SEC. 802. SENSE OF THE CONGRESS; REPORT.

(a) **SENSE OF CONGRESS.**—It is the sense of the Congress that—

(1) in order to provide the borrowers of Federal student loans with the option of converting their loans to income contingent repayment by providing direct loans for the discharge of such loans (in this section referred to as “direct IDEA loans”), the Secretary of Education and the Secretary of the Treasury will work together to develop a process by which the borrower will make payments on such loan using the income tax withholding system and will make appropriate adjustments to his or her withholding or estimated tax payments for such purposes;

(2) the Secretaries should determine—

(A) whether such a repayment option would be beneficial to borrowers and taxpayers; and

(B) how such program would be implemented by the Departments of Education and Treasury; and

(3) this process would—

(A) streamline the repayment process and provide greater flexibility for borrowers electing to use the direct IDEA loan;

(B) significantly reduce the number of loan defaults by borrowers; and

(C) significantly reduce the redundancy in reporting information pertaining to income contingent repayment to the Department of Education, institutions, and applicants.

(b) **REPORT.**—The Secretaries of Education and the Treasury shall, within one year after the date of enactment of this Act—

(1) provide the Congress with information on the progress in devising the direct IDEA loan with income contingent repayment using the income tax withholding system;

SEC. 804. ENCOURAGING COLLEGES AND UNIVERSITIES TO “GO GREEN”.

(a) **FINDINGS.**—The Committee on Education and Labor of the House of Representatives makes the following findings:

(1) A commitment to and academic programs for environmental and economic sustainability are essential for our Nation’s future prosperity.

(2) The more than 4,200 higher education institutions in the United States have the capacity to innovatively leverage spending and change consumption patterns by incorporating concepts of sustainability into their academic programs and by modeling sustainable economic and environmental practices for their communities.

(3) Many colleges and universities have interdisciplinary programs or centers focusing on equipping students with the academic content knowledge needed to understand concepts of sustainability and “going green”.

(4) Many colleges and universities have programs related to the research of sustainability and sustainable systems.

(5) Academic programs related to sustainability vary in rigor because no national education content standards for academic sustainability programs currently exist.

(6) Colleges and universities may partner with businesses to encourage students and faculty to translate academic learning and research into practical solutions that promote sustainability.

(7) Colleges and universities that make an effort to reduce energy consumption and promote environmental sustainability not only reduce their own emissions, but also motivate the leaders of the next generation to action and create technical skills and resources to develop innovative solutions.

(8) Many colleges and universities have undertaken detailed, campus-wide assessments of their progress toward “going green” and sustainability or have measured their progress in specific sectors, such as operations, or specific parameters, such as recycling, energy, and water consumption.

(9) No system that evaluates and compares college and university campuses in terms of overall sustainability-related academic programs and practices currently exists.

(b) **SENSE OF THE COMMITTEE ON EDUCATION AND LABOR.**—It is the sense of the Committee on Education and Labor that in order to encourage increased public awareness of the need to “go green” by using sustainable economic and environmental practices and rigorous sustainability academic programs on college and university campuses, the following should be encouraged:

(1) The development of educational standards by institutions of higher education to determine the necessary rigor and effectiveness of academic sustainability programs.

(2) Public awareness of the need for “going green” by using sustainable economic and environmental practices.

(3) Non-governmental efforts to improve economic and environmental sustainability efforts on college and university campuses, including holding national summits to share best practices.

III. SUMMARY OF THE BILL

TITLE I: GENERAL PROVISIONS

Dually enrolled students

H.R. 4137 amends the definition of an institution of higher education to permit institutions to admit students who are dually or concurrently enrolled in the institution and a secondary school.

Foreign medical schools

The bill allows foreign medical schools to be eligible for federal aid if they have a clinical training program approved prior to January 1, 2008, certify only unsubsidized Stafford or PLUS loans, and agree to reimburse the Secretary for the cost of any defaulted loan in the institution's cohort default rate during the previous fiscal year. It also allows foreign nursing schools to be eligible for federal aid if they have agreements with hospitals and nursing programs located within the United States, have students complete their training in the United States, certify only unsubsidized Stafford and PLUS loans, and agree to reimburse the Secretary for the cost of any student loan defaults if the institution's cohort default rate exceeds 5 percent.

National Advisory Committee on Institutional Quality and Integrity (NACIQI)

The NACIQI advises the Secretary of Education on matters related to accreditation and the eligibility and certification process for institutions of higher education. Under current law, the Secretary appoints members of NACIQI for three-year terms of office. H.R. 4137 increases the committee membership to eighteen members, with six members appointed by the Secretary, six members appointed by the House of Representatives (three appointed by the majority leader and three by the minority leader), and six members appointed by the Senate (three appointed by the majority leader and three by the minority leader).

College costs

H.R. 4137 includes:

A state maintenance of effort to make college more affordable: The bill ensures that states maintain their own level of college financing—to ensure that they fulfill their end of the bargain to make a quality college education affordable to all students. Under this section, states risk losing funds under the newly created “Grants for Access and Persistence” (GAP grants) if they fail to meet the state maintenance of effort. For those states that have specific fiscal challenges, the bill includes a waiver that may be awarded at the discretion of the Secretary.

Also included in the bill is a requirement for a report on the state appropriations, including a comparison of the percentage change in state appropriations per enrolled student in public institutions of higher education to the percentage change in tuition and fees for each public institutions of higher education for each of the five previous years.

Consumer Friendly Information and Transparency: The bill includes a provision for the creation of a national list and reporting system by institutions of higher education. Specifically, the bill requires the Secretary to publish annually a list that allows individuals to sort information by state or type of institution. The list will also include rankings for institutions based on their changes in tuition and fees over the preceding three years. Institutions whose increase in tuition and fees exceeds that of its applicable higher education price index will be placed on the “Higher Education Price Increase Watch List.” For institutions placed on the Watch List, the bill requires schools to create a Quality Efficiency Task Force which will examine the institution’s operating costs as compared to other similarly situated institutions and make recommendations on how the institution can create more efficiencies to help hold down costs.

University and College Accountability Network (U-CAN): H.R. 4137 includes a provision for the creation of a model document, the University and College Accountability Network (U-CAN). This model document may be used by institutions to annually report basic institutional information.

Higher Education Price Index: The bill requires the Bureau of Labor Statistics (BLS) to develop higher education price indices (HEPI) that accurately reflect the annual change in tuition and fees for undergraduate students enrolled in specific types of institutions (e.g., four-year public degree-granting).

Textbook costs

The bill directs college textbook publishers to provide pricing information to faculty and other personnel when they are making purchasing decisions and to provide combined or “bundled” materials separately. H.R. 4137 also directs institutions and college bookstores to provide textbook information to students early (in course catalogs and online) so that they are aware of the textbook costs associated with each course when they are making course selections each semester.

Student loan Sunshine—Private student loans

H.R. 4137 incorporates the bi-partisan Sunshine Act (H.R. 890) into the bill. It incorporates changes to address concerns that the original bill may have unintentionally prohibited College Presidents from serving on a Bank’s board of directors (and vice-versa), despite the absence of a conflict of interest. Further, rather than imposing an out-right ban on all opportunity pools, the bill retains the ban on lenders offering opportunity pools as a quid pro quo for placement on a preferred lender list or for a specified loan volume. The bill subjects any other opportunity pool arrangements to enhanced reporting and disclosure requirements and requires that schools provide students with the choice of multiple lenders, ending

past practices that resulted in students being directed to a single lender.

Feasibility study on a national electronic student loan marketplace

H.R. 4137 includes a requirement for a study on the feasibility of developing a marketplace for students and families to explore the best options with respect to federal and private student loans.

TITLE II: TEACHER QUALITY ENHANCEMENT

Partnership grants

The bill revises the current structure of the teacher education provisions by consolidating the three main programs (state, recruitment, and partnership grants) into one partnership program. The partnership grants permit funds for new initiatives including the establishment of induction programs, a residency model, and mentoring for new teachers. The partnership grants also include greater accountability to ensure both that states develop standards for their teacher education programs, and that these standards and information on the particular programs are reported to the Department of Education.

Preparing teachers for digital age learners

H.R. 4137 retains the goal of PT3 but revises the section to focus not only on ensuring that teacher candidates can integrate technology in the classroom, but also may assess the use of this technology.

Recruitment

The bill creates a new initiative aimed at recruiting and retaining individuals to enter and remain in teaching, particularly in the high demand fields such as science, technology, math, foreign languages, and special education.

Community colleges and teacher education

Because community colleges frequently serve as a pipeline to higher education for underrepresented populations, a new initiative in H.R. 4137 encourages partnerships between two-year and four-year teacher preparation programs. The focus is on ensuring transition is from the two-year to the four-year teacher education program and on exposing teacher education students to the classroom environment early on.

Teach For America

H.R. 4137 includes the authorization of Teach For America to encourage the recruitment and training of talented undergraduate students to enter into the teaching profession.

Honorable Augustus F. Hawkins Centers of Excellence

H.R. 4137 establishes new Centers of Excellence to provide grants to HBCUs and other Minority Serving Institutions (MBIs) to improve teacher quality and preparation.

Early childhood education task force and career ladder

The bill includes newly created state-based task forces on early childhood education with the goal of creating comprehensive state systems. In addition to creating statewide systems, the program encourages a focus on ensuring a well educated and compensated workforce.

National Academy of Science—Study on best practices in teacher education

H.R. 4137 calls for a study by the National Academy of Sciences to develop best practices in teacher education.

TITLE III: INSTITUTIONAL AID

Predominantly Black Institutions, Asian-Pacific Islander Serving Institutions

The bill establishes new designations within title III:

- Predominantly Black Institutions (PBIs) as institutions that have an enrollment of financially needy undergraduate students; an enrollment of undergraduate students at least 40 percent of whom are African American; and, that has at least 1,000 undergraduate students of whom not less than 50 percent enrolled at the institution are low-income or first generation and registered in a BA or AA program leading to a degree.
- Asian and Pacific Islander Serving Institutions as institutions that have an enrollment of undergraduate students that is at least 10 percent Asian American and Pacific Islander and that have a significant enrollment of financially needy students.

Native Americans

The bill makes modest changes to current law with respect to Tribally Controlled Colleges. Additionally, it creates a designation for Native American Non-Tribal institutions which are institutions that (1) have an enrollment of undergraduate students that is not less than 10 percent Native American students and (2) are not already designated as a Tribal College or University under section 316 of the Higher Education Act.

Historically Black Colleges and Universities (HBCUs)

In addition to several technical changes, H.R. 4137 amends Part B to allow HBCUs to acquire property, provide financial literacy, and seek technical assistance. Additionally, the bill adds six graduate programs, namely Alabama State, Bowie State, Delaware State, Langston University, Prairie View A&M, and the University of the District of Columbia School of Law. Finally, this section provides waiver to allow schools affected by the Gulf Coast hurricanes to be held harmless at the enrollment levels prior to the hurricanes.

Minority Science and Engineering Improvement (MSEI) Program

H.R. 4137 adds a new initiative to the current MSEI program to support the participation of underrepresented minority youth in science, technology, engineering, and mathematics through outreach and hands-on experiential-based learning projects. The bill also includes a marketing campaign aimed at encouraging minori-

ties to enter the fields of science, technology, engineering, and mathematics.

TITLE IV: STUDENT ASSISTANCE

Pell grants

The bill increases the authorized maximum Pell grant award from \$5,800 under current law to \$9,000. The bill also allows the Pell grant to be used year round, for certificate programs, and by part-time students. The bill limits student eligibility for the Pell grant to eighteen semesters or twenty-seven quarters (or its equivalent if the student attends part time).

AC/SMART grants

The bill includes changes to allow legal permanent residents in certificate programs and those attending part-time to receive AC/SMART grants. The bill also amends the definition of the academic year. The bill amends the SMART Grant program to clarify that a student pursuing eligible courses of study at an institution where students do not declare majors is eligible for the program.

TRIO

The bill includes outcome measures and evaluation criteria for the TRIO programs. It also retains a provision to prohibit the Department of Education from implementing the absolute priority and evaluation in the Upward Bound program that was adopted in the Committee on Education and Labor during the budget reconciliation 19 process (H.Rpt. 110–210). H.R. 4137 allows non-funded applicants to appeal funding decisions to an administrative law judge.

Campus based aid

The bill provides for cancellation of Perkins loans for firefighters and librarians. H.R. 4137 also clarifies the definition of an early childhood educator. Additionally, the bill includes provisions to help sustain the Perkins loan program. It also reauthorizes the Supplemental Education Opportunity Grants (SEOG) and the Work Study program.

Byrd Scholarship Program

The bill reconstructs the Byrd Scholarship Program to focus on persuading students to earn degrees in the fields of math and science. The program is authorized to develop a Math & Science Honors Scholarship Fund and a Math and Science Incentive Program. The Math and Science Honors Scholarship Fund provides funds to a nonprofit entity to develop the Fund, which may provide scholarships to students who commit to complete five consecutive years of service in a math or science field after graduation. The Math and Science Incentive Program provides for the forgiveness of up to \$5,000 of the interest that accumulates on a student's loan if the student agrees to work for five consecutive years in a math or science field.

Loan forgiveness

The bill includes a new \$10,000 loan forgiveness program for individuals serving in high-needs areas. These qualified individuals are eligible for up to \$2,000 in loan forgiveness each year for five years. Eligible professions are: early childhood educators, nurses, foreign language specialists, librarians, teachers, speech-language pathologists, national service participants, school counselors, public sector employees, nutrition professionals, medical specialists, and mental health professionals.

Additionally, the bill includes further clarification of the public service definition in the ten year loan forgiveness program established by the College Cost Reduction and Access Act (P.L. 110–84) to specifically add nurses, allied health professionals, and early childhood educators.

EZ-FAFSA

The bill simplifies the Free Application for Federal Student Aid (FAFSA) and ensures that students and families begin to receive aid information earlier in the college application process. Specifically, the bill:

- Encourages the Secretary to reduce the number of questions required to be answered by the applicant by 50 percent in the next five years.
- Creates a two-page FAFSA-EZ form for students and families who qualify for the “auto-zero” family contribution.
- Streamlines the reapplication process so that applicants must only provide updated data in subsequent years, rather than re-filing a new FAFSA.
- Directs the Secretary to implement a system that allows students and families, in the years before they apply for aid, to enter and update information and receive estimates of their Expected Family Contribution (EFC), as well as an estimated amount of aid.
- Includes a Sense of the Congress that the Department of Education and the Internal Revenue Service work together to use information the government already has with respect to students and families.

Students with intellectual disabilities

The reauthorization includes eligibility for Pell grants, work-study programs, and SEOG for students with intellectual disabilities who demonstrate financial need, even if they are enrolled in non-degree higher education programs.

Peer-to-Peer file sharing on campus

The bill requires institutions to report their policies with respect to copyright infringement and illegal peer-to-peer file sharing/downloading and any procedures to address the infractions. Additionally the bill includes a grant program for consortia of institutions to explore innovative ways to curtail and prevent illegal downloading.

Articulation agreements and transfer of credit

The bill encourages states to develop and implement comprehensive articulation agreements among institutions of higher education

over the next two years, and directs the Secretary to provide technical assistance.

The bill also requires institutions to fully disclose the transfer of credit policies for current and prospective students.

The “90/10 Rule”

The bill strikes from the statutory definition of an institution of higher education the provision that a for-profit school must derive no more than 90 percent of its revenue from federal title IV student aid programs. Instead, the bill makes this provision a requirement of a school’s title IV program participation agreement with the Secretary. In addition, the bill clarifies and provides additional flexibility with respect to the types of revenue that count toward the 10 percent of revenues that must come from non-title IV sources. In particular, the bill provides that schools may count funds from 529 college savings plans, and activities conducted by the school (to the extent they are not included in schools’ tuition, fees, and charges) that are necessary for the education or training of students enrolled in educational programs, as well as institutional aid and scholarships (to the extent such aid comes from established restricted accounts and the funds in such accounts represent designated funds from an outside source or from income earned on 21 those funds). In addition, the bill removes the automatic termination of a school’s title IV program eligibility after a single violation of the 90/10 rule.

The bill also includes additional safeguards, transparency, reporting and increased sanctions for violating the rule. The Secretary will have the authority to require increased monitoring and reporting requirements. Further, if a school violates the rule two consecutive years, the school will lose eligibility to participate in federal student aid programs for a minimum of three years. H.R. 4137 also provides for public disclosure of schools that violate the rule in any given year. Moreover, the bill requires that the Secretary annually report to the appropriate Congressional committees for each school the calculation of the school’s revenue from federal student aid programs.

Accreditation

H.R. 4137 requires an accrediting agency that already has or seeks to include the evaluation of distance education programs within its scope of recognition to demonstrate to the Secretary that its standards effectively address the quality of distance education programs in the same areas in which it evaluates classroom-based programs.

To ensure that accreditors, institutions of higher education and other organizations have a means to express their concerns about accreditation issues, the bill includes the creation of an ombudsman.

The bill also provides that information about investigations of institutions of higher education will not be made public until the final ruling. This process is consistent with the process followed by the Securities and Exchange Commission in its investigations.

Auction

The bill includes a study of the loan auction included as part of the College Cost Reduction and Access Act (P.L. 110–84). The bill requires the to assess other types of potential auction mechanisms for other federal student loans in addition to Parent Plus loans.

TITLE V: DEVELOPING INSTITUTIONS

Under the new graduate HSI program, the Secretary is authorized to award grants to institutions that offer graduate degrees to enable the institutions to purchase, rent or lease equipment; construct, maintain or renovate classrooms, labs and libraries; purchase books, journals, etc; provide graduate students with fellowships, scholarships and academic support; or support faculty exchanges, etc.

Graduate assistance in areas of national need

Currently, these fellowships are awarded to academic departments and programs at institutions of higher education that provide courses of study leading to a graduate degree in order to enable such institutions to provide assistance to graduate students who are studying in areas of national need. IV. COMMITTEE VIEWS

At several critical moments in history, the United States Congress has acted to establish and reaffirm access to an affordable college education as a national priority. In 1944, Congress passed the GI Bill (the Servicemen's Readjustment Act) to provide educational benefits for veterans returning from World War II, opening the doors of higher education to an entire generation. Responding to threats to the nation's technological superiority, the Congress passed the National Defense Education Act in 1958, ensuring that highly trained individuals would be available to help America compete with the Soviet Union by providing loans to college students and supporting efforts to improve science, mathematics, and foreign language and area studies instruction.

Several years later, in the belief that no one should be denied an equal opportunity to pursue higher education because of an inability to pay, the Congress passed the Higher Education Act of 1965 (HEA). The HEA established a broad-based federal student aid and loan system and created programs to enhance access for low-income students. Building on these earlier efforts, the Congress later created the Pell Grant program to provide grants for lower-income students to help increase access to higher education. Congress furthered these principles by enacting the College Cost Reduction and Access Act in 2007 (P.L. 110–84), which provided a landmark \$20 billion dollar investment in the educational aspirations of the nation's students and their families.

The Committee strongly believes that postsecondary education is a critical component of the formula to ensure a prosperous future for our nation's students. Postsecondary education can help individuals build a better life for themselves and ensure they are prepared to be active participants in the global economy of the 21st century. Research has shown that college graduates will earn an average of \$1 million more over their lifetime than those without a college degree.¹ Additionally, higher education attainment levels correspond to lower levels of unemployment, lower levels of poverty, greater levels of openness to the opinions of others, and higher levels of civic engagement—factors that benefit the entire nation.² Unfortunately, too many of our nation's students still face barriers when pursuing higher education, including: skyrocketing college costs, a complex federal student aid process, lack of awareness about aid

options, and an evolving student loan industry that demands increasingly high levels of consumer sophistication.

Despite these barriers, a growing population and increased occupational demands have resulted in record high enrollments in postsecondary institutions around the country. These enrollment increases and fundamental shifts in the demographics of the nation make all the more necessary an increased commitment from the federal government, states, and institutions to provide additional consumer protections for student loan borrowers and enhanced measures of accountability. To address these and other overarching concerns, H.R. 4137 includes provisions on colleges' affordability and consumer protections (including information on financial literacy), and provisions to support students attending MSIs, to increase access to higher education (including for veterans and students with disabilities), to ensure a highly qualified teacher in every classroom, and to ensure safety on campus.

Making college more affordable

In a 1998 survey by the National Association of College and University Business Officers, only 11 percent of respondents agreed with the statement that a four-year college education is affordable for most Americans.³ Since that survey, college tuition and fees have only increased. Because of these increased costs, as well as an aversion to accumulating debt, 40 percent of today's qualified high school graduates will never enter postsecondary education.⁴ The Committee strongly believes that college can and should be more affordable and accessible to all students, and that this goal can be accomplished, in part, by increasing aid, helping to make college expenditures more efficient thereby eliminating the need for high tuition and fee increases, and reining in the cost of textbooks.

Ensuring integrity and accountability to Student Loan Programs

H.R. 4137 creates consumer protections for students to ensure they can make smart and informed choices about borrowing, and to further ensure that borrowing will be beneficial to both themselves and their families. The Committee believes that creating transparency and accountability in college pricing and loans, maintaining low college costs, and increasing financial literacy will help students begin and complete a college education.

Increasing aid to Minority-Serving Institutions

The Committee believes that assistance for Minority Serving Institutions is essential to create a productive and supportive environment for minority students. Nearly one-third of all African American, American Indian, Alaska Native, Native Hawaiian, and Hispanic students enrolled in institutions of higher education in the United States attend Historically Black Colleges and Universities, Hispanic-Serving Institutions, Tribal Colleges and Universities, and Alaska and Hawaiian Native institutions. These programs and institutions provide unique opportunities to students

who, in many cases, have been denied equal educational experiences in primary and secondary school.

Helping more students access higher education

The Committee recognizes a longstanding and growing need for increased access to higher education, and believes financial literacy education for college students and their parents can help ensure such access. Financial literacy education and student aid awareness are key components of student and institutional support programs, including TRIO, GEAR UP, and others.

Barriers to entry into higher education, including a lengthy and opaque application process, inadequate academic preparation, and limited information on financing options are often significant, preventing qualified students from pursuing postsecondary studies. To alleviate such barriers, H.R. 4137 greatly simplifies the FAFSA form and strengthens key student support programs.

Supporting veterans and military families

Starting with the enactment of the GI bill in 1944, Congress has a long history of helping those who serve in the armed forces obtain a college or university degree. The Committee strongly believes that the federal government should support those who serve in uniform and defend our country in recognition of their service. This bill includes several provisions that will support veterans and their families make the transition to higher education and continue through graduation.

Helping recruit and train quality teachers

Placing well-trained, qualified, and dedicated teachers in schools is an important part of improving elementary and secondary education and ensuring students are academically prepared for postsecondary education. However, accomplishing this goal would be nearly impossible without institutions of higher education producing a qualified supply of these much-needed teachers. For this reason, the Committee believes that colleges and universities that train teachers should be held to high standards, and that these institutions should continue or expand programs that prepare teachers to better employ new technologies, work with students with disabilities, and mentor students in high-need fields of study.

Ensuring the health and safety of students

Over the last several years, tragedies have struck our nation's campuses, some with grave consequences, compelling Congress to recognize the need and importance of ensuring that students are both safe and secure while pursuing their studies. Accordingly, the legislation contains provisions concerning both routine crime reporting and preparedness for disasters and other security threats.

Promoting study in nationally important fields

The Committee recognizes the growing importance of certain fields such as science, technology, education, mathematics, and foreign languages. Not only are these subjects important for the participation of students in a global, technology-based economy, but they are also vital to the defense and success of the nation. Students must be encouraged to undertake study in these fields, and

teachers must be prepared to instruct and mentor students in these fields.

TITLE I—TITLE I AMENDMENTS

Through title I of H.R. 4137, the Committee intends to address the changing needs of higher education since the last reauthorization of the Higher Education Act in 1998. These changes include revisions to various definitions, including the definition of an institution of higher education. Further, the Committee calls for the higher education community to engage in efforts to rein in dramatic tuition increases. Finally, the Committee builds upon the bipartisan effort to enhance consumer protections for students and families started in H.R. 890, the Student Loan Sunshine Act.

Addressing the changing needs in higher education

The Committee recognizes, as part of the changing landscape in higher education, the necessity for diversity in the types of programs offered to assist individuals in their pursuit of postsecondary education. To this end, the Committee specifically recognizes the need for dual and concurrent enrollment programs that enable some secondary school students to earn postsecondary credit in programs of study at an institution of higher education. According to the National Center for Education Statistics (NCES), in school year 2002–2003, 71 percent of high schools offered dual credit courses. In response to this trend, the Committee clarifies that students in dual or concurrent enrollment programs may be admitted as regular students to institutions participating in programs authorized under the Higher Education Act of 1965.

The bill clarifies that degrees from rabbinical schools will continue to be recognized as equivalent to baccalaureate degrees. Additionally, the Committee recognizes the growing need for access to educational programs that do not lead to a specific occupation, such as liberal arts programs, as a way to ensure that students develop the critical skills necessary to understand the rigors of reasoning and to develop a basic knowledge of inquiry. Given that these other programs can serve as a building block to higher learning, particularly for programs such as teacher preparation, the Committee believes that efforts to expand access to liberal arts education programs, including those at accredited for-profit universities, should be continued.

Foreign medical and nursing schools

The Committee recognizes the need to clarify the law with respect to foreign medical schools and to expand the number of foreign medical schools that may participate in the student loan programs to address the critical shortage of nursing and medical professionals.

Under current law, foreign medical schools must meet one of two requirements to participate in the student loan program. First, at least 60 percent of those students enrolled in, and at least 60 percent of the graduates of, the institution may not be American citizens or legal permanent residents. In addition, at least 60 percent of the students or graduates of the institution taking the examinations administered by the Educational Commission for Foreign Medical Degrees must receive a passing score. Second, an institu-

tion must have a clinical training program that was approved by a state as of January 1, 1992. H.R. 4137 clarifies the second requirement to ensure that an institution remains eligible to participate in the student loan program so long as the institution has continuously operated a state-approved clinical training program in at least one state. This clarification enables such an institution that to maintain its eligibility in the event that the approved clinical training program ceases to operate or in the event that 33 that institution opts to change the clinical training program affiliated with the institution. This provision of H.R. 4137 ensures that students are not forced to interrupt their studies and training while the institution waits for re-approval.

The limited enrollment availability at U.S. medical schools and in nursing programs prompted the Committee to recognize more foreign medical schools and to allow for the creation of a new foreign nursing program. The expansion of current law will allow access to only unsubsidized Stafford or PLUS loans, and an institution must agree to reimburse the Secretary for the cost of any defaulted loan in the institution's cohort default rate during the previous fiscal year. The Committee supports exploring options to increase the number of health professionals in the United States, but directs the Secretary to monitor the expansion of the program closely to guard against misuse of the loan programs.

College costs

With the passage of the College Cost Reduction and Access Act, P.L. 110–84, Congress made a deliberate and necessary federal investment in the future of our nation's students and families, investing nearly \$20 billion in federal aid. The Committee is concerned that despite this significant federal investment, little to no effective action has been undertaken by institutions or the states to address the crisis of escalating college costs.

A poll conducted by the Public Policy Institute of California reveals a fear among California residents who believe their children will not be accepted to a university or will be unable to afford it even if they are invited to enroll. This sentiment is reflected in other national surveys on the topic of the perception of college affordability. This fear expressed by the public is rooted in reality. According to the College Board's most recent data on college costs, the average tuition and fees, even after adjusting for inflation, has increased by more than 44 percent in the ten years preceding the 2007–2008 academic year. Because of these increased costs, as well as an aversion to accumulating debt, a full 40 percent of today's qualified high school graduates will never enter postsecondary education.⁵ Costs are also driving students to work more to pay for their education. In testimony before the Committee on May 1, 2007, U.S. PIRG cited their report "At What Cost?" which found that 74 percent of full-time students graduating in 2000, worked while attending school. Of these students, nearly half worked more than twenty-five hours a week. Increased hours of work schedules have been shown to negatively impact a student's grades and over-

all educational experience and his or her educational attainment beyond the traditional four years of education.

The Committee strongly believes that colleges and states can and should do more to address the rising cost of college. To that end, H.R. 4137 provides for disclosure and transparency by institutions of higher education, and establishes a benchmark for states to encourage them to be true partners in the postsecondary education of students.

Transparency in college costs

The Committee believes that students and parents must be able to access information and make comparisons between schools in order to make informed choices about which school to attend. To address this need, the bill requires the Bureau of Labor Statistics to develop a higher education price index (HEPI) for each type of institution that accurately reflects annual changes in tuition and fees for undergraduate students. The Secretary of Education will publish an annual list that allows individuals to sort information by state or type of institution. The list will rank institutions based on their changes in tuition and fees over the previous three years. Those institutions, whose increase in tuition and fees exceeds the increase in the HEPI, will be placed on the “Higher Education Watch List.” When a school is placed on this list, the bill requires it to create a “Quality Efficiency Task Force” to examine the institution’s operating costs and make recommendations for increasing efficiency. The Committee adopted an amendment by Representatives Timothy Bishop (D–NY), Carolyn McCarthy (D–NY), and Yvette Clarke (D–NY) that modifies the exceptions to the HEPI requirements. In accepting this amendment, the Committee recognizes the potentially ambiguous data resulting from the indices for low-cost public institutions and intends to continue working to address this concern when H.R. 4137 is considered on the floor of the House.

The concern about the cost of college spans all types of institutions. The Committee intends that the efforts mandated under this section of the bill address all sectors and types of higher education institutions. The bill also provides for the creation of a model document, the University and College Accountability Network, to be used by institutions for annual reports of basic information useful for consumers. Accountability is among the core principles identified by the Committee to help guide higher education reform, and the Committee believes accountability will be achieved by placing more information about colleges and universities into the hands of students.

State maintenance of effort

The past decade has seen a decline in states’ financing of higher education relative to other state commitments and, as confirmed in testimony before the Committee on November 1, 2007 by the President of the California State University of Long Beach, F. King Alexander, there is a connection between state support for higher education and college costs:

It is quite obvious that as State appropriations slide downward, student tuition and fees must rise. . . . Over the last decade studies have highlighted the instability of

State appropriations and the effects of State policy on public institutional tuition changes. . . . [T]he most influential reason for increases in public college and university costs is the drastic fluctuations of State appropriations

. . . .

The Committee is concerned about the continued fluctuations of state support for higher education. In recognizing that state support is vital to the future success of U.S. higher education, H.R. 4137 requires states to maintain their current levels of college financing or risk losing federal funds under the newly created Grants for Access and Persistence program. Dr. Alexander described the notion of a “maintenance of effort” in his testimony as a “necessary part of the federal/state partnership” to ensure that states continue their current level of support. “Maintenance of effort” has historical roots in the Elementary and Secondary Education Act which, under title I of that Act, requires states to maintain a level of support in order to receive federal funds.

To account for the realities of the current economies of some states, the bill includes an exemption from this maintenance of effort for states experiencing severe economic constraints.

National Advisory Committee on Institutional Quality and Integrity (NACIQI)

The National Advisory Committee on Institutional Quality and Integrity (NACIQI) has served to advise the Secretary on matters related to the recognition of accreditors. H.R. 4137 offers an alternative path to achieve this advisory function by reconstituting NACIQI with individuals appointed by members of Congress in addition to those appointed by the Secretary. The Committee adopted an amendment by Representative Peter Hoekstra (R-MI) that modifies the Congressional appointments to ensure that members of the majority and minority parties would each appoint six individuals. In accepting this amendment, the Committee demonstrates its belief that by equally distributing the appointment of the Congressionally-nominated members among the majority and minority parties to NACIQI, the process may be depoliticized and the committee may truly function in an advisory capacity to the Secretary. Understanding the need for a period of transition, the Committee approved a provision to allow the reconstituted NACIQI to begin in 2009.

Textbook information

While tuition, fees, and room and board are typically the primary costs of attending college for most students, the Committee believes that the cost of textbooks can also play a significant role. This legislation requires publishers to provide pricing information to faculty and other college and university personnel when they are making purchasing decisions and to provide combined or “bundled” materials separately. Once faculty make their curriculum and textbook decisions, the bill directs institutions and college bookstores to provide textbook cost information to students before they choose their classes so that they may consider and budget for such expenses.

According to a 2005 Government Accountability Office (GAO) report, college textbook costs have risen at twice the rate of inflation.

The report found that textbook costs can increase a student's overall college costs from 8 percent at private institutions to over 72 percent at some public institutions and community colleges. In addition, the Advisory Committee on Student Financial Assistance, in a report requested by Congress, found that current grant and scholarship programs, which can barely meet the challenge of rising tuition costs, are insufficient to mitigate college textbook costs. The GAO's 2005 report also found that publishers have begun developing and distributing alternatives to college textbooks in order to provide less expensive materials, but they have had to incorporate the development costs into the price of domestic textbook sales. Furthermore, the GAO reported that demand for textbook alternatives has been insufficient to offset publishers' development costs and reduce the overall costs of college textbooks. Finally, the GAO report found that publishers have engaged in agreements with overseas distributors to restrict American students from purchasing lower-cost textbooks from overseas, regardless of the similarity between domestic and overseas editions.

