AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. POMEROY) at 2 p.m.

PRAYER

The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer:

Lord God, today, the ancient but bold wisdom of Solomon speaks to the Members of Congress and awakens a Nation to what is happening.

''Love justice, you rulers of the Earth. Set your mind upon the Lord as is your duty. Seek the Lord with simplicity of heart; for the Lord is found by those who trust Him without question. The Lord makes Himself known to those who never doubt Him. Dishonest thinking cuts people off from God and if such fools take liberties with His power, the Lord reveals them for what they are.''

Lord, grant us wisdom. There is no hiding from You. Help us to truly see who we are as individuals and as a Nation, both now and forever.

Amen.

Mrs. NAPOLITANO led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Williams, one of his secretaries.

WE NEED TO PROTECT AMERICAN FAMILIES

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, it has been 86 days since the Protect America Act expired, and the Democrat leadership refuses to bring a permanent extension to a vote. Our intelligence community has stated unequivocally that our ability to track and spy on potential enemies has been degraded.

The Senate passed a fair and commonsense extension to the Protect America Act months ago, and it has received vocal bipartisan support in the House of Representatives. That is why it is particularly disappointing that the Democrat leadership has failed to bring the bill to the floor. They refuse to do so because they know it will pass. For leadership to deny a vote on such an important piece of legislation, because they know it will pass, is an insult to the majority in this House who want to defeat terrorists overseas.

With each day, our intelligence community is being told to do their job without the tools and resources we can and should provide for them. This is unacceptable to keep American families at risk.

In conclusion, God bless our troops, and we will never forget September the 11th.

(4) NO HISTORIC YIELD DATA AVAILABLE.—In the case of establishing yields for designated oilseeds and eligible pulse crops, if historic yield data is not available, the Secretary shall use the ratio for dry peas calculated under paragraph (2)(A)(ii) in determining the yields for designated oilseeds and eligible pulse crops, as determined to be fair and equitable by the Secretary.

''SEC. 1238F. STEWARDSHIP CONTRACTS.

''(a) SUBMISSION OF CONTRACT OFFERS.—To be eligible to participate in the conservation stewardship program, a producer shall submit to the Secretary for approval a contract offer that—

''(1) demonstrates to the satisfaction of the Secretary that the producer, at the time of the contract offer, is meeting the stewardship threshold for at least one resource concern; and

''(2) would, at a minimum, meet or exceed the stewardship threshold for at least 1 priority resource concern by the end of the stewardship contract by—

''(A) installing and adopting additional conservation activities; and

''(B) improving, maintaining, and managing conservation activities in place at the operation of the producer at the time the contract offer is accepted by the Secretary.

''(b) EVALUATION OF CONTRACT OFFERS.—

''(1) RANKING OF APPLICATIONS.—In evaluating contract offers made by producers to enter into contracts under the program, the Secretary shall rank applications based on—

''(A) the level of conservation treatment on all applicable priority resource concerns at the time of application, based to the maximum extent practicable on conservation measurement tools;

''(B) the degree to which the proposed conservation treatment on applicable priority resource concerns effectively increases conservation performance, based to the maximum extent possible on conservation measurement tools;

''(C) the number of applicable priority resource concerns proposed to be treated to meet or exceed the stewardship threshold by the end of the contract;

''(D) the extent to which other resource concerns, in addition to priority resource concerns, will be addressed to meet or exceed the stewardship threshold by the end of the contract period; and

''(E) the extent to which the actual and anticipated environmental benefits from the contract are provided at the least cost relative to other similarly beneficial contract offers.

''(2) PROHIBITION.—The Secretary may not assign a higher priority to any application because the applicant is willing to accept a lower payment than the applicant would otherwise be eligible to receive.

''(3) ADDITIONAL CRITERIA.—The Secretary may develop and use such additional criteria for evaluating applications to enroll in the program that the Secretary determines are necessary to ensure that national, State, and local conservation priorities are effectively addressed.

''(c) ENTERING INTO CONTRACTS.—After a determination that a producer is eligible for the program under subsection (a), and a determination that the contract offer ranks sufficiently high under the evaluation criteria under subsection (b), the Secretary shall enter into a conservation stewardship contract with the producer to enroll the land to be covered by the contract.

''(d) CONTRACT PROVISIONS.—

''(1) TERM.—A conservation stewardship contract shall be for a term of 5 years.

''(2) PROVISIONS.—The conservation stewardship contract of a producer shall—

''(A) state the amount of the payment the Secretary agrees to make to the producer for each year of the conservation stewardship contract under section 1238G(e);

''(B) require the producer—

''(i) to implement during the term of the conservation stewardship contract the conservation stewardship plan approved by the Secretary;

''(ii) to maintain, and make available to the Secretary at such times as the Secretary may request, appropriate records showing the effective and timely implementation of the conservation stewardship contract; and

''(iii) not to engage in any activity during the term of the conservation stewardship contract on the eligible land covered by the contract that would interfere with the purposes of the conservation stewardship contract;

''(C) permit all economic uses of the land that—

''(i) maintain the agricultural nature of the land; and

''(ii) are consistent with the conservation purposes of the conservation stewardship contract;

''(D) include a provision to ensure that a producer shall not be considered in violation of the contract for failure to comply with the contract due to circumstances beyond the control of the producer, including a disaster or related condition, as determined by the Secretary; and

''(E) include such other provisions as the Secretary determines necessary to ensure the purposes of the program are achieved.

''(e) CONTRACT RENEWAL.—At the end of an initial conservation stewardship contract of a producer, the Secretary may allow the producer to renew the contract for one additional five-year period if the producer—

''(1) demonstrates compliance with the terms of the existing contract; and

''(2) agrees to adopt new conservation activities, as determined by the Secretary.

''(f) MODIFICATION.—The Secretary may allow a producer to modify a stewardship contract if the Secretary determines that the modification is consistent with achieving the purposes of the program.

''(g) CONTRACT TERMINATION.—

''(1) VOLUNTARY TERMINATION.—A producer may terminate a conservation stewardship contract if the Secretary determines that termination would not defeat the purposes of the program.

''(2) INVOLUNTARY TERMINATION.—The Secretary may terminate a contract under this subchapter if the Secretary determines that the producer violated the contract.

''(3) REPAYMENT.—If a contract is terminated, the Secretary may, consistent with the purposes of the program—

''(A) allow the producer to retain payments already received under the contract; or

''(B) require repayment, in whole or in part, of payments already received and assess liquidated damages.

''(4) CHANGE OF INTEREST IN LAND SUBJECT TO A CONTRACT.—

''(A) IN GENERAL.—Except as provided in paragraph (B), a change in the interest of a producer in land covered by a contract under this chapter shall result in the termination of the contract with regard to that land.

''(B) TRANSFER OF DUTIES AND RIGHTS.—Subparagraph (A) shall not apply if—

''(i) within a reasonable period of time (as determined by the Secretary) after the date of the change in the interest in land covered by a contract under the program, the transferee of the land provides written notice to the Secretary that all duties and rights under the contract have been transferred to, and assumed by, the transferee; and

''(ii) the transferee meets the eligibility requirements of the program.

''(h) COORDINATION WITH ORGANIC CERTIFICATION.—The Secretary shall establish a transparent means by which producers may initiate organic certification under the Organic Foods Production Act of 1990 (7 U.S.C. 6501 et. seq.) while participating in a contract under this subchapter.

''(i) ON-FARM RESEARCH AND DEMONSTRATION OR PILOT TESTING.—The Secretary may approve a contract offer under this subchapter that includes—

''(1) on-farm conservation research and demonstration activities; and

''(2) pilot testing of new technologies or innovative conservation practices.

''SEC. 1238G. DUTIES OF THE SECRETARY.

''(1) primarily on each State's proportion of eligible acres under section 1238E(b)(1) to the total number of eligible acres in all States; and

''(2) also on consideration of—

''(A) the extent and magnitude of the conservation needs associated with agricultural production in each State;

''(B) the degree to which implementation of the program in the State is, or will be, effective in helping producers address those needs; and

''(C) other considerations to achieve equitable geographic distribution of funds, as determined by the Secretary.

''(2) BENEFICIAL CROP ROTATIONS.—The Secretary shall determine whether a resource-conserving crop rotation is a beneficial crop rotation eligible for additional payments under paragraph (1), based on whether the resource-conserving crop rotation is designed to provide natural resource conservation and production benefits.

''(3) ELIGIBILITY.—To be eligible to receive a payment described in paragraph (1), a producer shall agree to adopt and maintain beneficial resource-conserving crop rotations for the term of the contract.

''(B) REMOVAL OF DESIGNATION OF FABRICS OR YARNS NOT AVAILABLE IN COMMERCIAL QUANTITIES.—If the President determines that—

''(i) any fabric or yarn described in clause (i) of subparagraph (A) was determined to be eligible for preferential treatment, or

''(5) WHOLLY ASSEMBLED.—A good is 'wholly assembled' in Haiti if all components, of which there must be at least two, pre-existed in essentially the same condition as found in the finished good and were combined to form the finished good in Haiti. (d) SENSE OF CONGRESS REGARDING PROHIBITION ON PROPOSED INTERPRETATION OF THE TERM ''SOLD FOR EXPORTATION TO THE UNITED STATES''.—

(1) IN GENERAL.—It is the sense of Congress that the Commissioner responsible for U.S. Customs and Border Protection should not implement a change to U.S. Customs and Border Protection's interpretation (as such interpretation is in effect on the date of the enactment of this Act) of the term ''sold for exportation to the United States'', as described in section 402(b) of the Tariff Act of 1930 (19 U.S.C. 1401a(b)), for purposes of applying the transaction value of the imported merchandise in a series of sales, before January 1, 2011.

(2) EXCEPTION.—It is the sense of Congress that beginning on January 1, 2011, the Commissioner responsible for U.S. Customs and Border Protection may propose to change or change U.S. Customs and Border Protection's interpretation of the term ''sold for exportation to the United States'', as described in paragraph (1), only if U.S. Customs and Border Protection—

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The Managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2419) to provide for the continuation of agricultural programs through fiscal year 2012, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SHORT TITLE; TABLE OF CONTENTS

(1) Short title

The House bill refers to this Act as the ''Farm, Nutrition, and Bioenergy Act of 2007''. (Section 1)

The Senate amendment states that this Act may be cited as the ''Food and Energy Security Act of 2007''. (Section 1)

The Conference substitute cites this Act as the ''Food, Conservation, and Energy Act of 2008''. (Section 1)

TITLE I—COMMODITY PROGRAMS

(2) Definitions

The House bill defines various terms used in the bill; most terms are defined as they were in the 2002 farm bill. The definitions of ''Far East price'' and two definitions regarding the cotton quality and premiums, ''United States Premium Factor'' and ''Comparable United States Quality'' are added. (Section 1001)

The Senate amendment defines various terms used in the bill; most terms are defined as they were in the 2002 farm bill. The definitions of average crop revenue payment, medium grain rice, and pulse crop are added. (Section 1001) The definition of Secretary applies to the entire bill. (Section 2) The definitions that are relevant to the peanuts subtitle are found in that part. (Section 1301)

The Conference substitute defines terms necessary for implementation of this Act: Secretary, average crop revenue election payment, base acres, counter-cyclical payment, covered commodity, direct payment, effective price, extra long staple cotton, loan commodity, medium grain rice, other oilseed, payment acres, payment yield, producer, pulse crop, State, target price, United States, and United States premium factor. The Conference substitute adopts the Senate structure for the peanut program. (Sections 2, 1001, and 1301)

(3) Adjustments to base acres

The House bill provides that producers are generally not given a choice of updating base acres or payment yields under this bill. However, it requires the Secretary to provide base acre adjustments when a conservation reserve contract ends. Peanut base acres are no longer specified because peanuts are included as a covered commodity. (Section 1101)

The Senate amendment provides for an adjustment in base acres to include pulse crop, camelina, or newly designated oilseed acreage; applies the limit on acreage enrolled in a conservation program only to acreage enrolled in Federal conservation programs; references base acres for peanuts; and requires the Secretary to reduce base acres for land that is no longer used for farming, specifically land that has been developed for commercial or industrial use or has been subdivided and developed for multiple residential units or other nonfarming uses unless the producer demonstrates that the land remains devoted exclusively to agricultural production. Section 1302 applies the base acre provisions for covered commodities under Section 1101 to peanuts. (Sections 1101 and 1301)

The Conference substitute provides for the adjustment of base acres when a conservation reserve contract expires or is terminated; the producer has eligible pulse crop acreage or eligible oilseed acreage as a result of the designation of additional oilseeds; provides for base acres for peanuts in the determination of excess base acres; provides for the reduction of base acres for land that has been subdivided and developed for multiple residential units; provides that direct payments, counter-cyclical payments, or average crop revenue election payments are prohibited if the sum of the base acres of the farm is 10 acres or less unless the farm is owned by a socially disadvantaged or limited resource farmer or rancher; and includes authority for data collection and evaluation. The Conference substitute adopts the Senate structure for the peanut program. (Sections 1101 and 1302)

The Managers intend that the Department accommodate requests for adjustments in base acres for producers on different farms or tracts who have agreed on a voluntary basis to redistribute base acres between tracts, if base acreage was previously transferred to or from a tract because of participation in the Conservation Reserve Program.

The Managers expect Section 1101(b)(1) and Section 1302(b)(1) to be administered in the

same manner as Section 1101(g)(1) and Section 1302(f)(1) of the Farm Security and Rural Investment Act of 2002 as implemented in 7 CFR 1412.204(a).

The Managers recognize the importance of assessing the impact of the suspension of payments for small base acres of covered commodities upon specialty crop producers. For greater efficiency, the Managers expect the Secretary to include the information and evaluations derived from Section 1101(d)(3) and Section 1302(d)(3) into the report required under Section 1107(d)(7)(C) prior to its submission to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate.

The Managers intend for the Department to allow for aggregation of farms for purposes of determining the suspension of payments on farms with 10 base acres or less. The Managers expect for the Department to review farms in this category on an annual basis rather than prohibiting payments to these farms for the life of the farm bill.

(3A) Payment yields

The Senate amendment provides for the establishment of a payment yield for any designated oilseed, camelina, or eligible pulse crop for the purpose of making direct payments and counter-cyclical payments. It also provides a formula for calculating payment yields that is similar to the provisions used in 2002. (Section 1102)

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision, but deletes all references to camelina. (Section 1102)

(4) Availability of direct payments

The House bill reflects current law for the 2008–2012 crop years, except it includes peanuts; terminates advance direct payments starting with the 2012 crop year; and prohibits a direct payment if the payment for all covered commodities would be less than $25. (Section 1102)

The Senate amendment reflects current law for the 2008–2012 crop years, except it terminates advance direct payments starting with the 2012 crop year; specifies separate rates for long grain rice and medium grain rice; and excludes participants in the average crop revenue program. (Sections 1103 and 1303)

The Conference substitute provides direct payments at current rates with an exception for participants in the average crop revenue election program; specifies separate but identical rates for long grain rice and medium grain rice; and terminates advance direct payments starting with the 2012 crop year. The Conference substitute adopts the Senate structure for the peanut program. (Sections 1103 and 1303)

(5) Availability of counter-cyclical payments

The House bill extends current provisions to the 2008–2012 crop years with the following exceptions: Includes peanuts as a covered commodity; clarifies that the Secretary shall establish national average loan rates for all rice and all barley for the purpose of calculating counter-cyclical payments; rebalances target prices for wheat, barley, oats, upland cotton, soybeans, and other oilseeds; eliminates partial counter-cyclical payments beginning with the 2011 crop year; and prohibits a counter-cyclical payment if the total counter-cyclical payments for all covered commodities on the farm would be less than $25. (Section 1103)

The Senate amendment extends the counter-cyclical program for the 2008–2012 crop years, except for participants in average crop revenue program, and with the following modifications: For long grain rice and medium grain rice, the effective price is determined using the same calculation, but by the type or class of rice, as determined by the Secretary; rebalances target prices for wheat, grain sorghum, barley, oats, upland cotton, soybeans, and other oilseeds; establishes target prices for dry peas, lentils, small chickpeas, and large chickpeas; eliminates partial counter-cyclical payments beginning with the 2011 crop year; prohibits the Secretary from establishing a target price for a covered commodity that is different from the target price specified. (Sections 1104 and 1304)

The Conference substitute adopts the Senate provision regarding long grain rice and medium grain rice. The Conference substitute provides that the revised target price for upland cotton and counter-cyclical program payment by class of rice will be effective beginning with the 2008 crop year; establishes target prices for pulse crops beginning with the 2009 crop year; and rebalances target prices for wheat, grain sorghum, barley, oats, soybeans and other oilseeds effective for the 2010 crop year; and eliminates partial counter-cyclical payments beginning with the 2011 crop year. The Conference substitute adopts the Senate structure for the peanut program. (Sections 1104 and 1304)

(6) Availability of revenue-based counter-cyclical payments

The House bill requires the Secretary to offer producers the option to receive revenue-based counter-cyclical payments for the 2008–2012 crop years, as an alternative to receiving counter-cyclical payments under section 1103. Producers will have only one opportunity to elect to receive revenue-based counter-cyclical payments as soon as practicable after enactment. If a producer fails to make such election in a timely manner, the producer will receive counter-cyclical payments pursuant to section 1103. The Secretary is required to make revenue-based counter-cyclical payments to such producers if the Secretary determines that the national actual revenue per acre for the covered commodity is less than the national target revenue per acre for the covered commodity. The Secretary shall establish a national actual revenue per acre by multiplying the national average yield for the given year by the higher of: the national average market price received by producers during the 12–month marketing year; or the loan rate for the covered commodity under section 1202, except that for rice and barley, the Secretary shall establish national average all rice and all barley loan rates. The House bill establishes the national target revenue per acre as follows: wheat, $149.92; corn, $344.12; grain sorghum, $131.28; barley, $153.30; oats, $92.10; upland cotton, $496.93; rice, $548.06; soybeans, $231.87; other oilseeds, $129.18; and peanuts, $683.83. The House bill establishes the national payment yield for each covered commodity and the formula for the national payment rate. The House bill provides that if revenue-based counter-cyclical payments are required for any of the covered commodities, the amount of the payment shall be equal to the product of: the national payment rate; the payment acres; and the payment yield. (Section 1104)

The Senate amendment contains no comparable provision.

The Conference substitute provides an optional revenue-based counter-cyclical program that will be available beginning with the 2009 crop year. As an alternative to receiving counter-cyclical payments under section 1104, and with an agreement to forgo 20 percent of the direct payment rate and 30 percent of the marketing assistance loan rates for covered commodities and peanuts, producers on a farm can elect to participate in the average crop revenue election (ACRE) program for all covered commodities and peanuts on the farm. Once they elect to participate in ACRE, the producers on the farm will remain in the program for the duration of the farm bill. Participants in ACRE will be eligible for state-based coverage with a revenue guarantee equal to 90 percent of the 5–year state average yield per planted acre (excluding the years with the highest and lowest yields) times the 2–year national average price for the covered commodity. Once the ACRE guarantee is established, it cannot vary by more than 10 percent from the previous year's guarantee. If the actual State revenue (yield per planted acre times the national price) is less than the revenue guarantee, and if the producers suffer a loss on their farm, then they will receive an ACRE payment equal to the difference between the State revenue guarantee and the actual revenue for the crop year up to 25 percent of the revenue guarantee. ACRE revenue payments are made on 85 percent of the acreage planted or considered planted to the covered commodity or peanuts. For the 2009, 2010 and 2011 crop years, ACRE payment acres are reduced to 83.3 percent of planted or considered planted acres. (Section 1105)

(7) Producer agreement required as condition of provision of direct payments and counter-cyclical payments

The House bill is similar to current law, except it includes peanuts and omits the reference to noncultivation with regard to the control of noxious weeds. (Section 1105)

The Senate amendment is similar to current law, except it includes an additional provision that land cannot be used for a residential use (including land subdivided and developed into residential units or other nonfarming uses, or that is otherwise no longer intended to be used in conjunction with a farming operation) and provides that no penalty with respect to benefits can be assessed against the producers on a farm for an inaccurate acreage report unless the producers on the farm knowingly and willfully falsified the acreage report. (Section 1105)

The Conference substitute adopts the Senate provision with an amendment that provides that participants in ACRE provide both acreage and production reports and that no penalty with respect to benefits can be assessed against the producers on a farm for an inaccurate report unless the producers on the farm knowingly and willfully falsified the report. The Conference substitute adopts the Senate structure for the peanut program. (Sections 1106 and 1305)

The Managers intend that if a transfer or change in interest of producers on a farm occurs, and the transferee or owner of the acres does not agree to assume all obligations under section 1106(a), then direct payments, counter-cyclical payments, and average crop revenue election payments will be terminated. However, the references to average crop revenue election payments in sections 1106(b)(1)(A) and 1305(b)(1)(A) refer only to the limitation described in section 1105(a)(2), not the actual payment acres for the average crop revenue election program.

(8) Planting flexibility

The House bill is the same as current law, but it includes peanuts and establishes a pilot Farm Flex project in Indiana for the 2008–2012 crop years, under which tomatoes for processing may be planted on up to 10,000 base acres. (Section 1106)

The Senate amendment is the same as current law, except provides an exception for mung beans and pulse crops and provides a pilot flexibility project in Indiana for the 2008 and 2009 crop years. (Section 1106)

The Conference substitute provides that mung beans and pulse crops can be planted

on base acres, and provides a pilot project to allow the production of specified fruits or vegetables for processing for the 2009–2012 crop years on up to 9,000 base acre in the State of Illinois; 9,000 base acres in the State of Indiana; 1,000 base acres in the State of Iowa; 9,000 base acres in the State of Michigan; 34,000 base acres in the State of Minnesota; 4,000 base acres in the State of Ohio; and 9,000 base acres in the State of Wisconsin; that base acres will be protected; and that the Secretary will evaluate the effects of the pilot project on the supply and demand of fresh fruits and vegetables and fruits and vegetables for processing. The Conference substitute adopts the Senate structure for the peanut program. (Sections 1107 and 1306)

The Managers expect the Secretary to establish a process to ensure that the quantity of fruits or vegetables delivered for processing under the pilot project does not exceed the quantity reflected in the original contract between the producer and the processor. The Managers further expect the Secretary to seek evidence that the amount of fruits or vegetables planted for processing under this pilot project is delivered to the processing facility or in the case of crop loss is determined by the Secretary to have been destroyed.

In evaluating the effects of the program on the supply of and price of fresh fruits and vegetables and fruits and vegetables for processing, the Managers encourage the Secretary to examine the impact of the program on bonus buys under the authority of Section 46 of the Agricultural Act of 1949 and surplus removal under the authority of Section 32 of the Act of August 24, 1935.

The Managers recognize the importance of assessing the impact of the expansion of the planting flexibility pilot program upon specialty crop producers. For greater efficiency, the Managers expect the Secretary to include the information and evaluations derived from Section 1101(d)(3) and Section 1302(d)(3) into the report required under this Section prior to its submission the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate.

(8A) Special rule for long grain and medium grain rice

The Senate amendment provides that for the purposes of making counter-cyclical payments for long grain and medium grain rice, base acres on the farm shall be apportioned based on acreage planted to long grain rice and medium grain rice during the 2003–2006 crop years. The Senate amendment requires that base acres, payment acres, and payment yields established with respect to rice are maintained. (Section 1107)

The House bill does not contain a comparable provision.

The Conference substitute adopts the Senate provision. (Section 1108)

(9) Period of effectiveness

The House bill authorizes Subtitle A of Title I for the 2008–2012 crop years. (Section 1107)

The Senate amendment authorizes Part I of Subtitle A of Title I for each covered commodity for the 2008–2012 crop years. (Section 1108)

The Conference substitute adopts the Senate provision with an amendment. (Section 1109)

(10) Availability of nonrecourse marketing assistance loans for loan commodities

The House bill is similar to current law; but authorizes that, for peanuts, a marketing assistance loan or loan deficiency payments may be obtained through a marketing association or marketing cooperative of producers that is approved by the Secretary, or through the Farm Service Agency; stipulates that as a condition for an individual or entity to provide storage for peanuts for which a marketing assistance loan is made, the individual or entity shall agree to provide storage on a non-discriminatory basis and to comply with additional requirements as the Secretary deems appropriate in order to promote fairness in the administration of this section; and authorizes a marketing association or cooperative to market peanuts for which a loan is made under this section, including by separating peanuts by type and quality. (Section 1201)

The Senate amendment is the same as current law; except for participants in average crop revenue program. (Sections 1201 and 1307)

The Conference substitute adopts the Senate provision. (Sections 1201 and 1307)

(10A) Peanuts storage and handling costs

The Senate amendment replaces the payment of storage, handling and associated costs under the 2002 farm bill with a mechanism that ensures handling and associated costs are not deducted from a producer's marketing loan. USDA would advance the payment for handling and associate costs for peanuts placed under loan and the advanced costs would be repaid when the peanuts are redeemed. (Section 1307(a)(7))

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision with an amendment to begin coverage for handling, and associated costs with the 2008 crop of peanuts. (Section 1307)

In order to provide adequate storage and handling for peanuts in the marketing loan program, FSRIA used funds of the Commodity Credit Corporation (CCC) to provide payments for storage, handling, and associated costs for peanuts in the loan. However, these payments expired before the 2007 crop year for peanuts. The budgetary constraints made it impossible to continue the storage and handling payments established under FSRIA in this bill. In order to continue to ensure the adequate storage and handling for peanuts in the loan program, this bill instructs the Secretary to pay any handling and associated costs incurred at the time the peanuts are placed under loan for the 2008 through 2012 peanut crop years. These payments would be repaid when the loan peanuts are redeemed. The Secretary would pay the storage, handling, and associated costs for peanuts under the loan that are forfeited. The purpose of this provision is to not only ensure proper and adequate storage and handling of peanuts in the loan but also to guarantee that these costs are not taken out of a producer's loan proceeds at the time the peanuts are placed in the loan.

