DEPARTMENT OF DEFENSE APPROPRIATIONS BILL, 2008

JULY 30, 2007.—Committed to the Committee of the Whole House on the State of the Union and ordered to be printed

Mr. MURTHA of Pennsylvania, from the Committee on Appropriations, submitted the following

R E P O R T

[To accompany H.R. 3222]

The Committee on Appropriations submits the following report in explanation of the accompanying bill making appropriations for the Department of Defense, and for other purposes, for the fiscal year ending September 30, 2008.

BILL TOTALS

Appropriations for most military functions of the Department of Defense are provided for in the accompanying bill for the fiscal year 2008. This bill does not provide appropriations for military construction, military family housing, civil defense, and military nuclear warheads, for which requirements are considered in connection with other appropriations Acts. This bill again provides appropriations for Basic Allowance for Housing; the Defense Health Program; Facilities Sustainment, Restoration, and Modernization (FSRM); and environmental restoration programs consistent with the Committee's reorganization at the beginning of the 110th Congress.

The President's fiscal year 2008 budget request for activities funded in the Department of Defense Appropriations Act totals \$463,143,300,000 in new budget obligational authority for the base military bill. The amounts recommended by the Committee in the accompanying bill total \$459,594,495,000 in new budget authority, a decrease of \$3,548,805,000 below the budget estimate, and \$39,722,516,000 above the sums made available for the Department of Defense for fiscal year 2007, excluding emergency supplemental appropriations.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY FOR 2007
AND BUDGET REQUESTS AND AMOUNTS RECOMMENDED IN THE BILL FOR 2008

The Committee recommendation does not include supplemental emergency appropriations requested by the President for fiscal year 2008 contingency operations related to the global war on terror.

The Committee has deferred consideration of this matter to a later date. During the Committee's deliberations on the fiscal year 2008 war supplemental, the following issues will be considered:

- Funding for additional C-17 cargo aircraft
- Funding for Mine Resistant Ambush Protected vehicles
- Shortfalls in funding for the Defense Health Program created by the so-called "efficiency wedge"
- Shortfalls in Basic Allowance for Housing
- Funding for additional Blackhawk MEDEVAC helicopters
- Funding for the Department's Global Train and Equip program
- Funding for our strategic reserve's readiness and equipment reset and recapitalization

COMMITTEE BUDGET REVIEW PROCESS

During its review of the fiscal year 2008 budget request and execution of appropriations for fiscal year 2007, the Subcommittee on Defense held a total of 31 budget hearings and 4 formal subcommittee briefings during the period of January to May 2007. Testimony received by the Subcommittee totaled 3,127 pages of transcript. Hearings were held in open session, except when the security classification of the material to be discussed presented no alternative but to conduct those hearings in executive or closed session.

SELECT INTELLIGENCE OVERSIGHT PANEL

House Resolution 35 established the Select Intelligence Oversight Panel (Select Panel). The Select Panel has the goals of executing greater focus and better oversight on intelligence programs. The resolution indicates that the Panel shall review and study on a continuing basis budget requests for and execution of intelligence activities. In the course of conducting its review, the Panel has held six hearings to date totaling over 400 pages of testimony on the major components of the National and Military Intelligence programs. In addition, the Panel heard worldwide threat briefings presented by the Director of National Intelligence and the Director of the Central Intelligence Agency, and has received periodic intelligence updates on regional topics.

The Panel's responsibilities include preparing a report to the Defense Subcommittee on Appropriations on an annual basis containing budgetary and oversight observations and recommendations for use in preparation of the classified annex accompanying the Defense Appropriations bill. This report was transmitted with classified attachments to the Defense Appropriations Subcommittee on July 11, 2007. The recommendations contained therein were used by the Defense Subcommittee in developing the classified annex accompanying this bill.

INTRODUCTION

Our national conscience is justifiably focused on the wars in Iraq and Afghanistan. The Committee and the country are deeply grate-

ful for and inspired by the dedication, service, and sacrifice of our men and women in uniform, their families, and those who support them. Yet, we cannot let this concentrated national focus distract our attention from the needs of our service members and their families here at home, and the imperative to prepare our forces for current and future conflicts. This is the challenge facing the Committee today, and our Nation for the foreseeable future.

To address that challenge, the Committee's recommendations achieve a balance between preparing units for near-term deployments, supporting our military members and their families, and modernizing our forces to meet future threats. Highlights of the Committee's recommendations are as follows:

Supporting our Troops and their Families.—First and foremost, the Committee recommends robust funding for programs important to the health, well-being, and readiness of our forces. In addition, the Committee proposes several initiatives that address issues raised by troops, their families, and Department of Defense officials in testimony before the Committee, and discovered through visits to military bases in the United States and overseas.

- Funding of about \$2,200,000,000 is recommended to cover the full cost of a 3.5% military pay raise, as approved in the House version of the Fiscal Year 2008 National Defense Authorization bill.

- Under their "Grow-the-Force" initiatives, the Army and Marine Corps propose to add 7,000 and 5,000 new troops, respectively. The personnel costs of these increases are fully covered in the bill, as are the associated equipping and outfitting costs. For the Army alone, the equipping costs amount to more than \$4,000,000,000 and for the Marine Corps, the equipping costs amount to more than \$2,000,000,000.

- Home-stationing training, optempo, and flying-hour costs are funded at robust levels. All told, the Committee's recommendations provide for a 13% increase in funding for these activities over last year's level.

- The military services' force structure and basing infrastructure are in a state of transition. The Army, in particular, has been forced to manage significant changes in force structure (known as Army Modularity), base closures, and a global repositioning of forces, all while meeting the demands of war. Based on information provided by the Army, the Committee recommends an important new initiative to assist the service in meeting this challenge. The Committee proposes adding \$1,232,400,000 to the Army's facilities sustainment and restoration budget request to offset the growing infrastructure costs associated with the global repositioning of its forces. These funds will be used to fix barracks, improve child care facilities, and enhance community services at Army bases throughout the United States, Europe, and Korea. This funding will only partially cover the Army's needs. As such, the Committee will address additional infrastructure cost requirements during consideration of the fiscal year 2008 emergency supplemental request. Further, the Committee intends to work with all the military services to better understand and respond to their basing and infrastructure needs during this time of significant upheaval.

- Another initiative proposed by the Committee directly responds to the needs of our military families. Total funding of

\$2,915,800,000 is recommended for the military's family advocacy programs, childcare centers, and dependent's education programs. This amount is an increase of \$558,400,000 over the Administration's request, with the lion's share of the increase allocated to DoD's family advocacy programs. This program provides counseling, education, and support to military families affected by the demands of war, and episodes of child or spouse abuse.

- The Committee's recommendations continue its long tradition of supporting the Department's health programs. The Committee proposes several initiatives and additional funding to address health care issues raised over the past year, including improving the Department's health record-keeping and fostering better coordination between DoD and the Department of Veterans Affairs, enhancing preventative medicine programs, and advancing military medical research.

- Protecting our forces abroad must be matched with a commitment to protect our forces and their families here at home. Thus, the Committee proposes a new initiative to enhance the security of military bases in the United States. Funding of \$268,100,000 is allocated for perimeter security force protection and related facility security improvements, an increase of \$141,900,000 over the President's budget request. These funds will be used to erect better perimeter fencing, provide more secure entry and exit controls, and improve situational awareness and response capabilities at military bases and hospitals.

Preparing for the Future.—In 1796, President George Washington counseled the Nation to be, "Taking care always to keep ourselves by suitable establishments on a respectable defensive posture." The Committee's recommendations abide by that counsel, providing robust funding for weapons systems purchases and research programs designed to meet future threats.

- The Committee supports full funding, as requested, for key weapons procurements, including the F-22 and F-35 tactical fighter aircraft programs.

- Increases above the President's request are allocated for development programs that address "asymmetric" threats from weapons of mass destruction and cruise missiles. Additional funding of \$15,000,000 is provided to pursue cruise missile defense; \$25,000,000 for chemical and biological defense research programs; \$26,500,000 for fissile material detection research and \$50,000,000 for the former Soviet Union Threat Reduction account to counter weapons proliferation.

- To support the Army's evolution to a larger, more lethal, and more rapidly deployable force, the Committee recommends adding funding of \$1,102,000,000 to outfit a new, eighth Stryker brigade.

- Testimony before the Committee revealed that our National Guard and Reserve forces continue to suffer from equipment shortfalls. To address this need, the Committee recommends providing an additional \$925,000,000 to purchase Guard and Reserve equipment. These additional funds will enhance these forces' ability to meet overseas deployment demands, as well as to respond to natural disasters here at home.

Economic Stability.—Fostering economic stability in DoD's weapons modernization programs has been a consistent theme of the Committee. Analyses completed in recent years about DoD's acqui-

sition program all conclude that, without improving stability in these programs, it's quite likely that the military will not be able to achieve the numbers of weapons systems required to equip current force structure at the estimated costs. As such, the Committee is proposing a series of recommendations that would help stabilize certain programs by adding funds and/or adjusting procurement or development schedules.

- The Navy's shipbuilding program has been beset by planning and resource instability for several years running, resulting in ever-increasing costs to the American taxpayer. Clearly, at current production rates and price levels, the Navy will be unable to meet its force structure requirements in the future. The Committee has responded by providing funds for an additional five ships. To purchase these ships, the Committee recommends adding a total of \$3,698,000,000 above the Navy's request for shipbuilding and sea-lift.

- The success of the Department's Joint Strike Fighter (F-35) program is critical to our Nation's ability to field a modern, capable fighter aircraft fleet for decades to come. To maintain stability in this program—and limit the potential for cost increases over time—the Committee recommends an increase of \$200,000,000 for F-35 production enhancements. These funds are to be used to outfit facilities with the latest in production line equipment and work-flow technology. In addition, the Committee recommends including \$480,000,000 to continue development of an alternative engine for this aircraft, thereby ensuring a competitive base for engine production.

Accountability.—The Committee's fiduciary responsibility to the American taxpayer requires holding accountable organizations, officials, and programs that have performed poorly. Moreover, wasted resources and procedural abuses ultimately come at the expense of our military men and women. The Committee focused attention on the following issues:

- *Fiscal discipline:* For some time, the Committee has raised concerns about the challenges facing the Department's financial managers. Some argue that fiscal discipline within the Department has eroded over time, severely constraining the Department's senior officials and the Congress' program and financial oversight. Regarding this matter, the Committee proposes several important initiatives to improve DoD's fiscal discipline and Congressional oversight. These initiatives are described later in this report.

- *Contracting Out:* The Committee also has registered concern about the Department's unabated appetite for contracting out services and functions once performed by military members or DoD civilians. Though clearly necessary to offset reductions in military and civilian personnel levels that occurred over time, the Committee believes that the Department has failed to manage adequately and oversee the growth in, and cost-effectiveness of, contracting out. It is also clear that the majority of DoD's service contractors has performed and will continue to perform well. Yet, abuses by some organizations, coupled with DoD's lack of an effective contractor management and oversight regime, has cast a pall over the service contractor community writ large. This must be reversed. The Committee recommends strong steps to do so. In an-

other section of this report, the Committee's recommendations for improving contract oversight are described.

- *Troubled procurement programs:* Several of the Department's major weapons acquisition programs have experienced considerable cost growth and/or poor execution. For each of these programs—including the Navy's Littoral Combat Ship, the Air Force's combat search and rescue helicopter, and several unclassified and classified satellite purchases—the Committee recommends significant adjustments to the Pentagon's request.

- *Basic research:* In testimony received by the Committee, and through information provided by the Department and third-party groups, the Committee learned that the percent of basic research funding allocated to Department and research organizations' overhead costs has grown to unwarranted levels. To reverse this trend and ensure that the Department's basic research dollars are being used for the purposes intended by Congress, the Committee recommends a general provision limiting the percentage of overhead costs that can be covered in basic research contracts.

Improving military readiness, addressing the toll of war on our forces, and preparing them for future conflicts require a national commitment to provide adequate resources for the Department of Defense and intelligence community now and in the future. The Committee's efforts reflect its strong commitment to our men and women in uniform, their families, and those individuals and organizations working in support of them.

STABILITY IN THE MIDDLE EAST

At this time in our Nation's history, no measure providing funding for the Department of Defense can be considered outside the context of the Iraq war. As the Committee has endeavored to strike a balance between supporting our forces' needs today and for the future, it also has been mindful that the evolution of the United States' military presence in the Middle East will have a significant effect on how our forces are to be structured, readied and resourced in the years to come.

All would agree that achieving stability in the Middle East is an enduring U.S. national security goal. Attaining that goal will require fully employing all elements of U.S. power: diplomacy, economic support and military might. While much has been written about the need for the United States to refocus its diplomatic and economic support activities in and around Iraq, there apparently has been little thought given to or explanation of what the long-term U.S. military presence in the region may be.

The reliance on the U.S. military alone to achieve "victory" in Iraq, without a coordinated diplomatic and economic aid plan, has left our forces weakened and with little strategic reserve to address other threats to our country. Moreover, the recent "surge" in deployments to Iraq has exacerbated the demands on our ground forces, with little evidence thus far that the increased troop numbers in theater have notably improved the security and stability of that country. Yet, the strains on our military are clearly evident: units across-the-board have had their tours of duty extended to 15 months while those back home struggle to meet deployment deadlines for lack of personnel and equipment; the costs of recruiting and retaining soldiers continue to spiral upward, even as standards

have been lowered to meet monthly recruiting goals; and, each appearance before Congress by senior military and DoD officials brings new and higher estimates of the costs for rehabilitating our forces once they return home.

Lessening the strains on the military forces can only be accomplished by relinquishing our overwhelming reliance on them to stabilize and secure Iraq. But doing so must occur in conjunction with an understanding of and consensus on the broader, more strategic interests of the United States in the Middle East.

FISCAL MANAGEMENT

For some time now, the Committee has expressed considerable concern over an erosion of DoD's fiscal discipline. That erosion is reflected primarily in the Department's use of emergency supplemental funding to cover what were once considered to be base budget costs, particularly weapons modernization and force structure costs. In this bill, the Committee has endeavored to begin restoring traditional funding criteria to these respective appropriations matters. Thus, recommendations for this fiscal year 2008 Defense Appropriations bill focus on non-incremental war costs and preparing for future threats by funding enduring personnel benefits, force structure initiatives (such as Army modularity and "Grow-the-Force" programs), infrastructure improvements, home-station training, and weapons modernization programs. The Committee's deliberations on the fiscal year 2008 war supplemental, however, will be tailored to funding those programs and incremental costs that are arguably related to the war efforts. Satisfying these criteria requires the shifting of funds between the base bill and supplemental requests. As such, the Committee recommends deferring consideration of certain funding requests made for the base fiscal year 2008 Defense bill to the emergency supplemental. Conversely, the Committee recommends that certain programs requested by the Administration in its fiscal year 2008 Global War on Terror emergency supplemental receive funding in this legislation as such items are more appropriately funded in the base budget.

Further, the Committee believes that seeking funding for weapons modernization programs and enduring force structure transformations in emergency supplemental requests conveniently eludes the procedural mechanisms designed to ensure that the most important priorities are resourced. There can be no doubt that the Department's financial officers have faced considerable challenges in managing both the war and base budgets. Nonetheless, a fiscal "flabbiness" has infected the Defense budgeting process—a situation that must be corrected. To ensure that sound budgetary and fiscal procedures are re-invigorated, the Committee recommends a general provision that requires the Department to include all funding for both non-war and war-related activities in the President's fiscal year 2009 annual Defense budget request.

Planning, Programming and Budgeting System (PPBS).—For over 40 years, the Department of Defense followed the Planning, Programming and Budgeting System (PPBS) as the process for assessing and prioritizing requirements and allocating resources. The PPBS process established long-range national security planning objectives, analyzed the costs and benefits of alternative programs

that would meet those objectives, and translated programs into budget proposals. The improvements that PPBS offered over previous budgeting processes were that: (1) it emphasized objectives, focusing less on changes from the prior-year budget and more on long-term objectives, and (2) it linked planning and budgeting. PPBS instilled a process that clearly defined a procedure for distributing available resources equitably among competing programs.

Beginning in 2003, the PPBS process has been significantly altered, splintering planning into two phases and requiring that the program and budget reviews occur simultaneously. The process changes were ill-conceived and have had significant and lasting adverse implications. Today, sequential steps to plan adequately or refine a plan into budget-level detail do not exist. Further, conducting a simultaneous program and budget review eliminate the inherent discipline in the process which force resource allocation decisions to occur deliberatively, resulting in unnecessary confusion and wasted effort. The time and attention required to harmonize simultaneous program and budget reviews detract from the Department's ability to scrutinize fully its fiscal requirements. As a result:

- the focus on program objectives has diminished;
- the inextricable link between planning and budgeting has been severely damaged;
- reliance on funds transfers and reprogrammings within DoD have grown significantly, often correcting inadequacies that should have been identified earlier in the Department's internal review process with the purpose being to fix holes in key programs originally created during the DoD budget review;
- supplemental requests and the Department's reliance on them have grown and increasingly resemble base budget requests; and lastly,
- Congress is forced to make increasingly difficult funding decisions in the absence of a rigorous budget review by the Department.

Accordingly, the Committee recommends that the Secretary of Defense institute a process for assessing and prioritizing requirements and allocating resources which is supportive of thorough, deliberative program and budget review and more fully utilize the efforts of the dedicated and talented DoD civil servants. The Committee's recommendation includes several directions to address the budget execution process within the Department, as discussed below.

Re-baselining.—Generally accepted reprogramming procedures and those procedures outlined in the Department of Defense Financial Management Regulation require the approval of Congress prior to transferring operation and maintenance funding in excess of \$15,000,000 from those levels appropriated by Congress. However, through a "rebaselining" process or "free move", the Department has transferred excessive amounts of funds—a total of \$2,500,000,000 in fiscal year 2007—without the approval of Congress. This re-baselining process, as it has evolved, vitiates Congressionally approved resource allocations provided in annual appropriations Acts, impedes the ability of Congress to perform its oversight responsibilities, and abrogates Congressional intent. Moreover, the Committee notes that the Department has failed to comply with certain reprogramming requirements as they relate to

specific subactivity groups within the Operation and Maintenance appropriations. These actions reflect a continuing erosion of fiscal discipline within the Department of Defense. Accordingly, the Committee directs the Department to cease the reallocation of funds through a re-baselining procedure, and further directs the Department to comply fully with the reprogramming procedures contained in this report. The Committee remains cognizant of the need for the Department to re-align certain appropriations and commits to work with the Department to address these concerns.

Base for Reprogramming Actions.—The Committee notes that the Department was not able to provide in a timely manner the Base for Reprogramming Actions report, or DD form 1414, for the current fiscal year. This report is to be provided to the House and Senate Committees on Appropriations soon after the enactment of the annual appropriations Act to establish the baseline from which the Department is to execute its programs. The report also serves as the benchmark from which Congress and the Committee can assess all transfers and reprogrammings. However, the DD 1414 was not submitted to the Committees on Appropriations until nearly nine months after the fiscal year had commenced and after the Department had submitted over \$700,000,000 in reprogramming requests requiring Congressional approval. When the report was submitted, it was incomplete, omitting each of the active services' operation and maintenance accounts. Moreover, it excluded a "re-baselining" or realignment in excess of \$2,500,000,000 in operation and maintenance funds from activities for which they were originally appropriated. The Committee believes that such funds management is unacceptable and suggests that the Department does not execute its programs consistent with Congressional direction. Accordingly, the Committee has recommended a general provision that requires the Department to submit the DD 1414 within 60 days after the enactment of the Act. In addition, the provision prohibits the Department from executing any reprogramming or transfer of funds for any purpose other than originally appropriated until the aforementioned report is submitted to the Committees of Appropriations of the Senate and the House of Representatives.

Items or subactivities for which funds have been specifically provided in an appropriations Act (including joint resolutions providing continuing appropriations), accompanying reports of the House and Senate Committees on Appropriations, or accompanying conference reports and joint explanatory statements of the committee of conference shall be carried in the Base for Reprogramming Actions (DD form 1414), irrespective of whether or not the report uses the phrases "only for" or "only to".

New starts.—The Committee recommends a general provision that prohibits the initiation of a new start program through a reprogramming of funds unless such program must be undertaken immediately in the interest of national security and only after written notification to the congressional defense committees. The use of reprogramming authorities to initiate new starts should be used seldomly, and if at all, only in times of national emergency. Starting new programs through the use of reprogramming authorities in the year of execution creates additional funding requirements in the ensuing budget year, and rarely does the Administration submit budget amendments to reallocate its funding requirements re-

flecting the new fiscal realities created by the new program starts. As such, the Committee's ability to review fully the program's cost-effectiveness and mission utility vis-à-vis other military programs is denied. The Committee notes that the fiscal year omnibus 2007 reprogramming includes new starts totaling nearly \$110,000,000. The Committee is not pleased with the Department's increasing use of its reprogramming authorities to initiate new program starts, and accordingly, directs the Department not to use reprogramming authorities provided in this Act to initiate new programs unless such programs are emergency requirements.

General transfer authority (GTA).—A provision is recommended, consistent with previous appropriations Acts, providing for the transfer of funds for higher priority items, based on unforeseen military requirements than those for which originally appropriated. This authority has been included annually to respond to unanticipated requirements that were not known at the time the budget was developed and after which time appropriations were enacted. This authority has grown significantly over the past several years, from \$2,000,000,000 in fiscal years 1997 through 2001, rising precipitously in fiscal year 2005 to \$6,185,000,000. In fiscal year 2007, the GTA was \$4,500,000,000 and the Department has requested \$5,000,000,000 in GTA for fiscal year 2008. While the waging of war certainly has increased the need for flexibility in executing the Department's resources, the Committee fears that the Department has come to rely on reprogramming and transfer authority in lieu of a thoughtful and deliberative budget formulation and fiscal management process. In an effort to restore fiscal management to the Department, while allowing for the flexibility in executing appropriations for a nation at war, the Committee recommends for fiscal year 2008 general transfer authority of \$3,200,000,000, the same level as provided in fiscal year 2004 after adjustments to reflect GTA as a percent of total appropriations.

Reprogrammings for Operation and Maintenance Accounts.—Beginning in fiscal year 2008, the Committee imposes new accountability and reprogramming guidelines for programs, projects and activities within the Operation and Maintenance appropriations. The Committee believes that such revisions are necessary given the unique nature of activities funded within these appropriations continuing concerns about force readiness, and recent budget execution within these accounts. The specific revisions are addressed later in this report in Title II, Operation and Maintenance.

CONTRACTED SERVICES AND ACQUISITION MANAGEMENT

A year ago, the Committee expressed concern about the increasing costs of operating our military forces. To gain better insight about the factors generating an increase in operation and maintenance costs, the Committee directed, in House Report 109-504, that the Government Accountability Office (GAO) prepare a comprehensive analysis of contracting out services, as well as other factors that may be driving up costs. GAO found that between the years 2000 to 2005, the cost of operation and maintenance service contracts increased more than 73 percent. Over the same period, DoD civilian pay costs increased 28 percent, and total DoD pay costs went up by 34 percent. However, despite the growing and seemingly unconstrained reliance on contractors to accomplish

DoD’s mission, no system of accountability for contract service cost or performance has been established.

The Committee is frustrated by the lack of accountability and management of contracted services. DoD has increasingly relied on private sector contractors, rather than uniformed or DoD civilian personnel, to perform operation and maintenance-related work such as logistics, facilities maintenance, base operations support; information technology services; and administrative support. But, responsibility for acquiring services within DoD is spread among individual military commands, weapon system program offices, or functional units on military bases. This decentralized management results in little visibility at either the DoD or military department level over the totality of DoD’s use of contractors to provide services. GAO recently found that DoD only had reviewed proposed acquisitions accounting for less than 3 percent of the funds obligated for services in fiscal year 2005, and DoD was in a poor position to regularly identify opportunities to leverage buying power or otherwise change existing practices.

Focused management attention.—The Committee contends that DoD is not providing sufficient management oversight to improve the acquisition and management of contractor services. Tens of billions of dollars are expended for contract services each year. Management of contract services should be among DoD’s top priorities. The Committee believes that the Department must improve management of contract services by instituting clear accountability mechanisms; instituting unambiguous and short chains of command to the most-senior decision makers; and improving the tracking and reporting of contract service costs, and management of contract service performance.

Increased contractor oversight.—The Committee directs the Department to provide more robust staffing of contractor management and oversight personnel. It is clear that DoD currently lacks the means to provide proper oversight of its service contracts, in part because of an insufficient number of contract oversight personnel. While the spending for contracted services has grown, the size of DoD’s workforce, including its contracting and acquisition workforce, has been decreased significantly. For example, the Defense Contract Management Agency’s (DCMA) workforce has been reduced by over 50 percent between the period 2000 to 2005, making it more difficult for DCMA to provide thorough and meaningful oversight of the Department’s increasing reliance on contracted services.

The Committee recommends adding funds for additional DoD civilian personnel to provide enhanced contract-service management and oversight. Further, the Committee added funds for the temporary assignment of 600 General Services Administration contract specialists on a reimbursable basis. The Committee provides the following for contract-service management and oversight.

[\$ in thousands]

	Committee recommended
Defense Contract Audit Agency	+\$12,000,000
Defense Contract Management Agency	+17,000,000
Defense Inspector General	+24,000,000

(\$ in thousands)

	Committee recommended
Reimbursable GSA Assistance	+21,000,000

Minimum Standards for Contracted Security Service Personnel.—DoD relies heavily on contracted security, both in the theaters of operation as well as at home. The Committee is particularly concerned that the oversight and administration of contracted security services is woefully inadequate. This lack of oversight seemingly has resulted in few, if any, operational standards and rules-of-engagement to which contracted security organizations and individuals must adhere. As such, the Committee directs the Secretary of Defense to develop, no later than 90 days after the passage of this Act, uniform minimum personnel standards for all contract personnel operating under contracts, subcontracts or task orders performing work that includes private security functions. The standards, at a minimum, must include determinations about contractors using personnel with criminal histories, must determine the eligibility of all private contract personnel to possess and carry firearms, and determine what assessments of medical and mental fitness of contracted security personnel must be undertaken. The Secretary of Defense should develop a mechanism for contract accountability that specifies consequences for noncompliance with the personnel standards, including fines, denial of contractual obligations or contract rescission. Finally, the Secretary is directed to establish a clear set of rules-of-engagement for all contracted security personnel operating in the Iraq and Afghanistan theaters of operations. The Secretary shall submit the prescribed standards to the congressional defense committees once the 90-day period referenced above is completed.

Improving the Acquisition Workforce.—The Committee directs that the Undersecretary of Defense for Acquisition, Technology, and Logistics submit, within 90 days of enactment of this Act, a report to the congressional defense committees analyzing the current acquisition workforce personnel needs and the tools to recruit and retain a workforce best positioned to provide appropriate contract management and oversight of contractor performance. The report should identify the most urgent shortages in the current acquisition workforce. The report should also recommend revisions to the Department's Strategic Human Capital Plan geared to enhancing the Department's ability to recruit and retain high performing acquisition and contracting personnel and overcome obstacles to the expedited hiring of talented acquisition professionals.

Enhancing Access to Small Business.—The Committee is concerned about the access of small businesses to Department of Defense contracting and procurement. Moreover, the Committee recognizes that harvesting mature innovative technologies from the Small Business Innovative Research (SBIR) programs has resulted in cost avoidance and savings in Defense Department acquisition programs. SBIRs have been invaluable in reintroducing competition and developing better capabilities for the warfighter. For example, efforts such as open architecture technologies and improved manufacturing processes championed by small businesses should reduce acquisition costs and ensure that the military services can

continue to support weapons systems once they become operational. In order to facilitate entry into the defense market by small businesses, the Committee recommends providing a total of \$100,000,000 more than requested for the Department's SBIR program. These funds are allocated as follows: \$25,000,000 is recommended for the Army's Future Combat System to enhance small business participation in that program; \$25,000,000 is allocated to each of the Navy's surface ship and submarine research and development activities for the SBIR program; and, \$25,000,000 is provided to enhance small business participation in the Joint Strike Fighter program.

Further, the Committee directs the Director of the Department of Defense Office of Small Business Contracting to submit, no later than June 1, 2008, a report to the congressional defense committees which identifies the impediments to small business owners to contracting or subcontracting with the Department, including, but not limited to, an analysis of the small business threshold size; small business contract bundling; distribution of small business subcontracts between professional service and research and development; the transition from SBIR II programs to procurement; the impact of the Department's vendor pay system on small businesses; and the effectiveness of the mentor-protégé program. The report should identify any impediments to the successes of businesses that graduate from the small business qualifications and offer recommendations to support the transition of small businesses to middle-sized businesses.

Improvements in the management of contract services need not take years to implement; rather, with intent leadership and executive attention, considerable efficiencies can be achieved in the near-term. Accordingly, the Committee recommendations reduce the Department's funding requests for contracted services in the operation and maintenance budgets by five percent, recognizing contract service efficiencies and savings with enhanced oversight.

MEMBER REQUESTS

Projects.—Congress has made significant reforms in the way it reviews funding for the Federal government—reforms which the Committee takes very seriously as it executes its constitutional authority. Earmarking or directed spending of Federal dollars does not begin with Congress. It begins with the Executive Branch. Provided as merely an example, the following was submitted by the Administration:

Installation	Number of projects	Budget estimate
Fort Meade	2	\$60,000,000
Fort Sam Houston	1	20,840,000
Norfolk Naval Shipyard	2	26,824,000
Charleston Air Force Base	5	26,200,000

The Administration, in selecting these projects, goes through a process that is the functional equivalent of earmarking. These 10 projects, totaling \$133,864,000, are rolled up with thousands of similar projects into a larger budget activity, essentially hidden within the request. However, when the Committee reviews the

budget request, it goes through a process of rigorous analysis and may alter or modify this list to reflect additional priorities.

The Executive Branch also engages in another practice which steers or directs money to specific entities or purposes through a process of contracting out various activities and services. In many important work locations, the number of people working for contractors exceeds the number of Federal employees in the same building or location. Many of these, in fact, are non-competitive or sole-sourced. When added together, the Executive Branch steers or directs far greater spending to specific projects or corporations than is directed or earmarked by Congress. And the practice of non-competitive contracting has exploded in the past five years. The Committee has expressed, in no uncertain terms, its opinion of how the Department of Defense has not properly managed this effort elsewhere in this report.

COMMITTEE RECOMMENDATIONS BY MAJOR CATEGORY

ACTIVE, RESERVE AND NATIONAL GUARD MILITARY PERSONNEL

In Title I of the bill, the Committee recommends a total of \$105,017,776,000 for active, Reserve and National Guard military personnel, a decrease of \$385,922,000 below the budget request, and \$5,154,899,000 above the fiscal year 2007 enacted level. The Committee has provided \$310,000,000 above the request to increase basic pay for all military personnel by 3.5 percent, effective January 1, 2008. This represents an increase of 0.5 percent over the President's request. The Committee also recommends full funding to support the requested end strength levels for active duty and Selected Reserve personnel, including over \$1,041,000,000 to increase the end strength of the Army by 7,000; the Army National Guard by 1,300; and the Marine Corps by 5,000.

The Committee has transferred \$364,000,000 from Research, Development, Test and Evaluation, Air Force into Military Personnel, Air Force to address what the Committee believes is a chronic force structure problem. Also, the Committee has deferred consideration, without prejudice, of certain special pays that it believes would be more appropriate to consider within the fiscal year 2008 Global War on Terror supplemental.

OPERATION AND MAINTENANCE

In Title II of the bill, the Committee recommends a total of \$137,135,127,000 for operation and maintenance support to the military services and other Department of Defense entities, a reduction of \$5,718,890,000 from the fiscal year 2008 budget request, and an increase of \$9,846,320,000 above the amount appropriated for fiscal year 2007.

The Committee's recommendation increases funding for operational training over the level appropriated for peacetime training and operations in 2007. The additional funding will robustly fund the operational training programs, supporting an increased training operating tempo in 2008 for the Army, Navy and Marine Corps. Funds not needed for home station activities due to units being deployed for military operations in Afghanistan and Iraq have been realigned for support of continuing combat and peacekeeping oper-

ations in Afghanistan and Iraq. Requests for unit and depot level maintenance program funding have been fully supported.

In addition, the Committee provides additional operating funds for family advocacy, childcare centers and dependent education to support military families. The Committee also supports anti-terrorism force protection by adding funds for perimeter security to protect DoD installations, facilities, and personnel. Finally, significant amounts are added to support the Army's global repositioning and force structure efforts.

PROCUREMENT

In Title III of the bill, the Committee recommends a total of \$99,608,169,000 for procurement, an increase of \$18,697,413,000 over the amount appropriated for fiscal year 2007.

Major initiatives and modifications include:

- \$770,751,000, the President's request, for the procurement of 52 Blackhawk Helicopters, for baseline and Grow-the-Army requirements.
- \$569,993,000, the President's request, for baseline and Grow-the-Army requirements, to procure 2 additional Patriot battalions, plus upgrades for 3 other battalions.
- No procurement funding for the Armed Reconnaissance Helicopter, instead of \$468,259,000 requested in the President's budget.
- \$472,907,000, the President's request, for the procurement of 108 Patriot Advanced Capability 3 (PAC-3) surface-to-air missiles and 6 Enhanced Launcher Electronic Systems.
- \$235,865,000, the President's request, for the procurement of 57 High Mobility Artillery Rocket Systems, launchers, trainers, and support equipment.
- \$1,912,884,000 for the procurement of Stryker vehicles, including an additional \$1,102,000,000 for an eighth Stryker brigade.
- \$1,266,010,000 for the procurement of 18 EA-18G Growler electronic attack aircraft.
- \$2,042,049,000 for the procurement of 24 F/A-18E/F Super Hornet tactical aircraft.
- \$2,410,800,000, the President's request, for the procurement of 12 F-35 Lightning II Aircraft, 6 Short Take-off and Vertical Landing variants for the Marine Corps and 6 Conventional variants for the Air Force.
- \$2,212,500,000, the President's request, for the procurement of 26 V-22 aircraft, 21 MV-22 variants for the Marine Corps and 5 CV-22 variants for the Air Force.
- \$15,303,820,000 in Navy Shipbuilding and Conversion, \$1,647,000,000 above the President's request for the procurement of 5 Navy ships including 2 LPD-17 Amphibious Transport Docks, 1 SSN-774 Attack Submarine, 1 CVN-78 Aircraft Carrier, and 1 Littoral Combat Ship. Additionally, this funding provides for the second increment of funding for 2 DDG-1000 Guided Missile Destroyers and 1 LHA-6 Amphibious Assault Ship and for the advance procurement of long lead items for 2 SSN-774 Attack Submarines.
- \$1,866,000,000 in the National Defense Sealift Fund for the procurement of 4 T-AKE Auxiliary Dry Cargo/Ammunition Ships, \$1,410,000,000 above the President's request.

- \$3,152,700,000, the President's request, for the procurement of 20 F-22 Raptor aircraft.
- \$403,005,000 for the procurement of 3 Global Hawk unmanned aerial vehicles.
- \$325,183,000, the President's request, for the procurement of 1 Wideband Gapfiller Communications Satellite.
- \$1,101,691,000 for the procurement of 4 Evolved Expendable Launch Vehicles.
- \$277,999,000, the President's request, for the procurement of 24 Predator unmanned aerial vehicles.
- \$58,470,000, the President's request, for the procurement of 4 Reaper unmanned aerial vehicles.
- \$125,000,000 for advance procurement of a fourth advanced EHF communications satellite.
- \$558,253,000 for Chemical and Biological Defense Programs, an increase of \$41,344,000 from fiscal year 2007 levels and a net increase of \$9,500,000 from the budget request.
- \$1,818,852,000 for Special Operations Command, an increase of \$202,578,000 from fiscal year 2007 levels and a net decrease of \$2,297,000 from the budget request.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION

In Title IV of the bill, the Committee recommends a total of \$76,231,440,000 for research, development, test and evaluation, an increase of \$1,114,246,000 from the fiscal year 2008 budget request and an increase of \$509,836,000 over the amount appropriated for fiscal year 2007.

Major initiatives and modifications include:

- \$8,497,934,000 for missile defense programs, a decrease of \$883,416,000 from fiscal year 2007 levels and a net decrease of \$297,992,000 from the budget request; within this amount, an increase of \$57,000,000 above the request is provided for sea-based mid-course defense to include \$15,000,000 to continue work on asymmetric missile defense issues, \$70,000,000 above the request for missile defense programs in cooperation with Israel, and \$150,000,000 above the request for Kinetic Energy Interceptor.
- \$3,157,118,000 for the development of the Future Combat System, \$406,300,000 below the President's request.
- \$356,296,000, an increase of \$134,000,000 above the President's request, for the development of the Warfighter Information Network—Tactical system.
- \$129,310,000, an increase of \$47,000,000 above the President's request, for the Armed Reconnaissance Helicopter program development.
- \$3,035,222,000 for the Defense Advance Research Projects Agency, a decrease of \$80,088,000 from fiscal year 2007 levels and a net decrease of \$50,395,000 from the budget request.
- \$372,146,000, the President's request, for Patriot/MEADS system development.
- \$288,220,000, the President's request, for the development of the Expeditionary Fighting Vehicle.
- \$808,993,000, the President's request, for the continued development of the E-2D Advanced Hawkeye aircraft.
- \$274,699,000 for the continued development of the EA-18G electronic attack aircraft.

- \$230,971,000 for the continued development of the VH-71A Presidential Helicopter.
- \$630,544,000 for continuing development of the DDG-1000 Guided Missile Destroyer program.
- \$4,146,256,000 for the continued development of the F-35 Lightning Joint Strike Fighter aircraft, \$705,000,000 above the President's request.
- \$603,179,000, the President's request, for the continued development of the Advanced Extremely High Frequency communication satellite system.
- \$963,585,000, the President's request, for the continued development of the Transformational Satellite Communication system.
- \$260,501,000 for the development of the Global Hawk unmanned aerial vehicles.
- \$186,000,000 for Space Radar in the Air Force, a reduction and transfer from the classified budget request for this program.
- \$75,877,000 for the Alternative Infrared Satellite System, a reduction of \$155,000,000 from the budget request.
- \$507,226,000 for the Global Positioning System III, a reduction of \$80,000,000 from the budget request.
- \$1,133,596,000 for Chemical and Biological Defense Programs, an increase of \$152,412,000 from fiscal year 2007 levels and a net increase of \$112,100,000 from the budget request.
- \$442,137,000 for Special Operations Command, a decrease of \$111,922,000 from fiscal year 2007 levels and a net increase of \$70,859,000 from the budget request.

CLASSIFIED PROGRAMS

As described elsewhere in this report, the Committee's budget reviews are published in a separate, detailed and comprehensive classified annex. Adjustments to the classified programs are addressed in the classified annex accompanying this report.

FORCES TO BE SUPPORTED

DEPARTMENT OF THE ARMY

The fiscal year 2008 budget request is designed to support the Army's continuing transformation of its Operating Force to a Modular Design. By the end of fiscal year 2008, the Active Component transformed force will include 4 Army Service Component Command Headquarters, 1 Corps Headquarters, 9 Division Headquarters, 38 Brigade Combat Teams and 34 multi-functional support brigades. Additionally, the Active Component will have begun transformation of two more Brigade Combat Teams. Active Component structure yet to be transformed includes 2 Army Service Component Command Headquarters, 2 Corps Headquarters, 1 Division Headquarters, 8 Brigade Combat Teams and 6 multi-functional support brigades. By the end of fiscal year 2008, transformed force structure in the Army National Guard (ARNG) and the U.S. Army Reserve (USAR) will include 6 ARNG Division Headquarters and 54 multi-functional Support Brigades (44 ARNG and 10 USAR). Additionally, the ARNG will have begun conversion of 28 Brigade Combat Teams (the first 7 Brigade Combat Teams will complete transformation in fiscal year 2009). Reserve Component forces yet to be transformed include 10 multi-functional support brigades (7

ARNG and 3 USAR). These forces are the key elements of the minimum capabilities needed to execute the National Military Strategy and to meet enduring defense needs of the Global Force Demand. By fiscal year 2013, the transformed Army will include 6 Army Service Component Command Headquarters and 3 Corps Headquarters in the Active Component, 18 Division Headquarters (10 Active and 8 ARNG), 76 Brigade Combat Teams (48 Active, 28 ARNG) and 104 multi-functional support brigades (40 Active, 51 ARNG, and 13 USAR). A summary of the major forces follows:

	FY06	FY07	FY08
Active Component Forces			
Headquarters:			
Army HQs	4	4	2
Corps HQs	4	4	3
Headquarters Total	8	8	5
Divisions (Legacy Structure):			
Airborne	0	0	0
Air Assault	0	0	0
Light	0	0	0

DEPARTMENT OF THE NAVY

The fiscal year 2008 budget request supports battle forces totaling 286 ships at the end of fiscal year 2008, including 14 fleet ballistic missile submarines; 11 aircraft carriers; 17 Support ships; 11 Reserve ships; 233 other battle forces ships; 1,708 Navy/Marine Corps tactical/ASW aircraft; 743 Undergraduate Training aircraft; 461 Fleet Air Training aircraft; 285 Fleet Air Support aircraft; 328 Reserve aircraft and 195 in the pipeline.