The Committee believes that H.R. 4137 will ease the burden of rising textbook prices by ensuring that faculty, students, and bookstores all have sufficient and relevant information to make informed choices before purchasing textbooks.

Unit record system prohibition

The Committee believes that students pursuing higher education have an expectation of basic privacy protections, and that these protections should not be compromised as a result of attending an institution of higher education. For that reason, the Committee accepted an amendment by Representative Virginia Foxx (R-NC) that prohibits the Secretary of Education from collecting personally identifiable student-level data for a federal database. The prohibition does not alter the Department's current surveys or data collection efforts to meet the requirements of the Higher Education Act. Further, this prohibition does not adjust any efforts to develop databases at the individual state level.

The Committee understands that the longitudinal sample surveys carried out by the National Center for Education Statistics, such as the Baccalaureate and Beyond Study, the Beginning Post-Secondary Study, and the National Postsecondary Student Aid Survey, involve the voluntary participation of samples of students rather than the collection of extensive, personally identifiable data on all students, and are not subject to the prohibition. Additionally, efforts under the No Child Left Behind Act that encourage the development of data systems at the state level should not be affected by this prohibition.

Enhancing consumer protections

Student loans serve as one of the primary means of access to higher education for students and families. Ensuring that our nation's federal student loan program is working as intended—to help students and parents pay for college—is critical to protecting the integrity of the program and to providing students greater access and opportunities to pursue their educational aspirations. Beginning in early 2007, the Committee launched several oversight activities and investigations, in response to heightened concerns

about questionable relationships among schools, student loan lenders and government officials.

In March 2007, the Committee began examining the relationships among schools and several of the largest student loan lenders in the industry. Additionally, in April 2007, the Committee began investigating potential financial conflicts of interest among lenders, United States Department of Education employees and some school student financial aid officers. As a result of its oversight and investigations, the Committee uncovered a number of unethical practices and disturbing findings, including:

- Lenders staffing schools' financial aid offices, procuring printed materials for schools, catering school and financial aid office functions, and providing other benefits, including access to private loan funds to schools, in exchange for preferential treatment with regard to student loans, such as placement on the school's list of preferred or recommended lenders provided to students;
- Lenders spending large sums of money to entertain school officials;
- Schools engaging in revenue or profit sharing with lenders recommended to students;
- School and government officials holding financial interests in lender companies recommended to students; and
- School officials receiving consulting contracts and payments from lenders that were recommended to students.

Also, in April 2007, the Committee heard additional evidence of unethical practices in the student loan industry during a Committee investigative hearing. New York Attorney General Andrew M. Cuomo appeared before the Committee to discuss his office's student loan investigation and testified that his office had likewise uncovered questionable practices and relationships among schools and student loan lenders. He further testified that the Department of Education's lax oversight over the student loan programs has allowed corrupt practices and conflicts of interest to develop within the system.

In July 2007, the GAO issued a report in response to a request from this Committee that further documented the Department of Education's failure to safeguard the nation's federal student loan programs. The report recommends that the Department immediately increase its oversight of lenders and schools and fully enforce current law, which prohibits lenders from using inducements to gain an advantage with respect to federal student loans from a college or university.⁶ The report also found that the Department did not have a sufficient oversight program in place to identify and address questionable lender behavior. In addition, despite repeated requests from lenders for the Department to provide direction on inducements, the Department had not updated its inducement guidelines in nearly twenty years and, in some cases, did not respond to lenders' inquiries at all. The report also determined that the Department had a poor system for dealing with complaints of improper lender behavior. For example, out of twenty-six documented complaints received by the Department between 2001 and

⁶ Government Accountability Office, Federal Family Education Loan Program: Increased Department of Education Oversight of Lender and School Activities Needed to Help Ensure Program Compliance, GAO-07-750 (Washington, D.C.: July 31, 2007).

2006, only two complaints prompted action by the Department, and fourteen complaints were left unresolved. Furthermore, the report found that the Department attempted to use its sanctioning authority against lenders accused of improper inducements only twice over the past twenty years.

In 2003, the Department's Inspector General urged the Department to issue guidance to lenders and schools on its regulations regarding inducements and gifts.⁷ Similar to the GAO report, the Inspector General noted that the Department's guidance to lenders was outdated. Since the Department had last issued any guidance concerning these matters, the student loan industry had undergone significant changes with increasing demands for benefits or services by schools and escalating competition among lenders. The Inspector General further noted that, in the absence of guidance from the Department, the industry itself had tried but failed to reach consensus on a set of guidelines concerning what constituted appropriate lender behavior.

The Committee believes that the unethical and questionable practices identified by the Committee and others—regardless of how widespread or commonly accepted—must come to an end. The nation's financial aid system exists for a single purpose: to serve students and their families. Students and parents deserve to know that they are getting the best deal possible on their college loans and that all arrangements made between schools and lenders are in the best interests of helping borrowers. The Committee recognizes that not every institution, financial aid officer or lender was engaged in these questionable practices and that many work to ensure students have access to a variety of financing options to achieve their dream of a college education.

This bill, the College Opportunity and Affordability Act of 2007, will help to restore students' trust in the nation's financial aid system by addressing the questionable practices and problems identified by the Committee. The bill incorporates, with additional refinements, the Student Loan Sunshine Act (H.R. 890), which overwhelmingly passed the House earlier this year with tremendous bipartisan support, by a vote of 414–3. In particular, H.R. 4137 will, among other important reforms:

- Require schools to adopt strict codes of conduct that prohibit conflicts of interest;
- Ban gifts and financial compensation, participation on advisory councils, and revenue-sharing agreements between lenders and schools;
- Require that lists of preferred or recommend lenders be compiled based solely on students' best interests;
- Ensure that students are not impeded from their choice of lender; and
- Establish measures to provide students clear, concise, and consistent information that will allow students to compare lenders' products when taking out and repaying loans.

The Committee recognizes the valuable role that schools' financial aid officers have in counseling students and their families about their options for paying college costs and that, in light of to-

⁷U.S. Department of Education Inspector General, Review of Lender Inducements, ED/OIG I13C0003 (Washington, D.C.: August 1, 2003).

day's skyrocketing costs of attending college, their role has never been more important. The Committee also recognizes that many student financial aid officers are dedicated professionals who care deeply and are passionate about assisting students to enroll in and complete college. The Committee believes that the reforms included in the bill will restore and foster the public's trust in the role of these officials in response to the recent controversies that have shaken the nation's student financial aid system. Further, the changes in the bill will better enable student financial aid officials to continue their critical work providing students and their parents with professional, objective, and sound financial aid advice.

The Committee notes that the provisions in the bill banning gifts and payments are not intended to prohibit charitable or philanthropic contributions to schools by lenders, guarantors, or loan servicers. But, such contributions must not be in absolutely any way in exchange for any advantage sought by a lender, guarantor or loan servicer with respect to student loans. The bill also requires that such contributions be disclosed to potential student loan borrowers. Additionally, the Committee does not intend for restrictions included in the bill to prohibit lenders, guarantors, loan servicers, or schools from participating in or supporting outside events designed to assist students in applying to college or completing the federal financial aid process, such as College Goal Sunday, a national initiative sponsored by the Lumina Foundation and the National Association of Student Financial Aid Administrators.

The Committee notes that while the College Opportunity and Affordability Act of 2007 prohibits school officials' participation on lender advisory boards, as well as bars certain contracting arrangements between school employees and student loan lenders, the legislation contains provisions that permit certain relationships to continue. It is the intent of the Committee that college and university presidents are allowed to continue serving on lenders', guarantors', and loan servicers' boards of directors and that bank presidents and other officials may continue their service as trustees of educational institutions, provided that, among other things, appropriate conflict of interest policies and procedures are in place to prevent conflicting interests from being advanced.

The Committee continues to be concerned about conflicts of interest among lenders and schools, especially with respect to instances of quid pro quo arrangements. These arrangements include the practice of lenders conditioning the offer of a pool of private loan funds, such as recourse loans or opportunity pools, on a school agreeing to give the lender an advantage, including the delivery to the lender a specified number of loans, a specified loan volume, or a preferred lender arrangement for federal student loans. The bill prohibits such quid pro quo deal making.

The Committee intends that the provisions of the bill will allow lenders to offer schools recourse loans/opportunity pools, as long as such arrangements do not violate the quid pro quo restrictions. Additionally, the Committee intends the provisions of the bill to operate in a manner that classifies any arrangement between a lender and a school for such funds as a preferred lender arrangement under the provisions of the Act. Consequently, the institution and lender would be subject to the reporting, disclosure and other requirements for preferred lender arrangements. Furthermore, as a

result of related provisions included under title IV of this bill that require schools that enter into preferred lender arrangements to do so with multiple private loan lenders, and multiple federal student loan lenders, as applicable, it is the Committee's intent that a borrower at any particular school would never be in the position of having a choice of only one preferred lender for private student loans or a choice of only one preferred lender for federal student loans. It is the Committee's expectation that the presence of multiple lenders will provide some measure of meaningful borrower choice and will provide at least a minimum level of assurance of the absence of a quid pro quo arrangement between a lender and a school.

The Committee intends to continue its oversight and investigative activities to meet its responsibility to students, families and taxpayers to ensure that the nation's student aid system is designed and administered in a responsive and efficient manner. Ensuring that students and families have access to and can continue fulfilling their dreams of achieving a college education is simply too important and too critical to do otherwise. Moreover, ensuring that higher numbers of Americans receive additional education and training beyond high school is imperative for the nation to effectively compete in the new global economy. The Committee will monitor and assess the implementation of the new initiatives and requirements included in the College Opportunity and Affordability Act to ensure that the intended objectives are met and that any needed improvements are identified.

TITLE II—TITLE II REVISION

The passage of the landmark No Child Left Behind Act in 2002 highlighted the notion that every child should be taught by a highly qualified teacher. As noted by the GAO in their testimony before the Committee on May 17, 2007, "teachers are the single largest resource in our nation's elementary and secondary education system. Approximately three million teachers are responsible for educating over 48 million students . . ." In addition, analysis by the University of Tennessee Value-Added Research and Assessment Center indicates that the single most important school based factor to raising student achievement is the quality of a student's teacher.

The Committee believes that in order for teachers to excel in their crucial role as educators, more must be done to address their needs by providing them with necessary supports and effective training programs. By eliminating the existing state grant program in title II and focusing on the partnership grant program, the bill strengthens programs that prepare prospective and new teachers with strong teaching skills and research capabilities. Comprehensive preparatory programs such as induction and residency will help ensure that our teachers receive quality instruction and develop the necessary skills to succeed in the classroom and educate students at every level. The Committee expects that activities required under title II of this bill will complement the larger teacher preparation efforts required by title II of the No Child Left Behind Act.

Induction programs for new teachers

According to the National Center for Education Statistics, 33 percent of teachers leave the profession after their first three years and 46 percent leave within their first five years—the point at which teachers tend to peak in their abilities. Further, the Alliance for Excellent Education reports that the United States spends an estimated \$5 billion annually due to the loss of approximately 400,000 teachers. The Committee believes, and research consistently supports, that comprehensive induction programs that provide support through not less than the first two years of a new teacher's career will significantly reduce the number of teachers who leave their schools and the profession. Moreover, research from the New Teacher Center shows that beginning teachers who received structure mentoring more closely resemble and can achieve student learning gains equal to those of veteran teachers. As a result, title II of H.R. 4137 authorizes the creation of induction programs as a required use of partnership grant funds. Comprehensive Induction programs like those authorized by H.R. 4137 include high quality mentoring by experienced and qualified individuals, structured collaboration time with teachers in the same department, grade, or field, structured meeting time with administrators, application of empirically based practice and scientifically valid research on instructional practice, assistance with understanding and using student achievement data, professional development activities, and regular evaluations of new teachers. Induction programs may also provide for reduced teaching loads, the support of a teaching aide, and the evaluation of the mentors and of the overall program.

Teacher residency programs

Teacher turnover drains schools of already limited resources. For high-need schools with attrition rates 50 percent higher than schools with more resources, the challenges are significant. The Committee believes we must address this problem and focus new efforts on recruiting a new generation of teachers to fill openings in high-need schools and hard-to-staff subjects. Innovative residency programs underway in Chicago, Boston and Denver require service commitments in high-need schools and boast retention rates that range from 90 to 100 percent. The Committee further believes that preparatory programs must provide teachers with not only the credentials, but also the skills and training to be truly effective in the classroom. Residency programs (like those authorized by the partnership grants in H.R. 4137) couple extensive classroom experience with relevant masters-level coursework. Participants in these programs become highly qualified by teaching alongside a mentor teacher for an entire academic year while earning a masters degree, teacher certificate, or license. These teachers receive substantial preparation and instruction before they ever independently manage a classroom. Research shows that residency programs develop educators with stronger teaching skills and those who remain in the teaching profession for longer periods of time.

Accountability

It is the intent of the Committee that teacher preparation programs, both traditional and those providing alternative routes to

state certification, should strive to increase the quality of individuals graduating from their programs with the goal of exploring ways to assess the impact of such programs on students' academic achievement. Additionally, the Committee believes that states should play a role in helping to evaluate the effectiveness of programs. To that end, H.R. 4137 imposes an annual report requirement on institutions of higher education, both traditional and those providing alternative routes to state certification programs, to provide information to the state and the public. Additionally, each state must submit to the Secretary, a similar report on the quality of teacher preparation programs in the state for both traditional programs and those providing alternative routes to state certification. The Committee intends to use these reports to continue assessing the progress of these programs to ensure that they are meeting their obligation to make teachers well-prepared to teach when they enter the classroom.

Digital age learners

The Committee believes that in today's climate of economic global competitiveness it is incumbent upon our nation to produce teachers who have the skills and expertise to prepare students who will succeed in a technologically-advanced environment. To support this goal, the Committee replaced Part B of current law with "Preparing Teachers for Digital Age Learners." Many teacher candidates are already avid users of technology in their personal lives. However, being facile and dexterous with technology for personal use does not necessarily translate to an expertise in integrating technology into classroom learning for raising student learning outcomes, or developing skills for the 21st century, such as higher order thinking, learning and problem solving skills, and creativity and innovation. Yet, there are programs such as the Technological Pedagogical Content Knowledge for Teaching and Teacher Educators that can instruct teachers in both the design and implementation of meaningful classroom applications of technology with the goal of improving student learning outcomes. Unfortunately, the need is great. The National Center for Education Statistics reports that a majority of teaching institutions have significant barriers to providing teacher candidates with field experiences where they can learn or practice technology-related skills. With the inclusion of "Preparing Teachers for Digital Age Learners", H.R. 4137 authorizes competitive grants to transform the way departments and schools teach technology integration and to develop partnerships linking technologically-capable teachers with high-need schools.

Recruiting teachers with math, science, or language majors

The Committee believes that too many students, especially those in high-poverty schools, are taught by teachers who lack a major in the subject they teach. Research by the National Commission on Teaching and America's Future shows a positive relationship between teacher preparation and knowledge of their subject and student achievement. Yet, according to the Education Trust, 70 percent of math classes in high-poverty middle schools are taught by teachers without a major or minor in math, and 57 percent of all science classes are taught by teachers without a major or minor in science. More than 12 million students in grades 7–12 are taught

by teachers who do not have a degree in the subject they are teaching. The Committee seeks to focus new recruitment efforts in high-need subjects, and H.R. 4137 authorizes a competitive grant program to improve the recruitment of teachers among students majoring in math, science, foreign languages, special education or English language instruction by offering financial incentives.

Teach For America

The Committee recognizes Teach For America's innovative and successful approach to teacher recruitment and the lasting impact Teach For America corps members have had in the movement to eliminate education inequity in schools and school districts. Since its creation in 1990, Teach For America has placed more than 17,000 outstanding college graduates of all academic majors in under-resourced schools around the country, reaching more than 2 million students. After teaching for two years as corps members, more than 63 percent of Teach For America alumni remain in education as teachers, principals, school founders, and policy advisors, becoming lifelong leaders for expanding educational opportunity. Others remain in public service careers in other fields. By authorizing a partnership between Teach For America and the federal government, the Committee believes it will give Teach For America additional tools to help dramatically expand its reach to more than 8,000 corps members teaching nearly 680,000 students every day in thirty-three urban and rural communities.

Early childhood education professional development and career task force

The Committee recognizes the importance of quality preparation and professional development for early childhood educators across the sectors of early childhood education programs. H.R. 4137 establishes competitive grants to support the preparation and mentoring of early childhood educators and to improve the compensation of early childhood educators as they earn postsecondary degrees. The Committee acknowledges research that shows that the quality of early childhood education programs and children's readiness for school is closely tied to the quality of knowledge and skills of educators in those programs. Yet the preparation, ongoing professional development, and other supports to the early childhood workforce are fragmented in delivery and resources. Under Good Start Grow Smart, states are required to plan a professional development system as part of their Child Care and Development Block Grant State plan. However, there have been no resources and limited direction to states to help them perform this critical work. In addition, the issue of woefully inadequate compensation (typically less than \$20,000 per year) for the early childhood workforce must be addressed by states in order to promote recruitment and retention of high quality early childhood educators in child care, Head Start and other early childhood education program settings. To rectify these problems, H.R. 4137 offers grants to establish or enhance existing state-based task forces on early childhood education to develop plans for comprehensive state-wide career systems.

Partnership grants for leadership development programs

The Mid-continent Research for Education and Leadership has discovered a positive correlation between administrator tenure and student achievement. Yet the Committee acknowledges a lack of assistance to states and school districts that are struggling with the increasing pressure to fill vacancies in school administration. Nowhere is this challenge greater than in geographically isolated and high-poverty school districts. While there has been a great deal of attention on teacher preparation and efforts to attract new teachers to the profession, there has been considerably less focus on addressing the education leadership deficit. The Committee accepted an amendment by Representatives Phil Hare (D-IL) and Dave Loebsack (D-IA) to create the Partnership Grants for Leadership Development. This program will train education administration students to serve as superintendents, principals or other school administrators. Students enrolled or preparing to enroll in education administration programs, including current teachers or principals who want to advance their careers, will have access to training and mentoring specific to their needs, including intensive induction programs and recruitment incentives.

The role of community colleges in teacher preparation

Increasingly, community colleges are offering specific teacher education programs and degrees. The most recent information shows that 351 community colleges offered 686 degree programs in education (not including early childhood education and teaching assistant programs), the vast majority of which were two-year associate degrees. Many of these degrees are fully articulated with teacher education programs at four-year universities and provide their students with clinical experiences. Similarly, because of their geographic ubiquity, affordable tuition, and close partnerships with local school systems, community colleges are key factors in teacher professional development and alternative routes to certification. The Committee believes a greater community college role in teacher preparation and development is especially important to increasing the number of teachers from underrepresented populations and in high-need areas.

Recognizing the ever-growing role that community colleges play in the preparation of teachers, the Committee includes the authorization of a new program, the Community Colleges as Partners in Teacher Education Grants. This program recognizes the essential role that community colleges play in the undergraduate preparation, post-baccalaureate certification and in-service professional development of teachers. While a precise number is not available, state estimates and national studies suggest that half or more of all teachers nationwide attend a community college. In Florida, for example, 52 percent of the graduates from university-based teacher education programs are community college transfers. Data show that 60 percent of the teachers graduating from the University of Illinois system started at a community college. These statistics are in line with the fact that nearly half of the nation's baccalaureate degree recipients completed at least some of their course work at a community college.

The Honorable Augustus F. Hawkins Centers of Excellence

The demand for more ethnically and culturally diverse highly qualified teachers is critical, especially given the significant growth in the numbers of minority K–12 students across the country. According to the National Center for Education Statistics, “from 1993 to 2003, minorities increased as a percentage of total public school enrollment from 34 percent to 41 percent.”

Accordingly, H.R. 4137 authorizes grants for the creation of Centers of Excellence at high quality HBCUs and Minority Serving Institutions. The Committee believes that the Centers of Excellence will provide HBCUs and MSIs that have a demonstrated record of preparing highly qualified teachers with a leadership role in recruiting and preparing highly qualified teachers, and also increase opportunities for Americans of all educational, ethnic, economic, and geographic backgrounds to become highly qualified teachers.

In general, the purposes of these Centers are to increase teacher recruitment at Minority Serving Institutions and make institutional improvements to teacher preparation programs at such institutions. Opportunities that increase the numbers of minority teachers and enhance their training, will support broader strategies to enhance instructional opportunities for, and can help to eliminate the achievement gaps of, minority students.

The Committee is further concerned with other underrepresented populations in the teaching profession, including minority males. A report by NCE in 2003 found that only 2.9 percent of full-time instructional faculty and staff at degree-granting institutions are African American males. Although some academic fields (such as engineering and fine arts) enjoy rates close to 5 percent, the percentages of African American men in various departments remain fairly consistent at around 3 percent. It is the Committee’s intent that the Centers of Excellence and the teacher residency component of the partnership grants, aim to address this disparity in order to increase the number of minority males in teaching positions in our public schools.

Augustus F. “Gus” Hawkins was the first African American elected to the House of Representatives from the State of California and a founding member of the Congressional Black Caucus. As a ground-breaking leader, Representative Hawkins chaired numerous committees, including the Committee on Education and Labor, and authored more than 300 pieces of state and federal legislation. His comprehensive record of achievement includes extensive education legislation and the establishment of the Equal Employment Opportunity Commission to combat employment discrimination, which continues to exist today. The Committee finds it fitting to name these newly created Centers of Excellence after Augustus F. Hawkins as a tribute to his record of excellence and as an inspiration to continue working towards equality.

TITLE III—INSTITUTIONAL AID

The National Center for Education Statistics reports that since 1984 minority undergraduate student enrollment has surged by 146 percent compared to a growth of 15 percent for the non-minority population. The number of institutions designated specifically to support minority undergraduates has also grown from 414 in 1984

to 1,254 in 2004. These institutions represent less than one-third of all degree granting title IV institutions, while enrolling more than half of all minority students in postsecondary education. These institutions also enroll a much higher percentage of low-income and first-generation college students than non-minority-serving institutions.

By reauthorizing title III, the Committee recognizes the pivotal role these institutions play in ensuring access to postsecondary education and in increasing the number of college graduates so that the nation can maintain and improve its global competitiveness. H.R. 4137 includes many provisions, including some provisions outside of title III, designed to strengthen these institutions and expand their participation in all of the higher education programs.

American Indian Tribally Controlled Colleges and Universities

The purpose of section 316 of H.R. 4137 is to provide grants and related assistance to Tribally Controlled Colleges and Universities (TCCUs) to enable such institutions to improve and expand their capacity to serve Native American students. Such grants have served the thirty-four federally supported TCCUs in the United States, which educate over 30,000 students, by offering associates, bachelors, and masters degrees, as well as over 200 vocational certificate programs. In many instances, TCCUs offer hope for communities struggling with acute economic and health problems. Such challenges were shared by Olivia Venegas-Funcheon, President of Tohono O'odham Community College (TOCC) in Arizona, in her testimony before the Subcommittee on Higher Education, Lifelong Learning and Competitiveness on June 4, 2007. The funds provided to TOCC purchased a state-of-the-art science laboratory for research opportunities and programs. The funds also helped establish a study center to provide tutoring and mentoring for students enrolled in developmental coursework. Of particular significance are the additional resources the grant has helped bring to TOCC, including funds from the Department of Defense. These funds leveraged from other sources are important for TCCUs given the historical challenges of Native Americans. The Committee recognizes that TCCUs do not have sufficient financial resources to provide these educational opportunities without federal assistance.

The Committee makes changes to the structure of the program to better support TCCUs in their missions. Specifically, the Committee permits the Secretary to use unexpended appropriated funds to award grants of no less than \$500,000 on a formula basis. Sixty percent of these funds are to be awarded proportionally, based on the number of Native American students enrolled at these colleges and universities. The remaining 40 percent would be distributed equally among all eligible schools.

Colleges or universities that are eligible for and receive funds under section 316 are not eligible to receive any additional funding concurrently, under parts A or B of title III. Eligible institutions would not be subject to the wait-out period with respect to new funding under section 316.

Additional support for minority populations

Recognizing the need to further expand the support for minority students, the Committee created additional designations within title III for Native American-Serving, Nontribal Institutions, Predominantly Black Institutions (PBIs), and Asian American and Native American Pacific Islander-serving institutions.

Native American-serving, nontribal institutions

While TCCUs have played a significant role in supporting Native American communities, the Committee recognizes that Native Americans are attending college at greater rates than ever before and many Native American students are attending nontribal institutions of higher education. In 2002, forty-two public and private institutions of higher education served Native American student populations of 10 percent or greater. However, despite the increasing number of Native American students eligible for college enrollment, only 11 percent of the population graduates with a bachelor's degree or higher. Moreover, Native American students are disproportionately enrolled in two-year colleges, and are much less likely to finish college than their non-Native American peers. Native American student educational attainment continues to lag far behind that of the total student population. Many Native American students come from families with low incomes, have parents with low levels of education, and are less likely to have completed a pre-college curriculum in high school. With increasing enrollment, nontribal institutions of higher education that serve large populations of Native American students require resources to improve and expand their capacity to serve the unique and diverse needs of their Native American student population.

To assist nontribal institutions of higher education to better serve Native American students, the Committee has established a competitive grant program for those institutions serving a Native American student population of 10 percent or greater. Grants will support curriculum development and academic instruction, faculty development, and student services such as academic tutoring and counseling. The Committee recognizes that the grant program will improve the capacity of Native American-serving, nontribal institutions of higher education to provide quality educational opportunities for Native American students to narrow the educational attainment gap and to better prepare students to meet the demands of a competitive workforce.

Predominantly Black Institutions

Many higher education institutions have been ineligible for federal grants to enhance college access for low-income and minority students because they are not Historically Black Colleges and Universities (HBCU) established prior to 1965. The Committee finds that at least 75 additional institutions, currently not receiving funding under part B that serve more than 200,000 students, would be eligible for these monies under this authorization. As such, the bill extends the college access grants to Predominantly Black Institutions (PBIs).

PBIs are different than HBCUs in mission, history and, in some instances, resource challenges. Similar to HBCUs, they are meeting vital higher education needs for traditionally underrepresented stu-

dents, a disproportionate number of whom are African American. The allocation formula will be similar to the formula for the title III, part B HBCU institutions. Awards will be based on the percentage of Pell Grant recipients, students graduating within a specified period of time, and students progressing to degree programs at the next academic level. The PBI grant program will increase college access for the growing number of urban and rural minority students whose family and financial situations limit their college attendance.

Asian American and Native American Pacific Islander-serving institutions

The population of Asian American and Native American Pacific Islanders (AAPI) is an exceptionally diverse population. Characteristics of the AAPI population vary according to ethnicity, immigration patterns, historical experiences, and social group issues. The diversity of the population is reflected in the federal government's categories for Asian Americans and Pacific Islanders. There are 17 ethnic groups considered to be Asian and four ethnic groups considered to be Pacific Islander. Neither definition reflects AAPIs who may identify as "more than one race".

The distinct cultural, linguistic, socioeconomic, and historical experiences that affect educational attainment of different AAPI subpopulations are often overlooked because programs and policies are based on aggregated data and the assumption that AAPIs are a monolithic group.

While Asian Americans and Pacific Islanders overall have the highest college graduation rates of any group (44 percent in 2000), certain subgroups have much lower rates of degree attainment. Only 13.8 percent of Vietnamese Americans, 5.8 percent of Laotian Americans, 6.1 percent of Cambodian Americans, and less than 5.1 percent of Hmong Americans had college degrees. Only 13.8 percent of Pacific Islanders had degrees. To address this challenge, the Committee includes the creation of a new program within title III to designate institutions that serve this population. Such a program will provide the assistance to institutions to expand their capacity to identify and assist underserved AAPI students.

Historically Black Colleges and Universities

Part B of title III was first enacted by Congress as part of the Higher Education Act Amendments of 1986 as the Historically Black College and University Act. The intent of the legislation then and now is to eliminate the disparity of educational opportunities for minorities in the United States.

The Committee believes that in the nation's struggle to offer the ideal of an equal education for all Americans, Historically Black Colleges and Universities (HBCUs) have played a critical role to enrich and inspire postsecondary education for African-Americans, low-income, and educationally disadvantaged Americans. For many generations from slavery to segregation, HBCUs were the only institutions in which minorities could receive a postsecondary education.

Their significance is only underscored by the fact that they represent only 3 percent of all colleges and universities, yet they enroll 16 percent of all African Americans in four-year degree granting in-

stitutions. Additionally, 24 percent of all PhDs earned each year by African Americans are conferred by twenty-four HBCUs; eighteen of the top twenty-three producers of African American students who go on to receive science related PhDs are HBCUs; four of the top ten producers of successful African American medical school applicants are HBCUs; eight of the top ten producers of African American engineers are HBCUs.⁸

To ensure the continued success of these institutions and the students they serve, the Committee has made changes to title III that include establishing minimum grant allotments and modifications to uses of funds to support activities such as financial literacy. And to further enhance the graduate programs within HBCUs, the following six universities are added to the list of qualified graduate programs: Alabama State University, Bowie State University, Prairie View A&M University, Delaware State University, Langston University, and the law school at the University of the District of Columbia.

Endowments at HBCUs

The Journal of Blacks in Higher Education reported in 1997 that the combined endowments of all 41 colleges represented by the United Negro College Fund Historically Black Colleges and Universities were about one fourteenth the size of the largest endowment held by a single institution nationally (\$8.8 billion). In a more recent report conducted by the Southern Education Foundation, Howard University had a \$308 million endowment while the largest endowment held by a single institution nationally had increased to \$18 billion. Endowments play a critical role ensuring the stability and sustainability of institutions like HBCUs.

In order to address this growing challenge faced by HBCUs, the Committee increased the authorization levels for the Endowment Challenge Grant program, which have not been increased since 1980.

Supporting Capital Needs at HBCUs

Many of our nation's HBCUs are housed in historical buildings that are in significant need of renovation, updating, and repair. Congress established the HBCU Capital Financing program to provide HBCUs with resources for repairs and renovations. The limit on the amount of bonds that may be outstanding was reached in the effort to assist institutions impacted by the Gulf Coast hurricanes. In order to allow the Secretary to continue issuing bonds for the program, the Committee includes language to increase the amount of outstanding bonds that may be issued.

Support for institutions impacted by Gulf Coast hurricanes

H.R. 4137 includes a provision to provide the Secretary of Education with waiver authority to hold Gulf Coast hurricane-affected institutions of higher education harmless from the enrollment-driven title III formula for the FY 2008–FY 2012 cycle. Gulf Coast hurricane affected institutions of higher education currently face a challenge maintaining their title III funding level due to enroll-

ment decreases that are a direct result of the hurricanes that devastated communities in 2005.

The Committee believes that these provisions are necessary in order for these institutions of higher education to continue expanding their capacity to serve low-income students by providing funds to improve and strengthen the academic quality, institutional management, and fiscal stability of eligible institutions.

Minority Science and Engineering Improvement Program

There is broad consensus that to remain globally competitive, the United States must produce more graduates in the fields of science, technology, engineering, and mathematics (STEM). The Committee recognizes that in order to accomplish this goal, it will be necessary to dramatically increase the number of under-represented minorities pursuing these fields. According to the U.S. Census, 39 percent of the population under the age of 18 is a racial or ethnic minority. That percentage is expected to pass 50 percent by the year 2050. Yet, in 2000, only 4.4 percent of the science and engineering jobs were held by African Americans and only 3.4 percent by Hispanics.

Early outreach, awareness and engagement are essential to encouraging youth to pursue STEM fields. H.R. 4137 establishes Youth Engagement in STEM Partnerships to address this need by leveraging the community ties of title III and title V institutions to establish outreach and experiential-based learning projects that encourage students to pursue careers in the STEM fields.

One example of where this approach has been successful is the Hispanic Engineering Science and Technology (HESTEC) Initiative that has been established by the University of Texas Pan American, a Hispanic-serving institution in Edinburg, Texas. Over the last six years, HESTEC has provided over 25,000 pre-college students and 5,000 teachers hands-on, experiential learning opportunities in the STEM fields. Over the same period, the University of Texas—Pan American has seen its engineering enrollment grow from 720 to 940, with 88 percent of the engineering majors being Hispanic. The YES Partnership Grants Program will enable other institutions to launch similar outreach and engagement initiatives.

Mandatory funds from the College Cost Reduction and Access Act

The College Cost Reduction and Access Act included mandatory funds for HBCUs and MBIs. Through a technical change in this bill, the Committee intends to clarify that the funds be disbursed through the rules that govern title III, specifically that institutions defined under 101 are the only institutions that shall have access to these mandatory funds. The Committee directs the Secretary to work to disburse these funds as soon as possible.

TITLE IV—TITLE IV AMENDMENTS

Part A—Part A Amendments

Pell Grants

The Committee believes that the Pell Grant program is the cornerstone of all federal need-based federal student aid. In the 2006–2007 academic year, more than five million students benefited from the Pell Grant. The language in H.R. 4137, to significantly increase the authorized maximum award from \$5,800 to \$9,000, begins to

restore the purchasing power of the Pell Grant program. Continued commitment to the Pell Grant program is critical in addressing access to and affordability of higher education.

The actual maximum Pell Grant award increased by \$260 in the 2007–2008 award year, and will increase by at least an additional \$490—to a maximum award of \$4,800—in the 2008–2009 award year. It is the hope of the Committee that the Appropriations Committee will build on the progress made by our Committee earlier this year and continue to increase the maximum award in coming years.