(11) Loan rates for nonrecourse marketing assistance loans

The House bill establishes loan rates for marketing assistance loans, including two loan rates for rice (one for long grain rice; one for medium and short grain rice) and two for barley (one for feed barley; one for malt barley), as follows: wheat, $2.94 per bushel; corn, $1.95 per bushel; grain sorghum, $1.95 per bushel; malt barley, $2.50 per bushel; feed barley, $1.90 per bushel; oats, $1.46 per bushel; base quality upland cotton, $0.52 per pound; extra long staple cotton, $0.7977 per pound; long grain rice, $6.50 per hundredweight; medium grain rice and short grain rice, $6.50 per hundredweight; soybeans, $5.00 per bushel; other oilseeds, $0.1070 per pound for each of the following—sunflower seed, rapeseed, canola, safflower, flaxseed, mustard seed, crambe, sesame seed, and other oilseeds designated by the Secretary; dry peas, $5.40 per hundredweight; lentils, $11.28 per hundredweight; small chickpeas, $8.54 per hundredweight; peanuts, $355.00 per ton; graded wool, $1.10 per pound; nongraded wool, $0.40 per pound; honey, $0.60 per pound; and mohair, $4.20 per pound. The House bill requires the Secretary to establish a single county loan rate for corn and grain sorghum in each county; and to administer the applicable loan, marketing loan, counter-cyclical and related programs using an identical loan rate for corn and grain sorghum in each county. (Section 1202)

The Senate amendment establishes loan rates for the 2008–2012 crop years; includes similar provisions to the House bill for corn and grain sorghum; and establishes grading basis for marketing loans for pulse crops using a grade not less than grade number 2 or other grade factors, including the fair and average quality of the crop in any year; and may be adjusted by the Secretary to reflect the normal market discounts for grades less than number 2 quality. (Sections 1202, 1210, and 1307)

The Conference substitute establishes loan rates for the 2008–2012 crop years. The Conference substitute adopts the Senate structure for the peanut program. (Sections 1202 and 1307)

The Managers have included in Section 1202 revisions to the marketing loan rates for dry peas, lentils, and small chickpeas and established a marketing loan program for large chickpeas, hereinafter referred to collectively as pulse crops. The Managers intend that the Secretary establish grade factors for pulse crop loan eligibility that reflects the established U.S. grades for #2 or better used in commercial domestic and export sales transactions and that the Secretary establish a commodity marketing loan grade discount schedule that is comparable to, and reflects the prevailing average grade discounts that apply to commercial pulse crop sales transactions.

(12) Terms of loans

The House bill provides the same loan term as current law. (Section 1203)

The Senate amendment provides the same loan term as current law, and it establishes the same loan term for peanuts as current law. (Sections 1203 and 1307)

The Conference substitute adopts the House provision and the Senate structure for the peanut program. (Sections 1203 and 1307)

(13) Repayment of loans

The House bill provides the same as current law, except it specifies long grain rice, medium grain rice, and short grain rice; includes peanuts; and for upland cotton, it specifies that USDA use price quotes from Far East market to determine the prevailing world market price for upland cotton; provides for adjustments to the prevailing world market price; and requires the prevailing world market price be adjusted to U.S. quality and location; and authorizes further adjustment in the prevailing world market price. The House bill requires repayment rates for dry peas, lentils and small chickpeas to be based on quality grades for those commodities. (Section 1204)

The Senate amendment is similar to current law, except it specifies long grain rice and medium grain rice, provides similar provisions for upland cotton, and requires the loan repayment rate for pulse crops to be based on the specified quality grades for the applicable commodity. (Sections 1204 and 1307)

The Conference substitute provides that the Secretary calculate a loan repayment rate for loan commodities (other than upland cotton, long grain rice, medium grain rice, extra long staple cotton, and confectionery and each other kind of sunflower seed (other

than oil sunflower seed)) based on the average market prices for the loan commodity during the preceding 30-day period. The Conference substitute adopts the Senate provisions with respect to upland cotton with an amendment to provide an adjustment for average transportation costs and adjustments related to U.S. premium factor. (Section 1204)

The Managers have included section 1204(h) which grants authority to the Secretary to modify repayment rates under the marketing loan program in the event of a severe disruption to marketing, transportation, or related infrastructure. The purpose of this provision is to grant the Secretary the authority to manage the marketing loan program in a manner that protects the taxpayer in the event of a major market disruption similar to the disruption that followed Hurricane Katrina. The Managers intend for the actions taken under this provision to be used on a short-term and temporary basis that should not extend beyond the duration of the disruption that gives rise to the exercise of this authority. Further, the Secretary should not exercise this authority if the disruption can be foreseen, such as, routine or announced maintenance on infrastructure, but rather should reserve this authority for extraordinary circumstances.

The Managers authorize the Department of Agriculture to make significant adjustments in the marketing loan program for upland cotton in sections 1204 and 1210. The Managers recognize that the upland cotton marketing loan program will undergo another significant change in the next marketing year when the Department is expected to modify its determination of the adjusted world price (AWP) in the absence of a North European A index. The Managers understand from the Department that it has the authority to make appropriate adjustments for determining and calculating the AWP for upland cotton. The Managers request that the Department ensure that an accurate world price is discovered in the absence of a North European index and appreciate communication from the Department about any changes that may be made. The Managers encourage the Department to make any changes in a manner that ensures a seamless transition for the program, for the Department, and for the entire cotton industry. The Managers also encourage the Department to ensure that such AWP calculation achieves the statutory goal of allowing upland cotton produced in the United States to be competitive both domestically and internationally.

(14) Loan deficiency payments

The House bill provides the same as current law for 2008–2012 crop years and includes peanuts. (Section 1205)

The Senate amendment provides the same as current law for 2009–2012 crop years. For the 2008 crop year, the Senate amendment establishes the effective date for payment rate determination as the date on which the producers on the farm lost beneficial interest and requires the Secretary to establish procedures for consumption on the farm. (Sections 1205 and 1307)

The Conference substitute adopts the House provision and the Senate structure for the peanut program. (Sections 1205 and 1307)

(15) Payments in lieu of loan deficiency payments for grazed acreage

The House bill provides the same as current law. (Section 1206)

The Senate bill provides the same as current law. (Section 1206)

The Conference substitute adopts the House provision. (Section 1206)

(16) Special marketing loan provisions for upland cotton

The House bill requires the President to carry out a special import quota program for upland cotton whenever the Secretary determines that for a consecutive 4-week period, the price of American cotton exceeds the price of cotton delivered in the Far East markets. The term ''special import quota'' is defined as a quantity of imports that is not subject to the over-quota tariff rate of a tariff-rate quota. The House bill provides that the amount of cotton that can come into the U.S. under the special import quota during any marketing year is limited to the equivalent of 10 weeks' consumption of upland cotton by domestic mills. (Section 1207(a))

Subsection (b) of the House bill provides the same as current law. (Section 1207(b))

Subsection (c) of the House bill requires the Secretary, beginning on the date of enactment through July 31, 2013, to issue marketing certificates or cash payments to domestic users of upland cotton for uses of all cotton regardless of origin. The payments or certificates will equal 4 cents per pound. Assistance can only be used for acquisition, construction, installation, modernization, development, conversion, or expansion of land, plant, buildings, equipment, facilities, or machinery. No end date is specified. (Section 1207(c))

The Senate amendment provides the same as the House measure except it specifies the price of American cotton delivered to a definable and significant international market. (Section 1207(a))

Subsection (b) of the Senate amendment is the same as current law, except it provides additional discretion on the quantity of quota. (Section 1207(b))

Subsection (c) of the Senate amendment requires the Secretary, beginning August 1, 2008 through June 30, 2013, to provide economic adjustment assistance equal to 4 cents per pound to domestic users of upland cotton for all documented use of cotton during the previous month regardless of the origin of the cotton. The payment rate is reduced to 0 cents per pound on July 1, 2013, terminating the funding for the program. It specifies the same uses for the assistance as in the House bill. (Section 1207(c))

The Conference substitute adopts the Senate provision with an amendment in subsection (c) to provide assistance equal to 4 cents per pound during the period August 1, 2008, through July 31, 2012 and reduced to 3 cents per pound beginning on August 1, 2012. (Section 1207)

(17) Special competitive provisions for extra long staple cotton

The House bill provides the same as current law. (Section 1208)

The Senate amendment provides the same as current law, except that it does not specify the form of payments (cash or certificates). (Section 1208)

The Conference substitute adopts the Senate provision. (Section 1208)

(18) Availability of recourse loans for high moisture feed grains and seed cotton

The House bill provides the same as current law. (Section 1209)

The Senate amendment provides the same as current law. (Section 1209)

The Conference substitute adopts the Senate provision. (Section 1209)

(19) Deadline for repayment of marketing assistance loan for peanuts

The House bill requires that marketing assistance loans for peanuts be redeemed no later than June 30 of the year subsequent to the year in which the peanuts were harvested. Such loans not redeemed by the deadline shall be deemed forfeited to the Commodity Credit Corporation. (Section 1210)

The Senate amendment contains no comparable provision.

The Conference substitute drops this provision.

(19A) Reimbursable agreements and payments of administrative expenses

The Senate amendment provides that the Secretary may implement any reimbursable agreements or provide for the payment of administrative expenses for peanuts only in a manner that is consistent with such activities in regard to other commodities. (Section 1307)

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision. (Section 1307(g))

(19B) Adjustments of loans for peanuts

The Senate amendment provides authority to the Secretary to adjust loan rates for peanuts based on differences in grade, type, quality, location, and other factors. (Section 1308)

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision. (Section 1308)

(20) Commodity quality incentive payments for healthy oilseeds

The House bill, subject to the availability of funds, requires the Secretary to provide commodity quality incentive payments during the 2009–2013 crop years for the production of oilseeds with specialized traits that enhance human health. Requires the Secretary to issue a request for proposals for payments under this section. (Section 1211)

The Senate amendment is similar to House provision, except it has fewer requirements for proposals; does not specify multi-year contracts; provides protection for proprietary information; and authorizes $400 million for the period of fiscal years 2008–2012 subject to appropriations. (Section 1705)

The Conference substitute adopts the Senate provision with an amendment that provides, subject to the availability of funds, for a quality incentive program for oilseeds demonstrated to improve the health profile of the oilseed for use in human consumption for the period of fiscal years 2009–2012. The provision sets forth the requirements for proposals, protects proprietary information, and provides for program compliance and penalties. (Section 1605)

(20A) Availability of average crop revenue payments

The Senate amendment requires the Secretary to give producers the opportunity to make a one-time election to receive average crop revenue payments for the 2010, 2011, and 2012 crop years; the 2011 and 2012 crop years; or the 2012 crop year in lieu of participating in the direct and counter-cyclical program and the marketing assistance loan program. Producers who elect to participate in the average crop revenue program are eligible to receive fixed payments equal to not less than the product of $15 per acre and the quantity of base acres on the farm for all covered commodities and peanuts. The Secretary is required to make revenue payments available if the actual state revenue for a covered commodity or peanuts is less than the average crop revenue guarantee for that commodity. Average crop revenue payments are made beginning October 1, or as soon as practicable thereafter, after the end of the applicable marketing year (compared to direct payments, this provision delays fixed ACR payments by one year with no provision for advance payments). The Senate amendment establishes actual state revenue as the product of the actual state yield (the quantity of the covered commodity or peanuts produced in the State during the crop year divided by the number of planted acres) and the average crop revenue harvest price (the harvest price used to calculate revenue under revenue plans offered by the Federal

Crop Insurance program). The average crop revenue program guarantee equals 90 percent of the product of the expected state yield per planted acre and the pre-planting price (the price used to calculate revenue under revenue coverage plans offered by the Federal Crop Insurance program) for the crop year and the preceding 2 crop years. The pre-planting price cannot decrease or increase more than 15 percent from the pre-planting price for the preceding year. The payment amount, in addition to the amount under section 1401(b)(2) is equal to the product of: the difference between the average crop revenue program guarantee and the actual state revenue; 85 percent of the base acres on the farm for the covered commodity; the ratio of APH on the farm to the expected state yield; and 90 percent. The Secretary is required to make recourse loans available to producers who participate in this program. (Section 1401)

The House bill contains no comparable provision.

The Conference substitute deletes this provision.

(21) Sugar program

The House bill maintains many provisions of current law as it relates to the sugar program. However, the loan rate for raw cane sugar is increased to 18.5 cents per pound and the loan rate for refined beet sugar is increased to 23.5 cents per pound. The House bill eliminates the authorization of the Secretary to reduce loan rates if there were negotiated reductions in export and domestic subsidies of other major sugar producing countries. (Section 1301)

The House bill extends current law with regard to the term of the loan and the nonrecourse nature of the loan. Processors are to make adequate assurances that payments to growers will be proportional to the loan values, and the Secretary is authorized to set minimums for such payments.

The Secretary is required to operate the sugar program, to the maximum extent practicable, at no cost to the Federal government. If the producer agrees to reduce production under an inventory disposition program, and such reduced production involves sugar beets or sugarcane already planted, the sugar beets or sugarcane produced on diverted acres may not be used for any commercial purpose other than as a bioenergy feedstock.

The House bill requires the Secretary to collect information on the production, consumption, stocks and trade of sugar in Mexico, including United States exports of sugar to Mexico; and publicly available information on Mexican production, consumption, and trade of high fructose corn syrups, including United States exports of high fructose corn syrups to Mexico.

The sugar program is extended through the 2012 crop year, and the program for the 2007 crop will be operated as under current law.

The Senate amendment also maintains many provisions of current law as it relates to the sugar program. However, the loan rate for raw cane sugar is increased to 18.25 cents per pound for 2009, 18.50 cents per pound for 2010, 18.75 cents per pound for 2011, and 19.00 cents per pound for 2012; and the loan rate for refined beet sugar is set at 128.5 percent of the loan rate for raw cane sugar. (Section 1501)

The Senate amendment requires that the Secretary collect information on the production, consumption, stocks and trade of sugar in Mexico, including United States exports of sugar to Mexico; and publicly available information on Mexican production, consumption, and trade of high fructose corn syrups.

All other provisions of the Senate amendment are the same as the House bill.

The Conference substitute adopts the Senate provision with a modification to the loan rate. The loan rate for raw cane sugar will increase to 18.25 cents per pound for 2009, 18.50 cents per pound for 2010, 18.75 cents per pound for 2011, and 18.75 cents per pound for 2012. The marketing loan rate for refined beet sugar is set equal to 128.5 percent of the loan rate for raw cane sugar beginning with the 2009 crop year.

The Conference amendment retains a requirement that the Secretary collect information on the production, consumption, stocks and trade of sugar in Mexico, including United States exports of sugar to Mexico; and publicly available information on Mexican production, consumption, and trade of high fructose corn syrups. The Managers expect such information on Mexican trade of high fructose corn syrups to include both imports and exports. (Section 1401)

(22) United States membership in the International Sugar Organization

The House bill requires the Secretary of Agriculture to work with the Secretary of State to restore U.S. membership within the International Sugar Organization within one year from date of enactment of this bill. (Section 1302)

The Senate amendment requires the Secretary of Agriculture to work with the Secretary of State to restore, to the maximum extent practicable, U.S. membership within the International Sugar Organization within one year from date of enactment of this bill. (Section 1504(l))

The Conference substitute adopts the House provision. (Section 1402)

(23) Flexible marketing allotments for sugar

The House bill extends and amends the provisions of the Agricultural Adjustment Act of 1938 requiring the Secretary to establish marketing allotments for the 2008 through 2012 crops of domestically produced sugar to balance supply and demand and avoid loan forfeitures. (Section 1303)

The House bill adds a definition of ''human consumption'' in the context of sugar for human consumption, as meaning sugar in human food, beverages, or similar products. The House bill defines the term ''market'' as meaning to sell or otherwise dispose of including the forfeiture of sugar under the loan program, the movement of raw cane sugar into the refining process, and the sale of sugar for the production of ethanol or other bioenergy product, if the disposition of the sugar is administered by the Secretary.

The Secretary is required to establish at the beginning of each crop year marketing allotments at a level to maintain raw and refined sugar prices above forfeiture levels. The overall allotment quantity is to be not less than 85 percent of the estimated quantity of sugar for domestic human consumption. The marketing allotments are to apply to the marketing by processors of sugar intended for domestic human consumption, with exceptions to facilitate the export of sugar, to enable another processor to fulfill an allocation established for that processor, or for uses other than domestic human consumption. Processors are prohibited from marketing for domestic human consumption a quantity in excess of the allocation, with the same exceptions as current law.

The House bill strikes the provision requiring the Secretary to suspend allotments when the level of imports will exceed 1.532 million short tons and retains the procedures for the Secretary to reassign allotments if processors cannot fulfill the allocations, and specifies that any resulting imports must be in the form of raw cane sugar.

The House bill includes the definition of ''seed'' for purposes of allotments in proportionate share States. The House bill authorizes the Secretary to transfer the acreage base history of a sugarcane farm to any other parcels of land of the applicant, in order to establish proportionate shares. Sugarcane base acreage that has been, or is, converted to non-agricultural use may be transferred to other land suitable for the production of sugarcane that can be delivered to a processor in a proportionate share State.

The House bill includes transfers of mill allocations under the procedures for appeals to the Secretary regarding allotments, and eliminates an obsolete special appeal procedure regarding beet sugar allocations.

The House bill extends the sugar allotments through the 2012 crop year. Current law shall apply to flexible marketing allotments for the 2007 crop year for sugar.

The Senate amendment is similar to the House bill, with technical changes with regard to definitions and a modification to indicate that the exception for uses other than domestic human consumption does not include the sale of sugar for the production of ethanol or other bioenergy under the Feedstock Flexibility Program. (Section 1504)

The Conference substitute adopts the Senate provision with a modification to clarify that should there be a sale of a factory possessing an allocation of beet sugar, then the Secretary is to transfer to the buyer the allocation that has been agreed upon by the buyer and seller, assuming such an agreement has been reached. Additionally, it clarifies that following a conversion of sugarcane base acreage to a nonagricultural use in a proportionate share state, the Secretary is to notify the affected landowners of the transferability of the applicable base not later than 90 days after the agency becomes aware of the conversion. (Section 1403)

(23A) Administration of tariff rate quotas

The House bill provides that the Secretary is to establish at the beginning of the quota year, the tariff-rate quotas for raw cane sugar and refined sugars at the minimum level necessary to comply with obligations under international trade agreements approved by Congress. The Secretary may take action to increase the supply of sugar on or after April 1 of each fiscal year, with certain constraints on that action. Before April 1, the Secretary is to take action to increase the supply of sugar only if there is an emergency shortage of sugar in the United States market that is caused by war, flood, hurricane, or other natural disaster or other similar event. The House bill would also require the Secretary to establish orderly shipping patterns for sugar imports. (Section 1303)

The Senate amendment is similar to the House bill except the Senate amendment does not contain the provision requiring the Secretary to establish shipping patterns. (Section 1504)

The Conference substitute adopts the Senate provision. (Section 1403)

(23B) Storage facility loans

The Senate amendment prohibits penalties for prepayment of sugar storage facility loans. (Section 1502)

The House contains no comparable provision.

The Conference substitute adopts the Senate provision. (Section 1404)

(23C) Commodity Credit Corporation storage payments

The Senate amendment establishes rates for the storage of forfeited sugar for each of the 2008 through 2011 crop years in an amount that is not less than 15 cents per hundredweight of refined sugar per month or 10 cents per hundredweight of raw cane sugar per month. For each of the 2012 and subsequent crop years, establishes storage payments at rates in effect at the time of enactment. (Section 1503)

The House contains no comparable provision.

The Conference substitute [adopts the Senate provision]. (Section 1405)

(23D) Sense of the Senate regarding NAFTA sugar coordination

The Senate amendment provides a sense of the Senate that the United States and Mexico should coordinate their respective sugar policies and that the United States should consult with Mexico on policies to maximize benefits for growers, processors and consumers. (Section 1505)

The House contains no comparable provision.

The Conference substitute deletes the Senate provision.

(24) Dairy Product Price Support Program

The House bill requires the Secretary to support the price of cheddar cheese, butter, and nonfat dry milk by purchasing such products at specified prices: cheddar cheese in blocks at not less than $1.13 per pound; cheddar cheese in barrels at not less than $1.10 per pound; butter at not less than $1.05 per pound; and nonfat dry milk at not less than $0.80 per pound. If net removals of cheese, butter or nonfat dry milk exceed specific limits for 12 consecutive months, the Secretary may reduce the purchase prices of that commodity during the month that immediately follows. The prices that the Secretary pays under this section for the commodities must be uniform across the country. The Secretary may sell cheese, butter, or nonfat dry milk for unrestricted use from inventories of the Commodity Credit Corporation at prevailing market prices, but not less than 110 percent of the prices specified in the Purchase Price subsection. (Section 1401)

The Senate amendment requires the Secretary to support the price of cheddar cheese, butter, and nonfat dry milk by purchasing such products at specified prices: cheddar cheese in blocks at not less than $1.13 per pound; cheddar cheese in barrels at not less than $1.10 per pound; butter at not less than $1.05 per pound; and nonfat dry milk at not less than $0.80 per pound. The prices that the Secretary pays under this section for the commodities must be uniform across the country. The Secretary may sell cheese, butter, or nonfat dry milk for unrestricted use from inventories of the Commodity Credit Corporation at prevailing market prices, but not less than 110 percent of the prices specified in the Purchase Price subsection. (Section 1601)

The Conference substitute adopts the House provision with an amendment to delete an unnecessary reference to Commodity Credit Corporation funding. (Section 1501)

(25) Dairy Forward Pricing Program

The House bill requires the Secretary to establish the Dairy Forward Pricing Program, which authorizes milk producers to voluntarily enter into forward price contracts with milk handlers for milk that is not Class I. Under such forward price contracts, prices received by milk producers and cooperatives will be deemed to satisfy all regulated minimum milk price requirements. Milk handlers will be prohibited from requiring participation in a forward price contract, and the Secretary is required to investigate complaints and to take appropriate action if evidence of coercion is found. No forward price contract can be entered into after September 30, 2012, or extend beyond September 30, 2015. (Section 1402)

The Senate amendment amends the former dairy forward pricing pilot program to establish a program that allows milk producers and cooperative associations to voluntarily enter into forward price contracts with milk handlers with protections for producers that are similar to the protections provided in the House bill. (Section 1606)

The Conference substitute adopts the House provision. (Section 1502)

(26) Dairy Export Incentive Program

The House bill reauthorizes the dairy export incentive program until December 31, 2012, and authorizes the Secretary to issue rules to ensure that each year the maximum volume of dairy product exports allowable within the United States' obligations under the Uruguay Round Agreements is exported. (Section 1403)

The Senate amendment reauthorizes the dairy export incentive program until December 31, 2012. (Section 1603)

The Conference amendment adopts the House provision.

(27) Revision of Federal marketing order amendment procedures

The House bill requires the Secretary, upon receiving a written request for a hearing to amend a milk marketing order, issue a denial of the request or issue a notice of the hearing, and stipulates the timeframe for a hearing. Notice for a hearing on a proposed amendment to a marketing order must be provided not less than three days before the date of the hearing. The Secretary is required to issue a recommended decision on a proposed amendment to a milk marketing order no more than 90 days after the date set for the submission of post-hearing findings, conclusions and written arguments. Further, the House provision requires the final decision to be issued no more than 60 days after the recommended decision was issued. If the Secretary receives a request for a hearing on a proposed amendment to a milk marketing order within 90 days after announcing a decision on a previously proposed amendment to the same order, and the two proposed amendments are essentially the same, the Secretary is not required to call a hearing. (Section 1404)

The Senate amendment requires the Secretary to issue supplemental rules of practice within 60 days of enactment and establishes 5 provisions to be included in the rules of practice. The Secretary, upon receiving a proposal for a hearing regarding a milk marketing order, is required to issue an action plan and expected timeframes for completion of the hearing not more than 180 days after the date of the notice; issue a request for additional information regarding the proposal; or issue a denial of the request. The Senate amendment establishes a time limit of 90 days after the deadline for submitting post-hearing briefs for USDA to issue a recommended decision on proposed amendments to milk marketing orders and to issue a final decision within 60 days after the deadline for submission of comments and exceptions to the recommended decision. The Senate amendment authorizes industry assessments to supplement appropriated funds if necessary to improve or expedite rulemaking; and authorizes the use of informal rulemaking to amend orders, other than provisions of orders that directly affect milk prices. The Secretary is required, as part of any hearing to adjust make allowances, to determine the average monthly prices of feed and fuel incurred by dairy producers in the relevant marketing area and to consider those prices in determining whether or not to adjust make allowances. (Section 1605)

The Conference substitute adopts the Senate provision with amendments to reduce the amount of time allowed for completion of a hearing to 120 days, provide a limit of up to 60 days for submission of post-hearing briefs, delete specific requirements related to the content of the hearing action plan; and adopt the House language designed to avoid duplicative hearings for similar petitions received within 90 days of the announcement of a decision on a previously proposed amendment. The conference substitute also sunsets the applicability of the Senate provision related to hearings involving adjustments to make-allowances coincident with the Food, Conservation, and Energy Act of 2008.

(28) Dairy Indemnity Program

The House bill reauthorizes the dairy indemnity program through September 30, 2012. (Section 1405)

The Senate amendment reauthorizes the dairy indemnity program through September 30, 2012. (Section 1603)

The Conference substitute adopts the House provision.