A summary of the major forces follows:

	FY 2006	FY 2007	FY 2008
Strategic Forces	14	14	14
Fleet Ballistic Missile Submarines	14	14	14
General Purpose	250	248	255
Aircraft Carriers	12	11	11
Surface Combatants	101	105	111

Authorized Pipeline	489	193	195
Tactical/ASW Aircraft	1,786	1,730	1,708
Fleet Air Training	454	460	461
Fleet Air Support	271	270	285
Training (Undergraduate)	730	736	743
Reserve	370	361	328

*Note: Surge ships are maintained in a Reduced Operating Status (ROS) from four to thirty days. The number of days indicates the time from ship activation until the ship is available for tasking. Only ROS-4 and ROS-5 ships are considered in the surge capacity below.

DEPARTMENT OF THE AIR FORCE

The fiscal year 2008 Air Force budget request is designed to support active, guard, and reserve forces, including 75 combat coded fighter and attack squadrons and 9 combat coded strategic bomber squadrons. The ICBM force maintains 495 launch facilities/control centers with 450 Minuteman missiles. The budget also supports our critical airlift mission, including 24 active duty airlift squadrons. To accomplish the Air Force mission, the 2008 budget supports a total force end strength of 502,800.

A summary of the major forces follows:

	Fiscal year—		
	2006	2007	2008
Summary of Major Forces:			
USAF Fighter and Attack Squadrons (Active, ANG, AFRC)			
AFRC	87	85	75
Active	45	45	40
ANG	37	36	32
AFRC	5	4	3
Strategic Bomber Squadrons (Active)	8	8	8
Strategic Bomber Squadrons (AFRC)	1	1	1
Flight Test Units (DT and OT Units with assigned aircraft)			
Fighter	10	12	12
Fighter	7	9	9
Bomber	3	3	3
ICBM Operational Launch Facilities/Control Centers	550	495	495
ICBM Missile Inventory	500	450	450
USAF Airlift Squadrons (Active):			
Strategic Airlift Squadrons	14	15	15
Tactical Airlift Squadrons	9	9	9
Total Active Airlift Squadrons	23	24	24
Total Air Force Aircraft Inventory	5,792	5,662	5,688

Note.—Numbers of squadrons above reflect combat coded units only (i.e., no training or test info except where noted).

DEFENSE HEALTH PROGRAM

The Committee recommends a total of \$22,957,184,000 for the Defense Health Program to support worldwide medical and dental services for active forces and other eligible beneficiaries, \$416,060,000 above the fiscal year 2008 budget request and \$1,740,184,000 above the amount appropriated for fiscal year 2007.

To address the challenges of the Defense Health Program, the Committee recommends:

- \$1,905,014,000 to fill the shortfall created by Congress not having approved the Department's proposed fee increases, making the Defense Health Program whole for fiscal year 2008;
- \$66,000,000 for wounded warrior assistance;
- \$23,260,000 for preventive medicine and surveillance;
- Fully funds the budget requests for vaccine research and development and the budget request of \$100,000,000 for avian influenza.

In addition, the Committee:

- Directs the Department of Defense to update the Physical Disability Evaluation System;
- Directs the Department of Defense to establish electronic medical record interoperability with the Department of Veterans Affairs; and

- Directs the review of TRICARE co-pays.

TITLE I

MILITARY PERSONNEL

The fiscal year 2008 budget request for programs funded in Title I of the Committee bill, Military Personnel, is \$105,403,698,000 in new budget authority, which is an increase of \$5,540,821,000 above the amount appropriated for fiscal year 2007. The accompanying bill recommends \$105,017,776,000 for fiscal year 2008, which is an increase of \$5,154,899,000 above the amount appropriated for fiscal year 2007, and \$385,922,000 less than the request for fiscal year 2008. These appropriations finance basic, incentive and special pays for active, Reserve and National Guard personnel, and Academy cadets; retired pay accrual; housing, subsistence and other allowances; recruitment and retention initiatives; permanent change of station (PCS) costs; and other military personnel costs such as survivor, unemployment, and education benefits. A summary of appropriations provided in Title I, Military Personnel, follows:

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST
40000	RECAPITULATION		
40050	31,623,865	31,346,005	-277,860
40100	23,305,233	23,300,801	-4,432
40200	10,278,031	10,269,914	-8,117
40300	24,097,354	24,379,214	+281,860
40400	3,734,620	3,629,620	-105,000
40500	1,797,685	1,776,885	-20,800
40600	594,872	513,472	-81,400
40700	1,370,479	1,365,679	-4,800
40800	5,959,149	5,815,017	-144,132
40900	2,642,410	2,621,169	-21,241
41000	105,403,698	105,017,776	-385,922

MILITARY PERSONNEL OVERVIEW

The Committee recommendation provides \$105,017,776,000 for Military Personnel accounts and continues to increase funding for military pay and allowances, recruitment and retention initiatives, and overall quality of life programs for active duty, Reserve and National Guard personnel. The budget request proposes to increase basic pay for all personnel by three percent. The Committee recommendation provides approximately \$2,200,000,000, or \$310,000,000 above the request, to increase basic pay for all military personnel by 3.5 percent, effective January 1, 2008. This recommendation also supports fully the resource requirements needed to achieve the requested end strength levels for fiscal year 2008. The Committee continues to support and encourage constructive enhancements to recruitment and retention programs, bonus and special pay incentives, and benefit programs for military personnel for fiscal year 2008. The Committee fully funds the “Families First Initiative”, a newly established program that ensures the Full Replacement Value (FRV) for property lost or damaged beyond repair in conjunction with a permanent change of station move. The Committee continues to be supportive of any programs intended to enhance the morale and quality of life for our military personnel and their families.

SUMMARY OF END STRENGTH

The fiscal year 2008 budget request includes a decrease of 2,800 in total end strength for the active forces and a decrease of 9,900 in end strength for the Selected Reserve from the fiscal year 2007 authorized levels. However, the budget proposes to increase the Army end strength by 7,000; the Army National Guard end strength by 1,300; and the Marine Corps end strength by 5,000. The Committee recommendation fully supports these increases.

The following tables summarize the Committee recommendations for end strength levels, both in the aggregate and for each active and Selected Reserve component. Explanations of changes from the budget request appear later in this section.

OVERALL ACTIVE END STRENGTH

Fiscal year 2007 estimate	1,329,200
Fiscal year 2008 budget request	1,326,400
Fiscal year 2008 recommendation	1,326,400
Compared with Fiscal year 2007	- 2,800
Compared with Fiscal year 2008 budget request	- - -

OVERALL SELECTED RESERVE END STRENGTH

Fiscal year 2007 estimate	847,800
Fiscal year 2008 budget request	837,900
Fiscal year 2008 recommendation	837,900
Compared with Fiscal year 2007	- 9,900
Compared with Fiscal year 2008 budget request	- - -

	Fiscal year 2008			
	FY 2007 estimate	Budget request	Recommendation	Change from request
Active Forces (end strength):				
Army	482,400	489,400	489,400	—
Navy	337,600	328,400	328,400	—

	Fiscal year 2008			
	FY 2007 estimate	Budget request	Recommendation	Change from request
Marine Corps	175,000	180,000	180,000	—
Air Force	334,200	328,600	328,600	—
Total, Active Forces	1,329,200	1,326,400	1,326,400	—
Guard and Reserve Forces (end strength):				
Army Reserve	205,000	205,000	205,000	—
Navy Reserve	71,300	67,800	67,800	—
Marine Corps Reserve	39,600	39,600	39,600	—
Air Force Reserve	74,900	67,500	67,500	—
Army National Guard	350,000	351,300	351,300	—
Air National Guard	107,000	106,700	106,700	—
Total, Guard and Reserve Forces	847,800	837,900	837,900	—
Total, Military Personnel	2,177,000	2,164,300	2,164,300	—

FULL-TIME SUPPORT END STRENGTH

There are four categories of full-time support in the Guard and Reserve components: civilian technicians, Active Guard and Reserve (AGR), non-technician civilians, and active component personnel.

Full-time support personnel organize, recruit, train, maintain and administer the Reserve components. Civilian (Military) technicians directly support units, and are very important to help units maintain readiness and meet the wartime mission of the Army and Air Force.

The following table summarizes Guard and Reserve full-time support end strength:

GUARD AND RESERVE FULL-TIME END STRENGTH

	Fiscal year 2008			
	FY 2007 estimate	Budget request	Recommendation	Change from request
Army Reserve:				
AGR	15,416	15,870	15,870	—
Technicians	8,507	8,844	8,844	—
Navy Reserve:

AGR/AR	73,732	73,595	73,595	—
Technicians	68,670	69,976	69,976	—
Totals:	142,402	143,571	143,571	—

GROW-THE-FORCE INITIATIVE

The Committee recommendation provides approximately \$1,041,000,000 in Military Personnel accounts to support the first installment of the "Grow-the-Force" initiative, fully funding the requested end strength increase of 7,000 Soldiers; 1,300 Army National Guardsmen; and 5,000 Marines. The Committee expects that the fiscal year 2009 baseline budget will include the necessary resources throughout the Pentagon's Future Year Defense Program to meet end strength and over strength objectives.

The Committee is concerned, however, about continued programmed manpower reductions in both the Navy and Air Force, especially since these services play vital supporting roles in the conflicts overseas. In hearings before the Committee, both the Secretary of Defense and the Chairman of the Joint Chiefs of Staff expressed a need to review these programmed manpower reductions. The Committee expects the Department to keep the Committee informed of any change in manpower resulting from this review.

On the basis of these manpower reductions, the Air Force, in particular, moved to recapitalize its weapon systems and aircraft fleet at the expense of its personnel budget. In fact, the Air Force assumed significant risk in its permanent change of station (PCS) policy, as reflected in the budget request for fiscal year 2008. Accession, training, operational, and rotational travel are essential for quality of life and professional development, as well as force multipliers for airmen supporting the war effort. Moreover, mid-level and command-grade officer retention, force development, and professional advancement setbacks are likely to intensify as the Air Force moves from the customary 2 to 3 year rotational schedule to one of 4 years. The Air Force cannot wait to address this matter. Therefore, the Committee recommendation reallocates \$364,000,000 into Military Personnel, Air Force, Budget Activity 5 from Research, Development, Test and Evaluation, Air Force, and directs the Secretary of the Air Force to conduct a thorough review of its PCS policy and provide a report to the Committees on Appropriations of the House of Representatives and the Senate not later than December 14, 2007, explaining the nature of this shortfall and any corrective policy or funding actions necessary to address the issue.

BOOTS-ON-THE-GROUND AND COST OF WAR REPORTING

The Committee believes there is a continuing need for accurate and timely information on actual/estimated costs and deployment numbers associated with Operation Iraqi Freedom (OIF) and Operation Enduring Freedom (OEF). Therefore, not later than the 10th day of each month following the enactment of this Act, the Committee directs the Secretary of Defense to submit to the congressional defense committees a "Boots-on-the-Ground" report providing, for the most recent month for which data is available, the total number of troops deployed in support of OIF and OEF, further delineated by service and component (active, Reserve or National Guard); and a monthly estimate for the three-month period following the date such report is submitted, which provides an estimate of the total number of troops expected to be deployed in sup-

port of OIF and OEF, further delineated by service and component (active, Reserve or National Guard). This report may be submitted in classified form.

RESERVE COMPONENT BUDGET SUBMISSIONS

The Committee supports a consolidated budget structure for the Reserve Components provided that the reporting requirements as set forth in House Report 109–676 are followed. However, as the Reserve Components continue their transformation from a strategic reserve into that of an operational force, the Committee believes greater transparency is needed over total costs for National Guard and Reserve servicemembers' cash compensation, such as basic pay and other allowances; noncash compensation, such as health care; and deferred compensation and benefits, such as retirement pay and health care. In a June 2007 report, the Government Accountability Office (GAO) reports that compensation costs have "increased 47 percent since 2000, rising from about \$13,900,000,000 in fiscal year 2000 to about \$20,500,000,000 in fiscal year 2006." Per capita compensation costs have nearly doubled, cash compensation has increased 19 percent, and deferred compensation costs have nearly tripled. The Committee acknowledges the contributions made by each of the Reserve Components, but a better understanding of the escalation in these compensation costs is necessary.

The full cost of providing Reserve compensation is fundamental to determine resource allocation, and the Department's Reserve compensation costs are presently found within multiple budgets. No single source currently provides this information. The compilation of compensation costs for those reservists who are drilling, serving in the Active Guard and Reserve, and who are mobilized, into a single source is a crucial first step toward gaining transparency over those costs. The Committee supports GAO's findings and directs the Department to include such detail within the Military Personnel budget justification material beginning in fiscal year 2009.

PAID INACTIVE DUTY TRAINING (IDT) TRAVEL

As an unintended consequence of the 2005 Base Realignment and Closure recommendations, some members of the Selected Reserve face significant out-of-pocket travel expenses to drill with their home unit. Unlike its active duty counterparts, the Reserve Component cannot reassign a unit reservist through Permanent Change of Station (PCS) actions. The Committee believes that passing these costs to the service member may have a damaging effect on unit cohesiveness, recruitment, and the retention of specialty skill sets in the Reserve Component. Therefore, the Committee directs the Department of Defense to include in its fiscal year 2009 budget request sufficient funding to assist members of the Selected Reserve who are required to perform IDT outside the commuting limits of their station.

MILITARY PERSONNEL, ARMY

Fiscal year 2007 appropriation	\$29,813,905,000
Fiscal year 2008 budget request	31,623,865,000
Committee recommendation	31,346,005,000
Change from budget request	-277,860,000

The Committee recommends an appropriation of \$31,346,005,000 for Military Personnel, Army, which is \$1,532,100,000 more than the amount provided in fiscal year 2007 and \$277,860,000 less than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

(DOLLARS IN THOUSANDS)

TITLE II

OPERATION AND MAINTENANCE

The fiscal year 2008 budget request for programs funded in title II of the Committee bill, Operation and Maintenance, is \$142,854,017,000 in new budget authority. The accompanying bill recommends \$137,135,127,000 for fiscal year 2008, which is an increase of \$9,846,320,000 above the amount appropriated for fiscal year 2007, and \$5,718,890,000 less than the request for fiscal year 2008. These appropriations finance the costs of operating and maintaining the Armed Forces, including the reserve components and related support activities of the Department of Defense (DoD). Included is pay for civilians, services for maintenance of equipment and, fuel, supplies, and spare parts for weapons and equipment. Financial requirements are influenced by many factors, including force levels such as the number of aircraft squadrons, Army and Marine Corps divisions, installations, military personnel strength and deployments, rates of operational activity, and the quantity, complexity and age of equipment such as aircraft, ships, missiles and tanks. The budget request for Operation and Maintenance includes \$5,400,000 in price adjustments and program growth of nearly \$10,000,000,000.

The table below summarizes the Committee's recommendations.

(DOLLARS IN THOUSANDS)

FORCE STRUCTURE

The Army continues to convert to a modular force. Modular Brigade Combat Teams (BCTs) with enabling support brigades are more capable, flexible, and deployable than the previous division-based structure. The Army plans to increase the number of BCTs by 5, to a total of 69, by the end of 2008 (38 active and 28 guard). The Army also plans to increase the number of support brigades by 35 to total of 193 by the end of 2008 (74 active, 67 guard and 52 reserve). The Navy supports a force structure of 10 active carrier air wings and 1,292 primary authorized aircraft, 286 battle force ships, including 11 aircraft carriers, 52 nuclear attack submarines and 14 missile submarines. The Navy's implementation of the Fleet Response Plan continues in 2008 with the goal of increasing availability of naval assets for duty worldwide. The Marine Corps plans to increase military end-strength beginning in 2008 with the goal of adding three infantry battalions and other support forces resulting in three balanced Marine Expeditionary Forces (MEFs). The force structure of the Air Force supports 81 Combat Wing Equivalents (CWEs). Air Force combat capability is organized into 38 Strike wings, 29 Mobility wings, and 14 Intelligence, Surveillance and Reconnaissance (ISR) wings.

TRAINING TEMPO

The unit training that the U.S. military conducts to support the national military strategy is funded by the operation and maintenance accounts. Operational readiness is the state of preparedness of a unit to perform the missions for which it is organized or designed. The Committee fully supports the peacetime requirements of the military services for readiness training.

Army training operating tempo is often expressed in terms of tank miles driven. The Army's readiness goal is 846 tank miles per year. The Army plans to drive an average of 600 tank miles in 2007, to include 428 training miles, and 770 tank miles in 2008, to include 582 training miles. The Navy's training tempo is expressed both terms of average number of steaming days per quarter and average number of flying hours per crew. The Navy's goal for deployed forces is 51 steaming days per quarter and an average of 18.8 flying hours per crew per month. The Navy plans on steaming 36 days per quarter in 2007 and 45 days per quarter in 2008, and plans to fly an average of 17.5 hours per crew per month in 2007 and 18.7 hours per crew per month in 2008. The Air Force's operational community does not set a training tempo goal, believing that the flying hours reflected in the budget request are adequate to conduct the training which ensures the needed combat capability. In 2007, the Air Force plans to execute an average of 16.5 hours for bombers and 16.7 hours for fighters. In 2008, the Air Force plans to fly an average of 15.5 hours for bombers and 14.4 hours for fighters.

RECOMMENDED OPERATION AND MAINTENANCE FUNDING LEVELS

The Committee recommends \$7,548,000,000 for peacetime training and operations in fiscal year 2008, an increase of 13 percent above inflation. The additional funding will robustly fund the oper-

ational training programs, supporting an increased training operating tempo in fiscal year 2008 for the Army, Navy and Marine Corps. The Air Force's request included a reduction to the flying hour program, a level of risk that the Air Force has determined to be manageable. The following table displays operational training funding for each of the Services.

OPERATIONAL TRAINING PROGRAM FUNDING
[Dollars in thousands]

	2007 Current estimate*	2008 Committee recommended	Change (percent)
Army	\$3,192,000	\$3,810,000	+19%
Navy	1,508,000	1,609,000	+7%
Marine Corps	465,000	627,000	+35%
Air Force	1,540,000	1,502,000	-2%
Total	6,705,000	7,548,000	+13%

* Includes expected 2008 cost growth.

In total, the Committee provides for an increase of \$843,341,000 for operational training program growth, equivalent to nearly 13 percent growth for the active Services.

IMPACT OF REBASING

The Committee seeks to ensure that the Army adequately addresses the impact of rebasing activities, particularly as large numbers of servicemembers are restationed from overseas bases to bases in the continental United States (CONUS). The Army is making significant changes in force structure, base closures, and a global repositioning of forces, all while meeting the demands of war. The Committee proposes adding \$1,232,400,000 to the Army's facilities sustainment and restoration budget request to offset the growing infrastructure costs associated with the global repositioning of its forces. The Committee is recommending, without modification, the funding levels and facility projects determined by the Department of the Army to support global repositioning. These funds will be used to fix barracks, improve child care facilities, and enhance community services at Army bases throughout the United States, Europe and Korea as follows:

PERIMETER SECURITY FORCE PROTECTION AND OTHER FACILITY
SECURITY IMPROVEMENTS

Perimeter security is the backbone of the anti-terrorism program designed to protect DoD installations, facilities, and people. Without a strong and robust perimeter security system, national security resources and personnel remain vulnerable targets for terrorists. A combination of perimeter fencing, entry controls, barriers, and response capabilities form a cost-efficient and effective layered defense structure to reduce vulnerability of individuals and property to terrorist acts. The budget request includes \$126,200,000 for perimeter security. However, the Committee finds that this level does not sufficiently mitigate danger to, nor improve the safety and security of, DoD personnel and assets. The Committee recommends an additional \$141,900,000 for perimeter security force protection for fiscal year 2008. The recommendation includes security enhancements for rapid, electronic authentication for the physical and logic access and interoperability with other Agencies to protect DoD bases, schools, hospitals, base housing, churches and childcare centers from terrorist attacks. In addition, the Committee recommendation includes funds to meet the combatant commanders' anti-terrorism/force protection requirements that require immediate attention. The Committee recommendation, by appropriation, is detailed below:

PERIMETER SECURITY FORCE PROTECTION AND OTHER FACILITY SECURITY IMPROVEMENTS
[Dollars in thousands]

	Request	Improved security	Committee recommendation
Army	\$32,700	+\$30,100	\$62,800
Navy	30,500	+29,300	59,800
Marine Corps	12,200	+12,400	24,600
Air Force	3,100	+3,100	6,200
Army Guard	30,700	+21,900	52,600
Army Reserve	4,700	+5,300	10,000
Navy Reserve	0,700	+1,300	2,000
DoD IG	*	*	100
Defense-Wide ¹	8,900	+37,500	46,400
Defense Health Program	2,700	+1,000	3,700
Total	126,200	141,900	268,100

* less than \$100,000.

¹ Includes funding for perimeter security force protection, Combating Terrorism Readiness Initiative Fund and Homeland Security Presidential Directive-12.

SUPPORT TO MILITARY FAMILIES

The makeup of the military has changed dramatically since the advent of the all-volunteer force more than 25 years ago. Where the Nation's force once was largely comprised of single men, today nearly half of the men and women in uniform are fathers and mothers. Family assistance, reliable childcare and quality education for military dependents has become a military necessity and directly affects military retention. These programs are essential to the health and welfare of the Nation's soldiers and their families, and the communities in which they live. Accordingly, the Committee recommendation includes nearly \$2,916,000,000 for support for military families, an increase of \$558,413,000 above the budget

request. The Committee recommendation for these programs is displayed as follows:

MILITARY FAMILY SUPPORT ACTIVITIES
[Dollars in thousands]

	Request	Expand service	Committee recommendation
Family Advocacy programs	\$232,587	+\$438,813	\$671,400
Army childcare centers	251,400	+46,000	297,400
Navy childcare centers	103,600	+24,000	127,600
Marine Corps childcare centers	21,900	+6,000	27,900
Air Force childcare centers	147,900	+5,600	153,500
Dependents education	1,600,800	+38,000	1,638,000
Total	2,358,187	+558,413	2,915,800

FAMILY ADVOCACY PROGRAMS

The Committee recommends a total of \$671,400,000 for family advocacy programs in fiscal year 2008. The Committee believes the additional funding provided will enhance the activities of family advocacy programs (FAP) and provide for children and families managing the difficult challenges of military service. The Committee is cognizant of and concerned about the growing need for family members to have access to professional counseling to help alleviate the mental stresses associated with deployments. FAP programs also provide comprehensive programs for prevention, identification and treatment of child and spouse abuse, and provide family assistance for severely-injured service members and their families.

Currently, there are more than 70,000 school-age children, 5 to 18 years of age, directly affected by the deployment of Guard or Reserve parents who serve in the Global War on Terror. The loss of the daily presence of a parent—and parents—in the home and the worry about the safety of a deployed parent is a difficult burden for children.

The Committee provides \$2,000,000 for Parents as Teachers Heroes at Home, a parent education and family support program for young military families. At a time when military families are increasingly impacted by repeat deployment, demands at home and the stress of being away, this program brings professional parenting support and child development information right to the homes of these young families. The Committee further urges the Department of allocate up to \$4,000,000 to the T.H.A.N.K.S. USA scholarship program from the additional funds provided for the family advocacy programs.

The Committee urges the family advocacy program to support such programs as Our Military Kids, an organization that provides grants to school-age children (K–12) of deployed and severely injured National Guard and Reserve personnel to cover their fees for tutoring, athletic, or fine arts programs, as well as the Military Child Education Coalition program, “Living in the Normal”. In addition, the Committee supports the expansion of ongoing activities that provide counseling, programs, products and services to help mitigate the disruption and stress in the military family when a service member is deployed, killed or seriously-wounded.

CHILDCARE CENTERS

Over the past ten years, the Department has made dramatic improvements in the management and operation of child development programs for children aged 6 weeks to 12 years old. The efforts to improve childcare have been based on the recognition that those who make up the force are not only personnel, they are also parents. To perform well under the stresses of a demanding high operating tempo, service members should not be preoccupied with the basic well-being of their families. The stresses of multiple deployments and extended hours to support longer duty days result in the need for longer childcare center operating hours. The Committee, therefore, recommends a total of \$606,400,000 for fiscal year 2008, an increase of \$81,600,000 over the budget request, to expand childcare center operating hours and reduce the number of children on waiting lists for childcare services.

DEPARTMENT OF DEFENSE DEPENDENTS EDUCATION (DODEA)

The Committee believes that DoDEA schools are an important quality of life issue for military families. Accordingly, the Committee recommendation for DoDEA provides an increase in excess of \$90,000,000 from comparable fiscal year 2007 program levels. This significant increase shall support emerging requirements to replace aging textbooks and consumable workbooks; reading intervention programs for struggling readers; special contracts associated with increased student enrollment resulting from the residential community initiative at selected bases; teacher development; increased staffing to support increased enrollment in foreign languages; enhanced child care programs and child development centers, family centers and voluntary education centers on the Department's bases; and temporary classroom construction and outfitting costs to address the backlog of repair, as well as an increased need due to troop deployments and school closures.

OPERATION AND MAINTENANCE REPROGRAMMINGS

Beginning in fiscal year 2008, the Committee imposes new accountability and reprogramming guidelines for programs, projects and activities within the Operation and Maintenance appropriations. The Committee believes that such revisions are necessary given the unique nature of activities funded within these appropriations, continuing concerns about force readiness, and recent budget execution within these accounts. Specifically, the Committee directs:

(1) with respect to service operation and maintenance accounts, that the Department shall submit prior approval reprogramming requests to the congressional defense committees for proposed transfers of funds in excess of \$15,000,000, to or from the levels specified for budget activities. In addition, the Department should follow prior approval reprogramming procedures for transfers in excess of \$15,000,000 out of the following budget subactivities:

Army:

Maneuver units
Modular support brigades

- Land forces operations support
- Force readiness operations support
- Land forces depot maintenance
- Base operations support
- Navy:*
 - Aircraft depot maintenance
 - Ship depot maintenance
- Marine Corps:*
 - Depot maintenance
- Air Force:*
 - Primary combat forces
 - Combat enhancement forces
 - Combat communications

(2) with respect to Operation and Maintenance, Defense-Wide (O&M,DW), that proposed transfers of funds to or from the levels specified for programs, projects or activities in excess of \$10,000,000 or 20 percent, whichever is less, shall be subject to prior approval reprogramming procedures. For purposes of the O&M,DW account, a program, project or activity shall mean any item for which a dollar amount is contained in an appropriations Act (including joint resolutions providing continuing appropriations), accompanying reports of the House and Senate Committees on Appropriations, or accompanying conference reports and joint explanatory statements of the committee of conference or specifically identified in the supplemental material justifying the budget request to the Committees on Appropriations of the Senate and the House of Representatives.

OPERATION AND MAINTENANCE BUDGET EXECUTION DATA

The Committee directs the Department of Defense (DoD) to continue to provide the congressional defense committees with quarterly budget execution data. Such data should be provided not later than forty-five days past the close of each quarter for the fiscal year, and should be provided for each O-1 budget activity, activity group, and subactivity group for each of the active, defense-wide, reserve and National Guard components. For each O-1 budget activity, activity group, and subactivity group, these reports should include the budget request and actual obligations; the DoD distribution of unallocated congressional adjustments to the budget request; all adjustments made by DoD in establishing Base for Reprogramming (DD form 1414) report; all adjustments resulting from below threshold reprogrammings; and all adjustments resulting from prior approval reprogramming requests. As discussed earlier in this report, the Committee directs the Department to cease the reallocation of funds through a re-baselining procedure.

OPERATION AND MAINTENANCE, ARMY

Fiscal year 2007 appropriation	\$24,208,355,000
Fiscal year 2008 budget request	28,924,973,000
Committee recommendation	26,404,495,000
Change from budget request	-2,520,478,000

The Committee recommends an appropriation of \$26,404,495,000 for Operation and Maintenance, Army. The recommendation is an increase of \$2,196,140,000 above the amount appropriated for fiscal year 2007 and \$2,520,478,000 less than the fiscal year 2008 request.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

(DOLLARS IN THOUSANDS)

UNJUSTIFIED PROGRAM GROWTH

The Army's re-baselining of funds in fiscal year 2007 resulted in unjustified program growth in its fiscal year 2008 budget request of \$1,647,400,000. The Army's fiscal year 2007 budget request for base operating support (BOS) was understated and did not reflect anticipated costs based on historical budget execution levels. In order to finance BOS costs in fiscal year 2007, the Army reduced other O&M programs in 26 subactivity groups and redirected funds to the BOS program via the "re-baselining." The fiscal year 2008 budget request reflects funding for BOS based on historical execution levels. The budget request also increases funding to the 26 subactivity groups used to finance BOS in fiscal year 2007, but does not justify or explain the increase from the level executed in fiscal year 2007. Instead the Congressional justification material merely notes "restoral of funds." The Army's budget request is adjusted in those subactivity groups for which there are not sufficient explanations for funding increases above the fiscal year 2007 levels.

STATUS OF RESOURCE AND TRAINING SYSTEM

The Committee supports the implementation of the Defense Readiness Reporting System (DRRS) as the single, capability-based readiness reporting system for the Department. The DRRS will be fully operational by October of 2007. The Committee is concerned that continued use of the Global Status of Resource and Training System (GSORTS) for unit readiness reporting is misleading, inaccurate, and inapplicable. Multiple, redundant readiness systems are both wasteful and undermine the Department's ability to ensure timely and accurate information. Furthermore, the Committee believes it is duplicative to expend funds on other readiness reporting systems that do not meet the requirements of a capability-based system in light of the many demands on the resources of the Department.

FACT OF LIFE ADJUSTMENTS

Subsequent to the submission of the fiscal year 2008 budget request, two Army Prepositioned Sets were provided to support the increased troop levels in Iraq. The Army will not incur cost to maintain these sets in 2008. The Committee urges replenishing the sets as soon as is practicable.

CIVILIAN PERSONNEL STRENGTH

The Army's civilian personnel strength as of April 2007 and projected through the end of 2008 indicates that the Army's budget for civilian personnel is overstated by \$241,900,000. The Committee has adjusted funding accordingly.

COMMON LOGISTICS OPERATING ENVIRONMENT

The Committee provides \$4,000,000 to implement the Common Logistics Operating Environment (CLOE) enablers on a Brigade. This funding will provide capability for "connecting" Army platforms and soldiers to the enterprise and provide the visibility within the Brigade, thereby providing much needed situational aware-

ness to the Commander and near real-time status reporting to the logistician.

SCANNING TECHNOLOGY TO ACCELERATE RESET

The Committee is aware that high OPTEMPO is wearing out vehicles and aircraft more quickly than expected, and the Army's organic depots are experiencing a backlog of systems awaiting reset. The Chief of Staff of the Army has testified that he is very concerned about the Army's degraded non-deployed unit readiness. One factor slowing reset efforts is the frequency of undocumented modifications resulting in slight differences between vehicles that can add days or weeks to reset. A program to use laser scanning to determine the exact composition of each vehicle could potentially reduce reset time 10 to 14 days which will support a 12-month reset turnaround for each system. The Committee, therefore, has added \$2,000,000 for scanning technology to accelerate reset.

While today's military logistics capability is unsurpassed, it still falls short on delivering the logistics effect of ensuring the Joint Force Commander's freedom of action. Great strides have been made in developing, demonstrating, and fielding effects-based planning and operations capability. Likewise, significant progress has been made in the logistics domain in developing condition-based maintenance (CBM+) concepts and technologies that will lead to a support system capable of delivering the desired effect. The Committee recognizes the need to demonstrate a capability integrating logistics intelligence and operations, and supports \$4,000,000 in the Army's Operations and Maintenance account to develop the common capabilities needed for the conversion of sensor-based status information with decision support tools necessary to convert status information to demand messages.

WESTERN HEMISPHERE INSTITUTE FOR SECURITY COOPERATION

The Committee supports the mandate of the Western Hemisphere Institute for Security Cooperation (the Institute) to be a transparent and democratic institution. To promote such transparency and democratic values, the Committee directs the Institute to release to the public the names of all students and instructors at the Institute for fiscal years 2005 and 2006. The list shall include all names, including but not limited to the first, middle, and maternal and paternal surnames, rank, country of origin, courses taken or taught, and years of attendance. In all future fiscal years, this same information shall be made available and provided to the public no later than 60 days after the end of each fiscal year.

WORKING CAPITAL FUND CASH TRANSFER

The Army Working Capital Fund (AWCF) is a revolving fund that relies on sales revenue to finance its operations. It is intended to generate adequate revenue to cover the full costs of its operations, and to finance the fund's continuing operations without fiscal year limitation. The AWCF is intended to operate on a break-even basis over time. Based on an analysis of cash balance as of May 2007, the AWCF has a cash balance of \$420,000,000 in excess

of 10 days of operation. The Committee, therefore, directs a transfer of \$420,000,000 to the Operation and Maintenance account.

OPERATION AND MAINTENANCE, NAVY

Fiscal year 2007 appropriation	\$30,954,034,000
Fiscal year 2007 budget request	33,334,690,000
Committee recommendation	32,851,468,000
Change from budget request	-483,222,000

The Committee recommends an appropriation of \$32,851,468,000 for Operation and Maintenance, Navy. The recommendation is an increase of \$1,897,434,000 above the amount appropriated for fiscal year 2007 and \$483,222,000 less than the fiscal year 2008 request.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

(DOLLARS IN THOUSANDS)

Overstatement of civilian personnel requirements		-82,000	-82,000
5% efficiency in contracted services		-214,850	-214,850

NAVY SHORE INFRASTRUCTURE TRANSFORMATION

The Committee recommends \$4,000,000 to accelerate the Navy Shore Infrastructure Transformation (NSIT) program. The NSIT program enables the Navy to identify opportunities to operate shore installations more effectively and efficiently to support fleet readiness and surge capability. This funding will allow promising ideas for improved operations to be tested and refined in pilot demonstration projects in the Navy Region Northwest prior to implementing them throughout the Navy.

NPS LABORATORY MODERNIZATION

Modern engineering laboratories are essential to ensure that the Naval Postgraduate School's (NPS) students can analyze future warfighting technologies, and gain the education needed to apply those technologies to meet emerging U.S. defense requirements. Yet, NPS laboratories are outdated. To address this issue, the Committee provides an additional \$10,000,000 under this heading to modernize NPS's laboratories and related science and engineering library holdings.

CIVILIAN PERSONNEL STRENGTH

The Navy's civilian personnel strength as of April 2007 and projected through the end of 2008 indicates that the Navy's budget for civilian personnel is overstated by \$82,000,000.

OPERATION AND MAINTENANCE, MARINE CORPS

Fiscal year 2006 appropriation	\$3,811,437,000
Fiscal year 2007 budget request	4,961,393,000
Committee recommendation	4,471,858,000
Change from budget request	- 489,535,000

The Committee recommends an appropriation of \$4,471,858,000 for Operation and Maintenance, Marine Corps. The recommendation is an increase of \$660,421,000 above the amount appropriated for fiscal year 2007 and \$489,535,000 less than the fiscal year 2008 request.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

(DOLLARS IN THOUSANDS)

RESOURCE REALIGNMENT

The Marine Corps budget request includes \$754,335,000 to support increases in force structure. Based on further analysis subsequent to the budget submission, the Marine Corps recommended a realignment of these funds for executability. The Committee recommendations reflect that realignment.

OPERATION AND MAINTENANCE, AIR FORCE

Fiscal year 2006 appropriation	\$30,458,947,000
Fiscal year 2007 budget request	33,655,633,000
Committee recommendation	31,613,981,000
Change from budget request	-2,041,652,000

The Committee recommends an appropriation of \$31,613,981,000 for Operation and Maintenance, Air Force. The recommendation is an increase of \$1,155,034,000 above the amount appropriated for fiscal year 2007 and \$2,041,652,000 less than the fiscal year 2008 request.

Transfer of excess working capital fund cash		-46,000	-46,000
5% efficiency in contracted services		-298,900	-298,900

PORTABLE ILLUMINATION SYSTEM

The Committee notes that ongoing contingency operations have increased the requirement for illumination systems to conduct base perimeter security, military police security lighting, and night vision goggle compatible lighting. Recent advancements in lighting and battery technology have produced far more light-weight, effective and affordable alternatives to the FL-1D floodlight now used by the Air Force to meet these requirements. Accordingly, the Committee recommends \$10,000,000 for the acquisition of portable illumination systems.

CIVILIAN PERSONNEL STRENGTH

The Air Force's civilian personnel strength as of April 2007 and projected through the end of 2008 indicates that the Air Force's budget request for civilian personnel is overstated by \$163,300,000. The Committee has adjusted funding accordingly.

WORKING CAPITAL FUND CASH TRANSFER

The Air Force Working Capital Fund (AFWCF) is a revolving fund that relies on sales revenue to finance its operations. It is intended to generate adequate revenue to cover the full costs of its operations, and to finance the fund's continuing operations without fiscal year limitation. The AFWCF is intended to operate on a break-even basis over time. Based on an analysis of cash balance as of May 2007, the AFWCF has a cash balance of \$46,000,000 in excess of 10 days of operation. The Committee, therefore, directs a transfer \$46,000,000 to the Operation and Maintenance account.

EXCESS ON-ORDER INVENTORY

Recently, the Government Accountability Office reported that the Air Force could save billions of dollars by terminating purchases of excess inventory of spare parts on order. Inventory that is on order is inventory which is not yet in the government's possession, but for which contracts have been awarded, or for which funds have been committed. Excess is inventory that is surplus to customer requirements, safety levels on hand to cover contract lead-times, and minimum quantities for essential items. Over the period 2002 to 2005, the Air Force purchased an average of \$1,300,000,000 per year of excess inventory.

AIR FORCE ON-ORDER INVENTORY IN EXCESS OF REQUIREMENTS

Fiscal year	\$ in thousands
2005	\$1,100,000
2004	1,800,000
2003	1,500,000
2002	800,000

In response to the GAO's findings, the DoD agreed that opportunities exist to reduce Air Force on-order inventory by putting measures in place to ensure Air Force inventory management specialists are following excess on-order termination procedures. The Committee endorses following excess on-order termination procedures

and reduces funding for the purchase of inventory in excess of requirements by \$650,000,000.

OVERSTATEMENT OF FACILITIES SUSTAINMENT, RESTORATION AND MAINTENANCE REQUIREMENTS

The Air Force has overstated Facilities Sustainment, Restoration and Maintenance (FSRM) requirements by applying inflation twice; once in revaluing plant replacement value and a second time when applying OP-32 inflation indices. The Committee, therefore, reduces the Air Force's request for FSRM by \$108,425,000 to correct for the overstatement.

OPERATION AND MAINTENANCE, DEFENSE-WIDE

Fiscal year 2007 appropriation	\$20,035,185,000
Fiscal year 2008 budget request	22,574,278,000
Committee recommendation	22,343,180,000
Change from budget request	- 231,098,000

The Committee recommends an appropriation of \$22,343,180,000, for Operation and Maintenance, Defense-Wide. The recommendation is a reduction of \$231,098,000 from the budget request, but \$2,307,995,000 over the fiscal year 2007 enacted appropriation.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide for the following program in fiscal year 2008:

(DOLLARS IN THOUSANDS)

SPECIAL OPERATIONS COMMAND

The Committee recommendation includes \$3,237,640,000 for the Special Operations Command, Operation and Maintenance activities, which is \$639,901,000 above fiscal year 2007 enacted levels and \$40,000,000 below the request. The reductions include \$10,000,000 from Intelligence and Communications, \$10,000,000 from Management and Headquarters Operations, and a general \$20,000,000 reduction based on previous unobligated balances.