Year-round Pell Grants

In order to help financially needy students who are working to graduate quickly, the bill allows for year-round Pell Grants. Currently, students may only receive Pell Grants based on the traditional two semester academic year. This limits options for students studying year-round or on a non-traditional schedule.

The provision of year-round Pell Grants will reduce costs to students and move them through their programs more quickly, thereby allowing institutions to increase enrollments and accelerate course completion and graduation for students. Additionally, year-round Pell Grants reduce the amount of debt that a student would otherwise accumulate, by eliminating the need to finance their education with loans.

The Committee believes that in the coming decades, many states will experience significant increases in postsecondary education enrollments. Offering year-round Pell Grants will allow institutions of higher education to make better use of current facilities by encouraging students to attend college on a year-round basis. Students who choose to take classes all year could complete a two-year associates or a four-year bachelor's degree in less time than usual. In addition, students may use the new summer Pell Grant eligibility to take courses that are overbooked in the regular academic year due to rising enrollments, concentrate on certain courses that require intensive study, or prepare for difficult or preliminary coursework (particularly incoming freshman and transfer students).

Pell Grant eligibility

Current law prohibits an individual who is incarcerated in a state or federal penal institution from receiving federal student loans and Pell Grants. However, in some states individuals convicted of serious sex offenses may be confined in mental health facilities. Under current law individuals so confined are eligible for Pell Grants. In 2004, over 50 individuals convicted of serious sex offenses confined in one mental health facility in Florida had received over \$200,000 in Pell Grants. Representative Ric Keller (R-FL) offered an amendment to modify the eligibility requirements for Pell Grants by ensuring that offenders who remain in custody through involuntary civil commitment' not be eligible for the awards. The Committee believes that this amendment is not intended to thwart the rehabilitation or education of such offenders, but it does address a very specific and particularly dangerous group of offenders and does not permit federal funds to be expended to these individuals through Pell Grant awards.

Pell Grant limitation

Representative David Davis (R-TN) offered an amendment to limit the length of time a student may receive a Pell Grant to eighteen semesters or twenty-seven quarters. Until 1992, a student's eligibility was limited to six years. This amendment ensures that this reauthorization will refocus grant aid to students who are actively pursuing a degree, while at the same time, recognizing the growth in part-time attendance. The Committee believes this will encourage students to make consistent progress toward a degree while protecting the federal fiscal interest in higher education. By basing the limit on semesters or quarters rather than years, this amendment reflects the growing number of part-time and non-traditional students who pursue a degree over an extended number of years.

Data from the Department of Education shows that less than 1 percent of students received eight Pell Grants over an eleven year span. This data demonstrates that the vast majority of students will easily meet this requirement.

Academic competitiveness and SMART grants

The Committee is aware that the first year implementation of this program generated significant concerns. Therefore, the bill includes provisions to ensure that going forward the program will better meet students' needs. The Committee specifically acknowledges the different determinations of academic year by institutions, and accordingly makes changes to ensure that grants under this section are awarded at the same time as other financial student assistance. Further, the Committee strongly believes that all students eligible for federal student aid, not only United States citizens, should be eligible to receive this aid. Therefore, this legislation ensures that the eligibility requirements are consistent with those for all federal student aid programs. In light of current enrollment trends, H.R. 4137 extends the eligibility for this aid to students who attend at least half-time or more, and to those pursuing a certificate in an eligible field of study.

TRIO

The TRIO programs have served many low-income students as they access, persist and graduate from secondary and postsecondary institutions, by providing student support services, college preparation, tutoring and other activities.

The bill provides important technical changes to clarify the definitions of the terms different campuses and different populations. The Department of Education's current regulations narrowly define additional campuses. Its definition thwarts an institutions ability to apply for grants to serve diverse groups of disadvantaged students at various campuses. The Committee intends for institutions with multiple campuses to be able to serve multiple populations.

In response to recent controversies about the competitive grant process, the bill outlines outcome measures and evaluations procedures to ensure that programs are of high quality. Further, the Committee adopted an amendment offered by Representative Robert Scott (D-VA) that creates an appeals process that allows applicants and current grantees to appeal adverse grant decisions before an administrative law judge.

The Committee is concerned with the establishment of an absolute priority for the 2007 Upward Bound grant cycle that required all grantees to have 30 percent of all first-time participants be high-risk academically, further the priority required grantees to only select first-time participants to be in the 9th or 10th grade (unless they were previously served at another grant site), and, finally, required the grantee to be willing to participate in an evaluation. Some members of the Committee expressed these concerns in an August 2006 letter to the Secretary. The Committee is further concerned with the manner by which these priorities were communicated to Congress and the community, and the impact this priority will have on grantees and ultimately the students the programs serve.

TRIO for veterans of the Armed Forces

The bill also resolves two issues important to veterans who are being served by the Upward Bound TRIO program. First, the bill authorizes the use of Upward Bound funding for Math and Science programs for veterans. In taking this action, the Committee recognizes that from 1991 through 2004, the Department of Education successfully funded Veterans Upward Bound Math Science programs at both Humboldt State University and Montana State University. In 2004, the Department of Education unilaterally decided to discontinue these grants after thirteen years despite the fact that one of the grantees has successfully won the competition to operate its Veterans Upward Bound Math Science program and was completing the first year in a multi-year grant. The Committee action specifically provides the legislative authority to fund such programs, and the Committee expects the Secretary to reinstate these programs for the duration of the grant cycle. The Committee further expects the Secretary to honor the terms under which the grants were originally awarded including funding level, number of students to be served, recruitment criteria, provision of room and board, and the ability to offer veterans the opportunity to earn math and science credit.

In return, the Committee expects the grantees to comply with all applicable accountability measures and new program outcomes that are part of the legislation. Further, the Committee intends for the programs to continue on a competitive basis for the duration of the authorization period. In taking this action, the Committee believes such efforts will ensure that these important outreach initiatives will continue to be offered to veterans across the country, as they return from service, to better prepare them to pursue a postsecondary education and gain the skills they need to be successful in today's economy while complying with new accountability standards and program outcome measures.

Second, the bill ensures that grantees are able to provide services for reservists that served on active duty, including those who served in support of a contingency operation in the reserve component for any period of time after September 11, 2001, and for reservists who were called to active duty for any reason so long as their period of service was more than 180 days. Since 2001, more than 40 percent of the troops sent overseas have been members of the reserve component of the Armed Forces. Under current law, upon returning home, these men and women are not given the

same benefits as individuals that served active duty in the Upward Bound program. The changes put forward here will ensure that these individuals are eligible to receive the same services under Upward Bound as other veterans.

GEAR UP

As a new program established in the 1998 amendment to the Higher Education Act, GEAR UP has proven to be an effective model in preparing low-income students for college. Recent data from the United States Department of Education shows that 84 percent of the first class of GEAR UP students graduated from high school in 2005. This remarkable graduation rate is well above those of other low-income students (52.1 percent) and all students nationally (73.9 percent).

In H.R. 4137, the Committee intends to strengthen the GEAR UP program by enabling grantees to serve students through the transition to college and by building incentives for partnerships to offer scholarships as a component of their GEAR UP grant. Additionally, the Committee adopted amendments to enhance the services provided to students and families by focusing on areas such as financial literacy, parental involvement, and dissemination of college information.

Leveraging Educational Assistance Partnership/Grants for Access and Persistence

The Committee believes that the changes made to the Leveraging Educational Assistance Partnership (LEAP)—including providing students with information about their grants and implementing the Grants for Access and Persistence program—will strengthen the program by leveraging the financial assistance provided under this program in a way that is more effective for students, states, and the federal government. These improvements to LEAP will broaden participation to include all stakeholders working to increase the number of financially needy students who can access and succeed in college.

H.R. 4137 replaces the Special Leveraging Educational Assistance Partnership with Grants for Access and Persistence (GAP). By doing so, the Committee seeks to ensure the continued success of LEAP, the only program in which the federal and state governments work together to extend higher education opportunities to financially needy students. Under the GAP program, awarded to states that receive LEAP funds above \$30 million, states will be rewarded for creating cohesive partnerships with colleges, foundations, businesses, and early intervention and mentoring programs. Access and persistence partnerships have three main purposes: to provide low-income students with adequate grant aid to ensure access to four-year colleges and eliminate unmet need; to provide early notification to low-income students of their eligibility for financial aid; and to increase participation of low-income students in early information, intervention, mentoring, and outreach programs. Research on college access programs with such components has shown that participating students are more financially and academically prepared, and thus more likely to enroll in college and persist to degree completion.

The Committee strongly encourages states to develop strong and broad partnerships that include philanthropic and business organizations, colleges and early intervention and mentoring programs. The Committee encourages the Secretary and states to coordinate the early notification components of the GAP program with other existing or new early financial aid awareness efforts in order to avoid duplication of services or information. Further, the Committee encourages the Secretary and states to work together to coordinate the GAP program with the Challenge Grant program to ensure continuity of services.

High School Equivalency Program (HEP) and the College Assistant Migrant Program (CAMP)

Farm-worker migrant and seasonal students are among the most disadvantaged youth in this nation and have one of the highest drop-out rates. They encounter tremendous obstacles in completing high school and transitioning and completing postsecondary education. For over three decades, the High School Equivalency Program (HEP)—College Assistant Migrant Program (CAMP) programs have been successful in helping farm-worker migrant and seasonal students to overcome barriers and provide them with opportunities to succeed in both secondary and postsecondary education by providing support services to help students make the transition to college.

The College Opportunity and Affordability Act of 2007, builds upon the success of the existing HEP—CAMP program by making improvements to the current program to allow additional activities that helps with the transition and improve the persistence and retention of farm-worker migrants students in postsecondary education. Activities include child care, transportation and follow up services. The legislation would also mandate data collection regarding farm-worker migrant and seasonal students' high school graduation rates, entrance and completion of postsecondary education to better understand the obstacles these students face in successfully completing postsecondary education. These improvements to the HEP CAMP programs would help to close the access and completion gaps for farm-worker migrant and seasonal worker students and their families and help make college education a more affordable, achievable dream.

Robert C. Byrd American Competitiveness Program

Over the past several years the Committee has heard from multiple witnesses that our nation's competitiveness depends on the quality of our science, technology, engineering and mathematics related workforce. Careers in these disciplines support the United States in maintaining its leadership in innovation and in ensuring that we can solve challenging problems such as designing new technologies, protecting our nation, and maintaining a strong economy. Therefore, the Committee is discouraged that America's high school students are struggling to keep up with their industrialized-world peers in the fields of mathematics and science and believes that Congress must do more to encourage our young people to pursue careers in these fields, providing not only for their prosperity but that of the entire nation.

Accordingly, H.R. 4137 includes a comprehensive proposal to help strengthen American competitiveness by increasing opportunities for students to study mathematics, science, and related fields. H.R. 4137 builds on the framework of existing federal higher education investments to better reflect the national priority of increasing the number of American students studying advanced science and mathematics. H.R. 4137 updates the Robert C. Byrd Honors Scholarship program to meet this priority.

The College Opportunity and Affordability Act of 2007 includes three distinct approaches to increase mathematics, science and foreign language opportunities for students. First, the bill authorizes mathematics and science honors scholarships to encourage students to pursue a baccalaureate, masters, or doctoral degree in physical, life, or computer sciences, mathematics, and engineering. This idea, generated from testimony provided by Mr. Norm Augustine during the hearing that took place in the 109th Congress, “Challenges to American Competitiveness in Math and Science,” is intended to provide an incentive for more students to persist in studies in the math and science disciplines. Mr. Augustine’s testimony pointed out that in the mathematics field, current trends indicate that of 3,500 ninth graders interested in math, only 300 of those students will qualify as freshmen to pursue a degree in mathematics. Of the 300 students, only 10 will receive a bachelors degree and only one will finish at the Ph.D. level.

Second, H.R. 4137 authorizes the Secretary to pay up to \$5,000 in student loan interest for individuals who have obtained degrees in science or mathematics and serve as teachers or other professionals in related fields. The loan forgiveness also provides an incentive for students to enter into the math and science fields. In addition, this incentive attempts to maintain people in the math and science fields by requiring that anyone receiving this forgiveness must work in a math or science related field for at least five years.

Finally, the College Opportunity and Affordability Act of 2007 authorizes the Secretary to award grants to partnerships composed of institutions of higher education and local educational agencies to increase the number of highly qualified teachers in critical foreign languages and increase the number of students who achieve the highest level of proficiency in these languages.

These provisions build on the provisions included in the America COMPETES Act, P. L. 110–69, and will help ensure that the country’s young people are armed with the skills needed to bolster America’s competitiveness throughout the world.

Part B—Federal Family Education Loans

Loan forgiveness in areas of national need

Our nation’s workforce, while strong and vibrant, suffers shortages in key sectors. Acknowledging this need, the Committee expands the loan forgiveness program to offer up to \$10,000 (\$2,000 per year for five years) of loan forgiveness to individuals in professions considered to be areas of national need as designated by the Secretary. This program includes loan forgiveness for: early childhood educators, nurses, foreign language specialists, librarians, highly qualified teachers serving students who are limited English

proficient in low-income communities and teachers who are individuals from underrepresented populations, school counselors, public sector employees, nutrition professionals, national service program participants, medical specialists, mental health professionals, and speech language pathologists. The Committee believes authorizing loan forgiveness for these areas with demonstrated national need will provide a step in the right direction as the nation works to alleviate shortages in key fields.

Of significant concern to the Committee is the critical shortage of nurses. Dating back to 2000, there was a 6 percent shortage of nurses and other health care professionals. The need for nurses is projected to increase to by almost 30 percent in the next fifteen to twenty years. There is also a shortage of professionals available to teach students to become nurses, exacerbating the shortages today and those we will see into the future. Over the next ten years, more than 2 million nurse faculty will leave the field for other careers.

Similar shortages are predicted in allied health professions. According to the U.S. Bureau of Labor Statistics, the health care industry is predicted to add nearly 3.5 million new jobs between 2002 and 2012, an increase of 30 percent. A large majority of these new jobs will be in allied health professions. At the same time that demand for allied health professionals is expected to grow, there are a variety of challenges relating to the training and retention of these professionals.

The Committee is additionally concerned with the shortage of well-trained and qualified early childhood educators. The evidence of a shortage of early childhood educators and the importance of having qualified people serve in these positions is clear. The Economic Policy Institute, the Keystone Research Center and the Foundation for Child Development recently published a report titled, "Losing Ground in Early Childhood Education: Declining Workforce Qualifications in an Expanding Industry, 1979–2004," in which it was demonstrated that the share of early childhood staff with college degrees has dropped significantly over the past twenty years, from 43 percent to 30 percent. In addition, the report pointed out that the most educated cohort of early childhood teachers are retiring in the next fifteen years and there are not enough students in the pipeline to fill those positions. Moreover, the demand for early childhood programs is growing. Today, approximately 70 percent of families with children include two working parents or one unmarried working parent. Nearly 12 million children under five years of age are in some type of regular child care arrangement, including 55 percent of infants under one year of age and 67 percent of three and four year olds. Access to high quality programs staffed by qualified early childhood educators is essential for all children to receive the support and care they need during the years in which their brains are growing the fastest. Increasing the supply of well-trained early childhood educators is an essential component to helping more children arrive at kindergarten ready to succeed and to closing the achievement gap.

Loan forgiveness for civil legal assistance attorneys

A study released in 2005 found that only 50 percent of the people eligible for legal services (meaning they had household income for

a family of four of \$25,800 or less) were able to get legal help from a legal aid program.⁹ Estimates are that closer to 80 percent of low income Americans actually have unmet civil legal needs. Unfortunately, there is only one legal aid attorney available per 6,861 low-income Americans, compared to one attorney for every 525 middle-income Americans. One key reason for this disparity is the inability of legal aid programs to recruit and retain attorneys.

As law school tuition has skyrocketed, legal aid salaries have not increased in any significant way. Between 1992 and 2002, public law school tuition increased 134 percent and private law school tuition increased 76 percent. A recent survey found that with median law school debt at \$70,000 with an additional \$16,000 in undergraduate debt, over 65 percent of new law school graduates were prevented from even considering a public service career.

The average starting salary for a legal aid attorney is \$36,000 a year. Yet among those attorneys who do commit to a legal assistance program, 90 percent graduated with debt. The debt averaged \$77,000 translating into payments of \$12,000 a year.¹⁰ Given these financial realities, many law graduates who take positions with legal aid leave after only two or three years of service.

To address this growing challenge, the Committee includes language to build on existing loan repayment and retention programs for federal prosecutors and twenty-nine other government agencies, including the Department of Justice and the Congress, by providing partial loan repayment assistance to full time civil legal assistance lawyers. The Committee strongly supports this aid to this group of attorneys in exchange for commitments of service. It is the belief of the Committee that such a program will help ease the challenges of recruiting and retaining qualified and talented attorneys working as legal aid attorneys.

Delinquency prevention, default aversion, and consumer information

As found in titles I and X of H.R. 4137, in response to the Committee's oversight and investigative findings, the Committee provided for improved consumer disclosures and school and lender reporting on terms and conditions of federal student loans. The Committee recognizes that guaranty agencies can play an important role in assisting students and families take full advantage of the clear, concise and consistent information that will be available to help inform students and parents as they undertake critical educational financing decisions. As more and more students turn to loans to finance their education, the Committee believes that additional and enhanced budgeting and financial management, including debt management and other aspects of financial literacy, such as the cost of using high interest loans, and the consequences of defaulting on loans, can help students and families avoid costly mistakes that can have an indelible and devastating impact on their lives.

Cohort default rates

Over the years, a number of provisions have been enacted under the Higher Education Act to protect the integrity of the federal student aid programs. One effective mechanism was to restrict federal loan eligibility for students at schools with very high cohort loan default rates. These rates have served as a relatively reliable indicator of the quality of programs and resulting success of the students in the job market. Under current law, loss of eligibility occurs if an institution has a cohort default rate of 25 percent or more for three consecutive years. Although the overall cohort default rate has fallen to 4.6 percent in 2005, from an overall high of 22 percent in 1992, the snapshot taken for purposes of the cohort default rate should be expanded to coincide with the change in the definition of default from 180 days to 270 days, in order to ensure a more realistic calculation.

Unfortunately, current cohort default rates may not provide an accurate picture of the number of students who are defaulting. According to a 2003 report by the Department of Education's Inspector General, some schools use various strategies to keep defaults from being counted.¹¹ These strategies include working to keep borrowers from defaulting during the maximum two-year period, the time in which cohort default rates are calculated. Such actions may mask actual default rates which tend to increase over time.

The Committee adopted an amendment offered by Representatives Raúl Grijalva (D-AZ) and Tim Bishop (D-NY) to address this potential inconsistency and to provide Congress with realistic information on defaults. This language lengthens the period in which the cohort default rate is collected in order to capture the defaults that occur just beyond the current window and will make it more difficult for institutions to avoid defaults from being counted. The language extends the cohort default rate by one year.

The Committee believes that it is also important to continue to follow loan defaults over the life of the loan by calculating and publishing updates to the initial cohort default rates annually, by institutional sector. The Committee recommends that such follow-up apply to all sectors in order to provide a clearer picture of default rate trends.

Part C—College Work-Study

Work-study has played a growing and necessary role in the financing of a student's education. During a hearing held by the Committee on May 1, 2007, Luke Swarthout of U.S. PIRG cited a report of the organization that 74 percent of full-time students graduating in 2000 worked while attending school. The Committee believes that work-study is a valuable program for students in the financing of their education and to that end H.R. 4137 reauthorizes the program.

Additionally, the Committee supports the continued use of funds for community service through an expansion of the program that allows funds under the program to be used for activities that respond to the needs of a community during natural disasters. As a

¹¹ Audit to Determine if Cohort Default Rates Provide Sufficient Information on Defaults in the Title IV Loan Programs (Washington, DC: Department of Education Office of Inspector General, December 2003).

further extension of these efforts, the Committee includes language to allow for institutions of higher education to supplement off-campus community service employment.

To ensure that institutions are properly informed about the need to encourage community service through the work-study program, the Committee requests the Department of Education and the Corporation for National and Community Service to provide all necessary information and technical assistance to participating institutions in order to help them expand the use of work-study funds for community service, and to strengthen the connection between federal work-study jobs and the educational or career goals of participating students.

Work colleges

The Committee continues to support work colleges as institutions that have proven an effective means of providing students the opportunity to work and learn. The bill includes language that encourages new models of student-organized volunteer service projects provide students with the opportunity to participate in volunteer service projects associated with institutions of higher education is an excellent way to develop leadership and civic engagement.

Part D—Federal Direct Student Loans

Loan forgiveness

The College Cost Reduction and Access Act (P.L. 110–84) created a loan forgiveness program to encourage individuals to pursue public service. Specifically, the legislation revised the Direct Loan Income Contingent Repayment program to allow individuals who choose public service the option to have their loans forgiven after ten years if payments are made during that time period. The Committee makes changes to this program to clarify the categories of jobs that qualify for public service.

Direct loans

The Committee reauthorizes the Direct Loan program. Further, the Committee adopted an amendment by Representative Tom Price (R-GA) to authorize the Secretary to conduct an audit of the program. The Committee believes such an audit is consistent with the process the Secretary should use for the oversight of all federal student aid programs and notes that this provision does not give the Secretary authority to diminish the valuable role that the Direct Loan program plays in the financing of higher education and as serving as an alternative to the Federal Family Education Loan program.

Part E—Perkins loans

The purpose of the Perkins loan program is to lend low-cost funds to borrowers with demonstrated financial need. Perkins loans make a significant difference for low-income borrowers who do not otherwise receive enough funds to pay for college. The Committee believes that, given this purpose and the need the Perkins loan program will be an essential of higher education financing for the foreseeable future.

Throughout the history of the Perkins Loan program, \$7.9 billion in federal contributions has been leveraged to award over \$24 billion in loans to financially needy students through almost 22 million aid awards, making it one of the most effective public-private partnerships in the federal government. Perkins loans offer financially needy students a long-term, fixed 5 percent interest rate loan. Without Perkins loans, the over 700,000 borrowers would be forced to borrow from high-cost alternative sources, such as private education loans.

H.R. 4137 reauthorizes the Perkins loan program and increases the annual maximum loan limits from \$4,000 to \$5,500 for undergraduates and from \$6,000 to \$8,000 for graduate or professional students. Additionally, the aggregate loan limits are increased from \$20,000 to \$27,500 for undergraduates and from \$40,000 to \$60,000 for graduate and professional students. H.R. 4137 emphasizes that collections of assigned loans should be returned to the revolving fund of the campus that assigned the loan, after deducting the Department's collection costs. The bill harmonizes certain requirements under the Perkins loan program with those of the FFEL and DL programs. In particular, Perkins borrowers would no longer be required to request forbearance in writing. In addition, in order to rehabilitate a defaulted loan, borrowers would be required to make nine consecutive monthly payments. H.R. 4137 also provides improved disclosure in the consolidation process regarding loss of Perkins benefits and allows for expanded cancellation opportunities for full-time firefighters, full-time faculty at tribal colleges, librarians, and speech-language pathologists.

The Committee notes that the Secretary lacks the authority to require assignment of defaulted Perkins loans and it is the intent of the Committee that any funds collected from defaulted Perkins loans, including loans that have been assigned to the Department of Education for additional collection activities, be returned to the program's revolving fund and available for new loans to future students.

Part F—Need analysis

The Committee believes that the needs analysis system should be as comprehensive as possible to recognize the differing situations of students and to ensure that students receive an appropriate amount of federal student aid. This legislation builds on the existing system by ensuring that veterans receiving education benefits are not financially harmed; clarifies the treatment of military housing benefits; allows nursing home expenses to be considered when financial aid officers are making exceptions for unique circumstances; and allows 'total income' for dislocated workers to be based on estimated income.

Additionally, the Committee recommends further exploration of the challenges faced by students who live in high-cost areas of the country. Under the current calculation of expected family contribution (EFC), students living in areas with a high cost of living face a significant disadvantage using the federal need analysis formula set in title IV. The current formula protects a standard allowance for all families to use for housing and other living expenses, and presumes that all families have similarly proportionate amounts left over from their income to use for their children's college costs.

As a result, families who live in certain areas of the country and who must allocate a larger percentage of their income to their housing costs than estimated in the need analysis have less money available for college than the formula indicates. The Committee is particularly concerned that this circumstance significantly affects low-income students' eligibility for Pell Grants, the amount of their Pell Grants, and decreases or eliminates eligibility for students for federal student loans.

Part G—General provisions

FAFSA

For many families, applying for federal student aid can be an overwhelming task. The Committee believes that, particularly for students who are the first in their families to go to college, ensuring the provision of useful and early information and making the application process simpler means that fewer students see the application as a barrier to college. This bill simplifies the existing Free Application for Federal Student Aid (FAFSA) by encouraging the Secretary to reduce the number of questions required to be entered by the applicant by 50 percent over the next five years. For reapplications in subsequent years, the bill also streamlines the FAFSA process.

To address the needs of first-generation college students and ensure that lack of family financial literacy does not stand in the way of attaining a college education, the bill creates a two-page FAFSA-EZ form for low-income students and families who qualify for the "automatic zero" expected contribution or the simplified needs test. Additionally, the Committee believes that information about available aid is an important factor in making an informed decision about college attendance. Therefore, H.R. 4137 directs the Secretary to implement a system that allows students and families to enter information and receive estimates of their Expected Family Contribution and total amount of aid in the years prior to enrollment in higher education.

H.R. 4137 includes a Sense of the Congress for the Department of Education and the Internal Revenue Services (IRS) to work together by sharing information germane to student aid applications. According to a report issued by the Institute for College Access and Success, by pre-populating the FAFSA form with information held by the IRS, approximately two-thirds of the income related questions could be eliminated from the FAFSA form while enhancing the integrity of the application process. Such a proposal could increase access by making the form less daunting and greatly reducing the time and calculations now required of families. Further, because the information would come directly from IRS, there would be fewer errors and miscalculations, resulting in more accurate aid awards and reducing the paperwork burden for institutions by eliminating the need for verifying income information.

Student eligibility

Under current law, students lose their eligibility for student aid if they were convicted for the sale or possession of drugs while receiving federal aid. The provision does not affect students who may have been arrested prior to the start of their first year of college,

nor does it affect students who may have an arrest during a semester or summer off from classes if they were not receiving federal student aid during that period. In addition, the Committee adopted two amendments offered by Rep. Mark Souder (R-IN). The first amendment requires institutions to inform students upon enrollment with a separate, clear and conspicuous written notice that advises students about the penalties for a drug conviction. The second amendment provided one additional manner in which a student can regain eligibility for student aid by giving students the option of passing two unannounced drug tests without participating in drug rehabilitation program. The Committee believes the Department of Education should take sufficient measures to ensure the integrity and privacy of these drug tests. Such drug testing should utilize only highly-reliable methods conducted by a qualified drug rehabilitation program.

The Committee believes that the Department of Education and institutions of higher education should take all necessary steps to ensure that students understand the implications and provisions of section 484(r). As currently worded, the “drug penalty” question on the FAFSA form serves as a potential barrier to entry, because many students fail to complete their financial aid application due to a lack of complete understanding about the prohibition. Data from the Department of Education show that in the 2007–2008 award year, at least 15,700 students initially filled the form out in such a way that they would have been ineligible for financial aid for at least part of the academic year. Upon further review and revision of these applications, approximately 5,400 students were deemed ineligible for aid—34 percent of those originally deemed ineligible for aid.

Therefore, the Committee believes that the Department of Education should immediately re-word the question on the FAFSA form in order to more accurately reflect the provision. The re-worded question should include: a threshold question about whether the student has ever received student aid—if they have not, they cannot be disqualified because of a conviction; a clarification that a conviction for alcohol does not disqualify a student for federal aid; information incorporated from the FAFSA worksheet that helps to clarify the limitations on aid and notes that an applicant may be eligible for federal aid depending on the date of the conviction; and a request for students to submit the worksheet on convictions so that the Department can gather more accurate data or review these worksheets for any errors. Further, the eligibility/drug conviction worksheet should be changed to include information on how students can regain eligibility after being convicted of a drug offense.

Data analysis on access to federal student aid for certain populations

As Congress continues to examine the issue of drug-related student eligibility, it is critical to have full information about the impact of the provision. The Committee intends that the information collected, analyzed, and made available to the public under this section will provide an understanding of the demographic background of the students excluded from federal aid by the drug prohibition as well as the nature of the offenses underlying the exclu-

sion. The information at a minimum shall include, but is not limited to, the total number of students affected and the numbers disaggregated by the following categories: family income, dependency status, age, zip code, gender, marital status, family size, highest level of education of mother, highest level of education of father; parental marital status, state of legal residence, grade level in school, degree or certificates sought, status as ward of the court, status of dependent children, veteran status, active military status, receipt of benefits from any of the federal benefit programs listed on the FAFSA, and WIC, whether denial was based on drug possession or sale, number of convictions for selling, number of convictions for possession, year of last conviction for selling, year of last conviction for possession, whether the student had attended an acceptable rehabilitation program, whether the student had completed two unannounced drug tests, and, if possible, whether the person was previously denied federal financial aid due to a drug conviction.

Financial aid for students with intellectual disabilities

The Committee acknowledges the unique challenges students with intellectual disabilities face in meeting the enrollment and coursework requirements for federal financial aid. The Committee authorizes eligibility for Pell grants, work-study programs, and Supplemental Educational Opportunity Grants for students with intellectual disabilities who meet the financial need criteria, even if they are enrolled in non-degree programs.

Disability determination

H.R. 4137 makes a subtle but powerful change to the parameters around total and permanent disability discharge provisions. The Higher Education Act has long provided for the discharge of a student's loan in the case of death and total and permanent disability. In 2000, the regulations surrounding the total and permanent disability discharge changed dramatically. New and additional burdens to students already facing very difficult life and health situations were added in an effort to stem perceived fraud and abuse. While the Committee agrees with enforcing standards to ensure that only those who are truly qualified receive such benefits, the accompanying requirements must also be reasonable. H.R. 4137 provides that, if the Veterans Administration determines an individual is totally and permanently disabled, the Secretary of Education shall accept that determination for the purposes of title IV. The Committee believes that a balance can be achieved between providing for this discharge without unnecessary administrative burden on recipients and preventing fraud and abuse. The Committee believes that once an individual has met the burden of proof relating to disability for the purposes of the discharge of a student loan under rules established under another federal agency, there should be no need for an additional federal agency to revisit that determination.

Veterans

Veterans and active duty service members returning from war need additional support to be successful in post-secondary education. Many veterans face financial, academic, and social barriers

to successfully completing postsecondary education. Coordinating veterans' health and education benefits with student financial aid is often challenging, resulting in some veterans forgoing benefits they have earned as a result of fulfilling their duty. Campuses are struggling to support veterans returning from Iraq and Afghanistan, many of whom are suffering mental and physical health challenges from their service in a war zone.

The Committee has included several provisions in H.R. 4137 to address the growing needs of veterans on campus. In the need analysis calculation for federal student assistance, H.R. 4137 ensures fair treatment of veterans by clarifying the treatment of military housing and by crediting veterans' contributions to their Montgomery GI bill benefits.

Information for students; campus safety

The Committee is particularly concerned with the safety of students and personnel on our nation's campuses, not only in emergency situations but also on a daily basis. It is the intention of the Committee that the amendments made to this section will help protect students and personnel on campuses.

Section 488(b) "Criminal Offenses Reported," requires "degree granting institutions" to add four crime categories to their regular Campus Crime Statistics reporting. The Committee believes that this change will facilitate uniformity in campus crime reporting to both the Department of Education and the FBI's Uniform Crime Reporting (UCR) Program, the voluntary national crime data collection program based on the submissions of more than 17,000 city, county, state, tribal, and federal law enforcement agencies. Each of the offense types required under this section is already an integral part of the FBI UCR crime data reporting program.

To increase awareness of hate crimes on college campuses, the 1998 amendments to the Higher Education Act required all colleges and universities to collect and report hate crime statistics to the Office of Postsecondary Education (OPE) of the Department of Education. The Department of Education utilized the definition of hate crime developed by the FBI, but the criminal offenses required to be reported did not match the existing FBI crime categories. The current HEA crime category omissions have resulted in critical gaps in OPE data, as well as discrepancies and substantial inconsistencies between FBI and OPE hate crime statistics. The Committee believes that this provision will provide parents and students a more accurate sense of campus safety, by making the crime categories required to be reported to the Department of Education parallel those collected by the FBI's UCR Program and published in its annual publications, *Crime in the United States* and *Hate Crime Statistics*.

Further, the Committee acknowledges the importance of informing the victim, or the next of kin in case of the victim's death, in specific instances of student misconduct at institutions of higher education. However, it also recognizes the need to maintain the protection and privacy of student educational records, as required under federal privacy laws. Therefore the Committee included in H.R. 4137 a requirement for institutions of higher education to disclose the final results of any disciplinary proceeding to an alleged victim of any crime of violence or non-forcible sex offense. This will

ensure the institution carefully examines the complaint and if any action is taken that the victim, or victim's family, knows what action the institution took in regard to the crime and is informed while protecting student privacy. This provision will help institutions of higher education and victims work together toward greater safety on campus.