(29) Extension of Milk Income Loss Contract Program

The House bill reauthorizes the MILC program through 2012, under the same terms as current law. (Section 1406)

The Senate amendment amends the MILC program for the period October 1, 2008 through August 31, 2012 by increasing the payment factor from 34 percent to 45 percent and by increasing the annual eligible payment quantity from 2.4 million pounds to 4.15 million pounds. (Section 1602)

The Conference substitute provides for the continuation of the program. For the period from October 1, 2008 through August 31, 2012, the payment factor is increased to 45 percent, the annual eligible payment quantity is increased to 2,985,000 pounds, and the $16.94 per hundredweight price is adjusted whenever the National Average Dairy Feed Ration Cost for a month is greater than $7.35 per hundredweight by 45 percent of the percentage increase in the feed ration cost. Beginning September 1, 2012, the trigger for the adjustment in the price used to determine the payment rate is set at $9.50 per hundredweight. (Section 1506)

(30) Dairy Promotion and Research Program

The House bill extends the authority to expend funds to develop foreign markets through fiscal year 2012; amends the definition of ''United States'' to include Alaska, Hawaii, the District of Columbia, and the Commonwealth of Puerto Rico for both promotion and research programs; and provides for a refund of assessments for importers on contracts in effect prior to July 26, 2007, for a period of one year after the date of enactment. (Section 1407)

The Senate amendment extends the authority to expend funds to develop foreign markets through fiscal year 2012. (Section 1604)

The Conference substitute adopts the House provision with an amendment to reduce the rate of assessment on imported dairy products to 7.5 cents per hundredweight. The substitute also amends the Dairy Promotion Stabilization Act of 1983 to authorize the Secretary to establish by regulation the time and method of importer payments under the Act. (Section 1507)

The Farm Security and Rural Investment Act of 2002 amended Section 112 of the Dairy Promotion Stabilization Act of 1983 (7 U.S.C. 4503(d)) to require that, ''The Secretary, in consultation with the United States Trade Representative, shall ensure that the order is implemented in a manner consistent with the international trade obligations of the Federal Government.'' The Managers expect the Secretary to consult with the United States Trade Representative to ensure that any action taken pursuant to this section is consistent with the bilateral, regional and multilateral trade obligations of the Federal Government.

(31) Report on Department of Agriculture reporting procedures for nonfat dry milk

The House bill requires the Secretary to submit a report to Congress within 90 days of enactment of this Act regarding USDA's reporting procedures for nonfat dry milk and the impact of those procedures on Federal milk marketing order minimum prices during the period July 1, 2006, through the date of enactment of this Act. (Section 1408)

The Senate amendment is the same as the House provision except it requires the Secretary to submit the report to the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry. (Section 1607)

The Conference substitute adopts the Senate provision. (Section 1508)

The Managers are encouraged by the corrective action agreed to by the Department in connection with a prior misreporting of nonfat dry milk prices and encourage the Secretary to submit periodic implementation progress reports to the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry. While the Senate provision to require USDA to formally designate an official to be in charge of coordinating dairy oversight was not included in the conference report, the Managers intend that USDA continue with the steps to improve coordination of dairy oversight within the Department and with other relevant agencies as necessary to ensure accurate price determinations.

(32) Federal Milk Marketing Order Review Commission

The House bill, subject to the availability of funds, establishes the Federal Milk Marketing Order Review Commission to conduct a comprehensive review and evaluation of the current Federal milk marketing order system and non-Federal milk marketing order systems. The House bill provides for the appointment of 18 Commission members; requires the commission to issue a report to Congress and the Secretary of Agriculture with the results of the review and evaluation conducted under this section; and stipulates that the commission is wholly advisory in nature, and the recommendations it issues are non-binding. (Section 1608)

The Senate amendment is similar to the House provision except it provides additional areas for the Commission to evaluate and modifies the appointment of Commission members. (Section 1608)

The Conference substitute adopts the House provision except the objectives of the Commission are modified, the number of commission members is reduced to 14 and all Commission members will be appointed by the Secretary.

The Managers are aware of a number of dairy reform proposals being advocated at the State, regional and National level to simplify and improve the Federal milk marketing order system. The Managers intend that the Commission should evaluate as many of these proposals as practicable. Specifically, the Commission should analyze and report on the potential economic benefits of establishing a 2-class system of classified milk consisting of a fluid milk class and a manufacturing grade milk class with the price of both classes determined using similar component prices of butterfat, protein, and other solids. The Commission should also evaluate the economic impacts of proposals to eliminate advance pricing that is currently used to calculate the prices of Class I and Class II skim milk and instead use 4-week component prices that are used to calculate prices for Class III and Class IV milk.

(32A) Mandatory reporting of dairy commodities

The Senate amendment amends current law to require corporate officers or officially-designated representatives of each dairy processor (other than those that process less than 1 million pounds of dairy products a year) to report to the Secretary on each daily reporting day such price, quantity, and product characteristics as the Secretary determines appropriate with respect to those package sizes used to establish minimum prices for Class III or Class IV milk under Federal milk marketing orders. The Senate amendment requires the Secretary to make the information reported available to the public on the same day as the information is reported, and requires dairy manufacturers to report, at periodic intervals, the quantities of dairy products in storage. (Section 1609)

The House bill has no comparable provision.

The Conference substitute provides authority for the Secretary to establish an electronic reporting system, subject to the availability of funds; and requires the Secretary to increase the frequency of mandatory reporting of sales of dairy products once the electronic reporting system is in place. (Section 1510)

(32B) Additional mandatory dairy reporting

The Senate amendment amends current law as amended by section 1609 to require regular audits and comparisons with other related dairy market statistics on at least a quarterly basis. (Section 1610)

The House bill has no comparable provision.

The Conference substitute provides for quarterly audits of information submitted or reported and comparison of such information with related dairy market statistics, and incorporates this requirement in the previous section. (Section 1510)

(33) Administration generally

The House bill authorizes the use of the Commodity Credit Corporation in carrying out the provisions of title I, and, generally, continues other administrative provisions of the 2002 farm bill. (Section 1501)

The Senate amendment includes the same provisions as the House measure, and includes an additional provision to exempt producers who have an option to receive advance direct and partial counter-cyclical payments from constructive receipt of those payments. (Section 1701)

The Conference substitute adopts the Senate provision with an amendment to provide for interim regulations to implement the payment limitations and adjusted gross income provisions. (Section 1601)

Beginning with the 2009 crop, the Conference substitute includes significant reforms to payment limitation and adjusted gross income provisions. This is a complex and long-standing area of the law and regulations, many of which have been in effect for decades. The continuity and predictability of these regulations is important to the economic stability of farm operators, the lenders that finance them, the input suppliers who provide their seed, feed, fertilizer and other inputs, and indeed for the agricultural economy as a whole. In order to avoid undue disruption of all of these sectors of the agricultural economy, the Managers expect USDA to provide adequate notice and opportunity for comment, consistent with the interim rule process, for Sections 1603 and 1604, to ensure these changes are implemented in a manner that is least disruptive to producers and other stakeholders, and that allows the programs to continue to achieve their objectives.

The Managers further expect that in the rulemaking process, USDA will give priority to addressing matters within the scope of these legislative changes and guidance in this Statement in order to minimize program and regulatory disruption, to maximize continuity and predictability, and to focus the scarce resources of the Department of Agriculture on implementing these and other specific regulatory requirements in this bill.

The Managers also expect that during the interim rule process USDA will amend the regulations as necessary or appropriate to implement these statutory changes consistent with the intent and guidance provided by the Managers throughout this Statement. The Managers expect the notice and comment period regarding the implementation of the AGI and payment limitation provisions to include issues such as, family definitions, denial of program benefits, notification of interests in operation, changes in farming operations, actively engaged, schemes and devices, apportionment of income for joint filers, and spousal eligibility. The Managers expect the Secretary to implement the AGI provision in a manner that provides equitable treatment, to the maximum extent practicable, to all producers.

(34) Suspension of permanent price support authority

The House bill provides the same as current law for 2008–2012 crops and for milk through December 31, 2012. (Section 1502)

The Senate amendment provides the same as the House measure except does not include peanuts. (Section 1702)

The Conference substitute adopts the House provision. (Section 1602)

(35) Payment limitations

The House bill extends payment limitations in the 2002 farm bill, with revisions including the elimination of limitations on marketing loan benefits and loan deficiency payments. It amends the Food Security Act of 1985 to limit the total amount of direct payments that a person or legal entity may receive in a crop year to $60,000, excluding peanuts; and counter-cyclical payments that a person or legal entity may receive in a crop year to $65,000, excluding peanuts. For peanuts, a person or entity may not receive more than $60,000 for direct payments, and no more than $65,000 for counter-cyclical payments. The House bill defines the term ''legal entity'' as an entity that owns land or an agricultural commodity, or produces an agricultural commodity; and the term ''person'' as a natural person, and does not include a legal entity. The House bill provides for direct attribution for payments, by requiring the Secretary to promulgate regulations to ensure that the total amount of payments are attributed to a person, by taking into account the direct and indirect ownership interests of the person in a legal entity. It provides that every payment made directly to a person will be combined with the person's pro rata interests in payments received by a legal entity in which the person has an ownership interest. It further provides that for every payment made to a legal entity, the payment will be attributed to those persons with an ownership interest in the entity traced through four levels of ownership in the entities, and includes a framework for that attribution. (Section 1503)

The Senate amendment is similar to the House measure, except it establishes payment limitations under the new act at $40,000 for a combination of both traditional direct and average crop revenue fixed payments, and $60,000 for counter-cyclical payments and the revenue portion of average crop revenue payments. It strikes the definition of ''loan commodity, thereby also terminating the limitations on marketing loan gains and loan deficiency payments,'' adds definitions for ''family member'', ''legal entity'', and ''person,'' and includes spouses in the definition of family member. The Senate amendment provides similar direct attribution requirements, except payments made to a legal entity shall be reduced proportionately by an amount that represents the direct or indirect ownership in the legal entity that has otherwise exceeded the applicable payment limitation. (Section 1703)

The Conference substitute adopts the Senate provision with an amendment that provides a $65,000 payment limit for counter-cyclical payments, a reduced direct payment limit for participants in the ACRE program to reflect the amount the direct payment is cut as a condition to participate in ACRE, and a limit in the amount of counter-cyclical and ACRE payments that reflects the $65,000 limit plus the amount of that the direct payment limit is reduced. The counter-cyclical limits and ACRE limits are combined for those producers who participate in ACRE because producers would be eligible to participate in the counter-cyclical program on one farm and the average crop revenue election on a separate farm. (Section 1603)

The change in the administration of the payment limit provisions from one based on separate ''person'' determinations to one that attributes income among persons and entities, based upon their share of participation, is, by design, less susceptible to manipulation by changing the farming structure to introduce multiple farming entities. With this change, many farming operations that had been approved under current law, may wish to reorganize such operations for estate or tax purposes or for other reasons. It is the intent of the Managers that, consistent with the action taken by the Congress with the passage of the significant changes in farm program participation in 1987, that during the 2008 and 2009 program years, persons should not be penalized for changing their farming operation structure given such a significant change in the law administering payment limitations.

(35A) Special rules

The House bill amends section 1001 of the Food Security Act of 1985 by inserting a new subsection (e) to essentially continue current rules for minor children, marketing cooperatives, trusts and estates, cash rent tenants, and federal agencies. For state, local governments, and their political subdivisions, it prohibits them from receiving direct and counter-cyclical payments unless they are the producer of all crops on the farm and the proceeds of the production benefits a public school or they have an existing share crop lease. If the state, local government, or political subdivision is the producer, all such qualified entities in a state have a combined limit of one entity for the payments they receive. For share crop leases, if the land is used to maintain a public school, the state, local government, or political subdivision may continue to receive payments under current law until the lease expires. It provides for a 2–5 year denial of benefits for evasion of payment limits, including the failure to disclose material information, and that benefits be denied on a pro-rata basis according to ownership. In addition, the language provides that the addition of a family member under the provisions of section 1001A will be considered to be a bona fide and substantive change. This language encompasses the addition of a spouse to a farming operation, given the new provisions in section 1001A concerning spouses. (Section 1503)

The Senate amendment provides the same as the House measure, except it maintained current law with regard to production on land owned by state and local governments when the proceeds are used to maintain a public school. The Senate amendment expands the enforcement capability of the Secretary and provides for extended penalties for individuals or entities that perpetuate a fraud or a scheme or device in order to exceed the applicable limit on payments. Persons or entities that commit fraud or equally serious actions can be subjected to a five-year denial of program benefits. Any member of a legal entity that participates in a scheme or device to evade the limitations shall be jointly and severally liable for any amounts determined to be payable to the Secretary. The Secretary may partially or fully release from liability any person who cooperates with the Secretary in enforcing payment limitation provisions. (Section 1703)

The Conference amendment adopts the Senate provision with an amendment to provide a single, combined statewide payment limit of $500,000 upon all state and local governments and political subdivisions that receive farm program payments. This limit would not apply to states with populations less than 1.5 million. (Section 1603)

It is the intent of the Managers that the addition of a spouse (also a family member) will be considered to be bona fide and substantive—just as with the addition of any family member.

(35B) Three-entity rule; actively engaged in farming; denial of program benefits

The House bill amends the Food Security Act of 1985 to repeal the three-entity rule and to require notification of interests. Each entity or person receiving payments is to provide the Secretary the name and social security number of each individual, or the name and tax ID number of each entity, that holds or acquires an ownership interest; and for each person, provide such information for each entity in which the person holds an ownership interest. (Section 1503)

The Senate amendment provides the same as the House measure. (Section 1703)

The Conference amendment adopts the Senate provision with an amendment to replace ''presented false information that was material'' with ''failed to disclose material information'' and to specify that the provisions apply to any legal entity and any member of any legal entity. (Section 1603)

(35C) Actively engaged in farming

The House bill amends the Food Security Act of 1985 to essentially continue the provisions that recipients be ''actively engaged'' in farming. Existing special classes of actively engaged participants are continued, with the exception that as long as one spouse is determined to be actively engaged, the

other spouse shall be determined to have met the requirements of personal labor or active personal management. (Section 1503)

The Senate amendment provides the same as the House measure. (Section 1703)

The Conference substitute adopts the Senate provision. (Section 1603)

Current law concerning spouses made it very difficult for a spouse to be considered to be a separate person for the purpose of the application of the payment limits. In adopting the provision that if one spouse has been determined to be ''actively engaged,'' then the other spouse will be deemed to have made a significant contribution of active labor or active personal management to the operation as required by section 1001A(b)(2)(A)(i)(II), it is the intent of the Managers that this provision recognize the valuable contributions made by the spouse in a family farming operation as well as the significant value of these contributions to the overall success of family farming operations in America. It is further the intent of the Managers that in implementing this section, the Secretary shall consider such automatic ''significant'' contribution of active labor or active personal management to be commensurate with at least a 50% share in the profits and losses of the farming operation and to be at risk. It is the intent of the Managers to end the discrimination against spouses of farming families and reflect their true value to the farming operation. By assigning a ''significant'' level of contribution of labor or active management, the Conference Substitute requires the spouse only to make a significant contribution of capital, equipment, or land in order to be considered actively engaged.

(35D) Transition

The House bill provides that the current provisions of Section 1001 of the Food Security Act of 1985 will remain applicable to the 2007 crop. (Section 1503)

The Senate amendment provides the same as the House measure. (Section 1703)

The Conference substitute provides that the current provisions of sections 1001, 1001A, and 1001B of the Food Security Act of 1985 will remain applicable to the 2007 and 2008 crops. (Section 1603)

(36) Adjusted gross income limitation

The House bill extends the adjusted gross income limitation to programs under this Act and extends the effective period through the 2012 crop year. (Section 1504(a))

It also amends section 1001D of the Food Security Act of 1985, beginning with the 2008 crop year, to require that individuals or entities have an average adjusted gross income (AGI) not exceeding $1 million in order to receive program payments. Further provides that an individual or entity with an AGI in excess of $500,000 shall not be eligible for benefits, unless at least 66.66 percent of the AGI is derived from farming, ranching, or forestry operations, as determined by the Secretary. (Section 1504(b))

Modified AGI limits applicable to the 2008 through 2012 crop years. (Section 1504)

The Senate amendment extends the effective period through the 2012 crop year. (Section 1704(a))

It amends section 1001D of the Food Security Act of 1985 to lower the applicable average adjusted gross income (AGI) limit for recipients of direct or counter-cyclical payments, marketing loan gain or loan deficiency payments and average crop revenue payments from the current level of $2.5 million to $1,000,000 for the 2009 crop year and to $750,000 for the 2010 and subsequent crop years. Individuals or entities that receive 66.66% of their income from farming, ranching or forestry operations are exempted from this restriction. The Senate amendment establishes the income limitation for conservation programs at the current level of $2.5 million, unless not less than 75 percent of the AGI is derived from farming, ranching, or forestry operations. (Section 1704(c))

The Senate Amendment provides that existing adjusted gross income provisions of the Food Security Act shall continue to apply with respect to the 2007 and 2008 crops. (Section 1704(d))

Authorizes the allocation of adjusted gross income among the individuals filing joint returns provided the allocation is supported by a certified public accountant or attorney. (Section 1704(b))

The Conference substitute provides an average adjusted gross nonfarm income cap of $500,000. If the average AGI for nonfarm income of a person or legal entity exceeds $500,000, they become ineligible for a host of farm programs, including the non-insured assistance program and the new disaster program. The Substitute also provides for an average adjusted gross farm income cap of $750,000. If a person's or legal entity's average farm AGI exceeds $750,000, then they become ineligible for direct payments.

The Conference substitute provides an average adjusted gross nonfarm income cap of $1,000,000 for conservation programs unless two-thirds or more of the income of the person or legal entity is average adjusted gross farm income. The Secretary is authorized to waive the limitation on a case-by-case basis if the Secretary determines that environmentally sensitive land of special significance would be protected. (Section 1604)

New section 1001D(a)(3) provides that married couples filing joint returns may allocate appropriately their income among themselves for the purposes of applying both the new $750,000 adjusted gross farm income test and the new $500,000 nonfarm income test to each individual spouse. The section requires that to secure this allocation married couples must provide a professional third party certification of the method used to apportion the income, and the Secretary must determine that the submission is appropriate. The Managers expect the Secretary to apply this provision carefully and that its impact should be limited to the unique and special circumstances of each individual case.

The new provisions under section 1001D will take effect in 2009 and will be based on the 3 tax years preceding the most immediate preceding tax year. Since these tax years occur in the past and income decisions regarding them were based on past circumstances the Managers expect the Secretary to allow modifications to the allocation of income in these past years in order to implement the new income requirements in as least disruptive manner possible.

The Conference Substitute strengthens the certification requirements and ensures the Secretary can take appropriate action against a person or legal entity that fails to provide certifications concerning their average adjusted gross income, average adjusted gross farm income and average adjusted gross nonfarm income. Certifications are required to be provided at least once every 3 years. The Managers intend for the Secretary to deny program benefits to a person or legal entity that does not provide the certifications required in section 1001D, as amended, until such time as the certifications are actually provided. The Secretary is also to establish audit procedures that are designed to ensure that audits are directed toward those persons or legal entities that are most likely to exceed the adjusted gross income ceilings set out in section 1001D, but is not designed to authorize the Secretary to conduct repeated audits of operations based upon size alone.

(36A) Income derived from farming, ranching or forestry

The House bill amends section 1001D of the FSA by adding a new paragraph (3) to delineate income that is to be included in the portion of average adjusted gross income derived from farming, ranching, or forestry to include the following: The production of crops, livestock, or unfinished raw forestry products; the sale, including the sale of easements and development rights, of farm, ranch, or forestry land or water rights; the sale, but not as a dealer, of equipment purchased to conduct farm, ranch, or forestry operations when the equipment is otherwise subject to depreciation expense; the rental of land used for farming, ranching, or forestry operations; the provision of production inputs and services to farmers, ranchers, and foresters; the processing, storing, and transporting of farm, ranch, and forestry commodities; and the sale of land that has been used for agriculture. (Section 1504(b)(3))

The Senate amendment provides the same as the House measure, except the Senate does not limit the sale of equipment to those other than dealers and does not include the provision regarding equipment subject to depreciation; includes income from water or hunting rights; includes packing in processing and shedding in storage; and includes payment or other income attributable to benefits received under any Title I or Title II program. (Section 1704(c))

The Conference amendment adopts the Senate provision with an amendment to clarify and expand upon the items included in the Senate amendment. Newly specified categories of farm income include the feeding, rearing or finishing of livestock and payments received under the noninsured assistance program (NAP), and under the Federal Crop Insurance Act. Income received from the sale of farm equipment or production inputs or services to farmers can be considered farm income if two-thirds of a person's or legal entity's average adjusted gross income comes from the other sources of farm income. (Section 1604)

The Managers intend for the Secretary to create a method for determining a person's average adjusted gross farm income by including all income reported on IRS Schedule F (or other schedule for reporting farm or farm-related income), farming, ranching, or forestry related income specifically listed in the statute, and other income as determined by the Secretary to be income related to farming, ranching, or forestry activities. The items described in section 1001D(c) to be included in average adjusted gross farm income are intended to be illustrative and by no means an exclusive list. The Managers expect the Secretary to interpret, implement, and expand the sources of income derived from farming, ranching, or forestry to include the income or benefits from farming and farm-related activities and other activities that the Secretary determines are derived directly or indirectly from farm or farm-related activities. Many of these activities may be in addition to those items reported on IRS Schedule F, Form 4853 (farm rental income), farm partnership returns, or other schedules or forms. As farming practices, farming enterprises, and farm-related activities continue to evolve and modernize, the Managers intend that the Secretary will expand the sources of income derived from farming, ranching, or forestry for these purposes to reflect these developments.

(37) Adjustments of loans

The House bill amends section 162 of the 1996 farm bill by inserting ''except for cotton and long grain, medium grain, and short grain rice'' after ''commodity''; extending the provisions; and adding provisions for cotton and rice.

The House bill authorizes the Secretary to make adjustments in the loan rate for cotton for differences in quality factors, and requires the Secretary to revise the marketing assistance loan program for cotton to better reflect market values for cotton. The House bill requires revisions, including: Eliminating or revising warehouse location differentials to reflect market conditions; changing the way premiums and discounts are calculated by using a 3-year weighted moving average of spot market data, weighted by each region's share of production; eliminating gaps between premium and discount differentials based on certain fiber lengths; and further capping premiums based on leaf and color considerations.

The House bill provides for discretionary revisions in—adjusting the loan rates schedule using non-spot market price data in addition to spot market data for cotton; and eliminating gaps between premium and discount differentials based on certain longer fiber lengths.

The House bill encourages USDA consultation with the private cotton industry when making the mandatory and discretionary adjustments.

The House bill amends section 162(e) of the 1996 farm bill to provide that ''with respect to long grain rice and medium and short grain rice, the Secretary shall not make adjustments in the loan rates for such commodities, except for differences in grade and quality (including milling yields)''.

The House bill provides the same as section 162(c) of the 1996 farm bill, which allows the Secretary to establish county loan rates in a manner that results in the lowest loan rate being 95% of the national average loan rate, if those loan rates do not result in an increase in outlays. Prohibits any adjustment resulting in an increase in the national average loan rate for any year.

The House bill provides the same as section 162 of the 1996 farm bill. (Section 1505)

The Senate amendment provides for adjustments in loan rates for loan commodities other than cotton for differences in grade, type, location, and other factors. (Section 1210(a))

Subsection (b) of the Senate amendment provides the same as current law. (Section 1210(b))

Subsection (d) of the Senate amendment provides the same as the House measure, except with respect to mandatory revisions, the Senate amendment eliminates warehouse location differentials.

With respect to discretionary revisions, the Senate amendment provides the same as the House measure.

With respect to consultation, the Senate amendment provides the same as the House provision, except that it requires consultation with the private cotton industry. (Section 1210(d))

With respect to rice, the Senate amendment prohibits the Secretary from making adjustments in the loan rates for long grain rice and medium grain rice, except for differences in grade and quality (including milling yields). (Section 1210(f))

Subsection (c) of the Senate amendment provides the same as current law. (Section 1210(c))

The Senate amendment provides the same as current law specifically for peanuts. (Section 1308)

The Conference substitute adopts the Senate provision with an amendment to simplify language related to the requirement to consult with the cotton industry. (Section 1210)

The Conference substitute adopts the House provision with an amendment. (Section 1608)

(41) Tracking of benefits

The House bill requires the Secretary to track the benefits provided under titles I and II directly or indirectly to individuals and entities. (Section 1509)

The Senate amendment contains no comparable provision.