DEFENSE LEGAL SERVICES AGENCY

OFFICE OF MILITARY COMMISSIONS

The Committee recommends deferring funding for the Office of Military Commissions for future consideration. These costs are solely related to the global war on terror and are more appropriately considered in that context.

DEPARTMENT OF DEFENSE DEPENDENTS EDUCATION

EXCEPTIONAL FAMILY MEMBER SERVICES

An exceptional family member is a dependent, regardless of age, who requires medical services for a chronic condition; receives ongoing services from a specialist; has mental health concerns, social problems, or psychological needs; or receives education services provided on an Individual Education Program or Individual Family Services Plan. In 1995, the Department of Defense established the Exceptional Family Member Program to identify and serve those military members with children in need of special education or medical needs.

At present, over 100,000 children of servicemembers with some form of disability live on military bases at home and abroad. Alarming over the past several years and just within the Marine Corps, a several-fold increase in the number of confirmed cases of autism has occurred. Similar trends in other conditions, such as attention deficit and hyperactivity disorders, cerebral palsy and learning disabilities, have occurred. In any family, these conditions place great stress and a financial burden on the parents, but in the military family, the hardship is magnified by separation, deployment and combat. The Committee, therefore, directs the Secretary to provide appropriate resource guides and information to military families, caregivers, education and medical personnel to improve competency in specialized educational and medical fields and to improve access to best practices in educational curricula and programs for special needs dependents.

DEFENSE SECURITY COOPERATION AGENCY

GLOBAL TRAIN AND EQUIP

The Committee has not included \$500,000,000 proposed for the global train and equip program. In authorizing the program in sections 1206 of the National Defense Act for Fiscal Year 2006 and the John Warner National Defense Authorization Act for Fiscal Year 2007, the Congress provided the authority to establish a pilot pro-

gram, the results of which Congress would take under advisement when considering or extending training and equipping authorities in the future. In addition, the authorization required the President to submit to the Congress a report on the ability of the Department of State and the Department of Defense to conduct foreign military assistance programs. The Congress has not received that report or any indication when such report will be forthcoming. Accordingly, since the Administration has failed to comply with existing law and has deprived the Congress of the full materials needed to make an informed judgment on the longer-term future of the proposal, the Committee denies the request for \$500,000,000 for the global train and equip program and defers consideration of the request until the supplemental.

DEFENSE SECURITY SERVICE

The Committee recommendation includes \$422,457,000 for the Defense Security Service (DSS), an increase of \$50,000,000 over the budget request. The DSS plays a crucial role in safeguarding our Nation's security by assuring protection of U.S. and foreign classified information in the possession of industry. The Committee notes that over the past several years, DSS experienced significant budget shortfalls, in part due to insufficient budgeting within the Department, and a six-month lag between the official budget submission and August rate adjustments by the Office of Personnel Management (OPM) which precludes reliable budgeting for the sizable premiums and surcharges that OPM may charge for each personnel security investigation. The Committee is not pleased that the Office of the Secretary underfunded this office's critical baseline requirements in the fiscal year 2008 budget request, and in doing so, exacerbated the office's ability to address its budgetary problems as it has been directed by this Committee in reports accompanying previous appropriations Acts. To mitigate the effects of OPM's late notice of charges, the Committee recommends a provision that provides that DSS shall pay rates for personnel security investigations in fiscal year 2008 that are in effect as of August 1, 2006. The additional funds recommended by the Committee shall be available solely to address critical funding shortfalls in the DSS baseline that were unaddressed in the budget request.

OFFICE OF THE SECRETARY OF DEFENSE

PERSONNEL AND READINESS

COMBATANT COMMANDER'S EXERCISE, ENGAGEMENT AND TRAINING TRANSFORMATION (CE2T2)

As a result of the Quadrennial Defense Review's effort to realign and consolidate joint exercise programs, the budget request proposed to create a new program, the combatant commander's exercise, engagement and training transformation program within the Office of the Secretary for Defense for Personnel and Readiness. This consolidation would functionally transfer funds from existing departmental sources, totaling \$233,641,000, and include the following activities:

Joint National Training Capability
 Joint Knowledge Development and Distribution Capability
 Joint Assessment and Enabling Capability
 Joint Warfighting Center at the U.S. Joint Forces Command
 Joint Deployment Training Center
 Combatant Command Headquarters Support
 Joint Training Information Management System
 Joint Training System Specialist Program
 Joint Training Facilitator Program

The Committee notes, however, that this proposal does not fully consolidate all joint training programs. The consolidation excludes the joint exercise program funded within the Joint Chiefs of Staff; the services' incremental costs associated with the joint exercise program; and the services' joint national training capability. It does contain, however, the costs associated with the planning of the joint exercise program by the combatant commanders.

The Committee believes that all joint training programs should be consolidated to achieve full efficiencies and to reduce management and administrative costs associated with the joint training portfolio. Therefore, the Committee fully consolidates all joint training programs and costs into the Combatant Commander's Exercise, Engagement and Training Transformation Program and provides within the Office of the Secretary of Defense an appropriation of \$589,143,000 to be available solely for these purposes. The Committee's action reflects the following adjustments:

Budget request	\$233,641,000
Recommended transfers:	
Joint exercise program, TJS	+245,075,000
Services joint national training capability	+63,600,000
Services joint exercise program incremental costs	+81,827,000
Recommended adjustments:	
Anticipated efficiencies and constrained program growth in the joint exercise program	- 35,000,000
TOTAL, CE2T2	589,143,000

The Committee directs the Department, in consolidating the joint training portfolio, not to increase administrative overhead costs or civilian or military positions associated with the operation and management of the joint training portfolio. The Department shall provide to the House and Senate Committees on Appropriations within 60 days after the enactment of this Act, an analysis of funds and personnel transferred to effect the consolidation.

OFFICE OF THE DEPUTY UNDERSECRETARY OF DEFENSE,
 COMPTROLLER AND CHIEF FINANCIAL OFFICER

The Committee recommends a total of \$41,293,000 for the Office of the Deputy Undersecretary of Defense, Comptroller and Chief Financial Officer, an increase of \$6,320,000 over fiscal year 2007 appropriations. The increase provided in this Act shall be available only for the costs associated with the recruitment, hiring, training, retention and pay of qualified professionals in budget execution and formulation, and shall be expended without regard to internal Department headquarters personnel ceilings. The Committee notes that the Office has struggled in fulfilling its mission in budget execution and fiscal management oversight, and has not been fully re-

sponsive to the Committee. The additional funds provided herein are intended to address these shortcomings.

ADDITIONAL ITEMS

CADET AND MIDSHIPMAN SOCIAL REPRESENTATION AND DIVERSITY AT THE SERVICE ACADEMIES

The Secretary of Defense is directed to conduct a comprehensive assessment of the recruiting efforts, admissions policies, graduation rates and career success rates (i.e., the percentage who graduate from each academy, complete their initial service obligation, and rank as of the year of the report) in terms of the social representation, particularly with regard to race, religion, sex and national origin, at the service academies. This study should cover the academies' classes over the last ten years in order to evaluate past trends and current standings. The Secretary shall provide the Committee with an action plan detailing ways to improve diversity and representation among the Nation's service academies, as appropriate. The report identified herein shall be submitted to the Committee not later than one year after the enactment of this Act.

DEPARTMENT OF DEFENSE ENERGY SECURITY TASK FORCE

The Committee recognizes the importance of the research and development of alternative and renewable energy sources within the Department of Defense (DoD) and believes that the DoD must make an increased effort to address energy concerns. The Committee commends the DoD for the establishment of the Defense Energy Security Task Force and is supportive of the initiatives that the Task Force has directed the services to undertake. However, the Committee remains concerned with the overall lack of support within the DoD to establish aggressive goals and timelines to achieve increased energy efficiency. The Committee directs the Defense Energy Security Task Force to provide a semi-annual report, with the first being delivered no later than March 1, 2008, to the congressional defense committees on the initiatives and activities that the DoD has undertaken with the goal to promote energy savings and energy efficiency across the Department.

OPERATION AND MAINTENANCE, ARMY RESERVE

Fiscal year 2007 appropriation	\$2,160,214,000
Fiscal year 2008 budget request	2,508,062,000
Committee recommendation	2,510,890,000
Change from budget request	+2,828,000

The Committee recommends an appropriation of \$2,510,890,000 for Operation and Maintenance, Army Reserve. The recommendation is an increase of \$2,828,000 over the budget request and an increase of \$350,676,000 over the fiscal year 2007 enacted appropriation.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide for the following program in fiscal year 2008:

PROCESS REFINEMENT AND IMPLEMENTATION INITIATIVE (PRI)
 FOR NATIONAL GUARD JOINT CONUS COMMUNICATIONS
 SUPPORT ENVIRONMENT (JCCSE)

The National Guard Bureau has identified Joint CONUS Communications Support Environment (JCCSE) Communications Enhancements as one of its top requirements, for which the Committee recommends \$1,600,000. The National Guard Bureau has stated that funding for furthering the JCCSE Communications enhancements is essential as it enhances the National Guard's ability to support and respond under the homeland defense/civil support mission. The Committee supports the National Guard's efforts to enhance this technology, including providing an interface for communications between federal and state agencies concerning incidents involving homeland defense and disaster mitigation.

OPERATION AND MAINTENANCE, AIR NATIONAL GUARD

Fiscal year 2007 appropriation	\$5,009,178,000
Fiscal year 2008 budget request	5,041,965,000
Committee recommendation	5,021,077,000
Change from budget request	-20,888,000

The Committee recommends an appropriation of \$5,021,077,000 for Operation and Maintenance, Air National Guard. The recommendation is a decrease of \$20,888,000 below the budget request, but \$11,899,000 over the fiscal year 2007 enacted appropriation.

Committee recommendation	---
Change from budget request	-5,000,000

The Committee recommends no funding for the Overseas Contingency Operations Transfer Account given the account's unobligated balance. The recommendation is the same as provided in fiscal year 2007.

**UNITED STATES COURT OF APPEALS FOR THE ARMED
FORCES**

Fiscal year 2007 appropriation	\$11,721,000
Fiscal year 2008 budget request	11,971,000
Committee recommendation	11,971,000
Change from budget request	---

The Committee recommends an appropriation of \$11,971,000 for the United States Court of Appeals for the Armed Forces. The recommendation is the same level as the budget request and \$250,000 over the fiscal year 2007 enacted appropriation.

ENVIRONMENTAL RESTORATION, ARMY

Fiscal year 2007 appropriation	\$403,786,000
Fiscal year 2008 budget request	434,879,000
Committee recommendation	434,879,000
Change from budget request	---

The Committee recommends an appropriation of \$434,879,000 for Environmental Restoration, Army. The recommendation is an increase of \$31,093,000 from the amount appropriated in fiscal year 2007.

ENVIRONMENTAL RESTORATION, NAVY

Fiscal year 2007 appropriation	\$302,222,000
Fiscal year 2008 budget request	300,591,000
Committee recommendation	300,591,000
Change from budget request	---

The Committee recommends an appropriation of \$300,591,000 for Environmental Restoration, Navy. The recommendation is a decrease of \$1,631,000 from the amount appropriated in fiscal year 2007.

ENVIRONMENTAL RESTORATION, AIR FORCE

Fiscal year 2007 appropriation	\$402,396,000
Fiscal year 2008 budget request	458,428,000
Committee recommendation	458,428,000
Change from budget request	---

The Committee recommends an appropriation of \$458,428,000 for Environmental Restoration, Air Force. The recommendation is an increase of \$56,032,000 from the amount appropriated in fiscal year 2007.

ENVIRONMENTAL RESTORATION, DEFENSE-WIDE

Fiscal year 2007 appropriation	\$27,885,000
Fiscal year 2008 budget request	12,751,000
Committee recommendation	12,751,000
Change from budget request	---

The Committee recommends an appropriation of \$12,751,000 for Environmental Restoration, Defense-Wide. The recommendation is the same level as requested, a decrease of \$15,134,000 from the amount appropriated in fiscal year 2007.

ENVIRONMENTAL RESTORATION, FORMERLY USED
DEFENSE SITES

Fiscal year 2007 appropriation	\$254,352,000
Fiscal year 2008 budget request	250,249,000
Committee recommendation	268,249,000
Change from budget request	+18,000,000

The Committee recommends an appropriation of \$268,249,000 for Environmental Restoration, Formerly Used Defense Sites. The adjustments to the budget for Environmental Restoration, Formerly Used Defense Sites are shown below:

Restoration of Naval Facility at Centerville Beach	\$3,000,000
Lake Erie/Touissant River Remediation	1,000,000
UXO Remediation	10,000,000
Spring Valley Remediation	4,000,000

OVERSEAS HUMANITARIAN, DISASTER, AND CIVIC AID

Fiscal year 2007 appropriation	\$63,204,000
Fiscal year 2008 budget request	103,300,000
Committee recommendation	103,300,000
Change from budget request	---

The Committee recommends an appropriation of \$103,300,000 for Overseas Humanitarian, Disaster, and Civic Aid. The recommendation is the same as the budget request and is \$40,096,000 over the fiscal year 2007 enacted appropriation. The recommendation includes \$40,000,000 for foreign disaster relief and emergency response activities, as proposed within the budget request. However, the Committee recommends that such funds shall be available until expended and be available solely for foreign disaster relief and emergency response activities. The budget request proposed that such funds be available for two years, the first year of which the funds would be for emergency response activities, and thereafter for other program requirements.

FORMER SOVIET UNION THREAT REDUCTION ACCOUNT

Fiscal year 2007 appropriation	\$372,128,000
Fiscal year 2008 budget request	348,048,000
Committee recommendation	398,048,000
Change from budget request	+50,000,000

The Committee recommendation provides a total of \$398,048,000 for fiscal year 2008, an increase of \$50,000,000 over the budget request and \$25,920,000 over the fiscal year 2007 enacted appropriation. This program, also referred to as the Cooperative Threat Reduction Program, is critical to the national security of the United

States and must be a national priority. The Committee expects that the increased funding provided in this bill will strengthen and expand existing cooperative threat reduction programs and enable the Department to develop new programs and projects.

The following table details the Committee's funding determinations:

[Dollars in thousands]

Major program	Budget request	Committee recommended
Strategic offensive arms elimination (R)	\$77,885	\$92,885
Nuclear weapons storage security (R)	22,988	39,640
Nuclear weapons transportation security (R)	37,700	37,700
Chemical weapons destruction (R)	—	1,000
Biological threat reduction (FSU)	144,489	144,489
WMD proliferation prevention (FSU)	37,986	47,986
Defense and military contacts (FSU)	8,000	8,000
Other assessments/administrative costs	19,000	19,348
New initiatives	—	7,000
Total	348,048	398,048

STRATEGIC OFFENSIVE ARMS ELIMINATION (RUSSIA)

The Committee recommends an additional \$15,000,000 over the budget request for elimination of two Delta III submarines and associated SS-N-18 missiles in Russia.

NUCLEAR WEAPONS STORAGE FACILITY (RUSSIA)

The Committee recommends a total of \$39,640,000 for nuclear weapons storage facility, an increase of \$16,652,000 over the request to accelerate nuclear warhead security work pursuant to the Bratislava Agreement. The Russian Ministry of Defense requested and the United States Government concurred in March 2007 with the expressed need for phase II to the Automated Inventory Control and Management System. The first phase of the program was built and fielded under the NWSS-Russia program. The Department initiated this program in fiscal year 2007 with direction to complete installation concurrent with completion of storage site security upgrades. Phase II will install a capability to automate the warhead and component inventories at 13 additional storage sites, bringing the total number of storage sites with this capability to 29, and will include replacing the old computers at the original sites. The Committee recommendation provides funding to complete the installation in fiscal year 2008.

CHEMICAL WEAPONS DESTRUCTION (RUSSIA)

Recently, the Department of Defense and the Government of Russia signed an agreement transferring responsibility for the completion of the Shchuch'ye chemical weapons destruction project to the Russia government. This agreement recognizes that any funding required over the current budget would be borne by Russia. The Committee notes, however, that minor related issues remain to be addressed by the parties and that the Department must maintain a strong commitment to the project's completion; main-

tain vigilant oversight of the project; and report project developments to the relevant congressional committees. For these remaining activities, the Committee recommends \$1,000,000 in fiscal year 2008.

WMD PROLIFERATION PREVENTION (FORMER SOVIET UNION)

The Committee recommends an additional \$10,000,000 for the Kazakhstan infrastructure project, for which funding requirements were not known at the time of the budget preparation.

NEW INITIATIVES

Within the funds provided, the Committee includes \$7,000,000 for new initiatives outside the scope of existing programs and projects for the cooperative threat reduction program to increase international security and threat reduction cooperation, and security and elimination of nuclear and chemical weapons and weapons-related materials that pose a threat to United States' national security interests. The Committee directs the Department to work closely with the relevant congressional committees in identifying and determining new avenues to pursue. The Committee recommendation also includes an additional \$348,000 to increase staff capacity, capabilities and resources associated with the development of new cooperative threat reduction initiatives. The funding is allocated within resources provided for other assessments and administrative costs.

UNOBLIGATED BALANCES FROM PRIOR YEARS

The Committee has learned that the Department continues to carry balances of no-year appropriations made as far back as fiscal year 1994. While the Department has plans to execute some of these balances in fiscal year 2008, the Committee directs program managers to expend these appropriations expeditiously on current program requirements or risk a rescission of those balances.

TITLE III
PROCUREMENT

The fiscal year 2008 Department of Defense procurement budget request totals \$99,623,010,000. The accompanying bill recommends \$99,608,169,000. The total amount recommended is a decrease of \$14,841,000 below the fiscal year 2008 budget estimate and is \$18,697,413,000 above the total provided for fiscal year 2007. The table below summarizes the budget estimates and the Committee's recommendations.

(DOLLARS IN THOUSANDS)

GROW-THE-ARMY AND MARINE CORPS

The President's budget request for fiscal year 2008 includes funding for additional personnel and equipment in recognition of threats to U.S. security beyond the war on terror in Iraq and Afghanistan. The budget request includes funds to increase force structure in both the Army and Marine Corps. Army Active Duty permanent end-strength will grow by 7,000 annually starting in fiscal year 2008, until reaching a total increase of 65,000 by fiscal year 2012. The number of Active Army Brigade Combat Teams will increase from 42 to 48 by fiscal year 2012. Marine Corps end-strength will grow annually by 5,000 starting in fiscal year 2008 until reaching a total increase of 27,000 by fiscal year 2011. The budget request for the Army procurement accounts includes a total of \$4,083,799,000 to support equipment requirements to grow the new Army structure. The funding was placed in five large undistributed lines with specific detailed requirements for the spreading of those funds to other lines provided to the Committee in various briefing materials. The Marine Corps funding for incremental equipment requirements totaled \$2,211,625,000, also listed in several large lines in the initial budget justification documents, with a detailed line item spread provided later. The Committee transfers funds to the detailed lines per the Army and Marine Corps briefing materials provided at the beginning of the budget review process. Additional changes have been made in various line items as the budget review process proceeded and additional information became available to the Committee. Detailed changes are displayed in the tables for each appropriation account. In a number of lines, funding appears to have been requested for the entire Grow-the-Force requirement despite the fact that new units will be formed over the time frame 2008 to 2012. The Committee cautions against funding ahead of need and encourages the Department of Defense to carefully align funding and procurement of additional equipment with the schedule for forming and outfitting new units.

JOINT STRIKE FIGHTER PRODUCTION

In the fiscal year 2008 budget request, the Air Force proposes funding for the procurement of six conventional take-off and landing (CTOL) aircraft and the Navy requested funding for procurement of six short take-off and vertical landing (STOVL) aircraft. The Committee believes that the development and production of the Joint Strike Fighter is at a critical period in the program's history. Aircraft AA-1 has completed the first phase of flight test, production of development aircraft is ramping up, and all nine of the international partners have signed production memoranda of understanding. In addition, the first flight of BF-1, the first of the flight test short take-off and vertical landing (STOVL) variants, is scheduled for next year. However, as the program matures, assembly of the development aircraft continues to slip from last year's schedule which raises questions about the ability of the contractor to meet delivery schedules for the subsequent production lots. The Committee also notes that the first flight of BF-1 is a major milestone decision tied to the contract award for the fiscal year 2008 funds. A slip in the first flight of just a few months could push the

contract award into fiscal year 2009, making the funds requested early-to-need.

While the Committee continues to be concerned about mounting delays in the production of the development aircraft and the potential for BF-1 first flight to be delayed, the Air Force and the contractor have made commitments that they will be able to produce and deliver aircraft on the current schedule. The Committee expects they will keep these commitments. At this time, any reductions in procurement quantities would cause serious perturbations in the program, with impacts extending into future years. The Committee believes this is a critical time for the program and in an effort to provide support and stability, the Committee fully funds the request for production of these aircraft.

ACQUISITION AND MANAGEMENT OF UNMANNED AERIAL SYSTEMS

The Committee notes that for some time a debate has been ongoing within the Department of Defense on the acquisition and management of unmanned aerial systems. The numbers and types of unmanned aerial systems has risen steadily since the beginning of the wars in Iraq and Afghanistan with missions expanding from reconnaissance to logistics, to communications relay, and to direct attack. Systems have become more capable and have been better integrated into overall military operations. Part of the growth in utility and combat effectiveness can be attributed to the diverse creative talents of the various military services and defense agencies. Conversely, opportunities for improved efficiency and interoperability can be lost in service centric approaches to acquiring and employing unmanned air systems. The Committee is aware that the Chief of Staff of the Air Force is seeking designation of the Department of the Air Force as executive agent for medium- and high-altitude unmanned aerial systems. The Committee is equally aware of the unanimous opposition of the other services to the Air Force proposal. A careful analysis of unmanned aerial systems acquisition and management by the Office of the Joint Chiefs of Staff and the Office of the Secretary of Defense is warranted. The Committee strongly cautions against any changes in current acquisition and operating arrangements pertaining to unmanned aerial systems until such time as the analysis is complete and the congressional defense committees have been briefed on any proposed changes.

MILITARY TIRES

The Committee understands that the Base Realignment and Closure Act of 2005 required Commodity Management Privatization of tires. The initiative would eliminate redundant supply operations, improve supply system responsiveness, and seek cost benefits through economies of scale in tire purchases. The Committee also understands that a single company was awarded the contract for aircraft tires and that company is on the winning team for ground vehicle tires. The Committee applauds well managed efforts by the Department of Defense to reduce costs and simultaneously improve support to military units in all branches of the military. The Committee is concerned, however, that the current contracting arrangement requires a very carefully crafted set of firewalls to ensure

that the contractor selected to be responsible for day-to-day management of the military tires programs under the Commodity Management Privatization initiative will not receive an unfair advantage in competing for contracts to provide tires to the centrally managed program. The Committee strongly encourages the Department of Defense, through its implementing agencies, in future competitions, to enhance oversight and avoid both unfair advantages and the appearance of unfair advantages by seeking a program management contractor who would not be a competitor to provide tires under the tire privatization initiative.

RESET AND MODERNIZATION

The Committee is concerned with improving accountability and oversight of funding provided to the military departments for equipment modernization, reset and recapitalization. Accordingly, the Committee directs that within 60 days of enactment of this Act, the Secretary of Defense shall provide to the congressional defense committees a report outlining the assumptions underlying the estimates of reset requirements to repair and replace equipment that is worn out or lost in combat. The report shall explain how recapitalization and upgrade requirements are related to war needs rather than ongoing modernization.

SPECIAL INTEREST ITEMS

Items for which additional funds have been provided as shown in the project level tables or in paragraphs using the phrase “only for” or “only to” in this report are congressional interest items for the purpose of the Base for Reprogramming (DD 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, specifically addressed in the conference report. These items remain special interest items whether or not they are repeated in a subsequent conference report.

REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS

The Committee directs the Department of Defense to continue to follow the reprogramming guidance specified in the report accompanying the House version of the fiscal year 2006 Department of Defense Appropriations Bill (H.R. 109–119). Specifically, the dollar threshold for reprogramming funds will remain at \$20,000,000 for procurement, and \$10,000,000 for research, development, test and evaluation. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative. Therefore, if the combined value of transfers into or out of a procurement (P–1) or research, development, test and evaluation (R–1) line exceeds the identified threshold, the Department of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this report.

REPROGRAMMING REPORTING REQUIREMENTS

The Committee directs the Under Secretary of the Department of Defense, Comptroller, to continue to provide the congressional defense committees quarterly, spreadsheet-based DD 1416 reports for service and defense-wide accounts in titles III and IV of this Act as required in the statement of the managers accompanying the Conference report on the Department of Defense Appropriations Act, 2006.

FUNDING INCREASES

The Committee directs that the funding increases outlined in these tables shall be provided only for the specific purposes indicated in the tables.

CLASSIFIED ANNEX

Adjustments to the classified programs are addressed in a classified annex accompanying this report.

AIRCRAFT PROCUREMENT, ARMY

Fiscal year 2007 appropriation	\$3,502,483,000
Fiscal year 2008 budget request	4,179,848,000
Committee recommendation	3,891,539,000
Change from budget request	-288,309,000

This appropriation finances acquisition of tactical and utility airplanes and helicopters, including associated electronics, electronic warfare equipment for in-service aircraft, ground support equipment, components and parts such as spare engines, transmission gear boxes, and sensor equipment. It also funds related training devices such as combat flight simulators and production base support.

The Committee recommends an appropriation of \$3,891,539,000 for Aircraft Procurement, Army, which is \$389,056,000 more than the amount provided in fiscal year 2007 and \$288,309,000 less than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

(DOLLARS IN THOUSANDS)

19	KIOWA WARRIOR Transfer from Aircraft Procurement, Army, Line 3	20,807	51,807 31,000	31,000
28	AIRCREW INTEGRATED SYSTEMS Cockpit Air Bag System (CABS)	42,727	44,727 2,000	2,000

ARMED RECONNAISSANCE HELICOPTER

The fiscal year 2008 budget request included \$468,259,000 for procurement of 37 Armed Reconnaissance Helicopters (ARH). On March 21, 2007, the ARH program office released a stop-work order as a result of an estimated over target baseline greater than 50 percent development cost growth and low-rate initial production pricing disagreements. The contractor was given 30 days to submit a plan which describes the strategy to maximize the contract performance at minimal cost to the Government and convince the Army it could complete the contract as intended. Following an Army Systems Acquisition Review Council on May 18, 2007, the Army decided to continue with the current contractor and the contractor's revised plan. The Army plan included a program delay of approximately one year with first unit equipped date slipping from the 4th quarter of fiscal year 2009 to the 4th quarter of fiscal year 2010. The Committee remains supportive of the Army's effort to field a replacement to the current armed scout helicopter. However, the Committee cautions the Army against overly optimistic product-development and integration assumptions and encourages greater attention to risk management. The Committee recommendation provides no additional procurement funds to the Armed Reconnaissance Helicopter program; transfers \$47,000,000 to Research, Development, Test and Evaluation, Army for the Armed Reconnaissance Helicopter program; and transfers \$31,000,000 to the OH-58D program for procurement of equipment necessary to sustain the continued service of the Kiowa Warrior fleet.

JOINT CARGO AIRCRAFT

The Committee recommends \$119,443,000 for Joint Cargo Aircraft instead of \$157,043,000 as proposed in the budget request. The Committee remains fully supportive of the Joint Cargo Aircraft program but understands that a source selection award protest has been filed which will delay the program between six months and one year. The recommended fiscal year 2008 funding will support three aircraft and an orderly ramp-up in production.

LIGHT UTILITY HELICOPTER

The Committee is concerned that the Army Program Objective Memorandum (POM) 2008 acquisition schedule does not provide a stable production profile for the Light Utility Helicopter, and does not capitalize on the successful performance of this program. A more rapid and stable procurement plan will fill the Army's urgent requirement sooner by retiring aging and expensive H-1s and H-58s sooner and thus making available H-60 Blackhawks for the global war on terror and other contingency operations sooner. In addition, the Army will realize operational cost savings. The Committee strongly encourages the Department of Defense to address the programmatic acquisition dips in the POM 2008 funding and place the Light Utility Helicopter program on a more rapid and stable production profile.

MISSILE PROCUREMENT, ARMY

Fiscal year 2007 appropriation	\$1,278,967,000
Fiscal year 2008 budget request	1,645,485,000
Committee recommendation	2,103,102,000
Change from budget request	+457,617,000

This appropriation finances the acquisition of surface-to-air, surface-to-surface, air-to-surface, and anti-tank/assault missile systems. Also included are major components, modifications, targets, test equipment and production base support.

The Committee recommends an appropriation of \$2,103,102,000 for Missile Procurement, Army, which is \$824,135,000 more than the amount provided in fiscal year 2007 and \$457,617,000 more than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

STRYKER

The Committee commends the Army for the overall success of the Stryker program. Strykers have performed well in combat, demonstrating reliability and survivability. The Committee understands that the schedule for the Initial Operational Test and Evaluation for the Stryker Mobile Gun System (MGS) was delayed from the second quarter of fiscal year 2007 to the first quarter of fiscal year 2008 due to a change in designated test units. Full rate production is to begin in the second quarter of fiscal year 2008. As such, the Committee recommends \$810,884,000 in base line funding for Stryker, a reduction of \$228,100,000 based on the delay in Mobile Gun System testing and production.

Additionally, the Committee has been informed that additional Stryker units would greatly benefit the Army's overall combat power, deployability, flexibility and sustainability. The Committee notes that one of the Army's unfunded requirements for fiscal year 2008 is for additional Strykers for various purposes including for maintenance floats and for certain missions in non-Stryker units. However, the Committee believes that the greatest increase in overall Army readiness can be gained by adding a Stryker brigade to the Army force structure. Accordingly, the Committee recommends an additional \$1,102,000,000 to procure an Eighth Army Stryker brigade, less the Mobile Gun Systems. The Committee directs the Secretary of the Army to provide a report to the congressional defense committees, not later than December 1, 2007, on the future force structure of the Army, including the Grow-the-Army combat and support units, and the allocation of the Eighth Stryker brigade in the total Army force structure.

PROCUREMENT OF AMMUNITION, ARMY

Fiscal year 2007 appropriation	\$1,719,879,000
Fiscal year 2008 budget request	2,190,576,000
Committee recommendation	2,215,976,000
Change from budget request	+25,400,000

This appropriation finances the acquisition of ammunition, modification of in-service stock, and related production base support including the maintenance, expansion, and modernization of industrial facilities and equipment.

The Committee recommends an appropriation of \$2,215,976,000 for Procurement of Ammunition, Army, which is \$496,097,000 more than the amount provided in fiscal year 2007 and \$25,400,000 more than the request for fiscal year 2008.

OTHER PROCUREMENT, ARMY

Fiscal year 2007 appropriation	\$7,004,914,000
Fiscal year 2008 budget request	12,647,099,000
Committee recommendation	11,217,945,000
Change from budget request	-1,429,154,000

This appropriation finances the acquisition of (a) tactical and commercial vehicles, including trucks, semi-trailers, and trailers of all types to provide mobility and utility support to field forces and the worldwide logistical system; (b) communications and electronic equipment of all types to provide fixed, semi-fixed, and mobile strategic and tactical communications; and (c) other support equipment, generators and power units, material handling equipment, medical support equipment, special equipment for user testing, and non-system training devices. In each of these activities, funds are also included for the modification of in-service equipment, investment spares and repair parts, and production base support.

The Committee recommends an appropriation of \$11,217,945,000 for Other Procurement, Army, which is \$4,213,031,000 more than the amount provided in fiscal year 2007 and \$1,429,154,000 less than the request for fiscal year 2008.

BRIDGE TO FUTURE NETWORKS

On March 5, 2007, congressional notification was made of a Nunn-McCurdy cost growth breach for the Warfighter Information Network—Tactical (WIN-T). On June 5, 2007, the Under Secretary of Defense for Acquisition, Technology and Logistics provided to the Congress certification that the WIN-T program satisfied the requirements for continuation. The WIN-T program was restructured to absorb the Joint Network Node (JNN) program as an Acquisition Category 1D Major Defense Acquisition Program. The restructured WIN-T program consists of four progressively more capable increments. The budget request for fiscal year 2008 included \$433,526,000 for Bridge to Future Networks in the base request, with an additional \$65,562,000 requested for Grow the Army, for a total request of \$499,088,000. The funds were allocated as follows: \$126,742,000 for Area Common User System modernization; and \$372,346,000 for procurement of JNN. The Army has reevaluated JNN procurement requirements and has requested that \$134,000,000 be transferred to Research, Development, Test and Evaluation, Army, Line 67, for WIN-T program stabilization. The Committee supports this transfer and provides a total of \$368,088,000 procurement funding for Bridge to Future Networks.

JOINT HIGH SPEED VESSEL

The Committee recommends \$76,000,000 in procurement funding for the Joint High Speed Vessel program instead of \$210,000,000 as proposed in the budget request. The Committee understands that the program requires \$60,000,000 for detailed design, and \$16,000,000 for long lead items in fiscal year 2008. The remainder of the funding is not needed until vessel construction begins in fiscal year 2009.

HMMWV

The Army's base budget request of \$596,627,000, plus \$389,782,000 for Grow the Army requirements, totals \$986,409,000 for HMMWVs. Virtually all the HMMWVs requested will be armored variants. The Committee understands that the driving characteristics and emergency egress procedures for the Up-Armored HMMWV are vastly different from an un-armored vehicle. The Committee strongly encourages the Army to provide Up-Armored HMMWVs for home station training once the needs of deployed units have been met. The Committee recommends total funding for HMMWVs of \$987,409,000, which includes an additional \$1,000,000 for Vehicle Emergency Escape Windows.

HEAVY EXPANDED MOBILE TACTICAL TRUCK EXTENDED SERVICE PROGRAM

The Committee recommendation includes \$107,499,000 for the Heavy Expanded Mobile Tactical Truck Extended Service Program, instead of \$197,499,000 as proposed in the budget request. The Committee believes that additional Heavy Expanded Mobile Tactical Truck Extended Service Program requirements are more properly considered as part of the Global War on Terror supplemental request.

NIGHT VISION THERMAL WEAPONS SIGHT

The Committee recommendation includes \$308,024,000 for Night Vision Thermal Weapons Sights instead of \$333,024,000 as proposed in the base budget request plus Grow-the-Army requirements. The Committee believes that \$25,000,000 of the \$230,607,000 base budget request is more properly considered as part of the Global War on Terror supplemental request.

TACTICAL OPERATIONS CENTERS

The budget request includes \$393,883,000 for Tactical Operations Centers in the base request. The Committee recommends funding of \$197,883,000, a reduction of \$196,000,000. The Committee notes that an additional \$263,709,000 is included for Tactical Operations Centers in the global war on terror supplemental request. The Committee understands that the Army's Command Post Platform program provides much needed improvements and standardization to the Army's tactical command posts. The Command Post Platform fielding will ensure that all tactical Army units share similar command and control capabilities, are interoperable, and more easily deployed and supported. The Committee supports the Army's efforts to field a standardized command post configuration to the active and reserve components of the Army. The Committee recommendation will ensure a program which, when combined with supplemental funds, will ensure prompt fielding to deploying units and a steady fielding program for non-deployed units.

FIELD MEDICAL EQUIPMENT LINE

The fiscal year 2008 budget request included \$20,000,000 in Other Procurement, Army for the new combat support hospital capabilities and field medical systems. The Committee believes that \$20,000,000 for medical field systems is more properly considered as part of the Global War on Terror supplemental request.

AIRCRAFT PROCUREMENT, NAVY

Fiscal year 2007 appropriation	\$10,393,316,000
Fiscal year 2008 budget request	12,747,767,000
Committee recommendation	12,470,280,000
Change from budget request	-277,487,000

This appropriation provides funds for the procurement of aircraft and related support equipment and programs; flight simulators; equipment to modify in-service aircraft to extend their service life, eliminate safety hazards and improve aircraft operational effectiveness; and spare parts and ground support equipment for all end items procured by this appropriation.

The Committee recommends an appropriation of \$12,470,280,000 for Aircraft Procurement, Navy, which is \$2,076,964,000 more than the amount provided in fiscal year 2007 and \$277,487,000 less than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

UH-1Y/AH-1Z

The UH-1Y/AH-1Z budget request for fiscal year 2008 was submitted prior to the approval of the fiscal year 2007 supplemental appropriation that approved a “new build” strategy and funding for the AH-1Z aircraft. The new build strategy allows aircraft to remain in the fleet during the manufacture of the new aircraft vice having to downsize the fleet during the remanufacture of aircraft. The aircraft in the fiscal year 2008 budget that would have been inducted into the remanufacture line can now be left in the fleet until replaced by new build aircraft in the future, allowing the cost of these remanufactured aircraft to be allocated towards higher priorities. Therefore, no funding is provided for the remanufacture of AH-1Z aircraft, a reduction of \$104,000,000. A total of \$414,475,000 remains available for the UH-1Y/AH-1Z program.

E-2D

The budget request contains \$57,275,000 toward the purchase of advance procurement items for the construction of three fiscal year 2009 E-2D Advanced Hawkeye aircraft. However, \$4,700,000 of this material can be delivered within the lifetime of the Aircraft Procurement, Navy appropriation of thirty-six months, thus being inappropriate to fund with advance procurement funds. These items should be considered in the fiscal year 2009 budget review, the full funding year of these E-2D aircraft. Therefore, the Committee recommendation provides funding in the amount of \$52,575,000 for the procurement of long lead items for the fiscal year 2009 Advanced Hawkeye aircraft, a decrease of \$4,700,000.

VERTICAL TAKE-OFF UNMANNED AERIAL VEHICLE

The Vertical Take-off Unmanned Aerial Vehicle (VTUAV) will provide real-time Intelligence, Surveillance and Reconnaissance (ISR) data to tactical users without the use of manned aircraft or national assets. The VTUAV program will initially satisfy mission requirements for the Littoral Combat Ship (LCS). However, the LCS program is experiencing significant program delays and only three of the six ships appropriated through fiscal year 2007 will actually be constructed. With this slowdown in the LCS program, the Committee believes it is prudent to slow the procurement of LCS-associated equipment and therefore provides no funding for the three VTUAV aircraft (and associated support equipment) requested in the budget.

F-18 SERIES

The request includes funding for the procurement of forty structural life management plan (SLMP) modification kits within operational safety improvement program (OSIP) number 11-99. These kits have a 24-month lead time to delivery. Ten of these kits are being purchased ahead of need as they will not be installed until fiscal year 2011, which is well beyond the stated 24-month delivery time. Therefore, the Committee recommendation provides funding for the 30 modification kits that will be installed in fiscal year 2010.

P-3 SERIES

The request includes funding for the procurement of twenty-seven special structural inspection kits (within Operational Safety Improvement Program number 005-05). The budget request also contains installation funding in the amount of \$20,000,000 for a portion of these kits when the kits themselves will not deliver until fiscal year 2009. Since the kits cannot be installed until they actually deliver, this installation funding is budgeted ahead of need and the Committee recommendation provides no installation funding for them.

SPARES

The request includes funding in the amount of \$85,000,000 for the procurement of spares for the F-35 Joint Strike Fighter. Fiscal year 2008 marks the initial procurement year for the Marine Corps variant of the aircraft and hinges on a flight test currently scheduled to occur late in the fiscal year. Although spares funding typically is budgeted in lockstep with the procurement of the aircraft, in this case the Committee believes procurement of JSF spares is premature due to the fact that the aircraft procurement contract will not be awarded until late in the year. Therefore, the Committee provides no funding for the procurement of F-35 spares.

WEAPONS PROCUREMENT, NAVY

Fiscal year 2007 appropriation	\$2,573,820,000
Fiscal year 2008 budget request	3,084,387,000
Committee recommendation	2,928,126,000
Change from budget request	- 156,261,000

This appropriation provides funds for the procurement of strategic and tactical missiles, target drones, torpedoes, guns, associated support equipment, and modification of in-service missiles, torpedoes, and guns.

The Committee recommends an appropriation of \$2,928,126,000 for Weapons Procurement, Navy, which is \$354,306,000 more than the amount provided in fiscal year 2007 and \$156,261,000 less than the request for fiscal year 2008.

