Question. Perhaps more than with any other combatant command, military operations in the PACOM area of operations (AOR) are subject to the "tyranny of distance" in getting forces to points of exigency or conflict. Significant changes to the U.S. force posture in the region are planned over the next several years, including movement of U.S. marines from Okinawa to Guam and relocation of U.S. forces within South Korea.

In your view, how important is a forward basing strategy to the ability of PACOM to execute its operational commitments?

Answer. Forward basing is essential to the PACOM strategy of partnership, readiness, and presence. Forward presence assures our friends and allies, while deterring potential adversaries. This strategy allows a more flexible force, positioning PACOM to respond with a variety of means in the event of a crisis or contingency.

Question. What do you see as the implications of the proposed force structure changes in South Korea, Japan, and Guam on security and stability in the Asia-Pacific region and what impact, if any, do you expect the proposed changes to have on our ability to react to contingencies in the region?

Answer. I support the U.S. posture changes in Korea and Japan. I believe these changes will contribute to strengthening our alliances while continuing to posture U.S. forces forward in the region. The relocations in Japan and Korea address host nation concerns such as noise and encroachment, while improving our mutual defense infrastructure in the region through investment projects funded by the host governments. Additionally, better use is made of Guam's strategic location to position U.S. forces more effectively for the evolving security environment.

Question. Do you believe the relocation of about 8,000 U.S. marines and about 3,600 other U.S. military members and dependents from Japan to Guam is in the best interest of the United States and our allies? Why or why not?

Answer. The relocation is the most comprehensive force change in over 3 decades. It helps to strengthen our alliance with Japan by addressing longstanding concerns about the U.S. presence on Okinawa. It diversifies our presence in the Western Pacific by taking advantage of Guam's strategic location and its status as a sovereign U.S. territory. It also allows a greater degree of flexibility to address regional and global threats, while providing the ability to train on U.S. territory in a forward location with partner nations.

Answer. How does the relocation of these marines improve our security posture in the region?

Answer. This relocation improves our security posture in the region by spreading our capability and balancing our flexibility more broadly across the Pacific. It also provides an opportunity for combined training with partner nations in the region on sovereign U.S. territory. Security and stability are enhanced through balancing strengthened alliances with a more flexible positioning of forces.

Question. What is your view about the advisability of requiring that construction companies pay their workers on Guam realignment construction projects wages equivalent to rates in Hawaii? What impact would this approach have on the cost of the move?

Answer. The Services have built military construction (MILCON) projects on Guam for many years including homes, runway repairs, piers, and schools using the prevailing Guam wages. According to Department of Labor data, Hawaii construction wage rates are approximately 300 percent higher than those on Guam. The \$10.27 billion estimated cost for construction to relocate the marines to Guam was based on historical wages experienced on Guam. In accordance with international agreement, the amount of funding that Japan will provide is fixed. Therefore, any additional cost will require more U.S. funding. The Joint Guam Program Office estimates application of Hawaii Davis-Bacon wage rates with fringes to Guam could increase the labor cost for the realignment by \$4.7 billion.

Question. Some observers suggest that the United States is preoccupied in Central Asia and has not focused sufficiently on challenges in East Asia at a critical time in the development of that region.

What is your assessment of the U.S. levels of funding, manning, and political-military engagement in PACOM's AOR as compared to other geographical regions, particularly Central Asia?

Answer. I understand the increased focus on the challenges in Central Asia. However, I do agree with Secretary Gates' observation that the United States has never been more engaged in the Asia-Pacific region than today. If confirmed, I will review levels of funding, manning, and military-to-military engagement in the Asia-Pacific region and, if there are shortfalls in existing resources, I will be a strong advocate for requesting an increase in levels of funding.

Question. Many of the United States' key alliances in Asia were established years ago when global conditions and threats were different than today. In recent years, PACOM has given priority to the development of cooperative security arrangements with partners in the region.

Do you agree with this objective and, if so, what countries do you see as the top priorities for such arrangements to best enhance stability and security in the region?

Answer. Yes, I agree with this objective. The cooperative security partnerships established with top priority countries such as Singapore, India, and Indonesia have served to significantly enhance access, security, and stability throughout the Asia Pacific. To date, these developing partnerships have resulted in successes in combating terrorism, maintaining maritime security, and providing humanitarian assistance/disaster relief.

EMERGING PACIFIC THEATER THREATS

Question. Regional powers and non-state actors in PACOM's AOR are making significant efforts to improve their ability to project power with respect to both conventional and irregular capabilities.

What are your biggest concerns with respect to development of advanced conventional and irregular warfighting capabilities by nations and non-state actors in PACOM's AOR?

Answer. Major concerns include the lack of transparency regarding China's development of advanced conventional and asymmetric weapons—beyond what is required for its national defense—and the ongoing North Korean missile programs. With regard to irregular warfare, several extremist organizations in South and Southeast Asia may continue to advance their agendas by importing foreign terrorist tactics and techniques that have proven most lethal elsewhere.

Question. What do you see as the highest priority capability gaps that need to be addressed by the United States in order to meet these emerging threats?

Answer. Regional state and non-state actors are increasingly sophisticated at hiding their activities and intentions. PACOM requires a similarly agile and sophisticated intelligence enterprise to avoid strategic surprise through early detection and insight into an adversary's intentions and capabilities. This can only be achieved by combining improved intelligence collection systems using the proper mix of platforms and sensors, with the regional expertise and advanced analytic tools that enable us to anticipate threats rather than react to crises.

If confirmed, I will ensure that the process to develop capability-gap priorities carefully considers the full range of PACOM roles and missions, takes into account the issues and concerns of our component and subunified commanders, and that the resultant actions by the Services and force providers delivers needed capabilities to our operational forces.

Our military must be able to respond to emerging threats in a variety of domains, including the electromagnetic spectrum and cyberspace, as well as the traditional air, maritime, and ground domains.

Question. If confirmed, what steps will you take to ensure that these needed capabilities are developed and deployed to warfighters?

Answer. If confirmed, I will ensure that PACOM processes to identify needed capabilities remain responsive to both assigned missions and emerging threats. I will continue to use the annual Integrated Priority List memorandum to the Chairman of the Joint Chiefs of Staff to advocate for those capability shortfalls most critical to operations in the Pacific theater. We will communicate these priorities to Services and force providers through proper channels, and we will provide feedback on the fielded capabilities and their effectiveness in closing identified capability gaps.

Question. How should U.S. policies and engagements in the Asia-Pacific region change to best meet new threats and conditions?

Answer. PACOM in general is well-positioned and resourced to meet most conventional threats in the Asia-Pacific theater. Countering the radical extremist threat, however, requires unique approaches to be most effective. Building indigenous CT capabilities and capacities into susceptible Asia-Pacific nations is one such approach. Equipped with supportive policies and resources, PACOM, in partnership with relevant agencies of the United States Government and private enterprise, can assist regional nations that are susceptible to radical extremism to become more self sufficient in combating terrorism.

NORTH KOREA

Question. North Korea continues to represent one of the greatest near-term threats to U.S. national security interests in Asia, and recent events underscore the possible destabilizing nature of certain North Korean activities.

What is your assessment of the current security situation on the Korean peninsula?

Answer. The 2009 North Korean TD-2 launch, probable nuclear test, and continued ballistic missile activity underscore the gravity of the North Korean threat. North Korea is pursuing a multi-dimensional strategy (includes provocative military actions and aggressive rhetoric) to achieve specific domestic, inter-Korean, and international objectives. North Korea's stated intent to depart from Six-Party Talks and conditions of the armistice further demonstrates the uncertain security situation they are generating.

Question. What is the value of diplomatic efforts to persuade North Korea to resume negotiations to verifiably dismantle its nuclear weapons program?

Answer. A resumption of negotiations might return the Peninsula to a more rational status quo. The United States remains committed to the Six-Party Talks process, and calls on the Democratic People's Republic of Korea to fulfill its commitments under the September 19, 2005, Joint Statement of the Six-Party Talks, to abandon all nuclear weapons and existing nuclear programs and return, at an early date, to the Treaty on Non-Proliferation of Nuclear Weapons and to International Atomic Energy Agency safeguards.

Question. What is your assessment of the threat posed to the United States and our allies by North Korea's ballistic missile and WMD capabilities, including the export of those capabilities?

Answer. North Korea's pursuit and development of WMD and ballistic missile capabilities, as well as its proliferation efforts, pose a significant threat to the U.S. and our allies. The development of WMD and advanced ballistic missiles increases regional tension and could spur a limited arms race as neighbors seek to enhance their own deterrent and defense capabilities. North Korea has historically proliferated arms and military equipment to regimes such as Iran, Burma, and Libya and may attempt to do so with WMD or longer range missiles.

Question. What is the U.S. military's role in enforcing sanctions imposed by U.N. Security Council Resolution (UNSCR) 1874?

Answer. As obligated by UNSCR 1874, the United States will remain vigilant of any North Korean activities that might contravene the resolution, and we will respond in line with the provisions of the resolution. UNSCR 1874 provides no authority for military enforcement outside a nation's territorial waters. However, the military provides support to the U.S. Government enforcement effort through tracking of maritime vessels of interest.

Question. In your view, what, if anything, should be done to strengthen deterrence on the Korean peninsula?

Answer. The United States has strong alliances in the region, and, if necessary, we will leverage these alliances to deter any aggression from North Korea. Our forces throughout the region train rigorously and are fully prepared to deal with any contingencies in upholding our treaty obligations to Japan and the ROK. Our commitment to the security of these close allies includes the U.S. strategic umbrella, which is an integral part of our extended deterrence.

REPUBLIC OF KOREA

Question. Over the next several years, the U.S.-ROK alliance, a key pillar of security in the Asia-Pacific region, will undergo significant change in terms of command and control and force positioning.

What is your understanding of the current U.S. security relationship with South Korea?

Answer. The U.S.-ROK security relationship is an enduring partnership that has been the key to deterrence for over 50 years. It ensures peace on the Korean Peninsula and in Northeast Asia. The major advances made by the ROK in recent years

regarding defense capability, economic capacity, and technology are supporting the transformation of this partnership. Our alliance has evolved to become a global one, as demonstrated by the ROK military's contributions to overseas contingency operations such as the U.N. mission in Lebanon and Counter-Piracy operations off the Horn of Africa.

Question. If confirmed, what measures, if any, will you take, in conjunction with Commander, U.S. Forces Korea/Combined Forces Command, to improve the U.S.-ROK security relationship?

Answer. If confirmed, I will work closely with the Commander, United States Forces Korea/Combined Forces Command to ensure there is no degradation in readiness or deterrence. I will ensure that PACOM supports the transformation initiatives, such as force realignment, return of unneeded facilities, development of command relationships, and contingency plans.

Question. The transfer of command and control to the ROK is planned for April 2012. In your view, is that date achievable and should this transfer occur as planned?

Answer. The U.S. and ROK military forces are on track to complete the transition of wartime operational control in 2012. This effort will enable the ROK military to take the lead role in the defense of Korea. If confirmed, I will ensure that PACOM supports the united efforts to achieve the transformation on time.

Question. Do you support increasing the number of personnel assigned to Korea for 2 or 3 years of duty and the number of military and civilian personnel authorized to be accompanied by their dependents for these longer tours of duty?

Answer. Yes, if confirmed, I will support the Secretary of Defense, who favors the concept of tour normalization, increasing the number of personnel assigned for 2- or 3-year tours, as well as the number of accompanied tours. Normalization of tours will provide greater stability for servicemembers and family members, improve operational readiness in Korea, and clearly demonstrate the enduring U.S. commitment to the U.S.-ROK alliance. The Quadrennial Defense Review is examining methods to best implement this concept, and if confirmed, I will ensure that PACOM staff continues to support this effort.

Question. What are the key considerations, in your view, in approving the stationing of more dependents in the ROK and how is your view on this matter affected, if at all, by the current tensions on the Korean peninsula?

Answer. Enhancing the stability of our families, improving the operational readiness of our forces in the ROK, and clearly demonstrating the enduring U.S. commitment to the U.S.-ROK alliance all support our efforts to address the security situation on the Korean Peninsula and in Northeast Asia. Implementation of these initiatives will contribute to increased deterrence and should lessen the likelihood of increased tensions on the Peninsula.

CHINA

Question. China is viewed by some as a potential threat and by others as a potential constructive partner. Either way, it is clear that China has an increasingly significant role in the security and stability of the region, and the United States must determine how best to respond to China's emergence as a major regional and global economic and military power.

What is your assessment of the current state of U.S.-China military relations?

Answer. Our military-to-military relationship continues to be characterized by cyclical ups and downs and, in general, lags behind the overall U.S.-China relationship in terms of maturity. The recent Defense Consultative Talks, led by USD(P) Flournoy in Beijing this past June, was the symbolic restart of our military-to-military relationship, unilaterally suspended by China in October 2008 over the announcement of U.S. arms sales to Taiwan. Although the meetings went well and restarting a military-to-military dialogue is a notable accomplishment, it highlighted the fact that there were no official military-to-military relations between the United States and China for almost 9 months. In a more mature relationship, which we are seeking, the value of a continuous military-to-military dialogue is recognized and leveraged to advance areas of common interest and help resolve areas of disagreement.

Question. How would you characterize the quality of the U.S.-China military-to-military engagements to date?

Answer. The general trend in military-to-military relations has been positive since the April 1, 2001, collision between a U.S. Navy EP-3 and a PLA fighter. The past 2 years of reduced engagement are hopefully atypical, as they were affected by a suspension of high level events during the Beijing Olympics in August 2008 and a pause as China responded to the earthquake disaster in May 2008. If confirmed, I

will seek to stabilize the military-to-military relationship and resume a positive trend in both quality and quantity of engagements.

Question. If confirmed as Commander, PACOM, what do you envision as your role in military-to-military engagements with China?

Answer. PACOM should lead the military-to-military relationship with China. As China and the People's Liberation Army are also engaging worldwide, other combatant commanders will also play a role in advancing the relationship. PACOM will work with these combatant commanders, the Joint Staff, and the Office of the Secretary of Defense to rationalize military-to-military engagements with China in support of broader U.S.-China strategic objectives.

Question. How do China's efforts to establish a strategic presence in various South Asian seaports affect its political-military posture and influence in the region?

Answer. As China grows and expands her presence, it will be increasingly important to understand her intentions and to help influence her development as a responsible stakeholder. Chinese influence in South Asia, like much of the world, has been facilitated mainly by economic penetration into this region's markets. Chinese assistance in the development of Indian Ocean ports is intended to facilitate access to trade, resources, and investment. To date we have not observed a military component to these port development projects. A more mature and sophisticated military-to-military relationship could lead to a better understanding of PRC long-term goals and intentions in South Asia, and contribute to a lessened likelihood of miscalculation.

Question. China's defense spending in 2009 will exceed its 2008 spending by 15 percent, continuing its trend of double-digit growth in each of the last 20 years.

In your view, what is China's intent in pursuing such rapid military growth and modernization?

Answer. For the past 20 years, the main impetus for China's military modernization has been to prepare for a potential Taiwan conflict involving U.S. intervention. However, investments also indicate a broader national agenda. Lacking transparency into the full range of Chinese military spending and planning, there remains uncertainty over the future direction and goals of an increasingly powerful PLA.

Question. What do you believe are China's political-military goals in the Asia-Pacific region and globally?

Answer. China aims to create a military commensurate with its reemergence as a global great power with expanded regional and strategic interests. China seeks to be increasingly self-sufficient in its ability to secure its interests, including areas around China that it regards as sovereign Chinese territory as well as the international sea lines of communication upon which its economy depends.

Question. Recent incidents involving the U.S. Navy and Chinese ships, such as with the USNS *Impeccable* in the South China Sea and the USNS *Victorious* in the Yellow Sea, suggest the need for improved mutual understandings between the United States and China in the maritime environment.

Please describe your understanding of the current U.S.-China Military Maritime Consultative Agreement (MMCA).

Answer. The U.S.-China MMCA has within its title ". . . A Consultation Mechanism to Strengthen Military Maritime Safety." The goal is to develop operational and tactical level understanding between military operators of the international norms for conducting safe operations in close proximity to one another.

Question. Has that agreement been effective? If not, how can it be improved?

Answer. The agreement has been a qualified success. The MMCA has served as a durable forum for communications between the U.S. and Chinese militaries. For example, a special meeting held under the MMCA was the first official meeting after the April 2001 EP-3 incident. In 2006, the MMCA forum facilitated a successful two-phase, bilateral Search and Rescue Exercise off Hawaii and San Diego. However, the Chinese continue to use the MMCA as a platform to discuss policy and legal interpretations and to criticize U.S. military operations. If confirmed, I will seek to mature MMCA discussions such that they achieve their goal of enhancing the safety of sailors and airmen of both nations.

Question. What should be done to prevent future maritime incidents with China?

Answer. A more mature military-to-military relationship will allow better understanding of intentions and reduce the chances for misunderstanding and miscalculations. As part of these discussions via the MMCA and all other levels on engagement, the necessity to observe international norms in maritime operations may be emphasized.

TAIWAN

Question. What is your assessment of U.S.-Taiwan military relations?

Answer. Guided by the Taiwan Relations Act stipulation that we will make available to Taiwan defensive articles and services as necessary for Taiwan to maintain a sufficient self-defense capability, we maintain a robust military-to-military engagement with Taiwan at all levels. The United States and Taiwan regularly conduct dialogues and exchanges. For example, U.S. Pacific Fleet conducted the Bi Hai ("Blue Sea") forum with the Taiwan Navy. PACOM conducts an annual observation of Taiwan's Han Kuang joint exercises. While our relationship is based on the Taiwan Relations Act and related policies, it is also shaped by our common democratic cultures. It is something I will continue to strongly support.

Question. What are the priorities, in your view, for U.S. military assistance to Taiwan?

Answer. We closely monitor the shifting balance in the Taiwan Strait and Taiwan's defense needs and Taiwan has made significant strides in increasing its self defense capabilities. We should continue to emphasize the importance of joint training—to include both command post exercises and realistic training in the field as well as their need to more fully integrate their capabilities, including air and missile defenses. Also, to the maximum extent possible, we should assist in Taiwan's transition to an All-Volunteer Force, including development of a professional noncommissioned officer corps.

Question. What is your assessment of the cross-strait relationship between China and Taiwan?

Answer. The Ma Administration's cross-strait policies have contributed to a lessening of tensions in the region. We support the expanding dialogue and exchanges across the Strait. Presently, the PRC continues to increase and improve its cross-Strait military posture. In the longer term, we should observe for a commensurate reduction in PRC military power that threatens Taiwan.

Question. What is your view of the relationship between the type of assistance we offer Taiwan and the stability of the region?

Answer. Adequate defense in Taiwan and our support to that capability is essential to maintaining peace and security in Northeast Asia. The Taiwan Relations Act, which shapes our support to Taiwan, has been in force now for over 30 years and has played a valuable and important role in our approach to the region. Helping Taiwan maintain its self defense will help ensure cross-Strait balance, stability, and regional prosperity.

INDIA

Question. What is your view of the current state of U.S.-India military relations?

Answer. Our military-to-military relations with India are very positive and expanding. Overall, both the United States and India view our military-to-military relationship as the foundation of our "strategic partnership." Due to the wide range of shared security interests, accompanied with the increasing complexity and maturity of our engagement, this relationship will continue to expand. Currently, we are engaging India on many fronts including foreign military sales, advanced training such as Malabar and Red Flag, and real world operations such as counter-piracy patrols in the Gulf of Aden and U.S. POW/MIA recovery missions in northeastern India.

Question. If confirmed, what specific priorities would you establish for the U.S. military relationship with India?

Answer. India's growing economic, diplomatic, and military power makes them a key player not only in South and Central Asia but globally as well. A strong positive relationship with India is essential to achieving long-term U.S. goals such as regional security and stability, reduced tensions with Pakistan, and wide-ranging cooperation to counter extremism. We should continue to expand our military-to-military engagement to include multilateral partners and increasingly complex exercise scenarios that help to advance India's military capabilities. In coordination with U.S. Central Command (CENTCOM), we will develop confidence building measures and events that help reduce India-Pakistan tension and support the greater U.S.-Afghanistan-Pakistan Strategy.

Question. How do our engagements in Pakistan and Afghanistan affect our relations with India?

Answer. India has voiced strong support for U.S. objectives to bring peace and stability to Afghanistan and Pakistan. While they voice their support, they also voice their concern that the United States might sacrifice our strong bilateral relationship and its long-term benefits for the sake of an immediate Afghanistan-Pakistan campaign strategy. Our best course of action to allay Indian concerns while garnishing

their overall support for our ongoing regional efforts is to continue to strengthen our bilateral relationship with India across all agencies of government, including military-to-military.

Question. What relationship, if any, do you believe exists between the armed groups conducting terrorist attacks in India, and the armed groups conducting attacks in Pakistan and Afghanistan?

Answer. Leaders of violent extremist groups such as al Qaeda, Jaish-e-Mohammad, and Lashkar-Tayyiba leverage personal relationships forged during the 1980s when many of these leaders joined together to fight the Soviets in Afghanistan. These informal, nonorganizational relationships continue to factor into some extremist operations in the PACOM AOR.

REPUBLIC OF THE PHILIPPINES

Question. What is your assessment of the current state of U.S.-Philippines military relations?

Answer. The Philippines is one of the United States' five treaty allies in the Pacific and is a committed regional security partner. Our alliance is exceptionally strong. The United States has a mature and focused engagement with the Philippines that is achieving results in the form of enhanced counterterrorism performance, maturing maritime security efforts, and increased commitment to multilateral regional security activities.

Question. What is your view of the effectiveness of the Special Operation Forces assistance being provided to the Philippines military in its light against terrorist groups?

Answer. The U.S. military is working effectively "by, with, and through" the Armed Forces of the Philippines (AFP) to provide assistance while respecting the legal restrictions on foreign forces embodied in the Philippine Constitution. The United States provides active support through a variety of security assistance and engagement activities designed to increase AFP capability and capacity to fight violent extremist organizations. The result of these efforts is evident in the increased ability to respond effectively to the threat of terrorist organizations like the Abu Sayaf Group and Jemah Islamiya by AFP.

Question. What measures or guidelines would you employ, if confirmed, to control the circumstances, if any, under which U.S. personnel may become involved in combat in the Republic of the Philippines?

Answer. The United States respects the sovereignty of the Philippines. Our policy is clear: U.S. forces are not authorized to conduct combat operations in the Republic of the Philippines or to accompany Philippine Security Forces to locations where contact with the enemy by U.S. forces is anticipated. If confirmed, I will continue to support current restrictions and enforcement mechanisms prohibiting a combat role for U.S. forces.

INDONESIA

Question. Indonesia is a key Asian power and the largest Muslim country in the world. Building on opportunities to improve and expand U.S. relations with Indonesia where possible should be a key goal.

What is your assessment of U.S.-Indonesian military relations?

Answer. The U.S.-Indonesia military-to-military relationship has steadily grown since the normalization of relations in 2005. The relationship has evolved from initial, small-scale, bilateral exchanges into a more complex, focused partnership which encourages the Indonesian Defense Forces (TNI) to take the lead in bilateral and multilateral exercises. TNI is a demonstrated partner in Humanitarian Assistance/Disaster Relief (HA/DR), Peacekeeping Operations (PKO), and leadership development. The Indonesian Government has demonstrated its desire to work multilaterally and be a partner nation through the TNI's participation in United Nations PKO missions in Lebanon, the Congo, and Sudan; leading the Global Peace Operations Initiative (GPOI) Capstone exercise, Garuda Shield; and taking the lead in the United Nations Force Headquarters in Cobra Gold.

Question. Do you favor increased U.S.-Indonesian military-to-military contacts? If so, under what conditions?

Answer. If confirmed, I would support increased military-to-military contact within the confines of existing legal restrictions and in close consultation with the Departments of State and Defense.

Question. What is your view of the commitment of the Indonesian military leadership to professionalization of its armed forces, adherence to human rights standards, improvement in standards of military justice, and cooperation with law enforcement

efforts to investigate and prosecute those military personnel accused of human rights abuses?

Answer. The Government of Indonesia continues to make progress in military reform. Early progress toward defense reform—separation of the police from the military, eliminating formal political roles for the TNI, increasing accountability, and human rights training—has been sustained. The 2002 Defense Law and the 2004 TNI Law formally codified the roles and responsibilities of the TNI as a mechanism to support, not replace, civilian government. It is worth noting the TNI's professional conduct during recently completed parliamentary elections. Continued “hard” reforms that the United States should continue to push for include full accountability for past human rights abuses, strengthening civilian control, putting the TNI fully “on budget”, and continued professionalism of the TNI officer corps.

If confirmed, I would support TNI's continued progress by encouraging professionalism within the military with particular emphasis on accountability and respect for human rights through bilateral security discussions, joint training, military assistance, and military training programs. U.S. interaction with TNI soldiers is the most effective method to encourage professionalism in the Indonesian military.

Question. What is your understanding of the extent to which the Indonesian Government is cooperating with the United States in the fight against terrorist networks?

Answer. Based on my current understanding, I believe the Government of Indonesia has cooperated closely and effectively with the United States and our allies in combating global terrorist networks in the region. The government has shown tremendous success in arresting and convicting terrorists.

Question. Do you believe increased engagement by U.S. Special Operations Forces, particularly in a foreign internal defense capacity, would be positive for the U.S.-Indonesian military-to-military relationship?

Answer. Engagement by all our forces has been steadily increasing as our military-to-military relationship continues to mature and expand. In every case, U.S. Special Operations Forces (SOF) inclusive, increased engagement has had significant positive impact on our growing partnership. Regardless of mission, our training focuses on reinforcing professional military practices to include respect for human rights and the rule of law.

Question. What do you believe is the biggest challenge to increasing special operations engagement in Indonesia?

Answer. Current U.S. military engagement with the Indonesian Special Forces is fairly robust; PACOM currently trains with the Indonesian Naval Special Forces, Indonesian Marine Special Forces, and Indonesian Air Force Special Forces. U.S. SOF engagement with key Indonesian Special Operations Forces (specifically the Indonesian Army Special Forces known as KOPASSUS) remains a challenge in light of current vetting requirements designed to preclude specific units previously linked to human rights abuses from participating in U.S.-funded training. In this regard, I am firmly committed to U.S. policies and laws on human rights and I will support all efforts to make sure that no U.S. money or training goes to those individuals who have abused human rights in the past.

AUSTRALIA

Question. The U.S.-Australia alliance remains strong and stands as a key component of regional security and stability.

Please describe your understanding of ongoing U.S. collaborative efforts with Australia, particularly with respect to intelligence, surveillance, and reconnaissance (ISR) and humanitarian assistance and disaster relief capabilities in the region.

Answer. In September 2007, the United States and Australia agreed to pursue three areas of Enhanced Defense Cooperation (EDC): ISR, HA/DR, and Joint Combined Training Capability (JCTC). The recent April 2009 Australia-U.S. Ministerial Consultations (AUSMINS) Joint Communiqué highlighted progress made on these enhanced defense cooperation initiatives.

The United States and Australia are partnering in an Enhanced ISR Initiative to increase interoperability in the employment of Australian and U.S. ISR systems to collect, fuse, and share intelligence to meet our mutual defense and national needs around the globe. Collaborative efforts have enabled both nations to efficiently employ their low density, high demand ISR assets and strengthen strategic partnership in the Pacific.

Combined efforts to develop a HA/DR capability that enhances our joint response to catastrophic regional events is progressing. Though neither PACOM nor the Australia Defence Force own HA/DR stocks, our coordination efforts reach to the inter-

agency, for a whole-of-government approach. As the HA/DR initial responders, our respective militaries improve coordination through existing agreements and arrangements and are exploring respective control-center linkages.

Question. What do you believe should be done to continue to promote cooperation between the United States and Australia and to further enhance interoperability?

Answer. The Australia-U.S. military relationship is mature and successful. Continued bilateral/multilateral training exercises, along with sustaining the ongoing range of formal and informal dialogues, will enhance interoperability between the United States and Australia.

The Joint Combined Training Capability (JCTC) is the third initiative under the EDC umbrella our countries agreed to in 2007. JCTC is a networked architecture linking U.S. and Australia simulations and live forces to create realistic combat training. The technology proven during our biannual, bilateral exercise Talisman Sabre in 2007 will be further explored this month in Talisman Sabre 09, as well as other exercises and operations this year. The JCTC directly enhances interoperability between our two militaries, reduces cost and improves unilateral and bilateral training quality.

THAILAND

Question. What is your view of the strategic importance of Thailand in the Asia-Pacific region?

Answer. Thailand remains a dependable U.S. ally and our 175-year bilateral relationship (our oldest in Asia) remains strong. Thailand was declared a Major Non-NATO Ally of the United States in 2003, and the Royal Thai Government (RTG) continues to provide strong support and close cooperation in combating sources of terrorism. Thailand is key for U.S. regional security goals and addressing regional challenges such as maritime security, counterterrorism, and disaster relief. Thailand provides important access to military facilities for force projection, military exercises, and humanitarian relief. Thailand hosts more exercises with the United States than any other Southeast Asian country, averaging over 40 per year, some of which are multilateral.

Question. If confirmed, what approach would you take to strengthening U.S. relationships with the Government of Thailand?

Answer. We will continue to expand our partnership in addressing global and regional security concerns and challenges. In recent years, Thailand has supported U.S. coalition efforts by dispatching military units to Afghanistan and Iraq, sent military observers to Indonesia to support the Aceh peace process, and pledged a peacekeeping battalion for the U.N. Mission in Darfur. If confirmed, I will encourage the RTG to continue joining international efforts promoting peace and stability. Additionally, we will use our military exercise program and training courses to maintain close relationships with Thai political, military, law enforcement and intelligence officials, build defense relations that promote specific U.S. security interests, and reinforce civilian control of the military.

TRANSNATIONAL THREATS IN THE PACIFIC COMMAND AREA OF RESPONSIBILITY

Question. Do you agree that drugs, human trafficking, and terrorism are transnational threats in the Asia-Pacific region?

Answer. I agree these are all extremely serious and interrelated threats to regional stability. Transnational crime and terrorism thrive on common enablers such as illicit transportation networks, weapons trafficking, corruption, and the financial underground. These threats impact political, social, and economic systems differently yet in equal measure by eroding the rule of law; undermining the legitimacy of governments and institutions; and shifting wealth and power to terrorist and criminal networks.

Question. If confirmed, how would you approach the prioritization of these threats? How would you assess the role of the U.S. military in addressing them, as well as the adequacy of resources to do so?

Answer. These threats are mutually supporting and must be addressed collectively with other U.S. Government agencies, foreign partners, and stakeholders such as NGOs and the private sector. We cannot achieve objectives against violent extremism without confronting criminal challenges that facilitate extremist and insurgent freedom of action. PACOM must continue to enhance cooperation with its partners to identify our comparative advantages and apply them cohesively toward achieving desired outcomes. The military priority is to further evolve its ability to support U.S. and partner nation law enforcement activities.

PACOM is currently limited in this endeavor by resources and authorities. Counterdrug programs are the primary means for providing military support to law

enforcement. Additional counterdrug funding, coupled with expanded authorities for other military-civilian engagement, would significantly enhance our contributions to overall effort.

MISSILE DEFENSE CAPABILITY IN THE PACOM AOR

Question. Do you believe the United States currently has sufficient missile defense capabilities to defend U.S. forward deployed forces and allies in the PACOM AOR against the existing ballistic missile threat posed by North Korea?

Answer. Yes, we currently have sufficient ballistic missile defense (BMD) capability to defend against the North Korean ballistic missile threat.

THEATER MISSILE DEFENSE FOCUS

Question. With the fiscal year 2010 budget request, Secretary Gates has refocused the Department's missile defense program more on effective theater missile defenses to protect our forward deployed forces, allies, and friends against existing short- and medium-range missile threats from nations like North Korea. The budget request would provide \$900 million in increased funding for more of the Terminal High Altitude Area Defense and Standard Missile-3 interceptors, and more Aegis BMD ships.

Do you agree with Secretary Gates' decision to increase the focus on effective theater missile defenses to defend our forces against existing regional missile threats from nations like North Korea?

Answer. Yes, I agree with the Secretary that regional and theater missile defense warrants increased focus. The preponderance of the threats we face in the Pacific are short, medium, and intermediate range ballistic missiles.

MISSILE DEFENSE RELATIONSHIPS

Question. What is your understanding of the current relationship between PACOM, NORTHCOM, and STRATCOM with respect to BMD deployments and operations, for both regional and long-range missile defense?

Answer. As defined in the Unified Command Plan 2008, Commander NORTHCOM is charged with defense of the Homeland that includes the continental United States and Alaska. Commander, PACOM is responsible for the defense of Hawaii and all other defended areas within the PACOM AOR. The two commands work together, either as the supported or supporting commander, contingent upon the threat and defended area, to defend their respective AORs. Commander, STRATCOM is the global synchronizer for planning and coordinating global missile defense.

AEGIS-CLASS SHIP ASSIGNMENTS

Question. What is your understanding of the arrangement whereby Aegis-class destroyers and cruisers of the U.S. Pacific Fleet will be made available, or dedicated, to BMD missions, and what impact will this arrangement have on the capability of PACOM and U.S. Pacific Fleet to fulfill their other missions involving Aegis-class ships?

Answer. Commander, PACOM and Commander, NORTHCOM have established a system of readiness conditions for theater and global missile defense, respectively. Aegis requirements are clearly delineated in these readiness conditions, and they provide the Commander, U.S. Pacific Fleet, the opportunity to integrate these requirements into his planning and resource allocation processes, ensuring his ability to fulfill the missile defense mission and the other Aegis specific missions for which he is responsible.

Question. If confirmed, how would you propose to strike an appropriate balance between missile defense and non-missile defense missions for ships of the U.S. Pacific Fleet?

Answer. If confirmed, I will promote and ensure close and frequent coordination between commanders with BMD responsibilities. Key to striking the right balance is PACOM's continued focus on integrating Patriot Advance Capabilities-3 (PAC-3), AN-TPY-2 Forward-Based X-Band Radar Transportable (FBX-T), and Terminal High Altitude Area Defense (THAAD) into the BMD architecture in order to improve its theater-wide BMD capability and reduce its reliance on Aegis ships. Finally, I will continue PACOM efforts to leverage potential allied contributions towards regional missile defense missions.

U.S. SPECIAL OPERATIONS COMMAND

Question. What is your understanding of the requirements for coordination and cooperation between U.S. Special Operations Command teams working to fulfill the

global terrorism mission, PACOM, and the U.S. mission chiefs in the relevant countries?

Answer. Coordination and cooperation between PACOM, ambassadors, and Special Operations Command teams remain essential to success in the global war on terror. Commander, PACOM assumes Operational Control (OPCON) of Special Operations Forces once those forces enter the AOR. In all cases, ambassadors remain responsible for activities in their respective country, to include theater security cooperation activities involving Special Operations Forces. As a result, the military commander exercising OPCON is required to coordinate activities with the respective ambassador.

Additionally, coordination with U.S. Special Operations Command and country ambassadors continues even after OPCON has been assumed by Commander, PACOM. In certain circumstances, U.S. Special Operations Command may retain OPCON of forces conducting specialized missions or crossing geographic combatant commander boundaries.

Question. If confirmed, would you seek to change any aspects of these requirements?

Answer. I do not foresee recommending changes in the current command and support relationships.

Question. Some have suggested that the rank of Theater Special Operations Commanders should be increased, as should the size of their respective staffs, to be commensurate with the level of special operations conducted in certain geographic regions.

Given the number of Special Operations personnel deployed in the PACOM theater in recent years, do you believe such measures should be considered?

Answer. In 2006, the Commander, Special Operations Command Pacific position was elevated from a one-star to two-star billet. At this time, I am comfortable with this rank structure. Additionally, Special Operations Command recently completed a manpower study that addressed SOF mission growth and the associated manpower to support. I am comfortable with this evolving process.

TECHNOLOGY PRIORITIES

Question. PACOM has been active in the Joint Concept Technology Development (JCTD) process and currently has several projects in the program, as well as cooperative activities with Service and Defense Advanced Research Project Agency (DARPA) research programs.

If confirmed, what steps would you expect to take to make your requirements known to the Department's science and technology (S&T) community to ensure the availability of needed equipment and capabilities in the long-term?

Answer. If confirmed, I will support efforts to strengthen the partnership between PACOM and the S&T community. In so doing, PACOM will help researchers better understand the context of our operational problems, while we gain better insight into solutions maturing through Service efforts. I plan to use the Integrated Priority List (IPL) as the foundation for these discussions. JCTDs will continue to be an important path for maturing S&T efforts into operational capabilities. Additionally, I will explore new S&T initiatives with key allies and partners across Asia Pacific to meet shared operational challenges and increase interoperability. Ultimately, I would like to see at least one JCTD or Rapid Technology Transition project against each of the IPL gaps and corresponding S&T capability development partnership projects with key allies and partners in the Asia Pacific region.

EXERCISES AND TRAINING

Question. What is your assessment of the current PACOM training and exercise program, including those designed to train personnel for peace and stability operations?

Answer. My assessment is the PACOM exercise program is very effective, as evidenced by successful disaster relief operations, responsive support to overseas contingency operations in the PACOM and CENTCOM AORs, and the improvements in the quality of our regional partners' peacekeeping forces.

I recognize the importance of a rigorous training and exercise program. If confirmed, PACOM training and exercises will continue to receive emphasis based on their value in maturing U.S. readiness and capabilities and improving our ability to operate with allies and partners in the region.

Question. Do you believe that the PACOM's training and exercise program currently has adequate funding and personnel resources?

Answer. I do not yet have a full appreciation of the funding and resource status of the PACOM training and exercise program. I am aware of the congressionally-

created Combatant Command Exercise Engagement (CE2) account that supports joint training. From my observations, this account has significantly enabled conduct of our training and exercise program. If confirmed, I will ensure resources are effectively used and advocate for additional resources when necessary.

Question. What are your views on how the PACOM, in concert with the U.S. Joint Forces Command (JFCOM), could improve its training and exercise program, including training and exercises for peace and stability operations?

Answer. I view collaboration with JFCOM and the continuous assessment such interaction fosters as central to improving the command's training program. I also anticipate the new Pacific Warfighting Center (PWC), when integrated into JFCOM's global grid of warfighting centers, will allow PACOM and JFCOM to continue to cooperatively develop transformational training concepts for traditional warfighting, peace and stability operations, irregular warfare, and a whole-of-government approach to mission execution. If confirmed, PACOM will continue to pursue interagency and multinational and multilateral participation in its training and exercise program to replicate the operating environment as realistically as possible.

Our GPOI training with partner nations continues to advance, successfully producing capable, ready forces to address peacekeeping-related requirements.

Question. The Commandant of the Marine Corps has expressed reservations, in the context of the planned move of U.S. marines from Okinawa to Guam, about the ability to do effective collective training of marines on Guam or in the Northern Marianas.

Do you share that concern?

Answer. I understand the Commandant's training concerns associated with the move to Guam. I believe continued collaboration with all of the elements involved with the move is critical to successfully working through the many issues associated with an endeavor of this magnitude.

PRISONER OF WAR/MISSING PERSONNEL OFFICE ACCOUNTING EFFORTS

Question. Recovery of remains of U.S. servicemembers from World War II, the Korean War, and the Vietnam war continues to be a very high priority and the Joint Prisoner of War/Missing Personnel Office Accounting Command (JPAC) is critical to recovery and identification efforts.

What is your understanding of the responsibilities of JPAC and its relationship to the Defense Prisoner of War (POW) and Missing Personnel Office (DPMO)?

Answer. JPAC conducts operations to support accounting of personnel unaccounted for as a result of hostile acts. PACOM provides higher headquarters support and direction, and interface between JPAC and the Joint Staff and OSD. The POW/DPMO exercises policy, control, and oversight within DOD. DPMO, and JPAC coordinate directly on routine POW/Missing in Action (MIA) issues.

Question. If confirmed, what steps, if any, would you take to enhance POW/MIA recovery efforts at JPAC and throughout the PACOM AOR?

Answer. JPAC resources and accounting efforts are focused not only in the PACOM region, but throughout the world. If confirmed, I will encourage full cooperation by the host nations where we conduct POW/MIA activities and continue to reinforce U.S. Government priorities and commitment in our accounting and recovery efforts with leaders of these countries and the respective U.S. ambassadors.

Question. If confirmed, what steps would you take to ensure the adequacy of resources available for this work?

Answer. If confirmed, it is my duty to ensure JPAC accomplishes their mission. I will work to ensure JPAC is fully resourced to accomplish its mission and pledge that we will not compromise the integrity of the mission or the ability of the U.S. Government to provide the fullest possible accounting to the families of our Nation's unaccounted. I am committed to maintain and expand, when requirements dictate, the scientific expertise and integrity inherent in JPAC today. PACOM will provide the JPAC Commander its full support in the conduct of its mission.

QUALITY OF LIFE

Question. Combatant commanders have an interest in the quality of life of military personnel and their families assigned within their AOR.

In your view, what is the role and responsibility of combatant commanders for the quality of life of personnel assigned to their AOR?

Answer. The combatant commander is a strong advocate for improving the quality of life for assigned personnel. The commander ensures that quality of life issues are articulated to community leaders, military installation commanders, DOD policymakers, and Members of Congress. The commander must also be a synergistic partner with the Office of the Secretary of Defense, AOR subunified commands, other

combatant commands, local industry, and government and non-DOD agencies to garner support and resources for quality of life programs.

Question. If confirmed, what would you do to enhance quality of life programs for military members and their families within the PACOM?

Answer. If confirmed, I would make quality of life for the servicemembers and families of PACOM one of my top priorities. People are our most important resource and constant focus on quality of life initiatives is vital to effectively implementing our “partnership, readiness, and presence” strategy in the region.

First and foremost, it would be my responsibility to commit resources and support funding for the broad array of initiatives and efforts that comprise an effective quality of life program. I would ensure adequate and appropriate access for our servicemembers to the high quality training, facilities, equipment, and technology necessary to ensure safe and effective mission completion. I would also ensure that our servicemembers and their families have access to the exceptional services, facilities, and programs they deserve given their commitment to our Nation (housing, medical/dental, commissary and exchange, child care, and morale, welfare, and recreations facilities).

Tailored and effective quality of life programs and services demonstrate our commitment to our personnel, both at home and deployed, by appropriately compensating them for their service and providing for their families. Our fighting forces deserve exceptional access to such quality of life programs and services and I stand committed to ensuring they get them.

Question. What is your view of the challenges associated with global rebasing on the quality of life of members and their families in the PACOM AOR (including adequate health care services and DOD schools)?

Answer. The biggest challenge will be preserving the quality of life for our servicemembers and their families while we realign our forces in theater.

Throughout the transition process, we should focus our efforts on maintaining quality housing, DOD schools, commissary and exchange services, medical/dental facilities, higher education, work life, family, and community support programs for our people. We should sustain current levels of service during the transformation ‘out’ phase and ensure these systems are in place before families arrive in the area.

Question. What steps do you believe need to be taken in Guam to ensure that adequate services are available to U.S. personnel and their dependents?

Answer. As we plan for increased military development in Guam, we must ensure organizations and agencies that provide services to U.S. personnel and their dependents are included in the planning process, and adequate funding for expansion of these services is provided.

The Joint Guam Program Office (JGPO), established by the Deputy Secretary of Defense and tasked with executing this comprehensive redevelopment effort, is leading the planning process and is engaging DOD components and other stakeholders to program and budget for adequate services for U.S. personnel and their dependents in Guam. If confirmed, I will ensure JGPO is fully informed of PACOM quality of life requirements on Guam.

HUMANITARIAN ASSISTANCE AND DISASTER RELIEF

Question. What should be the role for the U.S. military in humanitarian assistance and disaster relief in the Asia-Pacific region?

Answer. The role of the U.S. military during humanitarian assistance and disaster relief contingencies is to support U.S. efforts, specifically upon the request of host nations via U.S. Department of State, to save lives, alleviate human suffering, and preclude regional conflicts. The request for assistance is normally initiated by or through the U.S. ambassador, and is typically of short duration for immediate needs that cannot be fulfilled by the host nation or the international relief community.

Question. The Asia-Pacific region has experienced some of the worst natural disasters in recent history, including the 2004 Indian Ocean tsunami. In support of U.S. Agency for International Development and the U.S. Government’s broader relief efforts, DOD has played an instrumental role in the international response to recent Asian disasters (e.g. Burma, Philippines, Bangladesh, China) and is deeply involved in interagency disaster preparedness/mitigation planning efforts.

DOD HA/DR efforts have provided unique military capabilities (strategic airlift, logistics, transportation, communication) and have made significant contributions by saving lives, reducing human suffering, helping build partner capacities, and preventing crisis from becoming conflicts thereby increasing security and stability in the region. Such DOD contributions should continue in the Asia-Pacific region.

Are the resources necessary to fulfill this role currently available to the PACOM commander? If not, what additional resources are necessary?

Answer. The required resources are either currently assigned to PACOM or are readily available through normal mechanisms for providing logistical support or acquiring and providing specifically identified commodities, such as shelter, food, water, or medical supplies.

LAW OF THE SEA CONVENTION

Question. The United Nations Convention on the Law of the Sea is pending consideration in the United States Senate.

What is your view on whether or not the United States should join the Law of the Sea convention?

Answer. Like the Chairman of the Joint Chief of Staff and the Chief of Naval Operations, I strongly support U.S. accession to the Law of the Sea Convention.

Question. How would being a party to the Law of the Sea Convention help or hinder the United States' security posture in the Asia-Pacific region?

Answer. Being a party to the Law of the Sea Convention would enhance U.S. security posture in the Asia-Pacific region. As the Chief of Naval Operations has testified, the Law of the Sea Convention provides a robust legal regime for global operations by U.S. Armed Forces. Particularly important, it codifies navigation and over flight rights as well as high seas freedoms necessary for global mobility of our forces throughout the region. The Convention also codifies the right of warships to seize pirates and pirate vessels, the right of warships to approach and visit commercial vessels, the right to lay and maintain submarine cables (such as internet cables) on continental shelves, and the sovereign immunity of warships, public vessels, and military aircraft.

Many nations are already signatories to the Convention and I believe it is in our national security interests to do the same. Our current non-party status constrains our ability to develop enduring partnerships, inhibits our efforts to expand the Proliferation Security Initiative, and elevates the level of risk our sailors assume when they undertake their duties to preserve navigational rights and freedoms. I believe we ought to eliminate all barriers to collaboration and cooperation with like-minded partners in the maritime domain—accession to the Law of the Sea Convention would facilitate that process.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Commander, PACOM?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

JOINT POW/MIA ACCOUNTING COMMAND

1. Senator MCCAIN. Admiral Willard, the Joint Prisoner of War/Missing in Action (POW/MIA) Accounting Command (JPAC) plays a critical role in recovering and identifying the remains of missing military members. Recovery and identification of remains of U.S. servicemembers from World War II, the Korean War, and the Vietnam war continues to be a very high priority. The Under Secretary of Defense for Policy reported to Congress 2 years ago on the organization, management, and budgeting of JPAC, essentially supporting continuation of the status quo; however, proposals for organizational and resourcing changes aimed at increasing recoveries and identification of remains continue to be heard. What is your understanding of the responsibilities of JPAC and its relationship to the Defense POW and Missing Personnel Office?

Admiral WILLARD. JPAC conducts operations to support accounting of personnel unaccounted for as a result of hostile acts. U.S. Pacific Command (PACOM) provides higher headquarters support and direction, and interface between JPAC and the Joint Staff and the Office of the Secretary of Defense. The Defense POW/Missing Personnel Office (DPMO) exercises policy, control, and oversight within the Department of Defense (DOD). DPMO and JPAC coordinate directly on routine POW/MIA issues.

2. Senator MCCAIN. Admiral Willard, in your view is the current organization, management, and budget structure of JPAC optimal?

Admiral WILLARD. Given my limited exposure to the organization, I believe JPAC is currently structured and resourced to accomplish their current mission requirements. That said, if confirmed, I look forward to reviewing the results of the PACOM funded, comprehensive manpower study expected to be completed this September, to see what improvements, if any, can be made.

3. Senator MCCAIN. Admiral Willard, is JPAC, in your view, sufficiently resourced and funded to support DOD goals for identifying the remains of missing servicemembers?

Admiral WILLARD. I believe JPAC is resourced to accomplish their current mission requirements. With the exception of the Korean War (due to the suspension of operations in the Democratic People's Republic of Korea), JPAC has met the DOD goals established in October 2006. I understand the DPMO is in the process of developing policy guidance for resource allocation across conflicts which will provide guidelines for allocating resources to reduce cases on JPAC excavation list and determining goals for the number of identifications established per year. Once that guidance is issued, a review of the resources will be made to ensure JPAC can meet the new requirements.

4. Senator MCCAIN. Admiral Willard, if confirmed, would you support exploring new organizational structures, methods, and procedures, to include outsourcing, to increase JPAC's capabilities?

Admiral WILLARD. I do support exploring improvements in the organizational structure, methods, and procedures, to include outsourcing, that show promise of increasing JPAC's capabilities.

5. Senator MCCAIN. Admiral Willard, what, if any, specific steps would you favor to improve accomplishment of the mission of JPAC and other organizations involved in the POW/MIA accounting mission?

Admiral WILLARD. At this time I do not have any specific recommendations, but I am looking forward to reviewing the results of the PACOM funded, comprehensive manpower study of JPAC due out this September. If confirmed, I intend to review their analysis and recommendations, and then take those steps that will result in an improvement of our ability to accomplish this important mission.

[The nomination reference of ADM Robert F. Willard, USN, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 1, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the United States Navy to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be Admiral

ADM Robert F. Willard, 1564.

[The biographical sketch of ADM Robert F. Willard, USN, which was transmitted to the committee at the time the nomination was referred, follows:]

DEPARTMENT OF THE NAVY,
OFFICE OF THE CHIEF OF NAVAL OPERATIONS,
2000 NAVY PENTAGON,
Washington, DC, May 20, 2009.

HON. CARL LEVIN, *Chairman*
Senate Armed Services Committee,
United States Senate,
Washington, DC.

DEAR MR. CHAIRMAN: The President, under the provisions of section 601, title 10, U.S.C., has submitted to the Senate the nomination of ADM Robert F. Willard, USN, for reappointment to the grade of admiral.

Admiral Willard is presently serving as Commander, United States Pacific Fleet. He will be assigned as Commander, United States Pacific Command. He is 58 years of age.

This action will not result in the Navy exceeding the number of authorized four-star positions.

For the information of the committee, I am enclosing a career resume on Admiral Willard which includes a summary of his joint duty assignments.

Most respectfully,

R.S. ERSKINE,
Director, Flag Officer
Management and Distribution.

cc: The Honorable John McCain,
Ranking Member,
Senate Armed Services Committee,
United States Senate,
Washington, DC.

TRANSCRIPT OF NAVAL SERVICE FOR ADM ROBERT FREDERICK WILLARD, USN

05 DEC 1950	Born in Bell, CA
30 JUN 1969	Midshipman, U.S. Naval Academy
06 JUN 1973	Ensign
06 JUN 1975	Lieutenant (junior grade)
01 JUL 1977	Lieutenant
01 JUL 1982	Lieutenant Commander
01 OCT 1987	Commander
01 SEP 1992	Captain
01 SEP 1998	Rear Admiral (lower half)
10 AUG 2000	Designated Rear Admiral while serving in billets commensurate with that grade
01 JUN 2001	Rear Admiral
18 JUL 2002	Vice Admiral
18 MAR 2005	Admiral, service continuous to date

Assignments and duties:

	From	To
Naval Aviation Schools Command (DUINS) (Student)	July 1973	June 1974
Training Squadron Two Five (Student)	June 1974	Nov. 1974
Fighter Squadron One Two Four (Ready Replacement Pilot)	Dec. 1974	Dec. 1975
Fighter Squadron Two Four (Legal Officer)	Jan. 1976	June 1978
Fighter Squadron One Two Four (Quality Assurance Officer)	June 1978	Oct. 1981
Fighter Squadron Two (Operations Officer)	Oct. 1981	June 1984
Navy Fighter Weapons School Naval Air Station Miramar, CA (Operations Officer)	July 1984	May 1987
XO, Fighter Squadron One Two Four	May 1987	Jan. 1988
CO, Fighter Squadron Five One	Jan. 1988	Aug. 1990
Naval Nuclear Power School (DUINS)	Oct. 1990	May 1991
Naval Nuclear Propulsion Training Unit (DUINS)	June 1991	Nov. 1991
Naval Reactors, Department of Energy (DUINS)	Nov. 1991	Apr. 1992
XO, USS <i>Carl Vinson</i> (CVN 70)	May 1992	Nov. 1993
Commander, Amphibious Group Three (Assistant Operations/Readiness Officer)	Nov. 1993	Sep. 1994
CO, USS <i>Tripoli</i> (LPH 10)	Sep. 1994	June 1995
Naval Reactors, Department of Energy (DUINS)	July 1995	July 1995
CO, USS <i>Abraham Lincoln</i> (CVN 72)	July 1995	Mar. 1998
Office of the CNO (TEM DU)	Mar. 1998	Sep. 1998
Joint Staff (Deputy Director, Current Readiness and Capabilities) (J-38)	Sep. 1998	Sep. 2000
Commander, Carrier Group Five	Sep. 2000	Oct. 2001
Commander, U.S. Pacific Fleet (Deputy and Chief of Staff)	Oct. 2001	July 2002
Commander, Seventh Fleet	July 2002	Aug. 2004
Joint Staff (Director, Force Structure, Resources and Assessment, J8, Joint Staff)	Aug. 2004	Mar. 2005
Vice Chief of Naval Operations	Mar. 2005	Apr. 2007
Commander, U.S. Pacific Fleet	Apr. 2007	To Date

Medals and awards:

Defense Distinguished Service Medal
 Distinguished Service Medal
 Legion of Merit with two Gold Stars
 Meritorious Service Medal with two Gold Stars
 Navy and Marine Corps Commendation Medal with three Gold Stars
 Navy and Marine Corps Achievement Medal
 Joint Meritorious Unit Award
 Navy Unit Commendation
 Meritorious Unit Commendation
 Navy "E" Ribbon with three Es
 National Defense Service Medal with two Bronze Stars
 Armed Forces Expeditionary Medal with three Bronze Stars
 Vietnam Service Medal with one Bronze Star
 Southwest Asia Service Medal with one Bronze Star
 Global War on Terrorism Service Medal
 Korean Defense Service Medal
 Sea Service Deployment Ribbon with one Silver Star and one Bronze Star
 Navy and Marine Corps Overseas Service Ribbon with one Bronze Star
 Expert Rifleman Medal
 Expert Pistol Medal

Special qualifications:

BA (Physics), U.S. Naval Academy, 1973
 Designated Naval Aviator, November 1974
 Designated Navy Nuclear Propulsion, April 1991
 Capstone, 1998-2

Personal data:

Wife: Donna Joy of Falls Church, VA
 Children: Jennifer Lynn Willard (Daughter), Born: 25 August 1972
 Mark R. Willard (Son), Born: 15 June 1977
 Byron F. Willard (Son), Born: 15 June 1977

Summary of joint duty assignments:

Assignment	Dates	Rank
Joint Staff (Deputy Director, Current Readiness and Capabilities) (J-38)	Sep. 98-Sep. 00	RDML
Joint Staff (Director, Force Structure, Resources and Assessment, J8, Joint Staff)	Aug. 04-Mar. 05	VADM

[The Committee on Armed Services requires certain senior military officers as determined by the committee, to complete a form that details the biographical, financial, and other information of the nominee. The form executed by ADM Robert F. Willard, USN, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228
Washington, DC 20510-6050
(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM
BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Robert F. Willard.
2. **Position to which nominated:**
Commander, U.S. Pacific Command.
3. **Date of nomination:**
June 1, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
December 5, 1950; Bell, CA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Donna Joy (Yelverton) Willard.
7. **Names and ages of children:**
Jennifer Lynn Willard, 36.
Bryan Frederick Willard, 31.
Mark Robert Willard, 31.
8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.
None.
9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
None.
10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Naval Academy Alumni Association; Association of Naval Aviators; U.S. Naval Institute; Navy League of the United States; and the Tailhook Association.
11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding

service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

COMSEVENTHFLT: Award from Emperor Japan and award from President Republic of Korea (inadvertently left off of the 2007 questionnaire).

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify before any duly constituted committee of the Senate? Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ROBERT F. WILLARD.

This 20th day of March, 2009.

[The nomination of ADM Robert F. Willard, USN, was reported to the Senate by Chairman Levin on July 29, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 31, 2009.]

**NOMINATIONS OF HON. JOHN M. McHUGH TO
BE SECRETARY OF THE ARMY; DR. JOSEPH
W. WESTPHAL TO BE THE UNDER SEC-
RETARY OF THE ARMY; AND JUAN M. GAR-
CIA III TO BE ASSISTANT SECRETARY OF
THE NAVY FOR MANPOWER AND RESERVE
AFFAIRS**

THURSDAY, JULY 30, 2009

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:39 a.m., in room SD-106, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Reed, Akaka, E. Benjamin Nelson, Webb, McCaskill, Udall, Hagan, Begich, McCain, Inhofe, Chambliss, Thune, and Collins.

Also present: Senators Schumer, Cornyn, and Hutchison.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Jonathan D. Clark, professional staff member; Jessica L. Kingston, research assistant; Terence K. Laughlin, professional staff member; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; and William K. Sutey, professional staff member.

Minority staff members present: Joseph W. Bowab, Republican staff director; Daniel A. Lerner, professional staff member; Lucian L. Niemeyer, professional staff member; Christopher J. Paul, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Jennifer R. Knowles and Paul J. Hubbard.

Committee members' assistants present: Christopher Griffin and Todd M. Stein, assistants to Senator Lieberman; Carolyn A. Chuhta, assistant to Senator Reed; Nick Ikeda, assistant to Senator Akaka; Ann Premer, assistant to Senator Ben Nelson; Patrick Hayes, assistant to Senator Bayh; Gordon I. Peterson, assistant to Senator Webb; Tressa Steffen Guenov, assistant to Senator McCaskill; Jennifer Barrett, assistant to Senator Udall; Roger Pena, assistant to Senator Hagan; Lindsay Young, assistant to Senator Begich; Brandon Andrews and Anthony J. Lazarski, assistants to Senator Inhofe; Lenwood Landrum and Sandra Luff, assistants to Senator Sessions; Clyde A. Taylor IV, assistant to Senator

Chambliss; Erskine W. Wells III, assistant to Senator Wicker; and Chip Kennett, assistant to Senator Collins.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody.

The committee meets today to consider the nominations of Representative John McHugh to be Secretary of the Army, Dr. Joseph Westphal to be Under Secretary of the Army, and Juan Garcia III to be Assistant Secretary of the Navy for Manpower and Reserve Affairs.

Each of our nominees has a long history of public service. Congressman McHugh has represented the people of northern New York with great distinction for over 16 years, serving on the House Armed Services Committee (HASC), as well as chair and ranking member of the Military Personnel Subcommittee and most recently as the ranking member of the full committee.

Dr. Westphal has extensive experience in education and government, including service on the staff of the House Budget Committee, as a policy advisor at the Environmental Protection Agency, and as Assistant Secretary of the Army for Civil Works.

Mr. Garcia has a lifelong association with the Navy as the son of a naval aviator and is one himself through his own 12 years of service. After leaving the Navy in 2004, Mr. Garcia has practiced law and from 2006 to last year served as a member of the Texas House of Representatives for the people of south Texas.

We welcome our nominees. We especially welcome their families to today's hearing. Senior military officials put in long hours every day. We appreciate the sacrifices that our nominees and their families are willing to make to serve our country. As is our tradition and our pleasure, we look forward to the introductions of family members by our nominees for those members who are with us today when the nominees make their opening statements.

If confirmed, Representative McHugh and Dr. Westphal will assume leadership of the Army at a difficult time. Over the last 7 years, the Army has risen to every challenge and inspired this Nation with its courage, commitment, and honor in the most dangerous and difficult circumstances. Nothing brings the people of the United States together, regardless of ideology or world views, more than the deep appreciation and support that we all share for America's troops and their families.

The many sacrifices, large and small, of soldiers and their families weigh upon all Americans, and we are reminded of that time and time again as in the President's announcement a few days ago that the Medal of Honor will be awarded posthumously and presented to the parents of Sergeant 1st Class Jared Monti for heroism above and beyond the call of duty at the cost of his own life in Afghanistan.

Leadership at every level from sergeants to secretaries of soldiers and their families is an awesome responsibility, and the Nation's expectations of these nominees could not be higher.

If confirmed, Mr. Garcia will assume leadership of Navy personnel policies and programs at a challenging time. The Navy has halted its planned Active Duty end strength decreases and continues to struggle, as do all the Services, with the rising costs of

personnel entitlements and military health care. The medical and dental readiness of Reserve personnel and the recruiting and retention of medical professionals remain persistent challenges. These are difficult issues that are going to require Mr. Garcia's personal and total attention.

We look forward to the testimony of our nominees and to learn more about their ideas on how to deal with the many issues that confront the Army and the Navy.

Senator McCain.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you, Mr. Chairman, and I want to thank our colleagues, Senators Collins, Schumer, Hutchison, and Cornyn, who are here on behalf of the nominees. I will make my remarks brief and look forward to hearing from them and the witnesses.

I welcome them and their families, and I thank them for their willingness to serve in these positions of great responsibility at a critical time in our history. Congressman McHugh, Dr. Westphal, and Mr. Garcia are all well qualified to serve in these positions of responsibility in the Departments of the Army and Navy.

I have known Congressman McHugh since 1993. I greatly admire his record of service to the people of northern New York and the military men and women in his district. Sixteen years on the HASC makes Congressman McHugh uniquely qualified to understand the challenges the Army faces today.

I have to say, though, there is an aspect that I find troubling and that is a record of accepting campaign contributions from lobbyists like Paul Magliocchetti and his PMA lobbying firm from which Congressman McHugh accepted more than \$160,000.

The PMA lobbying group is under investigation by the Federal Bureau of Investigation which raided Magliocchetti's office and home last March looking for evidence of campaign finance violations and illegal dealings with lawmakers. There is no doubt in my mind that there is a lot more to be learned about PMA and their lobbying activities and earmarks.

I have no reason to believe that Congressman McHugh behaved improperly in any way, but it does create an appearance problem and one that I do not agree with. As I have said many, many times on the floor of the U.S. Senate this kind of earmarking breeds corruption which then lowers the opinion and reputation of the Congress of the United States. I do not view this as disqualifying Congressman McHugh. I think he is uniquely qualified, but it does blemish what otherwise is an exemplary record of public service.

With respect to the Department of the Army, I hope I speak for all members of the committee when I say I could not be prouder of the men and women who serve, and this Nation owes an enormous debt of gratitude to the Army which has carried the fight since 2001 and continue to do so today. I particularly want to express my concern for Private First Class Bowe Bergdahl and his family and note that he is in our thoughts and prayers.

Dr. Westphal, who is nominated for the position of Under Secretary of the Army, served as Assistant Secretary of the Army for Civil Works and for a brief period in 2001 as Acting Secretary of the Army. He brings a wealth of experience to this position.

Mr. Garcia is nominated to be the Assistant Secretary of the Navy for Manpower and Reserve Affairs. Coming from a Navy family with 13 years of Active Duty as a naval aviator and ongoing service in the Naval Reserve, he is extremely well qualified for this position.

I thank Dr. Westphal, Mr. Garcia, and Congressman McHugh and their families for their willingness to serve.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you.

Senator Inhofe wanted to make a statement in the record at this point.

**STATEMENT OF HON. JAMES M. INHOFE, U.S. SENATOR FROM
THE STATE OF OKLAHOMA**

Senator INHOFE. Yes. Just one brief comment, Mr. Chairman. I want all three of our nominees to know that I have a Senate Environment and Public Works Committee hearing where I am the ranking member and attendance is required at 10 o'clock, so I will not be here.

I just want you to know that two of these nominees, Mr. Chairman, I know very well. I see Steve Buyer sitting next to John McHugh back there, and I used to sit between the two of them on the HASC and in those long, long meetings, got to know them very well. I am delighted and I am looking forward to working with Congressman McHugh.

Something you might not know, but Joe Westphal was with Oklahoma State University (OSU) for many years. I have known him for 20 years, and I am just delighted I will be working with him again. I wanted to make sure he gets confirmed in time to go to the opening game of OSU and Georgia, and that should be a lot of fun.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you.

We are delighted we have four of our colleagues here to make introductions this morning. They have taken time from their extraordinarily busy schedules these days to do this. I know our nominees are grateful, and we are too, that they will be here. Let me start with Senator Schumer who is going to introduce his fellow New Yorker, Representative McHugh.

**STATEMENT OF HON. CHARLES E. SCHUMER, U.S. SENATOR
FROM THE STATE OF NEW YORK**

Senator SCHUMER. Thank you, Mr. Chairman. I want to thank you, Ranking Member McCain, and all of my colleagues for the honor—and it is a true honor for me—to support the nomination of John McHugh as Secretary for the U.S. Army.

I want to welcome members of the McHugh family who I know are especially proud to be here today in support of this important nomination.

John McHugh is my friend, my colleague, a man of great integrity, an outstanding New Yorker, and a great American who exemplifies so many of the qualities that make the American people a great people and make America a great country.

He is a nominee who is more than qualified for the post of Secretary of the Army for many reasons, but there are three in particular: patriotism, service, and leadership. He is a nominee with stellar credentials and a commitment to our country that is unwavering. John's pride in his country is only matched by the pride of those such as myself who are delighted to call him a fellow New Yorker. Just to watch John with the troops at Fort Drum, which is in his congressional district, and of course, in New York—and we are so proud of the 10th Mountain Division and the men and women who serve—and to see how much they admire him and how much he cares for them is no better testament for why he deserves to be supported for this position.

John was born in Watertown, NY. He is one of Watertown High School's most famous graduates. He went on to graduate from Utica College in 1970, received a Bachelors degree and than a Masters at the Nelson A. Rockefeller Graduate School of Public Affairs at the State University of New York in Albany. He began his commitment to public service as a young man while serving as an assistant to Watertown's city manager, then served as an aide to one of the great State Senators from New York, Douglas Barclay, from 1977 to 1984, when he was elected as a successor, served as a member of the State Senate until his election to the U.S. House of Representatives in 1992. He would go on to be reelected eight times with no substantive opposition, even running unopposed in 2002.

Prior to his nomination, as this committee well knows, he served as the ranking member on the HASC and a senior member of the House Oversight and Government Reform Committee, was also a member of the House Permanent Select Committee on Intelligence from 2005 to 2007 where he worked diligently to ensure our Nation stayed on the cutting edge of global intelligence and counter-intelligence gathering.

While in Congress, again as the committee well knows, John became known as a champion of our men and women in uniform. He has demonstrated a steadfast commitment to keeping America's Army the best trained, the best equipped, and the best the world has ever seen. I can personally attest as well, Mr. Chairman, having worked with him, just what a fine and decent human being he is. He is just a fine person. Whether we were working to develop the old Plattsburg Air Force Base, fighting to protect the Adirondacks from acid rain, establishing a new border station at Champlain, he was diligent, put in every minute of time that was necessary. He was intelligent. He got the things done and he did it all with grace and a quiet ease that was always, always impressive.

There is one accomplishment that I think truly sums up his commitment to both the military and the community that he serves and that was the creation of the Fort Drum regional health care planning organization. Fort Drum is one of the few military installations without its own hospital. John, recognizing that more needed to be done to protect our soldiers' health while staying at the base, helped create a pilot program that created health care arrangements between the base and the local health centers. The program was so successful it was expanded, and now bases across the country have the opportunity to set up and take advantage of similar programs.

I would like my entire statement to be read into the record, Mr. Chairman.

But I am just so proud that the President chose Congressman McHugh, so proud that he is willing to serve in this important post, and proud to be here in support of his nomination today.

[The prepared statement of Senator Schumer follows:]

PREPARED STATEMENT BY SENATOR CHARLES E. SCHUMER

Thank you, Mr. Chairman and Ranking Member McCain.

Welcome to the members of the McHugh family, who I know are especially proud to be here today in support of this most important nomination.

John Michael McHugh is a nominee who is more than qualified for the post of Secretary of the Army for many reasons, but here are three in particular: patriotism, service, and leadership.

He is a nominee with stellar credentials and a commitment to our country that is unwavering. John's pride in his country is only matched by the pride of those such as myself who are delighted to call him a fellow New Yorker.

John was born in Watertown, New York and is one of Watertown High School's most famous graduates. He went on to graduate from Utica College in 1970 with a Bachelor's degree and received a Master's degree from the Nelson A. Rockefeller Graduate School of Public Affairs at the State University of New York.

John began his commitment to public service as a young man while serving as an assistant to Watertown's city manager from 1971 to 1977. He then served as an aide to State Senator H. Douglas Barclay from 1977 to 1984, when he was elected as his successor. He served as a member of the New York State Senate until his election to the U.S. House of Representatives in 1992. Impressively, he would go on to be reelected eight times with no substantive opposition, even running unopposed in 2002.

Prior to his nomination to be Secretary of the Army, John served as the ranking Member on the House Armed Services Committee, and also as a senior member of the House Oversight and Government Reform Committee.

Additionally, he was a member of the House Permanent Select Committee on Intelligence from 2005 to 2007 where he worked to ensure that our Nation stayed on the cutting edge of global intelligence and counterintelligence gathering.

While in Congress John became known as a champion of our men and women in uniform. He has demonstrated a steadfast commitment to keeping America's Army the best trained, the best equipped, and the best the world has ever seen.

John and I have been friends and partners in government for almost two decades, so I can personally attest to what a fine and decent human being he is. Whether we were working to develop the old Plattsburg Air Force Base, fighting to protect the Adirondacks from acid rain, or establish a new border station at Champlain, John has shown time and time again his intelligence, his grace, and his desire to serve those that elected him to office.

There is one accomplishment that I think truly sums up John's commitment to both the military and the community that he serves, and that was the creation of the Fort Drum Regional Health Care Planning Organization. Fort Drum is one of the few military installations without its own hospital. The congressman, recognizing that more needed to be done to protect the soldiers' health while staying at the base, helped create a pilot program that created health care arrangements between the base and local health centers.

This pilot program was so successful, it was expanded—and now bases across the country have the opportunity to set up and take advantage of similar programs.

With John's confirmation, New York will be losing a tremendous public servant—but our loss will be America's gain, and I am confident that he will serve his country as well as he served the residents of the North Country and Central New York.

I commend President Obama for selecting such a fine nominee and a leader from the U.S. Congress who is a shining example of the belief that our country's partisan disputes about foreign policy and military power should cease at our Nation's shores.

Mr. Chairman, let me add that we would be hard pressed to find a better candidate than the one sitting alongside me today to be our Nation's next Secretary of the United States Army.

I look forward to this hearing, and to Congressman McHugh's swift confirmation.

Chairman LEVIN. Thank you very much, Senator Schumer.

We know that each of you have tough schedules. Each of you are free to leave if you want after your own introductions.

Senator Collins, you have a fellow Mainer to introduce here?

**STATEMENT OF HON. SUSAN COLLINS, U.S. SENATOR FROM
THE STATE OF MAINE**

Senator COLLINS. Thank you, Mr. Chairman.

I do not think I have ever heard Senator Schumer speak so well of a Republican before in my life. [Laughter.]

It really was just an amazing tribute.

Senator SCHUMER. We all grow and evolve. [Laughter.]

Senator COLLINS. Mr. Chairman, it is a great privilege to appear before you today to introduce Dr. Joseph Westphal, the President's nominee to be the Under Secretary of the Army.

The people of Maine are proud of his strong ties to our State, and I am grateful for his remarkable career of service to our Nation.

The challenging and complex responsibilities of this position require a person with the expertise in manpower, personnel management, reserve affairs, installations, environmental issues, weapons systems and equipment acquisition, communications, and financial management. It requires the ability to foster a spirit of cooperation with other branches of Service within the Pentagon, with our international allies, and with Congress. Above all, this position requires an individual as dedicated to our soldiers as they are to serving our country.

Dr. Westphal is that person. He is a true renaissance man. In addition to being a scholar, a teacher, and an academic leader, he is a public servant with a distinguished career in such Departments as the Army, the Department of the Interior, and the Environmental Protection Agency (EPA). He has spent more than 10 years working in Congress on issues related to the environment, trade, and the economy.

We Mainers came to know Dr. Westphal during his tenure from 2002 until 2006 as the Chancellor of the University of Maine's system. He played a critical role in introducing the Department of Defense (DOD) to scientific researchers in Maine and throughout the Northeast. This partnership has resulted in many advancements, including the development of a ballistic protection system for tents used by our troops in Iraq and Afghanistan. It is typical of Dr. Westphal that he saw this need for our troops and set out to develop the means of providing them with greater force protection.

Dr. Westphal's academic career includes a professorship of political science at the University of Maine, as well as 12 years on the faculty of Oklahoma State University, as Senator Inhofe noted. Most recently, he established the Environmental Studies program at The New School in New York City until he again answered the call to government service as a member of President Obama's national security transition team.

Dr. Westphal's previous government service is perhaps most relevant to this nomination and it has been exemplary. He served as Assistant Secretary of the Army for Civil Works, as the chairman indicated, from 1998 to 2001 and as Acting Secretary of the Army for June and July of 2001. Prior to that, he was a senior policy advisor for water resources at the EPA and Special Assistant to the

Secretary of the Interior. His congressional experience includes serving on the senior staff of the House Budget Committee, as special assistant to Senator Thad Cochran, and as executive director of the Congressional Sunbelt Caucus.

Dr. Westphal has received numerous awards during his academic and public career. These include the Decoration for Distinguished Civilian Service, the highest civilian award given by the Department of the Army.

The skills and experience Dr. Westphal brings to this position are matched only by his energy and commitment. Mr. Chairman, colleagues on the committee, it is indeed an honor to endorse the nomination of Dr. Joseph Westphal to be Under Secretary of the Army. Thank you, Mr. Chairman.

I would also ask to insert the statement of my colleague from Maine into the record at this point. Thank you.

[The prepared statement of Senator Snowe follows:]

PREPARED STATEMENT BY SENATOR OLYMPIA J. SNOWE

Chairman Levin, Senator McCain, and distinguished members of the Senate Committee on Armed Services, it is my distinct privilege to express my strongest support for the President's nominee for Under Secretary of the Army at the Department of Defense—an outstanding fellow Mainer, Dr. Joseph Westphal.

I would also like to welcome and acknowledge Dr. Westphal's wife of 41 years, Linda. I'm sure you, along with your son James, and daughters Amy, Heather, and Lindsay, are all extremely proud of Dr. Westphal's accomplishments and I understand how much this must mean to Dr. Westphal as well.

Mr. Chairman, the operational tempo of the U.S. Army remains high as the wars in Iraq and Afghanistan continue. As this committee understands, over the next several months, nearly 145,000 soldiers will be deployed to those 2 countries, as the number of troops in Afghanistan rapidly increases to approximately 60,000 and troop levels decline in Iraq as we begin a safe and secure redeployment from that country. The State of Maine alone is certainly contributing mightily to these operations, deploying as many as 40 percent of our National Guard soldiers to the region—and for the lion's share of our units these are multiple deployments—and some of our brave men and women in uniform incredibly are preparing for their fourth tour of duty.

While the total number of soldiers deployed will ultimately begin to decrease as the pace of our soldiers returning from Iraq increases, there is no question that 7 years of war have had an impact on the readiness of our Army. Army Chief of Staff General George Casey, just 2 months ago explained to this committee that the Army remains out of balance, that we have been consuming the readiness of the Army faster than it can be sustained, and that our soldiers, their families, and supporting communities are stressed due to lengthy and repeated redeployments. Dwell time in the Army, a key metric for restoring and building readiness, for example, remains well below the 1-year-deployed, 2-years-at-homestation that is the Army's goal. Clearly, there is pivotal work to be done.

The nomination of Dr. Westphal will provide an individual with strong knowledge of the Army who will bring a fresh set of thinking to the leadership guiding the 1.3 million members of the Army team, including the patriots of the regular Army, Army Reserve, Army National Guard, and the civilian workforce, stationed in 80 countries through this crucial rebalancing period.

I first met Dr. Westphal when he worked for Senator Thad Cochran and later during my tenure on this committee when he was Assistant Secretary of the Army for Civil Works from 1998 to 2001 and Acting Secretary of the Army in 2001. It was during this period that I became most familiar with his exemplary work ethic, tremendous intellect and impeccable character. From his prior service on the Army team, he is fully aware of the complexities and nuances of leadership in the Army, and will be a "full up round" from day one to lead the Army during this extraordinary time.

In the intervening years since his service with the Defense Department, Dr. Westphal was a member of the faculty at the University of Maine, and, from 2002 to 2006, served as its esteemed chancellor. I was pleased when he was asked to serve in this highly challenging position as Dr. Westphal's strong academic back-

ground and his years of service in the Federal Government provided him a unique set of experiences that would enable him to lead a large university system.

While with the University of Maine, Dr. Westphal immediately began a significant effort to redesign the business processes system-wide and to modernize what had become a decentralized and inefficient organization. That necessary change was implemented and is now operating smoothly. With his Army roots, he also was focused on enhancing the quality of life for members of the Army team who reside in Maine. Clearly, he is a man who looks beyond the moment, who thinks about tomorrow and what is best for those he represents.

Mr. Chairman and members of the committee, Dr. Westphal is an individual of tremendous energy, enthusiasm for service to our country, and dedication to our Nation and its finest principles. Dr. Westphal is an individual of the highest caliber, and I have no doubt that we are entrusting an extraordinary individual to a position of enormous responsibility, second only to the Army Secretary. I am confident that the new Army Secretary, the Honorable John McHugh of New York, also an individual of vision and talent whom I had the pleasure of serving with in the House of Representatives in the 103rd Congress, will rely on the thoughtful, reasoned counsel of Dr. Westphal to ensure that America's Army remains the best trained and best equipped in history.

I am pleased Dr. Westphal has without hesitation accepted this new call to service with the Army at this critical moment in the Army's history. I am confident that he will bring the same level of integrity, hard work, and openness to this important position in the Department of the Army that he brought to every organization with which he has served. I cannot express enough my gratitude to Dr. Westphal, his wife Linda, and their family, for their sacrifice and service to our great country.

I commend this committee for providing Dr. Westphal the opportunity to demonstrate that he will work tirelessly on behalf of the men and women of the Army team to ensure they have the training, the equipment, and all of the resources required for success in current operations—as well as to defend this nation as these patriots have been ready to do since first organized under General George Washington on June 14, 1775—some 234 years ago.

There is no question, Dr. Westphal will also work with equal dedication and vitality on behalf of the families and communities that constitute the Army family, for they too are fundamental to the health, readiness, and future well-being of the Army. I urge the members of this committee to report his nomination favorably for swift consideration by the full Senate. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Collins. The only important note that you missed was that he also is a Detroit Red Wings fan, and that means his nomination will be expedited, I can assure you. [Laughter.]

Senator Hutchison.

**STATEMENT OF HON. KAY BAILEY HUTCHISON, U.S. SENATOR
FROM THE STATE OF TEXAS**

Senator HUTCHISON. Thank you, Mr. Chairman. I am here to introduce someone that I know and think so highly of, Juan Garcia, to be the Assistant Secretary of the Navy for Manpower and Reserve Affairs.

Before I talk about Mr. Garcia, I did want to add my congratulations and also urge the support for my friend, John McHugh. I serve on the West Point Board of Visitors with Congressman McHugh and he has been so helpful and terrific on that board. I know he will make a great Secretary of the Army.

Juan Garcia III. You have given most of his bio, but I met him when he was in the Texas State legislature and did a wonderful job there. I wanted to also add for the record that he is a graduate of the University of California, Los Angeles, Harvard Law School, and Harvard's Kennedy School of Government. He will introduce his family I know, but his wife Denise is also a fellow Harvard Law School classmate.

I think that he has such a great qualification for this job because of his clear love for the Navy, being a second generation to serve in the Navy in his family, and his brother, who is here, is an Active Duty marine. I just want to say that he has served, as you pointed out, for 12 years. He was in Patrol Squadron 47 out of Naval Air Station Barber's Point, HI, completed deployments in the Persian Gulf and the Western Pacific, U.S. Naval Forces Europe in London, England, and was part of Operation Allied Force during hostilities in Kosovo. So he really has the wide range of experience.

He also served as a White House fellow from 1999 to 2000, just a great honor and experience for him.

He left Active Duty in 2004 but continues to be in the Navy Reserve and is currently the commanding officer of Reserve Training Squadron 28 at Naval Air Station Corpus Christi.

I know him. I know he is going to do a great job for our country, and I congratulate him on President Obama's selection and I urge his confirmation by this committee and by the Senate.

Chairman LEVIN. Thank you very much, Senator Hutchison.
Senator Cornyn.

STATEMENT OF HON. JOHN CORNYN, U.S. SENATOR FROM THE STATE OF TEXAS

Senator CORNYN. Thank you, Mr. Chairman.

I join Senator Hutchison in introducing Juan Garcia to my Senate colleagues. As has been pointed out, he will serve in a key position at the Pentagon. The Assistant Secretary of Navy for Manpower and Reserve Affairs is an advocate for our sailors and marines deployed all over the globe, our citizen sailors in the Navy Reserve and all of their family members. These brave men and women have met every challenge that has been given to them. They are supporting two wars in Afghanistan and Iraq and they are in a position to respond to natural disasters and security crises all around the world. They are fulfilling their mission for which the U.S. Navy and the U.S. Marine Corps were founded, to protect all of us every day in every way. These heroes and their families help keep our country free and they deserve our full support. As Assistant Secretary, Juan Garcia will be responsible for ensuring that they receive that support.

I would note that Mr. Garcia hails from Corpus Christi, TX, where he still, although in the Reserves, apparently serves as a flight trainer at Corpus Christi Naval Air Station. I was delighted to meet all of his family, but particularly his father who is from Robstown, TX, where my mother was from, and when my dad returned from World War II, having served as a B-17 pilot and was shot down and served 4 months in a prisoner-of-war (POW) camp, he came back to Corpus Christi Naval Air Station for flight training, met my mother, and they married. I guess, as they say, the rest is history.

So I understand where Mr. Garcia is from, his outstanding record. He understands the life of a sailor and a citizen sailor. He flew more than 30 armed missions in the Persian Gulf. He supported Operation Allied Force in Kosovo, and today, as I noted, he is a member of the Navy Reserve.

I might also point out that he is a lawyer, but I trust the committee will not hold that against him.

Chairman LEVIN. You were doing well until that point, I got to tell you. [Laughter.]

Senator CORNYN. It is my pleasure to present to you Juan M. Garcia III of Corpus Christi, TX, and I heartily endorse his nomination and hope you will expeditiously approve his nomination in the committee and on the floor.

Thank you, Mr. Chairman.

Chairman LEVIN. Senator Cornyn, thank you so much. I know how grateful the nominee is and his family for your words. That is a great story about your dad. Thanks for sharing that with us too.

All right. Let us call now on our nominees to come forward. Your statements will be made part of the record in their entirety. Representative McHugh, I think we will start with you for your opening statement.

**STATEMENT OF HON. JOHN M. McHUGH, NOMINEE TO BE
SECRETARY OF THE ARMY**

Mr. McHUGH. The Senate system is far more complex than the House system. Forgive me. I was not sure I was pushing the right button.

Chairman LEVIN. In more ways than one, I can assure you. [Laughter.]

Mr. McHUGH. Mr. Chairman, Senator McCain, distinguished members of the Senate Armed Services Committee, first of all, most importantly, I want to note how excited, how humbled, and frankly, how honored I am to be here before you this morning. This committee has a weighty constitutional responsibility in consideration of these nominations, and having been in this Congress for some years now, I fully recognize the truly dozens of great Americans who have sat before you in the years since the creation of the positions of secretaries of the military departments. Frankly, I am in awe that I may even deserve a moment of your time and consideration.

But as well, for all those that have passed before me, I would respectfully note there are few who have been in this moment in time who have held a greater and higher degree of respect and admiration and affection for this great committee. As Senator Schumer noted, for all of my 16 and a half years in the House of Representatives I have been privileged to serve on that body's Armed Services Committee, and I know from personal experience the tremendous concern and effort each of you puts forth each and every day in support of the brave men and women of our military who, along with their families—and that is important—sacrifice so much to protect our freedoms and our liberties wherever and whenever that challenge might arise. I have been fortunate to work in your shadow in a similar cause.

I, of course, want to thank President Obama for the high honor and opportunity he has afforded me through this nomination, and whatever judgment this committee in its wisdom may render, his faith and trust move me to my core.

A special thanks to my Senator, my colleague, and I think it is fair to say my friend for being here with me. Senator Schumer, New York's senior Senator, has been a leader in so many efforts for so many years on behalf of the public good, and I have been honored to know and work with him for some 2 decades. I deeply appreciate his introduction, his presence, and his gracious and kind words about my abilities.

I would also like to acknowledge, of course, the other presidential nominees on this panel with me this morning: Dr. Joe Westphal, nominated for Under Secretary of the Army, and Juan Garcia, as Assistant Secretary of the Navy for Manpower and Reserve Affairs. I congratulate them both for their selection and wish them well.

I would be remiss if I did not give special thanks to my family who, like good families everywhere, have lent me love, support, understanding, and in my case, not infrequently, some forgiveness in my 60-plus years of this world. The memory of my dad, departed from us for over 19 years, still inspires us and makes us smile. My brother, my best friend, Pat, his lovely bride Marti, their son and daughter, P.J. and Michaela, my nephew and my niece, and most of all, my mom who I have noted on previous occasions, after all these years, still finds ways each and every day to carry me forward. They are with me always and I know they are with me here today as well.

But for all the excitement of this moment, I want to assure this committee I appear here before you today with few delusions as to the difficulties that lie ahead. I believe I have a clear understanding of the serious and numerous challenges that face America's Army. As you all know so well, it is a force fatigued by some 8 years of uninterrupted combat now on two very dangerous fronts. They are strained by the frequency of constant deployments and stressed by the pressures levied against their families. Too often, far too often, they return home only to be disappointed by a network of support systems that, despite high intentions and constant effort, continue to fall short of the level of support they so richly deserve and each and every one of us so deeply desire.

There are no easy answers to these challenges, but answer we must. I promise you, if confirmed, my first priority will be, along with this great committee, Congress, the President of the United States, and of course, the Secretary of Defense, to engage in a constant search for the discovery and effective implementation of better ways.

If I may, just a few other challenges.

Balancing. The recognition that resources, ample in recent years through wartime supplementals, are likely to turn downward.

The requirement to make the hard and necessary choices to strike an equilibrium between prevailing in current conflicts and preparing for future challenges.

Secretary Gates put it very well. He said, "We cannot afford to do everything and buy everything, but at the same time, we cannot afford defeat." That is a tough challenge, tough realities, but both can be met and overcome. It will take a constant formulation of new thinking and new directions.

Success is also going to require a reinvention and reinvigoration of all of our Government resources. Expertise in our civilian agen-

cies must be brought effectively to bear both to avoid and, where possible, hasten the end of conflict. “Soft power” in this town right now is a fashionable phrase. But its fashion should not diminish the urgency of its application and the requirement that the Army, and indeed in my opinion, all the Services do their part to facilitate the effective implementation of these nonkinetic tools.

In the end—and I know everyone on this committee agrees—it all comes back to people: the men and women who step forward and don the uniform of our Nation, the spouses, the children of those brave warriors who sacrifice so much, as well. Like all of you, I have visited our wounded warriors at home and abroad, and in each visit, I have been so struck how these heroes, facing pain and loss and uncertainty, ask one question. What else can I do to serve? We can ask no less of ourselves. How can we succeed in repaying even a partial measure of the devotion they render to all of us each and every day?

If in your wisdom I am confirmed, that will be the key motivation I awake to each and every day.

Thank you, Mr. Chairman, Senator McCain. I look forward to your questions.

Chairman LEVIN. Thank you, Representative McHugh.