The Conference substitute adopts the House provision with an amendment to give the Secretary discretionary authority to track benefits. (Section 1609)

(42) Upland cotton storage payments

The House bill ends the practice of paying for upland cotton storage, handling and other costs associated with cotton going into the loan starting with the 2011 crop. (Section 1510)

The Senate amendment requires payment of cotton storage costs in the same manner and at the same rates as the Secretary provided for the 2006 crop of cotton effective for the 2008–2012 crop years. (Section 1204(h))

The Conference substitute adopts the Senate provision with an amendment to limit the payments to a percentage of the actual storage rates. (Section 1204(g))

(43) Government publication of cotton price forecasts

The House bill strikes the current prohibition on the publication of cotton price forecasts. (Section 1511)

The Senate amendment provides the same as the House measure. (Section 1714)

The Conference substitute adopts the Senate provision. (Section 1610)

(44) Prevention of deceased persons receiving payments under farm commodity programs

The House bill requires the Secretary to submit a report to Congress which identifies any estate of a deceased person that received payments under this title for more than two crop years following the death of the person. The Secretary is required to promulgate regulations specifying deadlines by which a legal entity that receives payments or other benefits under this title must notify the Secretary of any change in ownership of the entity, including the death of a person with direct ownership interest. Any entity that fails to comply may be denied such payments or benefits. The Secretary is required to recoup erroneous payments made on behalf of a deceased person, and to withhold payments that otherwise would be made to farming operations in which the deceased person was actively engaged until the funds have been recouped. The Secretary is required to biannually reconcile individual tax identification numbers with the Internal Revenue Service for recipients of payments under this title to determine recipients? living status. (Section 1512)

The Senate amendment prohibits the Secretary from providing any agricultural payment under this Act or Act amended by this Act to any deceased individual or estate of such individual after 2 program years after the date of death of the individual. The Secretary is required to submit reports to the respective committees on agriculture that describes the number of payments and the aggregate amount of payments to deceased individuals and estates of deceased individuals; and to specify for each such payment, the length of time the estate of the deceased individual has been open. (Section 11073)

The Conference substitute adopts the House provision with an amendment that provides for the Secretary to issue regulations to allow for the settlement of estates and to preclude payments on behalf of deceased individuals that were not eligible for payment. The Secretary is directed to reconcile Social Security numbers of program participants with the Social Security Administration at least twice annually. (Section 1611)

(45) Hard White Wheat Development Program

The Senate amendment creates a program to compensate producers of hard white wheat. It establishes acreage limitation and payment rates and provides $35 million for the period of fiscal years 2008–2012. (Section 1706)

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision with an amendment to make the program subject to appropriations and to modify the period of effectiveness to fiscal years 2009–2012. (Section 1612)

(46) Durum Wheat Quality Program

The Senate amendment authorizes compensation to producers of durum wheat in an amount not to exceed 50% of the actual cost of fungicides applied to a crop of durum wheat of the producers to control wheat scab. It provides $10 million for each of fiscal years 2008 through 2012 subject to appropriations. (Section 1707)

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision with an amendment to modify the period of effectiveness to fiscal years 2009–2012. (Section 1613)

(47) Storage facility loans

The Senate amendment establishes a storage facility loan program to provide funds for producers of grains, oilseeds, pulse crops, hay, renewable biomass, and other storable commodities (other than sugar) to construct or upgrade storage and handling facilities for the commodities. It provides the terms of loans, amounts, and security requirements. (Section 1708)

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision with an amendment. (Section 1614)

(48) State, county, and area committees

The Senate amendment provides for producer representation on county or area committees that are combined or consolidated. The provision requires that minority representation of socially disadvantaged farmers and ranchers is maintained. The Senate amendment provides that the producer is eligible to serve only as a member of the county or area committee that the producer elects to administer the farm records of the producer. (Section 1715)

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision with an amendment to require the Secretary to develop procedures for the purpose of maintaining representation of socially disadvantaged farmers and ranchers on combined or consolidated committees. (Section 1615)

(49) Prohibition on charging certain fees

The Senate amendment prohibits the Secretary from charging fees or related costs for the collection of commodity assessments. (Section 1716)

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision. (Section 1616)

(50) Signature authority

The Senate amendment provides that if the Secretary approves a document containing signatures of program applicants, the Secretary shall not subsequently determine the document is inadequate or invalid because of the lack of authority of any applicant signing the document on behalf of the applicant unless the applicant knowingly and willfully falsified the evidence of signature authority or a signature. (Section 1717)

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision with an amendment ensuring that the Secretary can still seek proper documentation despite the Senate provision and that third party producers who relied upon the prior approval of documents by the Secretary in good faith and substantially complied with farm program requirements are not denied benefits due to erroneous representations of authority. (Section 1617)

The Managers intend for the Secretary to continue to seek proper affirmation of signature authority from appropriate parties even as this section upholds prior document approval by the Secretary despite inadequate or invalid signature authority.

(51) Modernization of Farm Service Agency

The Senate amendment requires the Secretary to modernize the Farm Service Agency information technology and communication systems to ensure timely and efficient program delivery at national, state, and county offices. (Section 1718)

The House bill contains no comparable provision.

The Conference substitute provides for a report addressing the needs of the Department and a detailed plan to fulfill the Department's needs. (Section 1618)

(52) Geospatial systems

The Senate amendment requires the Secretary to ensure that all agencies of the Department of Agriculture consolidate the geospatial systems of the agencies into a single enterprise system that ensures that geospatial data are shareable, portable, and standardized. (Section 1719)

The House bill contains no comparable provision.

The Conference substitute provides that the Secretary shall ensure that all geospatial data of the agencies of the Department of Agriculture are portable and standardized. (Section 1619)

(53) Leasing of office space

The Senate amendment allows the Secretary to use Commodity Credit Corporation funds to lease space for use by agencies of the Department of Agriculture use provided the space is jointly occupied by the agencies. (Section 1720)

The House bill contains no comparable provision.

The Conference substitute provides for a report on the costs and time associated with complying with U.S. General Services Administration (GSA) leasing procedures. (Section 1620)

(53A) Geographically disadvantaged farmers and ranchers

The Senate amendment establishes a new program to provide geographically disadvantaged farmers and ranchers direct reimbursement payments to cover the cost to transport agricultural commodities or inputs used to produce agricultural commodities. The Secretary may spend up to $15,000,000 per fiscal year from funds appropriated to carry out this program. (Section 6021)

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision with an amendment. (Section 1621)

The Managers recognize the barriers to competition associated with the high transportation costs incurred by geographically disadvantaged farmers and ranchers. The Managers expect the Secretary to develop, in consultation with the eligible areas, an equitable allocation of the funds for such areas. The Managers also expect the Secretary to consult with eligible areas on administration of the program.

(53B) Implementation

The conference substitute provides $50,000,000 to the Farm Service Agency to implement title I. (Section 1622)

(54) Repeals

The Senate amendment repeals section 1605 of the 2002 farm bill authorizing a Commission on Application of Payment Limitations; repeals section 1617 of the 2002 farm bill renewing availability of market loss assistance and certain emergency assistance to persons that failed to receive assistance under earlier authorities. (Section 1721)

The House bill contains no comparable provision.

The Conference substitute adopts the Senate provision. (Section 1623)

TITLE II—CONSERVATION

(1) Definitions (Section 1201 of 1985 Food Security Act (FSA))

The Senate amendment adds definitions in the 1985 FSA for ''beginning farmer or rancher'', ''Indian tribe'', ''socially disadvantaged farmer or rancher'', ''nonindustrial private forest land'', and ''technical assistance''. The amendment authorizes the Secretary to employ a reasonable test of net worth or other measure to further qualify a beginning farmer or rancher. (Section 2001 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision with an amendment that removes the test of net worth for a beginning farmer or rancher. The Conference substitute further adopts the definition of a socially disadvantaged farmer or rancher as defined in Section 2501 of the Food, Agriculture, Conservation, and Trade Act of 1990 (7 U.S.C. 2279) and adds a definition of farm, integrated pest management, person and legal entity, and livestock. The definition of livestock is intended to include alpaca and bison. (Section 2001 of Conference substitute)

(2) Review of good faith determinations (Section 1212 of FSA)

The Senate amendment maintains the good faith exemption and provides for a second level review of highly erodible land compliance decisions by the Farm Service Agency State Executive Director with the technical concurrence of the Natural Resources Conservation Service State Conservationist or the Farm Service Agency District Director with the technical concurrence of the Natural Resources Conservation Service Area Conservationist or his or her equivalent. The amendment allows for graduated penalties for compliance violations. (Section 2101 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision. Conservation compliance was created in the 1985 FSA. It requires that individuals who farm highly erodible land to develop and apply a conservation plan or lose eligibility for farm program benefits. It has resulted in reductions in soil erosion but has often been inconsistently applied. Under current law, even a small compliance infraction requires the complete denial of farm program benefits.

The Conference substitute creates a system of graduated penalties, to be based on the severity of the violation. The amendment also creates a process to ensure that the Farm Service Agency Area Director or the Farm Service Agency State Director will review local compliance decisions. The Natural Resources Conservation Service will be involved to provide concurrence on technical issues.

The Managers believe this approach resolves a long-standing problem and provides for increased oversight of the violation process. The Managers are aware however, that current market conditions are encouraging commodity production on additional land and also changing cropping patterns. In light of the increase in new crop production, as well as changes in cropping systems, the Managers expect that the Secretary will increase whatever technical assistance, planning, monitoring, investigation, and enforcement activities may prove necessary to ensure that producers receiving farm program benefits continue to meet the applicable conservation compliance requirements. (Section 2002 of Conference substitute)

(3) Review of good faith determinations (Section 1222 of FSA)

The Senate amendment maintains the good faith exemption and provides for a second level review of wetland compliance by the Farm Service Agency State Executive Director (with the technical concurrence of the NRCS State Conservationist) or the Farm Service Agency district director (with the technical concurrence of the Natural Resources Conservation Service area conservationist or his/her equivalent). (Section 2201 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision. The Managers intend for this provision to provide for better review and enforcement of wetlands compliance provisions. It requires a second level of review of wetlands violations by the Farm Service Agency with the concurrence of the Natural Resources Conservation Service on technical issues. The Managers intend for the Farm Service Agency to continue its primary role in compliance determinations. (Section 2003 of Conference substitute)

(4) Comprehensive Conservation Enhancement Program (Section 1230 of FSA)

The Senate amendment extends the program through 2012 and adds the Healthy Forests Reserve Program. The Environmental Quality Incentives Program (EQIP) is moved to the Comprehensive Stewardship Incentives Program (CSIP). (Section 2341) It exempts land enrolled in the Conservation Reserve Enhancement Program (CREP), land affected by State or local regulations that prohibit water use for agricultural production, and land in the State of Washington where enrollment is essential to Federal or State plans for sustainable wildlife habitat from the 25 percent county acreage cap. (Section 2301 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute does not reauthorize the program. The Healthy Forest Reserve Program is retained in the Forestry Title, and the county acreage cap is addressed in ''Administrative Requirements for

Conservation Programs''. (Section 1244 of the FSA). The Conference adopts a provision to exclude CREP acreage and continuous Conservation Reserve Program (CRP) acreage from the 25 percent cap if the county government concurs. This provision is separate and distinct from the existing waiver authority. As such, the Managers do not intend for the Secretary to survey producers, businesses, and other entities as is required by the existing waiver authority to implement this new provision.

The Managers recognize that a loss of access to water by agricultural producers can significantly impact conservation needs and local economies, and that producers need access to a wide range of conservation programs to help comply with a State or local law, order, or regulation prohibiting water use for agricultural production.

In making any determination on the applicability of the 25 percent county cropland CRP enrollment limitation, the Managers encourage the Secretary to maintain maximum flexibility for the enrollment of acreage in CRP that cannot be used for an agricultural purpose or is precluded from planting as a result of a State or local law, order, or regulation prohibiting water use for agricultural production.

(5) Conservation Reserve Program (Sections 1231, 1232, 1234, and 1235 of FSA)

(a) Conservation reserve (Section 1231 of FSA)

The House bill extends CRP until 2012 and gives the Secretary authority to address issues raised by State, regional, and national conservation initiatives. It amends the land eligibility provision to include land the Secretary determines had been planted for 4 of the 6 years preceding the enactment of the Farm, Nutrition, and Bio-energy Act of 2007 (except for land enrolled in CRP as of that date). It maintains the existing maximum enrollment of 39,200,000 acres. It strikes specific enumeration of Pennsylvania, Maryland and Virginia, but maintains the Chesapeake Bay Region as a Conservation Priority Area. The House bill also provides that alfalfa grown as part of a rotation practice is a commodity for cropping history criteria in determining whether land is eligible to be enrolled. It extends the Pilot Program for Enrollment of Wetland and Buffer Acreage in CRP to 2012. (Section 2101 of the House bill)

The Senate amendment extends CRP until 2012 and adds pollinator habitat to the resources to be conserved and improved through the program. The Senate amendment also expands eligible land to include marginal pastureland if native vegetation is grown and the land contributes to the restoration of the long-leaf pine forest or similar rare and declining forest ecosystem. The Senate amendment modifies eligibility of land that would facilitate a net savings in groundwater or surface water to apply only to alfalfa and other forage crops. The section expands eligible land to include land enrolled in the flooded farmland program. The Senate amendment maintains the existing maximum enrollment of 39,200,000 acres. The Senate amendment expands the Chesapeake Bay Priority Area to include all parts in the Chesapeake Bay Watershed and adds the Prairie Pothole Region, Grand Lake St. Mary's Watershed, and Eastern Snake Plain Aquifer region as Conservation Priority Areas.

The Senate amendment expands the lands eligible for the Pilot Program for Enrollment of Wetland and Buffer Acreage to include shallow water areas that were devoted to a commercial pond-raised aquaculture and agricultural drainage water treatment areas that provide nitrogen removal and other wetland functions. The Secretary, in consultation with the State technical committee, shall establish the maximum size of the buffer acreage to be enrolled along with eligible lands, taking into consideration the farming practices used with respect to the cropland that surrounds the wetland or shallow water area. The section increases the maximum wetland size to 40 contiguous acres and makes all acres eligible for payment. (Section 2311 of the Senate amendment)

The Conference substitute adopts the Senate provision with an amendment. The substitute extends CRP until 2012 and provides the Secretary authority to address issues raised by State, regional, and national conservation initiatives. These ''State, regional and national conservation initiatives'' may include such things as the North American Waterfowl Management Plan, the National Fish Habitat Action Plan, the Greater Sage-Grouse Conservation Strategy, the State Comprehensive Wildlife Conservation Strategies (also referred to as the State Wildlife Action Plans), the Northern Bobwhite Conservation Initiative, and State forest resource strategies. The Managers intend for the Secretary to consider the goals and objectives identified in relevant fish and wildlife conservation initiatives when establishing State and national program priorities, scoring criteria, focus areas, or other special initiatives. The Managers expect the Department to work with conservation partners and State and Federal agencies, to the extent practicable, to complement the goals and objectives of these additional plans through its programs.

Regarding pollinators, the Managers have placed a provision in ''Administrative Requirements for Conservation Programs'' (Section 1244 of the FSA), which applies to all applicable conservation programs and encourages the Secretary to give priority to applications that provide pollinator habitat.

The Conference substitute adopts the House provision on land eligibility and updates the provision to include land the Secretary determines has been planted for 4 of the 6 years preceding the enactment of the Food, Conservation, and Energy Act of 2008.

While the Managers agreed to an overall reduction in CRP enrollment to 32,000,000 acres, this should not serve as an indicator of declining or reduced support for CRP. The Managers intend that CRP be implemented at authorized levels, and that the program continue as one of USDA's key conservation programs. USDA shall update rental rates and use incentive payments for continuous CRP practices to make the program competitive with other programs and more economically viable for producers. The Managers support the use of partnership agreements with State wildlife agencies and nongovernmental organizations to assist in program promotion and implementation. Additionally, as general CRP contracts expire, the Managers encourage the enrollment of those acres in the Conservation Stewardship Program (CSP), Grassland Reserve Program (GRP) and the continuous CRP. The Managers expect that the Department will use incentive payments, promotional efforts, and agreements with the third parties mentioned above to ensure that the portions of general signup acreages that can be maintained in the program will be enrolled through continuous CRP.

The Conference substitute adopts the House language and makes a technical correction to include all States that make up the Chesapeake Bay Region as the Conservation Priority Area.

The substitute clarifies that alfalfa grown as part of a rotation practice is a commodity for cropping history purposes. The Managers encourage the Secretary to enroll irrigated alfalfa lands into ongoing CREP projects that address water quantity and quality issues. (Section 2101 of Conference substitute)

(b) Duties of owner and operators (Section 1232 of FSA)

The House bill maintains current law regarding managed haying and grazing outside of nesting seasons and expands the provision to allow a producer to conduct prescribed grazing for the control of invasive species on CRP lands. It allows for managed grazing and requires the Secretary to reduce the rental payment and require a management plan. It allows dryland crop production and grazing on CREP acres where CREP is initiated to address declining water resources. The Secretary is required to develop a conservation plan, determine eligibility of dryland crop production and grazing for crop insurance, reduce the rental payment, and renegotiate the agreement to allow for dryland crop production and grazing at the request of the State. Such lands shall be considered ''noncropland'' for crop insurance purposes. (Section 2101 of the House bill)

The Senate amendment adds that approved vegetative cover shall encourage the planting of native species and the restoration of biodiversity. It requires contract holders to actively manage the land throughout the term of the contract and clarifies that managed harvesting and grazing outside of nesting and brood rearing season is permitted if it is part of the conservation plan. The Senate amendment allows prescribed grazing for control of invasive species. The Senate amendment requires that the practices in the conservation plan be compatible with wildlife and wildlife habitat, clearly described and applicable through the duration of the contract, consistent with the Secretary's priorities for local conservation management priorities, and actively managed. (Section 2311 of the Senate amendment)

The Conference substitute adopts the House provision with an amendment. The substitute allows routine grazing, including prescribed grazing for the control of invasive species, with appropriate restrictions. The Managers expect that routine grazing will be performed in a manner that is consistent with the underlying purposes of the program and conducted under a site-specific vegetation plan that provides for grazing frequency (duration of time throughout the year, when authorized, and the number of years during the life of the CRP contract). The Managers further expect that guidelines for the vegetation plan and grazing use be developed in consultation with the State technical committee.

The Managers understand that there has been some concern over the current rules related to haying and grazing on CRP land and insufficient flexibility for forage use across varied landscapes while still achieving the purposes of the program. The Managers expect USDA to review rules developed to implement routine grazing and to provide for appropriate flexibility in grazing periods consistent with the conservation goals of the program based on site-specific natural resource conditions.

The Managers understand that there has been some complication in local areas with restricting access to buffers while gleaning the crop residue in a field. The Managers intend that short-term access to buffers that are adjacent to fields be allowed post-harvest without a reduction in payment. While grazing of the buffer is not intended in this action, the proximity to the field crop residue makes restricting access difficult. Due to the short term nature of this activity (60 days maximum), it should not result in a reduced payment and should be done in accordance

with the contract. (Section 2107 of Conference substitute)

(b) Payments (Section 1234 of FSA)

The House bill requires the National Agricultural Statistics Service to survey annually the per-acre estimates of county average market dryland and irrigated cash rental rates for all counties with 20,000 acres or more of crop and pastureland. These surveys will be kept on the Department?s website and made available to the public. (Section 2101 of the House bill)

The Senate amendment contains a similar provision. In accepting new enrollments, the section requires that if land provides equivalent environmental benefit to a competing offer then the Secretary shall, to the maximum extent practicable, accept an offer from an owner or operator who is a local resident. (Section 2311 of the Senate amendment)

The Conference substitute adopts the Senate provision regarding the NASS survey. In accepting contract offers (Section 1234(c)), the substitute adds a new requirement that the Secretary provide priority to offers from local residents if the offer provides equivalent conservation benefits when compared to other offers. (Section 2110 of Conference substitute)

(c) Contracts (Section 1235 of FSA)

The House bill allows the Secretary to modify a CRP contract to facilitate the transition of CRP land from a retiring owner to a beginning, socially disadvantaged, limited resource farmer or rancher in order to return some or all of the land to sustainable grazing or crop production. It allows the beginning, socially disadvantaged, or limited resource farmer or rancher to make land improvements and to begin the organic certification process one year before the CRP contract expires. The House bill: requires the retiring landowner to sell or lease the CRP land to the beginning, socially disadvantaged, or limited resource farmer for production purposes; requires a conservation plan; allows the farmer to enroll in the Conservation Security Program or EQIP upon taking ownership of the land; and provides CRP payments to the retiring owner/operator for an additional two years after the contract terminates. The House bill allows the beginning, socially disadvantaged, or limited resource farmer or rancher purchasing the CRP land to reenroll a partial field that is eligible for continuous sign-up and is part of a conservation plan.

The House bill requires the Secretary to allow an operator to terminate a contract that has been in effect for 5 years at any time. The section also provides that land enrolled in continuous sign-up is ineligible for early termination. (Section 2101 of the House bill)

The Senate amendment has no comparable provision to the House language on CRP transition options for beginning, socially disadvantaged, or limited resource farmers. The Senate amendment retains current language on early termination by an owner or operator but expands current law to permit contract termination if the participant is disabled or retired from farming and has endured financial hardship as a result of taxation from rental payments received. (Section 2311 of the Senate amendment)

The Conference substitute adopts the House provision with an amendment regarding the transition of CRP land from a retiring farmer or rancher to a beginning or socially disadvantaged farmer or rancher. In implementing the CRP transition option, the Managers encourage the Department to publicize the availability of the transition option widely, including publicity aimed at CRP landowners who are not extending contracts or re-enrolling in the program and at beginning and socially disadvantaged farmers or ranchers. (Section 2111 of Conference substitute)

(6) Flooded Farmland Program (Section 1235B of FSA)

The Senate amendment adds a new flooded farmland program within CRP, which allows for the enrollment of flooded crop and grazing land or land rendered inaccessible because of flooding caused by the natural overflow of a closed basin in the Northern Great Plains region. The section requires that land enrolled must be at least 5 acres in size, flooded, and rendered incapable of production during the preceding three crop years and have no natural outlet. It provides for enrollment through the continuous sign-up process and requires that land enrolled have a consistent history of being used for the production of crops or used as grazing lands.

The Senate amendment allows enrollment of adjoining land that would enhance the conservation or wildlife value of the tract with reduction in rental payment. During participation in the program, owners are not eligible to participate in or receive federal crop insurance, noninsured crop disaster assistance, or any other federal agricultural crop disaster assistance program benefits for land included in the contract. The section also directs the Secretary to preserve the cropland base, allotment history, and payment yields applicable to the enrolled land and to adjust these values upon contract termination to ensure equitable treatment of the enrolled land relative to comparable land remaining in production in the county. The owner shall take actions as necessary to avoid degrading any wildlife habitat that has developed as a result of the natural overflow on the land covered by the contract. (Section 2312 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute deletes this section and makes modifications to CRP and the Wetlands Reserve Program (WRP) to accomplish the intent of the Senate amendment.

The pilot program for enrollment of wetland and buffer acreage in CRP is expanded to include land that had been cropped during 3 of 10 crop years prior to 2002 and after 1990 and is subject to a natural overflow of a prairie wetland. Wetlands and adjacent buffer areas are enrolled under the continuous sign-up process and are limited to no more than 40 acre tracts. The Managers expect the Secretary to require these enrollments in the CRP wetland pilot program to have ratios of at least two-to-one in upland buffer areas, or greater where practicable, in order to maximize wildlife benefits. Participants must agree to restore wetland hydrology, establish appropriate vegetation, and refrain from commercial use of the land, among other duties during the term of the contract. (Section 2101 of the Conference substitute)

Eligible land in WRP is expanded to include cropland or grassland that was used for agricultural production prior to flooding from the natural overflow of a closed basin lake or pothole. These wetland areas along with functionally dependent uplands, as practicable, are to be enrolled in 30–year easements. In determining the compensation, the Secretary is expected to base the value on the use of the land prior to flooding and the corresponding value of such land in the county where the eligible land is located. The Managers expect that enrolling these permanently and temporarily flooded lands in the program will provide long term benefits for wildlife habitat and water management. To ensure that enrollment opportunity exists for these lands, the Secretary is directed to conduct an annual survey of the demand for enrollment in the Prairie Pothole Region and adjust annual allocation of program funds in these interested States. The Managers intend the allocations made available through this adjustment process to be subject to any annual pooling and reallocation of funds that the Secretary applies to the entire program. (Section 2201 of the Conference substitute)

(7) Wildlife Habitat Program (Sec 1235C of FSA)

The Senate amendment creates, for the years 2008 through 2012, a Wildlife Habitat Program within the CRP. The program would be available to CRP contract holders who have established softwood pine stands. It provides for agreements that shall have management strategies and practices that benefit wildlife, such as thinning, establishing wildlife food plots, burning, and seeding. Contracts are up to 5–years in term. The Secretary shall encourage cooperative arrangements among program participants, State and local government entities, and nongovernmental organizations to achieve the purposes of the program. The section provides cost-sharing and technical assistance to carry out the program. The program terminates on September 30, 2011. (Section 2313 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute deletes this section and makes modification in CRP to accommodate the intent of the Senate amendment. In providing funding and clarifying the availability of cost-sharing payments related to trees, the Managers encourage the Department to take this opportunity to improve the condition of resources on land enrolled in CRP and planted to trees. The Managers are especially interested in improving wildlife habitat on land in the Southeast in CRP planted to softwood pines. The Managers expect the Department to work with partners to identify areas with the greatest need and potential for improvement. The Managers encourage the use of all appropriate forest-management practices, including thinning and prescribed fire, to achieve the purposes of the program.

(8) Wetland Reserve Program (Section 1237 of FSA)

(a) Establishment (Section 1237(a–f) of FSA)

The House bill authorizes WRP through fiscal year 2012. The section adds wetland creation to the purposes of WRP and authorizes the Secretary to purchase floodplain easements. The section increases the maximum enrollment to 3,605,000 acres; provides for an annual enrollment goal of 250,000 acres, of which up to 10,000 acres may be enrolled as floodplain easements; and changes the program to operate on fiscal year basis. The section amends eligible lands to include riparian areas and floodplains. Flood plain lands are eligible if the land has been damaged by flooding at least once in the preceding calendar year or has been damaged by flooding at least twice in the past 10 years or if the enrollment of other land within the floodplain would aid in flood storage, flow, or erosion control. (Section 2401(a) and Section 2102(a–c) of the House bill)

The Senate amendment authorizes WRP through fiscal year 2012. The section allows enrollment of 250,000 acres per fiscal year with no enrollments beginning in fiscal year 2013. Indian Tribes may enroll land through 30–year contracts, which shall be equivalent in value to a 30–year easement. The section includes riparian areas and riparian and adjacent areas that are linked to other parcels of wetlands protected under a wetlands reserve agreement or similar device. (Section 2321(1–3) of the Senate amendment)

The Conference substitute adopts the House language with an amendment. The substitute extends WRP to 2012, adds purposes to the establishment section, caps enrollment at 3,041,200, and focuses the program on private land. The substitute changes the program to a fiscal year basis. Enrollment conditions are modified to allow 30–year Tribal contracts. The substitute stipulates that values of such contracts shall be equivalent to 30–year easements.

The substitute does not include the expansion of riparian areas. The Managers recognize that riparian areas often provide extremely important habitat for wildlife, and that restored and protected riparian areas also help improve water quality, reduce sedimentation, and help manage floodwaters. Riparian areas are already eligible lands under WRP and may be enrolled either as uplands that are functionally dependent on a wetland or where they link wetlands that are otherwise protected by easements or a similar mechanism. (Section 2201 of Conference substitute)

(b) Easements and Agreements (Section 1237A of FSA)

The House bill states that compensation for easements shall be based on compensation formulas resulting in the lowest cost: percentage of fair market value according to the USPAP or a percentage of the market value determined by an area-wide survey; a geographic cap; or the landowners offer. Nonfederal funds may be accepted to administer this program. (Section 2102(e) of the House bill)

The Senate amendment adds a requirement that spraying or mowing is allowed if necessary to meet habitat needs of specific wildlife species. The amendment requires that the Secretary pay the lowest compensation for an easement among several alternative valuation methods. The compensation for easements may be provided to landowners in up to 30 payments of equal or unequal size. The section also adds a Wetlands Reserve Enhancement Program with the authority to enter into unique wetlands reserve agreements that may include compatible uses as reserved rights in the warranty easement deed restriction. (Section 2322(a–c) of the Senate amendment)

The substitute adopts the House provision with an amendment. It revises the process for determining the value of easements and contracts by requiring the Secretary to provide the lowest amount of compensation based on a comparison of the fair market value of the land (as determined by either an appraisal based on the Uniform Standards for Professional Appraisals or an area-wide market survey), a geographic cap, or an offer made by the landowner.