CONVENTIONAL TRIDENT MODIFICATION

The Conventional Trident Modification (CTM) effort is being proposed by the Navy and Department of Defense as the quickest near term solution to the prompt global strike concept. All told, the Navy is requesting \$175,434,000 for the CTM effort, \$36,000,000 of which is funded in Weapons Procurement, Navy for the procurement of missile hardware, \$13,000,000 in Other Procurement, Navy for the procurement of platform modifications, and the balance of \$126,434,000 in Research, Development, Test and Evaluation, Navy for development efforts. The Committee understands that the technologies being developed for the CTM are in large part transferable to other prompt global strike initiatives. Therefore, in an effort to explore all options of prompt global strike in the most efficient manner, the Department of Defense is directed to create a prompt global strike program element within the Research, Development, Test, and Evaluation, Defense-Wide appropriation. This new program element will be under the cognizance of the Director, Defense Research and Engineering. The Committee provides \$100,000,000 for this new program element for the development of such technologies as propulsion and guidance systems, mission planning, re-entry vehicle design, modeling and simulation efforts, and launch system infrastructure. These efforts will further the Department's prompt global strike initiative while not limiting the Nation to a single option at this early stage in the concept, but still allowing for the CTM option or other such options like Advanced Hypersonic Weapon in the near future. Additionally, the Department of Defense is directed to submit a report to the Committee that discusses the technology thrusts and investment objectives and outlines the allocation of funding towards achieving these objectives. This report shall be submitted no later than January 31, 2008.

ADVANCED ANTI-RADIATION GUIDED MISSILE

The Advanced Anti-Radiation Guided Missile (AARGM) is being developed to upgrade the legacy AGM-88 High-speed Anti-Radiation Missile (HARM) with multi-mode guidance and targeting capability. The Navy has requested fiscal year 2008 funding for missiles that will be used in the test program as well as \$41,302,000 for the first run of low rate initial production (LRIP) missiles. The contract award for the LRIP missiles is predicated on the successful completion of an aggressive developmental testing program. This program structure exhibits the classic program concurrency that the Committee sees all too often throughout the Department of Defense. To reduce program concurrency, the Committee provides no funds for the AARGM LRIP missiles and their associated spares.

PROCUREMENT OF AMMUNITION, NAVY AND MARINE
CORPS

Fiscal year 2007 appropriation	\$767,314,000
Fiscal year 2008 budget request	760,484,000
Committee recommendation	1,067,484,000
Change from budget request	+307,000,000

This appropriation finances the acquisition of ammunition, ammunition modernization, and ammunition-related material for the Navy and Marine Corps.

The Committee recommends an appropriation of \$1,067,484,000 for Procurement of Ammunition, Navy and Marine Corps, which is \$300,170,000 more than the amount provided in fiscal year 2007 and \$307,000,000 more than the request for fiscal year 2008.

SHIPBUILDING AND CONVERSION, NAVY

Fiscal year 2007 appropriation	\$10,579,125,000
Fiscal year 2008 budget request	13,656,120,000
Committee recommendation	15,303,820,000
Change from budget request	+1,647,700,000

This appropriation provides funds for the construction of new ships and the purchase and conversion of existing ships, including hull, mechanical and electrical equipment, electronics, guns, torpedo and missile launching systems, and communication systems.

The Committee recommends an appropriation of \$15,303,820,000 for Shipbuilding and Conversion, Navy, which is \$4,724,695,000 more than the amount provided in fiscal year 2007 and \$1,647,700,000 more than the request for fiscal year 2008.

SHIPBUILDING

The Committee is extremely concerned with the current state of the Navy shipbuilding program. The Littoral Combat Ship (LCS), which will comprise nearly twenty percent of the 313 ship Navy, has experienced significant cost growth and delays, and the Navy has decreased its near term LCS quantities by three ships, just since the submission of the fiscal year 2008 budget. The Committee is fearful that if the same type of growth is realized on the DDG-1000 and carrier replacement programs, the shipbuilding program will be put in greater peril. The Nation's shipbuilders are continuously challenged to maintain a viable industrial base given the low ship quantities that the Navy is ordering. The shipbuilding effort is desperately in need of stability. The Committee believes that one of the biggest factors contributing to the current state of the shipbuilding program is the fact that the Navy encourages ship construction to begin prior to completing the final ship design. Additionally, the Navy shows little discipline in sticking to the design once it is complete or nearly complete and orders changes and modifications that drive the final cost of the ship upwards. Various witnesses, both from the shipbuilding industry and the Navy, in hearings before the Committee stated that construction stability can be achieved only if construction is not started until the final design is complete. Therefore, the Committee directs that future construction of ships not begin until the final ship design is complete. The Committee recognizes that this requirement may appear to increase the time from funding being appropriated until the delivery of the ship. However, this increase should not be longer than the schedule delays caused by the disruptive design changes. Additionally, the probability of completing ships at or near their budgeted cost will significantly increase by having a completed design prior to the construction phase. In an effort to achieve these desired results the Committee strongly encourages the Navy to suppress its heavy appetite for changes during construction and accomplish only those design modifications necessary for the successful completion of ship construction or due to safety concerns. Further, the Committee believes that more stability can be gained in the shipbuilding program by increasing the throughput of ships with proven design and construction processes. Therefore, funding is being added to the request for an additional LPD-17 amphibious transport dock ship, three additional T-AKE dry cargo/ammunition ships (which will buy out the requirement for the Maritime Pre-positioned Force (Future)), and advance procurement for a Virginia Class attack submarine.

As stated previously, the LCS program has been plagued by growth and schedule delays. The Committee believes that the best course of action for the LCS is to allow the program to stabilize, finalize the design, obtain actual program costs, and firm up the outyear acquisition strategy. Therefore, funding for only one ship (to be combined with funding and material from prior years) is provided for the LCS program.

VIRGINIA CLASS SUBMARINE

The Virginia Class Submarine program is one of the few Navy shipbuilding programs that appears to be on the right track. The Committee applauds the teaming relationship between the Navy and the construction yards. This relationship has resulted in the successful completion of construction after overcoming early problems in the program. However, the remaining challenge in this program is the inability to procure two submarines per year. From the outset of the program, the industrial base has been sized to accommodate the construction of two submarines per year. Largely due to affordability, the funding for a second submarine has never materialized. However, the Navy seems firmly committed to provide funding for the procurement of a second submarine beginning in fiscal year 2012. The industry portion of the team is also doing its part, by meeting the cost reduction challenge given it by the Navy. The cost benchmark of the program is to have a submarine that will cost \$2,000,000,000 (fiscal year 2005 dollars) when the program begins construction of two submarines per year. Indications are that the submarine team is on track to meet that benchmark. The program's second multi-year procurement contract should initiate in fiscal year 2009 and the Virginia Class budget has been structured under the assumption that two submarines per year will become a reality. In an effort to provide the Navy the opportunity to accelerate the procurement of two submarines per year, the Committee provides \$588,000,000 above the request for the procurement of submarine nuclear and propulsion components as well as advance construction items. The Committee directs the Navy to make provisions during negotiation of the next multi-year contract to accommodate two submarines per year prior to fiscal year 2012, in an effort to achieve the best possible pricing arrangements with industry.

LPD-17

The request includes \$1,398,922,000 for the procurement of the ninth San Antonio Class (LPD-17) Amphibious Transport Dock Ship. This ship is the final LPD-17 class ship that the Navy has in the budget. The Committee notes that the 313 ship fleet that the Navy has stated as a goal requires ten San Antonio Class ships and that this tenth ship was the highest priority listed on the Navy's unfunded priority list. In an effort to achieve stability in the Navy's shipbuilding program by increasing throughput and helping the Navy meet its stated requirement for LPD-17 Class ships, the Committee provides an additional \$1,700,000,000 for the procurement of a tenth San Antonio Class Amphibious Transport Dock Ship.

CARRIER REPLACEMENT

The Ship Self Defense System (SSDS) suite of equipment that will be installed on board the CVN-78 is a new capability system that is still under development. The \$99,546,000 estimated cost of the system is more than double the cost of the current version of SSDS that is being installed on CVN-77 and also LHA-6. While the Committee recognizes that an increased capability is bound to

bear an increased cost, it seems quite unreasonable that an incremental increase in capability will cost more than twice that of the current system. Therefore, \$79,546,000 is provided for the CVN-78 SSDS, a decrease of \$20,000,000.

LITTORAL COMBAT SHIP

The Littoral Combat Ship (LCS) was conceived as a low cost, flexible, rapidly fielded platform to counter asymmetric littoral threats and conduct coastal missions. With a stated requirement of 55 vessels, the LCS will comprise a significant portion of the Navy's 313 ship fleet. However, this program has been plagued by cost growth and schedule delays. Although many variables have contributed to this growth, the underlying reason can be attributed to concurrency between ship design and ship construction. Through fiscal year 2007, the Congress has appropriated funds for the construction of six LCS vessels. The Navy has terminated the contract for one of these ships and has proposed using the funding for two more ships to pay for cost growth within the program. The end result will be that the funding originally appropriated for six ships will actually only procure three vessels. The Committee is disturbed by the revelation that the recent efforts of the Congress to improve the Navy's shipbuilding program via the LCS program have not borne fruit. In light of the recent LCS problems, the Committee believes that the best course of action is to allow the program to stabilize, finalize the design, obtain actual program costs, and firm up the outyear acquisition strategy. Therefore, the Committee provides \$339,482,000 for the procurement of a single LCS, a reduction of \$571,000,000. This funding is to be combined with the materials purchased in prior years for the LCS whose contract was terminated, which the Committee understands to be approximately \$120,000,000. This allows the Navy to have sufficient funding/materials to purchase a ship at the proposed fiscal year 2008 LCS cost cap value of \$460,000,000.

DDG-1000 ADVANCE PROCUREMENT

The DDG-1000 Guided Missile Destroyer is being designed as a multi-mission surface combatant that is envisioned to be the centerpiece of the future Navy fleet. The request includes funding in the amount of \$150,886,000 for advance procurement for the fiscal year 2009 ship for the purchase of the Integrated Power System and Communication Suite. Although this equipment is certainly necessary for the construction of the fiscal year 2009 ship, it is being requested in fiscal year 2008 for testing to mitigate the risk for the first two ships in an effort to maintain the Navy's acquisition schedule. The Department of Defense's own Financial Management Regulation (FMR) states that "Long lead-time procurements shall be for components, parts, and material whose lead times are greater than the life of the appropriation". In this case, lead times are well within the life of the appropriation and the items are being requested strictly as a risk mitigation effort. The Committee believes this to be an improper use of advance procurement funding due to lead times of the requested equipment. However, since the Committee is already skeptical of the amount of funding budgeted for the DDG-1000 lead ships based on the Navy's track record of

estimating lead ship costs, the Committee will allow this use of advance procurement in the DDG-1000 program in an effort to minimize further perturbations to the DDG-1000 schedule. The Navy is encouraged to review the FMR regarding the proper use of advance procurement funding for future requests.

DDG-1000

The request includes funding for the procurement of hardware for the new dual band radar for installation on the first two ships of the class. Although these installations represent the lead installations for this system, the hardware is priced at more than \$35,000,000 per shipset for the comparable system being installed on board the CVN-78. In an effort to reduce this mismatch, the DDG-1000 dual band radar funding is reduced by \$15,000,000 per shipset for the first two ships for a total of \$30,000,000.

LITTORAL COMBAT SHIP OUTFITTING

Outfitting funds are used to acquire on-board repair parts, equipment and other secondary items to fill the ships initial allowances. The request includes \$4,900,000 in fiscal year 2007 and \$4,900,000 in fiscal year 2008 to satisfy outfitting requirements for LCS-3. Since the construction contract for LCS-3 was terminated by the Navy, these funds are excess to requirement. The fiscal year 2007 funds will carry forward and be used to satisfy fiscal year 2008 requirements for other ships. Therefore, the fiscal year 2008 outfitting account is reduced by \$9,800,000. Additionally, since the delivery date of LCS-4 has been delayed, the outfitting account also contains an excess of \$5,000,000 that was appropriated in fiscal year 2007 and can now be used to satisfy other ship requirements. Therefore, the fiscal year 2008 outfitting program can be reduced an additional \$5,000,000 to account for this delay.

LEASING OF FOREIGN BUILT SHIPS

The Committee is concerned with the Navy practice of bypassing the intent of the long term capital lease restrictions in the way several foreign built military sealift mission ships are leased. Essentially, these ship leases are entered into on a recurring basis which individually meet the intent of the leasing restrictions, but when considered cumulatively would violate the spirit and intent of the 1990 Budget Enforcement Act. The Committee believes this leasing practice is harming the Nation's shipyards and major ship component industrial base by indirectly denying our shipbuilders the opportunity for additional ship construction. The Committee recognizes that the ships leased by the Navy fill an important role that must be continued through the near term and into the future. Due to the long lead time nature of the shipbuilding industry, ships constructed in the United States could take several years to fill the void created if these foreign ships were removed from service by statute or other means. However, the Committee strongly believes that the American shipbuilders must take advantage of this opportunity. Therefore, the Committee directs the Navy to submit a report that outlines a plan to wean itself off the practice of leasing foreign built ships to supplement the fleet and institute the prac-

tice of utilizing only American built ships within four years. The report should contain plans to use only American built vessels for all the needs of the Navy, including the necessary budget and funding plans that may be required to accomplish this. This report should be submitted no later than March 31, 2008.

SHIP INSULATION

The Committee directs the Department of the Navy, in consultation with the National Academy of Sciences (NAS), to assess the health effects of respirable, biopersistent manufactured vitreous fibers (MVF) in insulation materials installed on Naval vessels under construction, and to submit a report on those effects to the Committee no later than January 15, 2008. In a government-funded study pursuant to contracts with the Department of Defense, NAS, in its “Review of the U.S. Navy’s Exposure Standard for Manufactured Vitreous Fibers” of 2000, analyzed the Navy’s MVF exposure standard and concluded that “the Navy’s documentation does not provide an adequate assessment of the role of fiber biopersistence in health effects”. With the installation of alternative insulation material in Naval vessels, the Committee is very concerned about the health impacts of respirable, biopersistent MVF in such insulation material, and specifically directs the Navy to assess its health effects as advised in the 2000 NAS study.

OTHER PROCUREMENT, NAVY

Fiscal year 2007 appropriation	\$4,927,676,000
Fiscal year 2008 budget request	5,470,412,000
Committee recommendation	5,298,238,000
Change from budget request	-172,174,000

This appropriation provides funds for the procurement of major equipment and weapons other than ships, aircraft, missiles and torpedoes. Such equipment ranges from the latest electronic sensors for updates of naval forces, to trucks, training equipment, and spare parts.

The Committee recommends an appropriation of \$5,298,238,000 for Other Procurement, Navy, which is \$370,562,000 more than the amount provided in fiscal year 2007 and \$172,174,000 less than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

INTEGRATED SUBMARINE IMAGING SYSTEM

The Integrated Submarine Imaging System (ISIS) provides for the modernization of submarine imaging systems to improve imaging capabilities in support of ISR requirements. The request includes funding in the amount of \$56,198,000 for the procurement of thirteen systems and 3 spares. The Navy scheduled the installation of 5 of these systems in fiscal year 2009 and 8 in fiscal year 2010. The Navy states that the system will deliver fourteen months from contract award. With a lead time of fourteen months, the procurement of the 8 systems currently scheduled for installation in fiscal year 2010 is ahead of need and can be shifted to fiscal year 2009. Therefore, \$20,698,000 is provided for the procurement of the systems and associated spares that will install or be required in fiscal year 2009.

CRUISER MODERNIZATION PROGRAM

The Cruiser Modernization program provides CG-47 class cruisers with improved warfighting capabilities and extends the mission life of the platforms. The request includes funding for the procurement of equipment to be installed during an availability period in fiscal year 2011. The specific equipment (SPQ-9B radar, Cooperative Engagement Capability hardware, AEGIS Weapons System upgrades, and MK-34 Gun Weapon System hardware) has a 24 month production lead time. Since the ship availability in fiscal year 2011 is a scheduled eleven month availability, the procurement of this equipment in fiscal year 2008 is ahead of need and can be deferred until fiscal year 2009. Therefore, no funding is provided to procure equipment for the Cruiser Modernization availability scheduled for fiscal year 2011.

ASW ENHANCEMENTS

The unfunded priority list provided by the Navy contained a request for Anti-Submarine Warfare (ASW) enhancements to improve the ASW capability of the fleet as its fourth highest priority. The Committee recognizes the importance of this critical warfighting area and strongly supports efforts to improve capability. To that end, the Committee provides an additional \$29,300,000 for efforts such as accelerating DDG-51 class sonar modernization, accelerating the procurement of Common Broadband Advanced Sonar System (CBASS) Torpedo Modification Kits, and increased development efforts for the Anti-torpedo Torpedo.

LITTORAL COMBAT SHIP MISSION MODULES

The Littoral Combat Ship (LCS) is a small surface combatant and will operate with the flexibility to be configured with one of a variety of three different mission modules depending on the tasking. The Navy plan for mission modules is to procure a total of 64 LCS modules for the 55 ship class. The request includes \$80,324,000 for the procurement of two mission modules and associated procurement support as well as \$2,900,000 for spare parts. At the time of the submission, funding had been appropriated for the procurement of six ships and six mission modules through fiscal year 2007. Since the submission of the request, only three of

these six ships will actually be constructed. The Committee believes the six mission modules purchased in prior years will be more than sufficient to satisfy near term LCS requirements considering the reduced near term LCS construction quantity. Therefore, no funding is provided for the procurement of LCS mission modules and associated spares.

SUBMARINE SUPPORT EQUIPMENT

The request includes \$17,047,000 for the procurement of 7 multi-function modular masts (MMM) for submarines. As a result of delays in the development program, the fiscal year 2007 units will not actually execute until late in fiscal year 2008. The program's budget takes this long lead time realized in fiscal year 2007 and extrapolates it to fiscal year 2008 and beyond. This will result in the units scheduled for procurement in fiscal year 2008 not being installed until fiscal year 2011. In actuality, these fiscal year 2008 units will simply award in fiscal year 2009 and deliver in time for a fiscal year 2011 installation. Since the MMM units will execute in fiscal year 2009, the Committee believes the funding should be budgeted in fiscal year 2009. Therefore, no funding is provided for the procurement of the MMM in fiscal year 2008.

Q-70 FAMILY OF DISPLAY SYSTEMS

In the early 1990s, the Committee began investigating the Navy's use of proprietary designs and closed architecture in its display systems. The Committee found this display architecture to be costly and operationally limiting in that systems failed to keep up with technology advancements associated with commercial off the shelf technologies. Consequently, this Committee (and ultimately Congress) began funding both research and development and procurement of what is now known as the Q-70 Family of Display Systems that is currently in use throughout the fleet on board aircraft, surface ships and submarines. During the ceremonial delivery of the 5000th Q-70 system in 2006, the Navy acknowledged that the Q-70's use of open architecture and commercial off the shelf technology has saved the taxpayer nearly \$1,600,000,000. The Committee applauds the Navy for its efforts and encourages future support. In this regard, the Committee provides an additional \$5,000,000 for the procurement and installation of AN/SPA-25H display system refresh kits to further the Navy's open architecture system initiatives.

MAN OVERBOARD INDICATOR PROGRAM

The Man OverBoard Indicator (MOBI) program was initiated by the Congress after being rejected by traditional Navy channels. Every year, sailors and marines fall from Navy ships resulting in fatalities, serious injuries and the loss of many operational hours conducting search and rescue missions. The MOBI allows reduced reaction time to overboard incidents, resulting in reduced search and rescue time and increased recovery rates. The Committee's support has allowed for installation of MOBI systems on nearly 90 Navy ships and has been used in the recovery of numerous sailors

who were in need of rescue or recovery. Therefore, the Committee provides \$1,000,000 to continue the MOBI program.

ENHANCED DETECTION ADJUNCT PROCESSOR

In a July 2003 mission need statement regarding force protection capability against asymmetric threats, the Navy states that small boats, recreational watercraft, and unmanned service vehicles are considered amongst the highest threats to vulnerable targets. This is primarily due to the difficulty in detecting these threats in the difficult radar environments where they typically operate. The Enhanced Detection Adjunct Processor (EDAP) fulfills the stated Navy requirement to protect personnel, equipment and facilities in the areas of surface ship defense and port and harbor security. By improving the capability of existing surface search radar systems to operate in moderate to high sea states, EDAP will significantly improve a ship's ability to prevent small boat attacks by identifying the threat before an incident occurs. Therefore, the Committee provides \$5,000,000 for the procurement of Enhanced Detection Adjunct Processors to upgrade existing surface search radars.

PROCUREMENT, MARINE CORPS

Fiscal year 2007 appropriation	\$894,571,000
Fiscal year 2008 budget request	2,999,057,000
Committee recommendation	2,500,882,000
Change from budget request	-498,175,000

This appropriation provides funds for the procurement, production, and modification of equipment, supplies, materials, and spare parts.

The Committee recommends an appropriation of \$2,500,882,000 for Procurement, Marine Corps, which is \$1,606,311,000 more than the amount provided in fiscal year 2007 and \$498,175,000 less than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

RANGE TRANSFORMATION INITIATIVE

The Committee recognizes and supports the requirement for a large-scale urban warfare training facility to ensure our combat forces conduct realistic training prior to deploying overseas. The United States Marine Corps is pursuing an initiative to develop an urban operations training complex of unprecedented capability. The Committee applauds this effort and provided funding in fiscal years 2006 and 2007 to accelerate this initiative. In fiscal year 2008, the Committee provides funding to acquire supporting capabilities to maximize the training effectiveness of this large-scale urban warfare training facility.

AIRCRAFT PROCUREMENT, AIR FORCE

Fiscal year 2007 appropriation	\$11,643,356,000
Fiscal year 2008 budget request	\$12,393,270,000
Committee recommendation	\$11,690,220,000
Change from budget request	- 703,050,000

This appropriation provides for the procurement of aircraft, and for modification of in-service aircraft to improve safety and enhance operational effectiveness. It also provides for initial spares and other support equipment to include aerospace ground equipment and industrial facilities. In addition, funds are provided for the procurement of flight training simulators to increase combat readiness and to provide for more economical training.

The Committee recommends an appropriation of \$11,690,220,000 for Aircraft Procurement, Air Force, which is \$46,864,000 more than the amount provided in fiscal year 2007 and \$703,050,000 less than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

C-17 PRODUCTION

The Committee is aware that \$2,400,000,000 for procurement of additional C-17 aircraft has been included in title XV of the House-passed National Defense Authorization Act for Fiscal Year 2008. This title authorizes supplemental appropriations for Operation Iraqi Freedom and Operation Enduring Freedom. The Committee has not addressed these fiscal year 2008 supplemental funding requirements in this legislation. Rather, the Committee will consider these funding requirements in a separate measure at a later time.

GLOBAL HAWK

The budget request includes \$514,005,000 for procurement of five Global Hawk air vehicles, sensor payloads, one Ground Segment and associated support equipment. The Committee recommends reducing the request by \$111,000,000, including two air vehicles.

The Committee has long been concerned about delays in production of Global Hawk. While a highly capable surveillance platform when in operation, delays in the production of the more advanced RQ-4B air vehicle continue. In just the last year, delivery of the first RQ-4B slipped another three months, which amounts to a fifteen month delay from its initial estimated delivery date. The program continues to struggle with supplier manufacturing problems that are significantly impacting production schedules.

The Committee notes that even if the program were able to deliver Lot 7 aircraft on the current schedule, which history indicates is unlikely, one of these aircraft would not deliver until the very end of fiscal year 2010 and the last aircraft in the lot would deliver in fiscal year 2011. The Committee has traditionally eliminated funding for such procurements as early-to-need and believes that, by reducing the procurement of air vehicles, it affords the program the opportunity to demonstrate an ability to meet production timelines.

B-2 RADAR MODERNIZATION

The currently fielded B-2 radar system, including the radar, defensive management system (DMS) and transponder, operates within a portion of the electromagnetic spectrum where the U.S. Government is designated as a secondary user. Secondary user status means that the B-2 radar system cannot interfere with primary users. Interference with primary users by a secondary user invokes statutory penalties. Due to the planned expansion of primary users in the currently fielded radar system frequency band, in the near future the B-2 will no longer be able to operate without high probability of interference with primary users. In order to ensure the continued operation of the B-2 weapon system, the B-2 radar system must be modified to allow operation in another portion of the spectrum where the U.S. Government is guaranteed primary user status. The B-2 radar must vacate its current frequency by a classified, near-term date. A program to develop and field a new radar system is ongoing.

The budget request includes \$270,649,000 for the procurement of eight production radar units. Due to technical maturity problems with the radar modernization program's antenna, the fiscal year

2007 funds for four production units have been placed on hold and will be used for other unrelated efforts. Subsequent to the submission of the fiscal year 2008 budget request, the Air Force acknowledged the impact on production caused by the technical maturity problems and requested that the funding for the procurement of units requested in the fiscal year 2008 budget be reduced. In addition, the Air Force communicated to the Committee a requirement for additional funds supporting the radar's development program beyond what was requested in the fiscal year 2008 budget. Accordingly, the Committee reduces the procurement request by \$100,000,000, including three radar units. As requested by the Air Force, the Committee provides an additional \$38,000,000 in Line 70, Research, Development, Test and Evaluation, Air Force, for the ongoing radar development program.

MISSILE PROCUREMENT, AIR FORCE

Fiscal year 2007 appropriation	\$3,914,703,000
Fiscal year 2008 budget request	5,131,002,000
Committee recommendation	4,920,959,000
Change from budget request	-210,043,000

This appropriation provides for procurement, installation, and checkout of strategic ballistic and other missiles, modification of in-service missiles, and initial spares for missile systems. It also provides for operational space systems, boosters, payloads, drones, associated ground equipment, non-recurring maintenance of industrial facilities, machine tool modernization, and special program support.

The Committee recommends an appropriation of \$4,920,959,000 for Missile Procurement, Air Force, which is \$1,006,256,000 more than the amount provided in fiscal year 2007 and \$210,043,000 less than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

NEW ADVANCED EHF (AP-CY)	0	125,000	125,000

JOINT AIR TO SURFACE STANDOFF MISSILE (JASSM)

The fiscal year 2008 budget request includes \$201,125,000 for the procurement of 210 Joint Air to Surface Standoff Missiles (JASSMs). For several years now the Committee has expressed deep reservations about the reliability of this missile. Until recently, multiple test failures indicated that, in its current production configuration, the missile was about as likely to fail a mission as it was to succeed. However, during two days of recent flight testing in which four missiles were fired, all four of the missiles failed. In addition, in February the program reported a Nunn-McCurdy unit cost breach that requires a certification by the Office of the Under Secretary of Defense for Acquisition, Technology and Logistics before the program can proceed. That certification has now been deferred twice, pending approval of a plan to implement management controls and improve reliability. Recognizing these events, the Committee provides \$167,125,000 for JASSM procurement, the same level as provided in fiscal year 2007, a reduction of \$34,000,000 from the budget request.

ADVANCED EXTREMELY HIGH FREQUENCY PROGRAM

The Committee recommends \$125,000,000 for Advanced Extremely High Frequency satellite number 4 advanced procurement, which is not included in the budget request. Additionally, the Committee recommends \$963,585,000 to fully fund the Transformational Satellite program request. The Committee is supportive of the Transformational Satellite program, and wants to ensure there is not a gap in coverage between the Advanced Extremely High Frequency program and the Transformational Satellite program.

PROCUREMENT OF AMMUNITION, AIR FORCE

Fiscal year 2007 appropriation	\$1,054,302,000
Fiscal year 2008 budget request	868,917,000
Committee recommendation	342,494,000
Change from budget request	- 526,423,000

This appropriation finances the acquisition of ammunition, modifications, spares, weapons, and other ammunition-related items for the Air Force.

The Committee recommends an appropriation of \$342,494,000 for Procurement of Ammunition, Air Force, which is \$711,808,000 less than the amount provided in fiscal year 2007 and \$526,423,000 less than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

Defer consideration to GWOT Supplemental		-112,783	
13 FLARES	274,921	168,871	-106,050
Defer consideration of fiscal year 2008 increase to GWOT Supplemental		-106,050	

FLARES

The fiscal year 2008 budget request includes \$274,291,000 for procurement of flares. Flares are dispensed from a variety of aircraft to either protect the aircraft by decoying enemy heat-seeking missiles or as an illumination source for reconnaissance, target marking, emergency night landings or search and rescue. Due to ongoing contingency operations, funding for the procurement of flares increased \$106,050,000 beyond the planned increase from fiscal year 2007 to fiscal year 2008. As such, the Committee defers the consideration of these funds until such time that it addresses fiscal year 2008 supplemental requirements for ongoing operations.

OTHER PROCUREMENT, AIR FORCE

Fiscal year 2007 appropriation	\$15,493,486,000
Fiscal year 2008 budget request	15,421,162,000
Committee recommendation	15,255,186,000
Change from budget request	- 165,976,000

This appropriation provides for the procurement of weapon systems and equipment other than aircraft and missiles. Included are vehicles, electronic and telecommunications systems for command and control of operational forces, and ground support equipment for weapon systems and supporting structure.

The Committee recommends an appropriation of \$15,255,186,000 for Other Procurement, Air Force, which is \$238,300,000 less than the amount provided in fiscal year 2007 and \$165,976,000 less than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

NATIONAL GUARD AND RESERVE EQUIPMENT

Fiscal year 2007 appropriation	\$290,000,000
Fiscal year 2008 budget request	— —
Committee recommendation	925,000,000
Change from budget request	+925,000,000

The Committee recommends an appropriation of \$925,000,000 for National Guard and Reserve Equipment, which is \$635,000,000 more than the amount appropriated in fiscal year 2007 and \$925,000,000 more than the request for fiscal year 2008. The Committee directs that no less than \$700,000,000 be provided to the Army National Guard to continue the effort begun in fiscal year 2007 to meet the “Essential 10 Equipment Requirements for the Global War on Terror” as identified by the Chief, National Guard Bureau. The Committee has also provided funds for National Guard and Reserve equipment consistent with the budget request within the procurement accounts as noted in the following table. Additionally, the Committee has added funding for Guard and Reserve equipment in excess of the request in several procurement accounts, as described elsewhere in this report.

(In thousands of dollars)

Accounts	Committee recommended;
Aircraft procurement, Army	\$224,844
Missile Procurement, Army	307,792
Procurement of W&TCV, Army	612,657
Procurement of Ammunition, Army	310,102
Other Procurement, Army	3,041,223
Aircraft Procurement, Navy	28,221
Procurement of Ammo, Navy & Marine Corps	222
Other Procurement, Navy	23,499
Procurement, Marine Corps	99,900
Aircraft Procurement, Air Force	807,628
Procurement of Ammunition, Air Force	162,446
Other Procurement, Air Force	142,960
National Guard & Reserve Equipment	925,000
TOTAL	6,686,494

DEFENSE PRODUCTION ACT PURCHASES

Fiscal year 2007 appropriation	\$63,184,000
Fiscal year 2008 budget request	18,592,000
Committee recommendation	64,092,000
Change from budget request	+45,500,000

The Committee recommends an appropriation of \$64,092,000 for Defense Production Act Purchases, which is \$908,000 more than the amount provided in fiscal year 2007 and \$45,500,000 more than the request for fiscal year 2008.

The Committee recommendation shall be distributed as follows:

Project	Amount
Beryllium Supply Industrial Base	\$11,500,000
Lithium Ion Battery Production Initiative	1,089,000
Blue Force Tracking Production Initiative	2,000,000
Power & Energy Systems Production Initiative	4,000,000
Rare Earth Magnets Production Initiative	1,986,000
Traveling Wave Tube Amplifiers for Space	2,017,000
ALON and Spinel Optical Ceramics	3,500,000

Project	Amount
Production of Affordable Direct Methanol Fuel Cells	2,000,000
SWORDS Safety Confirmation Testing	2,000,000
Photovoltaic Solar Cell Encapsulant Domestic Production Ctr	1,500,000
Global Personal Recovery System Single Card Solution	1,500,000
Flexible Aerogel Material Supplier Initiative	2,000,000
Low Cost Military GPS	2,000,000
Life Cycle Support Center for Unmanned Systems	3,000,000
Vacuum Induction Melting and Vacuum Arc Re-melting Furnace Capacity	23,000,000
Production of Miniature Compressors for Electronics and Personal Cooling	1,000,000

BERYLLIUM SUPPLY INDUSTRIAL BASE

The Committee recommendation includes \$11,500,000, an increase of \$4,000,000 over the request, for continued efforts to maintain and support the beryllium supply industrial base, including the continued design and construction of a new production plant.

TITLE IV

RESEARCH, DEVELOPMENT, TEST AND EVALUATION

The fiscal year 2008 Department of Defense Research, Development, Test and Evaluation budget request totals \$75,117,194,000. The accompanying bill recommends \$76,231,440,000. The total amount recommended is an increase of \$1,114,246,000 above the fiscal year 2008 budget estimate and is \$509,836,000 above the total provided in fiscal year 2007. The table below summarizes the budget estimate and the Committee's recommendations.

(DOLLARS IN THOUSANDS)

CRUISE MISSILE DEFENSE

The Committee remains concerned about the lack of an integrated defense of the homeland against cruise missile, other low-altitude aircraft and short range missile attacks. While the Committee endorses the plan for the Commander, United States Strategic Command, to be the Air and Missile Defense Integrating Authority, and for the United States Northern Command to retain responsibility for the Homeland Air and Cruise Missile Defense mission, the Committee believes sufficient progress has not been made with respect to developing and fielding the capabilities necessary for defense against such threats. To ensure progress toward fielding this critical capability, the Committee directs the Secretary of Defense to provide a report to the congressional defense committees within 90 days of the enactment of this Act. The report shall include a plan for development of the cruise missile defense capabilities needed, deployment of those capabilities, and integration of those capabilities into the ballistic missile defense system when feasible. The plan shall specify an organization within the Department of Defense responsible for budgeting for and developing an overall architecture definition, acquisition planning, integration and testing of recommended deployment options, and execution of the acquisition plan. This office will also be responsible for coordinating with U.S. Strategic Command and U.S. Northern Command. In addition, this plan will identify each element of the Department of Defense that will be responsible under the plan for individual element program acquisition execution in order to achieve an integrated homeland defense capability. The Committee strongly recommends leveraging both the existing ballistic missile defense command and control capabilities where applicable and the ongoing asymmetric missile defense architecture definition activity.

JOINT COMMON MISSILE/JOINT AIR-TO-GROUND MISSILE

The Joint Air-to-Ground Missile (JAGM), formerly known as the Joint Common Missile (JCM), is a fixed and rotary wing aviation-launched missile system that provides advanced line-of-sight and non-line-of-sight capabilities, including precision strike, passive, and fire-and-forget seeker technologies with increased range and lethality. JAGM provides double the range of Hellfire (16,000 v. 8,000 meters for helicopter launches) allowing flight crews to take full advantage of target acquisition and guidance systems.

The Joint Common Missile (JCM) program was designed to mitigate missile credibility gaps identified by the Joint Capabilities Integration and Development System (JCIDS). The program has performed on schedule and on budget. In December 2004, the Department of Defense terminated the program choosing to assume temporary risk, and rely on less capable legacy missiles, or other guided munitions, which address some of the same targets. In August of 2005, the Joint Requirements Oversight Council revalidated the requirement for Joint Common Missile. A technology maturation effort began in February 2005. In September 2006 the Joint Staff published Joint Requirements Oversight Memorandum 185-06, re-establishing the program. The Joint Common Missile has been renamed the Joint Air-to-Ground Missile. On May 14, 2007, the

Army notified the JCM/JAGM contractor of a “Limitation of Funds”, that no additional funding would be added to the contract, and provided the contractor with close out instructions. The Department of Defense has indicated plans for a JCM/JAGM re-competition.

Congress added funds in the Department of Defense Appropriations Acts for fiscal years 2006 and 2007 to keep the JCM program going, recognizing the advanced capabilities offered by the JCM program and also recognizing that the legacy Maverick, Hellfire and TOW missiles offered less capability and an aging inventory. The fiscal year 2008 budget request includes \$53,500,000 in Research, Development, Test and Evaluation, Army; and \$15,000,000 in Research Development, Test and Evaluation, Navy for JAGM.

The Committee encourages the Department of Defense to continue to pursue the Joint Air-to-Ground Missile program and to fully resource the program in order to provide flight crews with a weapon system that has greater engagement range, insensitive munitions technology, and improved seeker, warhead and rocket motor technologies. The Committee notes with considerable frustration that the Department of Defense has poorly managed and finally terminated a highly successful program. The Department chose to terminate a program with a validated requirement that was performing on cost and schedule, and the Department did not execute the additional funding that the Congress provided to continue this successful program.

The Committee recommendation fully funds the fiscal year 2008 request for Joint Air-to-Ground Missile. The Committee strongly encourages the Department of Defense to fully fund the Joint Air-to-Ground Missile program in future budget requests. Additionally, the Committee directs the Government Accountability Office (GAO) to conduct a review of the management by the Department of Defense of the Joint Common Missile program to include program requirements validation; program performance; the decision to terminate the program; subsequent requirements revalidation; the execution of additional funding provided by Congress in order to continue the program; and the decision to re-compete the program under a new name, Joint Air-to-Ground Missile. The GAO shall provide a report to the congressional defense committees not later than January 30, 2008.

SMALL BUSINESS TECHNOLOGY INSERTION

The Committee notes that several major acquisition programs under the purview of the Department of Defense have been plagued by cost growth. The Committee is troubled by the seemingly increasing trend in the number of programs that breach the Nunn-McCurdy thresholds each year. A clear cut cause for this trend is not immediately obvious. The Department often preaches transformation and acquisition reform in its acquisition policies and procedures, however the cost growth trend continues. The Committee recognizes that transformation combined with a smart acquisition process should result in affordable and interoperable weapon systems and platforms. Open architecture systems are an example of a transformational technology that has resulted in cost savings or avoidance to the Department. The Committee believes

that an untapped source for similar technologies and ideas is the small business community which harbors many of the Nation's innovative thinkers and creative minds. In an effort to tap this source for transformational technologies and ideas that should lead to cost reduction measures such as improved manufacturing processes, open architecture technologies, software development and a host of others, the Committee provides \$100,000,000 to the Research and Development accounts of the services. This funding will be available only to fund small business efforts for high risk/high reward component and technology development for inclusion in the major program acquisition process.

SPECIAL INTEREST ITEMS

Items for which additional funds have been provided as shown in the project level tables or in paragraphs using the phrase "only for" or "only to" in this report are congressional interest items for the purpose of the Base for Reprogramming (DD 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, specifically addressed in the conference report. These items remain special interest items whether or not they are repeated in a subsequent conference report.

REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS

The Committee directs the Department of Defense to continue to follow the reprogramming guidance specified in the report accompanying the House version of the fiscal year 2006 Department of Defense Appropriations Bill (H.R. 109-110). Specifically, the dollar threshold for reprogramming funds will remain at \$20,000,000 for procurement and \$10,000,000 for research, development, test and evaluation. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative. Therefore, if the combined value of transfers into or out of a procurement (P-1) or research, development, test and evaluation (R-1) line exceeds the identified threshold, the Department of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this report.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, ARMY

Fiscal year 2007 appropriation	\$11,054,958,000
Fiscal year 2008 budget request	10,589,604,000
Committee recommendation	11,509,540,000
Change from budget request	+919,936,000

This appropriation finances the research, development, test and evaluation activities of the Department of the Army.