Articulation agreements

It is the intention of the Committee that states work in partnership with public institutions to develop comprehensive articulation agreements among such institutions by 2010. Such articulation agreements will help students transfer credits between institution and ensure a quicker and less expensive path to graduation. In particular, states are encouraged to develop agreements between community colleges and four-year institutions. The provisions included in H.R. 4137 are not intended to supersede the academic freedom of any institution, nor is it intended to require institutions to accept credits from another institution.

The Committee notes that states have begun to implement such agreements, and have employed best practices including common course numbering and general education core curriculum. While the Committee recognizes that all states have already taken some measures to employ articulation agreements among institutions, it is the intention that this language will encourage states to develop comprehensive agreements that employ best practices and ensure that students receive credit for courses taken.

Accordingly, the Committee wishes to acknowledge the National Articulation and Transfer Network (NATN), which has been working to develop a nationally coordinated articulation and transfer network to increase the percentage of credits accepted in transfer and fully counted toward the degree or certificate completion requirements of undergraduate students. NATN is supported and sponsored by hundreds of institutions of higher education across the United States with Minority Serving Institutions being at the forefront of its current efforts. The Committee believes that NATN can become a national center of information for students and institutions to facilitate the enrollment, transfer, and full-credit articulation of students. The Committee encourages the institutions to work closely with NATN and its partner institutions and organizations to find ways to ease the transfer burden for postsecondary students.

The "90/10 Rule"

The 90/10 rule was put into effect by the 1998 Higher Education Act Amendments (P.L. 105-244), replacing its predecessor, the 85/15 rule, which was authorized by the 1992 Higher Education Act Amendments (P.L. 102-235).

During the 1998 reauthorization process, Congress reduced the percentage of revenue that proprietary institutions had to obtain from non-title IV sources to a minimum of 10 percent. The Department of Education modified the definition of revenue and calculation of eligibility through regulations following the 1998 reauthorization.

Recognizing that institutions should continue to demonstrate that they maintain non-federal funds, the Committee adopted a

provision that retains the 90/10 rule but moves the requirement from an “eligibility criterion” in section 102 to a “program participation” criterion under the program participation agreement (PPA) currently in law.

In addition to the move to the PPA, the language includes strict rules as to what may count in an institution’s 10 percent. As outlined in H.R. 4137, the following sources of funds currently count toward meeting the 10 percent requirement: funds paid out of pocket by students, or on behalf of students, to cover tuition and fees; school activities, such as a restaurant, required for students’ education and training; non-federal grant aid received by students; federal and non-federal job training funds used to pay a student’s tuition and fees; section 529 pre-paid tuition and college savings plans used by a student to pay tuition and fees; private loans made to students by the school that are in repayment; and institutional scholarships from an outside source.

The move to PPA removes the automatic termination of a school’s eligibility for federal student aid after a single violation of the rule. To ensure proper oversight of this move, the Committee includes additional safeguards to balance the increased flexibility afforded to schools. These include increased sanctions for violating the rule two years in a row (schools will be banned from title IV program participation for three years in such cases) and increased monitoring and reporting requirements after violating the rule for one year. In addition to these safeguards, the Committee believes that there should be public disclosure of any school that violates the rule in any given year. Moreover, the bill requires that the Secretary annually report to the authorizing committees the result of the 90–10 calculation for each school, thereby allowing the Committee to monitor compliance and assess any unintended consequences.

The Committee believes this is a carefully balanced approach toward easing the burden of the rule on schools while providing additional safeguards to protect students and the federal fiscal interest. The Committee urges the Secretary to use the information collected on the 90/10 calculation as an opportunity to assist the Congress in monitoring proprietary schools to ensure that the fraud and abuse of the federal student aid program that originally motivated the rule does not reoccur.

Transfer of credit

An increasing percentage of the student population will change institutions at least once prior to graduation according to a 2005 National Center for Education Statistics (NCES) study of bachelor’s degree recipients in 1999–2000. With over half of the student population seeking information on transfer policies, the Committee believes it is vital that institutions provide students with clear, useful information explaining their policies related to college credit mobility.

Accordingly, H.R. 4137 requires institutions to develop an understandable transfer of credit policy. The policy must include, at a minimum, any established criteria that an institution uses regarding the transfer of credit earned at another institution. The Committee believes that students need to be given specific information about not only what coursework may transfer, but also how the

credits may be applied to the student's graduation requirements. Therefore, the Committee strongly encourages institutions to include within the transfer of credit policy any limit on the total number of credits that are able to transfer to that institution and any limit on the number of credits that will transfer to a particular major.

In addition, H.R. 4137 requires institutions to include a list of the institutions with which they have established articulation agreements within the transfer of credit policy. According to the Congressional Research Service, every state in the union has some form of arrangement relating to articulation agreements among institutions of higher education. Thirty-six of the states actually passed legislation enacting their agreements. The Committee applauds the efforts of the states in working to develop these agreements. At the same time, the Committee encourages states and institutions of all types to work together and across state lines to provide flexibility to students that wish to transfer institutions.

Advisory Committee on Student Financial Assistance

The Advisory Committee on Student Financial Assistance (ACSFA) was established in 1986 with the goal of providing extensive knowledge and understanding of federal, state, and institutional programs of postsecondary student assistance; providing technical expertise with regard to systems of need analysis and application forms; and making recommendations that will result in the maintenance of access to postsecondary education for low- and middle income students. The Committee appreciates the services provided by ACSFA over the past 20 years, however the services provided by ACSFA have become duplicative of those services provided by other entities including the Congressional Research Service (CRS), the Government Accountability Office (GAO), and other private non-profit entities.

The Committee believes that the Advisory Committee on Student Financial Assistance should not begin any new work, and aim to complete ongoing projects prior to the expiration of its authorization in 2011. The Committee further believes that the annual appropriation should be reduced to only the amount necessary to complete ongoing work and use such savings for the oversight and implementation of the new consumer protection requirements for lenders and institutions in title I of the Higher Education Act of 1965 (as amended by H.R. 4137).

Preventing theft of intellectual property on college campuses

College students often use their campus internet networks to download and share music, movies, and television programs. When they do it without the permission of the owner of the content, it is theft. This illegal file-sharing has exploded in recent years, and too much of it occurs on college campuses.

Film, television, and music production companies invest their money and talent in creating entertainment products to generate revenues. Intellectual property theft has caused significant revenue losses within these industries—hurting jobs and workers' benefits.

The challenge of addressing this issue was discussed at a Subcommittee on 21st Century Competitiveness hearing in the 109th Congress on September 26, 2006. The hearing highlighted not only

the problem on campuses but also the best practices that some institutions are utilizing. Cheryl Elzy, Dean of University Libraries and a federal copyright agent at Illinois State University, shared with the Committee that her school not only is seeking to slow piracy through technology—but changing behavior as well:

Illegal downloading of music, videos, movies, and games is a symptom. It is not the problem, nor is technology the answer. The problem is changing behavior, almost changing a culture. To that end, Illinois State can have a significant impact on peer-to-peer behaviors in another, more important way. Our teacher education graduates number in the top five in the nation. Almost 1,000 new teachers walk out our doors each year, and each teacher will influence the lives of at least 20–30 children each year. If our graduates can learn good Digital Citizen behaviors while on campus, they will imprint that ethical and legal perspective on perhaps 20,000 children annually.

To assist institutions like Illinois State University in their efforts, the Committee includes language to provide grants to offer alternatives to illegal downloading and for those that want to explore innovative ways of stopping illegal downloading. Additionally, the Committee includes language that requires colleges and universities to: inform their students about the law and about campus policies on copyright infringement and illegal downloading; report their campus policies and their procedures for addressing violations; and to the extent practicable, develop a plan to deter illegal downloading and offer alternatives to it.

The Committee notes that a number of misperceptions are being discussed in public forums regarding these provisions. Of significant importance to note is that no financial aid shall be taken away from colleges and students who engage in illegal file sharing. Additionally, the Committee wishes to clarify that the bill does not mandate the use of any particular alternative plan by colleges. Colleges and universities are simply required to report their campus policies on intellectual property theft, including their penalties, and to develop plans for addressing illegal file-sharing. Additionally, the Committee does not intend that such plans be submitted to the Secretary but does expect institutions to develop such plans, which may include plans already in existence or adopted by institutions. Further, the Committee expects the Secretary to closely monitor the implementation of this requirement.

Part H—Program integrity

Accreditation

The new language requiring accrediting agencies or associations to apply and enforce their standards in a manner that respects the missions of institutions of higher education, including religious missions, reflects Congress' belief that accredited institutions should be allowed to choose their own missions rather than having them imposed or regulated by accrediting bodies. In response to concerns raised by Representatives Robert C. Scott (D–VA) and Ruben Hinojosa (D–TX) about whether the amendment would harm the ability of accreditors to enforce nondiscrimination provisions, the author of the amendment, Representative Timothy

Walberg (R-MI), explained that the provision would not affect non-discrimination provisions and instead would require accreditors to respect the missions of schools, including when the missions are religious.

It is the intent of the Committee that this amendment does not change or alter current accreditation requirements, and the exemptions included in those requirements (such as those allowed by the American Bar Association and the American Psychological Association), for the enforcement of nondiscrimination provisions. The Committee also notes that this provision does not alter title VII of the Civil Rights Act of 1964, title IX of the Education Amendments of 1972 or other federal antidiscrimination statutes, which remain applicable to institutions of higher education to the same extent as before. The Department of Education shall not promulgate any regulations that provide any new exceptions to current nondiscrimination provisions.

It is also the intent of the Committee that this amendment does not change or alter current accreditation requirements, and the exemptions included in those requirements, for training professionals in the practice of medicine and other health care professions.

Additionally, the Committee accepted an amendment by Representative Robert Andrews (D-NJ) to strike language in the base bill and return to current law with respect to student learning outcomes, rather than allowing institutions of higher education to set the standards for student learning outcomes, as well as allowing institutions to measure themselves on the progress they have made in meeting those standards. The Committee intends to review this issue, taking into consideration the base bill, current law and other proposals for floor consideration of H.R. 4137.

Auction Evaluation

The College Cost Reduction and Access Act (PL 110-84) included a new loan auction pilot program for Parent PLUS loans. The Committee is interested in closely monitoring the loan auction program to ensure that it is effectively serving families and students in their pursuit of financing their higher education. To that end, the Committee includes language to require the Secretary of Education and the Secretary of the Treasury to jointly evaluate the loan auction program in consultation with the Office of Management and Budget, the Congressional Budget Office, and the Comptroller General.

Of significant interest to the Committee is the extent of the savings generated through the pilot program compared to the cost the federal government would have incurred in operating the parent loan program under section 428B of the Higher Education Act of 1965 in the absence of the pilot program; the number of lenders that participate in the pilot program over time, and the extent to which the pilot program generates competition among lenders; the number and volume of loans made under the pilot in each state; the effect of the transition to and operation of the pilot program on the ability of lenders participating in the pilot program to originate loans efficiently; the ability of institutions of higher education participating in the pilot program to disburse loans efficiently through the program; the ability of parents to obtain loans made through the pilot program in a timely and efficient manner; the differential impact, if any, of the auction among the states, including between

rural and non-rural states; the feasibility of using the mechanism piloted to operate the other programs under Part B of title IV of the Higher Education Act; and the feasibility of using other market mechanisms to operate the loan programs under part B of title IV of the Higher Education Act, including the sale of securities backed by federally-owned student loan assets originated by banks acting as agents of the federal government.

In the interest of ensuring the program is operating to the benefit of students and families, the Committee requires the Secretary of Education and the Secretary of the Treasury to submit to the Committee a preliminary report by September 1, 2010, an interim report by September 1, 2012, and a final report by September 1, 2013. It is the Committee's intent to closely monitor the auction and use opportunities in the future to hold oversight hearings, if necessary, to ensure proper implementation and availability of options to the consumer.

TITLE V—DEVELOPING INSTITUTIONS

Hispanic-Serving Institutions (HSIs) play an important role in American higher education, particularly in their capacity to provide college access to underrepresented populations, and populations of students with limited financial means. The National Center for Education Statistics recently reported that despite representing only 9 percent of all institutions of higher education, Hispanic-Serving Institutions enrolled over 50 percent of all Hispanic students in postsecondary education and 27 percent of all minority students enrolled in postsecondary education. HSIs receive federal funding under title V of the Higher Education Act to offer and increase the number of educational opportunities available to Hispanic and low-income students.

The Committee believes that increasing the number of Hispanic students in graduate education is imperative to business, industry, medicine and education. During the May 2, 2005 field hearing held by the Subcommittee on 21st Century Competitiveness entitled, "Expanding Opportunities for Graduate Study at Hispanic Serving Institutions," Dr. Blandina Cardenas, President of the University of Texas—Pan American argued that:

The students with master's degrees will be required to lead a diverse workforce and create new products and product delivery systems for a diverse national market and for competitiveness in the global market. Hispanics with doctoral degrees must be available in sufficient numbers to serve the teaching and research needs of our colleges and universities and research organizations in the private and public sector. I believe that Hispanics with post-baccalaureate preparation will bring significant added value to the creative and problem-solving enterprise—not in spite of the less privileged backgrounds, but because of it.

Hispanics still lag well behind other groups in college-going rates, retention and graduation rates and participation in graduate education. In 2003, data from the Department of Education show that 34 percent of non-Hispanic, white students over the age of 25 had completed four or more years of college, compared with 17.3

percent for non-Hispanic, African American students and 11.4 percent for Hispanic students.

In 2005, Hispanic students received 5 percent of all masters degrees awarded in the U.S., compared to 66 percent for white students and 9 percent for African American students. In 2004, the percentage of Hispanic students receiving doctoral degrees was three percent, compared to 58 percent for white students and 6 percent for African American students. The Committee believes these data illustrate the necessity of expanding graduate opportunities for Hispanic students and providing resources to the institutions that serve the majority of Hispanic students desiring a graduate degree.

TITLE VI—INTERNATIONAL EDUCATION

In order to continue the nation's established leadership role in international affairs and the global economy, the need for students to become knowledgeable about international issues, other cultures, and foreign languages has become increasingly important. International education programs at the postsecondary level play a critical role in building and maintaining the nation's ability to supply expertise in foreign language, area and other international studies, including international business. America's interests and national security are inextricably tied to our knowledge and understanding of the rest of the world.

Programs authorized under title VI of the Higher Education Act reflect the priority placed by the federal government on diplomacy, national security, and trade competitiveness by allowing for the study of international issues and cultures, as well as foreign languages at the postsecondary education level. Title VI builds an infrastructure to improve and maintain the nation's education capabilities in this regard, from outreach to K–12 through education at all postsecondary levels and advanced research, with emphasis on the less commonly-taught languages and areas of the world. Centers, programs and fellowships authorized under title VI serve the nation's national security interests in at least three ways: they produce new cadres of experts trained in foreign languages; they educate citizens about other cultures, international issues and foreign languages; and they provide a cumulative body of knowledge and research about such areas of study that provide expertise for government agencies, as well as for education, business and the non-profit sectors.

Programs under title VI were established over forty years ago to address these objectives and have been reformed and reauthorized to better reflect the current international climate. The bill updates the findings and purposes of the programs under title VI to reflect the updated needs of our country, including increased Department of Education coordination with other federal agencies.

Coordination with elementary and secondary schools

The knowledge of our nation's K–12 students about geography and international affairs has been documented to be below par compared to students in other industrialized countries. The Committee believes it is in the best interest of our nation to use the early years of a student's education as an opportunity to instill an interest in foreign languages and world affairs.

Understanding the critical role of teacher preparation programs in this regard, H.R. 4137 includes language to ensure that colleges of education and teacher professional development programs can be included as partners in outreach grants and summer institute programs under title VI. By authorizing the Secretary to make grants to outreach and summer institute programs that involve partnerships with local educational agencies and public and private elementary and secondary schools, the Committee intends to enhance student academic achievement in foreign languages and knowledge of world regions.

Additionally, by authorizing title VI centers and programs to widely disseminate materials for courses and materials for elementary and secondary schools, the Committee intends to promote and enhance international knowledge at all stages and levels of education.

Foreign language studies

According to the National Research Council, a pervasive lack of knowledge by individuals in this country about foreign cultures and languages threatens the security of the United States, as well as its ability to compete in the global marketplace and produce an informed citizenry. The latest title VI-funded Modern Language Association survey of postsecondary foreign language enrollments indicates that although foreign language enrollments have increased significantly this decade, particularly in the less commonly taught languages, overall relative student enrollment is still below the 1965 level. At the K–12 level, data from the Department of Education indicate that only 44 percent of American high school students are enrolled in foreign language classes, and only 31 percent of American elementary schools even offer foreign languages. The National Research Council concluded that early language learning in elementary and secondary school is key to establishing a pipeline of students who can eventually reach a sufficient level of proficiency in foreign language and culture to meet national needs.

H.R. 4137 therefore reinstates the eligibility of Foreign Language and Area Studies fellowships for undergraduates to encourage a concentration on foreign language and area studies earlier in students' postsecondary experiences. In addition, the title VI undergraduate international and foreign language studies program is amended to allow up to 10 percent of a grant to be used for undergraduate study abroad to promote foreign language fluency and knowledge of world regions. The Committee urges the Secretary to encourage the development of programs that stress the teaching of foreign languages for practical and professional use, including programs that promote foreign language education across the undergraduate curriculum. Further, the Committee includes language to require the Secretary to develop a marketing campaign aimed at encouraging the study of foreign languages.

Additionally, the Committee recognizes that students, who study abroad for the enhancement of foreign language knowledge and proficiency, as well as the study of world regions, may travel to areas or regions in conflict or unrest. The Committee encourages institutions of higher education to take into consideration safety policies and procedures for students participating in any study abroad program funded under title VI.

International business education

The Committee believes that international business education programs reauthorized by H.R. 4137 under title VI of the Higher Education Act play a unique and important role in our overall international education efforts. These programs have proven to be an integral part of many postsecondary institutions' efforts to develop international education initiatives. There are currently 31 Centers for International Business Education & Research (CIBERs), authorized under title VI that aim to expand the sphere of teaching, research, and outreach undertaken on their campuses and in their communities in the area of international business development. Each of the CIBER centers has at its core the goal of increasing international competitiveness, business language acumen, global trade expertise, and area studies competency. Programs are intended for undergraduate, graduate and Ph.D. students within colleges of business as well as elsewhere on campus; to faculty from throughout the university and to other institutions of higher education; and to executives and professionals within business communities. The Committee additionally includes language to encourage cooperation in the areas of software development with Asian countries, including Taiwan.

Science and technology advanced foreign language education grant program

One of the serious challenges facing our nation today is the absence of individuals who are fluent in a foreign language and have a background in science and technology. There are few Americans who can understand technical documents—including research studies or scientific papers—that are written in foreign languages. The Committee believes that, if our country is to stay competitive with the emerging economies in Asia, Central and South America, and Africa, this must change. To meet this goal, the Committee includes language to support programs with curricula that combine studying science and technology in a foreign language. This language specifically provides for grants to institutions to create immersion programs where students take science or technology-related course work taught completely in foreign languages.

The Committee believes that in order to stay current with innovations in science, mathematics, and technology, more professionals in these fields will also have to be proficient in a foreign language. It is only with the knowledge of technical terms in foreign language classes—words and phrases not taught in the average high school or college language class—that America can stay technologically and economically competitive.

Reporting requirements of Title VI grantees

The Committee includes language in the bill to require institutions of higher education that are title VI recipients to report gifts received by the institution that are intended for use directly or indirectly by a title VI center or program. Institutions of higher education with title VI grants also receive donations from the private sector, both of which contribute to the programs' ability to function. Publicly-reported data on sources of private contributions that are combined with public dollars will create a more open process and

enable taxpayers to better monitor government spending without creating any new bureaucracy.

TITLE VII—TITLE VII AMENDMENTS

It is becoming more critical to obtain an advanced education in order to remain a technologically advanced economy and retain our international competitiveness in critical fields, including science, technology, engineering, and mathematics. Furthermore, our nation is facing shortages in key areas, including nursing.

Graduate Assistance in Areas of National Need (GAANN)

Graduate programs, while important for their role in higher education, also play an essential, yet often overlooked role in K–12 education. For example, graduate programs provide the education and training necessary for individuals to become faculty at institutions of higher education who, in turn, train the elementary and secondary teachers of tomorrow. In order to ensure the nation's children receive the best education possible, the Committee includes language to ensure that the faculties in our teacher colleges are prepared to meet this challenge.

To achieve improved training of teachers, H.R. 4137 requires that the Secretary establish a competitive priority for grants under the GAANN program in order to prepare individuals for the professoriate who are committed to training highly qualified elementary and secondary school teachers of mathematics and science. The Committee encourages the Secretary to provide priority to departments that engage in such activities, and encourages the Secretary to include departments of mathematics and sciences, as well as departments of engineering, as departments that may provide such activities.

Further, H.R. 4137 requires the Secretary to establish a competitive priority for grants under the GAANN program in order to prepare individuals for the professoriate who are committed to training highly-qualified elementary and secondary school teachers who can effectively teach students with disabilities or students with limited English proficiency. The critical shortage of special education faculty in higher education is a major factor in the shortage of K–12 special education teachers. In the last two decades the number of special education doctorates has decreased by 30 percent. In 2006, only 205 people received doctorates in special education. Every year, 30 percent of faculty vacancies go unfilled. The special education faculty shortage also curtails the capacity of higher education to prepare general education teachers who are skilled in working with special education students. This priority will help to increase the capacity of higher education to prepare highly-qualified general and special education teachers, as well as teachers prepared to teach students with limited English proficiency.

Language included in the bill offers GAANN awards to students who are studying in areas that have current and future professional workforce needs. The Committee expects that nursing and nurse faculty will be included in this category. Results from the most recent National Sample Survey of Registered Nurses conducted by the Health Resources and Services Administration show that only 13 percent of RNs hold a master's or doctoral degree. According to American Association of Colleges of Nursing, graduation

rates from research-focused doctoral nursing programs increased by only 1.4 percent, or six graduates, between the 2005–2006 and 2006–2007 academic years.

Patsy T. Mink Fellowship Program

Patsy T. Mink Fellowships will help address the shortage of minority and women collegiate faculty. Currently, minorities make up less than 20 percent of all collegiate faculty. Further, although women make up 39 percent of full-time collegiate faculty, they tend to be concentrated in less-senior instructional positions and at two-year institutions, as opposed to research universities. This program will authorize fellowships for doctoral and terminal master's degree study for students interested in obtaining a doctorate, or other terminal degree, with a specified service requirement to teach at degree-granting institutions of higher education after graduation. Appropriately named in honor of former Congresswoman Patsy Mink (D-HI), a primary force behind the passage of title IX, the fellowships would be targeted at minorities and women to help diversify the higher education professoriate.

Fund for the Improvement of Postsecondary Education (FIPSE)

Recognizing the growing needs of postsecondary education, H.R. 4137 makes a number of changes to the Fund for the Improvement of Postsecondary Education (FIPSE). It is the intention of the Committee that the projects and programs funded under this section not only aid the funded institution of higher education, but that these programs will serve as models and best practices in order to improve the access and affordability for students at all institutions of higher education.

The Committee recognizes the great service of our nation's veterans and their families. For that reason, in H.R. 4137, new authority is provided to help provide a scholarship program for veteran students and their families. The Committee particularly recognizes the work of Thanks USA, a non-profit organization already providing this service.

In response to the numerous institutions of higher education that are establishing programs to collaborate with private and civic organizations to resolve pressing and severe community problems, FIPSE includes a new "national need" designation that permits grantees to use funds to support the development of coordinated curriculum and internship opportunities for students in disadvantaged communities. The Committee understands that some universities, such as the Shepherd Program at Washington and Lee University, are working to coordinate and expand programs to study poverty and its impact on communities. The Committee encourages the Department to identify other such programs for the purposes of awarding funds in order to assist disadvantaged communities in meeting this important national need.

In 2000, Congress unanimously passed a concurrent resolution (S. Con. Res. 129) stating, in part, that "the historical illiteracy of America's college and university graduates is a serious problem—reflecting a failure to impart to students a basic understanding of the history, ideals, documents and institutions that have formed the nation." In response to this concern, H.R. 4137 includes an important amendment to the FIPSE program. Specifically, language

was added identifying the expansion of academic programs focused on traditional American history as an area of “national need.” It is the intent of the Committee that this authority be used for reinvigorating majors and graduate programs in these fields, thus creating a new pipeline for producing the scholars and teachers needed to staff these fields at the graduate and undergraduate levels and in teacher training programs.

During this reauthorization, the Committee feels strongly that the importance of graduate education overall should not be overlooked. Dr. Earl Lewis, Dean of the Rackham Graduate School, Vice Provost for Academic Affairs for Graduate Studies, and Professor of History at the University of Michigan expressed his support for graduate education programs before the Subcommittee on Select Education in 2003:

Graduate education prepares the scientists and engineers needed by industry, government, and universities to conduct the nation’s research and development. Graduate programs also educate the scholars in the humanities, social sciences, and the arts who preserve and enlarge our understanding of the history and scope of human thought and the human condition, and transmit that knowledge to succeeding generations. Moreover, graduate programs at our nation’s universities generate new knowledge and act as incubators of innovative ideas that drive new technologies and create new ways to address societal, health, security, and economic needs and challenges.

As Congress continues its work on the reauthorization of the Higher Education Act, it must continue to build on the demonstrated success of these valuable graduate programs. These programs, and the amendments made within H.R. 4137, will prepare the next generation of scientists, scholars and teachers and ensure the support and effectiveness of these programs.

Urban-serving research institutions

Our nation’s cities play an important role in America’s national prosperity, driving innovation and economic growth by employing many highly-skilled workers and containing clusters of related firms and industries. However, urban areas face many challenges unique to cities. Urban secondary schools experience a higher dropout rate than the national average and urban elementary and secondary students typically score below state and national averages on academic performance exams. Urban schools often encounter teacher shortages in high need subject areas such as mathematics and science. Particular neighborhoods are stricken with poverty and struggle to attract businesses and services. A greater percentage of their citizens are uninsured or underinsured.

As anchors for our nation’s cities, urban research universities are uniquely positioned with a broad range of skills and resources—intellectual, human, technological, and social to engage in these urban challenges. Serving as an essential part of the education pipeline by enrolling large numbers of students from local school districts and specifically training them to be educators in urban areas, urban research universities are economic drivers, as they serve as prominent employers, real estate developers, and business

innovators in their cities. The community engagement by urban research universities not only provides a valuable service to the cities, but also enables these institutions to improve their own core knowledge and expertise that leads to further theories, discoveries, and advances for our nation.

H.R. 4137 updates the Urban Community Service program to authorize competitive grants for urban research universities to expand their capacity to develop initiatives geared toward improving the communities in which they are located. This updated program will help to address the unique challenges of our nation's urban communities by: enhancing teacher quality and college and workforce readiness (especially in the fields of science, technology, engineering, and mathematics); revitalizing the economies of local neighborhoods; and reducing the incidences of urban chronic diseases and health disparities. The Committee believes that supporting urban institutions of higher education in research and programmatic initiatives will help to address these challenges, bolster our nation's economic competitiveness, and make our cities better places to live.

Expanding access for students with disabilities

The Committee believes that it is important to examine postsecondary educational opportunities for students with disabilities and encourage improved enrollment, retention and completion rates for these students. Data reveal that there are low numbers of students with disabilities succeeding in college; only 12 percent of individuals with disabilities have graduated from college (as compared to 27 percent of non-disabled individuals). The number of individuals with disabilities in the workforce is also of great concern to the Committee; according to the 2005 Annual Disability Status Report, the employment rate of working-age people with disabilities was 37.9 percent compared to 77.6 percent for working-age people without disabilities. To address the need for improved education and employment outcomes for individuals with disabilities, the bill establishes a National Center for Information and Technological Support for postsecondary students with disabilities. The Center will support the dissemination of best practices, provide information to students and families on higher education opportunities for students with disabilities, and review and report on the current condition of postsecondary success for these students.

Additionally, the Committee also provides for a study by the GAO on barriers and opportunities in higher education for students with disabilities to inform future efforts to address the unique challenges students with disabilities in higher education face.

The Committee also expands the allowable activities of the Projects to Ensure Students with Disabilities Receive a Quality Higher Education, including development and dissemination of strategies for successful transition to the post-secondary education environment from high school; development of accessible distance learning efforts; and improvements in curriculum development including an emphasis on universal design for learning, and accessible instructional materials. H.R. 4137 requires the Secretary of Education to review and disseminate a report of the program activities funded under this section to provide guidance and rec-

ommendations to all institutions of higher education on how successful programs can be replicated.

Students with intellectual disabilities

The Committee recognizes that students with intellectual disabilities often face tremendous barriers to participation in higher education, including difficulties in enrolling in postsecondary programs prepared to meet their unique support needs. Despite these challenges, the number of students with intellectual disabilities who are seeking to enroll in postsecondary programs is increasing, and there is a need to expand the number of college- and university-based programs prepared to teach and support this population of students. Currently, only about 100 programs are available for students with significant cognitive disabilities across the country. A number of institutions have expressed an interest in developing such initiatives, but require appropriate financial and technical support to do so.

Accordingly, the Committee has authorized the Secretary to award grants to institutions of higher education to create and expand high-quality, comprehensive transition and postsecondary programs for students with intellectual disabilities. It is the intent of the Committee that such programs provide individual supports and services for the academic and social inclusion of students in all aspects of campus life, and focus on academic enrichment, socialization, independent living skills, and integrated work experiences and career skills that lead to gainful employment. The Committee also authorizes the establishment of a coordinating center that will help institutions of higher education improve existing programs for students with intellectual disabilities, facilitate the development of new programs, and ensure that all such programs are high-quality.

The Committee believes these measures will result in increasing numbers of students with intellectual disabilities succeeding in higher education, as well as an increase in the number of students with intellectual disabilities participating in the workforce.

Accessibility of instructional materials

The Committee recognizes that a key component of equal access to higher education for students with disabilities is timely access to instructional materials in accessible formats. The Committee also acknowledges that within the higher education system, the needs of students, institutions, publishers, and providers of materials in specialized formats are different than those in the elementary and secondary education system. In order to improve the delivery and the quality of postsecondary materials to students, the Committee directs the Secretary of Education to establish an advisory commission to study the barriers, systemic issues and technical solutions available to improve the efficiency, delivery, and quality of such materials. The Advisory Commission on Accessible Instructional Materials in Postsecondary Education for Students with Disabilities will consist of a broad cross-section of stakeholders, including strong consumer representation, will review existing systems as well as emerging technologies, and will report their findings and recommendations to the Secretary and Congress not later than twenty-four months after their first meeting.

The Committee acknowledges that in the absence of a coordinated national system to facilitate the provision of accessible instructional materials to postsecondary students with disabilities, some institutions of higher education and consortia of institutions have considered or implemented local, state and regional approaches. To encourage the further development of such systems, the Committee authorizes grants for model demonstration programs to be awarded to partnerships that include colleges and/or universities and entities with demonstrated experience in the creation of accessible instructional materials, which may include publishers. These programs will support the development and implementation of activities throughout the process, including the identification of students in need of specialized materials, systems for requesting materials, acquiring materials in a timely manner, procedures to protect against copyright infringement, and outreach and training for students, faculty and staff. Should the model programs prove effective in improving such systems, the Committee authorizes the Secretary to expand the model program.

It is the Committee's hope that the advisory commission and the model demonstration projects will lead to comprehensive improvements in the timely delivery of quality accessible instructional materials for students with disabilities.

Nursing education

The Committee recognizes that our nation continues to face a nursing shortage unprecedented in its depth and duration. Unfortunately, this crisis is expected to worsen in the coming years, as the Health Resources and Services Administration (HRSA) projects that the nation's nursing shortage will grow to more than one million nurses by the year 2020.

Constraints in our nation's nursing education system are inhibiting the ability to increase the number of practicing nurses to the levels needed to end the shortage. According to the American Association of Colleges of Nursing's 2006–2007 annual survey, schools of nursing turned away 42,866 qualified applications to baccalaureate and graduate programs due to an insufficient number of faculty, admission seats, clinical sites, classroom space, clinical preceptors, and budget constraints.

The Committee believes that the nursing program included in the bill will dramatically help our nursing education system prepare the next generation of nurses by supporting the faculty who prepare and teach them.

As a companion to this program, the Committee also includes capitation grants which have historical legislative roots in Congress. From 1971 to 1978, Congress provided Capitation Grants to schools of nursing in support of nursing education. The March 2002 HRSA Tenth Report to Congress on Health Personnel in the United States recommended Capitation Grants funding as a strategy to expand the nursing workforce pipeline. The Committee believes that Capitation Grants are a feasible solution based on historical success to help address the national nursing and nurse faculty shortage.

The Committee also includes language for demonstration grants to develop partnerships between health care institutions and accredited schools of nursing, allowing them to retain their cadre of

qualified nurses while providing a mechanism for these individuals to become faculty through graduate nursing programs. Without additional nurse faculty to teach new nurses, the nursing shortage will continue and further jeopardize the safety and quality of health care provided to our nation.