The Managers intend for the Department to develop guidelines and provide direction for States regarding the method for determining the value of easements. The Managers do not intend for the Department to require States to use a specific appraisal process, such as the ''Yellow Book'' process or an appraisal rather than a market wide survey or analysis. The Department should grant flexibility to State conservationists who, in consultation with State technical committees, should determine the method that best fits the needs of their State.

The substitute provides the Secretary authority to accept non-Federal funds to assist in implementing the program but places this new authority in ''Administrative Requirements for Conservation Programs'' (Section 1244 of the FSA) so it applies to all conservation programs.

The substitute includes authority for a Wetlands Reserve Enhancement Program (WREP). The WREP authority is intended to allow the Secretary to enter into agreements with States similar to what is done under CREP. It is not intended as a way to enroll State-owned lands in the program. It is the intent of the Managers that the Secretary will implement WREP projects in order to provide focused, targeted resource benefits and to leverage federal funds.

The substitute provides authority for a Reserved Rights Pilot. The Managers intend for the Secretary to explore different warranty easement deeds consistent with the purposes of the program, while allowing a landowner to retain the right to use the land for grazing purposes. The Managers intend that any activities occurring under a reserved right easement be covered by a conservation plan developed and approved by the Secretary.

The substitute provides that easements with values less than $500,000 be paid out over 1 to 30 years. Easements with values greater than $500,000 are to be paid out over 5 to 30 years. The Secretary is granted authority to waive that requirement and make lump sum payments if necessary to carry out the purposes of the program. For land to be eligible for the WRP, the land must have remained under the same ownership for a minimum of 7 years. (Section 2208 of Conference substitute)

(c) Duties of Secretary (Section 1237C of FSA)

The House bill adds criteria for the Secretary to use when evaluating easement offers from landowners for wetlands or floodplains. The Secretary may consider the conservation benefits, the cost effectiveness, and whether the landowner or someone else is offering to contribute to the cost of the easement or other interest in the land to leverage Federal funds. In determining the acceptability of easement offers for flood plains, the Secretary may take into consideration the extent to which the purpose of the program would be achieved on the land, whether the land has flooded repeatedly in the past 10 years, whether the easement would contribute to restoration of surrounding lands, and other factors. (Section 2102(f) of the House bill)

The Senate has no comparable provision.

The Conference substitute adopts the House language for evaluating wetlands. (Section 2207 of Conference substitute)

(d) Payments (Section 1237D of FSA)

The House bill is the same as current law with technical changes. It also changes the paragraph heading ''State wetland and environmental enhancement'' to ''Wetlands Reserve Enhancement''. (Section 2102(g) of the House bill)

The Senate amendment makes a conforming change to allow payments for 30–year contracts. (Section 2323 of the Senate amendment)

The Conference substitute adopts the Senate amendment. (Section 2205 of Conference substitute)

(3) Reports (Section 1237G of FSA)

The Senate amendment directs the Secretary to evaluate and report to Congress on the implications of long-term easements on Department of Agriculture resources by January 1, 2010. (Section 2322(d))

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision. The Managers are concerned with the long-term implications of managing and monitoring wetland easements. The substitute requires the Secretary to provide a report on the number and location of conservation easements acquired under the WRP and an assessment of the extent to which the oversight of conservation easement agreements impacts the availability of USDA resources, including technical assistance. (Section 2210 of Conference substitute)

(9) Comprehensive Stewardship Incentives Program

The Senate amendment creates a new CSIP to coordinate the two primary working lands programs: EQIP and the Conservation Stewardship Program (CSP). The section defines resources of concern and requires the Secretary to manage EQIP and CSP in a coordinated manner. The Secretary shall ensure that resources of concern are identified at the State level and shall identify not more than 5 resources of concern within a watershed or region within a State. The section directs the Secretary to issue regulations to implement the CSIP, CSP, and EQIP no later than 180 days after the date of enactment of the 2007 Farm bill. (Section 2341 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute does not include CSIP. The substitute includes a provision in ''Administrative Requirements for Conservation Programs'' (Section 1244 of the FSA) that requires the Secretary to ensure that there is a streamlined application process for all conservation programs.

(10) Conservation Security Program

(a) Conservation Security Program (Section 1238 FSA)

The House bill states that no new contracts may be entered into under the Conservation Security Program after October 1, 2007. However, payments and modifications to existing contracts may be continued to be made until those contracts expire. (Section 2103(b) of the House bill)

The Senate amendment reauthorizes the Conservation Security Program for existing contracts only. The section provides $2,317,000,000 for current contracts to remain available until expended and prohibits new contracts or renewals after enactment of the Farm Bill. (Section 2391 of the Senate amendment)

The Conference substitute adopts the Senate provision and provides such sums as necessary to carry out existing contracts.

(a) Definitions

The House bill defines conservation plan, conservation practice, management intensity, nondegradation standard, priority resource of concern, resource specific index, and socially disadvantaged farmer or rancher. (Section 2103(a) of the House bill)

The Senate amendment defines comprehensive conservation plan, stewardship contract, contract offer, enhancement payment, eligible land, livestock, management intensity, payment, practice, producer, program, resource conserving crop, resource conserving crop rotation, stewardship contract, and stewardship threshold. (Section 2391 of the Senate amendment)

The Conference substitute renames the program as the Conservation Stewardship Program (CSP) and defines conservation activities, conservation measurement tools, conservation stewardship plan, priority resource concern, resource concern, and stewardship threshold. (Section 1238D of the Conference substitute)

The Managers recognize that agricultural drainage systems are valuable conservation practices that can be carried out under the CSP and, in particular, that the installation of drainage management systems can provide benefits to water quality by reducing nitrogen loading from subsurface drainage as well as managing wildlife habitat. Thus, these practices are included as conservation activities.

The Conference substitute includes planning needed to address a resource concern as a conservation activity. Since CSP is intended to address multiple resource concerns

in a coordinated manner, the Managers encourage the Secretary to implement the program in a manner that encourages comprehensive conservation planning through technical and financial assistance under this program. The Managers encourage the Secretary to use site-specific conservation planning as outlined in the National Planning Procedures Handbook and implement the program in a manner that encourages comprehensive conservation planning on all applicable resources through technical and financial assistance under the program.

The Managers are aware of the effort made by NRCS to develop resource-specific indices for implementing CSP and other conservation assistance programs and encourage this development. Where such indices are not available or practical, the Managers urge the Secretary to use substitute tools that measure the degree, scope, and range of conservation activities adopted by a producer to improve and sustain the condition of a resource.

The term stewardship threshold refers to the level of conservation and environmental management required to improve and conserve a resource. The Managers intend the Secretary to set the threshold at a level that ensures substantial and lasting conservation benefits.

(b) Conservation Security Program/Conservation Stewardship Program and duties of the producer

The House bill states that a new Conservation Security Program shall go into effect for fiscal years 2012 through 2017, and that the purpose of the Conservation Security Program is to assist producers in improving environmental quality by addressing priority resources of concern. To be eligible, a producer must already be addressing at least one priority resource of concern to the minimum level of management intensity and have an approved conservation offer. Eligible land includes private agricultural land, forest land, and land owned by Tribes. (Section 2103 of the House bill)

The Senate amendment identifies the purposes of the program as promoting agricultural production and environmental quality as compatible goals and to optimize environmental benefits by assisting producers to promote natural resource conservation. To be eligible, a producer must address priority resources of concern relating to both soil and water to at least the stewardship threshold, adequately address other resources of concern applicable to the operation, and meet or exceed the stewardship threshold for at least 1 additional priority resource of concern by the end of the contract.

The Senate amendment clarifies that eligible land includes cropland, pasture land, rangeland, other agricultural land used for the production of livestock, land used for agroforestry, land used for aquaculture, riparian areas adjacent to eligible land, Tribal lands, public land (if failure to enroll would defeat the purposes of the program), and State and school owned land. The Senate amendment states that all acres of all agricultural operations within a watershed or region that constitute a cohesive management unit shall be covered by the contract.

The Senate amendment includes provisions on contract offers, contract renewal, contract termination, and optimal crop rotations. (Section 2391 of the Senate amendment)

The Conference substitute establishes the program purpose of encouraging producers to address resource concerns in a comprehensive manner by installing and adopting new conservation activities, and by improving, maintaining and managing conservation activities in place at the operation. The Managers encourage the Secretary to place emphasis on improving and adding conservation activities.

The Conference substitute allows nonindustrial private forest land to be eligible with the limitation that not more than 10 percent of annual acres made available under the program can be forest land.

Under the program, land used for cropland that had not been planted, considered to be planted, or devoted to crop production for 4 of the 6 years prior to the date of enactment of this act shall not be the basis of any payment under the program, unless the reason the land did not meet the requirement is that: it had previously been enrolled in CRP; had been maintained in a long term crop rotation; or was incidental land needed for efficient operation, such as an area of a farm or ranch that had been used for structures that had been subsequently removed. The exceptions only apply if they were the direct cause of the producer's inability to meet the 4–of–6 year requirement.

The Managers want to clarify that the ''additional criteria'' authority provided in Section 1238F(b)(3) may not supersede or be more heavily weighted than the five required evaluation criteria in section 1238F(b)(1). Instead, the additional criteria may provide extra ranking points to help address specific priorities. Contracts shall permit all economic uses of the land that maintain the agricultural nature of the land and are consistent with the conservation purposes of the program. The Managers intend for this to apply to conservation buffers or any other partial field conservation practice that may be included in the contract.

A producer may renew a CSP contract for an additional five-year period, provided the terms of the existing contract have been achieved to the satisfaction of the Secretary and the producer agrees to adopt new conservation activities. The Secretary is provided authority to require new conservation activities as part of the contract renewal process. It is the intent of the Managers that this could include expanding the degree, scope, and comprehensiveness of conservation activities adopted by a producer to address the original priority resource concerns or addressing one or more additional priority resource concerns.

The Secretary may allow for contract modification if the Secretary determines that a modification is consistent with achieving the purposes of the program. Modifications envisioned by the Managers include instances in which a producer enrolls a portion of the farm in a land retirement or easement program, gains or loses a lease, or has a change in production due to market or weather conditions. The Managers also intend for the Secretary to issue guidance for cases in which a producer has a change in production that requires a change to scheduled conservation practices and activities. The Managers expect the Secretary to approve the contract modification only as long as net conservation benefits will be maintained or improved as a result.

Supplemental payments are authorized for producers who adopt a beneficial crop rotation. The Managers intend for the supplemental payment to encourage producers to adopt new, additional beneficial crop rotations that provide significant conservation benefits. The payments are to be available to producers across the country and should not be limited to a particular crop, cropping system, or region of the country. In the Southeast, peanuts are an example of a crop that responds well to increased rotation lengths. Increased rotation lengths help peanut producers conserve water, more effectively control disease, reduce inputs to control disease and increase productivity.

On-farm conservation research and demonstration activities and pilot-testing projects can be approved as part of contract offers under the program. The Managers expect the Secretary to establish and publicize design protocols and application and contract offer procedures for individual producer and collaborative on-farm research and demonstration activities and for pilot testing projects so producers have a clear understanding of how to participate in either of these two options.

The substitute requires the Secretary to provide a transparent means by which producer may initiate organic certification under the National Organic Program while also participating in CSP. The Managers expect the Secretary to coordinate this program and the organic certification process to the maximum extent practicable.

(c) Duties of the Secretary

Under the House bill, the Secretary shall identify not more than 5 priority resources of concern for a watershed or area within a State. The House bill states that the payment amount shall be based on a portion of the actual costs, income forgone, and resource specific indices. The payment limitation on the Conservation Security Program is $150,000 for the 5–year term of the contract.

Under the Senate amendment, an acreage allocation is specified, and contracts are limited to $240,000 for all contracts entered into during any 6-year period. The Senate amendment enrolls 13,273,000 acres annually at a national average cost of $19 per acre. (Section 2391 and 2341 of the Senate amendment)

The conference substitute provides that the allocation of acres to each State shall be based primarily on each State's proportion of eligible acres to the total number of eligible acres in all States. The Secretary shall also consider the extent and magnitude of conservation needs associated with agricultural production in each State, the degree to which implementation of the program is or will be effective in helping producers address those needs and other considerations in order to achieve equitable geographic distribution of funds.

In carrying out the program on a continuing enrollment basis, a producer can apply at any time during the year for the program, but the application will only be ranked at the time determined by the Secretary. The Managers intend for the program to be available nationwide to all agricultural producers, not only in specific watersheds or geographic regions within a State. The Managers specifically intend that the program not be restricted to particular watershed enrollments.

The Conference substitute requires the Secretary to undertake outreach activities and provide appropriate technical assistance to specialty crop and organic producers and to ensure they can effectively compete in the program. In providing outreach and technical assistance, the Managers encourage the Secretary to provide appropriate training to field staff to enable them to work with these producers and to utilize cooperative agreements and contracts with nongovernmental organizations with expertise in delivering organic educational and technical assistance to these producers.

Payments under the program are limited to $200,000 for all contracts entered into by a producer in any 5-year period. This provision requires direct attribution to real persons. The Managers emphasize that direct attribution is a mandatory requirement. The Managers do not intend for the Secretary to pay for no-till or other common practices that have no cost to the producer.

The Managers encourage the Secretary to conduct outreach to encourage producers

who are transitioning land out of the conservation reserve program to protect conservation values by enrolling in CSP. As part of this transition from land retirement to working lands conservation, the Managers urge the Secretary to encourage producers to maintain the land in a grass-based production system with appropriate wildlife protections through CSP or to adopt advanced resource-conserving cropping systems through CSP in tandem with placing conservation buffers and other appropriate partial field conservation practices, farmed wetlands, or special wildlife habitat practices in the continuous CRP. (Section 2301 of Conference substitute)

(11) Grassland Reserve Program (Section 1238N–1238Q of FSA)

(a) Establishment and purpose (Section 1238N)

The House bill establishes an enrollment goal of 1,340,000 acres by 2012. It revises the enrollment process to be based on acreage rather than funding and requires that at least 60 percent of program acreage be in long term easements and agreements. It adds a priority for enrolling CRP acres, except that no more than 10 percent of the acreage enrolled in any year maybe from CRP; and prohibits duplicate payments for such land enrolled in GRP. It establishes that the method for determining the fair market value of enrolled land will be an appraisal, a market survey, a geographic cap, or the landowner offer; whichever results in the lowest amount of compensation to be paid. It authorizes the Secretary to enter into agreements with States and their subdivisions to advance the purposes of the program through a grassland reserve enhancement option. (Section 2104 of the House bill)

The Senate amendment eliminates short-term rental agreements and the requirement for enrollment of at least 40 contiguous acres. It provides for enrollment of land through 30-year contracts and easements and permanent easements. The 30-year contract option is included to encourage tribal participation in the program. A new authority is added for the Secretary to enter into cooperative agreements with eligible entities for the purpose of purchasing, holding, monitoring, and enforcing easements. The Senate amendment adds a definition of eligible entity, expands eligible land to include land that contains historical or archeological resources or would further goals of certain fish and wildlife plans or initiatives, and specifies that easements of the maximum duration by State law are equivalent to permanent easements. (Section 2381 of the Senate amendment)

The Conference substitute adopts an acreage enrollment goal of an additional 1,220,000 acres by 2012. The Conference substitute includes 10-, 15-, and 20-year rental contracts and permanent easements. Easements of the maximum duration allowed by State law are considered as permanent easements. The Managers expect that the 20-year rental contracts will be used to encourage tribal group participation in the program.

The Conference substitute strikes the House priority for 60 percent of acreage in long term contracts and retains current law that 60 percent of the funds would be dedicated to easements, while 40 percent of the funds would be dedicated to short term contracts. In addition, the Conference substitute adopts a priority for enrollment of CRP land with a modification to clarify that the priority applies upon expiration of the CRP contract.

The Conference substitute adopts the Senate additions to eligible land with technical corrections. It does not include a Grassland Reserve Enhancement provision. It adopts the Senate definition of eligible entity and authority for the Secretary to enter cooperative agreements with entities to purchase easements. It also adopts the House bill provision in regard to the method for determining fair market value with a technical correction.

(b) Requirements relating to easements and contracts (Section 1238O)

The Senate amendment modifies terms and conditions of easements and agreements to permit fire presuppression and addition of grazing-related activities, such as fencing and livestock watering. Criteria for evaluating applications for enrollment are expanded to provide additional flexibility to the Secretary, and in the case of agreements with eligible entities, to provide a priority to applications that include a cash contribution or leverage other resources toward the purchase price of easements.

The House bill has no comparable provision.

The Conference substitute adopts the Senate amendment. The Managers expect these additions to encourage improved management of enrolled acreage, particularly where breaking of the soil surface may be required to manage invasive species or improve grazing systems, and to leverage additional resources for the protection of grasslands.

The Conference substitute adds implementation of a grazing management plan as a new general requirement of landowners enrolling in the program. With the inclusion of a grazing management plan, the Managers emphasize the conservation purpose of the program, but further clarify that once established these plans are modified only by mutual agreement of the involved parties.

(c) Payments (Section 1238P)

The Senate amendment strikes rental agreement payments and modifies the rate of compensation for restoration agreements. Permanent easements will be paid at a rate of not less than 90 nor more than 100 percent of the eligible restoration costs. Thirty-year easements and contracts will be at the rate of not less than 50 nor more than 75 percent of the eligible restoration costs. The compensation schedule is lengthened to allow for up to 30 annual payments, corresponding to the newly established 30-year contract agreement.

The House bill has no comparable provision.

The Conference substitute adopts the cost-share rate for restoration agreements of not more than 50 percent of the costs of carrying out restoration activities.

(d) Delegation to private organizations (1238Q)

The House bill expands on the authority of the Secretary to transfer easement titles to private organizations and to also allow entities to own and write easements under this section, subject to periodic inspections by the Secretary.

The Senate amendment provides authority for the Secretary to enter into cooperative agreements with eligible entities for those entities to purchase, own, enforce, and monitor easements. Terms and conditions of cooperative agreements require entities to demonstrate qualifications, specify parcels to be enrolled, allow substitutions as agreed to by the parties, specify entity reporting on fund use, allow entities to use their own easement instruments, require appraisals using an industry approved method, allow a landowner contribution as a share of the purchase price, and specify a payment schedule. The Secretary shall require easements to contain a contingent right to protect the public investment.

The Conference substitute adopts the Senate amendment provision for cooperative agreements between the Secretary and eligible entities with a modification to the language specifying that eligible entities shall assume costs of administering and enforcing easements.

The Conference substitute adopts a requirement for a contingent right of enforcement. In selecting offers from eligible entities for funding, the Managers expect the Secretary to consider the sufficiency of the offer regarding effective monitoring and enforcement, reversionary interest, or other such factors that will affect the long-term integrity of easement being acquired under the program. The Conference establishes that eligible entities shall provide a share of the easement purchase price that is equal to the share provided by the Secretary. (Section 2403 of Conference substitute)

(12) Environmental Quality Incentives Program

(a) Purposes (Section 1240 of FSA)

The House bill adds forest management and organic transition as purposes of the program. It adds forest land and conserving energy to the list of purposes for installing conservation practices. Energy use, organic transition, and forest management are added to the list activities for which the Secretary will assist producers in making cost-effective changes. (Section 2105(a) of the House bill)

The Senate amendment adds forest management as a purpose of the program and adds forest land conservation and pollinators to the list of purposes for installing conservation practices. Fuels management and forest management are added to the list activities for which the Secretary will assist producers in making cost-effective changes. (Section 2351 of the Senate amendment)

The Conference substitute adopts the House bill with amendment. Forest management is added to the program purpose, and forest land and energy conservation are added to the resources to benefit from the installation of conservation practices. Fuels management and forest management are added to the list activities for which the Secretary will assist producers in making cost-effective changes. The Managers recognize the significance of the changes made to the program to reflect new needs and concerns. The Managers expect the Secretary to continue to help producers address conservation needs on their land while promoting agricultural production and environmental quality as compatible goals.

(b) Definitions (Section 1240A)

The House bill adds definitions for integrated pest management, socially disadvantaged farmer or rancher, and adds alpaca and bison to the definition of livestock. It also adds forest management and silviculture to land management practices for purposes of the program.

The Senate amendment adds a definition of producer that includes custom feeders and contract growers. It modifies eligible land to include private nonindustrial forest land and lands used for pond-raised aquaculture production. The amendment adds forest and fuels management and conservation planning to practices for purposes of the program.

The Conference substitute adopts the Senate amendment with an amendment to modify eligible land. The Managers intend for the Department to continue to provide assistance to custom feeders and contract growers through this program.

(c) Establishment (Section 1240B)

The House bill adds organic certification as a practice eligible for cost share payments; amends the exception to establish a 90-percent cost-share rate for beginning and socially disadvantaged farmers or ranchers and provides 90-percent cost-share for use of

gasifier technology. It allows for the use of an approved third party for technical assistance. Energy efficient improvements and renewable energy systems are added to practices eligible for incentive payments. Promotion of pollinator habitat is added to the Special Rule for determining incentive payment rates. The Secretary is directed to reserve for 90 days not less than 5 percent of program financial assistance for each of beginning farmers or ranchers and socially disadvantaged farmers or ranchers. It makes market agencies and custom feeding businesses eligible for technical and financial assistance. (Section 2105(c) through (h) of the House bill)

The Senate amendment adds conservation plans to practices eligible for incentive payments, reduces the maximum contract term to 5 years, and strikes the provision on bidding down. The cost-share rate exception for beginning and socially disadvantaged farmers or ranchers is amended to allow variable payment, not to exceed 90 percent, and authority to provide advance payments up to 30 percent for the purchase of materials or contracting. A guaranteed loan eligibility provision is included for eligible applicants that are not accepted into the program. Predator deterrence practices are added to the Special Rule for determining incentive payment rates. The Senate amendment authorizes assistance for water conservation and irrigation efficiency practices, air quality improvement practices and establishes a minimum eligibility requirement for program participation. (Section 2353 of the Senate amendment)

The Conference substitute extends the program through 2012 and maintains the 60 percent livestock funding allocation through 2012. It deletes the Senate provision on contract terms (1240B(b)(2)(B)) and bidding down (1240B(c)).

The Conference substitute does not include the Senate provision on the Special Rule (1240B(e)(2)). The Managers recognize that proactive, non-lethal options to deter predators protected by the Endangered Species Act of 1973, as well as delisted populations of gray wolves, grizzly bears, and black bears, are consistent with the purposes of EQIP.

The Conference substitute deletes the House provision on cost-share for gasifier technology. The Managers recognize the merits of new technologies, including gasification, as a means of safely disposing animal carcasses, thereby minimizing environmental impacts and threat of disease. As such, the Managers encourage the Secretary to consider EQIP applications involving poultry gasification and offer cost-share assistance of up to 75 percent.

The Conference substitute adopts the Senate provision for advance payments for beginning, socially disadvantaged and limited resource farmers or ranchers and deletes the Senate provision for guaranteed loan eligibility. The Conference substitute adopts the Senate provision with an amendment for cost-share rates and advance payments for beginning, socially disadvantaged, and limited resource farmers or ranchers.

The Managers expect EQIP to be available to organic producers for conservation activities related to organic transition and production. The Managers expect EQIP to be available to producers who are transitioning their operations to certified organic production and organic producers who may be transitioning additional acres or animal herds. The Managers are aware that organic conversion is a management-intensive activity and therefore encourage the Secretary to provide levels of technical and educational assistance for organic conversion commensurate to the need.

(d) Evaluation of offers (Section 1240C)

The House bill adds criteria to prioritize applications more completely and to evaluate applications in logical groupings relative to similar crop, livestock, or operation types. The Secretary is directed to ensure that the evaluation process is streamlined for applicants that have an environmental management system in place or seek to complete an existing system. (Section 2105(i) of the House bill)

The Senate amendment adds a priority for applications that propose to improve existing practices or to complete a conservation system. (Section 2354 of the Senate amendment)

The Conference substitute adopts the House bill with an amendment on priority for applications. The Managers intend this evaluation process to prioritize State, regional, or local resource concerns, as well as allow for the grouping of applications of similar agriculture operations to allow for more equitable consideration.

(e) Duties of producers (Section 1240D)

The House bill and Senate amendment modify the duties of producers to prohibit owners of enrolled forest land from conducting practices that may defeat the program purposes. (Section 2105(j) of the House bill and Section 2355 of the Senate amendment)

The Conference substitute adopts the House bill provision.

(f) Environmental Quality Incentives Program plan (Section 1240E)

The House bill adds a forest provision to allow a forest management plan, forest stewardship plan, or similar plan to serve as a plan of operations. The House bill authorizes the Secretary to consider a permit required under a regulatory program to serve as a plan of operations in order to avoid duplication in planning. (Section 2105(k) of the House bill)

The Senate amendment allows a producer organization to act on behalf of its membership in submitting applications or conducting similar activities to facilitate program participation. The Senate amendment includes a provision for forest plans similar to the House bill. (Section 2356 of the Senate amendment)

The Senate amendment establishes a Chesapeake Bay Watershed Conservation Program under EQIP to assist producers in applying conservation practices on agricultural and nonindustrial private forestland in the Bay watershed to address natural resource concerns related to agriculture. (Section 2361 of the Senate amendment)

The Conference substitute adopts the House provision regarding forest land.