The Committee recommends an appropriation of \$11,509,540,000 for Research, Development, Test and Evaluation, Army, which is \$454,582,000 more than the amount provided in fiscal year 2007 and \$919,936,000 more than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

(DOLLARS IN THOUSANDS)

The adjustments to the budget activities for Research, Development, Test and Evaluation, Army, are shown below:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
[in thousand of dollars]

R-1	Budget Request	Committee Recommended	Change from Request
2 DEFENSE RESEARCH SCIENCES	137,676	161,176	23,500
Perpetually Available and Secure Information Systems (PASIS)		5,000	
Functionally Integrated Reactive Surface Technologies (FIRST) Program		3,000	
UT-Tyler Organic Semiconductor Modeling and Simulation		1,000	
John H. Hopps, Jr. Defense Research Scholars Program		2,000	
Innovative, Computational Water-borne Pathogen Research for Chemical/Biological Detection		1,000	
Direct Methanol Fuel Cell – Battery Recharger Program		2,000	
Combat Mental Health Initiative		3,500	
Technology Commercialization and Management Network		2,000	
Cyber Threat Analytics		3,000	
Activated Nanostructures for De-icing		1,000	
3 UNIVERSITY RESEARCH INITIATIVES	64,843	74,743	9,900
University and Industry Research Centers, Automotive Research Center		2,000	
Laboratory for Engineered Human Protection (LEHP)		2,000	
Massively Broadband Wireless Integrated Circuits		1,500	
Consortium for Bone and Tissue Repair and Regeneration		1,000	
Nanomedical Technologies Research		2,500	
Imaging Research Center		900	
UNIVERSITY AND INDUSTRY RESEARCH			
4 CENTERS	84,034	96,784	12,750
NAC University Automotive Research Coalitions		2,000	
Florida Collaborative Development of Advanced Materials for Strategic Applications		950	
Transparent Nanocomposite Armor		300	
Development of Enabling Chemical Technologies for Power from Green Sources		2,000	
Center of Excellence in Industrial Metrology & 3D Imaging Research		2,000	
Research Support for Nanoscale Sciences and Technologies		1,000	
Nanotubes Optimized for Lightweight Exceptional Strength Composite Materials		3,500	
Manufacturing and Industrial Technology Center		1,000	

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
[in thousand of dollars]

R-1	Budget Request	Committee Recommended	Change from Request
5 MATERIALS TECHNOLOGY	18,614	47,989	29,375
Ultra Lightweight Metallic Armor		1,000	
Enhanced Holographic Imaging Program		2,000	
Control System for Laser Powder Deposition		350	
Improvised Explosive Device Simulation in Different Soils		425	
Next Generation Lightweight Drive System for Army Weapon Systems		2,000	
Novel Extremity Body Armor		600	
Advanced Materials Development and Manufacturing of Body Armor		2,500	
Nickel Boron Coating Technology for Army Weapons		3,000	
Lightweight Motors for the Future Combat System		2,000	
Project Kryptolite		1,500	
Advanced Lightweight Transparent Armor for Tactical Wheeled Vehicles and Force Protection		1,000	
Future Affordable Multi-Utility Materials for the Army Future Combat Systems		5,000	
Cold Spray Wear Coating for FCS		1,000	
Polymer Center of Excellence for Blast-Ballistic Protective Armor		2,500	
Cutting Tools for Aerospace Materials		1,500	
Ultra-Endurance Coating		3,000	
6 SENSORS AND ELECTRONIC SURVIVABILITY	39,826	62,826	23,000
High Brightness Diode-pumped Fiber Laser (HiBriD-FL)		2,000	
Electromagnetic Geolocation		1,000	
Urban Warfare Analysis Center (UWAC)		2,500	
Urban Warfare Knowledge Base		1,000	
Single Crystal Chemical Vapor Deposition Diamond			
Thermal Management Elements for high-energy lasers		1,000	
Terahertz Spectrometer Technology		2,000	
Network Enabled Combat Identification (CID)		3,000	
Wearable Video Capture System		1,000	
Land and Sea Special Operations (LASSO)		1,000	
One-Step JP-8 Bio Diesel Fuel		5,000	
Advanced Detection of Explosives Program		1,000	
Advanced Bonded Diamond for optical applications		2,500	
8 AVIATION TECHNOLOGY	42,567	46,567	4,000
Aircraft Structural Condition Monitoring (ASCM) for Diagnostics and Prognostics		3,000	
Composite Small Main Rotor Blades		1,000	
9 ELECTRONIC WARFARE TECHNOLOGY	16,411	25,411	9,000
Silver Fox and Manta UAS		3,000	
Electromagnetic Gun Initiative		2,000	
Integrated Information Technology Policy Analyses Research		2,000	
Battlefield Connectivity, Multi-Level Secure Networks		2,000	

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
[In thousand of dollars]

R-1		Budget Request	Committee Recommended	Change from Request
10	MISSILE TECHNOLOGY	53,038	60,538	7,500
	Materials Application Research Center		1,000	
	LENS XX Hypervelocity Ground Testing		1,000	
	Mariah II Hypersonic Wind Tunnel Development		3,500	
	Jam Resistent Technology for INS/GPS Precision		2,000	
11	ADVANCED WEAPONS TECHNOLOGY	19,342	21,342	2,000
	Remote Video Weapn Sight, USSOCOM Phase III		1,000	
	Missile Aero-propulsion Computer System (MACS) Modernization		1,000	
12	ADVANCED CONCEPTS AND SIMULATION	16,654	19,654	3,000
	Development and Simulation for Advanced Troop Protection Concepts in Urban Warfare		1,000	
	Mobile Medic Training Program		2,000	
13	COMBAT VEHICLE AND AUTOMOTIVE TECHNOLOGY	53,342	93,842	40,500
	Development of Logistical Fuel Processors to Meet Army/TARDEC/TACOM Needs		3,500	
	Tactical Metal Fabrication System (TacFab)		3,000	
	Light Utility Vehicle		1,000	
	Institute for Advanced Materials and Manufacturing Strategies (IAMMS)		3,000	
	Quick Reaction Advanced Tactical Vehicle Technology		3,000	
	Globally Accessible Manufacturing and Maintenance Activity (GAMMA)		3,000	
	DoD Hydrogen PEM Fuel Cell Medium/Heavy Duty Vehicle Demonstration Program		4,000	
	Extreme-Condition Vehicle Tribology for Military Vehicle Technology at Northwestern University		1,000	
	Secure Mobile MANET System		1,500	
	Digital Engine/Hydraulic Valve Actuation Technology		1,000	
	Advanced Digital Hydraulic Hybrid Drive System		2,500	
	Center for Advanced Vehicle Design and Simulations		2,000	
	Hydraulic Hybrids, Advanced Materials, and Multi-fuel Engine Research (HAMMER) program		5,000	
	Spring-Suspended Airless Tires for Convoy Protection		5,000	
	Rapid Up-Armor Synthesis and Crashworthiness Design for Improved Soldier Survivability		2,000	

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
[in thousand of dollars]

R-1		Budget Request	Committee Recommended	Change from Request
14	BALLISTICS TECHNOLOGY	55,014	64,014	9,000
	Small Unmanned Aerial Vehicles (UAVs) and Sensors		500	
	Multi Mission Armored Watercraft (MMAW) Project		1,500	
	Advanced Composite Materials Research for Air and Ground Vehicles		2,000	
	Beneficial Infrastructure for Rotorcraft Risk Reduction Demonstrations (BIRRRD)		1,000	
	Super High Accuracy Range Kit - 105mm Artillery Technology		4,000	
	CHEMICAL, SMOKE AND EQUIPMENT DEFEATING TECHNOLOGY			
15	TECHNOLOGY	2,235	7,735	5,500
	Paint Shield for Protecting People from Microbial Threats		2,000	
	Systems Biology Biomarker Molecular Toxicology Initiative		2,000	
	Rapid and Accurate Pathogen Identification/Detection (RAPID) Program		1,500	
17	WEAPONS AND MUNITIONS TECHNOLOGY	40,469	87,669	47,200
	CZT-Based Liquid Explosives Detections Systems		1,700	
	SLEUTH Tungsten Heavy Alloy Penetrator and Warhead Development		2,000	
	Effects Based Operations Decision Support Services (EBODSS)		1,000	
	Renewable Energy Testing Center		2,500	
	Long Range Initiator		2,000	
	Hospital Emergency Planning and Integration (HEPI) Letterkenny Army Depot and Chambersburg Hospital		2,000	
	Advanced Materials & Process for Armament Structures (AMPAS)		7,000	
	Remotely Operated Weapons and Sensor Technology		4,000	
	Energetic Formulation and Fabrication		5,000	
	Developmental Mission Integration		5,000	
	Mitigation of Energetics Single Point Failures		3,000	
	Strategic Technology Development and Integration for the Joint Munitions and Lethality Life Cycle Management Command		1,000	
	Green Armaments/RangeSafe		2,000	
	Armament System Engineering and Integration Initiative (ASEI2)		3,000	
	Advanced Rarefaction Weapon Engineered System		2,000	
	Rapid Response Force Protection System (Remote Weapons Platform)		4,000	

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
[in thousand of dollars]

R-1	Budget Request	Committee Recommended	Change from Request
18 ELECTRONICS AND ELECTRONIC DEVICES	43,391	88,791	45,400
Non-Flammable, High Energy Density, Low temperature Warrior Battery		1,000	
Advanced Portable Power Institute (APPI)		2,000	
Miniature Cooling Unit for Electronic Devices		1,000	
Revolutionary Self-Sealing Plastic Enclosure for Military Batteries		2,000	
Defense Modernization and Sustainment Initiative, Rochester Institute of Technology		2,000	
Roll-to-Roll Microelectronics Manufacturing in Support of the Flexible Display Initiative		2,000	
Low Signature Portable Fuel Cell Power Systems		3,000	
Mega-Capacity Hybrid Chemistry Lithium Primary Portable Batteries		1,000	
Manufacturing Technology Development of Advanced Components for High Power Solid-State Lasers		2,000	
Micromachined Switches in Support of Transformational Communications Architecture		2,000	
Lithium Ion Metal Battery		2,000	
Soldier Portable Solid Fuel Hydrogen Generator Cartridge		3,000	
Silicon Carbide MOSFETs for Electric Power Systems		2,000	
High-Frequency, High-Power Electronic and Optoelectronic Devices on Aluminum Nitride (AlN)		2,000	
Novel Zinc Air Power Sources for Military Applications		2,500	
Ceramic Membrane - 10(X) More Energy for Battery Systems		1,000	
Miniature Tactical Energy Systems Development		3,000	
Advanced Lithium-Carbon Monofluoride Combat Portable Batteries		4,900	
Advanced Wearable Microcell Power System Process Development		2,500	
Bio-Battery		1,500	
Soldier Fuel Cell System		1,000	
Blast Risk Analysis and Mitigation Application (BRAMA)		2,000	

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
[in thousand of dollars]

R-1	Budget Request	Committee Recommended	Change from Request
19 NIGHT VISION TECHNOLOGY	24,391	40,391	16,000
Next Generation Communications System		1,000	
Standoff Improvised Explosive Device Detection Program (SIEDP)		3,000	
Enhanced Micro-Image Display Technology		2,000	
Power Efficient Microdisplay Development for US Army Night Vision		3,000	
Personal Miniature Thermal Viewer (PMTV)		1,000	
Hyperspectral Sensor for UAV Surveillance/Targeting		2,000	
Miniaturized Sensors for Small and Tactical Unmanned Aerial Vehicles (MINISENS)		1,000	
Robotics Workforce and Military Curriculum		1,000	
Next Generation FPA Development		2,000	
HUMAN FACTORS ENGINEERING			
21 TECHNOLOGY	17,426	44,426	27,000
High Optempo Performance Soldier Training		2,000	
LWI Training-Based Collaborative Research		25,000	
22 ENVIRONMENTAL QUALITY TECHNOLOGY	15,809	25,309	9,500
Hawaii Undersea Chemical Weapons Assessment Program		5,500	
Biowaste to Bioenergy: Phase Two		2,000	
Vanadium Technology Program		2,000	
COMMAND, CONTROL, COMMUNICATIONS			
23 TECHNOLOGY	22,215	38,465	16,250
Integrated Lightweight Electronics Shelter		1,750	
Dynamically Managed Data Dissemination		1,000	
Advanced 3-D Locator (A3DL) Technology		4,000	
C4ISR Integrated Digital Environment Service Model (IDESM)		2,000	
Development of a High Performance Computing System Based on a Modern High Speed Switch Fabric		1,000	
Research of Advanced Communications Technologies for enhanced secure, mobile, networked communications		1,000	
Lightweight Theater Transportable TOC		3,000	
Intelligent Distributed Command & Control (IDC2)		2,500	
COMPUTER AND SOFTWARE			
24 TECHNOLOGY	5,368	11,368	6,000
Biologically Inspired Security Infrastructure for Tactical Environments		1,000	
Ruggedized Cylinders for Expandable Mobile Shelters		5,000	
25 MILITARY ENGINEERING TECHNOLOGY	51,120	54,620	3,500
C-RAM Armor Development		1,500	
Nano-Crystalline Cement for High Strength, Rapid Curing Concrete with Improved Blast Resistance		2,000	

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
 [in thousand of dollars]

R-1	Budget Request	Committee Recommended	Change from Request
27 WARFIGHTER TECHNOLOGY	23,083	33,583	10,500
Chemical And Biological-Protective Hangars (CAB-PH)		2,000	
Modular Ballistic System for Force Protection		4,000	
Active and Smart Packaging for Combat Feeding		1,000	
Advanced Fabric Treatment for Flame Resistant Uniforms		1,000	
Injection Molded Ceramic Body Armor		500	
Center for Geosciences/Atmospheric Research (CG/AR)		2,000	
28 MEDICAL TECHNOLOGY	76,544	183,334	106,790
Advanced Bio-engineering for Enhancement of Soldier Survivability		2,000	
Armed Services Gynecological Cancer Health Program		2,000	
BioFoam Protein Hydrogel for Battlefield Trauma		2,500	
Bone Health and Military Medical Readiness Program		1,000	
Cancer Prevention through Remote Biological Sensing		2,000	
Cedars-Sinai Core Imaging Center		3,000	
Center for Advanced Surgical and Interventional Technology (CASIT)		1,000	
Center for Vaccine Scale-Up Process Research (Phase I)		1,000	
Center for Injury Biomechanics		4,000	
Center for Ophthalmic Innovation		2,000	
Center for Research on Integrative Medicine for the Military (CRIMM)		1,000	
Center for Resuscitation Research		3,000	
Cold Spring Harbor Laboratory Women's Cancer Genomics Center		4,000	
Cone Beam CT Scanners		4,000	
Copper Air Quality Program		2,000	
Defense Against Viral Infection (DAVI)		2,000	
Disposable Unit Dose Drug Pumps for Anesthesia and Antibiotics		2500	
Electronic Technology Infrastructure in Support of Military Missions		2,000	
Epigenetic Disease Research		2,000	
Fibrin Adhesive Stat (FAST) Dressing		2,000	
Impact of Intensive Lifestyle Modification on Chronic Medical Conditions		2,500	
Improving Musculoskeletal Health & Function		1,500	
Injury Research Center-Ryder Trauma Center		3,500	
Integrated Medicine, Communications, Compassion, Chronic Care Program		2,000	
Mass Decontamination and Biosecurity Initiative		350	
Medical Image Database Holographic Archiving Library System (MIDHALS)		1,000	
Medical Resources Conservation Technology Pilot Energy Cost Control Evaluation (PECCE)		1,500	

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
 [In thousand of dollars]

R-1	Budget Request	Committee Recommended	Change from Request
Military Interoperable Digital Hospital Testbed		5,000	
Molecular Switch Vaccines for Biodefense and Cancer		2,000	
Nanofabricated Bioartificial Kidney and Bioterrorism		1,000	
Neuroscience Research Consortium to Study Spinal Cord Injury		1,000	
Neutron/Hadron Particle Therapy		2,000	
Orthopedic Implant Design and Manufacturing for Traumatic Injuries		2,000	
Oxygen Diffusion Dressings for the Accelerated Healing of Battlefield Wounds and Burns		500	
Pain and Neuroscience Center Research Center		7,000	
Plant-based Vaccine Research		2,500	
Prevention of Radiation Injury by use of Statins		2,000	
Proton Therapy		3,000	
Rapid Vaccine Discovery Technology		2,500	
Rapid Wound Healing Technology Development Project		1,500	
Rare Blood Program		1,000	
Regional NMR Facility		1,000	
Remote Robotic Teleproctoring to Promote Rapid Surgical Skills Acquisition		1,000	
Respiratory Biodefense Initiative		1,000	
Storage Area Network		1,000	
Synchrotron-Based Scanning Research		5,000	
Synthetic Malaria Vaccine		3,000	
Technological Regional Center of Excellence for PTSD		2,000	
West Nile Virus Vaccine		940	
Wound Infection Treatment Program		1,500	
29 WARFIGHTER ADVANCED TECHNOLOGY	47,065	57,495	10,430
High Pressure Airbeam Shelter Cost Reduction Technology Improvements		1,800	
Flame & Thermal Protection for Individual Soldier		2,000	
Remote Environmental Monitoring and Diagnostics in the Perishables Supply Chain		5,630	
Extended Shelf Life Produce for Remotely Deployed Forces		1,000	
30 MEDICAL ADVANCED TECHNOLOGY	53,274	287,474	234,200
Acellular Matrix Constructs for Military Casualties		2,500	
Advanced Diagnostic and Therapeutic Digital Technologies		2,000	
Advanced Non-Invasive Glucose Monitoring		1,000	
Advanced Protomics Program		1,500	
Advanced Regenerative Medicine (ARM) Skin Cell Therapies, Limb and Digit Treatment		2,000	
Advanced Regenerative Medicine Development		2,500	
Advanced Restoration Therapies in Spinal Cord Injuries		1,000	
Alliance for NanoHealth		4,000	

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
[in thousand of dollars]

R-1	Budget Request	Committee Recommended	Change from Request
ALS Therapy Development for Gulf War Illness Research		1,500	
Angiogenesis and Tissue Engineering Research		1,500	
Assistive Technology Research Center at the National Rehabilitation Hospital		3,000	
National Oncogenomics and Molecular Imaging Center		3,000	
Battlefield Exercise and Combat Related Spinal Cord Injury Research		3,000	
Bioceramic Bones for Battlefield Trauma		1,500	
Blood Safety and Decontamination Technology		2,500	
Cartledge Infuser		1,000	
Cellular Therapy for Battlefield Medical Care		1,000	
Center for Genetic Origins of Cancer		3,000	
Center for Integration of Medicine and Innovative Technology (CIMIT)		10,000	
Christian Sarkine Autism Treatment Center		2,500	
COG/USOC Pediatric Cancer Center		2,000	
Composite Tissue Allotransplantation Research and Clinical Program		2,000	
Cooperative International Neuromuscular Research Group (CINRG)		6,500	
Dangerous Pathogens DNA Forensics Center		2,500	
Electronic Medical Records Technology Infrastructure		1,500	
Feeding Tube for Trauma and Burn Patients		1,000	
Health Science Center Rapid Bio-Pathogen Detection Technology		2,000	
Human Genomics, Molecular Epidemiology and Clinical Diagnostics for Infectious Diseases		1,500	
Immersive Medical Environment for Distributed Intuitive Consultation (iMedic)		2,000	
Indiana-Ohio Traumatic Amputation Rehabilitation Research		1,000	
Integrated Functional Materials Initiative		1,000	
Joint Medical Simulation Technology Research & Development Center		1,600	
Medical Information Network Decision Support (MINDS) Tool Development		1,000	
Medical Surveillance Initiative-Clinical Looking Glass		1,000	
Military Biomaterials Institute for Acute and Regenerative Care		1,000	
Military Low Vision Research		2,000	
Military Molecular Medicine Initiative		15,000	
Mobile Integrated Diagnostic and Data Analysis System (MIDDAS)		1,000	
Multifunctional Protective Packaging Technology		3,000	
National Bioterrorism Civilian Medical Response Center (CIMERC)		2,500	
National Center of Ophthalmology Training and Education at Wills Eye Health System		2,500	
National Functional Genomics Center		7,500	
National Warfighter Health Sustainment Study		1,000	

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
 [in thousand of dollars]

R-1	Budget Request	Committee Recommended	Change from Request
Neural Control of External Devices		1,000	
Neurofibromatosis (NF) Research		10,000	
Neuroimaging & Neuropsychiatric Trauma in US Warfighters		5,000	
Neurotoxin Exposure Treatment Research Program		25,000	
Norfolk State University Center for Systems and Modeling & Simulation		3,100	
Nursing Clinical Simulation Lab		1,000	
Obesity and Cancer in the Military Medical Research Program at WRAMC		2,000	
PBRC Four Tasks to Address Personnel Readiness and Warfighter Performance		2,500	
Pediatric Brain Tumor & Neurological Disease Institute		2,000	
Peoria Robotics		1,000	
Personalized Orthopedic Implants for Combat Trauma Induced Orthopedic Surgery		500	
Portable Burn Debridement Laser Demonstration		3,000	
Portable Digital X-Ray		4,000	
Host Pathogen Interaction Study		1,000	
Prader-Willi Syndrome (PWS) Research		1,500	
Proton Beam Therapy		10,000	
Ration Packaging Materials and Systems for Meals Ready-to-Eat		5,000	
Remote Bio-Medical Detector		1,000	
Gulf War Illness Peer Reviewed Research		7,500	
Rural Health - CERMUSA		2,000	
Severe Battlefield Injury Treatment (Note: Technology to Prevent Compartment Syndrome)		2,000	
Spinal Muscular Atrophy (SMA) Research Program		4,000	
Technologies for Metabolic Monitoring (TMM)		2,000	
Telehealth Access and Infrastructure Expansion		2,000	
Telepharmacy Robotic Medicine Device Unit		2,000	
The Institute for the Advancement of Bloodless Medicine		2,000	
Three Dimensional Projection Environment for Molecular Design and Surgical Simulation		1,000	
Tracking of Health of Soldiers with Advanced Implantable Nanosensors		2,000	
National Eye Evaluation and Research Network - Clinical Trial of Orphan Retinal Degenerative Disease		3,000	
Ultra High-Speed MEMS Electromagnetic Cell Sorter		3,000	
Ultra-High Resolution Display for Army Medicine		4,500	
UMDNJ Cancer Initiative (Note: includes continuation of the Gallo Prostate Cancer Center)		3,000	
Warfighter Cancer Care Engineering		1,500	
Wireless Electronic Patient Records, WPIC-Personal Information Center		2,000	

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
 [In thousand of dollars]

R-1	Budget Request	Committee Recommended	Change from Request

FUTURE COMBAT SYSTEMS

The Army began the Future Combat Systems (FCS) program in May 2003 with the aggressive and somewhat risky strategy of defining requirements and maturing technology simultaneously. The fiscal year 2008 request includes nearly \$3,600,000,000 in research, development, test and evaluation funding, an increase of \$137,000,000 above the fiscal year 2007 appropriated amount. The budget request for FCS includes for the first time procurement funds in the amount of \$99,606,000 for facilitization and long lead items. FCS requested fiscal year 2008 funding supports the first of three planned technology spin outs which will deliver the benefits of FCS technology to other Army elements. Milestone 1 spin outs are planned to include Network Capability Integration kits for Abrams Tanks, Bradley Fighting Vehicles and HMMWVs. In preparing the fiscal year 2008 request, the Army reduced FCS funding by \$266,800,000, seeking efficiencies and improved management oversight in cost control. The Army also deferred four of the original 18 systems: Class II and Class III unmanned aerial vehicles; intelligent munitions systems; and large unmanned ground vehicles. A recurring concern in the program has been the demonstrated levels of technology readiness. However the Government Accountability Office reports that about 80 percent of FCS technologies can be assessed as mature, double the number assessed as mature a year ago. The Committee remains committed to Army force modernization and understands that the centerpiece and primary effort in Army modernization is FCS. The Committee encourages the Army to enhance program stability and achieve advancements in technology to benefit the current and near term force. The Committee recommends full funding of \$99,606,000 for FCS procurement. The Committee recommends reductions totaling \$433,800,000 in FCS research, development, test and evaluation lines as detailed in the Project Level Adjustment tables. The Committee recommends an additional \$25,000,000 for FCS in System of Systems Engineering and Program Management for Small Business Technology Insertion.

TACTICAL METAL FABRICATION SYSTEM (TAC FAB)

The Committee recognizes the successful implementation of the Army's Rapid Manufacturing System, formerly known as Mobile Parts Hospital, but is concerned that the program is unable to address the significant need for cast parts for tanks, vehicles, guns and other weapons systems. The Committee is aware that Soldiers and Marines in Iraq have expressed a need for a mobile foundry, co-located with deployed forces. The Committee understands that the Tactical Metal Fabrication System would provide a mobile, containerized foundry to serve as companion and complement to the Rapid Manufacturing System. The Committee also understands that such an asset can significantly contribute to easing current reset demands. The Committee, therefore, recommends an additional \$3,000,000 in PE 0602601A, Research, Development, Test and Evaluation, Army, Combat Vehicle and Automotive Technology, for the Tactical Metal Fabrication System.

WARFIGHTER INFORMATION NETWORK—TACTICAL

On March 5, 2007, congressional notification was made of a Nunn-McCurdy cost growth breach for the Warfighter Information Network—Tactical (WIN-T). On June 5, 2007, the Under Secretary of Defense for Acquisition, Technology and Logistics provided to the Congress certification that the WIN-T program satisfied the requirements for continuation. The WIN-T program was restructured to absorb the Joint Network Node (JNN) program as an Acquisition Category 1D Major Defense Acquisition Program. The restructured WIN-T program consists of four progressively more capable increments. The Committee fully supports the Army's efforts to stabilize the WIN-T and JNN programs through one overarching Acquisition Strategy emphasizing an incremental approach. The Committee understands that each element of the restructured WIN-T/JNN program will report via a separate Selected Acquisition Report for enhanced accountability. The budget request included \$222,296,000 for WIN-T. The Committee recommends \$356,296,000, an increase of \$134,000,000. The additional funds are transferred from Other Procurement, Army line 67 for JNN procurement in order to stabilize the WIN-T program and the incremental approach for the combined JNN and WIN-T program.

GLOBAL COMBAT SUPPORT SYSTEM—ARMY

The Committee recommends \$94,689,000 for Global Combat Support System—Army, instead of \$129,689,000 as proposed in the budget request. GCSS-A is the tactical component of the Single Army Logistics Enterprise, and will implement a comprehensive logistics automation solution for deployed units that provides streamlined supply operations, maintenance operations, property accountability and logistics management, and integration procedures. The Committee notes, however, that the Army is encountering problems in executing the acquisition and test strategies for this program, which will likely affect the Army's ability to execute funds in a timely manner.

HYBRID PROPELLANT FOR MEDIUM AND LARGE CALIBER AMMUNITION

The Committee recommends \$8,000,000 in Research, Development, Test and Evaluation, Army, Line 108, only to continue the development of a HYBRID propellant to be used in small, medium and large caliber munitions. HYBRID propellant combines the properties of chemical deterrents with the geometry of perforated propellants, resulting in the highest possible ballistic performance that can be tailored to meet specific gun applications. This additional funding will allow the Army to qualify the 105mm Artillery XM350 HYBRID propellant charge and support the Extended Range Guided Munitions propellant testing and shipboard qualification. The XM350 HYBRID propellant charge will replace both the M200 and the M67 propellant charges with one propellant due to the HYBRID propellant's flexibility and superior ballistic properties and thereby simplify battlefield management. Furthermore, successful implementation of the HYBRID propellant will significantly reduce the Army logistics burden and the corresponding procurement and life cycle costs via the highest possible muzzle veloc-

ity for extended ranges/lethality, lighter barrels with less recoil and extended wear characteristics.

RAPID RESPONSE SYSTEM FOR ACTIVE PROTECTION OF GROUND AND AIR VEHICLES

The Committee recommends \$5,000,000 in Research, Development, Test and Evaluation, Army, Line 46, only for the Rapid Response System for Active Protection of Ground and Air Vehicles. The technology underlying this initiative has been demonstrated as part of the Overwatch Advanced Concept Technology Demonstration and the Weapons Surveillance System program. The Committee recognizes the need to extend this technology in order to provide a Rapid Response Sensor System for immediate detection, warning and cueing as part of an active protection countermeasure system for protecting ground and airborne vehicles against projectile and missile threats. This program will provide key advances in hostile fire detection and classification in support of air and ground vehicle protection and next generation hostile fire detection for manned and unmanned platforms.

RESEARCH OF ADVANCED COMMUNICATIONS TECHNOLOGIES

The Committee recommends \$5,000,000 in Research, Development, Test and Evaluation, Army, Line 23, PE 0602782A, only for the research of advanced communications technologies for the purpose of providing the Army with enhanced capabilities for secure, mobile, networked communications, assured information delivery and presentation of information that enables decision making. This activity includes but is not limited to Project 779 (C2 and Platform Electronic technology) and Project H92 (Communications Technology).

TACTICAL WHEELED VEHICLE COMPOSITE COMPONENT WEIGHT REDUCTION PROGRAM

The Committee has provided an additional \$3,000,000 in Research, Development, Test and Evaluation, Army, line 33, to design, optimize, fabricate, and test composite components that can be applied to the Army's Family of Medium Tactical Vehicles (FMTV) and other interim vehicles in order to decrease weight and increase protection. The Army's Tank Automotive Command has completed work with industry to make a lighter and stronger composite hood for the HMMWV as well as other components for light vehicle platforms. Technology and processes used in this program will be applied to components on FMTV trucks and other vehicles that are being created for the purpose of replacing the HMMWV in combat situation. Larger logistics trucks have the same weight reduction and protection enhancement needs as the HMMWV. Such a program will enhance the military's industrial base and result in an Army fleet of larger and better armored trucks.

NEUROTOXIN EXPOSURE TREATMENT RESEARCH PROGRAM

The Committee is aware that the United States Army Medical Research and Materiel Command (USAMRMC) is conducting excellent research in investigating the underlying biologic mechanisms

and therapeutic interventions of neuro-degenerative effects caused by deployment, environmental, and occupational exposures. Therefore, the Committee recommends \$25,000,000 for the continuation of this vital research into Parkinson's and other neurological disorders through collaborative work between the military, a non-profit organization and an academic laboratory with distinguished scientific credentials in this field.

PAIN AND NEUROSCIENCE CENTER RESEARCH PROGRAM

The Committee is aware of the exceptional research outcomes of the Pain and Neuroscience Center Research Program, including the development of protocols for appropriate peripheral nerve block catheterization use for severe peripheral limb loss and damage, and the development of a comprehensive research, clinical and educational program to address a variety of neurological conditions with military and civilian relevance, focusing on acute neurology and neuromuscular disorders. The Committee continues to support this effort to increase the quality of battlefield and post-deployment pain management and neurological care.

SUSTAINING SUPPORT FOR ONGOING OPERATIONS

The Committee is concerned that the Army's C4ISR research, development, test and evaluation acquisition and sustainment assets are suffering workforce attrition at an unacceptably high rate. To ensure the continuity of support for ongoing operations, the Committee provides robust funding for critical C4ISR research and development to ensure that workforce attrition is mitigated. The Committee will examine both the reasons for and potential solutions to this attrition problem.

UNDERSEA UXO CLEANUP

The Committee applauds the Army's efforts to characterize, monitor and clean up undersea munitions off the coast of Oahu. The Committee encourages the Army to capitalize on the work being done by the University of Hawaii and their partners to conduct investigations and clean up at ocean dumping sites around the United States. The Committee believes that the Hawaii Undersea Chemical Weapons Assessment Program off Pearl Harbor and the coast of Wainae could serve as a template for work at other undersea clean up sites and encourages the Army to monitor project activities for possible use of duplication elsewhere.

ADVANCED AFFORDABLE TURBINE ENGINE (AATE)

The Committee is aware that the Army recently conducted a competition for design and concept demonstration of an advanced technology 3000 shaft horsepower turbine engine for the application to H-60 Black Hawks, AH-64 Apaches and other future force rotorcraft. The Committee, however, is concerned that the Army's current engine development approach may lead to selecting a single engine supplier prematurely. For these reasons, the Committee believes it is imperative for the Army to pursue and alternate engine design and test demonstration from a second manufacturer. As such, the Committee directs that, from funds available under

this heading, \$5,000,00 may be used to pursue an alternative AATE engine.

CVP DESIGN

The Committee is aware that the “CVP Design for Commonality Across Platforms and Applications” technology, which is designed to greatly reduce wear and tear on vehicle transmissions, is proving to be an effective tool to reduce consumption. The Committee encourages the Army to provide fundign for this activity in fiscal year 2008.

NATIONAL EYE EVALUATION AND RESEARCH NETWORK

The Committee recognizes the need for a nationwide infrastructure to provide readily accessible evaluation and testing for serious retinal injuries and diseases, as well as a central repository for clinical trial research data. The Committee directs \$3,000,00 to be appropriated for use by the National Eye Evaluation and Research Network, to be managed by the National Neurovision Research Institute.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, NAVY

Fiscal year 2007 appropriation	\$18,673,894,000
Fiscal year 2008 budget request	17,075,536,000
Committee recommendation	17,718,624,000
Change from budget request	+643,088,000

This appropriation provides funds for the research, development, test and evaluation activities of the Department of the Navy, which includes the Marine Corps.

The Committee recommends an appropriation of \$17,718,624,000 for Research, Development, Test and Evaluation, Navy, which is \$955,270,000 less than the amount provided in fiscal year 2007 and \$643,088,000 more than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST	
RESEARCH, DEVELOPMENT, TEST & EVAL, NAVY				
BASIC RESEARCH				
1	UNIVERSITY RESEARCH INITIATIVES.....	76,637	93,137	+16,500
2	IN-HOUSE LABORATORY INDEPENDENT RESEARCH.....	16,556	16,556	---
3	DEFENSE RESEARCH SCIENCES.....	374,052	380,052	+6,000
	TOTAL, BASIC RESEARCH.....	467,245	489,745	+22,500

The adjustments to the budget activities for Research, Development, Test and Evaluation, Navy, are shown below:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
(in thousands of dollars)

R-1	Budget Request	Committee Recommended	Change from Request
1 UNIVERSITY RESEARCH INITIATIVES	76,637	93,137	16,500
Blast and Impact Resistant Composite Structures for Navy Ships		2,000	
Cell-Based Sensors for Chemical Threats		1,000	
Center for Hetero-Functional Materials		2,500	
Center for Nanoscience and Nanomaterials		1,500	
CSTARS (Center for Southeastern Tropical Advanced Remote Sensing)		2,500	
Microwave Ferrites and Multifunctional Integrated Circuits		1,000	
National Security Training		2,000	
Research Infrastructure for the Applied Physics Laboratory (UW)		4,000	
3 DEFENSE RESEARCH SCIENCES	374,052	380,052	6,000
Energetics Technology Center/Energetics S&T Workforce		3,000	
Mobile Ad Hoc Data Communications for Unmanned Systems		1,000	
ONAMI Nanoelectronics and Nanometrology Initiative		1,000	
Stand-off Biochemical Agent Detection		1,000	
4 POWER PROJECTION APPLIED RESEARCH	83,419	102,019	18,600
Aging Evaluation of Advanced Materials Used for Military Aircraft		1,500	
Clustered Millimeter Wave Imaging Sensors		600	
High Energy Conventional Energetics (Phase One)		6,000	
High Power Free Electron Laser Development for Naval Applications		2,500	
Marine Mammals - Effects of Sound		1,000	
Modular Payload Systems		2,500	
Multifunctional Oxide Materials, Their Application and Devices (MFMA)		2,500	
Strike Weapon Propulsion (SWEAP)		2,000	
5 FORCE PROTECTION APPLIED RESEARCH	155,936	167,436	11,500
Advanced Simulation Tools for Aircraft Structures Made of Composite Materials		2,000	
Critical Composites Technologies for Enabling Special Operations Forces Medium Range Endurance Craft		1,000	
High Temperature Super Conducting Magnetic Energy Storage		500	
High Toughness Aluminum Structures		1,500	
Integration of Electro-Kinetic Weapons into Next Generation of Navy Ships		1,000	
Optical Recognition Protocol for Biologics Detection		1,000	
Planar Solid Oxide Fuel Cell System Demonstration at UTC SimCenter		3,500	
Stabilized Laser Designation Capability		1,000	
6 MARINE CORPS LANDING FORCE TECHNOLOGY	26,785	27,785	1,000

BONE MARROW REGISTRY

The Committee provides \$31,500,000, to be administered by the C.W. Bill Young Bone Marrow Donor Recruitment and Research Program, also known and referred to within the Naval Medical Research Center as the Bone Marrow Registry. Funds appropriated for the C.W. Bill Young Bone Marrow Donor Recruitment and Research Program shall remain available only for the purposes for which they were appropriated, and may only be obligated for the C.W. Bill Young Bone Marrow Program. This DoD donor center has recruited more than 420,000 DoD volunteers, and provides more marrow donors per week than any other donor center in the Nation. More than 2,575 service members and other DoD volunteers from this donor center have provided marrow to save the lives of patients. The Committee is aware of the continuing success of this national and international life-saving program for military contingencies and civilian patients, which now includes more than 6,600,000 potential volunteer donors. Further, the Committee encourages agencies involved in contingency planning to continue to include the C.W. Bill Young Bone Marrow Donor Recruitment and Research Program in the development and testing of their contingency plans. DD Form 1414 shall show this as a congressional special interest item, and the Committee directs that all of the funds appropriated for this purpose be released to the C.W. Bill Young Bone Marrow Recruitment and Research Program within 60 days of enactment of the Department of Defense Appropriations Act, 2008.

INNOVATIVE METHODS FOR SHIPBUILDING CONSTRUCTION

The Committee supports the Navy's efforts to design, develop, and implement high performance steel sandwich panel construction techniques in order to improve quality and performance and to reduce procurement costs for Navy ships. Therefore, the Committee provides an additional \$2,000,000 to Program Element 0603123N for continuing the development and qualification of advanced steel sandwich panels for ship construction.

SYSTEM OPEN ARCHITECTURE/SMALL BUSINESS TECHNOLOGY
INSERTION

While the Committee recognizes that the Navy has made considerable strides in the recent past towards open architecture combat systems, the overall effort could certainly be accelerated and improved. The Chief of Naval Operations has stated that after witnessing the cost-effective advantages gained through the Acoustic Rapid Commercial off-the-shelf Insertion/Advanced Processor Build Program (ARCI/APB) within the submarine community, the Navy needs to work to rapidly transition this concept to other acquisition programs. The Committee applauds the Navy's attempt to expand the ARCI concept from submarines to other platforms in an effort to obtain the same types of advantages and efficiencies now being seen in the submarine force. Examples include, but are not limited to, modularity, rapid technology insertion, software re-use, improved manufacturing processes, and cost reductions. The Committee believes that a key requirement of tactical systems is the

sharing of information across networks in a standard, consistent method via the use of middleware. Navy Open Architecture doctrine calls for a standard-based, middleware solution to be used for data communication. The Committee strongly recommends the use of virtualization that will allow disparate systems to co-exist on a single computer, thus allowing shipboard computer rooms/processing centers to be smaller in size, consume less power, and provide more processing capability in a more efficient and effective way.

To that end, the Committee believes a valuable resource in this area, the small business community, is oftentimes overlooked in the hectic world that is the Department's acquisition process. The small business community can provide fresh, creative, and innovative solutions to the Navy's requirements. Especially in light of cost growth recently realized in such ship construction programs as the Littoral Combat Ship, the Committee enthusiastically supports efforts to reduce the burgeoning cost of ship acquisition using the aforementioned ARCI concept as a blueprint. In an effort to reduce the cost of ship acquisition, the Committee provides \$25,000,000 in program element 0604558N and \$25,000,000 in program element 0603553N to fund small business efforts for high risk/high reward components of surface ship and submarine combat system development.

UNIQUE IDENTIFICATION OF TANGIBLE ITEMS

In 2003, the Department of Defense mandated that by 2010, the Services must be able to locate, control, and value assets which should lead to lower cost of item management, improved operational readiness, and reduced burden on the workforce through increased productivity and efficiency. To date, no Service or agency has developed a single standard approach to meet this mandate. The Unique Identification of Tangible Items program will satisfy the Department's mandated requirements for item identification and tracking. Therefore, the Committee provides \$8,500,000 to accelerate the development of the Unique Identification of Tangible Items program.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, AIR FORCE

Fiscal year 2007 appropriation	\$24,516,276,000
Fiscal year 2008 budget request	26,711,940,000
Committee recommendation	26,163,917,000
Change from budget request	-548,023,000

This appropriation finances the research, development, test and evaluation activities of the Department of the Air Force.

The Committee recommends an appropriation of \$26,163,917,000 for Research, Development, Test and Evaluation, Air Force, which is \$1,647,641,000 more than the amount provided in fiscal year 2007 and \$548,023,000 less than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST	
RESEARCH, DEVELOPMENT, TEST & EVAL. AF				
BASIC RESEARCH				
1	DEFENSE RESEARCH SCIENCES.....	258,259	265,759	+7,500

KC-135 TANKER REPLACEMENT

The fiscal year 2008 budget request includes \$314,454,000 for the development of a follow-on tanker to replace the aging KC-135. The Committee notes that \$70,000,000 was provided in fiscal year 2007 for systems development and demonstration and a replacement platform selection and that few funds have been obligated. Therefore, a substantial amount of the fiscal year 2008 request is early to need and would not be executed. Accordingly, the Committee reduces funding provided for the development program by \$200,000,000. The Committee is very supportive of proceeding with the development and procurement of a tanker to replace the KC-135 and as such has transferred these funds into the Tanker Replacement Transfer Fund. The Secretary of the Air Force may transfer these funds from this account only for the purposes of proceeding with a tanker acquisition program.