The provisions in title VII are supported by other titles, including language in title IV, providing loan forgiveness for nurses that agree to work full-time in a clinical setting or as a faculty member of an accredited nursing school. Budget constraints, an aging faculty, and increasing job competition have contributed to a significant shortage of nursing faculty. Loan forgiveness will provide needed relief and an additional incentive to enter into and remain in the profession.

TITLE VIII—ADDITIONAL PROGRAMS

Incentives and rewards for low tuition

Obtaining a college degree is the cornerstone of the American dream. However, the unfortunate reality is that paying for a college education has been and continues to be an exceedingly difficult proposition in this country. In the past year alone, tuition has increased an average of 6.6 percent at four-year public institutions, 6.3 percent at four-year private institutions, and 4.2 percent at two-year public institutions. These increases have a real impact and result in lost opportunities for students all over this country.

Every year, according to the Advisory Committee on Student Financial Assistance, some 200,000 students do not go to college in America solely because they are unable to pay for it. Meanwhile, nearly two-thirds of students who enroll in four-year colleges borrow to pay for it. The typical student now graduates with \$17,500 in total federal student loan debt—a figure amounting to nearly 45 percent more debt than just eleven years ago.

This debt appears to be having a profound effect on the lives and choices of borrowers. For instance, one report by U.S. PIRG noted that student loan debt caused 14 percent of young graduates to delay marriage; 30 percent to hold off on buying a car; 21 percent to postpone having children; and 38 percent to delay buying a home. High debt payments may also force graduates to change professions or only seek jobs in a certain salary range.

The Committee believes that the funds authorized in this part will encourage institutions of higher education to contain growing costs by rewarding low tuitions, encouraging the use of innovative cost strategies, and rewarding institutions where it matters most, by providing increased need-based aid to students.

Cooperative education

The purpose of cooperative education is to give college students work experience related to their academic objectives while helping them earn money to pay for college. Until 1995, cooperative education served as title VIII of the Higher Education Act. During this time, it provided \$20 million dollars to over 1,000 schools to help establish cooperative education programs. These programs helped over 250,000 students gain both work experience and money for college.

With the typical student borrower now graduating with \$17,500 in debt and many more working long hours in order to pay for college, the Committee believes that cooperative education provides an alternative for students who want to earn extra money and parlay their education into successful employment.

Student Success Grants

Student Success Grants will address the investment in college access to success by providing students with resources to adjust to college, develop plans for success, and graduate on time. Grants will go to colleges and universities where 50 percent or more of the student population tests into remedial education. Eligible institutions will receive a \$1,500 grant for every Pell recipient to establish a network of intensive support services that will ensure students stay in school and complete coursework. Activities may include intensive counseling by Student Success Coordinators, college and career success courses, blended or accelerated remediation classes, work-study jobs with private employers, instructional support, or learning communities that cluster students for the first two courses of college. The Committee intends Student Success Grants to empower institutions of higher education to identify the most effective policies and practices for helping at-risk students earn postsecondary degrees. Further, the Committee intends for the grants awarded to focus on the students who need assistance the most and will provide policymakers with research to strike an effective balance between access and success.

Jobs to careers

In order to increase the number of individuals completing occupational credentials individuals who will help ensure our workforce remains competitive and be able to earn family-supporting wages—our colleges must increase the number of students who transition successfully from developmental to for-credit occupational courses. According to the National Center for Educational Statistics, about 28 percent of all undergraduates, and 42 percent of those at two-year public colleges, participate in remedial coursework to improve their reading, writing, and math skills. As high as these numbers are, they are just “snapshots” of developmental education enrollments at a single point in time. Longitudinal research reveals that they underestimate the true extent of remediation needs. Research that tracked a cohort of first-time community college students through their twenties found that ultimately over 61 percent enrolled in at least one remedial course.¹² Lengthy participation in remediation poses a number of problems. Just 30 percent of first-time undergraduates enrolling in remedial reading courses completed a certificate or degree within eight years of leaving high school, compared with 69 percent of those not needing any remediation.¹³ For working adults who need to complete coursework quickly because of competing family and work demands, developmental education can take too long and seem disconnected from their career goals.

The Committee intends these grants to help students persist and earn credentials. Specifically, H.R. 4137 provides authorization for grants to institutions serving especially high numbers of students needing developmental education for purposes of creating bridge programs that customize developmental education curricula, including English language instruction where applicable, to the content of the certificate or degree programs or clusters of programs in which developmental education students seek to enroll. In addition, the grants will provide funding to colleges interested in implementing best practice innovations in developmental education, such as implementing cohorts and learning communities and developing accelerated developmental coursework.

Project GRAD

The Committee recognizes the importance of programs like Project GRAD, a national nonprofit education reform model that currently serves 121,000 economically disadvantaged youth in 211 schools across the nation. Project GRAD uses a feeder pattern, providing students a consistent set of academic programming from Pre-K through grade 12 so high schools are receiving well trained elementary and middle school students. H.R. 4137 authorizes the Secretary to award grants for such activities.

Project GRAD has a proven track record nationwide in increasing high school graduation and college attendance rates for low-income students. Project GRAD schools outperform comparison schools on nationally-normed achievement tests, and Project GRAD students are significantly more college ready than their peers. In the longest-served group of schools, Project GRAD students are completing college at a rate 70 percent above the national average for students from similar low-income backgrounds. Project GRAD has made college scholarships available to over 6,000 students and has an additional 15,700 high school students in the scholarship pipeline, making it one of the country's largest college access organizations for low-income students.

Diploma mills

Diploma mills have proliferated in recent decades due to inconsistent law enforcement and technological advances. Diploma mills take many different forms, but often share common characteristics, including the lack of accreditation or false claims of accreditation; no previous academic records required for admission; charging tuition based on the number of degrees purchased rather than the number of credit hours or courses taken; lack of a physical permanent address in the United States; and names that are very similar to legitimate accredited institutions of higher education. It is estimated that several hundred diploma mills are operating at any given time, with revenues estimated to total more than \$500 million each year.

In 2004, a GAO investigation revealed weaknesses in the Department of Education's administration of the student loan programs for higher education, including the possibility that a diploma mill could participate in the Federal Family Education Loan Program (FFELP) under title IV of the Higher Education Act of 1965.

In addition, the 2004 GAO investigation examined the credentials of a sampling of federal employees, and revealed that, of the

federal employees selected for the examination, 463 federal employees held degrees from diploma mills and other unaccredited universities, including twelve employees for the Department of Homeland Security, 13 for the Department of Justice, and twenty-nine for the United States Postal Service. The investigation also found that federal agencies have paid more than \$150,000 in tuition payments to diploma mills and other unaccredited universities on behalf of federal employees.

The Committee recognizes that the vast majority of regulation of education in the United States is, in general, a state responsibility, and the development and regulation of academic standards in higher education is the responsibility of institutions of higher education. Through H.R. 4137, the Committee recommends the adoption of uniform standards to determine, for federal purposes, the legitimacy of degrees, diplomas, certificates, and degree-granting institutions.

Student safety and campus emergency management

The Committee recognizes the need for parents and students to feel as safe as possible when attending institutions of higher education. Recent events such as the campus shootings at Virginia Tech and Hurricanes Katrina and Rita highlight the critical role colleges and universities have in protecting students from safety and security risks. The Committee believes the federal government has an interest in providing support and guidance to schools in efforts to keep students safe and prevent future tragedies. Time is of the essence during an emergency, as Virginia Tech tragically pointed out, and the bill improves current law by adding an emergency notification system for the college community with specific requirements. The Committee believes it is the federal government's role, in partnership with states, local communities, and institutions of higher education, to support prevention of future tragedies. To that end, H.R. 4137 authorizes a new grant program for institutions of higher education to develop and improve their campus safety and emergency response systems. Grant funds may be used to develop and implement emergency communications systems, for security assessments, for training of security personnel, and to coordinate mental health crisis response and intervention services for students enrolled in the institution of higher education affected by a campus or community emergency. The bill also requires institutions of higher education annually to publish a fire safety report on on-campus student housing, and to submit such information to the Secretary on an annual basis.

Education Disaster and Emergency Relief Loan Program

In 2005, Hurricanes Katrina and Rita had a devastating effect on the universities and colleges located in the Gulf region, displacing 83,821 students and causing, for the first time in history, the closure of the eleven colleges and universities in New Orleans for a full semester and ten more in other parts of Louisiana, Mississippi, Texas and Florida for an extended period of time. Damages and property losses to New Orleans area institutions alone exceeded \$1 billion and nearly \$2 billion in total damages to colleges and universities across the Gulf Coast region.

Understanding their essential role in the sustainability of their surrounding communities, the affected schools in the Gulf Coast acted quickly to rebuild their campuses in order to maintain their educational purpose. Many schools found challenges in rebuilding due to insurance company policies that did not give schools upfront financial assistance for repairs. Some of the schools with few accessible funds were forced to make a few repairs, and then wait for reimbursement before additional repairs could be made. In addition to wasting significant time, these schools also suffered because they were unable to save money by contracting for the total renovations, and instead had to pay more for sequential smaller jobs. Other schools obtained loans from private lenders, with high interest rates, in order to make the repairs.

It is the intent of the Committee that the loan program created under H.R. 4137 should provide low interest loans to schools that have suffered a loss as a result of a federally declared major disaster or emergency, so that they can pay for repairs efficiently. Further, the Secretary should make loans at the lowest interest rates possible, and funds from this program should also be used to assist institutions affected by the Gulf Coast hurricanes in 2005.

The intent of this Education Disaster Loan program is not to replace FEMA assistance or insurance recovery efforts; rather it is to provide a bridge loan for institutions of higher education immediately following a disaster. This loan will assist greatly in economic recovery, faculty and staff assistance as well as construction recovery that is not duplicated by FEMA or insurance coverage.

The Committee hopes that should institutions of higher education have to endure disaster recovery efforts, such as the Gulf Coast institutions, that this loan program will be in place and will shorten the recovery time not only for the higher education institution(s), but for that of the whole community. It is assumed that funds for such loans would best be appropriated from Emergency Supplemental funds following a federal disaster declaration.

Rural development grants for rural colleges and universities

Approximately half a million students graduate from high school in rural America each year and nearly 30 percent of all public four-year colleges and universities are located in rural areas. However, college enrollment rates for both eighteen to twenty-four year olds and twenty-five to twenty-nine year olds were generally lower in rural areas than in all other locales in 2004. (NCES, 2007) It is the intent of the Committee that this program will help target rural secondary students and make them aware of their postsecondary options in both community colleges and four-year institutions. This is often a challenge due to the geographic isolation of rural high schools and their proximity to institutions of higher education. By encouraging rural students to attend postsecondary institutions and community college students to consider entering a four-year institution, these grants will promote economic growth and development in rural America.

It is the further intention of the Committee that the grants awarded under this part encourage the development of training programs for professions in shortage in rural areas, and create employment pipelines to those occupations through partnerships with these same colleges.

Training for realtime writers

The Realtime Writers Act establishes competitive grants for the recruitment and training of students to help deal with the shortage of providers for closed captioning access for the over 30 million deaf and hard-of-hearing Americans that rely on this technology to get their information. The inclusion of this provision in H.R. 4137 complements previous efforts undertaken by Congress in the Telecommunications Act of 1996 and the Americans with Disabilities Act of 1990, which mandated full captioning to provide access for the hearing impaired community. By 2006, all television programming was expected to be captioned; but that has not occurred. This program helps to build the workforce necessary to provide captioners for decades to come and helps Congress keep its promise to the deaf and hard-of-hearing community.

Centers of Excellence for Veteran Student Success

H.R. 4137 strengthens support for military veteran students by establishing Centers of Excellence for Veteran Student Success to establish model programs to support veteran students on campus by coordinating services to address the academic, financial, physical and social needs of veteran students so that they successfully enroll persist and complete postsecondary education programs.

Modeling and Simulation Programs

The Committee believes that the Modeling and Simulation Grant Program is critical to ensuring that the United States remains competitive in the rapidly expanding field of study related to the application of computer science and mathematics to develop a level of understanding of the interaction of the parts of a system and of a system as a whole. For example, modeling and simulation technology can assess a city's evacuation plan or traffic congestion through advanced computer models and simulations. Many government agencies use modeling and simulation technology, including the United States Department of Defense and the United States Department of Homeland Security, which uses the technology to train the military and emergency responders for operational scenarios. Currently, a limited number of institutions of higher education have modeling and simulation programs, including undergraduate and graduate degree programs. This competitive grant program will provide a critical source of funding for colleges and universities that want to expand and improve their Modeling and Simulation programs and provide seed money for colleges and universities that do not have an established program.

Business workforce partnerships

The Committee adopted an amendment offered by Representatives Jason Altmire (D-PA) and Lynn Woolsey (D-CA) to create Business and Workforce Partnerships. Earnings and employment are strongly linked to educational attainment. Between 2001 and 2004, twenty-four of the thirty fastest-growing occupations were predicted to be filled by people with postsecondary education or training (either a vocational certificate or a degree). Yet 42 percent

of our current workforce—adults between the ages of twenty-five and forty-five—only have a high school diploma or GED.¹⁴

Employers in particular sectors and regions already face skill shortages, a fact that has profound implications for our country's ability to increase economic productivity and for workers' ability to earn enough to support their families. Colleges often lack the funds to start up new, credit-bearing programs that can respond to business workforce needs because state funding and federal financial aid typically only flow after students are enrolled in programs. College workforce offerings are often created instead on the noncredit training side of the college—but this limits access to these programs since they are not eligible for financial aid and limits the ability of workers to earn credits that ultimately will lead to a degree. In addition, the workforce, education, and social service systems that prepare individuals for the labor market are often disconnected from one another and from the labor market. Therefore, H.R. 4137 establishes a federal Business Workforce Partnerships initiative that funds partnerships of colleges and employers to link credit-bearing college programs to business workforce needs, adapt college offerings to workers' schedules, map and develop career and educational pathways, expand worksite learning opportunities, and assist students with job placements. The goals of this initiative are to identify high-demand jobs in local labor markets, create pathways for advancement for non-traditional students to these occupations, and increase the supply of high-skilled workers in the targeted industries.

It is the intent of the Committee that the Business Workforce Partnership Grants created in this bill can be used to serve unemployed, employed and incumbent workers. The Committee further intends that all partners involved in the partnership will remain full partners and remain involved throughout the grant period in the grant activities.

GAO study on standardized tests and race, ethnicity and gender bias

William Kidder of Testing for the Public and Jay Rosner, Executive Director of the Princeton Review Foundation, conducted a study in 2003 that used SAT item-level data to determine the existence of racial bias in the SAT. This study found that the test included a predictable racial bias; white students outperformed African American students on every test item included in the October 1998 SAT. Furthermore, Kidder and Rosner identified that the testing service deemed pre-tested questions on which African American students outperformed their white peers as “psychometrically flawed,” and did not include them for future tests on that basis. The GAO study on standardized tests and race, ethnicity and gender bias should consider whether any standardized admission tests are inherently discriminatory by race and/or gender.

Study on endowments

Endowments play a role in financing the operations of institutions of higher education. Annual investment income from endowments provides funds for student financial aid, professorships, research, and other academic activities. In order to better understand how endowments contribute to the operating budgets of institutions of higher education, the Committee directs the Secretary of Education to conduct a study describing the amounts, uses, and public purposes of college and university endowments. The study should include information on the average and range of the outstanding balance of such endowments; the growth of endowments over the last ten years after factoring inflation; and the percentage of endowment spending on an annual basis. The study, to the extent practicable, should describe the uses of endowments by institutions and the extent to which endowment funds are legally restricted in accordance with gift contributions imposed by charitable donors and the types of restrictions placed upon such funds.

TITLE IX—AMENDMENTS TO OTHER LAWS

Education of the Deaf Act

The Committee reauthorizes the programs of the Education for the Deaf Act with amendments.

The Committee recognizes Rochester Institute of Technology (RIT) as the named entity, which continues the agreement with the Secretary for the establishment and operation of the National Technical Institute for the Deaf (NTID), acknowledging the long-standing relationship between RIT and NTID. The Committee permits the Secretary to enter into an agreement with another institution of higher education for the NTID if the Secretary or RIT terminates the agreement with just cause. However, it is not the intent of the Committee to prohibit the Secretary from considering the establishment of additional technical institutions of higher education for deaf and hard of hearing students in the future, provided that any such expansion would not reduce the resources available to RIT for NTID. Further, the Committee recognizes the need to explore the issue of geographical diversity in the consideration of future institutions that may potentially be added.

The Committee believes children with disabilities should be held to the same high academic expectations as all other children, including the elementary and secondary deaf students attending the K–12 schools operated by Gallaudet University. As such, the Committee requires that the University's K–12 programs adopt achievement standards and yearly progress measures consistent with the accountability requirements in the No Child Left Behind Act of 2001 (P.L. 107–110).

The Committee believes that modifying Gallaudet's reporting requirements on the disposition of secondary school and university graduates from "upon graduation/completion" to "approximately one year after graduation" will provide a clearer picture of outcomes for students. Additionally, changing the timeline of the reporting requirements will make the reporting language for the audit the same for Gallaudet and NTID.

The Committee acknowledges the unique opportunities for deaf and hard of hearing students provided by Gallaudet University and

NTID, and the importance of these institutions for such students from around the world. Currently, the 100 percent surcharge for international students is a barrier to attendance for many students. By adjusting the tuition surcharges for international students to allow for a reduction in costs and a sliding scale for students from developing countries and for individual students with demonstrated need, the Committee hopes to allow Gallaudet and NTID to utilize the available capacity to serve additional international deaf and hard of hearing students.

Indian education

Tribally Controlled Colleges and Universities Act

In response to the concerns of many tribes, the Committee makes several changes to improve the consistency among different federal programs providing assistance to tribally controlled colleges and universities. The Committee recognizes the challenges of having different federal programs provide assistance, each with a slightly different set of definitions. The Committee expects these amendments to improve the coordination between federal programs and help tribally controlled institutions spend more time serving students, and less time navigating complex federal requirements.

Diné College

The Committee recognizes the longstanding relationship between the federal Government and the Navajo Nation. Legislation enacted in 1971 established a dedicated discretionary grant stream for the Navajo Community College, which has been renamed Diné College. In reauthorizing this program, the Committee finds that the Treaty of 1868 between the United States of America and the Navajo Tribe of Indians provides for the education of the citizens of the Navajo Nation.

In 1968, the Navajo Nation created and chartered the Navajo Community College by Resolution CN-95-68 as a wholly owned educational entity of the Navajo Nation. In 1971, Congress enacted the Navajo Community College Act. In 1997, the Navajo Nation officially changed the name of the Navajo Community College to Diné College by Resolution CAP-35-97.

The purpose of Diné College is to provide educational opportunities to the Navajo people and others in areas important to the economic and social development of the Navajo Nation. The mission of Diné College is to apply the principles of Sa'ah Naaghá I Bik'eh Hózhóón (Diné Philosophy) to advance quality student learning through training of the mind and heart—(1) through Nitsáhákees (Thinking), Nahatá (Planning), Iiná (Living), and Sihasin (Assurance); (2) in study of the Diné language, history, philosophy, and culture; (3) in preparation for further studies and employment in a multicultural and technological world; and (4) in fostering social responsibility, community service, and scholarly research that contribute to the social, economic, and cultural well-being of the Navajo Nation.

The United States has a trust and treaty responsibility to the Navajo Nation to provide for the educational opportunities for Navajo people. Significant portions of the College's infrastructure are

dilapidated and pose a serious health and safety risk to students, employees and the public.

For these reasons, the Committee amends the Navajo Community College Act, and renames it after the college, now known as Diné College. The Committee also updates references to the Navajo Indian Tribe and instead replaces it with the appropriate term “Navajo Nation.” The Committee also updates a study of the facilities needs of the college that was last commissioned in 1979, and authorizes a separate set of uses of funds related to the construction of buildings, water and sewer facilities, roads, information technology and telecommunications infrastructure, classrooms and external structures.

The Committee also clarifies that funds made available through the Act may be used for improving and expanding the college, including by providing for the Navajo people and others in the community higher education programs; vocational and technical education; activities relating to the preservation and protection of the Navajo language, philosophy, and culture; employment and training opportunities; economic development and community outreach; and a safe learning, working, and living environment.

Grants for training of incarcerated individuals

The Committee adopted an amendment offered by Representatives Danny Davis (D–IL), Mark Souder (R–IN), Robert Scott (D–VA), Yvette Clarke (D–NY), and Donald Payne (D–NJ) to amend the youth training grants included in current law and extend the program for incarcerated individuals of all ages. Although states provide remedial education to help prisoners acquire their high school diploma or GED, postsecondary correctional education is very limited. Research has identified lack of funding as a primary barrier to such programs.¹⁵

After Congress barred prisoners from receiving Pell grants in 1994, provision of postsecondary correctional education dropped greatly. Currently, only approximately 5 percent of the total prison population is enrolled in postsecondary education. Although forty-five of the fifty states offer some level of postsecondary correctional education, 15 states¹⁶ enroll 89 percent of all prisoners participating in such programs.¹⁷ Given that current federal postsecondary correctional grants target youth, there is a great need for such programs for adults. Creating higher education opportunities for older students would help prisoners who earn a GED while incarcerated, or who must take remedial college-prep courses to complete a postsecondary program. Further, because older prisoners tend to be more mature, focused, and intent on improving their situation after release, correctional education experts assert that they would benefit from such efforts.

Multiple empirical studies demonstrate that postsecondary correctional education improves the atmosphere in prisons, increases successful reentry, increases employment after release, and decreases criminal behavior. For example, studies show that such

education helps improve communication among staff and inmates, develop positive peer role models, and reduce disciplinary infractions.¹⁸ Further, a recent three-state study of Maryland, Ohio and Minnesota found that former prisoners who had participated in college courses were 29 percent less likely to return to prison after three years.¹⁹ Moreover, research suggests that benefits extend to prisoners' families, with children of women in a college program becoming more motivated to go to college.²⁰

The Committee believes that expanding the program is a significant step toward increasing accessibility and providing more individuals with the tools necessary to obtain a postsecondary education.

Establishment of Assistant Secretary and Office for International and Foreign Language Instruction

The Committee adopted an amendment introduced by Representative Rush Holt (D-NJ) to establish an Assistant Secretary and Office for International and Foreign Language Instruction. The Committee endorses the recommendation of the National Academies of Sciences that the Department of Education should consolidate administration of its international education and foreign language programs under an executive-level person reporting to the Secretary who will provide more strategic direction and coordination with other federal agencies and the nation's education community. The Committee specifically recommends amending the Department of Education Organization Act to create an Office of and Assistant Secretary for International and Foreign Language Education reporting directly to the Secretary who will be appointed by the President and approved by the Senate. The appointee should be an individual with extensive background and experience in international and foreign language education, and would have authority for the administration and coordination of all Department programs on international and foreign language education, inter-agency coordination on international and foreign language education, and Department of Education international affairs.

Loan repayment for prosecutors and public defenders

The Committee believes that this language would significantly benefit the criminal justice system by providing loan relief to prosecutors and public defenders. Both professions have recently suffered problems recruiting and retaining attorneys, in large part due to the high loan debt held by law school graduates. According to the American Bar Association, the average cumulative educational debt for law school graduates in the class of 2005 was \$78,763 for those graduating from private law schools and \$51,056 for those graduating from public law schools. Further, a 2002 survey by

Equal Justice Works showed that 66 percent of respondents stated that law school debt prevented them from even considering a public interest or government job. H.R. 4137 takes immediate action to alleviate that debt with the goal of recruiting and retaining more attorneys for these important professions.

Stevenson-Wydler Technology Innovation Act of 1980

Minority Serving Institutions (MSIs) play a unique role in the education of our diverse American workforce. Many of these institutions are located in poor, rural and isolated areas. MSIs have special expertise in serving their communities, which include large numbers of low-income or first-generation college students. Unlike other, larger institutions of higher education, however, MSIs typically have small or nonexistent endowments and few wealthy alumni. As a result, the ability to finance the acquisition and maintenance of the technology that will prepare these students for the workforce is especially challenging for many MSIs.

To address the significant challenges faced by MSIs, the Committee includes language to amend the Stevenson-Wydler Technology Innovation Act of 1980 to authorize the use of funds to assist eligible institutions in acquiring, and augmenting their use of, digital and wireless networking technologies to improve the quality and delivery of educational services at eligible institutions. The Committee intends for this program to address the systemic challenges within minority communities by providing a means for partnership between MSIs and K-12 schools. Further, it is the intent of the Committee that the economic support and development provided by this legislation will help to recognize that MSIs are the ideal vehicle to address the disparities in access to quality higher education opportunities impacting minority students. The Committee believes that the program should intentionally be housed at the Department of Commerce to ensure that the appropriate technology standards and resources are used to assist these institutions in need.

TITLE X—PRIVATE STUDENT LOAN TRANSPARENCY AND IMPROVEMENT

During the course of its oversight and investigations work with respect to federal student loans, the Committee began a preliminary examination of the private student loan market, which has experienced exponential growth over recent years in large part due to rapid increases in the costs of attending college that outpaced the federal investment in student financial assistance. Though private student loans may serve an important role in helping students and families finance the high costs of education, the Committee learned of troubling conflicts of interest and questionable practices similar to those found with federal student loans and other concerns distinct to private student loans.

Compared to federal student loans, little information is available about the size of the private student loan market, characteristics of private loan borrowers, and the terms and conditions of loans that borrowers obtain. According to the College Board, however, student borrowing from private sources has skyrocketed and now equals an estimated 24 percent of total educational loan volume,

nearly \$20 billion annually.²¹ According to the Institute of Higher Education Policy (IHEP), 83 percent of private loan borrowers are undergraduate students, 9 percent are graduate students, 7 percent are professional students, and 1 percent are post-baccalaureate students not in a degree program.²² Professional students tend to borrow more on average, nearly \$11,000 a year, compared with undergraduates, who borrow about \$6,000, and graduate students, who borrow more than \$8,000, according to IHEP. However, both the number of borrowers and amounts borrowed are likely to increase as the private loan market expands and if college costs continue to climb unabated.

Further, the Committee and the New York Attorney General found practices that raise concerns about conflicts of interest, including payment of travel and entertainment costs for school financial aid officers, schools and lenders entering into revenue or “profit-sharing” arrangements, and a failure by institutions to disclose the reasons why lenders were recommended by schools to their students. In addition, the New York Attorney General is investigating potentially troubling concerns about the criteria lenders are using in underwriting private student loans.

The Committee has also identified concerns with deceptive marketing practices in the private student loan industry which are consistent with findings in IHEP’s December 2006 report. This report noted the rapid growth of private student loans which is coupled with concerns about the marketing of such loans to students who may not fully understand the consequences of using private loans to finance their college education. IHEP reported that a student advocacy group had filed a complaint with the Federal Trade Commission for promoting what it considered “false and deceptive claims,” and “discouraging families from applying for valuable financial aid options,” while “encouraging students and parents to take out high-interest private loans of up to \$50,000 per year.”

IHEP also reported on important differences between private and federal student loans, raising additional issues of concern to the Committee. For example, because private loans exist outside of the federal student loan system, mandates on federal student loans do not apply to private loans, including certain disclosure and borrower counseling requirements. Further, the process by which enrollment at an institution is verified varies significantly among private student loan lenders. While some lenders require school officials to certify borrowers’ enrollment and educational costs, other lenders do not. The Committee is concerned that some students are receiving offers for and obtaining private loans prior to completing the FAFSA or prior to receiving a financial aid package offer from the institutions they want to attend.

Additionally, while some lenders market private student loans primarily through a school’s financial aid office, a growing number of lenders are offering direct-to-consumer private loans. While direct-to-consumer loans may provide consumers additional flexibility in selecting a lender and allow borrowers to avoid having to automatically rely on schools’ recommendations, IHEP noted that the lack of consistent and widespread information about private

²²Institute for Higher Education Policy, The Future of Private Loans: Who is Borrowing, and Why?, (Washington, D.C.: December 2006).

loans—and unequal financial literacy among potential borrowers—is of serious concern. Students who borrow private loans directly from lenders without the help of a school official may not be aware of the differences between federal and private loans, or may not fully understand the protections and benefits provided with federal loans, including in-school interest subsidies, caps on interest rates, and opportunities for loan deferments, forbearance, and forgiveness.

Further, Consumers Union released a report in July 2007 that determined, among other things, whether students and parents could identify the most affordable loan choices and understand the resources necessary to repay them.²³ Consumers Union conducted qualitative market research, using focus groups with over 130 students and parents in five major metropolitan areas: Atlanta, Boston, Chicago, Los Angeles, and New York. Focus group participants included recent graduates, current undergraduates, and parents of undergraduates.

Consumers Union reported a number of findings, including that nearly 50 percent of undergraduate private student loan borrowers fail to exhaust their low-cost federal student loan options. In addition, the research showed that current students and many parents:

- did not understand the significant differences between federal and private student loans;
- thought the interest rates charged for federal and private student loans were the same (a particularly troubling finding, given that the Committee in its own oversight work has identified some private loans with exceptionally high origination fees—10 percent—and interest rates—approaching 20 percent);
- expressed confusion over the concept of interest capitalization;
- believed that it was not worthwhile to complete the FAFSA to qualify for an unsubsidized federal Stafford loan (this was especially expressed by those who did not qualify for subsidized Stafford or Perkins loans);
- expressed concern over whether they had obtained the best student loan deal and several current and former students indicated that they had borrowed too much because they did not understand the costs they would have to repay;
- were bombarded (from junior year of high school through at least college graduation) with loan solicitations from private student loan lenders both in the mail and via email, some of which used various aggressive marketing “come-ons;”
- overwhelmed by the “hunt” for information and money to pay for college.

In light of the (1) exponential growth of the private student loan market, (2) questionable practices by some lenders and conflicts of interest identified by the Committee and others, (3) lack of transparency and substantive disclosures concerning the term and conditions of private loans, (4) challenges faced by students and families in identifying and determining optimal college financing strategies, and (5) consequences for students of incurring increasing and excessive debt burdens, the Committee believes Congress must act.

²³ Consumers Union, *Helping Families Finance College: Improved Student Loan Disclosures and Counseling*, (Yonkers, NY: July 2007).

Working closely with the Committee on Financial Services, the Committee on Education and Labor includes several significant provisions in H.R. 4137 to address many of the concerns identified. Importantly, the provisions are intended to complement the consumer protection provisions included in titles I and IV of the bill addressing federal student loans.

The Committee believes that students and families deserve full and fair information about all borrowing options when making important decisions about how to finance a college education. Title X of the College Opportunity and Affordability Act ensures that students are fully informed about the terms and conditions of private loans, and are better protected from dangerous levels of private student loan debt. Among the other things, the Act:

- Requires lenders to make additional disclosures to borrowers at three stages of the loan application process: (1) with advertising or solicitation of loans, (2) with approval of loan applications, and (3) with consummation of loans, and requires written notification from borrowers that they have received these disclosures;
- Prohibits any gifts or financial arrangements made between private lenders and schools in exchange for loan volume, and prohibits co-branding of loans;
- Requires lenders offering private loans to first inform students of their federal student loan borrowing options;
- Requires lenders to notify a borrower's school of a proposed loan of \$1,000 or more;
- Provides loan applicants a 30-day loan acceptance period after a lender has approved the loan, and grants borrowers up to three days to change their minds after they accept the loan;
- Bans fees and penalties for early prepayment of loans;
- Promotes college student financial literacy by requiring the Department of the Treasury to help colleges implement effective financial literacy education programs;
- Requires the GAO to further study private loans, and how private loan pricing, and default and graduation rates affect the availability of private loans to certain borrowers at certain schools; and,
- Provides incentives under the Community Reinvestment Act requirements for lenders to provide low-cost private student loans to low-income borrowers.

The Committee believes the initial steps provided for in the legislation will make important advances toward ensuring that students and families have enhanced information that will allow them to better understand the consequences of relying on private student loans in financing their education. Additionally, by ensuring the schools are made aware that students are considering taking out a private loan, professional student aid administrators will be afforded an opportunity to provide counseling to students and help ascertain whether students have exhausted their federal and other financial aid options before turning to private student loans. Moreover, given that under current law schools must take into consideration a borrower's private student loans in packaging student financial assistance, the Committee believes that student aid administrators can help students avoid unintentionally jeopardizing the amount of federal aid for which students would otherwise qualify.

The Committee intends to continue its oversight and investigations of the private student loan market, given its rapid expansion and its significant impact, both negative and positive, for students and families and the dearth of information available to policymakers. Already, in response to news reports of excessive executive compensation and extravagant expenditures, the GAO has undertaken, at the Committee's request, an investigation of whether tax-exempt organizations making student loans are abusing their tax-exempt status and are involved in deceptive marketing. In addition, at the request of the Committee, and subsequently supported by the Secretary of Education, the Federal Trade Commission has undertaken an investigation of student loan marketing practices by lenders in the student loan market. In undertaking its work, the Committee will continue its close collaboration with the Committee on Financial Services and consider future hearings and legislation as needed.

Sec. 108. State commitment to affordable college education

Inserts a new section 132 requiring a fiscal maintenance of effort on the part of a state for public institutions of higher education lo-

cated in the state. Provides that the Secretary of Education may waive the requirement in specified circumstances. Makes states that fail to meet the requirement ineligible for funding under certain newly established program funds. Authorizes the Secretary to identify and disseminate institutional cost containment strategies and publicly recognize institutions of higher education that are doing an effective job at cost containment.