Dr. Westphal?

**STATEMENT OF DR. JOSEPH W. WESTPHAL, NOMINEE TO BE
UNDER SECRETARY OF THE ARMY**

Dr. WESTPHAL. Thank you, Mr. Chairman, Senator McCain, distinguished members of the Senate Armed Services Committee. It is a great honor for me as well to be here and to be nominated by President Obama to be the Under Secretary of the Army.

I am also very grateful for the confidence and support of Secretary Gates.

As Senator Collins and the chairman noted in my resume, I spent a good deal of my life in academia, and in that part of my life, I spent almost all of it studying Congress. It is because of that that I am very humbled to come once again before this committee seeking your confirmation. I thank the chairman and Senator McCain for their very kind introductions.

It is not only an honor and a privilege to have a professional relationship with my two Senators from Maine but also to call them my friends. I am very grateful for the support they have given me and the kind and wonderful introduction that Senator Collins gave today. Her tireless efforts on behalf of the citizens of Maine and all Americans have made myself and my family and all of us who are part of that great State very proud.

I want to thank Senator Collins for her most gracious introduction, but more importantly, for her steadfast support of the men and women in uniform. She has just been a great advocate for ensuring that the needs of our troops are considered and met.

In knowing her personally, I got to meet her family, in particular her dad and her mom. Her mom Pat was a former chairman of the board of trustees of the University of Maine, not while I was there, but prior to my coming on board, and she certainly knew the university very well. Her dad was a World War II veteran who fought in the Battle of the Bulge, and to my knowledge, he was decorated

with the Purple Heart and the Bronze Star. I got to meet her dad and spend quite a bit of time with him, and I am very honored to have known him. I am sure he is extremely proud of his daughter today.

With me today is my wife, Linda Westphal. We have been married 41 years. She and I have raised a family, raised four children, James, Heather, Amy, and Lindsay. Unfortunately, they could not be here today because of family commitments and work responsibilities. But three of our four kids are married and have blessed us with six grandchildren. My family knows how demanding these jobs can be on the individual and the family, and thus, their support, patience, and love have only helped to strengthen our family bond and to give me the opportunity to serve my country through public service.

I also wish to cite the contribution to our Nation of my wife's dad, Wilbur McMaster, now deceased. He was a soldier who served in the Pacific during World War II. For me, he always truly represented that group of men and women that have come to be known as the "Greatest Generation." Senator Collins' dad would be one of those individuals.

I hope that my mother-in-law, Mary, is watching this hearing and her love and support are very important to me as well.

I am honored to be here today also alongside a great public servant, Congressman John McHugh, who is deeply committed to the task ahead, should you choose to confirm him. Congressman McHugh is a good friend, and if we are confirmed, I look forward to working with him and supporting his efforts in leading the Army towards a more sustainable future.

If confirmed, I pledge to work closely with you, your staffs, to truly partner with the other Services, with the Office of the Secretary of Defense in what I believe ought to be a fervent and urgent effort to sustain the best Army in the world and ensure our national security needs are met.

I believe one of the most important responsibilities I will have, if confirmed, will be to support the Secretary of the Army in meeting the needs of our soldiers and their families. Congressman McHugh eloquently expressed that important priority. I pledge to the President, to the Secretary of Defense, to this committee, and to Congress that I will work hard and to the best of my ability to meet that commitment.

I thank all of you for your consideration of my nomination. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Dr. Westphal.

Mr. Garcia?

STATEMENT OF JUAN M. GARCIA III, NOMINEE TO BE ASSISTANT SECRETARY OF THE NAVY FOR MANPOWER AND RESERVE AFFAIRS

Mr. GARCIA. Thank you, Chairman Levin, Senator McCain, and members of the committee. I am grateful to be here before you. I am honored that Senators Hutchison and Cornyn made time in their full schedules to be here and also honored to share a panel with my distinguished fellow nominees, Congressman McHugh and Dr. Westphal.

Thank you for the opportunity to introduce my family. My incredible wife Denise packed up our minivan and filled it with kids and drove up from Corpus Christi this week. Our four kids are here, the twin boys, Jack and Luke; our little girl, Calista Rose; and our youngest Lex.

My parents, retired Navy Captain Juan and Pat Garcia, are here, and my sister and brother-in-law, Marine Lieutenant Colonel Rob and Gabriela Scott and their beautiful kids are here. They are stationed here in town at the Pentagon and graciously have been incredibly supportive of this effort, and in fact, the entire family is crashed out at their full house right now. Thank you all.

On behalf of myself and my family, I want to thank the President for this moment, an impossible-to-imagine opportunity to be considered by the U.S. Senate for a post helping to shape and manage the world's finest sea service, the U.S. Navy and Marine Corps team. It is a moment that could be traced back to my first conscious memory as a small boy, 36 years ago, attending the homecoming ceremony for the POWs at Naval Air Station Lemoore in 1973. It winds through unforgettable moments for an oldest son growing up in base housing with mom squeezing my hand as that official Navy sedan slowly pulled into our cul-de-sac, praying under her breath that it did not stop at our house, knowing that it brought bad news.

The route here ran though a tiger cruise aboard the aircraft carrier USS *Constellation* a few years later when I joined my naval aviator father for a week at sea and knew then that I wanted to be like him and his shipmates. What I could not have known then was that I would get to return the favor 25 years later, hosting him aboard the same carrier.

I traced it through the gentle tutelage of my Marine Corps drill instructor, Staff Sergeant Mike Sinot, who will never know the full impact he had on me. This moment could not have happened without a dozen chief petty officers along the way who did their job and taught a junior officer what it means to take care of the troops.

Mr. Chairman, today's Navy and Marine Corps face a threat spectrum that spans from downing a spent satellite 60 miles above the surface to the centuries' old scourge of piracy. American families entrust their sons and daughters to this organization, believing that the Nation will provide the finest training, best equipment, fair compensation, care for their wounds, both visible and non-visible, and a quality of life for their dependents in exchange for their sacrifice. I can think of no more humbling an honor than to assist in meeting that commitment.

I thank you for your consideration and look forward to your questions.

Chairman LEVIN. Thank you very much, Mr. Garcia, and thank you all for sharing a bit of your family history with us. It helps to humanize and personalize these hearings, and it is very important for us and those who are listening that you do that.

There are standard questions that we ask of all nominees, and I am going to ask you the same questions.

Have you adhered to applicable laws and regulations governing conflicts of interest?

Mr. MCHUGH. Yes.

Dr. WESTPHAL. Yes.

Mr. GARCIA. Yes.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Mr. MCHUGH. No.

Dr. WESTPHAL. No.

Mr. GARCIA. No.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Mr. MCHUGH. Yes.

Dr. WESTPHAL. Yes.

Mr. GARCIA. Yes.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Mr. MCHUGH. Yes.

Dr. WESTPHAL. Yes.

Mr. GARCIA. Yes.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefing?

Mr. MCHUGH. Yes.

Dr. WESTPHAL. Yes.

Mr. GARCIA. Yes.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Mr. MCHUGH. Yes.

Dr. WESTPHAL. Yes.

Mr. GARCIA. Yes.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Mr. MCHUGH. Yes.

Dr. WESTPHAL. Yes.

Mr. GARCIA. Yes.

Chairman LEVIN. We have a number of Senators here this morning, so let us start with a 7-minute round of questions.

Congressman McHugh, let me start with you on the question of Army modernization. We have recently passed an important bill in terms of trying to reform the way we acquire items for the military. The bill is a major reform initiated here but fully supported by the House, signed by the President. Implementation of that is, however, critically important. We can write laws with good intent and with strong words, but when it comes to implementation, that is critical.

Give us your thoughts about implementation of that acquisition reform bill.

Mr. MCHUGH. First of all, Senator, as I said in the meeting that Senator McCain, you, Senator Levin, Congressman Ike Skelton, and I attended, I thank the two of you and this committee, this body, for taking the leadership in that effort. You called the House to arms, and I think it made a huge difference.

But you are absolutely right. The bill is an important step, but the implementation is absolutely essential. If we do not follow through with the fullest extent of the force of the law, then all of us have wasted our time.

I think the biggest challenge, with respect to that particular piece of legislation, is the designation of some 20,000 new contract officers. We probably—not probably—we went far to the extreme in cutting down the number of professionals within the military who could oversee those activities. This bill recognizes it. But I think as well it puts a rationalization and divorces those who have a stake in the system going forward from those who have an absolute responsibility to make a decision as to whether it should pass to the next milestone and the next step.

I can pledge to you, having had a little bit to do with that development on the House side, that this is the highest priority for me.

I think the challenge that also lies ahead, Senators, that this represents only about 20 percent of all the acquisition programs before the U.S. military. The major weapons acquisitions are certainly a huge part of the problem. A lot of money. But we have 80 percent still lying out there, and in my discussions with Chairman Skelton and others who were involved in this is that Congress fully intends to take up that other 80 percent. Whether I am confirmed or not, I would certainly, as an American citizen, encourage you to do that, and if I am confirmed, I promise to you as Army Secretary that I stand ready to work with you and make sure that we try to close that gap as well. Too much money out there, too many wasted dollars, too many dollars potentially to be saved that could be spent far better on those men and women who have so many needs that still exist.

Chairman LEVIN. Congressman, the Secretary recently announced that there is going to be a temporary growth in Army end strength of up to 22,000 soldiers. Do you have an understanding of the pace and plan to implement that increase in end strength?

Mr. MCHUGH. I really do not, Senator.

Chairman LEVIN. That is fine. If you do not, that is fair enough. We do not expect you to know a lot of the answers to some of these questions because you have not had an opportunity to be there to do that.

One of the issues that we face is the problem of mental health for our troops, particularly for our soldiers in the theater. I am wondering, based on the findings of the Army's Mental Health Advisory Team studies in the Iraqi theater, whether or not you are able to share with us now any plans to increase mental health resources available to our troops not just on their return, but also in theater?

Mr. MCHUGH. Senator, there has been a major effort to try to make a more robust effort on the troops who were forward deployed. I think the Army is in the right direction on that, but clearly, if you look at the feedback studies, we have a long way to go. If I may, this was not exactly to your question, but if you look at the suicide rates within the Army in recent months, the latest figure, about 87 for this year, we have an enormous challenge whether it is amongst the deployed or those who are back home.

So that is something that any Army Secretary would have a solemn responsibility to try to fine tune, and if we have gaps in the training capabilities, a lack of understanding amongst the officer corps who are entrusted with that forward-deployed sensitivity, then we have to do a better job. It is unacceptable to have brave men and women who commit so much on the battlefield come home and, at the end of the day, take their own lives.

Chairman LEVIN. The growth in the number of suicides has been a real significant concern of this committee and all of its members. It is important that you get right into that issue as soon as you are confirmed.

Relative to the role of women in the military, if confirmed as Secretary of the Army, will you support assignment policies that will permit women to continue to serve in all positions and specialties in which they currently serve, number one, but also will you review positions that are currently closed to female soldiers to determine whether female soldiers should be permitted to serve in additional positions?

Mr. MCHUGH. Thank you for that question, Senator, because there has been a lot of confusion and misinformation on that particular issue. As I think the legislative record shows, I strongly, strongly support the existing position and policy, and that policy has been in place since 1994, put into place by Secretary Les Aspen. I have learned through my 10 visits to Iraq, my 4 to Afghanistan, and to other combat theaters that the basic fact is women in uniform today are not just invaluable, they are irreplaceable. I have absolutely no evidence, nor have I ever had any evidence before me that would suggest that the policy, as in effect since 1994, is not working.

If someone shows me something to the contrary, I would certainly share that with the Secretary of Defense, the President, and of course, the oversight committees in the House and the Senate, but from everything I know at this moment this is a policy particularly on the irregular warfare battlefield that is working.

Chairman LEVIN. In terms of additional possibilities, will you take a look at that as well?

Mr. MCHUGH. The current policy, as I understand it, as issued under Secretary Aspen, is to continuously search for Military Occupational Specialties (MOS) that can be opened, and I support that and would certainly continue it.

Chairman LEVIN. Thank you.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman. Again, congratulations to the nominees. I am hopeful and I know the chairman will do everything to perhaps get these nominations confirmed before the August recess. Is that correct?

Chairman LEVIN. That is our goal. Absolutely.

Senator MCCAIN. That is our goal, and I thank you all for serving.

Congressman McHugh, I just want to follow up a second on the suicide issue. It is my understanding that 30 percent of these suicides have occurred with servicemembers who have never been deployed. Then it is hard to place the responsibility simply on long deployments or frequent deployments.

What kind of analysis are we conducting to try to figure out what it is? I am sure there are multiple causes, but also does it go back to recruiting?

Mr. MCHUGH. That is an important question, Senator. When you and I had a chance to talk about this, I quoted the 30 percent. Actually I was a little bit conservative. For the Army, it is 32.8 percent. Nearly a third of these suicides have never deployed.

Now, that should help us to understand that the normal stressors that we focus upon, including operations and personnel tempo (PERSTEMPO) were important, but as I mentioned to you, sir, I do not want to lose the fact that for a third of these brave men and women, something else occurred. I think we have to take a very calculated look at the programs that we are putting into place. Do they, in fact, respond to that reality? I have no reason to think they do or they do not, but it is a search that has to be undertaken.

The other question, as you noted, Senator, what else is happening? Is it a diminution of the standards that somehow we are recruiting people who are perhaps possessing a proclivity for that? I just do not know.

I think the Army took a positive step. They have engaged in a longitudinal study with the Institute of Mental Health to try to understand that. That is a 5-year study. We cannot wait 5 years. I do not pretend to have the answers right now. There are 20-some programs the Army has put into place to combat this issue. I think we have to take a cold, hard look and monitor the progress of those programs very carefully and be as adept and flexible as we expect these brave men and women to be on the battlefield.

Senator MCCAIN. I thank you for your commitment, and obviously all members of the committee and all Americans are deeply concerned about what seems to be a continued increase in these tragedies.

As we discussed in my office, Congressman, I understand that PMA's political action committee (PAC), employees, and clients contributed over \$160,000, which placed you at number 16 on the list of all PMA beneficiaries in Congress.

Did you ever seek an earmark for the PMA lobbying group or a PMA client corporation in exchange for any political contribution or anything else of value that was given to you directly or indirectly?

Mr. MCHUGH. Absolutely not.

Senator MCCAIN. As of today, have you returned any of the political contributions you received from PMA, its PAC, or its employees or clients?

Mr. MCHUGH. I did not, but what I did do, Senator, was ask my accountant to go through it. There were questions about phantom donors, and I want to make sure we were not in receipt of any of those funds, and I gave the standing order. Obviously, I will never use my campaign funds for personal gain. Again, that should there ever be a question as to the veracity of those contributions, they be, if not returned, I would rather give them, frankly, to a charity.

Senator MCCAIN. Thank you for that, Congressman.

According to a report by Citizens Against Government Waste, since 2008, you have sought earmarks for 52 projects totaling \$97.3 million, and you and I went through some of them before. Here is

my question. How do you answer a Congressman or a staffer that calls you and says, I want you to spend money on this earmark or I want you to support this earmark? How do you reconcile that?

Because I am absolutely convinced that earmarks—and the PMA Group is a classic example. There are continued stories in the media about the corruption that has been bred by this earmarking process which I think is absolutely unacceptable. I have fought it for many years, and I will never give up the fight until the day that I leave the U.S. Senate.

So how do you answer when one of these appropriators calls you up and says, hey, I want an earmark for X?

Mr. MCHUGH. The honest answer is I do not know because, quite frankly, in my 16 years I have never had a Congressman call and ask me to support an earmark. I am not an appropriator. I am an authorizer and, of course, that is an important part of the process, as this committee knows.

Senator, as I mentioned to you in our previous conversation, I deeply admire the many causes that you have taken up. I mentioned as well I was one of 44 Republicans in the House of Representatives out of more than 218 to support McCain-Feingold. It did not make my leadership happy, but it made me feel good because I felt it was the right thing to do.

I have tried to live up in all of my requests to the formal standards placed by the House. I have argued for higher standards, but I have tried to do the best job I could to provide projects that benefited my district and equally benefitted the military.

But, Senator, I understand your passion and I even admire it. No matter what the judgment of this committee, I can tell you I will never receive another earmark.

Senator MCCAIN. I thank you, Congressman McHugh. Let me just say again, one of the reasons why I raise this issue at this time is not in any way to diminish my respect and appreciation for your service. I raise it in the context of an attempt that I think is going on now, led by the President and strongly led also by the Secretary of Defense, that we stop some of this. I noted that the House Appropriations Committee just passed legislation filled with projects that, one, have no justification, strongly opposed by the President and the Secretary of Defense, and are clearly unneeded and unnecessary, including the presidential helicopter, and the list goes on and on.

I guess my point is that I think that we are either going to change and give the American people the defense capabilities and care for the men and women in the military, which is our obligation, or we are going to continue, as Secretary Gates calls it, an unsustainable path of earmarking and unnecessary and wasteful spending.

I only bring this to your attention in the context that I think there is going to be a big fight, and I am proud of the President who has threatened vetoes on several issues. I know that you will join this fight to give the taxpayers the best “bang for their buck.”

Again, I strongly support your nomination and I appreciate your dedicated service in the Congress of the United States.

Finally, Mr. Chairman, could I just ask Mr. Garcia a question? You come from a military family. You have served in the military.

So you have a good understanding of what these multi-deployments and absences from home and family is like. Could you just share a little bit of that with the committee, please?

Mr. GARCIA. Senator, thank you for your question. I know you also have been on both sides of a deployment, both as a dependant and as the deployer.

Like folks are doing all over the country right now, my last deployment aboard the USS *Constellation*, I left my wife with three kids under 3 years old. That is a story that is being echoed across our country right now. The Army particularly I think is bearing an exceptionally heavy load with their extended deployments.

Ensuring that we have the proper programs and efforts in place to take care of those dependents when you are gone, that housing is adequate, that when they are PCS'd (permanent change of station) when they move, children can transfer appropriately between schools, that credits get transferred, all those little things that you do not have time to think about when you are in a tent, on a carrier, or in a submarine, I think would fall under the purview of the Assistant Secretary for Manpower and Reserve Affairs. If confirmed, I look forward to ensuring we have the optimum programs in place.

Senator MCCAIN. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Senator REED.

Senator REED. Thank you very much, Mr. Chairman.

I want to welcome the nominees and just say I think the President has chosen very wisely. I had the privilege to work with Congressman McHugh on many issues and Dr. Westphal as a former official in the Department of the Army, who comes back with great insights and great experience. Mr. Garcia, thank you for your service and I look forward to your service in the Department of the Navy.

Congressman McHugh, one of the traditions of the Army is a respect for the individual's demonstration of their faith, which is very important. Essentially that is why we have a chaplain corps. But part of that is ensuring that there is not an attitude preferential to one denomination versus another, preferential to one set of beliefs to another, consistent with the Constitution.

I wonder if you have any comments on that.

Mr. MCHUGH. Thank you, Senator, and thank you for your kind comments.

My understanding is every chaplain who goes into service has a prime directive, and that is in those instances where it is far likely that there are multi-denominational attendees, the chaplain must be sensitive to the nature of that assemblage, and therefore, do everything necessary to keep away from proselytizing but give a general blessing, whether that is a deployment ceremony or some other variant. It does allow them, of course, in their regular duties on a Sunday, if it is a Catholic chaplain, providing mass or the Shabbat services in temple for Jews or in the mosque for Muslims. But when you have a general assemblage, they must be sensitive and not make comments that would be offensive to others in that assemblage.

I cannot imagine our ever changing that. Certainly in my opinion any chaplain who does not adhere to that needs to be admonished and instructed as to their primary responsibility.

Senator REED. I agree with you. I have found also that the chaplains play a very critical role in informally counseling soldiers not in any sort of denominational way but as a source of information for the commanders, as a source of support for troops, and it is a very important role.

Mr. MCHUGH. Yes, sir.

Senator REED. We have all talked about this, but it is, as Mr. Garcia pointed out, particularly acute for the Army. The operational tempo (OPTEMPO) has been exhausting over the last several years. Can you comment on the effect this has had on retention of mid-grade officers, captains, majors, and the noncommissioned officers (NCOs), which from my perspective are probably the real heart and soul of the force?

Mr. MCHUGH. I have two answers. The answer I will give to you first is the answer I had as a 16-year member of the HASC and 12 years on the Personnel Subcommittee. It just seems to me at a minimum intuitively that particularly in an economy that values the kinds of intellect and experience that those mid-grade officers have, that the operations and PERSTEMPO has a tremendous effect on encouraging them to leave the Service. Certainly the numbers would suggest there is something afoot. We are about 3,000 short in those middle cadres. It is such an acute problem that the Army does not estimate it will be able to begin to catch up until about 2014 or 2015.

The second answer is what I understand, what I was told as a member of the House Personnel Subcommittee, the Army believes that the retention is not the issue in those gaps, that the problem is the growth of the Army has left that gap.

There is probably accuracy and veracity on both sides, and I have not been in a position to be briefed, but the bottom line remains the same. We have a huge challenge in that cadre of officers that we have to make sure we can make up. Senator, these are the people who instill the values, who instill the training, who instill all those things that we view as so important in the formulation of the military, and we have to work hard to close that 3,000-officer shortfall.

Senator REED. Thank you, Congressman.

Dr. Westphal, what do you presume is going to be one of your key focal points as the Under Secretary of the Army?

Dr. WESTPHAL. Thank you, Senator.

Obviously, the Under Secretary works to implement or works at the direction of the Secretary of the Army, and with the new responsibilities, as the Chief Management Officer (CMO), which this committee rendered back in 2008 in the defense authorization bill, there is an additional broad responsibility to manage all the business operations of the Department.

Within that framework, I think what is very important—and the chairman's comments earlier about the acquisition issue touched on this—a key area of focus would have to be business transformation. There is the Defense Transformation Agency created by the law that you passed. The Army has a Business Transformation Office

which it needs to vigorously stand up, and then integrate that business transformation process into all the elements that you have discussed here today, that Congressman McHugh has been talking about in a way that we can address those issues both from a fiscal standpoint as well as a planning and execution standpoint.

Senator REED. Thank you very much, Dr. Westphal.

Mr. Garcia, again, thank you for your service.

Mr. GARCIA. And you for yours, Senator.

Senator REED. Well, thank you very much.

You are going to be in a situation where you have to recruit, you have to retain also. The OPTEMPO of the Navy is also quite compelling. Can you comment about some of your thoughts about your challenge of recruitment for the Navy?

Mr. GARCIA. Sure, Senator, although I think it is a very different story than the challenges the Army is facing right now. With the Navy that has downsized some 40,000 sailors over the last 7 years, in some ways we have the opposite problem. You have arguably one of the most selective, difficult-to-access navies that we have ever had right now. The Marine Corps, who even at the height of this long war, never failed to meet a recruiting goal, have now met and perhaps exceeded their end strength.

I think it is important, though, that as the economy begins its up-tick that we all hope will come sooner rather than later, that we not let our guard down on the recruiting front. It takes time to build up a recruiting effort to build those affinity groups and those relationships. In stressed monetary times, I think it is important that we not cut back too far despite the fact that our goals for the moment seemed to have been met.

Senator REED. Thank you very much, Mr. Garcia.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Reed.

Senator Chambliss.

Senator CHAMBLISS. Thank you, Mr. Chairman.

Mr. Chairman, before I make my comments and ask questions, I would like to recognize the service and sacrifice of Lieutenant Colonel Ray Rivas, a wounded servicemember who suffered a traumatic brain injury in Iraq and who testified before the Senate Subcommittee on Personnel, chaired by Senator Nelson and on which I serve, recently about the care and support of wounded warriors. I mention this because staff has just advised me that Lieutenant Colonel Rivas died last week as a result of an apparent suicide in San Antonio, TX.

Our committee recommended, and last week the Senate adopted, legislation to further improve care and effectiveness of support for our wounded warriors and their families. Mr. Chairman, certainly our thoughts and our prayers are with the family of Lieutenant Colonel Ray Rivas.

Chairman LEVIN. Thank you, Senator Chambliss, for mentioning that.

Senator CHAMBLISS. Mr. Chairman, I congratulate all three of our nominees who are here today, particularly my longtime dear friend, Congressman John McHugh, with whom I had the privilege of serving with in the House. I was the vice chairman of House National Security Committee Special Oversight Panel on Morale, Wel-

fare, and Recreation for 4 years while he was chairman, and I know firsthand, John, about your devotion and your care for our men and women in uniform. I could not be prouder and more pleased with a nomination coming from the President than to have you nominated as Secretary of the Army.

As you and I have discussed over the past 24 hours, for the past 20 years, the States of Alabama, Georgia, and Florida have been involved in discussions, negotiations, and significant litigation related to the Apalachicola-Chattahoochee-Flint (ACF) and the Alabama, Coosa, and Tallapoosa (ACT) River Basins, which are under the jurisdiction of the Army Corps of Engineers. The current water control manuals for the ACF and the ACT river basins are based on figures that are in excess of 50 years old.

The recent court decision that came out just a couple of weeks ago really chastised the Corps for their failure to update those manuals over the years with the increased and divergence of use of those river basins.

In 2007, Secretary Geren made a correct and courageous decision politically to update the water manuals, and I would simply like to ask you, even though I know you do not have a lot of background on this, but I want to make sure that you continue to pursue the updating of these water manuals so that final disposition of this disagreement can be made.

Mr. MCHUGH. First of all, Senator, thank you for your kind comments. The House's loss was the Senate's gain when you made the trip across the Rotunda.

You are right. I do not have a lot of information. I had the opportunity to sit down with you and Senator Isakson. Twenty years is a long time to be going back and forth.

I am going to, if I may, take a pass for the moment because I understand there is a court decision that you shared with me and I have not had a chance to look at it. I am aware that Secretary Geren felt that the court decision, if not compelled, certainly encouraged greatly the redevelopment of the water manuals, and I know that is going forward. I need to take a look at that. Without having an update, it seems to be a reasonable thing to do, but there is just such a complexity there that I am concerned.

What I do know, just as a member of the human race, is you have three vital interests there, three States, and what I would unquestionably say to you is I would make every effort to engage the Corps to try to provide whatever assistance, encouragement is necessary to bring about a resolution in a way that serves everyone's interests equitably. I suspect it is probably not going to be possible to create everybody's nirvana, but anytime you have a lawsuit for 20 years that has not been resolved, although I dropped out of law school after 10 days, that kind of raises my antenna that we have a tough issue. But I want to work with you. I started out in local and State government, and I know the importance of that, and I sure know the importance of water.

Senator CHAMBLISS. Fair enough.

You and I, along with Senator Isakson, discussed yesterday the issue of Fort Stewart and specifically the great financial risk that the local community assumed to a large degree at the Army's urging in expectation of an additional brigade coming to Fort Stewart.

As we advised you, the community put up approximately \$450 million in preparation for this brigade coming, and I am sure you can understand the enormous impact the announcement that the brigade is not coming has had on this small community in southeast Georgia. I know you can appreciate it because of your comments in representing communities around Fort Drum when a similar action was taken by the Army in previous years.

I simply want to get your assurance again on the record that you will address this issue as soon as you are confirmed and take whatever measures possible to fill the gap left by an additional brigade combat team not coming in order to help alleviate the financial distress. I just found out yesterday that Secretary Geren will be at Fort Stewart next Monday. That is the type of high profile issue it is now, and I simply want to make sure that is going to continue.

Mr. MCHUGH. Well, I am hopeful Pete Geren solves it in his visit on Monday. [Laughter.]

But assuming he may come a bit short—as you noted, Senator, I have seen how the Army and, I suspect, other Services where an expected expansion is going to take place understandably come in and try to encourage the community to make commitments. In my case, fortunately, those troops arrived and the commitment that was made, the investments that were made were utilized, and I think it was a win-win situation.

I do believe, from what I know at this point, that Secretary Gates probably made the right decision in holding at 45 because of the vagaries of cross-leveling and the desire to have 45 robust totally filled-out brigades versus 48 that needed all kinds of help. But the downside of that are those three communities that are left holding the bag of hundreds and hundreds of millions of dollars.

Senator, I cannot promise you that I can effect a positive outcome for you, but I can promise you I will look into this and press it as hard as I possibly can. This comes from my personal experience, and I absolutely understand the dilemma, as I recognize it, to be a very small, not particularly wealthy community is in.

Senator CHAMBLISS. If Secretary Geren does not solve it on Monday, I will be calling you Tuesday.

Mr. Chairman, I thank you. I would simply say to our other two nominees congratulations on your nomination. We look forward to a speedy confirmation.

Dr. Westphal, when I see you in Stillwater in September, please encourage your Oklahoma State Cowboys to be kind and gentle hosts to my Bulldogs. Thank you.

Chairman LEVIN. Thank you, Senator Chambliss.

Senator Akaka.

Senator AKAKA. Thank you, Mr. Chairman. Aloha to the esteemed nominees and your family and friends who have joined us today.

Gentlemen, first, I want to thank each of you for your service to our country. I am heartened to know that you are answering a call to start another chapter in your lives dedicated to public service.

Mr. McHugh, I enjoyed our visit the other day, and your entire career has been dedicated to public service. You have an outstanding track record supporting our troops and their families dur-

ing your service in the House, and should you be confirmed, I have no doubt that our Army will be under outstanding leadership.

Dr. Westphal and Mr. Garcia, your diverse experiences and outstanding educational backgrounds are very impressive. If confirmed, you will all face many difficult issues in your new positions. However, with your outstanding experiences and qualifications, I am confident that you will be able to handle the challenges before you.

Mr. McHugh, you have had the opportunity to view and shape the Army from the HASC for those many years, and I trust you have also received briefings and held discussions with the current Army leadership. As you prepare for this position, I would be interested to know what you believe would be the toughest challenges as Secretary of the Army.

Mr. MCHUGH. It is always the one you do not know about that rises up and catches you, Senator. But as I look ahead, I think our first responsibility and therefore our most important challenge is what we owe the men and women in uniform and their families. A number of your colleagues have spoken about the operations and personnel tempo, the dwell times that are 1 to 1, deploying for a year, coming back to a dwell for a year. The reality is much of that year is spent in retraining for the next deployment. So it is kind of an illusionary figure to begin with.

The Army has adopted a program and a plan to get there. Secretary Gates' temporary wartime supplemental of 22,000 will help. This committee and Senator Lieberman, I think, took the right step. I know there is a ways to go with respect to the conference committee, and it is probably not my place to editorialize, but I wish this committee the best on that particular provision in the conference committee with my House colleagues. Those should help as well.

But it is a fragile equation. Iraq for the moment is going positively—I know Secretary Gates and General Odierno talked about a modest acceleration of the planned drawdown. That would help tremendously. That extension of dwell times to a 1 to 2 and hopefully over a period working to a 1 to 3 for the Active and a 1 to 4 and then ultimately a 1 to 5 dwell for the Reserves is critical to that.

But that is only part of the equation. We have set up a good number, a very robust number of support programs for the families, for the men and women in uniform. We have to make sure that the families are not overwhelmed by that, they understand them, they trust them, they will access them. I am not sure that is true. I am not sure it is true in the suicide programs. I am not sure it is true in the variety of other personnel challenges we face.

The other problem, number two, is the challenge of resetting the equipment, making sure, as we redeploy out of Iraq, withdraw the equipment out of there, we are getting the right platforms, the right support to our troops in Afghanistan as we begin to build up there, and at the same time, ensuring that we are modernizing. The Army has always been challenged in an affordable modernization program, and we have to do a better job there as well.

Those are probably the cream that rises to the top, but you know there is a whole lot of important layers below that. This is a military and particularly an Army that is challenged on many fronts. Senator AKAKA. Thank you very much for your leadership.

Dr. Westphal, during your time with the administration's transition team for national security working defense matters, I believe that you had a chance to study our Army up closely. I am interested in hearing your thoughts on the things you found the Army to be doing well and what needs improvement.

Dr. WESTPHAL. Thank you, Senator.

To begin with, I think the Army was beginning to really recognize many of the issues that have been raised by members of this committee in this hearing, not only recognize them but begin to address those issues. Now, they are not resolved. They are complicated matters that require a fully integrated Army team working on these issues, and during a transition, you do not have that full Army team. You have people leaving the administration. You have people coming in and slow movement. You have essentially almost a lame duck kind of organization transitioning through there.

Then, of course, Congress was and this committee was working and giving signals to the Army that things needed to be corrected. Whether it is on the acquisition side or the manpower side, there were things that needed to be addressed. You did that in legislation soon after the President took office.

I think the Army is cognizant of the issues that you have raised. I think that what is needed is a consistent and collaborative effort to address it between a secretariat that is strong and enabling to both the civilian workforce and to the Army staff. I think we have an excellent Army staff, experienced Army staff. I think what we need to do is also strengthen the secretariat and bring about a team that can then take these business decisions that have to be made and integrate them to connect with the operational side.

The other thing that we looked in the transition, of course, and were trying to alert the President-elect to was the fact that you have a changing environment out there, that you have a very unstable political environment around the world, and that the Department is beginning to do the Quadrennial Defense Review (QDR) or was in the process of doing the QDR at the time. There are a number of other uncertainties out there, and what kind of planning and fiscal constraints are there going to be as we face these challenges into the future. I think we are facing them now, and I think the Army is moving ahead to try to address them.

They are, of course, waiting now for a team to come in and help push it along further, which is what many of you have insinuated in your questions is what you are looking for.

I think the Army is addressing these issues, are cognizant of them, but there is a lot of work to be done on all of these fronts.

Senator AKAKA. Thank you very much.

Mr. Chairman, I know my time has expired, but I had a question that I will submit to Mr. Garcia. It has to do with diversification of leadership in the Navy, but I will submit that as a question for the record. I mentioned diversification because I know you and your family did spend some time in Hawaii and wanted to hear about your feelings about that.

Mr. GARCIA. I look forward to it, Senator.

Senator AKAKA. Thank you.

Chairman LEVIN. Thank you, Senator Akaka.

Senator COLLINS.

Senator COLLINS. Thank you, Mr. Chairman.

Mr. McHugh, let me say how delighted I am with your appointment. We have had the opportunity to work together, along with Senator Hutchison, on the Board of Visitors for West Point. I know how deeply you care about the well-being of our soldiers.

I believe that when we were meeting yesterday, you told me that the 10th Mountain Division was the most deployed unit. I want to associate myself with the concerns that all of us have expressed about the stress of repeated deployments.

I had not heard the tragic news that Senator Chambliss shared with us today, but it indicates that we have so far to go in meeting the mental health needs of our troops and of their families who are often under stress also. I know from our conversation that you are committed to that, and I was pleased to hear you endorse an increase in the size of the Army, which is the ultimate answer.

I am concerned about press reports that indicate that the Pentagon has been given an assumption of a zero real growth in the budget for next fiscal year. In addition, I am told that Secretary Gates has tasked the Services with coming up with some \$60 billion worth of cuts.

It seems to me that the defense budget should reflect our military needs and requirements and be informed by the QDR, which is underway now.

What are your views on how the budget should be put together and what should drive the levels?

Mr. MCHUGH. Senator, again, speaking as a member of the House Armed Services Committee, I agree with you.

One of the—I do not want to say frustrating, but one of the interesting aspects of being a nominee is that once the President indicates his intention to nominate you, I resigned from the House Armed Services Committee. So I knew less. There is the very important dictate of not an assumption of confirmation. People talk to you less. I am not as smart as I used to be, and that is probably not reassuring to many people, including myself. I do not have a lot of information.

My initial reaction, when reading the press reports about the assumptions in the programming budget instructions, was that is probably not an unwise thing to do. I place it under the rubric—and this is a hope. It is not based on knowledge. I place it under the rubric of hope for the best and plan for the worst. I suspect, without having any conversation with the Secretary of Defense that he felt it was important to try to task all the Services to find as much waste, as much duplication, as many savings as is possible. So whatever the eventual budget line may take, they have an arsenal of possible savings they can revert to. That may or may not be accurate, but that was my hoped-for reading of it.

I think it is fair to say that any secretary wants more money rather than less, but at the end of the day, having read title 10, the President and the Secretary of Defense, in concert with the Congressional Budget Office are going to tell you what your budget

targets are and you have to fit within there. I think it is probably a factor of wise planning, but I may well, if I am confirmed, be instructed differently when I get there.

Senator COLLINS. I do hope that you will share with this committee, assuming your confirmation, what you believe the true needs are for our Army. I do not think any of us wants to see the Army or any of our Services shortchanged in order to meet budget goals. You, to me, have an obligation to tell us what you need and what the military requirements are, and then it is our job to try to find the money.

It is certainly appropriate for there to be a review of all programs to determine their necessity, to eliminate wasteful or nonperforming programs, but that should be an ongoing process that is different from having to meet an artificial budget number.

Mr. MCHUGH. Senator, I agree, and as I know you are aware, the law does not just allow, it requires the military officials and others to come and give their honest personal opinion. If I were to be confirmed, I would absolutely insist upon that within the military and Army officer corps. We all have to live within the Office of Management and Budget's directives, but that does not in any way obviate the prerogatives of this Congress, this committee in their role. I have sat in far too many committee hearings and heard things that were perhaps not as accurate as I would liked. That would not be a policy I would endorse.

Senator COLLINS. Thank you.

I want to talk to you about the National Guard. The National Guard has also suffered from repeated deployments. We put a lot of strain on our Guard and Reserve, their families, and their employers.

An issue that the Guard members have brought to me, in addition to the repeated deployments, is the state of their readiness when they come back home. When they are deployed, they are provided with all the equipment that they need, but frequently that equipment is left in Iraq or Afghanistan. I can understand the rationale for that. But what happens then is the Guard members come back home and they no longer have the equipment that they need. This is a problem that I am hearing increasingly about from the Maine National Guard.

Are you aware of this problem and the decreased readiness of our Guard units that results?

Mr. MCHUGH. I am, Senator. It is not just the Guard, frankly. It is Service-wide, Army-wide, and the Reserve and Guard units individually are facing the same problem. The Army is attempting to try to resource as best they can.

As I am certain you agree, the primary objective is to make sure that once troops arrive in a combat theater, be it Iraq or Afghanistan, that they are provided with everything they need. In fact, in most instances, they have equipment choices and a menu that is more than they would need on any particular mission, but they can shape and tailor.

The problem is upon redeployment that the Guard, the Reserves, and much of the Active components do not have those at-home base units particularly for training that they would like. The Army is working hard to try to rebalance that. The Guard is a good news/

bad news; the Reserves is a good news/bad news. When all of these hostilities started just prior to 2001, the average unit in the Reserve component had about 30 to 35 percent of their deemed required equipment. There has been a substantial investment in the ensuing years. It is now 60 to 65 percent. That is a doubling, obviously. That is good progress. But it also mathematically shows you have a ways to go. So it is hard to begin to resource a challenge that has been in existence really since post-World War II when you are in active combat.

The force generation model, the reset model called Army Force Generation that is applying against both the Active and the Reserve component is intended to provide some time to do retrofitting and resetting of equipment in a more reasonable calendar framework and also, of course, give those troops a little bit more time at home should help. But that is a work in progress, and it is certainly something we have to take a close look at.

Senator COLLINS. Thank you. I realize my time has expired.

Let me just mention to you, as I did yesterday, the Maine military authority in northern Maine does cost-effective work in refurbishing high mobility multipurpose wheeled vehicles (HMMWVs) and other vehicles. It consistently performs this work at a lower cost than the Army's own depots. I hope you will look at that as an area where you could achieve savings for the Army by having more work directed to that unit which provides high-quality, low-cost work for the Army.

Mr. MCHUGH. I appreciated our conversations, Senator. As another, for the moment at least, Member of Congress who represents largely rural areas, I promise you we will take a careful look at it.

Senator COLLINS. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Collins.

Senator Ben Nelson.

Senator BEN NELSON. Thank you, Mr. Chairman, and thank you, gentlemen, for your service, and to your families, we appreciate the sacrifices involved in public service both past and present, as well as future.

Mr. McHugh, we have had quite a bit of discussion this morning about the importance of mental health care for our troops, the rising rate of suicides, the challenge of the mental stress with re-deployments and in the case of nondeployments as well.

Our subcommittee has had a number of hearings and the tragic loss of Lieutenant Colonel Rivas is just one of the continuing challenges we have. It saddens us all that we are experiencing the loss that we are experiencing in so many cases to our military, to those who have departed, as well as to their families.

Do you have any thoughts about what you might do as you take this job—you mentioned about looking to 20 programs that are in place. In your former position as chairman of the House Personnel Subcommittee and serving on that, is there any one thing in particular that would stick out to you that we might consider doing?

Mr. MCHUGH. I really do not have an answer for that. Senator, as you alluded to, it is something we have been looking at. I wish this were an overnight phenomenon, but as you recognize, it is

something we have been dealing with for some time. I think if there were an obvious answer, we would have struck upon it.

One of the more important aspects of this—and it is true whether you are trying to combat sexual harassment or other problems and that is to have a cultural change. Right now, my impression is there is a two-part problem. The problem of the soldier, sailor, marine who believes if he or she seeks out help, if they are feeling depressed, if they are having thoughts of harming themselves, that somehow that makes them weak, somehow that makes them unfit for duty. On the other side, I am just not sure that those men and women in uniform who serve with those people have the knowledge or the awareness to recognize a problem and to help.

I think the Army started off well—and this is something that Senator Akaka and I had a chance to talk about—with the Ask, Care, and Escort (ACE) program. Every soldier is given a wallet-sized laminated card to talk about this, to recognize the signs when your buddy may be having bad thoughts or challenges, not just to recognize it, but as the “C” says, to care enough to ask about it, perhaps in extreme circumstances, to take away an item they may be threatening to hurt themselves with, and then to escort, to take them to some care provider.

We have to make sure this is not just something on a piece of paper. It is not something we hand out on that card. I just praise the card. I think it is a good thing, but it has to be instilled in the culture just as the unacceptability of sexual harassment and assault.

The best answer to this is this 5-year longitudinal study, but what is frustrating about that is right now 89 suicides this year in the U.S. Army. We really do not have 5 years. We have to make sure that the things we are doing are as effective as possible and people feel comfortable that when they are troubled, it is okay to say I need help.

Senator BEN NELSON. The increase in the number of potential mental health providers within the military I think is going to help as well, but the challenge is to create that cadre of mental health providers. I know the military has stepped forward on that, and I hope that you will proceed further with those efforts.

Mr. MCHUGH. If I may, Senator, Pete Geren, who is frankly kind of a hero of mine and he is a good friend, sat before this committee 2 years ago and made a pledge to hire 200 new mental health counselors and providers. They have worked like the dickens to try to meet that. They are about halfway there. It is not unlike the challenge of bringing medical specialists into the military. You have to rely not on the money aspect and any other reason, but you need to identify the people who want to make a difference and volunteer. That is a work in progress, a lot of progress being made, but we have to continue. Absolutely true.

Senator BEN NELSON. I appreciate your pledge to continue that effort because it is so critical.

The troop increase in Afghanistan has, obviously, been the direct result of our commitment to making sure that we improve the military presence but get the results in missions that we are after in Afghanistan. For a long time, with respect to Iraq, I pushed for some metrics or benchmarks to establish, first of all, what the mis-

sion or missions are and a way of measuring progress towards those. In Afghanistan, on the authorization legislation, we have put in place the request for establishment of measures of progress which would help us, as objectively as we possibly can, measure how we are doing towards those projects.

I have written letters to both Secretary Clinton and Secretary Gates urging them to develop a series of those progress measures. I have been informed that they are working toward that, and I would hope that you would find that to be something that could be helpful to you in your position as well. I think the American people want to know as much as they can about what our overall mission is and what the sub-missions may be. Instead of doing as we did with Iraq—we are winning, we are losing, we are going sideways—we are in a better position to say we are 70 percent toward that goal, we are 40 percent, or here is what else we need to do to achieve it.

Do you have any thoughts about that?

Mr. MCHUGH. My thought is I am about to get myself in trouble.

Senator BEN NELSON. Well, I do not want to get you into trouble.

Mr. MCHUGH. As a Member of Congress, a Member of the House of Representatives, I wrote the first bill in the House to create a series of measured benchmarks for Iraq. I happen to believe that it is not unreasonable to have a set of indices by which you can judge where you are, what has happened. I happen to believe as well the other side of that coin is it is pretty important to let those, in this case the Afghans, previously the Iraqis, know what we expect of them.

Senator BEN NELSON. Absolutely.

Mr. MCHUGH. But what challenges me about the process though, Senator, is that it becomes a means by which we utilize the measurements to do the wrong thing and to make bad decisions. But certainly if I were to be confirmed, if confronted with a set of benchmarks, I would tell you I have a history of understanding those and working with them, and if it is the dictate of this Congress and the President and signed into law that kind of measurement indices, I would do everything I can to provide you the most accurate information possible.

Senator BEN NELSON. I appreciate that very much.

On a lighter note, I was relieved that you did not get asked or try to repeat the names of the water plans and problems down in that southeastern part of our country.

Mr. MCHUGH. Hoochee something.

Senator BEN NELSON. Something like that. [Laughter.]

Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. It was an amazing statement, was it not?

Anyway, thank you, Senator Nelson.

Senator Webb.

Senator WEBB. Thank you, Mr. Chairman. First, Mr. Chairman, I would offer a comment about the preparation that Dr. Westphal has made for this position. He went to college in New York, Oklahoma, which made Senator Inhofe pretty happy, Missouri, which is going to be very good news to Senator McCaskill, and he spent a career in Maine, which obviously pleased Senator Collins. Before

the hearing began, he came up and told me he had gone to high school in Virginia, but not only had he gone to high school in Virginia, he had gone with Senator Udall's cousin, Senator Tom Udall, which just took out three States. If he can come up with having spent a summer in Nebraska, he has pretty well run the table I would say.

Chairman LEVIN. Do not forget the Red Wings.

Senator WEBB. That is right. He also mentioned he was a Detroit Red Wings fan. So he pretty well ran the table this morning.

Mr. Garcia, I would like to start with you, first, by saying how much I appreciated the fact that you mentioned growing up in the military. I did as well. There was one period in my life where my father was deployed or stationed in places where the family could not join him for 3½ years. I have often remarked, as someone who grew up in that environment and also had to watch a son and a son-in-law deployed to combat, it is probably harder being a family member either with a father or a spouse deployed or having a child deployed. It is harder doing that than it is being deployed, I think, in terms of a lot of the emotions that it brings to people. So it is a great understanding that you bring to your position.

I would like to ask you about this recent debate over standards at the Naval Academy as a result of diversity goals. We all feel very strongly that, as much as possible, our military should represent America, but we also, all of us I think, feel very strongly that should occur with demonstrable standards of fairness. This has been quite a debate over the past month or so. Are you familiar with this?

Mr. GARCIA. I am familiar with the piece, sir.

Senator WEBB. Have you seen any of the actual data that is floating around?

Mr. GARCIA. I cannot say I can speak definitively on the data. I am familiar with the debate and saw the original piece and would say this, Senator, that like yourself, my brother-in-law, who is here behind me, is an academy grad. Obviously, that institution has over the past century provided an elite, extremely rigorous, challenging, unique education and an inflow into our officer ranks both on the Navy and the Marine Corps side, and anything that would diminish that status is something we have to guard against.

I would also concur with you that we are at our best, we are at our strongest when we draw from all over the country.

Senator WEBB. I think in general, particularly in places like the Service Academies, but in general for every slot that is given to one person, it is arguably taken away from someone else. There are only so many people who can go to the Naval Academy. There are only so many people who can get into different kinds of schools, mid-level schools, and these sorts of things. I would just ask that you help us sort out this debate. We want to be able to stand in front of the American people and say that we have been fair on these issues.

Mr. GARCIA. I would just respond in this way, Senator. At a time when having met those recruiting goals, downsized our Navy and Marine Corps and now being able to be more selective than ever before, I commit to you that if confirmed, I will do everything I can to ensure that we solve that puzzle.

Senator WEBB. I appreciate your saying that, although we have not downsized the Marines, to my knowledge.

Mr. GARCIA. Excuse me. I meant met the recruiting goals early. That would be a better way of saying it.

Senator WEBB. Thank you. Thank you for that comment.

Congressman McHugh, when you were the chair of the House Personnel Subcommittee in 2005, you introduced an amendment that would, in the language that we have been given in my office, have banned Army women from forward support companies at a time when nearly 20,000 of them were actually already deployed in those billets. It got strong push-back from the uniformed military. DOD non-concurred at the time. You offered a substitute amendment similarly.

I do not want to go back and rehash that, but as Senator Levin mentioned, there were some questions on this. I appreciate your commitments to Senator Levin with respect to wanting to take a look at where it works and where it does not work.

We have a lot of confusion out in the military today. There was a 2007 RAND study taking a look at this issue that found that there were situations where people would believe that they were complying with DOD policy, but it could be a contradiction with Army policy on some of these standards.

I would like to offer, if I may, a suggested formula that I used when I was Secretary of the Navy because I had raised similar issues. My strongest objections early on were the interference of the political process into the day-to-day decisions that should have been left to the military on issues like this. I had questions raised on two confirmation hearings about my views on women in combat.

When I became Secretary of the Navy, I decided that the best way to do this was to go to the Active Duty military and have them report up to the political process rather than having the political process tell the military what to do. I convened a panel of 28 senior officers and NCOs, and 14 of them were male, 14 of them were female. I sent them to installations around the world. Instead of having them report back to me, I had them report to the warfare chiefs, in this case, submarine, air, and surface, and then to the Chief of Naval Operations. Then I had essentially the uniformed military report to the political process about how they thought this should look.

We opened up more billets in the Navy to women than any previous Secretary of the Navy had ever opened, but we did it with the military speaking to the political process. I would venture that now, after these many years of deployments, that it could be the time for the Army to do something similar.

Mr. MCHUGH. I appreciate that, Senator. That is an interesting take. As you alluded, I tried to explain to Senator Levin that amendment was—I had to offer it because I was the subcommittee chairman, but it was not my amendment. It was the full committee chairman. The walk-back amendments were mine.

I frankly do not have any information before me now that would suggest that the current policy in place since 1994 should be changed, but clearly, this should be a bottom-up exercise, should it come to that. I am not aware that Secretary of Defense Gates is engaged in a reevaluation. My understanding—and it is not based

on any direct conversations with him—is that he feels—and for the moment, I would concur—the current policy is working.

But clearly, that would be a very effective way because my interest would be in making sure the most, rather than the least MOSs are open to women. That is based on, as I mentioned to the chairman, the 10 visits to Iraq I have had. They are doing an irreplaceable job. If it should come to that, I appreciate the suggestion and I would certainly pass that along.

Senator WEBB. You would have that jurisdiction as Secretary of the Army without having to be directed by the Secretary of Defense, which is essentially what I did when I was Secretary of the Navy. I would just encourage you to think about this because the process now has been tested. From all indications that we have had in our office, there is some confusion in terms of whether policies are actually being met with the realities of where women are. This is probably best addressed systemically rather than anecdotally. I would encourage you to look at it.

Thank you, Mr. Chairman.

Mr. MCHUGH. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Webb.

Senator Udall.

Senator UDALL. Thank you, Mr. Chairman. Good morning. I want to thank all three panelists for taking the time to be here with us today. I have some very serious questions I want to direct to Congressman McHugh.

But I cannot help myself, Mr. Garcia. I have memories of my own family's time here in Washington. I have five brothers and sisters. My cousin, Senator Tom Udall, had five brothers and sisters. I see your children and their cousins sitting here. It brings a smile to my face. Wonderful families.

Congressman McHugh, you and I served in the House together on the House Armed Services Committee, and I learned a great deal from your leadership and from your focus on the welfare of our soldiers, our marines, our airmen, and our sailors. We have had a lot of conversation here this morning about what has been happening with our soldiers when they deploy home.

I represent the best State in the Nation. There is no question about that. One of the best communities in the Nation is Colorado Springs. There has been a large level of concern raised recently tied to a series of articles that the Colorado Springs Gazette has written. I would like to ask you, first, if you would commit to me to reading those articles about our service men and the acts that they have been committing in the community of Colorado Springs.

Mr. MCHUGH. I will, Senator. I became aware of those articles last night, and I promise you I will review them carefully.

Senator UDALL. They are sobering. They are concerning. They are horrifying, and they also point to the mission we have been discussing here today, which is how do we take care of our soldiers when they return from theater.

I would like to ask you about ways that the Army might think outside the box in addressing this looming set of challenges. Beyond building a requirement for uniform mental health providers into the budget, are there other ways that the Army might move forward? For example, how about a new category of mental health

providers like physicians' assistants? I would turn to you for your thoughts.

Mr. MCHUGH. Generically—and again, because I have not had the opportunity to be briefed on exactly what is happening internally in the Army and would not unless I were confirmed—I think we have to explore all possible opportunities and all possible paths of remedy.

I do understand, with respect to the situation that you mentioned in Colorado, there is a pilot project, Confidential Alcohol Treatment and Education Pilot (CATEP) project, that I am pretty confident you are aware of that is being established in three other facilities. Right now, the Alcohol and Substance Abuse Program (ASAP) is intended to encourage people to self-identify, come in, receive assistance, but one of the challenges about that is it does require commander notification of that self-referral. The project, as I understand it at Fort Lewis and two other facilities, will waive that reporting requirement.

I cannot make a promise here, Senator. I know you appreciate and understand that, but it may be, particularly given the news reports that I have understood have come out of the Epidemiological Consultation Study that have found, for example, more than 80 percent of those who committed violent acts at Fort Carson, in fact, less than 50 percent of them sought any kind of care and treatment. Perhaps inclusion in that CATEP study would be appropriate.

I do not know the details. I do not want to make you a promise I cannot keep, but I do promise you that if I am confirmed, we would certainly take a look at that.

Senator UDALL. You anticipated my question. What I hear you saying is you will look into it, and that is what I was going to ask you to do because I think it would be very effective.

Mr. MCHUGH. Absolutely.

Senator UDALL. If I might, let me turn to two other matters. I think you are aware of the Piñon Canyon maneuver site discussion that has been occurring in Colorado. I would like to ask you, if you are confirmed, can you commit that if the Army considers going ahead with the expansion, you would only proceed on the basis of willing sellers or leasing arrangements and would not use eminent domain.

Mr. MCHUGH. Again, under the rubric of not wanting to make a promise I cannot keep, I will tell you as someone who represents the Adirondacks Park, the largest publicly held park in the Lower 48, I have a healthy distrust for the process of eminent domain. We always want to try to work toward willing sellers.

I think part of the Army's problem—and again, I am answering as a Congressman—when it came to Piñon Canyon is they did not do as effective of a job as I think you and others and myself included would have liked in terms of engaging the community, trying to work for a positive outcome, having cooperative negotiations. That has to be the first path. If there is an opportunity to resurrect Piñon Canyon, I would certainly stand ready to work with you to try to search for that willing seller, that cooperative agreement because that is always the best way to go. The Army should want—

should want—happy, good, positive neighbors, and you do not get that by going in and condemning property.

Senator UDALL. Thank you for that. Yes, I would note that previous leaders in the Department of the Army have made it clear that eminent domain would not be used and they would pursue, if this moved forward, willing sellers or lease arrangements.

I said I wanted to make two additional points. I want to make a third one very briefly, which is to acknowledge the service of Major General Mark Graham at Fort Carson who has been a real leader on this mental health front. I think he has the talent, insight, and a personal set of stories that we ought to continue to utilize. I wanted to acknowledge General Graham in that regard.

Let me end on this note, and you do not need to respond, Congressman. But I think I would like to believe that Congress comes up with new laws to address new or abiding challenges and that Congress repeals laws that do not make sense in the context in which they now operate. They are antiquated or they no longer reflect the reality of our society.

I believe Don't Ask/Don't Tell is a failed policy. It is a good example of a law that Congress should repeal. I do not believe it will be easy to do, but it needs to be done. I believe this discriminatory policy undermines the strength of our military and the basic fairness of the principles on which our great Nation is founded. I look forward to working with you and with others at DOD to accomplish the full repeal of Don't Ask/Don't Tell. I look forward to working with you after you are confirmed. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Udall.

Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman.

Congressman McHugh, Dr. Westphal, and Mr. Garcia, I congratulate you on your nominations from our President, and I wish you the best of luck. I feel very good about you. I also want to welcome all of your family members here. It has already been a long morning, and they look, some of them, kind of tired. But it is great that you are all here.

Representative McHugh and Dr. Westphal, I just wanted to talk a little bit about the wounded warriors. Representative McHugh, your opening comments spoke about your concern of the wounded warriors and your obvious commitment to them.

Several weeks ago, I attended the Wounded Warrior Parade at the Pentagon, and it was a most inspirational moment for me. It was an opportunity to speak to these individuals and really gain a sense of the healing challenges that they face.

Following the parade—there were five Senators that morning—we met with the Chief of Staff of the Army, General George Casey, and the Director of the Army Staff, Lieutenant General David Huntoon. Then last month, my staff met with the Commander of the Warrior Transition Command, Brigadier General Gary Cheek.

I know that when our soldiers are injured—and I am pleased to know that the Army immediately assesses each soldier in order to devise a tailored, individual development plan for them, whether it is reintegration back to their combatant units, reclassification of their Active Duty status in order to learn a new Army specialty,

or transition to civilian life. We have actually had several wounded warriors come and talk to us about that.

But I think it is encouraging that many of the former wounded warriors are a part of the warrior transition unit as mentors.

I am also pleased that the Army plans on developing an electronic integrated system to track the progress of our wounded warriors.

One area that has caught my attention is the disciplinary process, and according to General Cheek, the soldier perceptions vary on acceptable conduct while healing and transitioning. He recommended that the Army draft policy guidance to clarify the Army expectations of the warriors in transition.

With that background, a couple of questions are, how do you plan on institutionalizing an Army directive aimed at clarifying the expectations of our warriors in transition? How do you envision working with General Casey to develop programs of instruction for the incoming warrior transition unit company commanders and the 1st sergeants? Do you plan on incorporating lessons learned regarding the wounded warrior care? Representative McHugh?

Mr. MCHUGH. I was interested to hear you say that because in my visits to the transition units, whether it is at Fort Drum in my district or in other places, in the sessions we had, where we asked the officers to leave, one of the major complaints was, gee, this guy does not have to do this and I have to do that. It seems to fit into the observation you just made. I guess one of the shortcomings you can assess against me is that I just assumed those were personal gripes that occur.

If General Cheek says there is a lack of uniformity in direction and instruction with respect to the anticipated and, in fact, demand behavior amongst the cadre of wounded warriors, then we have to fix that. It would seem to me, as I understood you to say, Senator, General Cheek suggested sort of directive, that makes a reasonable way forward. Obviously, I cannot commit to that, but certainly amongst all the other problems we are facing, that would seem to be one of the more basic and should and could be accommodated.

The training issue is one that, if not more problematic, is certainly more fundamental. I had the opportunity to work with Dr. Vic Snyder who served for a time as the ranking member and ultimately as the chairman of the Personnel Subcommittee in our House, a good man from Arkansas. We helped formulate a part of what became the Wounded Warrior Care Program. We were very proud of it and thought everything was going in the right direction.

But as I noted earlier in talking about suicide prevention and other things, the paperwork is just the first start. The warrior transition units—we have some 36 of them in this country. Everybody goes in with the best intentions, but in spite of that and in spite of a good approach that the House, this committee, the HASC, and others helped formulate, there still are gaps in the uniformity and effectiveness of implementation. We have to do a better job there.

It starts with training, Senator, as you suggested. I have been advised—and it is certainly something I want to make sure is, indeed, happening—that the Wounded Warrior Care Program is beginning to develop and instill curricula at both the battalion and

the brigade level to make sure everybody from officer down to our 1st sergeants are instructed as to the mission of the wounded warrior units and also what the care standards are and what the expectations are.

On paper, that sounds good. That is all I know at this point, but I promise you that is something certainly we not only need but will follow up on, if confirmed.

Senator HAGAN. I know you are sincere in your commitment to this.

Dr. Westphal?

Dr. WESTPHAL. Senator, I would agree with everything that the Congressman said.

I just had one additional dimension that actually came up yesterday in a conversation I had with an individual in the Army in the manpower/reserve affairs piece where he was bringing me up to date on some information. I was asking him about the issues that the Secretary and the Army will need to face or think about into the future, consistent with the idea that we are still going to be deployed heavily in Afghanistan and still in Iraq.

One of the things he said was we are learning slowly but do not have conclusions about head trauma, for example. We are now beginning to identify studies and have real experts, neurologists and other experts in these areas, begin to understand the full effects of what happens to soldiers when they come back and have been close to some type of an explosion.

I went further and asked, are you looking at behavioral aspects as opposed to simply physiological, neurological issues, and he said, yes, we are concerned about how this is altering behavior, how it is affecting behavior, how it is affecting performance as they are in the reset period.

So I would just add that to the Congressman's point, that this is an area we need to really focus on because there are more and more of those kinds of injuries faced by our soldiers and there are a lot of unknowns there.

I think as Congressman McHugh mentioned a little bit earlier in his comments, we are given timelines in our briefings. The Army is doing a study. This will take 5 years to do it, and there are not 5 years. These issues have to be addressed now. So I would agree with the comments of the Congressman that we have to focus on this more aggressively.

Senator HAGAN. Thank you, gentlemen. I see that my time has expired. Thank you.

Mr. MCHUGH. Thank you, Senator.

Chairman LEVIN. Thank you, Senator Hagan.

Senator McCaskill.

Senator MCCASKILL. Thank you, Mr. Chairman, and thank you to all of you for your service.

Representative McHugh, I have been visiting with the dairy farmers in my State, and it is a rough time. We wrangled over the postal bill yesterday. So I know that as you face new challenges, at least you can push some of those aside and realize they are no longer on your plate.

Dr. Westphal, I am going to give you a free pass this morning because I am a political science major from the University of Mis-

souri. So you, obviously, are brilliant since you got your doctorate from the University of Missouri in political science. What year did you get your doctorate?

Dr. WESTPHAL. 1980 is when I finished my Ph.D.

Senator MCCASKILL. So you are certainly familiar with David Luthold and Drs. Casey and Tilliman, all of the professors that have some responsibility for me sitting here.

Dr. WESTPHAL. I took classes from all those, Senator.

Senator MCCASKILL. Absolutely. It is a great school and it is great that you are coming back into the service of your country in this regard.

Let me first begin with you, Congressman McHugh, and ask you. No one has, so far, asked you about your view on Don't Ask/Don't Tell in the military. I think it is important that we get that on the record at this juncture.

Mr. MCHUGH. Thank you for the question. By the way, I am a political science major too.

Senator MCCASKILL. That counts. Unfortunately you are not a tiger though.

Mr. MCHUGH. I gave it a shot. [Laughter.]

It is a serious issue and it is an issue that has not been before me as a Member of Congress since 1993. The reality is the President has made very clear—and I have not had a chance and I have not talked to the President directly, but I have talked to high officials in the administration, and I have no doubt the President is going to press forward with his intent to change that policy. To whatever degree remains to be seen. I think he would like a full reversal.

It is also without question that Secretary Gates has begun a process of what he describes as softening that policy. Whatever that may mean remains to be seen.

My view, as Secretary of the Army, if confirmed, would be to do the most effective job I could garnering the military input and information that I think any secretary and any President would like as they go forward in finalizing the determination. That is how I described my envisioned role to the administration. They seemed content with that.

But having said that, two other factors. Whatever the decision of the President and the Secretary of Defense, it would be my responsibility, if confirmed, or any Service Secretary's responsibility thereafter to do the best job he or she could to come before this committee, the HASC, whichever other relevant committees may be afoot to best describe and as most effectively to describe the reasons, the rationale, and the justification for whatever policy evolves. That is the responsibility of a Service Secretary, as I see it, under title 10.

At the end of the day, I think it is worth noting, of course, this is a policy embedded in law, and there will be no overturning of it without the agreement of this Congress, the House, the Senate, and of course, the President.

Senator MCCASKILL. Thank you.

Further, I know that you worked on the Oversight and Government Reform Committee in the House, I have been very engaged

with the help and assistance of this committee and the staff and certainly the chairman on contracting issues.

There is a heartbreaking case of Rocky Baragona, a lieutenant colonel, who was killed in a HMMWV accident in 2003 in Iraq. He was hit by a Kuwaiti company that is a contractor for the United States. His HMMWV was struck by a truck driven by a Kuwaiti company called Kuwait and Gulf Link Transport. The Army found that this company was negligent in his death, and his family brought suit against this company and got a default judgment against this company. Then they hired lawyers, came into the United States, and claimed that we had no jurisdiction over them, no in personam jurisdiction over them, and they ultimately prevailed in court. Now, that is the first part of the story.

The second part of the story is that there have been allegations of human trafficking on the part of this company.

After they have come in and hired lawyers and defeated this family in their effort to get compensation for their son's death, they are now in line for more contracts. They were put up for possible debarment on September 22, 2006, and as we speak, they are seeking, through some successor companies and the original company, \$1.5 billion in contracts right now, including such things as food service, transport, and all kinds of things.

There is something terribly wrong with this picture, that a company we would hire would negligently take the life of one of our soldiers and we go back to business as usual. I have sponsored a law that will give in personam jurisdiction in Federal court over all U.S. contractors in civil and criminal actions. I would like your view on the Rocky Baragona case and the inability of the military to cut off contractors who are bad actors. I mean, at a minimum, I would like us to get to the point we quit paying them bonuses—we are still paying performance bonuses to companies who have hurt our troops—much less giving them successor contracts. I would like your view of the Rocky Baragona legislation, and if you think personal jurisdiction over any contractor that we hire through the U.S. Government should lie in the United States.

Mr. MCHUGH. Senator, as I am sure you will appreciate, I really cannot comment on the particulars of the case. Certainly as you describe it here this morning, something would appear to be very wrong. I would promise you, if I were confirmed, I would look at it carefully and get back to you and try to discuss it with you further.

I know the Secretary of Defense has begun to assemble a task force on contracting. It does not just apply to this issue but, in fact, applies to the issue of guard contractors, all kinds of contracting arrangements across the board as to what their legal obligations and responsibilities are.

My opinion has always been that if, indeed, we are going to contract with individuals, we ought to think very carefully about making them subject and under the jurisdiction of the laws of the United States. I understand that is a non-lawyer's opinion and that it is far more complex than that. But in terms of my sympathies, my sympathies certainly lean toward yours. But I just cannot comment on the particulars, but I promise you I would be happy—not

happy—I would be obligated to look at it and to pursue it with you further at the appropriate time.

Senator McCASKILL. That would be terrific. I think it is very important that we have accountability in every aspect of what we do as it relates to taking care of the men and women who are stepping across the line for us. If somebody we are hiring runs over one of them with a truck, they ought to be held accountable. It is just pretty simple I think. Just good, old midwest common sense tells me that is not the right outcome.

I look forward to you looking into it and I look forward to working all of you in your new capacities. God bless you for your service. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCaskill, for your typical boring in on a very important question that really needs to be addressed.

I just have a few additional questions for a second round.

First of all, Dr. Westphal, I think you made reference to the fact that you will be the CMO, if you are confirmed, to the Department of the Army. In fact, you will be the first CMO. We established that position in 2007 out of frustration with the inability of the military departments to modernize their business systems and processes. We chose to have the Under Secretary serve concurrently as CMO because no other official in the Department of the Army, other than the Secretary, sits at a high enough level to cut across stovepipes and implement comprehensive change.

Will that be a top priority of yours, and how would you balance your duties as CMO with your other duties as Under Secretary?

Dr. WESTPHAL. Thank you, Senator.

It certainly would be a top priority. I cannot tell you specifically because we have not talked about it, but if confirmed, I would immediately meet with the Secretary of the Army and discuss how to move forward into the job not only of the CMO but also the other responsibilities of the Under Secretary that he would wish to assign to me.

Having said that, I am a big believer, because I have seen this in other places where I have worked, that the business processes are critically important to the success of the operation. We have a huge bureaucracy. We have great challenges today and into the future financially and fiscally for the Army. The OPTEMPO is continuing to stay either steady state or even growing. We do not know what the QDR is going to tell us. We do not know what General McChrystal is going to suggest in terms of the future requirements in Afghanistan. We do not know what other combatant commanders are going to require.

With all that uncertainty, I think we absolutely have to reshape this business process and redesign it and transform it, as you have indicated, Mr. Chairman, in your efforts to do that across the Department almost immediately. We have to really focus on that, and I think the Army recognizes that.

Chairman LEVIN. It has been a longstanding frustration and problem. We have tried various ways, over literally decades I think now, to correct it. Will you just keep in close touch with this committee on your efforts in this area?

Dr. WESTPHAL. Yes, sir. In fact, I had made a mental note to myself that if confirmed, one of the first things that I would like to do is to meet with the majority and minority staff of the committee to get a sense of what you have been thinking about this and what your interpretations are of what you wanted to accomplish in this law so that I make sure I understand that because I am sure you will be asking me in the future.

Chairman LEVIN. Yes, we will be. We would welcome that initiative on your part.

Mr. Garcia, in response to the advance policy questions, you identified as a major challenge continuing efforts towards Active component/Reserve component integration and continuum of service. The Navy has taken the lead on this issue in recent years by pushing forward a sabbatical program, which Congress authorized on a pilot basis last year. This would allow sailors to leave Active Duty for a period of time to pursue family and career objectives and then return to Active Duty to continue their careers where they left off.

We have been told that this generation of young servicemembers may forgo the traditional military career, 20 years on Active Duty, followed by retirement, and instead opt to serve some years on Active, transfer to the Reserve components or out of the military altogether, then come back to Active Duty both to serve the individuals' needs and, obviously, to serve the needs of the Navy.

Is it too early to know how this pilot program is working, or do we have some evidence?

Mr. GARCIA. I think it is, quite honestly, Senator, a little too early. My understanding, at least, is the selectees for the first round for the pilot program that you just described have just recently been notified, and what they have found—we can say at this point—is that bulk of them were not what you described as what was envisioned, that is, folks taking a nontraditional path to military service.

My understanding is at this point in this first round, folks took an opportunity to devote full-time care to an injured one, a parent, grandparent. I think what is early enough to say is that, unfortunately, when those tragedies pop up in life, they do not align themselves with a schedule board at the Bureau of Personnel in Millington.

But if confirmed, as soon as that data does come back—I think it is an intriguing program. I think it is an interesting idea and possibly, as you said, a way to bring more young people who might not have considered the traditional 20-year path into our Nation's service.

Chairman LEVIN. You were asked, I believe, by Senator Webb about the diversity issue at the academies. You indicated that you were going to try to sort that issue out, as you put it, I believe, as soon as you can address it.

I would urge that as you approach that issue and to do your sorting out that what you do is include in that process an amicus brief which retired military officers signed in an affirmative action case in the Supreme Court that I joined and a few Members of Congress joined in support of the diversity efforts in the military. That ami-

cus brief pointed out the extremely positive effects that that effort had right after the Vietnam War. It is an important history.

I urge you to read the brief to gain, if you already have not, an understanding of what the lack of diversity produced and how the effort to promote it really made a major positive difference in our military and frankly for the country as well. The military has led in this area in many ways. I would urge that you take a look at that amicus brief as part of your reachout. That effort to reach out for diversity really was an historic effort on the part of the military with great benefits.

Mr. GARCIA. I remember the brief, Senator, and I will revisit it. Chairman LEVIN. All right.

Congressman McHugh, in answer to, I believe, Senator Webb's question about the amendments on women in particular roles, you indicated that yours were the walk-back amendments. I just want to make it clear for the record. I am not so sure everyone caught that, but I think it is important here historically that as you indicated, the amendment that was referred to in subcommittee was done as an accommodation to the chairman of the full committee, but that the correction of that, the undoing of that, the reversal of that was something that you led and that was "walked back."

Mr. MCHUGH. That was my intended interpretation of the phrase, yes, sir.

Chairman LEVIN. Thank you.

There are no other questions that I have. I would only say this to you, Mr. Garcia, and I guess I will single you out for this because of the number of children that you have here and you have, as well, I think a niece, maybe two nieces here as well. Is that correct, and one nephew?

Mr. GARCIA. Three nieces and a nephew.

Chairman LEVIN. Three nieces and a nephew all here, but your children and your nieces and nephew have really done an extraordinary job of trying to look attentive to the best of their ability. I want to give them a lot of credit. They do a lot of good when they come here. I hope some day they will recognize that they were a big help to their father and their uncle sitting behind him. I know how proud you are of them, but it is important to all of us that have families that they do stand behind you because you will need that kind of support. But they did yeoman's service here for their father and uncle this morning, and we commend them on it. We will not heap praise on the adults. They do not need it.

At any rate, we ought to add this to the list of stress on the military, the stress we put on kids who try to look interested for 2 hours at these confirmation hearings.

Mr. GARCIA. Thank you for saying that, Senator.

Chairman LEVIN. We thank you all for your service, your continued service. We look forward to your speedy confirmations and we stand adjourned.

[Whereupon, at 12:06 p.m., the committee adjourned.]

[Prepared questions submitted to Hon. John M. McHugh by Chairman Levin prior to the hearing with answers supplied follow:]

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. The Goldwater-Nichols Act changed Department of Defense (DOD) operations in a dramatic and positive way. I believe that the structure established by Goldwater-Nichols has significantly improved inter-service and joint relationships and promoted the effective execution of both military department and combatant command responsibilities. DOD, working with Congress, must continuously review the law in light of improving capabilities, evolving threats, and changing organizational dynamics. I am currently unaware of any reason to amend Goldwater-Nichols, but if confirmed I would have an opportunity to assess whether the challenges posed by today's security environment require amendments to the legislation with a view to continuing the objectives of defense reform.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. This milestone legislation, now more than 20 years old, has ably served our Nation. I am currently unaware of any reason to amend Goldwater-Nichols, but if confirmed, I would have an opportunity to assess whether the challenges posed by today's security environment require amendments to the legislation with a view to continuing the objectives of defense reform.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. In the role of Secretary, I would principally draw on my experiences as the Representative of the Congressional District that is home to Fort Drum and the 10th Mountain Division (Light Infantry) and as a 16-year member of the House Armed Services Committee. In that capacity, I held several leadership positions, first as the Chairman of the Morale, Welfare, and Recreation Panel, then as head of the Military Personnel Subcommittee, and later as the subcommittee's ranking member. At the beginning of the 111th Congress, I assumed the ranking member position of the full committee. During the majority of my time in Congress, I have served as the cochair of the House Army Caucus and as a member of the West Point Board of Visitors. I have seen firsthand the dedication and sacrifice of America's service personnel and have interacted extensively with their civilian and military leadership. If confirmed, the leadership experience I have gained through my career as a public servant has prepared me well to serve as Secretary of the Army.

DUTIES

Question. Section 3013 of title 10, U.S.C., establishes the responsibilities and authority of the Secretary of the Army.

What is your understanding of the duties and functions of the Secretary of the Army?

Answer. The Secretary of the Army is the head of the Department of the Army and is responsible for, and has authority to, conduct all affairs of the Department of the Army as prescribed by law, by the President, or by the Secretary of Defense.

Question. Assuming you are confirmed, what duties do you expect that Secretary Gates would prescribe for you?

Answer. I expect that if I am confirmed, Secretary Gates would task me to implement the President's national security objectives throughout the Department of the Army. Further, as he has done with other military department Secretaries, Secretary Gates may prescribe for me additional duties that support him in carrying out his responsibilities to ensure that DOD successfully accomplishes the many demanding and varied missions it has been entrusted with. At this time, I am not aware of any additional duties Secretary Gates may be considering assigning to the Secretary of the Army. However, if confirmed, I would carry out, to the best of my abilities, all duties assigned to me by law or the Secretary of Defense.

Question. What duties and responsibilities would you plan to assign to the Under Secretary of the Army?

Answer. The Under Secretary serves as the Secretary's principal civilian assistant and advisor on issues of critical importance to the Army. If confirmed, I would review the Under Secretary's current assignment of duties and functions to determine the capacities in which he might most appropriately support my efforts to ensure that the Department of the Army is effectively and efficiently administered in accordance with law and the policies promulgated by the Secretary of Defense. Further, pursuant to section 904 of the National Defense Authorization Act for Fiscal Year 2008, I would designate the Under Secretary as the Chief Management Officer of the Department of the Army, with the primary management responsibility for business operations. In this capacity, if confirmed, I would assign the Under Secretary such duties and authorities as Chief Management Officer as are necessary to organize and administer the business operations of the Army effectively and efficiently in accordance with the policies promulgated by the Secretary of Defense. In accordance with section 908 of National Defense Authorization Act for Fiscal Year 2009, I would act through the Under Secretary in his role as Chief Management Officer to continue the ongoing business transformation of the Army.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Secretary of the Army?

Answer. Although I look forward with confidence to assuming the duties of the Secretary of the Army should the Senate confirm me, I recognize that every new Secretary has much to learn. I would work to further my understanding and knowledge of the Army, its people and organizations, the challenges it faces, its interaction with DOD, and the resources necessary to sustain and transform it. I would work with and through the talented and dedicated military and civilian personnel serving the Department to broaden my expertise and increase my knowledge, and I would seek advice and counsel from the many and diverse stakeholders dedicated to the success of the Army, including the Members and staff of Congress.

RELATIONSHIPS

Question. If confirmed, what would be your working relationship with:
The Secretary of Defense.

Answer. The Secretary of the Army reports directly to the Secretary of Defense and ensures that his priorities are implemented in the Department of the Army.

Question. The Deputy Secretary of Defense.

Answer. The Secretary of the Army works closely with the Deputy Secretary of Defense to ensure that the Secretary of Defense's priorities are implemented in the Department of the Army.

Question. The Under Secretaries of Defense.

Answer. If confirmed, I, the Under Secretary of the Army, and the Assistant Secretaries of the Army will coordinate and work closely with the Under Secretaries of Defense to ensure that the Department of the Army's actions complement the priorities set forth by the Secretary of Defense and the Deputy Secretary of Defense.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Secretary of the Army coordinates with the Chairman of the Joint Chiefs of Staff to ensure that he has all the information and support necessary from the Department of the Army to perform the duties of principal military advisor to the President, National Security Council, and Secretary of Defense.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. The Secretary of the Army coordinates with the Vice Chairman of the Joint Chiefs of Staff to ensure that he has all the information and support necessary from the Department of the Army to perform his duties.

Question. The Under Secretary of the Army.

Answer. The Under Secretary of the Army is the principal assistant to the Secretary of the Army. The Under Secretary acts with the full authority of the Secretary in the management of the Department and performs any duties the Secretary of the Army gives him.

Question. The Chief of Staff of the Army.

Answer. The Chief of Staff of the Army performs his duties under the authority, direction, and control of the Secretary of the Army and is directly responsible to the Secretary according to title 10 of the U.S.C.

Question. The Assistant Secretaries of the Army.

Answer. The Assistant Secretaries perform specific oversight roles delegated to them by the Secretary of the Army.

Question. The General Counsel of the Army.

Answer. The Army General Counsel is the senior civilian legal advisor to the Secretary of the Army. The General Counsel also serves as the Secretary of the Army's chief ethics official.

Question. The Inspector General of the Army.

Answer. The Inspector General of the Army is charged with inquiring into and reporting on the discipline, efficiency, economy, morale, training, and readiness of the Army, as directed by the Secretary of the Army or the Chief of Staff.

Question. The Chief of the National Guard Bureau.

Answer. The Chief, National Guard Bureau is a principal advisor to the Secretary of Defense, through the Chairman of the Joint Chiefs of Staff, on matters involving nonfederalized National Guard forces and on other matters as determined by the Secretary of Defense. The Chief, National Guard Bureau also is the principal adviser to the Secretary of the Army and the Chief of Staff of the Army, and to the Secretary of the Air Force and the Chief of Staff of the Air Force, on matters relating to the National Guard, the Army National Guard of the United States, and the Air National Guard of the United States. Because the National Guard is a key element of the Reserve component, the Secretary of the Army must work closely with the Chief, National Guard Bureau to provide overall supervision of National Guard matters across all aspects of Army business as prescribed under title 10.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges that will confront the next Secretary of the Army?

Answer. In my view, the Army faces major challenges in two key areas: the stress on the force and properly equipping the force. Soldiers and their families continue to experience tremendous strain as they defend our Nation at home and abroad. Many are experiencing multiple deployments with too little time in between to fully recover. This stress is taking its toll and is manifested in a variety of areas, including rates of suicide and divorce.

Additionally, the Army faces the challenge of resetting its equipment after many years of hard use under extreme conditions. As the Army shifts forces from Iraq to Afghanistan, the equipment will need to be repaired and refitted—all while continuing to fight in both Iraq and Afghanistan. While the Army remains committed to equipping its forces for the current fight, it must continue to invest in modernization to ensure properly equipped forces for the future.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I would work with the Secretary of Defense, Congress, and the rest of the Army's leadership to reinforce effective programs that are already in place, make adjustments where appropriate, and, as needed, initiate programs that address new challenges. Taking care of soldiers and their families is fundamental to properly maintaining the force. Family support programs have improved tremendously over recent years, as have medical and behavioral health services that are now available to soldiers and family members; however, there is always room for improvement. Ultimately, the challenge of long and frequent deployments boils down to an equation of supply and demand. The Army must always be able to provide enough forces to meet the needs of the commanders who are fighting the wars and at the same time increase the time soldiers are able to spend at home between their deployments. The continued drawdown of forces from Iraq will help increase the supply of forces and lengthen dwell times at home.

If confirmed, I would demand innovative solutions to reset and modernize equipment to address current and future conflicts to ensure our defense dollars are well spent in this effort. To accomplish this, the Army's requirements, contracting, procurements, and processes must be able to meet soldier requirements within current and future resource constraints. I would place a great deal of emphasis on each of these areas.

Question. What do you consider to be the most serious problems in the performance of the functions of the Secretary of the Army?

Answer. I am not aware of any serious problems in the performance of the functions of the Secretary of the Army.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. Should the Senate confirm me, I intend to engage in an ongoing process of consultation with the Secretary of Defense, Army leaders, others in DOD, and Congress to address any area of the Secretary of the Army's performance of functions that may require attention and pursue opportunities for improvement. As to a timetable, if confirmed I would strive to ensure that upon my departure from office, I would leave America's All-Volunteer Army force better trained, equipped, and organized.

Question. If confirmed, what broad priorities will you establish?

Answer. If confirmed, my focus would be to keep America's Army the best-trained, best-equipped, and best-led land force the world has ever seen. Since we are at war, my first priority would be ensuring that soldiers and units are well organized, trained, equipped, and ready for success in the current conflicts.

A clear priority must be sustaining our Nation's quality, All-Volunteer Force by providing the support our soldiers and families deserve, with a particular emphasis on health care programs, especially for wounded soldiers.

Also, if confirmed, I would work to ensure that the Army continues to transform to meet the challenges of the 21st century. I would work to rebuild strategic depth and make sure the Army's organization, training, and modernization efforts can, on a continuous basis, provide land forces that are versatile enough to be successful across the full spectrum of operations.

ACQUISITION ISSUES

Question. Many experts have acknowledged that DOD may have gone too far in reducing its acquisition work force, resulting in undermining of its ability to provide needed oversight in the acquisition process.

Do you agree with this assessment?

Answer. Yes.

Question. If so, what steps do you believe the Department of the Army should take to address this problem?

Answer. If confirmed, I would look to examine the size and age of the acquisition workforce and its impact on the oversight of acquisition programs today and in the future. The October 2007 "Report of the Commission on Army Acquisition and Program Management in Expeditionary Operations," often referred to as the Gansler Commission Report, recommended an increase in the stature, quantity, and career development of military and civilian contracting personnel and recommended additional training and tools for overall contracting activities. It is my understanding that the Army is in the process of implementing these recommendations.

Also, the National Defense Authorization Acts for Fiscal Years 2008 and 2009 have enabled the Army to implement initiatives and programs that will assist in recruiting, hiring, developing, training, recognizing, and retaining its acquisition workforce. This flexibility is critical in the contracting arena, as well as program management, systems engineering, cost estimating, and several other areas. I support the rightsizing of the overall workforce to the mission.

Question. Major defense acquisition programs in the Department of the Army and the other military departments continue to be subject to funding and requirements instability.

Do you believe that instability in funding and requirements drives up program costs and leads to delays in the fielding of major weapon systems?

Answer. The short answer is yes. Without examining each program in detail, it is difficult to judge whether funding instability or other reasons cause some programs to experience high cost or schedule delays. I recognize that large funding changes often are made for what appear to be valid reasons, such as changes in force structure requirements or mission focus, and participation in combat operations.

Question. What steps, if any, do you believe the Army should take to address funding and requirements instability?

Answer. To address funding and requirements stability, the Army must increase the fidelity of cost estimates, avoid the too rapid adoption of immature technology, improve the quality of systems engineering, control growth in requirements, and, when appropriate, use incremental builds.

Question. The Comptroller General has found that DOD programs often move forward with unrealistic program cost and schedule estimates, lack clearly defined and stable requirements, include immature technologies that unnecessarily raise program costs and delay development and production, and fail to solidify design and manufacturing processes at appropriate junctures in the development process.

Do you agree with the Comptroller General's assessment?

Answer. Although I fundamentally agree with the Comptroller General's assessment, I note that threats cannot be predicted with certainty and programs therefore must respond to a broad range of possible situations. Accordingly, the Army is challenged to develop and field the most technologically advanced capabilities to its warfighters to keep pace with this high level of operations.

Question. If so, what steps do you believe the Department of the Army should take to address these problems?

Answer. I understand that DOD published a major revision to the instruction on the operation of the Defense Acquisition System in December 2008. That instruction

places increased emphasis on knowledge-based acquisition practices and delays the critical program initiation decision at Milestone B to provide for greater resolution on requirements, design, and costs. The Weapon System Acquisition Reform Act of 2009 reinforces the oversight and reporting process for major programs. It will take some time for the results of these actions to be seen in individual acquisition programs. If confirmed, I would insist on clarity and rigor in the oversight of major programs to ensure that the acquisition process supports the needs of the force and is a responsible steward of the resources available.

Question. By some estimates, DOD now spends more money every year for the acquisition of services than it does for the acquisition of products, including major weapon systems. Yet, the Department places far less emphasis on staffing, training, and managing the acquisition of services than it does on the acquisition of products.

What steps, if any, do you believe the Army should take to improve the staffing, training, and management of its acquisition of services?

Answer. If confirmed, I would direct an assessment of how the Army acquires services, including organization, policy, and processes, to make sure we have an effective management structure. I would also ensure that the management of service acquisition was properly led, staffed, and resourced.

Question. Do you agree that the Army should develop processes and systems to provide managers with access to information needed to conduct comprehensive spending analyses of services contracts on an ongoing basis?

Answer. I agree the Army should have the processes and systems in place to analyze spending and enhance the overall management of service contracts. I do not have sufficient insight at this time into the capabilities of the current information management systems. If confirmed, I would support modifying these systems as required to conduct these analyses.

Question. The last decade has seen a proliferation of new types of government-wide contracts and multi-agency contracts. DOD is by far the largest ordering agency under these contracts, accounting for 85 percent of the dollars awarded under one of the largest programs. The DOD Inspector General and others have identified a long series of problems with interagency contracts, including lack of acquisition planning, inadequate competition, excessive use of time and materials contracts, improper use of expired funds, inappropriate expenditures, and failure to monitor contractor performance.

What steps, if any, do you believe the Army should take to ensure that its use of interagency contracts complies with applicable DOD requirements and is in the best interests of the Department of the Army?

Answer. It is my understanding that the Office of Federal Procurement Policy, DOD, and the Army have issued new or revised policies, procedures, and guidance to address the problems the Inspector General identified. If confirmed, I would ensure that the Army's Procurement Management Review Team makes the assessment of compliance and effectiveness of policy and procedures an item of special interest.

ARMY MODERNIZATION

Question. In general, major Army modernization efforts have not been successful over the past decade. Since the mid-1990s, Army modernization strategies, plans, and investment priorities have evolved under a variety of names from Digitization, to Force XXI, to Army After Next, to Interim Force, to Objective Force, to Future Combat System and Modularity. Instability in funding, either as provided by DOD or Congress, has been cited by the Army and others as a principal cause of program instability. For the most part, however, the Army has benefited from broad DOD and Congressional support for its modernization and readiness programs even when problems with the technical progress and quality of management of those programs have been apparent—the Armed Reconnaissance Helicopter (ARH) is a recent example.

