was reported to the Senate by Chairman Levin on March 15, 2007, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 19, 2007.]

[Prepared questions submitted to Lt. Gen. Victor E. Renuart, USAF, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I do not see a need to modify the Goldwater-Nichols Act at this time. The fact that several non-military organizations are seeking to improve their coordination and mission execution through the introduction of reform measures modeled after the Goldwater-Nichols Act is a tribute to its enduring success.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Not applicable.

DUTIES

Question. What is your understanding of the duties and functions of the Commander, U.S. Northern Command (NORTHCOM)?

Answer. The Commander, U.S. NORTHCOM, is responsible for conducting operations to deter, prevent, and defeat threats and aggression aimed at the United States, its territories and interests within the assigned area of responsibility. As directed by the President or Secretary of Defense, the Command is also responsible for providing defense support of civil authorities, including consequence management operations.

Question. What background and experience do you possess that you believe qualify you to perform these duties?

Answer. More than 3½ decades of experience including operational combat service in Operations Desert Storm, Deny Flight, both Southern and Northern Watch, Enduring Freedom, and Iraqi Freedom; command of a North Atlantic Treaty Organization support group, two fighter wings, Joint Task Force-Southwest Asia and 9th Air and Space Expeditionary Task Force-Southwest Asia; service as the U.S. Central Command Director of Operations; and Vice Commander, Pacific Air Forces provide a solid foundation for assuming command of U.S. NORTHCOM. Additionally, my previous assignment as the Director of Strategic Plans and Policy for the Joint Staff has reinforced the value of teamwork and having a close working relationship with other combatant commands, the military Services, National Guard Bureau (NGB), defense agencies, other U.S. Government organizations, and international organizations.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, U.S. NORTHCOM?

Answer. If confirmed, I will continuously seek to further a better understanding of and effective information exchange with the other combatant commands and our international, Federal, State, and interagency partners to increase our ability to work collaboratively together in the areas of homeland defense and civil support.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the commanders of the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander, U.S. NORTHCOM, to the following officials:

The Secretary of Defense.

Answer. The Commander, U.S. NORTHCOM, is responsible to deter, prevent, and defeat threats to the United States as directed by the Secretary of Defense and the President. Under the authority and control of the Secretary and as directed by the Secretary, the Commander is also responsible for defense support of civil authorities. The Commander is directly responsible to the Secretary of Defense for the ability of the Command to carry out its missions. While serving as the Senior Military Assistant to the Secretary of Defense, I have participated in frequent and cooperative interactions between the Secretary of Defense and the Commander of U.S.

NORTHCOM. If confirmed, I intend to continue the close working relationship between U.S. NORTHCOM and the Secretary of Defense.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense is delegated full power and authority to act for the Secretary of Defense and to exercise the powers of the Secretary on any and all matters for which the Secretary is authorized to act pursuant to law. The Commander, U.S. NORTHCOM, ensures the Deputy has the information and support he requires.

Question. The Under Secretary of Defense for Policy.

Answer. The Under Secretary of Defense for Policy duties include formulating defense planning guidance and forces policy, Department of Defense (DOD) relations with foreign countries, and DOD's role in interagency policymaking. The Commander, U.S. NORTHCOM, works closely with the Under Secretary coordinating and exchanging information on strategic policy issues involving homeland defense and defense support of civil authority issues.

Question. The Under Secretary of Defense for Intelligence.

Answer. The Under Secretary of Defense for Intelligence is the Secretary's principal advisor on intelligence matters. Commander, U.S. NORTHCOM, works closely with the Under Secretary in order to provide predictive and actionable threat estimates and timely warning of worldwide threats against North America using fused, all-source intelligence and law enforcement information that characterizes the threat and provides strategic warning to support informed decisionmaking.

Question. The Assistant Secretary of Defense for Homeland Defense.

Answer. Commander, U.S. NORTHCOM, works routinely with the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs (ASD(HD&ASA)) on homeland defense and defense support of civil authorities issues.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman serves as the principal military advisor to the President, the Secretary of Defense, and the National Security Council. The role of Chairman of the Joint Chiefs of Staff (CJCS) in the chain of command of the combatant commands is threefold: communications, oversight, and spokesman. Communications between the President, Secretary of Defense, and the combatant commanders may pass through the CJCS. The Goldwater-Nichols DOD Reorganization Act of 1986 permits the President to place the Chairman in the communications chain and the President has in fact directed that such communications pass through the Chairman. Oversight of the activities of combatant commands may be delegated by the Secretary of Defense to CJCS. Finally, CJCS is the spokesman for the combatant commanders on the operational requirements of their commands. Having been a Director on the Joint Staff, I have first-hand knowledge of communications between the CJCS and the Commander of U.S. NORTHCOM.

Question. The secretaries of the military departments.

Answer. Each military department is separately organized under its own Secretary and functions under the authority, direction, and control of the Secretary of Defense. The military departments are responsible for organizing, training, and equipping forces for assignment to the Commander, U.S. NORTHCOM, and other combatant commanders. Commander, U.S. NORTHCOM, works closely with the Secretaries to ensure homeland defense and civil support requirements are met.

Question. The Chiefs of Staff of the Services.

Answer. The Chiefs of Staff are responsible for organizing, training, and equipping forces for assignment to combatant commands. The Commander, U.S. NORTHCOM, is responsible for communicating the needs of U.S. NORTHCOM to the Chiefs of Staff.

Question. The other combatant commanders.

Answer. The other combatant commanders exercise command authority over forces assigned to them as directed by the Secretary of Defense. Having served in U.S. Central Command, the Joint Staff, and also for the Secretary of Defense, I helped facilitate the multiple and valuable interactions that occur between combatant commanders. If confirmed, I intend to maintain open lines of communication with the other combatant commanders, and to provide support and mutual cooperation whenever possible.

Question. The Chief of the National Guard Bureau.

Answer. The relationship with the Chief of the NGB is integral to the success of U.S. NORTHCOM. U.S. NORTHCOM has regular dialogue on issues of the utmost importance to the Nation. There are 43 Army National Guard and Air National Guard Title 10 National Guardsmen assigned to U.S. NORTHCOM as permanent party. There are also 23 of 30 authorized Army National Guard personnel that are assigned to U.S. NORTHCOM as "drilling guardsmen." Last month, I had the op-

portunity to attend The Adjutants General Conference in Washington, DC, and if confirmed, I look forward to working closely with the Chief of the NGB.

Question. If confirmed, in carrying out your duties, how would you work with the Department of Homeland Security (DHS), the Homeland Security Council, and other Federal agencies, as well as State and local authorities and representatives from the private sector?

Answer. In fulfilling its civil support role, the military is an active member of the Federal response community. However, throughout any crisis or consequence management scenario, civilian authorities remain in charge and U.S. NORTHCOM's participation is almost always in support of a designated primary agency. If confirmed, I will ensure U.S. NORTHCOM continues to coordinate and conduct military efforts to provide support to save lives, reduce suffering, and restore critical infrastructure, while respecting the individual liberties and human freedoms guaranteed to all Americans by our Constitution.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the next Commander, U.S. NORTHCOM?

Answer. Our enemies continue to seek new means of achieving their goals and attacking our homeland. Countering asymmetric attacks and being prepared to respond to the possible use of a weapon of mass destruction on American soil, should our deterrence and prevention efforts fail, will continue to be major challenges in the future.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will ensure that U.S. NORTHCOM continually reviews and evaluates its plans and operations to effectively address the dynamic nature of the threats aimed at its area of responsibility. U.S. NORTHCOM will continue to expand a robust exercise and information sharing program with its DOD, National Guard, interagency, Federal, State, tribal, and local partners to ensure the command is able to collectively meet any challenges that arise.

MISSION OF U.S. NORTHCOM

Question. What is the mission of U.S. NORTHCOM?

Answer. Two missions:

- Conduct operations to deter, prevent, and defeat threats and aggression aimed at the United States, its territories, and interests within the assigned area of responsibility.
- Provide defense support of civil authorities including consequence management operations, as directed by the President or Secretary of Defense.

Question. How does U.S. NORTHCOM's mission relate to DHS's mission?

Answer. DHS has overall responsibility for the concerted, national effort to prevent and deter terrorist attacks and protect against and respond to threats and hazards to the Nation. U.S. NORTHCOM's primary mission is to deter, prevent, and defeat threats to the homeland and provide defense support of civil authorities when directed by the Secretary of Defense or President. Conducting both missions requires close collaboration throughout planning and exercise phases, and of course, during real-world operations to include pre-incident, crisis, and post-incident stages. Ultimately, the capabilities of DHS and U.S. NORTHCOM are complementary, focusing on "unity of effort."

Question. Under what circumstances, if any, would you anticipate U.S. NORTHCOM would have the lead role in responding to a terrorist incident?

Answer. In accordance with the Maritime Operational Threat Response for The National Strategy for Maritime Security, U.S. NORTHCOM will assume the lead role for DOD to interdict vessels at sea as part of the U.S. Government's active, layered defense of the United States. In addition, U.S. NORTHCOM will be responsible for responding to an attack on a DOD installation within its area of responsibility. U.S. NORTHCOM has a family of plans that detail its support to primary agencies, as well as additional plans that direct action in the event that DOD and U.S. NORTHCOM takes the lead for the response inside the United States.

Question. What responsibility, if any, does U.S. NORTHCOM have with respect to the Critical Asset Assurance Program?

Answer. The DOD Critical Asset Assurance Program (DOD Directive 5160.54) has been superseded by the Defense Critical Infrastructure Program (DCIP) (DOD Directive 3020.40). Under the DCIP, U.S. NORTHCOM is responsible for establishing a command program for matters pertaining to the identification, prioritization, and protection of Defense Critical Infrastructure. In coordination with the military de-

partments, the defense agencies, DOD field activities, and defense sector leads, U.S. NORTHCOM is working to identify and assess critical assets and associated infrastructure interdependencies within its area of responsibility. Under the DCIP, U.S. NORTHCOM is additionally charged with acting to prevent or mitigate the loss or degradation of DOD-owned critical assets within its area of responsibility. The Command will only take action to prevent or mitigate the loss or degradation of non-DOD-owned critical assets at the direction of the Secretary of Defense or President.

ORGANIZATION AND AUTHORITY

Question. U.S. NORTHCOM has been assigned responsibility for force protection and antiterrorism within its area of responsibility.

What actions would you take, if confirmed, to mitigate force protection vulnerabilities, and what force protection challenges do you anticipate you would face within U.S. NORTHCOM's area of responsibility?

Answer. If confirmed, I will continue to place emphasis on executing a synchronized and coordinated antiterrorism program and force protection mission throughout the area of responsibility. I will focus actions on efficient employment of resources for vulnerability mitigation and promote procedural steps that enhance antiterrorism programs and improve security postures for installations and facilities. One challenge will be harnessing new technologies.

Question. What actions would you take, if confirmed, to ensure efficiency in the use of funding for force protection and to prevent unnecessary duplication of efforts between U.S. NORTHCOM, the military Services, and the office of the Assistant Secretary of Defense for Homeland Defense?

Answer. If confirmed, I will continue enhancements of the Core Vulnerability Management Program to eliminate redundancies by mandating force protection vulnerabilities be entered into a single database. In addition, I will be actively involved in the ASD(HD&ASA) DCIP, which is focused on ensuring availability of networked assets essential to project, support, and sustain military forces protecting against and mitigating the effects of attacks on critical infrastructure and key resources.

Question. What specific forces, if any, have been assigned to U.S. NORTHCOM?

Answer. Day-to-day operations are conducted by four subordinate commands:

- Joint Force Headquarters National Capital Region is located at Fort McNair in Washington DC and is responsible for land-based homeland defense, civil support, and incident management in the National Capital Region.
- Joint Task Force-Civil Support (JTF-CS) is located at Fort Monroe, VA, and commands and controls DOD forces that respond to catastrophic chemical, biological, radiological, nuclear, or high-yield explosive (CBRNE) events.
- Joint Task Force Alaska is located at Elmendorf Air Force Base, AK. Military forces in Alaska are under U.S. Pacific Command for normal operations. If Alaska-based forces are needed for homeland defense, consequence management, or civil support operations in Alaska, U.S. NORTHCOM will command and control the forces through Joint Task Force Alaska.
- Joint Task Force North is located at Fort Bliss, TX. They support law enforcement agencies in counterdrug, counterterrorism, and border patrol operations along the United States-Canada and southwestern U.S. border.

U.S. NORTHCOM has few permanently assigned forces. Whenever mission requirements dictate, U.S. NORTHCOM requests additional forces from the Secretary of Defense, and if approved, receives them from the following DOD force providers: U.S. Joint Forces Command and U.S. Pacific Command.

Additionally, the Army, Air Force, and Marine Corps have established Service components for U.S. NORTHCOM. These commands are:

- U.S. Army North, located at Fort Sam Houston, TX.
- U.S. Air Forces Northern located at Tyndall Air Force Base, FL.
- U.S. Marine Forces North located in New Orleans, LA.

The Commander Fleet Forces Command, located at Naval Station Norfolk, VA, is designated as the Navy's supporting commander to U.S. NORTHCOM.

Question. How has the assignment of forces to U.S. NORTHCOM changed since U.S. NORTHCOM was established on October 1, 2002?

Answer. Since 1 October 2002, U.S. NORTHCOM deactivated Joint Force Headquarters Homeland Security and activated Joint Force Headquarters National Capital Region and Standing Joint Force Headquarters North. In addition, temporary

forces have been apportioned many times for defense support of civil authorities missions, such as for hurricane support.

NORAD

Question. What is the mission of the North American Aerospace Defense Command (NORAD)?

Answer. NORAD's missions are aerospace warning, aerospace control, and maritime warning. Aerospace warning consists of detection, validation, and warning of an attack against North America and aerospace control consists of air sovereignty, air enforcement, and air defense of United States and Canadian airspace. Maritime warning is a new mission, which consists of processing, assessing, and disseminating maritime intelligence and information, and warning of maritime threats to, or attacks against North America.

Question. How has NORAD's mission evolved since the creation of U.S. NORTHCOM?

Answer. Since the creation of U.S. NORTHCOM, the NORAD mission set has expanded to include maritime warning, which in turn enables the U.S. NORTHCOM maritime defense mission. With respect to ballistic missile defense, NORAD now provides ballistic missile warning to U.S. NORTHCOM to support its ballistic missile defense mission. To support these changes, NORAD has improved its sensor input, command and control systems, and ability to respond quickly.

Question. How does NORAD's mission relate to U.S. NORTHCOM's mission?

Answer. NORAD conducts the aerospace warning, aerospace control, and maritime warning missions. The warning provided by NORAD enables U.S. NORTHCOM to respond with regard to ballistic missile defense and maritime defense.

Question. How does NORAD's mission relate to the mission of the DHS?

Answer. NORAD supports the DHS by providing aerospace warning and maritime warning of threats in the approaches to North America and supporting enforcement when called upon by civilian agencies.

Question. Do you believe that NORAD should have a separate operations and planning staff from U.S. NORTHCOM? Why or why not?

Answer. I am aware of the current initiatives at Headquarters NORAD and Headquarters U.S. NORTHCOM to achieve efficiencies through staff reorganization. If confirmed, I will analyze and structure the commands to achieve these efficiencies in accordance with the law and guidance from senior authorities.

NORTHCOM JOINT TASK FORCES

Question. Since the establishment of U.S. NORTHCOM, several multi-service task forces, e.g., JTF-CS, Joint Task Force-North (JTF-North), have been placed under its authority.

What is the current status of the Joint Task Force organizations under U.S. NORTHCOM in terms of organization, planning, personnel allocation, and capability?

Answer. Multi-service units with task force capability under U.S. NORTHCOM's authority are Joint Task Force Alaska, JTF-CS, Joint Task Force North, Standing Joint Force Headquarters North, and Joint Force Headquarters National Capital Region. These task forces are currently working with U.S. NORTHCOM on further plans development and refinement to enhance execution of existing and emergent homeland defense and civil support missions.

NORTHCOM COUNTERDRUG RESPONSIBILITIES

Question. What role does U.S. NORTHCOM play in the Defense Department's overall counterdrug mission and organization?

Answer. U.S. NORTHCOM has execution authority for DOD's priority counterdrug activities throughout its area of responsibility. Specific tasking is in three broad categories: providing support to civilian law enforcement, creating a shared network of intelligence and information support, and leveraging theater security cooperation activities, specifically with Mexico, to reduce the impact of illicit narcotics trafficking on the homeland.

Question. How are counterdrug operations coordinated across combatant command boundaries, particularly with U.S. Southern Command (SOUTHCOM) and U.S. Pacific Command?

Answer. Per the Assistant Secretary of Defense for Special Operations/Low-Intensity Conflict Memorandum dated 21 August 2003, Joint Interagency Task Force-South (JIATF-South) will execute counterdrug detection and monitoring missions in a Joint Operations Area (JOA) covering operationally significant portions of the U.S.

NORTHCOM and U.S. Pacific Command areas of responsibility. JIATF-South coordinates counterdrug operations throughout its JOA with forces under the operational control of U.S. SOUTHCOM. A Memorandum of Understanding between Commander, U.S. NORTHCOM, and Commander, U.S. SOUTHCOM, delineates procedures to further coordinate counterdrug-related intelligence, information, and operations.

Question. The National Defense Authorization Act for Fiscal Year 2004 included a provision (section 1022) that authorizes forces providing support to law enforcement agencies conducting counterdrug activities to also provide, subject to all applicable laws and regulations, support to law enforcement agencies conducting counterterrorism activities.

How has this authority been implemented, and what financial resources do these task forces have to conduct counterterrorism missions?

Answer. Joint Task Forces under U.S. NORTHCOM have been granted authority to make incidental use of counternarcotics resources, capabilities, and structures to detect and interdict terrorists through a 26 April 2006 Deputy Secretary of Defense policy memorandum, titled "Use of Counternarcotics Funding for Counterterrorism." Further, with prior Deputy Assistant Secretary of Defense for Counternarcotics approval, Joint Task Forces can make non-incidental use of this authority. I understand U.S. NORTHCOM appreciates the inherent flexibility provided by section 1022 authority, but has not yet encountered the need to implement the authority through its primary counternarcotics task force, Joint Task Force North.

SECURITY RELATIONSHIP WITH MEXICO

Question. The U.S. NORTHCOM area of responsibility includes the land areas of the United States, Canada, and Mexico. The bi-national NORAD Command ensures close cooperation between the United States and Canada on security and homeland defense matters.

Do you believe it is important to improve our security cooperation with Mexico?

Answer. Yes. Increased security cooperation among U.S. NORTHCOM, SEMAR (Mexican Navy) and SEDENA (Mexican Army) would significantly improve national security.

Question. If so, what would be your goals as Commander of U.S. NORTHCOM for such improved relations with Mexico, and how would you plan to achieve them?

Answer. If confirmed, improved relationships with Mexico will be a priority. In fact, I hope to visit Mexico by the end of April. I will emphasize mutual security interests addressing counterdrug, counternarcoterrorism, and border issues through training and equipping. Combined exercises to expand cooperative opportunities in support of the Security and Prosperity Partnership of North America are critical.

CHEMICAL, BIOLOGICAL, RADIOLOGICAL, NUCLEAR, AND HIGH YIELD EXPLOSIVES RESPONSE CAPABILITIES

Question. U.S. NORTHCOM has Homeland Defense and Defense Support to Civil Authorities missions, including preparation for and response to an incident or attack involving CBRNE materials or weapons, in the U.S. NORTHCOM area of responsibility.

If confirmed, how would you approach the challenge of ensuring adequate forces, capabilities, and plans to respond to such incidents in support of civil authorities?

Answer. There is nothing more important than defending the homeland. If confirmed, I will ensure U.S. NORTHCOM continues to coordinate closely with the DOD, the military Services, and the force providers to identify military capabilities needed to respond to both homeland defense and defense support of civil authorities missions. Through a rigorous, realistic program that exercises all facets of the National Response Plan, U.S. NORTHCOM will continue to refine processes and plans in support of its mission sets.

Question. There are currently a variety of organizations and units intended for CBRNE response and consequence management, including JTF-CS, the CBRNE Consequence Management Response Force, the U.S. Marine Corps Chemical-Biological Incident Response Force (CBIRF), National Guard Weapons of Mass Destruction Civil Support Teams (WMD-CST), and National Guard CBRNE Enhanced Response Force Package teams.

If confirmed, how would you plan to manage this mix of capabilities to ensure the best possible response force in the event of a CBRNE incident, and to avoid unnecessary duplication?

Answer. Many of the capabilities referenced in fact work together under current concepts of operation. The National Guard capabilities are designed to respond to local and regional incidents that may be for smaller CBRNE incidents and/or ahead

of a Federal response. If confirmed, I will take a close look at all of the military capabilities to ensure we have the appropriate capabilities, in the appropriate numbers, in the right locations and States to provide the necessary flexibility, agility, and depth of the military response.

Question. The U.S. Marine Corps CBIRF has not had regular or stable funding programmed or budgeted since its creation.

Do you believe this unit should have regular and stable funding to ensure its ability to accomplish its assigned missions?

Answer. Yes. The United States Marine Corps CBIRF is a unique capability for Federal response in the event of a CBRNE incident.

NORTHCOM-STATE RELATIONS

Question. U.S. NORTHCOM has the primary military responsibility to provide defense support to civil authorities when directed by the President and the Secretary of Defense, including consequence management operations. Such military assistance would often support State and local emergency response units.

Do you believe it is important for NORTHCOM to understand the emergency response capabilities and plans of the various States before a crisis arises, in order to optimize U.S. NORTHCOM's consequence management support?

Answer. Yes. As directed, U.S. NORTHCOM will provide support in an emergency when the requirements are beyond the capabilities of civil authorities in accordance with the National Response Plan. Understanding the capabilities and plans of the States is imperative in order to optimize U.S. NORTHCOM planning and operations. State plans enhance U.S. NORTHCOM's situational awareness and expedite response to incidents.

Question. If so, how would you plan to ensure that U.S. NORTHCOM has sufficient knowledge of State emergency response capabilities, including capabilities of National Guard units, and a good working relationship with State emergency response leaders?

Answer. If confirmed, I will ensure U.S. NORTHCOM continues to work with its interagency partners to strengthen the overall Federal response to a State emergency or disaster. In response to the February 2006 White House report, The Federal Response to Hurricane Katrina, Lessons Learned, which recommended DOD better integrate its capabilities with the State National Guard and the overall Federal response plan, U.S. NORTHCOM has taken the initiative to get a more in-depth understanding of State response capabilities. This past year, U.S. NORTHCOM, through its Army Service component, U.S. Army North, assigned and embedded Defense Coordinating Officers with each of the 10 Federal Emergency Management Agency regions. Their full-time mission is to build relationships and understand the capabilities of both the emergency response communities and National Guard of the States in their regions. Every day, U.S. NORTHCOM is linked to the National, State, and National Guard operations centers to synchronize planning and execution of the military contribution to response efforts.

FORCE PROVISION FOR U.S. NORTHCOM

Question. U.S. NORTHCOM has the mission of conducting military operations for homeland defense and, when directed by the President or Secretary of Defense, for providing military assistance to civil authorities, including consequence management for natural disasters and CBRNE incidents. Yet U.S. NORTHCOM has relatively fewer military forces assigned to it on a permanent basis.

What is your understanding of how forces are planned to be allocated to U.S. NORTHCOM for its full range of mission requirements, and what role U.S. Joint Forces Command plays in that process?

Answer. U.S. NORTHCOM possesses detailed and flexible plans to respond and conduct military operations in the homeland, provide assistance to primary agencies, or to lead the effort. These plans provide comprehensive troop and capability lists to source the plans as the Command prepares for an event or response to a no-notice incident. U.S. NORTHCOM is closely partnered with U.S. Joint Forces Command, and other force providers, at all levels, to ensure the capabilities listed in U.S. NORTHCOM's plans are trained and ready to respond.

Question. If confirmed, how do you intend to ensure that U.S. NORTHCOM will have sufficient forces available to it, properly trained and equipped, to accomplish its assigned missions, including its Quick Reaction Forces and Rapid Reaction Forces?

Answer. If confirmed, I intend to continue U.S. NORTHCOM's excellent working relationship with U.S. Joint Forces Command and other force providers. These relationships are synergized as the Command works through the challenges of Global

Force Management (GFM). I will ensure through refinement of plans and requirements, as well as participation in the monthly GFM process, homeland defense and defense support of civil authorities mission sets are appropriately prioritized, sourced, and sourced forces are trained and prepared to respond as described in U.S. NORTHCOM plans.

Question. If confirmed, how will you monitor the personnel, equipment, and training readiness of U.S. military forces (Active and Reserve) for homeland defense mission-essential tasks in support of U.S. NORTHCOM's contingency plans?

Answer. It is the responsibility of the Services to provide trained and ready forces for combatant commands. If confirmed, I will continue to ensure trained and ready forces are incorporated into the U.S. NORTHCOM exercise program.

BALLISTIC MISSILE DEFENSE

Question. One of U.S. NORTHCOM's missions is the ballistic missile defense of the United States. You were Director of Operations for U.S. Central Command during the early phases of Operation Iraqi Freedom, during which the Patriot missile defense system demonstrated it was operationally effective in combat against ballistic missiles.

Do you agree that it is essential that our deployed ballistic missile defense systems are operationally effective?

Answer. Yes. An operationally effective ballistic missile defense system, employed in a layered defense approach, is essential to defeating threats ranging from short-range ballistic missiles using Patriots and the U.S. Navy's Standard Missile Block 3s to long-range ballistic missile threats using the currently deployed Ground-based Midcourse Defense (GMD) system operated by U.S. NORTHCOM.

Question. Do you agree that it is important to conduct operationally realistic flight tests to demonstrate operational capability and reliability of the GMD system?

Answer. Yes. It is important to conduct operationally realistic flight tests to demonstrate and verify the operational capability and reliability of the GMD system. The successful GMD flight test of September 1, 2006, FTG-02, was the most operationally realistic, end-to-end flight test performed to date.

U.S. NORTHCOM-DHS RELATIONSHIP

Question. DHS is still a relatively new Federal agency, and is continuing to improve its ability to meet its homeland security missions.

As DHS improves and matures its homeland security capabilities, do you expect that will reduce the requirements on U.S. NORTHCOM to provide defense support to civil authorities?

Answer. As U.S. NORTHCOM continues to improve coordination with DHS, the Command may capitalize upon efficiencies in order to reduce defense support of civil authorities. If confirmed, this is an area I will monitor closely.

Question. What do you consider to be DOD and U.S. NORTHCOM's appropriate role vis-a-vis DHS and State authorities in identifying and validating the equipment and other requirements associated with homeland security missions?

Answer. If confirmed, I believe DOD and U.S. NORTHCOM should work toward a full integration of capabilities and coordinate acquisition efforts with all mission partners to ensure unity of effort. Identification of equipment and other requirements should be synchronized to enhance interoperability and reduce duplication of effort.

NATIONAL GUARD

Question. There is still considerable debate about the role the National Guard should play in defending the homeland.

Do you believe that defending the homeland should become the National Guard's primary mission?

Answer. I believe defending the homeland is the most important mission for the military, regardless of component status: Active, Guard, or Reserves.

Question. What is the current status of the working relationship between U.S. NORTHCOM, the NGB, and individual State National Guard headquarters?

Answer. My understanding is that the working relationship between U.S. NORTHCOM, the NGB, and individual State National Guard headquarters is strong and growing stronger. U.S. NORTHCOM routinely hosts visits by NGB leadership and conducts conferences that bring together The Adjutants General (TAGs) of many States for planning, exercising, and training exchanges. Additionally, the current commander visits TAGs and State leadership during his travels around the country. If confirmed, I intend to continue to work closely and personally with the TAGs and Governors and strengthen current relationships.

Question. If confirmed, what type of liaison relationships for planning and operational purposes would you advocate between U.S. NORTHCOM, DHS, Federal, State, and local first responders, and National Guard units under State authority?

Answer. Throughout U.S. NORTHCOM's history, the Command has worked closely and continually with DHS, Federal, State, and local first responders, and National Guard units under State authority in capacities ranging from planning and exercising to conducting and collaborating on real-world operations. Recent progress in such relationships has been exponential and if confirmed, I intend to ensure this momentum continues.

Question. Recent changes to the Insurrection Act, 10 U.S.C. section 333, included in section 1076 of the John Warner National Defense Authorization Act for Fiscal Year 2007 clarified the President's authority to call up the National Guard to perform Federal service under circumstances resulting in the inability of State governments to maintain public order.

What is your view of these changes?

Answer. I have reviewed the changes to the former Insurrection Act. From my perspective at the execution level, if confirmed, I will carry out the orders of the President, just as I would have done under the previous authority.

Question. Do you think that the foregoing changes have enhanced the ability of Commander, U.S. NORTHCOM to respond to emergency situations? If so, how?

Answer. Please see the above answer.

Question. Do you believe that changes to the "posse comitatus" doctrine under section 1385 of title 10, U.S.C., and implementing DOD and Service regulations, are needed for U.S. NORTHCOM to accomplish its mission?

Answer. No, I do not believe that the Posse Comitatus Act is an obstacle to the performance of any U.S. NORTHCOM mission. The various statutory exceptions to this act provide sufficient authority for the command's support to civil authority, as directed by the President and Secretary of Defense.

Question. The National Guard is presently assisting DHS on the southern U.S. border in a mission known as Operation Jump Start. The administration proposed last year that up to 6,000 members of the National Guard would be deployed on a temporary basis until DHS could add additional personnel.

Do you believe that border security is primarily the responsibility of DOD or DHS?

Answer. Border security is the primary responsibility of DHS.

Question. In your view, is border security an appropriate mission for the National Guard or other DOD forces?

Answer. I support the President's determination, in consultation and coordination with Governors, that it is appropriate for the National Guard under command and control of the Governors to conduct this mission in support of U.S. Customs and Border Protection.

Would you support the deployment of National Guard personnel for this mission beyond the 2-year period currently proposed, to include the rotation of National Guard personnel to support this mission on an enduring basis?

Answer. Since these National Guard forces remain under the commands of their respective Governors, I defer to Governors on this issue.

WEAPONS OF MASS DESTRUCTION-CIVIL SUPPORT TEAMS (WMD-CSTS)

Question. In recent years, legislation has been enacted to establish additional WMD-CSTS with the goal of ensuring that all 54 States and territories have a WMD-CSTS within their borders. To date, 47 of the 55 planned WMD-CSTS have been certified by the DOD to be mission capable.

Question. Do you believe the WMD-CSTS are appropriately organized, sized, trained, and equipped to accomplish their assigned missions?

Answer. Yes. WMD-CSTS are a critical resource to the State response and offer the State leadership great flexibility when responding to an incident within their areas of responsibility. If confirmed, I will ensure U.S. NORTHCOM, through U.S. Army North, continues to validate and certify these unique capabilities.

Question. If not, what changes do you believe are needed?

Answer. Not applicable.

Question. What is your view about proposals that the Commander, U.S. NORTHCOM, or the Deputy Commander, by law must be a National Guard officer?

Answer. I believe the process to hire the Commander and Deputy Commander should allow for the best-qualified officers to compete for each of these positions. There are already two National Guard general officers serving in U.S. NORTHCOM in positions that are not mandated by law to be filled by National Guard officers. Specifically, there is a two-star Air National Guard officer serving as the Com-

mander of U.S. NORTHCOM's Air Forces Northern in a position that is not mandated by law to be a National Guard officer. Similarly, there is a two-star Army National Guard officer serving in U.S. NORTHCOM's Army North as the Operational Command Post Commander. Manning these positions has been done without a legal mandate and selection of each individual was made based on each officer being best qualified for the job.

In addition, the two-star Chief of Staff position in U.S. NORTHCOM's headquarters is filled by a two-star Air National Guard officer; this billet is a "Chairman's 10" position, designated to be filled by an officer in the Reserve component, in accordance with 10 U.S.C. 526 and the National Defense Authorization Act for Fiscal Year 2000.

Thus, given that the Chief of Staff position (one of the top three positions in U.S. NORTHCOM) already is filled by a member of the Reserve component, as well as U.S. NORTHCOM's success in hiring the best-qualified officers from the Active and Reserve component, I believe the U.S. NORTHCOM Commander and Deputy Commander positions should not be mandated by law to be filled by National Guard officers.

I also believe that the officer development process for both the Guard and the Reserve Forces needs to be reviewed. We must ensure that select Reserve component officers receive appropriate joint and operational exposure earlier in their career such that, at the appropriate points in their career, there would be a pool of senior leaders that could compete on a best-qualified basis.

INFORMATION SHARING

Question. On June 9, 2004, an incident involving a private aircraft entering the National Capital Region airspace led to the evacuation of the U.S. Capitol. The emergency apparently resulted from shortfalls in the ability of various Federal Government agencies, including the Federal Aviation Administration, DHS, and DOD to share information. The mission of U.S. NORTHCOM requires rapid, secure, and effective communication with a variety of Federal, State, and local entities.

What steps would you take, if confirmed, to ensure that rapid communication is ensured with other Federal agencies and with State entities?

Answer. The information-sharing capabilities and protocols practiced by U.S. NORTHCOM and NORAD have improved significantly over the last few years. Plans, exercises, and continual information-sharing exchanges have all helped to identify weaknesses and refine operations. Additionally, U.S. NORTHCOM has procured state-of-the-art communications equipment to best effect communications and interoperability with partners during a crisis.

Question. Are there any legal impediments that exist that slow or prevent the rapid dissemination of information gained by military components with other Federal, State, or local entities, or the private sector?

Answer. I am unaware of any legal impediments that slow or prevent the rapid dissemination of information to external agencies.

INTELLIGENCE SHARING/NATIONAL COUNTERTERRORISM CENTER (NCTC)

Question. What is the U.S. NORTHCOM's role and involvement in developing intelligence assessments regarding terrorist threats?

Answer. U.S. NORTHCOM draws upon foreign intelligence, intelligence derived from law enforcement agencies, and open source information to assess the foreign terrorist threat to the area of responsibility. The Federal Bureau of Investigation (FBI), Central Intelligence Agency, National Security Agency (NSA), and DHS are the primary sources of intelligence and Defense Intelligence Agency (DIA), NCTC/Interagency Intelligence Committee on Terrorism, DHS and FBI-finished threat assessments are furnished to U.S. NORTHCOM elements as appropriate. Threat assessments are provided to the Commander and senior staff, as well as U.S. NORTHCOM component commands.

Question. What intelligence agencies are involved in providing input to U.S. NORTHCOM's staff for the development of intelligence assessments?

Answer. U.S. NORTHCOM terrorism analysts rely on a broad collaborative network of counterterrorism organizations when developing terrorist threat assessments. Terrorism analysts from NCTC, FBI, DIA, DHS, and its components (U.S. Immigration and Customs Enforcement, U.S. Customs and Border Protection, the U.S. Coast Guard), NSA, and the other combatant commands all provide inputs to the threat assessment process.

Question. What is the current nature of the relationship between U.S. NORTHCOM and the NCTC, and what will that relationship be in the future?

Answer. U.S. NORTHCOM receives NCTC-finished intelligence and the U.S. NORTHCOM Operational Intelligence Watch participates in a daily NCTC Operations Center video teleconference regarding new terrorism reporting. U.S. NORTHCOM is participating jointly with U.S. Central Command and DIA in an NCTC process improvement initiative to optimize the information-sharing environment. In addition, the NCTC plays a critical role in supporting NORAD's aerospace control mission. For Operation Noble Eagle responses, the NCTC participates in Noble Eagle Conferences and provides real-time intelligence as applicable. If confirmed, I will continue to support a strong relationship with NCTC.

Question. Does U.S. NORTHCOM have representatives located at the NCTC on a daily basis? If so, what are their functions and responsibilities? If not, why not?

Answer. U.S. NORTHCOM has a billet for a representative to NCTC. The individual assigned is currently working at DIA. I understand he will return to NCTC after the successful completion of the process improvement initiative noted above, which will determine his new duties.

Question. How do posse comitatus, privacy restrictions, and other laws and regulations concerning the collection of intelligence within the U.S. affect the way U.S. NORTHCOM receives and uses intelligence?

Answer. U.S. NORTHCOM can accomplish its intelligence mission within the framework of existing laws and policy and is vigilant in ensuring all intelligence activities conducted in support of its mission comply with intelligence oversight law and policy. All intelligence activities conducted in support of U.S. NORTHCOM operations are reviewed by legal staff to ensure they are conducted in accordance with law and policy.

CRUISE MISSILE DEFENSE

Question. How serious do you believe the cruise missile threat is to the United States and its territories?

Answer. I believe the immediate threat is from high-speed commercial aviation flying in a low-altitude profile, similar to a cruise missile; or possibly an unmanned aircraft system that can be built in one's garage. That said, the threat from cruise missiles launched by a terrorist organization or rogue nation is also a real and increasing, though currently somewhat limited, threat.

Question. If confirmed, what capabilities would you prioritize to address this threat?

Answer. The key capability to counter this threat is persistent wide area air surveillance, which provides timely identification, classification, and assessment of tracks of interest critical in the defense against cruise missiles. If confirmed, I will advocate for continued research and for demonstration of promising technologies to enhance our capabilities and support the ongoing Homeland Air and Cruise Missile Functional Solutions Analysis. Upon completion, this analysis will provide a recommended family of systems to meet our wide area air surveillance requirements.

CONTINENTAL AIR DEFENSE

Question. How has the continental air defense mission changed since the end of the Cold War and the events of September 11, 2001?

Answer. The Command's mission has expanded since September 11 to protect against domestic airborne threats. NORAD's defense posture is now aligned to counter the new threat.

Question. Do you believe that current U.S. continental air defense capabilities are adequate to meet national security needs?

Answer. Yes. NORAD has adapted to counter the terrorist threat posed to the United States and Canada through improvements to surveillance and communications systems and through better coordination and information sharing with the interagency community.

Question. If confirmed, what capabilities and programs would you prioritize to address any identified deficiencies?

Answer. If confirmed, I will ensure NORAD continues to enhance the capabilities it has under Operation Noble Eagle to respond to a terror event and quickly increase air defense posture during a crisis. Future program priorities include Homeland Air and Cruise Missile Defense, wide area air surveillance, and improving the North American air surveillance picture not only for DOD, but also for our interagency partners—notably the National Capital Region Coordination Center and U.S. Customs and Border Protection.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Commander, U.S. NORTHCOM, and Commander, NORAD?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR DANIEL K. AKAKA

HAWAIIAN NATIONAL SECURITY

1. Senator AKAKA. Lieutenant General Renuart, the Department of Homeland Security (DHS) works with U.S. Northern Command (NORTHCOM) to address issues of national security. However, my State of Hawaii falls under the jurisdiction of U.S. Pacific Command (PACOM). While I have asked this question before to your predecessor, Admiral Keating, who did understand and assured me that PACOM's interest and that of the Pacific were being addressed, I have also asked this question to Secretary Chertoff of DHS and he was unaware that NORTHCOM did not include Hawaii and that it was under PACOM. In this regard, what efforts will you make to ensure that Hawaii's interests are heard?

General RENUART. The first priority of every combatant commander is to protect the homeland. To that end, U.S. PACOM has developed plans for homeland defense and civil support of Hawaii, which falls into Commander, U.S. PACOM's area of responsibility. U.S. NORTHCOM has coordinated on U.S. PACOM's plans to ensure seamless coverage for homeland defense and civil support across the United States and its territories.

STATE ASSISTANCE

2. Senator AKAKA. Lieutenant General Renuart, as you probably know, it has been reported in the media that the U.S. Government's response to Hurricane Katrina was not adequate or quick enough. What assurances can you give State and local officials that NORTHCOM will be prepared to respond should a State Governor request military assistance during a disaster?

General RENUART. U.S. NORTHCOM is prepared to support a designated primary Federal agency in the wake of disasters with specialized skills and assets that can rapidly stabilize and improve the situation in the event that the President approves a State Governor's request for Federal assistance. All Department of Defense (DOD) support is provided at the direction of the President or Secretary of Defense and in accordance with the National Response Plan. When requested, U.S. NORTHCOM will be fully engaged in supporting operations to save lives, reduce suffering, and protect the infrastructure of our homeland.

U.S. NORTHCOM has taken significant steps to improve our response capabilities based on lessons learned and findings in the House Select Bipartisan Committee to Investigate the Preparation for and Response to Hurricane Katrina report titled "A Failure of Initiative," the White House Report titled "The Federal Response to Hur-

ricane Katrina Lessons Learned,” and the Senate Committee on Homeland Security and Governmental Affairs Report titled “Hurricane Katrina: A Nation Still Unprepared.”

U.S. NORTHCOM has incorporated the Joint Staff standing execution order (EXORD) for Defense Support of Civil Authorities into operational planning for the upcoming hurricane season. The EXORD provides the U.S. NORTHCOM Commander authority, in coordination with supporting commands and military departments, to: deploy Defense Coordinating Officers (DCOs) and their staffs; establish operational staging areas, Federal mobilization centers, and DOD base support installations in support of the Federal Emergency Management Agency (FEMA); and deploy airborne fire fighting systems upon receipt of a request for assistance from a Federal primary agency. In addition, the U.S. NORTHCOM Commander can place the following assets on 24-hour prepare to deploy orders: medium and heavy lift support helicopters, fixed-wing search aircraft, communications support packages, patient movement capability, a Joint Task Force for command and control of Federal military forces, a forward surgical team, and a deployable distribution operations center.

To further improve our response capability, we have:

- Integrated full-time DCOs and their staffs into all 10 Federal Emergency Management Agency (FEMA) regions. Developed pre-scripted requests for assistance for FEMA, in collaboration with DOD and DHS, based on anticipated capability requirements.
- Purchased, in conjunction with DHS, cellular network packages that include portable cell towers, over 100 cell phones, over 40 laptop computers, a satellite terminal, and radio bridging. U.S. NORTHCOM also procured 300 satellite phones for distribution per request of the primary agency in support of State officials.
- Identified a series of deployed communication options from each Service that can quickly adapt to support FEMA's pre-scripted mission assignments and the needs of a request for forces from a joint task force, in addition, we drafted communications request for forces and identified assets from the Services and Joint Communications Support Element (e.g., voice, video, and data packages to support a small command post or large joint task force).
- Conducted Exercise Vigilant Shield 06 from 4–14 December 2006. This exercise tested U.S. NORTHCOM's command and control capability to provide defense support to the Nation during a variety of simulated scenarios to include a potential limited ballistic missile attack, a maritime domain threat, and support to a lead agency in response to a simulated nuclear weapons accident.
- Conducted Exercise Ardent Sentry 06 from 8–19 May 2006. This exercise focused on both homeland defense and defense support of civil authorities and included a Category 3 hurricane striking the Gulf Coast in the vicinity of New Orleans.
- Hosted or participated in more than 140 conferences or tabletop exercises since Hurricane Katrina.
- Developed procedures with Air Forces Northern to increase visibility and provide deconfliction of airborne rescue assets.
- Coordinated on a damage assessment concept of operations with DHS and the National Geospatial-Intelligence Agency. Collaboration is ongoing on pre- and post-hurricane imagery collection processes between DOD and interagency partners, as well as dissemination methods for imagery products.
- Deployed information management mobile training teams to demonstrate and instruct the use of collaborative tools and information sharing processes to our DOD and interagency partners. Our teams have trained National Guard Bureau Joint Operations Center personnel and the staffs of 28 National Guard Joint Force Headquarters-State, 11 of which are located in hurricane regions. We are also coordinating with U.S. Army North to train DCOs and Defense Coordinating Elements on the use of collaborative tools, process and procedures to facilitate greater information sharing. This initiative started in late 2003 and is an ongoing process.
- Coordinated with the U.S. Coast Guard and National Guard Bureau on a Joint Search and Rescue Center for large-scale operations.

3. Senator AKAKA. Lieutenant General Renuart, how will you ensure that the needs of State and local officials are addressed in NORTHCOM's disaster relief plans?

General RENUART. U.S. NORTHCOM and its component commands coordinate with State and local authorities, including the National Guard, to gain situational awareness of their civil support and consequence management efforts. For example, Joint Task Force-Civil Support (JTF-CS) is U.S. NORTHCOM's subordinate component for chemical, biological, radiological, nuclear, or high-yield explosive consequence management operations. To develop specific plans for specific events, JTF-CS used the Nunn-Lugar-Domenici cities as a baseline to evaluate all levels of emergency response to estimate the scope and magnitude and expedite U.S. NORTHCOM's supporting response. U.S. NORTHCOM, in its planning for homeland defense and defense support of civil authorities, takes into consideration the role of the National Guard as first responders for any crisis.

[The nomination reference of Lt. Gen. Victor E. Renuart, Jr., USAF, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
February 26, 2007.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the United States Air Force to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be General

Lt. Gen. Victor E. Renuart, Jr., 0278.

[The biographical sketch of Lt. Gen. Victor E. Renuart, Jr., USAF, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF LT. GEN. VICTOR E. RENUART, JR., USAF

Lt. Gen. Victor E. Renuart, Jr., is the Senior Military Assistant to the Secretary of Defense, Washington, DC. He serves as the principal immediate office adviser to the Secretary in all matters pertaining to the department. In addition to accompanying the Secretary on his travel and coordinating support to these trips, he serves as the Senior Military Liaison to the military Services, the Joint Chiefs of Staff, and the combatant commands. He also ensures timely execution of taskings as directed by the Secretary of Defense.

The general entered the Air Force in 1971 following graduation from Indiana University. He was commissioned through the Officer Training School in 1972. He has commanded a North Atlantic Treaty Organization (NATO) support group and two fighter wings. He served as Commander of the 76th Fighter Squadron during Operations Desert Shield and Desert Storm, and supported Operation Deny Flight as Director of Plans for the NATO Combined Air Operations Center at Headquarters 5th Allied Tactical Air Force. In addition, he commanded Joint Task Force-Southwest Asia and 9th Air and Space Expeditionary Task Force-Southwest Asia, responsible for control of Operation Southern Watch. The general has served as the U.S. Central Command Director of Operations, wherein he oversaw the planning and execution of all joint and allied combat, humanitarian assistance and reconstruction operations for Operations Enduring Freedom and Iraqi Freedom. He also served as Vice Commander, Pacific Air Forces, where he was responsible for Air Force and Air Component Command activities for the Commander, U.S. Pacific Command. The general has flown combat missions in Operations Desert Storm, Deny Flight, Northern Watch, and Southern Watch.

Prior to assuming his current position, General Renuart was the Director of Strategic Plans and Policy, the Joint Staff. He provided strategic direction, policy guidance, and planning focus to develop and execute the National Military Strategy in support of worldwide national security operations, politico-military affairs, international negotiations, and organizational issues through coordination with the combatant commands, the Services, Office of the Secretary of Defense, defense agencies, other U.S. Government agencies, and international organizations.

Education:

1971 Bachelor of Science degree in production and industrial management, Indiana University, Bloomington, IN.

1975 Master of Arts degree in psychology, Troy State University, Troy, AL.

1977 Distinguished graduate, Squadron Officer School, Maxwell Air Force Base (AFB), AL.

1979 Air Command and Staff College, Maxwell AFB, AL.

1992 Army War College, Carlisle Barracks, PA.

1997 Senior Officers in National Security Program, Johns Hopkins University, Baltimore, MD.

Assignments:

January 1972–March 1973, student, undergraduate pilot training, Laredo AFB, TX.

March 1973–July 1976, T-37 instructor pilot, Craig AFB, AL.

July 1976–September 1979, Assistant Professor of Aerospace Studies, University of Notre Dame, South Bend, IN.

September 1979–April 1980, student, AT-38 and A-10 training, Holloman AFB, NM, and Davis-Monthan AFB, AZ.

May 1980–June 1982, A-10 instructor pilot and flight commander, 92nd Tactical Fighter Squadron, 81st Tactical Fighter Wing, Royal Air Force Bentwaters, England.

June 1982–July 1984, operations officer, Detachment 2, 81st Tactical Fighter Wing, Detachment 2, Leipheim Air Base, West Germany.

July 1984–November 1985, operations inspector, Office of the Inspector General, Headquarters U.S. Air Forces in Europe, Ramstein AB, West Germany.

November 1985–September 1986, Executive Officer to the Inspector General, Headquarters U.S. Air Forces in Europe, Ramstein AB, West Germany.

September 1986–July 1991, Chief of Wing Inspections, 23rd Tactical Fighter Wing, later, Operations Officer, later, Commander, 76th Tactical Fighter Squadron, England AFB, LA.

July 1991–July 1992, student, Army War College, Carlisle Barracks, PA.

July 1992–March 1993, Director of Assignments, Deputy Chief of Staff for Personnel, Headquarters U.S. Air Forces in Europe, Ramstein AB, Germany.

March 1993–October 1994, Commander, Headquarters Support Group, Allied Air Forces Central Europe, NATO, Ramstein AB, Germany.

October 1994–June 1995, Executive to the Assistant Chief of Staff for Operations, Operations Directorate, and senior U.S. representative, Allied Air Forces Central Europe, NATO, Ramstein AB, Germany (November 1994–May 1995, Director of Plans, NATO Combined Air Operations Center, 5th Allied Tactical Air Force, Vicenza, Italy).

June 1995–April 1996, Assistant Director of Operations, Headquarters U.S. Air Forces in Europe, Ramstein AB, Germany.

April 1996–June 1998, Commander, 52nd Fighter Wing, Spangdahlem AB, Germany.

July 1998–March 2000, Commander, 347th Wing, Moody AFB, Georgia.

April 2000–May 2001, Commander, Joint Task Force-Southwest Asia and Commander, 9th Air and Space Expeditionary Task Force-Southwest Asia, U.S. Central Command, Riyadh, Saudi Arabia.

June 2001–November 2003, Director of Operations (J-3), U.S. Central Command, MacDill AFB, FL.

December 2003–August 2005, Vice Commander, Pacific Air Forces, Hickam AFB, HI.

August 2005–August 2006, Director for Strategic Plans and Policy, the Joint Staff, Washington, DC.

August 2006–present, Senior Military Assistant to the Secretary of Defense, Washington, DC.

Flight information:

Rating: Command pilot.

Flight hours: More than 3,800, including 60 combat missions.

Aircraft flown: T-37, AT-38, A-10, F-16, F-15, C-130, and HH-60.

Major awards and decorations:

Defense Distinguished Service Medal with oak leaf cluster

Distinguished Service Medal

Defense Superior Service Medal with oak leaf cluster

Legion of Merit with oak leaf cluster

Meritorious Service Medal with four oak leaf clusters

Air Medal with two oak leaf clusters

Aerial Achievement Medal with three oak leaf clusters
Air Force Commendation Medal with oak leaf cluster
Air Force Achievement Medal with oak leaf cluster

Effective dates of promotion:

Second Lieutenant, Jan. 12, 1972.
First Lieutenant, Jan. 12, 1974.
Captain, Jan. 12, 1976.
Major, Dec. 1, 1983.
Lieutenant Colonel, May 1, 1987.
Colonel, Nov. 1, 1992.
Brigadier General, Aug. 1, 1997.
Major General, Aug. 1, 2000.
Lieutenant General, Jan. 1, 2004.

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Lt. Gen. Victor E. Renuart, Jr., USAF, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Victor E. Renuart, Jr.

2. **Position to which nominated:**
Commander, Northern Command/Commander, North American Aerospace Defense Command.

3. **Date of nomination:**
February 26, 2007.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
26 Nov. 1949; Miami, FL.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Jill Jenner Renuart.

7. **Names and ages of children:**
Ryan Victor Renuart, 32.
Andrew John Renuart, 29.

8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the Service record extract provided to the committee by the executive branch.

None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational, or other institution.

None.

10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Life Member — Sigma Chi Fraternity.

Member — U.S. Professional Tennis Association.

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the Service record extract provided to the committee by the executive branch.

Significant Sig Award—Sigma Chi Fraternity.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

VICTOR E. RENUART, JR.

This 1st day of February, 2007.

[The nomination of Lt. Gen. Victor E. Renuart, Jr., USAF, was reported to the Senate by Chairman Levin on March 15, 2007, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 19, 2007.]

[Prepared questions submitted to LTG Robert L. Van Antwerp, Jr., USA, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders’ responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. No. The goals of the Goldwater-Nichols legislation are as important today as when the act passed 30 years ago. I continue to support these reforms and will be guided by the objectives of this important legislation, which promote the effectiveness of military operations, strengthen civilian control, provide for more efficient and effective use of defense resources, and improve the management and administration of the Department of the Army and Department of Defense (DOD).

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Not applicable, in view of my previous answer.

RELATIONSHIPS

Question. Please describe your understanding of the relationship of the Chief of Engineers to the following offices (for the purpose of these questions, the term "Chief of Engineers" should be read to include Commanding General U.S. Army Corps of Engineers (USACE)):

The Secretary of Defense.

Answer. As head of DOD, the Secretary of Defense has full authority, direction, and control over all its elements. The Secretary exercises this power over the Corps of Engineers through the Secretary of the Army, whose responsibility for, and authority to conduct all affairs of the Army is subject to the authority, direction, and control of the Secretary of Defense. If confirmed, I will cooperate fully with the Secretary of Defense in fulfilling the Nation's national defense priorities and efficiently administering the Corps of Engineers in accordance with the policies established by the Office of the Secretary of Defense.

Question. The Joint Staff.

Answer. The Joint Chiefs of Staff serve as military advisers to the President, the National Security Council, and the Secretary of Defense. Subject to the authority, direction, and control of the President and the Secretary of Defense, the Joint Chiefs of Staff assist the Chairman of the Joint Chiefs of Staff in carrying out the Chairman's responsibilities of providing for the strategic direction, strategic planning, and contingency planning; advising the Secretary of Defense on requirements, programs, and budgets identified by the commanders of the unified and specified combatant commands; developing doctrine for the joint employment of the Armed Forces; providing for representation of the United States on the Military Staff Committee of the United Nations; furnishing certain reports to the Secretary of Defense; and performing such other duties as may be prescribed by law or by the President or the Secretary of Defense. If confirmed, I will cooperate fully with the Joint Chiefs of Staff in the performance of their responsibilities.

Question. The Secretary of the Army.

Answer. As head of the Department of the Army, the Secretary of the Army is responsible for, and has the authority to conduct, all affairs of the Department of the Army, subject to the authority, direction, and control of the Secretary of Defense. The Secretary of the Army may assign such of his functions, powers, and duties as he considers appropriate to the Under Secretary of the Army, as well as the Assistant Secretaries of the Army, and require officers of the Army to report to these officials on any matter. If confirmed, I will support the Secretary in the performance of the Secretary's important duties. I will strive to establish and maintain a close, professional relationship with the Secretary of the Army, based on full and candid communication with the Secretary on all matters assigned to me.

Question. The Assistant Secretary of the Army for Civil Works.

Answer. The Assistant Secretary of the Army for Civil Works is principally responsible for the overall supervision of the Army's civil works functions, including programs for conservation and development of the national water resources, including flood control, navigation, shore protection, and related purposes. Carrying out the Army's civil works program is a principal mission of the Corps of Engineers and the complex issues that arise in this area demand a close, professional relationship between the Assistant Secretary of the Army for Civil Works and the Chief of Engineers, based on mutual respect, trust, cooperation, and full communication. If confirmed, I am committed to establishing and maintaining such a relationship.

Question. The General Counsel of the Army.

Answer. The General Counsel of the Army is the chief legal officer of the Army. The General Counsel serves as counsel to the Secretary of the Army and other Secretariat officials and is responsible for determining the position of the Department of the Army on any legal question or procedure. If confirmed, I will ensure that my Chief Counsel maintains a close and professional relationship with the General Counsel and actively seeks the General Counsel's guidance in order to ensure that

Army Corps of Engineers policies and practices are in strict accordance with the law and the highest principles of ethical conduct.

Question. The Chief of Staff of the Army and the Army Staff.

Answer. The Chief of Staff of the Army performs the Chief of Staff's duties under the authority, direction, and control of the Secretary of the Army and is directly responsible to the Secretary. The Chief of Staff also performs the duties prescribed by law as a member of the Joint Chiefs of Staff.

The Army Staff assists the Secretary of the Army in carrying out the Secretary's responsibilities, by furnishing professional advice and operations expertise to the Secretary, the Under Secretary, and the Assistant Secretaries of the Army, and to the Chief of Staff of the Army. Under the authority, direction, and control of the Secretary of the Army, the Army staff prepares for and assists in executing any power, duty, or function of the Secretary or the Chief of Staff; investigates and reports on the Army's efficiency and preparedness to support military operations; supervises the execution of approved plans; and coordinates the action of Army organizations, as directed by the Secretary or Chief of Staff. As a statutory member of the Army Staff, the Chief of Engineers assists the Secretary in carrying out the Secretary's responsibilities and furnishes necessary professional assistance to the Secretary, the Under Secretary, the Assistant Secretaries of the Army, and the Chief of Staff of the Army. Specifically, the Chief of Engineers is the principal adviser to the Army Staff on engineering and construction matters. In discharging these responsibilities, the Chief of Engineers must develop positive, professional relationships with the Chief of Staff, the Vice Chief of Staff, the Deputy and Assistant Chief of Staff, the Surgeon General, the Judge Advocate General, the Chief of Chaplains, and the Chief of the Army Reserve, in order to ensure that the Army Staff works harmoniously and effectively in assisting the Army Secretariat. I am committed to establishing and maintaining such relationship with the members of the Army Staff.

Question. The combatant commanders.

Answer. The combatant commanders are responsible to the President and to the Secretary of Defense for the performance of missions assigned to the commands by the President or by the Secretary with the approval of the President. Subject to the direction of the President, the combatant commanders perform their duties under the authority, direction, and control of the Secretary of Defense and are directly responsible to the Secretary for the preparedness of the commands to carry out their assigned missions. These missions include providing humanitarian and civil assistance, training the force, conducting joint exercises, contingency activities, and other selected operations. If confirmed, I will support the combatant commanders in the performance of these important duties by providing any necessary engineering and construction services required from the Corps of Engineers to the combatant commanders' component commands.

Question. The U.S. Ambassador to Iraq.

Answer. The Corps of Engineers is providing a broad array of engineering and construction-related services in Iraq generally to either the Central Command (CENTCOM) Commander or the State Department. In the first situation, the CENTCOM Commander has the primary relationship with the U.S. Ambassador and my involvement with the Ambassador would be in support of the CENTCOM Commander through my Gulf Region Division Commander. In the second situation, my representative, the Gulf Region Division Commander, would have a direct relationship with the Ambassador, but would coordinate with the CENTCOM Commander nonetheless.

Question. The State Governors.

Answer. The execution of the Corps of Engineers civil and military missions often demands a balancing of diverse interests. The proper reconciliation of these interests requires an understanding of the Corps' authorities and legal responsibilities and open communication among all parties. I am committed to working cooperatively with the Governors of the States for the public interest. If confirmed, I pledge to establish and maintain a full dialogue with the Governors of the States on all issues we must cooperatively address.

Question. Please describe the chain of command for the Chief of Engineers on: (a) military matters; (b) civil works matters; (c) operational matters; and (d) any other matters for which the Chief of Engineers may be responsible.

Answer.

Military Matters

The Chief of Staff presides over the Army Staff and assists the Secretary of the Army in carrying out the Secretary's responsibilities. The Vice Chief of Staff has such authority and duties with respect to the Army Staff as the Chief of Staff, with the approval of the Secretary of the Army, may prescribe for him. As a statutory

member of the Army Staff, the Chief of Engineers reports to the Chief of Staff, through the Vice Chief of Staff, with respect to military matters.

Civil Works Matters

The supervisory duties of the Assistant Secretary of the Army for Civil Works extends to all civil works functions of the Army, including those relating to the conservation and development of water resources. The Chief of Engineers reports to the Assistant Secretary of the Army for Civil Works on civil works functions.

Operational Matters

The Chief of Engineers serves as a member of the Army Staff and as Commander of the USACE. In this latter capacity, the Chief of Engineers commands nine engineer divisions and one engineer battalion. When employed in support of military contingency operations, these engineer assets fall under the command and control of the combatant commander designated for the particular operation.

Any other matters for which the Chief of Engineers may be responsible

The Chief of Engineers reports to each of the Assistant Secretaries within their areas of functional responsibility. For example, in the areas of installation and real estate management, the Chief of Engineers reports to the Assistant Secretary of the Army for Installations and the Environment. Similarly, the Chief of Engineers reports on procurement matters to the Assistant Secretary of the Army for Acquisition, Logistics, and Technology (ASA-ALT).

Question. Who is responsible for providing direction and supervision to the Chief of Engineers in each of the four areas listed above?

Answer. In each of these areas, the Chief of Engineers acts under the overall authority, direction, and control of the Secretary of the Army. With respect to military matters, the Secretary has assigned to the Chief of Staff the authority to preside over and supervise the Army Staff, including the Chief of Engineers. With respect to civil works functions, the Chief of Engineers reports to the Assistant Secretary of the Army for Civil Works. In operational contexts, command and control of engineer assets is exercised by the combatant commanders designated for the particular operation.

Question. In your view, are there any areas of responsibility where it would be inappropriate for the Chief of Engineers to provide information to the Secretary of the Army or the Assistant Secretary of the Army for Civil Works? If so, what areas and why?

Answer. No. Certain information may require protection from disclosure, as in the case of certain procurement sensitive information, however, even this information may be shared if appropriate steps are taken to protect sensitive and proprietary aspects of the information. The relationships between the Secretary of the Army and the Assistant Secretary of the Army for Civil Works and the Chief of Engineers must be founded upon information sharing, and full and open communication about all matters. If confirmed, I will ensure that all Secretariat officials are informed about issues and provided with all information pertinent to their functional areas of responsibility.

Question. What is your view of the relative authority of the Chief of Engineers, the Assistant Secretary of the Army for Civil Works, the Secretary of the Army, the Army Chief of Staff, and the Secretary of Defense with regard to the civil works functions of the Army Corps of Engineers?

Answer. As head of DOD, the Secretary of Defense has full authority, direction, and control over all elements within DOD. Similarly, as head of the Department of the Army, the Secretary of the Army has the authority necessary to conduct all affairs of the Department of the Army. Therefore, either Secretary could personally intervene in an issue involving the civil functions of the Corps of Engineers. However, the principal responsibility for overall supervision of the Corps civil works functions has been assigned to the Assistant Secretary of the Army for Civil Works by statute and various directives. Generally speaking, this supervisory responsibility includes the responsibility for setting program policies and for coordinating with the Department of the Army, DOD, Office of Management and Budget, and other executive branch officials on the Corps budget, legislative program, and other matters of program interest involving the Corps civil functions. In general, the Chief of Engineers is the engineering and construction expert responsible for carrying out the civil functions of the Corps and for conducting the various program, project, or study activities that comprise the civil works program. Typically, the Chief of Engineers does not interact with the Chief of Staff of the Army on a regular basis with respect to matters involving the Corps civil functions.

The work of the Chief of Engineers often involves issues of great significance to the States and localities and their elected officials in Congress.

Question. If confirmed, what would be your role in addressing such matters with Congress?

Answer. I agree this work often does involve issues of great significance to the States and localities and their elected officials in Congress. In fulfilling its statutory requirements, the Corps must interact positively to define an appropriate Federal role in addressing these issues that recognizes fiscal realities, environmental, and other societal considerations. The challenges the Corps faces are complex, and there are many difficult decisions to be made. It is important that all interests be brought to the table and that they be given a voice in the development of solutions to our Nation's problems. The Corps must be responsive to these interests and must engage in an open, constructive, and cooperative dialogue with the States, localities, and elected officials to ensure issues are resolved in a manner that maximizes the public interest.

Question. What is your understanding of the role of the civilian and military leadership of the Army Corps of Engineers in developing goals for Army Corps of Engineers programs and presenting these goals to the legislative branch?

Answer. The civilian and military leadership of the Corps of Engineers plays an important role in developing goals for Corps programs and in presenting these goals to the legislative branch. These goals are guided by the leaders' technical knowledge and understanding of Corps capabilities and by information gleaned from a variety of sources inside and outside the Corps of Engineers. The leaders' goals must promote the public interest, be affordable, and comport with existing law. Ultimately, the leadership's goals will set the direction and tone for the execution of the Corps missions, if embraced by the administration and Congress. Military and civilian leaders within the Corps play a pivotal role in shaping these goals, and in ensuring that the goals are supported by the executive branch and Congress. These leaders may be asked by Congress to give testimony on the goals or to answer questions about the goals. They must be prepared to enter into a full and constructive dialogue with Congress to ensure that the goals are understood by and endorsed by Congress as promoting the public interest.

QUALIFICATIONS

Question. Sections 3031, 3032, and 3036 of title 10, U.S.C., prescribe some of the duties and responsibilities of the Chief of Engineers. Other civil works related responsibilities are described in title 33, U.S.C.

What background and experience do you have that you believe qualifies you for this position?

Answer.

Background:

- Undergraduate - Bachelor of Science with concentration in Engineering from West Point (majors not offered at that time);
- Graduate - Masters Degree in Mechanical Engineering from University of Michigan and Masters Degree in Business Administration from Long Island University;
- Registered Professional Engineer in State of Virginia;
- Associate Professor of Mechanical Engineering at West Point.

Experience:

- Commanded Combat and Combat Heavy (horizontal construction) units at the Platoon and Company level;
- Commanded 326 Engineer Battalion, 101st Airborne Division during Operations Desert Shield/Desert Storm - built Camp Eagle II;
- District Engineer, Los Angeles District during Northridge Earthquake and Arizona Floods - military and civil works responsibilities;
- Chief of Staff, Corps of Engineers;
- Executive to the Vice Chairman, Joint Chiefs of Staff;
- Division Engineer, South Atlantic Division;
- Special Assistant to Chief of Staff for privatization and best business practices;
- Assistant Chief of Staff for Installation Management overseeing construction, operations, and maintenance of all Army Installations;
- Commanding General, Maneuver Support Center and Commandant of the Engineer School, Fort Leonard Wood, MO, in charge of engineer training, doctrine, and future systems;
- Commanding General, Accessions Command responsible for Army recruiting and initial military training for officers and enlisted soldiers.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges confronting the next Chief of Engineers?

Answer. If confirmed, my first priority would be to meet with the Assistant Secretary of the Army for Civil Works, Corps Leaders, Army, DOD, and administration leadership, as well as Members of Congress to seek their input into the major challenges confronting the next Chief.

In my view, the next Chief—and probably the next several Chiefs—must be concerned with the following issues.

Maintaining the technical competence and professionalism of the Corps. Attracting and retaining the most talented employees is key. The Corps must train, equip, and challenge its people properly, and continue to move forward as a recognized leader in developing and implementing the best technology. The integrity of the Corps of Engineers rests on the objectivity, transparency, and scientific validity of its analytical processes.

Meeting the Army's infrastructure transformation needs stemming from the base realignment and closure (BRAC) decisions, the re-stationing of troops, and the ongoing increase in the size of the Army. This is coupled with a need for meeting future water resources needs as the Nation grows and demographics change. I believe the refurbishing of our civil infrastructure (in which the Corps of Engineers shares responsibility) as highlighted in the American Society of Civil Engineers Report Card on the state of the Nation's infrastructure will be a major issue.

The Corps, working with other key players, must help create a joint and inter-agency stability, security, transition, and reconstruction doctrine and process. This may include the creation of a civilian deployment force to support the kind of contingency operations we have undertaken in the Balkans, in Afghanistan, and in Iraq.

I foresee a need for more comprehensive water resources and infrastructure solutions with new and innovative approaches. The Corps, as a member of a team, will play a role in determining the strategic direction essential to success.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I would need to complete a thorough assessment of the needs, challenges, and opportunities. I am familiar with the military construction (MILCON) transformation efforts that the Corps has already undertaken. These efforts should speed up the design and construction of military facilities, and promote lower costs by leveraging the capabilities of the private sector. I believe this work will need to be monitored very closely over the next several years to ensure continued success. I have also reviewed the 12 actions for change first announced last June in New Orleans by Lieutenant General Strock, in the wake of the Hurricane Katrina disaster. I would also track these to ensure they achieve the desired results. It is the responsibility of the Chief of Engineers, and the Corps as a whole, to provide the most professional advice possible to the administration and Congress. I see a need to assure that the Corps has a vigorous and continuous strategic planning process, as well as a systematic and effective way of engaging the broad array of stakeholders.

Question. What do you consider to be the most serious problems in the performance of the functions of the Chief of Engineers?

Answer. Many of the Corps' missions require balancing disparate interests. The Corps must further the public interest while executing the assigned missions.

Question. If confirmed, what management actions and timelines would you establish to address these problems?

Answer. As previously discussed, if confirmed, my first priority will be to meet with the Assistant Secretary of the Army for Civil Works, Corps leaders, Army and DOD leadership, others in the administration, as well as with Members of Congress to seek their input in preparation for developing a plan to meet the various challenges. I believe that the Corps must continue to transform its business processes in order to become more efficient and effective in the execution of its missions. I would go to the most critical areas with the greatest challenges to make a personal and thorough assessment of the needs and to meet with stakeholders and officials.