Sec. 109. Transparency in college tuition for consumers

Inserts a new section 133 to define net price and provide for the development by the Bureau of Labor Statistics of higher education price indices that reflect the annual change in tuition and fees for undergraduate students by institution type and control. Requires the Secretary to publicly report on an annual basis a national list ranking institutions of higher education according to the percentage change and dollar change in such institutions' tuition and fees over the preceding three years. Creates higher education price increase watch lists to be published by the Secretary annually to list those institutions whose increase in tuition and fees outpace the applicable higher education price index; requires the Secretary to report the full price of tuition and fees, price of room and board, and common expenditures for such institutions. Requires institutions so listed to establish quality-efficiency task forces to review, analyze and publicly report on the institution's operating costs. Provides that in specified circumstances institutions would be exempt from being listed on the higher education price increase watch list. Requires the Secretary to annually report on the Department's web site the most recent five-year trends in each state's appropriations per enrolled student in public institutions of higher education in the state and tuition and fees for each such institution as well as the total amount of need-based and merit-based aid provided by the state to students enrolled in an institution of higher education in the state.

Provides for the creation by the Secretary of several model net price calculators to help students, families, and consumers determine the net price of an institution of higher education for various categories of such institutions. Requires institutions of higher education to adopt and use a net price calculator, as either developed by the Secretary or the institution, to help students, families and other consumers determine the net price of such institution and requires disclosure of the institution's net price in the institution's admissions application materials. Further requires the Secretary to develop a model document, to be known as the "University and College Accountability Network" (U-CAN), to annually report basic information about each institution that chooses to participate, to be posted on the college information web site and made available to institutions of higher education, students, families, and other consumers. Requires the document to include the following information about the institution in a consumer-friendly manner: specified demographic and enrollment information on students enrolled at the institution; specified information on the degrees awarded by the institution; specified information about the faculty of the institution; specified information about the cost of attending the institution, the financial aid received by and available to the students at

the institution; and other specified information that would be helpful to prospective students and students enrolled at the institution.

Sec. 110. Textbook information

Amends part C of title I by adding a new section 134 to ensure that students are offered better and more timely access to affordable course materials. Defines necessary terms.

Further requires that publishers provide faculty or other adopting entities with information on the price at which the publisher makes the material available to the college bookstore on the campus of (or otherwise associated with) the institution, the copyright dates of all previous editions of the textbook, a description of any substantial content revisions between the current and preceding version of the textbook or supplemental material, and whether the textbook or supplemental material is available in any other formats (including paperback and unbound) and the price at which the alternative materials are available. Requires that such information be provided in writing, which may include electronic communication, such as e-mail or access to a public web site. Requires publishers to offer all bundled materials (as such term is defined) as separate and unbundled items that are separately priced. Requires publishers to provide the information required under this section to the maximum extent practicable for custom textbooks.

Requires that, to the maximum extent practicable, institutions of higher education shall disclose in the Internet course schedules the International Standard Book Number (ISBN) and retail price information for required and recommended textbooks, related materials, and supplies for each course listed in the institution's course schedule. In the case that the ISBN number is not available for an item, requires the institution to disclose the author, title, publisher, and copyright date of the item. If the institution determines that the disclosure of the information is not practicable for an individual item or for a course, requires the institution to place "to be determined" in absence of the information until such time as the information is available. Requires institutions that do not provide subsequent course information on the Internet to provide the information required in printed course catalogs, as such information is available at the time of printing.

Further requires that institutions of higher education provide, as soon as is practicable, upon the request of any college bookstore the institution's course schedule for the subsequent academic period, and for each course or class the information required to be provided on the institution's Internet course schedule, the number of students enrolled, and the maximum student enrollment.

Nothing in this section is intended to supersede institutional autonomy or the academic freedom of instructors in selecting college textbooks and materials for use in higher education.

This section is effective on July 1, 2008.

Sec. 111. Database of student information prohibited

Inserts a new section 135 that provides that nothing in the Act should be construed to authorize the Secretary, to develop, implement, or maintain a federal database of personally identifiable information on individuals receiving assistance under this act, attending institutions receiving assistance under this act, or other-

wise involved in any studies or other collections of data under this Act, including a student unit record system, an education bar code system, or any other system that tracks individual students over time. Adds a new section that clarifies that this prohibition does not apply to a system that is necessary for the operation of programs authorized by title II, IV, or VII or data required to be collected by the Secretary that were in use by the Secretary as of the day before the date of enactment of the College Opportunity and Affordability Act of 2007. Further clarifies that the prohibition does not extend to a state or a consortium of states, which may develop, implement, or maintain state-developed databases that track individuals over time, including student unit record systems that contain information related to enrollment, attendance, graduation and retention rates, student financial assistance, and graduate employment outcomes.

Sec. 112. Institution and lender reporting and disclosure requirements

Amends title I of the Higher Education Act of 1965 to create a new part E (Institution and lender reporting and disclosure requirements). Section 151 defines “covered institution” as any educational institution that offers a postsecondary educational degree, certificate, or program of study, and receives any federal funding or assistance; the term includes authorized agents and employees of the institution. The term “educational loan” is defined to include loans made, insured, or guaranteed under title IV of the Higher Education Act of 1965 or a private educational loan, which is defined as a loan not made, insured or guaranteed under title IV and issued by a lender to a student or parent expressly for postsecondary educational expenses. Defines a “preferred lender arrangement” as an arrangement or agreement between a lender and a covered institution under which a lender provides a loan to a student or parent of student attending an institution and the institution recommends, promotes, or endorses the lender’s loan product; excludes from the definition loans made under section 499(b) as well as loans under Parts D and E of title IV of the Higher Education Act. Defines “lender” as a creditor, as defined in section 103 of the Truth in Lending Act, and includes an agent of the lender. Defines “officer” as including a director or trustee of an institution and the term “postsecondary educational expenses” as those expenses included as part of a student’s cost of attendance, as defined under section 472.

Section 152 requires each lender entering into a preferred lender arrangement with a covered institution to certify annually to the Secretary of Education its compliance with the requirements of this act. Also prohibits institutions from agreeing to a lender’s use of the name, emblem, mascot, or logo of the institution in the marketing of private educational loans in any way that implies that the institution endorses the private educational loans offered by a lender.

Section 153 directs the Secretary of Education to report to the authorizing Congressional committees on the adequacy of educational loan information provided to borrowers and requires the report to include a model disclosure form developed and prescribed by the Secretary for lender use in providing annual loan informa-

tion to the Secretary and covered institutions with which they have a preferred lender arrangement. Also requires such lenders to disclose, in addition to specified loan information, interest rates and other terms and conditions of educational loans, and any philanthropic contributions made to such institutions. Requires institutions to provide the Secretary, prospective borrowers, and the public with the disclosure form information as well as a detailed explanation of why such loans are beneficial to borrowers in time for the student or parent to take such information into account before applying for or selecting a loan. In addition, requires covered institutions to disclose on their web sites and in their informational materials: (1) that they cannot limit students to recommended lenders and must process the loan documents of any eligible lender; (2) the information provided on the model disclosure form with regard to recommended lenders; (3) the maximum federal grant and loan aid available; and (4) the cost of attendance.

Requires, under section 154, covered institutions that provide prospective borrowers with private educational loan information inform students and parents of (1) their title IV assistance eligibility; and (2) compare and distinguish private loans from title IV loans.

Section 155 requires institutions of higher education (IHEs) to develop, publicize, and enforce codes of conduct for their officers, employees, and agents that prohibit conflicts of interest with respect to educational loans. Also prohibits an institution's officers, employees and agents that have financial aid duties from accepting gifts from lenders, guarantors, or servicers of educational loans and directs the Inspector General of the Department of Education to investigate and report annually to Congress on gift ban violations. In addition, prohibits institutional officers, employees or agents who are employed in the financial aid office of an institution from accepting any fee, payment, or other financial benefit as compensation for any type of consulting arrangement or other contract to provide services to a lender or on behalf of a lender, and from participating on any advisory councils of lenders or affiliates of lenders. Also provides that in certain circumstances an institutional officer, employee or agent is allowed to serve on a board of directors of a lender, guarantor, or servicer of educational loans, and that an officer, employee or agent of a lender, guarantor or servicer of educational loans is allowed to serve on an institution's board of trustees. Bars institutions from: (1) entering into revenue sharing agreements; (2) requesting or accepting lender assistance with call center or financial aid office staffing, except in limited circumstances; (3) requesting or accepting any lender's offer of funds for private educational student loans in exchange for concessions or promises to the lender with respect to an institution providing the lender a specified number of loans, a specified loan volume, or a preferred lender arrangement for any loans made, insured, or guaranteed under title IV. Also prohibits lenders from making any such offer.

Section 156 conditions the receipt of federal funds and assistance by schools and lenders on their compliance with part E. Establishes penalties for noncompliant schools and lenders, including: (1) a ban on lenders from participating in title IV programs; and (2) a \$25,000 civil penalty for institutions and as well as for lenders that do not participate in title IV programs.

Also included in the new part E is section 157 which provides for enhanced student loan counseling for borrowers. Requires lenders to contact borrowers five years into their loan repayment to ascertain, for those borrowers who selected other than a standard repayment plan, whether a borrower is able to select an alternative repayment plan with a shorter repayment period that would reduce the total interest paid on the borrower's loan. Additionally, prior to a borrower beginning loan repayment, requires lenders to provide a borrower an explanation of principal borrowed, current balance, interest already paid, interest due over the life of the loan, and options by which borrowers may avoid or be removed from default, as well as repayment options. Requires lenders to provide similar information during loan repayment periods, and to provide information concerning options, including forbearance, available to borrowers experiencing difficulty repaying their loans. Requires institutions of higher education to provide enhanced counseling for borrowers including providing them information concerning the average indebtedness of borrowers at the institution, sample monthly repayment amounts based on a range of indebtedness levels, starting salaries for graduates of institutions by type and control of institution and field of study, repayment options available to borrowers, and the likely consequences of borrower default. Requires the Secretary to provide information to institutions to enable them to provide borrowers with the enhanced counseling.

Sec. 113. Feasibility study for national electronic student loan marketplace

Directs the Secretary, in consultation with the Federal Trade Commission (FTC), representatives of student loan borrowers, representatives of institutions of higher education, and other relevant stakeholders, to conduct a study on the feasibility of developing a National Electronic Student Loan Marketplace that would provide for a registry of realtime information on federal and private student loans. Requires the Secretary to report findings to the authorizing Congressional committees not later than six months prior to the completion of the model interest rate format required under section 153(a)(1).

Section 201 amends title II with revisions to Part A, Part B, and the addition of a new Part C.

Partnership grants

Authorizes the Secretary to award competitive grants to eligible partnerships. Requires that each application contain a needs assessment of all the partners and a description of the extent to which the teacher preparation program prepares new teachers, including how to understand and use research and data in the classroom, and how the partnership would coordinate with other programs. Requires that applications also include a resource assessment of the resources available to the eligible partnership and an

evaluation plan. In addition, requires applications to describe how the partnership would: align the teacher preparation program with academic achievement, early learning, and content standards; connect faculty at partner institutions with teachers and their classrooms in the high-need local educational agency included in the partnership to provide professional development opportunities; ensure the preparation of general education teachers and special education teachers to teach students with limited English proficiency; in-service professional development strategies and activities to be supported; design, implement or enhance a yearlong rigorous and enriching pre-service clinical program; collect, analyze, and disseminate data on teacher retention.

Provides that eligible partnerships that receive grants under this part shall use grant funds to carry out a program for the pre-baccalaureate preparation of teachers, a teaching residency program, a leadership development program or all of these programs. Programs for the pre-baccalaureate preparation of teachers shall be held accountable for promoting strong teaching skills, as well as preparing current or prospective teachers to be highly qualified, to understand evidence-based research on teaching and learning and its applicability to the classroom, and to use technology effectively. Required reforms shall include changing teacher preparation curriculum to improve, evaluate and assess how new and prospective teachers develop teaching skills; using evidence-based knowledge about teaching and learning to improve the preparation of teachers; ensuring new teachers receive training in both teaching and content areas; and developing and implementing an induction program, literacy training, as well as other requirements. The program also includes an induction program for new administrators and ensures the recruitment of individuals, from underrepresented populations, mid-career professionals and those from rural communities, to participate in the program.

Administrative provisions

Provides that grants available under this section shall be for five year periods, and that a partnership is eligible to receive only one grant during a five year period. However, individual members within a partnership are eligible to receive another grant during this period by participating in other partnerships with different members. Applications shall be submitted to a peer review panel for evaluation, and the Secretary shall select grant recipients on the basis of the peer review process. Priority shall be given to applications that include teacher preparation programs with a rigorous selection process and to applicants from broad-based partnerships that include business and community organizations or to partnerships that will ensure an equitable distribution of grants among urban and rural areas. Each partnership receiving a grant under this section is required to provide an amount equal to 100 percent of the amount of the grant in cash or in kind from non-federal sources. The Secretary may waive the matching requirement if the matching requirements would impose a serious hardship.

Accountability and evaluation

Requires that partnership evaluation plans include objectives and measures for increasing student achievement, teacher retention, improvements in pass rates on state certification and licensure, and the percentage of highly qualified teachers hired by the high-need local educational agencies, including the percentage of highly qualified teachers working within the various targeted demographics including high-need areas (including special education, language instruction, educational programs for limited English proficient students, and early childhood education).

on these reports. The Secretary must provide Congress with a report card, which must be made widely available, on teacher qualifications and preparation in the United States. The Secretary must also submit a report to Congress that contains a comparison of states' and eligible partnerships' efforts to improve the quality of the teaching force.

Teacher development

Requires institutions that receive title IV aid and conduct traditional teacher preparation programs, including programs that offer ongoing professional development programs or alternative routes to state certification or licensure programs, to set annual quantifiable goals for increasing the number of prospective teachers trained in teacher shortage areas, and more closely link the training provided by the institution with the needs of schools. A report shall be made public on whether institutions have met these goals.

State functions

Requires states receiving funds under this section have in place a procedure to identify and assist low-performing teacher preparation programs. If a state terminates financial support for a teacher preparation program due to low performance, the program must provide transitional support for students enrolled at the institution at the time of the termination.

General provisions

Requires the Secretary to ensure that states and institutions of higher education use fair and equitable methods in reporting and that the reporting methods not allow for identification of individuals. Provides that information requested by the teacher preparation programs be provided to the program to enable the program to evaluate its effectiveness.

Authorization of appropriations

This section provides \$500 million for fiscal year 2009 and such sums for each of the two succeeding fiscal years.

TITLE III—TITLE III AMENDMENTS

Sec. 301. Program purpose

Allowable uses of grant funds are expanded to include using grant aid for education or counseling services designed to improve the financial literacy of students or their parents.

Sec. 302. Title III grants for American Indian Tribally Controlled Colleges and Universities

Section 302 amends the definition of a “Tribal College or University” to include institutions identified in the Tribally Controlled College or University Assistance Act of 1978, the Navajo Community College Assistance Act of 1978, or cited in section 532 of the Equity in Educational Land Grant Status Act of 1994.

Allowable uses of grant funds are also expanded. Institutions may now use grant aid to acquire real property adjacent to the institution, for education or counseling services designed to improve financial literacy of students or their parents, or to develop or improve distance learning or Internet facilities and capabilities.

The Secretary of Education would use the remaining appropriated funds to award grants on a formula basis, with no such grant in an amount less than \$500,000. Sixty percent of these funds would be awarded proportionally, based on the number of Indian students enrolled at these colleges and universities. The re-

maintaining 40 percent would be distributed equally among all eligible schools.

Colleges or universities that are eligible for and receive funds under section 316 would not be eligible to receive any additional funding, concurrently, under part A or B of title III. Eligible institutions would not be subject to the wait-out period with respect to new funding under section 316.

Grant funds shall be used to plan, develop, undertake and implement programs to enhance the institution's capacity to serve more low- and middle-income Black American students, to expand higher education opportunities for title IV eligible students by encouraging college preparation and student persistence in secondary school and postsecondary education, and to strengthen the ability of the Predominantly Black Institution to serve such students. Grant funds may be used for academic instruction in disciplines in which Black Americans are underrepresented, to establish or enhance a program of teacher education designed to qualify students to teach in a public elementary school or secondary school in the state, or to establish community outreach programs that will encourage elementary school and secondary school students to develop the academic skills and interest to pursue postsecondary education, among other uses. Up to 20 percent of each grant may also be used to establish or increase an endowment fund, in which case the institution must raise an equal amount from non-federal sources.

Priority for such grants shall be given to Predominantly Black Institutions with high numbers of financially needy or Black students. Grants shall not be less than \$250,000.

Sec. 304. Assistance to Asian American and Pacific Islander-serving institutions

This section authorizes the Secretary to award grants under a new grant program to Asian American and Native American Pacific Islander-serving institutions. Grant funds shall be used to plan, develop, undertake and implement programs to enhance the institution's capacity to serve more low- and middle-income Asian American and Pacific Islander students, to expand higher education opportunities for title IV eligible students by encouraging college preparation and student persistence in secondary school and postsecondary education, and to strengthen the ability of the institution to serve such students. Grant funds may be used for academic instruction in disciplines in which Asian Americans and Native American Pacific Islanders are underrepresented, to support faculty exchanges and faculty development, or to establish community outreach programs that will encourage elementary school and secondary school students to develop the academic skills and interest to pursue postsecondary education, among other uses. Priority for such grants shall be given to Asian American and Native American Pacific Islander-serving institutions with high numbers of financially needy students.

Sec. 305. Native American-serving, nontribal institutions

Section 305 authorizes a new grant program specifically for Native American-serving, nontribal colleges and universities. The Secretary of Education must provide grants of at least \$200,000 for schools to improve their capacity to serve Native Americans. Grants may be used to fund the following types of activities: purchasing scientific or laboratory equipment, books, and other educational material; renovating classrooms, libraries, or other instructional facilities; and supporting faculty and curriculum development, tutoring and other student support services.

Provides, in order to be eligible for a grant, the institution may not be a tribal college or university and at least 10 percent of the undergraduate enrollment must be comprised of Native American students. Additionally, institutions that are eligible for or receive funds under section 318 would not be eligible to receive any additional funding, concurrently, under part A or part B of title III. This section waives the requirement in section 313(d), allowing eligible institutions to apply for new funding once the grant expires.

Sec. 306. Strengthening Historically Black Colleges and Universities

Section 306 includes technical changes including the use of grant aid for education or counseling services designed to improve financial literacy of students and their parents or for various academic student support services. Funds may also be used to acquire and develop property adjacent to colleges and universities.

The section also makes specific changes to the minimum allotment for grants under Part B. Additionally this section makes changes to the duration of grants for professional graduate institutions as well as includes new institutions named as designees under the Professional or Graduate Institutions program.

The following six universities are added to the list of qualified graduate programs: Alabama State University, Bowie State University, Prairie View A&M University, Delaware State University, Langston University, and the University of the District of Columbia.

Sec. 307. Endowment Challenge Grants

Section 307 amends current law to increase the amount of grant aid institutions may receive under this section. Additionally, the language allows the Secretary to provide technical assistance to institutions desiring a grant under this section.

Sec. 308. Limitations on Federal insurance for bonds issued by the designated bonding authority

Section 308 increases the aggregate principal amount of bonds that may be outstanding at any given time.

engagement in science, technology, engineering, and mathematics through outreach and hands-on, experiential-based learning projects that encourage underrepresented minority students to pursue careers in science, technology, engineering and mathematics.

Sec. 356. Promotion of entry into STEM fields

Section 356 includes language to allow the Secretary to enter into a contract with a firm to implement a campaign aimed at expanding the population of qualified individuals in science, technology, engineering, and math fields by encouraging young Americans to enter such fields.

Section 357 requires the Secretary to develop an evaluation and accountability plan for projects funded under this subpart.

Sec. 310. Technical assistance

TITLE IV—TITLE IV AMENDMENTS

PART A—PART A AMENDMENTS

Sec. 401. Federal Pell Grants

Amends section 401(b) to increase the authorized annual maximum Pell Grant award to \$9,000 through academic year 2013–2014. Further amends section 401(b) by authorizing the Secretary of Education to provide up to two grants in a single award year for students seeking to enroll in additional academic sessions (e.g., summer sessions or year-round enrollment). Further amends the section to prohibit persons subject to an involuntary civil commitment after incarceration for a forcible or non-forcible sexual offense from receiving a Pell Grant. Makes a technical amendment to the mandatory funds provided under P.L. 110–84 to ensure that the funds are available for the same award period as are discretionary funds.

Amends section 401(c) to limit the period during which a student may receive a Pell Grant to the equivalent of eighteen semesters or twenty-seven quarters in duration (as determined by the Secretary). For students enrolled less than full-time, only the fraction of time enrolled shall count toward such duration limits. This limi-

tation only applies to students who first receive a Pell Grant on or after July 1, 2008.

Amends section 401A to make a number of changes to the eligibility requirements for Academic Competitiveness Grants (ACG) and National Science and Mathematics Access to Retain Talent (SMART) grants. The amendments expand eligibility for such grants to students who are in school on at least a half-time basis, clarify that eligible students enrolled in certificate programs of at least one year at two and four-year degree granting institutions are eligible for ACGs, and expand eligibility for National SMART grants to third and fourth year students who are enrolled at institutions that do not offer degrees in the subjects required to be eligible for a SMART grant (physical, life, or computer sciences, math, technology, engineering, or critical foreign language), but who have taken the required number of classes to gain such a degree at an institution that does grant degrees in eligible subject areas. Further, the section is amended to eliminate the citizenship requirement for grants under this section, thus enabling Pell-eligible non-citizens to receive ACG and SMART grants. Finally, it amends the process by which such grants are awarded.

Sec. 402. Federal TRIO Programs

Amends section 402A to clarify that community-based organizations with experience in serving disadvantaged youth are eligible to apply for and receive grants under this chapter. Further amends the section to establish that, except for staff training and development programs, awarded grants or contracts may be provided for a five-year period, and that the minimum amount awarded for a grant under this chapter shall be \$200,000, except for staff training and development programs. For staff training and development programs, the grants may be provided for a two-year period, and the minimum grant awarded shall be \$170,000. Further amends the section to make definitional changes and ensure that applicants for awards under this chapter identify services to foster care youth. Further clarifies that individuals who are homeless or unaccompanied youth (as defined in section 725 of the McKinney-Vento Homeless Assistance Act) are eligible to participate in the programs under this chapter.

Directs the Secretary to establish and use outcome criteria to measure the quality and effectiveness of the TRIO programs. Requires the criteria be disaggregated by low-income students, first generation college students, and individuals with disabilities. Requires outcome criteria to measure, where applicable, the delivery of service to a total number of students; the students' secondary school enrollment, graduation, and completion of a rigorous secondary school program of study; and the students' enrollment, retention, performance, and completion in an institution of higher education. The Secretary shall compare the results of the identified criteria to the targets that were agreed upon with the eligible entity, as established in the entity's application approved for funding. Further amends the section to allow applicants who were not funded for a program under this chapter to appeal the decision of the Secretary to an administrative law judge.

Further amends section 402A to clarify that a "different campus" is a site of an institution that is geographically apart from the

main campus of the institution, is permanent in nature, and offers courses leading to a degree, certificate, or other credential. Further, the term “different population” is defined as a group of individuals that is separate and distinct for any other population that the entity has applied for a grant to serve or that has distinct needs for specialized services. Also amends the section to define eligible veterans as those veterans who served on active duty for a period of more than 180 days, including members of a reserve component of the Armed Services who were called to active duty for a period of more than 180 days, or was a member of a reserve component who served on active duty in support of a contingency operation on or after September 11, 2001.

Amends section 402C to clarify that mathematics and science preparation are eligible services to provide to veterans to make the transition to postsecondary education. Further amends the section to restrict the Secretary’s use of funds for the purposes of evaluating and selecting participants of the Upward Bound program.

Amends section 402E to include Native Hawaiians and Pacific Islanders as eligible participants for assistance in securing admission to and financial assistance for enrollment in graduate programs under the Postbaccalaureate Achievement Program.

Amends section 402H to revise the title to read “Reports, Evaluations, and Grants for Project Improvement and Dissemination.” Directs the Secretary of Education to submit a report annually, and not later than two years after the participating entities submit their report to the Secretary, documenting the outcome data on the program’s delivery of services, participating students’ secondary and postsecondary school enrollment and completion, and academic performance. Reported data will be aggregated by individual project performance, include when appropriate descriptive, longitudinal, and multi-cohort data, and comparable data on the national population of low-income, first generation students and students with disabilities. Reports will provide national performance data with the primary purpose of identifying and highlighting best practices for increasing college access and persistence through implementation of the programs and improvement of program practices based on the outcome criteria outlined in section 402A. This section also specifies that the Secretary may not require an eligible entity that applies for assistance under this chapter to recruit students to serve as a control group in an evaluation and that the Secretary shall take into consideration the burden placed upon the program participants and eligible entity and the approval by the institution’s institutional review board when designing an evaluation.

Sec. 403. GEAR UP Amendments

Section 403 amends section 404(a) to specify that students with disabilities are included (1) among eligible low-income students for whom the Secretary is authorized to establish programs to encourage eligible entities to provide or maintain a guarantee of the financial assistance necessary to permit such students to attend an institution of higher education and (2) among students for whom the Secretary is authorized to support eligible entities in providing additional counseling, mentoring, academic support, outreach, and supportive services to students who are at risk of dropping out of school.

In addition, the section amends section 404A(b) to eliminate the current law priority for eligible entities that had previously carried out programs under chapter 2 prior to the Higher Education Amendments of 1998. This section requires the Secretary of Education to give priority to eligible entities that carried out successful educational opportunity programs under this chapter (as this chapter was in effect on the day before the date of enactment of the College Opportunity and Affordability Act of 2007) and that have a prior demonstrated commitment to early intervention leading to college access through collaboration and replication of successful strategies; and ensures that students served under this chapter on the day before the date of enactment of the College Opportunity and Affordability act of 2007 continue to receive assistance through the completion of secondary school.

The section also provides that the Secretary may award a grant under this chapter to an eligible entity for seven years.

The section also amends section 404B(g) to require that certain eligible entities provide the option of continued services to program participants beyond the 12th grade and through a student's first year of attendance at an institution of higher education, and provide services to students who have received services under a previous GEAR UP grant award but have not yet completed the 12th grade. The section also requires eligible entities receiving grants under the chapter to provide comprehensive counseling, activities and information to participating students regarding the transition to college or postsecondary education through continuity of services to support students in and through the first year of attendance at an institution of higher education. Further, the section expands the authorized uses of funds to include providing eligible students with a continuing system of mentoring and advising through their first year of attendance at an institution of higher education as well as special programs or tutoring in science, technology, engineering, or mathematics. The section also provides that certain eligible entities may consider as priority students those in their first year of attendance, students in foster care, or homeless youth. Additionally the section provides eligibility entities with additional flexibility in meeting required matching fund requirements by allowing entities to count as matching funds those accrued over the full duration of the grant award period, provides that, in limited cases, an entity may request a reduced match percentage, and provides incentives for entities to provide students with financial assistance. In addition, with respect to methods for complying with matching requirements, the section provides that eligible entity may count toward the matching requirement financial assistance obligated to students from state, local, institutional, or private funds under the chapter and also clarifies other resources that may be counted toward matching requirements.

The section also expands authorized uses of funds for purposes of early intervention by allowing eligible entities to provide financial literacy and economic literacy education or counseling to students, fostering and improving parent and family involvement in elementary and secondary education, engaging other entities in a collaborative manner to provide matching resources and participate in other authorized activities, disseminating information that promotes the importance of higher education, explains college prepara-

tion and admission requirements, and by providing technical assistance to middle schools, secondary schools or eligible partnerships.

The section also amends section 404E to provide that scholarships provided for under the program are to supplement aid for which students are regularly eligible and provides that the minimum amount of a scholarship that an eligible student may receive under this section shall not be less than the lesser of (1) the minimum federal Pell Grant funded under section 401 for the applicable fiscal year or (2) 75 percent of the average cost of attendance for an in-state student in a four-year program of instruction at public institutions of higher education in such state, as determined in accordance with regulations prescribed by the Secretary. Also, the section authorizes \$400,000,000 for fiscal year 2009 and such sums as may be necessary for each of the 4 succeeding fiscal years.

Sec. 404. Academic Achievement Incentive Scholarships

Repeals chapter 3 of subpart 1 of part A of title IV.

Sec. 405. Federal Supplemental Educational Opportunity Grants

Amends section 413A to authorize the program at \$875,000,000 for fiscal year 2009 and such sums as are necessary for the next four fiscal years. Amends section 413D to increase the allowance of books and supplies used to compute the average cost of attendance from \$450 to \$600.

Sec. 406. Grants for access and persistence

Amends section 415A to extend the authorization of the Leveraging Educational Assistance Partnership Program.

Amends section 415C to change the maximum amount allocated by states for an individual student grant from a maximum of \$5,000 per academic year to the lesser of \$12,500 per academic year or the student's cost of attendance. Require states to notify eligible students that aid is from Leveraging Educational Assistance Partnership grants and funded by the federal government and the state.

Rewrites section 415E. The title for section 415E, "Special Leveraging Educational Assistance Partnership Program" is revised to read "Grants for Access and Persistence." The purpose of this section is to increase college access and persistence by making states allotments to: expand and enhance partnerships with institutions of higher education and private organizations in order to provide additional need-based grants to eligible low-income students; provide early notification of eligibility for financial aid; and encourage participation in early information, intervention, and other outreach programs.

States desiring an allotment must submit an application to the Secretary of Education. The application must describe the state's plan for using the funds and the organizational structure in place to administer the various activities and assure that the state provides the matching funds and that early information, intervention, and other outreach programs exist or will exist. State agencies must apply for an allotment in partnership with the following organizations or entities: at least one private and one public college or university located in the state, if applicable; early information,

intervention, and other outreach programs located in the state; and at least one philanthropic organization or private corporation.

The amount of the federal share is determined by the percentage of full-time students enrolled in the state's partnership colleges and universities in comparison to the total number of students attending institutions of higher education in the state. The federal share is 57 percent if enrollment in the state's partnership schools represents less than a majority of all students attending colleges and universities. The federal share is 66.66 percent if enrollment in the state's partnership schools represents a majority of all students attending colleges and universities in the state.

Each state receiving an allotment must use funds toward the overall partnership to award grants for eligible low-income students. States must annually notify low-income students in grades seven through twelve of their potential eligibility for financial assistance. To be eligible to receive a grant, students must meet at least two of the following criteria: have an expected family contribution of zero; qualify for a free or reduced price lunch; qualify for the state's maximum undergraduate award; or participate in early information, intervention, or other outreach programs. Students would receive a grant for each year of their undergraduate education, as long as they remained financially eligible and meet the state's degree completion time limits.

Section 407. Special programs for students whose families are engaged in migrant and seasonal farmwork

Section 407 amends section 418A to expand the services provided by the college assistance migrant program to include internships, transportation, and child care. Program follow-up services with students, after they complete their first year of college, may include encouraging students to transfer from two-year to four-year institutions of higher education. This section also expands eligibility for the recruitment services authorized under this program to children who have immediate family members who have spent at least 75 days over the past 24 months in migrant and seasonal farmwork; current law only covers children who themselves or whose parents have spent such time in migrant and seasonal farmwork. This section also requires the Commissioner of Education Statistics to annually collect data about persons receiving services under this part, including rates of secondary school graduation, entrance into postsecondary education, and completion of postsecondary education. At least every 2 years, the Commissioner shall prepare and submit a report containing this data, which shall be made available to the public. The high school equivalency program and the college assistance migrant program are each reauthorized for such sums as may be necessary in fiscal year 2009 and each of the four succeeding fiscal years. The Secretary of Education shall allocate an amount no greater than \$180,000 for each project under the high school equivalency program or the college assistance migrant program. No more than 0.5 percent of funds made available for the projects may be used for outreach activities, technical assistance, and professional development programs.

Further amends the section to clarify that students who have income that qualifies them for eligibility for the Pell Grant are eligible to receive assistance under this section, and to direct the Secretary to publicize the availability of grants under this section, including in appropriate periodicals and to appropriate educational organizations. Also, amends the section to extend the authorization to 2013.

Further provides that any third party servicer shall (1) only use the information in a manner directly related to the default prevention work the servicer is performing on behalf of an institution, (2) not sell the information to other entities, (3) not share the information with, or transfer the information to, entities other than the borrower or the institution of higher education on whose behalf the third party servicer is working, and, (4) be subject to any regulations established by the Secretary pursuant to section 432 concerning the misuse of such information, including any penalties for misuse.

Sec. 424. Consolidation loan disclosure

Section 424 requires lenders to disclose in a clear and conspicuous manner to borrowers who seek to consolidate Federal Perkins loans made under part E of title IV that once a borrower adds the borrower's Federal Perkins loan to a consolidation loan, the borrower will lose all interest-free periods that would have been available for such loan and will no longer be eligible for cancellation of part or all of a Federal Perkins loan under section 465. The section also requires lenders to disclose in detail the occupations listed in section 465 for which the borrower will lose eligibility for Federal Perkins loan cancellation.