What is your assessment, if any, of the Army's modernization record?

Answer. The Army's modernization record clearly depicts the complexities of an Army in transition during wartime. I believe the Army must continue to adapt to a rapidly changing threat environment. If confirmed, I look forward to working with the Secretary of Defense and Congress to equip and modernize the force.

Question. If confirmed, what actions, if any, would you propose to take to achieve a genuinely stable modernization strategy and program for the Army?

Answer. Stable, predictable total obligation authority allows the Army to balance its needs, chart a course, and stick to it. If confirmed, I would work with the Secretary of Defense and Congress to arrive at that stable funding level and, subsequently, a stable modernization program.

Question. What is your understanding and assessment of the Army's modernization investment strategy?

Answer. Having watched this evolve over the past few years, I would offer that, by its very nature, the Army's modernization investment strategy is built on assessing the likelihood of evolving threats and planning future capabilities to mitigate those threats. It is an imprecise science, requires almost constant review and correction, and must balance investments in future development with improvements to today's equipment. If confirmed, I plan a thorough review of these investments.

Question. In your view does the Army's modernization investment strategy appropriately or adequately address current and future capabilities that meet requirements for unconventional or irregular conflict?

Answer. At this juncture it appears that the Army is making appropriate investments to counter unconventional and irregular threats. This includes investments in science and technology research and in an adaptable organizational structure in our labs, program offices, and headquarters staff that allow the Army to quickly address emerging threats on the battlefield. The key for me, if I am confirmed, is managing how the Army balances investments in current and future initiatives.

Question. If confirmed, what other investment initiatives, if any, would you pursue in this regard?

Answer. I do not have the detailed knowledge to make an accurate assessment at this time. If confirmed, I intend to fully review the Army's investment initiatives.

Question. If confirmed, what actions, if any, would you propose to ensure that all these initiatives are affordable within the current and projected Army budgets?

Answer. I believe one of the strengths of the defense program is to specifically address affordability and the outyear projection of long-term funding requirements. Those processes have been strengthened by initiatives within the Office of the Secretary of Defense and by Congress. If confirmed, I believe I would have the required visibility and management structure that would allow me to provide these judgments to Congress.

Question. In your view, what trade-offs, if any, would most likely have to be taken should budgets fall below or costs grow above what is planned to fund the Army's modernization efforts?

Answer. While I do not have sufficient insight into what actions might be required, any trade-offs must occur after all areas of risk are carefully considered in coordination with the Secretary of Defense and Congress.

ARMY WEAPON SYSTEM PROGRAMS

Question. What is your understanding and assessment of the following research, development, and acquisition programs?

Future Combat System (as restructured).

Answer. It is my understanding that the acquisition program for the Future Combat System has been canceled because of issues related to technology maturity and affordability. In its place, the Army has been directed to make the transition to an Army modernization plan consisting of a number of integrated acquisition programs: (1) Spin Out Early-Infantry Brigade Combat Team (BCT); (2) Follow-on BCT Modernization/Equipment for BCT Modernization; (3) Ground Tactical Network capability; and (4) a new platform for the Ground Combat Vehicle. I am not yet in a position to offer an informed assessment of these efforts.

Question. Stryker combat vehicle, including the Stryker mobile gun variant.

Answer. I am not yet in a position to offer an informed assessment of the Stryker program, but I understand that Stryker variants have been in production since 2004 and that the Army has successfully used the system in Iraq and is preparing to deploy it to Afghanistan.

Question. Joint Light Tactical Vehicle.

Answer. Although I am not yet in a position to provide an informed assessment of the Joint Light Tactical Vehicle (JLTV), I understand that it is a relatively new joint Service developmental program, which consists of a family of vehicles with companion trailers capable of performing multiple mission roles. Based on the lessons of Iraq, JLTV requires a design that supports inherent and supplemental protection, scalable to mission.

Question. Armed Reconnaissance Helicopter.

Answer. It is my understanding that the Army has an enduring requirement for an armed aerial scout that was unaffected by the termination of the ARH program. I am not yet in a position to provide an informed assessment, but I understand that this latest effort is completing pretechnology development activities under the supervision of the Defense Acquisition Executive.

Question. M1 Abrams tank modernization.

Answer. The Abrams Tank has been an integral part of the Army's force structure for decades. I understand that the tank has encountered performance decrements during Operation Iraqi Freedom (OIF) that affect its operational performance and reliability, and that the Army has initiated a modernization strategy to maintain the tank's survivability, lethality, and maintainability through 2050. I am not yet in a position to provide an informed assessment of this effort.

Question. M2 Bradley infantry fighting vehicle modernization.

Answer. The Bradley vehicle has been an integral part of the Army's force structure for decades. I understand that the program has encountered performance decrements during OIF that affect the vehicle's operational performance and reliability, and that the Army has initiated modernization efforts to maintain the vehicle's survivability, lethality, and maintainability through 2050. I am not yet in a position to provide an informed assessment of this effort.

Question. Warfighter Information Network-Tactical.

Answer. While I am not yet in a position to provide an informed assessment of Warfighter Information Network-Tactical (WIN-T), my general understanding is that WIN-T is the Army's critical modernization effort for managing electronic information in the tactical environment. I understand that the WIN-T capabilities are built on proven government and commercial technology using voice, video, and data. This program, as I understand it, is configured into separate increments, each providing increasing capabilities measured in terms of capacity, speed, network management, and maneuverability.

Question. Logistics Modernization Program.

Answer. Although I am not yet in a position to provide an informed assessment of Logistics Modernization Program (LMP), I understand that this program is designed to support, replace, and modernize aging, obsolete, and increasingly costly automation systems used at the national logistics level. LMP employs a commercially based Enterprise Resource Planning software solution and provides a comprehensive, modernized logistics and finance capability across major business areas. I understand that, when fully implemented, LMP is intended to enhance the Army's logistics capabilities to manage inventories, process millions of transactions, and integrate with many critical DOD software systems.

Question. Joint Tactical Radio System.

Answer. While I am not yet in a position to provide an informed assessment of Joint Tactical Radio System, I understand that this program is part of the Army's and DOD's transformational and network modernization effort. I understand that the system will provide the fully mobile, flexible, dynamic radio networking capability needed to support a highly dispersed force over a noncontiguous area.

MINE RESISTANT AMBUSH PROTECTED VEHICLES

Question. If confirmed, what would you propose should be the Army's long-term strategy for the utilization and sustainment of its large mine-resistant ambush-protected (MRAP) vehicle fleet?

Answer. The MRAP was procured in response to a joint urgent operational need statement from Multi-National Corps-Iraq in June 2006. The initial intent was to replace all up-armored HMMWVs (UAH) in theater because those vehicles could not provide the required levels of protection, and previous modifications had reduced the vehicle's payload capacity to an unacceptable level. The urgent nature of this program resulted in the deferral of many steps associated with a traditional acquisition process in an effort to expedite fielding. If confirmed, I would work to determine the long-term strategy for the use and sustainment of the Army's fleet of MRAPs.

MISSILE DEFENSE

Question. DOD intends to transition a number of ballistic missile defense programs from the Missile Defense Agency (MDA) to the Army, including the Terminal High Altitude Area Defense (THAAD) system. The Army and the MDA have negotiated a Memorandum of Understanding concerning such transition.

What is your understanding of the agreement between the Army and MDA on transition and transfer of missile defense systems from MDA to the Army?

Answer. At present, I am not familiar with this agreement. If confirmed, I would become acquainted with its provisions and ensure that the Department meets its stated commitments.

Question. What is your view of the appropriate role of the Army in funding, managing, operating, or maintaining missile defense programs, including in the areas of research, development, test, and evaluation; procurement; operation and maintenance; and military construction?

Answer. At present, I am not familiar with the Army's specific role with respect to these programs. If confirmed, I would evaluate this issue.

Question. If confirmed, what steps would you plan to take to ensure that the Army's approach and the MDA's approach are coordinated and integrated, so that the resulting capabilities are joint and interoperable?

Answer. The Army and the MDA are collaborating under a memorandum of agreement to coordinate the development of complementary current and future battle command and control products in their respective mission areas. Although I am not yet familiar with the details of this agreement, if confirmed I would ensure that the Army's Acquisition Executive works closely with the MDA to maximize the jointness and interoperability between these systems.

Question. Do you agree with Secretary Gates' decision to increase the focus on effective theater missile defenses to defend our forward deployed forces and allies against existing regional missile threats from nations like North Korea and Iran?

Answer. Yes.

SPACE

Question. The Army restructured its program executive office for air and missile defense to include Army space efforts, and issued an Army space policy.

Are you satisfied that current DOD management structures adequately support Army objectives in space?

Answer. I do not have detailed knowledge of DOD's management structures, but the Army depends heavily on space-based combat support. If confirmed, I would closely examine this issue.

Question. Are you satisfied with the current level of effort in the Army related to space programs? Do you believe these efforts have the right focus?

Answer. While I am not yet in a position to provide an informed assessment, I understand that the importance of space programs continues to increase across DOD, and the Army needs to keep pace to fully leverage capabilities and ensure that space systems are appropriately prioritized within both DOD and the Department of the Army.

Question. The Army currently defines its space career field as a subset of the information technology career field.

Do you believe the information technology career field structure is adequate to support Army space interests?

Answer. If confirmed, I would need to examine this issue more closely. I understand that some believe to fully realize the potential of space and to adequately support the Army's space interest, space operations should be recognized as a unique career field and included in a space requirements/acquisition and National Aeronautics and Space Administration support subset.

Question. Do you believe that the space career fields of the Army, Navy, and Air Force should be integrated?

Answer. It is my understanding that each Service has unique and broad requirements in how space assets are used and personnel are managed. Total integration might be unrealistic because of specific Service needs and existing models for the development of Service personnel. However, integration and cross-fertilization can be accomplished through joint training, assignments, and exercises.

Question. Does the Army plan to assign personnel to the new Operational Responsive Space Office?

Answer. I do not have any knowledge of this matter.

MODULARITY

Question. Modularity refers to the Army's fundamental reconfiguration of the force from a division-based to a brigade-based structure. The new modular BCT is supposed to have an increased capability to operate independently based upon increased and embedded combat support capabilities such as military intelligence, reconnaissance, and logistics. Although somewhat smaller in size, the new modular brigades are supposed to be just as, or more capable than the divisional brigades they replace because they will have a more capable mix of equipment—such as advanced communications and surveillance equipment. To date, the Army has established over 80 percent of its planned modular units, however, estimates on how long it will take to fully equip this force as required by its design has slipped from 2011 to 2019.

What is your understanding and assessment of the Army's modularity transformation strategy?

Answer. It is my understanding that the Army's modular transformation was designed to create a more expeditionary capable force that will address the full spec-

trum of missions emerging from a post-Cold War strategy. I have been advised that the Army continuously addresses changes to its unit designs by incorporating lessons learned and changes in technology that keep the formations relevant and effective. If confirmed, I look forward to assessing the strategy.

Question. In your view, what are the greatest challenges in realizing the transformation of the Army to the modular design?

Answer. I have been advised that the Army faces two major challenges related to transformation: restoring balance to a force experiencing the cumulative effects of 8 years of war and setting conditions for the future to fulfill the Army's strategic role as an integral part of the joint force.

Question. If confirmed, what actions or changes, if any, would you propose relative to the Army's modular transformation strategy?

Answer. The Army Campaign Plan and goals for modularity must be consistent with Department strategy for the current and future environment in an era of persistent conflict. While I have no recommendations for changes at this time, I would closely examine this issue if confirmed.

Question. What is your understanding and assessment of the employment and performance of modular combat brigades and supporting units in Operations Iraqi Freedom and Enduring Freedom?

Answer. Modular brigade level formations have provided a solid base of adaptation to meet a wide range of requirements for specific missions across the spectrum of conflict. Army soldiers and leaders are performing superbly in both operations with these enhanced capabilities, and modular organizations augmented and trained for their assigned missions in each theater. I believe they are the right organization in terms of leadership and mission functionality to rotate through the Army's Force Generation Model and into operations in Iraq, Afghanistan, and elsewhere as required.

Question. What changes, if any, would you propose to the modular design, the mix of combat and supporting brigades, or modular unit employment to improve performance or reduce risk?

Answer. At present, I am not sufficiently knowledgeable to propose changes to the current modular design. I understand that the Army continues to review its force mix to ensure it meets combatant commanders' needs in the current and foreseeable operational environments.

ACTIVE-DUTY END STRENGTH

Question. The Army has increased its Active Duty end strength to meet current and future operational requirements. The Army had planned to increase its end strength to 547,400 by 2010, but has already achieved this goal in 2009.

In your view, what is the appropriate Army Active Duty end strength needed to meet the demand for deployed forces, increase nondeployed readiness, build strategic depth, and relieve stress on soldiers and their families?

Answer. The Secretary of Defense's announcement to authorize a temporary end-strength increase should enable the Army to improve the readiness of its units throughout the Army Force Generation process. If confirmed, I will work with the Office of the Secretary of Defense, the Joint Staff, and the Army Commands to determine the appropriate balance of end strength and capabilities.

Question. If Army end strength is projected to be above 547,400 in fiscal years 2009 or 2010, how would you propose, if confirmed, to fund the additional end strength above levels budgeted for in fiscal year 2010?

Answer. Secretary Gates recently announced a temporary increase in the size of the Army by 22,000 soldiers, and indicated that this money would be taken from current DOD funding levels for fiscal years 2009 and 2010. If confirmed, I would work closely with the Assistant Secretary of the Army (Financial Management and Comptroller) to identify appropriate funding sources, and I would seek assistance from the Secretary of Defense and Congress, as necessary, to ensure an appropriate level of funding.

Question. Do you believe that the Army's Active Duty end strength should rise by 30,000 in the 2010 to 2012 timeframe and beyond?

Answer. The size of the Army is predicated on its ability to meet the strategic requirements of our Nation. That end strength should facilitate a rotation cycle that can meet operational requirements within the Department's force rotation goals and sustain the All-Volunteer Force. I understand that the Army plans to achieve a rotation ratio for the Active component of 1:2 between the amount of time deployed to the amount of time not deployed during fiscal year 2011, and that its objective for the Active component is to achieve a 1:3 rotation ratio.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel and related entitlement spending continues its steep upward growth and is becoming an ever increasing portion of the DOD budget.

If confirmed, what actions would you take to control the rise in the Army's personnel costs and entitlement spending?

Answer. It is my understanding that the military departments have limited authority to control overall personnel costs and entitlement spending. If confirmed, I would ensure adequate oversight through processes, procedures, and audit reviews to provide early warning regarding the costs and effects of current and proposed military pays or benefits.

Question. If confirmed, what actions would you take to avoid a requirement for massive end-of-year reprogramming to cover personnel costs?

Answer. If confirmed, I would work closely within the Army and DOD to budget accurately, and then would monitor budget execution, end strength, and the use of incentives.

LESSONS LEARNED

Question. What do you believe are the major lessons that the Department of the Army has and should have learned from Operation Enduring Freedom (OEF) and OIF regarding its title 10, U.S.C., responsibilities for manning, training, and equipping the force?

Answer. In terms of manning, I believe that 8 years of sustained combat operations have taken their toll on soldiers. Increases in nondeployable rates require deploying units to continue to be overfilled at the expense of readiness for the rest of the Army. In terms of training, a major lesson is that versatile and agile units that are fundamentally competent can adapt to any threat from across the spectrum of conflict. Also, the rapid incorporation of operational lessons into the training of next-to-deploy forces at training centers, mobilization stations, and home stations ensures that units are ready. In terms of equipping, the Army must constantly strive for advance knowledge of emerging requirements and then promptly engage the acquisition and industrial communities to find solutions as early as possible.

Question. If confirmed, which of these lessons, if any, would you address as a matter of urgent priority?

Answer. I have been advised that the most urgent matter to address is the rising nondeployable population and its effect on manning. If confirmed, I would also continue to explore ways to anticipate emerging equipping requirements and satisfy them as quickly as possible.

PRIVATE SECURITY CONTRACTORS

Question. The Special Inspector General for Iraq Reconstruction (SIGIR) recently reported that Federal agencies, including DOD, have spent more than \$5 billion for private security contractors in Iraq since 2003. Over this period, there have been numerous reports of abuses by private security contractors, including allegations of contractors shooting recklessly at civilians as they have driven down the streets of Baghdad and other Iraqi cities. In September 2007, employees of Blackwater allegedly opened fire on Iraqis at Nisour Square in downtown Baghdad, killing more than a dozen Iraqis and wounding many more.

Do you believe the Army should rely upon contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. In principle, no. However U.S. forces currently rely on contractors to "free" manpower for accomplishing missions focused on campaign objectives. Requiring uniformed forces to meet all requirements for security would divert a significant portion of a commander's forces from planning and controlling combat operations. Contractor performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations may constitute inherently governmental functions and must be avoided.

Question. In your view, has the U.S. reliance upon private security contractors to perform such functions risked undermining our defense and foreign policy objectives in Iraq?

Answer. I tend to agree that some near-term damage may have occurred. If confirmed, I would work to improve oversight of private security contractors through implementation of a better automated tracking system for contractor personnel. In addition, I would oversee the Army's implementation of the interim final rule recently promulgated in the Code of Federal Regulations. That rule establishes policy,

assigns responsibilities, and provides procedures for the selection, accountability, training, equipping, and conduct of personnel performing private security functions under a covered contract.

Question. What steps would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. If confirmed, I would ensure that the Army complies with current mandates to reduce reliance on private security contractors to the greatest extent practicable and would explore initiatives to help ensure accountability.

Question. How do you believe the ongoing operations of private security contractors in Iraq are likely to be affected by the new Status of Forces Agreement between the United States and Iraq?

Answer. The new Status of Forces Agreement no longer affords immunity to contractors supporting the United States in Iraq. This change would most likely affect the use of private security contractors who are U.S. nationals but not local nationals.

Question. Do you support the extension of the Military Extraterritorial Jurisdiction Act to private security contractors of all Federal agencies?

Answer. I have been advised that the act was intended to address the jurisdictional gap in U.S. law regarding criminal sanctions, as applied to civilians employed by or accompanying the Armed Forces outside the United States, members of the Armed Forces, and former members of the Armed Forces, including their dependents. I understand that legislation has been proposed in the past that would expand the act to cover individuals employed under a contract (or subcontract at any tier) awarded by any department or agency of the United States where the work under such contract is carried out in an area, or in close proximity to an area (as designated by DOD) where the Armed Forces are conducting contingency operations. If confirmed, I would study this matter in coordination with The General Counsel of the Department of the Army and the Judge Advocate General and assess whether this or any other change to the act may be appropriate.

Question. What is your view of the appropriate application of the Uniform Code of Military Justice (UCMJ) to employees of private security contractors operating in an area of combat operations?

Answer. I support the position that civilians serving with or accompanying our Armed Forces overseas who commit crimes should be held accountable as appropriate. The UCMJ provides commanders with the tools necessary to maintain good order, discipline, and the morale, welfare, and safety of all those under their jurisdiction during military operations. Because contractor misconduct may undermine good order and discipline, discredit the Army, or remain unaddressed absent the exercise of jurisdiction, Congress extended UCMJ jurisdiction to contractors. In turn, the Secretary of Defense published guidance on the prudent exercise of such jurisdiction. The guidance ensures that the Department of Justice and DOD each play an appropriate role in resolving whether, and under which system, jurisdiction might be better exercised in each potential case. OMB Circular A-76 defines "inherently governmental functions" to include "discretionary functions" that could "significantly affect the life, liberty, or property of private persons"

Question. In your view, is the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations an inherently governmental function?

Answer. I have been advised that DOD Instruction 3020.41 (Contractor Personnel Authorized to Accompany the Armed Forces) prohibits the use of contract security services to guard U.S. or coalition military supply routes, military facilities, military personnel, or military property in contingency operations where major combat operations are ongoing or imminent, except as the geographic combatant commander specifically authorizes. When either of those two conditions have been met, the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations is not necessarily an inherently governmental function. I understand, however, that support services that require substantial discretion or prudent judgment are inherently governmental, and that the likelihood an individual will be required to resort to force, especially deadly force, and the degree to which an individual may be required to exercise force in public are important factors to consider in assessing whether a particular security mission is inherently governmental. Therefore, if I am confirmed, I intend to study this issue in greater depth to ensure that the Army's assessment regarding this issue is fully considered in the ongoing review of DOD Instruction 3020.41.

Question. In your view, is the interrogation of enemy prisoners of war and other detainees during and in the aftermath of hostilities an inherently governmental function?

Answer. I am familiar with OMB Circular A-76 and with Section 1057 of the National Defense Authorization Act for Fiscal Year 2009, which reflects the position of Congress regarding the interrogation of detainees by contractor personnel. I understand that, under existing DOD and Army policies, the interrogation of enemy prisoners of war and other detainees is not considered an inherently governmental function as long as it is conducted under the supervision of government personnel.

Question. Do you believe that the Army fully considered these issues before deciding which functions should be assigned to private contractors in Iraq?

Answer. I believe the Army is committed to adhering to law, regulation, and policy, but I am unaware of precisely what factors the Army considered in making the decisions referred to.

Question. Do you see a need for a comprehensive reevaluation of these issues now?

Answer. I fully support the principles and policies set forth in President Obama's memorandum of March 4, 2009 which directs the Office of Management and Budget, in coordination with the Secretary of Defense, among others, to develop and issue governmentwide guidance to assist executive branch agencies in reviewing the propriety of existing contracts and to formulate corrective action when appropriate. I believe any such review must include an appraisal of inherently governmental and other critical government functions and how they are performed.

IRAQ AND AFGHANISTAN DEPLOYMENTS

Question. Many soldiers are on their third and some their fourth major deployment to Iraq or Afghanistan. In 2007, in order to support the surge of forces to Iraq, unit deployments were extended to 15 months and dwell time in some cases less than 12 months. Beginning in August 2008 DOD policy has been to limit deployments for Active component soldiers and mobilization of Reserve component soldiers to not longer than 12 months.

What is your assessment of the impact of multiple deployments of troops to Afghanistan and Iraq on retention, particularly among young enlisted and officer personnel after their initial active duty obligated service has been completed?

Answer. The generation of young commissioned and noncommissioned officers now serving in the Army has known only conflict. These soldiers well know the challenges the Army faces and continue to serve with distinction in a very fluid and demanding environment. The Army has advised me that multiple deployments to Afghanistan and Iraq are not adversely affecting enlisted retention, and have not resulted in the increased attrition of midgrade officers over the past several years.

I have been informed that Army officer shortages stem from force structure growth undertaken to support conversion to more self-sufficient, modular combat formations and to provide additional capabilities to meet the emerging threats in counterinsurgency warfare. I am encouraged that the measures the Army has taken to resolve shortages in midgrade officers, including increased accessions (over 5,000 by the end of fiscal year 2009); increasing Reserve component calls to Active Duty; using interservice transfers, higher promotion rates, below the zone promotions, and earlier promotion pin-on point to a path of resolving this challenge.

Question. What are the indicators of stress on the force, and what do these indicators tell you about that level of stress currently? In addition to any other stress indicators that you address, please discuss suicide and divorce rates, drug and alcohol abuse, absences without leave (AWOLs), and rates of indiscipline.

Answer. In this period of high operational and personnel tempo, Army leaders must maintain constant awareness of the physical and mental condition of their soldiers and families and constructively address concerns as soon as they come to light. It is my understanding that reenlistment rates are high, one indication that soldier morale remains strong. I am also informed that Army discipline and misconduct rates, including desertion, absence without leave, domestic violence, and courts-martial, have remained steady or declined in the past year. However, I am advised that other indicators of stress on the force, such as substance abuse and divorce, have increased. Most notably, the significant increase in the number of soldier suicides is of utmost concern. If confirmed, I would ensure that soldiers and families are provided with multidisciplinary solutions directed at mitigating risk behaviors and enhancing the fitness and resilience of soldiers and families.

Question. For how long do you believe these levels of commitments can continue before there will be significant adverse consequences for the Army?

Answer. At this time, I do not have the information or particular insights to determine how long the Army can sustain the current level of commitment without incurring significant adverse consequences. The Chief of Staff of the Army, General Casey, has stated that the Army is "out of balance."

Question. What is your understanding of this statement and what do you think can or should be done to correct that imbalance?

Answer. As I understand it, General Casey has publicly defined "balance" as the ability to achieve a 1:2 deployment-to-dwell (time at home station) ratio for Active component soldiers and a 1:4 mobilization-to-demobilization ratio for Reserve component soldiers. The two ways to improve balance are an increased deployable force structure or decreased demands. The Army has grown to its new end strength of 547,000, and Secretary Gates will temporarily add 22,000 additional soldiers. The increased end strength, along with a future reduction in demand for forces, is the key to regaining balance.

RESERVE COMPONENTS AS AN OPERATIONAL RESERVE

Question. What is your understanding and assessment of the Army's Reserve components as an Operational Reserve, as opposed to its longstanding traditional role as a Strategic Reserve?

Answer. The Army's Reserve components have transformed and adapted to today's operational environment of enduring conflict along with the Active Force. The Army's Reserve components bring a mix of skills and capabilities that have strengthened the force, and they are an essential and critical component of the current force generation system, which provides the right mix of trained and ready forces to the fight.

Question. In your view, what are the major challenges to transforming the Army Reserve and Army National Guard into a relevant and capable Operational Reserve?

Answer. It appears that resources and institutional support are the major challenges. Resources are necessary to ensure a continuously ready Reserve component force, such as increased training days and opportunities, recruiting and retention incentives, incentives for employers, earlier access to medical and dental readiness, increased installation and facility support, increased premobilization training support, and validation.

Question. In your view, how will predictable cycles of 1 year mobilized to 5 years at home, affect the viability and sustainability of the All-Volunteer Reserve Force?

Answer. I believe predictable cycles provide dwell time for the soldiers to maintain their civilian careers and predictability for soldiers, families, and employers for future deployments. This predictability also facilitates better training and requirements planning to prepare for future missions, thus enhancing unit viability.

Question. If confirmed, what actions, if any, would you propose to ensure the most rapid, efficient, and effective transformation of the Army's Reserve components into an Operational Reserve?

Answer. I do not have sufficient information at this time to make specific proposals. However, it is clear the Army needs to ensure the rapid transformation of the National Guard and Reserve to an operational force in the same fashion as the Active-Duty component. This could include a wide range of initiatives such as pay incentives for citizen soldiers and families, generation of sufficient forces, progressive equipment strategies, and continuum of service that allows soldiers to seamlessly transition duty statuses.

Question. In recent years, Reserve Force management policies and systems have been characterized as "inefficient and rigid" and readiness levels have been adversely affected by mobilization timelines, equipment shortages, cross leveling, and reset policies.

What is your understanding and assessment of the sufficiency of current Reserve Force management policies?

Answer. It is my understanding that Reserve Force management policies and systems have been under continuous review throughout the transformation of the Reserve component to an operational force and have been addressed when found to be inefficient or rigid.

Question. In your view, should DOD assign homeland security defense or any other global or domestic support missions exclusively to the Reserve?

Answer. DOD maintains a wide range of capabilities that may be called upon in times of catastrophic events that exceed the capabilities of the States and appropriate Federal agencies. However, no single Service or Reserve component embodies the wide range of capabilities often required to support a catastrophic event. The Department must maintain a Total Force approach as part of an interagency team to ensure that it can provide the most effective and timely response with the ability

to surge large follow-on forces in support of a global or domestic emergency. This Total Force approach requires all Active and Reserve components for a truly complete response.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. In the aftermath of the attacks of September 11, 2001, the National Guard and Reserves have experienced their largest and most sustained employment since World War II. Numerous problems arose in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical readiness monitoring, errors caused by antiquated pay systems, limited transition assistance programs upon demobilization, and lack of access to members of the Individual Ready Reserve. Reserve force management policies and systems have been characterized in the past as “inefficient and rigid” and readiness levels have been adversely affected by equipment stay-behind, cross-leveling, and reset policies.

What is your assessment of advances made in improving Army Reserve component mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. I have been informed that Reserve and National Guard soldiers, their families, and their employers now receive more advanced notice. The mobilization process has been streamlined significantly. It appears the Army has made significant strides to reimburse those soldiers who need travel advances. The annual periodic health assessment replaced the 5-year physical and, as a result, Reserve and National Guard soldiers are screened more frequently and diagnosed earlier. The added screening and treatment of dental deficiencies is also a positive advancement for Reserve component soldiers in a premobilization status.

Challenges still exist. Two examples are greater improvements to the medical care for Reserve and National Guard soldiers, and sourcing and notifying soldiers of deployment even earlier where possible.

Question. What do you consider to be the most significant enduring changes to the administration of the Reserve components aimed at ensuring their readiness for future mobilization requirements?

Answer. Clearly, the transformation of the Army National Guard and Army Reserve from a strategic to an operational Reserve has had the largest and most enduring impact, and it has fundamentally changed the contract between the Army and the soldier in terms of what is expected from them and, frankly, who joins. The Army cannot execute its mission of prompt and sustained land combat absent a substantial contribution from the Reserve component across the full spectrum of conflict. If confirmed, I would continue this necessary transformation.

Question. Do you see a need to modify current statutory authorities for the mobilization of members of the National Guard and Reserves?

Answer. The current laws seem sufficiently adequate and flexible to provide Reserve and National Guard forces for the fight. We appear to possess the necessary statutory authorities to meet the needs of the force, but mobilizing citizen soldiers is a solemn responsibility and should not be undertaken lightly. If confirmed, I would like to find efficiencies to make this process smoother and faster to give soldiers the predictability they deserve.

Question. Do you agree that National Guard and Reserve personnel should be mobilized to serve in Afghanistan in lieu of civilians?

Answer. The solution to Afghanistan is not solely military and therefore cannot be achieved by the U.S. military alone. The problems that the Afghan Government and its people face will require the expertise and all elements of national power. Using interagency and coalition responses is essential to success in Afghanistan. Mobilizing the U.S. Government for this task takes time, and it is possible that the military may be asked to shoulder the burden initially. The long-range solution is increased interagency capability in all elements and instruments of national power.

INDIVIDUAL READY RESERVE

Question. DOD established a policy in 2005 mandating the discharge of officers in the Individual Ready Reserve (IRR) who are beyond their military service obligations (MSO) unless the officer positively elects to remain in the IRR. Meanwhile, the Commission on the National Guard and Reserves has found that accessing the IRR as a viable source of manpower for the war has been problematic, and that using the IRR as a solution for unit manning is a failed concept.

What are your views on the proper role of the IRR in Army force management planning?

Answer. While the IRR is an important source of trained manpower to support Army missions across the spectrum of military requirements, I believe the mobiliza-

tion of IRR soldiers should be one of the last options. Not all IRR mobilizations have been involuntary; a number of IRR members have volunteered to serve on active duty. The IRR has been a valuable asset, primarily to fulfill requirements within Army National Guard and Army Reserve units.

Question. If confirmed, what changes, if any, do you foresee making to the Army's IRR recall policy?

Answer. I do not have detailed knowledge of the Army's IRR recall policy but, as stated previously, any recall of IRR soldiers should be one of the last options considered.

Question. What are your views about policies affecting continued service by officer and enlisted personnel in the Reserve components who have fulfilled their MSO?

Answer. Officers who have fulfilled their MSO and have not taken action to remain in the IRR are advised of the requirement to elect retention past their MSO; transfer to the retired Reserve, if they are qualified for retired pay; or be discharged from the military.

Question. In your view, should members of the Reserve components who are deployed when they reach the end of their military service obligation be treated differently?

Answer. Current mobilization policy ensures that soldiers have enough remaining MSO to serve their full mobilization if called on. Reserve soldiers should not be treated any differently than soldiers in other components.

Question. What is your assessment of the adequacy of the system in place for members in the IRR receiving orders to Active Duty to request a delay or exemption for that activation, including the procedures in place for appealing the Army's decision on that request?

Answer. I do not have sufficient information at this time to make an assessment

Question. What is your assessment of the value of the IRR to the All-Volunteer Force?

Answer. The IRR is extremely valuable to the force. The IRR provides individual replacements for deploying units and soldiers to support short-term missions throughout the Army. The IRR maintains its connection with the Army and its availability to support Army missions. Thousands of IRR soldiers have mobilized to theater in support of current operations. These soldiers have served in all ranks and military occupational skills, including doctors, aviators, and linguists.

MEDICAL AND DENTAL READINESS OF ARMY NATIONAL GUARD AND ARMY RESERVE PERSONNEL

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the Committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Reserves?

Answer. If confirmed I would assess the effectiveness of reporting on the medical and dental readiness and evaluate the need for policy changes and increased oversight.

Question. How would you improve upon the Army's ability to produce a healthy and fit Reserve component?

Answer. I am advised that the Army has comprised a multidisciplinary task force to address and promote comprehensive soldier fitness across all components. If confirmed, I look forward to learning more about the comprehensive soldier fitness program, particularly as it applies to the Reserve component, and working with leaders across the Army to implement it.

NATIONAL GUARD ORGANIZATION, EQUIPMENT, AND READINESS

Question. Legislative proposals introduced in 2006 and 2007, recommendations by the Commission on the National Guard and Reserves submitted on March, 1, 2007, and the Department's response to these calls for change are all currently under consideration.

What is your assessment of the effect, if any, of increasing the grade of the Chief of the National Guard Bureau to General (O-10)?

Answer. The National Defense Authorization Act for Fiscal Year 2008 prescribed the appointment of the Chief, National Guard Bureau to serve in the grade of general. The position of the Chief is one of significant responsibility, requiring a level of operational experience, professional military education, and demonstrated expertise in both national and homeland defense matters. The Chief's service in the grade of general reflects the diversity and complexity of his duties. In addition to exercising responsibility for the organization and operations of the National Guard, the

Chief serves as a principal advisor to the Secretary of Defense on matters involving non-Federalized National Guard forces and other matters, and as the principal adviser to the Secretary of the Army, the Chief of Staff of the Army, the Secretary of the Air Force, and the Chief of Staff of the Air Force, on matters relating to the National Guard, the Army National Guard of the United States, and the Air National Guard of the United States.

Question. What is your understanding of the role and authority of the Director of the Army National Guard?

Answer. The Director, Army National Guard assists the Chief of the National Guard Bureau in carrying out the functions of the Bureau as they relate to the Department of the Army. Specifically, the Director of the Army National Guard guides the formulation, development, and implementation of programs and policies affecting the Army National Guard, a force of more than 358,000 soldiers dispersed across the 54 States and Territories, and the District of Columbia.

Question. In your view, should the Director be "dual hatted" as a Deputy Chief of Staff of the Army?

Answer. I do not have sufficient information at this time to make that determination. If confirmed, I would carefully consider any proposals to modify the title, functions, or authorities of the Director of the Army Guard.

Question. What is your understanding and assessment of changes in the global and domestic roles and mission of the Army National Guard and the National Guard Bureau?

Answer. The Army National Guard is a critical element of our Nation's total force. The Army National Guard has historically served as a "first responder" in State contingencies and national emergencies, while simultaneously meeting its operational commitments in support of overseas contingency operations. Since 2001, the National Guard Bureau has played an increased role in coordinating emergency relief and response efforts at the local, State, and national levels. It is a testament to the inherent flexibility of the current organization of the Army National Guard and the National Guard Bureau that not one mission has been unexecuted in this environment of high-demand, dual-purpose requirements. I have every reason to expect this extraordinary performance to continue.

Question. What is your understanding and assessment of the Army's commitment to fully fund 100 percent of National Guard equipment requirements? In your view, do Army processes for planning, programming, and budgeting sufficiently address the requirements of the National Guard?

Answer. The recognition of the critical role of its Reserve components, both Army Reserve and National Guard, is evident by the increased investment funding in both components. Budget requests continue to provide the National Guard and Reserve with equipment to both modernize and fill "holes." Additionally, as part of a larger DOD program, efforts are underway in the Army to further increase the visibility and transparency of funding programmed for Army National Guard equipment.

Question. If confirmed, how would you ensure that the resourcing needs of the Army National Guard are fully considered and resourced through the Army budget? In your view, what is the appropriate role for the Chief of the National Guard Bureau in this regard?

Answer. If confirmed, I would ensure that the Army National Guard remains synchronized with the Army's requirement development and resourcing process, and that the Guard's needs are fully considered as part of the Army's resourcing strategy.

In regards to the role of the Chief of the National Guard Bureau as the principal advisor to the Secretary of Defense, through the Chairman of the Joint Chiefs of Staff, I would seek his advice on key National Guard programs and challenges.

EQUIPMENT REPAIR/RESET

Question. Congress has provided the Army with approximately \$17 billion per year to cover the costs to repair and replace equipment worn out by combat operations and prepare forces for rotations in support of OIF/OEF.

In your view, is this level of funding sufficient to not only prepare Army forces for OIF/OEF but to also improve the readiness of non-deployed forces for other potential contingencies?

Answer. I do not have sufficient information at this time to make that level of recommendation.

Question. Is it your understanding that our repair depots are operating at full capacity to meet rebuild and repair requirements for reset?

Answer. It is my understanding that all the Army's maintenance depots are currently operating at a level necessary to meet required workload, but capacity exists

to assume an additional workload. The depots' current production levels are based on the rate of return of equipment from theater and the Army's need to equip units for training and deployment. It is my understanding that the depots can increase production if the rate of equipment return accelerates, and that the Army constantly evaluates depot production and adjusts it to meet current and anticipated demand.

Question. What additional steps, if any, do you believe should be taken to increase the Army's capacity to fix its equipment and make it available for operations and training?

Answer. I do not have sufficient information at this time to make that level of recommendation.

Question. What impact do you believe the decision to send additional Army forces to Afghanistan is likely to have on equipment available for continued operations in Iraq and for non deployed unit training at home?

Answer. I do not have sufficient information at this time to make that level of decision.

ARMY SCIENCE AND TECHNOLOGY

Question. What do you see as the role that Army science and technology programs would play in continuing to develop capabilities for current and future Army systems?

Answer. The Army's science and technology investment strategy should be shaped to foster innovation and accelerate/mature technology to enable future force capabilities while exploiting opportunities to rapidly transition technology to the current force. The program should retain the flexibility to be responsive to unforeseen needs identified through current operations. Insights into technology that can enable capabilities can also provide building blocks and interim technology goals to assist in increasing unit capabilities over time.

Question. What in your view have been the greatest contributions of Army science and technology programs to current operations?

Answer. In my view, the most significant contribution the Army science and technology community has offered to current operations is its technical expertise coupled with a deep understanding of warfighter needs. This knowledge enables the community to respond to emerging theater needs and rapidly transform technology into warfighter capabilities. It is the capability of the Army's science and engineering workforce that has enabled the rapid development and deployment of lightweight and adaptable armor solutions that address the emerging threats for platforms such as the up-armored HMMWV and the MRAP. It is also my understanding that the Army's science and technology community has successfully transitioned other equipment, such as electronic countermeasures to provide jamming capabilities, base protection technologies to protect soldiers while in forward operating bases, and a variety of sensors and situational awareness enablers that have been critical to soldiers' efforts in theater.

Question. What metrics would you use, if confirmed, to judge the value and the investment level in Army science and technology programs?

Answer. If confirmed, the metrics I would use to judge the value and investment level in Army science and technology programs would include the transitions of technology to the warfighter, adoption of technology into acquisition programs, and alignment of technology development to warfighter needs.

ARMY LABORATORIES AND RESEARCH, DEVELOPMENT, AND ENGINEERING CENTERS

Question. What role should Army laboratories play in supporting current operations and in developing new capabilities to support Army missions?

Answer. Army laboratories are the platforms for developing the advances in science and technology that are benefiting the warfighter, and as such must continue to play a major role in supporting current operations with the best capabilities available.

Question. If confirmed, how would you ensure that the Army laboratories and R&D centers have the highest quality workforce, laboratory infrastructure, resources, and management, so that they can continue to support deployed warfighters and develop next generation capabilities?

Answer. If confirmed, I would encourage the laboratories to take advantage of the authorities they currently have in regard to infrastructure and to work with the Office of the Secretary of Defense in its current efforts to expand these authorities. Maintaining the current level of resources for all the laboratories and embracing best practices in regard to management would be a high priority.

ARMY TEST AND EVALUATION EFFORTS

Question. The Army's test and evaluation budget has not been certified as adequate by the Director of the Test Resource Management Center (TRMC) for fiscal year 2010. This is after a conditional certification received in fiscal year 2009. TRMC identified a shortfall of over \$25 million for investments in test and evaluation range sustainment, operations, and modernization.

If confirmed, how will you address this shortfall?

Answer. While I am not yet familiar with the specific concerns raised by the TRMC, I believe it is essential that the Department's test and evaluation infrastructure is adequately resourced.

Question. How would you ensure that the Army's test and evaluation infrastructure is robust enough to ensure that new systems and technologies are tested to verify their combat effectiveness and suitability?

Answer. If confirmed, I would become more familiar with the details of this requirement and ensure that future Army program and budget submissions provide an appropriate level of funding, consistent with competing demands on Departmental resources.

ARMY INFORMATION TECHNOLOGY PROGRAMS

Question. What major improvements would you like to see made in the Army's development and deployment of major information technology (IT) systems?

Answer. If confirmed, I would work to quickly leverage emerging technologies to meet security and operational capabilities. While this is an area I have not focused on in my work on the House Armed Services Committee, there are areas for improving the Army's development and deployment of major information technology systems. These include designing and adopting policies that reinforce management at the capability portfolio level, encouraging the identification and rapid development of new technologies, and improving the synchronization of acquisition management policies and processes. If confirmed, I would ensure that Army IT systems provide warfighters and business managers with leading edge capabilities that efficiently enhance the effectiveness and efficiency of the force.

Question. What is your understanding of the Army's plan to adopt and deploy the Defense Integrated Military Human Resources System (DIMHRS)? What are the major issues you feel need to be addressed in that process?

Answer. I have not been informed of the specific status of the Army's implementation of DIMHRS. If confirmed, I would carefully review the implementation plan and associated milestones. If my review identifies any weakness, I would make appropriate recommendations, after cross-Service coordination, to the responsible officials.

HOUSING PRIVATIZATION

Question. DOD has been engaged in the privatization of many of its support functions. Among the most significant privatization efforts is military family housing units and utility systems.

In your view, what challenges does the Army face in implementing housing privatization and, if confirmed, how would you propose addressing those challenges?

Answer. It is my understanding that three key challenges face the Army in the continued implementation of housing privatization. First, the Army faces risk related to the capital market, both for projects that have obtained financing and those for upcoming projects. To address this risk, the Army must continue to monitor the capital markets and evaluate opportunities associated with fluctuating interest rates, credit terms, and risk parameters. Second, the Army faces risk of underperformance by a private sector partner. To mitigate this risk, the Army should continue to monitor the financial health of each partner and the operational metrics established in the Army's portfolio and asset management program. The third risk facing Army housing privatization is that faced by any real estate investor: namely, that expected occupancy, financial performance, or development targets will not be met. To mitigate and address this risk, the Army must continue to implement the best practices from private sector investment management to oversee existing housing privatization projects. Monitoring the key performance metrics associated with typical real estate transactions is critical to identifying and addressing potential issues.

Question. What adjustments, if any, would you anticipate as a result of the current lending environment?

Answer. The terms and conditions of lending are growing more restrictive. Projects are now required to set aside more cash in reserve for debt payments, and

rating agencies are downgrading the credit ratings on existing debt, which has affected the appeal of projects to investors. Many investors who have historically purchased military housing privatization debt are saddled by financial challenges that have hindered their ability to invest. If confirmed, I would address these issues by ensuring that the Army continues to use experts to monitor how the financial markets could affect new and existing transactions. Additionally, I would direct that a team of senior Army leaders evaluate the current roster of proposed projects, both new and expansion, to determine what adjustments are necessary to ensure project feasibility.

Question. What actions would you propose, if any, to accommodate installations where there are housing shortfalls beyond the ability of the current privatization agreement?

Answer. I understand that DOD and the Army's longstanding position is to rely first on housing in the local community. Where there are shortfalls locally, the Army has sought to educate community and business leaders on its housing requirements and to encourage development to meet those requirements. I have been informed that the Army has already held several industry forums in local communities for Fort Drum, Fort Riley, and Fort Bliss. Further, the Army has also used its domestic Army family housing lease authority as a bridging tactic until the local community is able to meet the Army's family housing requirements.

Question. What are your views regarding barracks privatization?

Answer. I do not have sufficient information at this time to make that level of recommendation. If confirmed, barracks privatization is an issue I hope to be able to explore in depth.

Question. What is your opinion of the Army practice for the last ten years of using real estate consultants to assist with the development of housing privatization initiatives and the management of finances in awarded transactions?

Answer. It is my understanding that the Army's practice of using real estate consultants to assist with the development of housing privatization programs has significantly contributed to the success the Army has experienced in its privatization efforts. If confirmed I would support the Army's effort to continue to use private sector expertise and consulting services as it interfaces with the capital markets and real estate developers.

Question. What changes, if any, do you think are needed with respect to the Army's practice of giving access to private sector experts in these decisions and processes?

Answer. It is my understanding that the Army is considering new business processes regarding the use of consultant support. If confirmed, I would carefully study the Army's efforts to rebalance the tasks performed by its employees and private consultants and focus consultant use on providing financial, real estate, or research expertise, which is not inherent in the Army workforce.

INVESTMENT IN INFRASTRUCTURE

Question. Witnesses appearing before the committee in recent years have testified that the military Services under-invest in their facilities compared to private industry standards. Decades of under-investment in our installations have led to increasing backlogs of facility maintenance needs, created substandard living and working conditions, and made it harder to take advantage of new technologies that could increase productivity.

What is your assessment of Army infrastructure investment?

Answer. I do not have sufficient information at this time to make an assessment. If confirmed, I would undertake to assess the sufficiency of the Army's current infrastructure investment strategy and implementation plan.

Question. If confirmed, what actions, if any, would you propose to increase resources to reduce the backlog and improve Army facilities?

Answer. If confirmed, I would support an investment strategy to ensure that the infrastructure backlog is addressed. I would also seek support from the Secretary of Defense and Congress for the President's budget request for Army installations and facilities.

IMPLEMENTATION OF BASE CLOSURES AND REALIGNMENTS

Question. The 2005 Defense Base Realignment and Closure (BRAC) process has resulted in the required closure or realignment of numerous major Army installations. The DOD installation closure process resulting from BRAC decisions has historically included close cooperation with the affected local community in order to allow these communities an active role in the reuse of property.

If confirmed, would you change any of the existing efforts to assist affected communities with economic development, revitalization, and reuse planning of property received as a result of the BRAC process?

Answer. If confirmed, I would assess the current efforts and consider whether changes are warranted. I would also work diligently to uphold the commitment to support the communities of both closing and gaining installations.

Question. What, in your view, are the advantages or disadvantages, if any, on the use of no cost Economic Development Conveyances as a means of early property transfers under BRAC as opposed to holding out for full fair market value?

Answer. I do not have sufficient information at this time to make an assessment.

EXPANSION OF ARMY TRAINING RANGES

Question. With the recent inability of the Army to be able to gain support for the expansion of the Piñon Canyon Maneuver Site in Colorado, how would you propose addressing valid operational requirements to expand training and maneuver ranges across the United States as new weapon systems and additional end-strength drives the need for additional land for training?

Answer. The most important way the Army can address valued operational requirements is to do so in partnership with the communities surrounding the installations. I believe that when all stakeholders and partners are adequately informed of Army issues and public concerns, reasonable solutions can be found.

ARMY POLICIES REGARDING DRUG AND ALCOHOL ABUSE

Question. What is your understanding of the Army's policy with respect to disciplinary action and administrative separation of soldiers who have been determined to have used illegal drugs? Do you agree with this policy?

Answer. Illegal drug use is not consistent with Army values or the Army mission. The Army Substance Abuse Program (ASAP) is a commander's program used to assess the personnel readiness of his or her soldiers. Army policy is that any disciplinary or administrative action taken should be based on the misconduct that led to the referral to ASAP, not on the fact that the soldier is enrolled in the program. I agree with this policy because it gives the commander a tool to monitor the personnel readiness of his or her unit while providing sufficient flexibility when dealing with violations.

Question. What is your understanding of the Army's policy with respect to rehabilitation and retention on active duty of soldiers who have been determined to have used illegal drugs or abused alcohol or prescription drugs? Do you agree with this policy?

Answer. Commanders are required to refer all potential alcohol abusers identified by self-referral, alcohol testing, DUI/DWI, investigation, apprehension, underage drinking, or other incident involving the use of alcohol to ASAP for screening and potential enrollment within 5 working days of the incident or investigation. Commanders are required to process soldiers for separation who are involved in two serious incidents of alcohol-related misconduct in a 12-month period. This documentation is processed through the chains of command to the separation authority for final disposition. Additionally, any soldier who is convicted of a DWI/DUI twice during their career must be administratively separated unless retained by the court martial convening authority. This authority may not be delegated. Soldiers diagnosed as alcohol dependent would be detoxified and given appropriate medical treatment. Those soldiers who warrant retention based on their potential for continued military service would be offered rehabilitation and retained. Soldiers who are separated would be referred to a Veterans Administration (VA) hospital or a civilian program by the ASAP counselor to continue (or initiate) their rehabilitation.

Soldiers who test positive for illicit drugs for the first time would undergo a process of evaluation for dependency, would be disciplined as appropriate, and may face possible separation as circumstances warrant. If a soldier tests positive for illicit drugs, is subsequently retained by the separation authority, then tests positive again, the soldier's chain of command would initiate administrative separation and forward the case to the court martial convening authority for decision on the disposition of the action. This authority may not be delegated.

This policy appears to provide a clear requirement for commanders to refer soldiers and to appropriately review them for separation or retention within the parameters of Army regulations. Soldiers may also seek treatment through self referral. Soldiers who are retained must meet the standards for continued service to the Army.

Question. Do you believe that the Army has devoted sufficient resources to implementation of its rehabilitation policies and objectives since 2001? If not, in what ways?

Answer. Although I have not had the opportunity to fully track these programs, it would appear that some installations do not have sufficient numbers of counseling resources to provide timely services to soldiers. The Army is working to ensure that sufficient counselors are available and that this number takes into consideration the current state of continuous conflict.

Question. What measures are being taken to improve the Army's performance in responding to problems of drug and alcohol abuse?

Answer. I do not have sufficient information to make an assessment.

TOBACCO AND THE MILITARY

Question. The Institute of Medicine recently released a study commissioned by DOD and the Department of Veterans Affairs which recommends, among other things, that the Department begin phasing in a tobacco-free military. These findings have evoked angry responses among some servicemembers.

What is your understanding of the impact of tobacco use on the military and the effectiveness of current policies within DOD and the Army aimed at preventing tobacco use?

Answer. Tobacco use in the military, as well as in civilian society, has widely known and long-term consequences. I am informed that significant short-term implications of tobacco use affect military readiness. It is my understanding that current Army policies discourage smoking and even prohibit it at certain times or in certain areas. Nevertheless, many smokers in the military report they started smoking only after joining the military. The percentage of soldier smokers is higher than the percentage of smokers across the U.S. population. Based on this information, it appears that current policies and educational efforts may not be as effective as hoped.

Question. If confirmed, what additional measures, if any, would you take to reduce the problem of tobacco use by soldiers and their family members?

Answer. If confirmed, I would investigate additional means possible to discourage tobacco use by members of the Army.

ABORTION IN MILITARY MEDICAL FACILITIES OVERSEAS

Question. What is your understanding of current requirements regarding performance of abortions at military treatment facilities?

Answer. It is my understanding that no DOD funds may be used to administer any policy that provides for abortions at any DOD facility, except where the life of the mother may be endangered if the fetus were carried to term or where the pregnancy resulted from an act of rape or incest.

Question. What changes, if any, would you recommend with regard to these requirements?

Answer. If confirmed, I would review the applicable law and policies with the Army's legal and medical experts to determine if any changes are necessary.

NATIONAL SECURITY PERSONNEL SYSTEM

Question. Section 1106 of the National Defense Authorization Act for Fiscal Year 2008 restored the collective bargaining rights of civilian employees included in the National Security Personnel System (NSPS) established by DOD pursuant to section 9902 of title 5, U.S.C. Under section 1106, the Department retains the authority to establish a new performance management system (including pay for performance) and streamlined practices for hiring and promotion of civilian employees.

What is your view of the NSPS, as currently constituted?

Answer. I understand that the core purpose of NSPS was to support a streamlined and flexible civilian compensation, staffing, classification, and performance management system. Such a system is viewed as essential to the effective management of the sort of mission-oriented and results-driven civilian workforce that is vital to DOD's success. I recognize the many concerns with certain aspects of NSPS and understand that the NSPS Task Group's draft recommendation to the Defense Business Board was to initiate a reconstruction of the system. If confirmed, I look forward to working with DOD in the review of the recommendations detailed in the final report of the Defense Business Board.

Question. If confirmed, how would you evaluate its success or failure to meet its goals?

Answer. If confirmed, I would first review the findings and recommendations of the Defense Review Board and familiarize myself with reports from the Government Accountability Office and the Office of Personnel Management and with other as-

assessments that may be available. I would seek insights both into what works well in the extant system and into areas recommended for improvement, based on input for all stakeholders including recognized employee groups.

Question. Do you support the pay-for-performance approach adopted for civilian employees in the NSPS?

Answer. As a general principle, I support pay-for-performance and believe that employees' compensation should be based on their contribution to the mission. If confirmed, I look forward to reviewing the Defense Review Board's comprehensive evaluation of NSPS and working with DOD to address the concerns identified.

Question. Do you believe that the Department needs streamlined authority for hiring and promotion of civilian employees to meet its human capital needs?

Answer. I am advised that the Department is challenged to meet increased civilian labor requirements in critical occupations and to develop human capital strategies responsive to these challenges. It is my understanding that there are situations in which specialized hiring authorities are required to provide sufficient qualified applicants to meet mission needs. However, before making recommendations for additional authorities, I would want to ensure that managers fully understand the flexibility of the authorities currently available. If confirmed, I would work with the Assistant Secretary of the Army (Manpower and Reserve Affairs) to prompt managers to creatively and actively use available authorities and to explore the need for, and uses of, direct and expedited hiring authorities to assist in achieving the Department's human capital objectives.

Question. In your view, is it viable in the long run for DOD to maintain two separate systems (NSPS and the General Schedule) for its civilian employees?

Answer. It is my understanding that DOD operates a number of other personnel systems, such as the Defense Civilian Intelligence Personnel System, a system for nonappropriated fund personnel, and laboratory demonstration projects. If confirmed, I would work with DOD, the Office of Personnel Management, and the Assistant Secretary of the Army (Manpower and Reserve Affairs) to assess the appropriate number and types of personnel systems required for effective and efficient personnel management in the Department of the Army.

Question. What changes, if any, would you recommend to the NSPS authorizing legislation?

Answer. It is my understanding that the NSPS Task Group recently briefed its draft recommendations to the Defense Business Board and that the Task Group recommended reconstructing NSPS. Depending on the content of the final report, legislation may be appropriate to ensure that NSPS is on track to achieve its full potential.

Question. What changes, if any, would you recommend to the NSPS regulations?

Answer. It is my understanding that the NSPS Task Group recently briefed its draft recommendations to the Defense Business Board and that the Task Group recommended reconstructing NSPS. Depending on the content of the final report, regulatory or policy changes may be appropriate to ensure that NSPS is on track to achieve its full potential.

MANAGEMENT AND DEVELOPMENT OF THE SENIOR EXECUTIVE SERVICE

Question. The transformation of the Armed Forces has brought with it an increasing realization of the importance of efficient and forward thinking management of senior executives.

What is your vision for the management and development of the Army senior executive workforce, especially in the critically important areas of acquisition, financial management, and the scientific and technical fields?

Answer. The Army must carefully manage and develop its Senior Executive Service corps to meet the evolving work force challenges facing the Department. As I understand it, members of the Senior Executive Service are increasingly being looked to, when appropriate, as replacements for military flag officers in the critically important areas of acquisition, financial management, and the scientific and technical fields. To support this effort, I understand the Army's Senior Executive program focuses on the recruitment, assignment, and development of adaptive, multi-skilled senior civilian leaders, and that the current Senior Executive program includes periodic education and development opportunities and performance-based evaluations.

Question. Over the last 10 years, the Army budget has almost doubled, but the number of senior executives in the Department of the Army has remained almost unchanged.

Do you believe that the Army has the number of senior executives it needs, with the proper skills to manage the Department into the future?

Answer. If confirmed, I would carefully assess the Army's Senior Executive requirements and work to ensure that the Army has the number of Senior Executives with the diverse set of skills and experiences required to lead the Department into the future.

INITIAL RECRUIT TRAINING

Question. The committee has received reports from non-commissioned officers in operational units that new recruits graduating from basic training and advanced training are not prepared as they reach their units. Moreover, the committee has received reports of some recruits suffering from mental health and other health issues upon first arriving to their units.

Do you believe that the Army's basic and advanced training programs fully prepare new soldiers for combat operations?

Answer. As I understand the question, Army basic and advanced training programs are not intended to provide specific training for combat operations. Rather, it is my understanding that new soldiers are trained to ensure they have the skills required by their military specialty and to function as an individual soldier, and later receive additional training when assigned to a unit to prepare them for combat operations.

Question. In your view, has the Army sacrificed quality of personnel for quantity in achieving the past 2 years' growth in end strength?

Answer. At present, I do not have the information required to answer your specific question. If confirmed, I will focus on maintaining the quality of the Army's All-Volunteer Force.

Question. Has the Army lowered its basic and advanced training standards, including physical standards, to achieve this growth by graduating more recruits as compared to historical norms?

Answer. I am informed that the standards of training, including physical training, have not been lowered and are in fact higher than before to prepare soldiers for the conflicts they will face. The graduation rates for basic and advanced training are about the same as historical norms. If confirmed, I will work with Congress to ensure that our recruits continue to be adequately trained.

STOP LOSS AUTHORITY

Question. What is your assessment of the Army's plan to implement the Secretary of Defense's recent direction to end the use of stop-loss?

Answer. It appears the Army has a plan in place to implement the Secretary of Defense's guidance on the use of stop loss. The Army Reserve will begin mobilizing units without stop loss after 1 August 2009; the Army National Guard will begin mobilizing units without stop loss after 1 September 2009; and the active Army will begin deploying units without stop loss after 1 January 2010. I do not have sufficient information at this time to make an assessment.

Question. In your view, is the termination of stop-loss in the Army achievable without adversely affecting unit manning, cohesion, and readiness?

Answer. I do not have sufficient information to make an assessment at this time.

OPERATIONAL AND PERSONNEL TEMPO

Question. Current DOD policy is that Active component personnel would have 2 years of dwell time for each year of deployment and that Reserve component members would have 5 years of dwell time for each year they are mobilized.

What is your view of the achievability of this goal? What measures must be taken by the Army to be able to achieve it in 5 years or less?

Answer. The Army's ability to achieve its steady-state deployment-to-dwell time ratios of 1:3 for the Active component and 1:5 for the National Guard and Reserve would be a function of end strength and demand. The Army is currently working to achieve its surge deployment-to-dwell time ratios of 1:2 for the Active component and 1:4 for the National Guard and Reserve.

Question. In your view, how would shifting resources from Iraq to Afghanistan affect dwell-time ratios?

Answer. Shifting resources from Iraq to Afghanistan would not affect dwell-time ratios unless it results in an increase or decrease in demand. The key factor in deployment-to-dwell time ratios is overall demand.

Question. How would the end of the use of stop-loss affect dwell time ratios?

Answer. It will create additional demand in manning units scheduled to deploy. While this may have a negative impact on individual soldier dwell, the Army is offering incentive programs to encourage soldiers to extend to complete deployments with their units. The Army is hopeful that these measures would mitigate the in-

creased demand. The recent approval of a temporary end-strength increase of 22,000 soldiers will also significantly assist in manning units without stop loss.

Question. What is your assessment of the Army's ability to support scheduled troop rotation planning in 2009 and beyond, particularly in combat support and combat service support missions, given this goal?

Answer. The Army will continue to support scheduled troop rotation planning, including combat support and combat service support units, in 2009 and beyond. The recent approval of a temporary wartime allowance for an additional 22,000 soldiers will assist the Army in its efforts to man units without stop loss and improve dwell. Achieving steady-state dwell time goals will depend on future reductions in demand.

Question. What measures are being taken to respond to operational requirements for low-density, high-demand units and personnel whose skills are found primarily in the Reserve components, e.g., civil affairs, medical personnel, and truck drivers?

Answer. I do not have a detailed knowledge of all the measures being implemented. I believe the Army continues to seek solutions to sourcing low-density, high-demand requirements with a variety of initiatives, including the use of individual augmentees and rebalancing certain military occupational specialties between the Reserve and Active components.

Question. In your view, what would be the effect on recruiting, retention, and readiness of the Army of the current rates of operations and personnel tempo through 2010?

Answer. The Army has seen no negative effects on recruiting and retention because of operational and personnel tempo. Despite the challenges of a protracted conflict, the Army recently exceeded its enlisted recruiting missions for the first time since fiscal year 2002 and is optimistic it will meet its goals for fiscal year 2009 and fiscal year 2010. The Army monitors retention very closely given the high operational demand and multiple deployments soldiers experience. Statistics show that multiple deployments to Afghanistan and Iraq are not adversely affecting enlisted retention. On the officer side, the multiple deployments required of the Army to ensure success in overseas contingency operations missions have not resulted in increased losses of midgrade officers over the past several years. The Army's loss rates are well within historical norms at all officer grades and actually decreased slightly in company grade officers during 2008 and so far during 2009. The majority of the present generation of young officers and noncommissioned officers has entered the Army during a time of conflict. They have known the challenges we face and are continuing to serve with distinction in a very fluid and demanding environment.

Question. In your judgment, what would be the impact on the current rates of operations and personnel tempo of assigning principal responsibility for support to civil authorities for consequence management of natural, domestic disasters to Reserve component forces? What would be the impact of assigning these responsibilities to Active component forces?

Answer. I believe assigning principal responsibility for these missions to the Reserve Forces would likely lessen the demand on Active-Duty Forces, potentially yielding some improvements in operational and personnel tempo for the Active Duty. The reverse would likely be true if responsibility were assigned to Active-Duty Forces.

MEDICAL PERSONNEL RECRUITING AND RETENTION

Question. The Army continues to face significant shortages in critically needed medical personnel in both Active and Reserve components. Increasing medical support requirements, caused by the growth of the Army and the modular force, surge requirements in theater, and other factors would compound the already serious challenges faced in recruitment and retention of medical, dental, nurse and behavioral health personnel.

What is your understanding of the most significant personnel challenges in recruiting and retaining health professionals in the Army?

Answer. As the Nation deals with a shortage of medical professionals, the recruiting and retention of skilled and dedicated care providers continues to be a significant challenge for the Army. Issues of operational tempo, pay compatibility, and adequacy of support staff present ongoing hurdles to overcome. Even during these challenging times, I am heartened that Army medicine continues to attract and produce world-class physicians, nurses, and medics.

Question. If confirmed, would you undertake a comprehensive review of the medical support requirements for the Army, incorporating all new requirements for 2010 and beyond?

Answer. If confirmed, I would review medical support requirements on a regular, recurring basis and incorporate all new requirements in ongoing planning and re-

cruiting efforts. I am advised that the Army already reviews medical support requirements as part of its ongoing internal processes and, if confirmed, I would continue this practice.

Question. If confirmed, what policies or legislative initiatives, if any, are necessary in order to ensure that the Army can continue to fulfill medical support requirements as its mission and end strength grow?

Answer. If confirmed, I would work closely with The Surgeon General to evaluate the Army's requirements, support ongoing programs, and develop initiatives to enhance the Army's ability to recruit and retain care providers and support personnel with the requisite critical skills. Should legislative or policy changes be required, I will work with the leadership of DOD and Congress to bring them to fruition.

GROUND COMBAT EXCLUSION POLICY

Question. In May 2005, you cosponsored an amendment to the House-passed National Defense Authorization Act for Fiscal Year 2006 that would have required the Secretary of Defense to notify Congress if he proposed any changes to the ground combat exclusion policy or if he proposed to open or close any career designator to the assignment of women. In speaking of this amendment, you stated: "Many Americans feel that women in combat or combat support positions is not a bridge that we want to cross at this point."

What objective did you have in mind when you cosponsored this amendment?

Answer. The language as first included in the Military Personnel Subcommittee mark was inserted at the direct request of the full committee chairman. Subsequent to that adoption, it became clear that the Army had not provided the committee with a full and complete picture of the extent to which women were being used in forward support companies, and it was not clear that the Army was in compliance with DOD's existing regulations. Accordingly, I worked with the chairman and other senior members of the committee to develop a secondary amendment that, in essence, sought to codify existing DOD regulations and require notification to Congress of any proposed changes to units and assignments for female members. My intent was to provide for better oversight by requiring the Secretary of Defense to notify Congress of changes to the ground combat exclusion policy or proposals to open or close any career designator to the assignment of women. I also introduced a second amendment to require the Secretary of Defense to review military service policies with regard to the assignment of women, with a specific focus on the collocation policy.

Question. Do you believe that it is appropriate for female soldiers to serve in positions in which they may be exposed to combat?

Answer. Female soldiers make irreplaceable contributions to the Army's success and are an integral part of the All-Volunteer Force. All soldiers—male and female—are trained to fight in combat. As I understand the current law and policy, once properly assigned, female soldiers are subject to the same utilization policies as their male counterparts and, as required by their unit's mission, may find themselves in combat. Female soldiers remain with their assigned units, perform their assigned duties, and operate as a team with male soldiers as they have been trained to do.

Question. What is your view of the current policy regarding women in combat with respect to female soldiers serving in OIF and OEF?

Answer. In my view, the current policy seems to be operating adequately. If it is determined a need exists to consider a change to that policy, I would provide the Secretary of Defense with the most accurate information and cogent advice possible regarding the changes sought and would ensure that the Army complies with all the notification requirements in title 10.

Question. What is your assessment of the Army's compliance with the requirements of the current ground combat exclusion policy?

Answer. It is my understanding that the Army is in compliance with the requirements of law and DOD policy relating to women in combat. Women have and will continue to be an integral part of the Army team, performing exceptionally well in all specialties and positions open to them.

Question. In your view, should the current policy prohibiting the assignment of women to ground combat units be revised or clarified in any way to reflect changing roles for female soldiers and the changing nature of warfare?

Answer. If confirmed and if, after careful study and deliberation, it is determined it is necessary to seek a change to the policy, I would provide the Secretary of Defense with the most accurate information and cogent advice possible regarding the changes sought and would ensure that the Army complies with all the notification requirements in title 10.

RELIGIOUS GUIDELINES

Question. What is your understanding of current policies and programs of DOD and the Department of the Army regarding religious practices in the military?

Answer. At this time I do not have a sufficiently detailed knowledge of the current policies and programs, but it is my belief that whatever policies are in place must be consistent with the First Amendment protections afforded to all Americans.

Question. Do these policies accommodate, where appropriate, religious practices that require adherents to wear particular forms of dress or other articles with religious significance?

Answer. At this time I do not have a sufficiently detailed knowledge of the current policies and programs, but it is my belief that whatever policies are in place must be consistent with the First Amendment protections afforded to all Americans.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. At this time I do not have a sufficiently detailed knowledge of the current policies, but it is my understanding that Army policies require chaplains to support all unit personnel, regardless of their beliefs.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. At this time I do not have a sufficiently detailed knowledge of the current policies and programs, but it is my belief that whatever policies are in place must be consistent with the First Amendment protections afforded to all Americans.

FAMILY SUPPORT

Question. The Army Family Action Plan has been successful in identifying and promoting quality of life issues for Army families.

What do you consider to be the most important family readiness issues in the Army, and, if confirmed, what role would you play to ensure that family readiness needs are addressed and adequately resourced?

Answer. I recognize that soldiers and their families have made, and continue to make, significant personal sacrifices in support of our Nation. I fully support the Army Family Covenant, a commitment to provide soldiers and their families—Active, Guard, and Reserve—a quality of life commensurate with their level of service. If confirmed, I would continue efforts to improve family readiness through the Family Covenant. As the former chair and ranking member of the House Armed Services Personnel Subcommittee, I endeavored to ensure that military families received the support and resources they required. If confirmed, I commit to continuing my advocacy on behalf of Army families.

Question. How would you address these family readiness needs in light of global rebasing, BRAC, lengthy deployments, and the planned growth of the Army?

Answer. Repeated deployments and frequent moves because of base realignment and closure and other Army transformational efforts combine to create stress and anxiety for Army families. The Army offers a number of family service programs—child and youth services, relocation and recreational programs, and a myriad of counseling services—all designed to foster strong, resilient families capable of successfully navigating the challenges of military service and coping with the demands of a military lifestyle. One of the “pillars” of the Army Family Covenant is to standardize and fund these programs and services throughout the Army, providing families with predictable and consistent services no matter where they may be stationed. If confirmed, I would continue to advocate for the robust family service programs that I believe to be so important to creating a supportive environment in which Army families can thrive.

Question. If confirmed, how would you ensure support of Reserve component families related to mobilization, deployment and family readiness, as well as active-duty families who do not reside near a military installation?

Answer. Supporting the families of geographically dispersed soldiers poses special challenges but would be a high priority for me if I am confirmed. I understand that the Army already has undertaken several initiatives focused specifically on service to Reserve component families as well as to active duty families who do not reside near a military installation. In 2008 the National Guard Bureau created the Soldier Family Services and Support Division to provide family program resources, guidance, and training to all States and territories. In addition, the Army has implemented the Yellow Ribbon Reintegration Program; added more than 1,000 family

readiness support assistant positions to provide administrative and logistical support to Family Readiness Groups; established "Army OneSource" to provide soldiers and their families with online access to standardized services, programs, and support; supported 249 Army National Guard Family Assistance Centers; and expanded community-based outreach to geographically dispersed children and youth of deployed Active, Guard, and Reserve soldiers through Operation Military Kids.

MENTAL HEALTH ADVISORY TEAMS

Question. The Army's Mental Health Advisory Team (MHAT) studies in the Iraqi theater have been valuable in identifying the extent of mental health conditions and resource and training challenges being experienced in OIF. The most recent report, MHAT V, stated that deployment length and number of deployments were related to higher rates of mental health problems.

Based on the findings of MHAT V that soldiers experience increased stress due to multiple and lengthy deployments, what actions would you take, if confirmed, to ensure that appropriate mental health resources are available to soldiers in theater, as well as upon their return?

Answer. I have been advised that the MHATs have shown that far-forward mental health prevention and care are effective in assisting soldiers and reducing unnecessary evacuations from theater. If confirmed, I would review the Army's current force structure, and recruitment and retention programs for behavioral health providers across all force components, military and civilian, to make sure sufficient behavioral health providers are in theater and at home.

Question. What do you think have been the most valuable findings of the Army's MHATs, and what are the lessons which can be applied to future deployments?

Answer. I have been informed that multiple valuable findings have emerged from the Army's MHATs, which have been studying and reporting on mental health issues in combat zones since 2003. Among the findings are that the level of combat a soldier is and has been involved in continues to be the main determinant of a soldier's mental health status, good noncommissioned officer leadership is a key to sustaining a soldier's mental health and well-being, and the stigma that continues to be associated with those who seek mental health care.

MHAT findings have been used as the basis to reshape existing combat and operational stress control units to create more flexible and capable organizations. Information from the teams has also been used to better predict the quantity of behavioral health assets required for current and future conflicts. Finally, information from the teams has been used to create a training program known as "Battlemind," which changes the way the Army prepares soldiers, leaders, and families for high-stress deployments. The importance of leadership in the mitigation of mental health difficulties is a vital lesson that must be applied to future deployments.

SUICIDES

Question. The committee continues to be concerned about the continuing increase in soldier suicides.

In your view, what is the cause of this surge in the number of suicides?

Answer. I have been advised that the data suggests no single reason exists for the increase in the number of suicides in the Army. Several individual and organizational factors working in concert appear to lead an individual to make the tragic decision to end his or her life. The Army's operational tempo appears to play a role, but precisely what that role may be is unclear. For example, my understanding is that approximately one-third of all suicides across all Army components since 2003 were soldiers who had never deployed.

Question. What is your assessment of the Army's response to this increase in suicide rates?

Answer. I have been advised that the Army has taken important proactive steps to address this problem, including implementation of suicide prevention and intervention training for its personnel; issuing the Army Campaign Plan for Health Promotion, Risk Reduction, and Suicide Prevention; and entering into an agreement with the National Institute of Mental Health to conduct a 5-year longitudinal study with the goal of identifying both the causes of suicides and viable intervention methods. I pledge to you that, if confirmed, one of my top priorities would be to ensure that the Army's response to this critical problem is aggressive, effective, and appropriate.

Question. The Army recently signed an agreement with the National Institute of Mental Health to perform a 5-year study on suicides in the Army.

If confirmed, what actions would you propose that the Army take in the meantime to enhance its suicide prevention program?

Answer. I appreciate and share the committee's sense of urgency in addressing issues of suicide prevention and intervention. If confirmed, I would work to ensure that the suicide prevention program receives the leadership, resourcing priority, and support necessary to effectively address this difficult and challenging problem.

SUPPORT FOR WOUNDED SOLDIERS

Question. Wounded soldiers from OEF and OIF deserve the highest priority from the Army for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from Active Duty if required, and continuing support beyond retirement or discharge. Yet, as the revelations at Fort Stewart in 2003 and Walter Reed in 2007 revealed, the Army was not prepared to meet the needs of returning wounded soldiers.

In your view, what were the most critical shortcomings in warrior care since 2001?

Answer. As I understand it, the Army was not prepared for the increase in wounded, ill, and injured soldiers that resulted from overseas contingency operations such as OEF and OIF. One area that needed improvement was the management of outpatient soldiers during their recovery period. If confirmed, I will do everything I can to continue to promote a high standard of care for wounded warriors.

Question. What is your assessment of the Army's response?

Answer. The Army is in the process of transforming its care for wounded, ill, and injured soldiers and their families. As a cosponsor of the Wounded Warrior Assistance Act of 2007 in the House of Representatives, it was one of my highest priorities during my time on the House Armed Services Committee. If confirmed, I would assess the effectiveness of the Army's response and continue to work with Congress to ensure that America's warriors receive the highest possible care and support.

Question. How does the Army provide follow-on assistance to wounded personnel who have separated from Active service? How effective are those programs?

Answer. I am informed that the Army established the Army Wounded Warrior Program in 2004 to provide follow-on assistance to wounded personnel who have separated from service. The Army Wounded Warrior Program assists and advocates for the most severely wounded, injured, and ill soldiers, veterans, and their families by providing personalized support through more than 120 local Army wounded warrior advocates who connect soldiers and veterans with resources and assist in their transition to life post-injury. Should I be confirmed, I would strongly support this program and work to improve the partnership with the VA to ensure the care of all wounded soldiers separating from service.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Army's support for wounded personnel, and to monitor their progress in returning to duty or to civilian life?

Answer. If confirmed, I would continuously assess the efficiency and appropriateness of the Army's support for wounded personnel. I would implement strategies and seek additional resources as appropriate to make sure the Army meets the needs of wounded soldiers.

Question. Studies following the revelations at Walter Reed point to the need to reform the Army's disability evaluation system.

What is your assessment of the need to streamline and improve the Army's disability evaluation system?

Answer. I understand that beginning on November 26, 2007, the Army initiated testing of a revamped physical disability program at Walter Reed Army Medical Center, streamlining the process used to determine soldiers' fitness for service or eligibility for military and veterans' benefits. Key features of this pilot program include a single medical examination and a single sourced disability rating.

If confirmed I would closely examine the disability evaluation process to reveal any areas that need to be improved. I would also work toward this end with stakeholders in the Army, as well as with experts in DOD and VA.

Question. Is it your view that the Army currently is correctly assigning disability ratings to soldiers who are found not to be fit for duty?

Answer. I do not have sufficient information to make a judgment at this time.

Question. If confirmed, how would you address any need for change?

Answer. If confirmed, I would listen to the information presented by the experts in this area. I would work with the stakeholders in the Army and with appropriate personnel in both DOD and VA to determine what elements of the current system should be changed and how to best accomplish those changes.

ARMY MEDICAL ACTION PLAN AND WOUNDED WARRIORS

Question. The Army Medical Action Plan (AMAP) has attempted to address the various needs of wounded warriors and their families.

What is your view of the adequacy of the AMAP, and if confirmed, would you make any changes to the program?

Answer. The AMAP, now referred to as the Army's Warrior Care and Transition Program, has accomplished much over the past 2 years. If confirmed, I would support continued refinement of the program to ensure that it is not only efficient and effective, but is flexible enough to meet the demands of changing circumstances.

Question. Staffing of Warrior Transition Units (WTUs) has been a major issue, especially at installations experiencing surges of redeploying troops.

What are the impediments to fully staffing these units?

Answer. I do not have sufficient information to make a judgment at this time.

Question. If confirmed, would you pursue changes to improve assignment of military personnel and hiring of civilian personnel to improve staffing of WTUs?

Answer. If confirmed, I would ensure that systems are put in place to assign appropriate staffing in WTUs. WTUs must be able to expand or contract as the population of wounded, ill, and injured soldiers changes.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. Numerous cases of sexual misconduct involving soldiers in Iraq, Kuwait, and Afghanistan have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They asserted that the Army failed to respond appropriately by providing basic services, including medical attention and criminal investigation of their charges and, ultimately, appropriate disciplinary action.

What is your understanding of the resources and programs the Army has in place in deployed locations to offer victims of sexual assaults the medical, psychological, and legal help that they need?

Answer. It is my understanding the Army has taken a number of significant steps to improve the assistance to victims of sexual assault, including enhanced recognition of the special circumstances that apply to deployments. In addition, I understand that the Army has implemented a comprehensive Sexual Assault Prevention and Response Program (SHARP), which includes medical, advocacy, chaplaincy, investigative, and legal services. Under this program, the Army requires every unit, brigade-size and higher, to appoint and train a deployable sexual assault response coordinator and requires every battalion to appoint and train two unit victim advocates. If confirmed, I would ensure that the Army continues to take appropriate steps to aid victims of sexual assault, both in garrison and deployed locations.

Question. What is your view of the steps the Army has taken to prevent additional sexual assaults at deployed locations as well as home stations?

Answer. In my opinion, the Army has taken several important steps in its campaign to prevent sexual assaults both at home stations and deployed locations. For instance, I have been informed that the "I. A.M. Strong" Prevention Campaign is being implemented across the Army. "I. A.M. Strong" features soldiers as influential role models providing peer-to-peer messages to encourage other soldiers to take action to promote a positive command climate in which sexual assault is not acceptable. Command leadership and program representatives from divisions in deployed locations and home stations have participated in prevention summits held in September 2008 and April 2009. If confirmed, I would monitor these and other related programs closely.

Question. What is your view of the adequacy of the training and resources the Army has in place to investigate and respond to allegations of sexual assault?

Answer. It appears that the Army is committed to ensuring that it has trained personnel and resources in place to investigate and respond to allegations of sexual assault. I have been advised that the Army continues to emphasize victim services and response capabilities. I have also been advised that the Army is in the process of hiring and placing additional special investigators and prosecutors at Army installations with the highest occurrences of sexual assault and adding examiners to the U.S. Army Criminal Investigation Laboratory. If confirmed, I would assess whether additional steps should be taken to support victims and hold offenders accountable.

Question. Do you consider the Army's current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. This effort needs to be robust and ongoing. Clearly, significant challenges remain unresolved. If confirmed, it would be a high priority.

Question. What problems, if any, are you aware of in the manner in which the confidential reporting procedures have been put into effect?

Answer. At this time I am not aware of any problems with the current restricted reporting procedures. If confirmed, I would closely monitor the Army's sexual assault response procedures to determine whether improvements are needed in the area of confidential reporting. While the program is vital, those who might use it must hold it in trust.

Question. What is your view of the appropriate role for senior military and civilian leaders in the Secretariat and the Army staff in overseeing the effectiveness of implementation of new policies relating to sexual assault?

Answer. Sexual assault is a crime that has no place in the Army's ranks. The role of senior Army leadership is to ensure an organizational climate where such behavior is not tolerated and where victims feel free to report incidents without fear of reprisal.

I have been advised that as part of senior leader involvement, senior Army leaders review the Army Sexual Assault Report quarterly and submit statistical data to DOD on both a quarterly and an annual basis. Senior leaders also submit an annual Army report and program assessment to the Secretary of Defense in accordance with statutory requirements and DOD policy. Finally, senior Army leaders require their Inspectors General periodically to assess the program for compliance with statutory and regulatory requirements.

Question. If confirmed, what actions would you take to ensure senior management level direction and oversight of Departmental efforts on sexual assault prevention and response?

Answer. If confirmed, I would work with Chief of Staff and the Assistant Secretary of the Army (Manpower and Reserve Affairs) and the Deputy Chief of Staff, G-1 to ensure that SHARP operates effectively and receives the appropriate level of support.

MORALE, WELFARE, AND RECREATION

Question. Morale, Welfare, and Recreation (MWR) programs are critical to enhancement of military life for members and their families, especially in light of frequent and lengthy deployments. These programs must be relevant and attractive to all eligible users, including Active Duty and Reserve personnel, retirees, and their eligible family members.

What challenges do you foresee in sustaining and enhancing Army MWR programs and, if confirmed, what improvements would you seek to achieve?

Answer. I know from my experiences in representing the Fort Drum military community that Army MWR programs contribute immensely to the quality of life of military families. The continued vitality of these programs depends on consistent appropriated and nonappropriated funding. Yet I appreciate the difficulties associated with ensuring adequate funding for MWR activities in a challenging fiscal environment. In my view, the Army must constantly evaluate and improve support programs to meet the changing needs of soldiers and families. If confirmed, I would endeavor to ensure support for MWR programs that best meet the needs of soldiers and families and contribute positively to recruiting, retention, and readiness.

OFFICER SHORTAGES

Question. A report issued by the Congressional Research Service (CRS) in July 2006 found that the Army projected an officer shortage of nearly 3,000, with the most acute shortfalls in the grades of captain and major with 11 to 17 years of service. The CRS also found that shortages would persist through 2013 unless accessions are increased and retention improves. In that time, in addition to aggressive recruiting efforts, the Army has increased officer accessions through Officer Candidate School (OCS) from the pool of most qualified enlisted members.

What is your understanding of the reasons for the current shortfall, and what is your assessment of the steps the Army is taking to meet this mid-career officer shortfall?

Answer. I have been informed that Army officer shortages stem from force structure growth undertaken to support conversion to more self-sufficient, modular combat formations and to provide additional capabilities to meet the emerging threats in counterinsurgency warfare. I am encouraged that the measures the Army has taken to resolve shortages in midgrade officers, including increased accessions (over 5,000 by the end of fiscal year 2009); increasing Reserve component calls to Active Duty; using inter-service transfers, higher promotion rates, below the zone promotions, and earlier promotion pin-on point to a path of resolving this challenge.

Question. In your view, what are the long-term consequences and challenges, if any, for both the officer and noncommissioned officer corps of increasing the relative size of the officer corps through OCS accessions?

Answer. OCS graduates offer the Army a tremendous benefit; the OCS cohort has the highest officer retention rates of any commissioning program. I am informed that the noncommissioned officer corps can support demands to sustain OCS accessions at current and projected levels without adverse long-term consequences. In addition, the school has consistently produced minority officer candidates at the highest rate of any of the commissioning sources. It also offers an avenue for civilians with college degrees, in many cases in academic disciplines greatly needed in the Army, to enlist in order to seek a commission.

Question. If confirmed, what actions, if any, would you take to ensure adequate numbers of highly qualified captains and majors are serving on Active Duty over the next 10 years?

Answer. If confirmed, I would support the Army's strategy of retaining the capable and experienced company grade and junior field grade officers. In addition, I would support the continued development of nonmonetary incentives, including advanced education, quality of life, assignment to the region of choice, and other options that would best assist leaders in positively influencing an officer's decision to continue to serve.

Question. If confirmed, what actions, if any, would you take to continuously monitor and ensure the quality of mid-career field grade and senior noncommissioned officers?

Answer. If confirmed, I will continuously monitor and ensure the quality of the Army's midcareer field grade and senior noncommissioned officers. I would also work to ensure that midgrade and noncommissioned officers receive the necessary training and mentoring to realize the full benefit of their Army experience.

DETAINEE TREATMENT STANDARDS

Question. Do you agree with the policy set forth in the July 7, 2006, memorandum issued by Deputy Secretary of Defense England stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. I fully support the policy set forth in Deputy Secretary of Defense England's July 7, 2006, memorandum.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, DOD Detainee Program, dated September 5, 2006?

Answer. I do. The Army Field Manual and the directive clarify the roles, responsibilities, and relationships among military intelligence, military police, and health care providers in detainee operations and establish unequivocally that humane treatment is the standard of care for all detainees. These documents and the standards they promulgate have been instrumental in restoring the confidence of the American people in the Army as an institution and should act as important resources to guide soldiers in future contingency operations.

Question. Do you believe it is consistent with effective military operations for U.S. forces to comply fully with the requirements of Common Article 3 of the Geneva Conventions?

Answer. Compliance with the humane treatment standards specified in Common Article 3 of the Geneva Conventions is fully consistent with effective U.S. military operations and with Army values.

Question. If confirmed, how would you ensure that U.S. forces in Iraq and Afghanistan comply with the standards in the Army Field Manual, the DOD Directive, and applicable requirements of U.S. and international law regarding detention and interrogation operations?

Answer. It is my understanding that as the DOD Executive Agent for the administration of detainee operations policy, the Secretary of the Army is responsible for gathering "lessons learned" from detention operations and incorporating those lessons in Army policy and doctrine. U.S. forces worldwide are held to standards that are rooted in sound training and enforced by leadership. If confirmed, I will work to reinforce the Army's robust detention operations training program, which ensures that all U.S. forces involved in detainee and interrogation operations are aware of their obligations under U.S. and international law and implementing DOD policies.

Question. In the past 2 years, significant changes have been made in Iraq in the way detention operations have been conducted in a counterinsurgency environment, including through the establishment of reintegration centers at theater internment facilities.

What do you consider to be the main lessons learned from the changes to detention operations in Iraq?

Answer. As I understand it, the primary lessons learned include, first and foremost, that the Army must clearly communicate its commitment to ensuring that all soldiers adhere to the law of war and live up to the Army values, regardless of the circumstances. Second, soldiers who are determined to have violated the laws of war or to have failed to uphold Army values must be held accountable, as appropriate.

Another major lesson learned is that the Army may need to expand its detention operations force structure, particularly military police and military intelligence. If confirmed, I will act to ensure that the Army continues to assess and refine the force structure needed to successfully support the combatant commanders' detention operations missions.

Although Army policies have always prohibited inhumane treatment, Army detention operations policy and doctrine required revisions to incorporate operational realities. Policy and doctrine across the full spectrum of detention operations have been revised and published. I am told that key revisions include the designation of a single commander for detention operations; clear delineation of roles and responsibilities for detainee care, custody, and interrogations; and the promulgation of very specific guidance for identifying and reporting detainee abuse. It is my understanding that these new policies also mandate that U.S. forces receive additional law of war and cultural awareness training, and that the Army has enhanced detention operations training for soldiers, units, and civilians, not only in the predeployment context, but also as an annual requirement and by incorporating these courses into institutional training systems.

Question. What should be done to incorporate those lessons learned into DOD doctrine, procedures, and training for personnel involved in detention and interrogation operations?