Question. In your view, does the Army Corps of Engineers need to make any changes in the way it operates? If so what changes would you recommend?

Answer. Historically, the Nation's rich and abundant water, and related land resources provided the foundation for our successful development and rapid achievement of preeminence within the international community. Since the beginning of our Nation, the USACE has been a great asset, providing engineering support to the military, developing our Nation's water resources, and restoring and protecting our environment. The Corps has improved our quality of life by making America more prosperous, safe, and secure. The Corps must be flexible and continue to

evolve if it is to continue to make important contributions to the Nation and respond to today's and future challenges.

If confirmed, assessing the need for changes would be a top priority. Typically there are opportunities for improvements in any organization. I am confident that, in consultation with Congress, Corps partners, and others within the administration, we could determine what, if any, changes are needed.

CONTRACTING FOR IRAQ RECONSTRUCTION

Question. For the past 4 years, the Army Corps of Engineers has played a major role in Iraq reconstruction contracting.

What do you see as the major successes of the Army Corps of Engineers in Iraq reconstruction contracting?

Answer. It is my understanding that the Corps of Engineers has successfully completed almost 3,400 Iraq reconstruction projects valued at over \$4 billion out of a planned total of almost 4,500 projects with a total value of \$8 billion. These projects have:

- increased power generation benefiting 1.3 million homes,
- provided 834 new grade schools serving 325,000 students,
- provided 250 border forts helping to secure more than 2,000 miles of Iraq's borders,
- provided for new and restored water treatment facilities benefiting 1.9 million Iraqis, and
- provided 11 renovated hospitals serving approximately 5,500 patients per day.

Currently, 900 reconstruction projects are under construction and scheduled for completion by the end of next year with an additional 200 projects in the planning phase. These projects employ, on average, 22,500 Iraqis each week. Currently 75 percent of the Corps' contracts are awarded to Iraqi contractors who not only employ thousands of Iraqis but also gain the expertise, capability, and experience needed to continue the reconstruction of Iraqi infrastructure once the Corps of Engineers' mission is complete.

Question. What is your understanding of the major failures?

Answer. According to the Special Inspector General for Iraq (SIGIR) over 80 percent of the reconstruction projects audited by the SIGIR met project requirements. I'll list a few of the more significant factors, as I understand them, that contributed to project those difficulties:

- Some contractors and their subcontractors failed to complete projects to an acceptable level of quality or in a timely manner due to security issues. Due to the hostile and dangerous environment, contractor supervision and contractor quality control was not always adequate.
- Construction management and quality control for some projects had to be managed at a distance due to the inability for the project engineers, and the quality control and quality assurance personnel to physically visit the site.
- Due to security issues, prime contractors had difficulty in managing subcontractors. This was a problem where local subcontractors did not have the same quality standards as the prime contractor.

Question. What changes, if any, do you believe that the Army Corps of Engineers should make to improve its processes for reconstruction contracting?

Answer. From my understanding, the procedures used by the Corps of Engineers for reconstruction contracting in Iraq are the same as those used by other executive agencies. They are grounded in public law and the Federal Acquisition Regulation. I believe improvement in the processes for reconstruction could be made. For example, the procurement processes and practices followed for Iraq reconstruction were peacetime practices. The Army and DOD, in consultation with Congress, should determine whether alternate processes are necessary during contingency operations. If confirmed, I will further consider this issue and determine what potential changes I might recommend to the Army and DOD to improve the overall process.

Question. The Army Corps of Engineers has been criticized for the process by which major contracts for the reconstruction of the Iraqi oil industry (the "RIO I" and "RIO II" contracts) were awarded.

The RIO I contract was awarded on a sole-source basis to the company that helped the DOD assess the status of Iraq's oil infrastructure—an apparent organizational conflict of interest. Although the Army Corps of Engineers has maintained that this contract was a temporary "bridge" contract, intended to last only until a fully competitive contract could be awarded, the contract had a term of up to 5 years

and a value of up to \$7 billion. By the time that follow-on contracts were awarded more than a year later, DOD had already spent more than \$2 billion on a sole-source basis.

Do you believe that the Army Corps of Engineers did all that it should have done to ensure competition for this major reconstruction effort?

Answer. While I have not been personally involved with this mission, it is my understanding that when the Army was assigned the responsibility for executing the Contingency Support Plan, the mission was still classified. Under the circumstances in which the Army was operating, and given the requirements of the mission, the Corps of Engineers determined that KBR was the only contractor who could have provided the required services within the required timeframe. A written justification prepared by the Corps of Engineers requesting authority to award a sole-source contract was reviewed and approved by the ASA-ALT. It is my understanding that the Corps has always planned to convert to a competitive contract as soon as practical, and that the successive RIO contract was awarded competitively. Competition is always preferable, and the more competition the better. Circumstances and mission requirements sometimes dictate procurement methods. The Corps must comply with all procurement laws and regulations to include satisfying the requirement to provide a justification for limiting competition. I understand that there were several independent reviews of the award of the sole-source contract and those reviews found the award to be proper.

Question. If confirmed, what, if anything, would you do differently if faced by a situation like this in the future?

Answer. Not applicable, in view of my previous answer.

Question. The RIO II contract was awarded to two different contractors, including the RIO I incumbent. The RIO I incumbent was rated as excellent in areas including past performance, experience, business management, and contract administration despite the fact that the Defense Contract Audit Agency (DCAA) found systemic deficiencies in the company's estimating and financial management systems that "raised serious concerns about overpricing" and advised the Army Corps of Engineers to exercise extreme caution in contracting with the company.

Do you believe that the Army Corps of Engineers did all that it should have done to identify and address problems and deficiencies in the performance of the RIO I contractor?

Answer. I am not personally familiar with the details of this specific contractor issue. DCAA is an extremely important partner in the execution of our mission and, if confirmed, I will continue to work with DCAA as we move forward with our reconstruction mission. It must be recognized however, that DCAA is only an adviser. In making a decision regarding what to do in any given situation, the contracting officer must take the information received from DCAA, along with the information from all other sources.

Question. Do you believe that the Army Corps of Engineers appropriately took these problems and deficiencies into account in making its award decision on the RIO II contract?

Answer. I am not personally familiar with the details of this award decision. However, in accordance with law and regulation, it is ultimately the responsibility of the Source Selection Authority to make an independent award decision based on the identified selection criteria and facts and information available.

Question. On June 27, 2005, Bunnatine Greenhouse—then the senior civilian at the Army Corps of Engineers responsible for contracting—testified before the Democratic Policy Committee about the problems that she saw with the RIO I and RIO II contracts. Ms. Greenhouse alleged that these contracts were symptomatic of an "old boys" approach to contracting, more directed to achieving specific outcomes than to compliance with contracting requirements, which she asserted was pervasive at the Army Corps of Engineers.

Do you believe that the Army Corps of Engineers, in its contracting, has focused too much on achieving specific outcomes and not enough on compliance with contracting requirements?

Answer. In my experience, the Corps of Engineers is an agency with a strong focus on complying with contracting requirements, while still accomplishing the difficult and challenging missions it is assigned. If I am confirmed, I will work to ensure that the Corps of Engineers complies with all applicable contracting requirements.

Question. The SIGIR has reported on a series of Iraq reconstruction projects that appear to have been spectacular failures. For example, the SIGIR has reported that: (1) the RIO I contractor spent the full \$75 million allocated for the construction of a pipeline river crossing, but achieved only 28 percent of the planned pipeline throughput, resulting in the loss of more than \$1.5 billion a year in potential oil

revenues to the Iraqi government; (2) plumbing was so poorly installed at the Baghdad Police College that dripping sewage not only threatened the health of students and instructors, but could affect the structural integrity of the building; and (3) after the Army Corps of Engineers spent \$186 million on primary health care centers throughout Iraq, the contract was terminated with only 6 health care centers completed, 135 partially constructed, and the remainder “descoped.”

What is your assessment of the SIGIR’s evaluation of these projects?

Answer. SIGIR provides a valuable service to the coalition force in Iraq and the U.S. taxpayers. The feedback and assessment provided in consultation with SIGIR has helped identify areas of concern and improve processes during the reconstruction effort. SIGIR has stated that the problem projects are not indicative of the overall reconstruction effort in Iraq. Obviously, the three specific projects mentioned fall into the category of problem projects.

SIGIR identified the Baghdad Police College as not having adequate quality assurance oversight. The Corps of Engineers acknowledged that quality assurance was inadequate to monitor all phases of construction for each building given the size of the project. Communication failures between quality control, quality assurance representatives, the prime contractor, and the project engineers also contributed to the situation. During the deficiency correction period, the Baghdad Police College is continuing daily operations and normal training functions.

It is my understanding that the Corps of Engineers terminated the original contract for the primary health care centers. The Corps of Engineers has awarded subsequent contracts and is making steady progress in the completion of the primary health care centers. It is my understanding that the Corps of Engineers has completed 31 primary health care centers and has 124 under construction.

Question. What is your understanding of the major reasons for the failures of these and other major reconstruction projects in Iraq?

Answer. There are a number of reasons some projects were not successful. A few of the more significant factors are:

- Some contractors and their subcontractors failed to complete projects to an acceptable level of quality or in a timely manner due to security issues. Due to the hostile and dangerous environment, contractor supervision and contractor quality control was not always adequate.
- Construction management and quality control for some projects had to be managed at a distance due to the inability for the project engineers, and the quality control and quality assurance personnel to physically visit the site.
- Due to security issues, prime contractors had difficulty in managing subcontractors. This was a problem where local subcontractors did not have the same quality standards as the prime contractor.

Question. What lessons do you believe the Army Corps of Engineers has learned from its experience in Iraq reconstruction contracting?

Answer. I believe the Corps of Engineers could benefit from the following changes:

- Consideration of new contingency contracting procedures that balance the requirements to immediately provide needed supplies and services in contingency situations with the need to obtain competition.
- Reduce over-reliance on large design-build and cost-plus contracts in favor of smaller firm-fixed price and indefinite delivery indefinite quantity (IDIQ) contracts.
- Implementation of the President’s proposed Civilian Reserve Corps.

Question. What additional lessons, if any, do you believe the Army Corps of Engineers should learn from this experience?

Answer. I think the Corps of Engineers learned from the Iraq reconstruction mission that for future similar missions, a common and consistent theater construction management and oversight organization is necessary to synchronize all construction activities. During the Iraq reconstruction mission, multiple and overlapping organizations stressed the limited volunteer pool for expertise and brought a layer of inefficiency to the process. Quality assurance and quality control could be better executed with a lead construction agent clearly defined early in the effort. It is difficult and expensive to execute major reconstruction efforts in a wartime environment.

Question. Outside experts reviewing U.S. reconstruction contracts in Iraq have suggested that: (1) the Army Corps of Engineers and other responsible agencies were not adequately staffed to award and oversee these contracts; (2) the effort to hire one set of contractors to oversee the work of other contractors was misguided; (3) instead of bringing in U.S. contractors to undertake major reconstruction projects, the reconstruction effort should have relied upon Iraqi companies to under-

take much smaller projects; and (4) U.S. reconstruction goals were unrealistic, given the security situation in the country.

What is your opinion on these issues?

Answer. (1) It is my understanding that providing personnel to oversee contractors was difficult because of the limited number of government civilian volunteers and the ability to provide them with adequate security.

(2) In some cases, due to the limited number of government civilians available, an additional layer of contractor oversight was needed. Ultimately, however, oversight of U.S. Government responsibilities was performed by U.S. Government civilians.

(3) Immediately after hostilities in 2003, it was necessary to bring in U.S. contractors to perform reconstruction work because of the unknown capabilities of the Iraqi construction industry. As the Iraqi construction companies geared up, the Corps of Engineers was able to initiate the Iraqi First Policy. Currently 75 percent of the Corps' contracting actions are for Iraqi contractors. One of the Corps' primary missions is capacity development within the Iraqi government to raise the management, execution, operations and maintenance, and other skill sets needed for the Iraqi government to assume the reconstruction mission.

(4) The U.S. reconstruction goals were ambitious, but I would not characterize them as unrealistic. It is my understanding that out of a total of 10,600 Iraq reconstruction projects, over 8,500 have already been completed. The remainder are either under construction or planned. Also, the SIGIR in his most recent quarterly report identified that 80 percent of the projects audited during the last quarter were quality construction.

NAVIGATION MISSION

Question. The Army Corps of Engineers has built and maintains an intracoastal and inland network of commercial navigation channels, locks, and dams for navigation. The Corps also maintains 300 commercial harbors and more than 600 smaller harbors.

What do you view as the greatest challenges facing the Army Corps of Engineers with respect to the execution of its navigation mission?

Answer. I expect one of the greatest challenges with the execution of the navigation mission to be the maintenance and modernization of aging infrastructure. Maintaining our ports and waterways is critical to our economic well-being. An equally significant challenge to the navigation mission is the management of hundreds of millions of cubic yards of dredged material removed from our Nation's marine transportation harbors and waterways. My understanding is that the Corps is continually working to make dredging and placement of dredged material environmentally safe and acceptable. I believe that the Corps should continue these efforts and look for innovative ways to increase harmony between the critical need for navigation improvements and our precious aquatic environment.

Question. What do you see as the most significant navigation projects planned for the next 10 years by the Army Corps of Engineers?

Answer. Many ports, gateways to domestic and international trade and overseas military operations, are operating at the margin in terms of channel depths. Segments of the inland waterway system are congested and are in need of rehabilitation. Clearly we must sustain the efficiency of our major ports to assure our competitiveness in world trade. I believe that the Corps must be poised to meet these needs.

Question. What role, if any, do you believe the approval or disapproval of navigation industry groups should play in decisions made by the Army Corps of Engineers about specific projects?

Answer. Decisions regarding Corps of Engineers projects are the responsibility of officials in the executive and legislative branches. For its part, the Corps should listen to all interested parties and stakeholders and fully integrate economic and environmental values. The Water Resources Development Act of 1986 established the Inland Waterways User Board and charged this board to report to the President and Congress on priorities for investment in the inland system.

Question. In November 2000, the Army Inspector General found that three Army Corps of Engineers officials had manipulated data in a cost-benefit analysis in order to justify a \$1 billion project.

What is your understanding of the steps that the Army Corps of Engineers has taken since 2000 to ensure that projects are appropriately analyzed and justified?

Answer. My understanding is that the Corps has made substantial changes to assure that projects are appropriately analyzed and justified. The Corps has strengthened its own procedures for internal peer review and adopted procedures for exter-

nal peer review under guidance issued by the Office of Management and Budget. The Directorate of Civil Works now houses an Office of Water Project Review that is separate from project development functions. It is my understanding that a significant program of planning improvement is being undertaken that includes training, model certification, and centers of planning expertise.

Question. If confirmed, what steps would you take to ensure that technical analyses conducted by and for the Army Corps of Engineers are independent and sound?

Answer. If confirmed, I would evaluate the current process and be guided by the principle that Corps technical analyses be absolutely sound and the project evaluation process be transparent. The Chief of Engineers must be trusted with the technical discretion essential to meeting our Nation's water resources needs. External reviews can contribute to reducing controversy and risk, but these reviews must be integrated into the project development process not added at the end of the process. Integration of external review will improve projects and will assist the Corps in meeting urgent needs in a timely manner.

NATIONAL LEVEE SAFETY PROGRAM

Question. The Army Corps of Engineers has been criticized for its failure to do more to protect New Orleans from catastrophic hurricane damage. The alleged failures of the Army Corps include: (1) the construction of a shipping channel that acted as a "superhighway" funneling the storm surge from Hurricane Katrina directly into New Orleans; (2) the failure to properly account for the soil structure under the New Orleans levees; (3) the failure to adequately maintain the levees; and (4) the failure to construct levees sufficient to protect the city in the event of a direct hit by a strong hurricane.

What is your view of these criticisms?

Answer. While I, like the rest of the Nation, am generally familiar with the tragedies and widespread damages associated with Hurricane Katrina, I am not personally familiar with the specific issues raised above. I understand that the Corps of Engineers has initiated and been involved with several ongoing analyses and studies of the potential causes and effects of the hurricanes and the status of the hurricane storm damage reduction projects in the New Orleans area. I understand and appreciate the importance of this issue and, if confirmed, will immediately learn more about the past, present, and future work and issues associated with the ongoing efforts in the New Orleans area. Speaking generally, I support, and would welcome thoughtful and independent analysis of Corps activities such as those undertaken after Hurricanes Katrina and Rita. A full and complete understanding of what happened in both the technical and decisionmaking arenas is an essential component of assuring it does not happen again.

Question. Do you see the need for any changes to the structure, processes, or priorities of the Army Corps of Engineers as a result of the events in New Orleans?

Answer. I have not developed a position on the structure, processes, or priorities of the Corps as a result of the events in New Orleans. However, if confirmed, one of my first priorities will be to thoroughly examine the issues in New Orleans and to determine if potential changes to the Corps of Engineers structure or processes would be beneficial. It is essential, in my view, that such an examination be made in cooperation with Congress, others within the administration, and a broad array of stakeholders.

Question. What is your understanding of the steps that the Army Corps of Engineers is taking in the reconstruction of the New Orleans levees to protect the city from a recurrence of the tragic events of August 2005?

Answer. I know that the Corps of Engineers is involved in many ongoing reconstruction efforts in the New Orleans area, including improvements to the hurricane storm damage reduction projects. I know that the Corps is working towards designing and building an integrated system that will provide protection from a 100-year storm event. If confirmed, I will make it a priority to learn about all ongoing efforts in this area.

Question. The Army Corps of Engineers recently completed a nationwide river levee inspection process and identified numerous unacceptably maintained levees. Media reports quoted Corps of Engineers officials as acknowledging that past inspections were not documented adequately and that a lack of resources has made it difficult for periodic inspections to be performed. The operation and maintenance of levee systems is a shared responsibility of State and local sponsors, however, there is enormous dependence on the Corps of Engineers for inspection, identification of problems, risk assessment, and where required, rehabilitation.

What is your opinion of what the Corps of Engineers and Federal, State, and local authorities need to accomplish in order to ensure that existing deficiencies in the national system of levees are addressed?

Answer. The management of the Nation's levees is a shared responsibility among local, State, and Federal Government. I believe that the Corps should maintain a leadership role in this management responsibility and ensure that all parties are fulfilling their responsibilities. This includes thorough, joint inspections by the Corps and the levee owners, followed by immediate maintenance action by the levee owners. The Corps possesses administrative options to require proper operation and maintenance and I believe the Corps should exercise those options when necessary in order to ensure that the projects will perform as expected. Public safety must be the priority.

Question. What steps would you take, if confirmed, to ensure that those levees representing the highest risk of failure and loss of life and property are rehabilitated?

Answer. Protecting the public from catastrophic flooding is a key part of the Corps' mission. The Corps is currently in the process of developing an assessment methodology to identify levees which represent the highest risk of failure and loss of life and property. I believe the Corps should, after identification, work with levee owners and other key stakeholders to determine a rehabilitation plan using the available processes and programs. The Corps must work closely with the Federal Emergency Management Agency, States, local governments, and other stakeholders to ensure an understanding of risks and to develop comprehensive solutions that best address the need to improve system performance and reduce future flood damages.

HURRICANE KATRINA RELIEF AND RECONSTRUCTION CONTRACTING

Question. The Army Corps of Engineers played a major role in contracting for reconstruction and relief in the wake of the major hurricanes of 2005.

What is your understanding of the major successes of the Army Corps of Engineers in relief and reconstruction contracting?

Answer. The Corps of Engineers has a long tradition of providing disaster response assistance. Most recently, the Corps was a major player in the Federal response to Hurricanes Katrina and Rita in 2005. In addition to deploying over 8,000 Corps employees to provide disaster support, it leveraged the expertise, capacity, and capabilities of the private sector to provide relief assistance.

It is my understanding that a major contracting success is that of the Corps' program which utilizes "Pre-Awarded" contracts. This initiative provides the Corps with the ability to rapidly and effectively respond in order to execute major relief missions. After Hurricane Katrina, the Corps employed this initiative to rapidly provide emergency services. These contracts allowed the Corps to provide the initial assistance, while follow-on contracts could be competitively awarded to provide additional capabilities and capacity.

Question. What is your understanding of the major failures?

Answer. I am not aware of any specific major failures; however, if confirmed, I will look into the overall response to this, and other emergencies, and look for ways to improve the Corps' processes.

Question. What changes, if any, do you believe that the Army Corps of Engineers should make to improve its processes for reconstruction and relief contracting?

Answer. From my experience with the Corps of Engineers, it is an organization that is constantly looking for ways to improve. I believe it is important that the Corps work closely with the Department of Homeland Security, and other Federal and non-Federal partners, to improve the collective abilities to deliver required commodities and services in a timely, efficient, and cost-effective manner. The work that the Corps performed during Hurricane Katrina has been and will continue to be extensively audited and, if confirmed, I would look forward to continue to work with these agencies to implement corrective actions and improvements to the Corps' processes.

Question. Recent press articles have described a process in which work was passed down from the Army Corps of Engineers to a prime contractor, then to a subcontractor, then to another subcontractor—with each company charging the government for profit and overhead—before finally reaching the company that would actually do the work. In one such case, the Army Corps of Engineers reportedly paid a prime contractor \$1.75 per square foot to nail plastic tarps onto damaged roofs in Louisiana. The prime contractor paid another company 75 cents per square foot to do the work; that subcontractor paid a third company 35 cents per square foot to do the work; and that subcontractor paid yet another company 10 cents per

square foot to do the work. In a second such case, the Army Corps of Engineers reportedly paid prime contractors \$28 to \$30 per cubic yard to remove debris. The companies that actually performed the work were paid only \$6 to \$10 per cubic yard.

What is your understanding of the payments made under these contracts?

Answer. While I am not personally familiar with these particular contracts, it is my understanding that the Corps of Engineers entered into competitive contracts in order to complete its mission. Under such contracts, the Corps would have no contractual relationship with subcontractors that any prime contractor might engage. From my experience, the Corps is an agency that expects all subcontractors to be compensated for the work they perform and at the rate that their contract requires. If confirmed, I will examine this issue in detail.

Question. What steps do you plan to take, if confirmed, to ensure that the Army Corps of Engineers does not pay excessive “pass-through” charges of this kind on future contracts?

Answer. I believe that the Corps should take steps to minimize the tiering in the future. This could possibly be accomplished by awarding more, smaller contracts to achieve the mission.

Question. The Federal agencies, including the Army Corps of Engineers, have been criticized for awarding sole-source contracts on the basis of “urgent and compelling circumstances” in the wake of Hurricane Katrina, even though some of these contracts were awarded long after the hurricane took place or extended long beyond what could be justified on the basis of that disaster.

Would you agree that the “urgent and compelling” exception to competition requirements should be used to award a contract only on the basis of an event, or series of events, that is reasonably proximate in time to the contract award?

Answer. Yes, in general I believe that the “urgent and compelling” exception should be used only in the immediate wake of the disaster. I understand that the law requires competition except in very limited circumstances and believe that competition is vitally important. However, any determination regarding the specific use of an “urgent and compelling” exception to competition should be looked at on a case-by-case basis. If I am confirmed, I will ensure that the Corps judiciously uses the “urgent and compelling” exception in compliance with the applicable statutes and regulations.

Question. Would you agree that the term of a contract awarded on the basis of the urgent and compelling exception to competition requirements should not ordinarily exceed the period of time the agency reasonably believes to be necessary to award a follow-on contract?

Answer. Yes, I agree that in general, the term of a contract awarded under the “urgent and compelling” exception to competition should not ordinarily exceed the time reasonably required to award a follow-on contract. I understand that the law requires competition in all but a few limited circumstances and I believe that competition is the very foundation of Government contracting. However, the determination to use the “urgent and compelling” exception and the duration of the resulting contract must be reviewed on a case-by-case basis, taking into account the specific facts of the situation. If I am confirmed, I will ensure that the Corps complies with the applicable statute and regulations when using the “urgent and compelling” exception to competition.

COMPETITION IN THE CONTRACT MANAGEMENT OF MILITARY PROGRAMS

Question. The USACE has historically been designated as the primary contracting agent for military construction (MILCON) projects carried out by the Department of the Air Force. However in recent years, due to the perception of excessive overhead costs associated with the Corps of Engineers, the Air Force has sought to establish an organic contracting agency through the Air Force Center for Environmental Excellence in San Antonio, TX. Currently, the Air Force is limited by DOD policy to be able to contract a maximum of 5 percent of its MILCON projects organically, but in light of their success in achieving construction savings, has requested approval for a higher percentage.

What is your view of the request by the Air Force to be allowed to carry out a larger percentage of MILCON contracts?

Answer. The Corps of Engineers has successfully accomplished the Air Force military design and construction mission since the Air Force was established. I do not have an opinion on this specific issue at this time. If I am confirmed, I will review the matter and will work with DOD, the administration, and Congress to develop a position on this matter.

Question. In your opinion, what would the impact be to the Army Corps of Engineers by allowing the Air Force to serve as their own contracting agent without limitations?

Answer. Congress passed a law in the early 1950s that designated the Army and the Navy as the DOD construction agents and specific certain assessments that needed to be completed prior to allowing another agent to execute the DOD construction mission. If I am confirmed, I will review the matter and will work with DOD, the administration, and Congress to develop a position on this matter.

EFFICIENT MANAGEMENT PRACTICES IN THE ARMY CORPS OF ENGINEERS

Question. In a report to Congress dated February 1, 2007, and titled "U.S. Army Corps of Engineers Response to Senate Report 109-254, Management of Military Programs in the United States Corps of Engineers, January 2007," the Commander of the U.S. Corps of Engineers (USACE) stated that "through MILCON Transformation, USACE will gain economic efficiencies through design standardization of Army facility types, centralization of design activities in USACE Centers of Standardization, and focused business line contracting with regional acquisition strategies." The report also forecasted that savings from these efficiencies would be experienced by customers in later years after full implementation of transformation initiatives, possibly affecting rates charged by the Corps for supervision, inspection, and overhead.

Do you support the goals of the Corps' current plan for MILCON Transformation?

Answer. Yes. With the dramatic increase of construction that must be accomplished in support of Army Transformation and the most recent Base Realignment and Closure (BRAC 2005), I believe that the changes in the Corps of Engineers' MILCON process are on target to assist the Army to provide quality facilities less expensively and faster than the legacy processes. The current construction environment dictated the need to move from very prescriptive requirements to more performance-based requirements in order to allow contractors to utilize industry best practices and meet the Army's needs within the limited funds allotted.

Question. If confirmed, would you recommend any changes or improvements?

Answer. As MILCON Transformation is implemented, I expect the Corps to collect lessons learned on MILCON Transformation projects as they are completed and to make course corrections in the MILCON Transformation process or wholesale changes if needed. I believe that the strength of any successful process is continual assessment and improvement.

Question. When do you expect the Corps' customers would begin to see the real benefits of MILCON transformation in terms of decreased costs for supervision, inspection, and overhead and improved delivery times for construction products?

Answer. I understand that as a result of the greater use of standard designs and "adapt-build" acquisition, the Army is expecting a reduction in required design funds, over the Future Years Defense Program fiscal years 2008-2013. Design fund savings is expected to be \$255 million which will be used to acquire high priority projects. With the utilization of alternative construction methods such as modular or pre-engineered structures and use of more industry best practices, delivery times are expected to be shorter. Decreased costs in supervision, inspection, and overhead should occur once both the Corps and the contractors become more accustomed to the use of the new processes.

USE OF INDEFINITE DELIVERY INDEFINITE QUANTITY (IDIQ) CONTRACTS FOR CONSTRUCTION

Question. The Army Corps of Engineers plans to use IDIQ contracts for a wide range of construction projects to support requirements of Army modularity, the 2005 round of base realignments and closures, and to implement the Integrated Global Presence and Basing Strategy.

In your opinion, what are the pros and cons to the use of IDIQ contracts for MILCON in the United States?

Answer. I believe that the use of regional IDIQ contracts for MILCON will help the Army execute its program by allowing the Corps of Engineers to use standardized adapt-build designs. In my opinion, some advantages of utilizing IDIQ contracts may be:

- Providing for a significantly shortened procurement timeline for award of individual projects.
- Allowing the Corps to award standardized facility projects to contractors that have previous experience in building with similar materials and methods.

- Allowing the Corps to meet significantly shortened project execution schedules.
- Allowing the Corps to develop a “Continuous Build” program on standardized building types and to capture the potential cost and schedule savings that may accrue as a result.

The potential disadvantages to the use of regional IDIQ contracts may occur if the MILCON program changes significantly or the number of similar projects is reduced or funding disruptions occur in given regions. Any of these changes may affect the “Continuous Build” program and the benefits associated with it.

Question. In your view, what would be the impact to the Corps of Engineers if the use of IDIQ contracts were curtailed or limited by Congress?

Answer. The most significant impact would likely be the Corps’ inability to meet the Army’s execution schedules for re-stationing and BRAC commitments. The curtailment or limiting of these types of contracts would lengthen project procurement timelines and cause project schedule delays that would ripple through the Army’s execution plans for re-stationing and BRAC.

BUNDLING OF CONTRACTS BY THE CORPS OF ENGINEERS

Question. The Army Corps of Engineers is faced with the significant challenge of carrying out construction requirements over the next 5 years imposed by the combination of force structure changes due to Army modularity, the 2005 round of Base Realignments and Closures, the implementation of the Integrated Global Presence and Basing Strategy, and most recently, the Army’s initiative to grow the force. In response, the Corps plans to allow construction contractors to propose alternate types of construction, including pre-manufactured and modular buildings, to bundle projects for multiple buildings into one delivery order, and to rely on design-build acquisitions, which requires one contractor to provide both design and construction services. The net effect of these proposals will be to reduce the pool of qualified contractors able to bid on such large and complicated projects.

Question. In your view, what benefits, if any would be gained by these initiatives?

Answer. I believe that there will be reduced costs based on the experience gained from performing similar projects on a repetitive basis. It stands to reason that the more projects that a single contractor completes, the less costly each project becomes. For example, a contractor may need only one management team to oversee the construction of several buildings. Combining multiple projects should also lead to efficiency savings due to shortened learning curve and implementation of lessons learned, as well as material savings as contractors buy in bigger quantities.

Question. What are the risks to increasing the size and range of services required by these contracts?

Answer. It is a possibility that increasing the size of the contracts and decreasing the pool of contractors could result in reduced competition and an increase of costs. Large contracts may cause the contractors to become overburdened. However, I believe that the risk may be minimized through a thorough best value source selection process. From my experience, the Corps has a very good track record when it comes to construction source selection.

Question. In your opinion, how can the Corps of Engineers ensure a healthy bid climate that allows for a full range of small and mid-range businesses to compete for construction contracts?

Answer. I believe that the Corps must ensure that businesses of all types may compete for construction contracts. Some ways in which to achieve this goal would be to emphasize small and disadvantaged business subcontracting goals, and to hold national and regional industry days and technical forums. Additionally, requirements should be developed so that small and mid-sized businesses are able to compete and opportunities provided to disadvantaged contractors.

Question. In your opinion, what are the benefits and costs resulting from the Corps of Engineers’ decision to accept a less permanent type of construction?

Answer. While developing the national acquisition strategy, it is my understanding that the Corps has partnered with industry and identified changes that may allow it to operate more efficiently. The MILCON program uses technical performance criteria that rewards innovative construction methods throughout the United States. Among these innovative construction methods are offsite prefabricated modular assemblies, tilt-up construction, panelized assemblies, the use of combinations of different material types and others. The expected benefits are an improvement in completion schedules and reduced costs.

ENVIRONMENTAL CONCERNS

Question. If confirmed, you will take charge of the largest construction program in the country. Virtually every major civil works project of the Army Corps of Engineers raises environmental concerns.

What is your view of the appropriate balance between the missions and projects of the Army Corps of Engineers and the National Environmental Protection Act (NEPA) and other environmental statutes?

Answer. I believe that the Corps can and must carry out its missions in an environmentally responsible manner. In fact, one of the Corps' three main civil works mission areas is Aquatic Ecosystem Restoration. The Corps has a long record of coordinating its missions and planning its projects in compliance with the provisions of NEPA and other environmental statutes, which has led to better and more environmentally sensitive projects. If confirmed, I am committed to ensuring that they are planned and constructed in such a manner as to avoid or minimize environmental impacts.

Question. The Army Corps of Engineers is responsible for environmental restoration projects at DOD Formerly Used Defense Sites (FUDS) and at Department of Energy Formerly Utilized Sites Remedial Action Program (FUSRAP) sites.

What do you view as the greatest challenges facing the Army Corps of Engineers with respect to the execution of its environmental restoration mission?

Answer. It is my understanding that continuing to execute the vital cleanup mission while always protecting the health and safety of workers and the public is perhaps the biggest challenge for the FUDS Program and FUSRAP. Restoration standards and stakeholder expectations are continuing to increase. The Corps must continue to apply good science and management practices that will help to increase remediation efficiency and to continue to meet the commitments made to stakeholders.

Question. Do you believe that goals established for environmental cleanup (including cleanup of unexploded ordnance) under these programs are realistic and achievable?

Answer. The Corps does and should have aggressive goals for these programs and meeting those goals will be a challenge. Most all of this work is conducted on private property and involves numerous stakeholders, many espousing conflicting agendas. If confirmed, I will continue to press for ways to perform the mission in the most efficient and effective manner possible.

Question. In the past, the Army Corps of Engineers has not always been required to meet State's water quality standards in constructing and operating its water resources projects.

Do you believe that the Army Corps of Engineers should be required to meet State water quality standards in constructing and operating Army Corps of Engineers projects?

Answer. Yes. I believe that the Corps should be a leader in the environmental arena and, in most circumstances, should meet State water quality requirements.

Question. Section 404 of the Clean Water Act requires landowners or developers to obtain USACE permits to carry out activities involving disposal of dredged or fill material into navigable waters of the United States, including wetlands. For almost two decades, the stated goal of the Federal Government has been "no net loss of wetlands".

Do you support the goal of "no net loss of wetlands"?

Answer. Yes. Wetlands are important to human health, the environment, and our economy.

Question. Do you believe that we are currently meeting that goal?

Answer. From what I understand, I do believe that the Corps is meeting the goal of "no net loss." This is an area I will explore if confirmed.

Question. What specific steps do you believe that the Army Corps of Engineers should take to move us closer to the goal of "no net loss of wetlands"?

Answer. I believe there are two principal measures that could be implemented to assure that the Corps is meeting the goal of no net loss. First, I believe the Corps must continue to improve its program to verify that required mitigation is being furnished to replace lost wetlands. Second, the Corps should develop a database to improve the tracking of wetland impacts and mitigation. The combination of increased review of mitigation with this new database will increase the Corps' capability to confirm that it is meeting the goal of "no net loss of wetlands."

RECRUITING AND RETENTION OF ARMY ENGINEERS

Question. In recent years, competition among employers for the services of highly-qualified engineers has greatly increased.

What is your understanding of the Army's success in recruiting and retaining for careers sufficient numbers of highly-qualified officers and civilian employees for service in the Army Corps of Engineers?

Answer. From what I understand, the Corps is generally successful in filling positions and usually has multiple highly-qualified candidates for each position announced. The only area where the Corps has experienced some recurring challenges is in filling requirements for Iraq and Afghanistan and the large mission in the New Orleans area. Many of the Corps' employees, both civilians and military officers, have either professional engineering degrees or project management skills experience. As I have previously indicated, recruiting and retaining talented employees is key and is an area of great interest to me.

Question. What do you view as the Corps of Engineers greatest challenge in meeting its manpower and training and education requirements?

Answer. It is my understanding that the Corps does not have a problem meeting manpower requirements. The biggest challenge in training and education is funding and being able to divert the employees from their vital missions to obtain necessary training and development. As the vast majority of Corps employees are project funded, paying salaries during training periods has been and continues to be a challenge.

Question. What steps would you take if confirmed to ensure that the Army improves its attractiveness to highly-qualified individuals for service in both the Active and Reserve components and in the civilian workforce?

Answer. Recently, legislation was enacted providing additional benefits for Corps employees willing to deploy in support of national security missions. For example, a provision has been enacted in the last several National Defense Authorization Acts that raises the pay cap for overtime pay to civilians deployed in support of missions that fall under the CENTCOM Commander's purview. Similar legislation has been proposed for those employees deployed within the United States who are supporting the ongoing reconstruction and restoration efforts in New Orleans.

NATIONAL SECURITY PERSONNEL SYSTEM

Question. The Army Chief of Engineers has responsibility for a Federal civilian workforce of more than 35,000, portions of which are in the process of transition to the National Security Personnel System (NSPS). NSPS implementation efforts to date have underscored the essential requirement for senior leadership understanding and oversight in various NSPS features including employee perception of fairness, rewards of performance based on merit, transparency in the development of pay bands and pay pools, and adequate training for supervisors and employees at all levels in the organization.

What is your understanding of the Corps of Engineers progress to date in implementing NSPS, and, if confirmed, how would you ensure that the Army Corps of Engineers transition to NSPS is successful?

Answer. It is my understanding that the Corps is in the process of converting to NSPS. If confirmed, I will work to ensure that this system will be successfully implemented within the Corps of Engineers.

HUMAN CAPITAL PLANNING FOR THE CIVILIAN WORKFORCE

Question. DOD is developing a comprehensive human capital strategic plan for its Federal civilian workforce which is intended to identify critical skills and competencies needed in the future civilian employee workforce, as well as a plan of action for developing and reshaping the Federal civilian workforce.

If confirmed, how would you approach the task of identifying gaps in needed skills in the Army Corps of Engineers workforce and ensuring that adequate resources, training, and professional development efforts are undertaken to achieve the Corps' workforce goals?

Answer. I understand that the Office of Management and Budget has given the Corps of Engineers the highest rating for progress and status made in implementing the human capital initiatives under the President's Management Agenda. If confirmed, I will strive to ensure that the Corps continues to develop the workforce and achieve appropriate goals.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Chief of Engineers?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JACK REED

ARMY ENGINEERING RESEARCH DEVELOPMENT AND ENGINEERING CENTER

1. Senator REED. Lieutenant General Van Antwerp, how do the research and development (R&D) programs of Army Engineering Research Development and Engineering Center (ERDC) currently support the mission of the Corps of Engineers?

General VAN ANTWERP. ERDC's R&D programs support the full spectrum of Corps missions from peace to war. The ERDC's scientists and engineers support effort cuts across all five of the Corps broad mission areas; Water Resources, Environment, Infrastructure, Homeland Security, and Warfighting. Their capabilities are complementary, and reinforcing and are critical to the mission of the Corps.

2. Senator REED. Lieutenant General Van Antwerp, how will you work to enhance the leveraging of the engineering and technical skills of ERDC to assist in the performance of the Corps' mission?

General VAN ANTWERP. If confirmed, I will continue to fully support the entire spectrum of research, development, technology infusion, and sustainment within the Corps of Engineers. I look forward to meeting with the ERDC leadership, lab directors, and scientists to learn more about their efforts.

3. Senator REED. Lieutenant General Van Antwerp, how will you work to ensure that the ERDC continues to maintain and improve its technical workforce and facilities in order to best perform its mission?

General VAN ANTWERP. The Corps in its "12 Actions for Change," highlighted its commitment to a competent, capable workforce as well as a commitment to investing in R&D. If confirmed I intend to continue that commitment and will make it a priority to visit the ERDC facilities and assess the current status of the workforce and their facilities.

QUESTIONS SUBMITTED BY SENATOR DANIEL K. AKAKA

RECONSTRUCTION DURING CONTINGENCY OPERATIONS

4. Senator AKAKA. Lieutenant General Van Antwerp, it was a pleasure to meet with you prior to your hearing, and I was pleased to hear that one of the first things that you will do is to visit the Pacific Region. In my State of Hawaii, the Army Corps of Engineers is very important in particular for its work pertaining to shore protection, water resources, and dam safety. In your response to the advance policy questions, you mention that you "believe improvement in the processes for reconstruction could be made [in the area of reconstruction contracting during contingency operations]." While I understand that you wish to discuss this matter with the Army and Department of Defense (DOD), if there was one recommendation that you would suggest that would improve the process for reconstruction contracting, what would you suggest to change?

General VAN ANTWERP. Given the unique nature of the reconstruction mission, I believe improvements in the processes for reconstruction can be made. Specifically, the process for reconstruction contracting could be improved by the consideration of new contingency contracting procedures that balance the requirements to immediately provide needed supplies and services in contingency situations with the need to obtain competition. This type of change would most likely require changes to the Federal Acquisition Regulations. If properly done, this could allow Federal agencies such as the Corps of Engineers greater flexibility in contracting in contingency operations.

IRAQ RECONSTRUCTION

5. Senator AKAKA. Lieutenant General Van Antwerp, in your response to the advance policy questions for this hearing, you listed as major Army Corps' successes in Iraq "increased power generation benefiting 1.3 million homes." Are you aware that during the week of February 22–28, electricity availability averaged 6.2 hours per day in Baghdad and 9.7 hours nationwide? Electricity output for the week was 6 percent below the same period in 2006. Since the beginning of 2004, we have been unable to provide and sustain a significant increase in electrical generation and distribution capacity to meet the Iraqi power demands. I believe the chances of success in Iraq would be significantly enhanced if critical and highly visible infrastructure projects, such as the restoration of electrical power to the Iraqi citizens at a level meeting or exceeding the demand by the Iraqi population, were to be successful. What do you believe we can do to build on the Army Corps' successes in Iraq to increase generation and distribution capacity and sustain it at a higher level with a goal of meeting the needs of the Iraqi population?

General VAN ANTWERP. I inquired about the electricity availability in February. A significant portion of the generation capacity was taken off-line for planned maintenance because demand is relatively low during that timeframe. Demand has increased an average of around 10 percent per year since 2003. Last summer the Iraqi's reached a peak generation of 5,700MW, and we expect they will exceed that this summer.

The U.S. Army Corps of Engineers was allocated about \$4.3 billion to improve Iraq's electricity infrastructure. The World Bank estimated in 2003 that it would take more than \$20 billion to bring Iraq's electrical system to the point where it could supply power to all of Iraq for 24 hours a day and 7 days a week. That number is now estimated to be as high as \$40 to \$50 billion. The Iraq reconstruction program is just a stepping stone on the way to improving Iraq's electrical infrastructure. It is my understanding that it will take several years and significant international and Government of Iraq investment to completely upgrade Iraq's electrical infrastructure and give Iraqis power 24 hours a day, 7 days a week, nationwide.

6. Senator AKAKA. Lieutenant General Van Antwerp, in your advance policy questions responses for this hearing, you stated that many of the Iraq reconstruction projects in Iraq had problems with contractor supervision and quality due to the hostile environment. You further stated that quality control had to be managed at a distance due to the inability for project engineers and quality assurance personnel to physically visit the site. Lack of appropriate oversight on contracting in Iraq has been a major problem, and it seems to me that these types of problems you described were predictable given the operational environment in Iraq. What do you suggest we could have done, or should do in the future, to prevent these types of problems, and to ensure that the American people get the full value for their tax dollars?

General VAN ANTWERP. In his most recent quarterly report, it is my understanding that the Special Inspector General for Iraq (SIGIR) found that 87 percent of the Iraq reconstruction projects reviewed by the SIGIR during the last quarter met contract standards. While the goal would obviously be 100 percent of the projects, I think an 87-percent success rate in this difficult environment is encouraging.

The Iraq Reconstruction program is carried out in a hostile environment with an inherent high risk and formidable security challenges. Violence and hostile activity against United States and Iraqi personnel does impede reconstruction efforts by slowing progress on projects, restricting the movement of personnel, and diverting resources from reconstruction to security. However, the customary practices for the Corps' Quality Assurance that apply in a peacetime environment are still relevant to the Iraq reconstruction effort. It is my understanding that the U.S. Army Corps of Engineers, Gulf Region Division, does everything it can to see that U.S. Government personnel make timely visits to construction sites to ensure project quality,

enforce financial responsibility, and ensure that the end product is constructed to meet the contract requirements. When U.S. personnel are not able to visit a project site due to security concerns, I understand the Corps' Gulf Region Division has Iraqi nationals conduct site visits and assist U.S. personnel in providing quality assurance oversight. I think including local nationals in the reconstruction team has worked well and should be considered in future operations.

7. Senator AKAKA. Lieutenant General Van Antwerp, do you feel the Army Corps has been given all of the resources it needs to do the job in Iraq?

General VAN ANTWERP. Yes. Following combat operations the U.S. Army Corps of Engineers provided Forward Engineer Support Teams to begin the process of restoring the electrical and oil infrastructure to provide essential power and funds for the people of Iraq. As the mission unfolded, the Corps became an important asset in the reconstruction of Iraq which necessitated the establishment of the Corps' Gulf Region Division in January 2004. In addition to its own staff, the Gulf Region Division is supported by the Joint Services and has the ability to hire critical Federal employees and specialized contractors. Also, the Gulf Region Division has supplemented its staff by directly employing over 500 Iraqi citizens as engineers, architects, and planners. These individuals are deeply involved in the reconstruction effort and will be instrumental in continuing the reconstruction program once the Corps' mission is complete. In addition, the Corps contracts construction work directly to Iraqi contractors who in turn employ thousands of Iraqis through their construction firms. Finally, the Corps has, through reachback support, been able to make available the technical expertise from a workforce of over 30,000 employees, 9 research laboratories, 10 divisions, and 41 districts. The Corps' forward units involved in the Iraq reconstruction efforts are able to reach back and tap the resources of the entire U.S. Army Corps of Engineers which greatly assists them in their ability to accomplish the reconstruction mission.

CORPS RECRUITING AND RETENTION

8. Senator AKAKA. Lieutenant General Van Antwerp, in your response to the advance policy questions, you indicated that "attracting and retaining the most talented employees" is a key challenge facing the next Chief of Engineers. Has the Army Corps had problems with recruitment and retention of highly-qualified engineers?

General VAN ANTWERP. The Corps has generally been able to recruit, train, and retain sufficient engineers and scientists to meet current mission requirements. However, the Corps does face challenges in meeting requirements in some selected areas, because we are relying on voluntary temporary deployments to overseas areas and major post-disaster reconstruction efforts. I expect that the Corps, along with the rest of the public and private sector, will share in the future challenge of having sufficient engineers and scientists enter the workforce to meet the Nation's long-term needs.

QUESTIONS SUBMITTED BY SENATOR JIM WEBB

LEEVE SYSTEM IN NEW ORLEANS

9. Senator WEBB. Lieutenant General Van Antwerp, it is my understanding that a Corps of Engineers estimate said that levee systems in New Orleans needed to be dramatically invigorated before Hurricane Katrina. Can you confirm whether the Corps of Engineers warned before Hurricane Katrina that a different approach to the city's levee system should have been funded?

General VAN ANTWERP. It is my understanding that prior to Hurricane Katrina, Congress had authorized work on a reconnaissance-level report for category 4 and 5 protection for southeastern Louisiana and that these efforts were underway when Hurricane Katrina struck. The report was completed and it was recommended to proceed to the feasibility phase. The Corps had worked with State and local governments to advance the completion of this work and advised that the current hurricane protection measures did not provide protection for category 4 or 5 storms.

10. Senator WEBB. Lieutenant General Van Antwerp, what recommendations were advocated by the Corps of Engineers during the 7 years prior to Hurricane Katrina with respect to the levee system, including budgetary, safety, and structural aspects?

General VAN ANTWERP. The Corps recognized the urgency to complete construction of the ongoing levee projects, as well as the design and approval for new levee projects for the greater New Orleans area. The Corps' annual budget request included funding for the ongoing hurricane protection projects. The West Bank and Vicinity Hurricane Protection Project was budgeted annually at a funding level to complete the first level of protection as quickly as possible. The ongoing study to evaluate higher levels of protection in several parishes in southeastern Louisiana was proceeding to the feasibility phase. Several areas were identified for evaluation for raising current levee systems, construction of barriers that may prevent storm surges from moving inland and wetlands construction and restoration.

11. Senator WEBB. Lieutenant General Van Antwerp, what are the recommendations now?

General VAN ANTWERP. The Corps of Engineers is committed to designing and constructing the best hurricane protection system for people and the environment within the resources provided and remains focused on restoring levees and floodwalls to the authorized heights and completing all planned projects in conjunction with the ultimate goal of providing 100-year protection for the system, as directed by Public Law 109-234. Additionally, several measures to provide higher levels of protection are now being reviewed under the Louisiana Coastal Protection and Restoration Act evaluation requested by Congress following Hurricane Katrina. This evaluation includes nonstructural measures and coastal restoration as a way to provide comprehensive hurricane protection.

12. Senator WEBB. Lieutenant General Van Antwerp, there are reports that the pumps installed as part of a new pump-and-floodgate system to control flooding from Lake Pontchartrain may not be working properly. What is their status, and what is the status of the Corps' other major repair and improvement projects for the levee system in New Orleans?

General VAN ANTWERP. It is my understanding that the Corps has completed modifications on approximately one-half of the pumps and continues to modify the remainder as quickly as possible. Additionally I believe that there are plans to install additional pumps at the 17th Street Canal and London Avenue Canal in the near future.

The Corps of Engineers completed its mission to restore levels of protection to that which existed before Hurricane Katrina struck. The Corps has repaired the 220 miles of damaged levees (approximately 213 of the 325 miles of the total levee and floodwall system).

The Corps of Engineers is preparing for the start of the 2007 hurricane season by focusing on improvements that will significantly reduce risks for critical areas. This includes increasing the level of protection at the three outfall canals. At the three canals, temporary floodgates have been installed to prevent storm surge from entering the outfall canals providing more effective storm and flood management.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

BALANCING DISPARATE INTERESTS

13. Senator MCCAIN. Lieutenant General Van Antwerp, in the advance policy questions provided to you in preparation for this hearing, we asked what you considered to be the most serious problems in the performance of the functions of the Chief of Engineers. You responded, "Many of the Corps' missions require balancing disparate interests." Can you elaborate on that answer? Specifically whose or what range of interests?

General VAN ANTWERP. First, the Corps of Engineers has many varied responsibilities including military construction (MILCON) in support of our Armed Forces, infrastructure improvements in Iraq and Afghanistan, support to other Federal agencies such as that provided to the U.S. Environmental Protection Agency in its Superfund program, emergency response activities, and the large water resources-based civil works program, among others. This work is being carried out by a combined force of Corps employees and contractors working throughout the United States and in over 90 countries around the world. Each of these missions is vitally important, each has distinct authorization and funding sources and each has its own constituency and stakeholder interests. The Corps' organization and focus must be balanced in such a way as to successfully accomplish all of these missions concurrently.

Further, each of the separate missions has disparate interests internal to the mission or program. For example, the Corps civil works program includes projects having the primary benefit categories of navigation, flood damage reduction, and environmental restoration. Quite often, economic and environmental uses of water in these categories are in direct competition requiring a balanced approach to assure that both the Nation's economic strength and environmental health are properly considered. To further complicate matters, solutions to water resources problems today—especially in urban areas—frequently come into conflict with other challenges which are not within Corps missions areas such as providing efficient transportation systems, urban economic redevelopment, providing recreation opportunities, and so forth. It has become increasingly apparent that it is inappropriate to optimize a solution for any one of these challenges in such a way as to result in a sub-optimal solution to the full range of problems confronting an area. Here again, balance is required as a minimum, and “win-win” solutions should be actively sought.

14. Senator MCCAIN. Lieutenant General Van Antwerp, if confirmed, how do you propose to balance those interests? What guiding principles will you use in the process?

General VAN ANTWERP. The underlying guiding principles that must be used in carrying out the Corps missions are those provided by the administration and Congress through policy and legislation applicable to those missions. If confirmed, I would expect to engage both the administration and Congress on a regular basis to assure we are proceeding appropriately.

Beyond that, and internal to the Corps, there are great opportunities to use knowledge and experience gained in one Corps program to inform and otherwise benefit the others. As you might expect, the same Corps people who are working on one program one day are often assigned to another program on another day. My observation is that the Corps has always found this diversity of experience to be very beneficial, both in terms of individual professional development and in cross-fertilizing ideas among programs. I would expect to continue in that mode if confirmed.

Externally, the fundamental prerequisite for identifying the appropriate balance among disparate interests is continuous pursuit of open and candid communications with all interested parties—both listening carefully and offering information freely—and effective partnerships with a wide range of stakeholder groups, other Federal agencies, and State and local governments.

TRANSPARENCY IN CORPS ACTIVITIES

15. Senator MCCAIN. Lieutenant General Van Antwerp, you have stated in your responses to our advance policy questions about the Corps' challenges that “the integrity of the Corps of Engineers rests on the objectivity, transparency, and scientific validity of its analytical processes.” Are you committed to complete transparency in all contracting activities carried out by the Corps of Engineers?

General VAN ANTWERP. Absolutely. If confirmed I will see that the Corps of Engineers keeps the public advised of new contracting opportunities, emphasizing and utilizing the tools provided by the Federal Acquisition Regulation (FAR) and the Army Source Selection Manual. The Army Source Selection Manual is an excellent resource for contracting officers. The Source Selection Evaluation Team prescribes best practices for source selections. This will allow the Corps to conduct objective evaluation and source selection of contractors. I commit to finding ways to improve the Corps transparency in regard to our contracting procedures.

16. Senator MCCAIN. Lieutenant General Van Antwerp, if confirmed, what will you do to improve the objectivity and transparency of the Corps' processes, particularly as they relate to open competition and contract awards?

General VAN ANTWERP. I will reach out to industry through conferences and workshops, ensure advertisement of all contracting opportunities on the Army Single Face to Industry and Federal Business Opportunities Web sites and make certain that the Corps' contracting officers have the best and most current information on contracting best practices for competition.

USE OF "COST-PLUS" CONTRACTS FOR CONSTRUCTION ACTIVITIES

17. Senator MCCAIN. Lieutenant General Van Antwerp, to what extent does the Corps of Engineers rely on the use of "cost-plus" contracts for construction activities?

General VAN ANTWERP. The Corps of Engineers only employs "cost-plus" contracts when required in accordance with statute and regulation. The preferred contract type is always a firm fixed-price contract. Unfortunately, circumstances do not always allow the use of fixed-price contracts.

18. Senator MCCAIN. Lieutenant General Van Antwerp, does the Corps currently have any guidance or policies in place related to the use of these contracts?

General VAN ANTWERP. The Corps of Engineers' contracting officers follow FAR Part 16, "Types of Contracts" as supplemented by the Defense FAR Supplement and the Army FAR Supplement in determining the appropriate contract type.

19. Senator MCCAIN. Lieutenant General Van Antwerp, in your opinion, what are the advantages and disadvantages to the use of "cost-plus" contracts?

General VAN ANTWERP. In accordance with FAR Part 16.301-2 cost reimbursement contracts should be utilized "only when uncertainties involved in contract performance do not permit costs to be estimated with sufficient accuracy to use any type of fixed-price contract."

In many situations the Corps faces projects where the uncertainties are such that a cost-type contract is the only method available to ensure successful completion of the project. If the site conditions, the technology required, or the type of structure to be built are complicated and the good result of the project is at risk, it is necessary to use cost-type contracts as prescribed by FAR Part 16.

One of the disadvantages of cost-plus contracting is the lack of "market forces" as an incentive to control costs. This requires increased contract surveillance and cost reviews in accordance with statute and regulation. Use of effectively designed "cost-plus" incentive structures will allow the Corps to negate issues caused by the contractor's lack of cost control. It is not to the contractor's benefit to incur excessive costs, because a cost-plus incentive contract will not result in increased fees and could lead to reduced fees.

Cost-reimbursement contracts do have a number of unique limiting characteristics. Specifically, the FAR places three limits on their usage. First, the contractor's accounting system must be adequate for determining applicable costs. Second, government surveillance during performance must provide reasonable assurance that efficient methods and effective cost controls are employed by the contractor. Third, a determination must be made that a cost-reimbursement contract is likely to be less costly than any other type or that obtaining the needed supplies or services without the use of a cost-reimbursement contract is impracticable. FAR 16.301-3.

The Corps of Engineers contracting officers will continue to be encouraged to use the tools the FAR has provided for limiting cost risk when cost-type contracts are utilized.

20. Senator MCCAIN. Lieutenant General Van Antwerp, if confirmed, what will be your policy on the use of these types of contracts?

General VAN ANTWERP. If confirmed, I will assure that Corps of Engineers contracting officers are charged with carefully considering the project, risk of performance, and advantages and disadvantages of the contract type when determining whether a cost-type contract is appropriate for the project.

HEALTHY BUSINESS ENVIRONMENT FOR SMALL- AND MEDIUM-SIZE COMPANIES

21. Senator MCCAIN. Lieutenant General Van Antwerp, I wanted to follow up on a question we posed to you about maintaining a healthy bid climate that allows for a full range of small- and mid-size businesses to compete for construction projects. It seems that we have programs established for small and disadvantaged businesses and that the large multi-national companies will most be able to take advantage of the Corps bundling strategy for construction contracts. That leaves the entire mid-range of businesses without a competitive advantage. You mentioned that "requirements should be developed so that small and mid-sized businesses are able to compete." If confirmed, how do you propose to develop these requirements?

General VAN ANTWERP. When possible, I would assure that the Corps breaks up requirements into sizes that are manageable by the small business community wherever possible. Additionally, I will explore ways in which contracts may be broken out such that they might not be true small business set-asides, but would be

of such sizes that could be more easily accessible to mid-range businesses, i.e. those that do not qualify as small businesses, but are not equipped to adequately compete for very large contracts.

22. Senator MCCAIN. Lieutenant General Van Antwerp, how can the Corps ensure that mid-range companies will have a selection of projects in which to bid on?

General VAN ANTWERP. Regarding mid-size firms, unfortunately this is not a recognized business designation in Federal contracting. A business is either small or large. Once a small business construction firm exceeds its size limits to be considered as small business (revenues ranging between \$13 million–\$31 million depending on its size standard code), it now has to compete against large businesses with revenues in the hundreds of millions of dollars or even in the billion dollar range. This is not a level field of competition. Therefore, as mentioned above, I would explore ways to offer contracting opportunities for mid-range businesses.

QUALITY OF CONSTRUCTION

23. Senator MCCAIN. Lieutenant General Van Antwerp, you mentioned in answers to advance policy questions submitted by this committee that the Corps is using prefabricated modular and tilt-up construction in an effort to save costs for the tremendous amount to new construction required to satisfy requirements related to base realignment and closure (BRAC), Army modularity, and the Army's increase in end strength. As a professional engineer: what are the eventual costs of using such construction methods versus the traditional Army Corps—use of permanent type 5 construction methods?

General VAN ANTWERP. Traditionally, the Government has required type 1 or 2 construction, which is construction comprised primarily of steel and concrete. By allowing private contractors to propose a broader range of construction types, the Army is allowing industry innovations and construction techniques that maximize methods for both cost and schedule reduction. Commercial techniques such as prefabricated modular and tilt-up construction methods provide levels of quality that are comparable to traditional construction methods. The Corps of Engineers believes that by allowing the use of innovative methods and materials, initial facility construction costs will be reduced and that future facility maintenance costs will be similar to costs experienced by the private sector where similar methods have been used. However, it is recognized that life cycle maintenance costs associated with commercial construction standards that are less robust than traditional Corps standards may be higher. Nonetheless, the mission timeline requirements necessitated the use of such standards.

24. Senator MCCAIN. Lieutenant General Van Antwerp, what is the design life of these new facilities versus type 5 construction methods?

General VAN ANTWERP. All facilities are built for a 50-year design life whether they are type 5, which is a residential type standard, or whether they are type 1 or 2, which is construction comprised primarily of steel and concrete. In addition, the MILCON transformation strategy provides additional flexibility to facility commanders by providing a means by which the Army can more easily refurbish or readapt a facility with a 50-year design life after only 25 years, a timeframe similar to the life-cycle used in private industry.

25. Senator MCCAIN. Lieutenant General Van Antwerp, by accepting a lower design life for these new buildings in order to keep costs down, are we building a legacy of "World War II wood" where entire bases of failing buildings will have to be torn down and replaced in 30 years?

General VAN ANTWERP. The Army's MILCON transformation strategy is built on constructing facilities with a 50-year design life that can be built under compressed time schedules by using private industry methods, materials, and techniques. The MILCON transformation strategy uses industry innovations such as pre-fabrication, modular solutions, pre-engineered facilities, and the standardization of facility designs, to reduce costs while maintaining quality. The cost savings the Army expects to realize are from improved methods, materials, and the use of innovative techniques, not from accepting a lower design life. The Army expects to get a minimum of 50 years out of facilities built with a 50-year design life.

LAND ACQUISITIONS IN ARIZONA

26. Senator MCCAIN. Lieutenant General Van Antwerp, the Army Corps of Engineers is in the process of carrying out an Air Force requirement to purchase, or otherwise acquire, private property in aircraft accident zones around Luke Air Force Base, AZ. I have recently been briefed that the Corps of Engineers may have to rely on land condemnation or Federal seizure proceedings with four landowners in order to preclude unsafe development in critical airfield zones. While I understand and support the need for the Air Force to conduct safe flying operations, I am concerned that the rights of private landowners are preserved to the maximum extent possible. Can you look into this matter and report back to this committee within 30 days on the Corps plan to complete the land acquisitions for the Air Force, the process the Corps will pursue to ensure fair and equitable treatment of these landowners, and all other actions considered or conducted by the Corps, including the use of restrictive easements, to preclude as a last resort the seizure or condemnation of the properties?

General VAN ANTWERP. It is my understanding that the U.S. Army Corps of Engineers is acquiring restrictive easements and that landowners will not be displaced. Also, none of the landowners are being forced to change their current use of the land which is predominantly unoccupied cropland. There is one landowner, Arizona Motorsports, whose non-agricultural use of the land is being grandfathered in.

I understand that the Corps of Engineers has concluded negotiations for the majority of the necessary transactions, but anticipates having to utilize condemnation for several of the transactions. The Corps of Engineers is coordinating very closely with AETC and Luke Air Force Base and intends to continue to work with owners to conclude the transactions. If confirmed, I will ensure that the subject landowners are treated fairly and that all laws and regulations governing the taking of private property are followed.

QUESTIONS SUBMITTED BY SENATOR JEFF SESSIONS

DREDGING THE APALACHICOLA RIVER

27. Senator SESSIONS. Lieutenant General Van Antwerp, in 2004, Florida denied the Corps' application for a section 401 water quality certification to dredge the Apalachicola River, which cut off congressionally authorized navigation to the upstream States. Since then, the Corps has failed to exercise its Federal preemptive authority, including that contained in section 404(d) of the Clean Water Act, to dredge the river despite being requested to do so. If you are confirmed as Chief of Engineers, what will you do to restore navigation to Alabama and Georgia?

General VAN ANTWERP. I understand that in connection with the operation of any system of Corps multiple purpose reservoir projects, such as those in the ACF Basin, the Corps must consider many factors and interests in the operation of those projects to accomplish their congressionally authorized purposes. The Corps must consider factors such as navigation channel depths, drought conditions, and availability of water to release or hold back in order to accomplish the various multiple purposes of the projects, and such factors as the needs of endangered species, fisheries, and shellfish; available funding or lack thereof for dredging; and other maintenance activities. The Corps will always exercise its best efforts to balance all of these factors in the public interest and to fulfill all project purposes including navigation to the greatest possible extent in order to maximize the benefits of the projects.

THE CORPS' MISSION

28. Senator SESSIONS. Lieutenant General Van Antwerp, the Corps' mission continues to expand while its budget contracts, all at the expense of the Corps' traditional programs such as navigation and flood control. Recognizing the Corps is the only Federal agency with national responsibilities for water resources development, how will you manage the Corps to avoid taking on more nontraditional projects and programs—which should be the responsibility of other Federal agencies such as the Department of Interior and the Environmental Protection Agency—and ensure the Corps focuses its limited resources on its own established mission?

General VAN ANTWERP. The Corps' mission responsibilities and assignments come through the policy oversight and guidance provided by the administration and specific project and activity authorizations in laws passed by Congress. In contrast to most other Federal agencies, the Corps doesn't have a great deal of discretion in

the specific activities it undertakes. The Chief of Engineers can—and should—fully inform decisionmakers in both the administration and Congress as to the impacts on its traditional missions of proposals for the organization to take on work outside of its traditional mission areas. Working with the Assistant Secretary of the Army for Civil Works, I would expect to be proactive in offering such information if confirmed.

Beyond that, it seems to me that the best avenue for dealing with this problem is through comprehensive, collaborative, integrated approaches to problem solving. This is often referred to as a watershed approach. One element of such an approach is to seek ways to look more comprehensively at the full range of problems in a region or watershed before concentrating on site specific solutions to narrower problems. To accomplish this effectively, interagency partnerships and actionable memorandums of agreement among agencies are essential. Too often in the past, we have seen Federal agencies focus exclusively on their own discrete missions and tools without understanding the authorities and capabilities of sister agencies, or attempting to partner with them. If effective collaborations among relevant Federal agencies—and State and local governments as well—were created and each partner were to bring its respective authorities and resources to bear in solving intersecting problems in a complementary manner, the need seen by some for Corps mission expansion might be obviated.

FUNDING ALLOCATION

29. Senator SESSIONS. Lieutenant General Van Antwerp, in fiscal year 2007, the Senate Appropriations Committee unanimously rejected the administration's proposed "regional allocation" of operations and maintenance (O&M) funding because of its encroachment on the Constitutional prerogatives of Congress. Do you concur with this proposed budget policy which has again been included in the fiscal year 2008 budget request for the Corps? If so, please explain what influence, if any, would I or other Members of Congress have on the eventual funding levels for individual waterways in my State, if Congress should approve the administration's proposal?

General VAN ANTWERP. The O&M program is seen more and more as a very dynamic program, with needs and priorities changing at a moments notice. In a performance-based context, the Corps would manage the funds in that account and in the basin, only moving funds to the highest priority activities within that basin. The criteria used to move funds would be those that were used to develop the overall O&M program, which reflect a rigorous analysis to make best use of limited funding.

Tentative, draft individual funding levels were placed on the Corps' Web site when the 2008 budget request was introduced. From what I understand, there are strict guidelines for reprogramming funds at this time, so Members of Congress have significant influence over funding levels for individual waterways. Traditionally, Congress has appropriated funds by project and not by regional allocation and the Corps executes the program accordingly.

WATER RESOURCES STUDY

30. Senator SESSIONS. Lieutenant General Van Antwerp, it has been over 30 years since Congress authorized a National Water Resources Study Commission. Would you support congressional authorization in Water Resources Development Act of a Presidential Commission to: (a) assess the Nation's water resources needs; (b) ascertain the performance or benefits of current Federal programs and projects; (c) evaluate the effectiveness of present policies, principles, and performance/measurement standards in making resource allocation decisions; and (d) recommend needed changes pertaining to those Federal water resources needs, policies, principles, standards, and programs?

General VAN ANTWERP. Depending on how it was constructed and charged, such a commission could be very useful in raising awareness of national needs and approaches to meeting them. The pressure on water resources brought about by an increasing population and shifts in population distribution argue for a National Water Resources Commission and study. However, I don't think that waiting on the formation of a commission and results from its inquiry should delay us from doing today what we already know must be done. Existing policies, principles, standards, and programs are broad and flexible enough so that much can be done under them as they now exist. In the case of the Corps, a continuing review and updating of agency rules and procedures developed to implement current policies, procedures,

and laws could go a long way to addressing current and projected needs. If confirmed, I am committed to such a continuing review.

QUESTIONS SUBMITTED BY SENATOR JOHN ENSIGN

PROPER USE OF FUNDS FOR FACILITY REPAIRS

31. Senator ENSIGN. Lieutenant General Van Antwerp, in our review over the past 2 weeks into the facility conditions at Walter Reed Army Medical Center, I have come to the conclusion that the appalling conditions in Building 18 were the result of a failure in leadership to respond to and correct identified deficiencies. We heard witnesses testify earlier this week that the Army and Defense Health Affairs had received adequate resources from Congress, despite the pending BRAC decision to close Walter Reed by 2011, to maintain this facility at an acceptable level. In fact, over \$670,000 was spent on renovations for this facility between 2000 and 2005. What struck me is that in order for this money to have been spent in Building 18, a military engineer needed to have walked through the facility, talked to building residents, and identified problems. Then funds must have been approved at some level of command within the Army and provided to award a contract for the two renovations. So, this wasn't necessarily an issue of lack of oversight, it was an issue of misplaced priorities. My question to you as a former Assistant Chef of Staff for Installation Management, and now the potential Commanding General of the Army Corps of Engineers—what happened? Did we waste \$670,000 by, to use a little known veterinary term, putting “lipstick on a pig”?

General VAN ANTWERP. Funding for construction, sustainment, repair, and maintenance of medical facilities—including all buildings at Walter Reed Army Medical Center—is funded through the Defense Health Program appropriation and managed by the TRICARE Management Activity and the U.S. Army Medical Command.