The Conference substitute strikes the Senate amendment provision on producer organizations. The Managers intend for the Secretary to allow producer associations and farmer cooperatives to act on behalf of their members in submitting applications, plans, or other program materials for their members to participate in this program. The Managers expect the Secretary to clarify this option in any rule or procedure related to this program.

The Conference substitute adopts a modification to the House bill provision to consider a permit required under a regulatory program to serve as a plan of operations. The Managers intend this addition to reduce duplication in planning but expect that the plan developed for a regulatory permit should contain the elements equivalent to those required in a Plan of Operations, including practices to be implemented, objectives of the plan, and any relevant terms and conditions to carry out the plan.

(g) Duties of the Secretary (Section 1240F)

The House bill requires the Secretary to provide assistance for a practice intended to conserve water if it will result in a reduction in consumptive water use, saved water remains in the source, and the practice will not result in increased consumptive use on the producer's operation. (Section 2105(l) of the House bill)

The Senate amendment has no comparable provision.

The Conference substitute retains current law. The Managers address the intent of the House bill under modifications made in Section 1240B to provide assistance for water conservation or irrigation efficiency improvements.

(h) Limitation on payments (Section 1240G)

The House bill moves the limitation on payments to Section 2409. (Section 2409(b) of the House bill)

The Senate amendment includes a provision to require direct attribution of payments. (Section 2357 of the Senate amendment)

The Conference substitute provides for a payment limit of $300,000 over 6 years. The Secretary is provided with the authority to waive that limit to $450,000 in cases of special environmental significance. Projects of special environmental significance include methane digesters, other innovative technologies, and projects that will result in significant environmental improvement. The Secretary is expected to utilize this waiver to achieve the purposes of the program. (Section 2508 of Conference substitute)

(12) Conservation Innovation Grants (Section 1240H of FSA)

The House bill adds forest resource management as an eligible grant activity and adds eligible projects to include those that ensure the efficient and effective transfer of technologies. The House bill provides mandatory funding for a comprehensive conservation planning project in the Chesapeake Bay Watershed, incentive and cost-share payments for air quality concerns, and increased benefits for specialty crop producers.

The Senate amendment clarifies the purpose of the grants are to develop and transfer innovative conservation technology. The amendment seeks to increase participation by specialty crop producers.

The Conference substitute adopts the House provisions related to forest resource management and air quality.

The Conference substitute provides $150,000,000 to help producers address air quality concerns. The Managers expect funds will be used to provide financial assistance to producers for air quality improvements that help them comply with Federal, State, or local air quality requirements associated with agricultural operations. The funds should be used for cost-effective methods in addressing air quality and to reduce emissions and pollutants from operations, including making improvements in mobile or stationary equipment such as engines.

The Managers believe conservation programs as implemented by USDA should recognize the use of innovative technology such as enhanced efficiency fertilizers. Enhanced efficiency fertilizers, which can protect water quality and reduce greenhouse emissions, include slow and controlled-release fertilizers (absorbed, coated, occluded or reacted) and stabilized nitrogen fertilizers (urease and nitrification inhibitors and nitrogen stabilizers) and are recognized by State regulators of fertilizers. (Section 2509 of Conference substitute)

(13) Ground and Surface Water Conservation (Section 1240I of FSA)

The House bill modifies the purpose of the existing Ground and Surface Water Conservation Program (GSWCP) to allow cooperative agreements between the Secretary, producers, government entities, and Tribes to achieve regional water quality or quantity goals in water quality priority areas. (Section 2106(a) of the House bill)

The House bill requires the Secretary to invite prospective partners to submit competitive grant proposals for a Regional Water Enhancement Program. Proposals will be competitively awarded based on the inclusion of the most lands and producers; the most activities versus costs; contribution to sustaining or enhancing agricultural production or rural economic development; development of performance measures to measure long term effectiveness; the capture of surface water runoff; the participation of multiple interested persons in improving issues of concern; and the assistance provided to producers to meet regulatory requirements that reduce the economic scope of their operation.

The House bill provides $60,000,000 to be available for each of fiscal years 2008 through 2012.

The Senate amendment maintains the existing GSWCP and provides an increase in funding from $60,000,000 to $65,000,000 per year. The provision provides funding for each State that received funding under the program in previous years in an amount that is the simple average of funds provided for fiscal years 2002–2007 or the amount provided in 2007, whichever is greater. For States over the Ogallala Aquifer, not less than the greater of $3,000,000 or the average of funds provided for fiscal years 2002–2007 is provided.

The Conference substitute adopts the House provision with an amendment. The substitute creates the Agricultural Water Enhancement Program (AWEP) and provides an additional $40,000,000 in mandatory funding for the program.

The purpose of AWEP is to address water quality and water quantity concerns on agricultural land. The Managers expect the Department to balance its resources among the needs of producers in performing water quantity and quality activities. The Managers intend for producers to participate in the program directly or with other producers who have come together with a partner. The Managers intend for the Department to manage the program so that a producer who chooses to participate as an individual has the same opportunities as one who chooses to participate with a partner.

The purpose of authorizing partners in AWEP is to leverage federal funds and to encourage producers to collectively address specific water quality or quantity concerns. The Managers intend for the program to be delivered according to applicable program rules. Any federal funding must be delivered to producers; no federal funding may be used to cover the administrative expenses of partners.

The Managers expect the Department to require partners to clearly state their objectives and describe how they intend to leverage federal funds and the water quantity or water quality issues they intend to address. The Managers encourage the Department to require the measurement and quantification of actual resource outcomes as part of AWEP projects.

The Managers recognize that water quantity conservation is a significant nationwide concern. The Ogallala Aquifer is a critical source of groundwater for agricultural and municipal uses. Due to the scope and significance of the aquifer, there is a need for regional efforts to address groundwater management in the region. The Managers urge the Department to work with States and agricultural producers in the Ogallala region to coordinate Federal assistance with State programs and to encourage cooperation among States in implementing conservation programs and water reduction practices.

The Managers recognize that water use efficiency projects are an important means to encourage water conservation and expect the Department to continue to support such activities. The Managers intend that additional significance should be placed on water conservation practices that convert irrigated farming to dryland farming to encourage substantial water savings.

To ensure the effectiveness of proposals that convert irrigated farming to dryland farming, the Managers have included provisions to allow the Department to fund proposals for an extended period of five years. In setting the payment rate, the Secretary should take into account the change in the land value of converting an irrigated farming operation to a dryland farming operation.

The Managers intend for the Department to make the construction of small, on-farm reservoirs or irrigation ponds eligible for assistance through AWEP in drought-stricken areas. The Managers intend the Department to use the Drought Monitor as a guide to determine the areas eligible. Any area that has received a D4 drought designation for a month-long period during the previous two years should be eligible. The Managers intend the ponds to be no more than 40 acres in size.

The Managers believe these ponds and related activities will benefit wildlife and demonstrate the potential to capture on-farm surface water runoff in an environmentally beneficial manner. The Managers do not intend for any State water regulation or law to be waived.

In utilizing the authority to waive the eligibility provisions in Section 1001D, the Managers expect the Secretary to take into account the need to accomplish the purposes of the program by enrolling land that would be ineligible to participate in other conservation programs.

The Managers intend for the Secretary to give priority to producers in six priority areas: The Eastern Snake Plain Aquifer region, Puget Sound, the Ogallala Aquifer, the Sacramento River watershed, Upper Mississippi River Basin, the Red River of the North Basin, and the Everglades. (Section 2510 of Conference substitute)

(14) Grassroots Source Water Protection Program (Section 1240O of FSA)

The House bill increases the appropriations authorization from $5,000,000 each fiscal year to $20,000,000 each fiscal year through 2012. The provision provides a one-time infusion of $10,000,000 in mandatory funding to be available until expended. (Section 2107 of the House bill)

The Senate amendment is similar but does not include the one-time infusion of $10,000,000 in mandatory funding. (Section 2394 of the Senate amendment)

The Conference substitute adopts the Senate provision. (Section 2603 of Conference substitute)

(15) Conservation private grazing land (Section 1240M of FSA)

The House bill (Section 2108) and the Senate amendment (Section 2392) extend the program through 2012.

The Conference substitute adopts the Senate provision. (Section 2601 of Conference substitute)

(16) Great Lakes Basin Program for Soil Erosion and Sediment Control (Section 1240P of FSA)

The House bill extends the program through 2012. (Section 2109 of the House bill)

The Senate amendment extends the program through 2012 and clarifies that the purpose of the program is to assist in implementing the recommendations of the Great Lakes Regional Collaboration Strategy to Restore and Protect the Great Lakes. (Section 2395 of the Senate amendment)

The Conference substitute adopts the Senate provision with an amendment that includes using the recommendations of the Great Lakes Regional Collaboration Strategy as a basis for soil erosion and sediment control projects. (Section 2604 of Conference substitute)

(17) Discovery Watershed Demonstration Program (Section 1240Q of FSA)

The Senate amendment establishes that the Secretary shall carry out a demonstration program in not less than 30 small watersheds in States of the Upper Mississippi River basin to identify and promote the most cost effective and efficient ways of reducing nutrient loss to surface waters from agricultural lands. It allows for the Secretary to establish or identify appropriate partnerships to select the watersheds and to encourage cooperative efforts among the Secretary and State, local, and nongovernmental organizations. The amendment provides criteria for the selection of watersheds and prohibits the use of funds for administrative expenses. (Section 2397 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute adopts the House provision and does not include the program.

The Managers recognize that the loss of nitrogen and other nutrients from agricultural land impacts water quality in many parts of the nation. This is of particular concern in the States of the Upper Mississippi River basin.

The Discovery Watershed Demonstration Program was intended to address this loss of nutrients in these States through management projects operating on a watershed scale. The projects were to be based on agriculture-related water quality problems and include widespread participation from local producers in the selected watershed.

In Section 2707, the substitute provides for the Cooperative Conservation Partnership Initiative (CCPI), which is designed to encourage these types of activities. Given the cooperative nature of the proposed Discovery Watershed program, the Managers encourage the Secretary to consider locally developed projects for funding under CCPI.

(18) Emergency Landscape Restoration Program (Section 1240R of FSA)

The Senate amendment replaces the Emergency Conservation Program (ECP) and the Emergency Watershed Program (EWP) with a new Emergency Landscape Restoration Program. The purpose of the Emergency Landscape Restoration Program is to rehabilitate watersheds, nonindustrial private forest lands, and working agricultural lands adversely affected by natural catastrophic events.

The amendment authorizes such sums as necessary, provides for the temporary administration of ECP and EWP until final regulations are formulated, and repeals ECP and EWP. (Section 2398 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute adopts the House provision and does not include the program.

(19) Farm and Ranchland Protection Program (Section 1238I of FSA)

The House bill establishes a certification process for States. It allows grants to be made to certified States based on the demonstrated need for farm and ranch land protection. Up to 10 percent of those funds may be used for the costs of purchasing and enforcing easements. The bill states that the Secretary may also enter into agreements with eligible entities. The terms and conditions of the agreements must be consistent with the purposes of the program, as well as include a requirement consistent with agricultural activities regarding impervious surfaces. It also requires the use of a conservation plan for highly erodible cropland.

The House bill provides for the Federal Government to retain a Federal contingent right of enforcement or executory limitation in an easement to ensure its enforcement. This right is not considered an acquisition of property.

The House bill provides cost-share assistance for purchasing an easement, but the assistance may not exceed 50 percent of the appraised fair market value of the easement. The fair market value is determined by an appraisal using an industry-approved method. (Section 2110 of the House bill)

The Senate amendment modifies the definition of eligible forest land to include land that contributes to the economic viability of an operation or serves as a buffer. It also amends the definition to include land that is incidental to other eligible land to ensure efficient administration of the program. The provision requires the Secretary to enter into cooperative agreements with eligible entities as long as the terms and conditions of the cooperative agreement include: entity qualifications, specific projects, substitution of projects, use of funds, flexibility to use unique terms and conditions for easements, impervious surface limitation, appraisal method, and charitable contributions.

The Senate amendment requires the protection of Federal investment through an executory limitation, but specifies that the executory limitation is not a Federal acquisition of real property and will not trigger any Federal appraisal or other real property requirements.

The amendment limits the amount the Secretary can share in the costs of purchasing the easement to 50 percent of the appraised fair market value and establishes minimum amounts entities pay based on the amount of landowner contributions. The Senate amendment requires appraisals based on Uniform standards of Professional Appraisal Practice or any other industry-approved standard. (Section 2371 of the Senate amendment)

The Conference substitute adopts the House provision with amendment.

The Managers expect the changes to the Farmland Protection Program (FPP) will provide flexibility and certainty to program participants. The substitute makes changes to the administrative requirements, appraisal methodology, and terms and conditions of cooperative agreements which shall make the overall program more user-friendly.

The substitute clarifies the purpose of the program as protecting land for agricultural use by limiting nonagricultural uses of the land. The substitute adopts the Senate provision to modify the definition of eligible land to include forestland and other land that contributes to the economic viability of an operation.

The substitute establishes a certification process similar to the House bill for all eligible entities. To become certified, entities must have the authority and resources to enforce easements, policies in place that are consistent with the purposes of the program, and clear procedures to protect the integrity of the program.

The substitute adopts terms and conditions for cooperative agreements similar to the Senate amendment. The cooperative agreement sets forth the working relationship between the Department and the entity in carrying out the program. The terms and conditions will stipulate the length of the agreement; allow for the substitution of qualified projects; and maintain, at a minimum, that the agreement is consistent with the purpose of the program, provide for adequate enforcement of the easement, and include a limit on impervious surfaces. Once an entity is certified, it may enter into an agreement for a minimum of five years with the Department. Non-certified entities may enter into agreements of not less than 3, but not more than 5 years. In selecting offers from eligible entities for funding, the Managers expect the Secretary to consider the sufficiency of the offer regarding effective monitoring and enforcement, reversionary interest, or other such factors that will affect the long-term integrity of easement being acquired under the program.

The Managers intend any violation of the terms and conditions will result in a penalty to the eligible entity and the agreement will remain in place. It is the expectation that the violation and penalty terms will be outlined in all cooperative agreements between the eligible entity and the Secretary.

The substitute provides for the Federal Government to retain a Federal contingent right of enforcement in an easement to ensure its enforcement. The Managers do not intend this right to be considered to be an acquisition of real property, but in the event an easement cannot be enforced by the eligible entity the Federal Government shall ensure the easement remains in force. (Section 2401 of Conference substitute)

(20) Farm Viability Program (Section 1238J of FSA)

The House bill reauthorizes the program through 2012. (Section 2111 of the House bill)

The Senate amendment reauthorizes the program through 2012. (Section 2396 of the Senate amendment)

The Conference substitute adopts the House provision. (Section 2402 of Conference substitute)

(21) Wildlife Habitat Incentive Program (Section 1240N of FSA)

The House bill reauthorizes the program through 2012. The bill raises the cost-share limitation for long-term projects from 15 percent to 25 percent. It also increases the cost-share rate for long-term agreements and activities that assist producers in meeting a regulatory requirement that impacts the economic scope of their operation from 15 to 25 percent. (Section 2111 of the House bill)

The Senate amendment authorizes the Secretary to make incentive payments and increases the percentage of funds that can be used for projects longer than 15 years from 15 percent to 25 percent. The Senate amendment requires the Secretary to give priority to projects that would further the goals and objectives of State, regional, and national fish and wildlife conservation plans and initiatives. (Section 2393 of the Senate amendment)

The Conference substitute adopts the House provision with an amendment. The substitute increases the limitation on cost-share payments for long-term projects to 25 percent and focuses the program on agricultural and nonindustrial private forest lands.

The substitute allows the Secretary to provide priority to projects that address issues raised by State, regional, and national conservation initiatives. These 'State, regional and national conservation initiatives' may include such things as the North American Waterfowl Management Plan, the National Fish Habitat Action Plan, the Greater Sage-Grouse Conservation Strategy, the State Comprehensive Wildlife Conservation Strategies (also referred to as the State Wildlife Action Plans), the Northern Bobwhite Conservation Initiative, and State forest resource strategies. The Managers intend for the Secretary to consider the goals and objectives identified in relevant fish and wildlife conservation initiatives when establishing State and national program priorities, scoring criteria, focus areas, or other special initiatives. The Managers expect the Department to work with conservation partners and State and Federal agencies, to the extent practicable, to complement the goals and objectives of these additional plans through USDA programs. (Section 2602 of Conference substitute)

(22) Agricultural Management Assistance Program (Section 524(b)(1) of Federal Crop Insurance Act)

The House bill adds Virginia and Hawaii as eligible States. It requires that 50 percent of available funds shall be used for construction or improvement of watershed management or irrigation structures, planting trees for windbreaks or improving water quality, and mitigating risk through diversification or various conservation practices; 40 percent may be used for any activity relating to risk management activities, including entering agriculture trade options, futures, or hedging; and 10 percent shall be used for organic certification cost-share assistance. (Section 2201 of the House bill)

The Senate adds Idaho as a participating State, extends the program through 2012, and provides an additional $10,000,000 per year to the program (Section 524(b)(4)(B)(ii)) through 2012. (Section 2601 of the Senate amendment)

The Conference substitute adopts the House provision with an amendment and includes Hawaii as an eligible State. The Conference substitute provides an additional $25,000,000 in mandatory funding for fiscal years 2008 through 2012. (Section 2801 of Conference substitute)

(23) Resource Conservation and Development Program (Section 1528 of Agriculture and Food Act of 1981)

The House bill clarifies that an area plan must be developed through a locally led process, and that the planning process must be conducted by a local council. It also provides that the Secretary shall designate a coordinator to provide technical assistance to councils. (Section 2202 of the House bill)

The Senate amendment is comparable to the House. (Section 2605 of the Senate amendment)

The Conference substitute adopts the Senate provision. (Section 2805 of Conference substitute)

(24) Small watershed rehabilitation (Section 14 of the Watershed Protection and Flood Prevention Act)

The House bill provides $50,000,000 in mandatory funding for fiscal years 2009 through 2012. It authorizes appropriations for fiscal years 2007 through 2012 at the current funding level of $85,000,000 per year. (Section 2203 of the House bill)

The Senate amendment extends program to 2012 and authorizes appropriations for fiscal years 2008 through 2012 as such sums as necessary. (Section 2604 of the Senate amendment)

The Conference substitute adopts the House provision and provides $100,000,000 in mandatory funding for fiscal year 2009 to remain available until expended. (Section 2803 of Conference substitute)

(25) Chesapeake Bay Program for Nutrient Reduction and Sediment Control (Section 1240Q of FSA)

The House bill creates a new program at the Department to provide financial assistance to producers to minimize excess nutrients and sediments in order to restore, preserve, and protect the Chesapeake Bay. The program directs the Secretary to develop and implement a comprehensive plan to provide for innovative approaches to advance the improvement of water quality and enhance wildlife habitat. Critical projects include those in the Susquehanna, Shenandoah, Potomac and Patuxent River basins. The House bill includes a Sense of Congress that the Department is authorized and should be a member of the Chesapeake Bay Executive Council.

The Senate bill has no comparable provision.

The Conference substitute adopts the House provision with amendment.

The Chesapeake Bay is the nation's largest estuary. In 2000, Chesapeake Bay partners agreed to target water quality and habitat restoration as goals to improve the health of the Bay and its living resources. According to current estimates, the Bay will not meet the 2012 agreement without a better coordinated plan and greater targeting of resources.

Farmers in the Chesapeake Bay region are under some of the most stringent environmental regulations in the country. Despite the desire and demand that exists among farmers in the region to participate in conservation programs, current funding levels and program allocations leave many behind. While the reliance upon conservation programs and the need for funding may not be unique to the Chesapeake, it is nonetheless uniquely critical to the success of the Bay restoration strategy and the ability of farmers to meet regulatory requirements.

The Managers intend the Chesapeake Bay Watershed Program be carried out on agriculture and forestlands in the Chesapeake Bay through the use of all conservation programs available to producers in the region. It is the expectation this program will be carried out through existing program mechanisms in coordination with other relevant Federal agencies working in the Bay watershed, such as the Chesapeake Bay Program Office.

The special consideration given to the rivers under this section are areas of critical need to the overall health of the Chesapeake Bay. The Managers intend that the Secretary focus initial program resources in these key basins and build upon successful implementation elsewhere in the Chesapeake Bay Watershed, as appropriate. These funds should be used to install practices to help control erosion and nutrient loading before they reach the Bay, and that assessments will be made using existing models and information to evaluate the most cost-effective strategies for reducing nonpoint source nutrient inputs. This program provides $438,000,000 in mandatory funding for fiscal year 2009 through fiscal year 2012. (Section 2605 of Conference substitute)

(26) Voluntary Public Access and Habitat Incentive Program (Section 1240R [House] or 1240S [Senate] of FSA)

The House bill establishes a voluntary public access program under which States and Tribes may apply for grants to encourage owners and operators of privately held farm, ranch, and forest land to make that land available for wildlife-dependent recreation. The Secretary shall give priority to States and tribal governments that have consistent opening dates for migratory bird hunting for both residents and non-residents. The House bill authorizes $20,000,000 in discretionary funding for each of fiscal years 2008 through 2012. The program does not preempt a State or tribal government law, including liability law. (Section 2303 of the House bill)

The Senate amendment is comparable to the House bill. It includes a priority to States where the location of participating lands would be available to the public and provides $20,000,000 per year in mandatory funding for each of fiscal years 2008 through 2012. (Section 2399 of the Senate amendment)

The Conference substitute adopts the Senate provision with an amendment. The Conference substitute provides $50,000,000 in mandatory funds for this program. The Conference substitute includes a 25 percent reduction for the total grant amount if the opening dates for migratory bird hunting in the State are not consistent for residents and non-residents. (Section 2606 of Conference substitute)

(27) Muck soils conservation (Section 2303)

The House bill establishes a new program under which owners or operators of eligible land shall receive payments to conserve soil, water, and wildlife resources. Eligible land must be comprised of muck soil, be in agricultural production, have a spring cover crop, a winter crop, and year-round ditch banks seeded with grass. Payments are authorized for between $300 and $500 per acre per year. Appropriations are authorized at $50,000,000 for each of fiscal years 2008 through 2012. (Section 2303 of the House bill)

The Senate amendment has no comparable provision.

The Conference substitute adopts the Senate provision and the provision is deleted. The Managers recognize the unique soils throughout the Hudson Valley of New York that are classified as muck soils. These soils are former wetlands that have been drained with ditches years ago to allow for crop production. Due to the extensive networking of drainage ditches, normal buffer setback requirements associated with current conservation programs take a large percentage of these highly productive lands out of production. The Managers encourage the Secretary to work through the State Conservationist to address the needs of muck soil farmers in the Hudson Valley, using existing conservation programs to conserve soil, water, and wildlife resources on these lands.

(28) Funding for programs under the Food Security Act of 1985 (Section 1241 of FSA)

The House bill provides $1,454,000,000 for fiscal years 2007 through 2012 and $1,927,000,000 for fiscal years 2007 through 2017 for Conservation Security Program contracts entered into before Oct. 1, 2007. Conservation Security Program contracts entered into on or after Oct. 1, 2011, shall be funded in the amount of $5,01,000,000 for fiscal year 2012 and $4,646,000,000 for the period of fiscal years 2013 through 2017.

The Farm and Ranchland Protection Program is funded at $125,000,000 in fiscal year 2008; $150,000,000 in fiscal year 2009; $200,000,000 in fiscal year 2010; $240,000,000 in fiscal year 2011; and $280,000,000 in fiscal year 2012.

EQIP is funded at $1,250,000,000 in fiscal year 2008; $1,600,000,000 in fiscal year 2009; $1,700,000,000 in fiscal year 2010; $1,800,000,000 in fiscal year 2011; and $2,000,000,000 in fiscal year 2012.

WHIP is authorized at $85,000,000 each of fiscal years 2008 through 2012. (Section 2401 of the House bill)

The Senate amendment funds programs in title XII of the FSA for each of F 2008–2012 as follows:

Conservation Security Program—$2,317,000,000 for current contracts to remain available until expended;

Conservation Stewardship Program—13,273,000 acres for each of fiscal years 2008–2012;

FPP—$97,000,000 for each of fiscal years 2008–2012;

EQIP—for fiscal years 2008 and 2009: $1,270,000,000; for fiscal years 2010–2012: $1,300,000,000;

WHIP—Same as House;

Voluntary Public Access and Habitat Incentives Program—$20,000,000 for each of fiscal years 2008–2012; and

GRP—$240,000,000 for fiscal years 2008–2012. (Section 2401 of the Senate amendment)

The Conference substitute provides the following in additional new budget authority for these programs:

CSP—$1,100,000,000

EQIP—$3,393,000,000

FPP—$773,000,000

(Section 2701 of Conference substitute)

(29) Conservation access (Section 1241 of FSA)

The Senate amendment creates a new Conservation Access program. The provision requires 10 percent of conservation program funds and 10 percent of CRP and WRP acreage enrolled in any year be used to assist beginning and socially disadvantaged farmers and ranchers with annual gross sales of $15,000 or more. Any unused funds are to be re-pooled back to the original program and made available to all persons eligible for assistance.

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision with an amendment. The Conference substitute provides that 5 percent of CSP acres and 5 percent of EQIP funds will be used to assist beginning farmers or ranchers, and an additional 5 percent of each to assist socially disadvantaged farmers or ranchers.

The Managers recognize the importance of providing intensive technical assistance to beginning and socially disadvantaged farmers or ranchers participating in farm bill conservation programs. The Managers encourage the Department to provide rates of technical assistance to beginning and socially disadvantaged farmers or ranchers commensurate with the special needs to ensure high participation levels and substantial and lasting conservation benefits.

In implementing the conservation access provisions, the Managers encourage the Secretary to develop, implement, and support cooperative agreements with entities, including community-based and nongovernmental organizations and educational institutions that have expertise in comprehensive conservation planning and assistance needs of beginning and socially disadvantaged farmers or ranchers.