JOINT STRIKE FIGHTER F-136 ENGINE DEVELOPMENT

The fiscal year 2008 budget request includes no funding for development of the F-136 as an alternate engine within the Joint Strike Fighter program. The Committee recommends \$480,000,000 for this effort. These funds have been added to the Air Force and Navy's respective Joint Strike Fighter development lines.

The statement of the managers accompanying the conference report on the Defense Appropriations Act for fiscal year 2007 directed the Department of Defense to fund the continued development of both the F-135 and F-136 engines in the fiscal year 2008 budget request. The Committee notes that this direction was disregarded by the Office of the Secretary of Defense. In exercising its power of the purse, the Committee made the necessary program adjustments to the fiscal year 2008 budget request to fully fund the requirement for this engine development program. The fiscal year 2009 requirement for the F-136 is estimated to be \$350,000,000. The Committee again directs the Department of Defense to fully fund this development program in the fiscal year 2009 budget submission.

JOINT STRIKE FIGHTER DEVELOPMENT

Elsewhere in this report, the Committee notes the criticality of this period in the Joint Strike Fighter program. The Committee has expressed concerns about delays in systems design and development with regard to production of the test aircraft. The Committee believes that additional funding for development efforts at this time could help get production of these aircraft back on track and prove extremely beneficial to the long-term health of the program. Accordingly, the Committee recommends an additional \$200,000,000 divided between the Air Force and Navy research and development lines to support developmental activities. These funds may be used for unfunded information assurance requirements driven by current Department of Defense policy updates, or in support of investment into new and more efficient manufacturing techniques that can drive down aircraft cost and production schedule.

PERSONNEL RECOVERY SYSTEMS (CSAR-X)

The budget request includes \$290,059,000 for the development of a replacement helicopter for the HH-60 combat search and rescue mission. The Committee notes that the contract award for this program is under a bid protest and as such been delayed significantly. Accordingly, the Committee reduced funding for the request by \$100,000,000.

The Committee is concerned about the selection criteria and process by which this program has proceeded to source selection. The Committee directs the Secretary of the Air Force to submit a report to the congressional defense committees detailing the source selection criteria and how they were established. The report shall include the significant factors of the Request for Proposal (RFP) that determined the source selection, their importance, and how each of the respondents to the RFP was rated against those factors. The report shall be delivered not later than September 15, 2007.

JOINT STARS SYERS DEMONSTRATION

The Committee recommends an additional \$16,000,000 to develop and conduct a demonstration of the Senior Year Electro-optical Reconnaissance System (SYERS) on a Joint STARS aircraft. This funding is provided to address an Air Force requirement for combat identification capability on Joint STARS to reduce the sensor-to-shooter timeline. The Joint STARS Operational Requirements Document dated December 2004 requires a Combat Identification (CID) System/Function that entails the process of attaining an accurate characterization of detected objects in the joint battle space and provides decision quality data to the operator so the timely application of military options and weapons resource can occur. Demonstrating the integration of an electro-optical sensor on the Joint STARS will accelerate the ability to provide a combat identification capability to this platform. The current target identification concept of operations is a slow process measured in hours dependent on coordination of multiple intelligence, surveillance and reconnaissance systems. The Committee believes that just as targeting pods have become huge force multipliers by turning fighter jets into non-traditional intelligence, surveillance and reconnaissance assets, the ability of the Joint STARS to not only locate but also provide combat identification of ground threats will be a similar advancement and reduce the sensor-to-shooter timeline from hours to minutes.

SPACE PROGRAMS

The combination of space systems and modern weaponry provides today's armed forces with unprecedented lethality at a reduced risk to the lives of our nation's soldiers, sailors, airmen and marines. The present national security space acquisition system, however, is replete with cost overruns and schedule delays to the point that some observers have described space acquisition as broken.

In almost every area of national security space, this year's budget requests both space programs that have not yet been fielded, and at the same time requests alternative, or improved, programs

for the same mission area. In missile warning, the first Space Based Infrared System (SBIRS) has not yet launched, and the Air Force is requesting funds for the Alternative Infrared Satellite System (AIRSS) program. In global positioning, the first Global Positioning Satellite (GPS) IIF has not yet launched, and the Air Force is requesting funds for the GPS III program. In communications, the first Advanced Extremely High Frequency (AEHF) and Wideband Gapfiller Satellite (WGS) satellites have not yet launched, and the Air Force is requesting funds for the Transformational Satellite (TSAT) program. The high cost of space acquisition is only increased when the acquisition decision is to cut off a program after spending billions of dollars to procure three, two, or even a single satellite and to spend billions of dollars to start a new acquisition. New programs might look good on paper from a cost and schedule standpoint, but that is only because they have not yet entered the riskiest periods of a satellite's life during integration, testing, launch, and on-orbit initialization. For all national security space programs, a commitment to realistic budgets and schedules that reflects the realities of engineering, manufacturing, launch and the harshness of the space environment is necessary.

The Committee's review of the Department's space program has led to the conclusion that funding for some of these follow-on systems is requested ahead of need. The Committee recommends \$75,877,000 for the Alternative Infrared Satellite System, which is a reduction of \$155,000,000 below the request for fiscal year 2008. The Alternative Infrared Satellite System is investigating sensor improvements over the current Space Based Infrared System, and should continue these research and development efforts.

The Committee recommends \$507,226,000 for the Global Positioning System III, which is a reduction of \$80,000,000 below the request for fiscal year 2008. The Global Positioning System III acquisition plan includes a selection of a single contractor to build eight satellites for block A of the program and a future decision for block B and block C, which could include a decision to purchase satellites from a different contractor. Additionally, there is debate within the Department of Defense regarding the requirements and timing for each of the blocks of the program. The current acquisition strategy should be modified in a way that ensures a healthy competition for the objective program of block C and maximum flexibility for blocks A and B.

SPACE SITUATIONAL AWARENESS AND OPERATIONALLY RESPONSIVE SPACE

The Committee recommends \$197,604,000 for Space Situational Awareness Systems, which is \$9,800,000 more than the request for upgrades to the Space Fence. In addition, the Committee recommends \$62,604,000 for Space Control Technology, which is \$25,000,000 more than the request for fiscal year 2008. These additional funds are for Self Aware-Space Situational Awareness described in the Air Force unfunded priorities list.

The Committee is strongly supportive of the ongoing efforts to improve space situational awareness, especially in light of the recently successful Chinese anti-satellite test. Accordingly, the Committee has provided these additional funds to improve the efforts

to understand both natural and man-made threats to space systems.

The Committee also recommends \$107,032,000 for Operationally Responsive Space, which is an increase of \$20,000,000. Of the \$20,000,000 increase, \$6,100,000 shall be used as described in the classified annex. In light of the recent Chinese anti-satellite test, the Committee provides these additional funds for efforts associated with responsive launch, payload, and bus development.

SPACE RADAR

The Committee recommends \$186,000,000 for the Space Radar program, which is consistent with the fiscal year 2007 level of funding and has transferred the funding back to the same Air Force Space Radar program element as fiscal year 2007. The Committee remains concerned about the cost, value and maturity of planning for the Space Radar program. For example, the Department of Defense and the Intelligence Community have not decided on issues such as responsibilities for transitioning to operations and integration with other space and ground capabilities. The total program cost, estimated by the Congressional Budget Office as \$35 billion to \$50 billion, is not affordable, the program has significant technical challenges, the moving target indicator mission is currently performed by airborne platforms, and the program is a lower priority than other Defense requirements.

BALLISTIC MISSILE RANGE SAFETY TECHNOLOGY

The budget request includes \$15,145,000 in PE 605860F, Rocket Systems Launch Program, but does not include funding for the Ballistic Missile Range Safety Technology (BMRST) program. The Committee has long supported and continues to support BMRST. The Committee recommends \$20,145,000 in PE 605860F, an increase of \$5,000,000 for BMRST.

The Committee believes that BMRST has developed the opportunity for a more flexible national launch complex and is disappointed with the lack of effort shown by the Department of the Air Force to assess the long term value in this project. As a result, the Committee encourages the Department of Defense's Executive Agent (EA) for Space to pursue this opportunity and any other that will provide the Nation with minimal and adaptable launch infrastructure requirements, mobile range options, and launch-on-demand capabilities that fully leverage GPS metric tracking and integrated communications relays. The Committee also encourages the EA for Space, through the newly established Operationally Responsive Space Office, to explore ways that the BMRST program would enable the goals of responsive launch.

Additionally, the Committee directs the Secretary of the Air Force to perform the certification process for the BMRST system on the eastern range with respect to full integration of telemetry and command destruct capabilities. The Committee directs that of the funds available in PE 305182F, Spacelift Range Systems, \$10,000,000 is restricted from obligation or expenditure until 30 days after notification to the congressional defense committees of the results from the BMRST certification process.

MEDSTARS INTEGRATION WITH THE GLOBAL COMBAT SUPPORT SYSTEM

The Committee recommends \$2,000,000 for MEDSTARS Integration with the Global Combat Support System. As the exposure to non-conventional weapons increases, servicemembers need a front-line medical system to enable the rapid relay, monitoring and assessment of the health of the combat force. The MEDSTARS program is the only system that digitally collects information using a state-of-the-art digital data tablet system that can integrate with the Theater Trauma Registry program and the Global Combat Support System (GCCS). The Committee urges the rapid development and deployment of this system to best provide our forces with instant access to health care information and trauma reports.

WIDE AREA SURVEILLANCE RADAR INTEGRATION ON JOINT STARS

The Committee is concerned about the need for future radar capability enhancements for the Joint STARS fleet and understands that the Air Force is considering a plan to transition the wide area surveillance (WAS) radar from the E-10 program to Joint STARS. The Committee believes the Air Force should prepare a formal cost estimate and schedule for a program to integrate the WAS on Joint STARS for consideration by the congressional defense committees.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION,
DEFENSE-WIDE

Fiscal year 2007 appropriation	\$21,291,056,000
Fiscal year 2008 budget request	20,559,850,000
Committee recommendation	20,659,095,000
Change from budget request	+99,245,000

The appropriation provides funds for the research, development, test and evaluation activities of the Department of Defense for defense-wide activities.

The Committee recommends an appropriation of \$20,659,095,000 for Research, Development, Test and Evaluation, Defense-Wide, which is \$631,961,000 less than the amount provided in fiscal year 2007 and \$99,245,000 more than the amount requested for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST	
RESEARCH, DEVELOPMENT, TEST & EVAL, DW				
BASIC RESEARCH				
1	DTRA UNIVERSITY STRATEGIC PARTNERSHIP BASIC RESEARCH..	5,000	8,000	+3,000
2	DEFENSE RESEARCH SCIENCES.....	---	10,800	+10,800
2	FORCE HEALTH PROTECTION.....	152,622	152,622	---
3	GOVERNMENT/INDUSTRY COSPONSORSHIP OF UNIVERSITY RESEAR	---	8,000	+8,000
4	DEFENSE EXPERIMENTAL PROGRAM TO STIMULATE COMPETITIVE	5,878	5,878	---
5	NATIONAL DEFENSE EDUCATION PROGRAM.....	44,372	44,372	---
6	CHEMICAL AND BIOLOGICAL DEFENSE PROGRAM.....	72,003	101,253	+29,250
	TOTAL, BASIC RESEARCH.....	279,875	330,925	+51,050
APPLIED RESEARCH				
ADVANCED DEVELOPMENT INITIATIVES FUNDS.....				
7	INSENSITIVE MUNITIONS--EXPLORATORY DEVELOPMENT.....	15,542	11,542	-4,000
8	MEDICAL FREE ELECTRON LASER.....	---	2,000	+2,000
9	HISTORICALLY BLACK COLLEGES & UNIV (HBCU) SCIENCE.....	15,150	15,150	---
10	LINCOLN LABORATORY RESEARCH PROGRAM.....	29,524	29,524	---
11	INFORMATION AND COMMUNICATIONS TECHNOLOGY.....	229,739	235,139	+5,400
12	COGNITIVE COMPUTING SYSTEMS.....	179,728	179,728	---
13	BIOLOGICAL WARFARE DEFENSE.....	99,137	85,466	-13,671
14	CHEMICAL AND BIOLOGICAL DEFENSE PROGRAM.....	305,327	348,777	+43,450
15	HUMAN, SOCIAL AND CULTURE BEHAVIOR MODELING (HSCB) APP	7,300	---	-7,300
16	TACTICAL TECHNOLOGY.....	374,717	365,341	-9,376
17	MATERIALS AND BIOLOGICAL TECHNOLOGY.....	306,022	306,022	---
19	ELECTRONICS TECHNOLOGY.....	213,529	203,929	-9,600
21	WEAPONS OF MASS DESTRUCTION DEFEAT TECHNOLOGIES.....	182,416	222,916	+40,500
23	SPECIAL OPERATIONS TECHNOLOGY DEVELOPMENT.....	21,282	31,782	+10,500
24	SOF MEDICAL TECHNOLOGY DEVELOPMENT.....	2,388	2,388	---
25	INSENSITIVE MUNITIONS - ADVANCED DEVELOPMENT.....	6,000	---	-6,000
	TOTAL, APPLIED RESEARCH.....	1,987,801	2,089,704	+101,903
ADVANCED TECHNOLOGY DEVELOPMENT				
27	SO/LIC ADVANCED DEVELOPMENT.....	32,669	41,669	+9,000
28	COMBATING TERRORISM TECHNOLOGY SUPPORT.....	76,276	109,276	+33,000
29	COUNTERPROLIFERATION INITIATIVES--PROLIF PREV & DEFEAT	213,240	220,740	+7,500
30	BALLISTIC MISSILE DEFENSE TECHNOLOGY.....	118,569	101,569	-17,000
31	JOINT DOD-DOE MUNITIONS TECHNOLOGY DEVELOPMENT.....	23,488	23,488	---

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST	
32	ADVANCED AEROSPACE SYSTEMS.....	86,385	70,385	-16,000
33	SPACE PROGRAMS AND TECHNOLOGY.....	224,551	217,803	-6,748
34	CHEMICAL AND BIOLOGICAL DEFENSE PROGRAM - ADVANCED DEV	232,302	278,602	+46,300
35	JOINT ELECTRONIC ADVANCED TECHNOLOGY.....	9,219	9,219	---
36	JOINT CAPABILITY TECHNOLOGY DEMONSTRATIONS.....	194,352	196,352	+2,000
37	NETWORKED COMMUNICATIONS CAPABILITIES.....	40,000	---	-40,000
38	BIOMETRICS SCIENCE AND TECHNOLOGY.....	8,000	---	-8,000
39	HUMAN, SOCIAL AND CULTURE BEHAVIOR MODELING (HSCB) ADV	9,000	---	-9,000
40	DEFENSE-WIDE MANUFACTURING SCIENCE AND TECHNOLOGY PROG	10,000	3,500	-6,500
41	JOINT ROBOTICS PROGRAM/AUTONOMOUS SYSTEMS.....	11,256	16,756	+5,500
42	GENERIC LOGISTICS R&D TECHNOLOGY DEMONSTRATIONS.....	18,736	33,736	+15,000
44	STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM.....	68,874	68,874	---
45	MICROELECTRONIC TECHNOLOGY DEVELOPMENT AND SUPPORT....	---	28,000	+28,000
46	JOINT WARFIGHTING PROGRAM.....	11,060	11,060	---
47	ADVANCED ELECTRONICS TECHNOLOGIES.....	220,548	224,048	+3,500
48	SYNTHETIC APERTURE RADAR (SAR) COHERENT CHANGE DETECTI	6,500	---	-6,500
49	ADVANCED CONCEPT TECHNOLOGY DEMONSTRATIONS.....	---	2,000	+2,000
50	HIGH PERFORMANCE COMPUTING MODERNIZATION PROGRAM.....	187,587	189,587	+2,000
51	COMMAND, CONTROL AND COMMUNICATIONS SYSTEMS.....	256,868	256,868	---
52	LAND WARFARE TECHNOLOGY.....	24,711	19,011	-5,700
53	CLASSIFIED DARPA PROGRAMS.....	188,188	188,188	---
54	NETWORK-CENTRIC WARFARE TECHNOLOGY.....	151,641	144,641	-7,000
55	SENSOR TECHNOLOGY.....	196,462	196,462	---
56	GUIDANCE TECHNOLOGY.....	127,777	127,777	---
57	DISTRIBUTED LEARNING ADVANCED TECHNOLOGY DEVELOPMENT..	13,282	13,282	---
58	SOFTWARE ENGINEERING INSTITUTE.....	29,851	29,851	---
60	QUICK REACTION SPECIAL PROJECTS.....	109,514	112,414	+2,900
61	JOINT EXPERIMENTATION.....	112,017	108,717	-3,300
62	JOINT WARGAMING SIMULATION MANAGEMENT OFFICE.....	37,837	27,837	-10,000
63	TEST & EVALUATION SCIENCE & TECHNOLOGY.....	62,889	62,889	---
64	TECHNOLOGY LINK.....	2,234	4,234	+2,000
65	SPECIAL OPERATIONS ADVANCED TECHNOLOGY DEVELOPMENT....	29,935	42,435	+12,500
	TOTAL, ADVANCED TECHNOLOGY DEVELOPMENT.....	3,145,818	3,181,270	+35,452
	DEMONSTRATION & VALIDATION			
66	NUCLEAR AND CONVENTIONAL PHYSICAL SECURITY EQUIPMENT R	38,060	45,060	+7,000

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST
68 RETRACT LARCH.....	22,365	22,365	---
69 JOINT ROBOTICS PROGRAM.....	11,860	16,860	+5,000
71 ENVIRONMENTAL SECURITY TECHNICAL CERTIFICATION PROGRAM	33,199	40,699	+7,500
72 BALLISTIC MISSILE DEFENSE TERMINAL DEFENSE SEGMENT....	962,585	1,032,585	+70,000
73 BALLISTIC MISSILE DEFENSE MIDCOURSE DEFENSE SEGMENT...	2,520,064	2,233,864	-286,200
74 BALLISTIC MISSILE DEFENSE BOOST DEFENSE SEGMENT.....	548,759	498,108	-50,651
75 CHEMICAL AND BIOLOGICAL DEFENSE PROGRAM.....	57,160	62,160	+5,000
76 BALLISTIC MISSILE DEFENSE SENSORS.....	778,163	611,663	-166,500
SPACE SURVEILLANCE & TRACKING SYSTEM.....	331,525	286,167	-45,358
77 BALLISTIC MISSILE DEFENSE SYSTEM INTERCEPTOR.....	227,499	372,853	+145,354
78 BALLISTIC MISSILE DEFENSE TEST & TARGETS.....	586,150	586,150	---
86 BALLISTIC MISSILE DEFENSE C2BMC.....	258,913	460,703	+201,790
87 BALLISTIC MISSILE DEFENSE HERCULES.....	53,658	52,824	-834
88 BALLISTIC MISSILE DEFENSE JOINT WARFIGHTER SUPPORT....	48,787	50,235	+1,448
89 BALLISTIC MISSILE DEFENSE JOINT NATIONAL INTERGRATION.	104,012	79,099	-24,913
80 BALLISTIC MISSILE DEFENSE SYSTEMS CORE.....	482,016	431,788	-50,228
81 SPECIAL PROGRAMS - MDA.....	323,250	198,250	-125,000
82 AEGIS BMD.....	1,059,103	1,116,103	+57,000
84 MULTIPLE KILL VEHICLES.....	271,151	274,251	+3,100
85 BALLISTIC MISSILE DEFENSE SYSTEM SPACE PROGRAMS.....	27,666	17,666	-10,000
92 HUMANITARIAN DEMINING.....	14,013	14,013	---
93 COALITION WARFARE.....	14,047	10,047	-4,000
94 DEPARTMENT OF DEFENSE CORROSION PROGRAM.....	4,983	4,983	---
95 JOINT CAPABILITY TECHNOLOGY DEMONSTRATIONS.....	2,960	2,960	---
91 REGARDING TRENCH.....	2,000	2,000	---
96 HUMAN, SOCIAL AND CULTURE BEHAVIOR MODELING (HSCB) RES	5,700	---	-5,700
97 JOINT SYSTEMS INTEGRATION COMMAND (JSIC).....	19,375	19,375	---
98 JOINT FIRES INTEGRATION & INTEROPERABILITY TEAM.....	16,596	16,596	---
99 REDUCTION OF TOTAL OWNERSHIP COST.....	25,225	25,225	---
100 JOINT ELECTROMAGNETIC TECHNOLOGY (JET) PROGRAM.....	3,482	4,982	+1,500
PROMPT GLOBAL STRIKE.....	---	100,000	+100,000
TOTAL, DEMONSTRATION & VALIDATION.....	8,854,326	8,689,634	-164,692
ENGINEERING & MANUFACTURING DEVELOPMENT			
101 DEPLOYMENT AND DISTRIBUTION ENTERPRISE TECHNOLOGY.....	25,000	10,000	-15,000

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST
102 DEFENSE ACQUISITION CHALLENGE PROGRAM (DACP).....	28,970	28,970	---
103 NUCLEAR AND CONVENTIONAL PHYSICAL SECURITY EQUIPMENT R	3,281	3,281	---
104 CHEMICAL AND BIOLOGICAL DEFENSE PROGRAM.....	247,935	249,935	+2,000
106 JOINT ROBOTICS PROGRAM.....	2,911	7,911	+5,000
107 ADVANCED IT SERVICES JOINT PROGRAM OFFICE (AITS-JPO)..	9,832	9,832	---
108 JOINT TACTICAL INFORMATION DISTRIBUTION SYSTEM (JTIDS)	16,527	16,527	---
109 WEAPONS OF MASS DESTRUCTION DEFEAT CAPABILITIES.....	15,394	15,394	---
110 INFORMATION TECHNOLOGY DEVELOPMENT.....	11,297	11,297	---
113 DEFENSE INTEGRATED MILITARY HUMAN RESOURCES SYSTEM....	79,300	79,300	---
116 BUSINESS TRANSFORMATION AGENCY R&D ACTIVITIES.....	127,970	128,970	+1,000
117 HOMELAND PERSONNEL SECURITY INITIATIVE.....	1,800	1,800	---
118 TRUSTED FOUNDRY.....	43,604	43,604	---
119 DEFENSE ACQUISITION EXECUTIVE (DAE) PILOT PROGRAM.....	5,838	5,838	---
121 GLOBAL COMBAT SUPPORT SYSTEM.....	18,129	18,129	---
122 JOINT COMMAND AND CONTROL PROGRAM (JC2).....	70,283	70,283	---
TOTAL, ENGINEERING & MANUFACTURING DEVELOPMENT.....	708,071	701,071	-7,000
RDT&E MANAGEMENT SUPPORT			
126 GENERIC LOGISTICS R&D TECHNOLOGY DEMONSTRATIONS.....	4,000	4,000	---
127 TRAINING TRANSFORMATION (T2).....	51,752	54,252	+2,500
129 DEFENSE READINESS REPORTING SYSTEM (DRRS).....	11,886	11,886	---
130 JOINT SYSTEMS ARCHITECTURE DEVELOPMENT.....	14,437	14,437	---
131 CENTRAL TEST AND EVALUATION INVESTMENT DEVELOPMENT....	133,772	144,272	+10,500
132 ASSESSMENTS AND EVALUATIONS.....	1,645	1,645	---
133 THERMAL VICAR.....	7,822	7,822	---
134 JOINT MISSION ENVIRONMENT TEST CAPABILITY (JMETC).....	6,925	6,925	---
135 TECHNICAL STUDIES, SUPPORT AND ANALYSIS.....	31,263	35,263	+4,000
136 USD(A&T)--CRITICAL TECHNOLOGY SUPPORT.....	4,021	4,021	---
137 FOREIGN MATERIAL ACQUISITION AND EXPLOITATION.....	52,683	52,683	---
139 JOINT THEATER AIR AND MISSILE DEFENSE ORGANIZATION....	53,653	53,653	---
140 CLASSIFIED PROGRAM USD(P).....	---	98,200	+98,200
141 FOREIGN COMPARATIVE TESTING.....	32,919	32,919	---
142 NUCLEAR MATTERS - PHYSICAL SECURITY.....	4,513	4,513	---
143 SUPPORT TO NETWORKS AND INFORMATION INTEGRATION.....	11,152	11,152	---
144 GENERAL SUPPORT TO USD (INTELLIGENCE).....	4,574	4,574	---
145 CHEMICAL AND BIOLOGICAL DEFENSE PROGRAM.....	99,053	99,053	---

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST
150 SMALL BUSINESS INNOVATION RESEARCH/CHALLENGE ADMINISTR	2,162	3,162	+1,000
151 DEFENSE TECHNOLOGY ANALYSIS.....	11,927	11,927	---
153 FORCE TRANSFORMATION DIRECTORATE.....	20,585	20,585	---
154 DEFENSE TECHNICAL INFORMATION CENTER (DTIC).....	51,800	51,800	---
155 R&D IN SUPPORT OF DOD ENLISTMENT, TESTING & EVALUATION	9,326	9,326	---
156 DEVELOPMENT TEST AND EVALUATION.....	18,712	18,712	---
157 MANAGEMENT HEADQUARTERS (RESEARCH & DEVELOPMENT).....	52,992	52,992	---
158 BUDGET AND PROGRAM ASSESSMENTS.....	5,750	---	-5,750
161 SUPPORT TO INFORMATION OPERATIONS (IO) CAPABILITIES...	28,652	28,652	---
162 INFORMATION TECHNOLOGY RAPID ACQUISITION.....	5,197	5,197	---
163 INTELLIGENCE SUPPORT TO INFORMATION OPERATIONS (IO)...	9,932	9,932	---
165 WARFIGHTING AND INTELLIGENCE-RELATED SUPPORT.....	827	827	---
166 PENTAGON RESERVATION.....	6,058	6,058	---
167 MANAGEMENT HEADQUARTERS - MDA.....	85,906	85,906	---
168 IT SOFTWARE DEV INITIATIVES.....	888	888	---
TOTAL, RDT&E MANAGEMENT SUPPORT.....	836,784	947,234	+110,450
OPERATIONAL SYSTEMS DEVELOPMENT			
170 DEFENSE INFORMATION SYSTEM FOR SECURITY (DISS).....	34,417	34,417	---
171 PARTNERSHIP FOR PEACE (PFP) INFORMATION MANAGEMENT SYS	2,000	2,000	---
172 CHEMICAL AND BIOLOGICAL DEFENSE (OPERATIONAL SYSTEMS D	7,716	7,716	---
173 JOINT INTEGRATION AND INTEROPERABILITY.....	53,892	53,892	---
174 JOINT STAFF ANALYTICAL SUPPORT.....	7,744	7,744	---
175 CLASSIFIED PROGRAMS.....	1,694	1,694	---
176 C4I INTEROPERABILITY.....	76,179	76,179	---
178 JOINT/ALLIED COALITION INFORMATION SHARING.....	26,321	26,321	---
184 NATIONAL MILITARY COMMAND SYSTEM-WIDE SUPPORT.....	713	713	---
185 DEFENSE INFO INFRASTRUCTURE ENGINEERING AND INTEGRATIO	5,548	5,548	---
186 LONG HAUL COMMUNICATIONS (DCS).....	16,487	16,487	---
187 MINIMUM ESSENTIAL EMERGENCY COMMUNICATIONS NETWORK....	9,482	9,482	---
188 PUBLIC KEY INFRASTRUCTURE (PKI).....	9,389	9,389	---
189 KEY MANAGEMENT INFRASTRUCTURE (KMI).....	52,090	52,090	---
190 INFORMATION SYSTEMS SECURITY PROGRAM.....	13,256	16,256	+3,000
191 INFORMATION SYSTEMS SECURITY PROGRAM.....	394,314	394,314	---
192 INFORMATION SYSTEMS SECURITY PROGRAM.....	2,300	2,300	---

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST
194 C4I FOR THE WARRIOR.....	3,624	3,624	---
196 GLOBAL COMMAND AND CONTROL SYSTEM.....	47,237	47,237	---
197 JOINT SPECTRUM CENTER.....	18,653	18,653	---
198 NET-CENTRIC ENTERPRISE SERVICES (NCES).....	43,424	43,424	---
199 TELEPORT PROGRAM.....	5,798	5,798	---
200 SPECIAL APPLICATIONS FOR CONTINGENCIES.....	15,687	17,687	+2,000
203 CRITICAL INFRASTRUCTURE PROTECTION (CIP).....	12,667	12,667	---
205 DEFENSE JOINT COUNTERINTELLIGENCE ACTIVITIES.....	2,951	2,951	---
207 POLICY R&D PROGRAMS.....	4,627	5,627	+1,000
209 NET CENTRICITY.....	10,243	10,243	---
215 DISTRIBUTED COMMON GROUND/SURFACE SYSTEMS.....	15,800	17,800	+2,000
217 MQ-1 PREDATOR A UAV.....	13,100	13,100	---
226 INDUSTRIAL PREPAREDNESS.....	20,114	33,114	+13,000
227 LOGISTICS SUPPORT ACTIVITIES.....	2,846	2,846	---
228 MANAGEMENT HEADQUARTERS (JCS).....	3,210	3,210	---
229 NATO JOINT STARS.....	41,466	31,466	-10,000
230 STORM.....	27,107	27,107	---
232 SPECIAL OPERATIONS AVIATION SYSTEMS ADVANCED DEV.....	60,750	81,909	+21,159
233 SPECIAL OPERATIONS TECHNOLOGY DEVELOPMENT.....	42,262	54,262	+12,000
234 SPECIAL OPERATIONS TACTICAL SYSTEMS DEVELOPMENT.....	35,783	46,283	+10,500
235 SOF OPERATIONAL ENHANCEMENTS.....	53,418	58,118	+4,700
236 SPECIAL OPERATIONS CV-22 DEVELOPMENT.....	23,473	23,473	---
237 SPECIAL OPERATIONS AIRCRAFT DEFENSIVE SYSTEMS.....	5,195	5,195	---
238 OPS ADVANCED SEAL DELIVERY SYSTEM (ASDS) DEVELOPMENT..	20,292	20,292	---
239 MISSION TRAINING AND PREPARATION SYSTEMS (MTPS).....	6,405	6,405	---
240 UNMANNED VEHICLES (UV).....	1,500	1,500	---
241 MC130J SOF TANKER RECAPITALIZATION.....	12,701	12,701	---
TOTAL, OPERATIONAL SYSTEMS DEVELOPMENT.....	1,263,875	1,323,234	+59,359
999 CLASSIFIED PROGRAMS.....	3,483,300	3,396,023	-87,277
TOTAL, RESEARCH, DEVELOPMENT, TEST & EVAL, DW.....	20,559,850	20,659,095	+99,245

The adjustments to the budget activities for Research Development, Test and Evaluation, Defense-Wide, are shown below:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
 [In thousands of dollars]

R-1	Budget Request	Committee Recommended	Change from Request
DTRA UNIVERSITY STRATEGIC PARTNERSHIP BASIC			
1 RESEARCH	5,000	8,000	3,000
Combat Effective Facial Armor Research and Development		1,500	
Dual Use Technologies for Bio-defense		1,500	
2 DEFENSE RESEARCH SCIENCES	0	10,800	10,800
Nanoscience Nanotechnology Institute		3,000	
High Energy Laser for Detection, Inspection and Non-destructive Testing		2,000	
Illinois Institute of Technology		1,300	
Nanocrystal Source Display		1,500	
Bacterial Ghost Influenza Vaccine Development		2,000	
Advanced Research to Further National Security Goals		1,000	
GOVERNMENT/INDUSTRY COSPONSORSHIP OF UNIVERSITY RESEARCH			
3 UNIVERSITY RESEARCH	0	8,000	8,000
Nanotechnology Initiative at Shaw University		1,000	
New York Structural Biology Center		2,000	
Integrated Cryo-cooled High Power Density Systems		2,000	
Focus Center Government-Industry Consortia for University Research		3,000	
6 CHEMICAL AND BIOLOGICAL DEFENSE PROGRAM	72,003	101,253	29,250
Chem Bio Defense Initiative		5,000	
Detection of Biological Agents in Water		2,500	
Diamond MEMS Sensors for Real-Time Sensing of Weaponized Pathogens		1,000	
Portable Continuous Monitor for Biodetection		2,000	
Portable Rapid Bacterial Warfare Detection Unit		5,500	
Rapid Response Database Systems Initiative		1,000	
Initiative for Defense Against Bio-Warfare and Bio-Terrorism		2,000	
Zumwalt National Program for Countermeasures to Biological and Chemical Threats		1,000	
Chemical/Biological Preparedness Center – Advanced Development of Mobile Rapid Response Prototype		4,250	
Garden State Cancer Center Vaccine Development Program		1,000	
Novel Viral Biowarfare Agent Identification and Treatment (NOVBAIT)		4,000	
XX ADVANCED DEVELOPMENT INITIATIVES FUND	0	50,000	50,000
INSENSITIVE MUNITIONS--EXPLORATORY DEVELOPMENT			
7 DEVELOPMENT	15,542	11,542	-4,000
Program Growth		-4,000	
8 MEDICAL FREE ELECTRON LASER	0	2,000	2,000
Medical Free Electron Laser		2,000	

R-1		Budget Request	Committee Recommended	Change from Request
11	INFORMATION AND COMMUNICATIONS TECHNOLOGY	229,739	235,139	5,400
	National Repository of Digital Forensic Intelligence/Center for Telecommunications and Network Security		1,400	
	Secure Open Systems Institute		3,000	
	Software Assurance Education and Research Institute		1,000	
13	BIOLOGICAL WARFARE DEFENSE	99,137	85,466	-13,671
	Execution Delays		-4,400	
	Cancellation of Spectral Sensing of Bio-Aerosols (SSBA)		-9,771	
	Biomedical Engineering Initiative		500	
14	CHEMICAL AND BIOLOGICAL DEFENSE PROGRAM	305,327	348,777	43,450
	Chem Bio Defense Initiative		10,000	
	Asymmetrical Protocols for Biodefense: Rapid Acting Broad Spectrum Protection Against Biological Threat		3,000	
	Chemical Warfare Agent Fate Model Verification and Validation		1,000	
	Point-of-Care Diagnostic System		1,000	
	Biosurety Development and Management Program		800	
	Strategic Bioterrorism Response for Battlefield Survival		1,800	
	Virus Mutation and Virus Transfer from Humans to Animals		3,000	
	Mixed Oxidants for Chemical and Biological Decontamination		5,000	
	Self-Decontaminating Polymer System for Chemical and Biological Warfare Agents		7,000	
	Rapid Forensic Evaluation of Microbes in Biodefense		1,000	
	Continuation of Unmanned Vehicle CBRNE Unitary Sensor Suite Development and Demonstration		2,000	
	Countermeasures to Chemical/Biological Control-Rapid Response		5,000	
	Multifunctional Particles for Defeating CBWA (Chemical and Biological Warfare Agents)		1,000	
	HyperAcute Vaccine Development		1,850	
	HUMAN, SOCIAL AND CULTURE BEHAVIOR			
15	MODELING (HSCB) APPLICATIONS	7,300	0	-7,300
	Program growth		-7,300	
16	TACTICAL TECHNOLOGY	374,717	365,341	-9,376
	Cancellation for Waveforms for Active Sensing		-3,670	
	Cancellation of SUAVE		-6,706	
	Oplinet Sensor System		1,000	
19	ELECTRONICS TECHNOLOGY	213,529	203,929	-9,600
	Execution Delays		-9,600	
	WEAPONS OF MASS DESTRUCTION DEFEAT			
21	TECHNOLOGIES	182,416	222,916	40,500
	Fissile Material Detection Research		26,500	
	University Strategic Partnerships		3,000	
	Simulated Virtual Prototype Environment Development		1,000	
	Comprehensive National Incident Management System		3,000	

R-1	Budget Request	Committee Recommended	Change from Request
Center for Nonproliferation Studies, Monterey Institute for International Affairs		2,000	
Remote Sighting System		1,000	
PROTECTOR-DACS		3,000	
National Center for Blast Mitigation and Protection		1,000	
23 SPECIAL OPERATIONS TECHNOLOGY DEVELOPMENT	21,282	31,782	10,500
Pulsed Energy Projectile (PEP)		1,000	
Special Operations Forces Network-Centric Sharing and Storage		1,000	
Nickel Boron Metal Coating Technology for USSOCOM Vehicle Systems		2,000	
Athena - Threat Signal Locator		1,000	
Advanced Multi-Purpose Microdisplay System		1,000	
Flashlight Soldier-to-Soldier Combat ID System (FSCIS)		2,000

MISSILE DEFENSE AGENCY
REPORTING REQUIREMENTS

The Committee is concerned that the information currently provided by the Missile Defense Agency (MDA) does not allow Congress to exercise sufficient oversight over the Ballistic Missile Defense programs. Past Congresses have established a framework of laws that require program and cost reporting to Congress to help exercise this oversight. However, because the Ballistic Missile Defense System (BMDS) has not formally entered DoD's System Development and Demonstration acquisition phase, which triggers the application of a significant portion of these laws, all the information essential for full oversight has not been provided to Congress. Therefore, the Committee directs MDA to develop a system-wide plan to report according to the spirit of existing acquisition laws to improve accountability and transparency of its program. MDA is directed to report for all elements that are effectively in System Development and Demonstration or production corresponding baselines, the results of independent cost estimates performed by the Cost Analysis Improvement Group, unit costs, and unit cost growth. This direction should not be construed as requiring full compliance with DoD Regulation 5000.2. In addition, while developing and fielding the BMDS outside DoD's normal acquisition cycle, MDA should address operational testing by including operational test objectives in developmental tests. The Committee directs that this plan be delivered to the congressional defense committees with the submission of the fiscal year 2009 budget and updated semi-annually.

BLOCK STRUCTURE

The Committee understands that Missile Defense Agency (MDA) is in the process of restructuring its block acquisition approach. While the Committee does not wish to define the block approach that MDA should follow, it does believe that the new structure should include, at a minimum, a longer timeframe in which to complete system-level developmental activities and the manufacture and delivery of all assets that compose the block. In addition, the block structure adopted should include only those assets that will be fielded during the block.

EUROPEAN COMPONENT

The Department of Defense included \$310,000,000 in the fiscal year 2008 request for the Ballistic Missile Defense European Component. This request includes funding for the European Interceptor site in Poland, a Midcourse Radar in the Czech Republic and the fielding of a Forward Based Radar (AN-TPY-2). The cost of the proposed program exceeds \$4,000,000,000 through fiscal year 2013 just for the tactical portion of the proposal. These estimates, though, do not include costs for barracks, family housing or any other costs normally associated with infrastructure of a cantonment area at a military facility. Also, the estimate does not include personnel costs for manning the facilities.

The Committee believes that it is premature to provide full funding for the European Component given the uncertainty surrounding the program as of this writing. Accordingly, the Committee has reduced without prejudice funding of \$139,000,00 for the missile field construction and the associated equipment.

SPACE TRACKING AND SURVEILLANCE SYSTEM (STSS)

The budget request includes \$331,525,000 for STSS, of which \$105,789,000 is for the proposed follow-on space system. The Committee recommends \$30,720,000 for the follow-on effort. This amount, adjusted for inflation, is equal to the amount provided in the fiscal year 2007 appropriation. The Committee notes that two demonstration satellites will be launched in fiscal year 2008 and that exploitation of data from these satellites will allow the Missile Defense Agency to develop sensor requirements and a concept of operations that will drive the follow-on space system. As a result, the Committee believes it is premature to award the follow-on space system contract and directs the Missile Defense Agency to maintain the current level of effort in pursuit of sensor technology development and risk reduction with the remaining follow-on funds.

Additionally, the Committee has provided \$2,000,000 for a Federally Funded Research and Development Corporation to conduct an analysis of alternatives for a satellite-based capability for infrared and visible sensors to provide global tracking of ballistic missiles. Further, this analysis should also examine the applicability of the STSS demonstration system and the proposed follow-on systems' ability to perform against the space situational awareness mission requirement and other space mission applications.