Answer. It is my understanding that since 2004, the lessons learned have been spiraled into DOD policy, doctrine, and training. U.S. Army Intelligence Center and the Human Intelligence Training Joint Center of Excellence continue to incorporate lessons learned from current operations into the curriculum development for human intelligence-specific training and also into curricula for the professional development of leaders of all ranks. Furthermore, the U.S. Army Combined Arms Center at Fort Leavenworth includes lessons learned for detention and interrogation operations in scenarios composed for the Battle Command Training Program and in the intermediate level education curriculum, both of which provide realistic and challenging training to prepare leaders to succeed in future operations. If confirmed, I would seek to ensure that the Army constantly reviews its procedures and updates its doctrine through the analysis of lessons learned and best practices derived from afteraction reviews conducted by returning units, and that lessons learned collected by the Center for Army Lessons Learned are used in the development and revision of Army policy, doctrine, and training.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Secretary of the Army?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR CARL LEVIN

INSTITUTIONALIZING SUPPORT FOR IRREGULAR WARFARE

1. Senator LEVIN. Representative McHugh, a major objective of the Department of Defense's (DOD) budget recommendations is to rebalance the Department's investments across the spectrum of conflict by increasing emphasis on lower-end, irregular, counterinsurgency, and stability type operations, all of which are areas that place a high premium and demands on Army capabilities. In order to ensure that a rebalance achieves this objective, and perhaps more importantly is then sustainable, Secretary Gates has stressed the need for the Department to institutionalize and finance the support necessary for irregular warfare capabilities that have been developed over the last few years and will be needed in the future. What, in your view, does it mean to institutionalize support for irregular warfare capabilities in the Army?

Mr. MCHUGH. I believe that institutionalizing support for irregular warfare capabilities means making these competencies permanent—on par with traditional combat operations—across the categories of doctrine, organization, training, materiel, leader education, personnel, and facilities. It is my understanding that, with policy and strategy guidance from the Army Staff, the Army's Training and Doctrine Command is undertaking the transformation related to irregular warfare. These efforts have been underway for several years based upon the valuable lessons learned from operational experience. If confirmed, I would ensure this work continues.

2. Senator LEVIN. Representative McHugh, if confirmed, what are the most important policy and program changes you would pursue in support of the further institutionalization of capabilities for irregular warfare in the Army?

Mr. MCHUGH. I agree with Secretary Gates that we need to change the old paradigm of looking at potential conflict as either regular or irregular. If confirmed, I would review institutional processes and policies and adapt those required changes to execute a balanced strategy across the widest possible spectrum of conflict.

3. Senator LEVIN. Representative McHugh, what are the obstacles, if any, to institutionalizing this kind of support, and, if confirmed, what action will you take to overcome them?

Mr. MCHUGH. As with any institutional change, there is always some amount of resistance. However, over the last decade, the Army has shown increased capacity for learning and adapting particularly in the area of irregular warfare, including counterinsurgency and counterterrorism. If confirmed, I would work with Army senior leaders to identify and implement further changes as required.

NEW COMBAT VEHICLE PROGRAM

4. Senator LEVIN. Representative McHugh, DOD's fiscal year 2010 budget request includes cancellation of the family of armored manned ground vehicles in the Future Combat Systems (FCS) program. In announcing his decisions to restructure FCS and cancel the manned ground vehicle, and then again later in a speech at the Army War College, Secretary Gates emphasized his commitment to help the Army get a new ground combat vehicle in 5 to 7 years and promised to protect the Army's future years' funds that had been aligned with the FCS program for this purpose. In his testimony to the Subcommittee on Readiness and Management Support of the Senate Armed Services Committee last April, General Chiarelli said that the Army is committed to a ground combat vehicle modernization program and that they are, "going to move out as rapidly as [they] can." The Army Chief of Staff has echoed this position and said the target to field a system is in the 2015 to 2017 timeframe. What, in your view, is the appropriate schedule for developing a new ground combat vehicle system?

Mr. MCHUGH. While I am not yet in a position to offer an informed assessment of an appropriate schedule for developing a new ground combat vehicle system, I am aware the Army leadership is already working on fielding the next ground combat vehicle in the timeline stated by Secretary Gates. Despite the FCS restructure and cancellation of the Manned Ground Vehicle, the Army still needs to modernize and a next generation combat vehicle must be a priority.

5. Senator LEVIN. Representative McHugh, are you aware of any operational urgency in fielding a new ground combat vehicle in a 5- to 7-year timeframe?

Mr. MCHUGH. My understanding, based on communications from the Secretary of Defense and Chief of Staff of the Army, is that the Army's current ground combat vehicle platforms cannot meet growing and emerging demands for size, weight, and power and either have limited force protection and survivability or poor mobility and reliability. While I have not reached specific conclusions on vehicle needs and timelines, I do believe that persistent conflict demands shifting emphasis toward near-term needs while maintaining longer-term development goals.

6. Senator LEVIN. Representative McHugh, what, in your view, are the acquisition management risks associated with a combat vehicle development timeline of 5 to 7 years?

Mr. MCHUGH. It is my view that any quickly developed and rapidly fielded major acquisition program is at risk for cost, performance and schedule. It is my understanding that the Army is leveraging developments from the former FCS Manned Ground Vehicle platforms and other vehicle subsystems and components to help mitigate these program risks.

7. Senator LEVIN. Representative McHugh, if confirmed, how would you propose to manage those risks?

Mr. MCHUGH. I currently do not have the insight to offer a complete assessment of the risk management of the new ground combat vehicle development program, however, I believe risks can be mitigated by involving leaders in every step of the acquisition process to ensure that the program has proper oversight. If confirmed, I would ensure the ground combat vehicle program is given this oversight at the highest levels.

8. Senator LEVIN. Representative McHugh, are you confident that DOD will protect the Army's original FCS funds to start and sustain a new ground vehicle modernization program?

Mr. MCHUGH. The Office of the Secretary of Defense (OSD) has provided an allocation of FCS funding to the Army to develop and procure a new ground vehicle, of which the research, development, test, and evaluation funding of \$100 million was requested in the fiscal year 2010 budget. Additionally, Secretary Gates demonstrated his commitment to the funding of a new ground vehicle when he directed all money for FCS in the out years be protected to fund the new vehicle modernization program.

9. Senator LEVIN. Representative McHugh, if confirmed, what actions will you take to ensure that DOD provides the funds as promised?

Mr. MCHUGH. I have the utmost confidence that Secretary Gates will follow through with the commitments he has made to support the Army's new Ground Combat Vehicle initiatives. If confirmed, I would work closely with both the OSD Comptroller and OSD Acquisition Executive to monitor the allocation of funds for the Ground Combat Vehicle Program.

GROWTH OF ARMY COMBAT BRIGADES

10. Senator LEVIN. Representative McHugh, Secretary Gates had previously determined that planned growth of active Army combat brigades to 48 was not justified and that end strength growth was best used to man existing units before creating more. Accordingly, he limited active Army combat brigades to 45. In your view, does this additional growth of end strength merit creation of additional combat brigades as the Army originally planned, or should the additional manpower be used to meet shortfalls in existing and ad hoc unit requirements?

Mr. MCHUGH. It is my understanding that the 48 Brigade Combat Team (BCTs) construct required more soldiers than available with an end strength of 547,400. By eliminating three BCTs, those soldiers are available to offset requirements existing elsewhere in the force. I do not have detailed knowledge whether additional gains in end strength are also needed.

11. Senator LEVIN. Representative McHugh, in your view, what kind of budget pressure will this additional manpower put on other Army investments (for example readiness, reset, and modernization) and, if confirmed, how would you recommend making budget tradeoffs to afford the end strength growth, even though it is temporary?

Mr. MCHUGH. In my view, the temporary increase in military end strength will put pressure on other Army investments. Nevertheless, such an increase is nec-

essary if the Army is to achieve the critical objective of reducing stress on the force. If confirmed, I would work with the Secretary of Defense and his staff to prioritize requirements and identify the potential budget tradeoffs within the Army and DOD to support this growth.

ARMY SCIENCE AND TECHNOLOGY

12. Senator LEVIN. Representative McHugh, what do you see as the role that Army science and technology (S&T) programs will play in continuing to develop capabilities for current and future Army systems?

Mr. MCHUGH. It is my understanding that the Army's S&T investment strategy is shaped to foster innovation and accelerate/mature technology to enable future force capabilities while exploiting opportunities to rapidly transition technology to the current force. The S&T program must retain the flexibility to be responsive to needs identified through current operations and will be a critical part in improving capabilities.

13. Senator LEVIN. Representative McHugh, in your view, what have been the greatest contributions of Army S&T programs to current operations?

Mr. MCHUGH. In my view, the most significant contribution the Army S&T community has offered to current operations is its technical expertise coupled with a deep understanding of warfighter needs. It was the capability of the Army's Scientist and Engineering workforce that enabled the rapid development and deployment of lightweight and adaptable armor solutions that address the emerging threats for platforms such as the up-armored HMMWV and the MRAP. It is also my understanding that Army S&T community quickly developed electronic countermeasures to provide jamming capabilities, base protection technologies to protect soldiers while in forward operating bases and a variety of sensors and situational awareness enablers that have been critical to soldiers' efforts in theater.

14. Senator LEVIN. Representative McHugh, what metrics would you use, if confirmed, to judge the value and the investment level in Army S&T programs?

Mr. MCHUGH. If confirmed, I would evaluate the speed of transitions of technology to the warfighter and their effectiveness; the adoption of technology into acquisition programs; and the realignment of technology development to changing warfighter needs.

ENERGY TECHNOLOGY ADOPTION EFFORTS

15. Senator LEVIN. Representative McHugh, the Army has an opportunity to accelerate the development of fuel efficient tactical and support vehicles, leveraging commercial technologies such as fuel cells and hybrid engines. The Army should be playing an aggressive role in adopting advanced energy vehicles technologies, such as hybrids, for use in support functions use at installations. This type of early adoption puts the Army in compliance with existing statutes and executive orders regarding usage of advanced energy vehicles, reduces overall energy consumption costs to the Service, and serves the broader policy goal, and accelerating the wider spread adoption of these technologies nationally. If confirmed, what kind of investments would you make in advanced energy technologies (such as batteries, fuel cells, hybrids, etc.) and to make the Army an early adopter of these technologies through procurement and demonstration programs—for example, using hybrid vehicles or installing alternative energy projects on Army posts?

Mr. MCHUGH. The Army must be proactive in reducing fossil fuel consumption and increasing the use of alternative and renewable fuels across its installations. I understand that the Army currently has the largest hybrid vehicle fleet in the DOD and plans to lease 4,000 Low-Speed Electric Vehicles (LSEVs) from the General Services Administration over a three-year period to replace fossil fueled vehicles. If confirmed, I would support developing renewable energy charging capabilities for LSEVs, hybrid plug-ins, and fully electric vehicles to recharge their batteries and reduce reliance on local power grids. Certainly, efforts to incorporate other emerging technologies should continue as hybrid plug-in, fuel cell, solar, and other technologies mature and become available and economical. As technologies mature, the Army should consider incorporating larger advanced energy vehicles into the fleet.

16. Senator LEVIN. Representative McHugh, if confirmed, which agencies or activities within the Army would you task to take the lead in these efforts?

Mr. MCHUGH. Based on my understanding of current Army organizational responsibilities, the Assistant Secretary of the Army (Installations and Environment) is the Army lead in developing policy and identifying solutions to the energy challenges today and the future. If confirmed, I would assess the Army plans in this area and encourage partnerships among Army Commands and agencies, the Department of Energy, and private industry to promote and implement new technologies and best practices where appropriate.

SEXUAL ASSAULT PREVENTION AND RESPONSE

17. Senator LEVIN. Representative McHugh, numerous cases of sexual misconduct involving soldiers in Iraq, Kuwait, and Afghanistan have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They asserted that the Army failed to respond appropriately by providing basic services, including medical attention and criminal investigation of their charges and, ultimately, appropriate disciplinary action. What is your understanding of the resources and programs the Army has in place in deployed locations to offer victims of sexual assaults the medical, psychological, and legal help that they need?

Mr. MCHUGH. It is my understanding the Army has taken a number of significant steps to improve assistance to victims of sexual assault, including enhanced recognition of special circumstances that apply to deployments. I have been told that the Army has implemented a comprehensive sexual harassment/assault response and prevention (SHARP) program in deployed locations, to include medical, advocacy, and chaplaincy, and law enforcement, investigative and legal services. If confirmed, I would ensure that the Army continues to take appropriate steps to aid victims of sexual assault, both in garrison and in deployed locations.

18. Senator LEVIN. Representative McHugh, do you consider the Army's current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Mr. MCHUGH. I do not have detailed knowledge to make a complete assessment. I know the Army's policies and procedures for restricted reporting provide sexual assault victims the opportunity to receive the support they need whether or not they decide to file an unrestricted report. These efforts need to be robust and ongoing, and if confirmed, I would ensure it remains a top priority.

19. Senator LEVIN. Representative McHugh, in your view, what is the appropriate role for senior military and civilian leaders in the Secretariat and the Army staff in overseeing the effectiveness of implementation of new policies relating to sexual assault?

Mr. MCHUGH. Sexual assault is a crime and has no place in the military or our society. The role of any senior leader is to maintain a culture and organizational climate where such behavior is not tolerated and where victims feel free to report incidents without fear of reprisal. If confirmed, I would be vigilant in maintaining this climate across the Army and in responding quickly, effectively, and appropriately when and where deviations occur.

20. Senator LEVIN. Representative McHugh, if confirmed, what actions would you take to ensure senior management level direction and oversight of departmental efforts on sexual assault prevention and response?

Mr. MCHUGH. If confirmed, I would work with the Assistant Secretary for Manpower and Reserve Affairs, the Chief of Staff, and the Deputy Chief of Staff, G-1 to ensure that the Army has in place the appropriate protocols to provide senior leaders the information and assistance they require to operate and resource the sexual harassment/assault response and prevention program (SHARP).

ARMY LABORATORIES AND RESEARCH, DEVELOPMENT, AND ENGINEERING CENTERS

21. Senator LEVIN. Representative McHugh, what role should Army laboratories play in supporting current operations and in developing new capabilities to support Army missions?

Mr. MCHUGH. It is my understanding that the Army laboratories are the S&T performing organizations and have and will continue to play a major role in supporting current operations with best capabilities available. Through their broad

range of investments in key strategic S&T areas, they also provide critical new capabilities for soldiers.

22. Senator LEVIN. Representative McHugh, if confirmed, how will you ensure that the Army laboratories and research and development (R&D) centers have the highest quality workforce, laboratory infrastructure, resources, and management, so that they can continue to support deployed warfighters and develop next generation capabilities?

Mr. MCHUGH. If confirmed, I would ensure that the Army laboratories and R&D centers recruit and retain the highest quality workforce. I would encourage the laboratories to take advantage of the authorities they currently have in regard to infrastructure and to work with OSD in its current efforts to expand these authorities. Maintaining the current level of resources for all the laboratories and embracing best practices in regard to management would be given a high priority during my tenure.

QUESTIONS SUBMITTED BY SENATOR CLAIRE MCCASKILL

ARMY SUBSTANCE ABUSE PROGRAM

22. Senator MCCASKILL. Representative McHugh, I introduced S.459, the Substance Use Disorders Act of 2009 earlier this year based on problems with the Army Substance Abuse Program (ASAP), some of which were identified last fall at Ft. Leonard Wood, Missouri. In recent years, ASAP has struggled to manage the increasing number of soldiers needing treatment, often following stressful deployments to Iraq and Afghanistan. In particular, there have been problems with understaffing and mismanagement. Commander notification and the lack of confidentiality in treatment may discourage servicemembers from seeking treatment for fear of disciplinary action. It is important to move from a climate of punishment towards a climate that reduces the stigma of seeking treatment. Based on S. 459, the Army recently instituted the Confidential Alcohol Treatment and Education Pilot program to allow complete anonymity for eligible soldiers who self-refer to this program. This is a good start. However, I am still concerned whether commanders should be notified in all instances of soldiers enrolling in ASAP and that the disciplinary option should be on the table no matter what. What approach do you take to how discipline should be used with troops who ask for help with getting substance use disorders treated?

Mr. MCHUGH. I am told that the Army's philosophy is not to punish soldiers who come forward with substance abuse issues and that this policy applies without regard to what a commander may or may not know about a soldier's problem. The Army's substance abuse regulation has long included a limited use policy. As I understand it, if a soldier comes forward to an ASAP counselor and admits to prior or current substance abuse, he or she will receive treatment without fear of disciplinary action deriving from that admission. Soldiers are still subject to disciplinary action for acts of misconduct while under the influence of alcohol or other substances, but they are not subject to disciplinary actions based solely on self-admitted substance abuse disclosed in the context of seeking treatment. While I believe this policy supports a balanced approach to the rehabilitation of our soldiers, I am mindful that we must continue to weigh further changes.

23. Senator MCCASKILL. Representative McHugh, how does the Army plan to address the discipline issue with individuals who have sensitive security clearances or military occupation specialties (MOSs)? Specifically, how can these individuals be encouraged to seek treatment so that they get the help they need so that they can do their jobs effectively, rather than hiding substance use disorders that could ultimately impact their job performance?

Mr. MCHUGH. I am informed that the Army's policy is first to get a soldier the help he or she needs. One of the provisions of the Confidential Alcohol Treatment and Education Pilot is that soldiers who voluntarily seek treatment will not have their enrollment in the program recorded or documented in such a way that it is subsequently used for other purposes, such as determining that soldier's future duty assignments. If safety or national security is at stake, a soldier may be reassigned, without repercussion, to other duties during the course of his or her participation in the treatment program.

24. Senator MCCASKILL. Representative McHugh, in Representative McHugh's prepared responses for the committee, he says that, "It appears that there is a

shortage of ASAP counselors at some installations.” Indeed, the shortage of counselors is systemic to the Army. We even have whistleblowers at Ft. Leonard Wood in Missouri coming forth with concerns about the ASAP. What are the Army’s views on the adequacy of ASAP counselors in the Army, and what specific measures does the Army plan to mitigate the shortage and lack of resources?

Mr. MCHUGH. I am informed that the Army leadership is very cognizant of the shortage of counselor personnel in both the civilian and military sectors nationwide. This shortage often can be attributed to military and civilian sector competition for the services of an already constrained number of these care providers. The Army has instituted a number of incentives, including payment of recruiting bonuses, relocation costs, and retention bonuses, to attract qualified counselors. Further, the Army has secured direct hire authority to expedite the employment of these personnel.

25. Senator MCCASKILL. Representative McHugh, an area of substance abuse disorders in the Army that remains understudied and misunderstood is that of prescription drug abuse, particularly for those soldiers who are deployed in theater in Iraq and Afghanistan. Often these individuals are easily prescribed drugs that can be extremely addictive and harmful over time. What is the Army doing to include prescription drug abuse in the ASAP, and what data is available on the numbers of soldiers who are referred for treatment for prescription drugs in the Army?

Mr. MCHUGH. It is my understanding that treating soldiers for prescription drug abuse is, and has always been, an important part of the Army Substance Abuse Program. If confirmed, I would continue such programs to ensure every soldier with a substance abuse problem has the opportunity to receive the care he or she needs. I am told that reported Army rates of abuse for pain killers is about 5 percent of all cases.

QUESTIONS SUBMITTED BY SENATOR KAY HAGAN

ARMY UNIFORMS

26. Senator HAGAN. Representative McHugh, whether soldiers are serving overseas or training within the continental United States, in preparation for deployment, they need uniforms that are capable of defending against insect borne diseases such as Lyme disease and Rocky Mountain spotted fever. After over 15 years of study and research, the Army decided to adopt the factory treatment of uniforms with permethrin, as the most effective solution, to protect soldiers against insect borne diseases. The adoption of this technology has been recommended by the Army’s subject matter experts, including the Surgeon General and Uniform Board. However, contractual management, logistics, and funding jeopardize delays in providing the Army with factory treated permethrin uniforms until 2012.

In order for this technology to be properly implemented and supervised, I believe that the Army needs to establish the protocol that the contract management be established directly between the Army and the uniform treatment vendor. This is a very important difference from the Defense Logistics Agency/Defense Supply Center Philadelphia (DLA/DSCP) practice of relegating the oversight of this technology to a subcontract through the existing cut and sew uniform manufacturers. A direct contract to treatment vendors can provide oversight incentives to continue to improve the quality and the safety of this program.

This is a complex technology that is federally regulated by the Environmental Protection Agency (EPA). The EPA recognizes that each vendor’s treatment has different characteristics particularly regarding efficacy and safety. Assigning responsibility of supervising the production of this product through the DLA/DSCP process would negatively impact the quality, safety, and efficacy of the product. Moreover, inserting an unrelated vendor into the process adds an extra layer of cost, as the cut and sew vendor adds margin to the cost from the treatment vendors.

Please provide your thoughts on establishing the protocol that contract management of Army permethrin treated uniforms be established directly between the Army and the uniform treatment vendor.

Mr. MCHUGH. I am unable to provide a detailed assessment at this time. If confirmed, I would fully evaluate this issue.

27. Senator HAGAN. Representative McHugh, in accordance with the Acquisition Reform Bill, contractual management of Army permethrin treated uniforms between the Army and the uniform treatment vendor saves money as it removes the “middle

man” (cut and sew vendors) from adding additional margin of costs. Can you please provide your thoughts?

Mr. MCHUGH. I am unable to provide a detailed assessment at this time. If confirmed, I would evaluate this issue.

28. Senator HAGAN. Representative McHugh, where will the money come from within the Army budget to fund the treatment of all Army combat uniforms with permethrin?

Mr. MCHUGH. At present, I am not familiar with the Army’s plans with respect to this subject. If confirmed, I would evaluate this issue.

UPGRADING M24 SNIPER RIFLES

29. Senator HAGAN. Representative McHugh, Army sniper teams in Iraq and Afghanistan utilize the M24 sniper rifle to respond to improvised explosive devices and insurgent ambushes. The weapons system is outdated, and soldier input has propelled the Army to determine that it is necessary and cost-effective to upgrade 3,000 M24s to meet the changing operational requirements on the ground and counter threats, most notably: engage targets during times of limited visibility and at night; increase range from 800 to 1,200 yards; improve ergonomics and stock configuration to enable maneuverability within vehicles and small spaces within urban areas; and increase concealment when transporting and operating the weapon.

Congress appropriated \$3.4 million in the Defense Appropriations Act for Fiscal Year 2009 for the Army to upgrade the M24 sniper rifle using operation and maintenance funding and an existing refurbishment contract with the company Remington, to do an engineering change proposal (ECP). The fiscal year 2009 funding was moved to procurement, making an ECP under the existing contract no longer feasible. The House Defense Appropriations Bill for Fiscal Year 2010 would appropriate an additional \$3.0 million for M24 upgrades. Congress is appropriating the funds in response to validated operational needs statements from Army units, who require an upgraded M24 sniper rifle for operations in theater. What are the Army’s plans to expedite the M24 upgrade to meet the immediate needs of the Army’s sniper teams?

Mr. MCHUGH. I do not have detailed knowledge on this issue. It is my understanding the immediate needs of the Army’s sniper teams are being met by the ongoing fielding of the most current system.

30. Senator HAGAN. Representative McHugh, what can be done to provide upgraded M24s to units that have an urgent need and is there anything we need to do in Congress to help with the upgrade?

Mr. MCHUGH. I am unable to provide a detailed assessment at this time. If confirmed, ensuring our sniper team’s needs are fully met would be a top priority.

31. Senator HAGAN. Representative McHugh, given that Remington owns the technical data package for the M24, how will the Army compete the upgrade?

Mr. MCHUGH. I do not have detailed knowledge on this matter but it is my understanding the technical data of the M24 will not be disclosed during the competition to select a vendor to upgrade sniper weapons that are currently fielded.

M4/REPLACEMENT CARBINE

32. Senator HAGAN. Representative McHugh, on July 1, 2009, the Army received control of the technical data package (design rights) to the existing M4 carbine weapons system. Prior to this transfer, Colt Defense LLC had been the sole source provider of the M4 carbine for the U.S. military for the past 15 years, due to a legal settlement between the Federal Government and Colt. The last of the 473,000 M4 weapons is expected to be fielded in 2010. It is important that we replace the M4 with a new state-of-the-art weapons system that meets the operational requirements of our military in theater. Is the Army committed to a full and open competition for the follow-on weapon to the M4?

Mr. MCHUGH. I am unaware of any currently planned competition to replace the M4. If confirmed, I would ensure all acquisition program competitions are performed fairly and openly.

33. Senator HAGAN. Representative McHugh, please provide your thoughts on updating the M4 carbine requirement and the solicitation process for a future weapon.

Mr. MCHUGH. I do not have detailed knowledge of this subject. If confirmed, I would ensure the competition for every acquisition program is conducted fairly and openly.

34. Senator HAGAN. Representative McHugh, does the Army plan on awarding the replacement weapon contract to one manufacturer or dividing it among several companies?

Mr. MCHUGH. I do not have detailed knowledge of this subject. If confirmed, I would ensure the competition for every acquisition program is conducted fairly and openly.

MILITARY HOUSING PRIVATIZATION INITIATIVE

35. Senator HAGAN. Representative McHugh, Congress established the Military Housing Privatization Initiative (MHPI) in 1996 as a tool to help the military improve the quality of life for its servicemembers by improving the condition of their housing. The MHPI was designed and developed to attract private sector financing, expertise, and innovation to provide necessary housing in a more efficient manner. OSD has delegated to the Military Departments the implementation of MHPI and authorized them to enter into agreements with private developers selected in a competitive process.

Financing for military housing privatization in the current market is challenging and entails high relative lending rates of interest. This impedes the restricting of existing military housing transactions, prevents the construction of new military family housing, and limits the scope of work. Transactions such as the one the Army agreed to involving construction of privatized military housing in South Korea is one of those projects affected. Has the current financial market negatively impacted the Army's ability to move forward with any of its privatization initiatives? If so, how can we assist the Army?

Mr. MCHUGH. Within CONUS, most of the Army's MHPI projects have been privatized, and the Army has successfully obtained initial debt funding. However, due to the current poor financial climate, two of the final RCI projects were not able to obtain suitable loan and investor funding. Those projects were still privatized, but development schedules were adjusted to delay construction until the market improves and debt funding is more favorable. Other projects have had to scale back due to reduced sources of debt funding and increased costs associated with debt payments.

Existing MHPI authorities do not currently extend to overseas locations like Korea. The Humphreys Housing Opportunity Project (HHOP) cannot take advantage of MHPI tools like loan guarantees, direct Federal loans, contribution of funds, or transfer of property. Additionally, the HHOP has unique elements associated with Status of Forces Agreement issues and Korean law. If confirmed, I would examine if the Army having the authority to utilize MHPI tools is needed for overseas projects.

36. Senator HAGAN. Representative McHugh, the financial crisis in the commercial mortgage backed securities market has negatively impacted the traditional firms that have credit enhancement capabilities to the private activity bonds used to finance MHPI projects. Has the Army approached Fannie Mae or Freddie Mac with this opportunity?

Mr. MCHUGH. It is my understanding that the Army has worked with underwriters to discuss opportunities for credit enhancement with government-sponsored enterprises such as Fannie Mae and Freddie Mac, as well as private entities such as Berkshire Hathaway, Assured Guarantee, and others.

37. Senator HAGAN. Representative McHugh, the MHPI program authority is slated to expire in 2010. What can we do to assist the Army and DOD to ensure that this program remains in effect after 2010?

Mr. MCHUGH. It is my understanding that the authorities outlined in the National Defense Authorization Act for Fiscal Year 1996 (Public Law 104-106, February 10, 1996) Section 2885 were made permanent by the National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375 (October 28, 2004) Section 2805 "Repeal of Limitations."

QUESTIONS SUBMITTED BY SENATOR MARK BEGICH

ARMY FAMILY READINESS

38. Senator BEGICH. Representative McHugh, in your answers to the advance policy questions to the committee, you continuously state the importance of care for soldiers and their families. What do you consider to be the most important family readiness issues?

Mr. MCHUGH. In my view, the Army's most important family readiness issues are related to repeated deployments and to the increased stress on soldiers and families that results from high operational tempo and inadequate dwell times at home between deployments. Also, I understand that family issues such as access to health care, spouse employment and childcare are of significant concern.

39. Senator BEGICH. Representative McHugh, if confirmed, how would you ensure that family readiness needs are addressed and adequately resourced?

Mr. MCHUGH. I recognize that soldiers and their families have made, and continue to make, significant personal sacrifices in support of our Nation. In late 2007, the Army unveiled the Army Family Covenant, a commitment to provide soldiers and their families—Active, Guard, and Reserve—a quality of life commensurate with their level of service. I fully support the Covenant's commitment to soldiers and families and, if confirmed, would continue efforts to improve family readiness through the Family Covenant. I would seek to further the success of Family Readiness Groups in providing important support and assistance to families, while serving as a network of communication between family members, the chain of command, and community resources. As the former Chair and Ranking Member of the House Armed Services Personnel Subcommittee, I endeavored to ensure that military families received the support and resources they required. If confirmed, I am committed to continuing my advocacy on behalf of Army families.

ARMY FACILITIES

40. Senator BEGICH. Representative McHugh, the simultaneous implementation of force structure initiatives in the Army has exceeded capacity of existing infrastructure at military installations. In order to provide enough living and working space for servicemembers, temporary facilities are being used for barracks, offices, and equipment maintenance facilities. In addition, barracks at military installations are in deteriorating condition due to lack of adequate investment. As a result, the committee mandated in the report accompanying S.1390 (S. Rept. 111-35) that the Secretary of Defense provide a report to Congress outlining a strategy to replace relocatable facilities and ensure adequate investment in infrastructure. What is your assessment of the Army's infrastructure investment strategy?

Mr. MCHUGH. I do not have sufficient information at this time to make an assessment. If confirmed, I would undertake to assess the sufficiency of the Army's current infrastructure investment strategy and implementation plan.

41. Senator BEGICH. Representative McHugh, if confirmed, what actions would you propose to reduce the backlog and improve Army facilities?

Mr. MCHUGH. If confirmed, I would support an investment strategy to ensure that the infrastructure backlog is addressed. I would also seek support from the Secretary of Defense and Congress for the President's budget request for Army installations and facilities.

ALASKA IN ARMY STRATEGIC POSTURE

42. Senator BEGICH. Representative McHugh, Alaska is home to Fort Richardson, Fort Wainwright, and Fort Greely. In addition to those Army installations, Alaska is home to Eielson and Elmendorf Air Force Bases and the Donnelly Training Range. Alaska is a strategic location with joint forces, extensive joint training infrastructure, unencumbered air and land space, and a robust deployment infrastructure. The community provides and supports a strong family environment. What is your assessment of the current and future joint training and stationing opportunities Alaska provides for the Army?

Mr. MCHUGH. My assessment is that Alaska provides extraordinary training and stationing opportunities for not only the Army but the other Services as well. The mountainous terrain, large and first-rate range facilities, and the cold weather climate provide an essential and unique training and stationing environment for units. These opportunities, combined with the state's strategic location, enable Army forces

in Alaska to support the Army's worldwide mission, as well as to provide essential support to the Pacific and Northern Commands (PACOM and NORTHCOM). In addition, it is my understanding that the local communities adjacent to Army bases in Alaska provide exceptional support to Army soldiers and their families. For these reasons, I believe that Alaska will continue to provide training and stationing opportunities for the U.S. Army.

43. Senator BEGICH. Representative McHugh, please describe the role of Alaska in the Army's overall strategic posture.

Mr. MCHUGH. In addition to supporting the Army's worldwide mission in places such as Iraq and Afghanistan, forces assigned in Alaska support the combatant commanders of both the PACOM and NORTHCOM. I have been advised that as to PACOM, Army forces in Alaska provide essential capabilities to meet the requirement for global engagement and rapid deployment throughout that theater's enormous area of responsibility. With regard to NORTHCOM, Army forces in Alaska assist in the homeland defense mission. I believe that Alaska's strategic location, as well as the State's robust training and deployment infrastructure, make an Army presence in Alaska a critical component of the Army's overall strategic posture.

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

ARMY MODERNIZATION

44. Senator INHOFE. Representative McHugh, if confirmed as the Secretary of the Army, how will you prioritize Army vehicle modernization?

Mr. MCHUGH. I understand the Army has priorities to improve soldiers' capabilities to accomplish their missions more effectively, especially in the areas of surveillance assets and force protection. If confirmed, I would review the Army's modernization strategy to ensure the Army has a sound, synchronized plan. I would place special emphasis on force protection, mobility, networked communications, and lethality capabilities needed for full spectrum warfare.

45. Senator INHOFE. Representative McHugh, in your view, how did the cancellation of the FCS Manned Ground Vehicle program impact the acquisition process of the Army's new Army BCT Modernization Strategy?

Mr. MCHUGH. It is my understanding that with the cancellation of the FCS manned ground vehicle, the Army is transitioning to a BCT modernization strategy. Instead of focusing on a few FCS BCTs, the Army plans to field FCS spin out technology to all 73 BCTs, thus enhancing the effectiveness of all formations.

46. Senator INHOFE. Representative McHugh, what do you believe is a reasonable and realistic procurement timeline for a new line of Army combat vehicles? Is 5 to 7 years realistic?

Mr. MCHUGH. I think that the reasonableness of the timeline will depend on the analysis of the capabilities and requirements new combat vehicles would need to provide. I understand that the Army is currently conducting requirements analysis to determine the appropriate requirements. At this time I am not yet in a position to offer an informed assessment of these efforts.

47. Senator INHOFE. Representative McHugh, what are your personal feelings regarding the Secretary of Defense's cancellation of FCS/ground vehicles?

Mr. MCHUGH. I strongly support Secretary Gates' decision to initiate a reevaluation of ground vehicles to ensure the most modern equipment is available to our soldiers.

48. Senator INHOFE. Representative McHugh, did you have similar conversations with the President or Secretary Gates leading up to your nomination concerning Army modernization?

Mr. MCHUGH. My conversations with the President were not focused on specific programs but rather the overarching issues, concerns, and the challenges that lie ahead for the Army. Before my nomination, I had been approached as part of my duties as the Ranking Member of the House Armed Services Committee and did have a discussion with the Secretary of Defense.

HEAVY BRIGADE COMBAT TEAM PROGRAM AND PALADIN INTEGRATED MANAGEMENT

49. Senator INHOFE. Representative McHugh, with the cancellation of FCS and delay of the Non-Line-of-Sight Cannon/Next Generation Cannon, do you believe that the Paladin Integrated Management (PIM) program should receive increased priority within the Army?

Mr. MCHUGH. Although I do not have detailed knowledge on this subject, I believe the Paladin program is very important to the Army's overall modernization efforts.

50. Senator INHOFE. Representative McHugh, how concerned are you that our soldiers are using combat vehicles designed in the 1940s–1950s and will continue using them until 2050?

Mr. MCHUGH. My commitment to the American soldier is to ensure they have the best equipment, in the right amounts, to accomplish all their missions. The Army has constantly modernized its equipment by the use of technology upgrades, recapitalization, and service life extension programs. While I believe these incremental modernization upgrade efforts are not a substitute for the development of a new system, these types of solutions are necessary until the Army determines the modernization strategy for its future ground combat vehicle and related platforms.

51. Senator INHOFE. Representative McHugh, are you committed to the Army's PIM program to update our artillery fleet?

Mr. MCHUGH. Although I do not have detailed knowledge on this subject, I believe the Paladin program is very important to the Army's overall modernization efforts.

RESET/RECAPITALIZATION

52. Senator INHOFE. Representative McHugh, what are your concerns with the high usage rates of Army wheeled and combat vehicles in Iraq and Afghanistan?

Mr. MCHUGH. The increased 'wear and tear' on equipment from the harsh wartime environments is staggering. I'm informed that the Army's truck fleet is experiencing usage rates that are five to six times the peacetime rates, and this has been further exacerbated by the heavy armor kits added to enhance force protection. The depots and commercial industrial base has surged to meet the extra demands from these usage rates, however, reversing the impact of these many years of extraordinary wear and tear on the Army's equipment will take time and dedicated resources.

53. Senator INHOFE. Representative McHugh, as we draw down in Iraq, do you believe it is important to adequately reset, and upgrade where appropriate, our combat equipment?

Mr. MCHUGH. I believe the Army needs to continue to adequately reset equipment while upgrading where appropriate. While the equipment is in maintenance, I believe the Army should take advantage of the opportunity to ensure the equipment is brought to the appropriate configuration and to use the most up-to-date replacement parts available. Though reset is not intended as a modernization program, the maintenance operations afford a cost-effective opportunity to insert technologies and capabilities as fitting.

END STRENGTH

54. Senator INHOFE. Representative McHugh, how will you recommend DOD fund the 22,000 soldier end strength increase? Should it be resourced internally or externally from the Army budget?

Mr. MCHUGH. It is my understanding that Army will internally fund the fiscal year 2009 costs associated with the temporary end strength increase, and that DOD will amend the fiscal year 2010 overseas contingency operations budget request to fund temporary end strength increased costs.

55. Senator INHOFE. Representative McHugh, are you concerned that this end strength increase will hinder other Army priorities like modernization and equipment reset?

Mr. MCHUGH. I am aware of the fiscal pressures faced by the Department and our Nation as a whole. I believe the temporary increase in Army end-strength is critical to sustain manning levels of deploying forces and reduce stress on our soldiers and their families. During this time, the Army needs to continue to reset equipment while modernizing the force, which is critical to maintain capabilities

now and into the future. These important requirements will most decidedly put pressure on DOD fiscal resources and force difficult and significant strategic choices.

PERSONNEL

56. Senator INHOFE. Representative McHugh, if confirmed as the Secretary of the Army, what changes will you implement that relieve the tremendous strain on soldiers and the deployment process?

Mr. MCHUGH. I believe the temporary increase in end strength, a reduction in demand in the Iraqi theater, and the execution of the Army Force Generation model should result in more dwell time between deployments. This will allow the force to reset, create greater deployment predictability, and relieve some of the tremendous strain on soldiers and their families. If confirmed, I would ensure these are priority efforts until the Army has reached the right balance between deployments and dwell time.

57. Senator INHOFE. Representative McHugh, what will the effects on the Army Force Generation cycle be if the Iraq drawdown is delayed while we simultaneously double our troop strength in Afghanistan?

Mr. MCHUGH. It is my belief that a delay in the Iraq drawdown would increase the global commitment of forces and necessarily decrease the dwell time of select units as well as the time available to restore these units to a deployable condition prior to their next deployment. Although the temporary increase in end strength would help, I think it likely that the Army would experience a corresponding increase in the strain on our soldiers and their families.

58. Senator INHOFE. Representative McHugh and Dr. Westphal, what level of troop increase in Afghanistan or Iraq would cause a change to the current dwell time goal of 1:2?

Mr. MCHUGH. It is my understanding that current projections of the global commitment of Army forces requires the availability of 20 trained and ready BCTs in order to achieve a 1:2 Active component and 1:4 Reserve component dwell-to-deployment ratio. I believe any increase in the commitment of forces might endanger these desired dwell-to-deployment ratios.

THREAT PREPARATION

59. Senator INHOFE. Representative McHugh, what threats do you think the Army should be postured for and how should we equip and structure our force accordingly?

Mr. MCHUGH. In an era of persistent conflict, the Army must be prepared to operate across the full spectrum of conflict. Formations will conduct simultaneous offense, defense, and stability operations while facing hybrid threats from networked enemies embedded among the local population. These threats will possess a wide range of military capabilities and some advanced technologies. Accordingly, in my view, the Army must continue to review its force mix to ensure it meets combatant commanders' needs in the current and foreseeable operational environments. It is my understanding that the Army incorporates approved changes to existing unit structure or capabilities through the Force Design Update process, and brings in new capabilities that address gaps or shortfalls through several force management processes. If confirmed, I would work to maintain this flexibility in adapting the force to provide a supply of capabilities on a rotational basis to meet the demands of our combatant commanders.

In addition, I have been informed that a significant effort is underway to review the Army's force structure as part of the Quadrennial Defense Review and Total Army Analysis 2012–2017. This review will continue to focus on capabilities across the full spectrum of conflict in order to meet the challenges of an uncertain future security environment. Given those uncertainties, the Army must provide a balanced mix of versatile, expeditionary, agile, and sustainable forces. These include BCTs, functional and multi-functional support brigades, enabling units, and responsive institutional support to give Joint Forces Commanders an array of options. In my view, the Army's equipping strategy must ensure that soldiers have the right equipment amounts, types, and modernization to meet their mission requirements across the full spectrum of operations—whether in combat, training to go to combat, operating as part of the Army's generating force, or conducting homeland defense and defense support to civil authorities' missions.

60. Senator INHOFE. Representative McHugh, do you believe there is a deterrence value in having an Army equipped with the most advanced equipment available?

Mr. MCHUGH. Measuring the deterrence value of any capability is difficult given this value is largely determined by those actors deterred. The more advanced the military capabilities of the United States, the less likely those other states would mount a direct military challenge to the United States or its allies. Moreover, the predominance of "asymmetric warfare" in the conflicts in Iraq and Afghanistan demonstrates that even non-state actors that cannot be deterred are forced to devise unique ways of overcoming the overwhelming military superiority of the United States. Continuing to modernize the force with the most advanced equipment available will best ensure that the Army maintains its all-important advantage in military capabilities over the mid- and long-terms, and, thereby, serves a vital deterrence function.

61. Senator INHOFE. Representative McHugh, how should the Army be postured to counter the full spectrum of threats in the near- and far-term as well as be able to provide combatant commanders the forces they need?

Mr. MCHUGH. I believe the institutional Army's recruiting, training, equipping, and other functions must focus on the objective of ensuring that forces provided to the combatant commanders for operational employment are prepared to operate across the full spectrum of conflict to counter an increasingly adaptive, technologically sophisticated, and elusive enemy.

QUESTIONS SUBMITTED BY SENATOR JEFF SESSIONS

WATER RIGHTS AND ALLOCATION

62. Senator SESSIONS. Representative McHugh, what is the national purpose for moving forward with updating the water manuals before the Governors have an opportunity to reach a compact in light of the recent court ruling in the U.S. District Court-Middle District of Florida (MDL-1824 Tri-State Water Rights Litigation)?

Mr. MCHUGH. Although I have not been fully briefed on all of the details, I am keenly aware of both the sensitive and critical nature of this issue. I began my public service in State and local government and I know the importance of water. It is my understanding that the parties involved are committed to working together toward a solution that will address the interests and concerns of all to the maximum extent possible. If confirmed, I would personally monitor this issue to ensure that the solution is consistent with the law and the most equitable resolution of this matter. I would engage the Army Corp of Engineers to provide whatever assistance is needed to the Governors and the Congressional delegations of the states involved to bring about an agreed upon resolution to this long standing issue.

63. Senator SESSIONS. Representative McHugh, given the recent court case and the potential for the States to meet a mutually agreeable solution on water allocation, what role, if any, will the Army Corps of Engineers play in these negotiations?

Mr. MCHUGH. If confirmed, I would work closely with Assistant Secretary of the Army for Civil Works and fully support that office's efforts as well as those of the Army Corps of Engineers to provide technical expertise and facilitate the development of a mutually agreeable solution that is consistent with the law. In the formulation of an appropriate way ahead, I would work closely with the Governors and congressional delegations of the States involved.

QUESTIONS SUBMITTED BY SENATOR MEL MARTINEZ

KUWAIT AND GULF LINK TRANSPORT COMPANY

64. Senator MARTINEZ. Representative McHugh, LTC Dominic "Rocky" Baragona died while deployed in Iraq on May 19, 2003, in a car accident with a tractor-trailer near the Kuwaiti border. Lieutenant Colonel Baragona was returning home from his deployment. The tractor-trailer truck, owned by Kuwait & Gulf Link Transport Company (KGL), a Kuwaiti multinational firm, crossed the highway and struck Lieutenant Colonel Baragona's HUMVEE. KGL was a large Kuwaiti company, organized under Kuwaiti law and doing business across the Middle East. Its business and the business of its successor companies include the execution of substantial contracts with the U.S. Army. After Lieutenant Colonel Baragona's death, the U.S. Army conducted an accident investigation report concluding KGL's negligence caused the traffic accident which killed Lieutenant Colonel Baragona. The U.S.

Army required KGL certify that it had purchased third party liability insurance for just this sort of accident. Please explain how as the Secretary of the Army you will assist families of U.S. servicemembers in accessing these insurance policies purchased for their benefit and please explain how you will lead the Army in holding negligent contractors accountable for their actions.

Mr. MCHUGH. If confirmed I would seek to ensure that the Army faithfully complies with the Freedom of Information Act, in responding to all requests for information related to insurance policies as required by Federal law. It is my opinion that if contractors are doing business with the Government, we must look carefully at making them subject to and under the jurisdiction of the laws of the United States. If confirmed, I would do everything within my power to ensure all contractors are held accountable in accordance with law and regulations.

65. Senator MARTINEZ. Representative McHugh, in *Baragona v. Kuwait & Gulf Link Transport Company*, the Court found KGL liable to the Baragona family for approximately \$5 million. KGL has appeared in court to argue that the court does not have jurisdiction over KGL because it is a Kuwaiti company. Contractors, including foreign contractors, play an important part in the success of the U.S. military, but it's important that the contractors act responsibly and conform to the contracting requirements of DOD. The Army requires the purchase of insurance by all of its contractors, foreign and domestic, but this is pointless if the foreign contractors are able to assert that they shouldn't have to compensate accidental death or injury claims because of their lack of presence in the United States. As Secretary of the Army, how will you address contractor responsibilities outside of the United States and what recommendations do you have in changing contracting rules to ensure compliance with U.S. Court systems?

Mr. MCHUGH. Since I do not have in depth knowledge of this case, I cannot make any specific recommendations. It is my understanding, however, that contractors doing business outside of the United States are to be held to the same standards of conduct as those performing in the United States. The Federal Acquisition Regulation (FAR) was changed in December 2008 (FAR 3.10) to require contractors overseas to institute the same ethics and compliance programs as those located in the United States. Contractors failing to accept service of process or otherwise willfully evading litigation can be debarred under the Government's suspension and debarment regulations. If confirmed, I would work closely with the Department of Justice on issues such as this involving the Federal Rules of Civil Procedure and the U.S. Court system.

66. Senator MARTINEZ. Representative McHugh, do you believe the U.S. Army is able to facilitate a resolution in this kind of case?

Mr. MCHUGH. I understand that the Army must maintain neutrality in litigation between third parties. If confirmed, I would ensure that the Army provides materials sought in litigation in an impartial manner in accordance with law and regulations. I would hope having access to information will better enable the parties to make informed decisions as to the relative merits of their positions. It is my understanding that the Army defers to the expertise of the Department of Justice in matters involving the U.S. Court system and for the appropriateness of the United States participating in a particular lawsuit.

67. Senator MARTINEZ. Representative McHugh, what are your thoughts on S.526, the "Lieutenant Colonel Dominic 'Rocky' Baragona Justice for American Heroes Harmed by Contractors Act"?

Mr. MCHUGH. I strongly support the principle that contractors doing business with the Government, including contractors overseas, must be held accountable for their actions. If confirmed, I would act to ensure contractors are held responsible in accordance with law and regulations.

MILITARY HOUSING AND PRIVATIZATION INITIATIVE

68. Senator MARTINEZ. Representative McHugh, the MHPI program is slated to expire in 2010. If confirmed, what do you see as the future of the MHPI program?

Mr. MCHUGH. It is my understanding that the authorities outlined in the National Defense Authorization Act for Fiscal Year 1996 (Public Law 104-106, February 10, 1996) Section 2885 were made permanent by the National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375 (October 28, 2004) Section 2805 "Repeal of Limitations."

69. Senator MARTINEZ. Representative McHugh, the financial crisis in the Commercial Mortgage Backed Securities market has negatively impacted the firms which back Private Activity Bonds used to finance MHPI projects. Has the Army approached Fannie Mae, Freddie Mac, or any other Government-sponsored enterprises with this opportunity? If so, what can this committee do to assist the Army in this process?

Mr. MCHUGH. It is my understanding that the Army has worked with underwriters to discuss opportunities for credit enhancement with government-sponsored enterprises such as Fannie Mae and Freddie Mac, as well as private entities such as Berkshire Hathaway, Assured Guarantee, and others. If confirmed, I would work closely with Congress to identify any additional authorities as needed.

[The nomination reference of Hon. John M. McHugh follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
July 6, 2009.

Ordered. That the following nomination be referred to the Committee on Armed Services:

John M. McHugh, of New York, to be Secretary of the Army, vice Preston M. Geren.

[The biographical sketch of Hon. John M. McHugh, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF HON. JOHN M. MCHUGH

Congressman John McHugh is currently serving his ninth consecutive term in the U.S. House of Representatives. He represents New York's 23rd Congressional District, home to Fort Drum and the 10th Mountain Division (Light Infantry).

Congressman McHugh was the ranking member (lead Republican) of the House Armed Services Committee. Before becoming ranking member of the full committee, Congressman McHugh was first the chairman of the Morale, Welfare, and Recreation Panel and then chairman and later ranking member of the committee's Subcommittee on Military Personnel. Congressman McHugh is also a senior member of the House Oversight and Government Reform Committee. During the 109th and 110th Congress, Congressman McHugh served as a member of the House Permanent Select Committee on Intelligence.

Representative McHugh began his public service career in 1971 in his hometown of Watertown, where he served for 5 years as a confidential assistant to the city manager. Thereafter, he joined the staff of New York State Senator H. Douglas Barclay, where he served as Chief of Research and Liaison with local governments for 9 years. Succeeding Senator Barclay in 1984, Representative McHugh served four terms in the legislature's upper house before coming to Congress.

Representative McHugh is a resident of Pierrepont Manor in Jefferson County, NY. Born on September 29, 1948, the Congressman was educated in Watertown public schools, graduating in 1966. He received a B.A. in Political Science from Utica College of Syracuse University in 1970, and earned a Master's Degree in Public Administration from the State University's Nelson A. Rockefeller Graduate School of Public Affairs in 1977.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Hon. John M. McHugh in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
John M. McHugh.

2. **Position to which nominated:**
Secretary of the Army.

3. **Date of nomination:**
July 6, 2009.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
September 29, 1948; Watertown, NY.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Divorced: Katharine T. Sullivan.

7. **Names and ages of children:**
None.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Watertown High School, Watertown, NY; 1962-1966; Diploma, 1966.
Utica College of Syracuse, Utica, NY; 1966-1970; BA, Political Science, 1970.
The University of Albany, SUNY, Albany, NY; 1976-1977; MA, Public Administration, 1977.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Member of Congress, U.S. House of Representatives, January 1993 to present.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Ex Officio Member of the Board of Visitors for the U.S. Military Academy at West Point. 10 U.S.C. § 4355.

Ex Officio Member of the Board of Visitors for the Western Hemisphere Institute for Security Cooperation. 10 U.S.C. § 2166.

By nature of my service in Congress, I served on several congressional caucuses and task forces focusing on health care, social security, agriculture and rural affairs, the environment, foreign trade, veterans, tourism, and senior citizens.

Member of the New York State Senate, January 1985-December 1992.

Chief of Research, Liaison with Local Governments, New York State Senator H. Douglas Barclay, 1975-1984.

Confidential Assistant to the City Manager, Watertown, 1971-1975.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corpora-

tion, company, firm, partnership, or other business enterprise, educational, or other institution.

Ex Officio Member of the Council of Directors for the Henry M. Jackson Foundation for the Advancement of Military Medicine. 10 U.S.C. § 178.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Jefferson County Farm Bureau; Chowder and Marching Society; Capitol Hill Club.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

Member of the New York State Senate, January 1985–December 1992.

Member of Congress, January 1993 to present.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

See 13(a) and the Committee to Elect McHugh.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None as an individual, however my campaign committee has made political contributions. See attached list. [Nominee responded and the information is contained in committee's executive files.]

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Utica College, Syracuse University, 1986–1987, Circle of 40 Distinguished Alumni Achievement Award.

State University of New York, Albany, Congressional Honor Roll Award.

Utica College, Syracuse University, 2007 Outstanding Alumni Award.

I am also the recipient of numerous awards and citations from various veteran service organizations, military associations, and military honors related to my service in Congress.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

"Fill the Military's 'Holes in the Yard'" The Hill (September 29, 2008).

I have also posted several columns on my U.S. House of Representatives Web site, <http://mchugh.house.gov/>. These are:

"Honoring Our Veterans," November 11, 2008.

"A Memorial Day Gift," May 21, 2008.

"The Seeds of Freedom's Tree," May 27, 2007.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Please see attached copies of delivered speeches as well as statements in committee and on the floor of the U.S. House of Representatives.

[Nominee responded and the information is contained in committee's executive files.]

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JOHN M. MCHUGH.

This 8th day of July, 2009.

[The nomination of Hon. John M. McHugh was reported to the Senate by Chairman Levin on August 4, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on September 16, 2009.]

[Prepared questions submitted to Dr. Joseph W. Westphal by Chairman Levin prior to the hearing with answers supplied follow:]

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? *Answer.* I believe the Goldwater-Nichols Act has had significant and positive impact on Department of Defense (DOD) operations. I believe that the framework established by Goldwater-Nichols has substantially improved interservice and joint relationships and promoted the effective execution of both military department and combatant command responsibilities. I believe that it is very important that the Department work with Congress to continuously assess the law in light of improving capabilities, evolving threats, and changing organizational dynamics. I am currently unaware of any reason to amend Goldwater-Nichols, but if confirmed, I will have an opportunity to assess whether the challenges posed by today's security environment and business operations require amendments to the legislation with a view to continuing the objectives of defense reform.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. If confirmed, I look forward to reviewing this milestone legislation and assessing whether any changes should be considered to address the challenges posed by today's security environment.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. My professional background offers several areas of experience that I believe qualifies me for the position of Under Secretary of the Army. First, more than fifteen years of Federal Government service which includes work in the House and Senate as well as, Interior, EPA, and Army. I have a working knowledge of inter-agency dynamics as well as budgeting, finance, legal and contracting areas within the Federal and State Government arenas.

In addition, my previous position as Chancellor as well as other administrative positions in higher education has provided me with experience in strategic planning, financial management, modernizing business operations and leadership. For example, as Chancellor of the University of Maine System, I implemented the most significant restructuring of the System's business operations. Through the application of a new enterprise operating system, I led the work to completely transform the highly decentralized business operations to a more efficient and cost effective operating system for all business functions.

Finally, my previous positions in DOD as an Assistant Secretary of the Army for Civil Works, Acting Secretary of the Army and a member of President elect Obama's transition team have provided me significant experience in all matters affecting the department and its relations within DOD. I have a strong commitment to building partnerships and strengthening accountability and efficiency. My earlier experience in the Department strengthened my knowledge and respect for the men and women who serve our country in uniform and the civilians who support and strengthen our institutional commitment to our national security.

DUTIES

Question. Section 3015 of title 10, U.S.C., states the Under Secretary of the Army shall perform such duties and exercise such powers as the Secretary of the Army may prescribe.

What is your understanding of the duties and functions of the Under Secretary of the Army?

Answer. As set forth above, the Under Secretary of the Army performs such duties and exercises such powers as the Secretary of the Army prescribes. The Under Secretary is the Secretary's principal civilian assistant and advisor on issues of critical importance to the Army. Further, pursuant to section 904 of the National Defense Authorization Act for Fiscal Year 2008, the Under Secretary of the Army is the Chief Management Officer (CMO) of the Department, with the primary management responsibility for business operations. In accordance with section 908 of National Defense Authorization Act for Fiscal Year 2009, the Secretary of the Army acts through the Under Secretary in his role as CMO to carry out an initiative for the business transformation of the Army.

Question. What recommendations, if any, do you have for changes in the duties and functions of the Under Secretary of the Army, as set forth in section 3015 of title 10, U.S.C., or in DOD regulations pertaining to functions of the Under Secretary of the Army?

Answer. If I am confirmed, I will review the current assignment of duties and functions of the Under Secretary of the Army, discuss my findings with the Secretary of the Army and recommend to the Secretary any changes that I believe would enhance the Under Secretary's ability to support for the Secretary of the Army's efforts to ensure that the Department of the Army is effectively and efficiently administered in accordance with law and the policies promulgated by the Office of the Secretary of Defense.

Question. Assuming you are confirmed, what additional duties, if any, do you expect will be prescribed for you?

Answer. I expect that the Secretary will designate me as the CMO of the Department with all of the duties and responsibilities associated with that position. I also expect that the Secretary will assign me duties that most appropriately support his efforts to ensure that the Department of the Army is effectively and efficiently administered in accordance with law and the policies promulgated by the Office of the Secretary of Defense, taking into consideration my background and experience.

RELATIONSHIPS

Question. If confirmed, what would be your working relationship with: The Secretary of Defense.

Answer. The Secretary of Defense, as head of DOD, possesses full authority, direction, and control over all of its elements. If confirmed, and subject to the authority, direction, and control of the Secretary of the Army, I will support the policy and direction of the Secretary of Defense to the best of my ability.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense performs such duties and exercises such powers as the Secretary of Defense may prescribe. The Deputy Secretary's responsibilities require him, from time to time, to issue guidance and direction to the military departments. If confirmed, and subject to the authority, direction, and control of the Secretary of the Army, I will support the guidance and direction of the Deputy Secretary of Defense. I will also support and work with the Deputy Secretary in his role as the CMO of DOD.

Question. The Deputy CMO of DOD.

Answer. The Under Secretary of the Army is designated the CMO for the Army. If confirmed, I will deal directly with the Deputy Secretary of Defense (DOD CMO) and the DOD DCMO on the full range of matters dealing with the management of the DOD, and will assist in the development of a comprehensive departmental transformation plan and business systems architecture, and help to identify and implement potential business process improvements.

Question. The Director of the Business Transformation Agency.

Answer. In accordance with title 10, U.S.C., section 192(e)(2), the Director of the Defense Business Transformation Agency reports directly to the Deputy CMO of DOD. Further, the 2009 National Defense Authorization Act, section 908, charges the Army's CMO to consult with the Director of the Defense Business Transformation Agency as to the appointment of the Army's Director of Business Transformation. Further, the Director of Business Transformation of the Army reports directly to the CMO, subject to policy guidance from the Director of the Business Transformation Agency of DOD. If confirmed, I would work closely with the DCMO

to determine needed changes to Departmental transformation plan, business systems architecture, and to identify needed business process improvements.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman of the Joint Chiefs of staff is the principal military adviser to the President, the National Security Council, and the Secretary of Defense. If confirmed, as required and subject to the authority, direction, and control of the Secretary of the Army, I will establish and maintain a professional relationship with the Chairman, cooperate with him in the performance of his responsibilities, and communicate with him on policy matters involving the Army.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. The Vice Chairman performs the duties prescribed for him as a member of the Joint Chiefs of Staff and such other duties as may be prescribed by the Chairman with the approval of the Secretary of Defense. If confirmed, as required and subject to the authority, direction, and control of the Secretary of the Army, I will establish and maintain a professional relationship with the Vice Chairman, cooperate with him in the performance of his responsibilities, and communicate with him on policy matters involving the Army.

Question. The Secretary of the Army.

Answer. The Secretary of the Army is the head of the Department of the Army and is responsible for, and has authority to conduct, all affairs of the Department of the Army as prescribed by law or by the President or Secretary of Defense. If confirmed, my relationship with the Secretary of the Army would be close, direct, and supportive. I would work to communicate as effectively as possible with the Secretary regarding the advice, views, and plans of the Secretariat and Army Staff and to oversee the implementation of the Secretary's decisions throughout the Army. I further understand that, if confirmed, I would serve as the CMO of the Department of the Army and understand that in that capacity I would be accountable to the Secretary for the effective and efficient organization and management of the Army's business operations and for carrying out an initiative for the business transformation of the Army. I understand that all of my actions would be subject to the authority, direction, and control of the Secretary of the Army.

Question. The Chief of Staff of the Army.

Answer. The Chief of Staff of the Army performs his duties under the authority, direction, and control of the Secretary of the Army and is directly responsible to the Secretary. The Chief of Staff also performs the duties prescribed for him by law as a member of the Joint Chiefs of Staff. If confirmed, subject to the authority, direction, and control of the Secretary of the Army I will work with the Chief of Staff as he performs his prescribed duties to ensure that the Army Secretariat and the Army Staff work together efficiently and effectively to accomplish the missions entrusted to the Secretary of the Army and the Secretary of Defense.

Question. The Assistant Secretary of the Army for Civil Works.

Answer. The Assistant Secretary of the Army (Civil Works) (ASA(CW)) has as the principal responsibility overall supervision of the functions of the Department of the Army relating to all aspects of the civil works program. The ASA(CW) has as a principal duty the overall supervision of Army functions relating to programs for conservation and development of national water resources, including flood control, navigation, hydropwer, environmental restoration and wetlands protection. If confirmed, I will cooperate fully with the Assistant Secretary in carrying out the responsibilities of the Secretary.

Question. The other Assistant Secretaries of the Army.

Answer. The four other Assistant Secretaries of the Army help set the Army's strategic direction by formulating and overseeing policies and programs within their respective functional areas of responsibility, consistent with applicable laws and regulations and in accordance with the objectives and guidance of the Secretary of the Army. If confirmed, I will work to establish a strong Secretarial team by maintaining a close and professional relationship with each of the Assistant Secretaries, working together on the day-to-day management and long-range planning needs of the Army.

Question. The General Counsel of the Army.

Answer. The General Counsel is the chief legal officer of the Department of Army and serves as counsel to the Secretary and other Secretariat officials. His duties include providing legal and policy advice to officials of the Department of the Army, as well as determining the position of the Army on any legal question or procedure. If confirmed, I will establish and maintain a close and professional relationship with the General Counsel and will actively seek his/her guidance to ensure that Army policies and practices are in strict accord with the law and the highest principles of ethical conduct.

Question. The Inspector General of the Army.

Answer. The Inspector General of the Army is charged with inquiring into, and reporting on the discipline, efficiency, economy, morale, and training, and readiness of the Army, as directed by the Secretary of the Army or the Chief of Staff. If confirmed, I will establish and maintain a close and professional relationship with The Inspector General of the Army

Question. The Surgeon General of the Army.

Answer. The Surgeon General is a special advisor to the Secretary of the Army and to the Chief of Staff on all matters pertaining to the military health service system. In that role, The Surgeon General assists the Secretary and the Chief in carrying out their responsibilities by ensuring a medically ready force as well as a trained and ready medical force. If confirmed, I intend to work closely with The Surgeon General to ensure that the Army's healthcare systems and medical policies support the Army's objectives, responsibilities, and commitments effectively and uniformly across the total force, with a particular focus on Wounded Warriors.

Question. The Army Business Transformation Office.

Answer. I am advised that in accordance with section 908 of the National Defense Authorization Act for Fiscal Year 2009, the Secretary of the Army has established the Office of Business Transformation of the Department of the Army to assist the CMO of the Army in carrying out a business transformation initiative for the Army. The Office of Business Transformation will be headed by a Director of Business Transformation who shall be appointed by the Army's CMO in consultation with the Director of the Defense Business Transformation Agency, from among individuals with significant experience managing large-scale organizations or business transformation efforts. The Director of Business Transformation of the Army reports directly to the CMO, subject to policy guidance from the Director of the Business Transformation Agency of DOD. If confirmed, I intend to work closely and directly with the Army Business Transformation Office to carry out a business transformation initiative for the Army and will fulfill my statutory obligations regarding the appointment of the Director of Business Transformation of the Army.

Question. The Judge Advocate General of the Army.

Answer. The Judge Advocate General of the Army is the legal adviser of the Chief of Staff of the Army, members of the Army Staff, and members of the Army generally. In coordination with the Army General Counsel, The Judge Advocate General serves as military legal adviser to the Secretary of the Army. The Judge Advocate General also directs the members of the Judge Advocate General's Corps in the performance of their duties and, by law, is primarily responsible for providing legal advice and services regarding the Uniform Code of Military Justice and the administration of military discipline. Therefore, I will establish and maintain a professional and inclusive relationship with The Judge Advocate General and always welcome his views about any legal matter under consideration.

Question. The Chief of the National Guard Bureau.

Answer. The Chief, National Guard Bureau is a principal advisor to the Secretary of Defense, through the Chairman of the Joint Chiefs of Staff, on matters involving non-Federalized National Guard forces and on other matters as determined by the Secretary of Defense and is the principal adviser to the Secretary of the Army and the Chief of Staff of the Army, and to the Secretary of the Air Force and the Chief of Staff of the Air Force, on matters relating to the National Guard, the Army National Guard of the United States, and the Air National Guard of the United States. If confirmed, and subject to the authority, direction, and control of the Secretary of the Army, I will establish a close, professional relationship with the Chief, National Guard Bureau and will communicate with him as he performs his prescribed duties.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges, if any, that you would confront if confirmed as Under Secretary of the Army?

Answer. The Army is faced with many challenges today and in the future, including providing proper support to soldiers and families in time of war, enhancing readiness, providing quality housing, modernizing equipment, and meeting recruiting and retention goals. The Army must transform its support infrastructure and integrate base realignment and closure decisions. The Army must provide a quality of life commensurate with the quality of soldiers' service and provide high quality care, particularly for those suffering from Post-Traumatic Stress Disorder and Traumatic Brain Injuries. Finally, the Army must transform Army contracting by improving staff capability and providing leadership and training in this critically important area.

All of these and other issues face the challenges of fiscal constraints while tempo of operations remains high at a time of great fiscal stress for the Nation. If con-

firmed, with direction from the Secretary of the Army, I will address these issues in consultation with this committee and Congress, the President, and the Army leadership.

Question. If confirmed, how would you prioritize and what plans would you have, if any, for addressing these challenges?

Answer. The Army, in helping to sustain our national defense and security, places great demands on our soldiers and their families and in times of war there are significant increases in the stress to the force, soldier readiness, family well being, equipment and modernization, transitioning the Reserve component and many other areas important to the mission.

If confirmed, I will provide my assistance to the Secretary in pursuing initiatives aimed at improving our business operations and provide leadership across the Department in support of his efforts to transform management to meet the critical needs of the Army.

ARMY MANAGEMENT AND PLANNING PROCESS

Question. Over the past several years, the Army's planning, programming, and budgeting process has not kept pace with rapidly changing requirements. While this is more understandable for operational events like the Presidential decision to surge additional forces into Iraq, it is less understandable with respect to long-term programmatic decisions such as the modular conversion of Army brigades or the more recent decision to increase Army end strength. It has become routine for the Army to submit "placeholders" instead of actual program plans in budget requests, and to purchase temporary facilities followed almost immediately by additional funding requests to buy permanent facilities to replace the temporary ones.

What is your understanding and assessment of the Army's management and planning process and any changes or reforms of these processes currently underway?

Answer. I am not in a position to assess the Army's management and planning process at this time, however, if confirmed, I will make it a priority to understand this process and recommend and implement changes as necessary to improve planning and budgeting.

Question. If confirmed, what additional changes would you propose, if any, to correct or improve management and planning processes?

Answer. If confirmed, I will examine how Army can seek improvements that can be instituted to make the process more efficient and more adaptive to the changing environment.

Question. In your view, does the Army have enough people with the right skills to manage the changes being attempted, or is the Army undertaking more organizational change than it is capable of accomplishing during a time of war?

Answer. At this time I am not in a position to assess if the Army has enough people with the right skills to manage the changes being attempted.

Question. The Army budget, including annual base and supplemental appropriations, has grown significantly in both absolute and relative terms since the start of the wars in Afghanistan and Iraq. However, the Army's annual base budget request to Congress has not provided full funding for planned procurement or operation and maintenance costs related to force reset, nondeployed readiness, or, in some cases, modernization. Instead, the Army has pushed requests for significant portions of these costs into later supplemental appropriations. This in turn causes cash flow challenges throughout the fiscal year that appear to invariably result in threats of the cancellation of contracts, work stoppage, and civilian workforce furloughs.

If confirmed, what changes in management would you propose, if any, to reduce or eliminate the Army's chronic cash flow challenges?

Answer. I do not have sufficient information at this time to recommend any changes to the Army's cash flow management.

DUTIES AND RESPONSIBILITIES AS CHIEF MANAGEMENT OFFICER

Question. Section 904 of the National Defense Authorization Act for Fiscal Year 2008 designates the Under Secretary of the Army as the Army's CMO. Section 908 of the National Defense Authorization Act for Fiscal Year 2009 requires the CMO of each of the military departments to carry out a comprehensive business transformation initiative, with the support of a new Business Transformation Office.

What is your understanding of the duties and responsibilities of the Under Secretary in his capacity as CMO of the Department of the Army?

Answer. Pursuant to section 904 of the National Defense Authorization Act for Fiscal Year 2008, the Under Secretary of the Army is the CMO of the Department, with the primary management responsibility for business operations. The Secretary of the Army is charged to assign to the Under Secretary such duties and authorities

as are necessary to organize and administer the business operations of the Army effectively and efficiently, in accordance with the policies promulgated by the Secretary of Defense. In accordance with section 908 of National Defense Authorization Act for Fiscal Year 2009, the Secretary of the Army acts through the Under Secretary, in his role as CMO, to carry out an initiative for the business transformation of the Army. This responsibility includes developing and implementing both a comprehensive business transformation plan and a business systems architecture and transition plan.

Question. What background and expertise do you possess that you believe qualify you to perform these duties and responsibilities?

Answer. I believe my previous service in the Federal Government, in both the Legislative and the executive branches has afforded me extensive experience in budgeting, strategic planning, program management and evaluation, finance, legal and contracting areas. Also as Chancellor of a large university system, I led a significant overhaul of all business operations from a highly decentralized and inefficient management system to a more coordinated and cost effective operation. Finally, my experience as Assistant Secretary of the Army for Civil Works and Acting Secretary of the Army have provided me with experience in the Department and a strong knowledge of its mission, operations, and business processes.

Question. Do you believe that the CMO and the Business Transformation Office have the resources and authority needed to carry out the business transformation of the Department of the Army?

Answer. I have been advised that Secretary of the Army Geren made a conscious choice to defer to his successor significant decisions regarding the roles and responsibilities of the Army's CMO and Director of Business Transformation and the structure, organization, and staffing of their respective offices. If confirmed, I would expect that the Secretary of the Army and I would focus immediately on developing and implementing the roles, responsibilities, and authorities of the CMO and the Office of Business Transformation, both to meet statutory mandates and to gain the most benefit for the Army, and on resourcing the Chief Management Office and the Office of Business Transformation.

Question. What role do you believe the CMO and the Business Transformation Office should play in the planning, development, and implementation of specific business systems by the military departments?

Answer. It is my understanding that the CMO has "the primary management responsibility for business operations" of the Army and is responsible to carry out an initiative for the business transformation of the Army. By law, the objectives of the Army's business transformation initiative must include the development and implementation of both a business transformation plan to achieve an integrated management system for the Army's business operations and of an enterprise-wide business systems architecture and transition plan encompassing end-to-end business processes. In my view, these objectives will require the CMO and the Office of Business Transformation to align business systems with strategic priorities, with a view to overcoming gaps in the Army's ability to carry out its title 10 functions. If confirmed, and consistent with the Secretary of the Army's guidance, I will work to oversee the development and implementation of business systems to maximize the effectiveness and efficiency of the Army's business operations.

Question. What changes, if any, would you recommend to the statutory provisions establishing the position of CMO and creating the Business Transformation Office?

Answer. It is my understanding that the Army is in the initial stages of implementing these statutory provisions. If confirmed, I look forward to reviewing the implementation, and, together with the Secretary of the Army, assessing and recommending modifications, as appropriate.

Question. Section 2222 of title 10, U.S.C., requires that the Secretary of Defense develop a comprehensive business enterprise architecture and transition plan to guide the development of its business systems and processes. The Department has chosen to implement the requirement for an enterprise architecture and transition plan through a "federated" approach in which the Business Transformation Agency has developed the top level architecture while leaving it to the military departments to fill in most of the detail. The Army's business systems, like those of the other military departments, remain incapable of providing timely, reliable financial data to support management decisions. In particular, the Government Accountability Office has reported that the Army has not yet followed DOD's lead in establishing new governance structures to address business transformation; has not yet developed a comprehensive enterprise architecture and transition plan that plugs into DOD's federated architecture in a manner that meets statutory requirements; and instead continues to rely upon old, stovepiped structures to implement piecemeal reforms.

If confirmed, what steps, if any, would you take to ensure that the Army develops the business systems and processes it needs to appropriately manage funds in the best interest of the taxpayer and the national defense?

Answer. I expect that if I am confirmed, the Secretary of the Army will direct me to supervise the Office of Business Transformation in: transforming the budget, finance, accounting, and human resource operations of the Army, consistent with the Army's business transformation plan; eliminating or replacing financial management systems that are inconsistent with the Army's overall business systems architecture and transition plan; and ensuring that the Army's plans are implemented in a manner that is aggressive, realistic, and accurately measured. I believe that each of these efforts will advance, in some way, the Army's development of the business systems and processes it needs to appropriately manage funds in the best interests of the taxpayer and the national defense.

Question. Do you believe that a comprehensive, integrated, enterprise-wide architecture, and transition plan is essential to the successful transformation of the Army's business systems?

Answer. Yes.

Question. What steps would you take, if confirmed, to ensure that the Army's enterprise architecture and transition plan meet the requirements of section 2222?

Answer. If confirmed, I will work closely with the Deputy CMO of DOD and with the Director of the Defense Business Transformation Agency and with all of the Army Assistant Secretaries to ensure that the business transformation initiatives, plans, programs, and systems developed by the Army are fully coordinated and compatible with the business systems architecture and transition plan implemented by DOD pursuant to title 10, U.S.C., section 2222.

Question. What are your views on the importance and role of timely and accurate financial and business information in managing operations and holding managers accountable?

Answer. In my view, timely and accurate financial and business information are absolutely critical to the Army's management of operations and to its ability to hold managers accountable for the results of their business-related decisions.

Question. How would you address a situation in which you found that reliable, useful, and timely financial and business information was not routinely available for these purposes?

Answer. If confirmed, I would work diligently in my role as the CMO, to oversee the work of the Office of Business Transformation to develop and implement aggressive and realistic actions to rectify this sort of problem.

Question. What role do you envision playing, if confirmed, in managing or providing oversight over the improvement of the financial and business information available to Army managers?

Answer. I understand that the CMO is responsible for achieving an integrated management system for the business operations of the Army, a critical component of which is providing Army managers timely and accurate financial and business information in support of their operations and decisions. If confirmed, I will work with the Assistant Secretaries of the Army, other Army Secretariat officials, members of the Army Staff, and other Army officials, to include the Director of the Office of Business Transformation, in their respective functional areas, to develop and oversee the implementation of plans, processes, and systems capable of providing accurate and timely information in support of the Army's business decisions.

ACQUISITION ISSUES

Question. Many experts have acknowledged that DOD may have gone too far in reducing its acquisition work force, resulting in undermining of its ability to provide needed oversight in the acquisition process.

Do you agree with this assessment?

Answer. I do not have sufficient information at this time to make this assessment. If I am confirmed, I would immediately assess this issue and work with the appropriate Army leadership to make sure the Army has the appropriate workforce levels to do the job.

Question. If so, what steps do you believe the Department of the Army should take to address this problem?

Answer. Acquisition reform is a top priority of President Obama and of Secretary Gates and if confirmed, I will make it one of my top priorities to ensure that the Department of the Army makes maximum use of the acquisition workforce authorities provided in the National Defense Authorization Act for Fiscal Year 2008 necessary to grow, recruit, and retain a corps of acquisition professionals adequate to manage and oversee the Department's acquisition functions.

Question. Major defense acquisition programs in the Department of the Army and the other military departments continue to be subject to funding and requirements instability.

Do you believe that instability in funding and requirements drives up program costs and leads to delays in the fielding of major weapon systems?

Answer. Yes.

Question. What steps, if any, do you believe the Army should take to address funding and requirements instability?

Answer. Stable requirements and funding are critical for a successful acquisition program. If confirmed, I will carefully examine the Army's requirements generation, resourcing, and acquisition processes and seek to maximize stability in funding and requirements.

Question. The Comptroller General has found that DOD programs often move forward with unrealistic program cost and schedule estimates, lack clearly defined and stable requirements, include immature technologies that unnecessarily raise program costs and delay development and production, and fail to solidify design and manufacturing processes at appropriate junctures in the development process.

Do you agree with the Comptroller General's assessment?

Answer. Yes.

Question. If so, what steps do you believe the Department of the Army should take to address these problems?

Answer. I do not have sufficient information and data at this time to outline necessary steps needed to correct these issues. If confirmed, I will focus on insuring their timely implementation in order to develop stable, defined requirements and rigorous program oversight.

Question. By some estimates, DOD now spends more money every year for the acquisition of services than it does for the acquisition of products, including major weapon systems. Yet, the Department places far less emphasis on staffing, training, and managing the acquisition of services than it does on the acquisition of products.

What steps, if any, do you believe the Army should take to improve the staffing, training and management of its acquisition of services?

Answer. If confirmed, I would expect the Secretary of the Army to direct an assessment of services acquisition to include organization, policy and processes to ensure we have an effective management structure. I would also work with the Secretary to ensure that service acquisition management was properly resourced.

Question. Do you agree that the Army should develop processes and systems to provide managers with access to information needed to conduct comprehensive spending analyses of services contracts on an ongoing basis?

Answer. The Army should have the processes and systems in place to conduct spending analyses and enhance the overall management of service contracts. I understand there are some information management systems in place, but they were not intended to do comprehensive spending analyses and may need to be enhanced. If confirmed, I would support this effort.

Question. The last decade has seen a proliferation of new types of government-wide contracts and multi-agency contracts. DOD is by far the largest ordering agency under these contracts, accounting for 85 percent of the dollars awarded under one of the largest programs. The DOD Inspector General and others have identified a long series of problems with interagency contracts, including lack of acquisition planning, inadequate competition, excessive use of time and materials contracts, improper use of expired funds, inappropriate expenditures, and failure to monitor contractor performance.

What steps, if any, do you believe the Army should take to ensure that its use of interagency contracts complies with applicable DOD requirements and is in the best interests of the Department of the Army?

Answer. It is my understanding that the Office of Federal Procurement Policy, DOD, and the Army have issued new and/or revised policy, procedures and guidance to address the problems identified by the Inspector General. If confirmed, I would work with the Secretary of the Army to ensure that the Army's Procurement Management Review Team makes assessing the Army's compliance with the revised policy and procedures and the overall effectiveness of the revised policy and procedures an item of special interest.

ARMY MODERNIZATION

Question. In general, major Army modernization efforts have not been successful over the past decade. Since the mid-1990s, Army modernization strategies, plans, and investment priorities have evolved under a variety of names from Digitization, to Force XXI, to Army After Next, to Interim Force, to Objective Force, to Future

Combat System and Modularity. Instability in funding, either as provided by DOD or Congress, has been cited by the Army and others as a principal cause of program instability. For the most part, however, the Army has benefited from broad DOD and Congressional support for its modernization and readiness programs even when problems with the technical progress and quality of management of those programs have been apparent—the Armed Reconnaissance Helicopter is a recent example.

What is your assessment, if any, of the Army's modernization record?

Answer. The Army's modernization record demonstrates the complexity of the rapidly changing threat environment. If confirmed, I will work with the Secretary of the Army to equip and modernize the force.

Question. If confirmed, what actions, if any, would you propose to take to achieve a genuinely stable modernization strategy and program for the Army?

Answer. Stable, predictable Total Obligation Authority allows the Army to balance these needs, chart a course, and stick to it. If confirmed, I will work with the Secretary of the Army, the Office of the Secretary of Defense (OSD), and Congress to arrive at that stable funding level, and subsequently a stable modernization program. The second element necessary for action is ensuring that the Departments of the Army and the rest of DOD understand and synchronize the requirements that must be pursued.

Question. What is your understanding and assessment of the Army's modernization investment strategy?

Answer. I do not have sufficient information to assess the Army's modernization investment strategy. If confirmed, I would plan a thorough review of these investments.

Question. In your view does the Army's modernization investment strategy appropriately or adequately address current and future capabilities that meet requirements for unconventional or irregular conflict?

Answer. I do not have the necessary knowledge or data to accurately and reliably answer this question. If confirmed, I will do my utmost to address it.

Question. If confirmed, what other investment initiatives, if any, would you pursue in this regard?

Answer. A full review of the Army's investment initiatives will be an early goal of mine if I am confirmed. At this point, however, it is premature for me to offer recommendations on adjusting investment initiatives.

Question. If confirmed, what actions, if any, would you propose to ensure that all these initiatives are affordable within the current and projected Army budgets?

Answer. I believe one of the strengths of the Defense Program is to specifically address affordability and the outyear projection of long term funding requirements. Those processes have been strengthened by initiatives by Congress and within OSD. If confirmed I will have the required visibility and access to the management structure that will allow me to provide these recommendations.

Question. In your view, what trade-offs, if any, would most likely have to be taken should budgets fall below or costs grow above what is planned to fund the Army's modernization efforts?

Answer. If confirmed, I will make every effort to ensure that the Army builds a balanced program to respond to defense needs as directed by national and defense policy. In doing so, trade-offs will occur with areas of risk carefully considered, and if required, adjusted in coordination with OSD and Congress.

ARMY WEAPON SYSTEM PROGRAMS

Question. What is your understanding and assessment of the following research, development, and acquisition programs?

Future Combat System (as restructured).

Answer. As this response is being written, there continues to be a great deal of activity and change in the FCS program, especially with the Defense Authorization Bill currently being debated on the floor of the Senate. My understanding is that the Army has been directed to transition to an Army modernization plan consisting of a number of integrated acquisition programs: (1) Spin Out Early-Infantry Brigade Combat Team (BCT); (2) Follow-on BCT Modernization/Equipment for BCT Modernization; (3) Ground Tactical Network capability; and (4) a new Ground Combat Vehicle platform. I am not yet in a position to offer an informed assessment of these efforts, if confirmed, I will work to advise the Secretary of the Army on both the R&D and the Acquisition programs.

Question. Stryker combat vehicle, including the Stryker mobile gun variant.

Answer. While I am not yet in a position to offer an informed assessment of the Stryker program, I understand that Stryker variants have been in production since

2004 and that this system has been used successfully in Iraq and is preparing to deploy to Afghanistan.

Question. Joint Light Tactical Vehicle (JLTV).

Answer. While I am not yet in a position to provide an informed assessment of JLTV, I understand that it is a relatively new joint Service developmental program, which consists of a family of vehicles with companion trailers, capable of performing multiple mission roles. It is my understanding that the JLTV will be designed to provide protected, sustained, networked mobility for personnel and payloads across the full range of military operations (traditional to irregular).

Question. Armed Reconnaissance Helicopter (ARH).

Answer. It is my understanding that the Army has an enduring requirement for a light, manned, armed reconnaissance helicopter that was unaffected by the termination of the ARH program. While I am not yet in a position to provide an informed assessment of Armed Scout Helicopter, I understand that this latest effort is completing pretechnology development activities under the supervision of the Defense Acquisition Executive.

Question. M1 Abrams tank modernization.

Answer. The Abrams Tank has been an integral part of the Army's force structure for decades. I understand that as a result of the Operation Iraqi Freedom, the system has encountered performance decrements that impact the tank's operational performance and reliability, and that the Abrams tank modernization strategy has been initiated to address these issues. While I am not yet in a position to provide an informed assessment of this effort, I understand that it is intended to enable the Abrams tank to maintain its leading edge in survivability, lethality, and maintainability through 2050.

Question. M2 Bradley infantry fighting vehicle modernization.

Answer. The Bradley also has been an integral part of the Army's force structure for decades. I understand that as a result of the Operation Iraqi Freedom, the program has encountered performance decrements that impact the vehicle's operational performance and reliability and that modernization efforts have been initiated to address these concerns. While I am not yet in a position to provide an informed assessment of this effort, I understand that it is intended to enable the Bradley to maintain its leading edge in survivability, lethality, and maintainability through 2050.

Question. Warfighter Information Network-Tactical (WIN-T).

Answer. While I am not yet in a position to provide an informed assessment of WIN-T, it is my general understanding that this program is the Army's critical modernization effort for managing electronic information in the tactical environment. I understand that the WIN-T capabilities are built on proven Government and commercial technology using voice, video, and data.

Question. Logistics Modernization Program (LMP).

Answer. While I am not yet in a position to provide an informed assessment of LMP, I understand that this program is designed to support, replace, and modernize aging, obsolete, and increasingly costly automation systems used at the national logistics level. I understand that when fully implemented, this program is intended to greatly enhance the Army's logistics capabilities to manage inventories, process millions of transactions, and it will integrate many critical DOD software systems. This effort is designed to unify and modernize our national logistics capabilities.

Question. Joint Tactical Radio System (JTRS).

Answer. While I am not yet in a position to provide an informed assessment of JTRS, I understand that this program is part of the Army's and DOD's network modernization effort. I understand that the system will provide the fully mobile, flexible, dynamic radio networking capability needed to support a highly dispersed force over a noncontiguous area.

MINE RESISTANT AMBUSH PROTECTED (MRAP) VEHICLES

Question. If confirmed, what would you propose should be the Army's long-term strategy for the utilization and sustainment of its large MRAP vehicle fleet?

Answer. The MRAP was procured in response to a Joint Urgent Operational Need Statement from Multi-National Corps Iraq in June 2006. The initial intent was to replace all up-armored HMMWVs (UAH) in theater because those vehicles could not provide the required levels of protection and previous modifications had greatly reduced vehicle payload. The urgent nature of this program resulted in many steps associated with a traditional acquisition process being deferred in an effort to expedite delivery to the field. If confirmed, I will work with the Secretary of the Army to determine the long-term role for the Army's fleet of MRAPs.

MODULARITY

Question. Modularity refers to the Army's fundamental reconfiguration of the force from a division-based to a brigade-based structure. The new modular brigade combat team is supposed to have an increased capability to operate independently based upon increased and embedded combat support capabilities such as military intelligence, reconnaissance, and logistics. Although somewhat smaller in size, the new modular brigades are supposed to be just as, or more capable than the divisional brigades they replace because they will have a more capable mix of equipment—such as advanced communications and surveillance equipment. To date, the Army has established over 80 percent of its planned modular units, however, estimates on how long it will take to fully equip this force as required by its design has slipped from 2011 to 2019.

What is your understanding and assessment of the Army's modularity transformation strategy?

Answer. It is my understanding, the Army's modular transformation was designed to create a more expeditionary capable force that will address the full-spectrum of missions emerging from a post-Cold War strategy. The Army Campaign Plan and force management processes help synchronize and implement the transformation strategy across the active, Army National Guard and Army Reserve components. If confirmed, I will support the Secretary of the Army in undertaking this assessment.

Question. In your view, what are the greatest challenges in realizing the transformation of the Army to the modular design?

Answer. The Army faces two major challenges—restoring balance to a force experiencing the cumulative effects of 7 years of war and setting conditions for the future to fulfill the Army's strategic role as an integral part of the Joint Force.

Question. If confirmed, what actions or changes, if any, would you propose relative to the Army's modular transformation strategy?

Answer. If confirmed, I will work with the Secretary of the Army to ensure that the Army Campaign Plan and goals for modularity are consistent with Department's strategy for the current and future environment, in an era of persistent conflict. I would work with the Secretary of the Army to assess the work of the QDR and its projections in relations to current Army plans.

Question. What is your understanding and assessment of the employment and performance of modular combat brigades and supporting units in Operations Iraqi Freedom and Enduring Freedom?

Answer. At present, I do not have the necessary information to render such an assessment. If confirmed, I would work to better understand the performance of modular combat brigades and supporting units and support the Secretary of the Army in an assessment of that performance.

Question. What changes, if any, would you propose to the modular design, the mix of combat and supporting brigades, or modular unit employment to improve performance or reduce risk?

Answer. At this time I do not have sufficient information to suggest any changes to the modular design.

ACTIVE-DUTY END STRENGTH

Question. The Army has increased its Active-Duty end strength to meet current and future operational requirements. The Army had planned to increase its end strength to 547,400 by 2010, but has already achieved this goal in 2009.

In your view, what is the appropriate Army Active-Duty end strength needed to meet the demand for deployed forces, increase nondeployed readiness, build strategic depth, and relieve stress on soldiers and their families?