Sec. 425. Loan forgiveness for service in areas of national need

Rewrites section 428K to amend the Loan Forgiveness for Child Care Providers program. Renames the program the Loan Forgiveness for Service in Areas of National Need program. Defines the term “civil legal assistance attorney” to mean an attorney who is a full-time employee of a nonprofit organization that provides legal assistance with respect to civil matters to low-income individuals without a fee, and as an employee provides civil legal assistance on a full-time basis, and is continually licensed to practice law. Defines the term “student loan” as a loan made, insured, or guaranteed under part B, D, or E of title IV, as well as a loan made under section 428C or 455(g), to the extent that such loan was used to repay a (1) Federal Direct Stafford Loan, Federal Direct Unsubsidized Stafford Loan, or Federal Direct PLUS loan, (2) a loan 122 made under section 428, 428B, or 428H, or (3) a loan made under part E. Section 428 amends Part B of title IV by inserting a new section 433A “Delinquency Prevention, Default Aversion, and Consumer Education Information Programs.” Under the section, guaranty agencies are required to develop specific programs designed to prevent delinquencies and avert defaults with respect to loans insured by the agency. In particular, guaranty agencies shall develop and make available high quality educational programs and materials to provide training for students and families in budgeting and financial management, including debt management and other aspects of financial literacy, such as the cost of using high interest loans to

pay for postsecondary education. Such programs and materials are required to address budgeting and financial management relating to student loans, and be made available to students and families in a form and language that is understandable, before, during, and after the students' enrollment. The section also provides that nothing in the section shall be construed to prohibit a guaranty agency from using existing activities, programs, and materials in meeting the requirements of the section.

The section further requires the Secretary to collect and report cohort default rates and life of cohort default rates for each category of institution, including four-year public institutions, four-year private institutions, two-year public institutions, two-year private institutions, four-year proprietary institutions, two-year proprietary institutions, and less than two-year proprietary institutions. Further, the section defines life of cohort default rate, for any fiscal year in which one or more current and former students at an institution enter repayment on loans received for attendance at the institution, the percentage of those current and former students who enter repayment on such loans (or on the portion of a consolidation loan that is used to repay any such loan) received for attendance at the institution in that fiscal year who default before the end of each succeeding fiscal year.

Under this section, priority is given to applications that support activities related to early childhood education and in preparation for and during emergencies and natural disasters.

Sec. 443. Work Colleges

Section 443 emphasizes the importance of service in work-colleges. It amends the work-colleges section throughout to change comprehensive work-learning programs to comprehensive work-learning-service programs. Comprehensive work-learning-service programs are defined as student work-learning-service programs that, among other requirements, are an integral and stated part of the institution's educational philosophy and program; require participation of all resident students for enrollment and graduation; include learning objectives, evaluation, and a record of work performance as part of the student's college record; and includes consequences for non-performance or failure in the work-learning-service program similar to the consequences for failure in the regular academic program.

This section also adds to authorized activities under this section the support of existing and new model student volunteer community service projects associated with local institutions of higher education. It also limits the definition of work-colleges to four-year, degree-granting institutions. Changes the date of the University's requirement to report the differences in disposition of individuals from minority backgrounds with those students from non-minority backgrounds from the date of graduation or completion of their studies to one year after graduation or completion. Limits the requirements of the report as compared to current law.

PART B—INDIAN EDUCATION

SUBPART 1—TRIBAL COLLEGES AND UNIVERSITIES

Sec. 921. Reauthorization of the Tribally Controlled College or University Assistance Act of 1978

This section defines “National Indian Organization” to mean an organization that is nationally based, represents a substantial Indian constituency and has expertise in the fields of tribally controlled colleges and university and Indian higher education. “Indian Student” means a student who is a member of an Indian tribe or a biological child of a member of an Indian tribe, living or deceased.

In a continuing education program, eligible credits shall be determined as one credit for every ten contact hours in a quarter system, or fifteen contact hours in the case of an institution with a semester system. These hours must be completed in an organized continuing education experience under responsible sponsorship, capable direction and qualified instruction, as described by the International Association for Continuing Education and Training. No more than 10 percent of the Indian student count of a tribally controlled college or university shall receive such credits. The section also strikes the prohibition on credit hours earned by an Indian student not making satisfactory progress toward a degree or certificate being taken into account.

To be eligible for grant assistance under this Act, a tribally controlled college or university must be accredited by a nationally recognized accrediting agency or association, or must be making reasonable progress toward accreditation according to such an agency or association.

The Secretary shall require that contracts for technical assistance be awarded to an organization designated by the tribally controlled college or university to be assisted. The Secretary shall grant to each tribally controlled college or university with an approved application an amount equal to the product of multiplying the Indian student count at such college or university during the academic year preceding the academic year and \$8,000, with the latter adjusted annually for inflation. For technical assistance contracts under this section, authorizes \$3.2 million for fiscal year 2008 and five succeeding years. Authorize such sums as shall be necessary for fiscal year 2008 and the succeeding five years for grants to tribally controlled colleges or universities and the renovation program and construction of new facilities under this title. Changes authorized funding level of grants for the establishment and support of tribal economic development and education institutes from \$2,000,000 per fiscal year to such sums as may be nec-

essary. Authorizes such funding for fiscal year 2008 and the succeeding five years.

Section 921(j) adds at the end of the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801, et seq.) by adding at the end a new subtitle V on Tribally Controlled Postsecondary Career and Technical Institutions. The term “tribally controlled postsecondary career and technical institution” aligns with the definition of the term in the Carl D. Perkins Career and Technical Education Act. Subject to the availability of appropriations, for fiscal year 2008 and each fiscal year thereafter, the Secretary shall provide funding to the United Tribes Technical College and the Navajo Technical College to operate postsecondary career and technical programs for Indian students, so long as the Secretary determines that those institutions meet the definition of a “tribally controlled postsecondary career and technical institution” defined herein. Provides that this funding shall be provided in a lump sum payment for each applicable fiscal year. Provides that, for fiscal year 2009 and each fiscal year thereafter, the Secretary shall distribute an amount equal to the greater of either the appropriated amount for fiscal year 2006 or the appropriated amount for fiscal year 2008. If, for any fiscal year, the authorized amount exceeds the higher of the amount of fiscal year 2006 or fiscal year 2008, the Secretary shall distribute a portion of the excess amount to each institution according to each school’s proportion of the aggregate Indian student count of the two institutions the prior academic year. Requires that funds made available under this title be subject to the Indian Self-Determination and Education Assistance Act. A selected institution may elect to receive funds in accordance with an agreement between the institution and the Secretary if the agreement exists on the date of enactment of the College Opportunity and Affordability Act of 2007. Eligibility for, or receipt of, assistance under this title shall not preclude the eligibility of the institution to receive federal financial assistance under any program of the Higher Education Act, any program under the Carl D. Perkins Career and Technical Education Act of 2006, or any other program that provides a benefit for institutions of higher education, community colleges or postsecondary educational institutions. Authorizes to be appropriated for this new subsection such sums as may be necessary for fiscal year 2008 and five succeeding fiscal years. This is the final portion of the new Subsection V of the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801, et seq.). Subject to the availability of appropriations, requires the Secretary to make grants to provide support for the education and training of Indian students to institutions that are not receiving federal assistance as of the date on which the grant is provided under title I of the Tribally Controlled College or University Assistance Act of 1978 or the Navajo Community College Act. The short title of the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801 note; P.L. 95-471) is changed to the “Tribally Controlled Colleges and Universities Assistance Act of 1978,” and clarifies that any reference in law to the previous short title shall be considered a reference to the amended Act.

XI. STATEMENT OF OVERSIGHT FINDINGS AND RECOMMENDATIONS
OF THE COMMITTEE

In compliance with clause 3(c)(1) of rule XIII and clause 2(b)(1) of rule X of the Rules of the House of Representatives, the Committee's oversight findings and recommendations are reflected in the body of this report.

XII. NEW BUDGET AUTHORITY AND CBO COST ESTIMATE

With respect to the requirements of clause 3(c)(2) of rule XIII of the Rules of the House of Representatives and section 308(a) of the Congressional Budget Act of 1974 and with respect to requirements of clause 3(c)(3) of rule XIII of the Rules of the House of Representatives and section 402 of the Congressional Budget Act of 1974, the Committee has received the following estimate for H.R. 4137 from the Director of the Congressional Budget Office:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, December 18, 2007.

Hon. GEORGE MILLER,
*Chairman, Committee on Education and Labor,
House of Representatives, Washington, DC.*

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the enclosed cost estimate for H.R. 4137, the Higher Education Amendments of 2007.

If you wish further details on this estimate, we will be pleased to provide them. The CBO staff contact is Jessica Sherry.

Sincerely,

ROBERT A. SUNSHINE
(For Peter R. Orszag, Director).

Enclosure.

H.R. 4137—Higher Education Amendments of 2007

Summary: H.R. 4137 would reauthorize and amend most postsecondary education programs under the Higher Education Act of 1965 through 2013. Under the General Education Provisions Act, those authorizations would automatically be extended through 2014. The bill also would create several new student and institutional aid programs and amend several other acts.

CBO estimates that enacting the bill would increase direct spending by \$75 million in 2008 and decrease direct spending by \$27 million over the 2008–2017 period. For discretionary programs, CBO estimates that implementing H.R. 4137 would cost \$97.4 billion over the 2008–2012 period, assuming appropriation of the necessary amounts.

H.R. 4137 contains several intergovernmental and private-sector mandates as defined in the Unfunded Mandates Reform Act (UMRA). CBO estimates that the aggregate costs to state, local, and tribal governments and private entities to comply with those mandates would not exceed the thresholds established in UMRA (\$66 million in 2007 and \$131 million in 2007, respectively, adjusted annually for inflation).

Estimated cost to the Federal Government: The estimated budgetary impact of H.R. 4137 is shown in Table 1. The costs of this

legislation fall within budget function 500 (education, training, employment, and social services).

Note: Components may not sum to totals because of rounding.
¹In addition, H.R. 4137 would reduce direct spending by \$3 million per year over the 2013–2017 period and by a total of \$27 million over the 2008–2017 period. H.R. 4137 also would affect revenues by a negligible amount in every year and over the 2008–2017 period.

Basis of estimate: For the purposes of this estimate, CBO assumes that H.R. 4137 will be enacted in fiscal year 2008 and that sufficient funds will be appropriated for each program. For current programs that would remain unchanged, CBO assumes continued funding at their 2007 levels adjusted for inflation. The estimate does not address the changes to the student loan programs and to the Pell Grant Program included in the College Cost Reduction and Access Act (CCRAA, Public Law 110–84), which was signed into law on September 27, 2007.

Direct spending and revenues

CBO estimates that enacting H.R. 4137 would increase direct spending by \$75 million in 2008 and decrease it by \$27 million over the 2008–2017 period. Most of those effects stem from changes affecting eligibility for federal student loan programs and the Academic Competitiveness and SMART Grant programs.

Federal Student Loan Programs. H.R. 4137 would make several changes to the calculations of needs analysis and the rules governing the eligibility of students and institutions for the federal student loan programs. Under current law, the “cohort default rate” is defined as the percentage of a school’s borrowers who enter repayment during one fiscal year and then default prior to the end of the next fiscal year. H.R. 4137 would change the definition of the cohort default rate by also counting defaults for an additional fiscal year, which would raise cohort default rates for many institutions. Because schools with a cohort default rate over a specified level are ineligible to participate in Title IV student aid programs, CBO projects that the change to the definition of the cohort default rate would reduce the number of schools eligible to participate in the student loan programs. Accordingly, CBO estimates this reduction in loan volume would reduce direct spending by \$12 million over the 2008–2012 period and by \$27 million over the 2008–2017 period.

Academic Competitiveness and SMART Grant Programs. For both the Academic Competitiveness Grant and SMART Grant Programs, the bill would adjust how a student’s academic year is determined and expand eligibility to part-time students. Currently, only full-time students are eligible for grants. Appropriations for those programs are capped at specified amounts and the Secretary of Education has the authority to reduce award levels to stay with-

in the appropriation. CBO estimates those changes would increase outlays by \$75 million in fiscal year 2008 and would reduce outlays by the same amount in future years.

Private Student Loan Transparency and Improvement. Title X would require the Board of Governors of the Federal Reserve and other financial regulatory agencies to issue regulations and supervise compliance with the new lending standards and procedures in the bill. Based on information from the Federal Reserve and other agencies, those regulatory activities would have no significant effect on their workload or budgets. The budgetary effects on the Federal Reserve are recorded as changes in revenues (governmental receipts). Costs incurred by the other financial regulatory agencies affect direct spending, but most of those expenses are offset by fees or income from insurance premiums. Thus, CBO estimates that enacting this bill would reduce revenues by less than \$500,000 in every year and over the 2008–2017 period, and would have a negligible net effect on direct spending.

The National Center for Learning Science and Technology Trust Fund. The bill also would create the National Center for Learning Science and Technology to support basic and applied research. While federal funding for the program would be subject to appropriations (see the discussion below under the heading “Spending Subject to Appropriation”), the bill would establish a trust fund that could accept gifts from nonfederal sources and spend any proceeds. CBO estimates that this trust fund would have a negligible affect on revenues and direct spending.

Spending subject to appropriation

The bill would reauthorize and amend many of the discretionary programs previously authorized by the Higher Education Act of 1965 and would authorize a number of new discretionary programs. In total, CBO estimates that implementing this legislation would increase discretionary outlays by \$97.4 billion over the 2008–2012 period, assuming the appropriation of the necessary amounts, as shown in Table 2.

Title I. The title would reauthorize funding for a grant program designed to prevent alcohol and drug abuse and would require the Department of Education to perform several studies and prepare reports. CBO estimates that funding those activities would increase outlays by \$16 million over the 2008–2012 period.

Title II. CBO estimates that reauthorizing funding for programs in title II would result in outlays of \$1.8 billion over the 2008–2012 period, assuming appropriation of the necessary amounts.

Title II would authorize the appropriation of \$400 million for fiscal year 2009 and such sums as may be necessary for 2010 and 2011 for two programs that provide grants to aid in the recruitment and professional development of teachers. CBO estimates that discretionary costs for those programs would increase by \$1.1 billion over the 2008–2012 period, assuming annual adjustments for inflation.

In addition, title II would authorize the appropriation of such sums as may be necessary for 2009 and each of the next four years to carry out a new program under which grants would be provided to enhance teacher education. Based on data for similar comparative grant awards, CBO estimates that about 600 eligible entities

would receive grants under this program in 2009. Accordingly, CBO estimates that implementing the Enhancing Teacher Education program would increase discretionary costs by \$760 million over the 2008–2012 period.

Title III. This title would reauthorize and amend programs that provide aid to institutions and would create several new programs for the same purpose. Those programs are designed to give financial assistance to institutions of higher education that serve a high percentage of minority and low-income students and to help those institutions develop and improve the quality of education they offer such students. H.R. 4137 would authorize the appropriation of \$767 million in 2009 and such sums as may be necessary for 2010 through 2013 for those programs. Based on historical spending patterns and adjusting for inflation, CBO estimates that implementing title III would result in increased outlays of \$2.1 billion over the 2008–2012 period, assuming the appropriation of the estimated amounts.

Note: Components may not sum to totals because of rounding.

Title IV. CBO estimates that implementing title IV would increase discretionary costs by \$88.5 billion over the 2008–2012 period for student assistance programs.

Pell Grant Program. Title IV would make changes to the Pell Grant Program, which provides grants to low-income under-

graduate students. The CCRAA extended the underlying authorization for Pell grants through fiscal year 2017 but did not establish a maximum award level for any year. (The maximum award level of \$4,310 was set most recently in the appropriation for 2007.) H.R. 4137 would raise the maximum award level from \$4,310 to \$9,000 for academic years 2009–2010 through 2013–2014. CBO estimates those changes would increase discretionary costs for Pell grants by \$67.7 billion over the 2009–2012 period.

The title also would allow students who are enrolled year-round at two-year or four-year institutions to receive more than one Pell grant for that year and would prohibit grants to individuals that meet specific criteria. As discussed above under the heading “Direct Spending,” the bill would alter the needs analysis for students and definitions and rules relating to institutional eligibility for financial aid. CBO estimates that those changes would increase discretionary costs in the Pell Grant Program by approximately \$200 million over the 2008–2012 period.

Perkins Loan Program. The title would require the department to cancel an increased number of loans for students who meet specific criteria defined in the bill and who had received Perkins loans while enrolled in a institution of higher education. The bill also would authorize the Secretary to make increased contributions to student loan revolving funds held by colleges and universities for fiscal year 2009 and for each of the next five years, which would increase the amount of funds that could be loaned out. When those loans are cancelled, current law requires the department to reimburse the schools that make those loans for the cost of the loan cancellation. (These costs are treated as discretionary costs in the budget.) CBO estimates that this provision would increase discretionary costs by \$735 million over the 2009–2012 period.

Loan Forgiveness. Title IV would create a new program to forgive loans to borrowers that work in a variety of public-sector jobs. For each year of full-time employment in those jobs, a borrower could have up to \$2,000 forgiven, up to a lifetime maximum of \$10,000. The bill would authorize the appropriation of such sums as may be necessary for each of fiscal years 2009 through 2013 for such loan forgiveness. CBO estimates that this provision would increase discretionary costs by \$7.8 billion over the 2008–2012 period.

Other Programs. Title IV would authorize the appropriation of about \$4 billion for fiscal year 2009 and such sums as may be necessary for fiscal years 2010 through 2013 for many student assistance programs. This title would further authorize the appropriation of such sums as may be necessary for 2009 through 2013 for all other student assistance programs under title IV. Based on historical spending patterns, CBO estimates that implementing those programs would increase discretionary costs by \$12.8 billion over the 2009–2012 period.

Title V. The bill would authorize the appropriation of \$300 million in 2009 and such sums as may be necessary for each of the next four years to operate programs that provide grants to institutions to help expand and improve educational opportunities for Hispanic Americans. Assuming appropriation of the estimated amounts, CBO estimates that implementing those programs would

cost \$821 million over the 2008–2012 period if adjusted annually for inflation.

Title VI. The bill would authorize the appropriation of \$108 million in 2009 and such sums as may be necessary for each of the next four years to operate existing programs related to international education and foreign language studies. Additionally, the bill would authorize the appropriation of such sums as may be necessary in 2009 and for each of the next four years to implement new programs detailed in the title. Based on similar programs and current spending patterns, CBO estimates that implementing title VI would cost \$328 million over the 2008–2012 period, assuming the appropriation of the estimated amounts.

Title VII. In total, CBO estimates that providing assistance under title VII would cost \$971 million over the 2008–2012 period, assuming appropriation of the estimated amounts.

Title VII would authorize the appropriation of \$180 million in 2009 and such sums as may be necessary for each of the next four years to support a variety of graduate and postsecondary improvement programs. CBO estimates that implementing those programs would increase discretionary costs by \$312 million over the 2009–2012 period.

Additionally, H.R. 4137 would establish the Patsy T. Mink Fellowship Program and would authorize the annual appropriation of such sums as may be necessary for 2009 through 2013. Under this program, institutions that receive grants would have to make at least 15 fellowship awards consisting of a stipend equal to the level of support provided to the graduate fellows at the National Science Foundation (NSF). Based on the number of institutions that grant advanced degrees in the United States and information from the NSF, CBO estimates that implementing this program would increase discretionary costs by \$358 million over the 2008–2012 period.

Title VIII. H.R. 4137 would add title VIII to the Higher Education Act of 1965 and would authorize the department to establish several new programs to support institutions of higher education. Overall, CBO estimates that it would cost \$719 million over the 2008–2012 period to carry out title VIII, assuming appropriation of the estimated amounts. Major provisions of the title would:

- Authorize grants to improve remedial education. Based on data from the National Center for Education Statistics concerning the level of participation in remedial education opportunities at institutions of higher education, CBO estimates implementing this would increase discretionary costs by \$140 million over the 2008–2012 period.
- Authorize the appropriation of \$40 million for 2009 and such sums as may be necessary for each of the next four years to give grants to institutions to establish degrees that focus on computer modeling and simulation. Based on historical spending patterns, CBO estimates that implementing that program would increase discretionary costs by \$109 million over the 2008–2012 period.
- Create a competitive grant program designed to expand opportunities for worksite learning at institutions of higher education. Based on information from industry groups, CBO estimates that about 100 partnerships might receive an average grant of \$300,000 in 2009. CBO estimates that providing grants to these partnerships

would increase discretionary costs by \$82 million over the 2008–2012 period.

- Create a competitive grant program to help institutions develop emergency communications systems. Based on information from the Department of Education about similar programs, CBO estimates that operating this grant program would increase discretionary costs by \$68 million over the 2008–2012 period.

Title IX. CBO estimates that implementing title IX would result in outlays of about \$2.1 billion over the 2008–2012 period, assuming the appropriation of the estimated amounts.

Specifically the bill would:

- Create a program to assist eligible institutions in acquiring digital and wireless networking technologies. The bill would authorize the appropriation of \$250 million in 2008 and such sums as may be necessary to run the program in each year 2009 through 2012. CBO estimates that implementing this program would increase discretionary costs by \$946 million over the 2008–2012 period, assuming annual adjustments for inflation.

- Amend laws related to providing postsecondary education to Native Americans. The bill would allow biological children of enrolled tribe members to be officially counted as Native Americans, raise the authorized grant level per individual from \$6,000 to \$8,000 in 2008, and would adjust those levels for inflation. Accounting for those and other changes, CBO estimates that implementing those amendments would increase discretionary costs by \$434 million over the 2008–2012 period.

- Reauthorize support for Gallaudet University and the Laurent Clerc National Deaf Education Center. Based on the amount provided to Gallaudet University in 2007 (\$107 million) and assuming annual adjustments for inflation, CBO estimates that providing this support would increase discretionary costs by \$341 million over the 2008–2012 period.

- Reauthorize programs run by the National Technical Institute for the Deaf. Based on the amount provided to the institute in 2007 (\$57 million) and assuming annual adjustments for inflation, CBO estimates that this provision would increase discretionary costs by \$178 million over the 2008–2012 period.

- Expand a program under which grants are provided to states for the training of incarcerated individuals. The bill would authorize the appropriation of such sums as may be necessary for fiscal years 2008 through 2013 for this program. Based on data from the Bureau of Justice Statistics, CBO estimates that the change in the age limitation for this program would increase the number of people eligible for services under this program by about 80 percent. CBO estimates that implementing this program would increase discretionary costs by \$120 million over the 2008–2012 period.

- Create a new program that would allow the Department of Justice to forgive student loans for individuals employed as prosecutors and public defenders. The bill would authorize the appropriation of \$25 million for each of the fiscal years 2008 through 2013 for such loan forgiveness. Based on historical spending patterns, CBO estimates that this loan repayment program would cost \$83 million over the 2008–2012 period, assuming the appropriation of the authorized amounts.

Title X. This title would direct the Treasury Department and the Government Accountability Office to prepare reports on issues related to private-sector financing of post-secondary education. Based on information from the affected agencies, CBO estimates that preparing these reports would cost approximately \$2 million over the 2008–2009 period, assuming the availability of appropriated funds.

Intergovernmental and private-sector impact: H.R. 4137 contains several intergovernmental and private-sector mandates as defined in UMRA. CBO estimates that the aggregate costs to state, local, and tribal governments and private entities to comply with those mandates would not exceed the thresholds established in UMRA (\$66 million in 2007 and \$131 million in 2007, respectively, adjusted annually for inflation).

CBO estimates that several of the mandates would impose modest costs on public and private entities. Specifically, the bill would:

- Require institutions of higher education that increase tuition by more than the average across all institutions to create a quality-efficiency task force to review the operations of the institution and to report on the factors that lead to the increase. Although as many as 1,500 institutions may be required to produce such reports, CBO expects the cost to produce such reports to be modest.

- Require institutions of higher education to provide textbook information as part of their class schedules. Most schools currently post those schedules online and have mechanisms for collecting course information from professors. This mandate would require small modifications to those systems.

- Prohibit public and private colleges and universities from receiving gifts from private lenders in exchange for any advantage or consideration provided to those lenders. Those schools also would be prohibited from engaging in revenue-sharing agreements and co-branding with private lenders. CBO estimates the direct cost to comply with that mandate would be small because the prohibited practices are rare.

- Increase disclosure requirements for public and private lenders who make educational loans not backed by the federal government. The bill would require lenders to give applicants a certain period of time to accept a loan after approval and to change their minds after accepting. The direct cost of initially complying with these mandates would include the cost to a small number of lenders of developing and reviewing new disclosure information for advertising and modifying existing disclosure forms. According to industry sources, the major ongoing cost would be the cost of fielding questions about the new and somewhat different disclosure forms.

- Require publishers of college textbooks, including public university presses, to provide certain information to those individuals that make decisions on which texts are used in classes. This information is readily available to publishers and CBO estimates the cost of disseminating it would be modest.

- Require those publishers to make supplemental materials normally sold with textbooks available for purchase separately. According to industry sources, the components of textbooks packaged with other materials are generally available for separate purchase. Furthermore, the added packaging and administrative costs would be modest.

The bill contains several additional intergovernmental and private-sector mandates. CBO expects, however, that these requirements would not impose significant costs on public or private entities. Specifically, the bill would:

- Require institutions of higher education that have students who obtain private educational loans to develop and publish a code of conduct that prohibits a conflict of interest with respect to educational loans.

- Require institutions that have lost recognition by the Secretary of Education as a legitimate institution for immigration and federal employment hiring purposes to remove an indication on its web site that it has that recognition.

- Require institutions to submit a report to the Secretary if they require servicemembers who had to withdraw from school because they were called to active duty to reapply for admission before returning to classes.

- Preempt certain state contract laws as they apply to Perkins educational loans. Some states allow loan repayment agreements and other contracts to be broken if the borrower was a minor when the contract was signed. If this bill is enacted, those state laws would no longer apply to contracts for Perkins loans. The provision would benefit public and private colleges and universities that are seeking repayment on loans that could otherwise be disputed under state law.

The bill also would authorize funding for student aid and higher education programs and increase requirements for public colleges and universities that participate in voluntary federal programs. Any costs to those institutions or to state, local, or tribal governments would result from complying with conditions of federal assistance.

Comparison to previous estimates: On November 14, 2007, CBO transmitted a cost estimate for S. 1642, the Higher Education Amendments of 2007, as ordered reported by the Senate Committee on Health, Education, Labor, and Pensions on July 10, 2007. Differences between that estimate and this estimate reflect differences in the legislation.

Specifically, CBO estimated that implementing S. 1642 would increase discretionary costs by \$53.2 billion over the 2008–2012 period, and that implementing H.R. 4137 would increase discretionary outlays by \$97.4 billion over the same period. Most of the difference is due to changes in the Pell Grant program and a new loan forgiveness program under title IV.

On October 4, 2007, CBO transmitted a cost estimate for the Private Student Loan Transparency and Improvement Act as ordered reported by the Senate Committee on Banking, Housing, and Urban Affairs on August 1, 2007. Both versions of the legislation are similar and the estimated costs are identical.

Estimate prepared by: Federal Costs: Discretionary Costs—Jessica Sherry; Mandatory Costs—Justin Humphrey; Revenues—Barbara Edwards. Impact on State, Local, and Tribal Governments: Melissa Merrell. Impact on the Private Sector: Nabeel Alsalam.

Estimate approved by: Keith Fontenot, Deputy Assistant Director for Health and Human Resources, Budget Analysis Division.

XIII. STATEMENT OF GENERAL PERFORMANCE GOALS AND OBJECTIVES

In accordance with clause 3(c) of rule XIII of the Rules of the House of Representatives, the goal of H.R. 4137 is to make college more affordable and accessible. The Committee expects the Department of Education and other relevant departments to comply with H.R. 4137 and implement the changes to the law in accordance with these stated goals.

XIV. CONSTITUTIONAL AUTHORITY STATEMENT

Under clause 3(d)(1) of rule XIII of the Rules of the House of Representatives, the Committee must include a statement citing the specific powers granted to Congress in the Constitution to enact the law proposed by H.R. 4137. The Committee believes that the amendments made by this bill are within Congress' authority under Article I, section 8, clause 18 of the U.S. Constitution.

XV. COMMITTEE ESTIMATE

Clause 3(d)(2) of rule XIII of the Rules of the House of Representatives requires an estimate and a comparison of the costs that would be incurred in carrying out H.R. 4137. However, clause 3(d)(3)(B) of that rule provides that this requirement does not apply when the Committee has included in its report a timely submitted cost estimate of the bill prepared by the Director of the Congressional Budget Office under section 402 of the Congressional Budget Act.

CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED

In compliance with clause 3(e) of rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

[Subpart 8—Learning Anytime Anywhere Partnerships

[SEC. 420D. FINDINGS.

[(2) Individuals, including individuals seeking basic or technical skills or their first postsecondary experience, individuals with disabilities, dislocated workers, individuals making the transition from welfare-to-work, and individuals who are limited by time and place constraints can benefit from nontraditional, noncampus-based postsecondary education opportunities and appropriate support services.

[(3) The need for high-quality, nontraditional, technology-based education opportunities is great, as is the need for skill competency credentials and other measures of educational progress and attainment that are valid and widely accepted, but neither need is likely to be adequately addressed by the uncoordinated efforts of agencies and institutions acting independently and without assistance.

[(4) Partnerships, consisting of institutions of higher education, community organizations, or other public or private agencies or organizations, can coordinate and combine institutional resources—

The Comptroller General and Secretary, in consultation with the study group, shall design and conduct a study to identify and evaluate means of establishing a market mechanism for the delivery of loans made pursuant to such title IV.

[(b) DESIGN OF STUDY.—The study required under this section shall identify not fewer than 3 different market mechanisms for use in determining lender return on student loans while continuing to meet the other objectives of the programs under parts B and D of such title IV, including the provision of loans to all eligible students. Consideration may be given to the use of auctions and to the feasibility of incorporating income-contingent repayment options into the student loan system and requiring borrowers to repay through income tax withholding.

[(c) EVALUATION OF MARKET MECHANISMS.—The mechanisms identified under subsection (b) shall be evaluated in terms of the following areas:

[(1) The cost or savings of loans to or for borrowers, including parent borrowers.

[(2) The cost or savings of the mechanism to the Federal Government.

[(3) The cost, effect, and distribution of Federal subsidies to or for participants in the program.

[(4) The ability of the mechanism to accommodate the potential distribution of subsidies to students through an income-contingent repayment option.

[(5) The effect on the simplicity of the program, including the effect of the plan on the regulatory burden on students, institutions, lenders, and other program participants.

[(6) The effect on investment in human capital and resources, loan servicing capability, and the quality of service to the borrower.

[(7) The effect on the diversity of lenders, including community-based lenders, originating and secondary market lenders.

[(8) The effect on program integrity.

[(9) The degree to which the mechanism will provide market incentives to encourage continuous improvement in the delivery and servicing of loans.

[(10) The availability of loans to students by region, income level, and by categories of institutions.

[(11) The proposed Federal and State role in the operation of the mechanism.

[(12) A description of how the mechanism will be administered and operated.

[(1) The historical liquidity of the market for each, and a historical comparison of the spread between: (A) the 30-day and 90-day commercial paper rate, respectively, and the 91-day Treasury bill rate; and (B) the spread between the LIBOR and the 91-day Treasury bill rate.

[(2) The historical volatility of the rates and projections of future volatility.

[(3) Recent changes in the liquidity of the market for each such instrument in a balanced Federal budget environment and a low-interest rate environment, and projections of future liquidity assuming the Federal budget remains in balance.

[(4) The cost or savings to lenders with small, medium, and large student loan portfolios of basing lender yield on either the 30-day or 90-day commercial paper rate or the LIBOR while continuing to base the borrower rate on the 91-day

Treasury bill, and the effect of such change on the diversity of lenders participating in the program.

[(5) The cost or savings to the Federal Government of basing lender yield on either the 30-day or 90-day commercial paper rate or the LIBOR while continuing to base the borrower rate on the 91-day Treasury bill.

[(1) the local community, when properly organized and challenged, is one of the best sources of academic support, motivation toward achievement, and financial resources for aspiring postsecondary students;

[(2) local communities, working to complement or augment services currently offered by area schools and colleges, can raise the educational expectations and increase the rate of postsecondary attendance of their youth by forming locally based organizations that provide both academic support (including guidance, counseling, mentoring, tutoring, encouragement, and recognition) and tangible, locally raised, effectively targeted, publicly recognized, financial assistance;

[(3) proven methods of stimulating these community efforts can be promoted through Federal support for the establishment of regional, State, or community program centers to organize and challenge community efforts to develop educational incentives and support for local students; and

[(4) using Federal funds to leverage private contributions to help students from low-income families attain educational and career goals is an efficient and effective investment of scarce taxpayer-provided resources.

[SEC. 821. GRANTS TO STATES FOR WORKPLACE AND COMMUNITY TRANSITION TRAINING FOR INCARCERATED YOUTH OFFENDERS.

[(a) FINDINGS.—Congress makes the following findings:

[(1) Over 150,000 youth offenders age 21 and younger are incarcerated in the Nation's jails, juvenile facilities, and prisons.

[(2) Most youth offenders who are incarcerated have been sentenced as first-time adult felons.

[(3) Approximately 75 percent of youth offenders are high school dropouts who lack basic literacy and life skills, have little or no job experience, and lack marketable skills.