UNDEFINITIZED CONTRACTS

The Committee has become aware of the excessive use of undefinitized contracts by the MDA. Based on information obtained by the Committee, it is apparent that MDA has not provided the proper oversight of contracting activities within various programs. According to the MDA, the amounts of undefinitized contracts may be in excess of \$2,700,000,000. While the Committee understands the need at times for programs to use this type of contracting mechanism, it is apparent that the MDA has grossly abused it with respect to volume, dollar amounts and the numbers of days to definitize. The Committee directs the MDA to definitize the current contracts in an expedient manner and to minimize the use of the mechanism in the future. The Committee further directs the Undersecretary of Defense, Acquisition Technology and Logistics to review contracting procedures at the MDA and provide a report to the congressional defense committees within 90 days of enactment of this Act detailing a strategy to reduce current, and minimize future, undefinitized contracts in the MDA.

KINETIC ENERGY INTERCEPTOR

The Committee has included \$372,853,000 for the Kinetic Energy Interceptor (KEI) program, an increase of \$145,354,000 above the budget request. In the fiscal year 2008 request, the Missile Defense

Agency (MDA) reduced the planned funding by \$178,009,000 to \$227,499,000. Additionally, the MDA drastically descoped the program. Even though the KEI program has met each knowledge point while remaining on schedule and on budget, it has been used as an offset on numerous occasions for other more high risk programs. As originally conceived, the KEI mission is as a boost phase defense weapon with mobile capability on land and sea. In the current request, the KEI has been descoped to a booster program aimed at replacing the Ground-based Midcourse Interceptor. The Committee disagrees with this change and has provided additional funding in an effort to accelerate this much-needed capability.

AIRBORNE LASER (ABL)

The Committee believes that a robust boost intercept capability is vital to a layered missile defense system. Further, the Committee notes the technical progress that the Airborne Laser (ABL) program has made over the last three years with the early accomplishment of the firing and refurbishment of the high energy laser and the continuing flight testing of the associated beam control/fire control (BC/FC) system. These technical challenges were accomplished while the program stayed within the government determined schedule and budget. The Committee looks forward to continued strong support and commensurate funding by the Missile Defense Agency of ABL.

AIRBORNE LASER LESSONS LEARNED

The Committee commends the MDA on its continued efforts on the Airborne Laser program. While the program has seen many technology successes, the Committee is concerned about the transition of these successes to other service programs. The Committee directs the Missile Defense Agency to develop a lessons learned program for the Airborne Laser program for future use by the Department of Defense.

COMMAND AND CONTROL, BATTLE MANAGEMENT AND COMMUNICATIONS (C2BMC) PROGRAM

The Committee recommends \$460,703,000 for the Command and Control, Battle Management and Communications program. In fiscal year 2006, funding for the C2BMC program was reduced by \$30,000,000. However, during the year of execution the MDA increased funding for C2BMC by over \$50,000,000 by using funds in other program elements to back-fill the congressional reduction. The Committee in fiscal year 2007 reinstated the fiscal year 2006 congressional reduction and directed the MDA to fully comply with congressional intent by funding C2BMC within program element 0603889C. In fiscal year 2008, the MDA has chosen to ignore congressional intent by funding C2BMC in the C2BMC program element and has also included \$208,000,000 in various other program elements. This disregard of congressional intent obfuscates total funding allocated to the program. This method of funding also creates impediments to Congress' fiduciary responsibility to taxpayers in providing oversight of the programs. As in previous years, the Committee again directs the Missile Defense Agency to fully fund

C2BMC in the C2BMC program element. If the MDA continues to fund C2BMC in multiple different program elements, the Committee will consider all funding outside of the C2BMC program element to be excess to need. If, due to emergent requirements, the program needs additional funding during the year of execution, the Missile Defense Agency is directed to comply with the reprogramming guidance specified in this report and in the report accompanying the House version of the fiscal year 2007 Department of Defense Appropriations bill as it pertains to guidelines allowing agencies to reprogram funds from one program element or appropriation to another.

AEGIS BALLISTIC MISSILE DEFENSE SYSTEM

The Committee commends the MDA for showing progress and promise in continued success in its Aegis Ballistic Missile Defense System. In this bill, the Committee has included additional funding for the continuation of the Open Architecture and Ballistic Missile Signal Processor. Additionally, the Committee has included funding to upgrade two additional Aegis Destroyers to a Long Range Track and Surveillance (LRT&S) and Engage capability specifically for the Atlantic Fleet by the end of 2009. The Committee strongly urges that MDA refrain from transferring funds out of the Aegis program to other missile defense programs; MDA shall fully fund and execute the Aegis program as Congress intends.

MULTIPLE KILL VEHICLE

The Committee has provided \$272,151,000 only for the Multiple Kill Vehicle (MKV) program. The Committee encourages the Missile Defense Agency to accelerate development and delivery of the MKV capability. The Committee designates the MKV program as congressional special interest items subject to prior approval reprogramming procedures.

ASYMMETRIC MISSILE DEFENSE

The Committee has previously noted its concern about and responded to the possibility of an asymmetric missile threat against the United States homeland, defined by a terrorist or other non-state actor launching a cruise or short-range ballistic missile from air or sea-based platforms to the United States' territory. In fiscal years 2006 and 2007, the Committee provided additional funding targeted specifically at this potential threat.

The Committee believes that while the MDA has made valuable contributions in conducting studies and analyses and providing recommendations for potential means to address the threats, much additional work remains to be done within the U.S. government. As a result, the Committee recommends an additional \$15,000,000 to continue the Missile Defense Agency's efforts to conduct experiments, develop prototypes, test concepts of operations, and recommend deployment options for an integrated asymmetric missile defense capability that would protect population centers. In addition to the current efforts, the Committee directs the MDA to conduct an operationally realistic test using sea-based assets. The MDA shall develop a recommended architecture and concept of op-

erations for homeland asymmetric missile defense to include progressions for spiral technology upgrades that would enhance cruise and ballistic missile defense capabilities over time. The Director, MDA, in consultation with Commanders, U.S. Northern Command and U.S. Strategic Command, shall provide a report to the congressional defense committees not later than March 1, 2008 on results of the efforts to date along with a recommended program plan for further development, to include recommended knowledge points to guide further investment in the critical capability.

FISSILE MATERIAL DETECTION RESEARCH

The Committee recommends an increase of \$26,500,000 for the Defense Threat Reduction Agency (DTRA) to accelerate improvements in the detection of improvised fissile material devices. While the Department has funded small efforts in the fiscal year 2008 request, the Committee is concerned that the Department is not fully addressing this threat by providing the appropriate level of funding. Accordingly, the Committee is providing this funding specifically targeted to increasing the capability of detection of fissile material and allowing for the acceleration of these efforts by several years.

SPECIAL OPERATIONS COMMAND

The Committee recommendation includes \$444,637,000 for the Special Operations Command. This amount is \$109,422,000 below the fiscal year 2007 enacted amount and \$73,359,000 above the request. Of this amount, an increase of \$25,000,000 is included for the GPS Extension Program, transferred from the Air Force, RDT&E. The funds will enable the Special Operations Command to prove the ability to develop and manufacture GPS Extension user equipment in a portable device prior to funding future developmental efforts which compete with GPS III anti-jam capabilities. The request is to augment the GPS signal using the Iridium constellation of communications satellites for the benefit of SOCOM users. The task would be to modify GPS receivers to receive both GPS and Iridium signals on a handheld device.

CHEMICAL AND BIOLOGICAL DEFENSE PROGRAM

The Committee recommends \$25,000,000 for the Chemical and Biological Defense Program. The Committee commends the Department on the continued execution of the "Chem-Bio Defense Initiatives Fund" and recommends continuing the program within the Department's Chemical and Biological Defense Program. The Committee's recommendation provides an increase of \$25,000,000 for this fund. The Secretary of Defense is directed to allocate these funds among the programs that yield the greatest gain in our chem-bio defensive posture. The Committee further directs that funds cannot be obligated for the Chem-Bio Initiative Fund until 15 days after a report, including a description of projects to be funded, is provided to the congressional defense committees.

DEFENSE ADVANCED RESEARCH PROJECTS AGENCY

The Committee has included \$3,035,222,000 for the Defense Advanced Research Projects Agency (DARPA), which is a decrease of \$50,395,000 from the fiscal year 2008 request and a decrease of \$80,088,000 from the amount appropriated in fiscal year 2007. Based on historic under-execution in several program elements, the Committee has reduced funding in the Biological Warfare, Electronics Technology, Advanced Aerospace Systems and Land Warfare Technology program elements. Additionally, the Committee has reduced funding for various programs as identified by DARPA that have been cancelled subsequent to the submission of the fiscal year 2008 budget.

In the statement of the managers accompanying the Conference Report on the Department of Defense Appropriation Act, 2007, the conferees expressed concern over the development of the DARPA budget submission material and encouraged DARPA to include additional programmatic detail in the fiscal year 2008 budget request. DARPA chose not to address these concerns. Therefore, the Committee directs DARPA to provide in future budget justification material more individual programmatic detail, to include budget information, programmatic achievements and goal by fiscal year, as well as transition plans.

ADVANCE DEVELOPMENT INITIATIVE

The Committee includes \$50,000,000 for an Advanced Development Initiative Fund. This fund, under the direction of the Director, Defense Research and Engineering (D,DR&E), shall be used to resource projects that will enhance the Department's long-range research and development strategy, as determined by the D,DR&E. The Committee has denied funding for various new starts in the fiscal year 2008 request due to concern over an apparent lack of relations to and integration into that long-range strategy. A more coordinated approach that targets funds to key development programs should result in a more successful research and development effort over time.

FIRSTLINK—IEE (TECHNOLOGY TRANSITION LINE)

The Committee continues its support for the FirstLink program and strongly encourages the Department of Defense to include the funding for this program in its fiscal year 2009 budget submission. FirstLink has been highly successful at helping the Department transfer its technologies as well as generating new revenue through the return on investment this activity provides to the Department of Defense Laboratories while at the same time making these technologies available for both the military and first responder applications. The Department is urged to make the FirstLink program a permanent part of its technology, transition, and acquisition activities.

WMD MEDICAL COUNTERMEASURES

The Committee recognizes that there remains a significant threat from biological and chemical weapons. It is paramount that better medical defensive strategies are developed. It is unlikely that the

agent of a deployed weapon of mass destruction can be readily identified. Consequently, the DoD is encouraged to develop a multi-threat treatment countermeasure that can be used for exposures to chemical, biological and radiation exposures. DoD is encouraged to seek technologies that would facilities pre-symptomatic real-time diagnoses to avoid catastrophic health consequences.

OPERATIONAL TEST AND EVALUATION, DEFENSE

Fiscal year 2007 appropriation	\$185,420,000
Fiscal year 2008 budget request	180,264,000
Committee recommendation	180,264,000
Change from budget request	---

This appropriation funds the Operational Test and Evaluation activities of the Department of Defense.

The Committee recommends an appropriation of \$180,264,000 for Operational Test and Evaluation, Defense. The following table provides a summary of the Committee's recommendation.

PROGRAM RECOMMENDED

The total program recommended in the bill will provide the following in fiscal year 2008:

(DOLLARS IN THOUSANDS)

		BUDGET REQUEST	COMMITTEE RECOMMENDED	CHANGE FROM REQUEST

OPERATIONAL TEST & EVAL, DEFENSE				
	RD&E MANAGEMENT SUPPORT			
2	OPERATIONAL TEST AND EVALUATION.....	48,627	48,627	---
4	LIVE FIRE TESTING.....	11,133	11,133	---
6	OPERATIONAL TEST ACTIVITIES AND ANALYSES.....	120,504	120,504	---
TOTAL, RD&E MANAGEMENT SUPPORT.....		180,264	180,264	---
TOTAL, OPERATIONAL TEST & EVAL, DEFENSE.....		180,264	180,264	---

TITLE V**REVOLVING AND MANAGEMENT FUNDS****DEFENSE WORKING CAPITAL FUNDS**

Fiscal year 2007 appropriation	\$1,345,998,000
Fiscal year 2008 budget request	1,352,746,000
Committee recommendation	1,352,746,000
Change from budget request	---

This appropriation finances, through the receipt of funded reimbursable orders, the operation of industrial, commercial and support-type activities such as depot maintenance, supply operations, distribution depots, transportation services, Navy research, finance and accounting services, information systems and telecommunication services. Working capital fund accounts use cost accounting and business management techniques to provide managers with information that can be used to monitor, control, and minimize costs of operations.

The Committee recommends an appropriation of \$1,352,746,000 for the Defense Working Capital Funds. The recommendation is \$6,748,000 more than the amount provided in fiscal year 2007 and the same as the request for fiscal year 2008.

NATIONAL DEFENSE SEALIFT FUND

Fiscal year 2007 appropriation	\$1,071,932,000
Fiscal year 2008 budget request	1,079,094,000
Committee recommendation	2,489,094,000
Change from budget request	+1,410,000,000

This appropriation provides funds for the lease, operation, and supply of pre-positioning ships, operation of the Ready Reserve Force, and acquisition of ships for the Military Sealift Command, the Ready Reserve Force, and the Marine Corps.

The Committee recommends an appropriation of \$2,489,094,000 for the National Defense Sealift Fund, which is \$1,417,162,000 more than the amount provided in fiscal year 2007 and \$1,410,000,000 more than the request for fiscal year 2008.

T-AKE ACQUISITION

The Lewis and Clark Class of Dry Cargo/Ammunition Ships (T-AKE) will provide logistic lift capability as a shuttle ship from supply sources to ships at sea. The request includes \$456,110,000 for the acquisition of the eleventh Lewis and Clark Class T-AKE Dry Cargo/Ammunition Ship. In an effort to provide stability to the Navy's shipbuilding program by increasing throughput, the Committee provides \$1,866,110,000 for the procurement of 3 additional T-AKE ships, which is \$1,410,000,000 above the request. In addition to providing stability, this effort satisfies the second highest priority on the Navy's unfunded priority list. This increase will allow the Navy to buy out the T-AKE requirement for the Maritime Pre-positioned Force (Future) while at the same time promoting stability to the construction yard and sub-vendors and achieving volume efficiencies.

DEFENSE COALITION SUPPORT FUND

Fiscal year 2007 appropriation	---
Fiscal year 2008 budget request	\$22,000,000
Committee recommendation	---
Change from budget request	- 22,000,000

The budget requests a new appropriation to finance the acquisition of defense articles and defense services in anticipation of their temporary use or transfer to eligible foreign countries and international organizations, including the support of coalition or international military stability or counter-terrorism operations. The Committee has not included an appropriation of \$22,000,000 requested for the Defense Coalition Support fund as this appropriation is unauthorized.

TITLE VI
OTHER DEPARTMENT OF DEFENSE PROGRAMS
DEFENSE HEALTH PROGRAM

Fiscal year 2007 appropriation	\$21,217,000,000
Fiscal year 2008 budget request	22,541,124,000
Committee recommendation	22,957,184,000
Change from the budget request	+416,060,000

This appropriation funds the Defense Health Program of the Department of Defense.

The Committee recommends an appropriation of \$22,957,184,000 for the Defense Health Program, which is \$1,740,184,000 more than the amount provided in fiscal year 2007 and \$416,060,000 more than the request for fiscal year 2008.

PROGRAM RECOMMENDED

The total amount recommended in the bill will provide the following program in fiscal year 2008:

(DOLLARS IN THOUSANDS)

	BUDGET REQUEST		COMMITTEE RECOMMENDED		CHANGE FROM REQUEST	
	QTY	AMOUNT	QTY	AMOUNT	QTY	AMOUNT

Defense Health Program:						
Operation and maintenance.....	---	22,044,381	---	22,140,381	---	+96,000

Vanadium Safety Readiness		4,000	

TRAUMATIC BRAIN INJURY (TBI)

From the wars in Iraq and Afghanistan, traumatic brain injury has emerged as a significant cause of morbidity to the war fighter. Whether mild, moderate or severe brain trauma, the Committee finds that the level of assessment and standard of care provided to the injured war fighter is in need of enhancement. Diagnosis, treatment and rehabilitation must be at a level to ensure the best possible outcome is reached. To this end, the Committee recommends the development and adherence to specific protocols to address all levels of brain injury (mild, moderate and severe) and directs the Department of Defense to implement the use of off-the-shelf, computerized, proven technology that generates baseline scores for every member of the military to be administered prior to and upon return from the war theater. The Department shall create centers of excellence to provide specialized treatment and rehabilitation for brain injured troops. Such centers already exist in the private sector. The Department of Veterans Affairs and military centers should coordinate with civilian centers, to ensure optimal treatments are available throughout the country. Finally, identification and use of community-based treatment facilities is essential for a seamless transition throughout treatment.

The vast majority of disabled troops will ultimately return to their home communities, which may be remote from specialized centers. The identification of local services is crucial to an appropriate rehabilitation plan. The employment of case managers (who are frequently trained rehabilitation nurses and used by private insurers) are well suited to find and coordinate appropriate services from physicians, therapists and community support personnel.

Congress provided \$450,000,000 in the "U.S. Troop Readiness, Veterans' Care, Katrina Recovery, and Iraq Accountability Appropriations Act, 2007", (Public Law 110-28) for the creation of a dynamic, peer-reviewed research program to identify and employ the most current and promising diagnosis, treatment, and rehabilitative tools available. To date, the Committee has not received a plan on how these funds will be expended. During the fiscal year 2008 budget cycle, the Committee received numerous project proposals for TBI research. The Committee believes, however, that prior to considering these proposals, the Department must first establish protocols and standards utilizing the framework discussed above.

The Committee understands that the Department is aware of gaps within TBI treatment methods that need to be addressed, which include epidemiology, diagnosis, identification and assessment; protection and prevention treatment; and, clinical management. The Committee directs the Department, in conjunction with the Departments of Veterans Affairs, and Health and Human Services, academia and industry, to focus the research that will address the gaps that were identified by the Congressionally Directed Medical Research Program.

POST TRAUMATIC STRESS DISORDER (PTSD)

Survival rates today for servicemembers wounded in combat are even higher than earlier in the war due to improved personal protection and better health care. More than 800 soldiers have lost a

limb; more than 100 have been blinded; and many are disfigured by burns or have brain injuries. An estimated 2,000 cases of brain injury have been treated, while many less-severe or less-obvious injuries go undetected. The Committee believes there should be an active stress prevention component, along with methods of diagnosing and treating stress from the battlefield. Baseline testing should be considered for deploying and returning forces. The Committee also believes strongly that the Department of Defense should address the shortages of mental health experts in the military and report to the congressional defense committees by January 15, 2008, on the state of mental health experts available across the military, both at Military Treatment Facilities as well as the availability of care in the private sector.

The Committee directs the Department of Defense and the Department of Veterans Affairs to study jointly mental health care, the onset and nature of Post Traumatic Stress Disorder (PTSD), panic disorder. Also, these departments must improve mental health testing and tracking of returning combat duty servicemen, to include the Reserve Component. The Department shall report to the congressional defense committees on the findings by May 31, 2008.

Congress provided \$450,000,000 in “U.S. Troop Readiness, Veterans’ Care, Katrina Recovery, and Iraq Accountability Appropriations Act”, 2007, (Public Law 110–28), for the creation of a dynamic, peer-reviewed research program on PTSD. To date, the Committee has not received a plan on how these funds will be expended. The Committee received numerous project proposals for PTSD research. The Committee believes, however, that prior to considering these proposals the Department must first establish protocols and standards for detection, prevention and treatment of PTSD.

The Committee directs the Department in conjunction with Veterans Affairs, Health and Human Services, academia and industry to focus the research that will address the gaps identified by the Congressionally Directed Medical Research Program.

ELECTRONIC HEALTH INFORMATION SHARING

The Committee is extremely dismayed that the Department of Defense (DoD) and the Department of Veterans Affairs (VA) still do not have medical record electronic interoperability. DOD’s health care system is comprised of 65 military hospitals, 800 medical and dental clinics in the direct care system and 2,800 network facilities with 190,000 network providers in the private or purchased care system. On average a weekly workload consists of 19,600 in-patient admissions; 642,000 professional out-patient encounters; 102,900 dental sessions; 2.2 million prescriptions and 2,100 births. These numbers alone show that it is imperative that the DOD and VA have interoperability across the continuum—garrison and theater.

Using off-the-shelf technology may assist the Department in bridging the gaps that currently exist between VA and DOD. The Committee includes \$2,000,000 within Research, Development, Test and Evaluation, Army, for the Wireless Electronic Patient Records, WPIC Personal Information Center to improve the De-

partment's ability to track medical information pertinent to the treatment of servicemembers whether in a Military Treatment Facility or on the battlefield. The Committee further directs the Department to use funding provided in the Joint Incentives Fund for initiatives that will record-keeping interoperability between the Department of Defense and the Department of Veterans Affairs.

DEFENSE ENROLLMENT ELIGIBILITY REPORTING SYSTEM (DEERS)

DEERS is a computerized database of military sponsors, families and others worldwide who are entitled under the law to TRICARE benefits. Active-duty and retired service members are automatically registered in DEERS, but they must take action to register their family members and ensure they are correctly entered into the database. Mistakes in the DEERS database can cause problems with TRICARE claims and benefits. Other complications arise in the DEERS system with registration of dual military dependents. The system is only able to register the dependent under one of the parents, but not both.

Therefore, the Committee directs the Department of Defense to report to the congressional defense committees by January 15, 2008, on the number of dual military member families currently in the military system and on how to correct the inability of the system to register dependents under both parents. The report should include the cost estimates for correcting any flaws and deficiencies within the system.

DIABETES RESEARCH

The Committee remains concerned over the increasing number of type I and type II diabetes cases in the United States, specifically the growing numbers of children, teens and young adults afflicted by the disease. Over 50 percent of Americans are overweight and 30 percent are obese. Ninety percent of type II diabetes is attributed to excess weight. In the Department of Defense alone, there are 111,275 known cases of diabetes, with the Air Force having 43,733 known cases. Also, junior enlisted are four times more likely and senior enlisted are three times more likely to have diabetes than officers. The health care expenditures associated with treatment of this disease are increasing dramatically. Without proper medical care, monitoring and education, diabetes patients will experience significant adverse consequences. Nutrition, early detection, diagnosis and treatment are essential to alleviating this trend. Therefore, the Committee has provided \$25,000,000 for diabetes research. Of the funds provided, \$5,000,000 shall be for type I diabetes and \$20,000,000 shall be for type II diabetes research.

WOUNDED WARRIOR ASSISTANCE

This year has been wrought with issues and problems affecting the wounded warrior. Much improvement is needed for medical and dental care of servicemembers assigned to an outpatient status. Continuity of care and support for the wounded servicemembers and their families is essential to recovery. As such, the Committee provides \$66,000,000 for wounded warrior assistance. The funds provided will address the need to improve the standard of living for

the wounded and to improve the administrative systems that support these troops and their families.

WARRIORS IN TRANSITION

Warriors in transition are defined as troops who meet the qualification for medical hold, medical holdover or active duty medical extension, and active component troops who require a medical evaluation board or who have medical needs requiring more than six months of treatment. This year has proven that the military's system for ensuring that its programs to support these warriors in transition, namely housing, treating, transitioning, and integrating troops after injury, are extremely overburdened and in need of significant improvement. The problems occurred on many levels, from failed infrastructure, rehabilitative care, administrative process, and policy incongruities between the Department of Defense, the Services, and the Department of Veterans Affairs.

Following the disclosure of these deficiencies, the Department of Defense established an independent commission to review current rehabilitative care and processes, and the Army Inspector General reviewed the Physical Disability System. The results of these reviews highlighted many systemic deficiencies, as noted above.

The Committee is frustrated that this situation occurred despite all of the funding and support that has been provided over the years to the Department of Defense to ensure that returning troops have access to the best medical treatment and recovery facilities possible. Therefore, the Committee directs the Department of Defense to implement the findings of the independent commission and the Army Inspector General, and to provide a progress report to the congressional defense committees no later than 60 days after enactment of this Act regarding their implementation.

The Committee also directs the Department of Defense to report to the congressional defense committees by January 15, 2008, on how it plans to update the Physical Disability Evaluation System to more accurately reflect the injuries of war. This report should include a review of the differences among the Services' rating systems and the Department of Veterans Affairs system, and provide a process for how and when these various rating systems will be standardized.

The Committee is concerned that these reviews also revealed policy variances and differences in Physical Disability personnel training guidelines among the Department of Defense, Department of the Army regulatory guidance, and the Department of Veterans Affairs. These reviews also revealed insufficient data management systems and information management concerns.

The issues outlined above, coupled with the increasing number of injured troops entering the system, have stressed the Department's ability to efficiently manage this responsibility. The Committee intends to closely monitor the Department's progress in addressing these concerns, and directs the Undersecretary of Defense for Personnel and Readiness to report quarterly to the congressional defense committees on the status of implementing these improvements, and to notify the congressional defense committees promptly if other issues arise.

MILITARY TREATMENT FACILITIES USAGE OF RED CROSS VOLUNTEER
PHYSICIANS

Across the Nation there is a shortage of care givers in many medical fields. The military is facing a similar shortage due to the high rates of deploying physicians and specialty physicians. This shortage is acute within the Military Treatment Facilities (MTFs). Therefore, the Committee directs the Assistant Secretary of Defense for Health Affairs to report to the congressional defense committees by September 15, 2007, that describes the current regulations for allowing volunteer physicians to work in MTFs and what changes are needed to ensure that volunteers are used in such facilities across the military.

ORTHOPEDIC INJURY RESEARCH

Serious limb trauma, vascular injury, major limb tissue damage and blood flow disruption contribute heavily to U.S. military casualties. Amputation following battlefield injury now occurs at twice the rate of past wars. Recent advances in battlefield medical treatments have focused on reducing time from injury to evacuation and treatment, but the consequences of blood flow disruption to damaged limb tissues remain a major cause of permanent disability or death among military war fighters.

Extremity injuries are the number one battlefield injury. Understanding how to prevent, treat, and rapidly recover from orthopedic injuries should be a top priority for the Military Health System. Further, the Committee believes that dynamic research and treatment is necessary to provide servicemembers the greatest ability to recovery from injuries sustained on the battlefield.

The Committee is concerned that the Institute of Surgical Research is not working with all necessary entities to share data and collaborate on research and analysis. The Committee believes that every aspect of orthopedic research should be considered, to include reducing the negative impact of reduced blood flow. The Committee provided funding in the fiscal year 2007 supplemental to address this critical issue and expects the Department to use the research funds to benefit servicemembers wounded during the global war on terror.

VISION RESEARCH

The Department of the Army continually reassesses new technologies and therapies to address the ocular ailments of combat troops. Current ocular research targets the causes, effects and treatment of eye damage and disease that, despite different mechanisms and pathogenesis, all have a common end result: degeneration of the critical components of the eye and impairment or loss of vision. In order to implement therapeutic strategies to prevent or treat visual problems common to servicemembers, the Army needs to develop and validate compounds and strategies. The Committee directs the Army to target the various causes and effects of visual damage resulting from exposures during combat to elements, and damage resulting from Improvised Explosive Devices (IED). This research will be used to ensure and sustain combat readiness.

PREVENTIVE MEDICINE AND SURVEILLANCE

Preventive medicine is the key to sustaining a healthy and ready force. The Committee fully supports the budget requests for vaccine development and research. The Committee has included additional funding for malaria and leishmaniasis vaccine research and fully supports the \$100,000,000 for avian flu requested for the Defense Health Program.

The Committee also believes that surveillance and an enterprise information management system will further protect Department of Defense (DoD) personnel. The Committee has included \$15,660,000 for the Defense Occupational and Environmental Health Readiness System (DOEHRS). DOEHRS, once developed, will have the capability to document industrial hygiene and environmental health conditions at DoD installations and in the deployed settings.

DoD lacks a full-spectrum mortality registry, a well-proven public health and preventive medicine tool for decreasing mortality. Currently, the Armed Forces Institute of Pathology (AFIP) maintains a registry for all service members who die while on active duty, but no other beneficiary category is included. A full-spectrum registry would provide critical insight regarding long-term outcomes from military service and environmental exposures. To enhance this registry, the Committee has included \$1,500,000 for the Department.

Further, the Armed Forces Health Surveillance Center maintains a longitudinal health record for service members: the Defense Medical Surveillance System (DMSS). The Committee has included \$1,400,000 to automate the collection and transmission of environmental sampling data to DMSS and to expand linkages with various personnel data systems to allow the accurate identification of individuals at risk.

Tracking the immunization status of active duty personnel is an essential component of force health protection. Currently, each Service utilizes a Service-specific electronic immunization tracking system that, depending on the vaccine, may vary significantly with centrally-held records. This represents the potential for service members receiving excess vaccines, with attendant increased individual risk as well as excess cost to the Department. The Committee has included \$4,000,000 for a universal immunization tracking system that would help resolve this liability.

EMBEDDED METAL FRAGMENT REGISTRY

Military operations in OIF/OEF have increased the number of casualties with embedded metal fragments. Current medical practice guidelines often call for leaving such fragments in place unless they are clinically contraindicated. Currently, the DoD lacks a sufficient understanding of the toxicological implications of metal fragments. Therefore, the Committee has included \$700,000 for DoD to develop and implement an Embedded Metal Fragment Registry (EMFR) to monitor the health status of all such servicemembers, refine medical management guidelines, and more effectively partner with the Department of Veterans Affairs in the on-going care of these veterans.

LIMITED ACCESS TO MILITARY TREATMENT FACILITIES IN RURAL AREAS

The Committee is encouraged by the Department of Defense’s recent efforts to address the lack of access to care in rural and remote communities. However, the Committee remains concerned that, despite these efforts, under-served communities still have difficulty accessing health care services, especially the Guard and Reserve components. Therefore, the Committee encourages the Assistant Secretary of Defense for Health Affairs to redouble the Department’s efforts to expand health care services in areas where military installations are not located.

REDUCTION OF CARRYOVER PERCENTAGE

The current fiscal year 2006 Defense Health Program (DHP), Operation and Maintenance (O&M) account unobligated balance is below the fiscal year 2006–2007 DHP O&M two percent carryover threshold authorized in the Fiscal Year 2006 Department of Defense Appropriations Act. The Committee understands that any balances not required for pricing adjustments will be reapportioned into fiscal year 2007 to be obligated prior to fiscal year end. Therefore, the Committee has reduced the percentage the Department of Defense is able to carry over within the Operation and Maintenance account of the Defense Health Program from two to one percent for fiscal year 2008.

REVIEW OF TRICARE CO-PAYS

For several years now, the Congress has demonstrated its disapproval of increasing co-pays as a method for addressing the rising costs of health care by not enacting legislative proposals made by the Department of Defense.

Civilian employers have studied whether or not covering or waiving the cost of drugs can save money over the long term for chronic conditions. The Committee directs the Assistant Secretary of Defense for Health Affairs to review TRICARE co-pays and determine whether or not elimination of certain co-pays would in the long run, be a cost saving measure. The Secretary is to report to the congressional defense committees by January 15, 2008, on whether any savings could be achieved by eliminating certain co-pays.

CHEMICAL AGENTS AND MUNITIONS DESTRUCTION, ARMY

Fiscal year 2007 appropriation	\$1,277,304,000
Fiscal year 2008 budget request	1,455,724,000
Committee recommendation	1,455,724,000
Change from budget request	---

This appropriation funds the Chemical Agents and Munitions Destruction activities of the Department of the Army.

The budget requested \$1,455,724,000 for the Chemical Agents and Munitions Destruction, Army program, an increase of \$178,420,000 from the fiscal year 2007 appropriation. The Committee recommends \$1,455,724,000, fully funding the budget request.

PROGRAM RECOMMENDED

The total program recommended in the bill will provide the following in fiscal year 2008.

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS

[In thousands of dollars]

	Budget request	Committee recommended	Change from request
Chem Demilitarization—O&M	1,198,086	1,198,086
Chem Demilitarization—Proc	36,426	36,426
Chem Demilitarization—RDTE	221,212	221,212
Total, Chem Agents & Munitions Destruction, Army	1,455,724	1,455,724

**DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES,
DEFENSE**

Fiscal year 2007 appropriation	\$977,632,000
Fiscal year 2008 budget request	936,822,000
Committee recommendation	945,772,000
Change from the budget request	+8,950,000

This appropriation provides funds for Military Personnel; Operation and Maintenance; Procurement; and Research, Development, Test and Evaluation for drug interdiction and counter-drug activities of the Department of Defense to include activities related to narcoterrorism.

The Committee recommends an appropriation of \$945,772,000 for Drug Interdiction and Counter-drug Activities, Defense, which is \$31,860,000 less than the amount provided in fiscal year 2007 and \$8,950,000 more than the request for fiscal year 2008.

The adjustments to the budget activities for Drug Interdiction and Counter-Drug Activities, Defense are shown below:

DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES, DEFENSE

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
[In thousands of dollars]

	Budget Request	Committee Recommended	Change from Request

JOINT IMPROVISED EXPLOSIVE DEVICE DEFEAT FUND

Fiscal year 2007 appropriation	---
Fiscal year 2008 budget request	\$500,000,000
Committee recommendation	500,000,000
Change from budget request	---

This appropriation funds the Joint Improvised Explosive Device Defeat Organization (JIEDDO).

The Committee recommends \$500,000,000 for the Joint Improvised Explosive Device Defeat Organization, fully funding the President's budget request. This is the first time the budget includes a funding request for the JIEDDO through the regular appropriations process, and the Committee encourages the continued submission of requests in this manner, particularly for ongoing operating costs. The Committee has limited to \$110,000,000 amounts available to the Organization for operating and administrative costs.

PROGRAM RECOMMENDED

The total program recommended in the bill will provide the following in fiscal year 2008:

EXPLANATION OF PROJECT LEVEL ADJUSTMENTS
 [In thousands of dollars]

	Budget Request	Committee Recommended	Change from Request
JOINT IMPROVISED EXPLOSIVE DEVICE DEFEAT FUND	500,000	500,000	-
Attack the Network	-	299,400	299,400
Defeat the Device	200,000	83,200	-116,800
Train the Force	-	54,400	54,400
Staff and Infrastructure	300,000	63,000	-237,000

RAPID ACQUISITION FUND

Fiscal year 2007 appropriation	---
Fiscal year 2008 budget request	\$100,000,000
Committee recommendation	---
Change from budget request	- 100,000,000

The Committee recomends no funding for the Rapid Acquisition Fund. This request will be considered by the Committee during its deliberations of the fiscal year 2008 war supplemental.

OFFICE OF THE INSPECTOR GENERAL

Fiscal year 2007 appropriation	\$216,297,000
Fiscal year 2008 budget request	215,995,000
Committee recommendation	239,995,000
Change from budget request	+24,000,000

The Committee recommends an appropriation of \$239,995,000 for the Office of the Inspector General. Of this amount, \$238,995,000 shall be for operation and maintenance, and \$1,000,000 shall be for procurement. The recommendation is an increase of \$24,000,000 above the amount requested and will allow the DoD Inspector General to provide additional oversight of Department of Defense contracted services.

TITLE VII
RELATED AGENCIES

NATIONAL AND MILITARY INTELLIGENCE PROGRAMS

The National Intelligence Program (NIP) consists of those intelligence activities of the government that provide the President, other officers of the Executive Branch, and the Congress with national intelligence on broad strategic concerns bearing on U.S. national security. These concerns are stated by the National Security Council in the form of long-range and short-range requirements for the principal users of intelligence. In addition, the Military Intelligence Program (MIP) consists of intelligence activities of the Department of Defense that provide servicemembers with tactical intelligence on the battlefield, as well as provide the President, other officers of the Executive Branch, and the Congress with defense-related intelligence pertinent to defending the United States.

The National Intelligence Program and the Military Intelligence Program budgets funded in the Department of Defense Appropriations Act consist primarily of resources for the Director of National Intelligence including the Intelligence Community Management staff, the Central Intelligence Agency (CIA), the Defense Intelligence Agency, the National Reconnaissance Office, the National Security Agency, the National Geospatial-Intelligence Agency, the intelligence services of the Departments of the Army, Navy, Air Force, and Marine Corps and the CIA Retirement and Disability fund.

CLASSIFIED ANNEX

The Committee's budget reviews are published in a separate detailed and comprehensive classified annex. The intelligence community, Department of Defense and other organizations are expected to fully comply with the recommendations and directions in the classified annex accompanying the Department of Defense Appropriations Act, 2008. As directed by House Resolution 35, the recommendations of the Select Intelligence Oversight Panel are addressed as recommendations to the House Appropriations Committee, Subcommittee on Defense, in the accompanying classified annex.

**CENTRAL INTELLIGENCE AGENCY RETIREMENT AND
DISABILITY SYSTEM FUND**

Fiscal year 2007 appropriation	\$256,400,000
Fiscal year 2008 budget request	262,500,000
Committee recommendation	262,500,000
Change from request	---

This appropriation provides payments of benefits to qualified beneficiaries in accordance with the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (P.L. 88-643), as amended by Public Law 94-522. This statute authorized the establishment of the CIA Retirement and Disability System (CIARDS) for certain employees and authorized the establishment and maintenance of a fund from which benefits would be paid to those beneficiaries.

The Committee recommends the budget request of \$262,500,000 for the Central Intelligence Agency Retirement and Disability System fund. This is a mandatory account.

INTELLIGENCE COMMUNITY MANAGEMENT ACCOUNT

Fiscal year 2007 appropriation	\$621,611,000
Fiscal year 2008 budget request	705,376,000
Committee recommendation	683,276,000
Change from request	-22,100,000

The Committee recommends an appropriation of \$683,276,000 for the Intelligence Community Management Account, a decrease of \$22,100,000 below the budget request. Of the amount appropriated under this heading, \$39,000,000 is for transfer to the Department of Justice for operations at the National Drug Intelligence Center (NDIC). This is an increase of \$23,000,000 above the budget request.

Within the available funding, the Committee has provided \$1,000,000 for the purpose of allowing NDIC to support requests utilizing the Real-time Analytical Intelligence Data Base (RAID) software and training to enhance the capabilities of foreign nations, particularly those in Central America, to address and combat transnational drug and gang-related criminal activities, to include providing translation services and a Spanish language version of the RAID software.

TITLE VIII

GENERAL PROVISIONS

Title VIII includes the general provisions recommended by the Committee. Most of these provisions were included in the Department of Defense Appropriations Act for fiscal year 2007 and many have been included in the Defense Appropriations Acts for a number of years. A description of each provision follows.

Section 8001 provides that no funds made available in this Act may be used for publicity or propaganda purposes not authorized by Congress.

Section 8002 provides for conditions and limitations on the payment of, compensation to, or employment of, foreign nationals.

Section 8003 provides that no funds made available in this Act may be obligated beyond the end of the fiscal year unless express provision for a greater period of availability is provided elsewhere in the Act.

Section 8004 provides a 20 percent limitation on the obligation of funds provided in this Act during last two months of the fiscal year.

Section 8005 provides for the general transfer authority.

Section 8006 provides for the establishment of a baseline for application of reprogramming and transfer authorities for fiscal year 2008.

Section 8007 provides for limitations on the use and transfer authority of working capital fund cash balances.

Section 8008 provides that none of the funds appropriated in this Act may be used to initiate a special access program without prior notification to the congressional defense committees.

Section 8009 provides limitations and conditions on the use of funds made available in this Act to initiate multi-year contracts.

Section 8010 provides for the use and obligation of funds for humanitarian and civic assistance costs under Chapter 20 of title 10, United States Code.

Section 8011 provides that civilian personnel of the Department may not be managed on the basis of end-strength or be subject to end-strength limitations.

Section 8012 prohibits funds made available in this Act from being used to influence congressional action on any matters pending before the Congress.

Section 8013 prohibits compensation from being paid to any member of the Army who is participating as a full-time student and who receives benefits from the Education Benefits Fund when time spent as a full-time student is counted toward that member's service commitment.

Section 8014 provides for the limitations on the conversion of any activity or function of the Department of Defense to contractor performance.

Section 8015 provides for the transfer of funds appropriated in title III of this Act for the Department of Defense Pilot Mentor-Protégé Program.

Section 8016 provides for the Department of Defense to purchase anchor and mooring chains manufactured only in the United States.

Section 8017 prohibits funds made available to the Department of Defense from being used to demilitarize or dispose of certain surplus firearms.

Section 8018 provides a limitation on funds being used for the relocation of any Department of Defense entity into or within the National Capital Region.

Section 8019 provides for incentive payments authorized by section 504 of the Indian Financing Act of 1974 (25 U.S.C. 1544).