It is my understanding that prior to the BRAC decision, the former Walter Reed Army Institute of Research (Bldg. 40) and the Walter Reed Inn (Bldg. 18) were considered as part of the Enhanced Use Lease project. A lease was signed for Building 40. The destruction of Building 18 and development of a new parking structure was not pursued for two reasons; WRAMC students occupied the facility with no place to relocate and the BRAC closure announcement. A large portion of the \$670,000 was used for minor renovations prior to Wounded Warriors occupying the Walter Reed Inn (Bldg. 18) in late 2005.

32. Senator ENSIGN. Lieutenant General Van Antwerp, is the Army using its scarce O&M resources to fix up finishes rather than addressing seriously deteriorated facility systems?

General VAN ANTWERP. The Army works very hard to get the most out of every facility sustainment dollar.

The Army's Installation Management Command (IMCOM) manages the facility sustainment program for the Army and has adequate oversight in place. For example, any repair project estimated over \$3 million must be reviewed and approved by the Army Secretariat and any repair project over \$7.5 million is reported to Congress before a project can be awarded.

As one of the organizations supported by the Corp of Engineers, it is my opinion that the U.S. Army Medical Command is not wasting scarce resources on finishes rather than addressing deteriorated systems within its medical facilities. The U.S. Army Medical Command has a rigorous system for prioritizing facilities for sustainment, repair, and modernization requirements to ensure that the Army's medical facilities comply with the rigorous life-safety standards established by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO). The Army's healthcare facilities consistently achieve high scores on JCAHO surveys which suggests the Medical Command's Facility Management Program is making good use of scarce O&M resources.

33. Senator ENSIGN. Lieutenant General Van Antwerp, the Army has already spent over \$30,000 in the past 2 weeks to paint walls and patch holes in Building 18. They are also in the process of conducting an engineering survey of Building 18, which I am confident will result in the need to replace a failed roof, replace a leaking plumbing system, and upgrade an antiquated heating, air conditioning, and ventilation system—all the root causes of mold infestation which will again emerge on newly painted walls. So, who decided to spend money on drapes, carpet, and ceiling tiles while ignoring the basic problems of Building 18?

General VAN ANTWERP. The U.S. Army Medical Command receives separate funding for the construction, sustainment, restoration, and maintenance of medical facilities from the Defense Health Program. The decision to take immediate action to repair problems in Building 18 was directed by the Army. Funding was provided by the U.S. Army Medical Command.

The Corps of Engineers has developed, at the request of the U.S. Army Medical Command, a phased repair plan for Building 18. The Corps has already awarded a contract to replace the roof on Building 18, and is preparing to award the necessary contracts for interior repairs should the U.S. Army Medical Command decide it wants to continue to use Building 18 for housing soldiers in the future.

34. Senator ENSIGN. Lieutenant General Van Antwerp, Congress provides O&M funds to the military Services with the understanding that these funds will be applied wisely by military leaders to address the most urgent requirements. I realize that public works for the Army falls under the Army's Installation Management Agency, but does the Commanding General of the Corps of Engineers—responsible for the programming and design of major facility repairs—have a responsibility to customers to provide expertise and counsel on the use of these funds?

General VAN ANTWERP. The U.S. Army Corps of Engineers is indeed responsible for providing planning, engineering, design, and construction expertise and counsel at the request of Army customers or other military Services. However, responsibility for the programming and approval of major facility repairs rests with the respective military Services. Specifically, for the Army, the Office of the Assistant Chief of Staff for Installation Management (OACSIM) plans and programs sustainment, restoration, and modernization requirements. The Corps works very closely with OACSIM on both O&M funded repair projects and MILCON funded projects to provide expertise and counsel on how to best use the funds allocated. Ultimately, OACSIM approves and prioritizes facilities for repair or construction and the Corps provides design and construction services to complete the repairs or new construction.

35. Senator ENSIGN. Lieutenant General Van Antwerp, what policies does the Corps have in place, or do you propose, to ensure this expertise is provided?

General VAN ANTWERP. The U.S. Army Corps of Engineers has in place a major program to provide quality, responsive, and cost-effective installation support services for Army garrisons (to include the capability to provide expertise and counsel on facility repair projects). This program focuses on enhancing mission support capabilities, supplementing inherent technical capabilities, and extending manpower capacity at garrisons when needed. This support to garrisons is normally fully reimbursable, meaning the garrisons seek the Corps support when it is determined it is appropriate, and pays the Corps for providing the services.

Standard Corps engineering, design, and construction criteria and procedures are changed and adapted to IMCOM requirements when Corps of Engineer districts conduct garrison support work. Supporting districts comply with quality standards, including the Installation Design Guide, the Army Installation Design Standards, and maintenance and repair operational procedures. Health, life, safety, fire, or other statutory or regulatory requirements are not compromised. In the event of disagreement on the appropriateness of engineering and construction criteria or procedures for installation support work, the issue is raised through IMCOM channels and the Corps of Engineer district's channels for quick resolution.

If confirmed, I will continue to seek improvement in Corps of Engineers policies, processes, and procedures to optimize our support to installations worldwide.

36. Senator ENSIGN. Lieutenant General Van Antwerp, what can Congress do to ensure the military Services fix the problems as opposed to painting them over and wasting funds?

General VAN ANTWERP. I believe the Army has a strong program in place for making the most of scarce O&M funds in repairing and maintaining Army installations. However, in any process, improvements can always be made and I appreciate your willingness to help the Army in improving our processes. Congress can significantly help the Army improve our program by approving the legislative proposal, "Streamlining Military Construction to Reduce Facility Acquisition and Construction Cycle Time," contained in the fiscal year 2008 budget request: (Section 2932, which would amend section 2805 of title 10).

This proposal would raise the following thresholds: O&M from \$750,000 to \$1.5 million; Unspecified Minor Construction from \$1.5 million to \$3 million; and Life-Health-Safety from \$3 million to \$7 million.

Increasing these cost limits would allow DOD to: (1) respond more effectively to urgent and unforeseen requirements with properly sized and scoped facilities; (2) reduce the recapitalization rate faster by allowing facility projects under \$3 million to be funded from the unspecified minor MILCON account instead of the normal MILCON programming and budgeting process; and (3) allow the DOD health care community the same level of spending authority as the Department of Veterans Affairs (VA), allowing DOD to easily partner with the VA on health care projects.

Additionally, providing annual authorization and appropriations prior to the start of the fiscal year allows Army installations to receive sustainment and construction funds when needed and allows the Army to execute its program in a more timely and efficient manner.

[Letter requested by the committee follows:]

REPLY TO
ATTENTION OF

DEPARTMENT OF THE ARMY
COMMANDING GENERAL, UNITED STATES ARMY ACCESSIONS COMMAND/
DEPUTY COMMANDING GENERAL FOR INITIAL MILITARY TRAINING
96 INGALLS ROAD, BUILDING 100
FORT MONROE, VIRGINIA 23651-1065

23 April 2007

Honorable Carl Levin
Committee on Armed Services
United States Senate
Washington, D.C. 20510

Dear Senator Levin:

During the 19 April Senate Armed Services Committee hearing on the Department of Defense's management of costs under the Logistics Civil Augmentation Program, you and Senator Warner requested that I provide an assurance that, if confirmed, I would look into the removal of Ms. Greenhouse from her Senior Executive Service position as the Principal Assistant for Contracting at the U.S. Army Corps of Engineers.

My understanding is that Ms. Greenhouse has filed an action in U.S. District Court. If I am confirmed, I will undertake a review of this matter. I also will ask the Army's attorneys to take a hard look at the record to ensure that the Government's positions are supported by the facts and consistent with applicable law and regulations.

Additionally, I would like to emphasize my support for the Army's Equal Employment Opportunity program and my commitment to the goals and ideals of the Whistleblower Protection Act. I believe that, if confirmed as the Chief of Engineers, my duty will be to ensure that employees are treated fairly and in accordance with all laws and regulations. I assure this Committee that I will take that duty very seriously.

Sincerely,

R. L. Van Antwerp
Lieutenant General, U.S. Army
Commanding

[The nomination reference of LTG Robert L. Van Antwerp, Jr., USA, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
February 7, 2007.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment as the Chief of Engineers/Commanding General, United States Army Corps of Engineers, and appointment to the grade indicated in the United States Army, while assigned to a position of importance and responsibility under title 10, U.S.C., sections 601 and 3036:

To be Lieutenant General

LTG Robert L. Van Antwerp, Jr., 8468.

[The biographical sketch of LTG Robert L. Van Antwerp, Jr., USA, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF LTG ROBERT L. VAN ANTWERP, JR., USA

Source of commissioned service: USMA.

Military schools attended:

Engineer Officer Basic and Advanced Courses.
United States Army Command and General Staff College.
United States Army War College.

Educational degrees:

United States Military Academy — BS — No Major.
University of Michigan — MS — Engineering Mechanics.
Long Island University — MBA — Business Administration.

Foreign languages: None recorded.

Promotions:

	Dates of Appointment
2LT	7 Jun. 72
1LT	7 Jun. 74
CPT	7 Jun. 76
MAJ	1 Dec. 81
LTC	1 Feb. 88
COL	1 Jun. 92
BG	1 Aug. 96
MG	1 Jan. 00
LTG	21 Nov. 04

Major duty assignments:

From	To	Assignment
Feb. 73 ...	Apr. 74	Platoon Leader, 76th Engineer Battalion, (Construction), Fort Meade, MD.
May 74 ...	Apr. 75	Aide-de-Camp to the Assistant Commandant, United States Army Engineer School, Fort Belvoir, VA.
Apr. 75 ...	Dec. 75	Student, Engineer Officer Advanced Course, United States Army Engineer School, Fort Belvoir, VA.
Dec. 75 ...	Jun. 76	Executive Officer, 65th Engineer Battalion, 25th Infantry Division, Schofield Barracks, HI.
Jun. 76 ...	Apr. 79	Assistant Division Engineer, 65th Engineer Battalion, 25th Infantry Division, Schofield Barracks, HI.
Apr. 79 ...	May 81	Student, Department of Mechanical Engineering and Applied Mechanics, The University of Michigan, Ann Arbor, MI.
May 81 ...	Jun. 82	Instructor, Department of Mechanics, United States Military Academy, West Point, NY.
Jun. 82 ...	Jun. 84	Assistant Professor and Executive Officer, Department of Mechanics, United States Army Military Academy, West Point, NY.
Jun. 84 ...	Jun. 85	Student, United States Army Command and General Staff College, Fort Leavenworth, KS.
Jun. 85 ...	Jun. 87	Executive Officer, 84th Engineer Battalion, 45th General Support Group, Schofield Barracks, HI.
Jun. 87 ...	Apr. 88	Chief, Military Engineering and Construction Division, United States Army Western Command, Fort Shafter, HI.
Apr. 88 ...	Apr. 89	Executive Officer, Office of the Chief of Engineers, United States Army, Washington, DC.

From	To	Assignment
Apr. 89 ...	Jun. 91	Commander, 326th Engineer Battalion, 101st Airborne Division (Air Assault), Fort Campbell, KY, and during Operations Desert Shield/Storm, Saudi Arabia.
Jun. 91 ...	Jun. 92	Student, United States Army War College, Carlisle Barracks, PA.
Jun. 92 ...	Jun. 94	District Commander, United States Army Corps of Engineers, Los Angeles District, Los Angeles, CA.
Jul. 94	Jan. 95	Chief of Staff, United States Army Corps of Engineers, Washington, DC.
Jan. 95 ...	Mar. 96	Executive Assistant to the Vice Chairman of the Joint Chiefs of Staff, Office of the Joint Chiefs of Staff, Washington, DC.
Mar. 96 ..	Jul. 98	Commanding General, United States Army Division, South Atlantic, Atlanta, GA.
Jul. 98	Jan. 99	Director, Office of Competitive Sourcing, Office of the Assistant Secretary of the Army (Research, Development, and Acquisition), Washington, DC.
Jan. 99 ...	Jul. 02	Assistant Chief of Staff for Installation Management, United States Army, Washington, DC.
Jun. 02 ...	Sep. 04	Commanding General, United States Army Maneuver Support Center and Fort Leonard Wood/Commandant, United States Army Engineer School, Fort Leonard Wood, MO.

Summary of joint assignments: Joint duty requirement waived due to promotion and projected utilization based primarily on scientific and technical skills.

Assignment	Dates	Rank
Executive Assistant to the Vice Chairman of the Joint Chiefs of Staff, Office of the Joint Chiefs of Staff, Washington, DC (Cumulative joint credit awarded)	Jan. 95–Jun. 96	Colonel

U.S. decorations and badges:

Distinguished Service Medal
Defense Superior Service Medal
Legion of Merit (with Oak Leaf Cluster)
Bronze Star Medal
Meritorious Service Medal (with four Oak Leaf Clusters)
Army Achievement Medal
Parachutist Badge
Air Assault Badge
Ranger Tab
Joint Chiefs of Staff Identification Badge
Army Staff Identification Badge

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by LTG Robert L. Van Antwerp, Jr., USA, in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Robert L. Van Antwerp, Jr.

2. **Position to which nominated:**

Chief of Engineers/Commanding General, United States Army Corps of Engineers.

3. **Date of nomination:**

February 7, 2007.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

January 27, 1950; Benton Harbor, MI.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Paula Eberly Van Antwerp.

7. **Names and ages of children:**

CPT Jeffrey Van Antwerp, 31.

CPT Lucas Van Antwerp, 29.

Mrs. Julia Tobias, 27.

Ms. Kathryn Van Antwerp, 24.

PVT Robert T. Van Antwerp, 20.

8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational, or other institution.

None.

10. **Memberships:** List all memberships and offices held in professional, fraternal, scholarly, civil, business, charitable, and other organizations.

Society of American Military Engineers.

American Society of Civil Engineers.

Officers Christian Fellowship, Past President.

Great Dads, Past Chairman.

Association of the United States Army.

11. **Honors and awards:** List scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

None.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes, I agree.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes, I agree.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ROBERT L. VAN ANTWERP, JR.

This 7th day of February, 2007.

[The nomination of LTG Robert L. Van Antwerp, Jr., USA, was reported to the Senate by Chairman Levin on March 15, 2007, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on May 17, 2007.]

**NOMINATIONS OF CLAUDE M. KICKLIGHTER
TO BE INSPECTOR GENERAL, DEPARTMENT
OF DEFENSE; JAMES R. CLAPPER, JR., TO
BE UNDER SECRETARY OF DEFENSE FOR
INTELLIGENCE; S. WARD CASSCELLS, M.D.,
TO BE ASSISTANT SECRETARY OF DEFENSE
FOR HEALTH AFFAIRS; AND WILLIAM C.
OSTENDORFF TO BE PRINCIPAL DEPUTY
ADMINISTRATOR, NATIONAL NUCLEAR SE-
CURITY ADMINISTRATION**

TUESDAY, MARCH 27, 2007

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:35 a.m. in room SH-216, Hart Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Akaka, E. Benjamin Nelson, McCaskill, Warner, Inhofe, Chambliss, Cornyn, and Thune.

Committee staff member present: Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Madelyn R. Creedon, counsel; Gabriella Eisen, professional staff member; Creighton Greene, professional staff member; Michael J. Kuiken, professional staff member; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; Thomas K. McConnell, professional staff member; and Arun A. Seraphin, professional staff member.

Minority staff members present: Michael V. Kostiw, Republican staff director; Derek J. Maurer, minority counsel; David M. Morriss, minority counsel; Lynn F. Rusten, professional staff member; Kristine L. Svinicki, professional staff member; Diana G. Tabler, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Kevin A. Cronin and Benjamin L. Rubin.

Committee members' assistants present: Darcie Tokioka, assistant to Senator Akaka; Eric Pierce and Benjamin Rinaker, assistants to Senator Ben Nelson; M. Bradford Foley, assistant to Senator Pryor; Jason D. Raunch, assistant to Senator McCaskill; Sandra Luff, assistant to Senator Warner; Jeremy Shull, assistant to

Senator Inhofe; Mark J. Winter, assistant to Senator Collins; and Russell J. Thomasson, assistant to Senator Cornyn.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets today to consider the nominations of James R. Clapper, Jr., to be Under Secretary of Defense for Intelligence; Claude M. Kicklighter, to be Inspector General (IG) of the Department of Defense (DOD); S. Ward Casscells, to be Assistant Secretary of Defense for Health Affairs; and William C. Ostendorff, to be Principal Deputy Administrator of the National Nuclear Security Administration (NNSA).

We welcome our nominees and their families to today's hearing. We know the long hours that senior DOD officials put in every day. We appreciate the sacrifices that our nominees are willing to make to serve their country. We know that they are not going to be alone in making these sacrifices, so we, in advance, thank the family members of our nominees for the support and the assistance that we know that they are going to need to provide.

Each of our nominees will be called upon, if confirmed, to make important contributions to our national defense.

The Under Secretary of Defense for Intelligence carries the heavy responsibility of ensuring that military forces and policymakers receive objective and accurate intelligence information and assessments. The Under Secretary for Intelligence is also responsible for oversight of DOD intelligence interrogations, detainee debriefings, and tactical questioning that is the policy—and is, in addition to all that, the policy advisor to the Secretary of Defense on DOD intelligence interrogations.

The DOD IG is responsible for keeping the rest of DOD honest through independent review of the activities of the Department and the conduct of senior officials. IG audits and investigations have addressed a series of controversial and important issues in recent years, from the Air Force tanker lease to the intelligence activities of the Office of the Under Secretary of Defense for Policy prior to the Iraq war. This is a position which demands the highest standards of ethics and independence.

The Assistant Secretary of Defense for Health Affairs is responsible for the health care of military personnel, including Active-Duty, National Guard, Reserve, and retired personnel, and their families. The care provided, from the battlefield through intermediary facilities in Germany to our premier medical facilities in the United States, has been extraordinary, saving the lives of troops with grievous wounds who would not have survived in prior conflicts. On the other hand, recent revelations at Walter Reed make it clear that we have a long way to go with regard to the care and treatment of these wounded warriors, particularly when they move from inpatient to outpatient status, and that care for mental health issues and traumatic brain injury must be significantly enhanced.

Finally, the position of Administrator of NNSA is currently vacant, so the Principal Deputy Administrator, if confirmed, will act as Acting Administrator. The NNSA faces many challenges, including maintaining adequate security at NNSA sites, ensuring that

workers have a safe environment in which to work, managing projects to be on time and on budget, and ensuring that both the nonproliferation and the weapons programs are executed efficiently.

These are all extremely important positions that we're considering this morning, and they merit the attention which this committee is going to be giving to them.

Senator Warner.

Senator WARNER. Mr. Chairman, I suggest that we allow our two colleagues from the Senate and our distinguished good colleague from the House of Representatives, Representative Everett—he is the ranking member on the Strategic Subcommittee of the House Armed Services Committee, and you and I have dealt with him many times in the course of conferences—go ahead and then I'll say a few words, following them.

Chairman LEVIN. That's a very fine idea. We thank you for that, Senator Warner.

Now, Senator Akaka, whenever he comes in, if our colleagues would excuse this interruption in their introductions, we would call on Senator Akaka, who has to chair his Veterans Affairs Committee hearing this morning. So, we may be interrupting you, or interfering with the flow of events here.

Senator Hutchison, I think we'll call on you first to introduce Dr. Casscells.

Senator WARNER. I'd like to note that Senator Cornyn was also here with Senator Hutchison earlier this morning.

Chairman LEVIN. And still is.

Senator WARNER. Oh, he still is here. Excuse me, Senator.

Senator CORNYN. I'm still down here, Senator. Down here with the cheap seats. [Laughter.]

Senator WARNER. We have a lot of players out there.

Chairman LEVIN. We will call upon Senator Cornyn after Senator Hutchison, if that's okay.

Senator Hutchison.

STATEMENT OF HON. KAY BAILEY HUTCHISON, U.S. SENATOR FROM THE STATE OF TEXAS

Senator HUTCHISON. Absolutely. Thank you, Senator Warner, for allowing me to go first. I certainly appreciate it.

I am always happy to introduce people to this committee, but this is a particularly special introduction because it's a true friend, someone who I have known, along with his family, for years. Today, I introduce Dr. Samuel W. Casscells—"Trip" Casscells—to the committee for his confirmation. I also want to acknowledge his wife, who is one of my friends also, and their three children—his wife, Roxanne, and their three children, Lily, Henry, and Sam. They are an incredible family. As Senator Levin said earlier, when someone volunteers for public service of the type that these four are going to do, their families make a sacrifice, too, and they have certainly been wonderful support for Dr. Casscells throughout his life.

Dr. Casscells has an incredible record of accomplishment. He graduated cum laude from Yale, and then magna cum laude from Harvard Medical School. He spent 6 years at the National Insti-

tutes of Health (NIH). He is one of America's leading cardiologists. He's a distinguished professor at the University of Texas Health Science Center in Houston, and Associate Director for Cardiology Research at the world-famous Texas Heart Institute. He is the first civilian recipient of the Army's Maxwell Thurman Award for his work in using new technologies to improve military emergency medicine.

When you look at his life as a whole, there is one overriding theme, and that is service to others. I recall the day that he came to my office, nearly 6 years ago, and told me that he had a very serious case of prostate cancer. His doctors had told him the prognosis might not be good, and told him to get his affairs in order. Like everyone else, I said, "Slow down, take care of yourself, and do everything you can to beat this." He did not take my advice. He sped up. He kept on going and fought this cancer ferociously. At the same time, he continued his work in trying to protect the ports of Houston against terrorism, to use technology to improve emergency medical care for soldiers, to protect America from the avian flu, and studying the connections between flu and cardiovascular disease. While fighting for his life, he didn't slow down a minute in his commitment to our country.

Then, the great news came. At the age of 53, he had defeated the cancer. So, he sped up and continued to do more.

His father served as a doctor in World War II. While cleaning out his father's closet, he decided that it was time for him to serve as well. So, at the age of 53, with forces deployed to Iraq, he began a campaign to convince the Army that he should sign up for the Army Reserve and to try to go to Iraq, which is exactly what he did. He is now a colonel in the Army Reserve, and he went to Iraq for 3 months last year.

He is now volunteering to take on another very tough job, and one that is very timely. But I think that because of his commitment and the experience and what he has shown he wants to do for our country, he is the perfect person for a very tough job to make sure that we are giving the quality medical care, in the field and after service, to our military personnel. I cannot think of a better person who can do that job.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Hutchison, for your very eloquent and your very personal introduction. I know it makes a great deal of difference to Dr. Casscells and to us.

Senator Cornyn.

STATEMENT OF HON. JOHN CORNYN, U.S. SENATOR FROM THE STATE OF TEXAS

Senator CORNYN. Thank you, Mr. Chairman.

I'd like to join Senator Hutchison in introducing Dr. Casscells to the committee. I won't repeat the fascinating story of his life, really, and what brings him here today, except to say that, as a physician, and especially as a soldier, Dr. Casscells has proven his commitment to not only health care, generally, and improving it for all Americans, but particularly for improving health care services for the men and women serving in the Armed Forces.

As you noted, Mr. Chairman, the recent revelations of outpatient care at Walter Reed have caused all of us to raise some very important questions and to look for ways that we can improve what is already largely a very good record of health care for our military, how we can help them cut red tape and improve their transition—particularly seriously wounded warriors from the DOD health care system to the Department of Veterans' Affairs (VA)—with a minimum of delay and red tape, as I say. I think that Dr. Casscells will be uniquely qualified to help us as we work through that process.

I'm pleased to commend him to the committee, and hope, along with Senator Hutchison, that his nomination is voted out promptly to the floor and by the Senate so he can get to work.

Thank you very much.

Chairman LEVIN. Thank you, Senator Cornyn.

Representative Everett, we're delighted to have you here to introduce our next nominee.

**STATEMENT OF HON. TERRY EVERETT, U.S. REPRESENTATIVE
FROM THE STATE OF ALABAMA**

Mr. EVERETT. Thank you very much, Mr. Chairman, Senator Warner, and members of the Senate Armed Services Committee.

I certainly appreciate the opportunity to introduce a man who's shown great loyalty and served this Nation for many years. He's a man of high character and integrity. It is my hope that this panel will confirm Bill Ostendorff as the next Principal Deputy Administrator of the National Nuclear Security Administration.

Since 2003, Bill has served as the staff director for Strategic Forces Subcommittee, which I chaired for 4 years and am now the ranking member. In working with Bill over the last 3½ years, he's become one of my closest advisors, due to his professionalism and comprehensive understanding of some of the most challenging issues facing the Departments of Defense and Energy.

After graduating in 1976 from the U.S. Naval Academy with a bachelor's of science degree in system engineering, he served on six different submarines. Bill displayed tremendous leadership when he commanded the attack submarine U.S.S. *Norfolk*. In 1993, he led the U.S.S. *Norfolk* on the Mediterranean deployment with the *Roosevelt* battle group. Bill's ship was recognized by the commander of Submarine Force Atlantic as having achieved the greatest improvement in combat readiness among the 53 attack submarines in the Atlantic Fleet in 1993, and was awarded the Meritorious Unit Commendation by the Secretary of the Navy. In 1995, he was recognized by the Commander of the U.S. Atlantic Fleet as a finalist for the Vice Admiral James Stockdale Award for Inspirational Leadership in Command. During his tour of duty he received four awards of the Legion of Merit and other numerous campaign and unit awards. In 1996, due to a large part of his outstanding service at sea, Bill brought his expertise to the classroom to train submarine commanders as the Director of the Submarine Force Atlantic Commanding Officer School. He then served as Director of the Division of Mathematics and Science at the United States Naval Academy from 1999 to 2002, at which point he retired from the Navy as a captain.

Perhaps the only thing that could rival Bill's service to his country is his devotion to his family. His wife, Chris, and his three children, Becky, Chuck, and Jeff, have enjoyed his constant love and support. I'm pleased that Chris and Becky are here with us today.

It is without prejudice that I sit before you today and introduce to you who I hope will be the next Deputy Administrator of NNSA, Bill Ostendorff.

Thank you very much.

Chairman LEVIN. Thank you, Congressman Everett, very much. Senator Warner.

Senator WARNER. Thank you, Mr. Chairman.

On behalf of the ranking member, Senator McCain, I ask unanimous consent that his statement appear following your statement.

Chairman LEVIN. It will, indeed.

I'll now place the opening statement of Senator McCain into the record.

[The prepared statement of Senator McCain follows:]

PREPARED STATEMENT BY SENATOR JOHN MCCAIN

Thank you, Senator Levin. I join you in welcoming General Clapper, General Kicklighter, Doctor Casscells, and Mr. Ostendorff and their families. I congratulate them on their nominations, and thank them for their willingness to serve in these important positions.

General Clapper, as Senator Levin indicated, you had a very distinguished career in the Air Force, culminating in your assignment as Director of the Defense Intelligence Agency from 1991 to 1995. After retirement, you returned to the Intelligence Community, serving as Director of the National Geospatial Intelligence Agency from 2001 through 2006. We appreciate your willingness to serve in this critically important position as the Under Secretary of Defense for Intelligence. Obviously, the attacks of September 11 were a massive intelligence failure. As the fight continues in Iraq and Afghanistan, no one underestimates the role that rapid, accurate, and detailed intelligence plays in combat operations. In addition, if you are confirmed, you will be asked, in concert with Admiral John McConnell, to continue efforts to change and reform the Department of Defense components of the national intelligence enterprise. In your responses to the committee's advance policy questions, you wrote that "neither the Office of the Director of Naval Intelligence nor the Under Secretary of Defense for Intelligence are organized optimally to promote efficient collaboration and coordination." You will be asked to expand on that comment. It may be the most critical aspect of intelligence reform.

General Kicklighter, welcome, and thank you for accepting the challenge of serving as the Department of Defense (DOD) Inspector General (IG). I want to underscore the importance of the DOD IG's functions and urge you, if you are confirmed, to consider this appointment as a mandate to strengthen the independence and effectiveness of that office. The Office of the DOD IG has contributed positively in the past to acquisition reform, and, if confirmed you need to continue that positive record of curbing abuses in acquisition and in providing timely, well-documented investigations in situations in which the Services cannot be looked to for an independent, objective inquiry. You have a wealth of experience from your service as a senior commander in the Army, as an Assistant Secretary of Veterans Affairs, and as a Special Assistant to the Secretaries of Defense and State in planning the establishment of the new U.S. Mission in Baghdad and are well-qualified for this important position.

Doctor Casscells, thank you for your willingness to serve as Assistant Secretary of Defense for Health Affairs. I won't attempt to list your extraordinary accomplishments today, but I do want to acknowledge your decision to seek and accept a commission in the Army Reserve in 2005 and your active-duty deployments following Hurricane Katrina to assist in relief efforts and again from August through December 2006 in Iraq serving as liaison to Ambassador Khalilzad.

As Assistant Secretary of Defense for Health Affairs, you will be confronted with some very difficult challenges including how to maintain high quality health care, at home and on the battlefield, while being challenged to achieve greater efficiencies. Solutions to the problems we have seen at Walter Reed in outpatient care must be identified and implemented.

Mr. Ostendorff, congratulations on your nomination to become the Principal Deputy Administrator of the National Nuclear Security Administration (NNSA). The NNSA was established in the aftermath of continued security lapses at the Department of Energy's (DOE) nuclear weapons laboratories, and what appeared to be an indifferent attitude on the part of DOE towards the safety of its own workers and the reliable operation of its own facilities. It is now 7 years later, and the serious security lapses that occurred at Los Alamos just last fall suggest that NNSA has not yet succeeded in creating the culture and discipline around these national security missions that the act had intended to foster.

If confirmed by the Senate, you will confront a variety of management and operational challenges. You have an impressive background of accomplishments in the Navy, however, and I know you will bring great energy and commitment to the task. I look forward to hearing your views of what is working, what is not, and how you would tackle these challenges head on if confirmed.

I thank each of our nominees for their service and look forward to their testimony today.

STATEMENT OF SENATOR JOHN WARNER

Senator WARNER. In order to achieve brevity here in this proceeding this morning, I'll just briefly comment.

First, General Kicklighter, I thank you for stepping up, once again. What an extraordinary career and a wealth of wisdom and experience that you bring to this job of IG. You have to fight hard, and there will be times when you will be in an adversarial position with some of your former colleagues and respected peer groups in the military, but that's the job that you understood and that you'll take on.

General KICKLIGHTER. Yes, sir.

Senator WARNER. We have a magnificent, I think, Secretary of Defense now, in Bob Gates, and he will look to you, as will the Deputy and others in that Department for fair, objective, and independent analysis of some of the very difficult decisions that the Department from time to time must make.

I'll say a few words for you, Dr. Casscells, that my father also served as a military doctor in World War I, and I know the pride that you take in your father's service, as I took very humbly in my father's service. I'm not sure that, in all the years I've been here, I've known of a 53-year-old individual volunteer to enter the military service, but that may be one of the first around here. But well done to you.

How was boot camp, by the way? [Laughter.]

With that marvelous family of yours that has given you support, you'll do just fine in this new position.

I also would say that we've spent some time here on this committee with the problems, as Senator Cornyn said, associated with Walter Reed. You'll be thrust into the center of that situation. Just for what it's worth, I strongly believe that we should focus our attention on accelerating the funding of the new parts to go into Bethesda, and, likewise, the new hospital that has been planned for many years to go at Fort Belvoir. Those two bricks-and-mortar programs could move together very quickly, and then eventually the fate of this historic institution, Walter Reed, can be decided.

At this time, I would hope we do not try to amend the Base Realignment and Closure (BRAC) law because that would break a precedent. Senator Levin and I have been on this committee for 29 years. We have handled all five of the BRAC pieces of legislation. To my knowledge, we've never amended the law. I think it's in our

interest to maintain the integrity of that process, but, at the same time, recognize that, when the time comes for the transition, assuming it does take place, to the newer institutions at Bethesda and Belvoir, decisions can be made with regard to that property. It may well be that the Veterans Administration might wish to pick it up for one of their institutions.

To you, Skipper, well done. I think Admiral Rickover would be very pleased to know that you're here today, carrying on the institution and the training that he brought forth in your specialized career in the United States Navy. Well done, and thank you, to you and your family, stepping up for public service.

I see our colleague here. Why doesn't he proceed, and then I'll say a few words.

Chairman LEVIN. That would be great, thank you.

Senator Akaka.

Senator AKAKA. Thank you, Senator Warner. Thank you very much, Mr. Chairman.

Due to my chairing another hearing scheduled at this same time, I appreciate you and other members of this committee, Mr. Chairman, agreeing to accommodate my request to introduce Lieutenant General Mick Kicklighter.

Mr. Chairman, it's a great honor for me today to present to you and the distinguished members of this committee the President's nominee to be the next Inspector General of the Department of Defense, General Mick Kicklighter.

General Kicklighter is one of our Nation's most precious kind of resources, a public servant who has dedicated his life in service to our country. He has personally provided our Nation with over 50 years of combined military and public service. Following his retirement from the Army in 1991, after a distinguished 35-year military career, he continued to answer the call of duty to service to our country in various civilian positions wherever his leadership was needed.

I met General Kicklighter through my brother, Reverend Dr. Abraham Akaka, pastor of Kawaiahao Church, known as the Westminster Abbey of Hawaii. We became close and personal friends with General Mick Kicklighter and his wife, Elizabeth, who's here today, and also the family, since he commanded the 25th Infantry Division at Schofield Barracks in Hawaii from 1984 to 1986. From that time, I have always known him to be an honorable and selfless public servant who has always sought opportunities to serve our great country.

General Kicklighter's accomplishments are many. I will not go through all of them here, but I would like to note some of the highlights.

As a public servant, he has served in a number of positions in the Departments of State, Defense, and Veterans Affairs. Most recently, he led, at the request of Secretaries of State and Defense, the establishment of the Iraq/Afghanistan Joint Transition Planning Group, a joint Department of State and DOD team that provides analysis and recommendations for coordinating efforts to address transition challenges in Iraq and Afghanistan.

In prior assignments, he served as the Chief of Staff for the VA; Special Advisor to the Deputy Secretary of State for Stabilization

and Security Operations in Iraq and Afghanistan; Director of DOD's Iraq Transition Team; and Assistant Secretary for Policy, Planning, and Preparedness in the VA. He also served 5 years on the board of directors for Habitat for Humanity International, 3 of which were as chairman.

But, Mr. Chairman, Mick Kicklighter's public service is not even half of the story. As a member of our armed services for 35 years, General Kicklighter served as a leader in all levels of military, from platoon to theater command, completing his career as Commander of the U.S. Army Pacific. He also held senior-level staff assignments with the Joint Chiefs of Staff, the Office of the Secretary of Defense, and the Department of the Army. A combat veteran, General Kicklighter served two tours in Vietnam.

His list of awards is as long as his service to our country. He has been awarded the Distinguished Service Medal three times, the Defense Superior Service Medal, the Legion of Merit four times, the Bronze Star, the Meritorious Service Medal twice, as well as a number of foreign decorations.

As a civilian, he has been awarded the Presidential Citizen Medal, the Eisenhower Liberation Medal, the Decoration for Exceptional Civilian Service, and has twice been awarded the Department of Defense Medal for Distinguished Public Service.

Mr. Chairman, I believe, if confirmed by the Senate, that Mick Kicklighter will continue to give our country the high-quality service and dedication that have been characteristic of his service throughout his entire career, during which he was supported by his wife, Elizabeth.

I would like to thank you, Elizabeth, and your family, for all you have given and sacrificed for our country.

At this time, I would like to welcome General Kicklighter to this committee.

Mr. Chairman, I thank you for the opportunity to introduce my close and personal friend, General Mick Kicklighter.

Thank you.

Chairman LEVIN. Senator Akaka, thank you so much.

Senator Warner.

Senator WARNER. Thank you, Mr. Chairman.

I have the privilege of introducing General Clapper. I believe I had that privilege once before, and I'll mention that in his long, distinguished career of over 4 decades involved in the Intelligence Community, it's remarkable all the experience that you've had in this area.

I also note that he served as a senior intelligence officer for the U.S. Forces in Korea, the U.S. Pacific Command, and then Strategic Air Command. He was the Air Force Chief of Staff for Intelligence at Headquarters, U.S. Air Force Operation Desert Shield/Desert Storm. In 1991, General Clapper was nominated to serve as Director of the Defense Intelligence Agency, when I first had the occasion to meet him and work through a confirmation process at that time.

He served honorably in that position for 4 years, during the ever-shifting period following the end of the Cold War and the collapse of the Soviet Union and the Warsaw Pact. Together with other members of this committee, I worked closely with the General and

others to ensure our intelligence forces would not be cut too steeply. Clearly, we saw our intelligence forces as the first line of defense and a force multiplier. We saw the necessity of maintaining a robust and capable intelligence effort.

More recently, the General served as head of the National Geospatial-Intelligence Agency (NGA) retiring from that position in 2006. At NGA, he led the continuing transformation from the National Imagery and Mapping Agency from its legacy missions to become the leading agency for the creation and exploitation of geospatial intelligence.

Under General Clapper's leadership, the NGA routinely provided global intelligence and information security services to the White House, Cabinet officials, and Congress, in addition to a broad array of military, civil, and intelligence customers.

General Clapper was also one of the first senior officials in the U.S. Government to identify geospatial intelligence as major strategic issues in our increasingly imagery-dependent intelligence operations.

I'll put into the record his long achievements in the private sector and the many awards and distinctions that this famous man has received.

I congratulate you, General, and thank you for once again stepping up to public service with the support of your family.

At this time, perhaps you'd take a moment to introduce your family.

General CLAPPER. Yes, sir.

I'm pleased and proud to do so. First, my wife, Sue, of 42 years, herself a former National Security Agency employee; our daughter, Jen, who's an elementary school principal in Fairfax; her husband, Jay, who's a high-school teacher; our oldest grandson, Ryan; and our granddaughter, Erin. I also have a son and daughter-in-law, who are also schoolteachers, with two boys, who live outside of Roanoke, VA.

Chairman LEVIN. Thank you.

General CLAPPER. Obviously, I'm very proud of them, and couldn't contemplate this without their support.

Senator WARNER. Thank you.

One question, General, before I proceed. I understand you started your distinguished career in the United States Marine Corps.

General CLAPPER. Yes, sir.

Senator WARNER. It concerns me how that departure occurred and the Air Force got you. Would you please clarify that for the record?

General CLAPPER. Sir, I'm very proud of that, and proud to note that both Senators from my home State of Virginia, Senators Warner and Webb, and I all served in the Marine Corps. I'm a proud graduate of the Platoon Leader Course, Quantico—spent a wonderful summer at Quantico Marine Corps Station, way back in 1961. My family still reminds me I never got over it. I elected to move to the Air Force, since I grew up in the intelligence business, as sort of the family business, and I had more opportunities to pursue that line of work in the Air Force.

Chairman LEVIN. Thank you.

Senator WARNER. You're not suggesting the Marines in any way fail to have a high intelligence quotient.

General CLAPPER. Absolutely not, sir. [Laughter.]

Senator WARNER. Thank you very much. I want that clear for the record.

General CLAPPER. I'm pleased and proud, sir, to be a straight man for you anytime. [Laughter.]

Senator WARNER. That's right. Perhaps the others could introduce their families?

Chairman LEVIN. They will. As we call on them for their testimony, they could do that, at that time.

First let me proceed, though, with the standard questions which we ask all of our witnesses, and we'll ask all of you at one time.

Have you adhered to applicable laws and regulations governing conflicts of interest?

General KICKLIGHTER. I have.

General CLAPPER. Yes, sir.

Dr. CASSCELLS. Yes, sir.

Mr. OSTENDORFF. Yes, sir.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

General KICKLIGHTER. No, sir.

General CLAPPER. No, sir.

Dr. CASSCELLS. No, sir.

Mr. OSTENDORFF. No, sir.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

General KICKLIGHTER. Yes, sir.

General CLAPPER. Yes, sir.

Dr. CASSCELLS. Yes, sir.

Mr. OSTENDORFF. Yes, sir.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

General KICKLIGHTER. Yes, sir.

General CLAPPER. Yes, sir.

Dr. CASSCELLS. Yes, sir.

Mr. OSTENDORFF. Yes, sir.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

General KICKLIGHTER. Yes, sir.

General CLAPPER. Yes, sir.

Dr. CASSCELLS. Yes, sir.

Mr. OSTENDORFF. Yes, sir.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify, upon request, before this committee?

General KICKLIGHTER. Yes, sir.

General CLAPPER. Yes, sir.

Dr. CASSCELLS. Yes, sir.

Mr. OSTENDORFF. Yes, sir.

Chairman LEVIN. Do you agree to give your personal views, when asked before this committee to do so, even if those views differ from the administration in power?

General KICKLIGHTER. Yes, sir.

General CLAPPER. Yes, sir.

Dr. CASSCELLS. Yes, sir.

Mr. OSTENDORFF. Yes, sir.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner, when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good-faith delay or denial in providing such documents?

General KICKLIGHTER. Yes, sir.

General CLAPPER. Yes, sir.

Dr. CASSCELLS. Yes, sir.

Mr. OSTENDORFF. Yes, sir.

Chairman LEVIN. Thank you.

Let us, again, invite you to introduce your families as we call upon you. I think we'll just go in order, from left to right here.

General Kicklighter, let's start with you.

**STATEMENT OF LTG CLAUDE M. KICKLIGHTER, USA, (RET.), TO
BE INSPECTOR GENERAL, DEPARTMENT OF DEFENSE**

General KICKLIGHTER. Mr. Chairman, thank you very much. To the distinguished members of this committee, thank you for the opportunity to appear here today.

I'd also like to thank Senator Akaka, who took time away from chairing the Veterans Affairs Committee to come and introduce me.

My thanks also to President Bush for nominating me for this very important position. Also a special thanks to Secretary Gates for his support.

I'd like to introduce my college sweetheart, who's been my wife for the past 52 years, Betty. She is truly the wind beneath my wings, the toughest critic I have, and also the strongest supporter, the love of my life. I thank Betty also for three wonderful children, one of which is here, two could not be here, but, even more, five even more wonderful grandchildren.

I'd like to also introduce my son, Rick, and his wife, Yvonne, and I know that the other two children and their spouses are here in spirit, as well.

My military career actually began when I was a college student and I enlisted in the Army Reserves while also enrolled in the Reserve Officer Training Program on campus. I spent almost 2 years as an Army reservist, and was honorably discharged as a Sergeant E-5 when I graduated from college and was commissioned a 2nd Lieutenant.

I spent almost 36 years on active duty, and, as I was retiring, I was asked to plan and oversee the commemoration of the 50th anniversary of World War II, and assist our Nation in thanking and honoring the men and women, the Greatest Generation, who saved not only this Nation, but literally saved the world. This led to other jobs in the Departments of State, Defense, and Veterans Affairs, for accumulation of about 15 additional years.

This past December, when I was asked to consider being nominated for this position, which I knew as a very tough position, I was in Afghanistan, leading an assessment team for the Chairman of the Joint Chiefs of Staff. Having been on the ground a number

of times in Iraq and Afghanistan with these magnificent men and women fighting this global war against terrorism, it is impossible for me not to want to do all I can to support this, another great generation of Americans.

If confirmed, I will bring leadership, management skills, and a broad-gauge approach to the Office of the Inspector General. There's no doubt there's much that I have to learn and relearn. But, if confirmed, I look forward to joining the IG family and together will continue to build the IG team that our troops, their families, the DOD, this Congress, and the American people have a right to expect. We will remain independent and objective, and we will keep the Secretary of Defense and Congress fully and currently informed.

Thank you, again, Mr. Chairman and the members of this committee, for giving me the opportunity to appear, and also to respond to your questions.

Chairman LEVIN. Thank you, General.

General Clapper.

**STATEMENT OF LT. GEN. JAMES R. CLAPPER, JR., USAF, (RET.),
TO BE UNDER SECRETARY OF DEFENSE FOR INTELLIGENCE**

General CLAPPER. Chairman Levin, Senator Warner, and distinguished members of the Senate Armed Services Committee, it is, indeed, an honor for me to appear before you today as the nominee to serve as the Under Secretary of Defense for Intelligence.

Being nominated for this position is, for me, an unexpected turn of events. When I left government, at the end of last September, after serving for almost 5 years as Director of NGA, I was convinced that was absolutely the end of my government service. But when Secretary Robert Gates, for whom I have the highest respect, asked if I would be willing to serve again, in this position, I could not say no.

If I can leave one message with you today, it is this. My compelling motivation now is what it has been in every position in which I have served for over 43 years, not to do just what's best for a Service, agency, department, or Intelligence Community, it's do what's best for the Nation.

I regard the position of the Under Secretary of Intelligence in DOD as a sacred trust, particularly now, with so many of our magnificent men and women in uniform in harm's way in Iraq and Afghanistan. I served two combat tours during the Southeast Asian conflict, so I do know what it's like to get shot at, and I understand how intelligence can literally be a matter of life and death.

In the quarter century or so that I have dealt with Congress in various capacities, I've come to believe strongly in the need for congressional oversight particularly over intelligence activities, which, for obvious reasons, cannot be fully transparent to the public at large. That places, I think, an even greater burden on intelligence leaders to ensure that Congress is appropriately informed.

If confirmed, it would be my intention not to merely come to Capitol Hill when summoned, but, rather, to keep you informed and seek out and listen to your advice and counsel.

It's the highest distinction of my professional career to have been asked by Secretary Gates and to have been nominated by President

Bush for this extremely critical position, particularly at this difficult time.

This concludes my statement. I welcome your questions.

Chairman LEVIN. Thank you, General.

Dr. Casscells.

**STATEMENT OF S. WARD CASSCELLS, M.D., TO BE ASSISTANT
SECRETARY OF DEFENSE FOR HEALTH AFFAIRS**

Dr. CASSCELLS. Mr. Chairman, Senator Warner, and distinguished members of the committee, thank you for this opportunity today. I am honored to be here to answer your questions and to learn from you.

This is, for me, the honor of a lifetime, and I take it very seriously, as someone who is just back from the conflict and who lost friends there, and who, himself, was a patient there and a doctor there. So, this position is a position of enormous personal significance to me, and you can be sure that, if confirmed, I will work closely with you. While I have a lot to learn, I will give it everything I have.

Mr. Chairman, if I may take the liberty of introducing these four redheads who mean the world to me, my wife, Roxanne; my son, Sam; my daughter, Lily; and my son, Henry. This will, if we are confirmed, be a big move for us, and they are well aware that this will be a cut in their allowance. So, this is something I thank them for, for their support, and I'd look forward to you—

Chairman LEVIN. They're all shaking their heads, saying that that was not part of the deal. [Laughter.]

We'll have to negotiate that later, but you have all the Senators on your side, kids, on this one.

Dr. CASSCELLS. Thank you, sir.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Doctor, very much.

Mr. Ostendorff.

**STATEMENT OF WILLIAM C. OSTENDORFF, TO BE PRINCIPAL
DEPUTY ADMINISTRATOR, NATIONAL NUCLEAR SECURITY
ADMINISTRATION**

Mr. OSTENDORFF. Mr. Chairman, Senator Warner, and members of the committee, I'm honored to be considered as the President's nominee for the Principal Deputy Administrator of the National Nuclear Security Administration.

I'm grateful to President Bush and to Secretary Bodman for their confidence in me.

I want thank Congressman Everett for his very kind introduction today.

I'd also like to thank my family and introduce my wife, Chris, of 29 years, and my daughter, Becky, who is a law-school student down in Charlottesville. We have two sons who couldn't be here, one who is in college down at William and Mary, and another who is serving as a 2nd lieutenant with the 2nd Stryker Regiment, over in Vilseck, Germany. I also have my in-laws, Pat and Lee Miller, my dear sister-in-law, Karen Fales, and her husband, John, and their sons, Mark and Johnny. I'm very grateful for their support and encouragement over many years.

I'd like to thank this committee for their strong support of the NNSA mission. If confirmed, I'll look forward to working closely with the members of this committee and the staff to carry out the duties and responsibilities of the Principal Deputy Administrator.

I'm excited about the opportunity, if confirmed, to serve in a senior leadership position. The core missions of maintaining the safety and reliability of our nuclear weapons stockpile, providing safe propulsion for our Navy, and of reducing the global danger of weapons of mass destruction are absolutely critical. I am humbled by the importance of the task, and, if confirmed, commit to work tirelessly and professionally to execute these vitally important missions.

I've been privileged to serve my country in the past. Selected by Admiral Hyman Rickover back in 1975 to serve in the Navy's Nuclear Propulsion Program, I served on six submarines, and had the honor of commanding the U.S.S. *Norfolk* and Submarine Squadron 6. I'm confident that my nuclear reactor and nuclear weapons operational background, as well as leadership experience, will serve me well, if confirmed.

My past 3½ years as a counsel and staff director to the Strategic Forces Subcommittee on the House Armed Services Committee has given me the opportunity to work very extensively and closely with this committee and its staff, and has also instilled a deep appreciation for the role of congressional oversight of the executive branch.

The NNSA national security laboratory's and production plant's workforce, both Federal and civilian, comprise a vital national asset, one critical to our future national security. If confirmed, I intend to provide the strong leadership and management required for NNSA to continue to execute its national security missions.

If confirmed, I'll also look forward to working with the members of this committee and its staff. I commit to you communications founded on integrity and responsiveness. I appreciate the opportunity to appear before you today and look forward to your questions.

Chairman LEVIN. Thank you, Mr. Ostendorff.

Again, we want to thank all the families for coming today. We know how important it is that you be here for these nominees. As a father and a grandfather, I particularly know how important it is for the younger kids to be here, what a boost that gives to our nominees.

Let's have an 8-minute round, if that's all right, Senator Warner, for our first round.

Let me start with you, General Kicklighter. The question of the IG's independence is, of course, critically important to Congress, to the Nation, and not just to this committee, by the way; other committees that have responsibility relative to IGs look very closely and intensively at the operations of the IGs to be certain that there's no intrusion on the independence and objectivity of the IGs.

In your response to pre-hearing questions, you stated that, if confirmed, you would fight to maintain the independence of the Office of Inspector General. We asked you a series of questions about the circumstances under which you thought it might be appropriate for senior DOD officials to request that the DOD IG not investigate a particular matter or not issue a report on a particular matter. Your response was that only the Secretary of Defense had the authority

to make such requests to the DOD IG, and that such authority exists only with regard to sensitive matters within the scope of section 8 of the Inspector General Act, and that the authority has never been exercised. Is that your understanding?

General KICKLIGHTER. Yes, Mr. Chairman, that is my understanding.

Chairman LEVIN. You also stated that any such request outside of the authority given to the Secretary of Defense under section 8 would be inappropriate and that you would reject such a request and report it as a "particularly serious or flagrant problem, abuse, or deficiency," under section 5(d) of the Inspector General Act. Is that correct?

General KICKLIGHTER. That is correct, Mr. Chairman.

Chairman LEVIN. Thank you. Is it your understanding that the Secretary's authority under section 8 is personal to the Secretary, and that it cannot be exercised informally by members of the Secretary's staff or anyone else?

General KICKLIGHTER. That is my understanding, Mr. Chairman.

Chairman LEVIN. You also indicated, in response to our pre-hearing questions, that it is appropriate for the IG to consult with officials in DOD before issuing an audit report "to ensure that the information in the report is factually accurate and to resolve or minimize disagreements, where appropriate." Would you agree that that process must be transparent? In other words, that the report in the IG working papers should reflect the comments made by DOD officials and any changes that were made in response to those comments?

General KICKLIGHTER. I would, Mr. Chairman.

Chairman LEVIN. Relative to Walter Reed, deficiencies in housing and administration of injured soldiers, marines at Walter Reed, have focused attention on an overly bureaucratic, adversarial, and confusing physical disability evaluation system in DOD. The officials have testified that they're committed to improving the system to make it easier and fairer to disabled servicemembers. In your view, what role should the DOD IG have in improving the DOD disability evaluation system?

General KICKLIGHTER. Mr. Chairman, I don't have knowledge of what skill sets and staff we have, but I certainly would strive to ensure we have the expertise we need to provide the oversight to ensure that system is working as it should and we're taking care of those wounded men and women coming back off the battlefield. That would certainly be a very high priority.

Chairman LEVIN. Finally, General, at the request of the Armed Services Committee, the Office of Inspector General has provided us with copies of source documents from the IG's review of the DOD-directed investigations of detainee abuse. We've requested source documents from the IG's review of the activities of the Office of Under Secretary of Defense for Policy prior to the war in Iraq. These documents have also been requested by the Select Committee on Intelligence. Will you pass along to the folks from the Department with whom you are now working that the commitment of the acting IG to provide those documents to the committee is important to us? We've, again, asked for these documents, and we

need to know when those documents would be presented to us. Would you ask your coordinator to get us that date?

General KICKLIGHTER. Mr. Chairman, I will certainly pursue that and try to get you that date. If confirmed, I will pursue that as the IG.

[The information referred to follows:]

The requested source documents from the Inspector General's review of the activities of the Office of the Under Secretary of Defense for Policy prior to the war in Iraq were provided to the Senate Select Committee on Intelligence on March 30, 2007. The Acting Inspector General informed staff from the Senate Armed Services Committee of the transfer.

Chairman LEVIN. We hope that those documents are provided immediately.

General KICKLIGHTER. I will certainly proceed down that line, Mr. Chairman.

Chairman LEVIN. Thank you.

General Clapper, under the DOD directives, the Under Secretary of Defense for Intelligence has primary responsibility for DOD intelligence, interrogations, detainee debriefings, and tactical questioning, and serves as the policy advisor to the Secretary of Defense regarding intelligence interrogations. If confirmed, will you ensure that DOD interrogations comply with the requirements of Common Article 3 of the Geneva Conventions, the Detainee Treatment Act, and the Army Field Manual?

General CLAPPER. Absolutely. Yes, sir, Mr. Chairman.

Chairman LEVIN. Thank you.

The Under Secretary is responsible for overseeing the production of substantive intelligence, on the one hand, and for ensuring that detainees are treated humanely, on the other hand. Is it right that we put both jobs in the hands of one official, or would it be better, in your view, to split them, for example, by having the Under Secretary for Policy to be responsible for policy regarding detainees?

General CLAPPER. Mr. Chairman, I actually haven't considered that. I just think that though it would be difficult to split that oversight responsibility, since the two are so inextricably bound, so I guess my going-in position right now, sir, this would be my personal view, is that should remain the province of the Under Secretary of Defense for Intelligence.

Chairman LEVIN. Thank you.

General, in your answers to the committee's advance questions, you indicated that you thought a major challenge in the Intelligence Community is to "clarify roles and responsibilities in clandestine activities." Can you explain what you meant by that?

General CLAPPER. Sir, for my own part, I think it is essential that there be clarity between covert operations, which is a term that is statutorily defined, has a specific purpose, to elicit change in the political, economic, military, or diplomatic behavior of a target. In that context, covert activities are normally not conducted, I don't believe, by uniformed military forces.

As contrasted with clandestine activities, at least in my mind, the important distinction is that which is passive intelligence-collection, information-gathering, no matter how—which may be conducted, albeit true, under very risky, hazardous conditions. Of course, there is the connection between when you are doing clan-

destine collection as an enabler, in support of a covert activity. I believe that, to the maximum extent possible, there needs to be a line drawn from an oversight perspective, as well as a risk perspective. The important consideration here is whether if such an activity is revealed inadvertently, or an adversary nation, in which such an activity is being conducted, discovers it, that, in the case of military forces, the Government would have the option of acknowledging that, which then entitles those military forces proper treatment under Geneva Conventions, et cetera; whereas, that is not the case with covert activity as statutorily defined. That's why I think there's a distinction between activities conducted by DOD and the Central Intelligence Agency (CIA).

Chairman LEVIN. Just to conclude that point, since my time is up, the Department has been ambiguous, at times—or ambivalent, at times—about how military personnel, who might be captured conducting clandestine operations, would be treated, and whether their military status would be acknowledged. You indicated there is an option of acknowledging them. My question, I guess, would be this. Should it generally not be the policy to acknowledge the status of military personnel in such a situation? Should that not be the going-in assumption?

General CLAPPER. Sir, obviously, you would prefer that—I'm speaking theoretically here, or hypothetically—the particular operation would not be revealed; but, if it is, I personally think it's better that you be in a position, and be prepared to, and have planned for, acknowledging the operation if it involves military personnel, the expectation is that they could be accorded treatment in accordance with the Geneva Convention. If you don't do that, then you put them in jeopardy for not being accorded those privileges.

Chairman LEVIN. It is the expectation of our military personnel, is it not, that they will have those protections if, in fact, they are captured or detained?

General CLAPPER. Yes, sir, I believe so.

Chairman LEVIN. Thank you.

Senator Warner.

Senator WARNER. Thank you.

I'll yield to Senator Inhofe, and then I'll be here for the balance of the hearing.

Chairman LEVIN. Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman, and thank you, Senator Warner. We're working on the other committee that you and I are privileged to serve on today, so I have to do some of those duties.

Let me start with you, General Clapper. When you first came into my office, I could tell I hit a sensitive note when I told you that, for so many years, I've been, in both the House and the Senate, concerned about the process for getting security clearances. We've seen the Government Accountability Office (GAO) reports that talk about this, and so, it's like a lot of things in this system here in Washington. We all know it's wrong, we all know it doesn't work, we all know it's antiquated, we all know that there are new technologies that can be used, and we all express our concern, and then nothing's done. Is something going to be done?

General CLAPPER. Sir, it's certainly my intent, in the time that I have—if I'm confirmed, I would have remaining to do something about a system that is an anachronism.

Senator INHOFE. Yes.

General CLAPPER. We basically do security clearances the same way we've done it since I first came in this business, 40-plus years ago. Having recently gone through this once again for this confirmation process—and I know I've spoken with Director McConnell about this; he feels the same way, having endured the same process—we absolutely have to do something to change direction.

Senator INHOFE. Yes.

General CLAPPER. I believe there is great potential in researching the social sciences for determining other ways of gauging the trustworthiness—and that's really what this is about—the trustworthiness and reliability of people, other than pounding on people's doors. I think if I am confirmed and I have the wherewithal to do that, I'd like to pursue research for that.

In the meantime, the position of the Under Secretary of Defense for Intelligence does oversee the Defense Security Service, which clearly has management challenges of longstanding. It's been explained to me, I think they have a good strategy for trying to get well, but it's going to take money and attention.

Senator INHOFE. Yes, this is the information age. There are so many things that are automated. I can't imagine anything, as you said, not changing in 40 years. So, what I would request of you—and you and I talked about this—there are a lot of technologies out there I'd like to have you exposed to, and I think you already have been, to some of them. But maybe in another, oh, let's say, a couple of months, if we could have a conversation about this to see if there's any progress being made—is that reasonable? We could kind of stay on top of this?

General CLAPPER. Absolutely, sir. I'd be pleased to do that, sir.

Senator INHOFE. Good. Good.

General CLAPPER. I appreciate your interest.

Senator INHOFE. All right. Good, thank you.

Mr. Ostendorff, you have a tough job ahead. I've been concerned about keeping the secrets—I was quite outspoken, back during the 1990s, when the energy labs were just opened up. They did away with color-coded badges because they said, "Well, that's demeaning to people with a lesser clearance than others might have." Background checks, wire-tapping, all these things, I just want no holds barred. I want to have security. I just want to know if you have any new ideas on implementing any new systems where we can keep our information secure.

Mr. OSTENDORFF. Senator, I'm aware, as I know you are, of the recent events at Los Alamos National Laboratory, associated with the loss of classified material.

Senator INHOFE. That's specifically what I had in mind.

Mr. OSTENDORFF. Yes, sir. There have been several investigations by the Department of Energy IG and by other independent bodies, looking at those security practices, procedures, and compliance culture. I would commit, if confirmed, to taking a hard look at what is the Federal oversight force at the site doing to ensure that the security standards are being met, that there are rigorous

processes that are being followed, and would come back to the committee, and yourself, and provide you with feedback from that review.

Senator INHOFE. That's good.

General Kicklighter, I have the greatest respect for Senator Akaka, but he dropped the ball in his introduction of you, and forgot to mention the most significant thing, and that is the fact that you were destined for greatness when you started your career at Fort Sill, OK.

General KICKLIGHTER. Yes, sir.

Senator INHOFE. In your new relationship, I think you will be inundated with requests, not just, as the chairman said, you'll be getting from the Secretary, but also Members are going to have requests. I would hope that you would keep in mind and evaluate these as they come in, because sometimes you'll get legitimate requests, sometimes they'll be politically inspired requests. I think you're the person who can make those determinations and keep that in mind.

General KICKLIGHTER. Yes, sir, I certainly will.

Senator INHOFE. Good. Good.

Dr. Casscells, four redheads. I can't believe that. [Laughter.]

That's great. I understand that when you were over there, you were injured, so you kind of went through the process. We've all watched the television series M*A*S*H over the years. How similar was that to your experience?

Dr. CASSCELLS. Senator Inhofe, I wasn't badly injured. It was a small injury, but it was just enough to get me into the system as a patient. We were coming back from visiting an Iraqi hospital, and the convoy had to swerve because of a tripwire in the road to avoid an improvised explosive device (IED). We went up on the curb, and I was thrown into the side of the Humvee and got a bloody elbow that got infected. I had that drained at the 10th Combat Support Hospital (CSH) in Baghdad. It gave me an interesting insight, because, as the major was draining my elbow, an Army captain who was a nurse came in and said, "Heads-up, everybody, we have three birds coming in with about six Iraqi victims, bad IEDs. Everybody who hasn't given blood lately, roll up your sleeves." Even though I was the senior health policy guy for the country, I didn't realize that all the Iraqi blood transfusions came from our soldier volunteers. Then she caught sight of me and said to the major, "What's that colonel doing here? Get him out in the hall. I need that bed." [Laughter.]

Senator INHOFE. I think that answers the question.

Dr. CASSCELLS. But then, when I got back, I did face the bureaucracy that has been in the news lately, and that is very frustrating. If it's frustrating for a colonel, you can imagine how frustrating it is for a sergeant or corporal, particularly if they've had a head injury or their family is 1,000 miles away and can't be advocates for them. So, sir, we have to fix that and make it fair and fast.

Senator INHOFE. Yes. One of your biggest problems is going to be that you probably won't have the resources that you think are really necessary to get this done. You're going to have to be very inno-

vative. It's going to be difficult to take care of all the needs. But I know, with your background, you'll do a great job.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Inhofe.

Senator INHOFE. Thank you, Senator Warner.

Chairman LEVIN. Senator McCaskill.

Senator MCCASKILL. Thank you, Mr. Chairman.

I want to speak to the new IG for probably most of my time. I have been trying to get a handle on the number of people that we currently employ in DOD to look over the shoulders of the way we're spending our money in DOD. I'm wondering if you have any idea of the total number of employees that are currently on the payroll in all of the auditing and investigation different parts of DOD.

General KICKLIGHTER. Senator, I do not have that data. I've certainly looked at the numbers that they have in the IG's office, but that's only a small portion of the numbers that go all across DOD. If I am confirmed as the IG, I would certainly dig into that for you and report back to you what those numbers are and what I think we may be getting as a return on our investment.

Senator MCCASKILL. I think it's close to 20,000 people, from best I can tell. That's a lot of people—20,000 people. Now, the interesting thing about it is, the organization chart is not pretty. You have the IG's office, which you, of course, will head; then you have defense contracting; then you have the IGs in each of the Services.

General KICKLIGHTER. Right.

Senator MCCASKILL. In each of those instances, there are performance audits being done, with the exception of the Defense Communications Agency (DCA). There are not performance audits there. Of course, understanding that performance audits—if any part of auditing could be called exciting, it's performance auditing; and I'm kind of one those weirdos that thinks it's all exciting. But the number of performance audits that are done—one of my concerns is, who's consuming these products? Could you tell me your view on—you've been in the military a long time—how many IG reports have you read since you have been in the military?

General KICKLIGHTER. I can tell you that each time I was in a command position or a management position and the IG wrote a report, I read it very carefully. I think, generally speaking, that the IG reports are considered very seriously at very high levels. I would hope that's true. I certainly would look into that.

Senator MCCASKILL. I'm curious about the audit products from the other IGs, because I think they would, obviously, be instructive, regardless of which Service you're in. I'm wondering who consumes those, the ones that are produced by the IG in the Army, the IG in the Marine Corps, the IG in the Navy, and the IG in the Air Force.

General KICKLIGHTER. I am certainly not an expert in that arena right now, but I think one of the responsibilities of the DOD IG's office is to provide oversight for all of the audits, to make sure that, to the extent possible, you're not duplicating and overlapping, and, also, you're not leaving a lot of gaps out there that nobody's looking at. So, what I believe you have to do—and I certainly have a lot to learn in this arena, and I know you know an awful lot in this

area—is that we have to look at that to make sure it is an integrated effort and we are using that data, to the best of our ability and not wasting resources.

Senator MCCASKILL. I have looked into how many Antideficiency Act (ADA) violations have actually been punished in DOD, and the ADA obviously is just one of the tools, but a very important tool to get in contracting abuses as it relates to spending money you shouldn't be spending, spending it in ways you're not supposed to be spending it, and spending it when you're not supposed to be spending it.

General KICKLIGHTER. It is very important.

In fiscal year 2005, there were seven ADA violations that resulted in punishment. Seven. Billions and billions and billions of dollars and 20,000 auditors and investigators, and we got 7 cases that resulted in punishment. In fiscal year 2006, there were nine.

Now, part of the problem here is, of course, that the military wants what they want when they want it, and, for all the right reasons, they believe the purposes for which they want it is noble. I can't imagine the amount of money we're spending looking into ADA violations, because when you look at the process by which these are looked into, it involves hundreds of people. I mean, first somebody has to look at it, and then somebody else looks at it, and then somebody else looks at it, and then there's an opportunity to correct it. If the money is there—this is what I think a lot of people don't understand, that the ADA violations, when it's discovered, if you can go back and find the money that is appropriate to spend on that, it's like "no harm, no foul." It's as if you didn't do anything wrong. Now, that's not exactly how we deter behavior.

I'd like your view on how we get accountability. I mean, DOD has been on the high-risk list for GAO since 1990. There's a sense that everybody kind of throws up their hands and says we're not going to do any better, this is just the way it is. I'd like your commitment today. There's the realization that in government you don't have bottom-line pressure, it's not as if there is an issue of profit or not-profit. That's the discipline in the private sector. In government, the discipline is the rules and whether or not people are held accountable. I would like your view on this ADA process and how in the world we are ever going to deter behavior if we are coming up with fewer than 10 people a year that are punished for violating that law.

General KICKLIGHTER. Senator, let me respond to that. I certainly agree with your comments.

I really don't feel qualified to give you an answer today, but I'd like to get back to you on the antideficiency violation. I think the things that you pointed out that are occurring internally, I think the fact that we are doing so many things with other Federal agencies, also have problems with antideficiency violations when we're exchanging funds between Federal agencies.

Senator MCCASKILL. Right. Interagency contracts. That's a whole problem.

General KICKLIGHTER. Yes. But if you would allow me—if confirmed, I would very much like to look into this in great detail, because I think your points are extremely valuable, and I'd like permission to come back and report back to you on this.

Senator McCASKILL. That would be great. Thank you very much.

Doctor, I certainly am impressed with your background and your experience. I'm wondering how you feel about going into a job where your primary frustration isn't going to be your skill as a doctor; your primary frustration is going to be how you begin to get a handle on a system where things are so complicated. I will tell you that one of the soldiers I talked to at Walter Reed, his narrative summary, which, as you are aware, is very important to these soldiers that have been wounded, because it really sets almost in stone, how they're going to be treated, then, whether they'll remain on active duty or whether they're going to be retired, militarily, or whether they're going to be transitioned to VA. It took his narrative summary 2½ weeks to go across the hall after the doctor had done it—literally 2½ weeks, literally across the hall. I would like your view on what kind of tenacity do you bring to this, in terms of arm-wrestling the reality that these systems have become so bogged down with paper. There is technology, by the way, that's other places in the military where a soldier can pull up his record on any computer in the world, but the medical part, the part that really is causing the stress in these soldiers' families about how they're going to be treated the rest of their lives. It's very difficult for them to get information in a way that would reflect the fact that we're in 2007.

Dr. CASSCELLS. Senator McCaskill, your points are very well taken, and I have a major awareness that I will need a lot of help, including this committee's help, in getting things done that actually cut outside the lane of the Assistant Secretary of Defense for Health, because these problems do involve a very inefficient and, to some extent, unfair disability determination system, a very complex health care system that has numerous controversial issues in it. The latter, I am more comfortable with.