Answer. At this time, I do not have the information to predict accurately the appropriate Army end strength. However, I support the Secretary of Defense's recognition that the Army is under stress and requires additional Active component manpower.

Question. If Army end strength is projected to be above 547,400 in fiscal years 2009 or 2010, how would you propose, if confirmed, to fund the additional end strength above levels budgeted for fiscal year 2010?

Answer. If confirmed, I will work closely with the Secretary of the Army and the Assistant Secretary of the Army (Financial Management and Comptroller) to identify appropriate funding sources, and I will support the Secretary of the Army's efforts to seek assistance from the Secretary of Defense and Congress, as necessary, to ensure an appropriate level of funding.

Question. Do you believe that the Army's Active-Duty end strength should increase by 30,000 in the 2010 to 2012 timeframe and beyond?

Answer. I fully support the recognition by the Secretary of Defense that the Army is under stress and needs additional Active component manpower, up to a temporary increase of 22,000. If confirmed, I will support the Secretary of the Army's efforts to ensure that any projected increase is well-analyzed, fully coordinated, and fully justified.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel and related entitlement spending continues its steep upward growth and is becoming an ever increasing portion of the DOD budget.

If confirmed, what actions would you take to control the rise in the Army's personnel costs and entitlement spending?

Answer. I have been advised that the military departments have limited authority to reduce overall personnel costs and entitlement spending. If I am confirmed, I will work with the Secretary of the Army to ensure adequate oversight to provide early warning regarding the costs and effects of proposed new military pays or benefits.

Question. If confirmed, what actions would you take to avoid a requirement for massive end-of-year reprogramming to cover personnel costs?

Answer. As my experience has taught me about change in any large organization, military personnel changes take time to execute and implement throughout the force. If confirmed, I will work closely within the Army and with DOD to advance the Secretary of the Army's efforts to budget accurately and monitor budget execution, end strength, and the use of incentives to ensure the Army remains in balance.

LESSONS LEARNED

Question. What do you believe are the major lessons that the Department of the Army has and should have learned from Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) regarding its title 10, U.S.C., responsibilities for manning, training, and equipping the force?

Answer. Lessons learned from OEF/OIF have caused the Army to adjust its training and equipment to fight an adaptable, determined enemy. On the homefront, the pace of operations has placed great stress on Army families and Army has had to build programs to better support families. Army has also had to expand language skills and enhance cultural awareness to be successful in the operations and missions Army is engaged in today and likely will be engaged in the future. The Army must continue to modernize and sustain its combat training centers, home station training, and institutional training. The Army must continue to look for ways to enhance its capabilities in Detention operations. With growth in the Army's force structure and the challenges this places on training, the Army needs to continue to assess ways to train efficiently, using training resources from all Army components, as appropriate. Because of the large load that the Army National Guard and the U.S. Army Reserve is pulling, the Army needs to assess continually its mobilization policies, balancing training requirements to meet the appropriate level of Reserve component operational readiness with domestic missions and requirements.

Question. If confirmed, which of these lessons, if any, would you address as a matter of urgent priority?

Answer. I believe the Army leadership must take each of these on as priorities. If confirmed, I anticipate discussing these matters with the Secretary of the Army and the uniformed leadership to determine what areas I could best manage in view of my background, position, and skills. I would consider most urgent those that directly impact the safety, welfare and quality of life for soldiers and their families.

COMMISSION ON ARMY ACQUISITION AND PROGRAM MANAGEMENT IN EXPEDITIONARY

Question. The Commission on Army Acquisition and Program Management in Expeditionary Operations concluded that "the Army sent a skeleton contracting force into theater without the tools or resources necessary to adequately support our warfighters." According to the Commission, "Contracting, from requirements definition to contract management, is not an Army Core Competence. The Army has excellent, dedicated people; but they are understaffed, overworked, under-trained, under-supported, and most important, undervalued."

Do you agree with the conclusions reached by the Commission?

Answer. Yes.

Question. The Commission report states that "The Army's difficulty in adjusting to the singular problems of Kuwait, Iraq, and Afghanistan is in large part due to the fact that there are no generals assigned to contracting responsibilities." The Commission recommends that Congress authorize "a core set of 10 additional General Officers for contracting positions".

Do you support the recommendation of the Commission?

Answer. I have read the recommendations but do not have enough information beyond the report to provide a definitive answer to this question. If confirmed, I would assess the findings in light of current conditions and review actions taken and anticipated to address the Commission's recommendations.

Question. What is your understanding of the steps the Army has taken to address this recommendation?

Answer. I know that Congress has authorized 10 additional General Officer billets, 5 for the Army and 5 for Joint Commands, and I applaud that. I have been informed that the Army selected one additional acquisition General Officer last year with more to come.

Question. If confirmed, what additional steps, if any, would you take to address this recommendation?

Answer. If confirmed, I would begin to look at this matter by first seeking to put more focus on the recruitment, training and development of the military contracting corps to ensure the Army has a strong pipeline of capable colonels to fill these general officer positions in the near and long term.

Question. The Commission report states that "The number and expertise of the military contracting professionals must be significantly increased" to address the problems we have experienced in theater. The Commission recommends that the Army hire 2,000 new contracting personnel.

Do you support the recommendation of the Commission?

Answer. Yes.

Question. What is your understanding of the steps the Army has taken to address this recommendation?

Answer. I do not have sufficient information to provide an informed answer to this question.

Question. If confirmed, what additional steps, if any, would you take to address this recommendation?

Answer. Under the direction of the Secretary of the Army, if confirmed, I would examine the entire contracting process in the Army, from requirements definition to the final receipt and payment for goods and services received. As best practices emerge from these efforts, they will be shared across the entire contracting workforce.

Question. The Commission report states that most civilians working on contracting issues in Iraq were "volunteers, often with inadequate or wrong skill sets for the job at hand, and often getting their required contracting experience on-the-job as part of their deployment." The Commission recommends that qualified civilians who agree to deploy be provided enhanced career and job incentives. These include the elimination of an existing pay cap, tax-free status, and long-term medical care for injuries incurred in-theater.

Do you support the recommendations of the Commission?

Answer. I support the Commission's recommendations.

Question. What is your understanding of the steps that the Army has taken to implement these recommendations?

Answer. It is my understanding that Congress has authorized several incentives to foster civilian participation in future expeditionary operations, specifically pay adjustments, and life insurance. I also understand that the Army is working with the other Services and the Defense Acquisition University to enhance training and increase the number of training courses.

Question. If confirmed, what additional steps, if any, would you take to address these recommendations?

Answer. If confirmed, I would need to assess progress on all recommendations. Without that assessment I am currently unable to specify what steps need to be taken to further implement the recommendations.

Question. The Commission report states that some DOD and Army policies actively discourage the deployment of civilians. For example, the report states that volunteers are required to be sent on 'detail,' so that the providing office has to pay salary and expenses of deploying civilians out of their existing budgets without any reimbursement or backfilling. As a result, the Commission reports, managers in the United States have actively discouraged civilians from volunteering.

Do you agree with the Commission's findings on this issue?

Answer. It is my understanding that volunteers represent "out of hide" costs that place burdens on CONUS contracting offices—particularly in areas where there are hard to fill contracting jobs or in locations impacted by BRAC. Also, given that the contracting workforce has been cut by approximately 50 percent since the early 1990s while workload has more than doubled increasing the likelihood that volun-

teering may have been discouraged at some activities. At the same time, I am gratified that so many civilians have volunteered to deploy in support of our troops.

Question. What is your understanding of the steps that the Army has taken to address this problem?

Answer. I understand the Army is in the process of standing up a new command—the Expeditionary Contracting Command under the Army Contracting Command to better support this mission.

Question. If confirmed, what additional steps, if any, would you take to address this problem?

Answer. If confirmed, I would support staffing plans that would add the required deployable workforce with the right skill mix to support proper execution and oversight of contracts in theater.

Question. The report states that Contracting Officer's Representatives (CORs) are an "essential part of contract management", because they are responsible for ensuring contract performance. According to the report, however, "CORs are assigned as . . . an 'extra duty,' requiring no experience. . . . The COR assignment is often used to send a young soldier to the other side of the base when a commander does not want to have to deal with the person. Additionally, little, if any training is provided. . . . Despite this, there are still too few CORs. Moreover, COR turnover is high, frequently leaving many gaps in contract coverage."

Do you agree with the Commission's assessment of the CORs assigned in Iraq and Afghanistan?

Answer. Although I have not yet been fully briefed on this issue, I have no reason to disagree with the Commission's assessment. I can understand that there would be challenges in obtaining the number of CORs needed and ensuring those CORs have the proper training in COR processes and technical background necessary to monitor contractor performance effectively.

Question. What is your understanding of the steps that the Army has taken to address this problem?

Answer. At this time I am not aware of the specific steps taken by the Department to address this problem.

Question. If confirmed, what additional steps, if any, would you take to address this problem?

Answer. If confirmed, I would continue to support actions to ensure a sufficient number of trained CORs with the right technical skill sets are assigned in theater to provide appropriate contractor oversight.

CONTRACT SUPPORT FUNCTIONS

Question. DOD has engaged in the privatization of many of its support functions. As a result, the Department now relies heavily on contractors to perform acquisition, budget, and financial management functions that are critical to the execution of the Department's mission. Senior DOD officials have informed the committee both formally and informally that, because of reductions in the acquisition workforce, the Department now lacks the capability to effectively oversee the work performed by its support contractors.

Do you believe that the Army has become too reliant upon contractors to perform critical functions?

Answer. I agree with President Obama's government contracting memorandum of March 4, 2009, directing the Federal Government to ensure that functions that are inherently governmental in nature are performed by executive agencies and are not outsourced. If confirmed, I would work with leaders across the Army to assess this matter so as to ensure compliance with the law and with the President's policy.

Question. What steps, if any, do you believe the Army should take to ensure that it has the resources it needs to provide effective oversight for its support contractors?

Answer. Working within existing manpower constraints, the Army needs to ensure that its limited contract oversight resources are organized and employed in the most efficient manner. In addition, it needs to continue to place appropriate management emphasis on COR training.

Question. The privatization of functions previously performed by DOD employees now extends to many functions performed on the battlefield. As a result, many functions that were performed by DOD personnel as recently as the Gulf War have been performed by contractor personnel in the current conflicts in Iraq and Afghanistan.

Do you believe that DOD has reached, or exceeded, an appropriate balance in providing for the performance of functions by contractors on the battlefield?

Answer. At this time I do not have the information necessary to answer this question fully. If confirmed, I will assess this issue and obtain the necessary information to address policy and future management options.

Question. Where do you believe that DOD should draw the line between functions on the battlefield that can and should be performed by contractors and functions that should only be performed by DOD personnel?

Answer. This is a complex matter. It is simple to state that inherently governmental functions should not be contracted out, however, the complexities of today's irregular conflicts and the increased sophistication of outside contractors have made these lines less clear. If confirmed, I would undertake efforts to better understand policy and requirements and work with OSD, the other Services, and the Army Staff to provide a more definitive answer to this important question.

Question. Do you believe that contractors on the battlefield are subject to appropriate levels of control and accountability for their actions, or would additional regulation be appropriate?

Answer. I have not been fully briefed on these matters and hesitate to render an opinion without further information. If confirmed, I will assess if existing controls are appropriate.

PRIVATE SECURITY CONTRACTORS

Question. The Special Inspector General for Iraq Reconstruction (SIGIR) recently reported that Federal agencies including DOD have spent more than \$5 billion for private security contractors in Iraq since 2003. Over this period, there have been numerous reports of abuses by private security contractors, including allegations of contractors shooting recklessly at civilians as they have driven down the streets of Baghdad and other Iraqi cities. In September 2007, employees of Blackwater allegedly opened fire on Iraqis at Nisour Square in downtown Baghdad, killing more than a dozen Iraqis and wounding many more.

Do you believe the Army should rely upon contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. It is my understanding that U.S. forces currently rely on contractors to 'free-up' manpower for accomplishing missions focused on campaign objectives. If confirmed, I would seek additional information on this matter and request the advice of the Army General Counsel and the JAG in order to both render an opinion and implement policy.

Question. In your view, has the U.S. reliance upon private security contractors to perform such functions risked undermining our defense and foreign policy objectives in Iraq?

Answer. If confirmed, subject to the authority, direction, and control of the Secretary of the Army, I would work with other appropriate elements at OSD and Army to seek agreement with the Department of State and DOD in establishing and defining a framework for improved accountability and operational oversight of PSCs in theater.

Question. What steps would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. If confirmed, I would comply with current mandates to minimize reliance on private security contractors to the maximum extent practicable. Any effort to assess the performance of private security contractors would require consultation with Army OGC, IG, and OSD policy.

Question. How do you believe the ongoing operations of private security contractors in Iraq are likely to be affected by the new Status of Forces Agreement between the United States and Iraq?

Answer. At this time, I do not have the appropriate information to make this determination.

Question. Do you support the extension of the Military Extraterritorial Jurisdiction Act to private security contractors of all Federal agencies?

Answer. I am generally not aware of the provisions of the Military Extraterritorial Jurisdiction Act of 2000 (MEJA). If confirmed, I would coordinate closely with the Office of General Counsel in the application of the act to private security contractors.

Question. What is your view of the appropriate application of the Uniform Code of Military Justice (UCMJ) to employees of private security contractors operating in an area of combat operations?

Answer. I strongly support the position that civilians serving with or accompanying our Armed Forces overseas who commit crimes should be held accountable

as appropriate. The UCMJ provides commanders the tools necessary to maintain good order and discipline and the morale, welfare and safety of all those under their jurisdiction during military operations. Because misconduct by contractors may undermine good order and discipline, discredit the Army, or remain unaddressed absent the exercise of jurisdiction, Congress extended UCMJ jurisdiction over such individuals. The Secretary of Defense, in turn, published guidance on the prudent exercise of such jurisdiction in a memorandum of March 10, 2008. This guidance ensures that the Department of Justice and DOD each play an appropriate role in resolving whether, and under which system, jurisdiction might be better exercised in each potential case.

Question. OMB Circular A-76 defines “inherently governmental functions” to include “discretionary functions” that could “significantly affect the life, liberty, or property of private persons”

In your view, is the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations an inherently governmental function?

Answer. I have not been fully briefed on current policies regarding OMB Circular A-76. If confirmed, I intend to study this issue in greater depth to better understand the Army’s assessment regarding this matter.

Question. In your view, is the interrogation of enemy prisoners of war and other detainees during and in the aftermath of hostilities an inherently governmental function?

Answer. I have not been sufficiently briefed on this matter to render an opinion for the committee. If confirmed, I will give this matter great focus and consider it in the context of those responsibilities assigned to me by the Secretary of the Army.

Question. Do you believe that the Army fully considered these issues before deciding which functions should be assigned to private contractors in Iraq?

Answer. At this time I do not have the necessary information to answer this question.

Question. Do you see a need for a comprehensive reevaluation of these issues now?

Answer. I support the principles and policies set forth in President Obama’s memorandum of March 4, 2009. That memorandum directs the Office of Management and Budget, in coordination with the Secretary of Defense, among others, to develop and issue governmentwide guidance to assist executive branch agencies in reviewing the propriety of existing contracts and to formulate corrective action when appropriate. I believe that any such review must include an appraisal of inherently governmental functions and other critical government functions and how they are performed. If confirmed, I will support any such review and corrective action, particularly as it relates to matters under my purview.

IRAQ AND AFGHANISTAN DEPLOYMENTS

Question. Many soldiers are on their third and some their fourth major deployment to Iraq or Afghanistan. In 2007, in order to support the surge of forces to Iraq, unit deployments were extended to 15 months and dwell time in some cases less than 12 months. Beginning in August 2008 DOD policy has been to limit deployments for Active component soldiers and mobilization of Reserve component soldiers to not longer than 12 months.

What is your assessment of the impact of multiple deployments of troops to Afghanistan and Iraq on retention, particularly among young enlisted and officer personnel after their initial obligated service has been completed?

Answer. It is my understanding that the Army monitors retention very closely given the high operational demand and multiple deployments that soldiers are experiencing. I also understand that statistics reveal that multiple deployments to Afghanistan and Iraq are not adversely impacting enlisted retention. As to officers, I understand that the multiple deployments required in order to ensure our Nation’s success in our overseas contingency operations have not resulted in increased attrition of mid-grade officers over the past several years. Beyond this general overview, I do not have sufficient information to give a more detailed response or provide data.

Question. What are the indicators of stress on the force, and what do these indicators tell you about that level of stress currently? In addition to any other stress indicators that you address, please discuss suicide and divorce rates, drug and alcohol abuse, AWOLs, and rates of indiscipline.

Answer. In this period of high operational and personnel tempo, Army leaders—officers and noncommissioned officers—must maintain a constant awareness of both the physical and mental condition of their soldiers and families and address con-

cerns constructively as soon as they come to light. It is my understanding that reenlistment rates are high, one indication that soldier morale remains strong. I understand that other indicators of stress on the force, such as substance abuse and divorce, have increased. Of great concern to all is the significant increase in the number of soldier suicides. If confirmed, I will fully support the Secretary of the Army's commitment to provide soldiers and families with a quality of life commensurate with their service and continue Army efforts to develop multi-disciplinary solutions directed at mitigating risk behaviors and addressing the painful issue of soldier suicides. If confirmed, I would work diligently to address these critically important issues and to enhance soldier and family fitness and resilience.

Question. For how long do you believe these levels of commitments can continue before there will be significant adverse consequences for the Army?

Answer. The President, the Secretary of Defense, this committee, and Congress have expressed great concern over multiple deployments and the need for soldiers to have more time at home between deployments. An Army out of balance puts great stress on the force and it is my understanding that the Secretary of Defense has made this issue a high priority. At this time, I do not have the information or particular insights to determine how long the Army can sustain the current level of commitment without incurring significant adverse consequences. If confirmed, I would work to support the Secretary of the Army in addressing these adverse consequences in a timely manner.

Question. The Chief of Staff of the Army, General Casey, has stated that the Army is "out of balance." What is your understanding of this statement and what do you think can or should be done to correct that imbalance?

Answer. As I understand it, General Casey has publicly defined "balance" as the ability to achieve a 1:2 deployment-to-dwell (time at home station) ratio for Active component soldiers and a 1:4 mobilization-to-demobilization ratio for Reserve component soldiers. Increased force structure and decreased demand are the two ways to improve balance. The Army has grown and achieved its new end strength of 547,000 almost 2 years in advance of its goal. This accomplishment, together with a future reduction in demand for forces, is a major step forward to achieving balance.

NATIONAL GUARD ORGANIZATION, EQUIPMENT, AND READINESS

Question. Legislative proposals introduced in 2006 and 2007, recommendations by the Commission on the National Guard and Reserves submitted on March, 1, 2007, and the Department's response to these calls for change are all currently under consideration.

What is your understanding of the role and authority of the Director of the Army National Guard?

Answer. The Director, Army National Guard, assists the Chief of the National Guard Bureau in carrying out the functions of the National Guard Bureau as they relate to the Department of the Army. Specifically, the Director of the Army National Guard guides the formulation, development, and implementation of programs and policies affecting the Army National Guard, a force of more than 358,000 soldiers dispersed across the 54 States, Territories, and the District of Columbia. If confirmed, I will establish a close, professional relationship with the Director of the Army National Guard and will communicate with him as he performs his prescribed duties.

Question. Should the Director be "dual hatted" as a Deputy Chief of Staff of the Army in your view?

Answer. I have been informed that the Director of the Army National Guard is integrated in and works closely with both the Army Secretariat and the Army Staff on all matters involving the Army National Guard. If confirmed, and subject to the authority, direction, and control of the Secretary of the Army, I will consider any additional proposals under consideration to modify the title, functions, or authorities of the Director of the Army Guard.

Question. What is your understanding and assessment of changes in the global and domestic roles and mission of the Army National Guard and the National Guard Bureau?

Answer. The Army National Guard is a critical element of our Nation's total force. The Army National Guard has historically served as a "first responder" in State contingencies and national emergencies, while simultaneously meeting its operational commitments in support of overseas contingency operations. Since 2001, the National Guard Bureau has played an increased role in coordinating emergency relief and response efforts across the local, state, and national levels. It is a testament to the inherent flexibility of the current organization of the Army National Guard and the National Guard Bureau that not one mission has been unexecuted in this

environment of high-demand, dual-purpose requirements, and the Army has every reason to expect that extraordinary performance to continue.

Question. What is your understanding and assessment of the Army's commitment to fully fund 100 percent of National Guard equipment requirements? In your view, do Army processes for planning, programming, and budgeting sufficiently address the requirements of the National Guard?

Answer. The National Guard is a vital element of the capability the Army provides to combatant commanders and plays a critical role in the defense of the homeland and in providing defense support to civil authorities. Consequently, the National Guard must be properly and adequately trained, organized, and equipped. If confirmed, I will consult with the leadership of the Army National Guard to understand their requirements and to ensure that Army planning, programming, and budgeting processes are fair and equitable and sufficiently address the Guard's equipping and other requirements.

Question. If confirmed, how would you ensure that the resourcing needs of the Army National Guard are fully considered and resourced through the Army budget? In your view, what is the appropriate role for the Chief of the National Guard Bureau in this regard?

Answer. If confirmed, I will ensure that the Active and Reserve component will continue to work in concert to provide the land component capabilities our Nation needs. I do not have, at this time, sufficient information on both resourcing needs and the Army budget to make any recommendations. I would work with the Chief of the Army National Guard Bureau to better understand the resourcing needs of the Guard.

EQUIPMENT REPAIR/RESET

Question. Congress has provided the Army with approximately \$17 billion per year to cover the costs to repair and replace equipment worn out by combat operations and prepare forces for rotations in support of OIF/OEF.

In your view, is this level of funding sufficient to not only prepare Army forces for OIF/OEF but to also improve the readiness of nondeployed forces for other potential contingencies?

Answer. I do not have sufficient information at this time to offer an assessment of this important matter. If confirmed I plan to devote significant attention to the matter.

Question. Is it your understanding that our repair depots are operating at full capacity to meet rebuild and repair requirements for reset?

Answer. It is my understanding that all the Army's maintenance depots are currently operating at a level necessary to meet required workload, but they have the capacity to take on additional workload. It is my understanding that the depots can increase production if the rate of equipment return accelerates and that the Army constantly evaluates depot production and adjusts it to meet current and anticipated demand.

Question. What additional steps, if any, do you believe should be taken to increase the Army's capacity to fix its equipment and make it available for operations and training?

Answer. I do not have sufficient information at this time to offer an assessment of how the Army might increase its capacity to fix equipment in reset. If confirmed, I would assess the Army's estimates on equipment and reset efforts.

Question. What impact do you believe the decision to send additional Army forces to Afghanistan is likely to have on equipment available for continued operations in Iraq and for nondeployed unit training at home?

Answer. I have been advised that in the near term, the deployments of additional Army forces to Afghanistan will place additional demands on scarce Army equipping assets.

ARMY SCIENCE AND TECHNOLOGY

Question. What do you see as the role that Army science and technology programs will play in continuing to develop capabilities for current and future Army systems?

Answer. I have not been fully briefed on specifically how Army science and technology programs will help develop future capabilities for future Army systems. This is an important area for better understanding our acquisitions process and improving our planning and budgeting for future requirements. If confirmed, I would assess the role of the programs in this context.

Question. What in your view have been the greatest contributions of Army science and technology programs to current operations?

Answer. I must reference my previous response and assure the Committee that I will evaluate the impact to current operations as well.

Question. What metrics would you use, if confirmed, to judge the value and the investment level in Army science and technology programs?

Answer. If confirmed, some of the metrics that I would use to judge the value and investment level in Army S&T programs would include the transitions of technology to the warfighter; adoption of technology into acquisition programs; and alignment of technology development to warfighter needs.

ARMY LABORATORIES AND RESEARCH, DEVELOPMENT, AND ENGINEERING CENTERS
(RDEC)

Question. What role should Army laboratories play in supporting current operations and in developing new capabilities to support Army missions?

Answer. Army laboratories should be working to generate state-of-the-art science and technology applications to meet the operational needs of the force. There is a constant demand for new and innovative capabilities for soldiers, and the Army laboratories should play a key role in helping to meet the current needs and innovate for the future.

Question. If confirmed, how will you ensure that the Army laboratories and R&D centers have the highest quality workforce, laboratory infrastructure, resources, and management, so that they can continue to support deployed warfighters and develop next generation capabilities?

Answer. In assessing the role of the Army laboratories, I would attempt to understand all the facets presented in this question with respect to future requirements and capabilities needed.

Question. Do you support the full utilization of authorities established by Congress under the Laboratory Personnel Demonstration program that is currently being run in many Army RDECs?

Answer. Yes.

Question. Do you believe that all RDECs in the Army's Research, Development, and Engineering Command (RDECOM) need enhanced personnel authorities in order to attract and retain the finest technical workforce? Would you support expansion of the Laboratory Personnel Demonstration authorities to all of RDECOM's laboratories and engineering centers?

Answer. Yes.

Question. Do you believe that the Army's laboratories and engineering centers should have a separate, dynamic personnel system, uniquely tailored to support laboratory directors' requirements to attract and retain the highest quality scientific and engineering talent?

Answer. I do not have sufficient information at this time to offer an assessment of this important matter. If confirmed, I would study this and its potential benefits to the Army.

Question. How will you assess the quality of Army laboratory infrastructure and the adequacy of investments being made in new military construction and sustainment of that infrastructure?

Answer. If confirmed, I plan to look into this more deeply, so we have a better way of assessing laboratory needs in support of the Army's mission.

ARMY TEST AND EVALUATION (T&E) EFFORTS

Question. The Army's test and evaluation budget has not been certified as adequate by the Director of the Test Resource Management Center (TRMC) for fiscal year 2010. This is after a conditional certification received in fiscal year 2009. TRMC identified a shortfall of over \$25 million for investments in T&E range sustainment, operations, and modernization.

If confirmed, how will you address this shortfall?

Answer. While I am not yet familiar with the specific concerns raised by the TRMC, I believe it is essential that the Department's test and evaluation infrastructure be adequately resourced.

Question. How will you ensure that the Army's test and evaluation infrastructure is robust enough to ensure that new systems and technologies are tested to verify their combat effectiveness and suitability?

Answer. If confirmed, I will become more familiar with the details of this requirement, and I will ensure that future Army program and budget submissions provide an appropriate level of funding for testing and evaluation, consistent with competing demands on departmental resources.

Question. What metrics will you use to assess the quality of the Army's T&E infrastructure?

Answer. I do not have sufficient information at this time to fully answer this question, but if confirmed, I would begin by looking at the Army's ability to conduct all critical testing requirements, which includes testing of both rapid acquisition programs as well as those programs on the Office of the Secretary of Defense Oversight List for Test and Evaluation.

Question. If confirmed, how would you ensure that weapon systems and other technologies that are fielded by the Army are adequately operationally tested?

Answer. I am committed to the principle of independent operational testing by organizations not directly affiliated with the programs that undergo testing. If confirmed, I will insist that established operational testing processes are followed in all cases and that Army equipment be fielded only after it is proven to meet established requirements and is safe and effective.

ARMY INFORMATION TECHNOLOGY PROGRAMS

Question. What major improvements would you like to see made in the Army's development and deployment of major information technology systems?

Answer. If confirmed, I would work to quickly leverage emerging technologies to meet security and operational capabilities. If confirmed, I would ensure that the Army IT systems provide warfighters and business managers with leading edge capabilities that efficiently enhance the effectiveness and efficiency of the force.

Question. How will you encourage process and cultural change in organizations so that they maximize the benefits that new enterprise information technology systems can offer in terms of cost savings and efficiency?

Answer. I recognize the importance of encouraging process and cultural change as a component of organizational and business transformation. I confirmed, I will assess how best that can be achieved within the Army so as to maximize the benefits of new enterprise information technology.

Question. What is the relationship between Army efforts at implementing enterprise information technology programs and supporting computing services and infrastructure to support Army missions and efforts being undertaken by the Defense Information Systems Agency and the Assistant Secretary of Defense for Networks and Information Integration?

Answer. I understand that the Army must coordinate and integrate the implementation of its information technology programs with ongoing efforts in DOD. This coordination and integration is critical to the success of both programs. If confirmed, I look forward to establishing relationships and working with my counterparts in DOD to achieve this goal.

Question. What is your understanding of the Army's plan to adopt and deploy the Defense Integrated Military Human Resources System (DIMHRS)? What are the major issues you feel need to be addressed in that process?

Answer. I have not been informed of the specific status of Army's implementation of the DIMHRS, however, it is my understanding that once fully implemented, this program will substantially improve the accuracy and efficiency of Army's ability to manage its personnel across DOD. If confirmed, I will carefully review the implementation plan and associated milestones. If my review identifies any weakness, I will make appropriate recommendations, after cross-Service coordination, to the responsible officials.

HOUSING PRIVATIZATION

Question. DOD has been engaged in the privatization of many of its support functions. Among the most significant privatization efforts is military family housing units and utility systems.

In your view, what challenges does the Army face in implementing housing privatization and, if confirmed, how would you propose addressing those challenges?

Answer. It is my understanding that there are three key challenges facing the Army in the continued implementation of housing privatization. First, the Army faces risk related to the capital market both for projects that have obtained financing and also for upcoming projects. To address this risk, the Army must continue to monitor the capital markets and evaluate opportunities associated with fluctuating interest rates, credit terms, and risk parameters. Second, the Army faces risk of underperformance by a private sector partner. To mitigate this risk, the Army should continue to monitor the financial health of each partner and the operational metrics we have established in the Army's portfolio and asset management program. The third risk facing Army housing privatization is the risk faced by any real estate investor: namely, that the expected occupancy, financial performance, or development targets will not be met. To mitigate and address this risk, the Army must continue to implement the best practices from private sector investment man-

agement to oversee existing housing privatization projects. Monitoring the key performance metrics associated with typical real estate transactions is critical to identifying and addressing potential issues.

Question. What adjustments, if any, would you anticipate as a result of the current lending environment?

Answer. It is my understanding the terms and conditions of lending are growing more restrictive. Projects are being required to set aside more cash in reserve for debt payments, and the rating agencies are downgrading the credit ratings on the existing debt, which has impacted the appeal of projects to investors. Many of the investors that have historically purchased military housing privatization debt are saddled by financial challenges that have hindered their ability to invest. If confirmed, I would work with the Secretary of the Army to ensure that the Department monitor the potential impacts of the financial markets on new and existing transactions.

Question. What actions would you propose, if any, to accommodate installations where there are housing shortfalls beyond the ability of the current privatization agreement?

Answer. I understand that DOD and the Army's longstanding positions are to rely first on housing in the local community. Where there are shortfalls in the local community, the Army has sought to educate community and business leaders in those communities on the Army's housing requirements and to encourage development to meet those requirements. I have been informed that the Army has already held several industry forums in local communities for Fort Drum, Fort Riley, and Fort Bliss. The Army has also used its domestic Army Family Housing lease authority as a bridging tactic until the local community is able to meet the Army's family housing requirements. If confirmed, I would assess the current policy and make recommendations to the Secretary for any actions needed in light of current conditions.

Question. What are your views regarding barracks privatization?

Answer. I do not have sufficient information to provide a clear assessment of barracks privatization. If confirmed, barracks privatization is an issue I plan to explore in depth with a view to furthering the policies of the Secretary of the Army.

INVESTMENT IN INFRASTRUCTURE

Question. Witnesses appearing before the committee in recent years have testified that the military services underinvest in their facilities compared to private industry standards. Decades of underinvestment in our installations have led to increasing backlogs of facility maintenance needs, created substandard living and working conditions, and made it harder to take advantage of new technologies that could increase productivity.

What is your assessment of Army infrastructure investment?

Answer. If confirmed, I will work with the Secretary of the Army to assess the sufficiency of the Army's current infrastructure investment strategy and implementation plan.

Question. If confirmed, what actions, if any, would you propose to increase resources to reduce the backlog and improve Army facilities?

Answer. If confirmed, I will aggressively work to ensure the infrastructure backlog is addressed. I will also work with the Secretary of the Army and DOD to seek congressional support for the President's budget request for Army installations and facilities.

IMPLEMENTATION OF BASE CLOSURES AND REALIGNMENTS

Question. The 2005 Defense Base Realignment and Closure (BRAC) process has resulted in the required closure or realignment of numerous major Army installations. The DOD installation closure process resulting from BRAC decisions has historically included close cooperation with the affected local community in order to allow these communities an active role in the reuse of property.

If confirmed, would you change any of the existing efforts to assist affected communities with economic development, revitalization, and re-use planning of property received as a result of the BRAC process?

Answer. If confirmed, and subject to the authority, direction, and control of the Secretary of the Army, I will assess our current efforts and consider if changes are warranted.

Question. What, in your view, are the advantages or disadvantages, if any, on the use of no cost Economic Development Conveyances as a means of early property transfers under BRAC as opposed to holding out for full fair market value?

Answer. I do not have sufficient knowledge of this matter to render a view. If confirmed, I would assess the advantages and disadvantages in light of current economic conditions and property transfer issues.

NATIONAL SECURITY PERSONNEL SYSTEM

Question. Section 1106 of the National Defense Authorization Act for Fiscal Year 2008 restored the collective bargaining rights of civilian employees included in the National Security Personnel System (NSPS) established by DOD pursuant to section 9902 of title 5, U.S.C. Under section 1106, the Department retains the authority to establish a new performance management system (including pay for performance) and streamlined practices for hiring and promotion of civilian employees.

What is your view of the NSPS, as currently constituted?

Answer. I understand that the core purpose of the NSPS was to support a streamlined and flexible civilian compensation, staffing, classification, and performance management system. Such a system is viewed as essential to the effective management of the sort of mission-oriented and results-driven civilian workforce that is vital to the success of DOD. I recognize the existing concerns with certain aspects of NSPS and understand that the NSPS Task Group's core draft recommendation to the Defense Business Board was to initiate a reconstruction of the system. If confirmed, I look forward to working with the Secretary of the Army and DOD to review the detailed findings and recommendations of the Defense Business Board and, if appropriate, reconstruct NSPS to ensure an optimum system.

Question. If confirmed, how will you evaluate its success or failure to meet its goals?

Answer. If confirmed, I would first review the findings and recommendations of the Defense Business Board and familiarize myself with reports from the General Accounting Office and the Office of Personnel Management and other assessments that may be available. I would work with DOD and Army leaders on internal program evaluations, seeking insights both into what works well in the extant system and into areas recommended for improvement.

Question. Do you support the pay-for-performance approach adopted for civilian employees in the NSPS?

Answer. As a general principle, I support pay-for-performance and believe that employees' compensation should be based on their contribution to the Army's mission. If confirmed, I look forward to reviewing the Defense Review Board's comprehensive evaluation of NSPS and pay for performance and working with the Secretary of the Army and DOD to address the concerns identified.

Question. Do you believe that the Department needs streamlined authority for hiring and promotion of civilian employees to meet its human capital needs?

Answer. I am advised that the Department is challenged to meet increased civilian labor requirements in critical occupations and to develop human capital strategies responsive to these challenges. It is my understanding that there are situations in which specialized hiring authorities are required to provide sufficient qualified applicants to meet mission needs. However, before making recommendations for additional authorities, I would want to ensure that managers fully understand the flexibility of the authorities currently available. If confirmed, I will work with the Assistant Secretary for Manpower and Reserve Affairs to prompt managers to creatively and actively use available authorities and to explore the need for, and uses of, direct and expedited hiring authorities to assist in achieving the Department's human capital objectives.

Question. In your view, is it viable in the long run for DOD to maintain two separate systems (NSPS and the General Schedule) for its civilian employees?

Answer. It is my understanding that DOD operates a number of other personnel systems, such as Defense Civilian Intelligence Personnel System, a system for non-appropriated fund personnel, and laboratory demonstration projects. If confirmed, I will work with DOD, the Office of Personnel Management, the Secretary of the Army, and the Assistant Secretary for Manpower and Reserve Affairs to assess the appropriate number and types of personnel systems required for effective and efficient personnel management in the Department of the Army.

Question. What changes, if any, would you recommend to the NSPS authorizing legislation?

Answer. It is my understanding that the NSPS Task Group recently briefed its draft recommendations to the Defense Business Board and that the Task Group recommended reconstructing NSPS. Depending on the content of the final report, legislation may be appropriate to ensure NSPS is on track to achieve its full potential.

Question. What changes, if any, would you recommend to the NSPS regulations?

Answer. It is my understanding that the NSPS Task Group recently briefed its draft recommendations to the Defense Business Board and that the Task Group recommended reconstructing NSPS. Depending on the content of the final report, regulatory or policy changes may be appropriate to ensure NSPS is on track to achieve its full potential.

MANAGEMENT AND DEVELOPMENT OF THE SENIOR EXECUTIVE SERVICE (SES)

Question. The transformation of the Armed Forces has brought with it an increasing realization of the importance of efficient and forward thinking management of senior executives.

What is your vision for the management and development of the Army senior executive workforce, especially in the critically important areas of acquisition, financial management, and the scientific and technical fields?

Answer. The Army must carefully manage and develop its Senior Executive Service corps to meet the evolving workforce challenges facing the Department. As I understand it, members of the Senior Executive Service are increasingly being looked to as interchangeable with military flag officers in the critically important areas of acquisition, financial management, and the scientific and technical fields. To support this effort, I understand the Army's Senior Executive program focuses on the recruitment, assignment, and development of adaptive, multi-skilled senior civilian leaders, and that the current Senior Executive program includes periodic education and development opportunities and performance based evaluations.

Question. Over the last 10 years, the Army budget has almost doubled, but the number of senior executives in the Department of the Army has remained almost unchanged.

Do you believe that the Army has the number of senior executives it needs, with the proper skills to manage the Department into the future?

Answer. If confirmed, I will carefully assess the Army's Senior Executive requirements and work with the Secretary of the Army and the Assistant Secretary of the Army for Manpower and Reserve Affairs to ensure that the Army has the right number of Senior Executives with the diverse set of skills and experiences required to lead the Department into the future.

Question. Do you believe that it is appropriate for female soldiers to serve in positions in which they may be exposed to combat?

Answer. Female soldiers make significant contributions to the Army's success and are an integral part of the All-Volunteer Force. All soldiers—male and female—are trained to fight in combat. As I understand the current law and policy, once properly assigned, female soldiers are subject to the same utilization policies as their male counterparts and, as required by their units' mission, may find themselves in combat. Female soldiers remain with their assigned units, perform their assigned duties, and fight as a team with male soldiers, as they have been trained to do.

Question. What is your view of the current policy regarding women in combat with respect to female soldiers serving in Operation Iraqi Freedom and Operation Enduring Freedom?

Answer. The Department no longer confronts the prospects of a Cold War linear battlefield. The irregular warfare and nonlinear battlefield of today's conflicts raise questions about the practical application of the policy regarding the assignment of women in combat regions. Women make up about 14 percent of the active Army, 23 percent of the Army Reserve, and 13 percent of the Army National Guard. Approximately 10 percent of the forces deployed in support of overseas contingency operations are female soldiers. Women soldiers have been killed in action, have suffered wounds from hostile action, and have been held captive by our enemies. If confirmed, I would support the Secretary of the Army in having the most up to date information, assessing any changes sought to ensure compliance with all notification requirements in title 10.

Question. What is your assessment of the Army's compliance with the requirements of the current ground combat exclusion policy?

Answer. It is my opinion that women have and will continue to be an integral part of our Army team, performing exceptionally well in all specialties and positions open to them. However, I have no knowledge at this time as to the Army's compliance with the requirements of law and DOD policy relating to women in combat. If confirmed, I will make such an assessment, and work with the Secretary to take whatever actions are deemed necessary.

Question. In your view, should the current policy prohibiting the assignment of women to ground combat units be revised or clarified in any way to reflect changing roles for female soldiers and the changing nature of warfare?

Answer. If after careful study and deliberation, the Secretary of the Army determines that there is a need to modify or clarify the policy, if confirmed, I will provide the Secretary of the Army with advice regarding the changes sought and ensure that the Army complies with the notification requirements set forth in title 10, U.S.C., section 652.

RELIGIOUS GUIDELINES

Question. What is your understanding of current policies and programs of DOD and the Department of the Army regarding religious practices in the military?

Answer. I believe the Army's policies support religious tolerance and respect. It appears that Army and DOD regulations provide commanders and other leaders with ample guidance regarding the free exercise of religion in the Army. It is my understanding that these policies are consistent with the First Amendment.

Question. Do these policies accommodate, where appropriate, religious practices that require adherents to wear particular forms of dress or other articles with religious significance?

Answer. I believe that the Army places a high value on the rights of soldiers to observe the tenets of their respective religious faiths. It is my understanding that the Army will approve requests for accommodation of religious practice, to include the wear of particular articles of faith, unless the accommodation will have an adverse impact on unit readiness, individual readiness, unit cohesion, morale, discipline, safety, and health. It is my understanding that Army policies are consistent with the First Amendment.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. I understand that Army policies require chaplains to support all unit personnel, regardless of their beliefs.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. Given the high stress soldiers and families face during times of war, Chaplains ought to play a key role in helping soldiers face the many issues confronting them. However, I have no working knowledge if military chaplains strike this balance as stated in the question.

SUPPORT FOR WOUNDED SOLDIERS

Question. Wounded soldiers from Operations Enduring Freedom and Iraqi Freedom deserve the highest priority from the Army for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support beyond retirement or discharge. Yet, as the revelations at Fort Stewart in 2003 and Walter Reed in 2007 revealed, the Army was not prepared to meet the needs of returning wounded soldiers.

In your view, what were the most critical shortcomings in warrior care since 2001?

Answer. This question and all those following through question #156 focus on some of the most important set of issues affecting soldiers, their families and the ability of the Army to sustain and ready and vigorous force to fight the wars and maintain the peace. Since I have not been in the Department to witness first hand both the issues and solutions regarding the Army's care of warriors, if confirmed, I will make it a priority to work with the Secretary of the Army and all Army leadership as well as the Under Secretary for Personnel and Readiness and other elements at OSD to assess the current situation and support the Army in strengthening its capacity to take care of our wounded warriors.

Question. What is your assessment of the Army's response?

Answer. If confirmed, I will assess the effectiveness of the Army's response and continue to work with Congress to ensure our warriors receive the highest possible quality of care and support. If confirmed, I will support the Secretary of the Army in continuing to assess the Army's response.

Question. How does the Army provide follow-on assistance to wounded personnel who have separated from Active service? How effective are those programs?

Answer. I am informed that the Army established the Army Wounded Warrior Program in 2004 to provide follow-on assistance to wounded personnel who had separated from Service. If confirmed, I will review this program and embrace a full

partnership with the Department of Veterans Affairs to ensure the Army is playing its appropriate role in the care of all wounded soldiers separating from Service.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Army's support for wounded personnel, and to monitor their progress in returning to duty or to civilian life?

Answer. If confirmed, I will assess continuously the effectiveness and efficiency of the Army's support for wounded personnel. I will implement strategies and, as appropriate, seek additional resources to ensure that the Army meets the needs of our wounded soldiers.

Question. Studies following the revelations at Walter Reed point to the need to reform the Army's disability evaluation system.

What is your assessment of the need to streamline and improve the Army's disability evaluation system?

Answer. I understand that beginning on November 26, 2007, the Army initiated testing of a revamped physical disability program at Walter Reed Army Medical Center, streamlining the process used to determine soldiers' fitness for service or eligibility for military and veterans' benefits. I also understand that a joint DOD and Department of Veterans Affairs Disability Evaluation System Evolution Working Group is considering the overhaul of the disability system so that DOD would evaluate a soldier for fitness for duty and compensate the soldier for years of service, leaving to Veterans Affairs the responsibility to compensate the soldier for disability. Legislation would be required to make these changes.

If confirmed, I will assess this system and work to streamline and improve it.

Question. If confirmed, how will you address any need for change?

Answer. If I am confirmed, I will listen to the information presented by the experts in this area. I will work with the stakeholders in the Army and with appropriate personnel in both the Departments of Defense and Veterans Affairs to determine what elements of the current system should be changed and how to best accomplish those changes.

ARMY MEDICAL ACTION PLAN AND WOUNDED WARRIORS

Question. The Army Medical Action Plan (AMAP) has attempted to address the various needs of wounded warriors and their families.

What is your view of the adequacy of the AMAP, and if confirmed, would you make any changes to the program?

Answer. If confirmed, I will work with all the appropriate leadership in the Department to ensure continued refinement of the program to ensure that it is not only efficient and effective, but is flexible enough to meet the demands of changing strategic circumstances.

Question. Staffing of Warrior Transition Units (WTUs) has been a major issue, especially at installations experiencing surges of redeploying troops.

What are the impediments to fully staffing these units?

Answer. If confirmed, I will look into any possible impediments to staffing of these units and take what actions are necessary to ensure its success in meeting the needs of soldiers and families.

Question. If confirmed, will you pursue changes to improve assignment of military personnel and hiring of civilian personnel to improve staffing of WTUs?

Answer. If confirmed, I will work to ensure that the systems put in place to maintain appropriate staffing in WTUs continue. WTUs must be capable of expanding or contracting as the population of wounded, ill, and injured soldiers changes. Working with the Secretary of the Army, I will continue the Army's practice of being a good steward of tax dollars while ensuring that any adjustments made do not reduce the ability of the Army to provide our wounded, ill, and injured soldiers and their families with the optimal care and support they deserve.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. Numerous cases of sexual misconduct involving soldiers in Iraq, Kuwait, and Afghanistan have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They asserted that the Army failed to respond appropriately by providing basic services, including medical attention and criminal investigation of their charges and, ultimately, appropriate disciplinary action.

What is your understanding of the resources and programs the Army has in place in deployed locations to offer victims of sexual assaults the medical, psychological, and legal help that they need?

Answer. While I have been advised that Army has implemented a Sexual Assault Prevention and Response Program, to include medical, advocacy, chaplaincy, investigative and legal services, this will require a personal assessment prior to making any evaluation of its success or what other actions need to be taken. If confirmed, I would conduct such an assessment.

Question. What is your view of the steps the Army has taken to prevent additional sexual assaults at deployed locations as well as home stations?

Answer. I have not been briefed on steps taken by the Army to prevent additional sexual assaults and if confirmed, I will review such actions and assess their results.

Question. What is your view of the adequacy of the training and resources the Army has in place to investigate and respond to allegations of sexual assault?

Answer. If confirmed, I will work with the Secretary of the Army to assess whether additional steps should be taken to support victims and hold offenders accountable.

Question. Do you consider the Army's current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. If confirmed, I will work with knowledgeable professionals to assess and ensure Army policies, procedures and programs, particularly regarding confidentiality and restricted reporting of sexual assaults, are enforced and performing effectively.

Question. What problems, if any, are you aware of in the manner in which the confidential reporting procedures have been put into effect?

Answer. If confirmed, I will closely monitor the Army's sexual assault response procedures to determine whether improvements are needed in the area of confidential reporting.

Question. What is your view of the appropriate role for senior military and civilian leaders in the Secretariat and the Army staff in overseeing the effectiveness of implementation of new policies relating to sexual assault?

Answer. Sexual assault is a crime that has no place in Army's ranks. The role of senior Army leadership is to ensure an organizational climate where such behavior is not tolerated, and where victims feel free to report incidents without fear of reprisal.

Question. If confirmed, what actions would you take to ensure senior management level direction and oversight of departmental efforts on sexual assault prevention and response?

Answer. If confirmed, I will work with the Assistant Secretary for Manpower and Reserve Affairs and the Deputy Chief of Staff, G-1 to ensure the Army's Sexual Assault Response and Prevention Program continues to remain effective and receives the appropriate level of support.

OFFICER SHORTAGES

Question. A report issued by the Congressional Research Service (CRS) in July 2006 found that the Army projected an officer shortage of nearly 3,000, with the most acute shortfalls in the grades of captain and major with 11 to 17 years of service. The CRS also found that shortages would persist through 2013 unless accessions are increased and retention improves. In that time, in addition to aggressive recruiting efforts, the Army has increased officer accessions through Officer Candidate School (OCS) from the pool of most qualified enlisted members.

What is your understanding of the reasons for the current shortfall, and what is your assessment of the steps the Army is taking to meet this mid-career officer shortfall?

Answer. I have been informed that Army officer shortages stem from force structure growth undertaken to support conversion to more modular, self-sufficient, combat formations and to provide additional capabilities to meet the emerging threats in counterinsurgency warfare. If confirmed, I would review Army projections and steps being taken to resolve shortages.

Question. In your view, what are the long-term consequences and challenges, if any, for both the officer and noncommissioned officer corps of increasing the relative size of the officer corps through OCS accessions?

Answer. OCS graduates offer the Army a tremendous benefit; the OCS cohort has the highest officer retention rates of any commissioning program. In addition, OCS has consistently produced minority officer candidates at the highest rate of any of the commissioning sources. Also, OCS offers an avenue for civilians with college degrees, in many cases in academic disciplines greatly needed in the Army, to enlist in order to seek a commission.

Question. If confirmed, what actions, if any, would you take to ensure adequate numbers of highly-qualified captains and majors are serving on Active Duty over the next 10 years?

Answer. If confirmed, I will support the Army's strategy of retaining the capable and experienced company grade and junior field grade officers. I will support the continued development of nonmonetary incentives, to include: advanced education, quality of life, assignment to the region of choice, and other options that will best assist leaders in positively influencing an officer's decision to continue to serve.

Question. If confirmed, what actions, if any, would you take to continuously monitor and ensure the quality of mid-career field grade and senior noncommissioned officers?

Answer. If confirmed, I would assess Army retention policies and work with the appropriate Army Staff to become informed on the Army policies to retain the best and brightest officers and noncommissioned officers.

DETAINEE TREATMENT STANDARDS

Question. Do you agree with the policy set forth in the July 7, 2006, memorandum issued by Deputy Secretary of Defense England stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, DOD Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. Do you believe it is consistent with effective military operations for U.S. forces to comply fully with the requirements of Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. If confirmed, how would you ensure that U.S. forces in Iraq and Afghanistan comply with the standards in the Army Field Manual, the DOD Directive, and applicable requirements of U.S. and international law regarding detention and interrogation operations?

Answer. If confirmed, I will work to reinforce the Army's detention operations training program, which ensures that all U.S. forces involved in detainee and interrogation operations are aware of their obligations under U.S. and international law and applicable DOD policies.

Question. In the past 2 years, significant changes have been made in Iraq in the way detention operations have been conducted in a counterinsurgency environment, including through the establishment of reintegration centers at theater internment facilities.

What do you consider to be the main lessons learned from the changes to detention operations in Iraq?

Answer. As I understand it, the primary lessons learned include, first and foremost, that the Army must clearly communicate its commitment to ensuring that all soldiers adhere to the law of war and live up to the Army values, regardless of the circumstances. Second, soldiers who have violated the laws of war or have failed to uphold Army values must be held accountable. Another major lesson learned is that the Army may need to expand its detention operations force structure, particularly as to Military Police and Military Intelligence.

If confirmed, I will ensure that the Army continues to assess and refine the force structure needed to successfully support the combatant commanders' detention operations missions.

Question. What should be done to incorporate those lessons learned into DOD doctrine, procedures, and training for personnel involved in detention and interrogation operations?

Answer. If confirmed, I will ensure that the Army continues to review its procedures and update its doctrine through the analysis of lessons learned and best practices derived from After Action Reviews conducted by returning units, and that lessons learned collected by the Center for Army Lessons Learned are used in the development and revision of Army policy, doctrine, and training.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Under Secretary of the Army?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR CARL LEVIN

ARMY LABORATORIES AND RESEARCH, DEVELOPMENT, AND ENGINEERING CENTERS

1. Senator LEVIN. Dr. Westphal, what role should Army laboratories play in supporting current operations and in developing new capabilities to support Army missions?

Dr. WESTPHAL. It is my understanding that the Army laboratories are the science and technology performing organizations and have and will continue to play a major role in supporting current operations with best capabilities available. Through their broad range of investments in key strategic science and technology areas, they also provide critical new capabilities for soldiers.

2. Senator LEVIN. Dr. Westphal, if confirmed, how will you ensure that the Army laboratories and research and development centers have the highest quality workforce, laboratory infrastructure, resources, and management, so that they can continue to support deployed warfighters and develop next generation capabilities?

Dr. WESTPHAL. Army Laboratories and Research, Development, and Engineering Centers play an important role in discovery, development, transfer and application of significant tools needed by all sectors in the Army and Department of Defense (DOD). As such, future investments, organization and operations should be reviewed in the context of overall business transformation for the Army to ensure that their capacity remains "state of the art" and continue to make a difference for soldiers in the battlefield, training and other requirements throughout the force. If confirmed, I will review the linkages on the business operations and work with the Secretary to ensure priorities are met.

IMPROVEMENT OF ARMY BUSINESS SYSTEMS AND PROCESSES

3. Senator LEVIN. Dr. Westphal, DOD efforts to improve business systems by purchasing commercial, off-the-shelf systems frequently fail because too many people in DOD want to keep doing things the same way that they always have, and refuse to give up unique business processes and data requirements that don't fit into the new systems. Instead of instituting approaches that have worked in the private sector, DOD ends up spending hundreds of millions of dollars tailoring off-the-shelf systems to interface with obsolete systems and meet the unique demands of DOD users. Such changes have resulted in delay, duplication, added expense, and even system failure. If confirmed, will you have the authority needed to work across stovepipes and drive the change in the Army's business processes that is needed to effectively implement new business systems?

Dr. WESTPHAL. Yes. Pursuant to section 904 of the National Defense Authorization Act for Fiscal Year 2008, the Under Secretary of the Army is the Chief Management Officer of the Department, with the primary management responsibility for business operations. The Secretary of the Army is charged to assign to the Under Secretary such duties and authorities as are necessary to organize and administer the business operations of the Army effectively and efficiently, in accordance with the policies promulgated by the Secretary of Defense. In accordance with section 908

of National Defense Authorization Act for Fiscal Year 2009, the Secretary of the Army acts through the Under Secretary in his role as Chief Management Officer to carry out initiatives for the business transformation of the Army. I believe that these provisions of law ensure that the Chief Management Officer has the authority necessary to effectively implement new business systems across the Army.

4. Senator LEVIN. Dr. Westphal, will you report back to the committee on a regular basis on any obstacles that you are encountering in this effort, and on the progress that you have been able to make?

Dr. WESTPHAL. Yes.

INVESTMENT IN INFRASTRUCTURE

5. Senator LEVIN. Dr. Westphal, witnesses appearing before the committee in recent years have testified that the Military Services under-invest in their facilities compared to private industry standards. Decades of under-investment in our installations have led to increasing backlogs of facility maintenance needs, created sub-standard living and working conditions, and make it harder to take advantage of new technologies that could increase productivity and save money. What is your assessment of Army infrastructure investment?

Dr. WESTPHAL. I believe that given the needs of soldiers and their families in time of war and significant stress to the force plus the high ops tempo requirements for readiness combined with work to achieve base realignment and closure (BRAC) requirements, means that this assessment must take priority. If confirmed, I would undertake to assess the sufficiency of the Army's current infrastructure investment strategy and implementation plan.

6. Senator LEVIN. Dr. Westphal, if confirmed, what actions, if any, would you propose to increase resources to reduce the backlog and improve Army facilities?

Dr. WESTPHAL. I do not currently have enough information to propose any recommendations. I am concerned whether there is sufficient and timely military construction funding and if confirmed would focus on prioritizing these initiatives.

IMPLEMENTATION OF BASE CLOSURES AND REALIGNMENTS

7. Senator LEVIN. Dr. Westphal, the 2005 BRAC process has resulted in the required closure or realignment of numerous major Army installations. The DOD installation closure process resulting from BRAC decisions has historically included close cooperation with the affected local community in order to allow these communities an active role in the reuse of property. If confirmed, would you change any of the existing efforts to assist affected communities with economic development, revitalization, and re-use planning of property received as a result of the BRAC process?

Dr. WESTPHAL. If confirmed, I would assess the Army's current efforts to see if adaptations are warranted. I understand that in the past, there have been extensive negotiations with closing communities to facilitate property transfer using the appropriate authorities that support redevelopment. If confirmed, I would ensure the Army works closely with the local redevelopment authorities, the Office of Economic Adjustment, Governors, and other appropriate State and local officials to correctly transfer property at the time of closure.

8. Senator LEVIN. Dr. Westphal, in your view, what are the advantages or disadvantages, if any, on the use of no cost Economic Development Conveyances (EDC) as a means of early property transfers under BRAC as opposed to holding out for full fair market value?

Dr. WESTPHAL. Current law and DOD policy provide for a full complement of conveyance authorities that include cost and no-cost EDC and provide for conveyances at fair-market value or conveyances at no cost, depending on the specific conditions and circumstances associated with the property. Current negotiations with BRAC 2005 communities are utilizing the full complement of authorities. It is my understanding that the Army supports the current law and does not see any benefit to reverting back to the previous preference for no-cost property conveyances.

QUESTIONS SUBMITTED BY SENATOR CLAIRE MCCASKILL

ARMY SUBSTANCE ABUSE PROGRAM

9. Senator MCCASKILL. Dr. Westphal, I introduced S. 459, the Substance Use Disorders Act of 2009 earlier this year based on problems with the Army Substance Abuse Program (ASAP), some of which were identified last fall at Fort Leonard Wood, MO. In recent years, ASAP has struggled to manage the increasing number of soldiers needing treatment, often following stressful deployments to Iraq and Afghanistan. In particular, there have been problems with understaffing and mismanagement. Commander notification and the lack of confidentiality in treatment may discourage servicemembers from seeking treatment for fear of disciplinary action. It is important to move from a climate of punishment towards a climate that reduces the stigma of seeking treatment. Based off S. 459, the Army recently instituted the Confidential Alcohol Treatment and Education Pilot (CATEP) program to allow complete anonymity for eligible soldiers who self-refer to this program. This is a good start. However, I am still concerned whether commanders should be notified in all instances of soldiers enrolling in ASAP and that the disciplinary option should be on the table no matter what. What approach do you take to how discipline should be used with troops who ask for help with getting substance use disorders treated?

Dr. WESTPHAL. I concur with the statement of Representative McHugh. I would further add that if I am confirmed, I would work with the Secretary to continuously ensure that we are firmly grounded in policies, directives, and congressional initiatives on these issues and able to assess and react to the needs of soldiers and the effectiveness of our forces.

10. Senator MCCASKILL. Dr. Westphal, how does the Army plan to address the discipline issue with individuals who have sensitive security clearances or military occupation specialties? Specifically, how can these individuals be encouraged to seek treatment so that they get the help they need so that they can do their jobs effectively, rather than hiding substance use disorders that could ultimately impact their job performance?

Dr. WESTPHAL. I understand that the Army's priority is to get a soldier to treatment. The Army's CATEP program ensures that soldiers who voluntarily seek treatment will not have their enrollment in the program recorded in any personnel database for future reference. Of course, in cases where safety or national security is at stake, a soldier may be reassigned to other duties during his or her treatment.

11. Senator MCCASKILL. Dr. Westphal, in Representative McHugh's prepared responses for the committee, he says that, "It appears that there is a shortage of ASAP counselors at some installations." Indeed, the shortage of counselors is systemic to the Army. We even have whistleblowers at Fort Leonard Wood, MO, coming forth with concerns about the ASAP. What are the Army's views on the adequacy of ASAP counselors in the Army, and what specific measures does the Army plan to mitigate the shortage and lack of resources?

Dr. WESTPHAL. I understand that the Army is fully aware of, and concerned about, the shortage of qualified counselors—often exacerbated by competition between the military and civilian sectors for the same limited pool of care providers. The Army has established several programs to address this shortage, to include developing relationships with State substance abuse certification boards and improving internship and training programs. If confirmed, I would work with the Secretary to do all that we can to meet these needs and correct shortages where needed most.

12. Senator MCCASKILL. Dr. Westphal, an area of substance abuse disorders in the Army that remains understudied and misunderstood is that of prescription drug abuse, particularly for those soldiers who are deployed in theater in Iraq and Afghanistan. Often these individuals are easily prescribed drugs that can be extremely addictive and harmful over time. What is the Army doing to include prescription drug abuse in the ASAP, and what data is available on the numbers of soldiers who are referred for treatment for prescription drugs in the Army?

Dr. WESTPHAL. I understand that treating soldiers for prescription drug abuse is a significant component of the ASAP. A physician reviews the case of every soldier who tests positive for prescription drug use and determines whether or not the drug at issue was used lawfully and in accordance with prescribed practices.

QUESTIONS SUBMITTED BY SENATOR KAY HAGAN

ARMY UNIFORMS

13. Senator HAGAN. Dr. Westphal, whether soldiers are serving overseas or training within the continental United States, in preparation for deployment, they need uniforms that are capable of defending against insect borne diseases such as Lyme disease and Rocky Mountain spotted fever. After over 15 years of study and research, the Army decided to adopt the factory treatment of uniforms with permethrin, as the most effective solution, to protect soldiers against insect borne diseases. The adoption of this technology has been recommended by the Army's subject matter experts, including the Surgeon General and Uniform Board. However, contractual management, logistics, and funding jeopardize delays in providing the Army with factory treated permethrin uniforms until 2012.

In order for this technology to be properly implemented and supervised, I believe that the Army needs to establish the protocol that the contract management be established directly between the Army and the uniform treatment vendor. This is a very important difference from the Defense Logistics Agency/Defense Supply Center Philadelphia (DLA/DSCP) practice of relegating the oversight of this technology to a subcontract through the existing cut and sew uniform manufacturers. A direct contract to treatment vendors can provide oversight incentives to continue to improve the quality and the safety of this program.

This is a complex technology that is federally regulated by the Environmental Protection Agency (EPA). The EPA recognizes that each vendor's treatment has different characteristics particularly regarding efficacy and safety. Assigning responsibility of supervising the production of this product through the DLA/DSCP process would negatively impact the quality, safety, and efficacy of the product. Moreover, inserting an unrelated vendor into the process adds an extra layer of cost, as the cut and sew vendor adds margin to the cost from the treatment vendors.

Please provide your thoughts on establishing the protocol that contract management of Army permethrin treated uniforms be established directly between the Army and the uniform treatment vendor.

Dr. WESTPHAL. I am unable to provide a detailed assessment at this time. If confirmed, I would fully review this matter.

14. Senator HAGAN. Dr. Westphal, in accordance with the Acquisition Reform Bill, contractual management of Army permethrin treated uniforms between the Army and the uniform treatment vendor saves money as it removes the "middle man" (cut and sew vendors) from adding additional margin of costs. Can you please provide your thoughts?

Dr. WESTPHAL. I am unable to provide a detailed assessment at this time. If confirmed, I would fully review this matter.

15. Senator HAGAN. Dr. Westphal, where will the money come from within the Army budget to fund the treatment of all Army combat uniforms with permethrin?

Dr. WESTPHAL. At present, I am not familiar with the Army's plans with respect to this subject. If confirmed, I would fully review this matter.

UPGRADING M24 SNIPER RIFLES

16. Senator HAGAN. Dr. Westphal, Army sniper teams in Iraq and Afghanistan utilize the M24 sniper rifle to respond to Improvised Explosive Devices and insurgent ambushes. The weapons system is outdated, and soldier input has propelled the Army to determine that it is necessary and cost-effective to upgrade 3,000 M24s to meet the changing operational requirements on the ground and counter threats, most notably: engage targets during times of limited visibility and at night; increase range from 800 to 1,200 yards; improve ergonomics and stock configuration to enable maneuverability within vehicles and small spaces within urban areas; and increase concealment when transporting and operating the weapon.

Congress appropriated \$3.4 million in the Fiscal Year 2009 Defense Appropriations Act for the Army to upgrade the M24 sniper rifle using operation and maintenance funding and an existing refurbishment contract with the company Remington, to do an engineering change proposal (ECP). The fiscal year 2009 funding was moved to procurement, making an ECP under the existing contract no longer feasible. The Fiscal Year 2010 House Defense Appropriations Bill would appropriate an additional \$3.0 million for M24 upgrades. Congress is appropriating the funds in response to validated operational needs statements from Army units, who require an upgraded M24 sniper rifle for operations in theater. What are the Army's plans

to expedite the M24 upgrade to meet the immediate needs of the Army's sniper teams?

Dr. WESTPHAL. If confirmed, I will review this matter to determine the best way to meet the immediate needs of the Army's sniper team. I will work with Congress in reviewing funding needs and ongoing program development.

17. Senator HAGAN. Dr. Westphal, what can be done to provide upgraded M24s to units that have an urgent need and is there anything we need to do in Congress to help with the upgrade?

Dr. WESTPHAL. I am unable to provide a detailed assessment at this time. If confirmed, ensuring our sniper team's needs are fully met would be a top priority.

18. Senator HAGAN. Dr. Westphal, given that Remington owns the technical data package for the M24, how will the Army compete the upgrade?

Dr. WESTPHAL. I do not have detailed knowledge on this matter, but it is my understanding the technical data of the M24 will not be disclosed during the competition to select a vendor to upgrade sniper weapons that are currently fielded.

M4/REPLACEMENT CARBINE

19. Senator HAGAN. Dr. Westphal, on July 1, 2009, the Army received control of the technical data package (design rights) to the existing M4 carbine weapons system. Prior to this transfer, Colt Defense LLC had been the sole source provider of the M4 carbine for the U.S. military for the past 15 years, due to a legal settlement between the Federal Government and Colt. The last of the 473,000 M4 weapons is expected to be fielded in 2010. It is important that we replace the M4 with a new state-of-the-art weapons system that meets the operational requirements of our military in theater. Is the Army committed to a full and open competition for the follow-on weapon to the M4?

Dr. WESTPHAL. I am unaware of any currently planned competition to replace the M4.

20. Senator HAGAN. Dr. Westphal, please provide your thoughts on updating the M4 carbine requirement and the solicitation process for a future weapon.

Dr. WESTPHAL. My understanding is consistent with the response provided by Representative McHugh.

21. Senator HAGAN. Dr. Westphal, does the Army plan on awarding the replacement weapon contract to one manufacturer or dividing it among several companies?

Dr. WESTPHAL. I have not been briefed on the Army's procurement plans for the carbine requirement.

MILITARY HOUSING PRIVATIZATION INITIATIVE

22. Senator HAGAN. Dr. Westphal, Congress established the Military Housing Privatization Initiative (MHPI) in 1996 as a tool to help the military improve the quality of life for its servicemembers by improving the condition of their housing. The MHPI was designed and developed to attract private sector financing, expertise, and innovation to provide necessary housing in a more efficient manner. The Office of the Secretary of Defense has delegated to the Military Departments the implementation of MHPI and authorized them to enter into agreements with private developers selected in a competitive process.

Financing for military housing privatization in the current market is challenging and entails high relative lending rates of interest. This impedes the restricting of existing military housing transactions, prevents the construction of new military family housing, and limits the scope of work. Transactions such as the one the Army agreed to involving construction of privatized military housing in South Korea is one of those projects affected. Has the current financial market negatively impacted the Army's ability to move forward with any of its privatization initiatives? If so, how can we assist the Army?

Dr. WESTPHAL. My understanding is consistent with the response provided by Representative McHugh.

23. Senator HAGAN. Dr. Westphal, the financial crisis in the commercial mortgage backed securities market has negatively impacted the traditional firms that have credit enhancement capabilities to the private activity bonds used to finance MHPI

projects. Has the Army approached Fannie Mae or Freddie Mac with this opportunity?

Dr. WESTPHAL. My understanding is consistent with the response provided by Representative McHugh.

24. Senator HAGAN. Dr. Westphal, the MHPI program authority is slated to expire in 2010. What can we do to assist the Army and DOD to ensure that this program remains in effect after 2010?

Dr. WESTPHAL. It is my understanding that the authorities outlined in the National Defense Authorization Act for Fiscal Year 1996 (Public Law 104-106, February 10, 1996) section 2885 were made permanent by the National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375, October 28, 2004) section 2805 "Repeal of Limitations."

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

ARMY MODERNIZATION

25. Senator INHOFE. Dr. Westphal, what do you believe is a reasonable and realistic procurement timeline for a new line of Army combat vehicles? Is 5 to 7 years realistic?

Dr. WESTPHAL. I understand that the Army is currently conducting requirements analysis to determine the appropriate requirements. At this time I am not yet in a position to offer an informed assessment of these efforts.

26. Senator INHOFE. Dr. Westphal, what are your personal feelings regarding the Secretary of Defense's cancellation of FCS/ground vehicles?

Dr. WESTPHAL. I strongly support Secretary Gates' decision, which includes launching a new Army combat vehicle modernization program with reevaluated requirements and acquisition approach to better meet the needs of our soldiers as rapidly as possible.

RESET/RECAPITALIZATION

27. Senator INHOFE. Dr. Westphal, what are your concerns with the high usage rates of Army wheeled and combat vehicles in Iraq and Afghanistan?

Dr. WESTPHAL. I concur with Representative McHugh's statement.

28. Senator INHOFE. Dr. Westphal, as we draw down in Iraq, do you believe it is important to adequately reset, and upgrade where appropriate, our combat equipment?

Dr. WESTPHAL. I concur with Representative McHugh's statement.

END STRENGTH

29. Senator INHOFE. Dr. Westphal, how will you recommend DOD fund the 22,000 soldier end strength increase? Should it be resourced internally or externally from the Army budget?

Dr. WESTPHAL. My understanding is consistent with the response provided by Representative McHugh.

30. Senator INHOFE. Dr. Westphal, are you concerned that this end strength increase will hinder other Army priorities like modernization and equipment reset?

Dr. WESTPHAL. An increase in end strength is necessary to take pressure off our deploying forces. The Army must invest in modernization and equipment resets to ensure our soldiers maintain the highest levels of combat effectiveness within current fiscal constraints. If confirmed, I would work with the Secretary, OSD, and Congress to do all that we can to ensure that Army priorities for modernization and equipment reset are consistent with the needs of the force in time of war.

PERSONNEL

31. Senator INHOFE. Dr. Westphal, what will the effects on the Army Force Generation cycle be if the Iraq drawdown is delayed while we simultaneously double our troop strength in Afghanistan?

Dr. WESTPHAL. It is my understanding that the Army Force Generation (ARFORGEN) process was specifically designed to have some flexibility to support varying levels of demand over time. An Iraq drawdown delay would temporarily increase the commitment of Army forces. I would expect that the flexibility in the ARFORGEN process might mitigate the impact, but I believe that an extended delay in the drawdown and the corresponding decrease in dwell time are likely to result in increased stress on soldiers and families.

32. Senator INHOFE. Dr. Westphal, what level of troop increase in Afghanistan or Iraq would cause a change to the current dwell time goal of 1:2?

Dr. WESTPHAL. I have been informed that the Army is on track to achieve 1:2 Active component and 1:4 Reserve component dwell-to-deployment ratios by 2011. I understand, however, that this projection is based on the current, validated allocation of forces, which requires the Army to have 20 deployable Brigade Combat Teams (BCTs) at any time. In my view, an increase in troop levels in Afghanistan might impact these projections and could delay the Army's ability to achieve the desired dwell ratios.

THREAT PREPARATION

33. Senator INHOFE. Dr. Westphal, how should the Army be postured to counter the full spectrum of threats in the near- and far-term as well as be able to provide combatant commanders the forces they need?

Dr. WESTPHAL. In my view, the Army must provide combatant commanders with expeditionary forces prepared to counter the full spectrum of threats. I would envision such forces as comprising a mix of versatile organizations, capable of operating without large, fixed bases of support; comfortable in diverse cultural environments; and able to fight, if necessary, upon arrival in an operational area.

[The nomination reference of Dr. Joseph W. Westphal follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 11, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Joseph W. Westphal, of New York, to be Uner Secretary of the Army, vice Nelson M. Ford.

[The biographical sketch of Dr. Joseph W. Westphal, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF JOSEPH W. WESTPHAL

Dr. Westphal is University System Professor of Political Science at the University of Maine (currently on leave). He is also Professor of Environmental Studies at The New School where he also served as Provost and Senior Vice President for Research until December 2008.

From 2002 to 2006, Dr. Westphal was the Chancellor of the University of Maine System and Professor of Political Science at the University of Maine. The System is composed of 7 universities and 10 continuing education centers with a total enrollment of over 36,000 students and an operating budget of more than \$600 million.

Dr. Westphal received his Bachelor's degree from Adelphi University, his master's degree from the University of Oklahoma State and his Ph.D. in political science from the University of Missouri-Columbia. He spent 12 years on the faculty of Oklahoma State University. While on leave from the university, Dr. Westphal worked in the Department of the Interior on issues related to water development. Dr. Westphal also worked as a budget analyst and assistant to the chairman of the U.S. House Committee on the Budget.

From 1988 to 1995, Dr. Westphal worked in the U.S. Congress in various capacities from directing a congressional caucus in the House and Senate to working on Members staff. After leaving Congress in 1995, Dr. Westphal moved to the Clinton

administration as Senior Policy Advisor for Water Resources at the U.S. Environmental Protection Agency. He also taught public policy as an Adjunct Professor at Georgetown University.

In 1998, Dr. Westphal was confirmed by the U.S. Senate as Assistant Secretary of the Army for Civil Works. In 2001, Dr. Westphal served briefly as Secretary of the Army (Acting).

Dr. Westphal recently served as a member of the Obama-Biden Transition for the National Security Team working on Defense matters. He is a member of the Adelphi University Board of Trustees, the Santiago College Board and the Hydro-Photon Board Inc. Board of Directors. He is also a member of the Advisory Committee to the U.S. Southern Command.

Dr. Westphal is married with four adult children.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Dr. Joseph W. Westphal in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Joseph W. Westphal.

2. **Position to which nominated:**
Under Secretary of the Army.

3. **Date of nomination:**
June 11, 2009.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
January 26, 1948; Santiago, Chile.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Linda McMaster.

7. **Names and ages of children:**
James Westphal, 40; Heather Westphal Miele, 38; Amy Westphal Stewart, 34; and Lindsay Westphal, 27.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
McLean High School, McLean, VA; 1965-66 H.S. 1966.

Adelphi University, Garden City, NY, 1966–70, B.A., 1970.
 Oklahoma State University, Stillwater, OK, 1971–73, M.A., 1973.
 University of Missouri, Columbia, MO, 1973–75, Ph.D., 1980.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Senior Policy Advisor, U.S. Environmental Protection Agency, Washington DC; (1997–1998).

Assistant Secretary of the Army-Civil Works (1998–2001), Secretary of the Army (Acting, March–June 2001).

Senior Policy Council, Patton Boggs LLC, Washington DC, (July 2001–March 2002).

University System Professor, University of Maine System, Bangor, ME, (April 2002–June 2006).

Provost, The New School University, New York, NY, (July–December 2008).

Professor, The New School University, New York, NY, (January 2008–Present).

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Federal Government Experience:

As a professor at Oklahoma State University, I went on leave on an Intergovernmental Personnel Act (IPA) agreement as follows:

- 1980, U.S. Department of the Interior, Office of Water Resources Technology, Office of the Assistant Secretary for Land and Water

- 1980–1981, U.S. House of Representatives Committee on the Budget

- 1987–1988, Senior Social Scientist, Institute for Water Resources, U.S. Army Corps of Engineers. On leave from Oklahoma State University on an IPA agreement.

Staff member of the Office of Water Policy, U.S. Department of the Interior, summer 1982.

Executive Director, Congressional Sunbelt Caucus, U.S. House of Representatives, Mike Andrews (D–TX), Lindsay Thomas (D–GA), E. Clay Shaw (R–FL) Co-Chairmen. 1988–1995.

Special Assistant, Office of Senator Thad Cochran (R–MS), 1995–1997.

State Government:

Member of the Faculty, Oklahoma State University, 1975–1987.

Member, State of Maine Science and Technology Board (2002–2006).

Special Assistant, Director of Congressional Sunbelt Caucus, Office of Senator Thad Cochran, 1995–1997.

Executive Director, Congressional Sunbelt Caucus and Sunbelt Institute, 1988–1995.

Member, SOUTHCOM Commander's Panel (2006–Present).

Unpaid Consultant, USAID and USIA (By invitation for short periods between 1982 and 1995).

Commissioner, President's National Recreation Lakes Commission (1999).

Member, President's Drought Commission (2000).

Chairman, U.S. Coastal America Program (1998–2001).

Member, President's Coral Reefs Task Force (1999 to 2001).

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Trustee, Adelphi University, Garden City, NY.

Director, Hydro Photon Inc, Blue Hill, ME.

Director, Santiago College Board of Trustees, Washington, DC.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

See response to question 11 above.

Member, Partner University Fund Grant Review Committee, Washington, DC.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

Payne County Democratic Party Chair, Stillwater, OK, 1983–1984.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

N/A.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

\$100, Frank Davis, Vermont Legislature.

\$250, ACTBLUE Donation to Democrats/Greg Julian for Congress.

\$100, Miles Theeman for City Council.

\$1,000, Obama for President.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Silver Medal for Superior Service, Awarded by the Administrator, U.S. Environmental Protection Agency.

The Silver Order of the de Fleury Medal, Awarded by the Chief of Engineers Army Engineer Association-Engineer Regiment.

The Outstanding Civilian Service Medal, Awarded by the Chief of Staff of the Army, U.S. Department of the Army.

Decoration for Distinguished Civilian Service, Awarded by the Secretary of the Army, U.S. Department of the Army.

Phi Kappa Phi.

Pi Sigma Alpha.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

"The Politics of Infrastructure," *Social Research Quarterly* 75, No. 3 (Fall 2008).

"Coastal America's Corporate Wetlands Restoration Partnership: An Effective Public-Private Partnership," *National Environmental Enforcement Journal* 15 (November 2000).

"Public Opinion and the Equal Rights Amendment," with M. Daniels and B. Darcy in *Women Leaders in American Politics*, Eds. James David Barber and Barbara Kellerman (Englewood Cliffs, NJ; Prentice Hall), pp. 41–46 (1986).

Assessment of Economic, Social, and Institutional Impacts of Groundwater Regulation, with D. Kent and H. Mapp. Oklahoma State University Water Research Center. USDI, Project A-093 (1983).

"The ERA Won-At Least in the Opinion Polls," with M. Daniels and Bob Darcy, *P.S.* 15 (Fall, 1982).

The Potential for Groundwater Management in the West: A Symposium," *Ground Water* 20 (January–February 1982).

Integrating Water Quality Management and Water Resources Planning in Oklahoma, with R.D. Ireland, Oklahoma State University Water Resources Council (1981).

"Commitments, Priorities, and Organizational Options for Water Resource Planning in Oklahoma," with James J. Lawler, Oklahoma Water Resources Research Institute (August 1979).

Intergovernmental Aspects of Water Transfer in Oklahoma, with James Lawler, Oklahoma State University Water Research Center, USDI, Tech. Rept. A-084, Contract No. 14-34-0001-9038 (1979).

The Use of Resources and Assessment of Needs in Information Transfer for Science and Technology Issues by the Oklahoma Legislature, with Thomas Kielhorn, The Oklahoma State Legislature Council and the National Science Foundation (1978).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

[Nominee responded and the information is contained in the committee's executive files.]

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JOSEPH W. WESTPHAL.

This 6th day of July, 2009.

[The nomination of Dr. Joseph W. Westphal was reported to the Senate by Chairman Levin on August 4, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on September 16, 2009.]

[Prepared questions submitted to Juan M. Garcia III by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? Answer. I am not currently aware of any specific need for modifications to Goldwater-Nichols. If confirmed I will notify the Under Secretary and Secretary of the Navy of any changes of which I become aware.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I am not aware of any specific areas in which modification would be appropriate.

DUTIES

Question. Section 5016 of title 10, U.S.C., provides that the Assistant Secretary of the Navy for Manpower and Reserve Affairs shall have "as his principal duty the overall supervision of manpower and Reserve component affairs of the Department of the Navy."

If confirmed, what duties do you expect that the Secretary of the Navy will prescribe for you?

Answer. I believe the Secretary of the Navy will require me to provide overall supervision and oversight of manpower and Reserve component affairs for the Navy and Marine Corps. I would be responsible for developing integrated policies and programs related to military personnel (Active and Reserve components) and the civilian workforce.

Question. What actions will you take to enhance your ability to perform the duties of the Assistant Secretary of the Navy for Manpower and Reserve Affairs?

Answer. If confirmed, I will apply my experience as a naval officer and in government service to further my understanding and knowledge of the Navy, its people and organizations. I will diligently evaluate the challenges it faces and the resources necessary to sustain and transform it. I will seek advice and counsel from the military and civilian personnel of the Department and from Members of Congress and their staff.

Question. In carrying out these duties, what would be your relationship with the following officials:

Question. The Secretary of the Navy.

Answer. I will work with the Secretary of the Navy to help him achieve his goals, particularly those involving manpower issues. My role will be defined in part by powers he may choose to delegate to me.

Question. The Under Secretary of the Navy.

Answer. In his position as the Chief of Staff and Chief Operating Officer of the Department, the Under Secretary will play a significant role in prioritizing and synchronizing the efforts of the Assistant Secretaries of the Navy. If confirmed, I would

establish a close, direct, and supportive relationship with the Under Secretary of the Navy.

Question. The other Assistant Secretaries of the Navy.

Answer. I would coordinate with them on our combined interests as we work together to support the Secretary's goals.

Question. The General Counsel of the Department of the Navy.

Answer. The General Counsel is the senior civilian legal advisor to the Secretary, the Under Secretary, and the Assistant Secretaries and their staffs. I expect to consult and rely upon him/her on a variety of legal issues in discharging my responsibilities.

Question. The Judge Advocate General of the Navy.

Answer. As the senior uniformed legal advisor to the Secretary of the Navy, providing legal and policy advice on all legal matters not under the cognizance of the General Counsel, I expect to interact and seek legal advice as it pertains to those matters requiring a military legal perspective when discharging the responsibilities assigned to me.

Question. The Naval Inspector General.

Answer. The Naval Inspector General is the senior investigating official in the Department of the Navy and the principal advisor to the Secretary of the Navy, Chief of Naval Operations and the Commandant of the Marine Corps on all matters concerning inspection, investigations, and audit follow-up. If confirmed, I will establish and maintain a close and professional relationship with the Naval Inspector General.

Question. The Chief of Legislative Affairs of the Department of the Navy.

Answer. The Chief of Legislative Affairs is responsible for developing legislative strategies for the Navy. If confirmed I will work closely with him as it relates to the Department's legislative requirements for manpower and personnel.

Question. The Under Secretary of Defense for Personnel and Readiness.

Answer. I would coordinate and work with the Under Secretary of Defense for Personnel and Readiness on areas of mutual concern to support the goals of the Secretary of the Navy and the Secretary of Defense.

Question. The Principal Deputy Under Secretary of Defense for Personnel and Readiness.

Answer. I would coordinate and work with the Principal Deputy Under Secretary of Defense for Personnel and Readiness on areas of mutual concern to support the goals of the Secretary of the Navy and the Secretary of Defense.

Question. The Chief of Naval Operations.

Answer. The Chief of Naval Operations has a direct reporting relationship to the Secretary of the Navy. If confirmed, I would support the Secretary on areas of manpower policy as well as program execution.

Question. The Vice Chief of Naval Operations.

Answer. I would support the Under Secretary's close relationship with the Vice Chief of Naval Operations, as required, on manpower matters.

Question. The Commandant of the Marine Corps.

Answer. The Commandant has a direct reporting relationship to the Secretary of the Navy. If confirmed, I would support the Secretary on areas of manpower policy as well as program execution.

Question. The Assistant Commandant of the Marine Corps.

Answer. If confirmed, I will work very closely with the Assistant Commandant of the Marine Corps to ensure equitable manpower programs exist across the Department of the Navy.

Question. The Deputy Commandant of the Marine Corps for Manpower and Reserve Affairs.

Answer. If confirmed, I will work very closely with the Deputy Commandant of the Marine Corps for Manpower and Reserve Affairs to ensure equitable manpower programs exist across the Department of the Navy.

Question. The Surgeon General of the Navy.

Answer. I would look to the Surgeon General for advice and insights on the spectrum of medical affairs affecting our Naval personnel.

Question. The Chief of Navy Reserve.

Answer. I would work closely with the Chief of Navy Reserve on the numerous operational and policy matters affecting our Reserve component.

Question. The Commander, Marine Forces Reserve.

Answer. I would work closely with Commander, Marine Forces Reserve on the numerous operational and policy matters affecting our Reserve component.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I believe that my life, work and family experiences have provided me with the qualifications necessary to hold this position. As the son of a career naval aviator, I grew up as a Navy dependent; living, moving, going to school, and waiting out my father's deployments on Navy bases. As a naval officer, I served 13 years on active duty, completing five tours and four deployments. Now during my fifth year as a naval reservist, I have had the opportunity to command a Reserve Squadron. Trained in law and management at Harvard Law School and the John F. Kennedy School of Government, I've crafted public policy both as a White House Fellow and as an elected legislator. All of these experiences have taught me to understand and appreciate the demands, challenges and experiences of today's Active Duty service personnel, their Reserve counterparts, and their families. They have also taught me how to appreciate the bureaucratic barriers, the competing priorities and the processes to change.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Assistant Secretary of the Navy for Manpower and Reserve Affairs?

Answer. If confirmed, my challenges will include providing for the health and welfare of our sailors, marines, and their families, continuing efforts towards Active/Reserve force integration, attracting, recruiting and retaining top talent both for our civilian and military workforce (particularly in skill sets required for OCO), maintaining the superior pay and benefits package our sailors and marines deserve, and ensuring the best care for our wounded warriors and their families.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. I will work within the DON-DOD framework to address manpower costs while supporting our servicemen and women and their families.

SYSTEMS AND SUPPORT FOR WOUNDED SAILORS AND MARINES

Question. Sailors and marines wounded and injured in Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) deserve the highest priority from the Navy and Marine Corps for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support beyond retirement or discharge.

In your view, what were the most critical shortcomings in warrior care, both Active and Reserve, since 2001?

Answer. I have not had an opportunity to be fully briefed on any shortcomings in wounded warrior care. If confirmed, a review of the systems and support for wounded sailors and marines will be a top priority. Our Nation and our Navy owe these wounded sailors and marines a debt that can never be repaid.

Question. What is your assessment of the effectiveness of the Navy and Marine Corps response?

Answer. The Navy and Marine Corps have a longstanding tradition and record of success in caring for the medical needs of its personnel and their families. The Navy established the Safe Harbor program, and the Marine Corps established the Wounded Warrior Regiment to improve support services and speed delivery of coordinated care. If confirmed, I will continue to evaluate the effectiveness of these programs, identify best practices and implement process improvements to optimize the success of these programs.

Question. What measures would you take, if confirmed, to facilitate the seamless transition of wounded, ill, and injured sailors and marines from the Department of Defense (DOD) to the Department of Veterans Affairs?

Answer. If confirmed, I will work to foster a seamless transition for continuity of service between the Navy and Veterans Administration systems of care, to include the much discussed electronic medical records. Continued collaboration between DOD and the Department of Veterans Affairs will further strengthen the transition of wounded, ill, and injured sailors and marines.

Question. How do the Navy and Marine Corps provide follow-on assistance to wounded personnel who have separated from the Service? How effective are these programs?

Answer. As I understand, both the Navy's Safe Harbor Program and the Marine Corps' Wounded Warrior Regiment extend support to wounded personnel should they be separated or retire due to medical issues, up through and including reintegration to a community. Our heroes deserve our continued support even after

leaving active service. I have not had an opportunity to personally assess these programs, but if confirmed I will ensure that these programs provide the best service possible to our very deserving sailors and marines.

Question. What is your assessment of the need to streamline and improve the Navy's disability evaluation system? If confirmed, how will you address any need for change?

Answer. The Physical Evaluation Board manages the Department of the Navy's disability evaluation system. If confirmed, I will review the evaluation process to ensure it is fair, efficient and thorough. I have not had an opportunity to personally assess this system, but if confirmed I will ensure that this program provides the best service possible to our deserving sailors and marines.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Navy's support for wounded sailors and marines and to monitor their progress in returning to duty or civilian life?