The Managers recognize that off-farm employment is a necessity for most beginning farmers or ranchers, and that transition to a full-time agricultural occupation is a substantial challenge. The Managers also recognize the value that sound conservation can contribute to an enduring agricultural operation and a successful farming or ranching livelihood. The Managers intend for the Secretary to give priority to Conservation Access resources to beginning farmers or ranchers who are, or who are working toward, increasing their participation in the farming or ranching operation. (Section 2704 of Conference substitute)

(30) Improved provision of technical assistance under conservation programs (Section 1242 of FSA)

The House bill adds authority for contracting with third party providers to provide technical assistance to program participants, requires that the payment level for third party providers be established based on

prevailing market rates where available, and directs the Secretary to consult with producers, extension and others in a review and revision of conservation practice standards to ensure that they are complete and relevant. (Section 2402 of the House bill)

The Senate amendment adds the purpose of technical assistance, provides authority for contracting with third party providers for technical assistance, and defines entities eligible to receive technical assistance under this title. The Secretary is directed to provide technical assistance to all conservation and Agriculture Management Assistance program participants. Where financial assistance is not required, the Secretary may enter technical services contracts with program participants. (Section 2404 of the Senate amendment)

The Conference substitute adopts the Senate amendment with modifications. The Conference substitute reflects the Managers' two priorities for improving the delivery of technical assistance: 1) Increasing the availability of technical assistance, and 2) ensuring that conservation technical standards and resources are locally relevant.

The demand for technical assistance exceeds the present supply of technical resources, and the private sector cadre envisioned in the 2002 Farm Bill has not developed. The modifications made in the substitute are intended to correct these deficiencies through authority for use of mandatory funds and multi-year contracts with third party providers, establishment of fair and reasonable payment rates, and a nationally consistent certification process. The requirement for approval of State-level certification criteria is intended to address the criticism that current requirements, particularly those added at the State level, result in a complicated and overly burdensome process that discourages participation.

The Managers expect that these changes will provide the certainty needed to encourage the development of a successful, skilled, and accountable third party provider sector, diminish the tension caused by tradeoffs between public and private sector resources, and make locally relevant conservation technical assistance from public and private sources increasingly available and accessible to producers. (Section 2706 of Conference substitute)

(31) Cooperative Conservation Partnership Initiative (Section 1243 of FSA)

The House bill requires the Secretary to enter into 2- to 5-year agreements with eligible entities to preferentially enroll producers in specified conservation programs. This will allow multiple producers and others to cooperate on improving specific resources of concern related to farming on a local, State or regional scale. Eligible partners are States, State agencies, State subdivisions including counties and conservation districts, Tribes, and nongovernmental organizations and associations with histories of working with farmers on agriculture conservation issues.

The Conservation Security Program, EQIP, and WHIP are the programs covered by the provision. Not less than 75 percent shall be used for State projects and not more than 25 percent for multi-State projects. It prohibits use of funds to pay for partner overhead or administrative costs. (Section 2403 of the House bill)

The Senate amendment includes ''Special Rules Applicable to Regional Water Enhancement Projects'' that adds a section to the Partnerships and Cooperation section for Regional Water Enhancement Projects. This section requires the Secretary to identify priority areas and names the following as priority areas: Chesapeake Bay, Upper Mississippi River basin, Everglades, Klamath River basin, Sacramento/San Joaquin River watershed, Mobile River basin, Puget Sound, Ogallala Aquifer, Illinois River watershed (of Arkansas and Oklahoma), Champlain Basin, Platte River watershed (note: drafting error, this should be the Platte River Basin), Republican River Watershed, Chattahoochee river watershed, and the Rio Grande watershed.

The Senate amendment requires proposals to describe geographical location, identification of issues, baseline assessment, activities to be undertaken, and performance measures. It requires competitive awards of multi-year contracts for proposals that have the highest likelihood of success, involve multiple stakeholders, highest percentage of working agricultural lands, highest percentage of on-the-ground activities, the greatest contribution to sustaining agriculture, and suitable performance measures. (Section 2405 of the Senate amendment)

The Conference substitute adopts the House provision with an amendment and names the initiative the Cooperative Conservation Partnership Initiative (CCPI).

The Managers intend that resources made available under CCPI be delivered in accordance with the basic program rules and mechanisms relating to basic program functions, such as appeals, payment limitations, and conservation compliance. The Conference substitute allows the Secretary to make certain programmatic adjustments better fit the local circumstances and goals and objectives of the special project identified for funding under the initiative. Proposed adjustments may be part of the application from the conservation partnership and forwarded to the State Conservationist or the Secretary for consideration. The Conference substitute provides for adjustments to provide producers preferential enrollment in the applicable program as part of the special project.

The Managers include the following as an example of a CCPI partnership: A cannery has closed and near-by orchards are going out of business. A local watershed council pulls together several partners such as a State university, a wildlife organization, and an organic growers' cooperative. They agree to work together to improve water quality and wildlife habitat while working with interested local producers to transition their orchards to organic grass-based cattle operations.

The watershed council files an application with the Department proposing to conduct local producer outreach; provide training on transitioning to a new agricultural sector, including organic certification and cattle management workshops; assist with tree removal; and assist in implementing habitat diversity practices with workshops, labor, and seed. The council asks for designation of $10,000,000 in EQIP and $250,000 in WHIP.

The State Conservationist agrees with the proposal and sets aside the approved resources, which will go to producers participating in the project. When the producer applies for the programs, they certify that they are a project participant. If they are qualified, they bypass the regular program ranking processes and enter into a contract in the identified program(s). Each program in this example stands on its own and all program rules apply. The difference is the streamlined application and the process that works to make the programs seamless in application.

The Conference substitute applies to all of the Department's conservation programs except CRP, WRP, FPP and GRP. The Managers intend that applications may propose projects for consideration by the State Conservationist or the Secretary that include innovative combinations of covered initiative programs, if such combinations aid significantly in meeting the goals and objectives of the project. It is also the intent of the Managers that applicants may propose projects for consideration by the State conservationist or the Secretary that might work in tandem with the enhancement programs under CRP or WRP. (Section 2707 of Conference substitute)

(32) Regional equity and flexibility (Section 1241 of FSA)

The House bill raises the base amount of conservation funds that a State must receive in order to receive priority funding for conservation programs from $12,000,000 to $15,000,000. (Section 2404 of House bill)

The Senate amendment also increases the funding from $12,000,000 to $15,000,000 and adds CSP and the Agricultural Management Assistance Program to the programs considered in determining funding. It instructs the Secretary to conduct a review of conservation program allocation formulas to determine the sufficiency of the formulas in accounting for State-level economic factors, level of agricultural infrastructure, or related factors that affect conservation program costs. (Section 2402 of the Senate amendment)

The Conference substitute adopts the Senate provision with an amendment. (Section 2703 of Conference substitute)

(33) Administrative requirements for conservation programs (Section 1244 of FSA)

The House bill authorizes for socially disadvantaged farmers to be added as a group the Secretary must provide incentives for to encourage participation in conservation programs. The Secretary must establish a single, simplified application process for initial requests of assistance under the conservation programs administered by NRCS. Applicants should not be required to provide information that is already available to the Secretary, and the process itself must minimize complexity and redundancy. (Section 2405 of the House bill)

The Senate amendment requires the Secretary to develop a streamlined application process for conservation programs and provide written notification of completion to Congress not later than 1 year after enactment. It requires the Secretary, at the request of the landowner, to cooperate with the Secretary of the Interior and Secretary of Commerce to make Safe Harbor assurances available to the landowner under the Endangered Species Act. The provision allows producers to apply for conservation programs through a producer organization and that any applicable payment limits shall apply to individuals and not the organization.

The Senate amendment requires the Secretary to immediately implement policies and procedures to ensure proper payment to producers participating in conservation programs and correct other management deficiencies identified in the OIG report 50099–11–SF. It requires the Secretary to monitor and measure performance of conservation programs; to demonstrate the long-term benefits of the programs; and to coordinate program activities with the Soil and Water Resources Conservation Act. (Section 2405 of the Senate amendment)

The Conference substitute adopts the House provision with an amendment to include a pollinator provision. Despite their value, native pollinators such as bees, butterflies, moths, flies, beetles, bats, or hummingbirds often are under-appreciated in terms of their contributions to the U.S. agricultural sector. Insect-pollinated crops directly contributed $20,000,000,000 to the United States economy in 2000 alone. The

Managers recognize that many native pollinator groups, particularly those important to agriculture, are facing a serious risk of decline as a result of habitat loss, degradation, and fragmentation, among other factors.

The Managers see conservation programs as an important tool for creating, restoring, and enhancing pollinator habitat quantity and quality. The Managers expect the Secretary to encourage, within appropriate conservation programs, measures to benefit pollinators and their habitat, such as using plant species mixes in conservation plantings to provide pollinator food and shelter; establishing field borders, hedgerows, and shelterbelts to provide habitat in proximity to crops; establishing corridors that can expand and connect important pollinator habitat patches; and encouraging related pollinator-friendly production practices. (Section 2708 of Conference substitute)

(34) Annual report on participation by specialty crop producers in conservation programs (Section 12512 of FSA)

The House bill requires the Secretary to submit a report to the House and Senate Agriculture Committees regarding specialty crop producer participation in conservation programs that tracks participation by crop and livestock type, includes a plan to improve access of specialty crop producers to conservation programs, and the describes the results of this plan. (Section 2406 of the House bill)

The Senate amendment had no comparable provision.

The Conference substitute adopts the Senate provision with an amendment to modify the compliance and performance provisions of Section 1244 of FSA to accommodate the intent of the House bill. (Section 1244 of FSA)

(35) Promotion of market based approaches to conservation/conservation programs in environmental service markets (Section 1245 of FSA)

The House bill directs the Secretary to research, analyze and enter into contracts and agreements to promote the development of uniform standards for quantifying environmental benefits, promoting the establishment of credit registries and third party verification, and facilitating private sector market based approaches for agriculture and forest conservation activities. An Environmental Services Standards Board is established to develop uniform standards for quantifying environmental services in order to help develop credit markets agriculture and forest conservation activities. (Section 2407 of the House bill)

The Senate amendment directs the Secretary to establish a framework to develop uniform standards, design accounting procedures, and establish a protocol to report environmental services benefits. It also directed the Secretary to establish a registry to report and maintain the benefits and verify that a farmer, rancher or forest land owner has implemented the conservation or land management activity. The Secretary is directed to focus first on carbon markets. (Section 2406 of the Senate amendment)

The Conference substitute adopts the House provision with an amendment. The Secretary is directed to establish technical guidelines, including a verification process that considers the role of third parties. The Secretary is instructed to consult with Federal and State agencies and nongovernmental interests, such as producers, academia, and financial institutions. The Secretary is directed to focus initially on carbon markets, as the Managers recognize that this is the most pressing emerging market in which agriculture may be involved. The Secretary is expected to fulfill the intent of this section with resources available to the Department.

The adoption of this provision recognizes the growing opportunities for agriculture to participate in emerging environmental services markets. The Managers observe that the largest barrier to participation is the lack of standards and accounting procedures that make transparent the benefits that are being produced and marketed. The Managers believe that the most appropriate Federal lead for developing these common standards is the Secretary and expect the Secretary to move expeditiously to accomplish this task. (Section 2709 of Conference substitute)

(36) Establishment of state technical committees (Section 1261 of FSA)

The House bill changes the existing composition of State technical committees to include at least 12 producers representing a variety of crops, livestock, or poultry grown in the State.

The House bill states that State technical committees shall convene subcommittees to provide technical guidance and implementation recommendations. The topics subcommittees must address include: establishing priorities and criteria for State initiatives; private forestland protection issues; water quality and quantity issues; air quality, wildlife habitat, wetland protection, and other issues. (Section 2408 of the House bill)

The Senate amendment requires the Secretary to develop standard operating procedures to be used by the State technical committee in the development of technical guidelines for the implementation of the conservation provisions of this title. It makes local work groups subcommittees of the State technical committee, which exempts them from the Federal Advisory Committee Act. (Section 2501 of the Senate amendment)

The Conference substitute adopts the House provision with an amendment. The substitute requires the Secretary to develop standard operating procedures for the committees, updates the names of participating agencies, and deletes the requirement for establishing specific issue-area subcommittees. The substitute requires that public notice be given for meetings of the State technical committee and adds local working groups as subcommittees. The Managers expect that other relevant Federal agencies will also be invited to participate as needed. (Section 2711 of Conference substitute)

(37) Payment limitation (Section 1246(a-c), 1244(i), 1238C(d), and 1240G of FSA)

The House bill imposes payment limitation of $60,000 per fiscal year for any single program; $125,000 for payments from more than one program. This limitation does not apply to WRP, FPP, or GRP. The House bill requires the Secretary to issue regulations ensuring direct attribution. Further, the Secretary shall issue such regulations as necessary to ensure that the total amount of payments are attributed to an individual by taking into account the individual's direct and indirect ownership interests in a legal entity that receives payments. Payments to individuals shall be combined with the individual's pro rata share of payments received by an entity in which the individual has a direct or indirect ownership interest. Likewise, payments made to an entity shall be attributed to those individuals with a direct or indirect ownership interest in the entity. (Section 2409 of the House bill)

The Senate amendment requires the Secretary to use direct attribution for all conservation programs. In the case of a producer organization, the limitation on payments on applicable programs shall apply to each participating producer and not to the entity. (Section 2405 and Section 2357 of the Senate amendment)

The Conference substitute moves the payment limitations into each individual program and deletes this Section.

(38) Inclusion of income from affiliated packing and handling operations as income derived from farming for application of adjusted gross income limitation on eligibility for conservation programs (Section 1001D(b)(1) of FSA)

The House bill allows income from packing and handling operations to be included as income derived from farming for purposes of payment eligibility. (Section 2501 of the House bill)

The Senate amendment has no comparable provision.

The Conference substitute adopts the Senate provision and deletes this section.

(39) Encouragement of voluntary sustainability practices guidelines

The House bill provides that the Secretary may encourage the development of voluntary sustainable practices guidelines for producers and processors of specialty crops. (Section 2502 of the House bill)

The Senate amendment has no comparable provision.

The Conference substitute adopts the Senate provision and does not include the provision.

(40) Farmland resource information (Section 1544 of Agriculture and Food Act of 1981)

The House bill provides that the Secretary shall design and implement educational programs emphasizing the importance of farming. One or more farmland information centers shall be designated to provide technical assistance and serve as central depositories for information on farmland issues. The centers shall be funded using no more than 0.05 percent of FPP funds per year but no less than $400,000 annually and must be matched with non-federal funds or in-kind contributions. (Section 2503 of the House bill)

The Senate amendment has no comparable provision.

The Conference substitute adopts the Senate provision and does not include the provision.

(41) Pilot program for four-year crop rotation for peanuts

The House bill directs the Secretary to enter into contracts with peanut producers to implement a four-year crop rotation for peanuts. Funding for this pilot shall not exceed $10,000,000 of mandatory funds for each of fiscal years 2008 through 2012. (Section 2504 of the House bill)

The Senate amendment provides that within CSP the Secretary shall provide additional payments to producers who agree to adopt resource-conserving crop rotations to achieve optimal crop rotations. (Section 2341 of the Senate amendment)

The Conference substitute adopts the Senate provision with an amendment.

(42) Agriculture Conservation Experienced Services Program (Section 307(a) of the Department of Agriculture Reorganization Act of 1994)

The Senate amendment authorizes the Secretary to enter into agreements with organizations to hire individuals 55 and older to provide assistance in administering conservation related programs. Funding for the program is authorized from EQIP, the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590a et seq), and the Older Americans Act (42 U.S.C. 3056). The provision stipulates that agreements may not displace individuals employed by the Department. It allows the Secretary to provide tools, including agency vehicles, necessary to carry out

the program. (Section 2602 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision with an amendment that limits individuals employed under this authority to providing only technical assistance. The Managers intend that the program be used solely for technical assistance and not for administrative tasks. (Section 2710 of Conference substitute)

(43) Technical assistance (16 U.S.C 590(a) of Soil Conservation and Domestic Allotment Act and 16 U.S.C. 2001 of Soil and Water Resources Conservation Act)

In the Soil Conservation and Domestic Allotment Act, the Senate amendment clarifies that it is the policy of the United States to preserve soil, water, and related resources and to promote soil and water quality. It defines technical assistance to mean technical expertise, information and tools necessary for the conservation of natural resources on land active in agricultural, forestry or related uses.

In the Soil and Water Resources Conservation Act of 1977, the Senate amendment expands on existing appraisal requirements to include data on conservation plans, conservation practices planned or implemented, environmental outcomes, economic costs, and related matters. The national conservation program's evaluation of existing conservation programs is amended to emphasize monitoring of specific program components in order to encourage further development and adoption of practices and performance-based standards.

The House bill has no comparable provision.

The Conference substitute adopts the Senate amendment to the Soil Conservation and Domestic Allotment Act. The Managers intend to clarify that it is the role of USDA to provide technical assistance to farmers, ranchers, and other eligible entities to assist in the conservation of soil, water, and related resources. The Managers recognize that the natural resource concerns that producers face are dynamic and preclude an inclusive list as responsibilities for USDA.

The Conference substitute adopts the Senate amendment to Soil and Water Resources Conservation Act with an amendment. The Act is extended to 2018. The Managers expect the delivery of appraisals and programs to be tied more closely to the Farm bill cycle, with the intent that these evaluations will inform development of future farm policy. (Section 2802 of Conference substitute)

(44) National Natural Resources Conservation Foundation (Section 351 of Federal Agriculture Improvement and Reform Act of 1996)

The Senate amendment updates existing foundation language and expands granting authority of the foundation to include making grants to individuals, entering into agreements with the Federal government, and making gifts to the foundation tax exempt. (Section 2606 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute adopts the House provision and does not include the provision.

(45) Desert terminal lakes (Sec 2507 of the Farm Security and Rural Investment Act of 2002)

The Senate amendment extends and reauthorizes through 2012. It allows funds to be used to lease or to purchase land, water appurtenant to the land, and related interests in the Walker River Basin from willing sellers.

The section provides $200,000,000 in mandatory funds for fiscal years 2008 through fiscal year 2012. (Section 2607 in the Senate amendment)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision with an amendment to provide $175,000,000 in mandatory funding. (Section 2807 of Conference substitute)

(46) High Plains water study

The Senate amendment requires that program benefits under the 2007 Farm bill will not be denied to eligible individuals solely on the basis of participation in a one-time study of aquifer recharge potential in the high plains of Texas. (Section 2609 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision. The Managers recognize that the ongoing depletion of the Ogallala Aquifer is an acute concern for the eight States that depend on it for agricultural, domestic, industrial uses, and other uses. This provision will allow agricultural producers to participate in a one-time study of aquifer recharge potential that will help inform State and local water conservation investment and policy to aid in managing this critical aquifer. The study is narrowly focused on a small number of playa lakes situated on agricultural land over the Ogallala Aquifer.

Playas are temporary wetlands unique to the High Plains of North America, numbering more than 60,000. Playas not only serve as the primary source of recharge for the Ogallala Aquifer, they are the most important wetland type for wildlife in this region. The Managers encourages the Department to further recognize the importance of playas through increased communication to landowners of the benefits of playas and conservation programs available. The Managers encourage the Department to work with the Playa Lakes Joint Venture to enhance the use of such programs like CRP to help ensure the protection of playas. (Section 2901 of Conference substitute)

(47) Payment of expenses (Section 17(d) of the Federal Insecticide, Fungicide, and Rodenticide Act)

The Senate amendment amends the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.) to require that the Department of State shall cover expenses incurred by Environmental Protection Agency staff participating on an international technical, economic, or policy review board, committee, or other official body with respect to a related international treaty. (Section 2610 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision. (Section 14209 of Conference substitute)

(48) Use of funds for salinity control activities upstream of Imperial Dam (Sec. 202(a) of the Colorado River Basin Salinity Control Act)

The Senate amendment amends Section 202(a) of the Colorado River Basin Salinity Control Act (43 U.S.C. 1592(a)) to create a Basin States Program to allow the Bureau of Reclamation, to carry out salinity control activities in the Colorado River basin. The provision requires the Secretary of Interior to consult with the Colorado River Basin Salinity Control Advisory Council when providing assistance in the form of grants, grant commitments, or the advancement of funds to Federal or non-Federal entities. It requires a planning report to Congress that describes the proposed implementation of the program and stipulates that no funds may be expended to implement the program until 30 days after the report is submitted to Congress. (Section 2611 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision. The Mangers intend for this provision to be fiscally neutral both as to appropriations and as to draws on the basin funds. does not change the cost share ratios already established in Section 205(a) of the Act, nor does it change the percentage split between the two funds or the requirement that no more than 15 percent of the basin States cost share is to come from the Upper Colorado River Basin Fund. It is only intended to clarify the authority through which Reclamation expends the required cost share dollars. (Section 2806 of Conference substitute)

(49) Technical corrections to the Federal Insecticide Fungicide, and Rodenticide Act (Section 33 of FIFRA)

The Senate amendment makes technical corrections to the pesticide registration service fee program in the Federal Insecticide, Fungicide, and Rodenticide Act. (Section 2612 of the Senate amendment)

The House bill has no comparable provision.

The Conference substitute adopts the House provision and does not include the provision. However, the Conference substitute includes a container recycling provision. (Section 14109 of Conference substitute)

The Managers have received concerns from numerous agricultural interests concerning pest resistance to first generation anticoagulant rodenticide products and the importance of low-cost, widely available effective rodenticides. The Managers encourage the Administrator of the Environmental Protection Agency to continue to classify second-generation rodenticides as general use products so as to minimize the potential consequences of reclassifying these materials as restricted use on target species resistance to first-generation rodenticides, potential non-target species poisoning, and cost and availability of rodenticides to the general public.

TITLE III—TRADE

(1) Agricultural Trade Development and Assistance Act of 1954

(a) Short title (Section 1 of the Agricultural Trade Development and Assistance Act of 1954)

The Senate amendment changes the title of the underlying legislation to the Food for Peace Act. It also includes numerous conforming amendments. (Section 3001)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision on changing the title of the underlying legislation to the Food for Peace Act (Section 3001).

(b) United States policy (Section 2 of the Food for Peace Act)

The Senate amendment deletes a paragraph describing market development as one of the objectives of the programs under this Act. This modification is made to reflect the approach taken in operating the program in recent years. (Section 3002)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision that deletes a paragraph in Section 2 describing market development as one of the objectives of the programs under this Act (Section 3002).

(c) Food aid to developing countries (Section 3(b) of the Food for Peace Act)

The Senate amendment modifies the Sense of Congress in current law to (1) require the

President to seek commitments from other donors; reinforces the need to keep recipient governments, non-governmental organizations, and private voluntary organizations involved in conducting needs assessment and implementing programs and ensure that a variety of options are available to provide needs-based emergency and non-emergency aid and (2) that the United States should increase food aid contributions consistent with the Uruguay Round Agreement on Agriculture. (Section 3003)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision with a minor modification. (Section 3003).

(d) Trade and development assistance (Title I of the Food for Peace Act)

The Senate amendment renames Title I of the newly renamed Food for Peace Act from Development and Trade Assistance to Economic Assistance and Food Security. (Section 3004).

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision that renames Title I of the newly renamed Food for Peace Act from Development and Trade Assistance to Economic Assistance and Food Security (Section 3004).

(e) Agreements regarding eligible countries and private entities (Section 102 of the Food for Peace Act).

The Senate amendment strikes references to potential recipient countries becoming commercial markets and strikes a requirement that organizations seeking funding under the Act prepare and submit agricultural market development plans. (Section 3005).

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision that strikes references to potential recipient countries becoming commercial markets and strikes a requirement that organizations seeking funding under the Act prepare and submit agricultural market development plans (Section 3005).

(f) Use of local currency payments (Section 104 of the Food for Peace Act).

The Senate amendment adds the objective of improving trade capacity of the recipient country to the set of goals to be achieved under agricultural development. It removes authority for specific agricultural development activities such as business development loans, facilities loans, and private sector agricultural development. It also specifies that private voluntary organizations and cooperatives may implement agreements under this title. (Section 3006)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision on modifying language governing the use of local currencies, with the following changes: rather than striking paragraphs (3), (4), (5), and (6), the substitute modifies paragraphs (3), (4), and (5) to update obsolete references and leaves paragraph (6) intact (Section 3006).

(g) General authority (Section 201 of the Food for Peace Act)

The House bill amends the purposes of the Title II program to clarify that food deficits to be addressed include those resulting from man made and natural disasters. (Section 3001(a)).

The Senate amendment clarifies the objectives for assistance under Title II commodity donations. It adds the promotion of food security and support of sound environmental practices in paragraph (5); removes feeding programs as an objective in paragraph (6); and adds a new paragraph specifying the protection of livelihoods, provision of safety nets for food insecure populations and to encourage participation in educational, training, and other productive activities. (Section 3007)

The Conference substitute adopts both the House and Senate provisions, with a modification to paragraph (6) of the Senate provision to keep Section 201(6) intact and add a new paragraph (7) to reflect the need to promote economic and nutritional security for food insecure populations. (Section 3007).

The Managers recognize that humanitarian emergencies frequently occur due to a combination of factors, typically encompassing natural disasters, resource mismanagement and poor government policymaking. In most cases, the United States government ought to respond to such catastrophes with emergency assistance. However, if a disaster results mostly from poorly devised or discriminatory governmental policies in the recipient country, the Managers requests that the Administrator brief the relevant Congressional Committees before responding with assistance.

(h) Provision of agricultural commodities (Section 202 of the Food for Peace Act)

The House bill increases the percentage of Title II funding (currently at a range of 5 to 10 percent) that the Administrator may make available to eligible organizations for administrative and distribution costs to a range of 7 to 12 percent.

The House provision also expands the purposes for which such funds may be used to include developing monitoring systems for Title II programs. (Section 3001(b))

The Senate amendment revises current language to clarify that the fact that a project is being proposed in a country that does not have a U.S. Agency for International Development mission or is not part of an overall development plan for the country cannot be used as the sole rationale for denying the proposal.