I will say that the directions that Dr. Winkenwerder has been heading and pushing for an electronic medical record, numerous efforts to improve efficiency and accountability, are things that I would, if confirmed, naturally want to accelerate, if that can be done. I don't know whether they're at top speed or not. I do know that when I was in Iraq, it amused me to look up my record on Army Knowledge Online, one of our Web sites, and to find that my deployment status was amber, which means I was not fit to be deployed, and yet, there I was. So, clearly there are issues like that. We have primarily a paper record. There are errors in paper records. There are so many questions that are being addressed now by these various task forces and hearings that are going on that one would want to wait and study them carefully, if confirmed, because, to date, I just know what I've read in the papers. I've driven by the Armed Forces Retirement Home, walked around there, same with Building 18. I've called the Soldier Hotline, the 800 Hotline. It's clear that the military is taking this very seriously. I've read the President's statement, and Secretary Gates and Acting Army Secretary Pete Geren, and it sounds like there's a lot of support for improving things to take a system which is very good and make it absolutely superb.

Senator McCASKILL. Thank you all for your service. I appreciate it very much.

Dr. CASSCELLS. Thank you, ma'am.

Chairman LEVIN. Thank you, Senator McCaskill.

Just on that one point of interagency contracts, talking to my staff back here, we, back in the early 1990s, with a little subcommittee over at what was then called the Governmental Affairs, now the Homeland Security and Governmental Affairs Committee, got into what we then called "offloading," which is the same thing as "interagency contracts." The best estimate we can get is that there's probably 10 to 20 times more money funneled through those contracts now, minimally, than was then. There's been legislation that's been adopted to try to stop it. We're going to review more legislation. I think there's been two hearings now, in a subcommittee of this committee, on these interagency contracts. The opportunity for abuse is real, there's no accountability, there's very little oversight, and there's no competition, frequently. But Senator McCaskill's interest and passion in this area is going to help us get over the goal line. We very much thank you for your interest in these issues which are very dry sometimes. It's very few Senators, frankly, that are willing to really sink their teeth into these issues; and so, your willingness to do so with such gusto, I must tell you, is really a terrific boost.

Senator MCCASKILL. You should know, Mr. Chairman, I visited the temporary building, the Army Materiel Command at Fort Belvoir, yesterday, so I'll be anxious to share with you how temporary it felt. It was the one that's 230,000 square feet.

Chairman LEVIN. Thank you, Senator.

Senator MCCASKILL. You're welcome.

Chairman LEVIN. Senator Warner.

Senator WARNER. Thank you, Mr. Chairman.

To follow on our distinguished colleague's questions to Dr. Casscells, you mentioned his primary management skills would be heavy, but, in my conversations with the good doctor, he assured me that he's going to do a little hands-on medicine while he's in this position, not unlike our distinguished former majority leader, Bill Frist, would intermittently leave the Senate, put the frustration of the Senate behind him, and go out and do heart operations. I always admired him for that.

I hope that these management burdens—you'll handle it, but, at the same time, keep your skills up, and a little hands-on medicine, I think, is good for the heart and the soul, and to show the troops that you still know how to do it.

The TRICARE program, something that this committee has taken great pride in—and you noted in one of your replies to the committee's advance questions, that one of the TRICARE strengths is that it is very inexpensive for the beneficiary, compared to other health care plans. "This statement may well be inconsistent with the views of senior leaders in the Department who have described TRICARE as unsustainable in its present form." So, therein rests a challenge for you to sort that out. I don't presume, at this point in time, that you can give us a great deal of insight into how you would treat TRICARE, but it's viewed by the men and women of the Armed Forces and their families as a very essential part of the contract America makes with these families when they undertake

their role in the military. So, I hope you give us your assurances you'll do the best you can to strengthen that program.

Dr. CASSCELLS. Yes, sir. Senator Warner, I share your concern. If I understand you correctly, sir, that increasing copays and deductibles, particularly at this time, run the risk of making it harder for us to recruit and retain the very best, because people value enormously the health care given in the military. They are willing to sleep in tents, on cots, they don't demand the writs, but they would like, and deserve, the very best medical care. This is true for their families, and their budgets are lean. I know that the copays and the deductibles have been flat for 12 or 13 years, and there's understandable interest in raising them, because the private sector is raising theirs, to decrease utilization. But, sir, there are other efficiencies which can be sought. As Dr. Winkenwerder has told this committee, and told us, as soldiers, the more we get involved in our care, taking ownership of our care as patients, the more we utilize electronic records, the more we utilize disease management tools, Web-based discussion groups, confidential chat groups, the more people help themselves and help each other—these are often low-cost opportunities for savings and health.

Finally, sir, I think, as part of our pay-for-performance, we need to include pay-for-prevention. It has to be possible to incentivize people better to engage in prevention for themselves and to incentivize caregivers.

Senator WARNER. I think that's a point well taken.

Moving on to another mission—and maybe you haven't really had this brought to your attention fully, but the recruiting and retention of doctors, nurses, dentists, and other health care professionals is a source of great concern, and we must keep the best and the finest in the ranks of the uniform; at the same time, acquire, where necessary, civilians to work under a contract arrangement in our medical system. As one of the heads of personnel put it, we are failing in these areas right now. I hope that you can put this as one of your top priorities. You have an impressive career in the civilian sector, and a strong basis of knowledge about military medicine, and you have to go out and get the finest and the brightest to keep the ranks filled.

In that context, two things. We, here in Congress, years ago—as a matter of fact, I was in DOD when the very eminent Deputy Secretary of Defense, David Packard, had the idea to establish our own medical college. That's been done, the Uniformed Services University of the Health Care Sciences. That came under scrutiny here recently in the BRAC process. A number of us really went to bat and dissuaded the BRAC Commission from discontinuing that. It has provided an extraordinary number of very capable individuals, and they not only fulfill their initial obligation, which they serve to pay back the Federal Government and the taxpayer for their education, but they continue on, and they have a very high percentage of those physicians and others being trained becoming careerists in the military. I would hope you'd take a good look at that.

If I might say, we are fortunate here in Congress to have a very able retired submariner, now an admiral in the medical corps, Dr. Eisold, who's our physician, and he cares for all of us and disciplines all of us pretty well, I might add. He's tough. But he's

often come to me, particularly when I was chairman of this committee for 6 years, and addressed questions regarding the medical fraternity throughout the Services, was a helpful advisor to me. I would hope you'd find the opportunity to meet him—I'd be happy to arrange that—just to draw on his many years of experience in military medicine, and, having come from the ranks of a submariner before he took his medical training, he actually was in the Navy, then took his training as a doctor, and then went into the medical sciences of the military, and now cares for us here. He really is an extraordinary individual.

I was going to suggest, also, that you focus on the question of the Gulf war illnesses. That frequently comes before this committee, illnesses that could have been associated with service in those areas of responsibilities during that period of time.

So, I'll conclude my questions. I wish you well. I think you're eminently qualified, and I know that you'll do a splendid job, together with your family.

To you, Mr. Ostendorff, I thank you for your service. I want to start off with the question of the nuclear stockpile. That's a program that this committee has worked on for years and years. It's to go back and assess what is the status of the stockpile today, its availability in the time, should it—hopefully never be needed—but, if it were needed, we need to know whether that stockpile can meet the contingency required. How familiar are you with the program?

Mr. OSTENDORFF. I'm fairly familiar, Senator, based on my experience with the oversight committee.

Senator WARNER. So, you full well know Congress's concern.

Mr. OSTENDORFF. Yes, sir.

Senator WARNER. I'm anxious to continue to support that program, and the tremendous amount of money, billions of dollars we've invested in it. But, in the absence of actual testing—and I support the absence of actual testing—and, therefore, this is the alternative, to determine the viability and capability of the stockpile. Do you have any particular thoughts you want to share with the committee at this time?

Mr. OSTENDORFF. Senator Warner, in the context of that question, I think the ongoing Stockpile Stewardship Program run by NNSA that has its life-extension programs to look at the surveillance of aging effects on existing weapons that, in some cases, have been around for 30 years or more, that those ongoing research and development efforts are crucial, not just to maintaining the existing stockpile, but to other efforts, to learn more about materials in the context of some proposals for the Reliable Replacement Warhead (RRW) Program. It's all part of one integrated program.

Senator WARNER. Let's go to that very point, the RRW. Earlier this month, the Nuclear Weapons Council, a joint body of the Departments of Defense and Energy, announced the selection of a design team for a possible replacement warhead. This RRW would, if developed, replace a portion of the Nation's seabased nuclear weapons. Based on your knowledge of the program to this point, do you believe it will be possible to develop and field a replacement warhead without requiring underground nuclear testing?

Mr. OSTENDORFF. Yes, sir. I have been a participant, along with some of the staff who are behind you, in a number of briefings by

NNSA, including the laboratory directors at Los Alamos, Lawrence Livermore Laboratory, and Sandia. We have received very strong technical assurances that the RRW design selected earlier this month can be pursued without the need to resume underground nuclear testing. The various tools in the Stockpile Stewardship campaign are viewed as being robust and sufficient to the task to make sure that that can proceed. Next year, there'll be a design, definition, and cost study. Of course, any future plans to actually build an RRW weapon would require congressional authorization in a future budget.

Senator WARNER. I thank you. I wish you well.

General Kicklighter, in my opening statement, I expressed to you some of my concerns. You answered it, in terms of the independence that you must have to successfully operate. I would, however, draw your attention to this tragic case of Corporal Pat Tillman, which was just handled, but only from the context that—how long it took the IG to do this. We had another case here—it was a pressing case of the Air Force Academy, and certain questions regarding, unfortunately, a multitude of issues. Hopefully, the Academy's on a straight and true course now, but, for a while, it was in stormy seas. I would hope that you'd feel free—and, really, I ask that you come back before the committee, at least inform the staff, in about 90 days—do you have enough resources to operate that office as you see appropriate?

General KICKLIGHTER. Senator Warner, I certainly will be glad to do that. In fact, my intention is to, if confirmed, take a look at the mission resources available, and see what's really needed in the way of structure and staff. I certainly will be back to this staff and to this committee within 90 days with my findings and recommendations.

Senator WARNER. All right.

General Clapper, I've also covered—and others—most of the questions that were of concern to me, but I want to bring one to your attention, because I, fortunately, with other members of the committee, have spent a lot of time here in these many years working on unmanned vehicles. As a matter of fact, I think it was 8 or 10, 12 years ago, I challenged the private sector and the forces to each of them to get up to a certain percentage of unmanned vehicles into their system. Now, there's a lot of programs out there right now and, that's fortunate. A lot of these programs are being developed jointly. I would ask that you look at this Unmanned Aerial Vehicle Program, because it is an intelligence-gathering system, and come back to the committee if you feel that there's just too much duplication and effort out there, and other areas where we have a shortfall. Do you have any particular points you'd like to add about the unmanned vehicles here this morning?

General CLAPPER. Other than to say, sir, that, from my NGA experience, I think it has a tremendous potential, and I think I share your concern about management, proliferation, overlap, and duplication. I would commit to you to look into that, sir, if confirmed.

Senator WARNER. Thank you, General. Also, through the years, and particularly once Congress put in a new framework of laws about our intelligence system—both Senator Levin and I have had years of experience on the Senate Select Committee on Intelligence,

and we were part of drawing up those laws—there's still a process to bring DOD into conformity with—I'm not suggesting they're in violation now—but still, to bring it into conformity with the overall goals of trying to establish a system which comes up under the National Director for Intelligence. But I feel very strongly—I just say for myself, at this point in time—historically, the military have had their own responsibility to develop that intelligence, primarily tactical, which they need for daily operations of those forces. In this push, pull, and reorganization, we've done our best to preserve that. But that's something I want you to keep a watchful eye on and make certain that it does not fall below that level, drawing on your extensive experience, that these operational commanders demand, and must have, to effectively handle the missions that they are assigned. Do you have a view on that?

General CLAPPER. Senator Warner, I think you're exactly on target to raise that issue. It is a concern. Having served in combat at the tactical level, having served as a J-2 three times, having served as service intelligence chief once, and having served as the director of a national agency embedded in DOD, as well as the Defense Intelligence Agency, I think I have some background and experience to examine all dimensions of that issue.

When it comes down to it, it's a balance that has to be struck between the competing fiefdoms, if you will. But I share your perception on that.

Senator WARNER. Welcome to the arena, and fight hard for your troops.

General CLAPPER. I will, sir. Thank you.

Senator WARNER. Because balance is fine, but, if there's a tilt, tilt a little towards the troops.

General CLAPPER. Sir, there is absolutely no—

Senator WARNER. You don't have to answer that question. [Laughter.]

General CLAPPER. Okay, sir. No ambiguity about that.

Senator WARNER. Yes, no ambiguity about that.

Mr. Chairman, I think that concludes all the questions that I would have for this distinguished panel of witnesses. What an extraordinarily well-qualified group of nominees. I think the President and his team are to be congratulated on that.

I wish each of you well. It's a challenge. Many of you have been before this committee and other committees of Congress to accept positions, but this is a new chapter in your life, and that of your families, and I wish you well.

Thank you very much.

Chairman LEVIN. Thank you, Senator Warner.

Let me ask you, first, General Clapper, about the Counter-Intelligence Field Activity (CIFA). There's been a suggestion, I think, in last week's Newsweek, that there's a review going on of the activities of CIFA, out of concern about CIFA's collection and retention of information about U.S. citizens. Also, it's heavy reliance on contractors. This was the question of Talon, and this is the question of the database being maintained with names and information, improperly. Do you believe that CIFA itself should be engaged in counterintelligence collection and analysis, or should it be focused on coordinating the activities of the military Services?

General CLAPPER. Sir, my inclination is probably the latter, more of an overseer, coordinator, orchestrator, if you will, of counterintelligence activities. There may be cases where DOD departmental equities and security facilities or people are in jeopardy and where the CIFA would have to play a lead role. With respect to the Talon database program, that's something I have had the opportunity to delve into, and there's no question that there were, in the initial creation of that database, which was sort of a neighborhood-watch sort of thing, of some 13,000 records, approximately 186 of them involved reporting on U.S. citizens principally demonstrating against recruiting stations or educational institutions in support of the military. Since about July 2005, it's my impression that CIFA has cleansed the database of those records. They are in retention in a general counsel repository, for oversight purposes. Since that time, there have been mechanisms in place to preclude the inclusion of such data.

It would be my intent, sir, if I'm confirmed, though, to look at whether the candle's worth the flame here, to see whether the output of this database is really worth having it and if some other arrangement could be made to capture the data that's important for DOD equities.

Chairman LEVIN. Would you let us know about that? Because there's been some abuses and excesses here, which is troubling to many of us.

General CLAPPER. I will, sir.

[The information referred to follows:]

Sir, my sense of the Talon database issue, albeit without the advantage of being fully immersed in the details, is that OUSDI and CIFA leaders have taken appropriate steps to both cleanse the database and prevent recurrence of similar problems. Nonetheless, if confirmed, I will get back to you and the committee with a more informed read of whether the database provides value-added, Mr. Chairman.

Chairman LEVIN. Thank you.

General, your predecessor pledged to the committee to refrain from getting involved in the substance of intelligence, the production and the analysis of substantive intelligence. What Dr. Cambone said is that he saw the role that he was occupying as one of policymaking and providing resources for intelligence components. Do you agree with that?

General CLAPPER. Yes, sir, I do. In general terms, I think that the position of the Under Secretary of Defense for Intelligence, and, for that matter, his predecessor form, Assistant Secretary of Defense for Command, Control, Communications, and Intelligence, should play an important resource and policy and oversight role, but should not engage in substantive analysis issues.

Chairman LEVIN. Now, in response to the committee's advance questions, you gave us the answer to this, but I want you to do this again for the record, if you would. Give us your view on the propriety of nonintelligence organizations engaging in intelligence analysis.

General CLAPPER. Sir, I agree with the commentary that Secretary Gates made about this, that intelligence analysis, particularly in an all-source context, should be done, conducted by those organizations, institutions, officially charged with doing so; meaning, in our case, for example, the Defense Intelligence Agency or

CIA. I think special analytic cells that are established for one reason or another, I think they bear watching, scrutiny. In prior incumbencies, I've encountered those kinds of efforts, and if I were the responsible intelligence official, I would want to engage with them to determine what the purpose was and what it is that was not being satisfied by the established intelligence institutions.

Chairman LEVIN. Should the established intelligence institutions be aware if and when such a cell is created?

General CLAPPER. Yes, sir. Absolutely.

Chairman LEVIN. Aware of their activity so that they can comment, in turn, on those activities?

General CLAPPER. Exactly, sir. I would also like to add, sir, if I may, that, at the same time, we have questionable intelligence activities, and there are also, I think, valid red-teaming and this sort of thing. I think it's entirely appropriate and necessary, for that matter, that policymakers, commanders, whomever, question, probe, push back from intelligence. That is certainly a legitimate, appropriate, and necessary activity. To a certain extent, there's judgment here involved in and it's kind of like pornography, you know it when you see it. So, you have to be very vigilant as to the existence and purpose of such activities.

Chairman LEVIN. When such activities exist, should they be open, transparent to the folks that they are red-teaming?

General CLAPPER. Absolutely, sir. Absolutely.

Chairman LEVIN. Okay, thank you.

Dr. Casscells, let me ask you about the conversion of military medical billets to civilian positions. In a briefing to the committee staff last week, General Gale Pollock, the Acting Surgeon General of the Army, and Major General Eric Schoomaker, who's the new Walter Reed commander, said that they believe we've gone too far in converting military medical billets to civilian positions and that they're unable to hire or contract civilians to fill converted positions in a timely manner. General Pollock said that she would request relief from the continuing requirements to convert military positions to civilian positions, and I'm wondering, what are your views regarding conversion of medically-related billets?

Dr. CASSCELLS. Mr. Chairman, I have not had a chance to talk to General Schoomaker or General Pollock, but I'm aware of the general issue, and it's a critical one now, because so many providers—nurses, doctors, therapists, psychologists—have been deployed overseas, so the backfill issue is on everyone's mind. It seems that there are not quite enough in some specialties to backfill from the Reserves, and there has been a strong interest, of course, in converting some billets to civilian status in order to accept volunteers, for example, from the public health service or from the private world. I've been contacted by a number of private doctors who want to serve, asking if they have the right training and are the right age and so forth. That's something that, if confirmed, I would want to look into very closely. But I would certainly not want to see critical specialties contracted completely to the private sector, because if you contract all your neurosurgery to the private sector, then when you have a head-injured soldier, sailor, airman, or marine, you won't have a neurosurgeon. We had only one neurosurgeon in Baghdad at the 10th CSH, a person who was well trained, but that

person's on call 24/7. So, there are some billets, both in the continental United States and overseas, that we struggle to fill, and the combination of attention by me to recruitment, I think, to get some docs like me to sign up in mid-career, as well as judicious use of assistance offered from public health service and the private practice of medicine and nursing, these should enable us to provide these critical services.

So, there is a balance. Sir, if confirmed, I will look at that very closely and be honored to work with you on it.

Chairman LEVIN. Thank you. You made reference to electronic medical records, and I'm wondering whether you could give us some idea as to how you would accelerate the effective implementation of a DOD electronic medical records system.

Dr. CASSCELLS. Mr. Chairman, I haven't been in a management role with these records, but I have used electronic medical records for some 20 years. I've seen them evolve with painful slowness, first at Mass General Hospital and Beth Israel Hospital in Boston, at NIH, and Harvard Community Health Plan. Everywhere I've worked, we have struggled to implement these records, making them more user-friendly, providing incentives for doctors to use them, and the like. The same, of course, applies to nurses, psychologists, and other medical professionals. So, there is no easy answer to this, but I am heartened by the fact that DOD and the Veterans Administration recently signed an agreement—I think it was in January—to create a single in-patient medical record, which would not just be an interoperable seamless transition of two records, but would be one record.

There is a lot of commitment to this, a lot of dollars that have been spent. It's been a little frustrating to all the clinicians. I do know that Armed Forces Longitudinal Technology Application is our showpiece right now in DOD health care. There are plenty of providers who find it a little bit slow and difficult to use. These are motivated, computer-savvy young doctors, nurses, therapists, and so forth. So, we need to do more to make this more user-friendly and provide better incentives, sir.

Thank you.

Chairman LEVIN. Doctor, there's a recent report that injured soldiers from the 3rd Infantry Division were sent to the training center at Fort Irwin, even though their injuries prevented them from participating in training, and, in some cases, prevented them from receiving prescribed physical therapy. The article quotes military experts as saying that they suspect that the deployment to Fort Irwin of injured soldiers was an effort to pump up the manpower statistics used to show readiness of Army units. During the Army posture hearing recently, we asked Acting Secretary Geren and General Schoomaker to look into similar allegations about the 3rd Infantry Division changing medical profiles of soldiers so that they could be deployed to Iraq. Both Secretary Geren and General Schoomaker testified it would be improper to change a profile for the purpose of making the soldier deployable. Do you agree that it is improper to change a medical profile for the purpose of making a servicemember deployable?

Dr. CASSCELLS. Yes, sir, I certainly agree. While I'm not familiar with the reports you've gotten concerning Fort Irwin and Fort Ord,

I do know that we've had many soldiers who have asked to be deployed, despite a profile. They've really asked that it be set aside and that there be a waiver so that they could be deployed. That's quite a different thing from changing a profile and basically forcing a soldier to duty. I would look very seriously at that.

Chairman LEVIN. Okay. We'll look forward to your very thoroughly checking this out, because it would be very disturbing if, in fact, it's being done for that reason.

General Kicklighter, if you are confirmed as the IG, will you ensure that these allegations, now from two different sources, are thoroughly investigated by either the Army or by your office?

General KICKLIGHTER. Mr. Chairman, I will assure you that will be the case.

Chairman LEVIN. Thank you.

Mr. Ostendorff, the NNSA has started a review of the nuclear weapons complex—I think you've made reference to this already—to determine the complex's future—"the future" being defined as 2030. Are you going to be involved in making decisions with respect to the complex of the future? Is it your understanding that you would be involved in that?

Mr. OSTENDORFF. Chairman Levin, it's my understanding that, if I am confirmed, I would be involved in assisting the Administrator in those decisions, yes, sir.

Chairman LEVIN. Would you agree that the following elements are necessary to make decisions with respect to that complex of the future? I'm going to read them all at once, and then you can tell me if there's any that you don't believe are necessary. The anticipated size of the nuclear weapons stockpile, both deployed and non-deployed warheads; the number of different types of weapons in the stockpile; whether a RRW is feasible; if the RRW is feasible, what percentage of the stockpile will be comprised of those warheads, and what of conventional warheads; and what quantity of fissile materials would be required to support the stockpile in 2030? Would they all be needed to be considered?

Mr. OSTENDORFF. Yes, sir.

Chairman LEVIN. The NNSA has announced that it will make a decision on the future nuclear weapons complex in December 2008, at the latest, will all of the items that I just read off be known at that time?

Mr. OSTENDORFF. Mr. Chairman, I am not currently aware of the status of discussions between the Department of Energy, DOD, and the rest of the administration on the size of the future stockpile. That is an area that you've highlighted that certainly is a factor, and such things as, future pit production requirements, and what number of warheads we have for diversity in the stockpile. If confirmed, I would take a hard look to make sure that those discussions are transparent and are communicated back to Congress.

Chairman LEVIN. If those items have not been resolved, then tell us what's going to be used as the basis for decisions regarding the future nuclear weapons complex. Okay?

Mr. OSTENDORFF. Yes, sir.

Chairman LEVIN. Would you agree that if the RRW is feasible, that a new warhead for use in existing delivery systems—that it could be used for that purpose?

Mr. OSTENDORFF. It's my understanding, Mr. Chairman, that the RRW concept studies and design definition studies which are underway right now, to date have demonstrated that they could achieve those characteristics and purposes.

Chairman LEVIN. Could they then, if it is feasible, be usable in existing delivery systems?

Mr. OSTENDORFF. It is my understanding that the Air Force and the Navy nuclear weapons directorates have reviewed the existing reentry vehicle technologies and have not determined that there would need to be any significant changes to the delivery platforms.

Chairman LEVIN. Senator Thune, are you ready to go?

Senator THUNE. Yes, sir.

Chairman LEVIN. Senator Thune.

Senator THUNE. Thank you. You look like you need a break.

Chairman LEVIN. I don't want to hold you here, because I have a few more questions.

Senator THUNE. Okay.

Chairman LEVIN. But I'm going to be here anyway, so let me call on you, if you're ready.

Senator THUNE. All right, thank you.

I thank the panel for their willingness to serve. I just have a couple of questions I'd like to ask a couple of our nominees.

First, for Dr. Casscells, in your advance policy questions, you state that TRICARE key performance measures have improved dramatically. Among those are claims processing and customer satisfaction. What I would like to share with you are some concerns I've heard from my constituents regarding TRICARE and customer satisfaction.

South Dakota has approximately 7,000 military retirees who are TRICARE-eligible. On more than one occasion, constituents have indicated to me that health care providers are not accepting TRICARE because of the time it takes to process claims and because TRICARE is not reimbursing the health provider enough. If confirmed, can you inform the committee as to what steps you would take to improve the relationship between TRICARE and private health care providers?

Dr. CASSCELLS. Senator Thune, thank you. Yes, I have been looking into that as a TRICARE patient and as a TRICARE provider, not as a possible Assistant Secretary of Defense for Health Affairs. I have learned what I think most people have already come to understand, which is that the TRICARE contracts are not very generous financially to the providers. It is a little bit too onerous in signing up for them and maintaining them, given the relatively small number of patients that most doctors in most towns would have, or most hospitals. So, while I'm a TRICARE provider and patient, I'm at the University of Texas, where there's a big staff to negotiate these contracts and to help doctors with the regulations. The guys and gals in private practice throw up their hands when they get yet another complex contract. Some of them have said, "It's more difficult than Medicare, and, heck, I have zillions of Medicare patients, but hardly any of TRICARE." So, we have to make it simpler, and, if confirmed, I would work to do that.

In addition, sir, because the finances aren't so generous, it has to be cast in a light that people get recognition for taking on

TRICARE patients. There has to be a sergeant or a general from the local National Guard to come by and present a plaque and to call the local newspaper and say, "Thank heaven for some doctors who are willing to step up and help with TRICARE," because it is not the most remunerative, it's not the easiest, but it's a way that they can help the country. We need to recognize the doctors that way.

Senator THUNE. In a follow-up to that, one of the other concerns that I've heard is the lack of clarity of when and under what circumstances TRICARE is the primary payer. This is a confusing area, I think, of the health care industry, and especially for seniors, who may be carrying multiple policies and have multiple needs, like long-term care. Could you inform the committee, as well, of any steps you believe need to be taken to increase the level of education that TRICARE can provide to its beneficiaries so that this confusion that exists out there among those who are carrying multiple policies can be eliminated, or at least reduced?

Dr. CASCHELLS. Senator, I'm going to school on that, myself, now. I can say, again, just as a TRICARE patient and provider, that the Web site is getting better. The Joint Commission on Accreditation of Health Care Organizations has been happy with the way it's gone so far. The ratings tend to be higher than the average civilian hospital. But I'm sure we can do better, and I do think that from the military leaders I've spoken with, there is a commitment to do better in this regard. But, as to the details, I'm still going to school on them.

Senator THUNE. I hope that as you go through that, you can get some clarity and be able to communicate that with the many retirees who are using the program, because it does seem to be an issue on which there is great agreement that there is a lot of confusion and that there needs to be some better explanation of the various programs, particularly for seniors. Obviously, we're dealing with this on other issues, like Medicare Part D, as well. There is some confusion about the payer.

I have a question for General Kicklighter, I'm coming back to the issue of health care—about the increasing cost of DOD health care and the Department's plan to pay for it. DOD statistics on total medical spending indicate a growth of \$17.5 billion in fiscal year 2000, to an estimated \$39 billion in fiscal year 2007. I guess the question has to do with any thoughts that you might have about addressing what is a growing part of the DOD budget and any way that cost savings can be achieved in that. It's sort of endemic in health care generally, but that is a very substantial growth in one area of your budget over a relatively small period of time. So, any thoughts on that?

General KICKLIGHTER. Senator Thune, I don't know exactly what the health care capability is inside of the DOD's IG's office, but I certainly will take a look at what our skills are. If we don't have the skills we need to look at the growth of health care budgets, and what impact that is, and what care our recipients, both active and retired, are getting, I certainly would be glad to look into that, and would like to get back to you on that.

[The information referred to follows:]

If confirmed, I will review the skills sets within the DOD OIG and the associated oversight requirements regarding health care. Upon completion of my review, I will provide the committee with my conclusions and recommended actions.

Senator THUNE. I guess the reason I raise it is one of the suggestions of the problem has been increasing accountability and oversight for funds that get budgeted at the Department. I know that health care is a cost, in any organization right now, that is out of control. But if there are ways in which we can, through greater accountability and oversight help address that. We find that to be true in private health care, as well, that there sometimes is, in any government program, folks that figure out how to game the system. We want to make sure none of that's happening with regard to health care provided by the military.

General KICKLIGHTER. What I'd like to do, Senator, is to look into that, if confirmed, and get back to you as soon as I possibly can, in a very short period of time.

Senator THUNE. I appreciate that.

Thank you all very much.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Thune.

Mr. Ostendorff, over half of the nonproliferation program funding at NNSA is devoted to the mixed oxide (MOX) project which is aimed at turning 34 tons of excess weapons-grade plutonium into nuclear power reactor fuel. Several reports have indicated that the cost for the project has increased substantially. I'm wondering, if confirmed, whether you would look into the cost and the schedule for that program, and ensure that an independent cost estimate is available for the project.

Mr. OSTENDORFF. Yes, sir, I will.

Chairman LEVIN. Before construction activities begin for the MOX facilities, would you report back to the committee also on the status of the Russian companion effort to dispose of the same amount of excess weapons-grade plutonium?

Mr. OSTENDORFF. Yes, sir.

Chairman LEVIN. That winds up the questioning of members.

We'll keep the record open for the usual length of time.

Again, we want to thank you for your service. We want to thank your families. We particularly want to single out these younger kids who have sat here so patiently all morning long. I can't imagine, when I was their age, sitting still for as long as they have sat still. So, this new generation is not only computer literate, they are incredibly patient. I know their fathers, their grandfathers—are very grateful to them and all the family members for coming here again today.

With that, we will stand adjourned.

[Whereupon, at 11:31 a.m., the committee adjourned.]

[Prepared questions submitted to LTG Claude M. Kicklighter, USA (Ret.), by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Having served in the Armed Forces before and after the Goldwater-Nichols Act, I have seen the very positive benefit of more civilian control. The Goldwater-Nichols Act greatly strengthened the role of the Joint Chief of Staff and greatly enhanced the warfighting ability of the combatant commanders through jointness. If confirmed, I would work with the Department and Congress to recommend policy for activities designed to promote combat readiness, economy, efficiency, and effectiveness in the future. At this time, I do not know of the need for any modifications to the act.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Please see response above.

QUALIFICATIONS

Question. Section 3 of the Inspector General Act of 1978 provides that Inspectors General shall be appointed on the basis of their "integrity and demonstrated ability in accounting, auditing, financial analysis, law, management analysis, public administration, or investigations." What background and experience do you possess that you believe qualifies you to perform the duties of the Department of Defense (DOD) Inspector General (IG), particularly in the area of oversight, audit, and investigation?

Answer. In a career of over 35 years of military service, followed by 15 years in the Senior Executive Service of the civil service, I have had extensive executive responsibility and experience working with issues related to public administration, management analysis, accounting, auditing, financial analysis, law, and investigation. I obtained a Masters of Management degree to further develop a number of these skills.

I have learned what to expect from an IG in turns of their duties and responsibilities; my career has required that I maintain a close professional relationship with the IG in each military and civilian organization in which I have held senior management positions. I have been part of and led several high-level government investigations and have conducted numerous inspections intended to strengthen planning and implementation of policies, programs, and performance at the Departments of Defense, Veterans Affairs, and State.

During my years of public service, I have gained a broad-based understanding of the functioning of DOD, in particular. I have made an enduring commitment to the welfare and development of its civilian and military personnel, and strive to set an appropriate example for them in my personal conduct, integrity, and loyalty.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform these duties?

Answer. If confirmed, I plan to become more familiar with statutes and regulations applicable to government contracting in general and defense procurement, in particular. I also plan to meet with a broad cross-section of officials and personnel within DOD, including members of the Armed Forces here and overseas, to listen to their concerns and identify issues that might merit action by the Office of the Inspector General (OIG). Also, I plan to spend time listening to the concerns of the Members of Congress and their staffs.

If confirmed, I plan to engage the members of the Defense Council on Integrity and Efficiency and the President's Council on Integrity and Efficiency to better understand their effective roles.

I also intend to spend time with all elements of the DOD IG Office to learn and benefit from their invaluable grass roots level insights.

Question. Based on your background and experience, are there any changes that you would recommend with respect to the current organization or responsibilities of the DOD IG?

Answer. If confirmed, I plan to examine how the OIG is organized to determine if any structural changes in the office are appropriate. I also plan to determine whether the office is meeting the full range of its statutory responsibilities within the context of the resources available. It would be premature to offer any recommendations for change in these areas until I have an opportunity to conduct the necessary thorough evaluations.

RELATIONSHIPS

Question. If confirmed, what would your working relationship be with: The Secretary of Defense.

Answer. Section 8(c) of the act states that the IG shall “be the principal adviser to the Secretary of Defense for matters relating to the prevention and detection of fraud, waste, and abuse in the programs and operations of the Department”

If confirmed, I will seek to establish a strong and effective relationship with the Secretary of Defense that enables me to carry out my statutory duties with the independence required under the act, while enabling the Secretary to exercise his statutory supervisory authority. I will consult directly with the Secretary as necessary and appropriate, especially with respect to matters governed by section 8(b)(1) of the act. I also expect to continue the current practice of providing weekly updates on ongoing issues to the special assistants for the Secretary of Defense and Deputy Secretary of Defense, monthly meetings with the Deputy Secretary of Defense, and quarterly briefings to the Under Secretaries on matters warranting their attention.

Question. The Deputy Secretary of Defense.

Answer. Section 3(a) of the Inspector General Act states that “each IG shall report to and be under the general supervision of the head of the establishment involved or, to the extent such authority is delegated, the officer next in rank below such head.” DOD Directive 5106.01, dated April 13, 2006, states that “the IG of the DOD shall report to and be under the general supervision of the Secretary of Defense and the Deputy Secretary of Defense” Accordingly, if confirmed, I would expect my relationship with the Deputy Secretary of Defense to almost mirror my relationship with the Secretary of Defense.

Question. The Under Secretary of Defense (Comptroller/Chief Financial Officer) (USD(C/CFO)).

Answer. If confirmed, I will work with the USD(C/CFO) on areas of concern within the financial management arena which, I am told, the OIG has identified as a major management challenge for Department. I will conduct and supervise audits and investigations relating to the programs and operations of the establishment in order to promote economy, efficiency, and effectiveness. I would continue to work with the USD(C/CFO) to formulate the OIG’s portion of the annual President’s budget for submission to Office of the Secretary of Defense (OSD) and Office of Management and Budget (OMB), as well as request required resources to conduct the IG’s mission.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)).

Answer. I am informed that the OIG has also identified acquisition processes and contract management as a major management challenge for DOD. It is therefore essential for the IG to maintain an effective working relationship with the USD(AT&L). If confirmed, I anticipate to work particularly closely with the Under Secretary concerning the allocation of OIG resources in the acquisition area, and how best to implement audit recommendations pertaining to acquisition processes.

As IG, I would also recommend policies, in coordination with the USD(AT&L) and the USD(Comptroller), to ensure that audit oversight of contractor activities and financial management are coordinated and carried out in an efficient manner to prevent duplication.

Question. The General Counsel of DOD.

Answer. The OIG has extensive legal expertise and resources that are valuable to the OIG and, if confirmed, I will work as closely as possible with the Counsel without compromising, or creating the appearance of compromising, the independence of the OIG.

It is my understanding that the former DOD Office of the Deputy General Counsel (Inspector General) was re-designated as the OIG Office of the General Counsel. The nine positions that comprise the office were transferred, with associated funding, from OSD to OIG. The OIG is the appointing authority for all personnel and is responsible for budgeting, personnel services, and other administrative support for the OIG Office of General Counsel.

Question. The Director of Operational Test and Evaluation.

Answer. I am advised that the IG and the Director of Operational Tests and Evaluation have a common interest in ensuring that equipment and weapons systems allocated to the warfighter perform effectively and as planned. If confirmed, I would expect to consult as appropriate with the Director concerning the initiation of oversight efforts in these areas.

Question. The Inspectors General of the military departments, defense agencies, and the Joint Staff.

Answer. Section 8(c)(2) of the act states that the IG of DOD “shall . . . initiate, conduct, and supervise such audits and investigations in the DOD (including the military departments) as the IG considers appropriate . . .” Section 8(c)(9) adds that the IG “shall . . . give particular regard to the activities of the internal audit, inspection, and investigative units of the military departments with a view toward avoiding duplication and ensuring effective coordination and cooperation. . .”

As I understand it, the DOD oversight community uses internal coordination mechanisms to de-conflict potential duplicative efforts. In addition, DOD directives implementing statute govern certain programs in which the Inspectors General of the military departments participate. If confirmed, I will ensure that the DOD IG continues to coordinate and avoid duplicative efforts and works as a team.

Question. The Inspectors General of subordinate commands.

Answer. My relationship with the Inspectors General of subordinate commands will be based on the OIG role described above in part G. If confirmed, I will work closely with the other DOD Inspectors General to carry out applicable policies and guidance; avoid duplication, overlapping, and gaps; and work to build a strong team.

Question. The Criminal Investigative Services of the Military Departments.

Answer. Under the act, the IG has the authority to initiate, conduct, and supervise criminal investigations relating to any and all programs and operations of the DOD. In addition, the IG is statutorily authorized to develop policy, monitor and evaluate program performance, and provide guidance regarding all criminal investigative programs within the Department. It is my understanding that the DOD IG works frequently in close coordination with the Military Criminal Investigative Organizations (MCIOs) on joint investigations.

If confirmed, I will work closely with each of the MCIOs to ensure that investigative resources are used effectively.

Question. The audit agencies of the military departments.

Answer. Section 4(a) of the act establishes broad jurisdiction for the IG to conduct audits and investigations within DOD, and section 8(c)(2) states that the IG “shall . . . initiate, conduct, and supervise such audits and investigations in the DOD (including the military departments) as the IG considers appropriate.”

If confirmed, I will continue to work with the audit agencies of the military departments.

Question. The Defense Contract Audit Agency (DCAA).

Answer. If confirmed, I will continue to work with DCAA, as prescribed in the Inspector General Act. Although DCAA reports to the Under Secretary of Defense (Comptroller), it operates under audit policies established by the IG.

Question. The Defense Acquisition Regulatory Council.

Answer. As I understand it, the DOD OIG regularly provides comments to the Defense Acquisition Regulatory Council on proposed changes to the Defense Federal Acquisition Systems and also recommends changes as a result of DOD OIG work. If confirmed, I would expect to continue these practices.

Question. The Director of Defense Procurement and Acquisition Policy.

Answer. It is my understanding that the Director of Defense Procurement and Acquisition Policy is responsible for oversight of a large segment of the Defense Department’s acquisition and contracting operations and, accordingly, is a major recipient of reports provided by the OIG. If confirmed, I would expect to continue the current practice of working with the Director.

Question. The Comptroller General and the Government Accountability Office (GAO).

Answer. It is my understanding the DOD OIG works very closely with the Comptroller General and the GAO to coordinate planned and ongoing audits and inspections to avoid any duplication of efforts. It is my further understanding that the DOD OIG also has a GAO affairs office that serves as the central liaison between GAO and DOD management during GAO reviews of DOD programs and activities. If confirmed, I would work to maintain this cooperative relationship between the Comptroller General and GAO.

Question. The Special Inspector General for Iraq Reconstruction (SIGIR).

Answer. It is my understanding that the DOD OIG has supported the operations of the SIGIR and its predecessor, the Coalition Provisional Authority (CPA) Inspector General. In accordance with the IG Act and Public Law 108–106, title 3, section

3001(f)(4), the DOD OIG coordinates activities with the SIGIR as well as other oversight community members, to avoid duplicating oversight efforts and to minimize disruption to military operations.

As I also understand it, the DOD IG scope of oversight authority encompasses all DOD funded operations and activities in Iraq and the global war on terror, which today amounts to about \$463 billion in supplemental appropriations. The SIGIR focuses his oversight effort only on funds designated for Iraq reconstruction, which has been appropriated at about \$30 billion. If confirmed, and in keeping with the IG Act, I will work to ensure that the DOD OIG collaborates effectively with the SIGIR to ensure that we protect the public expenditures in Iraq for which we have oversight.

Question. The President's Council on Integrity and Efficiency (PCIE).

Answer. If confirmed, I plan to be a very active participant in the PCIE. As a Presidential-nominated and Senate-confirmed IG, the DOD IG is a member of the PCIE which meets on a monthly basis. It is my understanding that the DOD OIG currently serves on the PCIE Audit Committee and chairs the Information Technology Committee. I intend to participate fully and actively in the meetings of the PCIE and its committees.

Question. The Defense Council on Integrity and Efficiency (DCIE).

Answer. If confirmed, as its chairperson, I would organize meetings with the established members to discuss issues of common interest and reinforce close working relationships.

Sections 2 and 3 of the DCIE Charter state that, in accordance with section 2(2) of the IG Act, the DOD IG, who is the DCIE Chairman, is responsible to provide "leadership and coordination [in] activities designed: (A) to promote economy, efficiency, and effectiveness in the administration of, and (B) to prevent and detect fraud and abuse in such programs and operations."

Question. The Office of Management and Budget.

Answer. If confirmed, I will work with the Deputy Director for Management of the OMB, who is the Chairperson of the PCIE.

MAJOR CHALLENGES, PROBLEMS, AND PRIORITIES

Question. In your view, what are the major challenges and problems facing the next DOD IG?

Answer. Currently, I do not have sufficient knowledge to respond to this question. However, if confirmed, it will be my top priority to learn what challenges and problems the DOD IG office needs to address and to ensure the adequacy of resources required to accomplish its mission.

Question. If you are confirmed, what plans do you have for addressing these challenges and problems?

Answer. If confirmed, I will focus audit, investigative, and inspection efforts on the challenges identified in the Semiannual Report, while working to identify new issues in consultation with senior DOD officials and Congress. I will also work with senior DOD IG officials to determine what additional resources the OIG may need to fulfill its statutory responsibilities.

Question. If you are confirmed, what broad priorities would you establish in terms of issues which must be addressed by the DOD IG?

Answer. It is difficult as a nominee to formulate priorities because I have not had access to the full range of information and considerations that should inform them. Promoting efficiency and preventing fraud in defense acquisitions will obviously be a high priority—as well as effective support for the men and women of our armed services serving in Iraq and Afghanistan. I will also ensure that the OIG pursues aggressive oversight of contracting issues. There undoubtedly are several other key matters that will merit prioritization. If confirmed, I look forward to consulting with senior officials of the DOD and OIG, and with Congress, in establishing broad priorities.

Question. Are there any areas currently under investigation or review by the OIG which you do not believe are appropriate for investigation or review by the DOD IG? If so, why?

Answer. I have no knowledge of any inappropriate areas at this time.

DUTIES

Question. What is your understanding of the duties and functions of the DOD IG?

Answer. The duties and functions of the IG of DOD are those specified in sections 3, 4, and 8 of the Inspector General Act of 1978, as amended. Additional duties and responsibilities of the IG are specified in DOD Directive No. 5106.01, which was signed by the Deputy Secretary of Defense on April 13, 2006.

By statute, the IG conducts and supervises audits and investigations relating to the programs and operations of DOD. The IG also provides leadership and coordination, and recommends policy, for activities designed to: (1) promote economy, efficiency, and effectiveness in the administration of DOD programs and operations; and (2) combat fraud, waste, and abuse. In addition, the IG is responsible for keeping both the Secretary of Defense and Congress fully and currently informed about problems and deficiencies in defense programs, the need for corrective action, and the status of such action.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of Defense would prescribe for you?

Answer. If confirmed, I expect that the Secretary of Defense will prescribe for me the full range of duties and functions set forth in the Inspector General Act, as amended, as well as the additional duties and responsibilities specified in DOD Directive No. 5106.01. I also anticipate he will provide specific areas that he is concerned about and would like reviewed. I believe he would also expect for me to protect the independence and objectivity of the office.

Question. Section 2 of the Inspector General Act of 1978 states that its purpose is to create independent and objective units to conduct and supervise audits and investigations; to provide leadership and coordination and recommend policies designed to promote economy, efficiency, and effectiveness; to prevent and detect fraud and abuse; and to provide a means for keeping Congress and agency heads fully and currently informed about problems and deficiencies relating to the administration of programs and operations and the necessity for and progress of corrective action.

Are you committed to maintaining the independence of the DOD IG, as set forth in the IG statute?

Answer. If confirmed, I will maintain the independence of the OIG consistent with the provisions of the IG Act.

Question. Are you committed to keeping the Committee on Armed Services “fully and currently informed,” and, if so, what steps will you take, if confirmed, to ensure that this responsibility is carried out?

Answer. Yes. If confirmed, in accordance with section 2(3) of the act, I will be committed to keeping the Committee on Armed Services “fully and currently informed about problems and deficiencies relating to the administration of such programs and operations and the necessity for and progress corrective action.” I will do so through the dissemination of OIG products such as the Semiannual Report to Congress and audit reports. In addition, I will provide briefings for Members and staff, and testimony at hearings, when requested, with the intent of maintaining a close relationship.

Question. Section 3 of the Inspector General Act of 1978 provides that the head of an agency shall exercise “general supervision” over an IG, but shall not “prevent or prohibit the IG from initiating, carrying out, or completing any audit or investigation, or from issuing any subpoena during the course of any audit or investigation.”

What is your understanding of the supervisory authority of the Secretary of Defense over the DOD IG with respect to audits and investigations, in view of the independence provided by sections 2 and 3?

Answer. Section 2 of the act creates independent and objective units . . . to provide a means for keeping the head of the establishment and Congress fully and currently informed about problems and deficiencies relating to the administration of such programs and operations and the necessity for and progress of corrective action. Section 3 states that each IG shall report to and be under the general supervision of the head of the establishment involved or, to the extent such authority is delegated, to the office next in rank below such head, but shall not report, or be subject to supervision by, any other officer of such establishment. Moreover, neither the head of the establishment nor the office next in rank shall prevent or prohibit the IG from initiating, carrying out, or completing any audit or investigation, or from issuing any subpoena during the course of any audit or investigation.

Question. If confirmed, what action would you take if a senior official of the Department sought to prevent you from “initiating, carrying out, or completing” any audit or investigation within the jurisdiction of the OIG?

Answer. If the action was taken outside the authority given to the Secretary of Defense in section 8 of the IG Act, I would notify the Secretary and request his assistance in ensuring compliance with the IG Act by the senior official involved. Failure to resolve the issue, would, in my view, constitute a “particularly serious or flagrant problem, abuse, or deficiency” under section 5(d) of the IG Act. Under this section, the IG is required to report the matter to the head of the establishment, who is then required to transmit the IG’s report to Congress within 7 days.

Question. Section 8 of the Inspector General Act of 1978 states that the DOD IG shall “be under the authority, direction, and control of the Secretary of Defense with

respect to certain audits or investigations which require access to information concerning sensitive operational plans, intelligence matters, counterintelligence matters, ongoing criminal investigations by other administrative units of the DOD related to national security, or other matters, the disclosure of which, would constitute a serious threat to national security.

What is your understanding of the procedures in place to effect the authority and control of the Secretary of Defense over matters delineated in section 8 of the act?

Answer. To my knowledge the procedure in place is to follow the IG Act of 1978. Under 8(b)(1) or 8(b)(2) of the Inspector General Act, the Secretary has the "authority to stop any investigation, audit, or issuance of subpoenas, if the Secretary determines that such a prohibition is necessary to preserve the national security interests of the United States." I am informed that this provision has never been exercised. However, in the event that the Secretary exercises this authority, I would submit an appropriate statement within 30 days to this committee and other appropriate committees of Congress, as required under section 8(b)(3).

Question. What is your understanding of the extent to which the IG has, as a matter of practice, initiated and conducted audits or investigations covered by section 8 differently from other audits or investigations?

Answer. It is my understanding that the practice of the DOD IG with respect to the initiation and conduct of audits and investigations covered by section 8 is the same as for other audits and investigations.

Question. What changes, if any, do you believe are needed in the practices of the DOD IG for initiating and conducting audits or investigations covered by section 8?

Answer. None to my knowledge.

Question. Sections 4 and 8 of the Inspector General Act of 1978 set forth various duties and responsibilities of IGs beyond the conduct of audits and investigations.

What is your understanding of the supervisory authority exercised by the Secretary of Defense with regard to these issues?

Answer. Beyond the conduct of audits and investigations, section 4 directs the IG to "review existing and proposed legislation and regulations" and make related recommendations in semiannual reports; recommend policies to promote economy and efficiency in the administration of Department programs and operations, and to prevent and detect fraud and abuse; keep the Secretary of Defense and Congress fully and currently informed about fraud and other serious problems, abuses, and deficiencies; recommend corrective actions for such problems, abuses, and deficiencies; and report on the progress made in implementing such corrective actions. Section 8(c)(1) adds that the IG shall "be the principal advisor to the Secretary of Defense for matters relating to the preventing and detection of fraud, waste, and abuse."

It is my understanding that the operations above specified in sections 4 and 8 come within the general supervisory authority of the Secretary of Defense established under section 3(a).

INDEPENDENCE

Question. The DOD IG must ensure that the independence of the OIG is maintained, that investigations are unbiased, particularly those involving senior military and civilian officials, and promptly and thoroughly completed, and that the highest standards of ethical conduct are maintained.

Based on your background and work experience, are there any matters currently under investigation or review by the DOD IG from which you may be required to recuse yourself if confirmed? If so, why?

Answer. None to my knowledge.

Question. What is your understanding of the methods currently in place to address incidents of alleged misconduct by the DOD IG? Do you believe that these methods are adequate?

Answer. It is my understanding the PCIE Integrity Committee, chaired by a representative from the Federal Bureau of Investigation, has been established to ensure that administrative allegations against IGs and certain staff members of the OIGs are appropriately and expeditiously investigated and resolved. The results of Integrity Committee investigations are provided to the Chair of the PCIE who may forward the findings to the IGs agency head. The agency head is required to respond to the Integrity Committee within 30 days regarding the actions taken or planned to be taken in response to the investigative findings. I also note that the President has the authority to remove an IG.

To the best of my knowledge, these methods are adequate. I believe this process, if properly applied, can be an effective means to investigate alleged misconduct by IGs. However, I have not reviewed specific cases referred to the Integrity Committee to determine if those procedures are working effectively.

Question. Under what circumstances, if any, do you believe it would be appropriate for the DOD IG to consult with officials in the OSD (or other DOD officials outside the OIG) before issuing a report, regarding the findings and recommendations in the report?

Answer. In regards to audits, inspections, senior official investigations, and reprisal investigations, it is the current practice for the OIG to consult with officials in the OSD, or other DOD officials before issuing a report to ensure that the information in the report is factually accurate and to resolve or minimize disagreements on conclusions, findings, and recommendations. However, for criminal investigations, it is not appropriate to discuss the results of ongoing investigations.

Question. To the extent that you believe such consultation is appropriate, what steps, if any, do you believe the IG should take to keep a record of the consultation and record the results in the text of the report?

Answer. I believe it is necessary to consult with all parties to gather the facts to develop findings and recommendations. I am advised that the facts that are relevant should be included in the text of the report. A written record of all interviews and consultations are maintained in the working papers. The procedures are in place to redact certain information from reports in the appropriate circumstances.

Question. Under what circumstances, if any, do you believe it would be appropriate for senior officials to request that the DOD IG not investigate or review a particular matter?

Answer. Under section 8 of the Inspector General Act, the Secretary of Defense has the authority to prohibit the IG from initiating, carrying out, or completing any audit or investigation. That authority may be exercised when the audit or investigation requires access to information concerning: sensitive operational plans, intelligence matters, counterintelligence matters, ongoing criminal investigations by other administrative units of DOD related to national security, or other matters the disclosure of which would constitute a serious threat to national security. As noted previously, the Secretary of Defense has never exercised his authority under section 8.

Question. Under what circumstances, if any, do you believe it would be appropriate for senior officials to request that the DOD IG not issue a report on a particular matter?

Answer. No one has the authority to ask the DOD IG not to issue a report on a particular matter unless it is the Secretary of Defense, under the provisions delineated in section 8.

Question. Under what circumstances, if any, do you believe it would be appropriate for senior officials to request that the DOD IG alter findings, recommendations, or other pertinent material in a report on a particular matter?

Answer. In the course of conducting audits, inspections, and senior official investigations, the OIG practice is to consult with officials in the OSD, or with other senior level DOD officials, before issuing a report to ensure that the information in the report is factually accurate and to resolve or minimize disagreements where appropriate. However, for criminal investigations, it is not appropriate to discuss the results of ongoing investigations. The final decision on the content of reports rests with the IG.

Question. If confirmed, how would you react to a request, which you believed to be inappropriate, to not investigate a particular matter, not issue a report on a particular matter, or alter findings, recommendations, or other pertinent material in a report on a particular matter?

Answer. With respect to the initiation or completion of an audit or investigation, if the request was inappropriate and made outside the authority given to the Secretary of Defense in section 8 of the IG Act, I would reject the proposal. If and when necessary, I would notify the Secretary and request his assistance in ensuring compliance with the IG Act by the senior official involved.

Failure to resolve the issue, would, in my view, constitute a "particularly serious or flagrant problem, abuse or deficiency" under section 5(d) of the IG Act. Under this section, the IG is required to report the matter to the head of the establishment, who is then required to transmit the IG's report to Congress.

Question. What is your understanding of the corrective measures that were taken by the OIG in response to the report of the independent assessment team tasked by the DOD IG in 2002 to evaluate the overall effectiveness of the Office?

Answer. I know of the report and have read the Executive Summary. If confirmed, I plan to review the report and the response in detail and determine if corrective action were appropriate and effective.

Question. Do you believe that these corrective actions were appropriate and effective?

Answer. Please see my response to the previous question.

Question. What is your view of the professionalism and expertise of the career staff of the OIG?

Answer. During the briefings I have received, I have found the staff at the DOD IG to be knowledgeable and professional.

Question. What relationship, if any, do you see between the career staff of the OIG and the independence of the Office?

Answer. The credibility and effectiveness of IGs require a well-trained and professional staff that is aware of the agency's unique role and whose conduct and work products will be accepted as both independent and objective.

Question. What role, if any, do you believe that the senior leadership of the DOD should play in personnel decisions within the OIG?

Answer. In personnel matters, section 6 of the IG Act provides the IG the authority to "select, appoint, and employ such officers and employees as may be necessary for carrying out the functions, powers, and duties" of his office.

Question. The OIG currently relies upon legal advice provided by the DOD Office of General Counsel. The Inspectors General of many other Federal agencies have their own lawyers. Do you believe that reliance on the legal advice of the DOD Office of General Counsel has the potential to compromise the independence of the OIG?

Answer. I would expect to work with the DOD General Counsel on a variety of matters. However, I would rely on the OIG General Counsel legal advice for internal work products and processes.

Please also see my answer to the earlier question concerning the relationship with the DOD General Counsel. See section G of Relationships.

CONGRESSIONAL REQUESTS

Question. The OIG frequently receives requests from congressional committees and Members of Congress for audits and investigation of matters of public interest.

What is your understanding of the manner in which the OIG handles such requests?

Answer. It is my understanding that the DOD IG receives many requests from congressional committees and Members of Congress for oversight reviews, but adheres to the same principles of independence in responding to those requests.

Question. If confirmed, will you ensure that the OIG continues to respond to congressional requests for audits or investigations in a manner consistent with past practice?

Answer. Yes.

Question. Under what circumstances, if any, do you believe it would be appropriate for the OIG to redact the contents of any information contained in a report it provides to Congress?

Answer. It is my understanding that consistent with the Freedom of Information Act (FOIA), the practice of the DOD IG is to provide unredacted copies of reports to oversight committees of Congress. The DOD IG redacts information in reports released to the public in accordance with the FOIA and the Privacy Act.

SENIOR OFFICIAL INVESTIGATIONS

Question. The OIG plays a key role in the investigation of allegations of misconduct by senior officers and civilian employees of the DOD. The Committee on Armed Services has a particular interest in investigations concerning senior officials who are subject to Senate confirmation, and relies upon the DOD IG, as well as the OSD, to ensure that these investigations are accurate, complete, and accomplished in a timely manner.

If confirmed, what steps will you take to ensure that the investigations relating to senior officials are completed in a timely manner and that the results of investigations are promptly provided to this committee?

Answer. If confirmed, I will ensure that the investigations relating to senior officials to include those who are subject to Senate confirmation are completed in a timely manner and that the results of investigations are promptly provided to the committee.

Question. Do you believe that the current allocation of responsibilities between the DOD IG and the IGs of the military departments is appropriate to ensure fair and impartial investigations?

Answer. If confirmed, I will ensure that the current allocation of responsibilities between the DOD IG and the IGs of the military departments is appropriate to ensure fair and impartial investigations.

RESOURCES AND AUTHORITIES OF THE DOD IG'S OFFICE AND INVESTIGATORS

Question. Do you believe that the DOD IG's office has sufficient resources (in personnel and dollars) to carry out its audit and investigative responsibilities?

Answer. If confirmed, I will attempt to ensure that the DOD IG's office has sufficient resources to carry out its audit and investigative responsibilities.

Question. If confirmed, will you communicate any concerns that you may have about the adequacy of resources available to the OIG to Congress and this committee?

Answer. If confirmed, I will.

Question. Some Federal agencies have reacted to limited IG resources by using contractors to perform some audit and investigative functions.

What is your understanding of the DOD IG's role in determining whether the use of contractor resources to perform audit or investigative functions is appropriate?

Answer. For the audit function, the Inspector General Act, section 4(b)(1)(B) establishes the authority of each IG to establish guidelines for determining when it shall be appropriate to use non-Federal auditors. In addition, section 4(b)(1)(C) of the act states that the IG shall take appropriate steps to ensure that any work performed by non-Federal auditors complies with the standards established by the Comptroller General.

With regard to the criminal investigative function, it is considered inherently governmental and therefore contractors do not perform such functions.

Question. Under what circumstances, if any, do you believe that the use of contractor resources to perform such functions would be appropriate?

Answer. It is my understanding that there is specific guidance in DOD Directive 7600.2 on when it is permissible to use contractor resources to perform audit functions. It specifically permits DOD components to contract for audit services when applicable expertise is unavailable, if augmentation of the audit staff is necessary to execute the annual audit plan, or because temporary audit assistance is required to meet audit reporting requirements mandated by Public Law or DOD regulation. However, the directive includes an approval process to ensure the appropriate use of non-Federal auditors and that they comply with the Government Auditing Standards issued by the Comptroller General of the United States.

Question. In recent years, the DOD IG has sought and obtained increased authority to issue subpoenas, carry weapons, and make arrests.

Do you believe that the authorities of the OIG and its agents are adequate in these areas, or would you recommend further changes in the law?

Answer. If confirmed, I will review the IGs current authorities for adequacy.

DOD FINANCIAL ACCOUNTING AND AUDITS

Question. The performance of mandatory statutory duties, such as the performance of financial audits, has consumed a growing share of the resources of the IG's office, crowding out other important audit priorities.

What is your view of the relative priority of financial audits, and the resources that should be devoted to such audits?

Answer. Financial audits will continue to be a high priority consistent with the President's Management Agenda Initiative, the Secretary of Defense's top priorities, the Chief Financial Officers Act of 1990, and the Federal Financial Management Improvement Act of 1994. It is my understanding that the OIG has received sufficient resources to conduct financial statement audits under the current departmental approach. However, as the Department improves audit readiness and the requirements for financial statement audits increase, a reevaluation may be necessary. If confirmed, I will work with the Department and Congress to ensure that the appropriate level of resources continues to be dedicated to financial audits. I will also seek to ensure that resources committed to financial audits do not come at the expense of other audit priorities.

Question. Do you believe that resources currently directed to the audit of financial statements that are generally acknowledged to be unreliable would better be directed to other objectives?

Answer. Without the benefit of first hand knowledge of resource challenges faced by the DOD IG, I am not currently in a position to determine whether resources would be better directed to other objectives.

Question. Do you see any need for legislative changes to give the IG greater flexibility to target audit resources?

Answer. If confirmed, I am prepared to work with the Department and Congress to assess whether legislation in this area is appropriate.

Question. What is your view of the role of the DOD IG in evaluating and contributing to improvements made in the Department's financial management processes?

Answer. The role of the DOD OIG is to serve as a catalyst for improvements in the Department's financial management processes. That role should be consistent with the President's Management Agenda Initiatives, the Department's top priorities, and statutory requirements. If confirmed, I will ensure that the DOD OIG continues this vital function.

OVERSIGHT OF ACQUISITION PROGRAMS

Question. Problems with procurement, acquisition, and the ability of the Department and the military departments to effectively oversee acquisition programs have called into question the capability of existing DOD oversight mechanisms.

What are your views on the need for reform in how the DOD procures property and services?

Answer. I am informed that recent IG audit reports have identified contracting and acquisition problems and that the auditors are working with DOD management to correct those problems. If confirmed, I will work with the Department to address ways to improve acquisition procedures.

Question. What role, if any, do you believe the OIG should play in achieving acquisition reform?

Answer. The role of the DOD OIG is to serve as a catalyst for improvements in the Department's acquisition processes and contract management. That role should be consistent with the President's Management Agenda Initiatives, the Department's top priorities, and statutory requirements. If confirmed, I will ensure that the DOD OIG continues this vital function.

Question. Do you believe that the DOD IG and the various Defense auditing and contracting management activities have the resources needed to conduct effective oversight over the Department's acquisition programs?

Answer. If confirmed, conducting effective oversight over the Department's acquisition programs will be among our top priorities in the IG office. The men and women of our Armed Forces, and our Nation's taxpayers, have a right to expect that the funds appropriated by Congress for defense acquisitions are being utilized with cost-efficiency and integrity.

Based on the information made available to me thus far, I am concerned that the audit resources of the OIG have not kept pace with the growth in contract expenditures for defense acquisitions. I am also concerned that the current trend, if unchecked, will significantly increase the risk of fraud, waste, and abuse in acquisition programs.

Therefore, if I am confirmed, it will be vital for the OIG, the Department, and Congress to work together in a timely way to assess whether the OIG has adequate resources to conduct this essential oversight.

Question. Over the last 15 years, the DOD IG has gone from having one auditor for every \$500 million on contract by the DOD to one auditor for every \$2 billion on contract.

Do you believe that the DOD IG has the resources it needs to conduct effective oversight over the Department's acquisition programs?

Answer. If confirmed, I am prepared to work with the Department and Congress to assess whether the OIG has adequate resources to conduct this essential oversight.

Question. The DOD IG has played an important role in advising the DOD and Congress on the sufficiency of management controls in the Department's acquisition programs and the impact that legislative and regulatory proposals could have on such management controls.

How do you see the DOD IG's role in this area?

Answer. The DOD IG has an important role in helping the Department to effectively and efficiently manage acquisition resources dedicated to the support of the Department's mission, and in accounting for the management of those resources to the taxpayer. If confirmed, I will ensure that the DOD OIG continues its important advisory role.

HUMAN TRAFFICKING

Question. The DOD has adopted a "zero tolerance" position against abuses of human trafficking and modified its policies to ensure that United States military commands and activities and their personnel are informed about factors contributing to human trafficking and take preventative measures against behavior that contributes to this problem. The DOD IG has investigated allegations of human trafficking in Korea and the Balkans, and posted a survey on its Web site designed to obtain information about potential human trafficking abuses from DOD personnel.

What is the role of the DOD IG with respect to human trafficking?

Answer. It is my understanding that the IG strongly supports the Department's "zero tolerance" policy against human trafficking by evaluating programs and compliance, and by investigating allegations of human trafficking that have a DOD nexus. Over the last 2½ years, the DOD IG has been called upon to testify before Congress three times and has also addressed international forums on its efforts regarding trafficking in persons.

Question. What is your understanding of the actions that have been taken by the OIG to prevent human trafficking abuses and the current role of the DOD IG in formulating and enforcing the Department's policies?

Answer. As referenced above, it is my understanding that the OIG has evaluated DOD programs and compliance in Korea, Bosnia, and Kosovo.

On November 21, 2006, the OIG published its report titled "Evaluation of the DOD Efforts to Combat Trafficking in Persons." The objective of the evaluation was to determine if DOD Directives, implementing instructions, organization, metrics, and resources were adequate for the DOD components to develop implementing programs. The report made 14 major recommendations in the areas of coordination, training, policy, and metrics. It is my understanding that the Department published DOD Instruction 2200.01, "Combating Trafficking in Persons," on February 16, 2007, incorporating recommendations from the November 2006 DOD IG report. It is my further understanding that it is the responsibility of DOD management to formulate and enforce policies regarding trafficking in persons.

It is my understanding that the DOD IG continues to encourage use of the Defense Hotline to report human trafficking abuses. In October 2004, the OIG distributed over 17,000 Defense Hotline "Trafficking in Persons" (TIP) posters to military and DOD civilian activities worldwide.

Question. In April 2006, the Commander, U.S. Multinational Forces, issued an order titled "Prevention of Trafficking in Persons in MNF-I," aimed at preventing human trafficking abuses by contractors involving possibly thousands of foreign workers on U.S. bases in Iraq. Media reports about the problem of abuses in Iraq among contractors stated that allegations had been raised as early as 2004 with the DOD IG, but that lengthy delays occurred before a response.

What is your understanding of the role the DOD IG has played in investigating human trafficking allegations in Iraq?

Answer. It is my understanding that the OIG has worked closely with other human trafficking "stakeholders" within the DOD, and with other executive departments such as the Department of State. I also understand that the IG conducted an inquiry, based on a February 2006 request from the Under Secretary of Defense for Personnel and Readiness (USD(P&R)), that reviewed allegations of involuntary servitude occurring under the auspices of DOD contractors in Iraq. In its response to USD(P&R) in April 2006, the OIG concluded that it did not have the authority to investigate foreign nations or foreign companies inside countries which are the sources of laborers. Based on its review, the IG made several recommendations:

- DOD should continue to prosecute military members who become involved in TIP or TIP-related activities, in accordance with the Uniform Code of Military Justice.
- DOD should ensure that all new contracts incorporate the anti-TIP clause required by a proposed change to the Defense Federal Acquisition Regulation (DFAR), once it is approved.
- DOD should evaluate rewriting existing contracts to incorporate the language of the anti-TIP DFAR clause, once it is approved.
- Military department and combatant command IGs should continue their involvement in DOD efforts to combat TIP, within the limits of their authority.

The DOD IG supported changes to the DFAR to provide additional controls regarding TIP for DOD contracts performed outside of the United States. It is my understanding that an interim rule implementing the change to the DFAR was published in October 2006.

Question. What steps would you take, if confirmed as the DOD IG, to investigate and prevent the incidence of human trafficking abuses in connection with DOD activities?

Answer. If confirmed, I would promote compliance with the DOD "zero tolerance" policy by periodically evaluating DOD programs to combat human trafficking in coordination with other IGs throughout the Department.

OVERSIGHT OF DOD ACTIVITIES IN IRAQ AND AFGHANISTAN

Question. What is the relationship of the DOD IG to the SIGIR?

Answer. It is my understanding that the DOD OIG has supported the operations of the SIGIR and its predecessor, the CPA Inspector General. In accordance with the IG Act and Public Law 108-106, title 3, section 3001(f)(4), the DOD OIG coordinates activities with the SIGIR as well as other oversight community members, to avoid duplicating oversight efforts and to minimize disruption to military operations. See Section O in Relationships.

Question. What is your understanding of the responsibilities and activities of the OIG in investigating and preventing fraud, waste, and abuse of U.S.-provided resources for reconstruction and other purposes in Iraq?

Answer. I am informed that the DOD OIG has, in accordance with its legislatively mandated mission, conducted audits aimed at identifying and preventing fraud, waste, and abuse of funds appropriated to the DOD for its operations in Iraq. It is my further understanding that the DOD OIG has established a forward operating element at Camp Victory in Baghdad. The DOD OIG has also established an office in Qatar as an in-theater base of operations. The staff in the Qatar office conducts audits as required in Iraq, Afghanistan, Kuwait, and Qatar to support the operational commander. Additionally, audits are also being conducted in the continental United States (CONUS) on contracts awarded and funds expended in the United States that provide significant resources to support reconstruction and other purposes in Iraq.

I am advised that DCIS and its military criminal investigative counterparts, in particular the U.S. Army Criminal Investigative Command (Army CID), investigate major frauds, corruption, thefts, and other compromises of DOD assets in Afghanistan, Iraq, and other countries in that theater. Four DCIS agents are currently deployed to Iraq and Kuwait, collocated with Army CID, to conduct operations and investigations that primarily involve procurement fraud and public corruption. In addition, the DCIS European office and DCIS CONUS offices, along with the investigative partners (e.g., FBI), continue to investigate Iraq-related matters and travel into theater to conduct investigative operations, such as gathering evidence and conducting interviews, when crimes are reported. However, the bulk of DCIS's investigative activities occur in CONUS where corporate headquarters of DOD contractors, key evidence, and Department of Justice prosecutorial support are located.