Answer. If confirmed, I will work to ensure sailors, marines, and their families are provided with optimum medical care and support throughout their recovery, rehabilitation and reintegration. Our sailors and marines deserve nothing less.

OFFICER MANAGEMENT ISSUES

Question. As the Assistant Secretary of the Navy for Manpower and Reserve Affairs you would have significant responsibilities with regard to officer management policies, the promotion system, and recommending officers for nomination to positions of authority and responsibility.

If confirmed, what changes, if any, would you make to the officer management system?

Answer. The officer management systems, and in particular the promotion system, are constantly being evaluated and improved. I have experience with aspects of the officer management system from my military service, but I have not been fully briefed on all of the specifics of the program, or the results of the latest evaluations. If confirmed, I will fully consider and evaluate all recommendations for improvement from the Navy and Marine Corps.

Question. Do you believe the current Navy and Marine Corps procedures and practices for reviewing the records of officers pending nomination by the President are sufficient to ensure the Secretary of the Navy, the Secretary of Defense, and the President can make informed decisions?

Answer. I have not yet been briefed on this issue, but based on my experience as a Naval Officer I know the Department strives to ensure that the review process for officers pending nomination by the President is thorough, expansive, and fair. If confirmed, I am committed to ensuring that the officers recommended by selection boards are best qualified for promotion to meet the needs of the Navy and Marine Corps consistent with the requirements of exemplary conduct.

Question. In your view, are these procedures and practices fair and reasonable for the officers involved?

Answer. While I have not yet been briefed on these procedures and practices, my experience gives me the confidence that the Navy and Marine Corps procedures and practices for reviewing the records of officers pending nomination by the President are fair and reasonable for the officers involved.

GENERAL AND FLAG OFFICER NOMINATIONS

Question. Under DOD Instruction 1320.4, adverse and alleged adverse information pertaining to general and flag officers must be evaluated by senior leaders in the Services and in the Office of the Secretary of Defense prior to nomination.

If confirmed, what role would you play in the officer promotion system, particularly in reviewing general and flag officer nominations?

Answer. If confirmed, I will provide all necessary assistance to the Secretary of the Navy to evaluate adverse and alleged adverse information pertaining to general and flag officer nominations. Given the special trust placed in our senior leaders, it is essential that nomination packages provide the Secretary with the best possible information regarding the fitness of the officers selected to serve as our senior leaders.

Question. What is your assessment of the ability of the services to document credible information of an adverse nature in a timely manner for evaluation by promotion selection boards and military and civilian leaders?

Answer. The documentation of credible information of an adverse nature is critical to ensuring the reliability of selection board results. I consider this to be one of our most important responsibilities and one that, if confirmed, I would carefully study to ensure information of an adverse nature is properly evaluated.

Question. If confirmed, what steps will you take to ensure that only the best qualified officers are nominated for promotion to general and flag officer rank?

Answer. I have not had an opportunity to be briefed on the existing process within the Department of the Navy for developing and promulgating selection criteria for general and flag officers. If confirmed, I will provide the Secretary my frank assessment of the existing processes and will make recommendations of any changes necessary to ensure the best qualified officers are nominated.

TECHNICAL TRAINING OF GENERAL OFFICERS

Question. In your view, do a sufficient number of Navy and Marine Corps flag and general officers have advanced training and degrees in scientific and technical disciplines?

Answer. I have not been briefed on advanced training standards for flag and general officers. If confirmed, I will closely monitor the inventory of senior officer personnel to ensure our Navy and Marine Corps has officers with necessary technical and scientific training.

Question. Are the career paths for officers with technical skills appropriate to ensure that the Navy can execute complex acquisition programs, adapt to a rapidly changing technological threat environment, and make informed investment decisions on DOD, Navy, and Marine Corps resources?

Answer. I have not been fully briefed on the requirements for these technical Navy career paths. If confirmed, I will work with officials across the DON to ensure that the Navy can provide the acquisition and technical expertise required to make informed investment decisions.

Question. If not, what will you do to address this deficiency, if you are confirmed?

Answer. If confirmed I will evaluate whether there is adequate match between acquisition education requirements and senior officer training and education.

DELIVERY OF LEGAL SERVICES

Question. What is your understanding of the respective roles of the General Counsel and Judge Advocate General of the Navy in providing the Secretary of the Navy with legal advice?

Answer. I believe that the considered and independent counsel of the General Counsel and of the Judge Advocate General of the Navy are absolutely necessary to effective governance of the Department. It is my understanding that the General Counsel and the Judge Advocate General provide the Navy unique perspectives that are complimentary and essential. If confirmed, I will work closely with these two indispensable counsel to ensure that recommendations to the Secretary of the Navy receive the benefit of their independent legal advice.

Question. What are your views about the responsibility of staff judge advocates within the Navy and Marine Corps to provide independent legal advice to military commanders in the fleet and throughout the naval establishment?

Answer. Navy and Marine Corps staff judge advocates provide critical advice to civilian and military leaders within the Department. My prior experience as a naval officer has impressed upon me the value for commanders to have experienced, well trained staff judge advocates who serve with them, who understand the specific mission and requirements of the commander, and who are prepared to provide essential, independent advice where and when it is needed.

Question. What are your views about the responsibility of the Judge Advocate General of the Navy and the Staff Judge Advocate to the Commandant to provide independent legal advice to the Chief of Naval Operations and the Commandant of the Marine Corps, respectively?

Answer. It is critically important that the Chief of Naval Operations and the Commandant of the Marine Corps receive independent advice from well experienced, senior uniformed judge advocates.

NAVY JUDGE ADVOCATE GENERAL CORPS

Question. The Center for Naval Analyses (CNA) recently completed a study of manpower requirements for the Navy in which it concluded that the Navy's Judge Advocate General Corps was significantly understrength for its mission, including combat service support of Marine Corps' units and Task Force 134 in Iraq.

What is your understanding of the CNA study's findings with respect to Active Duty manpower in the Navy JAG Corps?

Answer. I have not had an opportunity to read or be briefed on the findings of the CNA study. If confirmed, I commit to reviewing the study and working with the Judge Advocate General of the Navy, the Chief of Naval Operations, and the Commandant of the Marine Corps to ensure that the Secretary is fully informed about

the legal manpower requirements of Marine combat units and the resourcing of the Navy Judge Advocate General's Corps.

Question. What is your understanding of the sufficiency of the number of active-duty judge advocates in the Marine Corps to provide legal support for all the Marine Corps' missions?

Answer. If confirmed, I will work with the Staff Judge Advocate to the Commandant, and with the Deputy Commandant for Manpower, to ensure that Secretary of the Navy and I are fully informed about the legal manpower requirements for Marine Corps missions.

Question. If confirmed, will you review the judge advocate manning within the Navy and Marine Corps and determine whether current active-duty strengths are adequate?

Answer. I will.

ACTIVE-DUTY END STRENGTH

Question. In its 2010 budget submission, the administration and the Navy requested a permanent end strength of 324,400 in the base budget, and a temporary emergency end strength of 4,400 in the OCO request. This additional 4,400 sailors was the only end strength of any service funded in the OCO request.

Is a permanent active-duty end strength of 324,400, in your view, sufficient to allow the Navy to accomplish its numerous missions going forward?

Answer. Determining the appropriate active-duty end strength is a critically important issue, and one that I am very concerned about. I have not, however, had an opportunity to be fully briefed on projections for permanent active-duty end strength for the Navy's future mission requirements. If confirmed, I intend to work with the Chief of Naval Personnel to ensure that we determine the right size of the military force.

Question. Does the Navy consider this 4,400 increase to be surplus to its permanent and enduring requirements and temporary in nature, or is this manpower the Navy will need for the foreseeable future?

Answer. It is my understanding that Navy requested the 4,400 increase to provide support to OCO and not as a permanent increase. If confirmed, I commit to continuously review both permanent end strength requirements for Navy missions as well as to monitor temporary OCO requirements to ensure the Department's budget requests provide the administration and Congress a clear understanding of manpower needs.

NAVY AND MARINE CORPS RECRUITING AND RETENTION

Question. Recruiting and retention of quality sailors and marines, officer and enlisted, Active-Duty and Reserve, is vital to the Department of the Navy.

How would you evaluate the status of the Navy and Marine Corps in successfully recruiting and retaining high caliber personnel?

Answer. The Navy and Marine Corps enjoy continued success in recruiting and retaining exceptionally well-qualified personnel. It is my understanding that both the Navy and Marine Corps continue to meet all recruiting goals through the efforts of a strong, well-resourced recruiter force. Once a sailor or marine joins the Service, success in retention requires that we provide world class benefits to Navy families that are appropriate to a world class force.

Question. What initiatives would you take, if confirmed, to further improve the attractiveness of Navy and Marine Corps, Active-Duty and Reserve service?

Answer. I have not had an opportunity to be briefed on initiatives that are in development, but if confirmed I commit to a vigorous review of the entire spectrum of tools available to the Navy and Marine Corps to ensure that as the economy improves we will be able to continue to recruit and retain the talented people who value service and are willing to serve.

MEDICAL PERSONNEL RECRUITING AND RETENTION

Question. The Navy is facing shortages in critically needed medical personnel in both the Active and Reserve components. The committee is concerned that growing medical support requirements will compound the already serious challenges faced in recruitment and retention of medical, dental, nurse, and behavioral health personnel.

If confirmed, will you undertake a comprehensive review of the medical support requirements for the Navy and the sufficiency of the plans to meet recruiting and retention goals in these specialties?

Answer. I will. Nothing is more important to our sailors, marines, and their families than to ensure that they receive ready access to world class medical care.

Question. What legislative and policy initiatives, including bonuses and special pays, do you think may be necessary to ensure that the Navy can continue to meet medical support requirements?

Answer. I have not had an opportunity to be briefed on the Department's legislative and policy initiatives, but I am committed to fully evaluating all such initiatives to ensure that the Navy will be positioned to compete for the best medical, dental, nurse and behavioral health personnel available.

REPORT OF THE DOD TASK FORCE ON MENTAL HEALTH

Question. The DOD Task Force on Mental Health found that the stigma surrounding post-traumatic stress disorder and other mental health issues acts as a barrier to many servicemembers seeking the help that they need. Additionally, the Task Force found that there are significant issues with accessibility and numbers of mental health providers, stating that the "military system does not have enough fiscal or personnel resources to adequately support the psychological health of servicemembers and their families."

If confirmed, what actions would you take to ensure that appropriate numbers of mental health resources are available to sailors and marines in theater, and to them and their families upon return to home station?

Answer. If confirmed, I will strongly advocate ensuring adequate mental health resources are available in theater as well as upon their return from deployment.

Question. What actions should senior leaders take to erase the stigma associated with seeking mental health care?

Answer. The psychological health of our servicemembers and their families is a critical readiness factor. Senior leaders must take the lead in creating a new perception that seeking help demonstrates courage and thereby reduce any perceived stigma.

OPERATIONAL AND PERSONNEL TEMPO

Question. Current DOD policy is that Active component personnel will have 2 years of dwell time for each year of deployment and that Reserve component members have 5 years of dwell time for each year they are mobilized.

What is your view of the achievability of this goal? What measures must be taken by the Navy and Marine Corps to be able to achieve it in 5 years or less?

Answer. The Marine Corps' achievement of an end strength of 202,000, accomplished some 3 years early, will give us the capacity to reach this goal. If confirmed, I will make it a priority to continue the Department's objective of attaining the 2:1 dwell time.

Question. In your view, how will shifting resources from Iraq to Afghanistan affect dwell-time ratios?

Answer. I have not been fully briefed on the impact of shifting resources from Iraq to Afghanistan. If confirmed, I will review this issue.

Question. What is your assessment of the Navy and Marine Corps' ability to support scheduled troop rotation planning in 2009 and beyond, particularly in combat support and combat service support missions, given this goal?

Answer. I have not been fully briefed on the impact of these scheduled troop rotations. If confirmed, I will review this issue.

Question. In your view, what will be the effect on recruiting, retention, and readiness of the Navy and Marine Corps of the current rates of operations and personnel tempo through 2010?

Answer. It is my understanding that the Navy and Marine Corps enjoy continued success in recruiting and retention. If confirmed, I will work with the Chief of Naval Operations and the Commandant of the Marine Corps to ensure naval service remains attractive to prospective recruits and that sailors, marines, and families receive the support they need to continue serving while operation and personnel tempo remain high. We must prepare for increased competition for the Nation's best and brightest, when the Nations' economy improves, by continuing our commitment to a ready, resourced recruiting force.

MOBILIZATION AND DEMOBILIZATION

Question. In the aftermath of the attacks of September 11, 2001, the Reserve components have experienced their largest and most sustained employment since World War II. Numerous problems arose in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical readiness monitoring, errors due to antiquated pay systems, limited transition assistance programs upon demobilization, and lack of access to members of the Individual Ready Reserve. Reserve Force management policies and systems have been characterized in

the past as “inefficient and rigid” and readiness levels have been adversely affected by equipment stay-behind, cross-leveling, and reset policies.

What is your assessment of advances made in improving Navy Reserve and Marine Corps Reserve mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. As I understand it, the Navy and Marine Corps have continued to modify, and where necessary improve, the activation process for Reserve component sailors and marines in order to best support these deploying personnel while at the same time meeting the combatant commander and gaining commander requirements. These processes are evaluated on a continual basis to best meet the needs of sailors and marines and the dynamic requirements of gaining commands.

Question. What do you consider to be the most significant enduring changes to the administration of the Navy Reserve and Marine Corps Reserve aimed at ensuring their readiness for future mobilization requirements?

Answer. As an officer in the Navy Reserve I am aware that prior to September 11, 2001, the Navy already had initiatives underway to enhance integration between the Active and Reserve components. The events of September 11 and OIF and OEF focused greater attention on these initiatives resulting in an enhanced, integrated Total Force. In my view, recent operations have emphasized the readiness and capability of the Reserve component.

Question. Do you see a need to modify current statutory authorities for the mobilization of members of the Reserves?

Answer. I am not aware of any needed modifications to statutory authority for mobilization of the Reserves. If additional authorities or modifications were required, I would recommend those changes to the Secretary of the Navy.

Question. Do you believe that Reserve personnel should be mobilized to serve in lieu of civilians in Afghanistan?

Answer. It is my understanding that marines and sailors are mobilized to meet combatant commander requirements as validated by the Joint Staff and the Secretary of Defense. If confirmed I would advocate utilization of our Reserve component consistent with those validated requirements and our commitment to dwell-time standards.

INDIVIDUAL READY RESERVE

Question. DOD established a policy in 2005 mandating the discharge of officers in the Individual Ready Reserve (IRR) who are beyond their military service obligations (MSO) unless the officer positively elects to remain in the IRR. Meanwhile, the Commission on the National Guard and Reserves has found that accessing the IRR as a viable source of manpower for the war has been problematic, and that using the IRR as a solution for unit manning is a failed concept.

What are your views on the proper role of the IRR in Navy and Marine Corps force management planning?

Answer. I have not had an opportunity to review the Commission on the National Guard and Reserves report to understand the specific problems identified. If confirmed I commit to assessing the effectiveness of the IRR as it relates to Navy and Marine Corps support to combatant commanders.

Question. If confirmed, what changes, if any, do you foresee proposing to the Navy and Marine Corps IRR recall policy?

Answer. My understanding is that Federal law stipulates that all members of the Individual Ready Reserve (IRR) are eligible for involuntary recall to active duty. I have not been briefed on the need to change any policy or policies currently associated with the IRR.

Question. What are your views about policies affecting continued service by officer and enlisted personnel in the Reserve components who have fulfilled their MSO?

Answer. I believe our military is built on the strength of volunteers and I wholly support the continued service of all those that are willing, fit and ready to serve consistent with the needs of the Services and the requirements of the law.

Question. What is your assessment of the adequacy of the system in place for members in the IRR receiving orders to active duty to request a delay or exemption for that activation, including the procedures in place for appealing a decision on that request?

Answer. My understanding is that the Services and DOD have established policies and systems in place to allow all reservists, including IRR members recalled to Active Duty to apply for delays, deferments, or exemptions from mobilization.

Question. What is your assessment of the value of the IRR to the Navy and Marine Corps All-Volunteer Force?

Answer. The IRR represents a valuable pool of experienced sailors and marines for our Nation's defense. If confirmed, I will evaluate the mobilization and demobilization processes for the IRR to ensure that sailors and marines willing and able to serve are permitted to do so.

MEDICAL AND DENTAL READINESS OF NAVY AND MARINE CORPS RESERVE PERSONNEL

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Reserves?

Answer. As an officer in the Navy Reserve, I recognize medical and dental readiness as essential to our mission. The best trained Reserve sailors and marines are unable to perform their missions if they lack essential medical and dental readiness. If confirmed, I will use my experience and all available resources to evaluate current readiness reporting processes to ensure our Nation has the warfighting capability that our Reserve sailors and marines are trained to provide.

Question. How would you improve upon the Navy and Marine Corps' ability to produce a healthy and fit Reserve component?

Answer. If confirmed, I will use my experience as a Navy Reserve officer to fully inform my review of the Reserve component with the goal of improving the health and fitness of the Reserve component, as well as ensuring accurate and timely accounting from our medical component.

LESSONS LEARNED

Question. What do you believe are the major personnel lessons learned from OEF and OIF which you would seek to address if confirmed as Assistant Secretary of the Navy for Manpower and Reserve Affairs?

Answer. I am confident that there are valuable personnel lessons learned from OEF and OIF. The sacrifices of our sailors and marines, and their families in support of these operations were made at great cost. If confirmed, I will seek out and review these hardearned lessons learned with senior leaders within the Department of the Navy.

TRICARE FEE INCREASES FOR MILITARY RETIREES

Question. Secretary Gates recently told officers at the Air War College that "health care is eating the (Defense) Department alive."

How do you interpret this statement and do you agree with the Secretary's assessment?

Answer. I interpret Secretary Gates' comments to be an acknowledgement of the huge cost associated with the Departments' overall medical care expenses. I understand his concerns. I have had the privilege to receive military medical care for most of my life. The medical care that is provided is of a very high quality. This care, however, comes at a substantial cost to the overall DOD budget.

Question. What is your view of the need for increased beneficiary payments in reducing overall health care costs to the Department?

Answer. The Department should consider all available options in order to confront the rising cost of military health care. Certainly, increasing the beneficiary payments would reduce the costs. However, this may also have an adverse impact upon those beneficiaries. Health care is a significant benefit to our military servicemembers and their families, earned with sweat and often blood, and any change must be thoroughly analyzed and carefully communicated.

Question. What other reforms in infrastructure, benefits, or benefit management, if any, do you think should be examined in order to control the costs of military health care?

Answer. I will support efforts by DOD to responsibly control the costs of military health care.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel, and related entitlement spending continue to increase rapidly and are becoming an ever increasing portion of the DOD budget.

If confirmed, what actions will you take to control the rise in personnel costs and entitlement spending?

Answer. Personnel costs represent the largest part of the Department's budget. One of the keys to controlling personnel costs is to operate as efficiently and effec-

tively as possible with respect to utilization of personnel. It is critical that we apportion that part of the budget devoted to personnel to benefits that deliver the best value to naval personnel while being good stewards of the taxpayer's dollar.

If confirmed, I will strive to do this while also seeking to find new options and approaches to address the rising personnel costs and work with Congress, the Secretary of Defense and the Secretary of the Navy to address this critical matter.

Question. If confirmed, what actions will you take to avoid a requirement for multimillion dollar end-of-year reprogramming to cover personnel costs?

Answer. If confirmed, I will examine the processes and requirements associated with personnel costs to determine what actions may be taken to reduce this reliance upon end-of-year reprogramming.

FAMILY READINESS

Question. Military members and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of growing concerns among military families as a result of the stress of frequent deployments and the long separations that go with them.

In your view, what are the key indicators of the stress on Navy and Marine Corps families at this time?

Answer. There are a number of tangible indicators of stress on our military families reflecting the impact of 7 years of wartime operations. These range from financial hardship, marital difficulties, psychological problems for children, to the most tragic imaginable, a member taking their own life. I intend to do everything possible to responsibly address the need for services and the demand for support programs by Navy and Marine Corps families.

Question. If confirmed, what will you do to address these key indicators?

Answer. I have personally experienced the impact of extended deployments, both as the deployer and as a dependent. If confirmed, I will work to ensure these resources are available to our families experiencing the effects of frequent deployments. Additionally, I will continue to advocate consistent standardized quality family support and child and youth programs.

Question. What do you consider to be the most important family readiness issue for sailors and marines and their families?

Answer. I consider all family readiness issues to be important, but obviously the most dramatic and tragic are mental health issues that may result in suicide. If confirmed, I will focus on Navy and Marine Corps family readiness programs, and will strive to meet all family readiness needs throughout the Navy-Marine Corps team. However, I intend to pay particular attention to suicide risks and take every reasonable measure to reduce them.

Question. What challenges do you foresee in sustaining quality of life programs, and are there new initiatives that you would undertake, if confirmed, to ensure the availability of high quality services, including child care, education, and recreational opportunities for sailors and marines and their families?

Answer. While fiscal challenges threaten Navy and Marine Corps quality of life programs, sustaining our current accredited programs will be a priority. If confirmed, I will work with the Chief of Naval Operations and Commandant of the Marine Corps to maintain focus and commitment to programs that support the quality of life needs of all naval personnel and their families.

Question. If confirmed, how would you ensure support for Reserve component families, particularly those who do not reside near an active-duty military installation, related to mobilization, deployment, and family readiness?

Answer. If confirmed, I intend to work with the Secretary of the Navy and the other military Services to maintain focus and commitment to the quality of life needs of all personnel, regardless of where they live.

Question. In your view, what progress has been made, and what actions need to be taken in the Navy and Marine Corps to provide increased employment opportunities for military spouses?

Answer. Military spouse employment is a readiness and quality of life issue and a top priority for the Department of the Navy. Significant progress has been made through State and Congressional support for our military spouses through alternative certifications and reciprocal agreements. I will consider a number of options, to include assessing whether allowing spouses to use FPO addresses will improve their ability to engage in home businesses.

Question. If confirmed, what additional steps would you take to ensure that family readiness needs, including child care, are addressed and adequately resourced?

Answer. We will continue to utilize feedback mechanisms from sailors, marines, and their families to address their concerns. If confirmed, I will work to ensure that effective and innovative Quality of Life programs including Child Development Centers that our sailors, marines, and their families rely on, remain resourced and a priority for Department of the Navy. Again, as someone who has both utilized such Development Centers for my children, and as a military child myself, I appreciate the importance of such facilities.

SUPPORT FOR SINGLE SAILORS AND MARINES

Question. While the percentage of married sailors and marines has steadily increased, a substantial portion of them, especially young sailors and marines, are single.

What are the unique support needs of single sailors and marines, especially those returning from combat?

Answer. My military experience has convinced me that all single sailor support needs are not alike. In many ways, their needs differ depending upon seniority. Many junior single personnel are away from their families for the first time and need life skills to adjust to living on their own. More senior single personnel live in the community and may be significantly impacted by a deployment since there is no one to care for their household. They may not have a support structure to monitor their well-being upon their return from combat operations or deployment.

Question. If confirmed, what would you do to address these needs?

Answer. If confirmed, I would continue to emphasize the availability of Fleet and Family Support Centers and the Marine and Family Support Centers resources and services to all of our sailors and marines. The importance of continuing the efforts put in place to engage a single servicemember's preferred point of contact during a single sailor's or marine's deployment remains important and cannot be over-emphasized.

NATIONAL SECURITY PERSONNEL SYSTEM

Question. Section 1106 of the National Defense Authorization Act for Fiscal Year 2008 restored the collective bargaining rights of civilian employees included in the National Security Personnel System (NSPS) established by DOD pursuant to section 9902 of title 5, U.S.C. Under section 1106, the Department retains the authority to establish a new performance management system (including pay for performance) and streamlined practices for hiring and promotion of civilian employees. Senior DOD officials have stated that they do not intend to expand NSPS to include employees in bargaining units that are represented by employee unions.

What is your view of the NSPS, as currently constituted?

Answer. I have had limited opportunity to fully evaluate the NSPS system. It is my understanding that the Department is currently reviewing the programs, policies and practices of NSPS. It seems prudent to allow this review to be completed prior to altering or eliminating the system. Regardless, it is critical for the Department to have a comprehensive system for employee management which provides accountability, flexibility and is mission-driven to incorporate pay for employee performance.

Question. Do you support the pay-for-performance approach adopted for civilian employees in the NSPS?

Answer. Yes. Appropriately compensating our workforce for their performance is essential. While I am familiarizing myself with the specifics of the NSPS pay-for-performance program, it seems reasonable to establish a clear relationship between the organization's mission and the work performed.

Question. Do you believe that the Department needs streamlined authority for hiring and promotion of civilian employees to meet its human capital needs?

Answer. Expedited hiring authority is an exceptional tool in the recruiting process and in building a strong public workforce. If confirmed, I would pursue expedited hiring authority for critical positions.

Question. In your view, is it viable in the long run for DOD to maintain two separate systems (NSPS and the General Schedule) for its civilian employees?

Answer. Currently, there are a number of personnel management systems operating within our workforce, including NSPS and the GS. If confirmed, I will review all of them before making recommendations on what is optimal to achieve mission.

Question. What changes, if any, would you recommend to the NSPS authorizing legislation?

Answer. I have no specific legislative change to propose at this time. I believe that it is important to wait for the final report and recommendations of the ongoing Department review of NSPS policies, regulations and practices.

Question. What changes, if any, would you recommend to the NSPS regulations?

Answer. I have no specific regulatory changes to propose at this time. It is important to wait for, and subsequently evaluate, the final report and recommendations of the ongoing Department review, as well as any additional legislative changes to determine what new regulations would be appropriate.

BALANCE BETWEEN CIVILIAN EMPLOYEES AND CONTRACTOR EMPLOYEES

Question. In recent years, DOD and the Department of the Navy have become increasingly reliant on services provided by contractors. Over the past 8 years, DOD's civilian workforce has remained essentially unchanged in size. Over the same period, the DOD's spending on contract services has more than doubled, with the estimated number of contractor employees working for the Department increasing from an estimated 730,000 in fiscal year 2000 to an estimated 1,550,000 in fiscal year 2007. As a result of the explosive growth in service contracts, contractors now play an integral role in the performance of functions that were once performed exclusively by government employees, including the management and oversight of weapons programs, the development of policies, the development of public relations strategies, and even the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as Federal employees.

Do you believe that the current balance between civilian employees and contractor employees is in the best interests of the Department of the Navy (DON)?

Answer. The DON "Smart Work" initiative contracted out certain tasks and duties, thereby freeing up permanent personnel. This was an understandable and admirable initiative. However, over time it may have gone too far. If confirmed, I will revisit this issue and look for every opportunity to "in source" where it would increase efficiencies. I am committed to achieving the optimal mix of military, Federal-civilian, and contractor personnel and to be better stewards of taxpayer resources.

Question. In your view, has the DON become too reliant on contractors to perform its basic functions?

Answer. It would be unwise to assume that contracting out all critical readiness capabilities is the most prudent route to steward scarce resources. If confirmed, I am committed to reviewing the current balance and establishing the process necessary to analyze the costs and benefits of contracting.

Question. Do you believe that the current extensive use of personal services contracts is in the best interests of the DON?

Answer. Similar to my concerns regarding contractors, it is unwise to assume that the use of personal service contracts is always the best route to addressing our needs in light of limited resources. If confirmed, I am committed to reviewing the current balance and establishing the processes necessary to analyze the costs and benefits of these types of contracts.

Question. Do you believe that the DON should undertake a comprehensive reappraisal of "inherently governmental functions" and other critical government functions, and how they are performed?

Answer. It is always in our best interest to carefully review the direct, indirect and potentially unintended consequences of a decision to contract out functions that may be considered inherently governmental. If confirmed, I am committed to establishing the processes necessary to perform this analysis.

Question. If confirmed, will you work with other appropriate officials in the DON to address these issues?

Answer. Yes.

Question. One reason for the explosive growth in DOD's contractor workforce has been the continuing limitation placed on the number of civilian employees of DOD. Rather than saving money as intended, this limitation has shifted all growth to contractor employees. Would you agree that the balance between civilian employees and contractor employees in performing DON functions should be determined by the best interests of the DON and not by artificial constraints on the number of civilian employees?

Answer. Yes.

Question. If confirmed, will you work to remove any artificial constraints placed on the size of the DON's civilian workforce, so that the number of employees most appropriate to accomplish its mission can be hired?

Answer. Yes.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. Numerous cases of sexual misconduct involving servicemembers at home station and in Iraq, Kuwait, and Afghanistan have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They asserted that the military failed to respond appropriately by providing basic services, including medical attention and criminal investigation of their charges.

What is your evaluation of the progress to date by the Navy and the Marine Corps to prevent additional sexual assaults at home station as well as deployed locations?

Answer. If confirmed, I will be guided by the fact that American families have entrusted us to care for their sons and daughters. I will not allow these young patriots to be victimized by their own. The Navy and Marine Corps have undertaken several important measures to strengthen the prevention and response to sexual assaults. Although I have not had an opportunity to fully review these programs, as a Navy Commander, I know these programs are critically important. If confirmed, I will have no greater priority or responsibility.

Question. What is your view of the adequacy of the training and resources the Navy and Marine Corps have in place to investigate and respond to allegations of sexual assault?

Answer. If confirmed, I will evaluate the current training and resources to ensure Department of the Navy investigative organizations have the ability to respond swiftly and appropriately to address all allegations of sexual assault.

Question. What is your understanding of the resources and programs the Navy and Marine Corps have in place in deployed locations to offer victims of sexual assaults the medical, psychological, and legal help that they need?

Answer. As a deploying force, Navy and Marine Corps units offer victim protection and support with victim advocates on board as well as additional assistance through 'reach back' capability. Services maintain close coordination to ensure support in joint units. NCIS also deploys to the combat areas special agents who are trained in investigating sexual assaults.

Question. Do you consider the Department of the Navy's current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. Confidentiality and restricted reporting of sexual assaults are critical. If confirmed, I commit to ensuring effective policies are implemented and enforced.

Question. What problems, if any, are you aware of in the manner in which the confidential reporting procedures have been put into effect?

Answer. It is imperative to strike the right balance between the legitimate interests of the victim of sexual assault who makes a confidential report, the Navy Commander who is responsible for the welfare of the victim, and the interests of the military justice system which seeks resolution. In my view, Navy leaders must continue to reconcile these competing interests.

Question. If confirmed, what actions would you take to ensure that senior civilian leaders of the Department of the Navy have ongoing visibility into incidents of sexual assault and the effectiveness of policies aimed at preventing and responding appropriately to such incidents?

Answer. If confirmed, I will evaluate the current reporting and response systems to determine if any modifications would improve the visibility for senior leadership.

PREVENTING SEXUAL HARASSMENT AND VIOLENCE

Question. The Defense Task Force on Sexual Harassment and Violence at the Military Service Academies reported that "Historically, sexual harassment and sexual assault have been inadequately addressed at the Service Academies. Harassment is the more prevalent and corrosive problem, creating an environment in which sexual assault is more likely to occur. Although progress has been made, hostile attitudes and inappropriate actions toward women, and the toleration of these by some cadets and midshipmen, continue to hinder the establishment of a safe and professional environment in which to prepare military officers. Much of the solution to preventing this behavior rests with cadets and midshipmen themselves."

What is your assessment of the policies and procedures at the U.S. Naval Academy to prevent and respond appropriately to sexual assaults and sexual harassment and to ensure essential oversight?

Answer. As a critical source for future Naval Officers, it is essential to ensure that midshipmen are trained in a culture that fosters respect and rejects sexual harassment and assault. If confirmed, I will work with the Superintendent of the Naval Academy to ensure the strongest, most response-oriented programs are in place.

Question. If confirmed, what actions would you take to encourage not only midshipmen but also all sailors and marines to step up to their responsibility to create a culture where sexual harassment and sexual assault are not tolerated?

Answer. Both the Navy and the Marine Corps continue to stress their unequivocal position that sexual assault is completely at odds with their core values—and that all sailors and marines are honor bound to step up, step in, and take personal responsibility for preventing sexual assault and holding offenders accountable.

Question. If confirmed, what other actions would you take to address the problem of sexual harassment and sexual assault in the Navy and Marine Corps?

Answer. If confirmed, I will ensure that every individual and organization under my office has access to the training and tools essential to promote a culture consistent with Navy and Marine Corps values.

RELIGIOUS GUIDELINES

Question. What is your understanding of current policies and programs of DOD and the Department of the Navy regarding religious practices in the military?

Answer. It is my understanding that DOD and the Department of the Navy have placed a high value on the rights of members of the military Services to worship according to the dictates of their individual beliefs. From my experience at sea, I know the lengths our Service goes to accommodate all faiths. These policies have been created in order to comply with the First Amendment to the Constitution and Federal law.

Question. Do these policies accommodate, where appropriate, religious practices that require adherents to wear particular forms of dress or other articles of religious significance?

Answer. Yes. DOD policy requires that the accommodation of religious practices be approved by commanders who strike the appropriate balance between accommodation and ensuring there is no adverse impact on mission accomplishment, military readiness, unit cohesion, standards or discipline.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. Yes.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. Yes. Tolerance, inclusiveness, and mutual respect guide Navy policy and practice in order to balance the rights of chaplains and those of many diverse faiths or non-faiths who attend formal and informal functions.

Question. What is your assessment of the policies and procedures at the U.S. Naval Academy to ensure religious tolerance and respect?

Answer. I have not had an opportunity to focus specifically on the policies and procedures at the Naval Academy in this regard. I would expect that the policies and procedures of the Naval Academy would align with the First Amendment to the Constitution, Federal law, and the policies of DOD.

SUICIDE PREVENTION

Question. The committee is concerned about the increasing rate of suicides in the Navy.

In your view, what is the cause of this increase in suicides?

Answer. Factors commonly associated with Navy and Marine suicides include multiple life stressors such as problems in relationships or work, administrative or legal actions and physical health concerns. Additionally, mental health problems, alcohol and substance abuse increase suicide risk. Preventing suicides requires preventing life problems, when possible, or resolving them before the problems escalate into suicidal thinking.

Question. What is your assessment of the Navy's response to this increase in suicides?

Answer. While I have not been fully briefed on the Navy's response to the increase, I am aware that the Navy has taken a proactive approach to suicide prevention with primary focus on building resilience through the Navy's Operational Stress Control Program, now in its early phases. If confirmed, I intend to leverage all tools available to improve the quality and access to such programs, to reduce the stigma associated with seeking mental health treatment, and to consider new programs to

help families and units deal with the trauma of these devastating acts. There is much to be done and efforts will require continued support.

FOREIGN LANGUAGE PROFICIENCY

Question. A Foreign Language Transformation Roadmap announced by DOD on March 30, 2005, directed a series of actions aimed at transforming the Department's foreign language capabilities, to include revision of policy and doctrine, building a capabilities based requirements process, and enhancing foreign language capability for both military and civilian personnel. More recently, Congress authorized incentive pay for members of precommissioning programs to study critical foreign languages.

In your view, what should be the priorities of the Federal Government to expanding the foreign language skills of civilian and military personnel and improving coordination of foreign language programs and activities among the Federal agencies?

Answer. Foreign language proficiency is an invaluable skill for the Department of the Navy. This is especially true in many of our mission critical occupations. If confirmed, I will make it a priority to identify the foreign language training available for the workforce and to establish a baseline from which to begin a review of potential training gaps. In this effort, it only makes sense to attempt to harness the expertise attained by other Federal agencies through a coordinated approach.

Question. If confirmed, what steps would you take to identify foreign language requirements, and to design military and civilian personnel policies and programs to fill those gaps?

Answer. I am not currently familiar with the Department's programs to attain foreign language proficiencies. If confirmed, my first step would be to review determinations of any assessments of foreign language requirements. I will need to see how they relate to language proficiency and cultural awareness in the force. Next, I will review our current capabilities in light of these requirements and analyze potential options to ensure that the capabilities meet the requirements.

Question. What is your assessment of an appropriate time frame within which results can be realized in this critical area?

Answer. Based upon my limited knowledge of the Department's programs in this regard, I am unable to provide a timeline at this time. If confirmed, however, I will work closely with members of the Committee to achieve results in the greatest possible time.

LEGISLATIVE FELLOWSHIP PROGRAM

Question. Each year, the Services assign mid-career officers to the offices of Members of Congress under the legislative fellows program. Upon completion of their legislative fellowships, officers are required to be assigned to follow-on positions in their Services in which they effectively use the experience and knowledge they gained during their fellowships.

What is your assessment of the value of the legislative fellows program to the Navy and the DON's compliance with utilization and assignment policies for officers who have served as legislative fellows?

Answer. My experience as a Naval Reserve officer and as a former White House Fellow convinces me that officers selected for fellowships receive invaluable insights from their assignments. I also believe that the military benefits greatly when those officers return to serve in post-fellowship utilization tours. The needs of the Navy and officer's professional development as well as career progression are both well served when these officers are able to take their experience as fellows to follow on assignments.

DEFENSE INTEGRATED MILITARY HUMAN RESOURCES SYSTEM

Question. Defense Integrated Military Human Resources System (DIMHRS) is a single integrated human resources pay and personnel system for all the armed services and the Defense Finance and Accounting System (DFAS), and is intended to replace many of the systems currently used to perform personnel management and pay functions. DIMHRS, which has been under development for several years, has come under criticism for cost growth, delays in implementation, and failure to meet the expectations of each Service.

What is your assessment of the need for an integrated, cross-service personnel and pay system?

Answer. I have not been fully briefed on the DIMHRS program or its impact on the Navy and Marine Corps. If confirmed, I will make it a priority to understand the potential options available under this system and the impact to personnel management and pay.

Question. What are your views of the need for completion of implementation of DIMHRS and what specific benefits, if any, would the Department of the Navy derive from this system?

Answer. The Department needs a comprehensive human resources system to enable rapid, accurate and accessible personnel information that will support the full range of our Navy and Marine Corps operational environments.

Question. What is your understanding of the Navy and Marine Corps positions with respect to the utility of DIMHRS and its suitability for sailors and marines?

Answer. I have not been briefed on the Department's position.

Question. Do the Navy and Marine Corps intend to implement DIMHRS when it is operationally ready?

Answer. I have not been sufficiently briefed on the Department's current plans regarding the implementation of DIMHRS.

Question. If confirmed, what changes, if any, would you recommend to the implementation schedule and process currently in place?

Answer. I have not been briefed upon the implementation schedule and am not in a position to make such a recommendation.

GI BILL BENEFITS

Question. Last year, Congress passed the Post-September 11 Veterans Educational Assistance Act that created enhanced educational benefits for servicemembers who have served at least 90 days on Active Duty since September 11. The maximum benefit would roughly cover the cost of a college education at any public university in the country.

What is your assessment of the effect of the act on recruiting and retention of sailors and marines and on nuclear-trained personnel in particular?

Answer. The implementation of this program is very recent, and initial benefits will not begin distribution until next week. Consequently, there is not enough data at this time to provide an accurate assessment of the act's effect on recruiting and retention. Anecdotally, I sense enormous enthusiasm from sailors and marines about the program, particularly the transferability component.

Question. What is your understanding of the sufficiency of the implementation plan in the DON for the transferability provisions contained in the act?

Answer. It is my understanding that the Department of Navy has successfully implemented the transferability provisions contained in the act. As part of my oversight role, if confirmed, I will monitor this on a regular basis.

QUADRENNIAL REVIEW OF MILITARY COMPENSATION

Question. The Department has completed the 10th Quadrennial Review of Military Compensation (QRMC), releasing Volume I of its report in February 2008 and Volume II in July 2008. Among other recommendations, the QRMC proposes a new defined benefit retirement plan that more resembles the benefits available under the Federal Employees Retirement System than the current military retirement benefit; increasing TRICARE fees for retirees; and the adoption of dependent care and flexible spending accounts for servicemembers.

What is your assessment of the QRMC recommendations, particularly the proposed new defined retirement plan?

Answer. I have not had an opportunity to review the QRMC. I recognize the need to evaluate the merits of a defined benefit retirement plan and related programs for our military retirees and their families. If confirmed, I will thoroughly review the QRMC to better understand their recommendations.

Question. Do you believe the Department of the Navy should offer dependent care and flexible spending accounts to sailors and marines?

Answer. I recognize the importance of providing a mechanism for families to build savings for dependent care. The adoption of dependent care and flexible spending accounts should be evaluated as options in a comprehensive review of potential programs to further assist families as well as to build additional incentives for the recruitment and retention of our military personnel.

MANAGEMENT AND DEVELOPMENT OF THE SENIOR EXECUTIVE SERVICE

Question. The transformation of the Armed Forces has brought with it an increasing realization of the importance of efficient and forward thinking management of senior executives.

What is your vision for the management and development of the Navy senior executive workforce, especially in the critically important areas of acquisition, financial management, and the scientific and technical fields?

Answer. My vision would be to establish a program to develop a senior civilian workforce with a broad background of skills and experiences, prepared to support the warfighter and respond to changing management requirements of the Department.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of the Navy for Manpower and Reserve Affairs?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided in a timely manner to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR CARL LEVIN

FLEXIBLE SPENDING ACCOUNTS

1. Senator LEVIN. Mr. Garcia, in your answers to the advance policy questions, you state that “dependent care and flexible spending accounts should be evaluated as options . . . to further assist families as well as to build additional incentives for the recruitment and retention of our military personnel.” The Federal Government and most private employers offer these arrangements, which allow employees to pay eligible medical and dependent care expenses on a pre-tax basis. The committee has previously stated its belief that servicemembers should have access to these tools. The Department, in its 2007 report on the matter, stated that no known statutory barriers precluded offering flexible spending arrangements to servicemembers, but for some reason, it has not pursued this benefit. In your view, should the Military Services offer these benefits to servicemembers?

Mr. GARCIA. I believe that the Military Services should consider offering the use of flexible spending accounts as a benefit to military personnel and their families. I am not yet advised as to the prospective pros and cons associated with this type of benefit, but it certainly warrants evaluation. If confirmed, I will review this option and, if beneficial to sailors and their families, find the means to implement it.

QUESTION SUBMITTED BY SENATOR DANIEL K. AKAKA

DIVERSITY IN THE NAVY

2. Senator AKAKA. Mr. Garcia, in a recent interview, Admiral Roughead stated “if you look at the Navy in its entirety, it’s a representative mix of America’s society. But if you look at the leadership, it tends to be very white male.” The Admiral went on to say that it is from diversity that you get different experiences, ideas, and perspectives producing a richness of solutions that you otherwise would not have. What are your thoughts on the diversity within the upper leadership ranks of the Navy, and if confirmed, what would you like to accomplish in this area?

Mr. GARCIA. I agree with Admiral Roughead, and appreciate his leadership in pursuing diversity throughout the Navy, while articulating the need to improve diversity in the upper leadership ranks. To achieve this, the Navy must focus on recruiting, commissioning, mentoring, and retaining highly skilled and qualified junior officers from diverse backgrounds who will lead the Navy in the decades to come.

The Navy has identified a long-term goal of a diverse Flag Corps by year 2037. It is also my understanding that since January 2008, the Navy has made exceptional progress in implementing the necessary measures to do so. The Navy recently established dedicated "City Outreach Officers" in New York, Chicago, Los Angeles, Houston, and Atlanta, to engage within their respective communities where it is believed significant opportunities exist to reach diverse candidates. The newly admitted Naval Academy class of 2013 is the most diverse class in its history with 35 percent of its midshipmen being from minority backgrounds, and 20 percent of the class being female. Additionally, over 30 percent of incoming freshman in Naval ROTC are of minority backgrounds. These initial steps and trends are encouraging for the Navy's long-term diversity goals.

I know that the Navy continues to actively support its internal minority affinity groups, including the National Naval Officers Association, the Association of Naval Service Officers, and the Sea Services Leadership Association, to provide greater visibility to the waterfront on diversity initiatives, venues for mentoring, and camaraderie among peers and across paygrades. Navy leadership is in the forefront of this effort with CNO and other senior Navy leaders attending and leading conferences and events for these affinity groups.

Finally, as the Navy builds a strong cohort of diverse leaders for 2037 and beyond, it must compete to retain these leaders who will be eagerly sought in the private sector.

I am encouraged by the recent efforts taken by the Navy. If confirmed, I am committed to build on this foundation of success. I hope to have the opportunity to work with the Secretary of the Navy and with Congress to identify any areas that require new or enhanced authorities that could be helpful in enabling the Navy to achieve its goal to establish a more diverse leadership.

[The nomination reference of Juan M. Garcia III follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 18, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Juan M. Garcia III, of Texas, to be an Assistant Secretary of the Navy, vice William A. Navas, Jr., resigned.

[The biographical sketch of Juan M. Garcia III, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF JUAN M. GARCIA III

Juan M. Garcia III is an attorney, a former Texas State Representative, and a second-generation naval aviator. Mr. Garcia, whose family hails from South Texas, was born May 27, 1966. He graduated from the University of California, Los Angeles (UCLA) in 1988, and gave the student commencement speech. Mr. Garcia earned a J.D. from Harvard Law School and an M.A. from Harvard's John F. Kennedy School of Government in 1992. After graduation, Mr. Garcia followed in his father's footsteps by joining the Navy, and upon completion of Aviation Officer Candidate School and flight training, Mr. Garcia earned his "Wings of Gold" at Naval Air Station (NAS), Corpus Christi, TX.

Mr. Garcia served in Patrol Squadron 47 out of NAS Barber's Point, HI, and completed deployments to the Persian Gulf and Western Pacific. Mr. Garcia also served overseas as flag aide to the Deputy Commander, U.S. Naval Forces Europe in London, England, deploying as part of Operation Allied Force during hostilities in Kosovo. From 1999 to 2000, Mr. Garcia was one of 16 Americans selected to serve as a White House Fellow, serving as a Special Assistant to the Secretary of Education, the Hon. Richard Riley. Mr. Garcia then reported for sea duty aboard the aircraft carrier USS *Constellation*, serving as the Officer of the Deck. In 2002, Mr. Garcia returned to the air as a flight instructor with Training Squadron 27 at NAS Corpus Christi.

Commander Garcia left Active Duty in 2004, but continues to fly in the Naval Reserve. Mr. Garcia currently serves as the Commanding Officer of Reserve Training Squadron 28 at NAS Corpus Christi.

Mr. Garcia joined the Corpus Christi law firm of Hartline, Dacus, Barger, Dreyer, and Kern as an associate attorney in 2004. In 2006, he was elected to the Texas House of Representatives, and represented the 32nd District from 2007–2009. While in the State house, Mr. Garcia focused on transparency in government and veterans issues.

Mr. Garcia is married to the former Denise Giraldez, a Harvard Law School classmate. The Garcia's have four young children—twin sons, Jack and Luke (11); daughter, Calista Rose (8); and youngest son, Lex (6).

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Juan M. Garcia III in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Juan Manuel Garcia III.

2. **Position to which nominated:**

Assistant Secretary of the Navy, Manpower and Reserve Affairs.

3. **Date of nomination:**

June 18, 2009.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

May 27, 1966; St. Louis, MO.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to former Denise Giraldez.

7. **Names and ages of children:**

Jackson Emiliano Garcia, 11; Lucas Cesar Garcia, 11; Calista Rose Garcia, 8; and Alexander Hector Garcia, 5.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Harvard Law School, 1989–1992, Juris Doctor (June 1992).

John F. Kennedy School of Government, Harvard University, 1988–1992, Masters in Public Policy (June 1992).

University of California, Los Angeles, 1986–1988, Bachelors of Arts (June 1988)
California State University, Fullerton, 1984–1986.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Attorney; Hartline, Dacus, Barger, Dreyer & Kern, LLP Corpus Christi, TX; May 2005–Present.

Naval Aviator; U.S. Naval Reserve, NRVT–28, Naval Air Station Corpus Christi, TX; November 2004–Present.

Texas State Representative, Texas House of Representatives, House District 32; January 2007–January 2009.

Naval Aviator; U.S. Navy, VT–27, Naval Air Station Corpus Christi, TX; October 2002–October 2004.

Naval Aviator; U.S. Navy, USS *Constellation*, Naval Air Station North Island, CA; October 2000–October 2002.

Naval Aviator; U.S. Navy, White House Fellow, Washington DC; September 1999–September 2000.

Naval Aviator; U.S. Navy, U.S. Naval Headquarters, London; September 1998–August 1999.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

U.S. Navy, 1994–1998.

Naval Aviator, U.S. Navy, Naval Air Station Barber's Point, HI; September 1995–September 1998.

Naval Aviator, U.S. Navy, Naval Air Station Jacksonville, FL; February 1995–September 1995.

Student Naval Aviator, U.S. Navy, Naval Air Station Corpus Christi, TX; November 1992–February 1995.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Associate Attorney; Hartline, Dacus, Barger, Dreyer & Kern, LLP; 800 N. Shoreline Blvd, Suite 2000, North Tower; Corpus Christi, TX.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, White House Fellows Foundation

Board of Directors, Texas Lyceum

Member, Corpus Christi Bar Association

Member, Texas Bar Association

Member, Federal Bar, Southern District, Texas

Member, PTA, Luther Jones Elementary School, Corpus Christi, TX.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

Texas House of Representatives-District 32, 2007–2009.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Texas House of Representatives-District 32, 2007–2009

Selected as a National Delegate, 2008 Democratic Convention.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Barack Obama for President, \$2,300; 2008.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

White House Fellowship, 1999–2000

Military Awards:

Navy and Marine Corps Commendation Medal (twice)

Joint Service Commendation Medal (twice)

Navy and Marine Corps Achievement Medal

Navy League, Honolulu Chapter, Junior Officer of the Year, 1998

Victor Astor Memorial Leadership Award, U.S. Naval Institute 2001
 National Hispanic Scholarship Foundation Award
 Knights of Columbus Scholarship
 Dozens of recognition awards from local civic groups in connection to my work as a Texas State representative.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

“Our Hispanic Power and Predicament” Op-Ed, Corpus Christi Caller-Times, September 23, 1999

“Immigrant Showed Amazing Courage Under Fire” Op-Ed, Corpus Christi Caller-Times, February 14, 2000 “Africa, A Tragic Continent” Op-Ed, Corpus Christi Caller-Times, June 15, 2000

“What Did George, Al, Dick, and Joe Do in the War” Op-Ed, Corpus Christi Caller-Times, August 13, 2000

“McCain’s Close Call Began in Corpus Christi” Op-Ed, Corpus Christi Caller-Times, September 3, 2000

“Texas House Should Record Critical Votes” Op-Ed, Corpus Christi Caller-Times, November 17, 2006

“VA Hospital Long Overdue for South Texas” Op-Ed, Corpus Christi Caller-Times, February 25, 2007

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Comments for BRAC Summit, Naval Station Ingleside, October 9, 2008.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JUAN M. GARCIA III.

This 22nd day of July, 2009.

[The nomination of Juan M. Garcia III was reported to the Senate by Chairman Levin on August 4, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on September 16, 2009.]

**NOMINATION OF ADM MICHAEL G. MULLEN,
USN, FOR REAPPOINTMENT TO THE GRADE
OF ADMIRAL AND REAPPOINTMENT AS THE
CHAIRMAN OF THE JOINT CHIEFS OF
STAFF**

TUESDAY, SEPTEMBER 15, 2009

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:32 a.m. in room SD-106, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Lieberman, Reed, Akaka, Bill Nelson, E. Benjamin Nelson, Webb, McCaskill, Udall, Hagan, Begich, McCain, Sessions, Chambliss, Graham, Thune, and Collins.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Howard H. Hoege III, counsel; Jessica L. Kingston, research assistant; Gerald K. Leeling, counsel; Peter K. Levine, general counsel; William G.P. Monahan, counsel; Russell L. Shaffer, counsel; and William K. Sutey, professional staff member.

Minority staff members present: Joseph W. Bowab, Republican staff director; Adam J. Barker, professional staff member; Michael V. Kostiw, professional staff member; Daniel A. Lerner, professional staff member; David M. Morriss, minority counsel; Richard F. Walsh, minority counsel; and Dana W. White, professional staff member.

Staff assistants present: Kevin A. Cronin, Jennifer R. Knowles, and Christine G. Lang.

Committee members' assistants present: James Tuite, assistant to Senator Byrd; Vance Serchuk, assistant to Senator Lieberman; Carolyn A. Chuhta, assistant to Senator Reed; Nick Ikeda, assistant to Senator Akaka; Christopher Caple and Madeline Otto, assistants to Senator Bill Nelson; Ann Premer, assistant to Senator Ben Nelson; Nathan Buniva and Patrick Haynes, assistants to Senator Bayh; Gordon I. Peterson, assistant to Senator Webb; Tressa Steffen Guenov and Elizabeth McDermott, assistants to Senator McCaskill; Jennifer Barrett, assistant to Senator Udall; Roger Pena, assistant to Senator Hagan; Brandon Andrews, assistant to Senator Inhofe; Lenwood Landrum and Sandra Luff, assistants to

Senator Sessions; Clyde Taylor IV, assistant to Senator Chambliss; Adam G. Brake, assistant to Senator Graham; Jason Van Beek, assistant to Senator Thune; Erskine W. Wells III, assistant to Senator Wicker; and Rob Eplin and Chip Kennett, assistants to Senator Collins.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Welcome, everybody. Today the committee meets to consider the nomination of Admiral Michael Mullen to a second term as Chairman of the Joint Chiefs of Staff. The team of Secretary Robert Gates and Admiral Mullen has proved and provided excellent leadership and great continuity of leadership across two administrations. Admiral, it is a strong vote of confidence in you that President Obama has put your name forward for a second term. The committee appreciates the service that you have provided and your willingness to continue to serve and to lead.

We also thank your wife Deborah and your family for their support to you and their sacrifices along the way. We know how vital that support is to someone with the responsibilities that you shoulder. On behalf of the committee, please pass along our appreciation to the great soldiers, sailors, airmen, and marines under your command throughout the world and to their families for their dedication and sacrifice.

As he enters into a second term, Admiral Mullen will focus on an array of challenges. Foremost among these is the situation in Afghanistan and Pakistan. While the security situation in Afghanistan is difficult, we still have important advantages there. The Taliban are detested by Afghans, who have experienced life under their brutal regime. The Afghan people know the bleak and hopeless future that the Taliban seeks to impose.

Another strong building block for a successful outcome in Afghanistan is that the Afghan military is a motivated force of proven fighters and is highly respected by the Afghan people. If we take the right steps, we can help ensure that Afghanistan does not revert to a Taliban-dominated government that once again provides a safe haven for al Qaeda to terrorize us and the world.

The Obama administration's new strategy, announced in March, refocusing on securing the Afghan people and partnering with the Afghan security forces, is an important step in reversing the spread of insecurity. The change in strategy has led our forces, in the words of General Stanley McChrystal, to "live, eat, and train together with the Afghan security forces, plan and operate together, depend on one another, and hold each other accountable and treat them as equal partners in success."

General McChrystal's guidance to the troops goes on to say that the success of the Afghan security forces is "our goal." To achieve that goal, I believe we should take several vitally important overdue steps. First, we need a surge in the numbers and strength of the Afghan security forces. We need to expand the Afghan National Army and Afghan National Police well beyond the current target of 134,000 soldiers and 96,000 police personnel by 2010. Most of the members of this committee urged, 4 months ago in a letter, the establishment of a goal of 250,000 Afghan troops and 160,000 Af-

ghan police by 2013. Hopefully, that goal will be adopted and the target set for the end of 2012.

Our own military in Afghanistan has repeatedly pointed to the need for more Afghan forces. As Colonel Bill Hicks, former commander of the Afghan Regional Security Integration Command, put it: "The U.S. force is growing down here, but the Afghan force is not growing nearly as fast. We have people who are bleeding and dying and we need to look hard at how we generate Afghan forces." A Marine company commander in Helmand, Captain Brian Houseman, put it this way: "The lack of Afghan forces is absolutely our Achilles heel."

In the sector of Helmand Province that Senator Reed, Senator Kaufman, and I visited earlier this month, our marines outnumbered Afghan soldiers by five to one.

We've been assured by Afghan Defense Minister Abdul Rahim Wardak that there's no shortage of volunteers to reach this goal. We will need significantly more trainers to achieve this. We asked General Richard Formica, who is in charge of the American effort to train the Afghan security forces, to assess what would be required, including the North Atlantic Treaty Organization (NATO) and U.S. trainers, to meet that timetable. In the meantime, we should also press our NATO allies much harder to provide more trainers.

A larger Afghan military will require more equipment. There needs to be a major, urgent effort to determine these requirements and to transfer equipment coming out of Iraq to Afghan security forces to meet their requirements. A plan for that needs to be developed immediately.

We also need to plan for separating local Taliban fighters from their leaders. In Iraq, large numbers of young Iraqis who had been attacking us switched sides and became the Sons of Iraq. A similar prospect exists in Afghanistan. Afghan leaders and our own military leaders say that local fighters, most of whom are motivated not by ideology or religious zeal, can be brought over to the government's side if offered the right incentives. General McChrystal has said: "There is significant potential to go after what I call mid- and low-level Taliban fighters and leaders and offer them reintegration into Afghanistan."

We can draw on the lessons from the Sons of Iraq in working with Afghan leaders to adopt and implement a plan without delay for turning some enemies into allies in Afghanistan. Such a plan requires assurances of protection and non-retribution, as well as prospects for jobs, including in the Afghan army and police. The potential positive impact of such a concerted effort should be taken into account in considering the need for additional U.S. combat forces.

The Afghan people want to provide for their own security. In a tiny village in Helmand Province, the three of us met with the elders at their village council, or their shura. One hundred or so men sat on the floor and talked with us about their future and their country's future. When asked how long the United States should stay, they said: "Until the minute you make our security forces self-sufficient. Then you will be welcome to visit us, not as soldiers, but as guests."

Providing the resources needed for the Afghan army and Afghan police to become self-sufficient would demonstrate our commitment to the success of a mission that is in our national security interest, while avoiding the risks associated with a larger U.S. footprint. I believe these steps should be urgently implemented before we consider a further increase in U.S. ground combat troops beyond what is already planned to be deployed by the end of the year.

I'm going to place the balance of my statement in the record and call on Senator McCain.

[The prepared statement of Senator Levin follows:]

PREPARED STATEMENT BY SENATOR CARL LEVIN

Welcome. Today the committee meets to consider the nomination of Admiral Michael Mullen for a second term as Chairman of the Joint Chiefs of Staff. The team of Secretary Gates and Admiral Mullen has provided excellent leadership and great continuity of leadership across two administrations. Admiral, it is a strong vote of confidence in you that President Obama has put your name forward for a second term. The committee appreciates the service you have provided and your willingness to continue to serve and lead. We also thank your wife, Deborah, and your family for their support to you and their sacrifices along the way. We know how vital that support is to someone with the responsibilities that you shoulder.

On behalf of the committee, please pass along our appreciation to our great soldiers, sailors, airmen, and marines under your command throughout the world, and to their families, for their dedication and sacrifice.

As he enters a second term, Admiral Mullen will focus on an array of challenges. Foremost among these is the situation in Afghanistan and Pakistan.

The security situation in Afghanistan is serious, and the fight with al Qaeda and the Taliban has reached a crucial stage.

While the security situation there is difficult, we still have important advantages in Afghanistan. The Taliban are detested by Afghans who have experienced life under their brutal regime. The Afghan people know the bleak and hopeless future that the Taliban seeks to impose. Another strong building block for a successful outcome in Afghanistan is that the Afghan military is a motivated force of proven fighters and is highly respected by the Afghan people. If we take the right steps, we can help ensure that Afghanistan does not revert to a Taliban-dominated government that once again provides a safe haven for al Qaeda to terrorize us and the world.

The Obama administration's new strategy announced in March, refocusing on securing the Afghan people and partnering with the Afghan security forces, is a very important step in reversing the spread of insecurity. The change in strategy has led our forces, in the words of General McChrystal, to "live, eat, and train together [with the Afghan security forces], plan and operate together, depend on one another, and hold each other accountable . . . and treat them as equal partners in success." His guidance to the troops goes on to say that the success of the Afghan security forces "is our goal."

To achieve that goal, I believe we should take several vitally important, overdue steps.

First, we need a surge in the numbers and strength of the Afghan security forces. We need to expand the Afghan National Army and the Afghan National Police well beyond the current target of 134,000 soldiers and 96,000 police personnel by 2010. Most of the members of this committee urged 4 months ago the establishments of a goal of 250,000 Afghan troops and 160,000 Afghan police by 2013. Hopefully that goal will finally be adopted and the target set for the end of 2012.

Our own military in Afghanistan has repeatedly pointed to the need for more Afghan forces. As Colonel Bill Hix, former commander of the Afghan Regional Security Integration Command put it, "The U.S. force is growing down here, but the Afghan force is not growing nearly as fast. We have people who are bleeding and dying, and we need to look hard at how we generate [Afghan] forces." A Marine company commander in Helmand, Captain Brian Huysman, put it this way, "[The lack of Afghan forces] is absolutely our Achilles heel."

In the sector of Helmand province Senator Reed, Senator Kaufman and I visited earlier this month, our marines outnumbered Afghan soldiers by 5 to one.

We have been assured by Afghan Defense Minister Wardak that there is no shortage of volunteers to reach this goal. We will need significantly more trainers to achieve this. We asked Major General Formica, who is in charge of the American effort to train the Afghan security forces, to assess what would be required, includ-

ing the North Atlantic Treaty Organization (NATO) and U.S. trainers, to meet that timetable. In the meantime, we should also press our NATO allies much harder to provide more trainers.

A larger Afghan military will require more equipment. There needs to be a major effort to determine these requirements and to transfer equipment coming out of Iraq on an urgent basis to Afghanistan to meet those requirements. There has not yet been a crash effort to transfer a significant part of the enormous amount of equipment coming out of Iraq to the Afghan security forces. A plan needs to be developed immediately.

In addition, we need a plan for separating local Taliban fighters from their leaders. In Iraq, large numbers of young Iraqis who had been attacking us switched sides and became "the Sons of Iraq." That same prospect exists in Afghanistan. Afghan leaders and our military leaders say that local fighters, most of whom are motivated not by ideology or religious zeal but by the need for a job or loyalty to their tribe, can be brought over to the government's side, if offered the right incentives. General McChrystal himself has said, "There is significant potential to go after what I call mid- and low-level Taliban fighters and leaders and offer them re-integration into Afghanistan." We can draw on the lessons from the Sons of Iraq in working with Afghan leaders to adopt and implement a plan without delay for turning some enemies into allies in Afghanistan. Such a plan requires assurances of protection and non-retribution, as well as prospects for jobs, including in the Army and police. The potential positive impact of such a concerted effort should be taken into account in considering the need for additional U.S. combat forces.

The Afghan people want to provide for their own security. In a tiny village in Helmand Province in the south, the three of us met with the elders at their village council, or Shura. One hundred or so men sat on the floor and chatted with us about their future and their country's future. When asked how long the United States should stay, they said, "Until the minute that you make our security forces self-sufficient. Then you will be welcome to visit us, not as soldiers but as guests."

Providing the resources needed for the Afghan Army and Afghan police to become self-sufficient would demonstrate our commitment to the success of a mission that is in our national security interest, while avoiding the risks associated with a larger U.S. footprint. I believe these steps should be urgently implemented before we consider a further increase in U.S. ground combat troops, beyond what is already planned to be deployed by the end of the year.

Pakistan's tribal region along the border with Afghanistan remains a major source of instability for both Afghanistan and Pakistan. There, militant extremists continue to find a safe haven from which to conduct attacks on our forces in Afghanistan and to threaten the security of a democratic Pakistan. Based on our discussions in Islamabad earlier this month, it appears that the Government of Pakistan is recognizing the threat that extremist groups pose to their country's survival. Progress is being made, but more still needs to be done to strengthen Pakistan in its efforts to take on these extremists. It remains an open question whether Pakistan is prepared to go after the Afghan Taliban leadership operating out of Quetta in Pakistan's Baluchistan province or the Haqqani militants in North Waziristan, which is the major source of attacks on our troops in eastern Afghanistan. I hope the Pakistan Government decides to do so promptly.

While the security situation has improved in Iraq, a major challenge remains in the implementation of the U.S.-Iraq security agreement and the transfer of responsibility for Iraq's security to Iraqi forces. The ongoing drawdown of U.S. forces from Iraq represents one of the greatest movements of equipment in history. U.S. equipment in Iraq should be transferred both to ensure that the Iraqi security forces have the minimum capability to meet their internal security needs and, as I mentioned earlier, to meet the requirements of more rapidly growing the Afghan security forces. Approximately 125,000 U.S. troops still remain in Iraq and most will continue to provide security through the Iraqi elections in January.

Numerous other challenges exist. These include: a confrontational Iran which continues to threaten regional stability and advance its nuclear ambitions; North Korea's belligerence; negotiations with Russia on extending the Strategic Arms Reductions Treaty, set to expire this December, and exploring possible U.S.-Russian cooperation on missile defense; and vigilance toward emerging sources of instability and extremism, such as the situation in Yemen. On top of this, the Department is updating the National Military Strategy and conducting the pending Quadrennial Defense and Nuclear Posture Reviews.

Additionally, the tempo of major operations has placed significant stresses and strains on our forces and their families. Improving dwell time and the quality of life of our men and women in uniform remains a priority.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. I thank you, Mr. Chairman, and I join you in welcoming Admiral Mullen and thank him for his service and his family for their support.

Admiral, I believe that you and Secretary Gates have done a superb job and obviously you are extremely well qualified for a second term as Chairman and we're grateful for your long years of service to our country in uniform.

At your last confirmation hearing in July 2007, I made a statement then, and things were certainly not clear as to what we were going to do in Iraq. I said: "There are no easy choices in Iraq and the temptation is to wash our hands of this messy situation. To follow this impulse, however, would portend catastrophe. Withdrawing before there's a stable and legitimate Iraqi authority would turn Iraq into a failed state and a terrorist sanctuary in the heart of the Middle East. We have seen a failed state emerge after U.S. disengagement once before and it cost us terribly. In pre-September 11 Afghanistan, terrorists found sanctuary to train and plan attacks with impunity. We can't make this fatal mistake again."

Despite our successes in Iraq and the hard-won understanding we have gained about what it takes to defeat an insurgency, it seems we now, regrettably, must have the same debate again today with respect to Afghanistan. With all due respect, Senator Levin, I've seen that movie before.

I've been encouraged over the past year by the statements and actions of the President and the unequivocal priority he has placed on achieving success in Afghanistan. In March the President acknowledged that the situation in Afghanistan is "increasingly perilous" and that the future of this troubled nation is inextricably linked to the future of its neighbor Pakistan. To the terrorists who oppose us, his message was: "We will defeat you." The President's approval of increases in troop strength was needed then and I believe even more necessary now.

I've also been impressed, Admiral, by your commitment and that of Secretary Gates to success in Afghanistan. You've been clear that defeating the Afghan and Pakistan Taliban is a necessary component of the President's strategy. General McChrystal, as we know, has completed an assessment of the challenges still standing in the way of meeting the President's strategy, which clearly will be the requirement for increased troops. I want to emphasize, every day we delay in implementing this strategy and increasing the number of troops there, which we all know is vitally needed, puts more and more young Americans who are already there, their lives in danger. I don't think we should do that.

Soon, General McChrystal recommends how many additional troops he thinks are necessary. I hope we won't delay the decision for long and will approve the troop increases that we know are being sought by General McChrystal working with General David Petraeus.

Senator Levin obviously, as he stated, supports a significant acceleration in the growth of the Afghan security forces and an increase in the number of trainers we should provide. I agree with this approach. I strongly disagree with the "wait and see" rec-

ommendation that we should deploy no additional U.S. combat forces to Afghanistan until this action has been taken. I believe that this position would repeat the nearly catastrophic mistakes of Iraq and significantly set back the vital war effort in Afghanistan.

The lesson of Iraq is that we make little progress merely by putting Afghan volunteers through a training course and releasing them into combat. In fact, when precisely this approach was tried in Iraq, Iraqi units collapsed repeatedly in the face of attacks. It took mentorship at every level, including partnership in joint operations with U.S. forces, that built a capable Iraqi security force.

Similarly, mentorship at all levels is required to build a robust and capable Afghan military and pave the way for our eventual successful exit in Afghanistan. To do this, we will need more U.S. combat forces in Afghanistan, not less or the same amount as we have today.

Vital areas in Afghanistan are controlled by the Taliban and its surrogates today. It will require U.S. military force to shape, clear, hold, and build in these areas. If we await the day when the Afghan National Army is increased in size and capable of carrying out all of these operations fully on its own, it may well be too late.

Admiral, as I express these views I am mindful of the stress on our force and the tremendous sacrifices being made by the men and women of the Armed Forces and their families. Admiral, I think I speak for all Senators in thanking you for your personal efforts to address the welfare of our wounded warriors and to implement more effective policies aimed at providing improved resources to eliminate barriers to seeking help for the emotional trauma of combat, to prevent suicides, and to do better in evaluating and responding to disabilities suffered while on Active Duty.

I also want to express my appreciation for the efforts you and Secretary Gates are making to improve our acquisition process. We have a long way to go and, as the Secretary has indicated, our weapons systems must impose greater costs on our current enemies than they do on us. The recently passed legislation I hope will further our efforts in that direction.

I hope we will hear more today about what steps need to be taken to improve the requirements process and on the rapid acquisition process. I urge you and Secretary Gates to continue to advocate in the strongest possible terms for the weapons systems we need for the readiness and effectiveness against our current enemies.

Thank you.

Chairman LEVIN. Thank you, Senator McCain.

Admiral Mullen.

**STATEMENT OF ADM MICHAEL G. MULLEN, USN, NOMINEE
FOR REAPPOINTMENT TO BE CHAIRMAN, JOINT CHIEFS OF
STAFF**

Admiral MULLEN. Mr. Chairman, Senator McCain, distinguished members of this committee, thank you for hearing my testimony today. I also thank the President and Secretary Gates for their confidence in me. It's been my great honor to serve as Chairman these past 2 years and, if confirmed by the Senate, I will remain as hum-

bled by the opportunity to continue that service as I will remain steadfast in the execution of my duties.

I'm joined this morning by my wife Deborah, who has also been steadfast in her commitment to the welfare of our troops and their families, not only during my term as Chairman, but throughout this long military career we have shared. I value her counsel and her company. But more critically, I know I would not be here, that I could not have endured the challenges presented me over the course of these 41 years, without her love and unfailing support.

I would add to that the love and support of our two sons, Jack and Michael, both serving today on Active Duty in the U.S. Navy. They are but 2 of the 2.2 million sons and daughters of America I strive best to represent. No decision I make or advice I give is done without thinking about the impact on our troops and their families.

The truth is, our people have been stretched and strained by 8 years of persistent combat in two theaters of war, not to mention the steady drumbeat of training and operations demanded by our security commitments around the world. This strain manifests in many ways: fatigue and stress, marital and family difficulties, homelessness, and an alarming number of suicides. We ought not forget as well the more than 5,100 troops killed since September 11 or the 35,000 wounded, each one a noble sacrifice worthy of our solemn attention.

Countless others suffer in silence with wounds we never see, with nightmares we never know. Physical or otherwise, these wounds of war represent a family's life forever changed.

As do you on this committee, I am committed to improving the care we provide now and into the future for all of these casualties and their families. Yet, for all this suffering and all this change, our people are the most resilient I have ever seen. They have endured much, yes, but they have also learned much and grown much.

Consider Iraq, where only 3 short years ago many people had given up on the effort. Today there's no question that security is much, much better and that the Iraqi security forces are increasingly more able to protect their own people. Violence persists and al Qaeda still threatens, but we are now in a position, the Iraqis are now in a position, for us to continue drawing down our forces, due in large part to our great military men and women.

We have made great strides in wounded care, particularly on the battlefield. We have become more nimble in collecting, disseminating, and acting on intelligence. Our Army has restructured itself to be a far more expeditionary force. The Marine Corps has refined a new concept of expeditionary maneuver warfare. Our Navy has taken back its riverine mission, and our Air Force is revitalizing its strategic nuclear rule.

But the biggest area of learning and growth has been in counterinsurgency warfare. Indeed, I believe we are today the best counterinsurgency force in the world, having learned anew so many valuable lessons over these last 8 years. As I noted, we didn't get here without great sacrifice in blood and treasure. Our knowledge came at a heavy price.

Now that we have shifted our main effort east to Afghanistan, where the Taliban insurgency grows in both size and complexity, we must apply that knowledge to the best of our ability. That is why I support a properly resourced, classically pursued counter-insurgency effort.

The President has given us a clear mission: disrupt, dismantle, and defeat al Qaeda and its extremist allies and prevent Afghanistan from becoming a safe haven again. You can't do that from offshore and you can't do that by just killing the bad guys. You have to be there, where the people are, when they need you there, and until they can provide for their own security. This is General McChrystal's view and it is my view and that of General Petraeus in the Joint Chiefs.

Now, not every lesson from Iraq will apply, but the big ones will: protect the people, connect them to the political process, enable them to provide for their own security. The enemy in Afghanistan is not the insurgent. The enemy is fear. If you can remove the fear under which so many Afghans live, if you can supplant it with security and good governance, then you can offer them an alternative to Taliban rule. If they have an alternative to Taliban rule, they will choose it.

To be sure, the President's strategy is a regional one, recognizing that the ideology shared by al Qaeda and the Taliban knows no border and that this area remains the epicenter of violent Islamic fundamentalism. An Afghanistan resistant to extremism, free of such sanctuary, will help bolster the efforts of neighboring Pakistan to become the same. On the other hand, if the Taliban succeed in governing at the state level, as they have already succeeded in many local areas, al Qaeda could reestablish the safe havens they enjoyed in Afghanistan at the end of the last decade and the internal threat to Pakistan by extremism will only worsen.

So how best to prevent it? How best to provide for Afghan security and governance? Ultimately it should be provided by the Afghans themselves. As you rightly pointed out last week, Mr. Chairman, I share your view that larger and more capable Afghan national security forces remain vital to that nation's viability. I share your view and have stated publicly that the path to achieving the President's goal is through our training efforts there. We must rapidly build the Afghan army and police. I agree that we must develop more and better ways to peel away those not ideologically committed to the insurgency and reintegrate them back into productive society.

But we cannot achieve these goals without recognizing that they are both manpower and time-intensive. More important than the size of the Afghan security forces is their quality. More important than the orders they follow is the leadership they exude. More important than the numbers of Taliban we turn are the personal lives they themselves turn around.

Sending more trainers more quickly will give us a jump start, but only that. Quality training takes time and patience. Private trust by the Afghans, so vital to our purpose, is not fostered in a public hurry.

Now, I do not know exactly what additional resources General McChrystal may ask for and I do not know what ratio of training

to combat units he really needs. We'll get to all of that in the coming weeks. But I do believe that, having heard his views and having great confidence in his leadership, a properly resourced counterinsurgency probably means more forces and without question more time and more commitment to the protection of the Afghan people and to the development of good governance.

We can get there. We can accomplish the mission we've been assigned. But we will need resources matched to the strategy, civilian expertise matched to military capabilities, and the continued support of the American people.

We also need to remember that we have other responsibilities, other threats to counter, and other missions to complete, and that as we responsibly draw down in Iraq and work towards success in Afghanistan we must remain ready to deter conflict elsewhere, improve the capacity of our allies and partners, and prepare for a broad spectrum of challenges, both conventional and unconventional.

Again, thank you for this opportunity and thank you for all you do on this committee to support the men and women of our military and their families as they protect our vital national interests in these very challenging times.

Chairman LEVIN. Admiral, thank you so much for your opening statement and again for your great service.

Let's try a 7-minute first round.

Admiral, has General McChrystal submitted yet a request for specific additional resources for Afghanistan?

Admiral MULLEN. No, sir, he has not.

Chairman LEVIN. Has a decision been made on whether to commit additional U.S. forces to Afghanistan beyond the 17,000 combat troops and the 4,000 trainers that the President approved in February?

Admiral MULLEN. No, sir.

Chairman LEVIN. Has the recommendation been made by you or Secretary Gates to President Obama relative to sending additional troops to Afghanistan?

Admiral MULLEN. Sir, we've made our recommendation based on the assessment, but, not having received the request from General McChrystal yet, we've made no recommendation with respect to forces.

Chairman LEVIN. How many of the 17,000 combat forces and the 4,000 trainers that were previously committed, how many of them have arrived in theater and when will the balance arrive?

Admiral MULLEN. They are all just about there. The balance will be there by the end of this month. The last group is really the 4th of the 82nd trainers, who are at the end of their arrival getting in place and will take over the mission, the training mission of these 4,000 soldiers, very quickly.

Chairman LEVIN. You've testified, Admiral, that an essential step in regaining the initiative in Afghanistan and to succeed there is to build the capacity of the Afghan security forces, the Afghan army and police, and empowering them to provide security for their own country. Is the Afghan army respected by the Afghan people?

Admiral MULLEN. It is from my perspective the most respected institution in Afghanistan.

Chairman LEVIN. Are they committed fighters?

Admiral MULLEN. They are. They've been fighting for a long time.

Chairman LEVIN. How many additional trainers is it going to take to build the Afghan army to, let's say, 250,000?

Admiral MULLEN. The rough estimate is somewhere between 2,000 and 4,000 in terms of overall trainers.

Chairman LEVIN. Is that additional to what's there now?

Admiral MULLEN. Yes, sir.

Chairman LEVIN. What is there now?

Admiral MULLEN. Training-wise it's about—I think it's about 6,000–6,500.

Chairman LEVIN. How many of those additional trainers should be supplied by NATO?

Admiral MULLEN. As many as possible. Countries who are capable—and they are some very capable countries in NATO at training both police and the army—we would like to see them step up as much as possible.

Chairman LEVIN. When you gave a number for additional trainers for the army, does that include additional trainers for the police or is that a separate number?

Admiral MULLEN. No, that's inclusive, yes, sir.

Chairman LEVIN. On the equipment issue, would you agree that as we withdraw equipment from Iraq that a major priority should be transferring to Afghanistan the equipment needed to build the capacity of the Afghan security forces to provide for their security?

Admiral MULLEN. Yes, sir.

Chairman LEVIN. What is being done in that regard?

Admiral MULLEN. Well, in fact your question when you came back off this trip caused us to focus, to see exactly where we were. I met yesterday with General Petraeus and General McChrystal, had a video teleconference with them, where we discussed this. In fact, there are some 2,000-plus Humvees in Kuwait which are being refurbished, that will be accelerated into Afghanistan, and the required focus on this to make sure that we are moving that as rapidly as we can.

It's also tied to their ability to absorb this and train to it.

Chairman LEVIN. Is that review going to be conducted to determine what other types of quantities of equipment would be needed and usable?

Admiral MULLEN. Right. We're doing a full-scale review in that regard.

Chairman LEVIN. When will that review be completed?

Admiral MULLEN. I think we'll know that within the next couple of weeks.

Chairman LEVIN. You will make that available to us?

Admiral MULLEN. Yes, sir.

Chairman LEVIN. Is that going to take any additional legislation, do you know?

Admiral MULLEN. No, sir, I'm not aware of any right now.

Chairman LEVIN. General McChrystal has spoken and I think you have too, as a matter of fact, as has the Secretary, about the great potential for reintegrating local Taliban fighters and getting them to switch over to the government side. Now, there's a lot of

differences between Afghanistan and Iraq, but one of the similarities could be that incentives for low- and mid-level Taliban fighters to switch from enemies to allies could be put in place.

Number one, is a plan now going to be developed to put into place an approach in Afghanistan to reintegrate young Afghan fighters?

Admiral MULLEN. Yes, sir. There is a British general by the name of Graham Lamb who did this in Iraq and who is now working for General McChrystal, and has initiated—I don't want to overstate this—putting in place a program to focus on mid-level and lower-level fighters who would like to turn themselves in and do so in a way, obviously, in which they are both protected and that they have a future, so in that regard similar to Sons of Iraq.

Chairman LEVIN. Has that plan been worked out with Afghan leaders?

Admiral MULLEN. It includes Afghan leaders in its initial inception, which we're really at the beginning of right now. We're not very far down that road.

Chairman LEVIN. What's been the delay in getting that done?

Admiral MULLEN. Actually it has not been an area of focus and we haven't had somebody there like Lamb to focus on it.

Chairman LEVIN. This committee, over two-thirds of us, signed a letter back 4 or 5 months ago on the question of the size of the Afghan forces and we pointed out that the Afghan defense minister has called for an army of between 250,000 and 300,000 soldiers. The minister of interior in Afghanistan supported a strategic increase in the size of the army. We urged you to declare a target at that time for end strengths for the army and the police to those levels.

I'm just wondering what has been the delay in adopting goals for the increase in the size of the Afghan army, given what our people on the ground say, which is that their presence with us, obviously as mentors, as partners, is critical to the security for Afghanistan. What has been the delay in establishing the larger goals?

Admiral MULLEN. I think if there's been any reason for a delay it's been where we are now in terms of our overall numbers, which is at 93,000 in the army and about 90,000 in the police. The timing of your letter came right about at the time we were making a leadership change out there.

General McChrystal has embraced the requirement to grow these forces and grow them more rapidly, and I'm sure that will be part of the output of the assessment, if you will, because we're all very committed to making that happen. I would assume that as a result of this assessment we will establish those goals and I wouldn't expect them to be far off from what we're recommending, what was recommended before.

Chairman LEVIN. Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

Thank you, Admiral Mullen. On this issue of simply relying on the buildup of the Afghan army, we tried that for several years in Iraq. As you may recall, by April 2004, in fact, the Department of Defense (DOD) reported that there were 208,000 Iraqis either on duty or being trained for security units. The same month, attacks by Sunni and Shia; basically, the Iraqi army collapsed. What we

found out, that we succeeded only after we instituted a practice of mentorship, including joint operations with U.S. combat forces at every level, that we saw marked improvement in the Iraqi forces.

Is there any reasonable scenario, Admiral, in which trained Afghan security forces can handle the bulk of the fighting over the near to medium term?

Admiral MULLEN. No, sir.

Senator MCCAIN. If we followed such a course, do you think the situation in Afghanistan would improve or get worse?

Admiral MULLEN. I think it would probably continue to deteriorate.

Senator MCCAIN. Thank you.

Admiral, General McChrystal's assessment of our strategy in Afghanistan has been closely held and is currently under review, as you stated, both in the Pentagon and the White House. The assessment as I understand it contains no resource requirements or requests for additional troops, but is instead being described as a new strategy for the President's consideration and endorsement.

Yet last March didn't the President adopt a new strategy for Afghanistan with considerable fanfare?

Admiral MULLEN. Yes, sir. I think that the description of General McChrystal's assessment that it's a new strategy—and in fact he uses those words, but his use of those words is really focused on a new implementation strategy for the President's strategy, which is the baseline for his review as he arrived in command and conducted it.

So General McChrystal's assessment assesses the implementation strategy required to execute the President's strategy which he rolled out at the end of March. His is not a new strategy.

Senator MCCAIN. Thank you.

Obviously, a strategy in order to succeed requires an assessment of resources needed, right?

Admiral MULLEN. Yes, sir.

Senator MCCAIN. A vital component of resources is manpower, personnel, right?

Admiral MULLEN. Yes, sir.

Senator MCCAIN. Now, help me through why we have a restatement of the President's strategy which was announced in March and yet there is no recommendation on what is obviously the most important aspect, both strategically and domestically? I'm talking about politics here in the United States. Why would it take weeks and weeks to make an evaluation and reach a decision?

Admiral MULLEN. The process that we are going through is to have General McChrystal assess it both for the President as well as for NATO. It's a dual assessment in that regard. Quite honestly, he found conditions on the ground tougher than he had thought. He went with General David Rodriguez, who had been absent about a year out of Afghanistan. He found it tougher. The importance of the fullness of that assessment and what it was going to take from the President's strategy, to include a second part, which is, okay, here's how I found it and these are the resources that I need.

Now, he's done extensive analysis to underpin those force options. My expectation is that they will be submitted in the very

near future. The administration wanted time to review it in terms of what General McChrystal found. One of the things that is very important to me is that, whatever the strategy is, and right now it's the 27 March strategy, is that we properly resource it.

That's where we are today. I would anticipate he will be submitting that request in the very near future.

Senator MCCAIN. As you stated this month, "Time is not on our side."

Admiral MULLEN. No, sir. I have a sense of urgency about this. I worry a great deal that the clock is moving very rapidly. There are lots of clocks. But the sense of urgency, I, believe me, share that with General McChrystal, who, while he is very focused on a change which includes partners, a focus on the Afghan people, he is alarmed by the insurgency and he is in a position where he needs to retake the initiative from the insurgents, who have grabbed it over the last 3 years.

Senator MCCAIN. I thank you, Admiral. But then I am frustrated and curious as to why the President's spokesperson yesterday should say it takes "weeks and weeks." We're restating a strategy. We know what the resources are that are required. Yet it would take "weeks and weeks."

Meanwhile, "weeks and weeks" go by and without the new strategy and the implementation of it or, excuse me, the implementation of the resources recommendation; there are more and more Americans who are at great risk. That is really bothersome. Already in the media there's speculation that the President doesn't want to make an announcement on troop increases because of the present debate on health care. I believe that the President can do both.

Let me finally ask, what do you anticipate the level of fighting to be as we get into the winter months here?

Admiral MULLEN. Each winter the fighting recedes, but last winter it was significantly more than the previous one. In discussions with General McChrystal, there's a term that we use and have used in Afghanistan, which is the "fighting season," but in fact we don't believe there's a fighting season. We think it's a 365-day-a-year fight for the people and for their support and for them to be able to be put in the position to be governed by the institutions in their country.

So much of the combat recedes, but, quite frankly, in the winter it is just as important to be engaged with the people as it is right now.

Senator MCCAIN. The sooner we get immediate resources over there, the sooner we can turn this situation around.

Mr. Chairman, I would strongly recommend that we do as we have in the past and ask General McChrystal and General Petraeus to come before the committee and testify so that we can better understand the situation both there in Afghanistan and what we can expect in the future.

I thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

Senator Lieberman.

Senator LIEBERMAN. Thank you, Mr. Chairman.

First, Admiral Mullen, let me thank you for your really extraordinary service to our country. I think you've done just a great job

as Chairman of the Joint Chiefs in every way. You haven't always given us the answers that we have been looking for, but that really is exactly what we expect you to do. You've shown great leadership here, really grace under pressure is the way I will put it. So I will enthusiastically support the President's renomination of you for a second term. I appreciate it. Your wife has urged me to think twice about my support of that, but nonetheless I'm going to go forward.

In the opening statements of Chairman Levin and Senator McCain, we I think see the dimensions of the beginning of a very serious national debate about our presence in Afghanistan. It's an important national debate that has to happen here in Congress and hopefully throughout the country, and in some senses it is a debate that has not yet occurred in all the time we've been in Afghanistan. Our support of the war in Afghanistan was a natural response to the attacks against us of September 11. There was almost total support of that.

After we went into Iraq, Afghanistan in many ways, including in the debates here in Washington, became the other war. It was even so during the campaign for President last year, where the differences between Senator McCain and Senator Obama really had to do with Iraq, and both generally agreed on Afghanistan. In fact, then-Senator Obama was really quite strong in stating that Afghanistan was the central front of the war on terrorism, a war of necessity we could not muddle through. To now-President Obama's credit as far as I'm concerned, he's followed through on those statements, particularly with the announcement of the new strategy in March and the deployment of 21,000 additional American troops to back up that deployment.

I appreciate the clarity that's emerged in the discussion that we've had here this morning, that what General McChrystal has been asked to do is not develop a new strategy for Afghanistan, because that's been done. It's to give a strategic assessment of where we are now and what we need to succeed. In some sense for us to reject that assessment and the reports that are necessary to carry it out would be a change in the strategic decision that President Obama made earlier this year.

The strategic policy we're following in Afghanistan does learn from the lessons of Iraq, although this is a different battlefield. The good news here is that there's no dissent, even as we listen to the different positions that Chairman Levin and Senator McCain have articulated, about the need to succeed in Afghanistan, both because it would be inexcusable to allow the Taliban to regain control of that country and bring back al Qaeda, which of course planned the attacks on us of September 11 and trained for them from there.