[(4) The average incarcerated youth has attended school only through grade 10.

[(5) Most of these youths can be diverted from a life of crime into productive citizenship with available educational, vocational, work skills, and related service programs.

[(6) If not involved with educational programs while incarcerated, almost all of these youths will return to a life of crime upon release.

[(7) The average length of sentence for a youth offender is about 3 years. Time spent in prison provides a unique opportunity for education and training.

[(8) Even with quality education and training provided during incarceration, a period of intense supervision, support, and counseling is needed upon release to ensure effective reintegration of youth offenders into society.

[(9) Research consistently shows that the vast majority of incarcerated youths will not return to the public schools to complete their education.

[(10) There is a need for alternative educational opportunities during incarceration and after release.

[(b) DEFINITION.—For purposes of this part, the term “youth offender” means a male or female offender under the age of 25, who is incarcerated in a State prison, including a prerelease facility.

[(c) GRANT PROGRAM.—The Secretary of Education (in this section referred to as the “Secretary”) shall establish a program in accordance with this section to provide grants to the State correctional education agencies in the States, from allocations for the States under subsection (i), to assist and encourage incarcerated youths to acquire functional literacy, life, and job skills, through the pursuit of a postsecondary education certificate, or an associate of arts or bachelor’s degree while in prison, and employment counseling and other related services which start during incarceration and continue through prerelease and while on parole.

[(d) APPLICATION.—To be eligible for a grant under this section, a State correctional education agency shall submit to the Secretary a proposal for a youth offender program that—

[(1) identifies the scope of the problem, including the number of incarcerated youths in need of postsecondary education and vocational training;

[(2) lists the accredited public or private educational institution or institutions that will provide postsecondary educational services;

[(3) lists the cooperating agencies, public and private, or businesses that will provide related services, such as counseling in the areas of career development, substance abuse, health, and parenting skills;

[(4) describes the evaluation methods and performance measures that the State correctional education agency will employ, which methods and measures—

[(A) shall be appropriate to meet the goals and objectives of the proposal; and

[(B) shall include measures of—

[(i) program completion;

[(ii) student academic and vocational skill attainment;

[(iii) success in job placement and retention; and

[(iv) recidivism;

[(5) describes how the proposed programs are to be integrated with existing State correctional education programs (such as adult education, graduate education degree programs, and vocational training) and State industry programs;

[(6) addresses the educational needs of youth offenders who are in alternative programs (such as boot camps); and

[(7) describes how students will be selected so that only youth offenders eligible under subsection (f) will be enrolled in postsecondary programs.

[(e) PROGRAM REQUIREMENTS.—Each State correctional education agency receiving a grant under this section shall—

[(1) integrate activities carried out under the grant with the objectives and activities of the school-to-work programs of such State, including—

[(A) work experience or apprenticeship programs;

[(B) transitional worksite job training for vocational education students that is related to the occupational goals of such students and closely linked to classroom and laboratory instruction;

[(C) placement services in occupations that the students are preparing to enter;

[(D) employment-based learning programs; and

[(E) programs that address State and local labor shortages;

[(2) annually report to the Secretary and the Attorney General on the results of the evaluations conducted using the methods and performance measures contained in the proposal; and

[(3) provide to each State for each student eligible under subsection (f) not more than \$1,500 annually for tuition, books, and essential materials, and not more than \$300 annually for related services such as career development, substance abuse counseling, parenting skills training, and health education, for each eligible incarcerated youth.

[(f) STUDENT ELIGIBILITY.—A youth offender shall be eligible for participation in a program receiving a grant under this section if the youth offender—

[(1) is eligible to be released within 5 years (including a youth offender who is eligible for parole within such time); and

[(2) is 25 years of age or younger.

[(g) LENGTH OF PARTICIPATION.—A State correctional education agency receiving a grant under this section shall provide educational and related services to each participating youth offender for a period not to exceed 5 years, 1 year of which may be devoted to study in a graduate education degree program or to remedial education services for students who have obtained a secondary school diploma or its recognized equivalent. Educational and related services shall start during the period of incarceration in prison or prerelease and may continue during the period of parole.

[(h) EDUCATION DELIVERY SYSTEMS.—State correctional education agencies and cooperating institutions shall, to the extent practicable, use high-tech applications in developing programs to meet the requirements and goals of this section.

In determining the amount of award in any class action, the court shall consider, among other relevant factors, the amount of any actual damages awarded, the frequency and persistence of failures of compliance by the creditor, the resources of the creditor, the number of persons adversely affected, and the extent to which the creditor's failure of compliance was intentional. In connection with the disclosures referred to in subsection (a) and (b) of section 127, a creditor shall have a liability determined under paragraph (2) only for failing to comply with the requirements of section 125, section 127(a), or of paragraph (4), (5), (6), (7), (8), (9), or (10) of section 127(b) or for failing to comply with disclosure requirements under State law for any term or item which the Board has determined to be substantially the same in meaning under section 111(a)(2) as any of the terms or items referred to in section 127(a) or any of those paragraphs of section 127(b). This subsection does not bar a person from asserting a violation of this title in an action to collect the debt which was brought more than one year from the date of the occurrence of the violation as a matter of defense by recoupment or set-off in such action, except as otherwise provided

by State law. An action to enforce a violation of section 129 may also be brought by the appropriate State attorney general in any appropriate United States district court, or any other court of competent jurisdiction, not later than 3 years after the date on which the violation occurs. The State attorney general shall provide prior written notice of any such civil action to the Federal agency responsible for enforcement under section 108 and shall provide the agency with a copy of the complaint. The Honorable George Miller, Chairman
 Committee on Education and Labor
 U.S. House of Representatives
 Washington, DC 20515

Dear Mr. Chairman:

I am writing concerning H.R. 4137, the College Opportunity and Affordability Act of 2007. This bill was introduced on November 9, 2007, and was referred to the Committee on Education and Labor, and in addition, to this Committee, among others. The bill has been ordered reported by the Education and Labor Committee.

The bill was referred to this Committee primarily because of the provisions in title X regarding private student loan transparency. However, because of the cooperation between our two committees, there is an agreement with regard to these provisions. Accordingly, in order to expedite floor consideration, I agree to forego further consideration by the Committee on Financial Services. I do so with the understanding that this decision will not prejudice this Committee with respect to its jurisdictional prerogatives on this or similar legislation. I request your support for the appointment of conferees from this Committee should this bill be the subject of a House-Senate conference.

Please place this letter in the committee report accompanying the bill. I look forward to the bill's consideration and hope that it will command the broadest possible support.

 Chairman

Dear Chairman Miller:

This is to advise you that, as a result of your agreeing to make requested revisions to provisions in H.R. 4137, the College Opportunity and Affordability Act of 2007, that fall within the rule X jurisdiction of the Committee on the Judiciary, we are able to waive any sequential referral of the bill to our committee in order that the bill may proceed without delay to the House floor for consideration. Specifically, you agreed to revisions in what became section 494, regarding school policies against unauthorized copying and distribution of copyrighted materials, and in what became section 766, establishing an advisory commission to facilitate distribution of materials to students with disabilities while appropriately protecting copyright owners.

The Judiciary Committee takes this action with the understanding that by foregoing consideration of H.R. 4137 at this time, we do not waive any jurisdiction over subject matter contained in this or similar legislation. We also reserve the right to seek appointment of an appropriate number of conferees to any House-Senate conference involving this important legislation, and request your support if such a request is made.

I would appreciate your including this letter in the Congressional Record during consideration of the bill on the House floor. Thank you for your attention to this request, and for the cooperative relationship between our two committees.

Dear Chairman Miller:

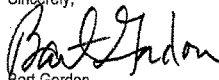

I write to you regarding H.R. 4137, the "College Opportunity and Affordability Act of 2007." This legislation addresses the soaring cost of college and other obstacles that prevent qualified students from attending college, and I fully support the passage of this important legislation. I am particularly excited about the inclusion of the "Minority Serving Institution Digital and Wireless Technology Opportunity Program," which the Committee on Science and Technology previously moved through the House as the freestanding bill H.R. 694.

H.R. 4137 was referred upon introduction to the Committee on Science and Technology. I recognize and appreciate your desire to bring this legislation before the House in an expeditious manner and, accordingly, I will waive further consideration of this bill by the Science and Technology Committee. However, I agree to waive further consideration of this bill with the mutual understanding that my decision does not waive, reduce, or otherwise affect the jurisdiction of the Committee on Science and Technology over H.R. 4137.

Further, I request your support for the appointment of Science and Technology Committee conferees during any House-Senate conference convened on this legislation. I also ask that a copy of this letter and your response acknowledging the Science and Technology's jurisdictional interest in H.R. 4137 be placed in the Committee Report on H.R. 4137 and the *Congressional Record*.

I look forward to working with you as we prepare to pass this important legislation.

XVIII. ADDITIONAL VIEWS

ADDITIONAL VIEWS

Since its inception four decades ago, the Higher Education Act has provided hundreds of billions of dollars to students, as well as significant resources to colleges and universities themselves. The Higher Education Act is responsible for helping generations of American students successfully complete postsecondary studies and reap the benefits that come with higher education. The Act is unique in its focus on providing students with a portable funding source that they may use at the institution of their choosing, modeling the success that can be achieved through authentic educational choice. Yet despite this clear success, Committee Republicans believe the Higher Education Act has failed to achieve a fundamental goal: lowering the cost of college so that every American can achieve the dream of higher education. The Department of Education currently makes available \$82 billion in student aid for higher education. This figure does not include student aid disbursed by other Federal agencies nor does the figure include the billions “spent” by the Federal government in the form of tax credits for higher education expenses. For every dollar increase in Federal student aid, it seems there is a larger dollar increase in college tuition. The result is an unending spiral of financial confusion that leaves far too many American students unable to pursue a college education.

This reauthorization provides a vital opportunity to reassess the effectiveness of the Federal investment in higher education, realign our priorities to ensure that the focus of the Higher Education Act is students, and redefine what it means to hold colleges and universities accountable. Policymakers have an opportunity—and an obligation—to enact meaningful reforms on behalf of American students, families, and taxpayers.

Historically speaking, and perhaps even more so today, Federal involvement in higher education is primarily viewed in financial terms. Committee Republicans believe this emphasis on funding has both positive and negative implications for students and taxpayers. On the positive side, Committee Republicans strongly believe that what has made the Higher Education Act so effective is that it targets funds directly to students. The Higher Education Act is a shining example of how educational freedom encourages competition and serves students by allowing them to make decisions about what educational opportunity will best meet their needs. On the negative side, however, Committee Republicans believe the vast Federal investment has allowed America’s higher education system to become complacent in its efforts to expand service, increase efficiency, hold down costs, and increase quality. Some would even argue that the infusion of Federal resources has stifled the type of

innovation and competition that would exist in a more demand-driven system that was not so dependent on third-party payments.

Funding for higher education has indeed gone up dramatically in recent years. According to information from the College Board in its 2007 Trends in Student Aid report, federally-supported student aid programs have increased by 128 percent in the last decade. This includes increases in Pell Grants, Supplemental Educational Opportunity Grants, Federal Work Study, support for veterans and other military personnel, and student loans.

Committee Republicans are proud of the financial commitment Congress has demonstrated in recent years toward higher education. This support will continue. However, Committee Republicans are concerned that the value of this investment may be diminished by a lack of market discipline, meaningful competition, and consumer awareness. As such, Committee Republicans believe that while the financial focus of the Higher Education Act is important to its success, there is also a need to refocus on the principles of access, accountability, affordability, and quality. Committee Republicans believe that, for the most part, H.R. 4137 achieves those principles. However, the principles could have been further enhanced through the acceptance of several key Republican amendments.

Student speech and association rights

Committee Republicans believe it is critical that students and members of the campus community are able to exercise their right to speak freely and express their views in organizations and events on campus. Therefore, Representative Mark Souder (R-IN) offered an amendment to adjust the existing Sense of Congress on Student Speech and Association Rights to ensure that institutions of higher education are protecting these rights for students. These rights include that students should be judged solely on their knowledge and reasoned answers; that student funds should be used to present diverse views at campus events, lectures and programs; that institutions should present students with an array of material in the instructional setting that includes dissenting views; and that students should not be unfairly punished because of their ideology or political beliefs.

Beginning in the 1980s and 1990s, institutions began enacting harassment policies or "free speech codes," institutional policies or regulations designed to prevent speech and expression that, in an off-campus environment, would otherwise be constitutionally protected. Courts have held that several of these policies and codes are too broad and vague to be constitutional.¹ Committee Republicans encourage institutions to re-examine their speech codes to ensure compliance with the law.

Further, Committee Republicans recognize that a good education involves free academic inquiry and thought in all fields of study. There is evidence to suggest, however, that both faculty and students have been harassed or discriminated against because of the

expression of their personal or professional judgments, opinions or beliefs that may be considered political, ideological or religious. Sometimes these opinions or beliefs may, in fact, be well-researched and intellectually informed, but because they are deemed controversial, the faculty or students who hold these beliefs may be harassed or limited in some way from academic or professional advancement. However, rather than put forward alternatives to our language, Committee Democrats simply chose to vote down this amendment by a 19–23 predominately party line vote. Committee Republicans believe that such discrimination discourages the type of intellectual curiosity necessary for a free, democratic society to flourish and we therefore encourage universities to promote intellectual pluralism within the context of the university's institutional mission. This amendment was simply building on a Sense of Congress included under current law and would have demonstrated the Committee's commitment to ensuring the free flow exchange of ideas on college campuses across the country.

Performance pay

One of the most important goals of the No Child Left Behind Act is to ensure that all public school students are taught by teachers with subject matter knowledge and teaching skills capable of effectively driving student learning gains in schools, particularly schools with high concentrations of low-income students.

Committee Republicans are concerned that the manner in which public school teachers are generally compensated (paying teachers according to a structured scale on the basis of their level of education and number of years in the classroom, even though neither of these factors is necessarily associated with better teaching or higher student achievement) may work against the goals in No Child Left Behind.

There is growing recognition that alternative compensation systems that reward teachers for demonstrated growth in student achievement can be a catalyst for school improvement and an important recruitment tool for school districts seeking talented prospective teachers. A study produced earlier this year by researchers at the University of Florida demonstrated that student learning increased when teachers were provided financial incentives.

Representative Tom Price (R-GA) introduced an amendment that would have permitted grantees in the title II Partnership Grants program to develop performance pay systems for teachers. This authority, which is similar to language already in current law, would encourage greater experimentation with performance pay to build on efforts already underway across the country to capitalize on this promising teacher quality improvement strategy. Unfortunately, the Committee rejected this amendment by a vote of 16 to 26.

Committee Republicans remain confident that this amendment permitting the development of performance pay systems would have allowed partnerships to implement reforms to teacher compensation systems that would result in improved learning environments and increased academic achievement for our nation's neediest students.

Adjunct Teacher Corps

School districts around the country are facing a shortage of qualified teachers in the fields of math, science, and critical foreign languages. A recent report cited by the U.S. Department of Education found that approximately one-third of middle and high school math and science teachers did not have a major or minor in their subject area or related discipline, with well over half of teachers in the physical sciences lacking such a degree. This shortage in qualified teachers in these high-need subjects has a profound impact on our country's ability to produce graduates with the skills in these high-need fields necessary to maintain our competitiveness in the global economy.

Representative Cathy McMorris Rodgers (R-WA) offered an amendment to address this issue by establishing an Adjunct Teacher Corps. This program would provide grants to local educational agencies and public or private educational organizations to recruit well-qualified individuals to serve as adjunct teachers in secondary school math, science, and critical foreign language courses. These individuals might be mid-career professionals with unique expertise and experiences that could fill gaping holes in schools' teaching forces. The amendment would require school districts to provide adjunct teachers pre-service training and on-going mentoring by highly qualified teachers to ensure that the adjunct teachers have both the subject matter knowledge and pedagogical skills to be effective classroom instructors.

Committee Republicans continue to believe that school districts must be granted more flexibility to make up for the shortfall in teachers prepared through the traditional pipeline with expertise in high-need fields. The Adjunct Teacher Corps would provide this flexibility by allowing schools to capitalize on the unique subject matter knowledge and experiences of individuals within the math, science, and critical foreign languages fields. Despite the talent that these individuals would bring to our nation's schools through the Adjunct Teacher Corps, this amendment was rejected 19-25 in Committee. Committee Republicans look forward to working with Committee Democrats on this amendment before the bill is brought up on the Floor.

Student Loan Auctions

Committee Republicans remain concerned about the PLUS loan auction proposal included in The College Cost Reduction and Access Act, H.R. 2669. Under this proposal, the Department of Education is responsible for starting and managing 50 statewide auctions every two years. Committee Republicans have serious concerns about the Department of Education's ability to manage this new complicated scheme. Further, Committee Republicans also have concerns about how the PLUS auction will complicate lending for parents. A parent with several children attending colleges in different States may be forced to take out PLUS loans from two or three different lenders, depending upon the lender that won the bid in each State. Such a process does nothing to simplify the loan process for families and in fact, has the potential to lead to greater confusion for students, parents and institutions. The College Opportunity and Affordability Act of 2007 includes an evaluation of

the auction proposal. While Committee Republicans support an evaluation, we believe that the simple amendment offered by Representative Mark Souder (R-IN) should have been adopted. Rep. Souder's amendment did not abolish the auction. In fact, it did not even set a test through which the Secretary would be required to end the auction. The amendment simply gave the Secretary the authority to discontinue the auction at any point if the evaluation determined that the auction was not in the best interests of taxpayers or students. This amendment was eventually withdrawn with the understanding that we could work out a compromise prior to the bill being brought up on the Floor. Committee Republicans look forward to working with Committee Democrats on this amendment.

Borrower choice in student loans

Since the creation of the Direct Loan program in 1992, the reauthorizations of the Higher Education Act have put forward proposals designed to level the playing field between the Federal Family Education Loan (FFEL) program and the Direct Loan (DL) program. The competition between the two programs has significantly increased the quality of service in both programs. Currently, approximately 80 percent of loans are originated in the FFEL program and 20 percent in the DL program.

In the FFEL program, students are permitted to select their own lender. In fact, this bill includes several provisions that improve borrower choice by requiring that every institution operating a preferred lender list recommend at least three unaffiliated lenders on the list. In addition, the bill builds on provisions included in the bipartisan H.R. 890, The Student Loan Sunshine Act, and requires that institutions conspicuously post a notice to students that they are permitted to select any lender, even if the lender does not appear on the preferred lender list.

At the same time that H.R. 4137 reinforces the policy that institutions must provide student choice, however, the bill limits the choice of students who attend institutions participating in the Direct Loan program. Committee Republicans supported the amendment by Representative Ric Keller (R-FL) that would have permitted borrower choice at Direct Loan schools.

The theme of the investigation by New York Attorney General Andrew Cuomo and the investigations by the Committee has been that students should have the ultimate choice in choosing their lender. However, students attending institutions participating in the Direct Loan program have no choice in their lender. In fact, the lender is automatically selected for them by their institution. In the FFEL program, investigations occurred when institutions tried to find the best deals for their students and offered recommendations. In the Direct Loan program, institutions mandate the Federal government as the lender even though students could get better loan terms from a FFEL lender. This amendment would simply have ensured that all students are provided free choice when it comes to their student loan lender regardless of the institution they attend. However, instead, Committee Democrats chose to vote down this amendment by a vote of 13-28, thereby supporting the idea that not all borrowers deserve a choice in their lender.

Accountability in international education

International education programs at the postsecondary level play a vital role in building and maintaining the nation's ability to supply expertise in critical foreign languages, area studies and international business arenas. In order to continue the nation's established leadership role in international affairs, the opportunities for students to become knowledgeable in international issues and critical foreign languages has become increasingly important. America's interests and national security are inextricably tied to our knowledge and understanding of the rest of the world.

Committee Republicans believe that when selecting grantees, the Secretary should take into account the degree to which activities of centers, programs, and fellowships at institutions of higher education advance national interests, generate and disseminate information, and foster debate on American foreign policy from diverse intellectual perspectives. In addition, Committee Republicans believe that the international education programs funded by the Federal government and operated at our country's institutions should be meeting the national security and intelligence needs of our country. For that reason, Representative Peter Hoekstra (R-MI) introduced an amendment that built on a number of reforms of the title VI programs included in H.R. 609, The College Access and Opportunity Act of 2006, from last Congress and the Senate reauthorization bill. The amendment required the Secretary to consult with various federal agencies, including the Departments of Commerce, Defense, and State and the National Security agency and the office of the Director of National Intelligence, in determining the national need for expertise in foreign languages and world regions. Congress should be enacting policies that tailor the laws to the country's needs. While this amendment was withdrawn, Committee Republicans look forward to working with Committee Democrats to supplement the amendment offered by Representative Rush Holt (D-NJ) to create a new Assistant Secretary position for international education with some of these important ideas and principles to ensure accountability in the title VI programs.

Over the past several Congresses, the Committee has heard testimony from a number of different experts and government officials that have pleaded for ways to fulfill important shortages. These officials need graduates to have expertise in critical foreign languages and in different regions of the world. This provision in the amendment would have provided the Secretary with the tools to gain a better understanding of the country's needs, award grant funds based on that new knowledge, and determine where the graduates of these programs are going upon graduation.

Committee Republicans also believe that international education programs need to develop an environment that fosters debate and offers diverse perspectives to our nation's students. In order to meet that goal, the amendment required the Secretary to collect information on how the program will reflect a wide range of viewpoints. Committee Republicans have heard one anecdote after another about how students with certain viewpoints are stifled in the classroom and through their coursework. For this reason, Committee Republicans also believe it is vital for the Secretary to gather information about how the grantees will address disputes re-

lated to the offering of diverse perspectives. Students with opinions that may be different from other students or their professors must know that there is a procedure in place to address concerns of discrimination.

Finally, Committee Republicans also believe that the bill should clearly require that recruiters from the military and Federal agencies be given the same access as is granted to prospective employers who wish to recruit students for non-government related employment opportunities. Committee Republicans believe students who benefit from the programs funded under title VI have instrumental and unique skills in critical foreign languages, world regions and international affairs that would benefit the military and agencies of the Federal government and those employers should be permitted to recruit students on campus for this purpose.

International advisory board

In a June 2005 report from the Congressional Research Service, there was significant discussion regarding the establishment of a "multi-agency board, endowment, foundation or other independent Federal entity to coordinate and/or administer all Federal programs dealing with foreign language and international studies." The report further suggested that one function of such board or agency might be "relatively long-range planning to attempt to meet both the Federal government's and the Nation's needs for foreign language and area studies specialists in a coordinated manner."

During a June 2003 hearing on title VI, Dr. Stanley Kurtz, a Research Fellow with the Hoover Institution, argued that a board, similar to those that govern the Fulbright and National Security Education Programs, was needed to help enhance the programs under title VI. Dr. Kurtz proposed that a board should be inclusive of all points of view and should therefore "be able to hold annual [public] hearings on title VI activities, including the outreach activities of the National Resource Centers."

In a book entitled, "Language and National Security in the 21st Century," published by the National Foreign Language Center, the authors recommend an "establishment of mechanisms to monitor national needs and capacity in language and to assess how those needs and that capacity are addressed by Federal, State, and local programs, including title VI." In response to all of these sources, Representative Peter Hoekstra (R-MI) introduced an amendment, rejected along party lines by a voice vote, that would create an International Advisory Board. The Board authorized by the amendment would be responsible for making specific recommendations that would assist the Secretary and the Congress to improve the programs under title VI to better reflect the national needs related to homeland security, international education, and international affairs, including the assessment of the national needs and training provided by the institutions of higher education that receive a grant for expert and non-expert level foreign language training.

Committee Republicans believe that the programs authorized under title VI of the Higher Education Act are crucially important because they ensure the expansion of the international knowledge base of the nation's citizenry and promote the growth and development in national need areas related to addressing national security

interests and international commerce. The International Advisory Board, rather than a new Assistant Secretary position at the Department of Education, would be the best entity to provide advice, counsel and recommendations to the Secretary and the Congress on international education issues for higher education in order to improve international education program. Rather than go through a political appointment process and be subject to the political winds of the time, the International Advisory Board would be appointed by the House of Representatives, the Senate, and the Secretary, who must select two representatives from agencies with diplomacy, national security, international commerce or other international activity responsibilities. These agencies may include, but not be limited to, the Department of Defense, the Department of Homeland Security, the Department of State, the Department of Commerce, and the Central Intelligence Agency.

The International Advisory Board would be authorized to hold public hearings to review the recommendations provided by the Board to the Secretary and the Congress. Committee Republicans believe the creation of the International Advisory Board would be an important first step to engage the independent board with the grantees, communities and constituencies who are most interested in the objectives and outcomes of the programs authorized under title VI. Committee Republicans also believe strongly that the creation of such a Board would not provide them with the authority to mandate, direct, or control an institution of higher education's specific instructional content, curriculum, or program of instruction.

New programs & regulations

Committee Republicans remain concerned about the overall expansion of the federal government included in H.R. 4137. The bill creates approximately 20 new programs and requires many more new reporting requirements. These facts are in direct conflict to the streamlining and simplification effort promoted by the Committee Republicans at the beginning of this reauthorization process.

At that time, the Committee believed the first step in developing meaningful reforms was not simply to impose new regulations on top of the existing framework, but to identify ways to actually reduce red tape and bureaucracy for students, financial aid personnel, and colleges and universities. Known as the FED UP project, this bipartisan initiative was the first step toward developing a more efficient and effective Federal student aid system.

In an effort to identify outdated, redundant, or overly burdensome provisions in title IV of the Higher Education Act and its regulations, the "Upping the Effectiveness of Our Federal Student Aid Programs," or "FED UP," was developed by then-21st Century Competitiveness Subcommittee Chairman Howard P. "Buck" McKeon (R-CA) and the late Representative Patsy Mink (D-HI) in 2001. The project, which was launched in May 2001, solicited suggestions from the higher education community as to what provisions in the Higher Education Act and which regulations should be changed or eliminated and why. More than 3,000 responses were received and logged from loan professionals, financial aid officers, students, higher education associations and concerned citizens. The

Department of Education completed a negotiated rulemaking session based on the proposals submitted through FED UP and released new regulations.

H.R. 609 incorporated the suggestions from FED UP and specifically addressed statutory changes that are necessary to relieve some of the administrative burdens on students, financial aid professionals, student loan providers and institutions of higher education, while providing clarification of other provisions currently in law. Committee Republicans fear that H.R. 4137 is heading in the opposite direction by requiring new reporting requirements for institutions, the result of which will be thousands of reports arriving every year at the doors of the Department of Education. Some of the reporting provisions in the bill require that the Secretary actually publicize the information required in the reports on the Department's web site. Other provisions do not specify what actions need to be taken. Committee Republicans remain deeply concerned about additional burdens imposed on students, institutions and other partners in the field. Committee Republicans look forward to working with Chairmen Miller and Hinojosa, and other Committee Democrats, in ensuring that the reporting requirements are not burdensome or duplicative and remain useful.

Committee Republicans also look forward to working with Committee Democrats to further limit the new initiatives and programs included in the bill. Creating new programs on top of existing programs generally creates duplication and waste. The programs already funded under the Higher Education Act cover a wide range of services and activities designed to meet the needs of students and, before creating and funding a new program, the Committee should carefully examine existing programs in order to ensure against creating more bureaucracy when the existing bureaucracy is already in place to do the job. Creating new authorizations simply burdens the appropriators to find funding for every program instead of focusing resources on the programs that are truly effective in helping our nation's students obtain a postsecondary education.

ADDITIONAL VIEWS ON THE ADVISORY COMMITTEE FOR STUDENT FINANCIAL ASSISTANCE

As the importance of a postsecondary education grows along with the need for a greater federal investment in student financial assistance, it is essential that Congress maintain a mechanism for on-going independent analysis and advice on the implementation of the student aid programs. Since its establishment in the 1986 Amendments to the Higher Education Act, the Advisory Committee on Student Financial Assistance has been that mechanism.

What has made the Advisory Committee an invaluable source of technical expertise and advice to the Congress and the Secretary of Education has been its independence—both from the administration and from outside interest groups. The Advisory Committee's agenda is set in statute by the Congress. The congressional mandate requires the Advisory Committee to conduct objective, non-partisan, and independent analyses on important aspects of the student assistance programs under Title IV of the HEA. In addition, Congress has and may call upon the Committee to conduct special evaluations, studies, and analyses that address the basic structure and effectiveness of the individual programs under Title IV.

The Advisory Committee provides an open, public process that incorporates input from a broad range of stakeholders for monitoring and making recommendations for improvements to the student aid programs. The Advisory Committee membership includes a cross-section of stakeholders in the student aid community with members appointed by the Congress and the Secretary of Education representing institutions of higher education, secondary schools, financial institutions, students, and parents. More than half of the members must be appointed on the basis of technical expertise and professional standing in the field of higher education and student aid administration. All Advisory Committee hearings and reports are a matter of public record.

To fulfill its congressional responsibilities over the past 20 years, the Advisory Committee has held more than 100 formal meetings, hearings, and symposia. In addition, the Committee has developed background papers on a myriad of issues pertaining to student financial assistance. The recent work of the Advisory Committee, including its three reports, *Access Denied: Restoring the Nation's Commitment to Equal Educational Opportunity*, *Empty Promises: The Myth of College Access in America*, and *Mortgaging Our Future: How Financial Barriers to College Undercut America's Global Competitiveness* has demonstrated to policy-makers, educators, and members of the higher education community that federal policy must be mindful of the barriers to access and persistence facing low- and moderate-income students. As a result of these reports, numerous efforts to encourage increases in need-based aid for low-

and moderate-income students have occurred at the federal, state, and institutional levels.

These barriers include the complexities of the student aid system. As a result, the Advisory Committee has been an active participant in discussions on ways to streamline and simplify both need analysis and aid application. The Advisory Committee's efforts on this issue have been met with significant success. In the 1990s, its work on financial aid simplification led to the introduction of a free common financial aid form that serves as an application for federal aid and most state and institutional aid. The Advisory Committee also worked toward expanding and implementing two streamlined need analysis formulas that are used for low-income students: the Simplified Needs Test (SNT) and the automatic-zero Expected Family Contribution, or the auto-zero EFC.

Congress charged the Advisory Committee in the fiscal year 2004 Consolidated Appropriations Act with conducting a one-year simplification study to identify ways to streamline the financial aid system and make it easier, more responsive, and fairer for students and families. The central question put forth by Congress was whether a broad and cost-effective simplification initiative could increase the power of student aid to achieve greater access to college, especially for low-income students. In 2005, the Committee submitted to Congress and the Secretary of Education the simplification study's final report, *The Student Aid Gauntlet: Making Access to College Simple and Certain*. The report recommended a sweeping, but cost effective, simplification initiative, consisting of four national imperatives for improving access that would increase the return on our nation's already sizeable investment in student aid. The recommendations are as follows:

- Create a system of early financial aid information.
- Make federal need analysis transparent, consistent, and fair.
- Expand existing simplification to more students.
- Allow all students to apply for financial aid earlier.
- Make the FAFSA relevant and understandable.
- Create a simpler paper form for low-income students.
- Phase out the full paper form and increase the use of technology.
- Simplify and streamline FAFSA on the Web.
- Simplify the verification process.
- Create a national partnership to make access simple and certain.

Nine of the ten recommendations were included, in whole or in part, in the Deficit Reduction Act of 2005, which was signed into law by the President on February 8, 2006 and the College Cost Reduction and Access Act, signed into law on September 27, 2007. The recommendation not included was to simplify the verification process.

The Advisory Committee's tenth proposal, to create a new national access and persistence partnership, is designed to leverage federal funds in order to encourage states to create public-private collaborations that increase college enrollment and success for low-income students. This recommendation is reflected in the provi-

sions to establish Grants for Access and Persistence (GAP) in H.R. 4137.

As is evident from its recent activities, the Advisory Committee on Student Financial Assistance continues to provide valuable input and advice to Congress. With the enactment of major changes to the student aid programs in the College Cost Reduction and Access Act and in H.R. 4137, the Advisory Committee will continue to play a critical role in ensuring that the student aid programs achieve the goal of access to postsecondary education for low- and middle-income students.

ADDITIONAL VIEW OF THE COLLEGE OPPORTUNITY AND
AFFORDABILITY ACT OF 2007 REPORT LANGUAGE

I support the bill and agree with the comments made in the full report. I would like to offer as additional views the following:

Feasibility study on renegotiated student loan interest rates (Sec. 808): This study should include an evaluation of the feasibility of treating student loans like home mortgages, such as allowing students to refinance their loans at any time to take advantage of lower interest rates or to convert to a variable rather than a fixed interest rate and what conversion fees might be appropriate.

Diversity in the Arts grant program (Sec. 705(a)(15)): Programs receiving these funds should seek to promote cultural diversity in the entertainment media industry to work in collaborations with schools and their students. A good example of an organization is the Legacy Media Institute, in Petersburg, Virginia. Legacy Media Institute is a nonprofit organization which seeks to diversify the entertainment media industry. They attain this goal by educating students aspiring to be professionals in the entertainment industry through interactions with leading professionals in the industry and educators.

Secretary's disaster plan (Sec. 863): The disaster relief plan shall include plans to accommodate either man-made or natural disasters.

ROBERT C. "BOBBY" SCOTT.