Also, I have been informed that DCIS is a participant in the International Contract Corruption Task Force, a formalized partnership between Federal agencies to investigate and prosecute cases of contract fraud and public corruption related to U.S. spending in Iraq. The Task Force has established a Joint Operations Center specifically to formally coordinate investigations and develop a criminal intelligence capability to successfully prosecute fraud. It is my understanding that DCIS has dedicated a special agent to the Joint Operations Center on a full-time basis.

If confirmed, and in keeping with the IG Act, I will ensure that the DOD OIG continues to focus oversight efforts to investigate and prevent fraud, waste, and abuse of U.S.-provided resources for reconstruction and other purposes in Iraq.

Question. What is your understanding of the responsibilities and activities of the OIG in investigating and preventing fraud, waste, and abuse of U.S.-provided resources for reconstruction and other purposes in Afghanistan?

Answer. It is my understanding that DOD IG is responsible for investigating fraud, waste, and abuse for funds appropriated to DOD for its operations in Afghanistan. It is my further understanding that the DOD OIG is initiating efforts to establish a forward deployed presence in Afghanistan. The DOD OIG has established an office in Qatar as an in-theater base of operations. Pursuant to the tenets of the IG Act, I would ensure the DOD oversight efforts were coordinated with other organizations conducting oversight in Afghanistan.

Question. If confirmed, what changes, if any, would you plan to make to the DOD IG's oversight activities in Iraq and Afghanistan?

Answer. If confirmed, I would ensure that DOD IG activities in Iraq and Afghanistan remain as a top priority. I will also want to assess the current level of oversight to ensure that adequate resources are being devoted to this mission and that those resources are being allocated appropriately.

Question. If confirmed, what would be your goals with respect to the oversight, audit, and investigation of ongoing U.S. activities in Iraq and Afghanistan?

Answer. If confirmed, it is my goal to ensure that the oversight provided by the DOD IG of ongoing DOD activities in Iraq and Afghanistan is consistent with the responsibilities contained in the IG Act and is sufficient to provide assurance to Congress, the Secretary of Defense, and to both the American taxpayer and the warfighter that funds supporting DOD activities are expended appropriately and effectively.

Question. The SIGIR has jurisdiction over contracts for the reconstruction of Iraq, however, the Special IG does not have jurisdiction over contracts to support our

troops in Iraq and Afghanistan. What role do you believe the DOD IG should play in the oversight, audit, and investigation of such contracts?

Answer. The DOD IG office should have an active role in ensuring stewardship of taxpayers' dollars and effective contract support for our troops through diligent oversight of the contracting function. This would include audits, inspections, and investigations, as required.

Question. Do you believe that a significant on-the-ground presence in Iraq is necessary to perform this role?

Answer. As noted earlier, the DOD OIG has established an office in Qatar as its in-theater base of operations for entry into Iraq as well as Afghanistan and Kuwait. Additionally, the OIG has established a forward operating presence at Camp Victory in Baghdad, and is in the process of initiating efforts to establish a forward deployed presence in Afghanistan.

Question. You have served as director of the Iraq-Afghanistan Joint Transition Planning Group and a special adviser to the State Department on stabilization and security operations in Iraq and Afghanistan, and Director of the DOD's Iraq Transition Team.

Please describe the role that you have played in U.S. reconstruction activities in Iraq and Afghanistan.

Answer. As Director of the Defense Department's Iraq Transition Team, I served as part of a joint team with the Department of State to develop a plan for closing down the CPA and standing-up the U.S. Mission in Baghdad. We focused on two reconstruction objectives: (1) transforming CPA's Reconstruction Project Management Office into the State Department-run Iraq Reconstruction Management Office; (2) establishing initial requirements for Provincial Reconstruction Teams (PRTs) in Iraq with respect to staffing, location, and security.

As Special Advisor to the State Department on Stabilization and Security, the office looked at the structure, location, and security of PRTs in Afghanistan and also recommended that the U.S. Army Corps of Engineers increase its support for U.S. Agency for International Development's reconstruction effort in that country. With the departure of the Secretary and Deputy Secretary of State our mission was ended, and we did not have the time to focus on Iraq.

The Iraq/Afghanistan Transition Planning Group (IATPG), for which I am Director, focused on assessing planning coordination of U.S. Government activities in these two countries, as directed by the Secretaries of State and Defense. In the specific area of reconstruction, we provided an assessment of PRTs in Afghanistan and made recommendations for improvement in the areas of planning, integration of effort, and staffing.

Question. What is your view of the major successes of those efforts?

Answer. Standing up the U.S. Embassy, Baghdad, and closing out the CPA was accomplished on time and was successful in establishing the initial framework for integration of our diplomatic and military activities. It also provided the foundation for the development of the PRT program initiative in Iraq. In Afghanistan, the IATPG advanced the planning and evolution of the PRT effort, with special emphasis on the merging of the U.S. PRT initiative with that of the International Security Assistance Force.

Question. What is your view of the major failures of those efforts?

Answer. We should have pushed harder and sooner to combine police and military training in a strong State and Defense Department partnership in both countries. In the early stages of a counterinsurgency war, when the police have to have both police and paramilitary skills to be effective, I believe that DOD should have the lead role in training the police and the military, as is the case currently. When the situation is more permissive, then the lead can be shifted. In any event, DOD, State, and Justice need to have a strong partnership for police training to succeed rapidly.

To advance reconstruction activities requires security and stability, which depends on effective Rule of Law. There should have been more of an integrated interagency effort on establishing a Rule of Law system from the very start of our engagement in Iraq and Afghanistan.

I wish we could have made more progress in getting the PRTs staffed with a balanced team of both military and especially civilian skill sets required to achieve their mission.

Question. Do you see any potential for conflict between your previous role in these efforts and your new role as DOD IG, if confirmed?

Answer. I do not.

Question. If confirmed, what steps would you take to address any such conflict?

Answer. I do not believe this will present any conflict. However, if there was every any doubt, I would recuse myself on any potential conflicts of interest.

Question. Recent press articles have criticized the decision by U.S. officials in 2003 and 2004 to shut down Iraqi state-owned enterprises, resulting in the loss of employment for thousands of Iraqis.

What is your view of this issue?

Answer. At the time, I was not aware of this decision. But, one of the most critical problems faced today in Iraq is employment and economic development. We should assist the Iraqi Government to increase employment for the Iraqi people to the extent possible.

Question. Did you play any role in this decision?

Answer. I did not.

OVERSIGHT OF MEDICAL FUNCTIONS, INCLUDING OUTPATIENT ADMINISTRATION

Question. Reports of medical cases from military treatment facilities involving tragic outcomes and allegations of medical malpractice have raised questions about the adequacy of existing reporting, investigatory, and readiness systems within the Defense Health Program and military treatment facilities. The ability of those outside the military medical system to fairly evaluate individual cases and overall quality of care is affected by such factors as the tort claim laws and adversarial litigation against the United States, reliance on privileges from the release of documents and information associated with such litigation and separate quality assurance systems, patient privacy requirements, and concern about the reputations of individual providers. Recently, deficiencies in the housing and administration of severely injured soldiers and marines in a medical hold status at Walter Reed Army Medical Center have raised questions about the adequacy of oversight into the care of outpatients and members involved in the disability evaluation system.

Do you have any views about the role the DOD IG should play in improving visibility into and objective assessments of the quality of care provided through the military medical system?

Answer. It is my understanding that health care is a major management challenge identified in the last DOD IG Semiannual Report to Congress. In particular, the DOD IG noted that the frequency and duration of military deployments further stresses the military health system in both the Active and Reserve components.

If confirmed, I will ensure that the DOD OIG continues to provide the independent review and oversight necessary of the military health system. Without the benefit of detailed information on DOD oversight efforts, I am not currently in a position to offer specific views about actions the DOD OIG might take to improve its oversight of medical functions.

My belief is that the DOD IG and the Service IG have a major role to play in ensuring that these great American heroes and patriots are receiving the health care they and their families have a right to expect. But, I don't think it stops there. DOD and Department of Veterans' Affairs (VA) should be working hand in glove to ensure the transition between DOD and VA health care system is seamless. DOD should work with VA to ensure that the best possible treatment and care continues throughout recovery and in some cases, the rest of their life. It does not stop there—I think they should do everything possible to bring as many of our injured troops back to military duty, commensurate with their ability. We should also find civilian positions in DOD and other Federal agencies for these men and women.

Question. What resources and expertise does the DOD IG currently have—or lack—to play a more prominent role in assessing the performance of health care providers in the DOD?

Answer. I do not know the answer. If confirmed, this will be a top priority for me to ensure that DOD IG has the resources and expertise to play a prominent role in assessing and ensuring that the wounded troops coming off the battlefield are getting the care they deserve.

INTELLIGENCE

Question. What is the role of the DOD IG with regard to intelligence activities within DOD?

Answer. I am informed that the IG, through the Deputy Inspector General for Intelligence, has responsibility for oversight of DOD intelligence activities and components as identified in DOD Directive 5240.1, "DOD Intelligence Activities," dated April 25, 1988. These include all DOD components conducting intelligence activities, including the National Security Agency/Central Security Service, the Defense Intelligence Agency, the military department intelligence and counterintelligence activities, and other intelligence and counterintelligence organizations, staffs, and offices, or elements thereof, when used for foreign intelligence or counterintelligence purposes. Other organizations and components under the IG's oversight not specifically

identified in DOD Directive 5240.1 include the Office of the Under Secretary of Defense for Intelligence (USD(I)), the National Reconnaissance Office, and the National Geospatial-Intelligence Agency. Responsibilities and functions of the IG as outlined in DOD Directive 5106.1, "Inspector General of the Department of Defense," include the responsibility to audit, evaluate, monitor, and review the programs, policies, procedures, and functions of the DOD Intelligence Community to ensure that intelligence resources are properly managed.

The DOD IG performs an oversight and coordination role through the Joint Intelligence Coordination Working Group (JIOCG). The JIOCG is a DOD working group chaired by the Deputy Inspector General for Intelligence and includes representatives from the Service audit agencies, military department IGs, and Defense Intelligence Agencies IGs. The primary goal of the JIOCG is to avoid duplication of effort and enhance coordination and cooperation among IGs and Auditors General inside the DOD and promote information-sharing among IGs whose functions include audits, inspections, evaluations, or investigations of their respective departments and agencies.

Question. What is the relationship of the DOD IG to the Special Assistant to the Secretary of Defense for Intelligence Oversight?

Answer. DOD Directive 5106.1 requires that intelligence-related actions be coordinated, as appropriate, with the Assistant to the Secretary of Defense (Intelligence Oversight) (ATSD(IO)) to determine respective areas of responsibility in accordance with DOD Directive 5148.11, "Assistant to the Secretary of Defense for Intelligence Oversight," dated May 21, 2004. (DOD Directive 5148.11 contains similar language for the ATSD(IO) to coordinate with the IG, as appropriate.) I am advised that the ATSD(IO) is a charter member of the JIOCG, and that the OIG has a long history of coordination and cooperation with the ATSD(IO).

Question. What is the relationship of the DOD IG to the IG of the Office of the Director of National Intelligence (DNI)?

Answer. The DOD IG's primary relationship with the DNI IG concerns participation in the Intelligence Community (IC) IG Forum. The IC IG Forum promotes information-sharing among the IGs of the departments and agencies of the IC whose functions include audits, inspections/evaluations, or investigations of their respective departments and agencies. The IC IG Forum also strives to avoid duplication of effort and enhance effective coordination and cooperation among IC IGs. The DNI IG chairs the IC IG Forum.

In addition to the IC IG Forum relationship, the DOD IG participates in various projects and initiatives undertaken by the DNI IG. The DNI IG also coordinates with the Office of the Deputy Inspector General for Intelligence on all ongoing projects relating to DOD organizations and activities.

Question. What is the role of the DOD IG with respect to detainee matters?

Answer. According to my reading of the Inspector General Act, the IG's statutory responsibility for oversight extends to oversight of detainee and interrogation matters. In that regard, I am advised that the OIG recently issued two final reports regarding detainee abuse.

Question. What is the role of the DOD IG with respect to interrogation matters?

Answer. Please see my answer to the previous question.

Question. Do you have any concerns about whether investigations and reviews conducted by the DOD IG with regard to intelligence activities are or have been appropriate?

Answer. It is my understanding that all investigations and reviews conducted have been within the IG's statutory authority.

INVESTIGATION INTO ACTIVITIES OF THE OFFICE OF THE UNDER SECRETARY OF DEFENSE FOR POLICY

Question. The OIG recently completed an investigation into the activities of the Office of the Under Secretary of Defense for Policy related to pre-war intelligence on Iraq and the purported links between Iraq and al Qaeda. This investigation was conducted in response to requests from the Senate. The OIG has been criticized for conducting this investigation and for the findings of the investigation.

What is your view of the OIG's investigation into the activities of the Office of the Under Secretary of Defense for Policy?

Answer. I have no knowledge of this case except a few news clips on the evening news.

Question. Do you believe that the OIG should have conducted this investigation?

Answer. Please see my response to the previous question.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the IG of the DOD?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR ROBERT C. BYRD

CHALLENGES

1. Senator BYRD. Lieutenant General Kicklighter, what do you see as your most significant challenge as the Department of Defense (DOD) Inspector General (IG)?

General KICKLIGHTER. My top priority will be to learn what challenges the DOD IG office needs to address and to ensure the adequacy of resources required to accomplish its mission.

Promoting efficiency and preventing fraud in defense acquisitions will obviously be a high priority—as well as effective support for the men and women of our armed services serving in Iraq and Afghanistan. I will also ensure that the OIG pursues aggressive oversight of contracting issues. There undoubtedly are several other key matters that will merit prioritization. If confirmed, I look forward to consulting with current OIG management, the Department, and Congress, in establishing broad priorities.

CONTRACTOR WASTE

2. Senator BYRD. Lieutenant General Kicklighter, there have been many investigations and reports of contractor waste, fraud, and abuse at DOD. How do you plan to address these issues, particularly as they relate to government contractors?

General KICKLIGHTER. Conducting effective oversight over the Department's contracts will be among our top priorities in the IG office. The men and women of our Armed Forces, and our Nation's taxpayers, have a right to expect that the funds appropriated by Congress for defense are being utilized with cost-efficiency and integrity.

MEDICAL SYSTEM DEFICIENCIES

3. Senator BYRD. Lieutenant General Kicklighter, recently, the military medical system has been exposed as having serious deficiencies. What do you feel that the role of the IG is in investigating these issues?

General KICKLIGHTER. It is my understanding that health care is a major management challenge identified in the last DOD IG Semiannual Report to Congress. In particular, the DOD IG noted that the frequency and duration of military deployments further stresses the military health system in both the Active and Reserve components.

I will ensure that the DOD OIG continues to provide the independent review and oversight necessary of the military health system. Without the benefit of detailed information on DOD oversight efforts, I am not currently in a position to offer spe-

cific views about actions the DOD OIG might take to improve its oversight of medical functions.

My belief is that the DOD IG and the Service IG have a major role to play in ensuring that these great American heroes and patriots are receiving the health care they and their families have a right to expect. But, I don't think it stops there. DOD and Department of Veterans' Affairs (VA) should be working hand in glove to ensure the transition between the DOD and the VA health care system is seamless. DOD should work with VA to ensure that the best possible treatment and care continues throughout recovery and in some case the rest of their lives.

MOST PRESSING PROBLEMS

4. Senator BYRD. Lieutenant General Kicklighter, what do you see as the most pressing systemic problems to be addressed within DOD?

General KICKLIGHTER. In the Semiannual Report to Congress, the OIG lists the most serious management and performance challenges faced by the DOD based on the findings and recommendations of audits, inspections, and investigations conducted during the year. In addition to the global war on terrorism, the most recent Semiannual Report to Congress lists the following challenges:

- Joint Warfighting and Readiness
- Human Capital
- Information Security and Privacy
- Acquisition Process and Contract Management
- Financial Management
- Health Care

5. Senator BYRD. Lieutenant General Kicklighter, are there other situations on the order of the Walter Reed situation that need attention before they become national media scandals?

General KICKLIGHTER. Currently, I do not have sufficient knowledge to identify such situations. It would be my goal to proactively identify programs within DOD that require the attention of management to either prevent fraud or abuse or to improve their efficiency and effectiveness.

MISSING FUNDS IN IRAQ

6. Senator BYRD. Lieutenant General Kicklighter, what do you feel is the role of the DOD IG in connection with identifying the whereabouts of billions of dollars in missing funds in Iraq—funds that might be being used by insurgents to fund operations against U.S. forces?

General KICKLIGHTER. Currently, I am not familiar with the details regarding the missing funds in Iraq. I will look at the relevant information and determine what action would be required by the Office of the Inspector General.

7. Senator BYRD. Lieutenant General Kicklighter, what do you plan to do to identify the location of and seize those funds?

General KICKLIGHTER. Please see my response to the previous question.

FURTHER INVESTIGATIONS

8. Senator BYRD. Lieutenant General Kicklighter, do you intend to further investigate the conclusions of the report prepared by Acting Inspector General Thomas Gimble regarding the pre-Iraq war activities of the Office of the Under Secretary of Defense for Policy?

General KICKLIGHTER. I am not aware of any outstanding issues that require further investigation at this time. I will work with Congress to consider any further concerns and what additional work by the DOD IG would be appropriate.

9. Senator BYRD. Lieutenant General Kicklighter, do you believe that further investigation of these "inappropriate activities," in the words of the report, is warranted?

General KICKLIGHTER. Please see my response to the previous question.

10. Senator BYRD. Lieutenant General Kicklighter, do you believe that reforms should be enacted to ensure that these activities do not take place in the future?

General KICKLIGHTER. As stated in the DOD OIG report, the creation of the Under Secretary of Defense for Intelligence and the aggressive efforts of the Director of National Intelligence's National Intelligence Council and analytic integrity and standards have contributed to a more favorable operational environment.

INVESTIGATING THE PROCUREMENT SYSTEM

11. Senator BYRD. Lieutenant General Kicklighter, as the IG for DOD, how will you identify and investigate counterfeit material and other forms of unauthorized product substitution into the procurement system?

General KICKLIGHTER. As I understand it, the introduction of counterfeit material and other forms of unauthorized product substitution into the procurement system has historically been and continues to be one of the Office of the Inspector General's Defense Criminal Investigative Service's highest priority for deterrence, investigation, and prosecution. Product substitution investigations comprise a major part of the Defense Criminal Investigative Service inventory. We will continue the efforts already underway within the Defense Criminal Investigative Service and expand if required.

[The nomination reference of LTG Claude M. Kicklighter, USA (Ret.), follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
February 26, 2007.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Claude M. Kicklighter of Georgia, to be Inspector General, Department of Defense, vice Joseph E. Schmitz, resigned.

[The biographical sketch of LTG Claude M. Kicklighter, USA (Ret.), which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF CLAUDE M. "MICK" KICKLIGHTER

Claude M. Kicklighter has served his country for over 50 years, first as an Army officer for over 35 years, retiring as a Lieutenant General, followed by over 15 years as a distinguished public servant. Most recently, in October 2005, he was selected by the Secretaries of State and Defense to establish and direct the Iraq/Afghanistan Joint Transition Planning Group, a joint Department of State and Department of Defense team that has provided analysis and recommendations for coordinating efforts to address transition challenges in Iraq and Afghanistan.

In addition to serving in this position, since his retirement in 1991, Mick Kicklighter has held a number of senior positions in the Departments of Defense, State, and Veterans Affairs. Prior to his current assignment, he was the Chief of Staff, Department of Veterans Affairs. In 2004, he was designated as Special Advisor to the Deputy Secretary of State for Stabilization and Security Operations in Iraq and Afghanistan. In 2003, he was Director of the Department of Defense's Iraq Transition Team that, together with the Department of State's Iraq Transition Team, planned the inactivation of the Coalition Provisional Authority and the establishment of the new U.S. Mission Baghdad.

Prior to this, Mick Kicklighter was nominated by the President and confirmed by the Senate, in 2001, as Assistant Secretary for Policy and Planning, Department of Veterans Affairs, which later became the Office of Policy, Planning, and Preparedness after the attacks on September 11, 2001. In this role, he was senior advisor to the Secretary on strategic planning, policy research and analysis, program evaluation, emergency operations, preparedness, and security and law enforcement.

Previously, he served as Deputy Under Secretary of the Army for International Affairs. LTG(R) Kicklighter also was Director of our Nation's commemorative activities in the United States and around the globe that thanked and honored our World War II veterans and their families during the 50th Anniversary of World War II.

During his more than 35-year career as a military officer, LTG(R) Kicklighter commanded units at every level from platoon through Army Division, and then commanded a theater Army. Senior level commands included serving as Commander, U.S. Army Pacific, 25 Infantry Division (Light), and the U.S. Army Security Assistance Command. He also held senior level staff assignments with the Office of the Joint Chiefs of Staff, the Office of the Secretary of Defense, and the Department of the Army, including being the Director of the Army Staff, and Chief of Staff at the Army Material Command.

During his military service, LTG(R) Kicklighter received the Distinguished Service Medal (3 awards), the Defense Superior Service Medal, the Legion of Merit (4 awards), and the Bronze Star, Meritorious Service Medal (2 awards), Army Commendation Medal (5 awards) as well as various foreign decorations; Argentina Order of May, French Order National Du Merite; Korean Order of National Security Gugseon Medal; and the Silver Honorary Order of Freedom of the Republic of Slovenia.

His civilian awards include the Presidential Citizen Medal, the Eisenhower Liberation Medal, the Decoration for Exceptional Civilian Service, and the Department of Defense Medal for Distinguished Public Service (twice).

While a public servant, he served on the Board of Directors for Habitat for Humanity International and as its Chairman for 3 years.

Born and raised in Glennville, GA, Mick Kicklighter graduated from Mercer University with a Bachelor of Arts Degree in biology and was commissioned a Second Lieutenant in Field Artillery. He earned a Master of Arts Degree in Management of National Resources from the School of Business Administration, George Washington University, and is a graduate of the United States Army Command and General Staff College, and the Industrial College of the Armed Forces. His overseas tours include France, Germany, the Netherlands, Iran, and two tours in Vietnam.

Mick Kicklighter is married to the former Elizabeth Exley and they have three adult children—Elizabeth, Claude, Jr., and Richard—and five grandchildren.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by LTG Claude M. Kicklighter, USA (Ret.), in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Claude M. Kicklighter, Sr.

2. **Position to which nominated:**

Inspector General for the Department of Defense.

3. Date of nomination:

26 February 2007.

4. Address: (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

22 August 1933; Glennville, GA.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Elizabeth Exley Kicklighter.

7. Names and ages of children:

Elizabeth Jane Kicklighter Palmer, 10/12/55; Claude Milton Kicklighter, Jr., 10/01/57; Richard Van Kicklighter, 10/14/58.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

George Washington University, Washington, DC.

Dates attended: 09/73–08/04

Degree: Masters of Arts Degree in Management of National Resources from the School of Business Administration, George Washington University

Date Degree Received: 08/74

Mercer University, Macon, GA

Dates Attended: 01/53–06/55

Degree: Bachelor of Arts/Biology

Date Degree Received: 06/55

University of Georgia, Athens, GA

Dates Attended: 09/52–12/52

Date Degree Received: N/A

Georgia Military College (Junior College), Millageville, GA

Dates Attended: 09/51–06/52

Date Degree Received: N/A

Emory-At-Valdosta (Junior College), Valdosta, GA

Dates Attended: 08/50–05/51

Date Degree Received: N/A

Glennville High School, Glennville, GA

Dates Attended: 09/46–05/50

Diploma: High School Diploma

Date Diploma Received: 05/50

Military Schools as shown on Enclosure

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Director, Iraq/Afghanistan Transition Planning Group, Department of Defense, 1401 Wilson Blvd, Suite 400, Rosslyn, VA, 10/2005–Present.

Chief of Staff, Department of Veterans Affairs, 810 Vermont Ave., NW, Washington DC, 02/2005–10/2005.

Special Advisor, Department of State, 2201 C St., NW, Washington, DC, 10/2004–02/2005.

Director, Iraq/Afghanistan Transition Planning Group, Department of Defense, 1010 Defense Pentagon, Washington, DC, 12/2003–10/2004.

Assistant Secretary, Policy, Planning, and Preparedness, 08/2001–12/2003.

Director, Acting, Assistant Secretary, Public and Intergovernmental Affairs, 01/2001–08/2001.

Principal Deputy Under Secretary, Memorial Affairs, Department of Veterans Affairs, 810 Vermont Ave., NW, Washington, DC, 04/2000–01/2001.

Chief of Staff, Value America, Inc., Charlottesville, VA, 07/1999–03/2000.

Deputy Under Secretary—International Affairs, The Pentagon, 102 Army Pentagon, Washington, DC, 10/1995–06/1999.

Director, WWII 50th Anniversary, DOD Committee, The Pentagon, 102 Army Pentagon, Washington, DC, 07/1991–09/1995.

10. Government experience: List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.

When I left Federal service in July 1999, I was asked to be a consultant with the Department of the Army, without compensation, and I accepted the position. I was never asked to perform any service. This appointment began in October and expired in October.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

I served on the Vestry of The Falls Church (Falls Church, VA). I am soon resigning on the Board of Enterprise Development.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Political contributions of Elizabeth and Claude Kicklighter from March 2002 until March 2007:

2002:		
16 April 2002	Republican National Committee	\$125.00
4 September 2002	RNC Presidential Victory Team	125.00
2003:		
31 January 2003	Republican National Committee	150.00
13 March 2003	Republican National Committee	150.00
7 July 2003	National Rep. Senatorial Committee	100.00
9 September 2003	Republican National Committee	150.00
19 September 2003	National Rep. Senatorial Committee	100.00
12 December 2003	National Rep. Senatorial Committee	100.00
2004:		
11 March 2004	Bush-Cheney 2004	350.00
29 August 2004	Bush-Cheney 2004	100.00
29 August 2004	Republican National Committee	150.00
31 October 2004	Republican Presidential Trust	300.00
28 December 2004	Republican National Committee	450.00
2006:		
13 February 2006	Republican National Committee	500.00
10 July 2006	Friends of George Allen	145.00
12 October 2006	Republican National Committee	125.00
2007:		
None to Date.		

My wife decides on our political contributions and signs all the checks. Even though I rarely am consulted of these contributions, I support her decisions and the right to make these contributions.

14. Honors and Awards: List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognition for outstanding service or achievements.

Presidential Citizen Medal, 1995

Eisenhower Liberation Medal (presented by the U.S Holocaust Memorial Council)

Department of Defense Distinguished Civilian Service Award, 1999

Department of Defense Medal for Distinguished Public Service, 2006

Department of Defense Medal for Distinguished Public Service, 1996

Department of Defense Medal for Distinguished Public Service, 1994

Declaration for Exceptional Civilian Service presented by Secretary of the Army, 1998

Distinguished Service Medal with two Oak Leaf Clusters

Defense Superior Service Medal

Legion of Merit with three Oak Leaf Clusters

Bronze Star Medal

Meritorious Service Medal with Oak Leaf Cluster

Army Commendation Medal with four Oak Leaf Clusters

Secretary of Defense Identification Badge

Joint Chiefs of Staff Identification Badge

Army General Staff Identification Badge
 Order of Aaron and Hur, awarded by the Chaplain's Corp
 Argentina Order of May
 French Order National du Merite
 Korean Order of National Security Gukseon Medal
 Silver honorary Order of Freedom from the Republic of Slovenia

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Wrote an article for Jane's Magazine describing NATO's Central European Pipeline operation in 1981. Received a check for \$200, which I returned to the publisher.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years of which you have copies and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate Committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

CLAUDE M. KICKLIGHTER.

This 14th day of March, 2007.

[The nomination of LTG Claude M. Kicklighter, USA (Ret.), was reported to the Senate by Chairman Levin on March 28, 2007, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on April 12, 2007.]

[Prepared questions submitted to Lt. Gen. James R. Clapper, USAF, (Ret.), by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. By any measure, the Goldwater-Nichols legislation has been a resounding success. I see no need for modification at this time; if confirmed, I will be alert to the need for change.

DUTIES

Question. What is your understanding of the duties and functions of the Under Secretary of Defense for Intelligence (USD(I))?

Answer. If I am confirmed for this position, my primary responsibility will be to support the Secretary of Defense in discharging his intelligence-related responsibilities and authorities under title 10 and title 50, U.S.C. This includes:

- Serving as the principal intelligence advisor to the Secretary of Defense.
- Exercising authority, direction, and control on behalf of the Secretary of Defense, over all intelligence organizations within the Department of Defense (DOD).
- Ensuring that intelligence organizations in DOD are manned, organized, trained, and equipped to support the missions of the Department.
- Ensuring that intelligence organizations in the Department which are part of the National Intelligence Community are responsive to the Director of National Intelligence (DNI), in the execution of the DNI's authorities.
- Ensuring that the combatant forces, the Joint Chiefs of Staff, and the civilian leadership of the Department are provided with appropriate intelligence support.
- Ensuring that counterintelligence activities in the Department are conducted and managed efficiently and effectively.
- Overseeing DOD personnel, facility, and industrial security to ensure adequacy, efficiency, and effectiveness.
- Serving as the Program Executive for the Military Intelligence Program (MIP), and ensuring that the Defense components of the National Intelligence Program (NIP) are robust, balanced, and in compliance with guidance and direction of the DNI.
- Ensuring the Department provides the U.S. Congress with intelligence-related information sufficient to execute its oversight responsibilities.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I have spent over 43 years in the profession of intelligence—in the military, in civil service, in the private sector, and in education. I have had the privilege and distinction of serving for a total of over 8½ years as Director of two of the national intelligence (and combat support) agencies, the Defense Intelligence Agency (DIA) (1991–1995) and the National Geospatial-Intelligence Agency (NGA) (2001–2006).

I retired as a Lieutenant General in 1995, after a 32-year career in the United States Air Force. My assignments prior to my 4 years as Director of DIA almost exclusively focused on intelligence and included the Chief of Air Force intelligence during Operations Desert Shield/Desert Storm and as Director of Intelligence (J-2) for three combatant commands (COCOMs): U.S. Forces, Korea; Pacific Command; and Strategic Air Command. I commanded an airborne Signals Intelligence unit in combat, a national-level scientific and technical intelligence center, and an Air Force Electronic Security Wing. I served two year-long combat tours during the Southeast Asian conflict; during the second, I flew 73 combat support missions in EC-47 aircraft over Laos and Cambodia.

During my 6½ years in the private sector, I served as an executive in four professional service companies in which my focus was on the Intelligence Community as a client. I both led business units, and served as a subject matter expert.

I have served on numerous government boards, commissions, panels, advisory groups, and task forces, addressing intelligence-related issues. I was a member of the Downing Assessment Task Force which investigated the Khobar Towers bombings in 1996; was vice chairman of a congressionally-mandated commission chaired by former Governor Jim Gilmore of Virginia on the subject of homeland security; and was a member of the National Security Agency Advisory Board for over 4 years. I am currently the Chairman of the Central Intelligence Agency (CIA) External Advisory Board, and am the Intelligence and National Security Alliance Distinguished Professor of Intelligence at Georgetown University.

I have worked with the Departments of State, Justice, Energy, and Homeland Security in the course of my career, and served for a total of 11 years in the Pentagon for administrations of both political parties. I understand intelligence at the strategic, operational, and tactical levels, having served in all three.

In sum, I believe I have the length, breadth, and depth of professional experience in intelligence at all levels, functions, and dimensions which distinctly qualifies me to serve as the USD(I).

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the USD(I)?

Answer. Yes. If confirmed, and if the Secretary of Defense concurs, I would restructure the organization of the USD(I) staff along functional lines, and patterned

after the DNI staff, as Director McConnell intends to restructure it. This would help synchronize the DOD intelligence components with the DNI.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of Defense would prescribe for you?

Answer. First and foremost, I believe the Secretary would expect me to discharge the duties and functions—both explicit and implicit—outlined in the response to the previous question under “Duties.”

Second, the Secretary is committed to fully supporting the DNI, and ensuring that the DNI has visibility and authority over the full range of intelligence activities in the Department, without abrogating his statutory obligations.

Third, given the magnitude of the responsibilities of the USD(I), he will look to me to transfer any non-intelligence functions and activities now residing with the position of the USD(I), to the appropriate staff element.

RELATIONSHIPS

Question. In carrying out your duties, how will you work with the following:
The Secretary of Defense.

Answer. I will attempt to relieve the Secretary of as many burdens in the intelligence domain as possible, will keep him informed, and seek his guidance and direction when appropriate.

Question. The Deputy Secretary of Defense.

Answer. I would endeavor to keep the Deputy fully informed, seek his guidance and direction when appropriate, and support him in his role as the alter ego of the Secretary.

Question. The Under Secretaries of Defense.

Answer. Each of the other four under secretaries has broad-gauged responsibilities and authorities, which impact on intelligence in DOD, and vice-versa. I intend to promote dialogue, understanding, and mutual support.

Question. The Assistant Secretary of Defense for Network and Information Integration (ASD(NII)).

Answer. My approach with the ASD(NII) would be the same as with the under secretaries. The relationship here needs to be especially close, since this office represents key enablers for the conduct of intelligence activities.

Question. The Deputy Assistant Secretary of Defense for Detainee Affairs.

Answer. I am not directly familiar with this office, since I did not have occasion to interact with it in my former capacity as Director of NGA. I would expect to foster close collaboration, particularly with respect to oversight of detainee interrogation policy and procedures.

Question. The Deputy Assistant Secretary of Defense for Special Operations/Low Intensity Conflict.

Answer. In the current world environment, the importance of Special Operations has grown. There are pervasive interactions between intelligence and special operations which entail mutual support and clear lines of responsibility and oversight. I intend to pay close attention to this relationship.

Question. The Service Secretaries and the Service Intelligence Directors.

Answer. Having served as a Service Intelligence Director, I believe I understand their perspectives and responsibilities to man, organize, train, and equip the intelligence forces in each of the Services. As such, I intend to support their needs, and work with them to address these needs primarily through the management of the MIP. I would also maintain an open dialogue with the Service Secretaries, providing guidance and direction in intelligence and related issues, when appropriate.

Question. The General Counsel of the DOD.

Answer. I am acutely aware of the crucial role the DOD General Counsel plays, particularly because of the many complex legal issues that arise in intelligence, security, and counterintelligence. I have worked closely with this office as an Intelligence Agency Director twice, and as Chief of Air Force Intelligence. I am very interested in maintaining the current superb level of support from the Office of the DOD General Counsel, particularly the senior “embedded” attorney assigned to Office of the Under Secretary of Defense for Intelligence (OUSD(I)), for liaison and requisite legal guidance.

Question. The Commanders of the Combatant Commands.

Answer. I believe it is a prime obligation of the USD(I) to ensure that the intelligence needs of the CCOMs are fulfilled. I have served as the Director of Intelligence in three of these commands, and have visited all of them many times during the course of my career. I believe I have an informed perspective on each of them. I intend to have an open dialogue with them, and, when possible, travel to each of

the commands to understand current needs and concerns. I would anticipate working closely with the respective Directors of Intelligence (J-2s) on a routine basis.

Question. The Directors of the Defense Intelligence Agencies.

Answer. Having served as Director of two of these agencies (DIA and NGA), spent 8 years at National Security Agency (NSA), and worked closely with the National Reconnaissance Office (NRO) for over 30 years, I believe I have a reasonably sound grasp of the cultures, capabilities, and shortfalls of each of them. I intend to work closely with the agency directors to: (1) stay informed as to what they are doing; (2) assist them when possible; (3) and provide direction and guidance when appropriate.

Question. The Under Secretary of the Air Force.

Answer. This relationship will be different than it was when I most recently served as Director of NGA. Traditionally, this position has been dual-hatted as the Director of NRO; currently, these two positions are separate. I believe this is a much sounder arrangement. The Under Secretary's remaining responsibilities still intersect with those of the NRO, so I would anticipate coordination and collaboration.

Question. The Director of National Intelligence.

Answer. I would anticipate a very close relationship with the DNI. The Secretary of Defense wishes to synchronize DOD intelligence with the DNI. Eight of the 16 components of the Intelligence Community are embedded in DOD, which constitute a substantial portion of the Nation's intelligence capabilities and resources. I believe there are improvements that can be made by clarifying this relationship institutionally, and partnering with the DNI to manage intelligence as a seamless enterprise. I agree with Admiral McConnell's priorities, and intend to work cooperatively with the DNI to bring them to fruition, without compromising the Secretary's statutory responsibilities and authorities. On a personal level, Admiral McConnell and I have been professional colleagues and personal friends for over 20 years. I anticipate a very close, productive relationship with the DNI.

Question. The Director of the National Counterterrorism Center (NCTC).

Answer. I worked with the Director of the NCTC when I served as Director of NGA. I was committed to the success of the NCTC then, and would, if confirmed, continue to support the mission of this crucial organization. I know and greatly respect Vice Admiral Redd, having worked with him when he was a member of the Weapons of Mass Destruction Commission.

Question. The Deputy Directors of National Intelligence.

Answer. I would intend to foster a collaborative relationship with the DDNI's, as well as with designated counterparts on the USD(I) staff. It would be my intent, if confirmed, to pattern the USD(I) staff after the Office of the Director of National Intelligence (ODNI), as Admiral McConnell intends to restructure it. This, we are both convinced, will promote closer coordination with counterparts. I have known and worked with all the Deputy Directors of National Intelligence, and would leverage these past productive working relationships, as the USD(I).

Question. Officials in the Department of Homeland Security with intelligence responsibilities.

Answer. I would intend to bolster the close relationship I had with these officials when I served as Director of NGA. I am familiar with these elements, since NGA provides dedicated support to them, particularly during national security special events, and in the wake of natural disasters such as Hurricanes Rita/Katrina. I have known the current Assistant Secretary for Intelligence, Charlie Allen, for over a quarter of a century; he is a respected professional colleague and close personal friend, and I would anticipate a continued close and collaborative relationship.

MAJOR CHALLENGES, PROBLEMS, AND PRIORITIES

Question. In your view, what are the major challenges that will confront the USD(I)?

Answer. Since I am nominated but not confirmed, I do not have an inside perspective, but believe there are sets of issues that are virtually perpetual, which I would outline as follows:

- Internal to USD(I): There are organizational, structural, and personnel issues that will have to be dealt with arising from a change in leadership.
- Internal to DOD: Collectively, there are challenges confronting all of the eight intelligence components of the Department. Similarly, each has component-centric issues and challenges. If confirmed, I will have to select and rank those which merit the attention from the USD(I) level. This includes—by way of example, but not exhaustion—acquisition challenges at NSA, NGA, and the NRO; human capital issues across all components; programing and financial management issues; oversight concerns involving the

nexus of the needs of national security and civil liberties; the balancing of resources to satisfy many competing requirements, et cetera. Above all, of course, are the continuing challenges involved in ensuring intelligence support to our forces in harm's way, particularly in Iraq and Afghanistan. This includes—again, by way of selected examples—intelligence support to thwarting improvised explosive devices, sharing intelligence with coalition forces, ensuring the flow of intelligence to and through the “last tactical mile” (or, perhaps more aptly, the “first tactical mile”); countering the adversary use of the internet; and substantially improving foreign language capabilities.

- **Intelligence Community:** A major challenge (and an opportunity, as well) is to crystallize the relationship with the DNI. Challenges here include sharing and collaboration between and among the “stovepipes;” overhauling security policies; improving acquisition; clarifying roles and responsibilities in clandestine activities, building on the success of the National Clandestine Service; and transforming analysis.

Question. What do you anticipate will be the most serious problems in the performance of the functions of the USD(I)?

Answer. This question infers to me “what are the internal obstacles to optimum performance of the USD(I) staff in the discharge of its functions and responsibilities?”

It appears to me that the current organizational structure of the USD(I) is neither optimized for the missions it must perform, nor postured for the relationship that should exist with the DNI. The lack of a designated full-time deputy has hindered internal coordination. Moreover, I do not believe the current staff is large enough to fulfill their existing responsibilities.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. See answer below.

Question. What management actions and timelines would you establish to address these problems?

Answer. See answer below.

Question. What broad priorities would you establish in terms of issues which must be addressed by the USD(I)?

Answer. I would cite the organizing principles of General Templar, the successful architect of the British counterinsurgency campaign in Malaya:

- Get the priorities right
- Get the instructions right
- Get the organization right
- Get the right people into the organization
- Get the right spirit into the people
- Get out of the way so they can get on with it.

If confirmed, I would intend to use the short tenure I will have as an advantage, by focusing on the issues I have outlined in the responses to the earlier question on major challenges, and driving progress with a sense of urgency.

Accordingly, I anticipate promulgating a “Campaign Plan”—a concise, yet comprehensive statement of strategic intent, in which I would describe objectives, priorities, and instructions, to reinforce those of the Secretary and Deputy Secretary. This will be the vehicle I would use to articulate a common understanding, and to elicit a common commitment by all DOD intelligence components, to a shared set of goals.

I would hope to roll out this “Campaign Plan” very early in my tenure. In doing so, I intend to consult with the four Agency Directors and the four Service Intelligence Chiefs to gain their “buy-in.” I would intend to capitalize on the initiative already underway to build integrated ground architecture, and to harmonize that with similar efforts underway by the DNI. This will form the basis for real-time collaboration and data dissemination to the warfighter. I would intend to empower the component heads by delegating the authorities necessary to lead their components, and in so doing ensure that USD(I) is an enabler, not an impediment, to their success.

I would rely upon them. I have “been there, done that,” both as an Agency Director (twice), a Service Intelligence Chief, and a J-2 (three times), so I know their respective perspectives. I would demand that they lead and manage their respective components as part of the enterprise—and then hold them accountable—just as I wanted to be treated when I held these positions.

I would particularly engage the active participation of the Service Intelligence Chiefs—who these days are understandably consumed with operational issues—in

the dynamics of DOD intelligence. Their tactical military perspectives are crucial. I would plan to engage actively with the Military Intelligence Board, and to invigorate the Senior Military Intelligence Officer Conferences as a forum to engage all the component leadership.

Staff members who are expert only in DOD must be rotated to the agencies, Services, or COCOMs to gain “life experiences,” (in accord with the emphasis on “joint duty” for the entire Intelligence Community). Overseers must be at least as knowledgeable as those whom they oversee. Similarly, other experts need to be brought in to deal with new and changing challenges, to replace dedicated but out-dated bureaucrats.

Where appropriate, I would intend to travel to commands with component heads or their senior representative, involving them in problem identification and resolution.

I would look for ways to implement small, quick-reaction capabilities, which often get lost in the wake of the “big ticket” programs.

I would impose a “Ten-Day Rule” for staffing issues and making decisions, acknowledging that many issues are complex and perpetual.

I would intend to conduct an in-progress review of human intelligence activities, both within the Department (to include the involvement of Special Operations), and externally with the CIA and the National Clandestine Service.

In sum, I would quote from LTC John Nagl’s landmark book, “Learning to Eat Soup With a Knife.” While nominally a comparison of the British experience in Malaya to that of the American effort in Vietnam, it is really about cultural change, or more precisely, about the manner in which organizations fail to adapt to change. Nagl cites an instructive exchange between Field Marshal Montgomery and Colonial Secretary Lyttelton, as they contemplated the way ahead in Malaya:

“Dear Lyttelton:

Malaya.

We must have a plan.

We must have a man.

When we have a man with a plan, we will succeed.

Not otherwise.

Montgomery.”

I trust the committee, and in turn the full Senate, will support this man with a plan.

INFORMATION SUPERIORITY

Question. One major criticism of the creation of the Office of the USD(I) was the separation of intelligence from the Department’s other information-intensive functions (such as command, control, information systems, Chief Information Officer, and cyberspace defense) and the creation of a new Assistant Secretary position to manage the latter (the ASD(NII)). Critics argued that it was unwise to split these functions, since they are inherently closely related and should be integrated as part of a strategy for achieving “information superiority.” The counterargument was that the intelligence function had become so important and complex after September 11 that it required full-time attention at the under secretary level.

Do you believe that the USD(I) and ASD(NII) positions should remain separate?

Answer. Yes. I regard the establishment of the position of USD(I) as long-overdue recognition of the importance, magnitude, and complexity of intelligence. There is no more rationale for subordinating intelligence to the stewards of the means for conveying and protecting it, than for any other form of information. Virtually any endeavor in DOD—operations, logistics, acquisition, medical, personnel, as well as intelligence—are all information-intensive. The ASD(NII) now has a holistic perspective to all forms of information, not just intelligence. It is in a better position to look across all information domains, and promote integration, robust networking, and security.

Question. If you do think the positions should remain separate, do you think that there are adequate mechanisms in place for coordination and integration of the two broad functions?

Answer. Again, I do not have the “insider” perspective, but it is my impression that sufficient coordination and integration mechanisms for the two functions do exist. If confirmed, I would certainly plan to verify that this is so, and would take appropriate action if I see need for improvement.

INFORMATION SHARING

Question. There are still strong barriers to sharing, or allowing access to, the mass of intelligence data that has not been included in finished reports or analyses and approved for dissemination within the Intelligence Community.

In one response to the problem, Congress mandated an “information sharing pilot” program between the NSA and the DIA’s Joint Intelligence Task Force for Combating Terrorism (JITF-CT), which provided access for JITF-CT analysts to some NSA databases containing unevaluated or “raw” intelligence. This pilot program demonstrated that U.S. persons’ privacy can be fully protected by giving non-NSA analysts the same training that NSA analysts receive in minimization procedures, subjecting the non-NSA analysts to the same auditing procedures, and ensuring that non-NSA analysts would be disciplined the same as NSA analysts for any transgressions. Since this pilot concluded, NSA and DIA have negotiated a Memorandum of Understanding (MOU) making access permanent. This MOU is now available to other intelligence agencies as a model agreement for broadening access to NSA terrorism information (but not information collected under the Terrorist Surveillance Program).

Question. Do you support extending the access that DIA’s JITF-CT has gained to NSA databases to other organizations?

Answer. Like the NSA/DIA “information sharing pilot” mandated by Congress, NSA and NGA embarked on a similar arrangement whereby NGA employees were given access to selected NSA “raw” databases in the interest of collaboration between the disciplines of signals intelligence (SIGINT) and GEOINT. The centerpiece for this relationship was the GEOCELL, but the approach was expanded to other collection and analytic challenges. The agreement I struck with General Hayden, then Director, NSA, was that any NGA employees who were given (selected) access to SIGINT data had to abide by the same rules as NSA employees, i.e. training, compliance with U.S. Signal Intelligence Directive 18, auditing, and accountability for any transgressions. This program enjoyed great success, and is still extant. So, yes, absolutely, I would support selectively extending such access to other agencies and other issues, under the same ground rules.

Question. If this model can work for NSA’s sensitive SIGINT information, do you believe it would also work for CIA’s human intelligence databases?

Allowing outside analysts to access foreign intelligence data in the forms in which it is collected carries the risk that analysts will sometimes not understand it and could be overwhelmed by the volume of it. This concern has prompted proposals to augment access to raw foreign intelligence data with: (1) multi-disciplinary teams composed of experts from each of the collection disciplines (imagery, signals, and human intelligence) and led by all-source analysts; and (2) advanced information technology tools to help analysts search large data holdings for correlations and connections and to understand the results. Indeed, the individual intelligence agencies are exploiting this very technology as the means to cope with information overload. This technology could be used by analysts outside these agencies.

Answer. Yes, I do, with the provision of analogous ground rules.

Question. Do you support the concept of cross-agency and cross-discipline analytic collaboration, either virtually or through physical co-location, on the basis of common missions or targets where all the analysts have common access?

Answer. Yes, I do, when such arrangements make sense and hold the promise of better intelligence products, services, and solutions. My only reservation about such arrangements is that in the rush to proliferate and “universalize” them, tradecraft considerations are compromised. That is, one of the great strengths of our system of intelligence is the championing of the respective tradecraft by each of the intelligence disciplines. We must be careful not to homogenize all analysis; each form brings complementary attributes to the table, which serves to promote competitive analysis.

Question. Do you support the paradigm that the information gathered by the various collection agencies, such as CIA, NSA, and DIA, is not “owned” by those agencies, and those agencies not control decisions about who should get access to collected information?

Answer. Yes.

Question. Should the DNI, rather than individual agencies, decide who should get access?

Answer. Yes. The DNI should have benefit of input from each of the data “owners,” but the rule sets should be established by the DNI.

HOMELAND DEFENSE

Question. With the establishment of the positions of USD(I), the Assistant Secretary of Defense for Homeland Defense, and the Commander of Northern Command, DOD has been fundamentally reorganized to better address the critical homeland defense mission.

In your view, what challenges lie ahead in integrating the intelligence capabilities of DOD with those of the Department of Homeland Security and other associated Federal, State, and local agencies?

Answer. I believe there are two dimensions to this question.

One relates to intelligence support to military forces which are under the aegis of Northern Command (NORTHCOM). The relationship is straightforward and conventional—that is, intelligence support is rendered to NORTHCOM and its subordinate components, just as it would be rendered to any other COCOM.

The second relates to the support which may be rendered to the Department of Homeland Security, or some component of the Department, directly. This is primarily, but not exclusively, an issue for the agencies. In NGA's case, for example, virtually all of its products, services, and solutions traditionally employed in a foreign intelligence context can be applied in a domestic context. Two issues are relevant here: (1) legal constraints on domestic surveillance, and (2) potential competition for resources. It has been my experience that both concerns are manageable.

I think the Department of Homeland Security has a very important role to play, to broker, validate, and prioritize requirements from all of its constituents, particularly at the State and local levels. I do not believe it prudent to allow, for example, direct tasking of Intelligence Community components by State and local officials. There must always be a "lead Federal agency" to vet and sponsor such needs.

Question. Does DOD's existing requirements process adequately support the establishment of intelligence requirements for the homeland defense mission?

Answer. I do not have current information about how the process works now, but from my NGA experience, I thought it worked well.

Question. As a former Director of the NGA, do you believe that you had sufficient latitude and resources to assist domestic authorities in emergency situations, such as existed in the aftermath of the September 11 attacks.

Answer. Yes, I did.

Question. Are you satisfied that there is adequate oversight within the DOD on the domestic activities of the U.S. NORTHCOM?

Answer. I have no evidence to the contrary, but if confirmed, would be vigilant to concerns about domestic surveillance activities.

TRANSFORMATION

Question. Secretary Rumsfeld established transformation of the Armed Forces to meet 21st century threats as one of his highest priorities.

In your judgment, what is the role of intelligence in the overall transformation process?

Answer. Intelligence is a key enabler for transformation. I can think of no military capability or doctrinal tenet that would not be heavily dependent on and influenced by intelligence.

Question. Specifically for the Defense Intelligence Community, what do you believe transformation should mean?

Answer. I believe there are two meanings implied in this question. As indicated in the response to the previous question, intelligence is a key enabler for transformation writ large. While it is enabling department-wide transformation, intelligence must transform itself as well. This means transformation of policies, tactics, techniques, procedures, and technology.

Question. In your view, what transformational capabilities does our Intelligence Community require?

Answer. One could name a long list; some illustrative examples follow: We should ultimately acquire the global "god's eye" and "god's ear" collection and surveillance capability for foreign intelligence needs. We need a robust integrated ground architecture that is secure, consistent, reliable, and has multi-level security. We need much more automation to relieve analysts of tedious "grunt" work that can be done by computers (e.g. automatic target recognition, automatic feature extraction, to name two specific cases I am familiar with). We must improve collaboration and information sharing both internally within the Intelligence Community, and externally with partners and customers. We need to vastly improve language capability and proficiency.

THE ORGANIZATION OF DEFENSE INTELLIGENCE

Question. The defense intelligence structure has evolved over the years, most recently with the creation of the Defense Human Intelligence Service in 1996, the establishment of the NGA in 1997, the formation of the Counterintelligence Field Activity (CIFA) in 2002, the creation of the Joint Functional Component Command for Intelligence, Surveillance, and Reconnaissance, and the evolution of the Joint Intelligence Centers at the COCOMs into Joint Intelligence Operations Centers (JIOCs).

In your view, is the current organizational structure of defense intelligence the best structure to support military and national intelligence needs?

Answer. The current organization of the Intelligence Community and its Defense components are a product of a historical evolution which traces its heritage from the National Security Act of 1947 through the Intelligence Reform and Terrorism Prevention Act (IRTPA) of 2004. Whether what we have is the “best,” is heavily dependent on the criteria for “best.”

I would observe that if one were to start with a blank piece of paper and were tasked to design the optimum Intelligence Community for the environment of today and the future, we would probably end up with another design. But, “we are where we are.”

Question. If not, what changes would you recommend to the current structure?

Answer. I have given this matter a great deal of thought. At this point in time, I have no major recommendations for change. Both the DNI and the USD(I) are works in progress. I think we would be well served to allow them to mature before mandating yet more change.

In the future, however, it may be worth considering the stand-up of a cabinet-level Department of Intelligence, composed of the major “engines of intelligence.” Such a construct would provide products, services, and solutions in common to a wide variety of customers. Even after the IRTPA, we still have the basic organizational framework that has been built piecemeal since 1947. I believe that intelligence is so crucial to the safety and security of this Nation, that it could merit the stature and prominence represented by a full-fledged cabinet department. This is not to suggest that, under such a construct, the other cabinet departments—most notably DOD—would not still require robust organic intelligence capabilities. However, I see no prospect that such a radical change is feasible, so it is not something I would recommend at this time.

Question. Do you think that DOD and the ODNI are effectively integrated operationally?

Answer. No, I do not; this is not a criticism necessarily, but rather a function of a new arrangement and new relationships maturing. As stated previously, both organizations are works in progress. I have every confidence that integration, coordination, and collaboration will continue to improve.

Question. Do you believe that the ODNI is organized properly to enable efficient joint planning and execution of intelligence operations and activities?

Answer. I believe that neither the ODNI nor the USD(I) staffs are organized optimally to promote efficient collaboration and coordination. Both need restructuring; if confirmed, I intend to pattern the USD(I) staff after his reorganized DNI staff. Doing so will facilitate staff interactions and promote synchronization.

Question. For example, is there an analog to the DOD JIOC under the DNI? Should there be?

Answer. One component of the DNI structure, the NCTC, is “JIOC-like.” Otherwise, the DNI’s missions and responsibilities are not “operational” in the classic DOD sense.

HUMAN INTELLIGENCE AND SPECIAL OPERATIONS

Question. Former Secretary of Defense Rumsfeld emphasized enhancing the human intelligence capabilities of the DOD both within the Defense HUMINT Service and Special Operations Command (SOCOM). Military forces, and especially SOCOM forces, have been assigned the mission to conduct military operations against terrorists abroad. This mission requires that the military be prepared to act against terrorist targets in a wide variety of situations abroad. It has been asserted that DOD personnel have deployed to foreign countries and engaged in counterterrorism activities without the approval or knowledge of the cognizant Ambassador or the Chief of Station. Concerns have also been raised that some military activities constitute covert actions that under the law require a presidential finding.

Do you think that military activities in the areas of intelligence gathering, preparation of the battlefield, and the use of force, conducted pursuant to the counterterrorism mission, constitute covert actions under the law?

Answer. The term “covert action” is statutorily defined to mean “an activity or activities of the United States Government to influence political, economic, or military conditions abroad, where it is intended that the role of the United States will not be apparent or acknowledged publicly. . . .” Conversely, as I understand it, Congress also statutorily stipulated certain categories of activities which would not constitute covert action. They include acquiring intelligence, traditional counterintelligence, traditional operational security, traditional military activities, or administrative activities. Clandestine activities—a term that is not statutorily defined—are those activities conducted in secret, but which are, in an intelligence context, passive in nature. For me, the crucial distinction lies in whether an activity is “passive” (which is the case with intelligence activities) or “active” (which is the case with covert action). It is my understanding that military forces are not conducting “covert action.”

Question. Do you think that the (U.S.) ambassador in a country should always be informed of all military activities taking place in that country?

Answer. Yes. If confirmed, I would only have jurisdiction over DOD intelligence activities. My cardinal rule when I was the Director of DIA was that all military intelligence activities under DIA’s purview would be made known to, and approved by, the respective Ambassador and Chief of Station. I would, if confirmed, continue that policy.

Question. Do you think that coordination and cooperation among the DOD, the State Department, and the ODNI have been adequate regarding sensitive military operations abroad?

Answer. I am not in a position to answer this question authoritatively. If confirmed, I would certainly be attentive to this concern.

Question. To your knowledge, what is the Department’s policy with respect to acknowledging that the U.S. military personnel involved are members of the U.S. Armed Forces in the event that they are taken into custody by a foreign nation in which they are conducting these activities?

Answer. Assuming “these activities,” are “clandestine” (as opposed to “covert actions”), the operative DOD policy is to acknowledge the affiliation of military members in such a circumstance.

Question. What are your views regarding the recommendation of the 9/11 Commission that DOD take over responsibility for all so-called paramilitary missions?

Answer. I am personally opposed to this proposal. I think it would remove an “arrow from the quiver” of potential capabilities available to the President.

NEED FOR INDEPENDENT INTELLIGENCE ANALYSIS

Question. Intelligence analysis should be independent and free of political pressure that it reach a certain conclusion, including a conclusion that fits a particular policy preference.

If confirmed, would you ensure that all intelligence analysts within DOD, including those who may be seconded to offices that are not part of the defense intelligence structure, is free from such pressure?

Answer. Yes. Absolutely.

Question. What is your position on whether intelligence officers and analysts should be able to testify to Congress on their professional conclusions regarding a substantive intelligence issue even if those views conflict with administration positions?

Answer. I have hard-won personal experience in this regard. Accordingly, I have a very strong conviction that intelligence officers should be free to speak their mind before Congress. This is regardless of whether their views comport with administration positions or not, so long as it is made clear that such views are personal, not those of the administration.

CONTROL OF INTELLIGENCE AGENCIES WITHIN THE DOD

Question. The IRTPA of 2004 granted the DNI control over the preparation and execution of the NIP budget and tasking of national intelligence operations. However, IRTPA also contained language asserting that nothing in the act should be construed as to impair the authorities of secretaries of cabinet departments, and the Secretary of Defense has delegated “direction, control, and authority” over the national intelligence organizations within DOD to the USD(I)—the highest form of authority in the executive branch.

What are your views on the balance of authorities accorded in IRTPA to the DNI and to cabinet secretaries, particularly the Secretary of Defense?

Answer. In a sense, they appear to be evenly balanced. On one hand, Title I of the IRTPA ascribes extensive authorities over the Intelligence Community to the

DNI; on the other hand, section 1018 stipulates that these authorities are to be executed “. . . in a manner that respects and does not abrogate the statutory responsibilities of the heads of departments. . . .”

Question. What are your views on the extent of the grant of “authority, direction, and control” to the USD(I) over DOD national intelligence organizations?

Answer. The phrase “authority, direction, and control” is the highest expression of executive branch power and influence. The dictionary definitions of these terms are quite inclusive and encompassing. In practice, however, policies, practices, and procedures have evolved since 1947 so that the exercise of “authority, direction, and control” virtually always comports with the requirements of the (now) DNI, based upon mutual understanding. I have served as Director of two Combat Support Agencies, which also have national intelligence responsibilities. There is an art form to balancing both obligations. The more time I have spent in the Intelligence Community, the more I have come to appreciate the importance of both personal relationships among senior leaders and the value of established ways of conducting business. These factors are almost as influential as statutes and their interpretation.

Question. What type of relationship would you strive to establish, if you are confirmed, with the DNI to ensure that DOD interests in national intelligence are satisfied, that DOD adequately assists the DNI in discharging his responsibilities, and that the defense intelligence agencies are properly managed?

Answer. If confirmed, I intend to explore with Vice Admiral McConnell potential formal institutional arrangements that would serve to clarify the relationship between the DNI and the USD(I) so that not only DOD and DNI interests—but those of the Nation—are better served.

Question. Do you believe that the relationships, authorities, processes, and structures in place between DOD and the DNI provide sufficient influence for the DOD to ensure that the intelligence capabilities DOD will need in the future to prepare for and conduct military operations will be developed and acquired through the NIP?

Answer. Yes. There is a long history of the NIP (in its previous form as the National Foreign Intelligence Program) satisfying military requirements. I have seen no degradation in this practice. The USD(I) is in a strong position to influence such support. Moreover, the newly created MIP in DOD is much more coherent, and a better parallel to the NIP, than was the combination of the predecessor program, the Joint MIP and the aggregation of what was called Tactical Intelligence and Related Activities. These two programs (the NIP and MIP) provide a congruent programmatic basis for improved intelligence capabilities.

PERSONNEL SECURITY

Question. The Washington Post reported on February 7, 2007, that Admiral McConnell, in testimony before the Senate Select Committee on Intelligence, expressed the intention to alter the rules governing the granting of security clearances to U.S. citizens who are naturalized or born here to immigrant parents. Under existing rules, it is difficult for these citizens to gain security clearances if any of their family members live abroad or are not citizens. This hurdle makes it very difficult for the Intelligence Community to hire American citizens with much-needed language skills, cultural knowledge, and physical characteristics to assist in the war on terrorism, counterproliferation, counternarcotics, and other critical missions.

Do you agree with the view attributed to the DNI regarding the need to re-examine the rules and processes for clearing U.S. citizens in light of the pressing needs of the Intelligence Community for the skills our citizens possess?

Answer. Yes.

JOINT DUTY ASSIGNMENTS

Question. The Goldwater-Nichols Act mandated joint-duty tours for military officers as a condition for promotion and instituted processes intended to ensure that personnel serving in joint-duty billets are promoted at the same or higher rates as those who did not serve in joint-duty assignments. This measure was enacted in order to raise the quality of personnel serving in joint assignments, such as on the Joint Staff, COCOM staffs, and the Office of the Secretary of Defense, and to instill a joint perspective in the officer corps across the Armed Forces. By any measure, this requirement has paid enormous dividends. The 9/11 Commission urged adoption of similar requirements for Intelligence Community civilian personnel, to achieve the same goals—improving the quality of staff serving in community positions, and nurturing joint perspectives. The IRTPA of 2004 did not actually mandate the adoption of this reform, and, to date, the Office of the DNI has not acted on the 9/11 Commission recommendation.

The new DNI has indicated a strong desire to establish an ironclad joint tour requirement for Intelligence Community civilians. If confirmed, would you support this decision?

Answer. Philosophically, I am in agreement with Intelligence Community civilian employees diversifying their professional horizons through joint duty. I spent 9 years on active duty after the enactment of the Goldwater-Nichols Act, and experienced (endured) the evolution of the rules governing joint duty, particularly which billets "counted" for joint duty credit, and which ones didn't. As in all such initiatives which potentially have a profound impact on employees' careers and lives, the "devil will be in the details" of implementation. I would hope that the components of the Intelligence Community are granted some latitude to manage this program in a "crawl-walk-run" manner to achieve the objective.

Question. Would you support legislation in this area if the DNI judges it to be necessary?

Answer. Yes, but I would hope the program could be developed and executed without legislation.

ACQUISITION OVERSIGHT

Question. The National Defense Authorization Act for Fiscal Year 2003 and the IRTPA of 2004 mandated that Milestone Decision Authority (MDA) could no longer be delegated to, or exercised by, the Director of the NSA. Congress took this action because of serious deficiencies in NSA's systems acquisition capabilities that prevented the Agency from effectively modernizing SIGINT capabilities to meet new threats. Since Congress first acted to stimulate better executive branch oversight of NSA systems acquisition, NSA's transformation program, Trailblazer, has been terminated because of severe management problems, and its successor, Turbulence, is experiencing the same management deficiencies that have plagued NSA since at least the end of the Cold War.

What is your view of the seriousness of the acquisition management problems at NSA?

Answer. While I have some familiarity with acquisition issues at NSA, I am not sufficiently informed about current challenges to comment authoritatively.

Question. What are your views about the ability of current NSA personnel to effectively execute a transformation program?

Answer. I have the highest regard for the NSA workforce. I have no doubt about their ability to execute a transformation program.

Question. Do you think that the Turbulence activity should remain disaggregated and not managed as an integrated major program?

Answer. Again, I am not informed about the Turbulence activity. If confirmed, I would intend to become familiar with it, and then, in consultation with Director, National Security Agency and the DNI, decide what action should be taken.

Question. If confirmed, what actions would you take to strengthen oversight of NSA's transformation efforts?

Answer. If confirmed, I would first determine what oversight is currently underway, and work with the DNI staff to establish a coherent, systematic, and joint DNI/USDI (in conjunction with USD(AT&L)) oversight program.

COUNTERINTELLIGENCE FIELD ACTIVITY (CIFA)

Question. The DOD has established an organization called the CIFA. CIFA is reportedly charged with protecting military facilities and personnel and carrying out intelligence collection, analysis, and operations within the United States.

Do you believe that it is appropriate that DOD has such an organization (CIFA)?

Answer. Yes. It is imperative that foreign collection efforts against the Department are aggressively detected, and then neutralized. CIFA fulfills the counterintelligence mission at the strategic (in contrast to the operational or tactical) level. This is an inherent responsibility of the Department which I feel cannot be abrogated. It is equally important that the proper balance be struck between the counterintelligence mission on one hand, and the protection of civil liberties on the other.

Question. What is the appropriate division of functions and responsibilities between such a DOD organization and the National Counterintelligence Executive (NCIX) within the Intelligence Community?

Answer. CIFA's focus is on DOD equities, whereas the NCIX has a broader, national perspective. NCIX promulgates broad strategies; reaches out to industry, academic institutions, and other non-military entities; and it oversees the counterintelligence functions in other government agencies and departments. If confirmed, I will look for opportunities to promote closer collaboration between CIFA and the NCIX.

Question. Are you comfortable with CIFA reporting to the USD(I)?

CIFA is responsible for the TALON data base that was found to have inappropriately included information on U.S. persons, including reports on peaceful civilian protests and demonstrations inside the United States, in contradiction of Executive orders and the rules published by DOD.

Answer. Yes, I am comfortable with the current reporting chain, but if confirmed, I will explore other options.

Question. What are you(r) views on the steps that should be taken to preclude the possibility that CIFA or any other DOD organization deals inappropriately with information on U.S. persons?

Answer. I am strongly supportive of protecting civil liberties. The history of the Intelligence Community is replete with instances of abuse of civil liberties—well intended, but abuse nonetheless. The requisite elements of a program to prevent such abuse are: (1) clearly articulated and widely publicized policies; (2) training, both basic and refresher; and (3) a mechanism to verify compliance independently. I am given to understand that in the instant case, corrective actions have been taken to preclude the collection and inclusion of such inappropriate information. If confirmed, I would plan to familiarize myself in more detail with the corrective actions taken and underway, and their effectiveness. I will be particularly interested in determining how compliance is monitored independently.

ROLE IN ACQUIRING SPACE SYSTEMS

Question. If confirmed, what role do you anticipate you would have in the requirements process for, and in oversight of, the acquisition of space systems, including space systems for which milestone decision authority rests with either the Under Secretary of Defense for Acquisition, Technology, and Logistics or the DOD Executive Agent for Space?

Answer. I am not informed on exactly which space reconnaissance systems are under the milestone decision authority of either of these officials. If there are such systems under their purview, I would, if confirmed, expect to be heavily involved in these management processes, particularly the exercise of milestone decision authority.

INSPECTOR GENERAL REPORT

Question. On February 9, 2007, the DOD Inspector General (IG) issued a report titled "Report on Review of the Pre-Iraqi War Activities of the Office of the Under Secretary of Defense for Policy." That report concluded that the Office of the Under Secretary of Defense for Policy (OUSD(P)) "developed, produced, and then disseminated alternative intelligence assessments on the Iraq and al Qaeda relationship, which included some conclusions that were inconsistent with the consensus of the Intelligence Community, to senior decisionmakers." The DOD IG concluded that these actions were "inappropriate," and that "this condition occurred because the OUSD(P) expanded its role and mission from formulating Defense Policy to analyzing and disseminating alternative intelligence."

What are your views on the IG's report?

Answer. I have read both the DOD IG report on this matter and the OUSD(P) rebuttal. I think this episode is a regrettable example of apparent lack of trust in the analyses performed by the Intelligence Community. I note that this occurred before the establishment of the Office of the Under Secretary of Defense for Intelligence. If confirmed, and if such a situation were to arise again, I would hope to be involved, to ensure that: (1) policymakers and decisionmakers are fully supported; (2) that all potential intelligence alternatives are thoroughly explored and vetted; and (3) that any differing viewpoints are made known to all involved parties.

As a general comment, I am strongly opposed to any misrepresentation or distortion of intelligence.