It's also true, and I want to stress this—and you've said it yourself here, I think quite eloquently—a failure in Afghanistan would have, I think, a devastating effect on our efforts to stabilize neighboring nuclear Pakistan. There's just no question about it.

We start with those similar goals and it seems to me the question now is how do we succeed. Chairman Levin has offered an alternative, which is to go with trainers for at least a year and no additional combat troops. Senator McCain has said we need combat troops now, we need more of them, and as quickly as possible, and I agree with Senator McCain.

I hear you to say this morning, Admiral Mullen, that, based on the strategy that the President adopted, the new strategy he adopted in March, and the strategic assessment that General McChrystal has now given the President, you, and Secretary Gates, from the battlefield, though you have not seen and General McChrystal has not submitted a specific request for specific numbers of troops, that your conclusion is that we need to send more combat troops to Afghanistan.

Admiral MULLEN. I've said in my opening statement that it's very clear to me we will need more resources to execute the President's strategy from the end of March. I really await the submission from General McChrystal, which I think is going to occur here very quickly, to evaluate specifically what that means and to look at the risks associated with various options.

Maybe I can give a little better answer to the chairman on why we weren't doing a program like the one Graham Lamb is now in charge of. We very badly underresourced Afghanistan for the better part of 4 or 5 years. I've spoken about a culture of poverty. That's been interpreted to focus on the poverty level in the country. That isn't what I meant. Certainly that is a problem, but we have a culture of poverty there amongst us in terms of being underresourced, an economy of force, for this extensive period of time, to get to a point where we didn't have the wherewithal to create a program like that, not that we didn't think it would be needed.

The totality of that underresourcing is something we're just coming to grips with. It's not as simple as trainers or not as simple as combat troops. It's are you committed, as the Afghan people look at it, are you committed as the Paks look at it. This is a regional area that is the epicenter of terrorism.

Every time I go—and I'm sure it happens to you as well—when you're in Afghanistan or Pakistan, the question that is on their lips is: Are you staying or are you going?

Senator LIEBERMAN. Are you staying or are you going to go?

Admiral MULLEN. Are you with us or not?

Senator LIEBERMAN. Right. My concern is that Chairman Levin I know is well intentioned, but if we just send trainers and don't send more combat troops, particularly if it's clear that General McChrystal has requested them, then I believe the Afghan people and the Pakistani people are going to decide we're essentially on our way out, and they're going to make some judgments based on that and take actions that will not be what we want them to do.

Do you agree?

Admiral MULLEN. I'm very concerned about—the Afghan people are waiting on the sidelines for how committed we are and, quite frankly, so are the people of Pakistan. I said in my opening statement I believe in a fully resourced counterinsurgency. These are the lessons from Iraq that we have learned. They have been very painful and, quite frankly, we need those lessons in a timely manner applied right now, with the level of deterioration that we've had in Afghanistan, particularly over the last 3 years.

Senator LIEBERMAN. I agree.

The last question, because I think you've said clearly today that the momentum, the initiative right now in Afghanistan—and Gen-

eral McChrystal told us that when we visited him in August—is not on our side.

Admiral MULLEN. Right.

Senator LIEBERMAN. Sending more trainers and more combat troops gives us a much higher probability of regaining the initiative in this critical battle.

Admiral MULLEN. The issue of regaining the initiative is absolutely critical. General McChrystal, I spoke to him yesterday. He emphasizes that each time that I engage with him.

Senator LIEBERMAN. Final question. Isn't one of the lessons we learned from Iraq and Anbar Province that the Sons of Iraq turned away from al Qaeda in our direction after they were confident that we were not leaving, in fact we were going to surge our troops there? Isn't it true that any effort to break away local Taliban who are not Islamic fanatics requires us similarly to convince those local Taliban that we're committed to this fight and if they come to our side they're going to be winners, not losers?

Admiral MULLEN. Yes, sir.

Senator LIEBERMAN. Thank you.

Thanks, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Lieberman.

Senator SESSIONS.

Senator SESSIONS. Thank you, Mr. Chairman.

Thank you, Admiral Mullen, for your leadership and service, and all the people that serve under you, your leadership. They've put their lives on the line to effectuate American policy that this Congress has directed them to do. Having sent them, we do need to listen to their advice about how to be successful.

I know sending more troops to Afghanistan is a bitter pill to me, but I do think that Senator McCain, Senator Lieberman, and others have made the case in Iraq at a very difficult time that we needed to strengthen our presence and if we did we could be successful, and actually things went better than we could have expected at this point in Iraq.

I'm inclined to think that we need to listen to that wisdom again. But I do believe that every area of the world is different. I think Afghanistan is different to some degree than Iraq, but there are a lot of lessons that we can apply there. I won't go into details about that today, but I do look forward to hearing from Generals McChrystal and Petraeus, and we can fulfill our constitutional role in this process to examine the facts and make sure that we're supporting a good policy that will be successful.

Admiral Mullen, you signed off on the President's budget this year, I suppose it's fair to say? Is that correct?

Admiral MULLEN. Yes, sir. I'm not sure a signature, but I'm certainly supportive of it.

Senator SESSIONS. I don't, and I'm worried about it. What is the personnel increase that we expect to occur as a result of this budget? How many? Is it 30,000 troops?

Admiral MULLEN. The question that I think you're asking about is an increase of 22,000 for the Army, a temporary increase over a period of about 3 years. What it really addresses is the need to make up for losses which are occurring principally in our large units. So a brigade of 3,500, now the number of soldiers who are

falling out before deployment has about doubled since the war started. So we're rushing other people into these brigades.

That 22,000 will essentially greatly reduce the churn at a time where we're transitioning out of Iraq, we obviously don't know what our final level or our level in Afghanistan is going to be, and as we work to, given the overall requirement, get to a dwell time that's increased from 1:1 to 1:2. But principally it's focused on getting at the churn that's in the system. It's not going to add any additional capability. That's why it's temporary.

Senator SESSIONS. We authorized, I believe Senator Lieberman's legislation authorized, up to 30,000.

Admiral MULLEN. I think, yes, sir.

Senator SESSIONS. So that you've decided or DOD's decision is to do 22,000. Does that mean that we will have 22,000 more people on the payroll?

Admiral MULLEN. I think we'll get an additional 15,000 next year in 2010, with 7,000 more after that in 2011. Then literally to get back down you have to start coming down pretty fast.

Senator SESSIONS. You don't see this as a permanent thing?

Admiral MULLEN. No.

Senator SESSIONS. I'm inclined to think the personnel certainly are needed today and I support that, and I am worried about the dwell time of our soldiers and the redeployment rate. But I just have to say what's worrying me in another area is that the amount of money once you fund this new surge of troops and you get a 3 percent increase in your budget and certain costs go up each year in maintaining your personnel and all the matters from energy to whatever in the defense budget, that procurement and research and development (R&D) are the things historically we see that get squeezed too much.

We have an obligation, this President has an obligation, this Congress has an obligation, to fund the development and procurement of weapons systems today that we may not see in the inventory 5, 10, 15 years down the road.

Isn't it fair to say that we should be concerned and very observant about the impact of this tight budget for the Defense Department on procurement, R&D, and perhaps other?

Admiral MULLEN. A lot of my life in Washington over the last decade has been spent in programming and budgeting, and I worked very closely with Secretary Gates to submit the budget amendment, and I'm very supportive of the decisions, hard as they were, that he made for programs that were running out of control, way overdue, costs increasing, et cetera, and others that didn't conceptually make sense. A lot of very tough decisions, but it's the best work I have seen since the mid-1990s from my own personal point of view.

Yes, I am concerned about increasing personnel costs. When I was the head of the Navy, 60 to 70 percent of my budget went to personnel costs. That's military, civilian, and direct support of contractors who helped us in carrying out our mission. That's gone up, and health care is a big part of that, but it's not exclusively that.

I think one of the biggest issues we have actually in the defense budget is how do we control that, how do we come to grips with those costs? I need every single person I need and not one person

more. That's very difficult, particularly when it takes up so much. I have to pay for my operations. That's another big undertaking. What's left is procurement and R&D. So when a budget gets tighter, clearly that's where the pressure is going to be felt.

We do have to watch that. At the same time, I think the budget focuses on, first of all, people, which if you want me to bet on the future, that's where I would put my next marginal dollar. Second, it focuses on the wars that we're in and I think the wars that we're in have a lot to do with our future as well. We've learned an awful lot. Then obviously it focuses on what we see in the future.

We're trying to bring it into balance, not try to undo the future. I think it took a significant step in that direction. I'm mindful that it's a lot tighter than it was and that we have to be very vigilant about the things that we do, the things that we buy and the things that we don't buy.

Senator SESSIONS. Thank you. I know you understand that, as the top senior uniformed military leader in the country, you have a serious burden in that regard, and I hope that you will examine the impact of this very tight budget. I think our discretionary spending 7, 8, 9 percent increase this year, not counting the stimulus, and the military got very little, almost nothing, out of the stimulus and only a 3 percent increase in DOD total budget.

So I hope that you will, and I expect that you will, evaluate that and let us know to what extent some of these decisions are impacting adversely the military of the United States. Will you do that?

Admiral MULLEN. Yes, sir. I'd only add that as budgets have gone up over the last decade one of the characteristics that evolves, or at least I watched it evolve, is we become less disciplined in our prioritization. We become less disciplined in our analysis, because there are resources there that don't have to be justified as much as when there's additional pressure on us.

So we have to bring all those skills back to the fore, to the front, in order to make the right decisions. Senator McCain talked about and Senator Levin both this acquisition legislation, which is very powerful. Now we need to get at that. We need to execute it. We need to make hard decisions. We don't need the perfect solution. I don't need the 100 percent solution each and every time that I'm developing something. I need some high end stuff, there's no question about that, and it's very expensive.

All those things are in play right now and we, believe me, take that all very seriously.

Chairman LEVIN. Thank you, Senator Sessions.

Senator Reed.

Senator REED. Thank you very much, Mr. Chairman.

Admiral, thank you for your great service to the country over many years. Your family and you have led with great not only vision, but decency, and I appreciate it very much.

Let me just as a first point, I would think that in trying to resource Afghanistan the first place to look would be within Central Command (CENTCOM). Is that your emphasis, to see if there are assets within CENTCOM, not only those that are presently there, but those that are scheduled to go there, which should be diverted into Afghanistan?

Admiral MULLEN. In fact, we've done a great deal of that already inside the foot print that the President has approved for Afghanistan, to move resources, intelligence, reconnaissance, surveillance, ground convoy, improvised explosive device (IED), counter-IED capability, to focus on force protection, the mine resistant ambush protected (MRAP), meeting the MRAP requirement there as well. We are very focused on moving people and capability from Iraq to Afghanistan.

General Raymond Odierno has been terrific in looking at his risk, understanding what the need is, and been very supportive.

Senator REED. There seems to be an emerging consensus on increased trainers. Just for the record, I think there's, as you point out, an increased need for enablers. Where do we stand in terms of the enablers, the road-clearing teams, the intelligence and reconnaissance platforms?

Admiral MULLEN. Those that General McChrystal has asked for this year are on the way, basically through the end of this calendar year.

Senator REED. But he will presumably ask for additional.

Admiral MULLEN. That again clearly will be a part of this request. We just don't have the details yet.

Senator REED. One of the areas that has plagued us throughout our presence in Afghanistan is the lack of unity of effort. First there's the command and control problem. Second, there's I think a lack of coordination between our counterinsurgency operations and our counternarcotics operations. Then there's a certain lack of coordination between Afghan security forces and International Security Assistance Force (ISAF) forces and our forces. Then also, our conventional forces and our Special Operations Forces.

Can you comment on—there's no silver bullet here, but unless we get these issues improved dramatically, increased resources won't help as much.

Admiral MULLEN. I agree, and General McChrystal has made this one of his top priorities, focus on the people, partner with them, and really the other one is to fix the unity of command. He's very clearly going to put whoever the senior person is in battle space in charge of all forces, including the special forces.

We are standing up this three-star command, operational command, if you will, or tactical command. But General Rodriguez is standing it up as a NATO command. It will stand up by October 12 and we're on track to do that.

We all agree that the command and control has been far from ideal and that these steps and others to make sure that our unity of command and unity of effort is very visible, and particularly to the Afghan security forces who we are working so closely with. He's making major changes to address that issue. I don't think it'll ever be perfect, but it will be much better than it has been.

Senator REED. Regardless, I think, of the presence of U.S. forces there, the limiting factor appears to me to be the Afghan forces, not only in the long run, but in the short run. We're operating now typically, as we saw in Helmand, with an American battalion and one Afghan company. But the impression I got from our commanders on the ground is that unless there's an Afghan presence it's hard to operate, not only tactically, but psychologically and

symbolically you send a very wrong signal, that this is our war, not their war.

Admiral MULLEN. I think the chairman pointed out, I think the stories that came out when the marines initiated their first operation, and General Nicholson talked about what I recall is about a 10 to 1 ratio. Certainly we have Afghans present, but they are very thin. That gets to the whole issue of needing to build up those forces.

Senator REED. Let me just expand on one point. When we discussed on our return the training of the Afghan army, are we training, are we trying to train, an army with battalion, brigade, division staffs, or are we, because of this emergency, trying to focus on infantry companies and infantry company commanders, which you could probably produce much quicker than talented staffers?

Admiral MULLEN. General McChrystal's intent—I'll take the 4th of the 82nd as an example. They're going to break down into platoon-sized units and they're going to focus at the platoon and company level specifically. There will be training certainly at company, battalion, and brigade headquarters level, but the main effort is going to be at that level.

Senator REED. The civilian surge. To be blunt, military forces can buy time, but the success there ultimately will be some type of political accommodation. Right now the Government of Afghanistan is dysfunctional within Kabul and not even present outside of Kabul. Is this civilian surge going well? If it's a function of resources, should DOD kick in the money? I know Secretary Vilsack, for example, wants to send more Agriculture people there, but he wants you to pick up the tab.

Admiral MULLEN. The best I know, there's no shortage of funds to do this. I liken it to Iraq. We are surging. It is not happening fast enough. It has Secretary Clinton's attention, it has Ambassador Holbrooke's attention. There are an awful lot of people working on it.

We're just not a government that has been constructed to do this quickly. There is a plan and I think we're a little bit behind that plan, to surge upwards, like 500 or 600 to be there in the spring. But it's the spring. They're not there now. There are additional civilians who have arrived. There has been a major change in the embassy. But it's not happening as rapidly as it could.

We can't do it without that help, first of all. Second, you talk about governance. I consider the threat from lack of governance to be equal to the threat from the Taliban. Both of those things have to be addressed.

Senator REED. The presidential election is grinding to a conclusion. To what extent will that affect the situation within Afghanistan in your view? There is a possibility that there could be a serious crisis of legitimacy that will impair the ability of a very dysfunctional government to function at all. Is that a factor that we have to consider?

Admiral MULLEN. I think the legitimacy of the Afghan Government at every level, not just the national level—that's where the election is—is a real concern, and that there needs to be a level of legitimacy that the Afghan people see in their government, wheth-

er it's local to national. There's a great question about that now and so far the elections have not helped.

I think we need to get through these elections, see what the results are, see who we're dealing with, what the government looks like, and move forward accordingly. But that issue of legitimacy is a huge, huge issue.

Senator REED. Thank you very much, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Reed.

Senator Graham.

Senator GRAHAM. Thank you, Mr. Chairman.

We all appreciate your service and I think you will be confirmed, hopefully with everyone's vote. I think you've earned that.

Quite frankly, this is an opportunity to do an assessment about Iraq and Afghanistan. Football season's here at home and I'm trying to think of an analogy. From Senator Lieberman's question, it seems like we're on the defense in Afghanistan; is that fair to say?

Admiral MULLEN. I think that's probably fairly characterized.

Senator GRAHAM. In Iraq we're on offense? The Iraqi people, the Iraqi security forces?

Admiral MULLEN. I'm not sure I'd draw—clearly we're on a path to success with them.

Senator GRAHAM. Are we driving the ball in Iraq?

Admiral MULLEN. In that regard, we're certainly moving in the right direction.

Senator GRAHAM. Do you think we're inside the 20?

Admiral MULLEN. I'm not sure I'd say 20.

Senator GRAHAM. Okay.

Admiral MULLEN. But we're moving toward the red zone.

Senator GRAHAM. Okay, good. That's good. There we go. I got something I can understand here.

The combined Afghan security forces and all coalition forces at this moment are not enough to reverse the lost momentum, is that correct?

Admiral MULLEN. From what General McChrystal says and what I said earlier about a fully resourced counterinsurgency, we are extremely concerned about the momentum that the Afghans have.

Senator GRAHAM. Okay. Well, the answer then would be that, no, the combined coalition forces and Afghan security forces are not enough to change the momentum?

Admiral MULLEN. They have not so far.

Senator GRAHAM. So there's two paths we can take. We can wait and get more Afghans or we can send more coalition forces and do the training.

Admiral MULLEN. Right.

Senator GRAHAM. Now, let's flesh that out a bit. How many tanks do the Taliban have?

Admiral MULLEN. I'm not aware they have any.

Senator GRAHAM. How many airplanes?

Admiral MULLEN. None.

Senator GRAHAM. Well, how are they doing this?

Admiral MULLEN. They've watched us. They're very good at it. It's their country. They know how to fight. They choose when to stay and when to go.

Senator GRAHAM. Do they have popular support?

Admiral MULLEN. More than anything else, they're intimidating the Afghan people. No, they're not held in high regard at all by the Afghan people.

Senator GRAHAM. So they're not held in high regard, they don't have an air force, they don't have any armor, but they're winning. That makes me conclude something has gone awry in Afghanistan, and the biggest threat in my opinion is not the Taliban, it's the governance. The only reason they possibly could have come back is because there's been a vacuum created. Is that fair to say?

Admiral MULLEN. I would agree with that.

Senator GRAHAM. That vacuum is a combination of poor governance and a lack of troop presence. Would you agree?

Admiral MULLEN. It is clearly the lack of legitimacy in the government at every level. The people don't get services from their government.

Senator GRAHAM. Let's find some common ground there. We could send a million troops and that will not restore legitimacy to the government; do you agree with that?

Admiral MULLEN. That is a fact.

Senator GRAHAM. Now, as to civilians, I just got back from a visit and I appreciate all of our civilians who are over there from different agencies. They're very brave. But quite honestly, they can't go anywhere. You could send 10,000 lawyers from the State Department to deal with the rule of law programs, but they're sitting on the base because if they leave the base they're going to get shot. Do you agree with that?

Admiral MULLEN. Yes, sir.

Senator GRAHAM. The only way they get off the base is they have a military convoy; is that right?

Admiral MULLEN. Right.

Senator GRAHAM. The same people who are driving them to meet the tribal leaders are also basically the same people training the Afghan army and the police forces; is that right?

Admiral MULLEN. Yes.

Senator GRAHAM. They're the same people fighting at night when they get attacked. I just want our colleagues to know that the security environment in Afghanistan from my point of view will prevent any civilian success until we change the security environment.

How long would it take to train enough Afghan troops to change the momentum in your view, if you just did it with Afghan forces?

Admiral MULLEN. I think it'll take 2 to 3 years.

Senator GRAHAM. What will happen in that 2- or 3-year period, do you think, in terms of the security environment while we're training?

Admiral MULLEN. If we're just training?

Senator GRAHAM. Yes.

Admiral MULLEN. I think the security environment will continue to deteriorate.

Senator GRAHAM. It seems to me that we have one more shot at this; is that right, Admiral Mullen?

Admiral MULLEN. We're looking at a big shot right now.

Senator GRAHAM. Do you understand you have one more shot back home? Do you understand that?

Admiral MULLEN. Yes, sir. Yes, sir.

Senator GRAHAM. About 55 percent of the American people in polls said that they did not support us staying in Afghanistan. What would you tell them as to why we should?

Admiral MULLEN. I'd say it is the epicenter of terrorism right now. It's very clear that in fact al Qaeda has diminished while it's living in Pakistan, and this is a Pakistan-Afghanistan issue. They are by no means dead. It's a very serious threat, and that if we allow the Taliban to take control and run Afghanistan again I think the likelihood that they would return to that safe haven would be high. I'm very concerned about the deterioration, not just in Afghanistan, but also in Pakistan.

Senator GRAHAM. Do you believe we have the right strategy with the appropriate resources to win?

Admiral MULLEN. I believe we have the right strategy. The resource request will come in. What I've said, what I said earlier and will recommend in the future is this is how you properly resource this strategy.

Senator GRAHAM. But the point I'm trying to make to the American people, you're our top military commander.

Admiral MULLEN. Right.

Senator GRAHAM. You're our leader. You're telling us that we have a strategy you believe in. If we get it resourced the way that General McChrystal needs, you think we can win?

Admiral MULLEN. We can succeed, yes, sir.

Senator GRAHAM. Do our troops believe that?

Admiral MULLEN. Yes.

Senator GRAHAM. Now, the rules of engagement. I've been informed by some colleagues over there that if an insurgent is captured, under the ISAF rules of engagement, the NATO rules of engagement, they can be detained for 96 hours and then they have to be released?

Admiral MULLEN. Correct.

Senator GRAHAM. We're limited to tactical interrogation during that 96 hours.

Admiral MULLEN. Correct.

Senator GRAHAM. That basically is how you do it?

Admiral MULLEN. Correct.

Senator GRAHAM. Not much more.

Has this resulted in a catch-and-release dynamic?

Admiral MULLEN. There is concern about that, although since you came back I've discussed this with the leadership. There is an option to certainly, inside ISAF, to stay longer. I'm much more—we get much more intelligence—and you could argue this both ways—much more intelligence from our special forces as a result of—

Senator GRAHAM. Who are not under these rules?

Admiral MULLEN. That's correct.

Senator GRAHAM. They're not under this rule.

Admiral MULLEN. Yet they—

Senator GRAHAM. They shouldn't be under this rule, should they?

Admiral MULLEN. However, this is General McChrystal, there is a strategic vulnerability by longer-term detention in terms of being able to identify who's been captured and who isn't with the Afghan people.

Senator GRAHAM. I agree with that.

Mr. Chairman, I just want to wrap this up for the benefit of the committee.

In Iraq we had 20,000-something Iraqis in Camp Bucca and Camp Cropper, is that right?

Admiral MULLEN. Yes, sir. Actually, we're going to close Camp Bucca here momentarily.

Senator GRAHAM. I would argue we put too many in jail, but it did help clear the battle space in Anbar to have some breathing room to get some of these folks out of Anbar so we could kind of do our job.

The balance that we're trying to achieve is not to put everybody in Afghanistan in jail because that's counterproductive, but to make sure that the really bad ones don't come back after 96 hours.

I look forward to working with you and General McChrystal, and I think you're doing a heck of a job, and there's no easy way forward, but there's two outcomes. You either win or you lose, and I think everybody wants to win. We can have differences on how to get there, but I believe we can win and we must.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Graham.

Senator McCaskill.

Senator MCCASKILL. Admiral, I am going to go back to a familiar subject for me, which is contracting. I know we're in Logistics Civilian Augmentation Program (LOGCAP) IV and that it was competed and that we have a number of companies working on it. Let me start with this. Can you today or for me at a later date tell me exactly how large is the contracting oversight on LOGCAP IV?

Admiral MULLEN. I'd have to get back to you with the details.

[The information referred to follows:]

The Logistics Civilian Augmentation Program (LOGCAP) Executive Director provides program oversight of LOGCAP. The Executive Director has Deputy Program Directors located in Iraq, Kuwait, and Afghanistan that are responsible for program oversight in each theater. Defense Contract Management Agency (DCMA) also has offices located in these regions that employ 329 personnel, which provide direct contract oversight to the LOGCAP IV contract. DCMA also has a contract management office in Houston, TX, that provides additional support to the LOGCAP contract. Additionally, supported units are required to provide Contracting Officer Representatives (CORs) to provide additional oversight on contract performance. U.S. Forces-Afghanistan recently released a Fragmentary Order providing guidance on COR training, assignment, and necessity for all subordinate units.

- Defense Contract Management Agency: Kuwait - 39; Iraq - 178; Afghanistan - 112
- Contracting Officer's Representative: Kuwait - 22; Iraq - 835 (1,061 Required); Afghanistan - 141 (264 Required)
- LOGCAP Support Unit: Kuwait - 6; Iraq - 27; Afghanistan - 33
- Acquisition: Kuwait Task Orders - 5; Iraq Task Orders - 10; Afghanistan Task Orders - 6; Other Contract Personnel - 10
- Program Office - 19

Senator MCCASKILL. How about, who is the number one military commander responsible for oversight of LOGCAP IV? Who would be at the top of the organization chart?

Admiral MULLEN. Well, really in Afghanistan it would be General McChrystal. In who is the senior officer specifically assigned that responsibility, I don't know.

Senator MCCASKILL. I think if possible, if we could get the information as to in theater who's the command staff on contract oversight on LOGCAP IV and in civilian who is.

Admiral MULLEN. Sure.

[The information referred to follows:]

General Ann E. Dunwoody, who is the Commanding General of the Army Material Command, is responsible for managing the Logistics Civilian Augmentation Program (LOGCAP) for the Army. The Defense Contract Management Agency (DCMA), who reports to the Office of the Secretary of Defense, Acquisition, Technology, and Logistics (OSD ATL), provides General Dunwoody with contractor oversight on the LOGCAP in their role as a Combat Support Agency for the Contingency Contracting Administration Support (CCAS) mission.

The Army Sustainment Command Commander, Major General Yves J. Fontaine (Head of Contracting Activity), and his LOGCAP Executive Director, Lee Thompson, SES, provide program oversight. Mr. James Loehrl is the Director, Rock Island Contracting Center (Principle Assistant Responsible for Contracting). They have three Deputy Program Directors in Kuwait, Afghanistan, and Iraq that provide program oversight in their respective theaters. In Afghanistan, the senior person on the ground is Colonel Randy C. LeCompte and he reports directly to the LOGCAP Executive Director, Mr. Thompson. DCMA Houston is responsible for overall LOGCAP IV contract administration and oversight. DCMA Kuwait, Afghanistan, and Iraq are sub-delegated the responsibilities for transition and day-to-day contract oversight in theater.

Senator MCCASKILL. What interaction are they having with this new Contracting Command?

Admiral MULLEN. I can only say, as a result obviously of some very difficult lessons from Iraq, we're applying them directly in Afghanistan. There is a great deal more focus on this and numbers of people who are assigned to make sure these contracts are not just let fairly, but executed as we want them to be.

The details of exactly who's doing that and how much we have and what the proportion is, I'd have to get back to you.

[The information referred to follows:]

The Logistics Civilian Augmentation Program (LOGCAP) Executive Directorate was realigned under the Army Contracting Command (an Army Material Command subordinate) in October 2008. In April 2009, the LOGCAP Executive Directorate was attached to the Army Sustainment Command for administrative control. LOGCAP Acquisition is executed by the Rock Island Contracting Command, a subordinate organization of the Army Contracting Command.

Senator MCCASKILL. Also, to the extent that you can today or for the record reassure us that you are being more aggressive perhaps than State has been in terms of the oversight of security personnel at your base camps. Clearly we had, after a lot of discussion about security contracts at the embassy in Kabul, an entire hearing on it in June in the subcommittee that I work on on contracting oversight. We had those pictures that—frankly, not only is it a matter of embarrassment for us in terms of the security of our embassy, but as you well know those pictures circulate quickly among our enemies, and it contributes to an image of America that doesn't help us in terms of fighting this war.

Admiral MULLEN. Certainly it's a priority for us in DOD to make sure that never happens. But I will also tell you, when I see an incident like that I start looking in my own house just to make sure I'm okay. We're doing that right now to make sure that that possibility doesn't exist.

We have a great deal more focus on it. We look at the contractors who are there very frequently to make sure they're the right ones.

It is a large number. In Afghanistan it's some 71,000 right now. We don't want it to grow any further, any more than it needs to. Yet we are in many ways dependent on them.

I will be happy to get back to you with more details on our review as a result of what happened with the State Department contractors, which has just been part of a prudent response as far as I'm concerned.

[The information referred to follows:]

U.S. Government provides appropriate oversight of, and accountability for, private security contractors (PSCs) working on its behalf overseas. The Departments of State and Defense have jointly coordinated oversight procedures, including the development of a Memorandum of Agreement in Iraq and government-wide regulations pursuant to congressional legislation. In Iraq, the Embassy and the military have developed joint procedures for movement coordination and serious incident reporting. Allegations of misuse of force or other criminal conduct are investigated, and if there is evidence of a crime, the U.S. Government coordinates with Host government authorities as well as U.S. law enforcement authorities, as appropriate. U.S. Government PSCs in Iraq and Afghanistan are now subject to host country jurisdiction and, under certain circumstances, if the host country is unable or unwilling to exercise it, U.S. jurisdiction. We have established better cooperation with host governments over the last year, by conducting joint investigations of incidents, sharing best practices, and integrating host government police into our protective procedures. The number of incidents is significantly lower now in Iraq as compared with pre-2007 levels, and has never been substantial in Afghanistan. The recent State Department incident has an ongoing review by the State Department and they have taken steps to improve management, oversight, and accountability. The Department of Defense maintains open and direct dialogue with State and will continue to incorporate lessons learned from this incident as appropriate. We recognize that challenges still remain, but we are diligently working to identify and address those challenges.

Senator MCCASKILL. We have the highest percentage of contractors in a conflict in the history of our Nation right now. Never before have we been at this level. The interesting thing is looking at the difference between Iraq and Afghanistan in terms of the make-up of that contracting force. I would like you to try to put your finger on the difference, in that in Iraq the vast majority of people that were hired by our contractors were third party nationals. In Afghanistan, it's Afghanis.

In fact, in March—and I don't know what that number is right now. But in March the number of Afghani contractors was equal to the number of our troops. It was about a 52,000 to a 52,000. The vast majority of the contracting force in Afghanistan are Afghanis.

Can you explain to me what the difference is there and why is it that Fluor and the contractors—and I think Fluor is the one that's gotten most of the contracting so far on LOGCAP IV. What is the difference there? Why are we using so many Afghanis? Is this our substitute for Sons of Iraq?

Admiral MULLEN. This is a very clear strategic shift to focus on and guide—and the number I saw at the end of June was 52,000 out of 71,000. So it's about two-thirds are locals. Quite frankly, the strategic guidance there is invest in this country and invest in the people, and in that regard it does have the same kind of impact that Sons of Iraq does.

Senator MCCASKILL. Are you asking that the contractors hire Afghanis?

Admiral MULLEN. I think the guidance is to do that where they have the capability. I couldn't tell you what the contract says in

terms of their requirements. But clearly the results are exactly that.

Senator MCCASKILL. We may take a more extensive look at this down the line in another location, but I would be very interested in knowing how this came about. If indeed this is part of the strategy, I think it's something that we need to be aware of as to how it's working, because if we're fighting Taliban, the thing that worries me about this, they're good, they're smart. I just want to make sure we're having enough clearance here.

Admiral MULLEN. Sure.

Senator MCCASKILL. I mean, these people are coming into our bases. They're doing the food. They're constructing. We had bad things happen with electricity and showers in Iraq. I'm glad that we are using Afghanis, but it does concern me on the security end that we're taking the steps necessary to make sure that we inadvertently are not inviting some of the enemy up close and personal.

Admiral MULLEN. I certainly understand your concern and I've heard of no examples of that. I've actually discussed this when I've been in Afghanistan with the leadership there, the military leadership, about how we assign or how we determine this. The feedback I got was again it's going to be Afghani first if they have the skills to do this, and that's where the contractors are headed.

Certainly those who are in charge are aware of what the possible threat could be. I know there is a vetting process that they certainly go through to hire, and I'm not any more versed in that right now.

Senator MCCASKILL. I'd like to be more comfortable about that vetting process. I'm a little cynical because I saw the kind of lack of oversight that occurred in Iraq. I trust that you're trying.

No one has talked about the recent allegations about the Pakistani army and what's going on in the Swat region as it relates to extrajudicial killings. My time is up, so I will leave that question to the next round or perhaps another member. But I'm interested in your take on that.

[The information referred to follows:]

The Department treats vetting contractors seriously as a matter of force protection and a critical responsibility of commanders at all levels. While not a part of the contracting pre-award process, contractor vetting is integral to Central Command (CENTCOM) force protection policies and supported by the Office of the Secretary of Defense policies and significant resources. These processes, originally implemented and refined in Operation Iraqi Freedom, are in place throughout the CENTCOM Area of Responsibility (AOR). In the CENTCOM AOR, access to U.S.-controlled bases has evolved from the use of "dumb badges" for local national and third-country nationals to a more robust base access program that uses biometric recognition and smart card technology. Procedures meet the dictates of Homeland Security Presidential Directive 12 which established broad requirements and limitations for identity verification of persons seeking access to U.S. Federal facilities.

In CENTCOM, all personnel entering U.S.-controlled installations and facilities are subject to screening. This screening relies on biometrics for contractor vetting using either Biometric Identification System for Access (BISA) or Biometric Automated Toolset (BAT). BAT is used in Afghanistan; BISA is used elsewhere in CENTCOM. Both are part of the Department of Defense's Tactical Biometric System program. The biometric program includes detailed processes for enrollment of contractors, vetting, adjudication, card issue, verification for base access and visitor control. This includes individual screening through the Biometric Fusion Center in Clarksburg, WV, to verify the identities and background of contractors in close support of U.S. forces. In response to a recent Joint Operational Needs Statement submitted by U.S. Force-Afghanistan's Biometric Task Force and fully endorsed by

CENTCOM and the Joint Staff, the Department is in the process of expanding these capabilities in Afghanistan to maximize our ability to protect our troops from harm at the hands of contractors or anyone else.

Chairman LEVIN. Thank you, Senator McCaskill.

Senator Collins.

Senator COLLINS. Thank you.

Admiral MULLEN. Hi, Senator Collins.

Senator COLLINS. How are you?

Admiral MULLEN. Good.

Senator COLLINS. Good.

Let me begin by thanking you for your extraordinary service. We are so fortunate to have you at the helm. I just want to echo the praise of my colleagues and tell you that I look forward to voting to reconfirm you in the important position that you hold.

Admiral MULLEN. Thank you, ma'am.

Senator COLLINS. Counterinsurgency strategy requires a unity of the military and the civilian effort. We have heard and will continue to hear a great deal of discussion over the critical issue of whether or not we should send more combat troops to Afghanistan. But there has been relatively little discussion of the civilian side of the counterinsurgency effort, and that really concerns me.

When I visited Camp Leatherneck last month with my colleagues, I had lunch with a group of marines that had ties to my home State and they told me that they cleared the Taliban at great cost, incurring casualties, going village by village, and it was hard work, but they were successful, and they were proud of their success. But they told me that their frustration is after they cleared the Taliban out that there's no follow-up, that the civilian capacity does not come in to build the institutions that everyone agrees are essential to providing an alternative to the Taliban.

That has led me to conclude that we're not focusing enough on the civilian side. I left Afghanistan uncertain about the road ahead in terms of more combat troops, but I am certain that we need a surge in the Afghan army and I am certain that we need a civilian surge.

When I was in Helmand Province I learned that we had thousands of marines, like 10,000 marines; we only had like 800 Afghan troops, which infuriated me, and we only had dozens of American civilians. Perhaps there were more NATO civilians.

What should we be doing to surge the civilian side? Do you believe that we need to place more emphasis on a civilian surge?

Admiral MULLEN. There's been a great deal of emphasis placed by all of us, but in particular Secretary Clinton and Ambassador Holbrooke, Deputy Secretary Lew, et cetera. So there is a great deal of focus on this. As I look at the numbers, it is a matter of the machine just can't turn them out very quickly. I share your concern, although I was with those same marines a month before and I was actually taken back by the civilians who rolled into those villages literally the next day. So it's very spotty. Some places we can do it and some places we can't.

But we have to have that. What ends up happening is if the civilians aren't there, we do it. In those same villages, I'm guessing the marines are now doing that until they're relieved. That's just not going to change, and that's what we did in Iraq. We're in some

version of that right now. I think they will get there more quickly than we did in Iraq.

The President's strategy was March 27. General McChrystal got there June 13. One of the challenges we have right now is we're just getting the pieces in place of the President's strategy. Ambassador Holbrooke has worked across an array of requirements to try to get the rest of the comprehensive piece of this strategy going, but it's just starting to get laid in.

I think we won't know where we are with that, quite frankly, probably until the spring time, sort of that first burst.

Senator COLLINS. But it's complicated also by the rampant corruption in Afghanistan. If we're going to have an effort after the marines have cleared a village to prevent the Taliban from returning, which was the frustration I heard, if we're going to have that alternative to Taliban rule, isn't our task made much more difficult by the widespread corruption and the shadow over the legitimacy of the recent presidential election?

Admiral MULLEN. Yes, ma'am, there's no question. The Afghan Government needs to at some point in time appear to actually have some legitimacy in the eyes of its people. The core issue in that regard is the corruption piece. In many ways it's been a way of life there for some time and that has to fundamentally change. That threat is every bit the threat that the Taliban is.

Senator COLLINS. Exactly, and we need to treat it that way.

Admiral MULLEN. Yes, ma'am.

Senator COLLINS. Finally, Admiral Mullen, I'm going to submit for the record a letter that really disturbs me, that I received from John Bernard, who is a retired marine whose son was killed in Afghanistan. His son was the marine whose picture became so controversial. I am so grateful to Secretary Gates and to you and others who tried to convince, unsuccessfully, the AP to not publish that horrible image, which will be the last image that this family has of their beloved son.

But Mr. Bernard, who, as I said, is a retired marine himself, wrote me just a few weeks before his son was killed in Afghanistan. He expressed serious concerns about the rules of engagement. He told me that he felt it put his son and others needlessly at greater risk and that in our commendable and very American attempt to prevent civilian casualties, that we were placing our troops at far greater risk.

I'm going to send you the letter so that you can read it. I promised Mr. Bernard at his son's funeral that I would do so. I hope that you and General McChrystal will look seriously at the concerns he raises about the rules of engagement. I can't tell you how tragic this was, to have received this letter and then what this father feared most indeed happened just a few weeks later. I would very much appreciate your reading his letter.

7/10/2009 10:32

I am writing to you today as an American citizen, 26 year veteran of the United States Marine Corps, committed Christian, Husband, Father of two and a businessman. I am also writing to you as the Father of a Marine who is, as all of his brothers in arms are, in harms way. That by itself is not a cause for concern for me because as a Warrior I understand two things: (1) it is the very nature of the calling to which we have been called that we will be thrust into dangerous, even life threatening situations to fight the enemies of our country and (2) that there could not possibly be a safer place to be than in the company of fellow Marines. In any case, that is the nature of the business and those who serve in this capacity have long since dealt with the realities of life in uniform.

There are, however, certain expectations, an unspoken trust within the ranks of those of us who serve and have served in this capacity. One of those is that we have a belief that as Americans, our leadership will not frivolously spend our blood on unworthy pursuit. To those of us who serve, let me be very clear to those of you who hold our lives in your hands; this means that the reason we may die can ultimately be defined as protecting homeland, family and fellow American lives (spelled US citizens). We also assume we will not be used as pawns in some personal vendetta or worse some career building scheme; that we will not be asked to spill our blood in a foreign land to defend the indefensible. We expect we will be able to do that for which we were trained; export violence with ferocity and drive our enemies to their knees with the ultimate goal of ending the conflict by forcing them to do our will. Such are the dreams and aspirations of the Warrior. Men like this seek to serve side by side with like-minded men prepared to meet their destiny on the field of battle; living a life of honor while testing personal courage in the forge of combat. Our nations Warriors have no other expectations, no visions of grandeur, no careers to bolster, no kingdoms to lord over, no sovereignty to subvert. These men just seek to serve their country.

Now that you have ever so basic an understanding of the intrinsic nature of the Warrior, I hope to encourage you to show them at least the dignity of thoughtful and painstaking decision-making when considering when and where to thrust them into the fires of hell. My demand is that you emphatically understand that this decision will have eternal consequences for the men involved and their families. I also expect this decision to be for the simple reason of defense of country and countrymen (again spelled United States Citizens).

If any part of you still understands that you were sent to Washington DC for the sole purpose of defending these shores and to defend the 'life, liberty and pursuit of happiness' of the citizens of this nation; and if you still believe you are first a servant of all, then you yet may possess the ability to understand the immorality of what I am about to share with you and the necessity to change this policy NOW.

President Obama has seen fit to replace the sitting ISAF commander with a General McChrystal (see Bio at http://en.wikipedia.org/wiki/Stanley_A._McChrystal). Suffice it to say that Gen McChrystal's understanding of the Warrior ethos is somewhat askew from the mainstream. Also let us cut to the chase and identify him more as a political mouthpiece than a field commander. Add to this the dubious addition

of General James L. Jones (see bio at http://en.wikipedia.org/wiki/James_L._Jones), who unlike McChrystal has actual combat experience but still shares the same ultimate goals and one world vision as both McChrystal and Obama. What you have here is an unholy trinity injecting their shared philosophy of 'spare the civilians at all cost' – even though those civilians are not US citizens and are in fact complicit in their own misfortune. The new ROE presented by McChrystal and under which operation Khanjar was mounted is nothing less than disgraceful, immoral and fatal for our Marines, Sailors and Soldiers on the ground. The Marines and Soldiers that are 'holding' territories of dubious worth like Now Zad and Golestan without reinforcement, denial of fire-support and refusal to allow them to hunt and kill the very enemy we are there to confront are nothing more than sitting ducks. Denying them even the ability to fight, which is their only purpose for existing, to defend themselves in a foreign land that sees them first as agents of the devil is detestable to the secular world and immoral to the rest of us. And for those of us with 'vested interests' thrust into that foreign land; it angers us. The links I have provided will give you some indication of the insanity of the current situation and the suicidal position this administration has placed these Warriors in. I admonish this administration and all those currently in public office whom we have entrusted with our security, well-being and the very lives and well-being of the best of us, our Warriors to start acting like you actually care or even understand the consequences of ludicrous decisions like this one. I then hold you responsible to actively seek to change this immoral policy to one that allows our Warriors the opportunity to do what they were trained to do; destroy our enemies and protect our citizenry.

<http://www.militarytimes.com/forum/showthread.php?t=1578049>

<http://www.captainsjournal.com/2009/07/07/no-excuse-marines-losing-legs-in-now-zad/>

<http://www.captainsjournal.com/2009/07/05/calling-on-national-security-advisor-james-l-jones-to-resign/>

To those who would suggest that COIN (counter insurgency) is complicated I say hog-wash. This has become the mantra of the one-world ideologues. This has become complicated because leadership has lost it's way. It is not the responsibility of the leaders (servants) of this country to re-build a country that has not been destroyed by us nor does the leadership of this country have any intrinsic right to spill the blood of this countries finest for this cause. I'll lay it out for you; bad guys entered this country, unannounced and unwelcome and killed Americans on American soil. Bad guys continue to harass and threaten to kill Americans here at home and abroad. Bad guys continue to train in foreign lands and continue to plan to carry out these plans against sovereign American citizens. They have no rights or guarantee of protection under the Constitution of the United States because they are not United States citizens. They are not protected by the Geneva Convention because they don't fight under any Nation's Flag. *We* however, have the right – and responsibility, with historical and Biblical precedent to export violence to crush these Bad guys, wherever they may live and in whatever lair they may hide relentlessly. If the civilian populations in those areas lack the intestinal fortitude to expel them from their midst or they quietly support them or they actively support them; they are not innocent and may well suffer ill consequences for their cowardice and their complicities.

For those of us who have served in uniform and for those of us who have family forced to serve under these immoral conditions the time to quietly observe and pray has ended. There is a new activist emerging; not like the cannabis induced flailing of the sixties and seventies but one with the discipline, training and tenacity of a Warrior. Those of us who have a history in this Warrior culture and a vested interest on the battlefield will be a lot more vocal from this point on. Those in this culture who do not yet know about this immoral ROE change will soon all know as well as the families of those who are

1257

imperiled by it. Those who have actively supported this policy of immorality or are not engaged enough to know of it; they will be re-introduced to your constituencies for their failings. Public service is precisely what it portends to be; service. If there are those among your number who have failed to remember that I can promise you we will make that known within our spheres of influence.

This letter is making its way through the halls of every national news agency as well as the local ones in Maine, as you read this. I have contacted your office by phone, e-mail and now letter to give you a chance to get out in front of it. Consider this a wake-up call.

Admiral MULLEN. If I may, ma'am, I thought what AP did on that was unconscionable to that family.

Senator COLLINS. I agree.

Admiral MULLEN. The issue of rules of engagement is one obviously we all take extraordinarily seriously. We were in my view putting ourselves in a very bad strategic position in terms of being able to succeed with the number of civilians that we were killing. I don't think we really understood that. I think it took too many incidents for us to get that right.

General McChrystal knows that. We also believe that getting this right in the long run will actually result in fewer casualties. That doesn't mean that risk isn't up higher now, given the challenges that we have and the direction that General McChrystal has laid out. So I understand.

Senator COLLINS. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Collins.

Senator Begich.

Senator BEGICH. Thank you very much, Mr. Chairman.

Thank you very much for being here. I know it's a confirmation hearing, so let me just make this quick comment on that. I think you have done a very good job. I'm looking forward to your next 2 years. I'm looking forward to supporting you. That's off the table, now we move on to the other issues.

Senator Collins brought up an interesting point. I had an interesting call last night from my father-in-law, who's a retired Army colonel who served in Vietnam, and actually he had the exact same concern. So as you receive that letter and if you do respond in some formal way, I would like to be included on that if I could. His comment was interesting; he, 20-plus years in the military, but his concern was, we're engaged or we're not. We're not halfway in. We have to make a decision on what we're going to do and how we're going to do it. I'd be very interested if you do a formal response.

Which leads me to a bigger issue. I have gone over to Afghanistan, I've gone over to Pakistan. It was a very eye-opening experience, to say the least. Back earlier in the spring this year, General Petraeus was here and I asked a specific question. I know you said in your opening comments you can't answer ratios, but I want to put this comment on the line and then maybe your response in general.

That is, based on his own ratios of 20 counterinsurgents per 1,000 population—and Iraq it was much higher toward the end; it was in the 24, 25 range, give or take, per 1,000. If you use that ratio, based on the populations from our own data that we have on the population, even with our surge that we have now, with the goal of Afghan troops and police and all the other security personnel, we're going to be short under that ratio 350,000 if we use that ratio.

That was General Petraeus' ratio. The concern I have is, Iraq is a different environment geographically and otherwise. Afghanistan is much different, harder, as you have well defined. So how do we get there? That is a huge number.

Then the second part of that question is, what are our allies going to do? What is their role going to be? Because what I keep hearing and seeing is a diminishment of their role and responsibility, which concerns me, especially from Alaska we've lost 12 more troops in the last 90 days and dozens of casualties. I'd be interested in first those two questions.

Admiral MULLEN. Let me take the allies first and I'll come back to the ratio if that's okay.

Senator BEGICH. Yes.

Admiral MULLEN. Actually, the allies over the last year and a half or so have actually increased their numbers fairly substan-

tially. Now, compared to the numbers that we have—and I just think I'm enough of a realist to believe that it's not going to increase. We're not going to get tens of thousands of more troops, should we have a request for them, from our allies.

But they have some quality capability. They actually, several of the NATO countries, put more forces in to support security for the elections. There are 41 countries that have military or civilian capability in Afghanistan supporting this mission.

Senator BEGICH. Can I interrupt you for just a second. Have they increased significantly the combat front-line folks? That's my point.

Admiral MULLEN. No, but they have actually put some. The forces, the security forces for the elections, were all combat forces.

Then there's the question of will they leave them there after the elections. I don't know the answer to that. But they've actually over the last couple of years put in a significant additional number from their perspective. I think that's important.

As this resource request comes in, I think NATO is going to have to also deal with it as well and look at what they can do. So the training piece, which they do pretty well, both police and army, may be an area that they can add additional capability; the civilian piece as well.

We would look to that. They've gotten better. From my point of view, they're more committed. But we're never going to see an extraordinary addition of resources from our allies.

Second on the ratio piece, the 20 to 1,000. I hope that's 50 to 1. I used to be able to do that kind of math. But basically, the number that we focus on is about 50 to 1. First of all, it's a guideline. If you do the math, clearly with the forces we have there right now we're not close to that.

I think General McChrystal would sit here and tell you, his biggest concern is east and south. That doesn't mean we don't have challenges in the north and the northwest. So we need to be careful with this. We use it as a guideline, not as the absolute answer that, hey, if you're not at 50 to 1 you don't have a chance. We just don't believe that.

But clearly we need to keep that in mind as we move forward and look at where the threat is and see what the ratios are there roughly, which we do.

So as we look at his request that will come in and ask for resources to support his view of where he stands, certainly we'll have that in mind. But we're not there in the classic sense right now. We're not there, we're not close.

Senator BEGICH. But I would say we're not there even in those high-intensity areas.

Admiral MULLEN. Correct.

Senator BEGICH. That's my concern.

Let me follow up on a couple other things. The way I see this, I'm anxious to hear General McChrystal's recommendations, but this is a two-part. It's civilian, it's military. It's a combination. Will his recommendations to you look at the whole spectrum or just the combat component, with a little bit of notation in regards to the civilian component because so much of the State Department participates in that? How will that approach come to you?

Admiral MULLEN. I think the second way, how you describe it. He will address the military side. In our review, certainly at the Pentagon as well as through the administration, we're very specifically looking at the broader requirement as well.

Senator BEGICH. So you'll look at the bigger picture.

Admiral MULLEN. The State Department is. But certainly the administration, the White House, is looking at the integrated view of all the requirements.

Senator BEGICH. Last because my time is up, I know you said in short order. How do you define that? The time that he'll give those recommendations?

Admiral MULLEN. I said that so I wouldn't have to define it.

Senator BEGICH. I know. That's why I'm asking. I noticed. I noted that question was not specifically answered by each person. 2 weeks?

Admiral MULLEN. His submission, I think in the next couple of weeks.

Senator BEGICH. The next couple of weeks to you. Then from there, you and the President—

Admiral MULLEN. We'll go through the same process, Secretary Gates and I. This is a process we've used over the last several years, where I will then review it with the chiefs, and we'll review it with Petraeus. Petraeus will endorse it, first of all, with his views, bring it in to the chiefs. We will essentially look at it, and we'll then take it to Secretary Gates, and then he'll make a decision and we'll move it across the river at that time.

Senator BEGICH. Very good.

Thank you very much. My time is up.

Chairman LEVIN. Thank you, Senator Begich.

Senator Chambliss.

Senator CHAMBLISS. Thank you, Mr. Chairman.

Admiral Mullen, I, too, want to thank you for your commitment and your service to our country, and also the service of your family and the commitment of your family. This is difficult times that we're in. You're gone from home a lot, and without the strong support of your family we wouldn't have the commitment from you. So we thank both of you there.

I want to get to Afghanistan, but first I want to ask a couple of questions about Iraq. We obviously just celebrated the eighth anniversary of September 11. We're getting close to the eighth anniversary year of going into Iraq. These are difficult times still in Iraq. It's pretty obvious that is the case, even though we're downsizing.

First of all, is downsizing on track? Do you see any potential changes in the schedule of reduction in forces?

Admiral MULLEN. No, sir, I think we are basically on track. We're very focused on the elections in January to provide support for the Iraqi security forces, between now and then. We have had violent incidents. All violence is not gone. Al Qaeda is not gone.

One of the things that I do worry about is making sure that I spend enough of my time that we don't lose focus there, because we have come so far, although I think most of the effort between now and the end of 2011 is really political.

Senator CHAMBLISS. We have been training security police and military personnel in Iraq basically since we got there. I remember

visiting with General Petraeus early on in that conflict, where he was in charge of that training. We're now seeing that spike in violence that you talked about with the downsizing of American troops.

Were the Iraqi military as well as security police ready to assume the challenge that was given to them when we pulled out of the major areas?

Admiral MULLEN. By and large, yes, sir. The attacks of a couple weeks ago in Baghdad certainly got everybody's attention. To his credit, I think Prime Minister Nouri al-Maliki reacted very strongly. So did the security forces. They saw that as a wakeup call. They've adjusted very quickly, and what I get when I talk to General Odierno specifically and General Petraeus about that, they're very satisfied with the adjustment.

Senator CHAMBLISS. Moving to Afghanistan, in that same vein, you indicated that it'll be another 2 to 3 years before you think that the Afghan security police and their military are capable of providing any kind of meaningful defense. How do you see the difference from the training in Iraq and the training in Afghanistan?

Admiral MULLEN. I think it's basically focused in a way that we know what they need to learn. It is a huge challenge because of the literacy rate with the Afghan soldiers and police. It's at the single digit level, maybe 9 or 10 percent.

Yet we have a program with the army, where we put that in place to increase their literacy level. We haven't done that with the police. We're just starting to do that with the police right now. We know that's going to be a requirement. I have much more confidence in our ability to train and get the army to the level that they need to get and execute operations, which they're doing right now even at the 90,000 that exists right now. I'm much more concerned about the police, as I was in Iraq at about the same point in time, where we never thought we'd make it with the police there as well, from the ministry to out in the field. In about 2007, which was a couple years after General Petraeus had started that work, it finally started to turn.

That's why I say 2 to 3 years. But I don't think from a training standpoint we're done. If I were to look at Iraq, that was 2004. You are talking about it's now 2009. So there will be a longer term requirement. Yet these forces that we're generating, the army and the police, they're in the fight pretty quickly. We don't have to wait until then. It's just that I think it's going to be about that length of time before they'll really be able to take a grip.

I worry about as violence increases there—our lesson in Iraq was the police and the security forces got worse, just because it was really violent. My expectation is we're probably going to have to go through some of that in Afghanistan as well.

Senator CHAMBLISS. You preempted my next question relative to the literacy rate. As you and I discussed in my office a couple weeks ago, what I understood the literacy rate to be was about 30 percent, and both you and General Petraeus have kind of deflated me there. That was bad enough, but you just indicated about a 9 to 10 percent in the military.

Admiral MULLEN. That's what I understand it to be. I think that is probably close.

Senator CHAMBLISS. Whatever it is, it's very low, which means that at some point in time when we think we have achieved military success, we still have to look at the other side. When we leave, there has to be some kind of economic foundation left there for the Afghan people to be able to survive. With a literacy rate of somewhere of, let's assume it's in teens or assume it's 20 percent, that means 80 percent of the people in that country can't read and write.

What do we do? How do we leave that country in a state nonmilitarily that they can survive?

Admiral MULLEN. I think first of all they have to have security. That's the necessary condition. They have to have enough good governance to be able to survive. That includes things like rule of law and institutions that provide things for them that just aren't there now, goods and services. But it also has to have some level of economic underpinning. I don't underestimate the challenge there as well. It's 1 of the 5 or 10 poorest countries in the world.

There has to be some economic improvement. Not unlike Iraq in a sense or just about any insurgency or counterinsurgency, it's a three-legged stool. You have to be able to do security. You have to be able to do development, create jobs, as well as a level of governance.

Senator CHAMBLISS. My time is up, but we talked with General McChrystal last time he was here about the National Guard from various parts of the country going into agricultural areas and providing, rather than military security cover, agricultural training services. Is that program still being successful?

Admiral MULLEN. It is. I can't remember how many brigades now or how many States, but it's like six or seven States that continue to do this, to provide agricultural expertise out of the Guard. It's had a big impact and we're going to continue that.

Senator CHAMBLISS. Thank you very much, Admiral.

Chairman LEVIN. Thank you, Senator Chambliss.

Senator Akaka.

Senator AKAKA. Thank you very much, Mr. Chairman.

Aloha, Admiral Mullen.

Admiral MULLEN. Aloha, Senator.

Senator AKAKA. I would want to thank you very much for your outstanding and dedicated service to our Nation over these years. You have shown outstanding leadership as the Chairman of the Joint Chiefs. I also want to congratulate you on your nomination to continue to serve in this position.

Admiral MULLEN. Thank you.

Senator AKAKA. I also want to add a welcome to your lovely wife Deborah to the hearing.

Admiral MULLEN. Thank you, Senator.

Senator AKAKA. Admiral, I'm interested in the Afghanistan momentum. We have been fighting in Afghanistan now for about 8 years. We are facing a more sophisticated and resilient insurgency than any time since 2001. My question to you is what could be the long-term effects if we fail to quickly regain the initiative and reverse the momentum in Afghanistan?

Admiral MULLEN. I worry a great deal about essentially it becoming a failed state and a safe haven and, while not immediately,

maybe the mid-term effects that that has on Pakistan. The President's strategy—and I strongly agree with this—it's a regional strategy. It involves both those countries. Even though they're both sovereign countries, they have links that go back throughout the ages.

There are other countries in the region that I think need to be paying a lot of attention to this as well, India being a specific one. It's very difficult to predict here. Actually, I think what has happened in Afghanistan, as difficult as it is, has contributed to the diminishment of al Qaeda even in Pakistan. So it is the combination of efforts in both countries I think that is so important to get at what is the core goal of the President's strategy, which is al Qaeda.

I don't know for sure, but I worry a great deal that if the Taliban retake Afghanistan that in fact clearly the option is there to recreate that safe haven where they were pretty comfortable. The long-term effects of that I think could be pretty disastrous for us and our national interests, assuming al Qaeda is somehow able to both plan and execute attacks, which they are planning to do today.

Senator AKAKA. As you mentioned, Pakistan begins to play into our strategy. The administration's goal in Afghanistan and Pakistan is—and let me quote—“disrupt, dismantle, and defeat al Qaeda in Pakistan and Afghanistan and to prevent their return to either country in the future.” Admiral, assuming we are able to defeat al Qaeda, how would you propose that we accomplish the last part of the goal of preventing their return to Afghanistan or Pakistan?

Admiral MULLEN. I think if the country of Afghanistan has a strong enough government and a strong enough security force, they can prevent them from coming back. Clearly it doesn't include the Taliban under their current leadership.

The “defeat al Qaeda” piece, and it does focus on al Qaeda, but these terrorists and extremists, particularly in recent years, have become much more linked. So yes, it's al Qaeda, but it's also the Taliban. It's also Lashkar-e-Taiba (LET), it's also Tehrik-e-Taliban Pakistan (TTP), it's Jama'at-ud-Da'wah (JUD), it's Jaish-e-Mohammed (JEM). All of them have the same kind of outlook. Now, each one of them does not threaten us directly as a country, but the totality of this epicenter there in terms of the terrorists who are there is one that I am extremely concerned about, led by al Qaeda.

Senator AKAKA. Admiral, our military continues to shoulder a huge burden in the Middle East and South Central Asia. It seems the number of deployed forces in Afghanistan will remain high and there are reports that there might be a request for additional troops. That concerns me about military readiness.

If we continue our current pace of operations, how would you assess our readiness to counter future threats abroad?

Admiral MULLEN. At the current levels, which includes the plan to draw down in Iraq, we actually will start to increase dwell time, which is nominally for the ground forces, particularly the Army, 1 to 1. Actually, the Marine Corps, because we've built three additional battalions, they're coming out of Iraq now, the Marine Corps deployment level ratio—I'm sorry—dwell time is out to about 1 to 1.5 for its main units. There are some units whose ratio is 1 to 1.

So we'll be able to increase that dwell time, and that will happen over the period of about 2 or 3 years with the Army as well. General Casey says about 2011 or 2012, assuming we come out of Iraq and our levels in Afghanistan don't go too high, that he also would be able to increase that dwell. That buys us some recuperation time, which we need for our troops and our families, for our gear as well. But it also allows us to start training for other missions.

We've clearly accepted additional risk globally focusing on Iraq and Afghanistan. That is how we would move forward here.

I would be first and foremost concerned about just the recuperation time for our troops and families, while at the same time getting ready for those additional possibilities.

Senator AKAKA. Admiral, I applaud your continued efforts to be a strong advocate for our wounded warriors. During a recent speech you stated: "Time is of the essence when it comes to finding better treatments for traumatic brain injuries." Admiral, what more can be done to better treat traumatic brain injuries?

Admiral MULLEN. I spend a fair amount of time with my wife Deborah visiting what I would call centers of excellence, certainly in the Veterans Administration (VA) world. I was recently up in Boston and I was struck at the advancements that are being made there by the Boston VA and their relationships in the community with Harvard and Boston University and other institutions, educational and research institutions, which are contributing. I know Secretary Eric Shinseki has this as a priority as well.

I think that we, that DOD and the VA, must work as hard as we can together to surface and then fund these things. Some of what I saw there were studies that were going on for 3 or 4 years that actually had some good information. So what are we doing with them? We have to know what's going on and then execute, and basically take it and do something with it. I just believe we're in the beginning stages of this, 8 years into war notwithstanding, that we're really just starting to get to a focus across the full spectrum that addresses these kinds of issues.

I use the VA hospital as an example. I think we need to do this throughout the country.

Senator AKAKA. Thank you very much, Admiral.

Chairman LEVIN. Thank you, Senator Akaka.

Senator Thune.

Senator THUNE. Thank you, Mr. Chairman.

Admiral, thank you for your great service to our country. I do want to add my support for your reconfirmation. Thank you, your wife and family for their service as well. There are some tough things that we're involved with. Of course, you're in the middle of it all. I know much of the focus today has been on Afghanistan, as it rightly should be. I have one question with regard to that, but I'd like to ask a couple of other questions if I might.

I, like everybody else in this country, want to see us succeed in Afghanistan and be able to put together a strategy that would allow that to happen. To me, that I think means preventing terrorism organizations from being able to create safe havens in that country and also making sure that we have a well-trained Afghan army and police force that can maintain security and take over more of the fight.

That's why I'm a little bit concerned about, last Tuesday NBC News aired a story from a reporter that was embedded with a U.S. Army unit on patrol in Afghanistan and one particular aspect of that report caught my attention. There was a report that highlighted how the U.S. forces are not allowed to search private dwellings due to cultural sensitivities. Afghan soldiers search Afghan residences. Yet the report also noted that the Afghan army soldiers are reluctant to support the coalition in the more dangerous aspects of the mission. It went on to say that, while the U.S. soldiers searched a wooded area, this NBC report stated: "It's so risky, bombs easily hidden in this brush, Afghan soldiers refused to go in." That's what I found troubling about that report.

I guess my question is, is this report an isolated case or does the Afghanistan National Army often refuse to perform dangerous missions?

Admiral MULLEN. I'm not aware that they do, and their reputation is such that they're good fighters, and that our relationship with them is very strong. You're speaking to the directive or direction that actually I think General David McKiernan put out before General McChrystal got there, and I know McChrystal concurs with this, is we just were doing ourselves a lot of damage by entering those homes ourselves and strategically we were really hurting ourselves.

But I am not aware of a rampant kind of incidents that you just described where the Afghan army isn't in the fight. In fact, and it's not an army story, but it's a police story, I think in the last couple of months the Afghan police have had upwards of 150 plus of their officers killed. They have also sacrificed greatly. All the problems that we do have with the police, and they are plenty, we've had an extraordinary number of sacrifices there as well.

But I certainly haven't gotten that kind of feedback. I can check and see if it's different.

Senator THUNE. It was a news report, but I guess it gets to the broader question of as we place more and more burden on the Afghan army and the Afghan police to perform, do we have a level of confidence that they will perform up to our expectations and as we begin to at some point hopefully hand off, that they continue to provide security.

Admiral MULLEN. All the feedback I've gotten is yes. That doesn't mean we don't have challenges. I hope the report is only isolated, but I think the report speaks to the complexity of the challenge of both training and executing and getting them into the fight. It is an enormously complex environment, mission, et cetera. But I'm just not aware of any kind of extensive incidents like that that you described.

Senator THUNE. To shift gears for just a minute, there was a September 10, 2009, article in The New York Times. The headline read that "United States Says Iran Could Expedite Nuclear Bomb," and that American intelligence agencies have concluded that Iran has created enough nuclear fuel to make a "rapid sprint" for a nuclear weapon.

I know that there are conflicting views about when that capability will exist and I guess I'm interested in your thoughts about

how quickly Iran could develop a nuclear weapon if they decide to make a rapid sprint to that end.

Admiral MULLEN. Those time frames generally run for me 1 to 3 years. What you're talking about, what that article spoke to, was what I call a breakout capability. In other words, they develop enough of the technology and then they make a decision, the Supreme Leader makes a decision, to go. From there it takes a period of time. As you indicated and I think the article indicated, there are various views of what that takes.

Everybody is sort of in that ballpark, 1 to 3 years. So it's not like it's a long way off should they decide to do that. My personal belief is that the Iranians are on a path, they want to develop nuclear weapons, and I think that would be an incredibly destabilizing outcome for a part of the world that is already pretty unstable.

Senator THUNE. You had stated in your answers to some of the advance questions that, with regard to current negotiations over the follow-on Strategic Arms Reduction Treaty (START), that the proposed range of 500 to 1,100 strategic delivery vehicles and a limit of 1,500 to 1,675 warheads would be sufficient to maintain U.S. strategic deterrence. I guess my question has to do more with the delivery vehicles, but do you really mean to suggest that the United States would be able to maintain the strategic deterrent, the nuclear umbrella to allies, at a level of 500 strategic delivery vehicles?

Admiral MULLEN. I'm very comfortable at 500 to 1,100. It is a range. That's where the negotiations are. At some level coming down from 1,100, I get pretty uncomfortable with our ability to do that. That's really for the negotiators to figure out and obviously what our strategic deterrent will be.

What I am equally concerned about is the need for us as a country to invest in this capability, in the industry for the future, which has been underinvested in or not invested in for a significant period of time, so that we can have a deterrent force that is technically current and reliable. So it is that range. At that range on the high end, I'm very comfortable. On the low end I'm pretty uncomfortable.

Senator THUNE. Do you know, has DOD done analysis at the low end?

Admiral MULLEN. Yes, sir, we have.

Senator THUNE. Is that something that would be available to Congress?

Admiral MULLEN. I'm not sure. I'd have to check. I mean, pretty much anything is if you want. It's been a few weeks. I'd have to go back and look at it to see. We're right—"we," our country, is right in the midst, the administration is right in the middle of negotiating to get to a START follow-on by the end of this year.

Senator THUNE. Right. Obviously, that requires significant force structure changes.

Admiral MULLEN. Yes, sir, I understand that.

Senator THUNE. Submarines, bombers, Intercontinental Ballistic Missiles, something would have to be eliminated. I just wondered if the Department's carefully studied that.

Admiral MULLEN. We actually know where the break points are. Analytically, we've looked at this and so we know where tough de-

cisions have to be made as you come down and decisions about is it a triad or is it a dyad and what would it take, if we sustained a triad even at lower levels, which could be very expensive. Actually, I'm very comfortable with the level of analysis that we've done with respect to that.

Senator THUNE. I'd be interested in following up with you if that's something that would be available for us to look at.

Thank you, Admiral.

Thank you, Mr. Chairman.

[The information referred to follows:]

[Deleted.]

Chairman LEVIN. Thank you, Senator Thune.

Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman.

Admiral Mullen, thank you so much for being here. I thank you for your work, for your service. To your wife Deborah and to your sons, I thank you so much for your family sacrifices. It means a lot, I know, and I do think that you are certainly well qualified for a second term. Thank you for doing that.

I wanted to ask you a question about Afghanistan. I think that succeeding in Afghanistan requires partnership built upon the strong relationships that we have with the Afghan Government, national security forces, and above all the local populace. It's essential that our strategy in Afghanistan is centered on protecting the Afghan people from the Taliban, which we talked about, enabling the Afghan governance and reconstruction, and enabling the capacity of the Afghan national security forces. As Secretary Gates has indicated, we must ensure that Afghanistan has the appropriate intelligence, law enforcement, and internal security capabilities to sustain the long-term opposition against the Taliban.

Our troops and resources in Afghanistan must be used to build trust with the Afghans, move to the next phase of counterinsurgency tactics, and enable the Afghan Government to conduct development and reconstruction operations. Our U.S. troops have to be perceived by the Afghans not as the problem, but rather as part of the solution.

Has the Department begun discussing the resourcing effort within the special operations community to execute the President's Afghanistan strategy, specifically the theater special operations forces needed to train the Afghan National Army and Police and the strategic special operations forces needed to conduct the combat operations under the domain of the Joint Special Operations Command (JSOC)?

Admiral MULLEN. We think that clearly the Afghan special forces are a very capable group or part of the Afghan military and so there's great emphasis there. As we move forward I think in the strategy, General McChrystal's review of the President's strategy as he took leadership, took command there, the priority to focus on the Afghan people and also train and equip the Afghan forces writ large—special forces, army, as well as police—is a top priority.

He hasn't submitted a request yet to say, given this, these are the forces that I need. But I'm confident that inside that, the totality of that request, will be embedded a request for a certain

amount of special forces to get at exactly the issue that you're talking about. That will come in great part out of JSOC, among others, and out of Tampa and the totality of our special forces, who are as pressed as any other part of our military, quite frankly, and are so exceptional in what they do.

So it will be, I believe as I look at it right now, a very important part embedded in the fullness of the counterinsurgency approach, because these forces are. I'm confident that request will come in. We just don't have it yet.

Senator HAGAN. Let me ask you a little bit about Pakistan. I believe that the stability of Afghanistan is dependent upon the stability of Pakistan, and I believe that the Pakistani Government's beginning to recognize that the Pashtun insurgency in the Federally Administered Tribal Areas (FATA) is a threat to Pakistan's sovereignty. We need to enable the Pakistan army and the Frontier Corps with the capacity and capability to conduct sustainable direct action missions against the more dangerous elements of the Pakistani Taliban and al Qaeda in Waziristan. Unlike the Swat region, Waziristan is populous, mountainous, and remote, characteristics that are not conducive for conventionally trained Pakistani army.

We also need to work with the Pakistan Government and military to deny the safe havens for the Afghan Taliban's high command, currently based out of Quetta in Pakistan's Baluchistan Province.

Though General McChrystal's assessment deals with our civil affairs strategy in Afghanistan, can you provide an update on the Department's strategy along the Afghan-Pakistan border? Of particular note, it's interesting to me since it's the 82nd Airborne out of Fort Bragg that's currently based in Regional Command (RC)-East, and Major General Curtis Scaparotti is the regional commander in RC-East.

Admiral MULLEN. There's been a lot that has changed in the last year in Pakistan with what the Pakistani military and the Frontier Corps have achieved. I think it's important to recognize that, because a year or 2 ago there were many people who were very skeptical that they would do anything. They've had a big impact. It hasn't been perfect.

We are there to support them where they are asking for our support. That said, it's only going to go as fast as they want it to go. I've been there I think 13 times. It's very clear to me that they very much appreciate the support, but it's going to be at their pace, even though many of us would like to see it happen more quickly.

He has a two-front threat. The Pakistani military also, they consider their principal threat, their existential threat, to be India, not these extremists. They are increasingly concerned about the extremists, which is why they've addressed it. He's started to train his forces in counterinsurgency, which a year ago or 2 years ago they didn't do much of. He's rotating them, and he's had some pretty significant positive impacts on it.

In addition to the Quetta shura, I am as concerned about the Haqqani network, which is north of there and which is sort of the centroid for feeding Afghan Taliban in and out of Afghanistan killing our people and killing Afghan citizens. It's still an extraor-

dinarily dangerous border. I think it will be for the foreseeable future. We've actually had success in diminishing al Qaeda leadership and it's not as strong as it was, but it is still very lethal and still very focused on us as a country, planning to still execute attacks against us and other western interests.

There's been progress, but we've still got a long way to go. From the overall strategy standpoint, we're still very much invested in Pakistan. We think that's an important long-term relationship. They still ask the question: Are you staying or going this time? Not unlike the question that gets asked in Afghanistan. The Senator Kerry-Senator Lugar bill is very important as far as I'm concerned, because it's not about the \$1.5 billion a year as much as it is a 5-year commitment to Pakistan.

So our strategy is, I think, much more comprehensive with Pakistan than it used to be. That said, there are limits. It's a sovereign country and they're very much in charge of their own country.

Senator HAGAN. Thank you. I see that my time is out.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Hagan.

Senator WEBB.

Senator WEBB. Thank you, Mr. Chairman.

Admiral, I'd like to add my thanks to you and Deborah and your sons for all the years of service that you've given our country, and also to express my appreciation for the integrity and forthrightness that you have brought to this job. I can tell you that it is greatly appreciated on this side of the river and, having spent 5 years in the Pentagon, I know it's appreciated on the other side as well.

There's been a lot of talk about Afghanistan. I'm going to ask some questions on it. But before I do, I would like to point out that we're doing this Quadrennial Defense Review and it's a very important one with the new administration in. I hope that we don't lose sight on either side of the river of the larger aspects of national strategy that sometimes fall away at the expense of short- and mid-term ground commitments that can affect force structure in the short term, but really not play out to our national advantage in the long term.

In the interest of time, I have two questions that I would like to submit for the record on that. One of them relates to the size of our Navy. The other regards the roles and missions of the Marine Corps. I will submit that to you for the record.

With respect to the situation in Afghanistan, there's been discussion earlier about whether this is a new strategy or an ongoing strategy. The most important point I believe is whether this is a valid and achievable strategy, whether we have attainable goals that are clearly articulated our side to the other side and to the American people, and whether those goals have an understandable end point so that we know when we are done, particularly in a military sense.

What you are attempting to achieve or what the administration says that it's attempting to achieve is in some ways without historical precedent. We've had a lot of discussion today about Iraq as something of a touchstone here. But as you know and I know, for better or worse, the Iraqis have been used to in the past a strong central government, strong national government, and they also

have for a very long time had a national army. Hundreds of thousands of Shia are known to have died in the war against Iran, fighting in the national army of Iraq. It's a different situation with respect to Afghanistan.

I wonder if you would comment on the historical precedent or lack thereof for what you are attempting to do right now.

Admiral MULLEN. I think history is something we must pay attention to, recently in Iraq and the things that we've learned there, the things that are the same, the things that are different, obviously the history in Afghanistan, which has rich lessons as well, and it's a country that's never been governed centrally. I certainly understand that.

I don't argue for a strong central government in Afghanistan. I think it's important that there is governance that is available to the people at every level. So in the totality of governance that I would look at for the future, it would be from village to some level of relatively weak central government that isn't corrupt, more than anything else, in terms of establishing some semblance of governance for the future.

I hear the discussions about an occupying force. I think McChrystal said it very well not too long after he got there, that it isn't necessarily how big; it's what you do with what you have and how the Afghan people—

Senator WEBB. In the interest of time, my readings are that in the history of Afghanistan the largest national army, actual national army, was somewhere between 80,000 and 90,000.

Admiral MULLEN. In 1979.

Senator WEBB. Your goals with respect to a national level force are at what level?

Admiral MULLEN. Right now, for the army to be 130,000.

Senator WEBB. National police, military combined?

Admiral MULLEN. Right now it would be about 240,000 or 230,000 combined.

Senator WEBB. In the absence of an affiliation with a national government, what is the challenge of building a national military and police force of that size?

Admiral MULLEN. I think the challenge is huge. The only thing I would say is that as a percentage of the population the goals that are out there, not just these but even the goals you may hear tied to the chairman's previous letter, are within the math as a percentage of the population.

But I think you raise a good point. I don't underestimate the challenge of recruiting a force that could do this at the national level. I am encouraged because the army is seen as the one non-corrupt institution the country has and it's held in pretty high regard by the people. They're also an excellent fighting force historically, with a great warrior mentality.

Senator WEBB. We run the risk, as I mentioned to General Petraeus and General McChrystal, of allowing our success to be defined by something that's never happened before, something that we can't totally control, which is something that concerns me.

You're familiar with this raid that took place in Somalia within the past 24 hours?

Admiral MULLEN. I've seen the press reports.

Senator WEBB. In concept, this was American Special Operations coming in over the horizon, presumably off of naval ships, taking out an element of al Qaeda, and returning back to its original point of origin, which to me, if the target was an appropriate target, is an appropriate way to use military force against international terrorism. Would you agree?

Admiral MULLEN. Globally, we're very focused on this. I'd actually be happy to go through the details of that, but I'd really need to do it in a closed session.

Senator WEBB. It points to a concern that a lot of people who have served and a lot of people who have written about the situation in Afghanistan share. That is that maneuverability is the most effective way to conduct operations against international terrorism, and the more territory that you have to defend or occupy the more vulnerable you are in terms of carrying out your mission.

I know the counter-argument about the populace, but it would seem to me that, from what I've been hearing or reading with respect to the level of activity of al Qaeda in Afghanistan, it seems to be very low. We have to be pretty careful in terms of how we lock our people down in defensive cantonments as we approach the issue.

Admiral MULLEN. I think you'll see McChrystal emphasize the exact maneuverability that you're talking about. I take it a huge part of that is just footprint-related. The larger the footprint, the less maneuverable you may be. But clearly he does not want his people in cantonments and he's made that very clear.

Senator WEBB. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Webb.

Senator Udall.

Senator UDALL. Thank you, Mr. Chairman.

Good morning, Admiral.

Admiral MULLEN. Good morning, Senator.

Senator UDALL. It's good to see you.

Again, let me touch on three subjects and I'll do my best to use my time efficiently: on "Don't Ask, Don't Tell," on Iraq, and then turn to Afghanistan.

When you testified at your last confirmation hearing, you rightly pointed out that the law of the land was "Don't Ask, Don't Tell," and it was the Pentagon's job to implement and abide by that policy. We often look to you for personnel recommendations and as we are on the verge, I believe, of holding the first hearing, perhaps this fall, in 16 years on "Don't Ask, Don't Tell," I would welcome your thoughts and would ask if you would consider putting your thoughts in writing before that hearing later this fall, so that we can have the benefit of your thoughts.

Admiral MULLEN. Yes, sir. I'd be glad to do that.

Senator UDALL. Thank you for that.

I want to commend the chairman for his willingness as well to consider moving in that way.

To Iraq: National elections will be in January, there is some talk of a concurrent referendum on the presence of our troops there. Ambassador Hill believes that it won't actually be brought to the ballot, but I would like your thoughts on what General Odierno

and others are preparing if that were to be on the ballot and were to pass.

Admiral MULLEN. This was a possibility last summer, spring and summer, as well, and it fell out and was moved to the right. It's obviously resurfaced. It is a great concern on the part of both Ambassador Hill and certainly General Odierno. Obviously, as part of the political spectrum that is there that I think is such a dominant part of how Iraq moves ahead, the outcome with respect to whether this actually gets voted on or not, the referendum occurs, I think is really critical.

We were on a plan and on a glide slope right now that we think makes a lot of sense, gets us through the elections. Then actually we start coming down pretty dramatically starting in the spring to that 35,000 to 50,000. Clearly, the Iraqi people and the Iraqi Government are in charge of their country. If there's a referendum that we're going to leave, we'll leave.

The military view from a security standpoint right now, we think that's pretty high risk. The glide slope that we're on is one that we're much more comfortable with.

Senator UDALL. Thanks for that update. I think we'd be well served to continue to prepare for any of those particular scenarios.

Let me turn to Afghanistan, but in an interesting connection. I want to turn to Deborah. She may have done more for our future counterinsurgency efforts than anybody because, if my memory is right, she encouraged, strongly encouraged, you to read the book entitled "Three Cups of Tea." I know Greg Mortenson. I know you've gotten to know him. He's pointed out that cultural sensitivity is in some ways one of our greatest weapons. There's no place like the United States for cultural sensitivity since we have every culture, every ethnic group, every racial group, every country, represented here among our population.

He noted and you noted in some remarks that western fast food culture is not well suited to that part of the world. He's speaking of Afghanistan, the Middle East. Results are measured in decades and generations, rather than minutes and seconds. It takes time to build relationships, time to learn cultures, time to foster sincerity and mutual respect.

My question to you is, do we have that time? I remember General Petraeus talking about different clocks in Washington and Baghdad as we were talking about timelines. What are the different clocks telling you about what's happening in Kabul and here in Washington?

Admiral MULLEN. I'm greatly worried about the time that we have. That's why I have such a sense of urgency about getting this right. It's why I recommended, very specifically that's why I recommended, that General McChrystal be put in a leadership position out there, because I don't think we have a lot of time. At the same time, I feel we almost must take time because it's such a vital part of the world long-term from the standpoint of our strategic national interests. This is Afghanistan and Pakistan, it's Central Asia and South Central Asia.

It's a real conundrum in that regard. I think we have to move quickly to start to turn this thing around. Then at the same time, I think we have to have a long-term relationship that allows those

young girls, when I went out there to open up that school, to grow up and make a difference as they raise families and, as Greg Mortenson would say, they give guidance to their sons: You are not going to go do this.

Senator UDALL. Yes, the heartening core of that effort is that the elders in those communities, in other words the men, understand the potential if you empower women in those cultures. At the same time, those are very patriarchal cultural structures.

Again, thank you, Deborah, for what you've done to help us in these important national security efforts.

My final question is the footprint debate we're having about Afghanistan. I know Secretary Gates expressed a concern about being seen as occupiers as well as partners.

He said an increased footprint becomes part of the problem, depending on whether the nature of the footprint and the behavior of those troops and their attitudes and their interactions with the Afghans promotes an occupier perspective or a partnership perspective.

What are your thoughts on this question of increased footprint and how we find that right balance?

Admiral MULLEN. I think that under no circumstances can we be seen as an occupier. We know we're not. That's who we are. We've never been. We haven't done it anywhere. But that message has to be understood by the Afghan people. I think General McChrystal, as I indicated earlier, said it very well not too long after he got there. He was much less concerned about footprint, although he has a concern, than he is about what are you doing with it. So what are you actually doing to engage the people, to let them know you're on their side in a way that they accept that?

We were in too many cantonments. We were not integrated with them. We weren't living with them. The message was one of occupation on the part of many. There again, the Afghan people don't like the Taliban. They don't want to return to that rule. But they still have questions about whether we're staying long-term, not just the combat side of this, but whether we're staying long-term and we're going to be with them. Before we left them and they know that.

It's really, I think, what you're doing with the forces that are there, as opposed to the size of the footprint.

Senator UDALL. I see my time has expired. Thank you again for your service and I look forward to working with you as we continue to make the case to the American people with three or four or maybe even just two quick bullet points about why we have to be successful in Afghanistan.

Thank you.

Chairman LEVIN. Thank you very much, Senator Udall.

Again, thank you very much, Admiral, for your service, for your answers today. I think that colonel and that captain that I quoted before put the issue very succinctly for me, which is that we have to look hard at how we generate Afghan forces and that the lack of Afghan forces is our Achilles' heel. That was dramatically brought to our attention when we were in Helmand Province; the ratio of forces was 5-to-1, 5 marines, 1 Afghan soldier. Totally unacceptable.

No one's talking about removing all of our forces from Afghanistan. The question is whether we go beyond at this time and make a commitment at this time to additional combat forces, beyond what has been already put in motion. That is an issue worthy of debate. It is part of a much larger picture. As you have indicated here this morning, this is not just a picture of one part, of just combat troops additional to what's already a commitment. There are many other issues involved here in terms of the resources that may be requested.

We look forward to your review as the Chairman of the Joint Chiefs, taking I presume an independent review with your other chiefs of whatever recommendation is presented to you. You obviously put a great deal of stock in a McChrystal recommendation when it's forthcoming. But you will be giving your own independent view to the Secretary of Defense, and he will be giving his recommendation, I presume, to the President. Is that the way it works?

Admiral MULLEN. Yes, sir.

Chairman LEVIN. We are going to stand adjourned. We are obviously going to move as quickly as we can with your nomination. I'm sure you're going to get a very strong unanimous vote from this committee. We've already heard everyone speak out on it. I see no reason why we can't proceed very promptly to the floor. There may be some questions for the record. If there are, we would hope they would be filed within the next 24 hours so we can get this done promptly.

We thank again your wife and family. I think each one of us has touched upon their service as well as your own, and we're grateful for all of it.

We stand adjourned.

[Whereupon, at 12:04 p.m., the committee adjourned.]

[Prepared questions submitted to ADM Michael G. Mullen, USN, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. On previous occasions, you have answered the committee's policy questions on the reforms brought about by the Goldwater-Nichols Act, the last time being in connection with your first nomination to be Chairman of the Joint Chiefs of Staff (JCS).

Has your view of the importance, implementation, and practice of these reforms changed since you testified before the committee at your last confirmation hearing?

In light of your experience as Chairman, do you see any need for modifications to Goldwater-Nichols? If so, what modifications do you believe would be appropriate?

Answer. No. Overall, the Goldwater-Nichols reforms have strengthened the warfighting and operational capabilities of our combatant commands and our Nation. The importance of these reforms has not diminished with time.

DUTIES

Question. Based on your experience as Chairman, what recommendations, if any, do you have for changes in the duties and functions set forth in section 152 through 155 of title 10, U.S.C., and in regulations of the Department of Defense (DOD), that pertain to the Chairman and the Vice Chairman of the JCS and the organization and operation of the Joint Staff in general?

Answer. Having been in office for a sufficient time to determine if changes are advisable, I do not recommend any changes to the law.

RELATIONSHIPS

Question. Please describe your understanding of the relationship of the Chairman of the JCS to the following officials:

The Secretary of Defense.

Answer. DOD is composed of the Office of the Secretary of Defense (OSD), the Military Departments, the Chairman of the JCS, the combatant commands, the Inspector General of DOD, the Defense Agencies, the DOD Field Activities, and such other offices, agencies, activities and commands established or designated by law, or by the President or by the Secretary of Defense. The Secretary of Defense, according to existing law, assigns the functions of the heads of these offices. The Chairman and the JCS are responsible to the Secretary of Defense for the functions assigned to them. Under title 10, the Chairman, JCS is the principal military advisor to the President, the National Security Council (NSC), and the Secretary of Defense.

Question. The Deputy Secretary of Defense.

Answer. Under existing directives, the Deputy Secretary of Defense has been delegated full power and authority to act for the Secretary of Defense on any matters upon which the Secretary is authorized to act. As such, the relationship of the Chairman with the Deputy Secretary is similar to that with the Secretary.

Question. The Under Secretaries of Defense.

Answer. Title 10, U.S.C., and current DOD directives establish the Under Secretaries of Defense as the principal staff assistants and advisers to the Secretary regarding matters related to their functional areas. Within their areas, Under Secretaries exercise policy and oversight functions. They may issue instructions and directive type memoranda that implement policy approved by the Secretary. These instructions and directives are applicable to all DOD components. In carrying out their responsibilities, and when directed by the President and Secretary of Defense, communications from the Under Secretaries to commanders of the unified and specified commands are transmitted through the Chairman of the JCS.

Question. The Assistant Secretaries of Defense.

Answer. With the exception of the Assistant Secretaries of Defense for Public Affairs, Legislative Affairs, and for Networks and Information Integration, all Assistant Secretaries of Defense are subordinate to one of the Under Secretaries of Defense. In carrying out their responsibilities, and when directed by the President and Secretary of Defense, communications from the Under Secretaries to commanders of the unified and specified commands are transmitted through the Chairman of the JCS. If confirmed, I will work closely with the Assistant Secretaries in a manner similar to that described above for the Under Secretaries.

Question. The General Counsel of the Department of Defense.

Answer. Under title 10, U.S.C., section 140, the DOD General Counsel serves as the chief legal officer of DOD. In general, the DOD General Counsel is responsible for overseeing legal services, establishing policy, and overseeing the DOD Standards of Conduct Program, establishing policy and positions on specific legal issues and advising on significant international law issues raised in major military operations, the DOD Law of War Program, and legality of weapons reviews. The office of the DOD General Counsel works closely with the Office of Legal Counsel to the Chairman of the JCS, and communications with the combatant commanders by the DOD General Counsel are normally transmitted through the Chairman of the JCS.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. The Vice Chairman of the JCS performs such duties as may be prescribed by the Chairman with the approval of the Secretary of Defense. When there is a vacancy in the Office of the Chairman or in the absence or disability of the Chairman, the Vice Chairman acts as Chairman and performs the duties of the Chairman until a successor is appointed or the absence or disability ceases.

Question. The Secretaries of the Military Departments.