Section 8020 provides for a 24-month limitation on a study of a single activity or function and a 30-month limitation on a study of multiple activities or functions.

Section 8021 provides that no funds made available in this Act for the American Forces Information Service may be used for national or international political or psychological activities.

Section 8022 provides for the obligation of funds for purposes specified in section 2350j(c) of title 10, United States Code.

Section 8023 provides funding for the Civil Air Patrol Corporation.

Section 8024 provides for the number of staff years of technical effort that may be funded for defense Federally Funded Research and Development Centers (FFRDCs) and deletes language on the number of staff years that may be funded for defense studies and analysis by FFRDCs.

Section 8025 provides for the Department of Defense to procure carbon, alloy or armor steel plate melted and rolled only in the United States and Canada.

Section 8026 defines the Congressional Defense Committees as being the Armed Services Committees and the Subcommittees on Defense of the Committees on Appropriations of the House and Senate.

Section 8027 provides for competitions between private firms and Department of Defense Depot Maintenance Activities for modification, depot maintenance, and repair of aircraft, vehicles and vessels as well as the production of components and other Defense-related articles.

Section 8028 provides for revocation of blanket waivers of the Buy American Act upon a finding that a country has violated a reciprocal trade agreement by discriminating against products produced in the United States that are covered by the agreement.

Section 8029 provides for the availability of funds for the Young Marines Program.

Section 8030 provides for the availability of funds for purposes specified in section 2921(c)(2) of the 1991 National Defense Authorization Act, namely facility maintenance and repair and environmental restoration at military installations in the United States.

Section 8031 provides for the conveyance, without consideration, of relocatable housing units located at Grand Forks and Minot Air Force Bases to Indian Tribes located in North and South Dakota, Montana, and Minnesota.

Section 8032 provides authority to use operation and maintenance appropriations to purchase items having an investment item unit cost of not more than \$250,000, or upon determination by the Secretary of Defense that the operational requirements of a Commander of a Combatant Command engaged in contingency operations overseas can be met, funds may be used to purchase items having an investment item unit cost of not more than \$500,000.

Section 8033 prohibits the use of Working Capital Funds to purchase specified investment items.

Section 8034 provides that none of the funds appropriated for the Central Intelligence Agency shall remain available for obligation beyond the current fiscal year except for funds appropriated for the Reserve for Contingencies, the Working Capital Fund, or other certain programs authorized under section 503 of the National Security Act.

Section 8035 provides that funds available for the Defense Intelligence Agency may be used for intelligence communications and intelligence information systems for the Services, the Unified and Specified Commands, and the component commands.

Section 8036 provides funding for the procurement of competitive, domestic expansion of essential vacuum induction melting furnace capacity and vacuum arc re-melting furnace capacity.

Section 8037 provides for the Department of Defense to comply with the Buy American Act (title III of the Act entitled "An Act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes").

Section 8038 provides conditions under which contracts for studies, analyses or consulting services may be entered into without competition on the basis of an unsolicited proposal.

Section 8039 provides for the limitations of funds made available in this Act to establish Field Operating Agencies.

Section 8040 provides grant authorities for the Department of Defense acting through the Office of Economic Adjustment.

Section 8041 provides for the rescission of \$367,786,000 from the following programs:

2006 Appropriations:	
Aircraft Procurement, Air Force:	
C-5 RERP	\$10,000,000
C-5 RERP Advanced Procurement	15,786,000
2007 Appropriations:	
Aircraft Procurement, Air Force:	
C-5 RERP	40,000,000
C-5 RERP Advanced Procurement	11,000,000
Research, Development, Test and Evaluation, Navy:	
Expeditionary Fighting Vehicle	24,000,000
Research, Development, Test and Evaluation, Air Force:	
Personnel Recovery Systems	92,000,000
Defense Reconnaissance/Support Activities	50,000,000
Research, Development, Test and Evaluation, Defense-Wide:	
Defense Advance Research Projects Agency	125,000,000

Section 8042 prohibits funds made available in this Act from being used to reduce authorized positions for military (civilian) technician of the Army National Guard, Air National Guard, Army Reserve and Air Force Reserve unless such reductions are a direct result of a reduction in military force structure.

Section 8043 provides that none of the funds made available in this Act may be obligated or expended for assistance to the Democratic People's Republic of Korea unless appropriated for that purpose.

Section 8044 provides for reimbursement to the National Guard and Reserve when members of the National Guard and Reserve provide intelligence or counterintelligence support to the Combatant Commands, Defense Agencies and Joint Intelligence Activities.

Section 8045 prohibits funds made available in this Act from being used to reduce civilian medical and medical support personnel assigned to military treatment facilities below the September 30, 2003, level unless the Service Surgeon General certifies to the congressional defense committees that it is a responsible stewardship of resources to do so.

Section 8046 provides that Defense and Central Intelligence Agency drug interdiction and counter-drug activity funds may not be transferred to other agencies unless specifically provided in an appropriations law.

Section 8047 prohibits the use of funds appropriated by this Act for the procurement of ball and roller bearings other than those produced by a domestic source and of domestic origin.

Section 8048 provides for the Department of Defense to purchase supercomputers manufactured only in the United States.

Section 8049 prohibits the use of funds made available in this or any other Act to transfer administrative responsibilities or budgetary resources of any program, project, or activity financed by this Act to the jurisdiction of another Federal agency not financed by this Act without expressed authorization of the Congress.

Section 8050 provides for prior Congressional notification of article transfers to international peacekeeping organizations.

Section 8051 prohibits the use of funds made available in this Act for contractor bonuses from being paid due to business restructuring.

Section 8052 provides for the transfer of funds to be used to support personnel supporting approved non-traditional defense activities.

Section 8053 provides for the Department of Defense to dispose of negative unliquidated or unexpended balances for expired or closed accounts.

Section 8054 provides conditions for the use of equipment of the National Guard Distance Learning Project on a space-available, reimbursable basis.

Section 8055 provides for the availability of funds provided by this Act to implement cost-effective agreements for required heating facility modernization in the Kaiserslautern Military Community, Germany.

Section 8056 provides for the limitation on the use of funds appropriated in title IV to procure end-items for delivery to military

forces for operational training, operational use or inventory requirements.

Section 8057 provides for the use of funds made available in this Act for the transportation of relief supplies to American Samoa and the Indian Health Service.

Section 8058 prohibits the use of funds made available in this Act from being used to approve or license the sale of the F-22A advanced tactical fighter to any foreign government.

Section 8059 provides for a waiver of the “Buy America” provisions for certain cooperative programs.

Section 8060 prohibits the use of funds made available in this Act to support the training of members of foreign security forces who have engaged in gross violations of human rights.

Section 8061 provides for the Department to develop, lease or procure T-AKE class ships with main propulsion engines and propulsors manufactured only in the United States by a domestically operated entity.

Section 8062 prohibits the use of funds made available in this Act for repairs or maintenance to military family housing units.

Section 8063 provides obligation authority for new starts for joint concept technology demonstration projects only after notification to the congressional defense committees.

Section 8064 provides that the Secretary of Defense shall provide a classified quarterly report on certain matters as directed in the classified annex accompanying this Act.

Section 8065 provides for the crediting of travel and purchase card refunds.

Section 8066 provides for the registration of financial management information technology systems with the DoD Chief Information Officer for certifications of compliance with the Financial Management Modernization Plan and with the Clinger-Cohen Act.

Section 8067 prohibits the use of funds made available to the Department of Defense to provide support to an agency that is more than 90 days in arrears in making payments to the Department of Defense for goods or services provided on a reimbursable basis.

Section 8068 provides for the use of National Guard personnel to support ground-based elements of the National Ballistic Missile Defense System.

Section 8069 prohibits the use of funds made available in this Act to transfer to any nongovernmental entity ammunition held by the Department of Defense that has a center-fire cartridge and is designated as “armor piercing” except for demilitarization purposes.

Section 8070 provides for a waiver by the Chief, National Guard Bureau or his designee for all or part of consideration in cases of personal property leases of less than one year.

Section 8071 prohibits funds made available in this Act from being used to purchase alcoholic beverages.

Section 8072 provides for the use of funds made available to the Department of Defense for the Global Positioning System.

Section 8073 provides for the transfer of funds made available in this Act under “Operation and Maintenance, Army” to other activities of the Federal Government for classified purposes.

Section 8074 provides for the forced matching of disbursement and obligations made by the Department of Defense in fiscal year 2008.

Section 8075 provides grant authority for the construction and furnishing of additional Fisher Houses to meet the needs of military family members when confronted with the illness or hospitalization of an eligible military beneficiary.

Section 8076 provides the Secretary of Defense, in coordination with the Secretary of Health and Human Services, the authority to distribute surplus dental and medical equipment to Indian Health Service facilities and to federally qualified health centers.

Section 8077 provides funding and transfer authority for the Arrow missile defense program.

Section 8078 provides for the transfer funds to properly complete prior year shipbuilding programs.

Section 8079 provides for the noncompetitive appointments of certain medical occupational specialties, as prescribed by section 7403(g) of title 38, U.S.C.

Section 8080 provides that funds made available in this Act are deemed to be specifically authorized by Congress for purposes of section 504 of the National Security Act of 1947.

Section 8081 prohibits the use of funds made available in this Act to initiate a new start program without prior written notification.

Section 8082 provides authority for the Secretary of the Army to make a grant only to the Center for Military Recruitment, Assessment and Veterans Employment.

Section 8083 requires the Department of the Army and the Department of Defense to program and budget to fully finance the Non-Line of Sight Future Force Cannon program; to achieve fielding by fiscal year 2010; to deliver eight combat operational pre-production Non-Line of Sight Future Force Cannons by the end of calendar year 2008; and to ensure budgetary and programmatic plans to provide no fewer than eight Stryker Brigade Combat Teams.

Section 8084 provides the Secretary of Defense the authority to make grants in the amounts specified.

Section 8085 provides that the budget of the President for fiscal year 2008 shall include separate budget justification documents for costs of the United States Armed Forces' participation in all named operations estimated to exceed \$100,000,000 in cost.

Section 8086 prohibits funds made available in this Act from being used for the research, development, test, evaluation, procurement or deployment of nuclear armed interceptors of a missile defense system.

Section 8087 prohibits funds made available in this Act from being used to reduce or disestablish the operation of the 53rd Weather Reconnaissance Squadron of the Air Force Reserve.

Section 8088 prohibits funds made available in this Act from being used for the integration of foreign intelligence information unless the information has been lawfully collected and processed during conduct of authorized foreign intelligence activities.

Section 8089 provides that at the time members of Reserve components of the Armed Forces are called or ordered to active duty,

each member shall be notified in writing of the expected period during which the member will be mobilized.

Section 8090 provides that the Secretary of Defense may transfer funds from any available Department of the Navy appropriation to any available Navy ship construction appropriation to liquidate costs caused by rate adjustments or other economic factors.

Section 8091 provides for the use of current and expired Shipbuilding and Conversion, Navy subdivisions to reimburse the Judgment Fund.

Section 8092 provides for the presentation of promotional materials to active or Reserve members who have participated in Operation Enduring Freedom or Operation Iraqi Freedom.

Section 8093 provides for unspecified reductions to reflect savings from revised economic assumptions.

Section 8094 provides limitations for the reimbursement of any health care provider for inpatient mental health services.

Section 8095 provides authority to the Secretary of Defense to adjust wage rates for civilian employees hired for certain health care occupations.

Section 8096 provides authority to purchase heavy and light armored vehicles notwithstanding price or other limitations on the purchase of passenger carrying vehicles.

Section 8097 provides obligation authority of supervision and administration costs associated with construction projects outside the United States.

Section 8098 limits the obligation authority of funds provided for the Director of National Intelligence to the current fiscal year except for research and technology which shall remain available for the current and the following fiscal years.

Section 8099 provides for the adjustment of obligations within the Shipbuilding and Conversion, Navy appropriation.

Section 8100 provides that not more than 35 percent of the funds made available in this Act for environmental remediation may be obligated under indefinite delivery/indefinite quantity contracts with a total contract value of \$130,000,000 or higher.

Section 8101 provides for the creation of a major force program category for space for the Future Years Defense Program of the Department of Defense.

Section 8102 provides additional appropriations to and transfer authority for the Tanker Replacement Transfer Fund.

Section 8103 prohibits the use of funds made available in this Act to establish any permanent military installation or base in Iraq.

Section 8104 prohibits the use of funds made available in this Act to contravene laws enacted or regulations promulgated to implement the United Nations Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment.

Section 8105 provides limitations on the use of funds made available in this Act to pay negotiated indirect cost rates on agreements or arrangements between the Department of Defense and certain entities conducting basic research.

Section 8106 requires the cost of ongoing operations be included in the budget request. The Congress has urged the Department of Defense to include the reasonably known and ongoing costs of mili-

tary operations in Afghanistan and Iraq within the annual regular budget request each year over the past five years. However, the fiscal year 2008 budget again included the cost for military operations in Afghanistan and Iraq as a supplemental funding request outside the regular budget and in a separate schedule. This non-compliance not only defies Congressional direction, it contravenes stated policy of the Executive Office of the President Office of Management and Budget (OMB), found in OMB circular A-11, which states, that supplemental and budget amendments are to be used for “an unforeseen emergency situation . . .” The Committee observes that the historical precedent for including the cost of ongoing military operations in the annual regular budget requests of the President following initial funding for such operations by emergency or supplemental appropriations Acts, includes:

- funds for Operation Noble Eagle, beginning in the budget request of President George W. Bush for fiscal year 2005;
- funds for operations in Kosovo, beginning in the budget request of President George W. Bush for fiscal year 2001;
- funds for operations in Bosnia, beginning in budget request of President Clinton for fiscal year 1997;
- funds for operations in Southwest Asia, beginning in the budget request of President Clinton for fiscal year 1997;
- funds for operations in Vietnam, beginning in the budget request of President Johnson for fiscal year 1966; and
- funds for World War II, beginning in the budget request of President Roosevelt for fiscal year 1943. Accordingly, this section requires the cost of overseas military operations, to include operations in Afghanistan and Iraq, to be included within the annual regular budget request.

Section 8107 prohibits award fees to any defense contractor contrary to the provisions of section 814 of the National Defense Authorization Act, Fiscal Year 2007 (Public Law 109-364).

Section 8108 limits to 90 percent the funds appropriated to the Department of Defense for contracted services unless and until the Secretary of Defense submits to the congressional defense committees a report of contracted services.

Section 8109 makes available up to \$30,000,000 from funds appropriated under “Operations and Maintenance, Defense-Wide” for impact aid to eligible local education agencies.

HOUSE OF REPRESENTATIVES REPORTING REQUIREMENTS

The following items are included in accordance with various requirements of the Rules of the House of Representatives:

CHANGES IN THE APPLICATION OF EXISTING LAW

Pursuant to clause 3(f)(1) of rule XIII of the Rules of the House of Representatives, the following statements are submitted describing the effect of provisions in the accompanying bill which directly or indirectly change the application of existing law.

Language is included in various parts of the bill to continue ongoing activities which require annual authorization or additional legislation, which to date has not been enacted.

The bill includes a number of provisions which place limitations on the use of funds in the bill or change existing limitations and which might, under some circumstances, be construed as changing the application of existing law.

The bill includes a number of provisions, which have been virtually unchanged for many years, that are technically considered legislation.

The bill provides that appropriations shall remain available for more than one year for some programs for which the basic authorizing legislation does not presently authorize each extended availability.

In various places in the bill, the Committee has allocated funds within appropriation accounts in order to fund specific programs.

Changes in the application of existing law found within appropriations headings:

Language is included that transfers funds appropriated under the heading "Operation and Maintenance, Army" to the U.S. Corps of Engineers for expenses related to dredging of the Hudson River Channel and provides that such transfer shall be in addition to any other transfer authority provided elsewhere in the bill.

Language is included that provides for emergency and extraordinary expenses within the appropriation for "Operation and Maintenance, Army".

Language is included that provides that any transfer authority provided under the heading "Operation and Maintenance, Army" is in addition to any other transfer authority provided elsewhere in the Act.

Language is included that provides for emergency and extraordinary expenses within the appropriation for "Operation and Maintenance, Navy".

Language is included that provides that any transfer authority provided under the heading "Operation and Maintenance, Navy" is in addition to any other transfer authority provided elsewhere in the Act.

Language is included that provides for emergency and extraordinary expenses within the appropriation for "Operation and Maintenance, Air Force".

Language is included that provides that any transfer authority provided under the heading "Operation and Maintenance, Air Force" is in addition to any other transfer authority provided elsewhere in the Act.

Language is included that provides not more than \$25,000,000 for the Combatant Commander Initiative Fund.

Language is included that provides for emergency and extraordinary expenses of the Office of the Secretary of Defense.

Language is included that provides for the Procurement Technical Assistance Cooperative Agreement Program and centers.

Language is included that provides not less than \$245,075,000 shall be available for the Combatant Commander's Exercise Engagement and Training Transformation program.

Language is included that provides that none of the funds in or made available by this Act shall be used to plan or implement consolidation of a budget or appropriations liaison office of various of-

fices with the Department into a legislative affairs or legislative liaison office.

Language is included that provides specific amounts for the Office of Legislative Affairs within the Office of the Secretary.

Language is included that provides, notwithstanding section 130(a) of title 10, U.S.C., funds shall be available for the Office of the Undersecretary of Defense Comptroller and Chief Financial Officer.

Language is included that funds provided for the personnel security investigations of the Defense Security Service shall be paid at rates not to exceed those rates in effect as of August 1, 2006.

Language is included that provides \$4,000,000, to remain available until expended, only for expenses for certain classified programs, may be transferred to certain accounts and that ceilings on investment unit item cost shall not apply to such funds.

Language is included that provides that any transfer authority provided under the heading "Operation and Maintenance, Defense-Wide" shall be in addition to any other transfer authority provided in the Act.

Language is included for the various Environmental Restoration accounts that provides that the service secretaries may transfer such funds for the purposes of the funds provided under such appropriations headings.

Language is included that provides that funds made available for foreign disaster relief and response activities shall remain available until expended.

Language is included that provides for specific construction, acquisition or conversion of vessels under the heading "Shipbuilding and Conversion, Navy".

Language is included that prohibits the use of funds provided under "National Defense Sealift Fund" to award new contracts that provide for the acquisition of major components unless such components are made in the United States.

Language is included that provides that the exercise of an option in a contract award through the obligation of previously appropriated funds shall not be considered to be the award of a new contract.

Language is included that provides waiver authority of the Buy America provisions under "National Defense Sealift Fund" under certain circumstances.

Language is included that provides that not less than \$10,000,000 of funds provided under "Defense Health Program" shall be available for HIV prevention education activities.

Language is included that provides for the carry-over of one percent of the Operation and Maintenance account under the "Defense Health Program".

Language is included that provides for the transfer of funds within the Operation and Maintenance account under the "Defense Health Program".

Language is included under the heading "Chemical Agents and Munitions, Destruction, Army" providing for the allocation of funds for specific activities.

Language is included that provides for the transfer of Drug Interdiction and Counter-Drug Activities. Such transfer authority

shall be in addition to other transfer authority provided elsewhere in the Act.

Language is included that provides for operating and administrative costs within the Joint Improvised Explosive Device Defeat Fund.

Language is included that allows the Director of the Joint Improvised Explosive Device Defeat Organization to undertake certain activities.

Language is included that requires that within 60 days of enactment of this Act, a plan for the intended management and use of the Joint Improvised Explosive Device Defeat Fund is to be provided to the congressional defense committees.

Language is included that requires the Secretary of Defense to submit a report to the congressional defense committees providing assessments of the evolving threats, service requirements to counter threats, pre-deployment training strategy and funds execution of the Joint Improvised Explosive Defeat Fund.

Language is included under the Joint Improvised Explosive Defeat Fund to transfer funds. Such transfer authority shall be in addition to other transfer authority provided elsewhere in the Act.

Language is included that provides for the transfer of funds for the National Drug Intelligence Center.

Language is included that requires the National Drug Intelligence Center to maintain the personnel and technical resources to support law enforcement authorities with counter-drug, counter-terrorism and national security investigations and operations.

Changes in the application of existing law found within general provisions:

Language is included that provides that no funds made available in this Act may be used for publicity or propaganda purposes not authorized by Congress.

Language is included that provides for conditions and limitations on the payment of compensation to, or employment of, foreign nationals.

Language is included that provides that no funds made available in this Act may be obligated beyond the end of the fiscal year unless express provision for a greater period of availability is provided elsewhere in the Act.

Language is included that provides a 20 percent limitation on the obligation of funds provided in this Act during the last two months of the fiscal year.

Language is included that provides for the general transfer authority.

Language is included that provides for the establishment of a baseline for application of reprogramming and transfer authorities for fiscal year 2008 and prohibits certain reprogrammings until after submission of a report.

Language is included that provides for limitations on the use and transfer authority of working capital fund cash balances.

Language is included that provides that none of the funds appropriated in this Act may be used to initiate a special access program without prior notification to the congressional defense committees.

Language is included that provides limitations and conditions on the use of funds made available in this Act to initiate multi-year contracts.

Language is included that provides for the use and obligation of funds for humanitarian and civic assistance costs under Chapter 20 of title 10, United States Code.

Language is included that provides that civilian personnel of the Department may not be managed on the basis of end-strength or be subject to end-strength limitations.

Language is included that prohibits funds made available in this Act from being used to influence congressional action on any matters pending before the Congress.

Language is included that prohibits compensation from being paid to any member of the Army who is participating as a full-time student and who receives benefits from the Education Benefits Fund when time spent as a full-time student is counted toward that member's service commitment.

Language is included that provides for the limitations on the conversion of any activity or function of the Department of Defense to contractor performance.

Language is included that provides for the transfer of funds appropriated in title III of this Act for the Department of Defense Pilot Mentor-Protégé Program.

Language is included that provides for the Department of Defense to purchase anchor and mooring chains manufactured only in the United States.

Language is included that prohibits funds made available to the Department of Defense from being used to demilitarize or dispose of surplus firearms.

Language is included that provides a limitation on funds being used for the relocation of any Department of Defense entity into or within the National Capital Region.

Language is included that provides for incentive payments authorized by section 504 of the Indian Financing Act of 1974 (25 U.S.C. 1544).

Language is included that provides for a 24 month limitation on a study of a single activity or function and a 30 month limitation on a study of multiple activities or functions.

Language is included that provides that no funds made available in this Act for the American Forces Information Service may be used for national or international political or psychological activities.

Language is included that provides for the obligation of funds for purposes specified in section 2350j(c) of title 10, United States Code.

Language is included that provides funding for the Civil Air Patrol Corporation.

Language is included that provides for the number of staff years of technical effort that may be funded for defense Federally Funded Research and Development Centers (FFRDC) and deletes language on the number of staff years that may be funded for defense studies and analysis by FFRDCs.

Language is included that provides for the Department of Defense to procure carbon, alloy or armor steel plate melted and rolled only in the United States and Canada.

Language is included that defines congressional defense committees as being the Armed Services Committees and the Subcommittees on Defense of the Committees on Appropriations of the House and Senate.

Language is included that provides for competitions between private firms and Department of Defense Depot Maintenance Activities for modification, depot maintenance, and repair of aircraft, vehicles and vessels as well as the production of components and other Defense-related articles.

Language is included that provides for revocation of blanket waivers of the Buy American Act upon a finding that a country has violated a reciprocal trade agreement by discriminating against products produced in the United States that are covered by the agreement.

Language is included that provides for the availability of funds for the Young Marines Program.

Language is included that provides for the availability of funds for purposes specified in section 2921(c)(2) of the 1991 National Defense Authorization Act, namely facility maintenance and repair and environmental restoration at military installations in the United States.

Language is included that provides for the conveyance, without consideration, of relocatable housing units located at Grand Forks and Minot Air Force Bases to Indian Tribes located in North and South Dakota, Montana, and Minnesota.

Language is included that provides authority to use operation and maintenance appropriations to purchase items having an investment item unit cost of not more than \$250,000, or upon determination by the Secretary of Defense that the operational requirements of a Commander of a Combatant Command engaged in contingency operations overseas can be met, funds may be used to purchase items having an investment item unit cost of not more than \$500,000.

Language is included that prohibits the use of Working Capital Funds to purchase specified investment items.

Language is included that provides that none of the funds appropriated for the Central Intelligence Agency shall remain available for obligation beyond the current fiscal year except for funds appropriated for the Reserve for Contingencies, the Working Capital Fund, or other certain programs authorized under section 503 of the National Security Act.

Language is included that provides that funds available for the Defense Intelligence Agency may be used for intelligence communications and intelligence information systems for the Services, the Unified and Specified Commands, and the component commands.

Language is included that provides that of the funds made available in this Act under the heading "Defense Production Act Purchases", funds shall be for the procurement of competitive, domestic expansion of essential vacuum furnace melting capacity and vacuum arc re-melting furnace capacity.

Language is included that provides for the Department of Defense to comply with the Buy American Act (title III of the Act entitled "An Act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes").

Language is included that provides conditions under which contracts for studies, analyses or consulting services may be entered into without competition on the basis of an unsolicited proposal.

Language is included that provides for the limitations of funds made available in this Act to establish Field Operating Agencies.

Language is included that provides grant authorities for the Department of Defense acting through the Office of Economic Adjustment.

Language is included that provides for the rescission of previously appropriated funds.

Language is included that prohibits funds made available in this Act from being used to reduce authorized positions for military (civilian) technician of the Army National Guard, Air National Guard, Army Reserve and Air Force Reserve unless such reductions are a direct result of a reduction in military force structure.

Language is included that provides that none of the funds made available in this Act may be obligated or expended for assistance to the Democratic People's Republic of Korea unless appropriated for that purpose.

Language is included that provides for reimbursement to the National Guard and Reserve when members of the National Guard and Reserve provide intelligence or counterintelligence support to the Combatant Commands, Defense Agencies and Joint Intelligence Activities.

Language is included that prohibits funds made available in this Act from being used to reduce civilian medical and medical support personnel assigned to military treatment facilities below the September 30, 2003, level unless the Service Surgeons General certifies to the congressional defense committees that it is a responsible stewardship of resources to do so.

Language is included that provides that Defense and Central Intelligence Agency drug interdiction and counter-drug activity funds may not be transferred to other agencies unless specifically provided in an appropriations law.

Language is included that prohibits the use of funds appropriated by this Act for the procurement of ball and roller bearings other than those produced by a domestic source and of domestic origin.

Language is included that provides for the Department of Defense to purchase supercomputers manufactured only in the United States.

Language is included that prohibits the use of funds made available in this or any other Act to transfer administrative responsibilities or budgetary resources of any program, project, or activity financed by this Act to the jurisdiction of another Federal agency not financed by this Act without expressed authorization of the Congress.

Language is included that provides for prior Congressional notification of article transfers to international peacekeeping organizations.

Language is included that prohibits the use of funds made available in this Act for contractor bonuses from being paid due to business restructuring.

Language is included that provides for the transfer of funds to be used to support personnel supporting approved non-traditional defense activities.

Language is included that provides for the Department of Defense to dispose of negative unliquidated or unexpended balances for expired or closed accounts.

Language is included that provides conditions for the use of equipment of the National Guard Distance Learning Project on a space-available, reimbursable basis.

Language is included that provides for the availability of funds provided by this Act to implement cost-effective agreements for required heating facility modernization in the Kaiserslautern Military Community, Germany.

Language is included that provides for the limitation on the use of funds appropriated in title IV to procure end-items for delivery to military forces for operational training, operational use or inventory requirements.

Language is included that provides for the use of funds made available in this Act for the transportation of relief supplies to American Samoa and the Indian Health Service.

Language is included that prohibits the use of funds made available in this Act from being used to approve or license the sale of the F-22A advanced tactical fighter to any foreign government.

Language is included that provides for a waiver of the "Buy America" provisions for certain cooperative programs.

Language is included that prohibits the use of funds made available in this Act to support the training of members of foreign security forces who have engaged in gross violations of human rights.

Language is included that provides for the Department to develop, lease or procure T-AKE class ships with main propulsion engines and propulsors manufactured only in the United States by a domestically operated entity.

Language is included that prohibits the use of funds made available in this Act for repairs or maintenance to military family housing units.

Language is included that provides obligation authority for new starts for advanced concept technology demonstration projects only after notification to the congressional defense committees.

Language is included that provides that the Secretary of Defense shall provide a classified quarterly report on certain matters as directed in the classified annex accompanying this Act.

Language is included that provides for the crediting of travel and purchase card refunds.

Language is included that provides for the registration of financial management information technology systems with the DoD Chief Information Officer for certifications of compliance with the Financial Management Modernization Plan and with the Clinger-Cohen Act.

Language is included that prohibits the use of funds made available to the Department of Defense to provide support to an agency that is more than 90 days in arrears in making payments to the Department of Defense for goods or services provided on a reimbursable basis.

Language is included that provides for the use of National Guard personnel to support ground-based elements of the National Ballistic Missile Defense System.

Language is included that prohibits the use of funds made available in this Act to transfer to any nongovernmental entity ammunition held by the Department of Defense that has a center-fire cartridge and is designated as “armor piercing” except for demilitarization purposes.

Language is included that provides for a waiver by the Chief, National Guard Bureau or his designee for all or part of consideration in cases of personal property leases of less than one year.

Language is included that prohibits funds made available in this Act from being used to purchase alcoholic beverages.

Language is included that provides for the use of funds made available to the Department of Defense for the Global Positioning System.

Language is included that provides for the transfer of funds made available in this Act under “Operation and Maintenance, Army” to other activities of the Federal Government for classified purposes.

Language is included that has been amended and provides for the forced matching of disbursement and obligations made by the Department of Defense in fiscal year 2008.

Language is included that provides funds and grant authority for the construction and furnishing of additional Fisher Houses to meet the needs of military family members when confronted with the illness or hospitalization of an eligible military beneficiary.

Language is included that provides the Secretary of Defense, in coordination with the Secretary of Health and Human Services, the authority to distribute surplus dental and medical equipment to Indian Health Service facilities and to federally-qualified health centers.

Language is included that provides funding and transfer authority for the Arrow missile defense program.

Language is included that provides for the transfer funds to properly complete prior year shipbuilding programs.

Language is included that provides for the noncompetitive appointments of certain medical occupational specialties, as prescribed by section 7403(g) of title 38, U.S.C.

Language is included that provides that funds made available in this Act are deemed to be specifically authorized by Congress for purposes of section 504 of the National Security Act of 1947.

Language is included that prohibits the use of funds made available in this Act to initiate a new start program without prior written notification.

Language is included that provides authority for the Secretary of the Army to make a grant only to the Center for Military Recruitment, Assessment and Veterans Employment.

Language is included that requires the Department of the Army and the Department of Defense to program and budget to fully finance the Non-Line of Sight Future Force Cannon program; to achieve fielding by fiscal year 2010; to deliver eight combat operational pre-production Non-Line of Sight Future Force Cannons by the end of calendar year 2008; and to ensure budgetary and programmatic plans to provide no fewer than seven Stryker Brigade Combat Teams.

Language is included that provides the Secretary of Defense the authority to make grants in the amounts specified.

Language is included that provides that the budget of the President for fiscal year 2008 shall include separate budget justification documents for costs of the United States Armed Forces' participation in named operations with an estimated cost in excess of \$100,000,000.

Language is included that prohibits funds made available in this Act from being used for the research, development, test, evaluation, procurement or deployment of nuclear armed interceptors of a missile defense system.

Language is included that prohibits funds made available in this Act from being used to reduce or disestablish the operation of the 53rd Weather Reconnaissance Squadron of the Air Force Reserve.

Language is included that prohibits funds made available in this Act from being used for the integration of foreign intelligence information unless the information has been lawfully collected and processed during conduct of authorized foreign intelligence activities.

Language is included that provides that at the time members of Reserve components of the Armed Forces are called or ordered to active duty, each member shall be notified in writing of the expected period during which the member will be mobilized.

Language is included that provides that the Secretary of Defense may transfer funds from any available Department of the Navy appropriation to any available Navy ship construction appropriation to liquidate costs caused by rate adjustments or other economic factors.

Language is included that provides for the use of current and expired Shipbuilding and Conversion, Navy subdivisions to reimburse the Judgment Fund.

Language is included that provides hereafter for the presentation of promotional materials to active or Reserve members who have participated in Operation Enduring Freedom or Operation Iraqi Freedom.

Language is included that provides for unspecified reductions to reflect savings from revised economic assumptions.

Language is included that provides limitations for the reimbursement of any health care provider for inpatient mental health services.

Language is included that provides authority to the Secretary of Defense to adjust wage rates for civilian employees hired for certain health care occupations.

Language is included that provides authority to purchase heavy and light armored vehicles notwithstanding price or other limitations on the purchase of passenger carrying vehicles.

Language is included that provides obligation authority of supervision and administration costs associated with construction projects outside the United States.

Language is included that limits the obligation authority of funds provided for the Director of National Intelligence to the current fiscal year except for research and technology which shall remain available for the current and the following fiscal years.

Language is included that provides for the adjustment of obligations within the Shipbuilding and Conversion, Navy appropriation.

Language is included that provides that not more than 35 percent of the funds made available in this Act for environmental remediation may be obligated under indefinite delivery/indefinite quantity contracts with a total contract value of \$130,000,000 or higher.

Language is included that provides for the creation of a major force program category for space for the Future Years Defense Program of the Department of Defense.

Language is included that provides additional appropriations to and transfer authority for the Tanker Replacement Transfer Fund.

Language is included that prohibits the use of funds made available in this Act to establish any permanent military installation or base in Iraq.

Language is included that prohibits the use of funds made available in this Act to contravene laws enacted or regulations promulgated to implement the United Nations Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment.

Language is included that provides limitations on the use of funds made available in this Act to pay negotiated indirect cost rates on agreements or arrangements between the Department of Defense and certain entities conducting basic research.

Language is included that requires any request for funds for a fiscal year after fiscal year 2008 for an ongoing military operation shall be included in the annual budget of the President.

Language is included that prohibits award fees to any defense contractor contrary to the provisions of section 814 of the National Defense Authorization Act, 2007.

Language is included that limits to 90 percent the funds appropriated to the Department of Defense for contracted services unless and until the Department of Defense submits to the congressional defense committees a report on contracted services.

Language is included that provides appropriations for assistance to local education agencies.

APPROPRIATIONS NOT AUTHORIZED BY LAW

Pursuant to clause 3(f)(1) of rule XIII of the Rules of the House of Representatives, the following table lists the appropriations in the accompanying bill which are not authorized by law:

Agency/Program	Last year of authorization	Authorization level	[In thousands of dollars]	
			Appropriations in last year of authorization ^{1/}	Appropriations in this bill
DEPARTMENT OF DEFENSE:				
Military Personnel, Army.....	2007	2/	29,813,905	31,346,005
Military Personnel, Navy.....	2007	2/	22,776,232	23,300,801
Military Personnel, Marine Corps.....	2007	2/	9,174,714	10,269,914
Military Personnel, Air Force.....	2007	2/	23,564,706	24,379,214
Reserve Personnel, Army.....	2007	2/	3,364,812	3,629,620

1/ Appropriations for Basic Allowance for Housing (Military Personnel); Facilities Sustainment, Restoration and Modernization (Operation and Maintenance); Environmental Restoration; and the Defense Health were provided in H. J. Res. 20

2/ The FY 2007 National Defense Authorization Act authorizes \$110,098,628 for Military Personnel

TRANSFER OF FUNDS

Pursuant to clause 3(f)(2) of rule XIII of the Rules of the House of Representatives, the following is submitted describing the transfer of funds provided in the accompanying bill.

Language has been included in "Operation and Maintenance, Defense-Wide" which provides for the transfer of funds relating to classified activities.

Language has been included in "Environmental Restoration, Army" which provides for the transfer of funds for environmental restoration, reduction and recycling of hazardous waste, removal of unsafe buildings and debris or for similar purposes.

Language has been included in "Environmental Restoration, Navy" which provides for the transfer of funds for environmental restoration, reduction and recycling of hazardous waste, removal of unsafe buildings and debris or for similar purposes.

Language has been included in "Environmental Restoration, Air Force" which provides for the transfer of funds for environmental restoration, reduction and recycling of hazardous waste, removal of unsafe buildings and debris or for similar purposes.

Language has been included in "Environmental Restoration, Defense-Wide" which provides for the transfer of funds for environmental restoration, reduction and recycling of hazardous waste, removal of unsafe buildings and debris or for similar purposes.

Language has been included in "Environmental Restoration, Formerly Used Defense Sites" which provides for the transfer of funds for environmental restoration, reduction and recycling of hazardous waste, removal of unsafe buildings and debris at sites formerly used by the Department of Defense.

Language has been included in "Drug Interdiction and Counter-Drug Activities, Defense" which transfers funds to other appropriations accounts of the Department of Defense.

Language has been included in "Joint Improvised Explosive Device Defeat Fund" which provides for the transfer of funds to appropriations for military personnel; operation and maintenance; procurement; research, development, test and evaluation; and the defense working capital funds.

Language has been included in "Intelligence Community Management Account" which provides for the transfer of funds to the Department of Justice for the National Drug Intelligence Center.

Language has been included in several accounts and general provisions which allows for the transfer of funds between accounts.

RESCISSIONS

Pursuant to clause 3(f)(2) of rule XIII of the Rules of the House of Representatives, the following table is submitted describing the rescissions recommended in the accompanying bill:

Aircraft Procurement, Air Force, 2006/2008	\$25,786,000
Aircraft Procurement, Air Force, 2007/2009	51,000,000
Research, Development, Test and Evaluation, Navy, 2007/2008 ...	24,000,000
Research, Development, Test and Evaluation, Air Force 2007/2008	142,000,000
Research, Development, Test and Evaluation, Defense-Wide, 2007/2008	125,000,000

COMPLIANCE WITH CLAUSE 3 OF RULE XIII (RAMSEYER RULE)

In compliance with clause 3(e) of rule XIII of the Rules of the House of Representatives, the Committee notes that the accompanying bill does not propose to repeal or amend a statute or part thereof.

STATEMENT OF GENERAL PERFORMANCE GOALS AND OBJECTIVES

Pursuant to clause 3(c)(4) of rule XIII of the Rules of the House of Representatives, the following is a statement of general performance goals and objectives for which this measure authorizes funding:

The Committee on Appropriations considers program performance, including a program's success in developing and attaining outcome-related goals and objectives, in developing funding recommendations.

CONSTITUTIONAL AUTHORITY

Clause 3(d)(1) of rule XIII of the Rules of the House of Representatives states that:

Each report of a committee on a bill or joint resolution of a public character, shall include a statement citing the specific powers granted to the Congress in the Constitution to enact the law proposed by the bill or joint resolution.

The Committee on Appropriations bases its authority to report this legislation from Clause 7 of Section 9 of Article I of the Constitution of the United States of America which states:

No money shall be drawn from the Treasury but in consequence of Appropriations made by law . . .

Appropriations contained in this Act are made pursuant to this specific power granted by the Constitution.

COMPARISON WITH THE BUDGET RESOLUTION

Clause 3(c)(2) of rule XIII of the Rules of the House of Representatives requires an explanation of compliance with section 308(a)(1)(A) of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93-344), as amended, which requires that the report accompanying a bill providing new budget authority contain a statement detailing how that authority compares with the reports submitted under section 302 of the Act for the most recently agreed to concurrent resolution on the budget for the fiscal year from the Committee's section 302(a) allocation. This information follows:

[In millions of dollars]

	302(b) allocation		This bill	
	Budget authority	Outlays	Budget authority	Outlays
Discretionary	459,332	475,980	459,332	473,079
Mandatory	263	263	263	263

FIVE-YEAR OUTLAY PROJECTIONS

In compliance with section 308(a)(1)(B) of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93-344), as amended, the following table contains five-year projections associated with the budget authority provided in the accompanying bill.

	(Millions)
Budget Authority	459,332
Outlays:	
2008	309,511
2009	101,111
2010	29,442
2011	9,931
2012 and beyond	8,588

FINANCIAL ASSISTANCE TO STATE AND LOCAL GOVERNMENTS

In accordance with section 308(a)(1)(C) of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93-344), as amended, no new budget or outlays are provided by the accompanying bill for financial assistance to State and local governments.

EARMARKS

Pursuant to clause 9 of rule XXI of the Rules of the House of Representatives, this bill, as reported, contains the following congressional earmarks, limited tax benefits, or limited tariff benefits as defined in clause 9(d), 9(e), or 9(f) of rule XXI.