Question. If you are confirmed, how would you ensure that DOD intelligence elements, as distinct from policy offices, engage in intelligence activities?

Answer. The first priority in this context is vigilance. Intelligence officials must be alert to attempts by those outside the Intelligence Community to engage in intelligence analysis. There are, however, no empirical criteria for determining whether intelligence is being distorted or misrepresented, or is simply being tested and subjected to alternative points of view. One man's legitimate "red team" is another man's inappropriate intelligence activity. To some extent, this is in the realm of beauty (or lack thereof) being in the eye of the beholder.

DOD INTELLIGENCE INTERROGATION POLICY

Question. DOD Directive Number 3115.09 assigns the USD(I) responsibility for providing oversight of intelligence operations, detainee debriefings, and tactical

questioning, and ensuring overall development, coordination, approval, and promulgation of DOD policies and implementation of plans related to intelligence interrogations, detainee debriefings, and tactical questioning.

Do you support the policy set forth in the July 7, 2005, memorandum issued by Deputy Secretary of Defense England stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes. I fully support this policy.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes. I fully support these standards.

Question. If confirmed, will you ensure that all DOD policies promulgated and plans implemented related to intelligence interrogations, detainee debriefings, and tactical questioning comply with the Common Article 3 of the Geneva Conventions and the Army Field Manual on interrogations?

Answer. If confirmed, I will ensure that all relevant DOD policies and plans comply with applicable U.S. law and international obligations, including Common Article 3.

Question. Do you share the view of the Judge Advocates General that standards for detainee treatment must be based on the principles of reciprocity, in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts?

Under DOD Directive Number 3115.09, the USD(I) is responsible for developing policies and procedures, in coordination with the Under Secretary of Defense for Acquisition, the DOD General Counsel, and the appropriate DOD components, to ensure that all contracts in support of intelligence interrogation operations include the obligation to comply with the standards of DOD Directive Number 3115.09 and exclude performance of inherently governmental functions in accordance with DOD Directive 1100.4 and that all contractor employees are properly trained.

Answer. I strongly hold the view that the manner in which the United States treats detainees may well impact how captured U.S. soldiers, sailors, airmen, or marines are treated in future conflicts. I believe that the Department's policies must be documented accordingly.

Question. What do you believe is the proper role of contractors in intelligence interrogation operations?

Answer. I believe it is permissible for contractors to participate in detainee interrogations, as long as they comply with the policies and guidance which govern DOD military and civilian interrogators. As I understand it, DOD contractors who conduct government-approved interrogations must be properly supervised and closely monitored throughout the interrogation process, and may not, themselves, approve, supervise, or monitor interrogations.

Question. What steps would you take, if confirmed, to ensure that intelligence interrogation operations are performed in a manner consistent with the requirements of the manpower mix and that contractors involved in such operations do not perform inherently governmental functions?

Answer. If confirmed, I would ensure compliance with relevant DOD directives.

These require that DOD contractors be trained and certified to the same standard as DOD military and civilian interrogators, that contract interrogators be properly supervised when conducting interrogations, and that contractors do not approve, supervise, or oversee interrogations. I would review, approve, and ensure coordination of all DOD component plans, policies, orders, directives, and doctrine related to intelligence interrogation operations, to include the role of contractors.

INTERROGATION TECHNIQUES

Question. An August 25, 2006, report by the DOD Office of the Inspector General titled "Review of DOD-Directed Investigations of Detainee Abuse" included the following finding: "The USD(I) in coordination with the Commander, U.S. Joint Forces Command, should develop and implement policy and procedures to preclude introducing survival, escape, resistance, and evasion (SERE) techniques in an environment other than training."

Do you agree with the recommendation of the DOD IG that SERE techniques should not be introduced into an environment other than training?

Answer. Yes. I fully agree with the DOD IG's recommendation and support the U.S. Joint Forces Commander's policy prohibiting Joint Personnel Recovery Agency personnel from participating in any aspect of the intelligence interrogation process.

Question. Has this finding been implemented by the USD(I)?

Answer. I am given to understand that the USD(I) fully supports the U.S. Joint Forces Commander's policy prohibiting Joint Personnel Recovery Agency personnel from participating in any aspect of the intelligence interrogation process. The OUSD(I) has requested that U.S. Joint Forces Command restate this prohibition in its interrogation policy.

Question. If confirmed, would you ensure that policies and procedures are developed and implemented to preclude the introduction of SERE techniques in an environment other than training?

Answer. If confirmed, I will ensure that the Commander of U.S. Joint Forces Command interrogation policy prohibits Joint Personnel Recovery Agency personnel from participating in any aspect of intelligence interrogation operation.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the USD(I)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents.

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR MARK PRYOR

INFORMATION SHARING

1. Senator PRYOR. Lieutenant General Clapper, what policies would you plan to implement to secure a more effective information sharing relationship to prepare State and local first responders to a terrorist event or natural disaster?

General CLAPPER. As a result of my experience on the Gilmore Commission, as well as my time as Director of National Geospatial-Intelligence Agency (NGA), I have become a strong proponent of sharing as much information as possible with first responders, within the constraints of law. If confirmed, I would work with the Director of National Intelligence (DNI) and the appropriate officials of the Department of Homeland Security and the Office of Information Sharing Environment to promote more timely and pervasive sharing of intelligence-related information to this constituency. As well, I would ensure that any requirements that Northern Command has in this area would be addressed.

QUESTION SUBMITTED BY SENATOR JAMES M. INHOFE

OPEN SOURCE INTELLIGENCE

2. Senator INHOFE. Lieutenant General Clapper, when you were Director of the NGA, you were a champion for using open source information, including commercial imagery to support the intelligence mission. Given the changing nature of the threats we face and the availability of open source information, do you plan to continue the work you did at NGA to encourage and expand the use of open source data within the broader defense intelligence mission? The committee is aware of

agency initiatives to enrich classified information with open source, but unfortunately they have suffered from inconsistent funding and support.

General CLAPPER. If confirmed, I would most definitely emphasize the utility and more pervasive use of open source information in the broader defense intelligence context. If a DOD Coordinator of Open Source information has not been designated, I would move to so designate someone at a senior level to serve as the parallel with the DNI's Director of Open Source.

[The nomination reference of Lt. Gen. James R. Clapper, Jr., USAF, (Ret.), follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 29, 2007.

Ordered, That the following nomination be referred to the Committee on Armed Services:

James R. Clapper, Jr., of Virginia, to be Under Secretary of Defense for Intelligence, vice Stephen A. Cambone.

[The biographical sketch of Lt. Gen. James R. Clapper, Jr., USAF, (Ret.), which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF LT. GEN. JAMES R. CLAPPER, JR., USAF, RETIRED

James R. Clapper, Jr., has devoted over 4 decades of service to the Nation in the profession of intelligence—in the military, in industry, in civil service, and in education.

He has the distinction of having served as director of two national intelligence agencies for a total of over 8½ years—the Defense Intelligence Agency (DIA) 1991–1995, and the National Geospatial Intelligence Agency (NGA) 2001–2006.

He retired as a Lieutenant General in 1995, after a 32-year career in the United States Air Force. His assignments prior to his 4 years as Director of DIA almost exclusively focused on intelligence and included the Chief of Air Force intelligence during Operations Desert Shield/Desert Storm and as (another singular distinction) Director of Intelligence for three combatant commands: United States Forces, Korea, Pacific Command, and Strategic Air Command. He previously commanded an airborne Signals Intelligence (SIGINT) unit in combat, a national-level scientific and technical intelligence center, and an Air Force SIGINT Wing. He served 2-year-long combat tours during the Southeast Asian conflict; during the second, he flew 73 combat support missions in EC-47s over Laos and Cambodia.

During his 6 years in industry, he was an executive in three successive professional services companies, where his focus was on the Intelligence Community as a client. He both led business units and served as a subject matter expert, expanding business and increasing revenue in all three cases.

He has served as a consultant and advisor to Congress and the Departments of Defense, Energy, and Homeland Security, and as a member of many government panels, boards, commissions, and advisory groups. He was a member of the Downing Assessment Task Force which investigated the Khobar Towers bombings in 1996, and was vice chairman of a congressionally-mandated commission chaired by former Governor Jim Gilmore of Virginia on the subject of homeland security. He has testified in Congress numerous times, and in Federal court as an expert witness on intelligence tradecraft.

He holds a bachelor's degree in government and politics from the University of Maryland, a master's degree in political science from St. Mary's University in San Antonio, TX, and an honorary doctorate in strategic intelligence from the Joint Military Intelligence College, where he taught as an adjunct professor. He now occupies the Intelligence and Security Alliance Chair at Georgetown University's School of Foreign Service, as Distinguished Professor of Military Intelligence.

His military awards include two Defense Distinguished Service Medals, the Air Force Distinguished Service Medal, and a host of other United States military and foreign government awards and decorations. His civilian awards and recognition include designation as one of the Top 100 Information Technology Executives by Federal Computer Week Magazine in 2001 and receipt of the NAACP National Disting-

guished Service Award. He has received three National Intelligence Distinguished Service Medals, the Department of Defense Distinguished Civilian Service Award, the Coast Guard's Distinguished Public Service Award, and the Presidentially-Conferred National Security Medal. He was the 2006 winner of the prestigious William Oliver Baker award in recognition of lifetime achievement in the National Intelligence Community.

He now is the Senior Vice President/Chief Operating Officer of DFI-International Government Services, Washington, DC.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Lt. Gen. James R. Clapper, Jr., USAF, (Ret.), in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
James Robert Clapper, Jr., (Nickname: Jim).
2. **Position to which nominated:**
Under Secretary of Defense for Intelligence.
3. **Date of nomination:**
29 January 2007.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
14 March 1941; Fort Wayne, IN.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Susan Terry Clapper.
7. **Names and ages of children:**
Jennifer Coakley, 40; Andrew Clapper, 35.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
B.A., University of Maryland, 1959-1963 (5 June 1963).
M.A., St. Mary's University, San Antonio, TX 1965-1970 (31 May 1970).
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Sep. 95–Mar. 97: Executive Vice President, Vredenburg, 1835 Alexander Bell Drive, Ste. 400, Reston, VA.

Mar. 97–Nov. 98: Principal, Booz-Allen-Hamilton, 8283 Greensboro Drive, McLean, VA.

Nov. 98–Aug. 01: Vice President, Intelligence Programs, SRA International, 4350 Fair Lakes Court, Fairfax, VA.

Sep. 01–Jun. 06: Director, National Geospatial Intelligence Agency (NGA), 4600 Sangamore Road, Bethesda, MD.

Jun. 06–Sep. 06: Special Assistant to the Deputy Director, NGA, 4600 Sangamore Road, Bethesda, MD. (CIA Retiree Transition Program).

Aug. 06–Present: INSA Distinguished Professor of Intelligence, Security Studies Program, Edmund A. Walsh School of Foreign Service, 3600 N St., NW, Washington, DC.

Oct. 06–Present: Senior Vice President & COO, DFI International, Government Services, 1717 Pennsylvania Ave, NW, Ste. 1200, Washington, DC.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

None currently.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Member, Board of Directors, GeoEye, 21700 Atlantic Blvd., Dulles, VA.

Member, Board of Directors, 3001 Inc., 10300 Eaton Place, Suite 340, Fairfax, VA.

Member, Senior Advisory Board, Sierra Nevada Corp, 444 Salomon Circle, Sparks, NV.

Senior Advisor, Center for Strategic & Intl Studies (CSIS), 1800 K Street, NW, Washington, DC, (unpaid).

Advisor, U.S. Geospatial Intelligence Foundation, 2325 Dulles Corner Blvd, Ste. 500, Herndon, VA, (unpaid).

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

United States Geospatial Intelligence Foundation—Advisor to the Board of Directors.

Intelligence & National Security Alliance—Member.

Armed Forces Communications Electronics Association—Member of Intelligence Committee.

National Cryptologic Foundation—Member.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Principal Military Decorations and Awards:

Defense Distinguished Service Medal (2)

Air Force Distinguished Service Medal

Defense Superior Service Medal

Legion of Merit (3)

Bronze Star Medal (2)

Defense Meritorious Service Medal

Air Force Meritorious Service Medal

Air Medal (2)

Civilian Awards and Recognition:

National Security Medal (Presidentially-conferred)

National Intelligence Distinguished Service Medal (3)

DOD Distinguished Civilian Service Award

Coast Guard Distinguished Public Service Award
 NAACP Meritorious Service Award
 William Oliver Baker Award for lifetime achievement in intelligence

Foreign Decorations:

Republic of Korea, France, Norway, and Canada

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Have written or by-lined many articles which were “in-house” professional treatises—nothing for the broader public domain.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

As Director of NGA, I gave many briefings, speeches, talks, and presentations. I do not have copies.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JAMES R. CLAPPER, JR..

This 6th day of February, 2007.

[The nomination of Lt. Gen. James R. Clapper, Jr., USAF (Ret.), was reported to the Senate by Chairman Levin on March 28, 2007, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on April 11, 2007.]

[Prepared questions submitted to S. Ward Cassells, M.D., by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? Answer. No, only to enhance it where we might find an opportunity to do so.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. N/A.

DUTIES

Question. What is your understanding of the duties and functions of the Assistant Secretary of Defense for Health Affairs (ASD(HA))?

Answer. The ASD(HA) assists the Under Secretary of Defense for Personnel and Readiness and the Secretary of Defense in promoting and safeguarding the health

of military personnel and their families, retirees, and others eligible for DOD health benefits. The role is primarily one of setting health policies, in consultation with other ASDs, the Services, and their Surgeons General, and Service ASDs. These health policies include deployment health, both physical and mental. The ASD also has an important, though less direct, role in health education and research. Health Affairs is directly responsible for managing TRICARE, and the Uniform Services University.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. As a practicing doctor, teacher, researcher, university administrator, and Army Reserve colonel with two tours of duty in the last 2 years, including most recently in Iraq, I have an appreciation of the breadth, complexity, and urgency of DOD health issues. As I have had limited management experience I will need the guidance of DOD civilian and military leaders, and input from the troops and their families. In addition I will ask for help from colleagues at Center for Disease Control (CDC), National Institute of Health (NIH), Food and Drug Administration (FDA), Department of Health and Human Services (HHS), State, the World Health Organization, Red Cross, industry, and others who can help. In particular, I will seek guidance from Senate and House Members and their staffs whose expertise and dedication I have come to appreciate in working with them on military health research since 1995.

As a doctor, as a patient, I know that good medical care is comprehensive, coordinated, compassionate, efficient, preventive, and respectful of patient's privacy, time, and authority.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the ASD(HA)?

Answer. Yes, I need to learn more about DOD regulations and finances, in order to accelerate decisionmaking so as to get benefits and answers to injured troops and other beneficiaries.

Question. If confirmed, what duties and functions do you expect that the Secretary of Defense would prescribe for you?

Answer. In addition to force protection, readiness, deployment health, and TRICARE, the Secretary of Defense may call on the ASD(HA) for advice on civil/military operations and global health issues. The DOD has played an increasingly frequent and important role in disaster readiness and response, both in the U.S. and abroad. Health care is a critical part of this effort, and indeed the provision of health care and assistance in capacity-building (education and facilities) is proving to be a bridge to peace and a currency of diplomacy.

Question. In carrying out your duties, how will you work with the following:

The Under Secretary for Personnel and Readiness,
The Under Secretary of Defense (Comptroller),
The Assistant Secretaries for Manpower and Reserve Affairs of the Services,
The ASD for Reserve Affairs,
The Surgeons General of each of the Services,
The TRICARE Lead Agents,
The TRICARE Support Contractors,
The Designated Providers' Chief Executive Officers (i.e., Uniformed Services Treatment Facility CEOs),
Beneficiary Groups,
Department of Veterans Affairs (VA), and
Centers for Medicare and Medicaid Services.

Answer. If confirmed as ASD(HA) I will have the opportunity and duty to work closely with, and learn from, leaders in all the offices and organizations listed above. I know many of them, and will request meetings with the others, in person. Like most people, I have learned that most problems arise from poor communication. Success requires regular, frank meetings with partners and those we serve, consensus on near-term and long-term goals, simple, fair and transparent processes, and accountability. I am not embarrassed to ask for help, but also not afraid to stand up for the soldiers, sailors, airmen, marines, and their families.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the ASD(HA)?

Answer. The office is tasked, with continuously improving the quality of health services while also reducing inefficiencies. The challenges range from finding better ways to prevent and treat battlefield injuries to better ways to assess and treat subtle, complex, important conditions like post-traumatic stress and head injuries. Also

important is our readiness for potential threats such as epidemic diseases, especially as troops increasingly work and live in areas such as Asia and Africa where emerging infectious diseases often arise. Other important issues are safety (in the hospital, at work, and at home), obesity, and autism.

Administrative issues include the challenges of joint medical command, BRAC, the role of outsourcing, interaction with other DOD offices, Department of Health and Human Services, Department of Homeland Security, and the Veterans Administration. Finally, the office must assist with the recruitment and retention of dedicated and talented health care personnel. Every satisfied military medical professional can be encouraged to tell our story, safety in the hospital at work and at home, obesity and autism.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. My limited experience to date with DOD health care needs input from a broader group of providers, administrators, and especially beneficiaries. I need to review the data the office has gathered, ask for briefings, and get out in the field to ask questions and see for myself. But it seems likely that there are opportunities for improving services such as care of Post-Traumatic Stress Disorder (PTSD) and traumatic brain injuries (TBI), disability determination, extremity injuries and prosthetics. There may also be ways of improving, simplifying, and safeguarding electronic medical records, and making them portable—for care by private physicians or by the Veterans Administration. It may also be important to do more to foster innovation, to encourage and empower self-care, and to protect whistleblowers.

Question. What do you consider to be the most serious problems confronting the ASD(HA)?

Answer. The most important immediate issue is identifying the extent, causes, and correction of the problems that have been brought to light at Walter Reed Army Hospital. I also understand that the important work of the Mental Health Task Force has recommendations due in May, and the task force on the future of military health care will have their work completed late this year.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. Several commissions are addressing these issues and if confirmed I will do all I can to assist them and to be guided by their reports. If confirmed I plan to be a strong influence in ensuring our wounded warriors and families are well cared for after they receive care and in ensuring swift implementation of improvements recommended.

PRIORITIES

Question. If confirmed, what broad priorities would you establish for policy and program actions which must be addressed by the ASD(HA)?

Answer. The rank order of priorities of the problems noted above, and others I may become aware of, needs to be determined once I have had the opportunity—if confirmed—of studying the issues from the inside.

WALTER REED ARMY MEDICAL CENTER

Question. Concern over outpatient facilities and care for severely wounded service-members at Walter Reed Army Medical Center has been a highly-visible issue over the past several weeks.

Based on your experience, do you believe the issues raised about care and facilities at Walter Reed could be occurring at other military medical hospitals or facilities?

Answer. I do not know. I visited Walter Reed's main hospital to see patients and attend conferences several times over the past 2 years but did not see Building 18. What I did see there, and at the naval hospitals at Bethesda, Balboa, and Portsmouth, and Army hospitals such as Beaumont and Evans, and at our facilities in Hawaii, Bangkok, Cairo, Doha, and Kuwait, and when I was a patient in Ibn Sina (the 10th Combat Support Hospital) in Baghdad, is excellent inpatient care and satisfied patients. The areas were clean but not deluxe, or even very cheering. I did not see or hear about the very real, intolerable problems in Building 18. That shows how management issues and priorities can be missed unless you look systematically, and listen carefully.

I did experience firsthand some errors and delays with my benefits, but not the unacceptably slow, complex, and stingy disability system outlined in recent press accounts. Ongoing patient and family surveys, a vigilant press, staff reports up the chain of command and outside it when justified, are critical to our providing the care our troops deserve.

Question. If confirmed, what actions would you take to examine care for the wounded from the battlefield until discharge from DOD medical treatment?

Answer. Battlefield care is excellent. I know that from the data, from what I have seen as a doctor and as a patient in Iraq. The civilian trauma and public health doctors are learning from lessons we learned in Iraq and Afghanistan. Still, it requires vigilance, innovation, and incentives for continuous improvement.

Question. What would you expect your role to be in support of ongoing study of these issues by the Presidential Commission and the DOD Independent Review Group?

Answer. To assist them in any way they request, and if not, then to ask to be involved. It is important for the groups to hear from my office, if confirmed, to provide perspective, and for us to hear from them.

TRICARE

Question. If confirmed, what would be your short-term and long-term goals for TRICARE?

Answer. TRICARE is the best health plan in the country and it must only get better. My plan would be to look for opportunities to make the link stronger between the direct care system and our vast purchased care network even stronger in order to make the benefit better, more seamless, of higher quality, and look for opportunities to make it more affordable. One of TRICARE's strengths is that it is very inexpensive for the beneficiary compared to other health plans. I believe we need to look for ways to leverage the best public and private sector ideas to make our system an example the beneficiaries and our Nations' taxpayers can be proud of.

Question. If confirmed, how would you strengthen the partnership between the Department and the TRICARE support contractors that is necessary for the successful delivery of health care within the TRICARE Program?

Answer. I will have a wholehearted commitment to TRICARE. In the past few years, key performance measures for TRICARE have improved dramatically—for example, claims processing and customer satisfaction. Enrollment, especially for our retiree population has also increased. A key feature of my commitment will be to seek further improvements in the program, building on its many successes. There may be even more opportunities to learn from commercial health plan experience by building even stronger bonds with our many contract partners, to coordinate TRICARE with other Federal health care programs, and to better capitalize on the unique capabilities of military medicine for the good of the Nation and the world.

Question. Do you have any views on how health care support contracts could be restructured to incentivize effective disease management programs and cost-efficient delivery of health care services?

Answer. It is a good example of how the opportunities with the private sector can be leveraged. Future TRICARE contracts will continue the triple option health benefits package. We will continue to use an outcome-based approach where the government states the desired outcomes and the bidders are to determine how to meet these outcomes using, where possible, commercial best business practices. The timeframes for implementation of the contracts should assume that no significant benefit changes will occur during the procurement cycle. While the contracts will be designed, awarded, and administered centrally, regional oversight of health care will be delegated to the Regional Directors affirming the principle that health care is best administered and monitored locally. In structuring our support to the military, we cannot diminish the capabilities of the direct care system—and those skills that only military medical providers can and should do.

Question. There continues to be concern expressed by TRICARE beneficiaries about the adequacy and availability of health care providers in some areas of the country. While health care support contracts have access standards and timeliness requirements to ensure beneficiaries have access to appropriate providers within a reasonable period of time, this does not always happen. In addition, many beneficiaries who choose the TRICARE Standard option report a lack of availability of health care providers willing to accept new TRICARE patients.

Answer. From all reports, the TRICARE contracts are working well and have very robust networks. If a local problem exists, I will work to understand what it is and take steps to ensure network adequacy is improved.

Question. What recommendations, if any, do you have for improving the number and adequacy of providers under the TRICARE program?

Answer. I would begin by asking why some doctors are reluctant to contract with TRICARE. As a recent TRICARE provider at the University of Texas, I think the contracts can be simplified. I would take aggressive steps to appeal to health sys-

tems in the States through both our networks managers, our TRICARE regions, and through our Governors. I would also appeal to professional associations to help educate those provider networks on the service they could be providing for our Nations' men and women in uniform. We may also be able to do more to recognize and welcome new providers, such as presentations of awards by local servicemembers. In general, the average participation rate of providers accepting the TRICARE reimbursement rate is 96 percent. Our managed care support contractors are aggressively recruiting additional providers to join our networks. Where there are areas that are lacking certain specialties, the contractor together with the TRICARE Regional Offices initiates an action plan to address the concerns of those providers in the locality. In addition, TMA is in the process of implementing legislation to provide for locality-based reimbursement rates for those Services that are lacking in certain areas. This authority will improve health care access for all beneficiaries by targeting providers who are currently not participating in the TRICARE program.

COMMITMENT TO MILITARY RETIREES

Question. By law, DOD and the military departments must provide health care through the Military Health Care System to those who have retired from the uniformed services and their eligible family members.

What is your view of the importance of delivering health care services to military retirees and their family members in ensuring the overall readiness of U.S. Forces?

Answer. The commitment to delivering the highest quality care to all of our over 9 million beneficiaries is paramount. The retired servicemembers and their families, which is the vast majority of those we care for, are an integral part of clinical experience base that our providers and staff require in our Medical Treatment Facilities and in our Graduate Medical Education programs to develop, maintain, and advance their clinical skills.

Of course, military facility health care is a finite resource. The entitlement to payment for civilian health care services under TRICARE, now available to retirees over 65 as well as under 65, provides assurance of comprehensive coverage for our retirees even when military providers are not available.

RESOURCING MEDICAL BENEFITS

Question. Last year, DOD proposed an initiative referred to as "Sustain the Benefit" aimed at achieving savings in the Defense Health Program. This proposal would have phased in significant increases in TRICARE fees for military retirees under the age of 65 and increased copayments for prescriptions filled in retail drug stores for all categories of beneficiaries. A substantial portion of the projected savings were based on the assumption that retirees would elect to use their civilian employer's or some other health care plan in lieu of TRICARE.

If confirmed, would you support initiatives designed to save costs by discouraging retired military personnel from using their military health benefit?

Answer. The increasing cost of health care for the department is of great concern as it reduces its ability to fund other high priority capabilities. Congress directed the Task Force on the Future of Military Health Care which is now well into its deliberations and I have reviewed their charter. A key area of their review is the health care cost share structure between the beneficiaries and the government and I will carefully review their recommendations as we develop future initiatives along with other key stakeholders in the Department, in Congress, and with our coalitions and associations.

Question. Do you have other ideas to achieve savings in the Defense Health Care Program?

Answer. As I have reviewed the Military Healthcare System, there may be continuing efforts we can take to find cost savings. I will continue to work to improve the large TRICARE contracts to assure we are getting best value and, I believe, as all other health care systems have found, that we can incrementally improve our pharmacy benefits management to assure we are providing the most effective drugs at the best possible price. I also think that advancing the concept of "shared services" between the Services' medical departments and the Health Affairs/TRICARE Management Activity, as outlined in Secretary England's governance improvement memo makes sense. I see value in making incremental, sensible, and reasonable steps to improve governance, provides an excellent opportunity to reduce administrative duplication, create more effective partnerships and services, and be more efficient.

I strongly believe that faster and more effective implementation of our electronic health record, Armed Forces Health Longitudinal Technology Application, can also

save time and money and improve quality. Included in my initiatives will be to promote incentives for prevention and disease management.

Question. Adequate financing of the Defense Health Program has long been an issue. The President's budget request for fiscal year 2008 includes \$486.3 million in efficiency savings from military hospitals. The Surgeons General have testified that they cannot achieve savings of this magnitude. These so-called "efficiency wedges" have been used over the past 2 years by the Department in an attempt to force savings in military hospitals.

Do you feel that these efficiency wedges remain an acceptable financing approach?

Answer. If confirmed, I will examine the financing of the Defense Health Program in detail to determine the best way forward and the mechanisms we can use to assure that we adequately fund all elements of our system. I strongly believe that efficiencies can be promoted if we provide incentives for operating jointly, more efficiently, and with higher quality.

Question. What steps would you take, if confirmed, to more accurately project the cost of, and appropriately resource, both the military hospitals and private sector care contracts within the Defense Health Program?

Answer. If confirmed, I fully understand my responsibilities to oversee the Defense Health Program appropriation. Since 2001, the Military Health System has not required emergency supplemental appropriations or reprogrammings (with exception of hurricane recovery, global war on terror, the war on terror, and Avian Influenza)—which I believe clearly demonstrates that we have benefited from congressional and departmental financial support. Looking to the future, I do understand that in the fall of 2006, the department as well as Office of Management and Budget and external actuarial experts, did a thorough analysis of the private sector care requirements for the Department. I will review that effort. In addition I will continue to evaluate the Services' financial requirements to make sure that they are provided adequate resources to accomplish their complex and demanding missions.

CONVERSION OF MILITARY MEDICAL BILLETS TO CIVILIAN POSITIONS

Question. Conversion of certain military billets to civilian positions has been a key objective of the Department's transformation objectives. The committee has been concerned that in the area of medical services, which are needed in wartime and peacetime, such conversions could place both the quality and the effectiveness of military health care including care of the battlefield wounded, at risk.

What is your understanding of the extent to which civilian substitution for military medical billets has taken place in the Army, Navy, and Air Force?

Answer. In all efforts to become more efficient we must balance appropriate numbers of providers and medical personnel against the mission. We must also ensure a proper mix of specialists and military providers and support personnel. At the same time we need to avoid waste while maintaining depth in our forces for handling contingencies. It is my understanding that the military-to-civilian conversion effort was a consequence of a long and detailed examination, called appropriately, the Medical Readiness Review of the military medical force structure and billets. This review was done with the military departments as well as other Office of the Secretary of Defense activities. The analysis included an rigorous assessment of the cost of conversions, availability of civilian replacements with proper requisite skills and credentials, and the potential impact on the quality of and access to healthcare. Experience has shown that the Army successfully converted a considerable number of its military medical billets in the 1990s and today their civilian staffing at the MTFs often exceeds 50 percent civilians. The Navy and Air Force have done fewer conversions in the past. Currently, the secretaries of the military departments are certifying their fiscal year 2008 conversions to Congress in accord with the provisions of the National Defense Authorization Act for Fiscal Year 2007. If confirmed, I will oversee this conversion process, in collaboration with the service surgeons to assure that we do this effectively.

Question. If confirmed, will you examine the extent to which military-to-civilian conversions played a role in the understaffing of critical support positions at Walter Reed Army Medical Center, as well as a revaluation of conversion goals for all three Service medical departments?

Answer. I am unaware of any shortage in critical clinical positions but if confirmed I will work closely with the Army Surgeons General to assure that any such issues are effectively and immediately addressed.

MILITARY HEALTH PROFESSIONAL RECRUITING AND RETENTION

Question. DOD is facing severe shortages of military medical professionals needed for its peacetime and wartime missions. The Department relies on a combination of

bonuses and incentives to recruit and retain military health care professionals to provide care to military members and their families.

What are your views on the adequacy of existing bonus and pay incentive programs for both Active and Reserve components?

Answer. There is a delicate balance between being a steward of the taxpayers' money, in which role we must justify every increase in spending with proof that the increase will have a payback, versus being a champion for the uniformed health care providers. As we analyze the effects the Warfight war has on our professional population, we need to be able to use effective, competitive, and fair financial tools to be able to fill our gaps in the Active and Reserve Forces. The importance of balancing efforts to recruit and retain the right numbers of qualified individuals professionals to meet mission requirements is enormous. Having less than the optimum number of uniformed health care professionals may result in increased private sector care costs and lower medical force morale. It is important to properly manage recruiting, pay, and retention programs to ensure appropriate balance for Department missions and beneficiary needs. As a provider in the Reserve Force, I will bring a unique and current perspective to this issue.

Question. Based on your service in the Army Reserve, do you have any recommendations about the effectiveness of incentives for medical personnel to join the Reserve Forces?

Answer. I am not aware of barriers to recruiting and retention, especially in my current status. If those circumstances arise and I see shortfalls or barriers, I will work to understand what they are and take action to fix them.

SEAMLESS TRANSITION OF DISABLED SERVICEMEMBERS

Question. Recent hearings in both the House and Senate have examined the challenges faced by servicemembers who are undergoing disability evaluation and transitioning from the DOD to the Department of Veterans' Affairs (VA) for health care services.

What are the critical elements necessary for a seamless transition of health services from one agency's responsibility to another?

Answer. The critical elements for a seamless transition of health services from one agency to another are: a full understanding of medical care capabilities within both agencies by all medical providers involved; clear communications of the transition plan between providers in each agency and with the patient and patient's family; timely transfer of all pertinent medical records before or at the time of transfer of the patient; and, ongoing communication after the transfer of the patient between the medical providers in each agency and with the patient and patient's family.

Question. How can the transition for disabled servicemembers between DOD and the VA be improved, especially in the area of health care?

Answer. Improvements in the transition of health care between DOD and VA can be achieved by early and concise communications to servicemembers and their families about DOD and VA benefits and programs they are entitled to based on their military status and service. Two efforts would facilitate the early and concise communication we desire. The first would be to establish a program that assigns a specific DOD-VA team comprised of medical staff from both DOD and VA to support each patient and his/her family during the transition process. The second initiative would be to establish a single, user friendly disability evaluation system that is evidence based, medically endorsed, and most importantly, consistent with the civilian disability system.

Question. Do you have any views about improvements that can be made quickly to the Physical Disability Evaluation System, specifically the medical evaluation board process?

Answer. DOD's Physical Disability Evaluation System is designed to evaluate an individual's loss of capability to function once the medical condition has reached maximum benefit from continued medical care. The period of time necessary to make that assessment varies widely from person to person, and is dependent on individual rates of healing and response to restorative therapies. The medical evaluation board process requires that maximum benefits of medical care be completed. A change that would streamline the process would require care providers to make an early, initial medical prediction of capability after maximum benefits of medical care are complete, and once the patient's medical condition is stable, then proceed with the disability benefits determination based on that assessment. This would require frequent re-evaluation of medical capability as the healing process is continuing, and possible redetermination of benefits.

TRAUMATIC BRAIN INJURY

Question. In Iraq and Afghanistan, our troops are facing the threat of Improvised Explosive Devices (IED). Because of improved body armor, troops are surviving IED blasts, but frequently suffer TBI from the concussive effects of the blasts.

What tools are needed by medical personnel to adequately diagnose and treat TBI on the battlefield, and do you think the Services have the capabilities in Iraq and Afghanistan?

Answer. Our medical personnel are doing a superb job identifying and treating the severe TBI incidents on the battlefield. Far forward surgical care is saving lives, and neurosurgical care is a significant contributor. In August 2006 we started using the Military Acute Concussion Assessment (MACE), along with a clinical practice guideline, to help identify and document mild and moderate TBI. Educating troops and their leadership about the importance of this evaluation as soon as possible after even a mild injury, as well as educating medical providers on this new tool, is our current challenge.

Question. What is your understanding of the ability of medical personnel to diagnose and treat TBI in the continental United States medical facilities?

Answer. One constant in medicine is "to make a diagnosis, the doctor must consider it." Our medical personnel are very aware of the potential for TBI in our personnel, both at home and on the battlefield. There is no easy, definitive test, (such as a blood test) available today to quantify the nature and extent of injury associated with TBI. However, we are extending the use of the MACE as a tool used throughout the DOD system, and it will certainly help identify patients who had TBI and determine if they still have symptoms. The majority of mild TBI does not require specific treatment other than time to heal, but we now believe we must document the incident and an assessment of acute signs and symptoms as close to the time of injury as possible. Treatment for persistent symptoms is available in our neurology clinics.

Question. Should DOD have a comprehensive plan for prevention, diagnosis, and treatment of TBI, and if confirmed, what actions would you take to develop such a plan?

Answer. DOD is implementing a comprehensive plan to identify and treat TBI. Use of the MACE whenever a servicemember is dazed, stunned, or knocked out will document these events and trigger education for the patient and medical follow-up. DOD will be asking individuals if they experience any trauma to the head on the annual Periodic Health Assessment. These questions will also be added to the Post Deployment Health Assessment and the Post Deployment Health Reassessment. Understanding what the causes of these injuries are will direct a comprehensive preventive program.

Question. What is your understanding of the adequacy of the DOD physical evaluation system and its ratings to fairly address the conditions that result from TBI?

Answer. The DOD Physical Evaluation Board evaluates impaired function and rates individuals against established criteria for disability compensation. When that disability is severe, the system works very well. As we shape a comprehensive DOD/VA system to assess, diagnose, and treat mild and moderate TBI, we may need to modify the disability evaluation system.

POST-TRAUMATIC STRESS DISORDER

Question. Army leaders testified recently that some military doctors are reluctant to diagnose servicemembers with PTSD because of their concern that it could stigmatize them, resulting in possible harm to careers.

What is your understanding of the scope of the problem of diagnosing and treating PTSD in the Armed Forces?

Answer. The biggest problem with diagnosing and treating PTSD in the Armed Forces is the same as that in the civilian world—having the individuals recognize they have a problem and to then seek care. DOD is educating its personnel about PTSD. DOD also assesses servicemember concerns and symptoms of PTSD and related mental health issues upon return from deployments and again 3 to 6 months later. Individuals who identify symptoms are medically evaluated and referred for further diagnosis and treatment if needed. PTSD and other mental health conditions are treatable.

Question. If confirmed, what actions would you take to ensure that health care providers are appropriately trained and guided in diagnosing PTSD?

Answer. DOD and the VA have developed clinical practice guidelines for the diagnosis and treatment of PTSD. Continuing Medical Education is a requirement for all practicing physicians and DOD has many educational resources available to not

only ensure our providers have the expertise to diagnose PTSD, but that our servicemembers and their families will be educated.

Question. What steps would you take, if any, to help destigmatize PTSD and other mental health conditions?

Answer. The first step to destigmatize PTSD and other mental health conditions is education of our military population. A major next step would be to validate that those who seek and receive mental health care are successful in continuing their military careers. Concerns about loss of status with peers, leaders, and family members, and loss of military career are the two major causes for individuals not seeking care for PTSD and other mental health conditions.

Question. The Army's Mental Health Advisory Team (MHAT) has made three separate assessments over the past several years detailing the immediate effects of combat on mental health conditions of U.S. soldiers deployed to Iraq. The most recent study, MHAT III, found that multiple deployers reported experiencing higher levels of acute stress, and that overall levels of combat stressors are increasing. Some reports allege that the DOD is deliberately underdiagnosing PTSD due to a shortage of resources.

Answer. Acute stress and combat stress are very different conditions from PTSD. The fact that DOD has been consistently evaluating the mental health concerns and symptoms of its deployed forces is important. Military departments have deployed mental health providers in theater to provide the prevention and treatment needed for combat stress and for mental health conditions. Resources have not driven mental health care availability. Identifying needs for mental health providers has driven the provision of mental health care capabilities.

Question. Based on your experience, do you believe that PTSD is underreported and underdiagnosed?

Answer. I believe PTSD is underreported by the individuals who have it because of the stigma in our society about mental health. I also believe that it is therefore under diagnosed because these individuals are not seen by medical providers. However, I do believe that medical providers are appropriately diagnosing PTSD, perhaps even over-diagnosing PTSD, because the diagnostic criteria have not changed for over a decade.

Question. If confirmed, how would you assess whether we currently have the resources needed to address the mental health needs of servicemembers during deployment in Iraq and Afghanistan and after their return?

Answer. I would assess the adequacy of mental health resources by reviewing the data from assessments in theater and after deployment (post-deployment health assessment and post-deployment health reassessment), and by reviewing the medical care being provided in-theater and after return home in our DOD system and the VA system. Additionally, I would survey the servicemembers and their families for their evaluation of the adequacy of our programs to meet their mental health needs.

Question. Do you believe that the DOD disability ratings fairly address the disabilities that result from PTSD?

Answer. The DOD disability rating system is designed to evaluate an individual's functional capability. A diagnosis of PTSD requires that the individual have some impairment, along with other symptoms. With early diagnosis and treatment, it is believed that the impairment will resolve, while other symptoms may persist or become intermittent. Therefore it is difficult to definitively respond if the system "fairly" addresses disabilities that may no longer be present.

RESEARCH ON GULF WAR ILLNESS

Question. Both DOD and VA have conducted research on Gulf War Illness stemming from health concerns of veterans.

What is your assessment of the evolution of research in this field to date?

Answer. More research has been done to understand the health concerns of veterans of the Gulf War than on any other war. The recent Institute of Medicine review of the medical literature from this research has stated that while there is no unique syndrome that has been identified, the Gulf War veterans experience a wide spectrum of symptoms at a rate nearly double that of military personnel who were on active duty at that time but did not deploy. The medical challenge is to better understand the causes of symptoms in our patients, particularly for the subjective symptoms.

Question. What, in your view, are the promising areas for further research, especially for the treatment of symptoms resulting from neurological damage due to chemical exposures?

Answer. Medical science is developing a better understanding of brain function and brain physiology due to better tools and better understanding from research

that has been ongoing in the fields of mental health, traumatic brain injury and the spectrum of neurological diseases like Alzheimer's, Parkinson's disease, amyotrophic lateral sclerosis, and others. Research focused on relating symptoms to specific brain functions, insults, or neurotransmitter changes would have major importance, not only to Gulf War veterans, but to humanity.

Question. If confirmed, what approach would you take to assess the core biomedical research programs of DOD to ensure that the objectives and resourcing of such research is consistent with future potential threats to U.S. Forces?

Answer. The core biomedical research programs in DOD are requirements driven, and those requirements are based on military unique issues. The governance of the biomedical research is through the Armed Services Biomedical Research Evaluation and Management Committee which the ASD(HA) co-chairs.

QUALITY OF DOD MEDICAL CARE

Question. Please describe your knowledge of quality improvement programs in the civilian sector, and comment on how they would compare to military health care quality programs.

Answer. Dr. Casscells, please comment herefrom 30 years of experience with quality improvement processes at university, community, and government hospitals, and health maintenance organizations, I have seen these processes improve. They work best where there are electronic medical records, and committed leadership that fosters a sense of teamwork and energy, not intimidation. From my limited (2 years) experience in Army Medicine I believe the process is taken very seriously. From my service on GE Healthcare's Advisory Board, I am keen to assist the Lean/Six Sigma initiative and process now underway at DOD.

Question. If confirmed, what role would you take in the monitoring of quality and patient safety throughout the military health care system?

Answer. There has been an increasing awareness of the need to improve the quality of care and patient safety in our medical facilities across the Nation. The Institute of Medicine's reports "To Err is Human" in 1999 and "Crossing the Quality Chasm" in 2001 sounded the alarm regarding the scope of the problem and the opportunities for improvement. Improving Quality and Patient Safety have been high priorities for the health systems with which I have worked, and finding solutions to the problems we confront requires a multifaceted, team approach: Quality care begins with well-trained and qualified professionals who work together as a team. These professionals must be provided appropriate ancillary support services and facilities to create a safe "environment of care" focused upon the needs of patients and their families. We must have automated systems for documentation of care, surveillance, supply support, and to meet the information needs of the health care team. Periodic assessment of organizational programs and procedures by the Joint Commission and other certifying organizations is important. Finally, senior leaders must be committed to supporting health care quality and safety by establishing strategic objectives and providing the resources necessary to achieve them.

I am aware that the military health system has been engaged in addressing quality and safety along with its civilian counterparts. Military professionals, graduate medical education programs and facilities also meet the same standards as those established for civilian sector professionals and organizations. If confirmed, I can assure you that providing high quality, safe health care for the men and women who serve, their families and all other beneficiaries of the Military Health System will be one of my highest priorities.

DENTAL BENEFITS

Question. The committee has increasingly heard complaints that DOD dental benefits are less attractive than those offered by other employers. Also, DOD beneficiaries, especially members of the Reserve components, have shown a reluctance to use their dental benefits.

If confirmed, what action would you take to evaluate the effectiveness of dental programs for the active duty, reservists, and retirees and their dependents?

Answer. I would expect my staff to evaluate the benefit on an ongoing basis, including analysis of enrollment and utilization, and surveys of members to determine their satisfaction. I would expect to work with Congress to make any necessary changes to the program.

ROLE OF PHYSICIANS IN INTERROGATIONS

Question. Under current DOD policies, a physician is authorized to participate in the interrogation of a detainee with the approval of the ASD(HA).

If confirmed, what criteria would you use for deciding to allow a member of the medical profession to participate in interrogations?

Answer. I have not yet been briefed on this issue. In the civilian sector, I am aware that law enforcement agencies often use medical professionals to assist them with their investigations. Medical professionals also assist the courts in assessing the mental health of those accused or convicted of crimes. However, I am not familiar with the current role of military medical professionals in interrogations. If confirmed, I will review the use of military medical professionals in interrogations.

Question. National and international medical organizations have taken positions in opposition to DOD policy on this matter.

Do you think that DOD should have a different ethical standard for its physicians than those adopted by recognized national and international bodies?

Answer. I believe that military physicians and other medical professionals should adhere to the same high level of ethical standards that we expect of our physicians in civilian practice. Based upon my experience as an Army reservist, and having observed military providers firsthand in Iraq, I can tell you that military medical professionals are exceptionally high in both clinical quality and ethical standards. I am also aware that even national and international professional bodies may disagree about what constitutes the ethical course of action for some of the more controversial ethical issues facing healthcare professionals, such as support for individuals at the end of life, certain types of medical research, or involuntary treatment of the mentally ill or others trying to harm themselves.

Question. If so, why?

Do you think that DOD's current policy needs to be re-evaluated?

Answer. If confirmed, I will review DOD's policy on use of medical professionals in interrogations.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the ASD(HA)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR ROBERT C. BYRD

FIXING THE MILITARY MEDICAL SYSTEM

1. Senator BYRD. Dr. Casscells, you are about to take charge of a bureaucracy that many would describe as broken. Our service men and women, now more than ever, are depending on your leadership to put the military medical system on a new track. How do you intend to examine the operations of the elements under your office to make changes as appropriate?

Dr. CASSCELLS. In the past year, the Military Health System took several important steps in the multi-year transformation that will prepare our military forces and our military medical forces for the future. Our focus has been to develop greater joint capabilities and joint operations. I am committed to achieving jointness, interoperability, greater efficiency, improved outcomes, and world-class education, research, and medical care.

2. Senator BYRD. Dr. Casscells, what do you see as your greatest challenges?

Dr. CASSCELLS. First, we must ensure that our wounded warriors receive the care and treatment that they expect and deserve. The Department is aggressively addressing weaknesses and looks forward to considering recommendations of the various groups and task forces which are reviewing the system at present. Second, the Department faces a tremendous challenge with the growing costs and long-term sustainability of the Military Health System. We need important changes in our great health benefit program. TRICARE, to ensure a superior benefit for the long-term. We need the help and support of Congress to achieve this goal.

3. Senator BYRD. Dr. Casscells, if you encounter resistance to making changes, are you prepared to report honestly to Congress about the problems that you encounter?

Dr. CASSCELLS. Yes. The Department is firmly committed to working closely and openly with Congress in order to protect the health of our servicemembers and to providing world-class health care to more than 9 million beneficiaries.

4. Senator BYRD. Dr. Casscells, there have been a number of efforts by the Under Secretary for Personnel and Readiness to reduce the cost of military medical functions. The Service Chiefs and the Surgeons General have testified that the first year cuts were difficult, but possible. They have also testified, however, that in the current and future years, these so called "efficiency wedges" will affect essential services. How are you going to deal with the pressures to reduce spending from your boss, an economist, and the medical needs of the individual soldiers?

Dr. CASSCELLS. The foremost responsibility that I share within the Office of the Secretary of Defense and Service Surgeons General is to provide quality care to the men and women of the Armed Forces and their families. No one in the Department believes we can measure the quality of care, or the compassion with which it is delivered by a financial yardstick alone. The Department, working with our beneficiary support activities and Congress, must continue to challenge itself to find innovative and effective solutions to excel in that stewardship.

5. Senator BYRD. Dr. Casscells, the exchange of information regarding military and veterans' medical and service records between the Department of Defense (DOD) and the Department of Veterans Affairs (VA) has never been particularly good. It is a continuing source of problems for individual service men and women, and frustrating for their families as well. How do you intend to approach this issue, and what solutions do you propose to fix it?

Dr. CASSCELLS. I recognize that the programs and benefits earned by servicemembers could not be delivered without cooperation between DOD and VA in the area of information sharing. I am also aware of the concerns regarding the time it has taken to establish the desired level of interoperability, and the resulting frustrations of providers, servicemembers, and their families.

In the last several years, DOD and VA have made impressive progress, and are leading the Nation in many ways in the sharing of electronic health information, but there is room for improvement. I intend to accelerate the efforts of DOD to achieve an even greater degree of electronic health information sharing with VA.

In the short term, I will focus on our most critically injured servicemembers by ensuring that the VA Polytrauma Centers receiving inpatient transfers from Walter Reed Army Medical Center, the National Naval Medical Center, and Brooke Army Medical Center also receive the radiology images and medical records for these patients electronically.

Another immediate focus will be ensuring the data we capture electronically in theater on injured and ill servicemembers is being made available to the VA for patients that present to VA for care. This will include information on inpatient and outpatient pharmacy and allergy data, laboratory and radiology results, and encounter notes.

I will also focus on including more data in the current bi-directional sharing of health information between DOD and VA for shared patients. My aim is to share data at the most critical points first, such as, the DOD medical records to the VA Polytrauma Centers, and then to leverage these efforts, and accelerate the extent of electronic health information sharing DOD and VA-wide.

I also intend to personally monitor, and be engaged in, to the extent necessary, the efforts recently started to determine the right approach for a joint inpatient electronic medical record application for DOD and VA. Done right, this will support the needs of both Departments and help ensure continuity of care. The timing is right for an initiative such as this. With the full deployment of DOD's electronic health record—Armed Forces Health Longitudinal Technology Application—across the Military Health System accomplished, DOD is poised to begin focusing on incor-

porating documentation of inpatient care into AHLTA. My understanding is that VA needs to modernize the inpatient portion of their electronic health record. I will ensure we do not lose this opportunity to continue building on our significant achievements in sharing electronic health information across department lines in support of the men and women who serve and have served this country.

QUESTION SUBMITTED BY SENATOR MARK PRYOR

AID ORGANIZATIONS

6. Senator PRYOR. Dr. Casscells, as the Assistant Secretary of Defense for Health Affairs, you will be working closely with organizations dedicated to our wounded soldiers, sailors, airmen, and marines. What is your understanding of organizations like the Army Emergency Relief and Air Force Aid Society, and what roles do you see them playing with Veterans Affairs issues?

Dr. CASSCELLS. The Army Emergency Relief and the Air Force Aid Society are two incredibly beneficial organizations. Both are privately funded, non-profit organizations that exist to help with the emergency financial needs, such as food and rent, of their respective Service active-duty personnel, retirees, and family members. Because of the legal ramifications, I do not see a direct link with them in the Department's interface with the VA. However, in the course of advising personnel on making a transition to veteran status, the existence of such organizations would certainly be present in the discussion, especially in dealing with short-term financial issues.

[The nomination reference of S. Ward Casscells, M.D., follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
February 26, 2007.

Ordered, That the following nomination be referred to the Committee on Armed Services:

S. Ward Casscells of Texas, to be Assistant Secretary of Defense, vice William Winkenwerder, Jr., resigned.

[The biographical sketch of S. Ward Casscells, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF S. WARD CASSCELLS, M.D.

Samuel Ward Casscells III, was born March 18, 1952, in Wilmington, DE. He received the B.S. in biology cum laude from Yale in 1974, and the M.D. magna cum laude from Harvard Medical School in 1979, winning the Reznick Prize for his research with Nobel Laureate Bernard Lown, M.D.

His residency in medicine was at the Beth Israel Hospital and Harvard Community Health Plan, and his cardiology fellowship at Massachusetts General Hospital, with a Kaiser Fellowship in clinical epidemiology at the Harvard School of Public Health.

From 1985 to 1991, Dr. Casscells served in the Cardiology Branch at the National Institutes of Health, followed by a sabbatical year at Scripps Institutes of Medicine and Science in La Jolla, CA, working under Nobel Laureate Roger Guillemin, M.D., Ph.D.

Dr. Casscells joined the University of Texas at Houston in 1992. From 1994 to 2000 he served as the Levy Professor and Chief of Cardiology at UT-Houston Medical School and Hermann (now Memorial Hermann) Hospital and Associate Director for Cardiology Research at the Texas Heart Institute/St. Luke's Episcopal Hospital. Dr. Casscells established the President Bush Center for Cardiovascular Health in 1997. In November 2000 he was awarded the John Edward Tyson Distinguished Professorship of Medicine. In 2001 the university added the titles of Professor of Public Health and Vice-President for Biotechnology. In 2004 the Texas Heart Institute named him Director of Clinical Research.

Dr. Casscells is primarily involved in patient care, teaching and research on vulnerable atherosclerotic plaque (detection and prevention of heart attack and stroke) with James T. Willerson, M.D. He was the first to identify influenza as a cause of heart attacks. In addition, he is known for his work in growth factors, web-based health education, disaster medicine, and the costs, ethics, and policy implications of new technologies.

Dr. Casscells serves on the editorial boards of *The American Journal of Cardiology*, *The Texas Heart Institute Journal*, *Health Leader*, and *The Journal of the Royal Society of Medicine*. He formerly served on the board of *The Journal of Vascular Medicine and Biology*, and from 1993–2004 was Associate Editor of *Circulation*.

He was a co-founder of Selective Genetics, Inc., and Volcano Corporation, and currently serves on the board of Volcano, and SpectraCell, Inc. He served on the board of Lifeline Systems, Inc., until its acquisition by Philips in 2006. He serves on advisory boards for GE Healthcare, Pepsi, GlaxoSmithKline, RediClinics, and Roche.

His current nonprofit activities include board service at BioHouston, the Yes Preparatory School, and the Prostate Cancer Foundation.

In 2004, Dr. Casscells established the Alliance for NanoHealth with Rice University, UT MD Anderson Cancer Center, Baylor College of Medicine, Texas A&M, and the University of Houston. He is also a director of the UTHSC–M.D. Anderson–G.E. Center for Advanced Biomedical Imaging.

Dr. Casscells has served since 1992 on the Board of Directors or Advisory Board of the American Heart Association's Houston affiliate. He was President of the Houston Cardiology Society from 1995 to 1996. Dr. Casscells has also served on the boards of the Society of Vascular Medicine, the Association of Professors of Cardiology, and the University of Houston Law School's Institute of Health Law and Policy, and the International Center for Medical Technology. Since 1996 Dr. Casscells has been listed in *Who's Who in Medicine*, in *Science and Engineering*, . . . in *Education*, . . . in *America*, . . . in *the world*.

In 1997, Dr. Casscells was elected to the Association of University Cardiologists, and in 2000 to the American Clinical and Climatological Association. In January 2001, Dr. Casscells was appointed to President Bush's Health Care Advisory Committee. In 2001, he received the first CIMIT award from Harvard Medical School, Massachusetts General Hospital and MIT. In 2002, he was named a Hero of the Flood by the Memorial Hermann Hospital. In 2004, he received the American Telemedicine Association's General Maxwell Thurman Award.

The founding chairman of Defense of Houston, which won the 2002 Best Practice Award from the U.S. Department of Health and Human Services, Dr. Casscells also leads the U.S. Army's T5 program (Texas Training and Technology against Trauma and Terrorism). He and his team have assisted in many major disasters from the Oklahoma City bombing and Tokyo sarin gas attack to Hurricane Katrina. In January 2005, he organized a tsunami relief effort and conducted a technology needs assessment in Phuket. Dr. Casscells has served on numerous local, State, and national commissions on biosecurity. In 2004, he established the UT-Zogby poll on health issues. He was the medical honoree of the 2005 American Heart Association's Heart Ball in Houston.

A colonel in the U.S. Army Reserve, Dr. Casscells was mobilized in 2005 and assisted in the Army's response to Hurricanes Katrina and Rita, for which he was awarded the Army Achievement Medal. For guiding the Army's avian influenza preparedness, he received the Meritorious Service Medal. From August to December 2006, he served in Iraq as liaison to the U.S. Ambassador, Zalmay Khalilzad, receiving the Iraq Campaign Medal, Armed Forces Reserve Medal with M Device, and Joint Service Commendation Medal.

He and his wife, Roxanne Bell Casscells, a leader in historic preservation, have three children, and are members of Christ Church Cathedral.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by S. Ward Casscells, M.D., in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Samuel Ward Casscells, M.D., (Col., USAR).

2. **Position to which nominated:**
Assistant Secretary of Defense for Health Affairs.

3. **Date of nomination:**
February 26, 2007.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
March 18, 1952; Wilmington, Delaware.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Roxanne Bell Casscells.

7. **Names and ages of children:**
Sam, 04/18/92; Henry, 03/26/96; Lillian, 09/09/97.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Tower Hill School (Wilmington, DE), 9/1965-6/1970.

Yale College (New Haven, CT), 9/1970-5/1974, B.S., cum laude.

Harvard Medical School (Boston, MA), 7/74-05/79, M.D., magna cum laude.

Beth Israel Hospital (Boston, MA), 7/79-5/83, residency in Internal Medicine (Primary Care Track) and board certification.

Massachusetts General Hospital (Boston, MA), 7/82 to 06/85, Cardiology Fellowship and Board Certification.

National Heart, Lung, and Blood Institute (National Institutes of Health, Bethesda, MD), 6/85-6/91, Senior Staff Fellow, Chief of Clinical Service, then Senior Investigator.

Whittier Institute (Scripps Institutes of Medicine and Biology, La Jolla, CA), 6/91-6/92, Molecular biology fellowship.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

University of Texas Health Science Center at Houston, 6431 Fannin, Houston, TX, 1992-current.

Chief of Cardiology (1994-2001).

Vice President for Biotechnology (2001 to present).

John E. Tyson Distinguished Professor of Medicine (1999 to present).

Professor of Public Health (2001-present).

Director, Clinical Research, Texas Heart Institute (2004-present).

10. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.

1985–1992 Senior Investigator, Cardiology Branch, National Heart, Lung, and Blood Institute

1992–1998 Training Mentor-NIH Grant “Molecular and Cellular Mechanisms of Heart Disease”

1993–1998 Principal Investigator-NIH Grant “Molecular Atherectomy Using FGF Receptors”

1994–1998 Co-Investigator, NIH Grant “Genetically Enhanced Cardiovascular Devices”

1997–2003 Disaster Relief and Emergency Medical Services—DOD Grant #DAMD17–98–1–8002

1998 NIH(NHLBI)/FDA panel on Biomarkers

1997 FDA Advisory Panel on Circulatory Devices

1998–2000 Houston Task Force on Counterterrorism (appointed by Mayor Lee Brown)

2001 Bush-Cheney Transition Health Care Advisory Committee

2001 Mayor Lee Brown’s Medical Advisory Committee to the Emergency Medical Strike Team

2004 Mayor Bill White’s Homeland Security Policy Advisory Group

2005 Delegate, White House Conference on Aging

2005 Member, Congressman John Culberson’s Science and Research Advisory Committee

2005 Army mobilization for pandemic influenza readiness

2006 Army deployment to Iraq

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

See SF278.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

American Heart Association

American College of Cardiology

City Tavern Club (Washington, DC)

Texas Heart Institute Cardiac Society

Christ Church Cathedral

Association of University Cardiologists

American Clinical and Climatological Association

Metropolitan Club (Washington, DC)

Reserve Officers Association

Association of Military Surgeons of the U.S.

Association of the United States Army

Dancers

Allegro

Coronado Club

Harvard Club of Houston

Yale Club of Houston

Aesculapian Club (Harvard Medical School)

The American Legion

(NB: excludes sports clubs)

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

2004 Finance Committee, Rep. John Culberson Campaign

2004 Mayor Bill White’s Homeland Security Policy Advisory Group

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

	Year	Amount
Bell, R. Christopher	2002	\$1,000

	Year	Amount
	2004	500
Bentsen, Kenneth Jr.	2002	3,000
Bonilla, Henry	2003	1,250
	2006	500
Brady, Kevin	2004	1,000
Bush-Cheney 04	2004	1,000
Primary Inc.		
Bush-Cheney 04 Compliance Comm	2004	1,000
Bush, George W (Bush for President)	2000	1,000

Wohlgemuth, Arlene	2004	250
McCain, John	2007	2,100

14. Honors and Awards: List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

1978 Class Day Speaker, Harvard Medical School
1979 Leon Reznick Prize for Research, Harvard Medical School
1984–1985 Chairman, Committee on Scientific Affairs, Massachusetts Medical Society
1988 NHLBI Surgery Branch Teaching Award
1991 AHA Nation's Capital Affiliate Heartthrob Award
1995–1996 American Heart Association Central Research Review Committee
1996–1999 Who's Who in America, Who's Who in the World, Who's Who in Medicine and Science, Who's Who in Education
1996–2001 Theodore and Maureen O'Driscoll Levy Professor of Medicine
1996–2000 Dean's Excellence Award, UT Houston
1996–2000 President's Citation for Outstanding Achievements in Clinical Service, UTHSC
1998–2003 Advisory Board, University of Houston Health Law and Policy Institute
1998 Board of Directors, Association of Professors of Cardiology
1998 Houston Task Force on Counterterrorism
1999 American Heart Association Operation Heartbeat Committee
2001 Bush-Cheney Health Care Advisory Committee
2001 Founding Director, International Center for Medical Technology
2001–present John Edward Tyson Distinguished Professor of Medicine CIMIT (Harvard & MIT) Research Achievement Award
2001 Tropical Storm Allison Hero Award from Memorial Hermann Health Care System
2001–2007 Board of CAPCure, The Prostate Cancer Advocacy Group (Now called The "Prostate Cancer Foundation")
2001–2002 Mayor's Medical Advisory Committee to the Emergency Medical Strike Team
2001 Co-Founder, Volcano Therapeutics, Inc.
2002 Member, CSIS Panel on Bioterrorism
2002 U.S. Department of Health and Human Services' Best Practice Award for Defense of Houston

- 2003 Director, Texas Training and Technology Against Trauma and Terrorism
- 2004 General Maxwell Thurman Award, American Telemedicine Association
- 2004 Mayor Bill White's Homeland Security Policy Group
- 2004–2006 Zogby International Poll on Biotechnology
- 2004–2005 Board of Directors: Lifeline Systems, Inc., and Spectracell, Inc; Advisory Boards: Eli Lilly, Inc., Glaxo SmithKline, Inc., PepsiCo, Roche Laboratories
- 2005–2007 Cardiology Advisory Board, GE Healthcare
- 2005 American Heart Association's Heart Ball—Medical Honoree
- 2005 Delegate to The White House Conference on Aging
- 2005–2007 Member, Congressman John Culberson's Science and Research Advisory Committee
- 2005 Army Achievement Medal
- 2005 Army Meritorious Service Medal
- 2006 Advisory Board, RediClinics
- 2006 Advisory Board, YES Preparatory School in Houston
- 2006 Medical Journal Houston's Physician Spotlight
- 2006 Physician Spotlight for "O" Magazine "Avian Influenza" (February)
- 2006 Prostate Cancer Foundation's Honoree at Honor your Father event with the Houston Astros, Minute Maid Park, Houston (June)
- 2006 Texas Medical Center's Pandemic Flu Committee
- 2006 The Meritorious Achievement award presented by Iraq's Surgeon General and induction as honorary member of the Iraqi Military Medical Regiment
- 2006 Joint Service Commendation medal; Iraq Campaign medal; Armed Forces Reserve medal with M Device.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Sept 2002	Lecture: "Medicine in the year 2010" Bayou Club, Houston, TX
Sept 2002	Lecture: "Houston Preparedness and Bioterrorism" Intercontinental Hotel, The Houston Yale Club, Houston, TX
Apr 2003	Luncheon Lecture: "Medicine in 2010: The Triumph of Technology?" University of Houston, Houston, TX
Mar 2004	Lecture: "Nano-biotechnology" Bio/Medical Technology Club of Houston, Houston, TX
Oct 2004	Lecture: "Reengineering Medicine" Biolink USA-Ireland Biotechnology Meeting, Houston, TX
Feb 2005	Cardiology Grand Rounds "Tsunami Disaster Relief Efforts and Influenza", UT Health Science Center, Houston, TX
Feb 2005	Participant in Baker Institute (Rice University) Student Mock Congressional Hearing on NanoMedicine
Apr 2005	Milken Institute Global Conference Faster Cures Panel Member, "Starting Over with the FDA: Designing a Drug Approval System for the 21st Century", Beverly Hills, CA
Apr 2005	Milken Institute Global Conference Panel Member, "Emerging Diseases: Interdependence and Innovation", Beverly Hills, CA
Apr 2005	Presentation to the Houston World Affairs Council "Disease, Disaster and Political Instability: A Status Report on Tsunami Relief Efforts"
Nov 2005	Moderator "Preparing our Community for Influenza: A Multi-disciplinary Approach to Preparedness" – Hosted by Houston City Council, Texas Medical Center, and UT School of Public Health's Center for Biosecurity and Public Health Preparedness
Nov 2005	Guest Speaker at the Italian Embassy, Office of the Scientific Attache' in Washington, D.C. "A future without cancer"
Nov 2005	Keynote dinner speaker at the Massachusetts' Prostate Cancer's "7th

Annual Conquer & Cure Coalition," Cambridge, MA

Dec 2005 Participant on Panel "Avian Influenza and SARS: Global Challenges for Health Diplomacy" – James A. Baker III Institute for Public Policy, Rice University

Dec 2005 Keynote speaker at The New York Academy of Medicine "Medical Relief in Disaster Situations"

Feb 2006 Keynote speaker at the Army Medical Reserve annual banquet, Dallas, TX

Mar 2006 Invited Panelist, Council on Foreign Relations "Influenza," New York

Mar 2006 Invited Panelist on the U.S. Chamber of Commerce's Pandemic Influenza Simulation, Washington, D.C.

Mar 2007 Participant at the GE Healthcare Cardiovascular Innovation Symposium, New York City

(N.B.)

1. These presentations were given without a printed text, notes, slides or handouts but in some presentations I have shown Powerpoint photos of the tsunami, Hurricane Katrina, and Iraq .
2. The list excludes:
 - a) talks given to cardiologists and scientists on the role of influenza in the development of atherosclerosis, advances in detection and treatment of vulnerable atherosclerotic plaque to prevent heart attack and stroke, and
 - b) talks on technologies and non-technological ways to treat heart failure
 - c) talks to community groups about prostate cancer

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

S. WARD CASSCELLS.

This 20th day of March, 2007.

[The nomination of S. Ward Casscells, M.D., was reported to the Senate by Chairman Levin on March 28, 2007, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 29, 2007.]

[Prepared questions submitted to William C. Ostendorff by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. Section 3213 of the National Nuclear Security Administration (NNSA) act states that the Principal Deputy Administrator shall be appointed "from among persons who have extensive background in organizational management and are well qualified to manage the nuclear weapons, nonproliferation, and materials disposition programs of the administration in a manner that advances and protects the national security of the United States."

What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. My background and experience are well suited for the performance of duties as Principal Deputy Administrator. In 1975, I was personally selected by Admiral Rickover to serve in the nuclear power program and did so for over 20 years as a career submarine officer. I have served on six nuclear submarines, with 16 years of sea duty, with significant responsibilities for both the operation and maintenance of nuclear reactors and for the operational readiness of both strategic and tactical nuclear weapons. Having served as the engineer officer and commanding officer of nuclear attack submarines, I have years of experience in dealing with complex nuclear issues, a background that is directly relevant to the technical duties of the Principal Deputy Administrator.

In the area of organizational management, I have had two significant leadership positions in the Navy that are relevant to the Principal Deputy Administrator position. First, I have served as the commanding officer of a nuclear attack submarine squadron with responsibilities for 8 nuclear attack submarines, a floating drydock, and a support staff encompassing over 1,200 individuals. Working with my staff, our job was to help the individual submarine commanding officers and their crews achieve success by providing tailored training, mentoring, and maintenance support. Second, I served as Director of the Division of Mathematics and Science at the United States Naval Academy, responsible for 5 academic departments and over 160 faculty, over two-thirds of whom had Ph.D.s in mathematics or science. Both assignments required the clear articulation of policy and effective, routine communications on many fronts, a role I see as integral to the Principal Deputy Administrator position.

Finally, for the past 3½ years, I have served as counsel for the House Armed Services Committee as the staff director for the Strategic Forces Subcommittee where I have gained a deep appreciation for the issues facing both the NNSA and the Department of Energy (DOE), as well as the role of congressional oversight.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Principal Deputy Administrator for Defense Programs?

Answer. While I am confident that my experience has prepared me for the duties of Principal Deputy Administrator, I recognize that if confirmed, I will have much to learn. From day one on the job, I would spend a significant amount of time learning about both the organization and its people, at headquarters and at the site offices, in order to become a better leader and manager. One concrete action that I intend to focus on if confirmed would be to establish and sustain clear and unambiguous communications with a number of entities: the NNSA Federal workforce; the contractors who operate the production plants and the national security laboratories; DOE; other Federal agencies; State and local governments and communities, and Congress. I have spent years at sea "walking around" talking to sailors in my crew—I expect to build upon that practice if confirmed as Principal Deputy Administrator.

Question. Section 3213 also states that the Principal Deputy Administrator "shall perform such duties and exercise such powers as the administrator may prescribe, including the coordination of activities among the elements of the administration."

Assuming you are confirmed, what duties and functions do you expect that the Administrator of the NNSA would prescribe to you?

Answer. If confirmed, my overarching responsibility would be to work with the Administrator to provide solid leadership and management within NNSA. As Principal Deputy, there are a number of duties that I anticipate the Administrator would assign to me:

- Serving as the Chief Operating Officer of NNSA, responsible for the day-to-day operations of its staff both at headquarters and at the site offices,

including leading the Federal workforce in overseeing the administration of the management and operating contracts for the nuclear weapons production facilities and national security laboratories.

