

111TH CONGRESS
1ST SESSION

H. CON. RES. 107

Supporting the goals and ideals of “National STD Awareness Month”.

IN THE HOUSE OF REPRESENTATIVES

APRIL 23, 2009

Ms. LEE of California (for herself, Mr. MCGOVERN, Mr. MEEKS of New York, Ms. KILPATRICK of Michigan, Mr. McDERMOTT, Ms. BALDWIN, and Mrs. CHRISTENSEN) submitted the following concurrent resolution; which was referred to the Committee on Energy and Commerce

CONCURRENT RESOLUTION

Supporting the goals and ideals of “National STD Awareness Month”.

Whereas sexually transmitted infections (STIs) (also known as sexually transmitted diseases, or STDs) pose a significant burden in the United States both in economic and human terms;

Whereas the United States has the highest rate of STIs in the industrialized world, with an estimated 19,000,000 new cases occurring each year, and almost half of those infections occurring in young people between the ages of 15 to 24;

Whereas, according to the Centers for Disease Control and Prevention (CDC), STIs impose a tremendous economic

burden on the United States, with direct medical costs as high as \$15,900,000 per year;

Whereas, in 2008, the CDC estimated that 1 in 4 young women between the ages of 14 and 19 in the United States, or 3,200,000 teenage girls, and nearly 1 in 2 African-American young women are infected with at least one of the most common sexually transmitted infections, which are human papillomavirus (HPV), chlamydia, herpes simplex virus, and trichomoniasis;

Whereas poverty and lack of access to quality health care exacerbate the rate of infection with the human immunodeficiency virus (HIV) and other STIs;

Whereas racial disparities in rates of STIs are among the worst health disparities in the Nation for any health condition;

Whereas most STIs have been associated with increased risk of HIV transmission and are likely contributing to the ongoing HIV epidemic in the United States;

Whereas the CDC also reports that the two most common STIs among young women are HPV, with 18 percent infected, and chlamydia, with 4 percent infected;

Whereas the long-term health effects of these STIs are especially severe for women and include infertility and cervical cancer;

Whereas vaccination, screening, and early treatment can prevent some of the most devastating effects of STIs;

Whereas high STI infection rates in the United States demonstrate the need for better ways to reach those most at risk of infection;

Whereas the CDC recommends annual chlamydia screenings for sexually active women 25 years of age and younger;

Whereas the CDC also recommends HPV vaccination for girls and women between the ages of 11 and 26 who have not been vaccinated, or who have not completed the full series of shots;

Whereas chlamydia can lead to pelvic inflammatory disease chronic pelvic pain, infertility, and tubular pregnancies, which can affect a woman's health and well-being throughout her lifetime;

Whereas STIs can be transmitted from infected mothers to infants during childbirth and can cause severe health consequences in these infants;

Whereas STIs often cause social stigma and may have a serious psychological impact among those who are infected;

Whereas the Federal Government should help people protect themselves against STIs by supporting programs providing comprehensive and medically accurate health information and funding screening and treatment services, including through a variety of programs such as under title X of the Public Health Service Act and the CDC's STD prevention program;

Whereas STI screening, vaccination, and other prevention strategies for sexually active women should be among our highest public health priorities; and

Whereas the CDC observes April as "National STD Awareness Month": Now, therefore, be it

1 *Resolved by the House of Representatives (the Senate*
2 *concurring), That Congress—*

1 (1) supports the goals and ideals of “National
2 STD Awareness Month”;

3 (2) encourages the Federal Government, States,
4 localities, and nonprofit organizations to observe the
5 month with appropriate programs and activities,
6 with the goal of increasing public knowledge of the
7 risks of sexually transmitted infections (STIs) and
8 protecting people of all ages;

9 (3) recognizes the human toll of STIs and the
10 importance of making the prevention, diagnosis, and
11 treatment of STIs an urgent public health priority;
12 and

13 (4) calls on all people in the United States to
14 learn about STIs and the prevention approaches rec-
15 ommended for them and encourages all sexually ac-
16 tive individuals to get tested for STIs and to seek
17 appropriate care if they are infected.