It modifies the share of Title II funds which can be used to cover logistical expenses incurred by the eligible organizations that carry out Title II programs from between 5 and 10 percent to not less than 7.5 percent.

It clarifies that such funds can be used to cover management, personnel, programmatic, operational activities, internal transportation, and distribution costs for new and existing programs. These funds can also be used to cover the costs of needs assessment and monitoring and evaluation. (Section 3008).

It also strikes language on streamlining program management included in the 2002 farm bill. It also inserts new language which permits the Administrator to use Title II funds to address food aid quality issues, and requires that regular reports on progress on these quality issues be made to the relevant Congressional Committees.

The Conference substitute adopts Senate language on paragraph (1) and paragraph (3) with modifications, providing $4.5 million for fiscal years 2009 through 2011 to be used to study and improve food aid quality for fiscal 2009–2011 from funds made available under Section 3012. It adopts House language on paragraph (2) with the modifications that the range of Title II funding available for administrative and distributional expenses is increased to between 7.5 percent and 13 percent. (Section 3008).

The Managers urge the Administrator to explore the practicality of allowing Title II recipients to enrich or fortify Title II commodities overseas and produce high-value and processed products to support local manufacturing of food products in recipient countries. Such local products could include ready-to-use therapeutic and therapeutic and supplemental products and other fortified and processed foods that can be used successfully to treat severe and moderate malnutrition among children and provide nutritional support for people living with HIV/AIDS and other vulnerable groups.

(i) Generation and use of currencies by private voluntary organizations and cooperatives (Section 203 of the Food for Peace Act)

The House bill makes a technical correction. (Section 3001(c))

The Senate amendment adds activities involving micro-enterprises and village banking as a valid use of proceeds generated by monetization of commodities donated under Title II. (Section 3009)

The Conference substitute adopts the House provision (Section 3009).

The Managers recognize that microfinance and village banking, which relies on low dollar loans and collective responsibility, has flourished throughout the developing world for more than 30 years.

The Managers believe that similar activities such as micro-enterprise lending, village banking, and microfinance can be a valuable complement to development assistance projects under Title II of the Food for Peace Act, and encourages the Administrator to view micro-enterprise microfinance, and village banking projects as valid uses of local currency generated by monetization under this Act.

(j) Levels of assistance (Section 204 of the Food for Peace Act)

The House bill extends requirements on overall minimum tonnage and minimum tonnage for non-emergency assistance provided under Title II through 2012. (Section 3001(d))

The Senate amendment extends only the overall minimum tonnage requirement for Title II programs through 2012. (Section 3010).

The Conference substitute adopts the House provision (Section 3010).

(k) The Food Aid Consultative Group (Section 205 of the Food for Peace Act)

The House bill extends the authority for the Food Aid Consultative Group (FACG). (Section 3001(e))

The Senate amendment requires that a representative of the maritime transportation sector be included in the Group.

It also requires the Administrator to consult with the FACG in developing regulations for the pilot local cash purchase program established in Section 3014, and extends the authority for the FACG through 2012. (Section 3011)

The Conference substitute adopts the House provision, and paragraph (1) of the Senate provision. (Section 3011).

(l) Administration (Section 207 of the Food for Peace Act)

The House bill deletes a requirement that if the U.S. Agency for International Development denies a proposal for a Title II project, it must specify conditions that must be met for the approval of such proposal.

It also adds a new provision that requires the U.S. Agency for International Development to establish and report on systems to improve and evaluate Title II assistance, including early warning systems to prevent famines. (Section 3001(f) and (g)) The Senate amendment provides more flexibility to the Administrator in terms of the time available to evaluate and determine whether to accept a proposal for assistance under Title II, and clarifies the intent of the law with respect to notifying an applicant why their proposal was rejected.

It deletes a requirement for handbooks which are no longer used within the Title II program. Information previously contained in such handbooks is now available through other outlets, such as the U.S. Agency for International Development website.

It deletes a specific deadline for submitting commodity orders, which on occasion can have the effect of slowing down the process, and substitutes a requirement that orders should be provided on a timely basis and it pushes back the date from December 1 to June 1 for a report on the programs, countries, and commodities approved to date within a fiscal year under Title II.

It adds language that allows the Administrator to use Title II funds to pay for assessment, data collection and management, and monitoring activities, and to hire contract workers to undertake such work in recipient or neighboring countries, without limiting existing authority to hire contractors to help address emergency food needs.

The Senate amendment also adds language allowing the Administrator to pay the World Food Program of the United Nations for indirect support costs of the commodities donated under Title II, requiring that the Administrator report to relevant Congressional committees on such payments. It also clarifies the authority of the Administrator to pay indirect costs associated with funds received or generated for programs to PVO's and cooperatives. It also requires that project reports should be submitted in such a form as can be readily displayed for public use on the U.S. Agency for International Development website. (Section 3012)

The Conference substitute adopts House language to require specific oversight, monitoring, and assessment activities and provides up to $22 million annually of Title II funds for monitoring and assessment activities for non-emergency programs. It provides that no more than $8 million of these funds may be used for the Famine Early Warning Systems Network, but only if at least $8 million is provided for this system from accounts funded pursuant to the Foreign Assistance Act of 1961. It also provides up to $2.5 million of the $22 million to upgrade the information technology systems associated with the food aid program in fiscal year 2009, to enhance the monitoring of these programs.

The Conference substitute also adopts Senate language on paragraphs (2) and (3), and provides contracting authority for personal service in order to undertake monitoring and assessments for non-emergency programs, as part of paragraph (5). It does not provide for additional authority to pay indirect support costs to the World Food Program or to private voluntary organizations. (Section 3012).

The Managers recognize the use of handbooks in Title II is no longer an efficient method of providing information to foster development of programs under this title by eligible organizations. Realizing the need for clear communication of guidelines and regulations to eligible organizations, the Managers expect the Administrator to ensure the accessibility and clarity of information previously dispensed in the handbooks such as in an electronic form readily available to the public, in addition to other means as determined appropriate by the Administrator.

The Managers believe that the provision of commodities overseas must be carried out in a timely manner and in a manner that is consistent with planned delivery schedules.

The Managers are aware that the U.S. Agency for International Development has received significant cuts in operating expenses in the President's budget and in Congressional appropriations over the last several years to carry out their operating expense which increasingly affects the Agency's ability to monitor its programs. Although the Managers appreciate these constraints, it expects the Administrator to make every effort to improve the monitoring and evaluation of U.S. food assistance programs. Therefore, the Managers provide the Administrator with the authority to contract for personal services from persons not employed by the U.S. Government to carry out monitoring and oversight activities. The Managers have been concerned that, in the past, the U.S. Agency for International Development has not had the authority or the resources for monitors for non-emergency food aid programs. The April 2007 Government Accountability Office report on U.S. food assistance programs found that monitoring of food assistance programs in-country by the U.S. Agency for International Development has been insufficient due to various factors, including limited staff, competing priorities, and legal restrictions on the use of food assistance resources. The Managers are concerned about the significant gaps in monitoring and evaluation of U.S. international food assistance programs and expects the Administrator to address this problem immediately by establishing a system to monitor food assistance programs. The language in this new subsection will allow the Administrator to address this criticism by employing non-emergency food aid monitors.

The Managers expect the Administrator to continue to use existing authority to pay those expenses required and agreed upon to the World Food Program.

(m) Assistance for stockpiling and rapid transportation, delivery, and distribution of shelf-stable, prepackaged foods (Section 208 of the Food for Peace Act)

The House bill extends the authorization and increases annual funding for such grants from $3 million to $7 million. (Section 3001(h))

The Senate amendment reauthorizes this program and also increases the level that can be appropriated to assist in the development of shelf-stable, prepackaged foods for use in food aid programs from $3 million to $8 million. (Section 3013)

The Conference substitute adopts the Senate provision (Section 3013)

The Managers recognize the value added to U.S. food aid programs through cost sharing by implementing partners and recognize that preference is given to organizations that are able to provide such additional program funds. The Managers are supportive of the Administrator evaluating the inclusion of in-kind contributions when administering guidelines for cost sharing by non-profit organizations.

(n) General authorities and requirements (Section 401 of the Food for Peace Act)

The Senate amendment strikes the requirement that the Secretary make a determination about domestic supply of the commodity before releasing commodities for the food aid program. (Section 3015)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision (Section 3014).

(o) Definitions (Section 402 of the Food for Peace Act)

The Conference substitute consolidates several references to the appropriate committees of Congress with respect to reporting activities under the Food for Peace Act. (Section 3015).

(p) Use of Commodity Credit Corporation (Section 406 of the Food for Peace Act).

The Senate amendment clarifies that costs incurred to improve food aid quality to the list of activities and functions can be covered by the Commodity Credit Corporation through advance appropriations acts. (Section 3016)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision (Section 3016).

(q) Administrative provisions (Section 407 of the Food for Peace Act)

The House bill extends the authorization for prepositioning of commodities and increases the limit on funding available for prepositioning such commodities overseas from $2 million to $8 million. The bill also authorizes assessment and possible establishment of additional prepositioning sites. (Section 3001(i))

The Senate amendment reauthorizes prepositioning of U.S. commodities abroad and increases the limit on funding available for prepositioning in foreign countries from $2 million to $4 million. It also requires that resource requests for multi-year or ongoing non-emergency assistance agreements be approved by October 1 of the fiscal year when the commodities will be delivered.

It also pushes the completion date for an annual report concerning the programs and activities of this Act from January 15 to April 1, and requires the Administrator to make the report available to the public by electronic and other means. (Section 3017)

The Conference substitute adopts the Senate provision, but increases funding for prepositioning to $10 million, and adds the House language on studying the need for additional prepositioning sites (Sections 3017 and 3018(a)).

(r) Consolidation and modification of annual reports regarding agricultural trade issues (Section 407 of the Food for Peace Act)

The House bill amends requirements of the report the President must prepare on food aid programs that are carried out under the Act. (Section 3001(j))

The Senate amendment has no comparable provision.

The Conference substitute consolidates a number of reporting requirements and date changes for reports from both Senate and House bills (Section 3018).

(s) Expiration of assistance (Section 408 of the Food for Peace Act)

The House bill reauthorizes agreements under the Act through 2/31/12. (Section 3001(k))

The Senate amendment reauthorizes agreements under the Act through December 31, 2012. (Section 3018)

The Conference substitute adopts the House provision (Section 3019).

(t) Authorization of appropriations (Section 412 of the Food for Peace Act).

The House bill extends the Act through 2012, and sets authorization levels for Title II to $2.5 billion. (Section 3001(l))

The Senate amendment reauthorizes appropriations for the Act through 2012. It also strikes subsection (b) and removes the President's authority to transfer funds between the programs under this Act. (Section 3019)

The Conference substitute adopts the House provision, modifying it with technical changes. (Section 3020).

(u) Micronutrient Fortification Programs (Section 415 of the Food for Peace Act)

The House bill extends authorization for the program through 2012 and amends the purposes. (Section 3001(m))

The Senate amendment reauthorizes the Micronutrient Fortification Program from the Farm Security and Rural Investment Act of 2002 and adds new authority to assess and apply technologies and systems to improve food aid. It also strikes subsection (b),

which limits the number of countries in which this program can be implemented. (Section 3020)

The Conference substitute adopts the Senate provision (Section 3023).

(v) John Ogonowski and Doug Bereuter Farmer-to-Farmer Program (Section 501 of the Food for Peace Act)

The House bill provides a floor level of funding for the Farmer-to-Farmer program of $10 million and extends the program through 2012. The House bill also increases authorization of appropriations for specific regions from $10 million to $15 million. (Section 3001(n))

The Senate bill reauthorizes the Farmer-to-Farmer program. (Section 3022)

The Conference substitute adopts the House provision (Section 3024).

The Managers recognize that organizations such as the Foods Resource Bank provide vital financial and technical assistance to agricultural production in developing countries in areas of financing, market access and knowledge, and development assistance. This assistance is generated through sale of crops grown in a cooperative effort between members of urban and rural churches and other organizations. These growing projects are an outstanding example of harnessing the grass-roots energy and generosity of Americans. Through use of these proceeds, these members of churches and organizations help to increase the technical knowledge and available capital, for farmers and others in targeted developing countries. These efforts enhance food security and increase productivity in these countries.

The Managers understand that in the recent years, the Foods Resource Bank has received matching funds through the Global Development Alliance established by the U.S. Agency for International Development. The Managers encourage the Administrator to continue this funding and consider entering into longer term agreements with these organizations to provide for more certainty in project planning.

The Managers believe that providing funds to match such contributions leverage the government's investment and provide an incentive to expand the effort of growing projects working in the United States to raise money. Such an action would also increase public awareness of the plight of farmers in developing countries.

(2) Export Credit Guarantee Program (Sections 203 and 211 of the Agricultural Trade Act of 1978)

The House bill reduces the tenor of the GSM–102 Export Credit Guarantee Program to six months beginning in fiscal year 2008. (Section 3002)

The House bill and the Senate amendment both repeal authority for the Supplier Credit program, which provides guarantees to buyers of U.S. commodities in foreign countries for a period of not more than 180 days.

Both bills repeal authority for the GSM–103 Intermediate Credit Guarantee Program which provides guarantees for loans to purchase U.S. agricultural commodities with duration of between three years and ten years, and repeal the one percent cap on loan origination fees for the GSM–102 export credit guarantee program.

The Senate amendment reduces the tenor of the GSM–102 export credit guarantee program to no more than six months beginning in fiscal year 2012. The Senate amendment also clarifies how the U.S. Department of Agriculture should conduct evaluations of the creditworthiness of countries participating in export credit guarantee programs, and reduces the minimum amount that can be allocated to the export credit programs from its current $5.5 billion to $5 billion. (Section 3101)

The Conference substitute adopts the Senate provision, with the following modification: in lieu of the reduction in tenor for the GSM–102 program beginning in fiscal year 2012, the conference amendment includes a cap on the credit subsidy for the program of $40 million annually (Section 3101).

The Managers eliminated proposals to limit the tenor of export credit guarantees to periods shorter than 3 years in length. In order to garner budget savings while preserving the 3 year tenor and effectiveness of the program to support U.S. agricultural exports, subsection (b) limits the available budget authority for the cost of the program, as determined on a net present value basis under the Federal Credit Reform Act of 1990.

Specifically, the Commodity Credit Corporation must make available each year GSM–102 guarantees in an amount not less than $5.5 billion, or the amount of guarantees that can be supported by $40 million in budget authority (plus any budget authority carried over from prior years)—whichever amount is less. It is expected that the U.S. Department of Agriculture can make available approximately $4 billion annually in export credit guarantees on $40 million in budget authority.

The Managers remain concerned that the U.S. Department of Agriculture has consistently failed to meet its statutory obligation to make available at least $5.5 billion in export credit guarantees, to the detriment of U.S. agricultural exports and the ability of food importing countries to meet their food, feed, and fiber needs.

The Managers expect the U.S. Department of Agriculture to use this authority to design and operate the export credit guarantee program to maximize the export sales of agricultural commodities and to assist food importing countries' efforts to meet their food, feed, and fiber needs, by making available and utilizing guarantees equal to at least the statutory minimum, and more as necessary to meet program demand.

Finally, the Managers believe that the changes in this section satisfy U.S. commitments to comply with the Brazil cotton case with regard to the export credit programs.

(3) Market Access Program (Sections 203 and 211 of the Agricultural Trade Act of 1978)

The House bill extends the program and makes organic commodities eligible for the program. It increases funding by $25 million annually. (Section 3003)

The Senate amendment makes organic commodities eligible for the program. It also increases funding for the program from its current level of $200 million for fiscal year 2007, raising it by $10 million annually until fiscal year 2011, when it returns to baseline levels. (Section 3102)

The Conference substitute adopts the Senate provision, without the increase in funding above baseline levels (Section 3102).

(4) Food for Progress Act of 1985

The House bill extends the Food for Progress Act (7 U.S.C. 1736o) through 2012. (Section 3004)

The Senate amendment reauthorizes the program through 2012, and makes recipient governments, intergovernmental organizations, and private entities ineligible for the program. It also increases the amount that can be spent transporting commodities under Food for Progress from $40 million to $48 million for fiscal years 2008 through 2010. This figure is the effective cap on this program. (Section 3106)

The Conference substitute adopts the House provision and adds a provision requiring the Secretary to establish a project in Malawi under this program (Section 3105).

(5) McGovern-Dole International Food for Education and Child Nutrition Program

The House bill extends the program through 2012, requires the Secretary of Agriculture to carry out the program, and provides mandatory funds of: $0 for fiscal year 2008; $140,000,000 for fiscal year 2009; $170,000,000 for fiscal year 2010; $230,000,000 for fiscal year 2011; $300,000,000 for fiscal year 2012; and $0 for fiscal year 2013. (Section 3005)

The Senate amendment establishes the U.S. Department of Agriculture as the permanent home for this program and reauthorizes the program through fiscal year 2012. Up to $300 million may be appropriated annually to fund this program. (Section 3107)

The Conference substitute adopts the Senate provision, except it provides $84 million in mandatory money for this program for fiscal year 2009, to be available until expended (Section 3106).

(6) Bill Emerson Humanitarian Trust

The House bill extends the Bill Emerson Humanitarian Trust through 2012. (Section 3006)

The Senate amendment specifies that the Trust can be held as a combination of commodities and cash, not to exceed the equivalent of 4 million metric tons and allows the commodities to be exchanged for funds available under Title II or the McGovern-Dole program. The Secretary may sell commodities in the Trust onto the market if such sales will not disrupt the domestic market. It permits the Secretary to manage the funds held under the Trust to maximize its value.

The Senate amendment further clarifies the rules under which commodities or funds can be released from the Trust, and defines the term ''emergency'' for the purpose of release. It also clarifies the rules by which the Trust is managed by the Secretary, including specifying that price risks must be managed and allowing the funds held in the Trust to be invested in low-risk short-term securities or instruments. Instructs the Secretary to maximize the value of the Trust and instructs the Secretary to transfer saved storage costs back to the Trust from the CCC. The Senate amendment replaces the word ''replenish'' with the word ''reimburse'' throughout the language, reinforcing the notion that resources can be held through cash as well as commodities under this program. The program is reauthorized through fiscal year 2012. (Section 3201)

The Conference substitute adopts the Senate provision, with the following modifications: it removes the 4 million ton cap entirely, and no longer allows the Secretary to engage in futures market transactions with funds in the Trust. It also does not allow the exchange of funds available under Title II or the McGovern-Dole International Food for Education and Child Nutrition program, nor require transfer of foregone storage charges into the Trust (Section 3201).

The Managers expect the Trust to be used in a manner that recognizes its unique availability as a resource for food emergencies worldwide. The sale of commodities in the Trust should be undertaken in such a way as to prevent market disruptions and dramatic price fluctuations in the domestic market.

(7) Technical assistance for specialty crops

The House bill extends the Technical Assistance for Specialty Crops through fiscal year 2012 and increases funding from $2 million annually to $4 million in 2008, ramping up to $10 million for fiscal years 2011 and 2012. (Section 3007)

The Senate amendment extends Technical Assistance for Specialty Crops through fiscal year 2012 and increases funding by $19 million over the baseline. (Section 1833)

The Conference substitute adopts the House provision with annual funding ramped up to $9 million in fiscal years 2011 and 2012, and adds a report (Section 3203).

(8) Representation by the United States at international standard-setting bodies

The House bill authorizes the Secretary to enhance U.S. Department of Agriculture staff support for international standard-setting bodies, such as the Codex Alimentarius, the International Plant Protection Convention, and the World Animal Health Organization. (Section 3009)

The Senate amendment has no comparable provision.

The Conference substitute strikes this provision.

(9) Foreign Market Development Cooperator Program (Section 702 of the Agricultural Trade Act of 1978)

The House bill extends the program through fiscal year 2012. (Section 3010)

The Senate amendment increases funding for the Foreign Market Development Program from its current level of $34.5 million annually for fiscal year 2007 by $5 million for fiscal years 2008 and 2009, by $10 million in fiscal year 2010, and returns to baseline levels in fiscal year 2011. (Section 3105)

The Conference substitute adopts the House provision (Section 3104).

(10) Emerging Markets and Facilities Loan Guarantee Program

The House bill extends the program through fiscal year 2012. (Section 3011)

The Senate amendment reauthorizes the Emerging Markets and Facilities Guarantee Loan Program through fiscal year 2012.

It permits the Secretary to waive requirements that U.S. goods be used in the construction of a facility under this program, if such goods are not available or their use is not practicable. It also permits the Secretary to provide a guarantee for this program for the term of the depreciation schedule for the facility, not to exceed 20 years. (Section 3202)

The Conference substitute adopts the Senate provision (Section 3204).

(11) Export Enhancement Program (Section 301 of the Agricultural Trade Act of 1978)

The House bill extends the program through fiscal year 2012. (Section 3012)

The Senate amendment repeals authority for the program. (Section 3103)

The Conference substitute adopts the Senate provision (Section 3103).

(12) Minimum level of nonemergency food assistance

The House bill provides that of Title II funds, the U.S. Agency for International Development must use at least $450 million for non-emergency programs unless Congress provides otherwise with new legislation. (Section 3014)

The Senate amendment establishes a ''safe box'' for non-emergency, development assistance projects under Title II of $600 million annually to be obligated and expended each fiscal year. (Section 3019)

The Conference substitute adopts the House provision, modified to reflect a phasing in of the safe box level beginning at $375 million in fiscal year 2009 and ending at $450 million in fiscal year 2012. It also provides an exception to the safe box designation, allowed to be exercised only if the President determines that an extraordinary food emergency exists and that resources available from the Bill Emerson Humanitarian Trust have been exhausted, and if the President has submitted a request for additional appropriations to Congress equal to the reduction in safe box and Emerson Trust levels (Section 3022).

(13) Global Crop Diversity Trust

The House bill requires the U.S. Agency for International Development to make a contribution on behalf of the United States to the Global Crop Diversity Trust of up to $60 million over 5 years. United States contributions be may not exceed one fourth of the total of funds contributed to the Trust from all sources. (Section 3014)

The Senate amendment requires the U.S. Agency for International Development to make contributions to the Global Crop Diversity Trust to assist in conservation of genetic diversity of key food crops around the world. Appropriations of $60 million are authorized for the period of the fiscal year 2008 through 2012 for this purpose, with a cap equal to 25 percent of all funds contributed to the Trust from all sources. (Section 3021)

The Conference substitute adopts the House provision, with a title change for the section (Section 3202).

(14) Report on efforts to improve procurement planning

The House bill requires that not later than 90 days after the date of the enactment the U.S. Agency for International Development and the U.S. Department of Agriculture shall submit to Congress a report on efforts taken to improve planning for food and transportation procurement, including efforts to eliminate bunching of food purchases. (Section 3015)

The Senate amendment has no comparable provision.

The Conference substitute adopts the House provision (Section 3022).

(15) International disaster

The House bill requires that for each of fiscal year 2008 through 2012, $40 million of amounts made available to carry out Section 491 of the Foreign Assistance Act of 1961 shall be made available for famine prevention. (Section 3016)

The Senate amendment authorizes a pilot program for local/regional cash purchase. Subsection (a) provides several key definitions for the section. Subsection (b) establishes authority for the pilot program. Subsection (c) establishes the purposes for which the pilot program can be used. Subsection (d) establishes criteria for local or regional procurement. Subsection (e) requires the Administrator to initiate an external review of prior local/regional cash purchase activities by other donor countries, PVO's and intergovernmental organizations within 30 days of enactment. A report detailing the results of this review is also to be provided to the relevant Congressional Committees. This information would be used to assist in developing guidelines for the request for proposals. Subsection (f) authorizes the Administrator to request and approve applications for grants from eligible organizations under this section, and requires any projects authorized under this section to be completed by Sept. 30, 2011, to allow time to complete a study of pilot results before expiration of authorized appropriations in subsection (k). Subsection (g) establishes requirements for specific projects in selecting proposals for grants. Subsection (h) lists information that would need to be included in grant applications. Subsection (i) requires the Administrator to arrange for independent evaluation of the pilot program results, and a report to the relevant Congressional Committees. It also lays out the factors that would have to be examined in the report. Subsection (j) requires the Administrator to promulgate guidelines for the operation of this pilot program. Subsection (k) authorizes appropriations of $25 million for each year between fiscal 2009 and fiscal 2011 for this program, to be available until expended. (Section 3014)

The Conference substitute adopts the Senate provision, modified to provide that the project be conducted by the Secretary with $60 million in mandatory funding between fiscal 2009 and 2012. It establishes requirements for undertaking such activities and requires the Secretary to promulgate rules or guidelines in order to award grants or cooperative agreements to conduct field-based projects using local or regional procurement. It also requires entities receiving grants or entering into agreements under this section to provide data about market parameters and methodologies used to acquire eligible commodities locally or regionally, intended to be used to evaluate the effectiveness of local or regional procurement (Section 3206).

(16) Importation of agricultural products made with child labor

The Senate amendment requires the Secretary of Agriculture, in cooperation with the Secretary of Labor, to develop standards that importers of agricultural products into the United States could choose to use to certify that those products were not produced with the use of abusive forms of child labor. (Section 3104)

The House bill has no comparable provision.

The Conference substitute adopts the Senate provision, modified to establish a consultative group of interested stakeholders charged with developing recommendations on practices that would enable companies to monitor and verify whether the food products they import are made with the use of child or forced labor. Guidelines developed from these recommendations would be released after a public comment period (Section 3205).

The Managers strongly support efforts to reduce and eliminate the use of child and forced labor. The Managers expect the Secretary of Agriculture to work with the multi-stakeholder Consultative Group to develop the recommendations for best practices for the voluntary, third-party certification initiative that will provide producers, importers, retailers and consumers with reasonable assurances as to what measures have been taken to ensure that the products are not produced with child labor. After the Consultative Group has issued its recommendations, the Managers expect the Secretary to develop guidelines for such best practices and release the guidelines for public comment. The outcome expected by the Managers is a voluntary, third-party certification effort is designed to reduce the likelihood that products produced with forced labor or child labor are imported into the United States as directed in the Trafficking Victims Protection Act of 2005.