- Serving as the first line manager for NNSA senior managers in headquarters and the field.
- Leading the Management Council (senior headquarters and site managers) and working with the council to coordinate activities between headquarters and site offices.
- Serving as the Central Technical Authority for NNSA.
- Serving as the senior NNSA liaison with the Defense Nuclear Facilities Safety Board.

MAJOR CHALLENGES AND PROBLEMS

Question. What is your understanding of the role that you will play in the overall administration of the NNSA, in the event that you are confirmed?

Answer. In the event that I am confirmed as Principal Deputy Administrator, I would expect to run the day-to-day operations of NNSA for the Administrator, working with the NNSA headquarters and site office personnel to execute NNSA's mission. I see an essential aspect of that role as working directly with NNSA's Deputy and Associate Administrators, and with the NNSA site office managers.

Question. In your view, what are the major challenges that will confront the Principal Deputy Administrator?

Answer. The first is the leadership challenge of ensuring that NNSA management works together as a smooth, effective team on a daily basis to execute NNSA's national security mission. This requires both the clear articulation and consistent execution of the role of Federal oversight at headquarters and in the field. I believe it essential for senior NNSA leaders to continually invigorate the highly talented Federal workforce with a purposeful sense of mission and esprit de corps.

Second, the recurring safety and security incidents in the complex are of significant concern. One significant component of this problem is directly related to the first challenge, which is exercising the role of Federal oversight as intended when NNSA was created. Other factors have been noted in a number of both internal and external reviews. The protection of special nuclear material and nuclear weapons design information against physical and cyber security threats goes to the core of NNSA's mission and is an ongoing challenge.

The third challenge is advancing the transformation of the NNSA nuclear weapons complex. Complex 2030, the plan to modernize the nuclear weapons complex infrastructure, is critical to national security. The process is currently underway to complete a Supplemental Programmatic Environmental Impact Statement (PEIS) for Complex 2030 in accordance with the National Environmental Policy Act (NEPA). The Nuclear Weapons Council also recently announced their selection of a design for the Reliable Replacement Warhead (RRW). RRW design definition and cost studies will help inform the administration and Congress as to how to proceed for the future in a manner consistent with the RRW program objectives contained in the National Defense Authorization Act for Fiscal Year 2006. I would expect to thoughtfully evaluate the results of both the Complex 2030 NEPA process and the RRW design definition/cost studies as NNSA moves forward with plans to transform the complex.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If I am confirmed, I would seek to instill a sense of enthusiasm and dedication to the NNSA mission as Principal Deputy Administrator. NNSA, both at headquarters and at the site offices, has a tremendously talented workforce. I see my role as working with the NNSA leadership team to ensure that there are clear standards and expectations for the Federal workforce in performing its oversight function and then to get out and "look and listen" to see how things are going based on both my observations and those of the Administrator.

With respect to safety and security, I have already noted the importance of Federal oversight. I will also add that careful, objective monitoring of the performance of the management and operating contractors is critical to improvement in these areas. Holding contractors accountable for adherence to standards is integral to the responsibilities of the Principal Deputy Administrator. In the area of protecting our nuclear weapons design and other sensitive national security information, I would expect to carefully evaluate Federal staffing at the site offices to ensure they have personnel with the requisite technical and security backgrounds to perform effective oversight of security practices. I would also anticipate reviewing NNSA security policies to see where they may be improved.

With respect to working with NNSA leadership on advancing complex transformation, if confirmed, I would work to ensure the PEIS and RRW evaluations were thorough and kept on schedule. I would also work to ensure that the processes evaluating Complex 2030 transformation (including the associated NEPA process) and the RRW are transparent (consistent with security requirements) and that the communications strategy is both precise and closely coordinated with the Department of Defense. This strategy requires ensuring that the congressional committees are kept informed and that NNSA is responsive to questions and concerns.

Question. What do you consider to be the most serious problems in the performance of the functions of the Principal Deputy Administrator?

Answer. I believe that being successful as the Principal Deputy Administrator will require clearly communicating to the Federal workforce what is expected of them and ensuring that they have the right cadre of skills and appropriate resources to perform their oversight mission. I also consider as essential the building of a work environment where all personnel feel that they are part of a team performing a mission vital to national security.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. If confirmed, I would immediately work to establish myself as an effective leader within NNSA. A first step here would be to meet with the Federal workforce, both at headquarters and in the field, to learn more about NNSA and how it executes its mission. Another critical management step is to foster clear and effective communications, both within NNSA headquarters and with the field offices, to establish an environment where all are working together as a member of an integrated team. Reviewing the safety and security posture and associated corrective actions underway is an urgent task and one that I would hope to have a firm grasp of within 3 months of assuming responsibilities as Principal Deputy Administrator.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues that must be addressed by the Principal Deputy Administrator?

Answer. If confirmed, my broad priorities would be to focus on ensuring that the Federal workforce is effectively performing its oversight mission throughout the complex. Effective oversight of the contractor is critical to ensuring that the complex is properly executing its mission, especially in key mission areas such as physical and cyber-security. I would anticipate reviewing how the site offices assess contractor performance as well as how this assessment and other contractor performance information is communicated to and evaluated by headquarters. This review also would require a careful evaluation of whether the resources within the Federal workforce, especially in technical and security areas, are adequate to perform the oversight mission. Along with the review of site office oversight, I would expect to assess how clearly headquarters communicates its expectations on what is expected of oversight to the site offices as well as what headquarters can do to better mentor and support the site offices.

RELATIONSHIPS

Question. Please describe your understanding of the relationship of the Principal Deputy Administrator for Defense Programs with the following officials:

The Secretary and Deputy Secretary of Energy.

Answer. Under the NNSA act, the Secretary, acting through the Administrator, can direct the activities of NNSA. In addition, the Secretary sets policy for NNSA and NNSA implements it. Under the DOE Organization Act, the authority of the Secretary may be delegated to the Deputy Secretary of Energy. As Principal Deputy Administrator, I expect the Administrator would rely upon me to work directly with the Secretary and Deputy Secretary on issues in their areas of responsibility. Although the NNSA act establishes a clear chain of command between the Administrator and the Secretary (or Deputy Secretary), it does not limit my ability or responsibility to communicate, cooperate, and coordinate with the Secretary, the Deputy Secretary, and other senior officials in DOE.

Question. The Administrator of the NNSA.

Answer. The Administrator is the direct supervisor of the Principal Deputy. He sets priorities for the Principal Deputy and serves as the common superior to resolve any disputes between the Principal Deputy and the other Deputy Administrators. He is also responsible for ensuring that NNSA achieves the missions and priorities set by the Secretary.

Question. Other Deputies in the NNSA.

Answer. The other deputies are direct reports to the Principal Deputy who is their first line supervisor providing coordination, integration, and oversight of their performance.

Question. The Assistant Secretary for Environmental Management.

Answer. The Principal Deputy works with the Assistant Secretary for Environmental Management (EM) in ensuring that NNSA supports and facilitates the cleanup of legacy waste and contamination at NNSA sites. The Principal Deputy coordinates EM's work at NNSA sites with the Assistant Secretary for EM.

Question. The Assistant to the Secretary of Defense for Nuclear, Chemical, and Biological Defense Programs.

Answer. The Assistant to the Secretary of Defense for Nuclear, Chemical, and Biological Defense Programs also serves as the Executive Secretariat for the Nuclear Weapons Council (NWC). The NNSA representative to the NWC is the Administrator and, if confirmed, I will, along with the Deputy Administrator for Defense Programs, provide support to the Administrator in this critical role. The Assistant also chairs the subordinate committee to the NWC known as the Standing and Safety Committee which reviews nuclear weapons safety issues and makes recommendations to the NWC. The NNSA Office of Defense Programs has personnel who serve on the Standing and Safety Committee.

Question. The Chairman of the NWC.

Answer. The NWC is a joint DOD-NNSA body established to facilitate cooperation and coordination between the two agencies in fulfilling their dual responsibilities for nuclear weapons stockpile management. The Administrator is NNSA's representative to the NWC, which is chaired by the Under Secretary of Defense for Acquisition, Technology, and Logistics. The Principal Deputy supports the Administrator in his role as a member of the NWC and may act on his behalf with the Chairman of the NWC in the Administrator's absence. As Chief Technical Authority within NNSA, the Principal Deputy may interact with the NWC on technical issues.

Question. The Commander of United States Strategic Command (STRATCOM).

Answer. The Commander of STRATCOM is the central customer at the Department of Defense for the work of NNSA. Along with the three national security laboratory directors, he provides his judgment annually on the certification of the nuclear weapons stockpile along with the NWC to the Secretary of Defense. I expect the Administrator would direct me to support routine interactions with the Commander of STRATCOM and his staff regarding military requirements and stockpile size and composition.

Question. The nuclear directorates of the Air Force and Navy.

Answer. The Deputy Chief of Staff for Operations, Plans, and Requirements is the Air Force directorate with responsibility for policy and strategy for Air Force nuclear weapons operations and requirements, including arms control activities ranging from treaty negotiation support to implementation and compliance. The current incumbent is Lieutenant General Carrol Chandler. This office is the Air Force lead for activities to counter the proliferation of chemical, biological, radiological, and nuclear weapons.

The nuclear weapons directorate of the Navy is divided into policy and technical organizations. The policy organization is the Strategy and Policy Branch within the Office of the Chief of Naval Operations. Rear Admiral Philip Cullom is the current incumbent. He serves as the principal advisor on national/naval policy matters and National Security Council (NSC) policy issues; and to advise and implement national policies with respect to nuclear weapons, strategic programs, and arms control initiatives. The Navy's nuclear weapon technical organization is Strategic Systems Programs (SSP), currently led by Rear Admiral Stephen Johnson. The Director of SSP is responsible for all research, development, production, logistics, and support of the Navy's Trident Missile Weapons Systems.

I would expect to have ongoing working relationships with these Service offices, primarily through the NWC's Standing and Safety Committee.

Question. The Associate Administrator of NNSA for Facilities and Operations.

Answer. The Principal Deputy is the first line supervisor for this Senior Executive who is responsible for the corporate management and oversight of NNSA's facilities management policies and programs, project management systems, and office of environmental projects and operations. I would expect daily interaction with this Associate Administrator to provide oversight and to resolve any issues that may arise between headquarters and site managers, and to ensure the vitality of the industrial and laboratory infrastructure of NNSA. The Principal Deputy performs the annual performance appraisal of this Senior Executive, including the establishment of the performance plans and recommendations for compensation and awards.

Question. The Associate Administrator of NNSA for Management and Administration.

Answer. The Principal Deputy is the first line supervisor for this Senior Executive who is responsible for the overall business management aspects of the NNSA enterprise by providing for the financial, procurement and acquisition, human resources, information technology, and day-to-day business operations of NNSA. The information technology function also includes certain responsibilities for cyber-security practices within NNSA. I would expect daily interaction with this Associate Administrator to provide oversight, address concerns, and resolve any issues that may arise between headquarters and site managers. I would expect to work closely with this Associate Administrator on staffing of the NNSA headquarters and site offices with properly qualified individuals as well as management of the Future Leaders Program. The Principal Deputy performs the annual performance appraisal of this Senior Executive, including the establishment of the performance plans and recommendations for compensation and awards.

Question. The DOE Director of Health, Safety, and Security.

Answer. The Chief Health, Safety, and Security Officer advises the Deputy Secretary and Secretary on all matters related to health, safety, and security across the DOE complex. This office is responsible for policy development and technical assistance, safety analysis, corporate safety and security programs, education and training, and conducts independent oversight and investigations. With these broad responsibilities, if confirmed, I would expect to have regular contact with the chief of this office. For instance, this office conducts comprehensive assessments of the security posture, both physical and cyber-security, at individual NNSA sites. I would anticipate a very close working relationship with the chief in order to gain an external, professional perspective of how NNSA is doing in those areas he oversees and equally as important, how can NNSA improve its own internal practices in these vital areas.

Question. The Under Secretary of Energy for Science and the Director of the Office of Science.

Answer. I believe it is important to have a proactive working relationship with the Under Secretary of Energy for Science and the Director of the Office of Science. The DOE Office of Science is the single largest supporter of basic research in the physical sciences in the United States, and manages 10 world-class laboratories. If confirmed, I would expect to cooperate with the Under Secretary to leverage work between the science and national security laboratories on disciplines of common interest such as high speed computing, high energy physics, and materials sciences. As Principal Deputy Administrator and Chief Technical Authority, I expect the Administrator would rely upon me to work directly with the Under Secretary of Energy for Science on issues in his area of responsibility.

Question. The Defense Nuclear Facilities Safety Board.

Answer. If confirmed, I would expect that the Principal Deputy would be the senior liaison with the Defense Nuclear Facilities Board on all management issues with NNSA. The board serves a vital statutory oversight function for the NNSA complex, a role that I have come to value as a congressional staff member conducting oversight of NNSA. I would expect to have a very close relationship with the board and to foster a positive sense of cooperation between senior NNSA management and the board.

MANAGEMENT OF THE NNSA

Question. What is the role of NNSA's Management Council and, if confirmed, what would be your relationship with the council?

Answer. The NNSA Management Council provides a formal mechanism to help NNSA top managers deal promptly with crosscutting issues and to identify opportunities for synergy across NNSA. If confirmed as the Principal Deputy Administrator, I would be the lead official for all Management Council activities, and as such, would strive to ensure that all NNSA programs and activities are carried out in the most efficient and effective manner possible. In this capacity, I would keep the Administrator fully informed on all council activities and make sure that the work of the council is carried out in full consonance with his overall management objectives and policies.

WEAPONS PROGRAMS WORK FORCE

Question. If confirmed, what specific steps would you recommend for the NNSA to retain critical nuclear weapons expertise, particularly design capabilities, in the NNSA workforce?

Answer. If confirmed, working to retain and develop critical nuclear weapons expertise will be one of my highest priorities. The design and most other aspects of nuclear weapons require highly specialized skills that are not found outside the nu-

clear weapons complex but must be built on a foundation of advanced education. NNSA sites often invest years in additional training of employees. The applied use of these unique skills has proven to be the best method for both developing and then maintaining the skills within the workforce. NNSA must continue to develop its future workforce through knowledge transfer. The most efficient and reliable approach to achieve this objective is by having new hires work side-by-side with experienced specialists.

With respect to design capabilities, the laboratories have had efforts in place for some years to develop newly hired physicists and specialists in related fields into designers. For a few years, the new hires are integrated into existing teams, staffed and led by experienced designers. My understanding is that this approach has been successfully employed to develop a new cadre of designers as evidenced by the successful participation of early career designers in the RRW designs at the laboratories.

Question. If confirmed, what specific steps would you recommend for the NNSA to ensure that adequate and appropriate technical skills are maintained in NNSA?

Answer. In 2006, NNSA committed to re-establishing an interagency effort to identify critical skills as a step towards gaining a clearer picture of the relative supply and demand for these highly-trained personnel. NNSA has reached out to other agencies and to the private sector for data on these critical skills. The emphasis is on identifying those skills that are at highest risk and which, if lost, would have the greatest consequences for the ability of the laboratories and plants to carry out their missions. If confirmed, I will work within NNSA to continue and expand on this work.

Question. In your view, what are the critical skills that are needed in the NNSA?

Answer. I understand from the NNSA that there is concern regarding the majority of the critical skills needed to support the nuclear weapons program. In 2004, the National Science and Technology Council Interagency Working Group on Critical Workforce Needs, led by the NNSA, collected data across the defense, homeland security, and intelligence communities on hundreds of critical skills and the expected difficulty in finding U.S. citizens with those skills over the next 5 to 10 years. NNSA identified almost 400 critical skills across all laboratories and plants. NNSA has continued to make progress in developing a methodology to use in identifying those skills likely to be at risk in the future due to shortages of appropriately educated and trained U.S. citizens.

NNSA experts in the field expressed some degree of concern regarding about 80 percent of the skills identified by NNSA, and significant concern regarding 50 percent of the skills identified. The concerns arise from the anticipated retirement of critically skilled workers, mainly scientists and engineers, over the next few years and the declining number of American citizens seeking graduate degrees in relevant fields. Earning a Ph.D. in these fields takes 7 to 10 years, and laboratories and plants often invest another 2 to 3 years in on-the-job training. These long lead times complicate the hiring of replacements for retiring specialists.

SAFEGUARDS AND SECURITY

Question. One of the biggest initiatives of the DOE and the NNSA over the past several years has been to implement the various changes to the design basis threat (DBT) standard.

If confirmed, what recommendations would you make to help ensure the NNSA meets the new DBT in a timely fashion?

Answer. If confirmed, I will work to ensure NNSA meets its commitment to stay on the approved schedule for DBT compliance, stay focused on finding innovative security solutions, and continue to make progress in meeting the complex transformation goals. Meeting the new DBT will require proactive steps to work with the Department to consolidate special nuclear material in a timely and responsible manner, to complete construction projects on time and on budget, and to fully understand the impacts of any security related funding shortfalls at individual sites.

Question. How should the NNSA maintain an appropriate balance between adding security personnel and investing in force multiplying technologies and infrastructure in this area?

Answer. NNSA has maintained its security police officer staffing at about 2,400 persons in spite of significant increases in the DBT Policy in 2003, 2004, and 2005. This is due to the deployment of early warning and detection systems around key facilities, the use of barriers to delay adversaries, providing hardened structures for key materials, and providing its protective forces with more reliable and lethal weapons systems and improved training. I think the real key to achieving further efficiencies in the NNSA physical security mission rests in the ability to reduce the

overly large footprint of the nuclear weapons complex and to make strategic investments in new facilities that are built with today's security requirements in mind. One of my primary endeavors, if confirmed for this position, will be to help lead NNSA in its efforts to make the Complex 2030 vision a reality.

Question. In your opinion, what are the biggest safety and security threats to the facilities and materials in the nuclear weapons program?

Answer. At this point, I think NNSA has made reasonable progress in developing robust physical security programs to defend against outside attacks. Continued investment in infrastructure security upgrades and complex transformation efforts will further enhance the physical security posture of the complex. The "insider threat" is one I would want to explore more fully. I understand that the Department will focus the 2008 DBT policy review on the insider threat and if confirmed, I will ensure NNSA is a strong contributor to this review.

From my congressional committee oversight work, I have concluded that there are perhaps more "unknown threats" in the cyber area than in that of physical security. I am aware that NNSA is reviewing cyber security protection requirements and using a risk-based approach to determine what is the necessary amount of funding for cyber protection. If confirmed, I intend to work closely with the NNSA Chief Information Officer and the Department to evaluate the NNSA readiness and required funding to counter current and future cyber security threats.

STOCKPILE STEWARDSHIP PROGRAM

Question. What is your view of the Stockpile Stewardship Program's progress towards its goal of being able to continuously certify the U.S. enduring nuclear weapons stockpile as safe, secure, and reliable, without the need for underground nuclear testing?

Answer. The fact that there has not been a technical need to recommend a nuclear test since 1992 is a testament to the success of the Stockpile Stewardship Program to date. However, one cannot overstate the importance of ensuring that the annual process to certify the nuclear weapons stockpile is based on a solid scientific foundation involving robust peer review and uncompromising integrity. If confirmed as Principal Deputy Administrator, I would work hard to ensure that the key programs supporting the Stockpile Stewardship Program receive top-level management attention so as to stay on cost, on schedule, and meet program requirements.

Question. In your opinion, what are the greatest challenges confronting the Stockpile Stewardship Program?

Answer. In my opinion, the greatest challenges confronting the Stockpile Stewardship Program all lead back to meeting commitments, both near-term and long-term. Near-term, I see that NNSA has an ambitious set of goals such as resuming tritium production, accelerating warhead dismantlements, and delivering First Production Units for the B61 and W76 Life Extension Programs. If confirmed, I will work with the Administrator to ensure resources are balanced to keep our commitments to the Department of Defense, Congress, and the public. Long-term, the NNSA has a serious challenge in keeping the right set of skilled workers at the laboratories, production sites, and in the Federal workforce. Keeping the workforce engaged and exercised will be essential in sustaining the U.S. nuclear deterrent without underground nuclear testing.

Question. Do you fully support the goals of the Stockpile Stewardship Program?

Answer. Yes, I fully support the goals of the Stockpile Stewardship Program, which are: 1) to sustain a safe, secure, and reliable nuclear weapons stockpile; 2) to maintain a fully capable, agile, responsive nuclear weapons complex infrastructure; and 3) to conduct research and development activities to ensure U.S. leadership in science and technology. If confirmed, I look forward to playing a key role in shaping the future of the Stockpile Stewardship Program.

Question. The NNSA and the Department of Defense have recently made a decision to explore the feasibility of a new design for use as a RRW.

Do you support the idea of a RRW and in your view how would such a program further nonproliferation goals of the United States?

Answer. Yes, I fully support the goals of the RRW program, and believe it furthers nonproliferation objectives of the United States in a number of ways. RRW should reduce the likelihood that the U.S. would have to resort to nuclear testing in the future. Additionally, RRW could allow further significant reductions in the number of total U.S. nuclear warheads. A strong U.S. nuclear deterrent will also assure our allies that are not nuclear weapons states that the U.S. can provide their nuclear deterrent, obviating their need to develop and deploy nuclear weapons.

NUCLEAR POSTURE REVIEW AND THE FUTURE COMPLEX

Question. The Nuclear Posture Review (NPR), which was released in January 2002, contained the administration's plan to reduce the number of operationally deployed strategic nuclear warheads to between 1,700 and 2,200 by 2012. These reductions were included in the Strategic Offensive Reductions Treaty in 2003, known as the Moscow Treaty.

Will any nuclear warheads be dismantled as a result of the NPR and the Moscow Treaty?

Answer. The Department of Defense and DOE have developed a plan that achieves President Bush's goal of 1,700–2,200 operationally deployed strategic nuclear warheads by 2012. The President's direction results in dramatic cuts to the stockpile that existed when he took office, and leads to a significant increase in total weapons available for dismantlement. While there are no provisions in the NPR or the Treaty of Moscow mandating specific dismantlement of warheads, the NNSA has significantly increased dismantlements.

Question. With the large number of refurbishment and other life extension program activities planned over the next 6 years, including the possibility of a RRW, is there enough facility capacity and are there sufficiently qualified personnel in the NNSA workforce to also take on a large increase in dismantlement during the same time period?

Answer. Last year, the NNSA provided a dismantlement plan to Congress that identified for dismantlement warheads that were in excess of stockpile requirements. Through efforts such as the Pantex Throughput Improvement Plan, the NNSA has significantly increased weapon activities using available capacity. This has ensured the critical enduring stockpile work for life extensions and surveillance can be completed while significantly accelerating dismantlements. The NNSA has determined that it can successfully achieve this goal. If confirmed, I will evaluate how well the complex achieves its dismantlement objectives and work to ensure the sites are properly resourced for this key task.

Question. In your view, would NNSA be able to manage an accelerated implementation of the Moscow Treaty if directed to do so?

Answer. The Moscow Treaty does not specifically identify a required dismantlement rate; it only addresses limits on the number of operationally deployed strategic nuclear warheads. The NNSA has already significantly accelerated dismantlements. However, there are limitations on how many operations can be done at Pantex. The current workload plan that factors in surveillance, life extension programs, dismantlements, pit packaging, and other required operations at Pantex maximizes available throughput during the next several decades. Significantly increasing the dismantlement rates at Pantex would impact accomplishment of the critical work that supports the safety, security, and reliability of the enduring stockpile. Additionally, there are capacity limits across the complex on shipping, storage, component dismantlement, and material disposition that constrain total dismantlement throughput. If confirmed, I would work with Defense Programs to optimize the workload across the nuclear weapons complex, to include evaluating possible further acceleration of dismantlements.

Question. The NPR stated as one of its priority goals achievement of a reinvigorated infrastructure across the nuclear weapons complex.

With competing budget priorities for the Stockpile Stewardship Program, such as directed stockpile work, safety and security, and maintenance and recapitalization, what steps would you take, if confirmed, to ensure the infrastructure continues to be consolidated, revitalized, and well-maintained?

Answer. I support the NNSA's "Complex 2030" transformation goals. If confirmed as the Principal Deputy Administrator, I would work with the Administrator in optimizing the NNSA budget to achieve complex modernization and consolidation. If confirmed, I will demand accountability of NNSA personnel, both contractor and Federal, as we meet near-term commitments and I would work with Congress to ensure appropriate funding for nuclear weapons complex and stockpile transformation. As Counsel to the House Armed Services Committee, I am well aware of the limited resources available and the need to make tough decisions on competing priorities.

Question. What recommendations, if any, would you make to improve management of the facilities in the nuclear weapons complex?

Answer. I am aware generally of NNSA's initiatives to improve management of the nuclear weapons complex primarily through transforming the contract relationship with its management and operating contractors. If confirmed, and after conducting my own review of these initiatives, I would expect to continue efforts to include greater uniformity and accountability in contracts, include multi-site incentives in contracts that enhance total enterprise objectives, and provide for more ef-

fective integration across the nuclear weapons complex. As the complex is transformed to be smaller, more efficient, and more affordable, accurate, and timely communication of expectations, progress, and issues is essential. I see one of the key roles of the Principal Deputy Administrator is to ensure that the NNSA contracts with the sites throughout the complex are well-managed and professionally executed.

Question. The Secretary of Energy Advisory Board recommended several options to consolidate the weapons complex of the future.

If confirmed, would you commit to reviewing the consolidation options being evaluated by NNSA, to ensure that modernization of facilities is being complemented by consolidation of materials and facilities as appropriate?

Answer. I am familiar with the nuclear weapons complex transformation options and material consolidation initiatives being considered by both the NNSA and the Department. If confirmed, I commit to continue to review these options as part of NNSA management; successful complex transformation and consolidation of both materials and facilities are fundamental to the success of the nuclear weapons program, and I would make them among my highest priorities as Principal Deputy Administrator.

Question. Do you have any views on additional options that the NNSA could or should consider or evaluate that would ensure the most efficient complex of the future?

Answer. Many decisions on complex transformation must await completion of the NEPA process and the formulation of detailed cost studies for various transformation alternatives. I understand that during the recently completed scoping process, NNSA received nearly 33,000 comments on its environmental impact statement (EIS) for complex transformation and is considering those comments in preparing the draft EIS, which, when issued, will provide another opportunity for public review and comment. If confirmed, I would commit to conducting a thorough review of the EIS process and outcomes to ensure that decisionmaking going forward is well-informed and transparent. I would anticipate working closely with the NNSA staff to carefully review the cost studies and the underlying assumptions associated with the various transformation options.

Question. There has been some criticism that the options being considered by the NNSA, as part of the Complex 2030 EIS, will result in modernization in place and no facilities consolidation.

If confirmed, and after you have a chance to review the options in the EIS, if you believe that there are additional options that should be included in the EIS, would you inform the committee?

Answer. Yes, if confirmed, and if I believe there are additional options for Complex 2030 that should be included in the NEPA process, I will inform the committee. My understanding is that, based on comments it received, NNSA is expanding the range of transformation alternatives it will analyze in the EIS.

FACILITIES AND INFRASTRUCTURE

Question. Upon its creation, NNSA inherited an infrastructure in need of significant repair and modernization, particularly at the nuclear weapons plants. At the request of the DOE, Congress, in section 3133 of the National Defense Authorization Act for 2002, established the Facilities and Infrastructure Recapitalization Program (FIRP).

Although FIRP appears to be making good progress in revitalizing the nuclear weapons complex infrastructure through elimination of maintenance backlogs, what recommendations would you make to ensure that current and future maintenance activities, under the Readiness in the Technical Base and Facilities (RTBF) program, are in line with industry benchmarks when FIRP is terminated, so that no additional extensions of FIRP are required?

Answer. I understand that the NNSA is committed to maintaining its facilities and infrastructure consistent with industry best practices. The RTBF program has taken some significant steps to better align facility operations and maintenance activities with industry practices in preparation for the end of the FIRP. RTBF and FIRP are working on enhancing the corporate facility condition performance measure to formalize new sustainment strategies for both categories of facilities which includes a national Work Breakdown Structure. One key aspect of efficiently allocating maintenance resources is having a clear understanding as to what happens to individual facilities as the complex is transformed—NNSA cannot afford to refurbish outdated buildings that may not be part of the future complex. If confirmed, I commit to working with the various offices within NNSA to fully integrate facility maintenance plans and priorities with transformation plans.

Question. The DOE and the NNSA have begun to explore the possibility of using third party or other alternate financing options for construction projects.

If confirmed, would you commit to carefully review any NNSA proposal to undertake construction projects with funding approaches that deviate from the traditional line item funding approach?

Answer. Yes. If confirmed, I will ensure that NNSA conducts a rigorous, detailed, and formal review and analysis of any third-party or other alternative financing proposal for construction in accordance with the procedures established by the Deputy Secretary for such proposals. To be approved, these proposals must demonstrate that they represent a sound business decision and are in the best interest of the Department and the taxpayer.

Question. In addition, would you commit to keep Congress fully informed of any such proposals, to fully coordinate any proposal with the Office of Management and Budget, and to ensure that any such proposals include a business case documenting that any alternative financing approach is in the best interest of the taxpayer?

Answer. Yes. I will keep Congress fully informed of any such proposals and fully coordinate any proposals with the Office of Management and Budget, in accordance with the Department's policies. I will ensure that such proposals represent a sound business decision in the best interests of the NNSA and show a clear financial advantage to the taxpayer.

Question. One of the goals of the effort to modernize the nuclear weapons complex is to reduce the number of square feet of building space.

As the NNSA proceeds with construction projects in the future would you commit to support the goal and work to include in the total project cost of any new facility the disposition of any buildings or facilities that are being replaced?

Answer. If confirmed, I will commit to work within NNSA to keep Congress fully informed of plans for Decontamination and Decommissioning (D&D) of old facilities being replaced by new facilities, or for D&D of an equivalent amount of excess space if the replaced facilities can be refurbished in a cost effective manner. Reducing the footprint of the NNSA nuclear weapons complex is an important component of the Department's preferred approach to complex transformation known as Complex 2030. I understand that current NNSA practices do not include disposition costs for old buildings in the total project costs for new replacement facilities. If confirmed, I commit to reviewing NNSA practices in this area.

ENVIRONMENTAL RESTORATION AND WASTE MANAGEMENT

Question. What responsibility do you believe the NNSA should have for funding, managing, and disposing of its current and future hazardous waste streams and environmental restoration?

Answer. Environmental restoration at the NNSA sites addresses cleanup of legacy contamination and waste. This work is funded and overseen by the Office of EM, and performed by NNSA contractors. It is NNSA's responsibility to assure that this work is performed in a safe, cost effective manner that meets regulatory requirements, and to ensure that such activities are appropriately integrated with other ongoing site mission activities.

As to future waste streams, these are the responsibility of NNSA. NNSA is also responsible for ensuring that current operations comply with all environmental requirements.

Question. What specific steps do you believe the NNSA should take to negotiate programmatic responsibilities for environmental activities between the NNSA and the Office of the Assistant Secretary for EM?

Answer. Presently, DOE's Office of EM provides funding to NNSA sites for the EM work scope. This work includes legacy cleanup activities and the disposition of legacy waste. EM defines the scope of work and budget for projects at NNSA sites based on input and recommendations from NNSA. However, NNSA maintains authority, direction, and control as the landlord and contracting authority for EM work conducted at NNSA sites. NNSA directs and executes the program through its management structure and management and operating contractors. NNSA then reports to EM on project performance against the baseline and milestone schedules. This approach is consistent with the NNSA act and budget direction from Congress.

I remain committed to successful execution of the EM-funded activities at the NNSA sites and effective integration of this work scope with our ongoing mission.

Question. If confirmed, what role do you anticipate you will play in this process?

Answer. If I am confirmed, my role would be to ensure that NNSA and its contractors perform EM work at our sites in an effective and expeditious manner. It is my expectation that both my NNSA staff at Headquarters and at the NNSA sites will be able to work within the existing agreements and protocols to effectively exe-

cute the work. However, in those instances where there are issues that cannot be easily resolved, I expect to be fully engaged in resolution. To that end, I will work both with NNSA, DOE, and State and Federal regulators to develop appropriate solutions.

DEFENSE NUCLEAR NONPROLIFERATION PROGRAMS

Question. In your view, are any policy or management improvements needed in the Defense Nuclear Nonproliferation Programs? If so, what improvements would you recommend?

Answer. In the policy area, I fully support NNSA's expansion of nuclear nonproliferation program activities outside the former Soviet Union and if confirmed, would work with the Deputy Administrator for Defense Nuclear Nonproliferation to advance these efforts. In the area of program management, I am aware of concerns from NNSA related to the challenges that arise from having to deal with two separate funding mechanisms—one for program activity and the other for program direction. I understand that NNSA believes the current funding arrangement creates an impediment in terms of personnel management, training, travel, and information technology support. If confirmed, I would work with the Deputy Administrator for Defense Nuclear Nonproliferation to gain a better understanding of this management concern and develop proposed corrective action.

Question. NNSA has significantly expanded its work in the Megaports program in cooperation with the Department of Homeland Security (DHS).

If confirmed, would you commit to keeping Congress fully informed as to the success of, as well as any problems with, this cooperative relationship?

Answer. During my time working for Congress, I have received briefings on the Megaports program. As for the Megaports program's cooperation with the DHS, I understand that NNSA has developed a close working relationship with DHS and its various components, including Customs and Border Protection (CBP) and the Domestic Nuclear Detection Office (DNDO). NNSA has worked closely with CBP in coordinating the implementation of the Megaports Initiative with their Container Security Initiative. With DNDO, NNSA is working closely in the development of the global nuclear detection architecture and in their evaluation and procurement of next generation radiation detection technologies. NNSA's success is clearly linked to that of DHS in these important areas. If confirmed as Principal Deputy Administrator, I would work with NNSA and DHS leadership to foster a close cooperative relationship.

If confirmed, I would commit to keeping Congress informed about the status and health of NNSA's relationship with DHS.

Question. The NNSA has responsibility for the bulk of the Federal Government's basic research on radiation detection technologies as well as other nuclear technologies, such as those used in nuclear forensics.

If confirmed, would you commit to undertake a review of the nonproliferation research and development program to ensure that it is adequately funded and fully coordinated with the activities of other Federal agencies?

Answer. I understand that NNSA's nonproliferation research and development work has potential applicability to a number of Federal agencies. Should I be confirmed as Principal Deputy Administrator, I commit to reviewing the NNSA funding as well as coordination with other Federal agencies in the area of nonproliferation research and development.

MATERIALS DISPOSITION PROGRAM

Question. The NNSA is responsible for implementing the United States commitment to the Russian government to dispose of 34 metric tons of weapons grade plutonium. There are many issues and challenges facing the program including the fact that it is substantially over budget. In the National Defense Authorization Act for Fiscal Year 2007, Congress directed DOE and NNSA to undertake an independent cost estimate for the plutonium disposition program and facilities.

If confirmed, would you ensure that the congressional direction is followed?

Answer. Yes. It is my understanding that DOE will submit its response to this requirement in the near-term. If confirmed, I will do my best to ensure that the NNSA complies with the congressional direction on the plutonium disposition program in a timely fashion.

NATIONAL IGNITION FACILITY

Question. The National Ignition Facility (NIF) is scheduled to achieve ignition by 2010. In order to accomplish this goal under current funding, much of the experimental work has had to be postponed.

If confirmed, would you commit to examining any opportunities that may exist to restore experimental work at the NIF in advance of ignition?

Answer. Yes, I support the goal of ignition at the NIF and appreciate the value of NIF pre-ignition experimental work to the Stockpile Stewardship Campaign. I understand that the NNSA is working to increase opportunities for experimental work at NIF prior to ignition consistent with completion of NIF on its current baseline, the ignition 2010 experimental campaign, and available budget. If confirmed, I will examine opportunities to restore experimental work in advance of NIF ignition.

NUCLEAR WEAPONS TESTING

Question. Do you support the current moratorium on testing?

Answer. Yes, I support the current moratorium on nuclear testing. Supporting a vigorous Stockpile Stewardship Program and the RRW program should reduce the likelihood in the long-term that the U.S. would have to resort to nuclear testing in the future.

Question. Do you believe that there is a need at the present time to resume underground nuclear weapons testing to support the current stockpile or to support new or modified nuclear weapons?

Answer. No. I understand from the NNSA and the Department of Defense that there are no foreseeable requirements that would lead to a recommendation for a nuclear test for technical issues, either to support the enduring stockpile or to support the RRW program.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Principal Deputy Administrator?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees in a timely manner?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Question for the record with answer supplied follows:]

QUESTION SUBMITTED BY SENATOR MARK PRYOR

NUCLEAR PROLIFERATION

1. Senator PRYOR. The National Nuclear Security Administration (NNSA) has said that the acquisition of nuclear weapons, weapons of mass destruction capabilities, technologies, and expertise by rogue states or terrorists stands as one of the most potent threats to the United States and international security. What is your plan to address these threats?

Mr. OSTENDORFF. The mission of NNSA's Office of Defense Nuclear Nonproliferation (DNN) is to detect, prevent, and reverse the proliferation of nuclear materials, technology, and expertise. DNN's programs are structured in support of multiple layers of defense against nuclear proliferation and terrorism. NNSA's first line of defense is to secure nuclear materials in place at vulnerable materials, facilities, and sites worldwide. In this area, NNSA is working to complete site security upgrades at Russian sites by the end of 2008 as agreed to by the U.S. and Russia under the Bratislava Initiative. NNSA's second line of defense is the deployment of radiation detection monitors at border crossings and major seaports. In this area, NNSA has equipped 88 land border crossings and 8 major seaports with radiation detection equipment. This layered defense strategy is bolstered by NNSA's efforts

to reduce quantities of nuclear materials, to develop cutting-edge proliferation detection technologies, and to strengthen the nonproliferation regime.

If confirmed, I will continue and, where possible, accelerate work in all of these areas to ensure that NNSA is doing all that it can to prevent the acquisition of nuclear weapons, weapons of mass destruction capabilities, technologies, and expertise by rogue states or terrorists. In addition to the work NNSA does, I plan to work closely with other agencies of the U.S. Government as well as with international partners through the Global Initiative to Combat Nuclear Terrorism to coordinate national and international efforts to meet the serious threat posed by nuclear proliferation and terrorism.

[The nomination reference of William C. Ostendorff follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
February 26, 2007.

Ordered, That the following nomination be referred to the Committee on Armed Services:

William Charles Ostendorff, of Virginia, to be Principal Deputy Administrator, National Nuclear Security Administration, vice Jerald S. Paul, resigned.

[The biographical sketch of William C. Ostendorff, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF BILL OSTENDORFF

A native of Shreveport, LA, Bill Ostendorff graduated from the United States Naval Academy with merit in 1976 with a B.S. in Systems Engineering. Following initial nuclear power and submarine training, he served on six submarines, including command of U.S.S. *Norfolk* (SSN 714) from 1992–1995. During this tour he conducted highly successful classified overseas deployments to the Mediterranean and the North Atlantic. U.S.S. *Norfolk* was recognized by Commander Submarine Force Atlantic as having achieved the greatest improvement in combat readiness among the 53 attack submarines in the Atlantic Fleet in 1993 and was awarded the Meritorious Unit Commendation by the Secretary of the Navy. In 1995, he was recognized by Commander, U.S. Atlantic Fleet, as a finalist for the Vice Admiral James Stockdale award for inspirational leadership in command.

From 1996–1998, Bill was Director of the Submarine Force Atlantic Prospective Commanding Officer School. From 1998–1999, he commanded the 1,200 men and women of Submarine Squadron Six in Norfolk, responsible for the operations, maintenance, and training of 8 attack submarines and a floating drydock. From 1999–2002, he served as Director of the Division of Mathematics and Science at the United States Naval Academy.

Bill's awards include four awards of the Legion of Merit and numerous campaign and unit awards. His education includes a JD from the University of Texas (Order of the Coif), an LLM in International and Comparative Law from Georgetown University Law Center (with distinction), and graduate work in policy studies at the University of Maryland. He is a member of the State Bar of Texas.

Upon retiring from the Navy in 2002 in the grade of Captain, Bill joined the Institute for Defense Analyses in Alexandria, VA. In 2003, he joined the staff of the House Armed Services Committee where he assumed duties as staff director for the Strategic Forces Subcommittee which has oversight responsibilities for the Department of Energy's Atomic Energy Defense Activities as well as the Department of Defense's space, missile defense, and intelligence programs. Bill and his wife Chris, reside in Oakton, VA, and have three children—Becky, a third year law student at the University of Virginia; Chuck, an Army Second Lieutenant stationed with the 2nd Calvary Regiment in Germany; and Jeff, a second year student at the College of William and Mary.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the

advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by William C. Ostendorff in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

William C. Ostendorff, Nickname: Bill.

2. **Position to which nominated:**

Principal Deputy Administrator, National Nuclear Security Administration.

3. **Date of nomination:**

February 26, 2007.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

October 22, 1954; Shreveport, LA.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Christina Lee Miller Ostendorff.

7. **Names and ages of children:**

Rebecca Lee Ostendorff, 26; Second Lieutenant William Charles Ostendorff, Jr., USA, 22; Jeffrey Thomas Ostendorff, 19.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Jesuit High School, Shreveport, LA, 1972.

United States Naval Academy, B.S. Systems Engineering, 1976.

University of Texas School of Law, J.D., 1984.

Georgetown University Law Center, LLM International Law, 1992.

University of Maryland School of Public Policy, Graduate Certificate In Policy Analysis, 2005.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

August 2003–Present, Counsel, House Armed Services Committee.

August 2002–August 2003, Research Staff Member, Institute for Defense Analyses, Alexandria, VA.

August 1999–July 2002, Director of Division of Mathematics and Science, United States Naval Academy, Annapolis, MD.

April 1998–August 1999, Commander Submarine Squadron Six, Norfolk, VA.

December 1995–March 1998, Director, Submarine Prospective Commanding Officer School, Submarine Force Atlantic, Norfolk, VA.

November 1992–November 1995, Commanding Officer, U.S.S. *Norfolk*, (SSN 714) Norfolk, VA.

10. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.

None.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member State Bar of Texas (admitted 1984).

Life Member, United States Naval Academy Alumni Association.

Church of the Holy Comforter, Vienna, VA.

Grachur Club—a family summer retreat with a religious heritage on Magothy River south of Baltimore, MD—President (started 2-year term October 2005).

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Republican National Committee member.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Republican National Committee contributions:

January 2007 - \$30

October 2006 - \$40

August 2006 - \$30

January 2006 - \$30

September 2005 - \$25

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Military:

Legion of Merit (four awards)

Defense Meritorious Service Medal

Meritorious Service Medal

Navy Commendation Medal (four awards)

Other Navy unit awards

Finalist 1995 Vice Admiral Stockdale Award for Inspirational Leadership in Command

Law school:

Order of the Coif

Gene Woodfin Prize for Leadership

National Patent Moot Court Finalist

College:

Listed in Who's Who Among American College Students 1976.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

WILLIAM C. OSTENDORFF.

This 7th day of March, 2007.

[The nomination of William C. Ostendorff was reported to the Senate by Chairman Levin on March 28, 2007, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 29, 2007.]

**NOMINATION OF LTG DOUGLAS E. LUTE, USA,
TO BE ASSISTANT TO THE PRESIDENT AND
DEPUTY NATIONAL SECURITY ADVISOR
FOR IRAQ AND AFGHANISTAN**

THURSDAY, JUNE 7, 2007

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:35 a.m. in room SH-216, Hart Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Lieberman, Reed, E. Benjamin Nelson, Bayh, Clinton, Pryor, Webb, Warner, Inhofe, Sessions, Dole, and Thune.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Daniel J. Cox, Jr., professional staff member; Evelyn N. Farkas, professional staff member; William G.P. Monahan, counsel; Michael J. Noblet, research assistant; and William K. Sutey, professional staff member.

Minority staff members present: Michael V. Kostiw, Republican staff director; William M. Caniano, professional staff member; David M. Morriss, minority counsel; and Richard F. Walsh, minority counsel.

Staff assistants present: David G. Collins and Kevin A. Cronin.

Committee members' assistants present: Jay Maroney, assistant to Senator Kennedy; David E. Bonine and James Tuite, assistants to Senator Byrd; Frederick M. Downey, assistant to Senator Lieberman; Elizabeth King, assistant to Senator Reed; Christopher Caple, assistant to Senator Bill Nelson; Andrew R. Vanlandingham, assistant to Senator Ben Nelson; Jon Davey, assistant to Senator Bayh; M. Bradford Foley and Terri Glaze, assistants to Senator Pryor; Gordon I. Peterson, assistant to Senator Webb; Sandra Luff, assistant to Senator Warner; Anthony J. Lazarski, assistant to Senator Inhofe; Lenwood Landrum, assistant to Senator Sessions; Mark Winter, assistant to Senator Collins; Clyde A. Taylor IV, assistant to Senator Chambliss; Lindsey Neas, assistant to Senator Dole; and Stuart C. Mallory and Jason Van Beeks, assistants to Senator Thune.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. We welcome this morning Lieutenant General Douglas Lute, whom President Bush

has named as his choice for what the President called the “full-time manager” for the conflicts in Iraq and Afghanistan. Lieutenant General Lute has been serving as the Director of Operations on the Joint Staff since September 2006. Immediately prior to this assignment, he served for more than 2 years as the Director of Operations at the U.S. Central Command (CENTCOM), overseeing combat operations in Iraq and Afghanistan and other operations in the CENTCOM area of responsibility (AOR).

General Lute is accompanied by his wife, Jane Holl Lute, herself a retired Army officer, who is currently Assistant Secretary General for Peacekeeping Operations at the United Nations; and we welcome you, Mrs. Lute.

General Lute is an accomplished senior officer with a distinguished record and great experience in both military tactics and national security strategy and policy. He’s been nominated for an unenviable position. He’ll be responsible for bringing coherence to an incoherent policy, a policy that is still floundering after more than 4 years of war in Iraq.

We asked General Lute several advance policy questions prior to the hearing, one of which was what authority he will have to fulfill the responsibilities of the position to which he is nominated. In his written reply he said that: “The position is an advisor and coordinator, without directive authority beyond a small staff.” He further said that the ability to move policy forward had to do with such factors as “presidential direction and support, acceptance by other policy principals, broad commitment to a common cause, cultivated interpersonal relationships, personal integrity, and meaningful results.”

Secretary of State Condoleezza Rice, described as a close personal friend of the President, almost a family member, was either not able to get that presidential direction and support or not able to employ it to bring coherence to the President’s policy, and one has to wonder, how does one expect that General Lute can be more successful.

It is no secret that several retired four-star general officers were offered the position and turned it down. According to media reports, one reason given by one of the generals was that the administration remains fundamentally divided on how to carry out the conflicts in Iraq and Afghanistan. Retired Marine General Jack Sheehan, who declined to be considered for the position, was quoted as saying, “The very fundamental issue is the administration doesn’t know what the hell or where the hell they’re going.” General Sheehan reportedly expressed concern that the hawks within the administration, including Vice President Dick Cheney, remain more powerful than the pragmatists looking for an exit in Iraq. That does not bode well for General Lute.

It is no secret that General Lute himself questioned the so-called “surge” strategy for Iraq before its announcement by the President last January. The results of the surge are not very promising. Nearly 5 months after it began, the surge is nearly complete, with the last U.S. combat brigade now being deployed in Iraq. However, American casualties are at some of the highest levels of the war, sectarian violence is rising again after a short reduction, and the insurgency is as active as ever, especially in the use of mass cas-

ualty-producing car bombs against Iraqi civilians and the improvised explosive devices (IEDs) against U.S. and Iraqi forces.

Iraqi units are reporting to Baghdad with an average of only 70 percent strength and, while American soldiers have been extended or deployed on 15-month tours with 12 or fewer months between rotations, Iraqi soldiers are on 3-month tours to Baghdad with no plan that we are aware of to return Iraqi units back for another rotation once they depart. Those are the words of Major General William Caldwell, the Multi-National Force-Iraq spokesman, as quoted in the Washington Post.

Apparently the first Iraqi troop rotation was completed in March, the second will be completed this month, and the third is in preparation. Sooner or later, the Iraqis will run out of troops for these rotations.

Just as troubling, with little continuity in Iraqi troop presence, it'll be the Americans who will have to continue to lead the constantly changing Iraqi forces in the Baghdad neighborhoods. With no stable Iraqi troop presence in those neighborhoods, there'll be little intelligence gleaned from the Iraqi people and it will be the Americans who will be forced to continue to take the lead in holding those neighborhoods.

In fact, media coverage of the weekly reports by American brigade commanders indicates that only 128 of 457 neighborhoods are under control and that insurgents have been cleared out in those 128 and the population can be protected.

Now, Prime Minister Nouri al-Maliki promised that there would be no political interference with the operation, but there have been recent disturbing press reports of a department of the prime minister's office, the office of commander in chief, "playing a major role in the arrest and removal of senior Iraqi army and national police officers, some of whom had apparently worked too aggressively to combat violent Shiite militias."

That report in the Washington Post quoted Brigadier General Dana Petard, Commanding General of the Iraq Assistance Group, which provides the military transition teams advising Iraqi units, as saying: "Their only crimes or offenses were that they were successful," meaning successful against the Mahdi Army. Then he goes on to say—and this is our general—"I'm tired of seeing good Iraqi officers having to look over their shoulders when they're trying to do the right thing."

The surge is now nearly complete. The stated principal purpose of the surge was to give space and time for the Iraqi politicians to make progress on important political reconciliation benchmarks, such as implementing legislation for the equitable distribution of revenues from oil sales, de-Baathification, and constitutional amendments that would lead to reconciliation among the three main Iraqi groups. Progress is not apparent in that all-important area of political reconciliation.

I was dismayed to see a report in yesterday's Los Angeles Times that Prime Minister Maliki's top political advisor, Sadiq al-Rikabi, said that he doubts the prime minister will be able to win passage of key legislation so ardently sought by U.S. officials and quoted him as saying "We hope to achieve some of them, but solving the

Iraqi problems and resolving the different challenges in the next 3 months would need a miracle.” Those are his words.

How much more time should we give after 4 years in Iraq? Baghdad is burning while the Iraqi politicians avoid accepting responsibility for their country’s future. I believe the only chance to get Iraqi politicians to stand up is when they know we are going to begin to stand down. Our soldiers risk their lives while Iraqi politicians refuse to take the political risks and make the necessary compromises to promote reconciliation. We cannot continue to have the lives of American servicemembers held hostage to Iraqi political intrigue and intransigence.

Now, I’m going to put the balance of my statement in the record—it relates to Afghanistan—because Senator Inhofe needs to leave immediately for another important assignment. So, with Senator Warner’s concurrence, I’m now going to call upon Senator Inhofe for his opening remarks.

[The information referred to follows:]

THE BALANCE OF SENATOR LEVIN’S OPENING STATEMENT

Another challenge of the new position for which General Lute has been nominated will be to ensure that even as we’re focused on Iraq that we don’t neglect the mission of bringing security and stability to Afghanistan. This is a pivotal time for our efforts there. In 2006, the security trends were in the wrong direction—attacks on coalition forces, roadside bombs and suicide bombers were all up compared to the year before. In response, the NATO-led International Security Assistance Force (ISAF) launched military operations to counter an anticipated Taliban spring offensive. Last week, Secretary Gates during his visit to Kabul was guardedly optimistic that coalition forces are making progress against a Taliban resurgence. As British General David Richards, former ISAF Commander, recently wrote, there may be a “window of opportunity,” thanks to ISAF and the Afghanistan security forces, for the Afghan government and the international community to promote governance and development for the Afghan people.

One of the main tasks of the position for which General Lute has been nominated will be to ensure that the entire Government, both the military and civilian components, are providing the necessary resources to succeed in Afghanistan. Militarily, it is essential that our troop levels, and those of our NATO allies and the Afghan security forces, are sufficient to both clear areas of Taliban influence and then hold those areas.

But, as General Lute states in his answers to pre-hearing advance policy questions, “the solution in Afghanistan will be political, not military.” To succeed, we, along with the international community, must also commit the financial resources and civilian expertise to the other components of the Afghanistan mission—improving governance and bringing economic development through the joint military-civilian Provincial Reconstruction Teams; fighting corruption; and countering the scourge of the illegal drug trade. With more than 60 countries on the ground in Afghanistan, as well as the United Nations, the European Union and NATO, and the Afghan Government, the person coordinating this effort will have his work cut out for him.

Senator WARNER. I concur.

Senator INHOFE. Thank you, Mr. Chairman. I do appreciate your accommodating this. We have an Environment and Public Works Committee hearing that is very significant, as Senator Warner knows, and I must be there.

Let me quickly say, General Lute, as we’ve discussed in my office, I was one of those who didn’t think this position was necessary. However, I would say this, that if the position is necessary and we’re going to do it, you’re the ideal person for the job.

Let me just give you a different perspective from our chairman, because I don’t agree with his statement. After having returned

from my 14th trip in the AOR, not always in Iraq but in the surrounding area, this is the first time that I saw some results. This was just 2 weeks ago and I am really excited about it. I think it's a combination of three things, and what I'll ask you to do is respond to this in the record, to find out what your feelings are about them.

One is, it appeared to me you had coinciding at the same time the surge, the appearance of General David Petraeus, and the concern of the Iraqis, primarily the clerics, over this idea that we had all these cut-and-run resolutions here and that all of a sudden they realized maybe they're going to have to do this on their own, I think that actually provided something very positive.

My experience there was mostly in the Anbar Province, I remember, it was only a year ago that al Qaeda made the announcement, this is going to be the capital of terrorism, if you would, in Ramadi. Ramadi is now under control and the whole Anbar Province does look very good.

In Fallujah, I've been there many times and I've watched the progress—that's a place that we all have these visions of this World War II type of door-to-door marine activity. It is now virtually under the control of the Iraqi security forces, something we did not expect could happen this soon.

I want to ask you to study this a little bit and tell me if I'm wrong on this. We've heard a lot about Prime Minister Maliki, Defense Minister Jassim, Dr. Rubaie, and all these people we've met. But these are the political leaders. It appeared to me that the progress being made is really being made through the mosques. It's my understanding—and correct me if I'm wrong in the record—that we've been monitoring the messages that come from the mosques on a weekly basis. Up until February, about 80 percent of these were anti-American messages. They started dwindling down so that in the month of April there was not one anti-American message coming out of the mosques.

I've come to the conclusion the clerics, the imams, are really the leaders and the reasons for the real progress I have seen.

[The information referred to follows:]

It is true that there has been an overall decline in anti-American rhetoric coming out of the mosques; despite this decline, however, the coalition remains the overall primary target of insurgent and militia attacks. Specifically in al Anbar, the dramatic decrease in violence comes mainly from the actions of Sunni tribal leaders.

The second thing I'm going to ask you to respond to is on two programs. One is what we in this country would call the neighborhood watch program. Where somehow—and I assume it's coming from the clerics—we're getting individuals, unarmed, who are volunteering to go out with spray cans and spray paint around the undetonated IEDs—cooperating just as we would in this country on some of our anti-crime efforts.

[The information referred to follows:]

There are 9 District Councils and 88 Neighborhood Councils that represent over 5 million citizens of Baghdad. Members of these councils are selected from their peers, represent local citizen interests, and provide interface with coalition forces and Iraqi security forces (ISF). Because reconstruction and community governance are such a key component of the Baghdad security plan, ISF, and Multi-National Division-Baghdad are working very closely with these councils to address neighbor-

hood security concerns, restore essential services, and facilitate civil-military projects designed to improve the quality of life in each neighborhood.

The third thing I noticed, it was actually in Baghdad, was called joint security stations, where our guys go out and instead of coming back to the Green Zone after their missions, they actually stay out in the neighborhoods with the Iraqi security forces, developing very intimate relationships. To me, this is the reason for that success and I see these successes there.

The last thing I would ask you to talk about for the record is, I've heard from people a lot of them don't even want this to succeed over there—that the same model and the activity you have in the Anbar Province is not something that would work in the rest of Iraq. I'd like to know your feeling about that and why these programs that I see as greatly successful would not work in other parts of Iraq. That would be for the record, and thank you very much, Mr. Chairman and Senator Warner, for allowing me to get my words in.

[The information referred to follows:]

The political progress in the past several months in al Anbar province has dramatically improved the security situation there. Essentially the Sunni tribes are standing up together to oppose al Qaeda. We are beginning to see signs of similar Sunni tribal opposition to al Qaeda in Diyala and Saladin provinces, and in some areas of Baghdad. Some experts suggest that al Anbar is a special case because it is so predominately Sunni and that similar tribal-based progress is not likely in other areas that are mixed Sunni-Shia. My assessment is that it is too early to tell whether this pattern will play out beyond al Anbar, but it represents a potential for improving security that we should support based on assessments of our leaders on the ground.

General LUTE. Thank you, Senator.

Chairman LEVIN. Senator Warner, we've changed the procedure a little bit here to accommodate Senator Inhofe, but we don't want to shortchange you on your opening statement, so let me call on you.

STATEMENT OF SENATOR JOHN WARNER

Senator WARNER. First, I extend a very warm welcome to you, General and Mrs. Lute, and thank you and your family for many years of loyal and dedicated service in the United States Army, and most importantly to our Nation.

You are taking this position at the request of the President of the United States. It's not one that you sought. You are very, I think, happily and exceptionally good at delivering the responsibility as Chief of the Staff of the Joint Staff. As you well know, I've had the occasion on a regular basis to come over and visit with you and other members of the Joint Staff and observe you and the manner in which you, with extraordinary professional capability, manage those responsibilities on behalf of the Chairman of the Joint Chiefs and the Secretary of Defense.

I commend you for all your posts, and I further reflect on a trip that we took, again this time at the request of the President on my behalf. The North Atlantic Treaty Organization (NATO) commander at that time, General James Jones, asked you to accompany me, and we went into Africa to examine some of the areas that were experiencing civil strife and a turnover in government. I saw firsthand how you handled yourself, both as a soldier in a

situation that was not entirely secure by any measure and also with the heavy influx of diplomacy. So I have the highest professional regard for you as a person and you have my full support in this position.

Now, it seems to me, Mr. Chairman—and you and I have been on this committee together many years, 29 to be exact—there are strong divisions within the committee regarding policies as it relates to Iraq and to a lesser extent to Afghanistan. The chairman has expressed his. I most recently, together with a number of other Senators, 52 to be exact, put a measure through the Senate, which measure was eventually taken almost verbatim and incorporated in the most recent appropriations bill, in which in a bipartisan way we discussed the need for benchmarks, an independent examination to be performed by a private sector entity and a retired group of military officers as to the professional capabilities today and projecting into the future of the Iraqi security forces.

Of course everyone is free to discuss policy, but in my judgment this hearing is about General Lute, his background, his experience, his ability to fulfill this position. Now, this position has been the subject of some characterizations by certain retired officers who allegedly were invited to consider it. I was somewhat struck—I have known several of those officers very well—about their condemnation of it.

But that's not General Lute's problem. He didn't participate in that, and I just don't think that those comments by those officers are germane to this hearing. This hearing is on whether or not this officer has the professional credentials to fulfill this assignment requested by the President of the United States, a nomination submitted to the Senate for confirmation. I, for one, feel ever so strongly, based on personal work with him over a period of several years, on his extensive biographical material, this officer is more than qualified to handle those positions.

I think one of the most important aspects of this assignment, if not the most important in my judgment, in addition to your credentials, is will you provide the President your own impartial, straightforward personal advice on a range of issues relating to these two AORs? That's it. I've come to know you. In my dealings with you, you have always said to me, even though perhaps knowing I didn't fully share those views, these were your professional views, these were your assessments.

There's been throughout the history of our country a number of military officers who've stepped up to take on these positions with our Presidents, remaining on active duty, but assigned to the president. As this description of your job lays out very clearly, you're reporting to him and reporting to him only. For military career purposes, you do have your normal chain of command, but that in no way is going to obstruct or impede your ability to give the President your impartial assessment of situations. Many of these situations we cannot foresee on this date at this time, because this is an ever-changing scenario, particularly in Iraq, politically, economically, and militarily.

I was impressed. I've gone through very carefully the responses that you've given to the questions propounded by the committee, which we do as a matter of routine here for officers coming forward

for this type of position. But the question is very interesting: "What role, if any, did you play in the development of the new Iraq strategy announced by the President earlier this year, January 10? Press reports indicate that you opposed the surge strategy during policy deliberations prior to the President's decision. Is that true? If so, why? Have events to date validated or invalidated your concerns?"

This is your reply, very straightforward I find: "I participated in the policy review prior to the President's decision to adjust course in January 2007. During the review I registered concerns"—your personal, professional concerns—"that a military surge would likely have only temporary and localized effects unless it were accompanied by counterpart surges by the Iraqi Government and the other non-military agencies of the U.S. Government. I also noted our enemies in Iraq have in effect a vote and should be expected to take specific steps to counter our efforts. The new policy took such concerns into account. It's too soon to tell the outcome."

I think that's a very straightforward answer, and that's what I say is clear evidence of how you're going to handle this important assignment with the President.

So I congratulate you and I think the President has chosen well, and I'm happy to participate in this hearing this morning.

I thank the chairman.

Chairman LEVIN. Thank you very much, Senator Warner.

Now, before we call upon you, General, pursuant to the long-standing tradition of this committee, we ask all of our nominees, military and civilian, to answer a series of advance policy questions, which Senator Warner has referred to. These questions and the nominee's responses will be made part of the record.

There are also certain standard questions that we ask of every nominee who appears before the committee. These are the questions and we would appreciate your answers:

Have you adhered to applicable laws and regulations governing conflicts of interest?

General LUTE. Yes, sir.

Chairman LEVIN. Thank you.

Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

General LUTE. No, sir.

Chairman LEVIN. Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record in hearings?

General LUTE. Yes, sir.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to Congressional requests?

General LUTE. Yes, sir.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

General LUTE. Absolutely.

Chairman LEVIN. Now, the next question is one which you have answered for the record in a way which is more complicated. I want to alert you to that and make sure we're on the same wavelength here. Do you agree, if confirmed, to appear and testify upon request before this committee?

General LUTE. Senator, I think, as I've demonstrated in the past in my current position as the Director of Operations, I fully respect the Senate's responsibilities for oversight, and I have demonstrated that by quick, responsive appearances before this committee a number of times. In this new position, I'm advised that I may not be in such a position as I have in the past. However, I'll do as directed by the White House.

Chairman LEVIN. I think we all understand the situation. This has been a similar position that others have been in before, and your answer will be made part of the record.

Senator WARNER. Mr. Chairman, on that, could we request that the responses, which were somewhat more at length than what the General just said, be placed in the record at this point, taken out of the responses to the committee and put here for ease of reference by those studying the record?

Chairman LEVIN. Yes, that's a good suggestion, and what we will do is take that answer—we'll leave that in the questions and answers which are already made part of the record. But in addition, what Senator Warner is suggesting is that we will take your answer to this particular question and, since it is more complete than the one you just gave, understandably—

General LUTE. Certainly.

Chairman LEVIN. We will make that part of the record at this point.

[The information referred to follows:]

Congressional Oversight

In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information. Do you agree, if confirmed for this position, to appear before this committee and other appropriate committees of Congress?

Response. During my service as the J-3 to Joint Chiefs of Staff, I have always honored my obligations to this committee to offer testimony when requested. With this new assignment, if confirmed, I am advised that as an Assistant to the President, principles designed to ensure that the President is provided with candid advice and to protect the autonomy of the office would apply to me as they do to preclude the testimonial appearances of other senior advisors to the President, especially as they concern matters of national security. I understand that these principles have applied to all other Active-Duty military officers who have served as senior advisors to the President, including those serving as National Security Advisor and Deputy National Security Advisor, in prior administrations.

Chairman LEVIN. Do you agree to give your personal views when asked before this committee to do so, even if those views differ from the administration in power?

General LUTE. Yes, sir.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

General LUTE. Senator, I think the answer there is very similar to the previous one: As directed by the White House.

Chairman LEVIN. Well, here, though, it's a little different question because we're asking you if you have a good faith basis for denying the request will you give us the basis for your denial.

General LUTE. Yes, sir.

Chairman LEVIN. Okay. Now, we would be delighted to hear from you, General. Again, we thank you for your willingness to take this position at the request of the President. We know that you did not seek this position. You have always performed your duties in a most professional manner. You have been somebody who has provided great service to this Nation and we are grateful for that, and we welcome you and we look forward to your opening statement.

STATEMENT OF LTG DOUGLAS E. LUTE, USA, TO BE ASSISTANT TO THE PRESIDENT AND DEPUTY NATIONAL SECURITY ADVISOR FOR IRAQ AND AFGHANISTAN

General LUTE. Thank you, Mr. Chairman.

I'd like to at the outset join you in recognizing my wife Jane, who's sitting here behind me and has been a constant source of support for me, even while she contributes in a very senior position at the United Nations. It's a real pleasure for me and a great source of support that she's here today.

Senator WARNER. We share those views.

Chairman LEVIN. Thank you so much. Again, our thanks to you, Mrs. Lute.

General LUTE. It's an honor to come before you today for this confirmation hearing. I want to express my sincere thanks to you, Mr. Chairman, to Ranking Member Senator McCain, and to Senator Warner for your prompt consideration of this nomination, especially given the other pressing demands before this committee.

Also, to the members of the committee with whom I have met over the past several weeks, thank you for taking time to discuss this position and my nomination.

To a person, those with whom I have spoken conveyed two clear messages: first, a message of concern for the wellbeing and safety of our men and women in harm's way; and second, that we would all like to see us pursue a course of action that makes our country safer while safeguarding our national interests in the region. Surely we could call this the common ground.

America is at war, and the conflicts in Iraq and Afghanistan represent what we in the military call the main effort in the long war. The stakes for these two countries are certainly high, as they are for all the countries in the region. But the stakes for the United States are also high. This region, where America has vital national interests, will not succeed if Iraq and Afghanistan do not succeed. The U.S. plays a vital role in this cause.

Where are we today? Not where any of us would like. Especially in Iraq, progress has been too little and too slow. No one is satisfied with the status quo, not the Iraqis, not the key regional partners, not the U.S. Government, and not the American people.

To change this, we are in the midst of executing a shift in course, as announced by the President in January. Early results are mixed. Conditions on the ground are deeply complex and likely to continue to evolve, meaning that we'll need to constantly adapt. Often in an environment as complex as Iraq, measures that fix one problem in turn reveal challenges elsewhere.

But one factor remains constant: the dedication and sacrifice of our men and women, military and civilian, serving in these combat

zones. They're a continuing source of inspiration to me and to my family.

The position for which I have been nominated is designed for one fundamental purpose, to advise the President on how to provide our troops and civilians in the field with increased, focused, full-time, real-time support here in Washington. It will do so in two basic ways: by executing policy decisions comprehensively; and by developing policy adaptations to meet changing needs on the ground.

If confirmed, I will report directly to the President. I will brief him daily and act on his instructions in fulfilling my duties. I will work closely with National Security Advisor Steve Hadley to clarify priorities, establish milestones, provide follow-through, and set the policy development agenda. The aim is to bring additional energy, discipline, and sense of urgency to the policy process. Our troops deserve this support.

Mr. Chairman, I'm a soldier and our country is at war. It's my privilege to serve. This position represents a major personal challenge and I'm humbled by the responsibility it entails. If confirmed, I will give the President my straightforward, candid professional advice. I ask for the support of this committee for my nomination. Thank you, sir.

Chairman LEVIN. Thank you, General.

We'll have an 8-minute round to begin.

You stated both in your answers to the questions for the record and publicly that you were skeptical about the surge at the time it was decided upon. You and I talked about this next question yesterday in my office. Were the reasons for your skepticism you believe justified by the events that have occurred?

General LUTE. Senator, I'd reply by saying I think the bidding is still out. I expressed concerns in the policy development phase, as you mentioned in your opening remarks, that this not simply be a one-dimensional surge, that is a military-only. We have taken steps on other dimensions inside the U.S. Government and the Iraqi Government has taken some steps to demonstrate that it understands that it must surge, if you will, alongside of us.

I'd assess at this point that the Iraqi participation in the surge has been uneven so far, and I think we're in the early days and time will tell.

Chairman LEVIN. Do you still retain some of your skepticism overall about the chances of the surge succeeding?

General LUTE. Senator, I think as a military planner and an operations officer, skepticism is a bit of a genetic setting. We are constantly looking at what's happening on the ground——

Chairman LEVIN. I'm not sure what that means.

General LUTE. What I mean by that is it comes naturally. We are constantly looking at developments on the ground, assessing them and asking, what if this, what if that. So I think we're very much in that phase of this operations, where we're still assessing.

Chairman LEVIN. During the last few years, General, what other differences have you had with U.S. policy on Iraq?

General LUTE. Senator, I'm trying to recall. I believe that the policy review that we've just discussed was really the first time I had an opportunity to participate first-hand in the policy process.

Chairman LEVIN. My question's a little different, though: What other differences have you had, not as part of the policy process, but you personally? What other differences have you felt?

General LUTE. Senator, I believe that as I've watched this for 3 years I've come away with three personal lessons, if you will, that reflect my observations over those 3 years. One is that there's no purely military solution to this fight; second, that there's no American-only solution or purely American solution to this fight; and then third, that we can't look at Iraq and Afghanistan and the problems there without seeing them through the lens of the region in which they exist. I'd suggest that any differences or concerns I've had in the past 3 years can be logged under those three categories.

Chairman LEVIN. Would you say that the way you've described them reflects the differences that you felt during those 3 years?

General LUTE. I think that's right, yes, sir.

Chairman LEVIN. Now, the report in the Washington Post a few weeks ago said the following: that in an interview with Charlie Rose of PBS in January 2006 that you said that the military wanted "to see a smaller, lighter, less prominent U.S. force structure in Iraq, both to undercut the perception of occupation and to prevent" what you called the "dependency syndrome, the notion that U.S. forces will do what is necessary and therefore local forces do not need to step up."

Is that an accurate statement of your feelings at the time?

General LUTE. It is, Senator.

Chairman LEVIN. Does that remain your feeling?

General LUTE. It remains to the extent that those two factors, the perception of occupation and what I called at the time the dependency syndrome, are still factors to be taken into account as we plot the way forward in Iraq.

Chairman LEVIN. Do you worry that the Iraqis might have a dependency syndrome?

General LUTE. Senator, I worry any time that we charge young Americans to go out and work alongside an emerging security force, like the Iraqi force, but like others we've worked with across this region and beyond, that the sorts of people we recruit and train into our Armed Forces are can-do, positive, very affirmative and aggressive individuals, and it's not always easy for them to step aside and let their hosts or their local counterparts, step forward. So I think that's a concern.

Chairman LEVIN. That's a concern that you have about our professionalism. I'm talking about the Iraqis' dependency syndrome. Are you worried that they might have a dependency syndrome?

General LUTE. That's a concern, Senator, and it's largely based, as I said, on how we approach our duties alongside the Iraqi forces.

Chairman LEVIN. In the last year and a half since January 2006, we have not had a smaller, lighter, less prominent U.S. force in Iraq to undercut what you call the "dependency syndrome." Would you agree we have not carried out that goal in the last year and a half?

General LUTE. Senator, I agree that we have not. However, I believe that statement was made in January 2006. In February 2006, of course, we saw the Golden Mosque bombing in Samarra, which dramatically changed the conditions on the ground.

Chairman LEVIN. You've said, I think, that you don't believe that there's a military solution for the violence, that Iraqi politicians must work out reconciliation issues in order for Iraq to have a successful outcome. Is that a fair statement?

General LUTE. It is.

Chairman LEVIN. What leverage does the United States have to get the Iraqi political leaders to make the political compromises which are necessary for a political solution? For instance, do you think that U.S. troops' presence and the protection that we offer to the Iraqi Government in the Green Zone provides leverage and that therefore at least the possibility of reducing U.S. troop presence needs to be considered as a leverage method?

General LUTE. Senator, I would look at the current state of affairs slightly differently. I will come to the question. I think that this isn't solely a question of leverage. I believe that the Iraqi Government is committed to the sorts of benchmarks that Senator Warner mentioned and that are now in the most recent bill.

The question in my mind is not to what extent can we force them or lever them to a particular outcome, but rather to what degree do they actually have the capacity themselves to produce that outcome and, if produced or if pressed too hard, will we in turn end up with an outcome that isn't really worth the paper it's written on? So I take that slightly from a different perspective.

Chairman LEVIN. You indicate it's not solely a matter of leverage. Is it at least partly a matter of leverage?

General LUTE. I believe that we have asserted leverage to the extent that the Iraqi Government officials clearly understand that we're providing critical stability for them and critical security for them, especially in the face of this 5-brigade plus-up in Baghdad proper. We're giving them a golden opportunity that they must seize to make progress on the political front. I don't think there's any doubt in the mind of any Iraqi politician that this is an opportunity they have to seize.

Chairman LEVIN. Should there be consequences if they don't seize it?

General LUTE. I accept that might in some views increase the leverage on these Iraqi officials, and it ought to be a dimension of future policy consideration.

Chairman LEVIN. When you say "in some views," is that your view?

General LUTE. Senator, only to the extent that, as I just indicated, I have reservations about just how much leverage we can apply on a system that is not very capable right now.

Chairman LEVIN. Is it your view that to some extent at least that leverage may be useful?

General LUTE. Senator, I agree that it ought to be considered, that it may be useful.

Chairman LEVIN. My time is up. Senator Warner.

Senator WARNER. Thank you, Mr. Chairman.

I'd like to pick up on your last statement, which I found to be a very profound one, and I think it's one that the chairman and I and others agree with. Right now you said, your words were, yes, there is a measure of leverage we have, but your concern is about the capacity of the current elected government to do those things

that we set out in the benchmarks. I think you said that at this time they're not capable.

Would you like to amplify that, because that goes to the very heart of what we're faced with in this situation in Iraq?

General LUTE. Senator, what I meant by the government of Iraq's capacity is simply that I think it's useful for all of us to remember that this government was formed for the first time just a year ago. They're at the 1-year mark. Further, this is the first government of its kind, duly elected, founded on a constitution which was endorsed by the Iraqi people, in the history of Iraq.

So in these very early days of capacity-building inside the Iraqi Government, I just caution that we should be aware that this is a very immature, still emerging government.

Senator WARNER. But I say to you—and you know more about this than I do—we're paying a very heavy price to allow them to grapple with seizing the reins of sovereignty. We're losing brave soldiers, their lives, every week. Many more wounded seriously for life every week. It is a balance that this Congress, this President, and the American public must look at each and every day. Put aside the enormity of the money. There's nothing more precious to us than our military and their families, and they have given a full measure.

When I listen to witnesses that say, yes, the government's only been in business a year, yes—wake up. We're paying a heavy price for them to establish this government.

General LUTE. Senator, if I may.

Senator WARNER. Yes.

General LUTE. Those young men and women walking the streets of Baghdad, Ramadi, Kirkuk, and other places today, Kabul, Kandahar, and so forth, are foremost in my mind, and they're absolutely behind my motivation to seek this appointment, seek this nomination, your confirmation of this nomination, and try to make a difference here in Washington. I share your concern for those young men and women.

Senator WARNER. I think we're progressing. Congress has now required the President to come back up here by July 15 and give us a current assessment, not wait until September. September obviously is a critical period of time, but we need an interim report. I look forward, as do other members, to receiving that from the President. But foremost in our mind is the price that we're paying to allow this government to constitute itself.

Now, the question is—I've looked at the history of a number of your predecessors and they had various ranks. I personally am not concerned that simply you're a three-star as opposed to a four-star, yet you will be dealing with four-stars almost on a basis of equality. But they must recognize, those four-stars that deal with you, that you are the Assistant to the President and in many ways speaking for him and advising him.

Do you see any impediment by virtue of the disparity in rank that you have with the seniors that you will be dealing with?

General LUTE. No, Senator, I don't.

Senator WARNER. I'm confident that is the case.

Now, interagency. This committee has spent a good deal of time—actually, we passed some provisions into law to enable the

various Cabinet officers, secretaries, administrators, and the like, to induce their employees, more and more of them, to take up responsible positions in Iraq. In our discussions that you and I have had over the years, we recognize and are in full agreement this cannot be resolved solely by the men and women in uniform, together with our coalition partners. It has to be an all-out effort across the board by our Federal Government, and I think we have to acknowledge that has not occurred, and even to the satisfaction of the President. In conversations that I've had with him, and I've been in meetings where he, in the presence of his senior Cabinet officers, has urged that cooperation.

Now, that is part of your portfolio. Can you give us some insight into how you intend to approach the need to get further participation, whether it's the Department of Agriculture trying to help restore agriculture in Iraq, whether it's trying to restore a judicial system, or maybe not restore, create a judicial system in Iraq? What are the criteria and how do you intend to go about it?

General LUTE. Senator, if confirmed my plan would be to open, re-open actually because these communication channels exist now, but re-open, based on this new position, open communication channels with General Petraeus in Iraq and General Daniel McNeil in Afghanistan and Ambassador William Wood in Afghanistan and Ambassador Ryan Crocker in Iraq, and ask them for their priorities for the sorts of interagency support that you're suggesting here.

So rather than base it on old priorities, perhaps priorities that linger from the past, I'd ask them for a fresh assessment of what their priorities are and then focus like a laser on meeting those commitments.

Senator WARNER. If you see and learn from the various Cabinet officers that there's a deficiency in the law, I would hope that you would ask the President to promptly send to Congress such legislative requirements as may be needed to make certain all America is in this operation.

Now, of recent there's been a great deal of focus on the Baker-Hamilton report. I personally have the highest regard for those two individuals and the committee that put together that report. I had a small hand in creating the situation which gave rise to that report. I thought the report was very constructive.

But in the light of the lack of progress with this surge in the minds of many Members of Congress and the American public, and other deficiencies that the chairman and myself pointed out that we see as far as the execution of our policy, some members are turning to that report—bills were filed this week in the Senate—as a redirection of efforts.

I personally think we should certainly give the President through July before we act on trying to put any additional direction as to change of policy. That's my view. I'd like to have the President's review in July. But it seems to me that report is about 7 or 8 months old. It was written and put together in the fall of 2006, and some of the assumptions in that report—for example, I think they made a valid assumption that this government, duly elected, was proceeding to become more of a unity government, had set for itself benchmarks of achievement of certain legislative steps that would bring about reconciliation of the differences. That simply has not

happened. So that assumption to me, which gave rise to their findings in that report, should go back and be reexamined before the report is embraced.

Likewise, one of the assumptions is that the Iraqi security forces, which have been in training now for some several years, were gaining strength. I personally, just speaking for myself, am not entirely satisfied with the measure of their participation in the surge. We hear reports now that their units are rolling over, as the chairman said, in a period of 90 days, when our troops are there for a year or more, and this is causing friction.

Their table of organization is well below what is constituted as needed for a viable fighting force. Today I understand some of their units are marginally at 50 percent of their full strength. Now, that's another assumption made by Baker-Hamilton which I feel, no criticism to Baker-Hamilton, but the assumption just hasn't proven out over time.

So as we go forward and await the President's assessment of this program on July 15, I think we should forestall any direction of Congress to try to dictate or suggest or in any other way to the President what's to be done, until we get his report on those issues.

I yield the floor.

Chairman LEVIN. Thank you very much, Senator Warner.

Senator Lieberman.

Senator LIEBERMAN. Thank you, Mr. Chairman.

General Lute and Mrs. Lute, thank you very much for your service. We welcome you here today.

I was just thinking as I've had the chance to get to know you, General, and hearing you today that some of the most impressive people I have met in my lifetime wear the uniform of the U.S. military, and you're one of them. It's really quite remarkable and we all have a lot to be grateful for. This goes from the military police who are walking the beat in Baghdad right to the top. I thank you very much for your service.

What I really mean to say is, I haven't met anybody in the private sector who's any better than the best that we have to offer, that you offer your country, and the others you serve with in the military. I thank you for it.

I was struck—you said some very important things in your opening statement and your answers to the questions asked by the chairman and by Senator Warner. Just in your closing paragraph you said quite simply: "I am a soldier and our country is at war. It is my privilege to serve." That's a real sense of personal ethics and also national purpose, that really continues to distinguish our military. I thank you for saying that.

Again, I just went to Iraq last week and that's exactly—even in the midst of dissent, even when soldiers tell you, I'm not sure it was right for us to be here, or they wonder about how it's going now—most of them don't, but some do—there's a tremendous commitment to try to make it work and a pride in being in service. It should be, and it is I believe, an inspiration to us all.

I appreciate your opening statement because in a couple of your paragraphs you put this in context. I think it's very important for us to look at Iraq and Afghanistan as not isolated. You said—I'm going to quote because these are strong words—"America is at war

and the conflicts in Iraq and Afghanistan represent what we in the military call our 'main effort in the long war.'" I presume, parenthetically, we're talking here about the war we're engaged in against the Islamist extremist terrorists who attacked us on September 11. Am I right about that?

General LUTE. That's right, Senator.

Senator LIEBERMAN. Then you go on to say: "The stakes for these two countries, Iraq and Afghanistan, are high, as they are for all the countries in the region." That's what I found last week when I was there. I visited three of our best Arab allies and Israel, and there is a profound sense of a conflict there between the extremists and everybody else, in some sense more directly between al Qaeda and Iran and in the rest of the region, and that is part of what's going on in Iraq and Afghanistan.

"But the stakes for the U.S. are also high," you say. "This region, where America has vital national interests, will not succeed"—the region won't succeed—"if Iraq and Afghanistan do not succeed, and the U.S. plays a vital role in this cause."

So you have quite powerfully, directly put what's happening in Iraq and Afghanistan in what I believe is the correct larger context of the war against Islamist extremism and of an entire region in which, and I quote you again, "the U.S. has vital national interests." I think it's very important as we go forward that we understand all of that.

Let me just ask you this briefly as my time is limited. You say the stakes for the U.S. are high in what happens in Iraq and Afghanistan. You use the word "succeed." What are the negative consequences for the U.S. if we don't succeed in Iraq and Afghanistan and what are the positive consequences if we do?

General LUTE. Senator, thank you for those comments. I think the long-term, and I would even say the most vital interest at stake in Iraq, Afghanistan, and the regions in which these countries exist begins with defeating al Qaeda. It is very clear that al Qaeda has made it a matter of priority to reestablish a physical safe haven, which they lost when they were driven from Afghanistan. They'd like to retake Afghanistan and move back to that safe haven. But they now have declared their main effort to be in Iraq. So first of all, we have this interest of denying safe haven.

Senator LIEBERMAN. Excuse me a moment. I thank you again for that comment. So therefore I presume you would say that anyone who says that we should pull out of Iraq so we can focus on fighting al Qaeda has missed the point that, in fact, al Qaeda today is our main enemy in Iraq?

General LUTE. I'd argue that that's correct, yes, sir.

Senator LIEBERMAN. Thank you. Please continue.

General LUTE. Second of all, there are longstanding, enduring relationships, security partnerships that we have in the region, some of the countries that you visited. We have an obligation to them in an effort to build longstanding stability or enduring stability in the region.

That of course is linked as well to another interest, and that is access to key natural resources. Then finally, I think over the last years there's an increasingly important national interest with regard to our future strategies toward Iran.

So at least in those four areas, I think there are things that should draw our attention to the regional dimensions of what's happening in Iraq and Afghanistan.

Senator LIEBERMAN. Therefore, how important it is to do everything we can, within reason obviously, to succeed and avoid failure there?

General LUTE. I agree, Senator.

Senator LIEBERMAN. General, I appreciate, I know there has been some media interest in the fact that in some sense you've been portrayed as an opponent of the surge. But I think in your answer to the question that you submitted to the committee you again were right on target. "I participated"—I quote from you—"in the policy review prior to the President's decision to go into the surge. I registered concerns that the military surge would likely have only temporary and localized effect unless it were accompanied by counterpart surges by the Iraqi Government and by the other non-military agencies of the U.S. Government. The new policy took such concerns into account."

I can tell you that I certainly saw that when I went over there last week. On one occasion I was briefed by one of our brigade combat teams that has jurisdiction over a large area in Baghdad, including the Haifa Street area, which was a scene of terrible street combat and now is totally calm. I believe the colonel in charge. He was most impressive. Colonel Roberts, I believe, was his name. It was most interesting to me that they made a presentation of what their goals are. They had eight goals for the area of their responsibility. The first one was military. The other seven were non-military. So I think the position you argued for is being reflected on the ground, and I believe with some success.

This gets to the point, which is the question always raised, do we, those who support the policy, somehow think that there's a strictly military solution to the violence in Iraq? I can tell you I don't. I know you don't. I'll ask you, do you agree that the President of the United States, the Commander in Chief, doesn't think that there is a strictly military solution to the problem in Iraq?

General LUTE. Senator, I believe the President stated that very clearly and certainly the policies that are in place right now reflect that.

Senator LIEBERMAN. I know that the same is true, but I'll ask you, of General Petraeus, who's now commanding our forces there?

General LUTE. I believe that's a strongly held belief by General Petraeus as well.

Senator LIEBERMAN. My time is up, but I thank you for your service. The final word I would say is this. The U.S. military is carrying out an enormous range of responsibilities with great effect, including mostly responsibilities that are non-military. I saw the beginning of some of the provisional reconstruction teams with personnel from other agencies there. Frankly, I don't think the other agencies of the U.S. Government are carrying a fair share of the responsibility today in Iraq, and I hope you will do everything you can to push them to do that. I'd say our military is in some sense involved in the most ambitious, important effort of national reconstruction that America has made since the Marshall Plan. But they need some help from the non-military sections of our Government.

Thank you.

Chairman LEVIN. Thank you, Senator Lieberman.

Senator Reed.

Senator REED. Thank you very much, Mr. Chairman.

General, welcome. For the record, let me say there's no one in the uniform of the United States Army I admire more, respect more. I've had the privilege of knowing you not only as a professional, a colleague, but also as a friend. I have known your wife longer and as someone who has distinguished herself as an Army officer, and we have similar ties to West Point.

I am certainly going to support you, couldn't do otherwise. But, to be blunt, I don't think I'm doing you a big favor.

My sense is, if you step back, your appointment represents a devastating critique of the national security apparatus of this White House, because all you're being asked to do was what Stephen Hadley and Dr. Condoleezza Rice were supposed to be doing for the last several years—identify problems, coordinate resources, bring it to the attention of the President, and get presidential direction. That has been abysmal.

I think also, I'm afraid that your position will be someone who's there to take the blame, but not really have the kind of access to the President and the resources you need to do the job. I presume you will be reporting to Mr. Hadley?

General LUTE. No, sir. I'll be reporting to the President and coordinating with Mr. Hadley.

Senator REED. Mr. Hadley will be reporting to the President independently?

General LUTE. On matters outside of Iraq and Afghanistan, yes, sir.

Senator REED. That I find interesting. Frankly, Afghanistan, Iraq, and, related to that, Iran, are the most critical foreign policy problems we face, and the National Security Advisor of the United States has taken his hands off that and given it to you? Is that your understanding?

General LUTE. Sir, that's the design, yes.

Senator REED. Well, then he should be fired, because, frankly, if he's not capable of being the individual responsible for those duties and they've passed it on to someone else, then why is he there? That's my view.

In fact, I think if the President was really serious he should replace Mr. Hadley, appoint you as a civilian, not as an Army officer. Also, if he didn't choose to do that, replace General Pace with you, because we do need a change in direction and policy.

I just fear that you're going to be placed in an impossible situation. I know why you're doing this job. It's because at the core you're a soldier, because you understand what those young men and women are doing out there, so you couldn't do anything less. But I am very concerned that this is not going to work. It is another political, public relations ploy, rather than a significant change in strategy.

My respect for you is such that certainly I'll support you. I wish you well, and if there's anything that you think I can do to assist you please call upon me.

General LUTE. Thank you, Senator.

Senator REED. Thank you.

Chairman LEVIN. Thank you, Senator Reed.

Let me just clarify one thing. Your answer is so critically important here. Is there a written description of your job which states what you have just said to Senator Reed, that you are going to report to the President on Afghanistan and Iraq and that Hadley does not have that any longer in his portfolio? Is that in your written description?

General LUTE. It is, sir. The best written description is perhaps the response to the first policy question, which is an extract of the job description itself.

Chairman LEVIN. But it excludes Hadley reporting.

General LUTE. No, sir.

Chairman LEVIN. The way you described it, though—

Senator WARNER. The way you described it, you indicated—

Chairman LEVIN.—you have that chunk of his portfolio.

General LUTE. I believe that's right. It does not exclude him from also advising, but the responsibilities for advising for Iraq and Afghanistan, if confirmed, will be mine.

Chairman LEVIN. I agree with Senator Reed. I view that as an astounding indictment and a bifurcation of the national security job. Now there's two national security advisors to the President, one on Iraq and Afghanistan and one on everything else, despite all the relationship between Iraq-Afghanistan and everything else. I think that Senator Reed has put his finger on a very decisive point here and I find it, with him, kind of astounding that that has been done.

That's not your doing, by the way. This is not in any sense a criticism of you. It's quite the opposite.

I also agree with what Senator Reed said about you and why you're doing this, because you're a patriot. It's that simple, and we thank you for that.

Senator Bayh is next.

Senator BAYH. General, I understand you're from Michigan City.

General LUTE. I am, Senator.

Senator BAYH. Well, you come from good roots, but you've been given a tough assignment. I share my colleagues' concern that a good man has been put in a very difficult spot. I'm going to be for you, just as Senator Reed said, but I do have some questions I'd like to ask you your view.

I think it's important for the American people to get as clear an understanding about the state of affairs in Iraq and Afghanistan as we possibly can. I also serve on the Senate Select Committee on Intelligence, so I hear from the intelligence world, as well as the military world. I've been struck over the years about the disparity sometime in the view of events and the state of affairs between the two different communities, and I'd like to ask you about that.

We had a briefing in the intelligence world on Iraq last week and I'd like to share with you the consensus view of the Intelligence Community and get your reaction to that. Their overall consensus was that the trend in Iraq is negative. There are occasional bright spots—for example, some developments in al Anbar Province—but that those positive developments are within the context of an overall negative trend.

Do you share that assessment?

General LUTE. I think, Senator, when you consider beyond simply the security setting, but also looking at the opportunities presented to the Iraqi Government to make progress on important political and economic measures along with the intent of reconciliation, that I share that at best the progress has been uneven.

Senator BAYH. Let me follow up on that. There may be some convergence of opinions here. Their assessment was that the prospect for political steps in Iraq toward meaningful reconciliation among the different parties, that those steps toward reconciliation, the political steps, would be marginal at best through the end of this calendar year. We all agree that political reconciliation is sort of the key to this ultimately working out.

I was interested in your colloquy with Senator Warner about your belief that they have the right intentions in terms of embracing the benchmarks, but don't have the capacity. I would encourage you to retain a healthy level of skepticism about that. I mean, these folks were thinking about taking 2 months off this summer. Now they've gone back on that, but where's the sense of urgency? Their country's at risk of falling apart and they just don't seem to grasp the need to move forward here in material ways.

My question would be: Do you share the Intelligence Community's assessment that the political steps toward reconciliation are likely to be marginal at best through the end of this calendar year?

General LUTE. Senator, my assessment would be that they have a very full agenda and have shown so far very little progress.

Senator BAYH. We were also told that the state of the insurgency, the level of violence and that sort of thing, was in all likelihood going to be about where it is today a year from now. Do you have an opinion about that?

General LUTE. Senator, in the absence of the kind of political and economic steps that are before the Iraqi Government now, if they don't make progress on those sorts of reconciliation measures, I'd share the view that we're not likely to see much difference in the security situation.

Senator BAYH. You said our leverage was limited and that they are sort of feeling their way along here. As Senator Warner pointed out, I think many Americans are deeply concerned about asking our brave soldiers, who I know you care deeply about, to sacrifice themselves while a group of Iraqi political leaders get their act together. I think the American people understand the need for some degree of patience and resolve, but where's the evidence that they're doing their part?

I would encourage you to focus on whatever leverage we have. Some of us have concluded—I think Senator Warner, perhaps others, will take a look at September and that timeframe—but they're just not doing enough. Trying to build up their confidence doesn't seem to have worked too well, and that perhaps the opposite strategy of saying, look, you're either going to do this or not, but you need to get on with it here, that perhaps that sort of approach might be more fruitful, because the other avenue just hasn't worked.

General LUTE. Senator, I'd just add, if I may, that while it's important for us to focus on the results coming out of the government

of Iraq for the good of Iraq, that whatever those results the United States in my view retains long-term, enduring interests in the region, which has us with a national interest in the outcome in Iraq. So we have to balance what's good for Iraq with what's good for the United States in the region.

Senator BAYH. I agree with that.

General LUTE. There's a careful balance here.

Senator BAYH. But we have to pursue our interests in the most intelligent way.

With regard to your colloquy with Senator Lieberman, my dear friend, about al Qaeda and that sort of thing, we cannot let al Qaeda define how most intelligently to pursue our national security interests. Which leads me to something else that the Central Intelligence Agency's top expert on radical Islam had to say last week. In his opinion our presence in Iraq is creating more members of al Qaeda than we are killing in Iraq. Do you have an opinion about that?

General LUTE. Senator, again, I think we have to balance those sorts of assessments, which I think have some credibility, with a gross adjustment in the other direction, which might feature leaving Iraq to al Qaeda. There has to be a policy balance struck here between what's good for Iraq and what's good for the region and what's ultimately good for America.

Senator BAYH. A group of us just returned from Turkey last week and they're very concerned about attacks emanating from the Kurdish parts of northern Iraq. They feel that there are some camps there occupied by radical Kurdish groups. They had an attack in Ankara that killed several people and wounded dozens more. About half a dozen police officers were just killed, I think last week, in eastern Turkey.

This is a legitimate concern for them. They feel that northern Iraq is being used as a safe haven for terror groups to launch attacks on them. They would like our cooperation in doing something about that. Otherwise they feel that they might be forced to take direct action, which could be very destabilizing in Iraq and probably not very successful in cleaning out the camps.

Do you have any thoughts about what we can do to restrain those radical groups?

General LUTE. Senator, two thoughts on that. First, the Kurdish situation and the potential that Kurdish terrorists in northern Iraq may be influencing events inside Turkey demonstrates well, I think, this notion of needing to put the events in Iraq into a regional perspective. Usually when we talk about regional perspective we're talking about east to Iran or west to Syria or south to the Gulf States. I think north to Turkey is a very important dimension of the regional impact of Iraq.

The other thing that strikes me is, to go back to my opening statement, this point of, in such a complex setting as Iraq, as we make a policy adjustment to take on a new dimension or adapt our policy towards a particular element of the problem, we have to be careful that that's viewed in the overall picture, because one adjustment may cause two or three other perhaps unintended consequences. I think the situation with the Kurds in the north is in that category.

Senator BAYH. I would encourage you to look at that, because if the Turks for domestic political reasons feel that they're forced to take more overt action that could have consequences. My point simply was there are ways to deal with the fallout in Iraq that's not going well that might in fact be more effective than our current strategy there. This is something that we're going to ultimately have to make a decision about, whether the Iraqis have it within them to reconcile in a way that this is going to work. Ultimately, if we conclude that they don't, no matter how much we sacrifice, no matter how long we stay, we better have a backup strategy for dealing with the fallout of all of that as we begin to recalibrate our presence there, because it is important to the region, but many of us have concluded that our current way of pursuing our interest is just not very intelligent and is in fact harming our national security interests rather than buttressing them.

My last question for you would be shifting gears a bit to Afghanistan. Pakistan is going through a turbulent time here. That tribal area along their western border has become, unfortunately, a safe haven for al Qaeda. You said they're searching for one in Iraq. They have one now in western Pakistan.

President Musharraf has an election coming up, so he has to deal with that. But look, we have a right to expect them to be more aggressive and vigorous in dealing with those lawless tribal areas. I'd like to ask you, what is it reasonable for us to expect Pakistan to do to try and secure those areas, and how do we strike a balance between the worry of destabilizing Pakistan as they get more vigorous, or perhaps we might have to get more vigorous for them if they just can't do it, on the one hand, versus not doing enough or doing nothing and destabilizing Afghanistan?

There's this tension there between destabilizing two countries, both of which we want to try and stabilize. How do you strike that balance? What specifically should we expect the Pakistanis to do, because they've more or less pulled back from those areas and that's led to an upsurge in Taliban activity?

General LUTE. Senator, if confirmed, this would be very high on my priority list, to deal with the unhelpful influences both by way of the al Qaeda safe haven, but also I'd mention the Taliban safe haven that exists in these border regions of Pakistan. My sense is that Pakistan has done a lot as a key ally in the war on terror, but I couple that view with the impression that they have to do more.

I think there are things that we can do and that we're beginning to undertake now by way of making their tribal-based forces in the frontier regions more capable. I think that has some promise, but that will be a long-term effort.

I think, more fundamentally, the key to the tribal regions in Pakistan have to be viewed in a tribal perspective, and that is essentially that the Pashtun people who reside there and who are giving safe haven to al Qaeda and the Taliban don't only reside there, and we have to look at this problem as the Pashtun community at large, which also includes vast areas of eastern and southern Afghanistan. So I'd look at it tribally in a more regional take and then see what we can do in a targeted way to improve the capacity of the Pakistani forces.

Senator BAYH. Thank you, General. I wish you well. I'm going to vote for you. I would encourage you to have—and I'm sure you will—a particularly realistic view of the Iraqi political leadership, and constantly focus on what we can do to leverage them in the right direction. Ultimately we're going to have to conclude, are they capable of doing this? Not us, but them, with our assistance. Can they reconcile, make the hard political decisions, or are they just kicking the can down the road constantly and the situation is deteriorating, and at some point you reach the point of no return. I for one have concluded that a greater sense of urgency is in order here on their part or it's just not going to work.

Thank you.

General LUTE. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Bayh.

Senator Webb.

Senator WEBB. Thank you, Mr. Chairman.

General, welcome to the process. I'd like to also give my regards to your family. As someone who grew up in the military, I know the sacrifices that they've had to go through to help you reach the position that you're in.

Actually, my concerns here are twofold and they're not related directly to your credentials or to the issues of Iraq and Afghanistan per se. They first of all are related to how this position was created and second to my concerns, and they've been long-held concerns, about the possible confusion of civil-military relations when we have active duty military people over in political positions in an administration.

The first thing—and I hope you will help clarify this for me—we hear that this position was created and at the same time—I spent 5 years in the Pentagon and the way this description is read and your description of it in your testimony about advising the President on these matters, helping to develop policy and these sorts of things, I don't see how that is not redundant to what we are expecting General Pace to do, what the Secretary of Defense ought to be doing, what the National Security Advisor should be doing if he were fully competent, the kind of advice that would be given from Admiral Fallon, for whom I have a high regard.

Can you clarify for us the distinction there?

General LUTE. Senator, you're right. As you list those other principals in the policymaking team, the policy development team—the Secretary of Defense, General Pace as the Chairman of the Joint Chiefs, Admiral Fallon as the combatant commander for these two combat zones—that all of them participate in the policy development process.

This position is slightly different in that I would advise directly the President of the United States in both execution matters and policy development matters on a full-time, 24-7 basis. This is a very focused, limited portfolio position, while the Secretary of Defense, General Pace, and others who sit at the table at the principals committee in the policymaking table have responsibilities much broader than that.

Senator WEBB. I would submit—and this is not a knock in any way on your credentials—but I would submit that if those other in-

dividuals were properly doing their job, this position wouldn't be necessary.

The second question that I have is, from the way that I read your statement and also from past experiences with people who are in uniform who move over into policy advisory and policymaking positions inside an administration, that's a real strain on the notion of civil-military relations, when you have a uniformed military individual making political judgments and giving political advice to a political administration.

I'm interested in hearing your thoughts about that.

General LUTE. Senator, in my mind the key distinction is advice versus decisionmaking. I'm not in the decisionmaking chain. On the execution side, I'm not in the chain of command. I am simply one of a number of assistants to the President, and in this case I advise him on a relatively narrow portfolio.

Senator WEBB. Wouldn't that also describe Mr. Hadley's position? He's not a decisionmaker.

General LUTE. I think it does describe Mr. Hadley's position—

Senator WEBB. But in the decisions that are developed and in the advice that is developed there are political considerations.

General LUTE. Senator, I believe the President will turn to me, based on my background, my experience, and my expertise, and weigh most heavily on me or expect most heavily from me professional, candid, military advice.

Senator WEBB. Yes, but in terms of policy formulation political considerations have to come in play.

General LUTE. That's correct.

Senator WEBB. There will come a time, more than likely, history shows there will come a time when you will return to the military, I would assume.

General LUTE. Senator, we'll have to see how that goes, but that's my intent, yes.

Senator WEBB. So then you will return to the military, to the uniformed military, as an individual who has had a policy advisory position inside a political administration.

General LUTE. If I return to the military, yes, Senator, that'd be right. I'd return fully aware of the military chain of command into which I'm returning.

Senator WEBB. But also you would return as someone who—for instance, similarly, when I was Assistant Secretary of Defense I had a political position and an advisory position, but I was a part of an administration and I was identified with that administration. That concept with respect to civil-military relations has concerned me for a long time. I just want to put that on the table, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Webb.

Senator WEBB. Thank you for your testimony.

Chairman LEVIN. Senator Clinton.

Senator CLINTON. Thank you, Mr. Chairman.

General, thank you. Thank you for your years of service to our country. I agree with my friend and colleague Senator Reed. I don't know why you would put yourself in this position, but I'm grateful that you saw that this was a way to continue your service. I wish you well in a position that many of us believe is an impossible one.

We can only hope that perhaps you might be listened to where others have been ignored for some years now.

General, one of my concerns is that there is growing pressure here in Congress, and it certainly is reflected around the country, that at some point in the not very distant future we will begin to withdraw our combat troops when it becomes abundantly clear, as I believe it already is, that the Iraqis are not yet done killing each other, they have no intention to reach political resolution, and there is no one in the Iraqi Government nor on the scene who appears able to emerge to try to force those political settlements that are absolutely essential to any kind of stability or security in Iraq.

We may, as I have said, have remaining missions that will be concerned with al Qaeda, with the difficult position that we find ourselves in vis-a-vis the Kurds, the Turks, and the increasing pressure on the Kurds from the Sunnis to the south, as well as perhaps a continuing training and logistical role if the Iraqis get their act together, as well as protecting our interests and attempting to figure out what to do about Iran going forward.

I do not foresee a long-term role for our combat brigades in the midst of this sectarian civil war. So to that end, since we know it will be difficult, timeconsuming, and dangerous to withdraw our troops and our equipment, I wrote to Secretary of Defense Gates on May 23, and gave a copy of my letter to General Pace, asking for briefings on what exactly the planning was with respect to future, maybe even imminent, withdrawals of U.S. forces from Iraq.

Mr. Chairman, I ask unanimous consent that my letter to Secretary Gates be made a part of the record.

Chairman LEVIN. It will be made part of the record.

HILLARY RODHAM CLINTON
NEW YORK
SENATOR

ALBANY SENATE OFFICE BUILDING
STATE ST.
WASHINGTON, DC 20540-0894
(202) 224-4401

United States Senate

WASHINGTON, DC 20510-3204

May 22, 2007

COMMITTEES:
ARMED SERVICES
ENVIRONMENT AND PUBLIC WORKS
HEALTH, EDUCATION, LABOR, AND PENSIONS
SPECIAL COMMITTEE ON AGING

The Honorable Robert M. Gates
Secretary of Defense
The United States Department of Defense
The Pentagon
Suite 319
Washington, D.C. 20301

Dear Mr. Secretary:

Given the express will of the Congress to implement a phased redeployment of United States forces from Iraq and the importance of proper contingency planning to achieve that goal, I write to request that you provide the appropriate oversight committees in Congress – including the Senate Armed Services Committee – with briefings on what current contingency plans exist for the future withdrawal of U.S. forces from Iraq. Alternatively, if no such plans exist, please provide an explanation for the decision not to engage in such planning.

The seeds of many problems that continue to plague our troops and mission in Iraq were planted in the failure to adequately plan for the conflict and properly equip our men and women in uniform. Congress must be sure that we are prepared to withdraw our forces without any unnecessary danger.

At a Department of Defense operational update which you hosted earlier this month, you were asked whether contingency plans were being developed in the event that a future assessment concludes the surge is not working. In response, you noted that efforts at the Department of Defense included detailed planning and consideration of operational alternatives, but that “it’s more of just broader conceptual thinking.” General Pace reiterated that the Joint Chiefs of Staff had not received orders to prepare contingency plans.

Yesterday, however, it was reported that your Iraqi counterpart, Defense Minister Abdul-Qader al-Obeidi is preparing plans in the event that the United States and its forces departed Iraq quickly, reviewing worst-case scenarios, and conducting meetings with Iraq’s political leadership on this issue.

In light of growing violence and insecurity in Iraq, the continued lack of political progress by Prime Minister al-Maliki, the Iraqi Defense Ministry’s level of contingency planning, and the will of the American Congress to begin withdrawing troops from Iraq, it is imperative that the Department of Defense prepare plans for the phased redeployment of U.S. forces. As you well know, any military operation requires contingency planning so that the

military and our troops are prepared if the current plan is unsuccessful. It would be irresponsible not to engage in similar planning in Iraq.

Thank you for looking into this matter. I look forward to your reply.

Sincerely yours,

Hillary Rodham Clinton

CC: General Peter Pace, USMC
Chairman, Joint Chiefs of Staff

Senator CLINTON. Certainly while sitting on this committee both in public and in private encounters and conversations it has disturbed me that there seems to have been only the most general of contingency planning with respect to withdrawal. I believe that withdrawal will be extraordinarily dangerous for our troops. There are basically two ways out: up through the north, assuming the Turks let us come out, and they didn't let us come in, so that's a challenge—perhaps they will see their interests differently—or through the south, along highways that will be very difficult to control and protect. We know that a great number of our casualties and injuries occur because of the IEDs and now the more powerful explosives that attack our convoys.

General LUTE, I hope that among your many responsibilities that you have assumed that you will look at this. May I ask you, if you will, please turn your attention to this issue, determine what level of planning has taken place, whether the Secretary of Defense and the Joint Chiefs have been briefed about the level of planning, what kind of timeline would exist if a decision for either military or political reasons were taken to begin withdrawal, and that you would assume this to be part of your responsibility in your new position.

General LUTE. Thank you, Senator. I do think such an adaptation, if the conditions on the ground call for it, will be part of this position.

Senator CLINTON. Thank you very much, General.

I think that among the many concerns that we have expressed to you are the confusion over responsibilities and chain of command. In fact, I think that has been an unfortunate hallmark of this administration's policy toward Iraq from the very beginning. It was unclear who was in charge after the invasion. It certainly was opaque at best as to the extent of authority exercised by Ambassador Paul Bremer. There's been a tremendous amount of difficulty and lack of accountability up and down the chain of command because there have been so many detours and other actors that have been involved.

I think that one of your challenges will be trying to sort all that out. It is certainly my opinion that the Vice President's office has played a major role, continues to play a major role, and runs a par-

allel operation. What is your understanding of your responsibilities vis-a-vis the Vice President?

General LUTE. Senator, as I've said, I'll work directly for the President. But of course the Vice President is on the policy council, if you will, the principals committee of the National Security Council, and as such is an important participant in policy development considerations. So as I work with the President to set the agenda for that council, I'll be working with the Vice President and his staff.

Senator CLINTON. I wish you well, because certainly that's turned out to be a difficult situation for many. I don't know quite how we ever really determine what the chain of command inside the White House is. But certainly I think it's important that whatever your advice is, it be given directly to the President on a regular basis, and it would be my very strong recommendation, if you haven't already negotiated that, that you certainly try to obtain that assurance that you will be working with and directly reporting to the President.

Finally, the question that Senator Bayh raised about Turkey I think is increasingly critical. During the past few weeks there has been an increase in tension between Turkey and the Kurds, with the Turks bitterly complaining about continuing Kurdish separatist attacks. I don't know that we've had a very good briefing on that, Mr. Chairman. I can't figure out what is and isn't really happening. We know that there's a great deal of enmity between these forces. I'm told by the Kurds that they've tried to put a stop to the separatist actions. I don't know whether that's true. So I think it's important that we try to sort it out.

Turkey is a very important ally of ours and I know that, given some of the internal discontent and political upheaval going on in Turkey, that there is tremendous nationalist pressure on the Turkish military to respond to these attacks. It's been reported that there was last Sunday an ambush and killing of eight Turkish military personnel inside Kurdish territory. Yesterday there were unconfirmed reports that some Turkish military units crossed over the border to conduct raids and limited clearing operations in suspected militant camp locations.

I just urge, General, that you pay immediate attention to this. I know that General Joseph Ralston was appointed as a presidential envoy some time ago to the Turkish government. I think this demands the highest and most urgent attention. Clearly it is not in anyone's interest that the Turks cross the border en masse and the Kurds need to understand that it is not in their interest. But I would not be surprised to discover that there were agents, provocateurs within the Kurdish area either operating outside of the two principal Kurdish lines of military command or in some back room deal involved with a few people in Kurdistan, that needs to be reined in, if possible.

This situation is dangerous and difficult enough. We certainly don't need to see it explode in the north.

General, I too will be supporting you because of my high regard for you, what I know of your record, for those like Senator Reed who are incredibly admiring of your service, which I share. I hope that you, since you will be confirmed by the Senate, will see it as

part of your continuing responsibility to keep Congress apprised of what is happening with your work.

General LUTE. Thank you, Senator.

Chairman LEVIN. Thank you very much, Senator Clinton.

Senator SESSIONS.

Senator SESSIONS. Thank you, General. We appreciate your willingness to take on this difficult and important task. For some time I have believed that we needed more intensive management from the President to really make sure that all the various agencies and departments that are involved in Iraq and Afghanistan are operating at the highest level of cooperativeness and effectiveness.

For several years now, I have pointed out that responsibilities such as the economy, oil production, water, electricity, and others are the responsibility of the State Department or other Government departments than the military. My personal view is the military has performed extraordinarily well. I believe, however, that they probably could have done more in these other areas, but because other departments were given that responsibility there's been some confusion about responsibilities.

In areas involving the Department of Justice (DOJ) and the legal system, in my view there are too few personnel there. Likewise, there are areas in which the State Department has not functioned well because they do not have enough people in the country, and at times the level of coordination has not been effective.

I have recommended that the President appoint someone like yourself to be his personal representative, his personal advisor, who can identify the problems that are not getting addressed and report them to him immediately so that he can use his power, his decisionmaking authority, to make it happen. Sometimes it takes an absolute direct decision by the President to end logjams and uncertainties about responsibilities and in a life and death situation like Iraq I don't think we've been getting that done sufficiently. I think you can really help. I think it would be a really positive step.

I believe Mr. Hadley has a tremendous challenge. He has a worldwide challenge. He's with the G-8 and the President today I think. He has China, he has South America, he has Africa, he has Russia, all of those things on his plate that the National Security Council does; and I'm not sure they are configured or ever were considered to be an entity to really get into the details of managing the difficulties that we are facing in Iraq today. I think the President has done well in choosing a military person who has real background in that area who has the gumption to identify problems and confront them and help him solve them. So I want to say that to you first.

Now, as I understand this you won't have a team that would actually execute any proposal. Basically what you would do is if there's a conflict in responsibility or disagreement, let's say about how to establish a court system in Iraq, which I think is way behind its schedule, you would figure out what you thought was a solution and make a recommendation to the President to help him issue the directives that could solve that problem. But you wouldn't have people on your own staff to go out and operate a court system. You would use the personnel that are already there for that. Is that correct?

General LUTE. That's correct, Senator. The execution will continue to reside with the executive departments, as it does today.

Senator SESSIONS. About how many staff personnel do you expect to have?

General LUTE. I have a small staff of about 10 or 12 people, sir.

Senator SESSIONS. So really it will be your personal leadership and your personal determination that will get to the bottom of these things and to give the President the best possible advice. I mean, you're not going to be depending on a big staff. You're going to be doing this personally.

General LUTE. That's correct, Senator.

Senator SESSIONS. I think that's important. I think we need some person of your stature, of your experience, to personally get involved in these matters.

For example, on the question of creating an effective legal system in Iraq, I concluded that Iraq has one-ninth as many prison bed spaces as they have in my State of Alabama, which isn't much different than the national average, and they have a real problem with violence. I've been told DOJ is adding some more prosecutor advisors. I've been told we are adding some bed spaces and that we're doing some of the things that I had previously suggested, which is sending judges out to try cases in distant areas of Iraq so that the local judges' families wouldn't be threatened.

I guess what I'm saying is I think somebody needs to look at this and say, adding just a few more DOJ personnel and adding another 10,000 bed spaces may not be close to enough, and that we need to do 3, 4 times as many and do it promptly. Would you be willing to make those kind of decisions and say, status quo is not enough; we need to make dramatic change here?

General LUTE. Senator, I think the key here is to go to General David Petraeus and Ambassador Ryan Crocker, get from them sort of the ground truth in terms of where our priorities should fall, and then once the President is advised of this assessment, renders a decision, oversee and coordinate the policy execution. I think I agree with everything you've said. I would only add that I think that General Petraeus and Ambassador Crocker are the key inputs to which issues should be priorities.

Senator SESSIONS. You spoke wisely there. That's certainly true. But I guess what I have perceived is that with regard to other agencies than the Defense Department, that people will tell you they're making progress, but if you look at the entire picture it's not nearly enough. I know that Senator Levin and all of us believe that infrastructure, governmental improvements, political improvements, are necessary, and the military can't carry this ball alone.

Would you agree that one of the key components of any success we might have in Iraq is to make progress in those areas other than just the military?

General LUTE. Absolutely. I think the military performs or provides a necessary contribution to this picture, but by itself it's insufficient.

Senator SESSIONS. You served, I believe, on the staff of General John Abizaid?

General LUTE. Yes, sir.

Senator SESSIONS. What was your position and how long did you do that?

General LUTE. For 2 years I was General Abizaid's operations officer, his J-3 as we call it.

Senator SESSIONS. He always expressed concern—and I believe it was persuasive to me—that there was a danger in overcommitting American troops in what could be perceived as an occupation mode and not a supportive role, a temporary action. Share your thoughts about that concern? Would you articulate the tension between using military force and being an occupation force?

General LUTE. Senator, I think this goes right to the heart of the question of are we in the lead or are the Iraqis in the lead and are we supporting. I think at this point in this fight, increasingly we need to take every opportunity to put the Iraqis in the lead across the security, governance, and economic dimensions of this struggle. If we fail to do that and we retain the lead, I think there is a real risk that we'll be seen as occupiers.

Senator SESSIONS. Now, there are some superb generals, colonels, and all out there trying to do their job every day. Do you think there's a danger that sometimes they may want to do too much, just out of patriotism and commitment to mission?

General LUTE. Senator, I think we recruit people and advance people in our Armed Forces who see no problem too great for their efforts and their dedication. That's simply the sort of people we put on the battlefield. But we have to temper that with a realization in this instance in particular that the local Iraqi solution will be the enduring one.

Senator SESSIONS. Well said.

Chairman LEVIN. Thank you.

We have a few minutes before we're going to have to run. We'll have maybe a 2-minute round now to get a couple of us in before we have to run and vote. We will come back after two votes.

General, do you agree that the main purpose of the surge was to give space to the Iraqi politicians to reach a political settlement involving reconciliation?

General LUTE. Yes, Senator.

Chairman LEVIN. Therefore the measure of success of the surge will be whether or not it has led to significant progress towards political reconciliation?

General LUTE. That's right, Senator.

Chairman LEVIN. It seems to me your answer raises a number of questions that you doubt the capacity of the Iraqi Government to reach a political reconciliation. I mean, if the purpose of a surge is to give them breathing space to do something they're incapable of doing, then it seems to me we have a real double problem with this surge. We're losing a lot of lives there during a surge whose purpose is to give breathing space to an Iraqi Government which you have grave doubts about the capacity to reach the very purpose of the surge, which is to give them breathing space to reach the political reconciliation.

By the way, I think they lack will, not capacity, so I don't agree with you particularly on that. But taking your argument, how do you then justify a surge whose purpose is to give breathing space

to a government that by your testimony you doubt has the capacity to make the political reconciliation compromises?

General LUTE. Senator, I am concerned about the capacity of this government, but I haven't passed final judgment on them. I think it is possible that they can muster the will and enough capacity to show progress and maybe by passing measures of reconciliation, break this cycle of violence and this sort of winner-take-all attitude that we sometimes see. So I am concerned, but I'm not yet convinced that they're incapable or unwilling.

Chairman LEVIN. I think there's an inconsistency there. I'll just leave it at that.

Do you believe, General, that the debate that we've had in Congress on amendments that call for troop reductions starting at a certain point, that those debates undermine the troops?

General LUTE. Senator, I know of no evidence of that. I believe the sort of people that are serving in the American Armed Forces today understand the democratic process, and in fact that's what we've sworn to protect and defend. When they see it play out here in Washington they understand that, and they're driving on with the mission they were given.

Chairman LEVIN. So is it your answer then that you do not believe that—

General LUTE. I don't believe that it undercuts their morale.

Chairman LEVIN. Thank you.

Senator Warner.

Senator WARNER. Mr. Chairman, I think the colloquy between Senator Reed and the General—I'd hope in the few moments while we're voting maybe we can get some clarifications as to actually what was said, because I don't want reporting out of this hearing—it just concerns me. I've known Steven Hadley. I've worked with him for 25 years and I have the highest regard for him. I don't share my colleague's personal observation.

But the more important thing is, in any way has Mr. Hadley's role with respect to Iraq and Afghanistan been diminished by your now, presumably subject to confirmation, joining as an advisor to the President on those two specific AORs?

General LUTE. Senator, I see my role as Steve Hadley's teammate on Iraq and Afghanistan. Because Iraq and Afghanistan must be viewed, as we've talked about here this morning, in a regional context, where Steve Hadley does have primacy for execution and policy development, it'd be very difficult to draw a line between us or separate us on matters inside Iraq and Afghanistan. But it is clear that, if confirmed, this appointment will hold primary execution and policy development for those two countries.

Senator WARNER. But in no way is Mr. Hadley's role diminished?

General LUTE. Sir, he's not cut out of the process in any way, and in fact there are two key lines, if you go to the conventional wire and block diagram, for my position if confirmed. One would be a direct line to the President; a second would be a dotted, parallel line to Mr. Hadley for coordination.

Senator WARNER. Correct. I think that puts in perspective my understanding.

Now, there have been announced two resignations from Mr. Hadley's staff, very competent individuals. One was Meghan O'Sullivan

and another J.D. Crouch. Will you be picking up some of their responsibilities?

General LUTE. Almost none of J.D. Crouch's responsibilities, but to a large extent Ms. O'Sullivan's, in addition to others.

Senator WARNER. I see. So you'll be picking that up.

But again, Hadley's operating and going to continue to operate, I think as a very strong, professional advisor to the President. In the history of national security advisors, he's done a fine job. But his role has not been changed by virtue of your addition, subject to confirmation?

General LUTE. Senator, my view is that, if confirmed, Steve Hadley will have a new teammate.

Senator WARNER. Fine. But his role will not be diminished?

General LUTE. That's not how I read it, correct.

Senator WARNER. It'll be augmented.

General LUTE. That's correct.

Senator WARNER. I thank the witness.

Chairman LEVIN. We have asked for your testimony to be transcribed in response to Senator Reed's questions, in response to my questions on this subject.

Senator WARNER. And mine.

Chairman LEVIN. Senator Warner's as well. I think it will speak for itself and we can get back into it.

Senator WARNER. Give the witness a chance in the course of this hearing, before there's reporting made on this hearing, to review that and confirm or advise the committee about how he stated it.

Chairman LEVIN. Very good.

Senator Sessions, if you would recess as soon as you're done, we'd appreciate it.

Senator SESSIONS. I would be pleased.

With regard to schools, oil production, electricity, the legal system—will you be digging into those in more depth than Mr. Hadley could ever have time to do? I mean, won't that be your responsibility, to figure out how these things are coming along, get right in there with the authority of the President behind you to see what the problems are and make advice on how to fix it?

General LUTE. That's the essence of the design of this position, yes, sir.

Senator SESSIONS [presiding]. I don't think the National Security Advisor can have the time to do all those things with every other responsibility. I think it's going to enhance his ability to be effective. Agencies I think have begun to drift sometimes in these kind of situations, and by being a representative of the President you have the authority to shake things up, get things moving in a way that would be helpful to us, and actually could make things safer for those superb soldiers we have on the ground.

We will stand in recess.

General LUTE. Thank you, sir.

[Whereupon, at 11:22 a.m., the committee recessed, then reconvened at 11:58 a.m.]

Chairman LEVIN [presiding]. General, I know you understand how these things go, so I won't apologize too much. But nonetheless, thank you for your patience. We're now back in session.

I think that Senator Lieberman has not had his second round. Senator Warner and I have. Senator Lieberman.

Senator LIEBERMAN. Thank you.

Chairman LEVIN. A very short round, I want to alert you. It's like 2 or 3 minutes.

Senator LIEBERMAN. It's not a long count. It's a short round, okay.

Very briefly, I understand that this is an unusual position you've been appointed to, but I must say, contrary to my friend Senator Reed, I don't think your appointment suggests that Steve Hadley should go. I think this is a recognition and a kind of exercise of sound management that the advice to the President on the wars in Iraq and Afghanistan are so substantial that one person, the National Security Advisor, can't do it all. Either he's going to spend all his time or too much of it on Iraq and Afghanistan and ignore the rest of the world in his advice to the President, or he's going to do the opposite. Either one is not a good idea.

I note that your title is that you've been nominated to be Deputy National Security Advisor for Iraq and Afghanistan and Assistant to the President. Why Assistant to the President? Because history tells us that nations do better when the commander in chief is directly involved day to day in the management of a war, and you're going to be his conduit to do that.

I just wonder if I have it right. I guess the other point is internal—this is real inside baseball—that you will chair the so-called deputies committee when it comes to Iraq, but obviously Mr. Hadley will continue to be involved in the National Security Council overall, the principals.

General LUTE. Right. Senator, let me be very clear about this, because I don't want to leave any doubt based on the earlier session.

Senator LIEBERMAN. Yes.

General LUTE. Steve Hadley remains in all of his capacities the National Security Advisor. He's responsible for national security affairs across the global spectrum. His role is not diminished by this appointment or this designed position. If confirmed, I'll join him as a teammate, and I'll augment him by providing him and the President 24-7 dedicated coverage of policy execution and policy development for Iraq and Afghanistan.

If I was confusing earlier, I'd like to set that straight. To your specific point, yes, I will be, if confirmed, chairing the deputies-level sessions inside the National Security Council process, and Steve and I will be seated together at the principals level.

Senator LIEBERMAN. Okay. To me that clarifies it, and I think your appointment, the creation of the position, particularly putting you into it, is going to move us toward better management both of the Iraq and Afghanistan wars and of the rest of our foreign policy. It's going to require a real sense of mutual respect and, as you said, a sort of team spirit between you and Mr. Hadley. That's where the problems can occur.

But I know both of you and I think I know your skills, your personalities, and your commitment to the higher national purpose, and I don't have any doubt that the two of you will make it work.

General LUTE. Thank you, Senator.

Senator LIEBERMAN. Thank you for clarifying that.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Lieberman.

We'll start our third round here. We'll just go maybe 3 minutes each because another vote has started. But I'm hoping that we'll be able to finish up before we all leave this time.

General, there's been a report in yesterday's edition of the New York Times that the Iraqi parliament voted to require the government of Prime Minister Maliki to bring the matter of how long American troops can stay in Iraq before lawmakers—to bring that matter before the lawmakers, of how long American troops can stay in Iraq, in order for any additional extensions to occur.

Are you familiar with that?

General LUTE. I read the same report, Senator.

Chairman LEVIN. How do you interpret that vote?

General LUTE. Senator, I interpret that as an indication that their council of representatives, the Iraqi parliament, does want to assume control completely of Iraqi affairs. I think this can be viewed as an expression of desired full sovereignty on behalf of the Iraqi representatives. I think that as we approach the fall and look at the current authorizing resolution, which is a U.N. Security Council resolution, and whether or not it will be extended or adapted in some way, that the expression of the parliamentarians, the elected representatives of Iraq, will be heard.

Chairman LEVIN. Secretary Gates has said that the votes here in Congress that set a timetable, while he doesn't agree with them, nonetheless perform a useful function in that they put pressure on the Iraqi leaders to recognize that there is a diminished congressional support for the President's policies and that the American people are no longer, since at least November, supporting the policies as well.

Do you agree with Secretary Gates that there's a useful purpose to these votes, even though he disagrees with the substance of the amendment; that when Congress does pass amendments saying we'll begin to reduce troops as of a certain time that does have a useful aspect to it?

General LUTE. I think that the policy debate back here, first of all, is watched very carefully by the Iraqi officials. I agree with Secretary Gates that it helps them draw the right conclusion, which is that our commitment to Iraq is not open-ended.

Chairman LEVIN. Do you know if the Iraqi parliament has finally decided whether it's going to take a 2-month summer recess?

General LUTE. Senator, we watch this pretty carefully in my current position on the Joint Staff. We have reports, but I don't yet have a confirmation that they've changed their schedule.

Chairman LEVIN. On the question of your relationship to the President and Mr. Hadley, the daily brief that you made reference to—did you say a daily brief on Iraq?

General LUTE. I said I expect to engage with the President daily.

Chairman LEVIN. Is that something that you and Mr. Hadley will do jointly or is that something you're going to be doing?

General LUTE. I think I will, and my staff, will craft it and then we'll coordinate it closely with Steve and his—

Chairman LEVIN. Who will actually be briefing the President?

General LUTE. Sir, as I have—

Chairman LEVIN. As far as you know.

General LUTE. As far as I know, I will, and I fully anticipate that Steve Hadley will be right there alongside of me.

Chairman LEVIN. Will be there?

General LUTE. Alongside.

Chairman LEVIN. Physically?

General LUTE. I believe so, yes, sir.

Chairman LEVIN. Thank you.

Senator WARNER. [Pause.]

Senator WARNER. Excuse me, Mr. Chairman. We have a rough handwritten transcript of what the earlier statement was. I would simply say that I would hope that the witness could have the opportunity to review his earlier statement in the transcript in the context of his reply to our colleague from Rhode Island's question, and if there's any further clarification that you be given the leeway to so state that in the record.

General LUTE. Thank you, Senator.

Senator WARNER. Fine.

Chairman LEVIN. On that matter, I would suggest that we get the transcripts of all of the questions of any of us on the subject that you're referring to, to the General, and that he add whatever he wishes for the record.

Senator WARNER. That's it precisely.

Chairman LEVIN. So we want to thank our reporter as well, because he's done yeoman service in trying to transcribe this during our recess.

[The information referred to follows:]

General LUTE. I'd like to clarify that Steve Hadley retains all his responsibilities as National Security Advisor. So he's responsible for national security affairs across the spectrum of global issues. His role is in no way diminished by this appointment or this designed position. If confirmed, I'll join him as a teammate and I'll augment him by providing him and the President 24-7 dedicated coverage of policy execution and policy development for Iraq and Afghanistan. I have the highest regard for Steve Hadley and, if confirmed, look forward to working with him.

I'd like to clarify that the responsibilities for Iraq and Afghanistan are not exclusively mine. The new position does not exclude Steve Hadley and many others also from advising.

Chairman LEVIN. Senator Warner.

Senator WARNER. Thank you. Now, Senator Lieberman brought up an important thing about how General Lute, subject to confirmation, would be conducting a certain segment of the meetings on Iraq in the procedure of the NSC. It's my understanding that was a function that Meghan O'Sullivan did. Am I correct in that?

General LUTE. Senator, not at the deputies or principals level.

Senator WARNER. Not at the deputies, but—

General LUTE. But below that, yes, sir.

Senator WARNER. That's the chairing that you will do, is that correct?

General LUTE. I'll actually chair at the deputies level and participate at the principals level.

Senator WARNER. So there's two levels of hearings or review processes that regularly go on within the NSC. What was it that Meghan O'Sullivan had?

General LUTE. Senator, that's just below the deputies level.

Senator WARNER. Correct. But didn't you say you would be picking up her responsibilities?

General LUTE. Some of her responsibilities.

Senator WARNER. Some of hers.

General LUTE. Then additional responsibilities, and among the additional are the roles on the deputies and principals committee.

Senator WARNER. Correct. But did she not conduct meetings of a certain level?

General LUTE. She did.

Senator WARNER. Will you be continuing conducting those meetings?

General LUTE. Senator, I suspect I won't be doing those myself, but rather one of my assistants will.

Senator WARNER. I think that we've done our very best then to try and get the record straight. I believe your response to our colleague from Connecticut's question clarified it for my purposes, that there is no diminution; as I stated in my earlier question, that Mr. Hadley will carry on as he has always done, and that you will be in a support role, and directly—of course, for your own initiative, you have free access to the President to, quite frankly, and I hope there are occasions where you will be at variance to the National Security Advisor in terms of some of his observations and opinions. I anticipate that. Wouldn't you?

General LUTE. That may well happen.

Senator WARNER. You would have no reluctance to so speak?

General LUTE. No, Senator, no reluctance.

Senator WARNER. Therein is what this hearing is all about, to hopefully assure this committee that you're going to be an independent individual, and that is why the President selected you, because you've manifested a certain measure of independence in your previous positions as it relates to Iraq and Afghanistan, and that you will continue to do so.

General LUTE. That's exactly right, Senator. I don't intend to change now.

Senator WARNER. Now we go to the subject of Afghanistan, which is of great concern to all of us. We tend to spend a great deal of time, understandably, on Iraq. But this is a situation that bears close attention. There are two difficult things. One, I must say I read through carefully all your answers to the advance policy questions, but I would hope that you could go back and look at your answers and refine with more specificity what you feel is the U.S. role as a part of the NATO organization, as a part of our independent operations with U.S. forces over there, as it relates to this insidious and tragic situation of the growing dependence on drug revenues indeed by the economy of Afghanistan and how that impairs, in my judgment, the ability of the Karzai Government to go forward.

Maybe quickly, what is the U.S. role? At one time Great Britain, as roles were divided up, was given that responsibility. Has that changed now in any way?

General LUTE. The United Kingdom still retains the international lead, based on the Bonn Conference of several years ago, for counternarcotics in Afghanistan. We play a supporting role in

two fundamental ways: first, as one of the 26 member nations of NATO——

Senator WARNER. Correct.

General LUTE.—and then second of all, in a U.S.-only role, if you will, because we retain some U.S.-only missions in Afghanistan as well. In both of those capacities, as part of NATO and U.S.-alone, we provide military support on an in extremis and as-available basis to the U.K. and increasingly the Afghan counternarcotic effort.

Senator WARNER. But the direct responsibility rests with the Afghan government?

General LUTE. It does, that's correct.

Senator WARNER. We're in there in a supporting role. When called upon, we have the discretion to give that support or not.

General LUTE. That's correct.

Senator WARNER. Because I don't want to see the American GIs tasked as the principal persons that have to go in and clean up this situation.

General LUTE. That's right, Senator. This is fundamentally a law enforcement and governance role, not a military role.

Senator WARNER. That is correct.

Next I'd like to ask a question just quickly on the national caveats, which are troublesome. There are some nations that are in that NATO force which have a caveat on the use of their forces, which caveat in many respects precludes them from participating in active combat. Now, what do you hope to bring about by way of a change in that situation?

General LUTE. Senator, you'll appreciate that the NATO command structure already and the political authorities in NATO already understand what you're saying with regard to caveats, which fundamentally restrict the flexibility of our commanders on the ground, because he can't go to everyone and ask them to do every task. He has to sort of keep a chart as to who agrees to do what.

It's a major effort by General Bantz Craddock in his role, both his NATO role and his U.S. role, to reduce those conditions or those caveats, and I'll certainly do everything possible to support that effort.

Senator WARNER. Finally, in response to questions by my colleagues here—and I copied down what you said—the council of representatives are going to assume control of Iraqi affairs. I believe that's what you said. But I did not interpret that to say that they're going to preempt the prime minister. Or how do you take your response and tie it to the fact that the government consists of the council of representatives and the prime minister and his ministers?

General LUTE. Yes, Senator. What I meant by that earlier response was their constitutional role, which is defined in the constitution and has, of course, the parliament, if you will, working alongside the prime minister and other government officials.

Senator WARNER. Right. So it's to foster stronger reins of sovereignty within the framework of the constitution, which outlines their roles as legislators and that of the prime minister and his ministers.

General LUTE. That's exactly right.

Senator WARNER. Not in any way interpreted they're marching off——

General LUTE. This is in accordance with the constitution.

Senator WARNER. Understood.

Chairman LEVIN. Thank you.

Senator Lieberman.

Senator LIEBERMAN. Thank you, Mr. Chairman. Just one question. I know time is going.

This is in some sense a question, in some sense an appeal, and it goes back, General, to something we talked about when you came to my office. The American public's understanding of what we're trying to do in Iraq and how we're doing it is critically important to whether we succeed or fail there. I think you'd agree that ultimately the enemy, al Qaeda, Iran, can't defeat us in Iraq, but we can be defeated by an absence of public support or understanding for what we're doing.

You are a very credible, straightforward communicator, an effective communicator. You're now going to be Deputy National Security Advisor for Iraq and Afghanistan. National Security Advisor Steve Hadley has regularly gone before the press, gone onto television, answering questions. I don't know whether the President has asked you to do this as part of the job definition, but I really appeal to you in the interest of your own sense of service to be willing to spend some of your time, not much because you have a big job to do, going out and speaking to people about what we're trying to do and telling them honestly how you think it's going. Will you do that?

General LUTE. Senator, I'm, with you, concerned about the full range of responsibilities and making sure I meet those responsibilities as essentially an inside player. But I also take your point that our ability to explain what we're doing and where we're going is absolutely critical to the overall success of this mission, and I take your point. Thank you.

Senator LIEBERMAN. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you.

I think you were asked before about an exit strategy and planning pursuant to an exit strategy. Have you seen such planning?

General LUTE. I have not been privy to planning that has any label such as that, sir.

Chairman LEVIN. Do you know if it exists?

General LUTE. I do not know that it exists.

Chairman LEVIN. Could you try to find out and let us know for the record whether that planning exists and what the state of it is and when did it begin?

General LUTE. I understand the question, Senator, and I will do so.

Chairman LEVIN. Thank you.

Senator WARNER. Would the chairman's question be enlarged to say—you used "exit strategy." There could well be some planning with regard to some variance to the strategy announced on January 10.

Chairman LEVIN. However the General wants to answer. He understands the question and I think he——

General LUTE. I think I do take Senator Warner's point, that there's constant planning going on in terms of what might happen, sort of what-if drills, if you will. That planning is going on all the time. It could feature more troops in Iraq, fewer troops in Iraq, troops in Iraq doing something else.

Chairman LEVIN. If you could just tell us what planning there is for fewer troops in Iraq or the removal of troops from Iraq and under what circumstances that would occur and how it would be implemented. Okay?

General LUTE. Yes, sir.

Chairman LEVIN. If you could do that for the record.

[The information referred to follows:]

The focus of planning now is on how to achieve our objectives in Iraq. To my knowledge, no orders have been issued to begin planning for an "exit strategy," although military contingency planning at multiple levels of command takes place continuously and routinely in an effort to have options prepared to respond to changing conditions on the ground.

Chairman LEVIN. In your opinion, would it be advisable for the United States to maintain permanent military bases in Iraq?

General LUTE. Senator, it's U.S. policy that we don't seek this, and we also have no desire for control of resources. These are two things that have been discussed with the Iraqi Government. I believe the position there is very clear. We simply don't seek long-term bases.

What we do seek is a more normalized nation-to-nation relationship with the Government of Iraq, with the state of Iraq.

Chairman LEVIN. Anything further, Senator Warner?

Senator WARNER. No.

Chairman LEVIN. The record's going to stay open for your answers, but also for questions of members of the committee. We will keep the record open for 2 days. I have a number of questions on Afghanistan which I didn't have time here to ask you, and those will be some of my questions.

Again, we thank you very much for your presence, for your willingness to take a very difficult job under circumstances which are extraordinarily difficult, to put it mildly. From everything we know about you, it is part of your character that you would respond to this kind of a request from the President of the United States.

We will now stand adjourned.

[Whereupon, at 11:58 a.m., the committee adjourned.]

[Prepared questions submitted to LTG Douglas E. Lute, USA, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

RESPONSIBILITIES

Question. What are the responsibilities of the position for which you have been nominated? What will be your responsibility for analyzing and evaluating requirements and policies and making recommendations to the President about:

- increasing, sustaining, or reducing U.S. force levels in theater; deployed force readiness, manning, equipment availability/cross leveling/prioritization, modernization, and supply;
- operation and maintenance funding levels, prioritization and cash flow necessary to support continued operations in support of Operation Iraqi Freedom (OIF) and Operation Enduring Freedom (OEF);

- task distribution between and among Federal agencies operating in support of OIF and OEF; and
- command and control relationships between and among Federal agencies in support of OIF and OEF.

Answer. Position description:

Goal:

Establish a full-time senior manager for implementation and execution of the President's strategies for Iraq and Afghanistan and to manage the interagency policy development process for Iraq and Afghanistan and to help develop our ongoing strategy for these two theaters in close coordination with the Assistant to the President for National Security Affairs.

Mission:

- To support our civilian and military leaders in the field, in turning the President's new strategies for Iraq and Afghanistan into a prioritized set of defined implementation and execution tasks with clearly assigned responsibility, deadlines, performance metrics (as appropriate), and a system of accountability to ensure progress toward accomplishing those tasks.