Answer. Title 10, U.S.C., section 165, provides that, subject to the authority, direction and control of the Secretary of Defense, and subject to the authority of the combatant commanders, the Secretaries of Military Departments are responsible for administration and support of forces that are assigned to unified and specified commands.

The Chairman advises the Secretary of Defense on the extent to which program recommendations and budget proposals of the Military Departments conform to priorities in strategic plans and with the priorities established for requirements of the combatant commands.

Question. The Chiefs of Staff of the Services.

Answer. Because of the Goldwater-Nichols Act, the Service Chiefs are no longer involved in the operational chain of command. However, this does not diminish their importance with respect to title 10 responsibilities, and among other things, they

serve two significant roles. Primarily, they are responsible for the organization, training, and equipping of their respective Services. Without the full support and cooperation of the Service Chiefs, no combatant commander can assure the preparedness of his assigned forces for missions directed by the Secretary of Defense and the President.

Second, as members of the JCS, the Chiefs are advisers to the Chairman and the Secretary of Defense as the senior uniformed leaders of their respective Services. In this function, they play a critically important role in shaping military advice and transforming our joint capabilities. If confirmed, I will continue to work closely with the Service Chiefs to fulfill warfighting and operational requirements.

Question. The combatant commanders.

Answer. The combatant commanders fight our wars and conduct military operations around the world. By law, and to the extent directed by the Secretary of Defense, the Chairman serves as spokesman for the combatant commanders oversees their activities. He provides a vital link between the combatant commanders and other elements of DOD, and as directed by the President, may serve as the means of communication between the combatant commanders and the President or Secretary of Defense.

Question. The National Security Advisor.

Answer. The National Security Advisor is a Special Assistant and direct advisor to the President. As the role of the Chairman is to serve as the principal military advisor to the President, NSC, Homeland Security Council, and Secretary of Defense, if confirmed, I will continue to work closely with the National Security Advisor to ensure our efforts are synchronized across the interagency and combatant commanders.

Question. The Assistant to the President/Deputy National Security Advisor for Iraq and Afghanistan.

Answer. The Deputy National Security Advisor for Iraq and Afghanistan is a direct advisor to the President. As the role of the Chairman is to serve as the principal military advisor to the President, NSC, Homeland Security Council, and Secretary of Defense, if confirmed, I will continue to work closely with him to ensure our efforts are synchronized across the interagency and combatant commanders.

Question. The Under Secretary of Energy for Nuclear Security.

Answer. The Under Secretary of Energy for Nuclear Security/Administrator for Nuclear Security Administration is charged with keeping nuclear weapons and naval nuclear reactors safe. The Under Secretary of Energy for Nuclear Security/Administrator for Nuclear Security Administration works with a network of labs, test sites and production sites owned by the government and run by contractors, such as Los Alamos National Laboratory. If confirmed, I will collaborate with the Under Secretary to keep these facilities safe, transport weapons and materials safely, and ensure that weapons are ready and available to meet national security needs.

Question. The Chief of the National Guard Bureau.

Answer. The Chief of the National Guard heads a joint activity of DOD and is the senior uniformed National Guard officer responsible for formulating, developing and coordinating all policies, programs, and plans affecting more than half a million Army and Air National Guard personnel. Appointed by the President, he serves as principal adviser to the Secretary of Defense through the Chairman of the JCS on National Guard matters. He is also the principal adviser to the Secretary and Chief of Staff of the Army, and the Secretary and Chief of Staff of the Air Force on all National Guard issues. As the Chief of the National Guard Bureau (CNGB), he serves as the department's official channel of communication with the Governors and Adjutants General. If confirmed, the CNGB will continue to have full access to the upper echelons of the Joint Staff and me.

MAJOR CHALLENGES

Question. What do you consider to be the most significant challenges you have faced in your first term as Chairman of the JCS?

Answer. The most significant challenges I have faced in my first term as Chairman have been: (1) managing the transition in Iraq from a U.S.-led to Government of Iraq-led effort; (2) resourcing the President's AF-PAK strategy—military and civilian components; and (3) addressing Health of the Force issues that threaten the vitality of the All-Volunteer Force.

Question. What new challenges do you expect to face if you are confirmed for a second term?

Answer. As a global force with global responsibilities, the realities of today are cause for measured optimism and focused concern. While constrained and weak-

ened, al Qaeda remains a national security threat. The epicenter of its senior leadership is in south Asia, making that region my number one priority. We have a new strategy for the effort there, and new leadership on both the military and civilian side. All existing troop requests for 2009 have been approved by the President and a new approach to counter-insurgency is already making a difference. In Pakistan, increased military and diplomatic dialogue, coupled with tangible military progress in the border regions, is encouraging. Pakistan deserves our sustained commitment.

Iranian and North Korean behavior provides ample reason for concern. Iran poses grave challenges because of its confrontational posture, nuclear ambitions, and long-standing support to terrorist organizations and activities. The tumultuous events coincident with the June 2009 presidential elections in Iran have complicated U.S. and international community efforts at engagement. North Korea's belligerence, its quest for nuclear weapons, and its history of weapons of mass destruction and missile proliferation make it an equally difficult and dangerous challenge.

I remain concerned that the pace of current operations prevents our forces from training across the entire range of operations and erodes our readiness to counter future threats. We must continue to institutionalize proficiency in irregular warfare while restoring the balance and strategic depth necessary to assure national security. Additionally, the demands on our equipment are simply unsustainable. Continued operations that are not matched with appropriate resources will further degrade our warfighting systems, equipment, platforms and, most importantly, our people.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I intend to continue making the Afghanistan-Pakistan region the main effort. It is no longer a question of doing only that which we can, it is now, and urgently so, an imperative to demonstrate the resolve to do what we must in Afghanistan and Pakistan. Without a commensurate shift in focus and resourcing both the military and civilian components, the conditions in Afghanistan will worsen.

In Iraq, managing the drawdown and transition to an Iraqi-led security effort is critical to an enduring peace in that country and the region. I believe that our success in Iraq is vital for regional stability.

Our Armed Forces continue to shoulder a heavy burden not only in the broader Middle East and South Central Asia, but worldwide. While our military remains the most capable in the world, the stress on our forces and the strain on our families have been tremendous. Over the coming 2 years, the number of deployed forces from our Active and Reserve components and National Guard will remain high, exacerbating these concerns even further. We will not see improvements in the dwell time of our ground forces until 2011, at the earliest.

The quality, numbers, and fighting capability of the men and women serving in and supporting our military are vital, yet insufficient alone, to counter the challenges of this new century. Our national security requires the full involvement of not only the entire U.S. Government but also that of our international community partners. We must continue to provide the sustained presence and persistent engagement required to effect enduring partnerships and cooperation necessary to secure our vital national interests. Through multilateral cooperation with our partners and allies, we will continue to take prudent measures to defend against any threat to the Nation.

PRIORITIES

Question. Recognizing that challenges, anticipated and unforeseen, will drive your priorities to a substantial degree, if confirmed, what other priorities, beyond those associated with the major challenges you identified in the section above, would you set for your second term as Chairman?

Answer. Upon becoming Chairman, I set three priorities for the U.S. military. These continue to guide the United States even as we assess and adjust our efforts. First, we will improve stability and defend our vital national interests in the broader Middle East and South Central Asia. Second, we will improve the health of our Armed Forces. Third, we will balance global strategic risks such that we can prevent future war by deterring conflict, while always being prepared to act decisively should deterrence fail. In so doing, we defend the Nation and reassure our allies and partners around the world.

ACQUISITION REFORM AND ACQUISITION MANAGEMENT

Question. What is your view of the changes made by the Weapon Systems Acquisition Reform Act of 2010?

Answer. I fully support the changes made in the Acquisition Reform Act and am working to implement the necessary changes to the requirements process. The results these changes seek are long overdue.

Question. What role have you played in the implementation of the act thus far and, if confirmed, what role do you expect to play in the implementation of the act in the future?

Answer. As Chairman, I have been working—and, if confirmed will continue to strive—to implement the much-needed changes to the requirements process. I support and, if confirmed will continue to support full implementation of the act.

Question. What additional steps do you believe Congress or DOD should take to ensure that trade-offs between cost, schedule, and performance objectives for major weapon systems are made at an appropriately early point in the acquisition process?

Answer. The list of problems remains long. We still have a problem managing requirements creep. Cost estimates, although made in good faith, are often too low, leading to unexpected cost growth. High technology solutions are adopted before they are proven. The Joint Capabilities Integration and Development System is much too complex and needs to be revised.

Congress has taken important steps in the 2009 Acquisition Reform Act to address most of these issues, but increased participation by the uniformed military throughout the acquisition lifecycle, stronger oversight of contractors, deeper understanding of the incentives in different contract types, and increased focus on improving our military acquisition corps are all needed.

Question. Do you see a need for any change in the role of the Chairman or the Vice Chairman of the JCS in the requirements determination, resource allocation or acquisition management processes?

Answer. We are reviewing a realignment of the roles that the Chairman and Vice Chairman play in requirements determination, to best manage requirements in the future, and to better balance the inputs of all stakeholders.

Question. What is your view of the Nunn-McCurdy requirements for Major Defense Acquisition Programs that fail to meet cost, schedule, and performance objectives?

Answer. The Nunn-McCurdy certification requirements force the Department to perform a fundamental net reassessment of a program, and decide to either restructure it appropriately or terminate it. This is a very important requirement. From a Joint Requirements Oversight Council (JROC) perspective, it is appropriate to ask the warfighter to revalidate a program's essentiality and requirements. In 2007, the JROC established a trip-wire process to bring troubled programs back to the JROC for a review and to consider performance trade-offs to mitigate further cost growth and/or schedule delays without sacrificing joint warfighting capabilities.

Question. What is your assessment of the effectiveness of the JROC in the DOD acquisition process?

Answer. The results of our acquisition systems speak for themselves. A more credible and more empowered JROC can help control requirements growth and certify systems which fail Nunn-McCurdy requirements. We must better involve all with a stake in determining the necessary tradeoffs between cost, schedule, and performance.

Question. How should the role and priorities of the JROC change, if at all?

Answer. The JROC should place more priority on focusing on combatant commander needs, carefully managing the requirements of systems in development, and ensuring new systems have adequate requirements definition and trade space.

Greater emphasis must be placed on the need for balanced capabilities that match the strategic direction of the Department, meet the need dates of the combatant commanders, and provide solutions that remain fiscally responsive. Increasing the authority, responsibility and accountability of the uniformed military exercises over the requirements determination process is also vital in achieving the Joint Force we need.

DISTRIBUTION OF GENERAL AND FLAG OFFICERS

Question. At the request of the Secretary of Defense, Congress included a provision in the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 that designated up to 324 general and flag officer positions as joint duty assignments that are excluded from the limitation on the number of general and flag officers in each Service, and specified the minimum number of officers required to serve in these positions for each Service. The provision also reduced the number of general and flag officers authorized to serve on active duty in each Service. Implementation of this provision was delayed until 1 year after the Secretary of Defense sub-

mits a report on the proposed implementation of the provision. The report was submitted in June 2009.

What is your view of the merits of this provision?

Answer. I am a strong proponent of this provision, which does not reduce the number of general and flag officers authorized to serve on active duty. Implementation of this provision will support the objectives of the Goldwater-Nichols act by creating a statutory framework that allows the Secretary of Defense to reimburse the Services for participation in joint positions with general and flag officer authorizations. Importantly, the Joint Pool recognizes in-Service general and flag officer requirements to accomplish the mission to organize, train and equip, separate from joint general/flag officer requirements.

Question. In your view, what impact will implementation of this provision have on joint officer assignments?

Answer. The Joint Pool will increase competition for these senior joint duty assignments. The legislation provides incentives for the Military Services to nominate their best officers, from both their Active Duty and Reserve components, thereby promoting the competencies required for our Nation to continue to address the challenges that confront our forces. As proposed, the distribution of senior joint authorizations among the Military Services with a specified minimum distribution for each Service expands the number of positions open to nomination by all four Services.

Question. In your opinion, should implementation of this provision be delayed until June, 2010, 1 year from the date the Secretary submitted the required report?

Answer. No. The Department is requesting enactment of conforming legislation in the Department's 2010 legislative package. This provides the Department the flexibility to meet rapidly emerging joint requirements.

REBALANCING FORCES

Question. In connection with your first nomination to be Chairman of the JCS you answered questions on the progress toward achieving Secretary Gates' vision set forth in a memorandum of July 9, 2003 for a better balance in the capabilities of the Active and Reserve components.

During your first term as Chairman of the JCS, what progress has been made in achieving the Secretary's vision?

Answer. The Department has made significant progress towards rebalancing the total force through realignment of approximately 130,000 billets to date, with 225,000 by 2015, making more of the high demand capabilities previously residing solely in the Reserve component available in our active force. For example, one initiative taken is changing the percentage of Civil Affairs capability residing the Reserve component from 94 percent to 76 percent with a corresponding increase in the Active component, while growing an additional 2,800 authorizations. By the end of fiscal year 2013, this will have more than doubled our rotational capacity for these units. Force structure changes like these have reduced the frequency of mobilizing Reserve component units and individuals, and continue to improve our operational and strategic flexibility.

Additionally, greater access and predictability of capabilities residing in the Guard and Reserve has been achieved through the use of improved rotational management tools such as the Army's Force Generation model (known as ARFORGeneral) which accounts for availability of forces based on dwell time, mobilization requirements, and reset periods to support existing and planned demand for forces. We are now giving our Reserve and Guard forces up to 24 months notification prior to deployment.

Finally, we have instituted policy changes, captured in DOD Directives, to facilitate more efficient planning, preparing, and executing of the mobilization and demobilization processes for the Reserve component forces. These policy changes clearly outlined the time requirements for accessing the Reserves, further improving predictability for the servicemembers, their families, and employers.

Rebalancing the force is an ongoing process. The Department will continue to preserve the Reserve component's ability to operate across the range of missions as part of the Total Force.

Question. What do you consider the biggest continuing obstacles to achieving the goals that the Secretary of Defense set forth in his memorandum?

Answer. The biggest continuing obstacle to achieving the goals the Secretary of Defense set forth is that we must fight and win the wars of today while simultaneously preparing for tomorrow. I also see three additional challenges. First, the competing demands for Force on a global scale. Second, assuming greater risk in other theaters to achieve goals in the broader Middle East jeopardizes our capacity to meet global contingencies. Finally, the decline in Health of the Force and the crit-

ical importance of developing a restoration plan complemented by an investment strategy is significant given the time necessary to recover.

Additionally, we are challenged to determine the capabilities needed in the future and therefore, the appropriate balance between the Active and Reserve components while maintaining sufficient warfighting capability. To that end, rebalancing of the force is an ongoing activity within the Department. The Department continually assesses its force structure and rebalancing within, and between, the Active and Reserve components with the expressed purpose of improving readiness and deployability to support the full spectrum of mission. Reserve component forces must be adequately resourced and prepared for anticipated requirements.

During this protracted war, we continue to depend on the Reserve components and they have performed in an exemplary manner. It is true that when you call out the Reserve component you call out the will of the Nation, and they have answered that call.

MENTAL HEALTH ISSUES

Question. The final report of the DOD Task Force on Mental Health, issued in June 2007, found evidence that the stigma associated with mental illness represents a "critical failure" in the military, preventing individuals from seeking needed care. The report states, "Every military leader bears responsibility for addressing stigma; leaders who fail to do so reduce the effectiveness of the servicemembers they lead." In light of increasing suicide rates in each of the Services and the increase in the number of servicemembers diagnosed with post-traumatic stress disorder (PTSD), it is more important than ever to ensure that servicemembers and their families have access to mental health care and that the stigma associated with seeking such care is eliminated. In your response to a previous advance policy question on this issue, you stated that you "intend to provide strong leadership to ensure that we address" the stigma associated with seeking help for mental health issues in the military.

What actions have you taken over the past 2 years and what further actions are necessary, in your view, to alleviate this stigma?

Answer. As a nation, we have an enduring obligation to care for those who bear the scars of war, seen and unseen. This is why over the past 2 years I have made reducing the stigma of mental health care a personal priority. I realize that our servicemembers and families will be reluctant to seek mental health care and treatment if they believe there will be a negative impact or if there are obstacles to securing that care. I also recognize that the stigma associated with seeking mental health treatment is common in our country and that there are inequities between mental health services and health care in general. Accordingly, I have promoted policies and practices along several lines of action to mitigate stigma and promote access to care.

I have actively supported and pushed initiatives by OSD, all Military Services, the combatant commands, and all other related agencies in activities to reduce the stigma associated with seeking help for mental health issues in the military. I have launched a Campaign Plan with specific initiatives to mitigate stress and promote access to mental health treatment, and have actively engaged the senior leaders of the Services and combatant commands to speak out as well. I have made reducing stigma a leadership issue for commanders at all levels across the Services. My staff is actively engaged in surveying and analyzing the distribution of mental health staff and ancillary practitioners across the Department in an effort to improve the availability and effectiveness of the treatment they provide. I have directly engaged both the leadership of the uniformed services and contract providers of healthcare to initiate policies and programs to improve access and mitigate stigma. I believe that by addressing mental health issues on several fronts and at multiple levels of DOD, the identification of mental health related counseling or treatment becomes more acceptable reducing the historical stigma.

I have had the advantage of being able to talk to our servicemembers on the ground as well as families and health care workers in their neighborhoods. The town hall venue has given me the opportunity to hear the voices of individuals, individuals who identify areas where we need to strengthen our safety net. The other key component in providing this needed safety net is for all levels of leadership to be on board and support initiatives providing mental health services reducing the stigma at the unit level. I am acutely aware that many servicemembers and their families feel that seeking mental health treatment will adversely affect their careers. Accordingly, I have supported all efforts to recognize that combat imposes stress on everyone and can impose enduring changes, in ways that are normal and fully acceptable. Providing support and access to care are vital to maintaining the

strength and viability of the force and should be encouraged in an effort to sustain our combat capability.

If confirmed, I will continue to evaluate our mental health programs, training, and the needs of our servicemembers and their families to identify areas for improvement across DOD in all Services. Operational research methodologies should be used to identify improved resource allocation in the areas of mental health. Mental illness due to combat operations needs to be addressed and treated just like any other medical condition. I have made it a point that every leader in DOD must conform to this line of thought. If confirmed, I intend to continue my commitment to provide strong leadership to ensure that we completely remove the fear and stigma in seeking the proper care for our most precious resources.

Question. What is your view of the need for revision of military policies on command notification when servicemembers seek mental health care?

Personal mental health issues cannot be ignored and as an institution, DOD must continue to address this issue directly. While mental health questions need to be asked and investigated for security clearances, a balance needs to be established between mental health issues that have a high possibility to be detrimental to national security and mental health issues that the member experiences and is actively seeking help.

On July 2, 2009 a new Directive Type Memorandum (DTM) was issued that will soon be a new DODI. This new instruction will positively affect command notification reducing the stigma associated with receiving mental health treatment.

DTM-006 was issued on July 2, 2009 - Revising Command Notification Requirements to Dispel Stigma in Providing Mental Health Care to Military Personnel. This new DTM that will become a DODI within 180 days of issuance and applies to OSD, the Military Departments, CJCS, combatant commands, the Office of the Inspector General of DOD, the Defense Agencies, the DOD Field Activities, and all other organizational entities within DOD.

The recommendations were based on the conclusions from the DOD Task Force on Mental Health findings. This newly issued DTM not only provides more specific standards for health care providers regarding when to notify commanders of military member's use of mental health services but also provides a balance between patient confidentiality rights and the commander's right to know for operational and risk management decisions. Stigma associated with mental health treatment is reduced by paralleling notification standards to those for reporting any other health issue.

In the future, we have to continue to monitor and determine what additional measures are needed to affect positively our servicemembers and their families. If confirmed, I will continue to review current policies and ensure the policies do address the core issues surrounding mental health and not institutionalize stigma.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. Numerous cases of sexual misconduct involving military personnel in Iraq, Kuwait, and Afghanistan have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They assert that the Command failed to respond appropriately with basic services, including medical attention and criminal investigation of their charges.

Based on your experience as Chairman, what additional actions, if any, should the Joint Staff take in monitoring progress within the Military Services and the combatant commands' areas of responsibility in order to ensure effective implementation of a "zero tolerance" policy relating to sexual assaults?

Answer. Sexual assaults remain at an unacceptable level. In fiscal year 2008, there were 251 reported cases in the operational theater. This is a significant increase from the 174 cases reported in fiscal year 2007. While we are improving access to care to victims when an incident occurs in theater, we still have a number of challenges in deployed areas based on dispersion of forces and proximity to support personnel.

The Service Chiefs and I recognize that the prevention of sexual assault is the responsibility of all leaders and every soldier, sailor, airman, and marine. Leaders in particular must be apprised of command climate and aware of sexual assault or harassment incidents, and remain in the forefront to ensure that our policies are understood and enforced. They should also be held accountable in this area.

At the same time, we must ensure victims of these crimes are provided the best care possible as well as offering a variety of counseling options to help them deal with this traumatic event. If reconfirmed, I will continue to stress my expectations to the entire Armed Forces.

The Joint Staff is revising joint doctrine to better define the roles and responsibilities for addressing sexual assault in the operational environment. This includes pre-deployment training and in theater operational reporting and case management.

Commanders at all levels across the Joint Force must remain committed to eliminating sexual assault within our forces through robust prevention and response policies; by providing thorough and effective training on awareness, intervention, and response measures and procedures. We recognize that not all victims will come forward. Commanders must identify and eliminate barriers to reporting; and ensure care is available and accessible. Confidence in the system is paramount.

Question. What reporting requirements or other forms of oversight by Service leaders do you think are necessary to ensure that the goals of sexual assault prevention and response policies are achieved?

Answer. Currently reports are submitted through Service channels. The fielding of the new DOD sexual assault integrated database will improve communication protocols to better track victims services, case management and disposition, and identify trends and areas requiring additional emphasis. This will give Service leaders better access to the most current information and status of cases.

The new database will provide an important capability. Combatant commanders will have visibility to support trend analysis and strategic planning for their area of responsibility and enable them to provide better oversight and program management in the operational environment.

Question. What is your understanding of the resources and programs the Services have in place in deployed locations to offer victims of sexual assaults the medical, psychological, and legal help that they need?

Answer. There is a 24/7 response capability in garrison as well as deployed areas. Every military installation in the world now has a Sexual Assault Response Coordinator (SARC). Each SARC trains and oversees one or more Victim Advocates who help victims understand their reporting options and pathways to medical and mental health care.

If victim support resources are not readily available at the point of incident, victims are transported to a facility with appropriate victim advocate support, medical and psychological care (regardless of Service) and investigative/legal support.

The Services have primary responsibility to ensure sexual assault response personnel in deployed locations (SARCs, victim advocates, medical and mental health providers, criminal investigation, and legal personnel) are well trained to support victims, investigate, and respond to allegations of sexual assault. For example, the Navy uses a webinar forum to provide real-time online discussion and training for first responders in theater. Additionally, the Air Force has initiated a sexual assault response scenario-based evaluation to determine the effectiveness of first responders in the AOR.

The Joint Staff will remain a key partner with the Services and OSD in the campaign against sexual assault. My staff works closely with the combatant commands during the development of operational plans and personnel policy guidance to ensure the prevention and response to incidents of sexual assault is addressed. Additionally, combatant commanders are placing increased emphasis on prevention through education and training by leveraging all available forms of media to continue awareness and education while deployed.

Question. What is your view of the steps the Services have taken to prevent sexual assaults in combat zones?

Answer. The Services are implementing procedures and processes to meet the challenges of preventing and responding to incidents of sexual assault in deployed areas. We have over 200 SARCs and victim advocates for all Services deployed in Iraq and Afghanistan at any one time.

The Services provide baseline training for all military personnel. As soon as an individual enters the military, we educate him or her about sexual assault, our policies, programs, and prevention.

Additionally, all servicemembers and first responders receive sexual assault and sexual harassment prevention training prior to deployment. In addition, coordination among Service sexual assault response personnel has improved support to victims in the operational environment and provides additional resources to conduct additional training if needed.

We are providing our military members and leaders with more tools to empower them to take action. The Services have begun aggressive outreach programs, such as the Army's Intervene Act Motivate (IAM) Strong program to combat sexual assaults by engaging all soldiers in preventing sexual assaults before they occur. The Navy and Marine Corps use the Mentors in Violence Prevention and Sex Signal presentations to train sailors and marines on bystander intervention. The Air Force has also launched a training program focusing on bystander intervention.

Furthermore, we are communicating the message using a variety of methods. The 2009 DOD Sexual Assault Awareness Month theme, "Our Strength is for Defending: Readiness=Respect" connects prevention of sexual assault to mission readiness. Our military members know that sexual assault is a crime and is incompatible with military service.

Question. What is your view of the adequacy of the training and resources the Services have in place to investigate and respond to allegations of sexual assault?

Answer. We continue to improve and will always strive to do better. The services are responsible for training sexual assault response personnel to ensure they are well trained to investigate and respond to allegations of sexual assault. I support, for example, the Army's new IAM Strong program. IAM Strong emphasizes that leaders must understand their responsibilities to ensure that victims of sexual assault receive sensitive care and support and are not revictimized as a result of reporting the incident. It also provides tangible guidelines to help Army leaders remain alert to, and respond proactively to, incidents of sexual assault. Improved training for investigators and trial counselors is one of the Secretary's priorities. This includes the investigative resources in deployed areas. As you may imagine, the combat environment and deployed operations are very dynamic. The investigative resources are often strained by other mission requirements. Remoteness of locations, availability of transportation, or the level of ongoing operations may complicate access to resources. I believe the DOD training network in place now prepares them and investigators to handle sexual assault cases in a caring, responsive, and professional manner. Our ability to respond and support victims is critical.

Question. Do you consider the current sexual assault policies and procedures, particularly those on confidential or restricted reporting to be effective?

Answer. Yes. I believe current policies and procedures have improved care to victims of sexual assault; however, restricted reporting limits a commander's ability to support the victim, investigate, and/or hold alleged offenders accountable.

Restricted reporting has been effective (original intent—to allow a sexual assault victim to confidentially receive medical treatment and counseling without triggering the official investigation process). Although the use of restricted, or confidential, reporting doesn't allow a commander to investigate alleged assaults, it does allow a sexual assault victim to confidentially receive medical treatment and counseling without triggering the official investigation process.

Unrestricted reporting supports a sexual assault victim who desires medical treatment, counseling but also provides for official investigation of his or her allegations within existing administrative reporting channels (such as their chain of command, law enforcement or through the SARC).

As our military members' confidence in the reporting and investigative policies and procedures improve, I believe and certainly hope that more victims will choose unrestricted reporting; this will ultimately increase offender accountability.

Question. What problems, if any, are you aware of in the manner in which the restricted reporting procedures have been put into effect?

Answer. Privacy for restricted and unrestricted reporting becomes a challenge in a deployed environment and remote locations where units are small communities and accountability of personnel is a critical task. In deployed areas confidential reporting becomes more difficult for the victim to reach out to the SARC or a victim advocate because of the need to keep track of all personnel movements within the theater and that support resources may not be co-located with the victim. The joint deployed environment could present additional difficulties in case management, delivering care, and tracking services due to the geographical dispersion of both victims and responders. Once the joint integrated sexual assault prevention and response data base becomes operational, our ability to communicate between the Services will improve. The database is currently projected for fielding in 2010.

Question. If confirmed, what actions would you take to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults?

Answer. If confirmed, I will continue to emphasize that eliminating sexual assault from our military requires a personal commitment by all soldiers, sailors, airmen, and marines. Critical to this effort is the role of our leaders and system accountability. Leaders at all levels must foster a climate of confidence in their units, lead by example, and take action that:

- demonstrates zero tolerance for offensive sexual behaviors,
- holds members accountable for their actions,
- disciplines offenders and lets unit members know exactly where leaders stand on sexual assault, and
- protects victim privacy through all phases of investigation and discipline.

Without this leadership, our program cannot succeed and this crime will continue hurting the Americans who voluntarily risk their lives in defense of our country. I will stress together with our Service Chiefs that commanders and senior enlisted leaders must be held accountable for ensuring robust and effective sexual assault prevention and response programs in their commands.

Another cornerstone of our program that requires continued emphasis is education and training. By educating our military members when and how to act and intervene, we will turn bystanders into actors who can prevent sexual assault.

I will continue my open dialogue with the Secretary, Service Chiefs, and our men and women in uniform to ensure we have the best available resources and procedures in place to care for victims, improve prevention through training and education, and gain greater system accountability. The addition of the Service Vice Chiefs to the DOD Sexual Assault Advisory Council will make this senior forum more effective will aid in ensuring that policies and procedures are executable in the operational environment.

COMMISSION ON NATIONAL GUARD AND RESERVES

Question. In a March 1, 2007 report to Congress, the Commission on the National Guard and Reserves recommended, among other things, that the Chief of the National Guard Bureau (CNGB) should not be a member of the Joint Chiefs. The grade of the CNGB has since been increased to general (O-10), as recommended by this Commission.

In your response to previous advance policy questions on this subject, you stated your opposition to making the CNGB a member of the JCS.

Do you still oppose making the CNGB a member of the JCS? Please provide your rationale.

Answer. Yes. The JCS consists of the Chairman, Vice Chairman, and the Chiefs of Staff of the armed services. The National Guard is a component of the armed services and is represented on the JCS by the Chiefs of Staff of the Army and Air Force. A separate representation of a portion of the Reserve components from a portion of the services would be inappropriate, and in my view divisive of a Total Force. As a four star general officer, the CNGB is already participating in all appropriate JCS Tank sessions when domestic issues, which fall under the purview of our National Guard, are involved. This is similar to the methodology used to include the Commandant of the U.S. Coast Guard when specific Coast Guard equities are involved. In addition, if I am confirmed, the CNGB will continue to have full access to the upper echelons of the Joint Staff and me.

Question. In its final report, issued on January 31, 2008, the Commission concluded, among other things, "DOD must improve its capacities and readiness to play a primary role in the response to major catastrophes that incapacitate civilian government over a wide geographic area. This is a responsibility that is equal in priority to its combat responsibilities." In response to a request for your assessment of the Commission's final report, you stated, on April 21, 2008: "I have some concern with the Commission's ideas enhancing the Defense Department's role in the Homeland. While Reserve component civil support requirements are important, they should not be of equal importance to DOD combat responsibilities."

Is that still your view?

Answer. Yes. I continue to believe that DOD should not have statutory or policy directives that elevate civil support to the same level as combat responsibilities. The Department has taken, and continues to take, seriously its responsibility to provide support for civil authorities.

Using policy or statute to elevate the role of DOD's role in response to major catastrophes would: erode the Department's ability to perform its statutory responsibility; militarize domestic activities traditionally executed by civil authorities; and, undermine the role and credibility of other supported Federal departments in the fulfillment of their own unique statutory responsibilities.

TACTICAL CONTROL OF FEDERAL MILITARY FORCES BY STATE GOVERNORS

Question. In its final report to Congress (January 31, 2008), the Commission on the National Guard and the Reserves recommended DOD "develop protocols that allow Governors to direct the efforts of Federal military assets responding to an emergency such as a natural disaster."

In your view, should Governors have tactical control over Federal military forces, including those in a title 10, U.S.C., active status and operating in their States? What is your rationale for this view?

Answer. I do not believe Governors require the ability to exert tactical control over all military forces operating within their state when they are providing Mili-

tary Support to Civil Authorities. Statutory authority currently exists whereby the President can appoint a title 10/title 32 Dual-Status Joint Task Force (JTF) Commander.¹ The Dual-Status JTF Commander construct for command and control was successfully employed in 2004 for the Democratic and Republican National Conventions (DNC/RNC). It was also used for the G-8 Summit, in support of Customs and Border Patrol for Operation Winter Freeze, again for the 2008 DNC/RNC, and is currently being considered for the G-20 Pittsburgh Summit. In many instances, the Dual-Status JTF Commander is the best option to ensure unity of effort and provide both the President (and/or the Secretary of Defense¹) and the Governor with the ability to employ all types of military forces in a synchronized effort.

Federal forces are generally brought in to a State by the Federal Emergency Management Agency (FEMA) under the Stafford Act, which means Federal forces are in support of the Federal effort, which is in support of the state priorities. Thus, it is appropriate for Federal forces to take direction from FEMA to keep from diverging from the authorities' relationships as they exist in accordance with the National Response Framework.

Governors currently have the authority to exert tactical control over National Guard forces in a State Active Duty or title 32 status and have the ability to request the assistance of Federal forces when the Governor believes such assistance is necessary, to include responses to terrorist acts and or public domestic emergencies. Available forces for such events would likely be placed under tactical control of the designated, JTF Commander, under operational control of the Commander, U.S. Northern Command, or possibly under tactical control of a designated title 10/title 32 Dual-Status JTF Commander. The designated commander, working with the Governor and the State's Adjutant General, would be able to provide the necessary support to restore order, save lives, and secure property as the situation dictates.

DWELL TIME

Question. For many military members, dwell time goals are not being met, and recent testimony suggests that dwell time will not improve appreciably over the next 12–18 months.

In your view, what can be done to increase dwell time for both Active and Reserve component members, and when will these improvements be seen?

Answer. An increase in the size of the Armed Forces and/or a reduction in overall military requirements will naturally improve dwell. The current programmed growth in capabilities needed to support ongoing operations, as well as the planned reduction in forces in OIF, will lead to improved dwell ratios in both the Active and Reserve components. As operational demand changes, we will continue to assess the impact to dwell time and make appropriate adjustments.

Question. In your view, would additional Army end strength in 2010 or 2011 improve dwell time ratios and reduce stress on the force, and if so, what numbers of Active and Reserve component members would be necessary?

Answer. The additional 22,000 soldiers for the Army authorized by Congress as a temporary end strength increase will not improve dwell time. However, it will relieve unit stress by reducing the rapid and repetitive churn associated with personnel assignments, training, deploying, and resetting the force. We will continue to assess each Service's end strength in light of operational demand.

END STRENGTH OF ACTIVE-DUTY FORCES

Question. In light of the manpower demands of Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF), what level of Active-Duty personnel (by Service) do you believe is required for current and anticipated missions?

Answer. The Services, Joint Staff, and OSD have looked at this impact and have brought forward their force structure recommendations. Both the Army and Marine Corps have planned end strengths of 547,000 in fiscal year 2012 and 202,000 in fiscal year 2011, respectively. This is consistent with the future demands expected to be placed on our ground forces. The Secretary of Defense reversed the Air Force's programmed reductions to be more in line with our future air demands. I believe the planned Air Force and Navy end strength levels of 330,000 and 328,000, respectively are appropriate. We continue to assess requirements of the Active-Duty Force as we draw down in OIF and increase our operational presence in OEF. Under the President's Declaration of National Emergency, the Secretary of Defense has authorized a temporary increase of 22,000—which will increase manning strength and improve readiness both for units deploying to combat and for units resetting following

¹Note: On 23 July 2004, approval authority for title 32, U.S.C. 325, was delegated from the President to the Secretary of Defense.

deployments. I will continue to work with the Services to determine the right size force as current and anticipated missions adjust.

WOMEN IN COMBAT

Question. The issue of the appropriate role of women in the Armed Forces is a matter of continuing interest to Congress and the American public.

Does DOD have sufficient flexibility under current law to make changes to assignment policy for women when needed?

Answer. The current law provides the Department sufficient flexibility to make changes to the assignment policy. Women in our Armed Forces continue to make tremendous contributions to our national defense. They are an integral part of the force and are proven performers in the operational environment and under fire. It is important to understand that DOD policies fully recognize that women are assigned to units and positions that are not immune from the threats present in a combat environment. In fact, women are assigned to units and positions that may necessitate combat actions—actions for which they are fully-trained and prepared to respond and to succeed.

Question. Do you believe any changes in the current policy are needed?

Answer. As an advocate for improving the diversity of our force, I believe we should continue to broaden opportunities for women. One policy I would like to see changed is the one barring their service aboard submarines.

WOUNDED WARRIORS

Question. In congressional testimony on the fiscal year 2010 budget request, you stated that there is “no higher duty for this Nation, or for those of U.S. in-leadership positions, than to care for those who sacrificed so much and who must now face lives forever changed by wounds both seen and unseen.” You have taken an active role in advocating for services and support to the wounded and their families, including those suffering from PTSD and other mental health conditions.

What is your assessment of the progress made to date by DOD and the Services to improve the care, management, and transition of seriously ill and injured servicemembers and their families?

Answer. We have made good improvement in the care and treatment of the seriously ill and wounded, but there are still aspects of our Wounded Warrior care that are woefully inadequate—including in mental health, PTSD, traumatic brain injury (TBI), and in transitioning seriously ill and injured servicemembers.

Question. What are the strengths upon which continued progress should be based?

Answer. I count three. First, is our ability to innovate. I have seen remarkable improvements in our own care simply from an individual’s or a unit’s ability to adapt to new circumstances. Battlefield care and rehabilitative programs are obvious examples, but so, too, are improved practices at warrior transition units across the country, and more streamlined efforts to reduce to assign and compensate for disability ratings. We have begun to apply valuable lessons learned from across the services to improve both the efficiency and the effectiveness of our warrior transition programs, which now almost uniformly offer some sort of family outreach and support services.

Second, our programs, thanks to Congress, are well-funded. We will continue to need this support.

Third, there is a real sense of urgency here and an understanding that this is an institutional imperative. I am heartened by the attention being given to issues of warrior care and stress reduction across the force. Leaders are increasingly taking these challenges on as personal mandates, and that is having a very positive effect.

Question. What are the weaknesses that need to be corrected?

Answer. Let me highlight four areas that are in need of more improvement. First, we have not made as much progress as we should have in the area of mental health. I am deeply concerned by the rising suicide rate amongst active duty personnel. Evidence is mounting of increased mental and emotional stress among the families. There is still a stigma attached to the act of seeking mental health counseling, and that, too, is being felt by spouses who fear that by seeking such care, they will negatively impact the military career of their loved one.

Second, we are only just beginning to understand the complexities of PTSD, which may take many forms and include many symptoms not generally obvious to even the most skilled practitioner. Many experts estimate that as many as 25 percent of all deployed troops suffer from PTSD or some type of TBI. Anecdotally, we hear from many family members who say they also experience PTSD-like symptoms. We simply must do a better job screening for and then treating PTSD, and that should

include some sort of mandatory face-to-face screening before a member departs for home.

Third, we have much more work to do on TBI. We need to better characterize the nature of TBI, particularly those defined as “mild”, possibly by application of blast sensor technology. We need to create a better linkage of events to patient signs and symptoms. I repeatedly hear from soldiers and families about the benefits of alternative treatments, such as hyperbaric chambers and acupuncture, and yet it doesn’t appear to me that the medical establishment has yet fully embraced these options. We need to do the quality medical studies to help sort out the value of these various alternative options. I also remain concerned about our ability to anticipate TBI damage by more accurately assessing one’s vulnerability to long-term effects after one or more TBI incidents. Some say the magic number is three events; others say there is no magic number. My sense is that there is enormous expertise out there—such as the staff I met a few weeks ago at Boston VA medical center—who possess and explore new knowledge about this very real injury. I would like to see the United States tap into that expertise much more completely than we do today.

Finally, we must improve the process of transitioning seriously ill and injured servicemembers. The Disability Evaluation System (DES) frequently promotes disability instead of maximizing ability. The system currently pushes our departing troops into Veterans Administration (VA) programs immediately upon retirement and/or separation with little lash-up between the two departments beforehand and even less education for the member as he or she makes that transition. I am working closely with the VA to streamline and improve this process, but institutional practices long established and codified in law make that effort very difficult indeed. A pilot program underway to speed up the assignment of disability ratings and payments shows real promise but must be accelerated. Additionally, we have a Joint DOD/VA team critically examining the DES from stem to stern to determine the next steps in revolutionizing the DES system, to ultimately promote ability vice disability.

Question. How would you assess the effectiveness of the services provided by the Department as well as your own efforts to continually improve care to the wounded?

Answer. Though improving, the Department’s services are not yet where they need to be. To rectify this, I have made caring for Wounded Warriors and their families one of my top concerns and priorities. I established a permanent office on my staff to work with DOD, the Service branches, and nongovernmental organizations to leverage a broader network to address the myriad of issues related to the care of our wounded. Caring for those who have sacrificed so much is a sacred duty for this Nation, one which requires we redouble our efforts.

Question. It is critical that senior uniformed military leaders have more insight and control into how medical resources are being applied.

Answer. My vision is that our returning warriors—wounded or well—successfully reintegrate upon return from war into the force and/or civil society. They should be able to find and hold rewarding jobs, access educational opportunities, and have the opportunity to find a home and raise their families. Those families must be well supported and able to assist that reintegration. This vision encompasses more than programs, it must also see communities supporting returning warriors and their families, and in turn being supported by DOD and the Department of Veteran Affairs—with all three working closely together. Our families of the fallen must be comfortable in the knowledge that the U.S. military will not forget them or their sacrifice, that it will instead make concerted efforts to ensure they receive all benefits entitled and all support and counseling required to lead positive and productive lives.

Question. What is your expectation for casualties resulting from operations in Afghanistan, both in terms of numbers and the adequacy of resources to support their care, transportation and recovery?

Answer. I believe we must all accept the fact that, as we better resource this fight and as we focus more on classic counter-insurgency operations (as opposed to simply counterterrorism operations), we will see higher casualty rates among U.S. forces. Securing the population will remain a difficult and dangerous mission. General McChrystal has been provided everything he has requested in terms of medical care and support capabilities, but we will continue to monitor his needs very closely. If confirmed, this will remain a high priority for me.

RISING COSTS OF MEDICAL CARE

Question. In testimony presented to Congress in February 2009, the Assistant Director of the Congressional Budget Office asserted that “medical funding accounts for more than one-third of the growth projected for operations and support funding

between 2009 and 2026.” In April 2009, Secretary Gates told an audience at Maxwell Air Force Base that “health care is eating the Department alive.”

What is your assessment of the long-term impact of rising medical costs on future DOD plans?

Answer. The current trends and dramatic cost growth are not sustainable. Our men and women in uniform make great sacrifices for their Nation, and their personnel benefits, to include compensation and health care programs, have always been a priority for me. The continued support of Congress, and the Nation, is greatly appreciated by our military servicemembers.

If confirmed, I will continue to foster a health care benefit system that is flexible, effective, and cost-efficient to serve the needs of our people—military members, retirees, and their families—who are my number one priority. Projected rising costs of medical care will require either an increase in the Department’s top-line or the acceptance of additional risk in warfighting capability.

If confirmed, I look forward to continuing our efforts with Congress and DOD to ensure military personnel can serve their nation with the knowledge that their health care benefits are secure. In this time of war, we are committed to providing the best care possible for our forces that are returning with combat injuries. I will also continue to support close cooperation between DOD and the Department of Veterans Affairs to improve care for our troops and for those who have left the Service, where much more needs to be done.

Question. If confirmed, what actions would you initiate or recommend to the Secretary to mitigate the effect of such costs on the DOD top-line?

Answer. If confirmed, I will continue to support the Secretary of Defense, as he leads the Department’s ongoing effort to promote efficiency in both our direct health care and purchased health care programs.

The rising cost of health care is clearly an issue we need to work and will seek the support of Congress. Maintaining the life long continuum of care is especially critical with the ongoing operations in the Middle East. I fully support our people, who are this Nation’s greatest asset. The state of their health and well-being defines the effectiveness of every dollar spent on acquisition, operations, and sustainment.

HOMOSEXUAL CONDUCT POLICY

Question. President Obama has made it clear that he intends to work with the military and with Congress to repeal the policy regarding homosexuality in the Armed Forces, commonly referred to as “Don’t Ask, Don’t Tell.” You have stated that you have begun discussions of this issue with other senior military leaders.

What is your view on repealing or changing this policy?

Answer. Don’t Ask, Don’t Tell is commonly referred to as a DOD policy but it is Public Law 103–160 910 (U.S.C. 654). Therefore, my view is quite simple: DOD policy must comply with the public law and only Congress and the President can change the law. My responsibility is to guide the Armed Forces of the United States consistent with the law.

At the behest of Secretary Gates, DOD legal counsel are currently examining whether the law allows a more flexible application of policy. I concur with the Secretary and fully support his efforts in that regard.

In determining whether and how to change the policy, we must act in accordance with law and in a thoughtful and deliberate way, taking into account the health and integrity of the force.

Question. What is your understanding of the views of the Service Chiefs and combatant commanders on this policy?

Answer. I cannot speak for the Service Chiefs or combatant commanders, but I am confident that they share my desire for a measured, deliberate approach to any change required by law.

Question. In your view, would changing this policy have an adverse impact on good order and discipline in the military?

Answer. Any change to the law would require sound policy revision and leadership. Like any significant overhaul of military personnel policy, we must carefully consider its impact on military readiness. Whatever the decision, we will follow the law and remain focused on supporting our troops in—and preparing for—combat.

Question. If the policy is changed by Congress, how lengthy a phase-in period would you recommend?

Answer. The truth is that I just don’t know, and I would need some time to study this before coming back to you with an answer.

NATIONAL MILITARY STRATEGY

Question. There continues to be much discussion about threats the United States will face in the coming decades, including radical Islam, the so-called “long war” against terrorism, and the growing potential for confrontations with a range of violent non-state actors. There are also pressures to take a broader view of the threat to U.S. national security from potential political, economic, and social instability caused by environmental catastrophes brought on by global warming or natural disasters. The 2004 National Military Strategy is due for another update and will be guided and informed by a range of strategic reviews including the 2008 National Defense Strategy, the 2009 Quadrennial Roles and Missions Review, and the pending Quadrennial Defense and Nuclear Posture Reviews.

What is your assessment of the current 2004 National Military Strategy with respect to its treatment of threats, opportunities, strategies, and capabilities?

Answer. My 2009 annual risk assessment report to Congress provided a current assessment of the threats, opportunities, strategies, and required capabilities that will inform our revision of the 2004 National Military Strategy. If confirmed, I intend to issue an updated version of the National Military Strategy in 2010.

Question. What major changes, if any, with respect to threats, opportunities, strategies, or capabilities do you anticipate will be made in the next update to the National Military Strategy?

Answer. To address the complex and dynamic strategic environment, we are working to update the National Military Strategy in parallel with the development of the National Security Strategy and the Quadrennial Defense Review. The evolving strategy will continue to emphasize the need to protect the homeland, prevail in current conflicts, promote cooperative security with partner nations, and prevent future conflicts by preparing for a wide range of contingencies. To execute this strategy, we need to sustain a balanced Joint Force with the capability and capacity to defeat hybrid combinations of conventional, irregular, and catastrophic threats across the full spectrum of conflict and in multiple locations. Toward that end, I am particularly concerned that we reset, reconstitute, and revitalize the Joint Force to defend the Nation, deter potential adversaries, and assure our allies.

ROLES AND MISSIONS

Question. Since the end of the Cold War, the Department has considered and reconsidered its capabilities, requirements, technology acquisition strategies, organizational structure, and forces mix. Fundamental to change within the Armed Forces is agreement on the appropriate distribution of roles and missions among the military departments and several independent agencies. The last two Quadrennial Defense Reviews have acknowledged major shifts in the strategic environment facing the Nation, but recommended no changes to roles and missions and only minor adjustments to the form and size of the defense establishment. The 2009 Quadrennial Roles and Missions Review also recommends no major adjustments to the Services, but acknowledges the need to improve capabilities and capacities to conduct irregular warfare, cyber security, intra-theater airlift, unmanned aircraft for intelligence, surveillance, and reconnaissance, and interagency coordination.

Are you satisfied that our defense establishment is correctly structured, that roles and missions of the Military Departments are appropriately distributed, and that U.S. forces are properly armed, trained, and equipped to meet the security challenges the Nation faces today and into the next decade?

Answer. With your support, I believe the defense establishment can remain capable and ready to address the threats that our Nation faces. There are areas such as irregular warfare, cyber security, intra-theater airlift, unmanned aircraft for intelligence, surveillance, and reconnaissance, and interagency coordination that need continued focus. The recent work completed during the 2009 Quadrennial Roles and Mission Review offered the Joint Chiefs an opportunity for comprehensive review of the distribution of roles and missions. As we increase capabilities in the focus areas, we will continue to evaluate the best defense structure to ensure we successfully arm, train and equip our forces to meet challenges both today and in the future. The wars in Iraq and Afghanistan have heavily immersed our forces, especially our ground forces, in irregular warfare. We lack the balance that is required for full spectrum training, equipping, and warfighting. As we reset the force, we need to regain that balance while planning for the future.

Question. In your view, what changes, if any, are needed in the distribution of core missions, competencies, or functions between the Services or Special Operations Forces (SOFs)?

The current distribution of core missions, competencies, and functions meets the needs of the department and provides the necessary distribution among the Services

and SOFs. During the 2009 Quadrennial Roles and Mission Review, the Joint Chiefs and the Commander of Special Operations Command (SOCOM) worked closely to review the distribution of core missions, competencies, and functions and concluded no significant change was warranted. Those efforts captured the current distributions and codified them in our extensive review and rewrite of DOD Directive 5100.1, which governs the functions of DOD and its components.

STRATEGIC DEPTH

Question. At this moment, the vast majority of U.S. ground forces are fully committed to or exclusively preparing for operations in Iraq and Afghanistan.

What is your assessment of the current readiness of our Armed Forces, and particularly our ground forces, for worldwide commitment to any contingency and any level of operations?

Answer. The Armed Forces are meeting all our current mission demands. DOD's persistently high operations tempo and OIF/OEF force requirements continue to stress our ability to reset, train, and maintain readiness for the full spectrum of operations. Although our ground forces are achieving "just in time" readiness, current commitments significantly impact our ability to respond to additional contingencies. We retain considerable air and maritime capability to deter aggression and continue to monitor our capacity to respond immediately to any emerging contingency.

Question. What in your view is the level of strategic risk the Nation faces given the lack of depth in our ground forces?

Answer. I believe the Armed Forces can execute the missions of the National Military Strategy, but at an elevated level of risk. We will prevail in the end, but it will take additional time and resources to deploy trained and ready ground forces for any new missions outside of our current requirements.

From a purely military perspective, continued deployments, accelerated equipment usage rates across the Services and high operational tempo all increase risk. None is likely to subside in the near term. I am confident that our Armed Forces remain capable of defeating all who threaten our Nation's security.

Question. What in your view are the three most important actions we should take immediately to mitigate and correct the lack of strategic depth?

Answer. To mitigate this risk we need to: (1) complete the growth of new units in the Army and Marine Corps, (2) increase the dwell time for units to train for different missions, and (3) reset and reconstitute a balanced Joint Force that can quickly adapt to a wide range of contingencies.

TRANSFORMATION

Question. Please describe the progress that the Department, including the JCS and the Joint Staff, has made in transforming the Armed Forces.

Answer. While I am pleased with the progress made in transforming our Armed Forces for the threats we face and will face in the future, particularly in time of war, I also recognize more is left to do. We must continue to shift the balance of our capabilities to meet the irregular, disruptive, and potentially catastrophic security challenges of the 21st century while maintaining our ability to defeat any traditional challenge that may confront us.

As stated in my January 2009 Capstone Concept for Joint Operations, the military should shift its focus to adopt the following common operating precepts:

- Achieve and maintain unity of effort within the Joint Force and between the Joint Force and U.S. Government, international and other partners.
- Plan for and manage operational transitions over time and space.
- Focus on operational objectives whose achievement suggests the broadest and most enduring results.
- Combine joint capabilities to maximize complementary rather than merely additive effects.
- Avoid combining capabilities where doing so adds complexity without compensating advantage.
- Drive synergy to the lowest echelon at which it can be managed effectively.
- Operate indirectly through partners to the extent that each situation permits.
- Ensure operational freedom of action.
- Maintain operational and organizational flexibility.
- Inform domestic audiences and influence the perceptions and attitudes of key foreign audiences as an explicit and continuous operational requirement.

In accordance with the Unified Command Plan, U.S. Joint Forces Command (JFCOM) is responsible to me for leading and coordinating Joint Concept Development and Experimentation (JCD&E) activities. My Joint Staff supports JFCOM in their transformation efforts by working in partnership with combatant commands

and Services to facilitate and advocate their concept development and experimentation efforts.

The Joint Staff has increased the focus on rapid transition, to ensure the results of these concepts and experiments are fielded more rapidly to the warfighter.

In addition, Joint Staff has continued to champion the Joint Staff developed Joint Capability Areas (JCA) framework and lexicon as an integral part of the capabilities based planning process. Through our efforts, JCAs have become the common language to discuss and describe capabilities and increase transparency across related DOD activities and processes.

Question. If confirmed, what would be your goals regarding transformation in the future?

Answer.

- We must recruit and retain the high quality of our Joint Force and rapidly reset that force to meet the security challenges of the 21st century.
- Our future military concepts all reflect the need for addressing future security challenges as a unified, interagency team. One of my primary goals would therefore be for DOD to partner with other U.S. agencies to routinely achieve national security objectives with whole-of-government approaches, now and in the future.
- We must continue to build relationships with multi-national partners and potential partners, laying the foundation for future joint operations and shaping the environment for those operations.

Question. Do you believe the Joint Staff should play a larger role in transformation? If so, in what ways?

Answer. I believe the Joint Staff should continue to pursue new operational and organizational initiatives that enable our forces to be more effective. We should also aggressively address and solve issues that fall in or across the seams between the combatant commands, while reducing those seams, and work with the Services to ensure our best ideas, and technologies are made rapidly available to our warfighters, now and in the future.

“INSTITUTIONALIZING” SUPPORT FOR IRREGULAR WARFARE

Question. A major objective of the Department’s fiscal year 2010 budget request is to “rebalance” the Department’s investments across the spectrum of conflict by increasing emphasis on lower-end, irregular, counterinsurgency, and stability type operations. Secretary Gates has stressed the need for the Department to “institutionalize and finance” the support necessary for the irregular warfare capabilities that have been developed over the last few years and will be needed in the future.

What, in your view, does it mean to “institutionalize” support for irregular warfare capabilities in the Defense Department?

Answer. I believe General Mattis’, Commander, JFCOM, 11 March 2009 memo to Secretary Gates on “institutionalizing Irregular Warfare (IW) as a core competency of the Armed Forces while maintaining a balance with other required capabilities” and his seven anchor points provides a useful framework:

- (1) Establish National Center for Small Unit Excellence to ensure IW superiority.
- (2) Direct an outside review (e.g., Red Team) of the Defense Planning Scenarios (DPS) for appropriate inclusion of hybrid, complex threats.
- (3) Direct Defense Intelligence Agency (DIA) to produce an annual, unclassified, update on the IW/hybrid threat.
- (4) Offer to run an IW/hybrid wargame for State and the interagency.
- (5) Use our Professional Military Education (PME) program as a strategic asset.
- (6) Direct process to reduce JFCOM-identified high demand, low density forces through changes in organizational and personnel policies.
- (7) Direct a fully resourced effort to immediately develop first class simulators for IW training.

My staff has worked with OSD, Department of State, combatant commands, and Services to plan a way ahead for each of these activities, many of which are near completion.

As well, results of this year’s Global Force Management Process informed the ongoing Quadrennial Defense Review, making recommendations to resolve capacity shortfalls, including those shortfalls in irregular warfare. These recommendations for institutionalizing IW enhancements were captured in the fiscal year 2011–2015 Guidance for the Development of the Force Update.

Question. What are the obstacles, if any, to institutionalizing this kind of support, and what will be necessary to overcome those obstacles?

Answer. I believe there are two obstacles: resourcing and changing mindsets. Regarding resourcing, for example, we look forward to working with Congress to fulfill Resource Management Decision 802's intent to establish the National Program for Small Unit Excellence² (NPSUE) so that the Joint Irregular Warfare Center, led by JFCOM, is adequately funded to support the mission of the NPSUE.

While we have progressed, I believe we have more work to do in changing mindsets. We have made great strides within the Services to share capabilities, and we need to continue in that direction to ensure that all new capabilities we develop/program for are truly joint. Irregular Warfare capabilities must be joint and Services must work with each other to identify training and simulation tools that can provide cross-functionality. My staff as well as OSD continue to reach out to the interagency to support our common missions. We collaborate closely with the Departments of State and Homeland Security and are expanding our efforts with other agencies. The goal is to leverage and compliment each other's capabilities and work together to build joint irregular warfare capabilities that are value added to all.

Question. While program changes may be necessary for such rebalancing, they are unlikely to prove sufficient. The greater challenge may prove to be changing military culture, attitudes, management, and career path choices, for example through adjustments to organization, training, doctrine, and personnel policies.

In your view, what are the most important changes, if any, that might be required, to complement programmatic changes, in support of the further institutionalization of capabilities for irregular warfare?

Answer. In my view, our progress in executing some of the Irregular Warfare anchor points illustrates the sort of changes needed. The most important considerations that could complement programmatic decisions in support of the further institutionalization of capabilities for irregular warfare are:

- An outside review (e.g., Red Team) of USD–Policy developed Defense Planning Scenarios (DPS) to ensure the family of scenarios is appropriately balanced to address the future threat environment, specifically, hybrid, complex threats.
- A DIA-led annual, unclassified, update on the IW/hybrid threat through direct collaboration with JFCOM, J2; the Joint Irregular Warfare Center; the Defense Intelligence Agency; and the National Ground Intelligence Center.
- An IA/hybrid wargame for the interagency, specifically, Department of State, to generate valuable insights and inspire a comprehensive perspective essential to meeting the complex security challenges we face.
- Use our Professional Military Education Program as a strategic asset to improve synchronization across all military departments in education and training with our foreign partners.

IRAQ

Question. Diplomatic and military leaders in Iraq have cautioned that security gains over the last year remain fragile and are still subject to reversal.

What is your assessment of the stability of security gains and reduced violence?

Answer. Security incidents throughout Iraq continue to show a decreasing trend of violence in 2009 and remain at the lowest levels in 5 years. However, underlying sources of instability have yet to be resolved. Upticks in high profile attacks targeting civilians during July and August have not affected the overall trend of violence seen this year, but have caused an increase in civilian casualties. We are carefully monitoring the full effects of the U.S. withdrawal from cities, villages, and other locales and assessing the impact on the overall stability and sustainability of security gains in Iraq.

Question. What, in your view, are the greatest threats to these gains and what are the prospects of these threats materializing?

Answer. There are a number of underlying sources of instability that the Iraqi Government must overcome. Immediate challenges include Arab-Kurd tensions, Shia-Sunni rivalries, violent extremists groups, and malign Iranian influence.

Arab/Kurd Tensions

Arab-Kurd tensions remain the most dangerous threat to Iraq. Confrontations between the Iraqi security forces (ISF) and Peshmerga—as well as aggressive political rhetoric on both sides—continue to raise tensions. Without a concerted effort to resolve issues by both the Government of Iraq and Kurdish Regional Government and

²National Center for Small Unit Excellence was renamed National Program for Small Unit Excellence after receipt of General Mattis' 11 March Anchor Points Memo.

continued U.S. engagement, this situation has the potential to directly impact our security gains.

Shia-Sunni Rivalries

Continued integration of Sunni, primarily Sons of Iraq (SoI), into the Iraqi Government is key to mitigating Sunni sense of disenfranchisement. Failure by the Government of Iraq to continue progress on reconciliation issues could result in a return to Sunni-Shia violence.

Countering Violent Extremist Groups

The ability of violent extremist groups, most notably al Qaeda-in-Iraq (AQI), to conduct attacks has been severely degraded but not completely destroyed. The continued maturation of the Iraq security forces is essential to countering violent extremist groups in Iraq.

Malign Iranian Influence

Iran poses a significant challenge to Iraq's long-term stability and political independence. The Government of Iraq, through reciprocal visits with Iran, has sent tough messages warning Iran against interference in Iraqi politics, while still encouraging improved bilateral relations, economic cooperation, and cultural/religious exchanges.

Question. What do you believe are the most important remaining steps that the United States needs to take in Iraq?

Answer. The most important near-term step the United States must take is assisting Iraq in conducting legitimate, free, and fair elections and seating the new government following the elections. Additionally, the United States must assist the ISFs with filling equipment and training gaps to ensure they are capable of meeting internal threats by the end of 2011. Finally, the United States must transition from a DOD to State Department led.

Question. What do you believe are the most important remaining steps that the United States needs to take in Iraq?

Answer. The most important near-term step the United States must take is assisting Iraq in conducting legitimate, free, and fair elections and seating the new government following the elections. Additionally, the United States must assist the ISFs with filling equipment and training gaps to ensure they are capable of meeting internal threats by the end of 2011. Finally, the United States must transition from a DOD to State Department lead mission and continue to build a long-term relationship with Iraq.

Question. What do you believe will induce Iraqi political leaders to make the political compromises necessary for a political solution? What leverage does the United States have in this regard?

Answer. Dialogue and engagement between political actors will be essential for them to reach a political solution on critical unresolved issues. We can play an important role in this. Increasingly, our leverage stems from our ability to play a mediation and coordination role on key, unresolved issues. A lasting political solution is also dependent on all groups actively participating in the electoral and political process. All indicators suggest that this will continue to be the case. To further encourage this, using the Strategic Framework Agreement, whereby we offer assistance to Iraq in the areas of education, agricultural capacity, local governance programs, and assisting Iraq with strengthening the rule of law, we can reinforce to political leaders in Iraq that political solutions to their problems are more enduring than military ones.

Question. Secretary Gates has indicated that if security conditions continue to improve we may be able to accelerate the withdrawal of U.S. forces.

Do you agree with his assessment of the security situation and the possible acceleration of the troop withdrawal?

Answer. Yes. A stable security environment is the primary factor in any decision to accelerate the drawdown in Iraq. Our responsible drawdown plan includes options to accelerate the redeployment of certain units should the security environment allow it. Generals Odierno and Petraeus will continue to make recommendations to the Secretary of Defense and I based on the security situation.

Question. What is your assessment of Iraqi elections as indicators of increasing or decreasing stability and security in Iraq? Are there other indicators that are better barometers of improving or deteriorating stability conditions?

Answer. I believe the elections in Iraq are excellent indicators for determining stability conditions in Iraq. Recent provincial elections in Iraq were a testament to the determination of the Iraqi Government and the Iraqi people to express their will through the electoral process—choosing ballots over bullets. Most notably, Sunni Arabs actively re-engaged the electoral process, helping to redress their earlier

under-representation on provincial councils. General Odierno rightly assesses that the national elections timeframe will be a period of heightened risk and vulnerability, when AQI and other extremist groups may attempt to exploit ethno-sectarian rivalries.

As for other indicators of improving or deteriorating conditions, Arab-Kurd tensions will need to be closely monitored, particularly along the disputed territories. The overall level of violence and number of large-scale attacks are important because it both reflects AQI and ISF capabilities, and affects the Iraqi public's confidence in the ISFs.

Question. An important aspect of the improved security conditions in Iraq is the improved capability of the ISFs. However, press reports, following a recent series of high profile attacks in Mosul and Baghdad, suggest that the ISFs are not ready to assume full responsibility for the security of their country.

What is your assessment of the overall capability and reliability of the ISFs?

Answer. Based on current conditions, the ISFs are ready to handle responsibilities for security in the cities and urban areas. We are in the assessment phase in Baghdad, Mosul, Kirkuk, and Diyala to determine sustainability of the withdrawal in those localities.

Operational readiness continues to improve for both Ministry of Defense forces and the Ministry of Interior. With U.S. assistance in the development and fielding of key enablers, I believe the ISFs will be capable of handling internal security, to include counter-insurgency operations, by the time U.S. forces depart in 2011.

Question. In your view, what are the enduring challenges or threats to the establishment of reliably professional and capable ISFs?

Answer. One of the most significant challenges facing the ISFs is budget shortfalls. Both the Ministry of Defense and Interior face extreme budgetary shortfalls, which have affected the growth of both personnel and equipment. Another significant challenge is maintaining an ISF that is non-sectarian in both actions and perception. Currently public confidence remains moderately high in the ability of the ISFs to secure Iraq and the majority of the public views the ISFs as a non-sectarian entity.

Question. What support should the United States be prepared to provide to the ISFs beyond the end of the U.S.-Iraq Security Agreement in December 2011?

Answer. Operational readiness continues to improve for both the Ministry of Defense forces as well as the Ministry of Interior. With U.S. assistance in the development and fielding of key enablers, I believe the ISFs will be capable of handling internal security, to include counter-insurgency operations, by December 2011 while setting the conditions for the Iraqis to continue the development and growth of their security forces.

We are working very closely with the State Department to draft a framework for U.S. support to the ISFs in 2012 and beyond. This framework may include technical assistance and Foreign Military Sales through an Office of Security Cooperation. Ultimately, our level of support will depend on agreements reached between our government and the Government of Iraq.

Question. What is your assessment of security conditions in those provinces and cities where ISFs have already assumed responsibility for maintaining security?

Answer. ISFs have assumed responsibility for maintaining security in all of the provinces and cities as of June 30, 2009. For the most part, they have handled themselves professionally and in a non-sectarian manner and overall security incidents in Iraq have shown a decreasing trend. However, I am concerned about recent high profile attacks that have resulted in greater civilian casualties, particularly in Baghdad and Mosul. There is the potential that if these types of attacks continue, the sectarian violence that plagued Iraq in 2006 and 2007 could return. Iraq's leaders continue to denounce these attacks and vow not to let them trigger renewed sectarian violence. That is encouraging.

Our military forces continue to work closely with the ISFs to help them stop future attacks by encouraging them to take aggressive and proactive security measures. We are also helping them reassess their force protection measures to reduce vulnerability to these types of attacks. In addition, our forces in Iraq continue to conduct joint counterterrorism operations, share actionable intelligence, and provide the necessary enablers to help the ISFs safeguard their citizens.

Question. What is your assessment of the infiltration or the risk of infiltration of ISFs by sectarian militias, AQI, and Iranian agents?

Answer. Though difficult to assess, there is currently no reporting suggesting widespread infiltration by sectarian militias, AQI, or Iranian agents into ISFs. Both the Government of Iraq and U.S. forces recognize the inherent risk that such actors could infiltrate the ISFs and will continue to monitor the issue.

Question. The Government of Iraq has assumed responsibility for the approximately 85,000 SoI throughout Iraq. There are enduring problems, however, with the Government of Iraq's ability to pay SoI salaries as promised, continue to integrate a portion of them into the security forces, and assist in transitioning the remaining SoI into civil or private employment.

What is your assessment of Iraqi progress in implementing the integration of the SoI into the ISFs or placing them in civil or private jobs?

Answer. Despite some obstacles, SoI integration is moving forward, albeit slower than originally planned. In October 2008, the Government of Iraq began to pay and exercise responsibility for the SoI. This was an important first step since it demonstrated to the Iraqi Sunni community that the Government of Iraq recognized the security contributions of the SoI. There now remain 86,000 Iraqis in the SoI program. There have been problems in the past with late payroll disbursements but we have worked closely with the Iraqi leadership to overcome those issues. Another friction point is the perception by the Sunni population that the ISFs were targeting some of the SoI leadership based on sectarian agendas. We worked closely with the Government of Iraq and the SoI leadership on this issue and these types of incidents have declined significantly.

The Government of Iraq's goal is to ensure that all of the SoI receive long-term government employment. The plan is for 20 percent of the SoI to transition into the ISFs and 80 percent of the SoI to transition to non-security government jobs. The Government of Iraq continues to move forward towards meeting those goals, albeit slowly. To date, they have transitioned approximately 13,000 SoI into security related jobs but only 6,000 into non-security jobs. The rate of integration of SoI is not on pace to meet the Government of Iraq's stated goal of transitioning all SoI by the end of 2009 and could undermine Sunni confidence in the Government of Iraq.

We continue to work with the Government of Iraq to expand SoI government employment opportunities while ensuring the SoI are paid in a timely and accurate manner. We stress that this is critical to preventing the disenfranchisement of the Sunni community and will strengthen national unity.

Question. How likely are more confrontations between ISFs and SoI groups? What should U.S. forces do to reduce this risk?

Answer. In the past, ISFs targeting of SoI leaders previously threatened to undermine Sunni confidence in the Government of Iraq and U.S. efforts overall. Although there were some instances of targeting SoI leaders, this has been largely abated in recent months. Engagement by key U.S. leadership has been essential in ensuring Government of Iraq continues its reconciliation commitments to the SoI. Continued engagements by U.S. forces will remain the key to reducing the risk of future ISFs/SoI confrontations.

Question. What is your assessment of Muqtada al-Sadr's intentions and capabilities through the rest of this year, especially with respect to the district and parliamentary elections and the completion of the U.S. combat mission by August 2010?

Answer. I believe we will need to continue to watch how Muqtada al-Sadr and his followers respond to the electoral results. For now, there are signs that the Sadrists are actively engaged in the political process and intend to participate in the parliamentary elections. The 30 June withdrawal of U.S. forces from Iraqi cities removed some of the energy associated with Sadr's militant faction. Assuming a peaceful transition of the national government occurs, and the Sadrists remain engaged in the political process, Sadr and his political movement will not benefit from inciting violence.

Question. How would you characterize the level of success achieved against AQI?

Answer. I would characterize the level of success achieved against AQI as positive; however, AQI has not been defeated and remains dangerous. ISFs and U.S. targeting continues to pressure AQI's ability to direct and carry out attacks. Security operations in Basrah, Baghdad, Ninewa, Maysan, and Diyala have produced encouraging results that further degraded the capabilities of AQI. Iraqi forces have extended control over more areas of Iraq and on Government of Iraq operations have severely degraded AQI activities, finances, and supply networks, leading to the capture of several high-value individuals. Extensive counterinsurgency operations in Mosul and Diyala have continued to pressure AQI networks and clear areas that had been AQI strongholds. Although Iraq has achieved progress, AQI retains a limited capability to conduct high profile attacks targeting civilians and ISFs, primarily in mixed urban areas such as Baghdad, Mosul, and Kirkuk as well as Diyala province in an attempt to discredit the Government of Iraq and ISFs and incite sectarian violence—as evidenced by the recent high profile attacks in Ninewa and Baghdad. In the upcoming months, AQI may attempt to take advantage of changes in the political and security environment to reassert its presence in some areas of Iraq. AQI

remains the primary instigator for ethno-sectarian violence, and it will seek to capitalize on Sunni-Shia and Arab-Kurd tensions.

DRAWDOWN IN IRAQ AND TROOP LEVELS/ROTATIONS IN AFGHANISTAN

Question. What is the relationship between the pace of our force drawdown in Iraq and the pace of our force increase in Afghanistan? In other words, will an accelerated drawdown of forces in Iraq improve the readiness and availability of additional forces needed in Afghanistan?

Answer. As forces drawdown in Iraq, those forces will become available to support other global requirements, including operations in Afghanistan. I will continue to work with the Service Chiefs and combatant commanders to determine the proper force size and composition necessary to support the commanders in Iraq and Afghanistan in order to ensure that current and anticipated missions are supported.

Question. How does the withdrawal of U.S. forces from Iraqi cities this summer impact the availability of forces for deployment to Afghanistan?

Answer. The withdrawal of forces from Iraqi cities this summer does not directly affect the ability of forces to deploy to Afghanistan. The pace for the withdrawal of forces from the cities is linked to the security agreement with Iraq and the overall progress by the Government of Iraq to provide for its own security requirements. If Iraqi security continues to improve, as verified by General Odierno and Ambassador Hill, then our force drawdown should proceed as planned. We will continue to monitor and assess the requirements in both Iraq and Afghanistan to ensure that the force size and composition are matched to mission requirements.

Question. What considerations will be factored into decisions regarding whether (and if so, what kind and how much) U.S. military equipment currently in Iraq will be transferred to the ISFs?

Answer. Operational readiness of U.S. forces and the ability of ISFs to achieve the essential, sustainable capabilities to maintain security after the departure of U.S. forces in December 2011 will be the drivers. We continue to define the requirement so the exact types and numbers of equipment are still being determined; however, our goal is to ensure the ISF has a foundational ground defense capability to maintain internal security and stability with a credible, initial deterrence against external conventional threats. Additionally, they need to maintain maritime security and sovereignty of Iraqi airspace.

Question. How should the readiness requirements of the Services for non-excess defense articles currently in Iraq be addressed as part of this transfer determination process?

Answer. We have a process to weigh the impacts to Service readiness and make decisions accordingly. The Joint Staff, Military Services, National Guard Bureau, Central Command (CENTCOM), Multi-National Forces-Iraq and Multi-National Security Transition Command-Iraq are all actively involved in the process.

We are carefully considering readiness of U.S. forces, including the Reserve component. Some of the equipment required by the ISF is excess to U.S. forces; however, U.S. forces have a need for non-excess equipment to fulfill worldwide requirements. It is a matter of weighing risks and making informed decisions. Therefore, all those organizations involved in the process will weigh the risks and make collective recommendations, accordingly.

AFGHANISTAN-PAKISTAN STRATEGY

Question. The strategy announced by the President in March sets out as its goal “to disrupt, dismantle, and defeat al Qaeda in Pakistan and Afghanistan, and to prevent their return to either country in the future.”

In your view, can this strategic goal be achieved through a purely military solution? If not, what other instruments of power are needed to achieve this goal?

Answer. No. There is not a purely military solution to achieving the President’s strategic goal. All elements of national power—diplomatic, informational, military, and economic—must be brought to bear. This requires better civil-military coordination and a significant change in the management, resources, and focus of our foreign assistance. Our approach to defeating al Qaeda must be one that builds trust with Afghans and Pakistanis while applying all instruments of power. We require these diverse instruments to deny sanctuary to al Qaeda and the Taliban now, and to generate a stable and secure Afghanistan capable of denying al Qaeda return after the withdrawal of our combat forces, and while we sustain partnership and commitment to political and economic development in that nation.

Question. What steps do you believe are required to prevent al Qaeda from returning to Afghanistan in the future?

Answer. We are working with the Afghan Government to build its capacity to secure its people from Taliban intimidation, to provide an environment for required economic growth, and to set the conditions for an education system that will enhance the lives of people well into the future. A critical component of this effort is to increase the capacity of Afghan National Security Forces (ANSF) to secure its own people. We also support Afghan counterterrorism measures that target specific al Qaeda members and support networks. As the Afghan Government strengthens its ties to its people it will help set conditions that prevent the return of al Qaeda extremists.

Question. Is defeating the Afghan Taliban and militant extremists, other than al Qaeda, who are attacking Afghanistan from safe havens in Pakistan a necessary component of the President's strategy?

Answer. Yes. Defeating the Afghan Taliban and militant extremists operating out of Pakistan, whether directly linked to al Qaeda or not, is an essential component of the President's regional strategy. As the President stated, the objective of the strategy is to "disrupt, dismantle, and defeat al Qaeda and their extremist allies in Pakistan and Afghanistan," and "prevent their return to either country in the future . . ." we must separate al Qaeda operatives from their key allies. While a complex web of groups, the Afghan Taliban are interwoven with al Qaeda in many ways. Thus, we must work with Pakistan and our other partners to disrupt and defeat the Afghan Taliban, to advance a stable and secure Afghanistan and to inhibit the spread of al Qaeda influence in Afghanistan and across the region.

Question. Is defeating the Pakistan Taliban a necessary component of the President's strategy?

Answer. Yes. Defeating the Pakistan Taliban is an important component of the President's regional strategy. Defeating the Pakistan Taliban will prevent al Qaeda from collaborating with other extremist allies in the region and is necessary to ensure a stable, democratic Government of Pakistan (GoP). Defeating the Pakistan Taliban is a responsibility of the GoP, which faces serious threats from insurgent activities. Our role in defeating the Pakistan Taliban includes supporting the GoP through diplomatic and military means.

Question. In your view, what are the greatest challenges in implementing the administration's strategy for Afghanistan and Pakistan?

Answer. The most significant challenges we face in implementing the administration's strategy arise from our requirement to bridge the common ground between our national interests and those of the Governments of Pakistan and Afghanistan. Both sovereign nations face threats from entrenched insurgencies as well as significant domestic challenges. As a responsible partner and ally, we need to work carefully to support the two governments in maintaining the stability of their governments, defeating extremists, and supporting the needs of their populations. By supporting the two nations with all elements of our national power, we can enable them as they seek to prevent extremists from threatening regional stability.

AFGHANISTAN

Question. Secretary Gates has said that in the long run the conflict in Afghanistan has to be "Afghanistan's war for its own people."

Do you agree with that assessment?

Answer. Yes. Unlike conventional battles for dominance of air, sea, land, or space, counterinsurgency is, at its core, a battle for the people. In Afghanistan, the Taliban is attempting to undermine, and in some cases replace, the Government and its services. International Security Assistance Force (ISAF) efforts in the near, mid and long term must focus on creating capability and capacity within Afghan structures in order to re-gain the confidence of the Afghan people. As Afghan institutions do so, they will win the confidence of the people, the Taliban will fall out of favor, and the Afghan Government will grow to provide the necessary services expected of a democratically elected national government. The Taliban offer no popular governance agenda, and are feared and mistrusted by more than 80 percent of Afghans. Thus, an empowered Afghan Government is essential to undercut the fundamental approach of the Afghan Taliban.

Question. Do you believe that our long-term strategy is properly oriented toward enabling the Afghan people to assume responsibility for their own security?

Answer. The orientation of our strategy is sound; however, the execution of the strategy is under review. The ISAF Commander, General McChrystal, has just completed his initial assessment of the situation in Afghanistan. I and other senior leaders are taking a hard look at his assessment to define the way ahead to better focus our efforts and improve our effectiveness in enabling the Afghan people to assume greater responsibility for their own security.

Question. From your perspective, what are the key lessons learned from our experience in Iraq that should be applied in Afghanistan?

Answer. Every conflict is different. In Afghanistan, General McChrystal is implementing a strategy that reflects the reality of the current fight as it relates to the actual situation on the ground and the goals of the President's strategy. I believe one of the greatest lessons learned from Iraq that are applicable to all conflicts is the multi-faceted approach to problem solving and issue-resolution. Bringing together our very best talent from across the military, other U.S. Government Agencies and Departments as well as the leaders of industry provides for a whole-of-government approach applicable to the unique circumstances of the conflict.

Question. You have expressed a sense of urgency about conditions in Afghanistan, saying that "we have to start to turn this thing around within the next 12 to 18 months."

In your view, what goals and objectives must U.S. forces in Afghanistan achieve within the next 12 to 28 months?

Answer. If we fail to gain the initiative and reverse the insurgent's momentum, we will face an emboldened enemy and worsening security situation. Gains in this must be our focus over the coming 12-18 months. But, we must also account for the importance of longer-term activities that will provide the path to success.

We must grow and improve the effectiveness of the ANSFs. We must leverage a whole-of-government approach, assisting in the development of effectiveness governance in Afghanistan. We must also secure the population and separate them from the insurgents to allow for social development and reconstruction.

Question. You have also been quoted as saying the situation in Afghanistan is "serious and deteriorating" and expressing concern over recent opinion polls indicating that for the first time a majority of Americans do not think the war in Afghanistan is worth fighting.

What has caused you to describe conditions in Afghanistan as "serious and deteriorating"?

Answer. We have been fighting this war for 8 years, and although considerable effort and sacrifice has resulted in some progress, many tangible indicators and perceptions here at home, within the International community, and among the Afghan people have resulted in less confidence in our ability to accomplish the mission. The perception that our resolve is uncertain creates reluctance amongst the Afghans to align against the insurgency. The security situation has worsened, which makes the Afghan people feel less safe and have less confidence in coalition forces. The insurgency itself is more sophisticated and more resilient than at any time since 2001.

Question. What would you say to those who question whether the war in Afghanistan is worth fighting?

Answer. The U.S. military conducts the missions it is given. The question of "worth" is one for the American people to answer through debate, and ultimately by their elected representatives in Congress and by the President.

Personally, however, I believe that allowing Afghanistan to again be used as a safe haven for those who seek to do the United States harm would not serve the national interest.

Question. General Stanley McChrystal, Commander, ISAF/Commander, U.S. Forces Afghanistan, is in the process of conducting an assessment of the campaign plan in Afghanistan, including a review of United States and Afghan troop levels.

Do you believe that the current end strength targets of 134,000 for the Afghan National Army (ANA) and 96,800 for the Afghan National Police (ANP) are sufficient, or should those end strength targets be increased?

Answer. I do not believe the current authorized ANSF force levels (134,000 ANA and 96,800 ANP) are sufficient to provide security for the Afghan population. One of the stated goals of the President's strategy on Afghanistan and Pakistan is to develop an increasingly self-reliant ANSF that can take the lead role in the counterterrorism and counterinsurgency fight with reduced U.S. assistance. Current ANSF force levels are not sufficient to accomplish this goal.

The Secretary of Defense has directed a detailed analysis, led by CENTCOM and the Joint Staff, be conducted to inform recommendations on options for future end-strength and capabilities for both the ANA and the ANP. If confirmed, I will use this analysis as well as inputs from the Service Chiefs, our Allies and partners to make recommendations on the future size and required capabilities of the ANSF.

Question. What in your view are the factors that should be considered in evaluating any request for additional U.S. forces for Afghanistan?

Answer. A proper analysis of General McChrystal's initial assessment will be critical to evaluating U.S. force levels in Afghanistan. Understanding the effective application of current resources in Afghanistan is a key factor. Any request for additional resources must focus on what is required to accomplish the mission in Af-

ghanistan, where there are shortfalls, and then the specific requests to meet the requirement. We must understand how the additional forces fit into the overall strategy. Finally, careful consideration and assessments must be made about available force levels and the impact additional forces will have on the health of the force.

Question. What in your view are the major challenges for accelerating the growth of the Afghanistan National Security Forces, and how would you recommend addressing these challenges, if confirmed?

Answer. The greatest international community challenge to accelerating the growth of the ANSF is the requirement for mentors for these forces. The greatest Afghan challenge is the development of leadership for the expanded force.

The President's decision in March to deploy the 4/82 Brigade Combat Team (BCT) to provide additional mentors for the ANSFs will allow the United States to meet our ANA embedded training team requirements for the 134K Army and will significantly increase the number of ANP police mentor teams. U.S. Counterinsurgency BCTs are also assuming responsibility for police mentors in districts within their battlespace. We must continue to encourage our North Atlantic Treaty Organization (NATO) partners to provide these district mentors in order to build synergy for security within the battlespace and increase the number of districts with police mentor coverage. I also recommend encouraging NATO to use the NATO Training Mission-Afghanistan (NTM-A), which just recently stood up on 10 September 2009, as an opportunity to enhance training and mentoring of the ANP.

Expanding the leadership capacity of the ANSF requires training and experience and both the ANA and ANP have leadership development programs in place. However, we must also recognize that leader development requires time and we must balance the pressing need for additional growth and progress in leadership with this reality in order to build forces that are self-sustaining over the long-term.

Question. As the size of the Afghan National Army increases, should more of these forces be deployed to the border region to prevent cross-border attacks by extremist militants from Pakistan into Afghanistan?

Answer. I will defer comments on the placement of additional Afghan National Army forces to the senior commanders in theater as well as the leadership within the Afghan Ministry of Defense. However, the Afghan Border Police (ABP) have primary responsibility for border security. The Afghan National Army provides direct support and support in depth to the ABP. Operational Coordination Centers are currently being established at the Regional and Provincial levels to improve information sharing and synchronization of efforts.

Preventing all incursions is difficult due to the length and porous nature of the border. However, practical cooperation between Afghan, Pakistani, and international forces improves border security. Effective military operations along the Afghanistan-Pakistan border areas are key to disrupt and eventually deny safe havens to al Qaeda and the Taliban from which to launch these incursions.

ISAF and USFOR-A must continue to enhance the practical cooperation between ANSF, Pakistani military and international forces and increase the effectiveness of our counterinsurgency operations. Border and Joint Coordination Centers, regular tripartite engagements at all levels, and counterinsurgency training of Afghan and Pakistani forces are key to these efforts.

Question. NATO has agreed to the establishment of a three-star command within the ISAF command structure to oversee the day-to-day execution of the conflict.

What further changes, if any, to the U.S. and ISAF command structures in Afghanistan do you support to achieve greater unity of command?

Answer. Achieving unity of command is critical to the success of any strategy. The Intermediate Joint Headquarters is a critical step in aligning the many current operational activities under a single command. Ongoing reviews of the various training organizations, SOFs, and other units will further streamline our command structures, and assist the United States and its allies achieve unity of effort while supporting the Government of Afghanistan.

We also need to review how we conduct and synchronize our efforts across Afghanistan. In the past, we have often operated as if there were five separate campaigns occurring in each of the Regional Commands. While conditions on the ground may vary widely across the country, we must insure that our counterinsurgency campaign is unified throughout Afghanistan. The new Counterinsurgency Advisory and Assistance Team (CAAT) initiative, currently under development in Afghanistan, will assist ISAF in achieving unity of effort across the Regional Commands. CAATs will be employed in all five Regional Commands, and will assist commanders at all levels in achieving ISAF campaign objectives. They will also assist in rapidly disseminating counterinsurgency best practices across the theater. I expect the CAATs will be tremendous assets as we move to unify our counterinsurgency efforts,

and will enable commanders to apply a combined, multi-disciplined approach to the problem sets they face.

Question. What is your assessment of the contributions by our NATO allies to the mission in Afghanistan? What more should our NATO allies be doing to support that mission, particularly the training of the ANSFs?

Answer. Both our NATO and non-NATO partners have served valiantly alongside our forces, and more importantly, the growing Afghanistan national Security Forces. The fruits of their collective labors bore out during last months national and provincial elections, as Afghan National Army and National Police, having been trained and mentored by international ISAF forces, secured their country's first-ever self-run democratic election.

As we adjust our strategy, we continue to seek our allies' perspectives and incorporate them into our approach going forward. Some allies have restrictive caveats that make our operations on the ground and in the air challenging and impact ISAF's unity of effort. The new intermediate joint command headquarters will go a long way in improving unity of effort, but there is still work required to encourage our partners to remove or reduce their caveats.

Additionally, we would encourage our allies and coalition partners to contribute in ways consistent with their traditional strengths, including trainers for Afghan National Army and Police units. The new NATO Training Mission-Afghanistan command will leverage our allies' strengths in these areas. Certainly, we would welcome both equipment and financial donations from our partners who are unable to provide troops. As we collectively focus on building Afghan governance, all contributions will be welcome and put to good use.

Question. Fielding the right kind of intelligence, surveillance, and reconnaissance (ISR) assets in Afghanistan is more challenging than in Iraq, due in large part to the very different geography of the country.

In your view are there adequate ISR assets available to support requirements in Afghanistan? Is there a need for more?

Answer. With the help of Congress, we have made progress ensuring our troops in Afghanistan have every advantage possible through significant investments in ISR. Since the Secretary of Defense stood up the ISR Task Force in 2008, we have resourced initiatives that collectively increase full motion video capabilities by more than 200 percent and signals intelligence capabilities by approximately 300 percent. As we shift our focus from Iraq to Afghanistan, we will work closely with General McChrystal and his staff to ensure our ISR capabilities adequately respond to the unique challenges associated with terrain, distance, and the relative lack of communications infrastructure. While increased ISR collection and sensors remain important, we must also ensure that the necessary processing, exploitation, and dissemination capabilities are in place to move information rapidly to tactical users.

Question. What in your view are the best performing ISR assets?

Answer. We have learned through experience in Iraq and Afghanistan that in addition to ISR assets, cross-cueing, and fusion of information from a variety of sensors is also critical to success. One example of this has been the use of signals intelligence as a means to employ more effectively full motion video. Commanders on the ground ask for additional full motion video more than any other ISR asset.

Question. Recent press articles have raised concerns about the ability to provide assured beyond line of site and satellite communications as needed to troops deployed in Afghanistan outside of the large main bases.

In your view, is there a problem with sustainable communications and if so, what options do you see as available to address the situation?

Answer. Yes. It is clearly a challenge to provide robust and sustainable communications in Afghanistan due to the rugged terrain, varied missions our troops must execute, and lack of existing infrastructure within the country. We are increasing our overall satellite capacity in the theater by taking advantage of a variety of assets (for example, the recent launch of the Wideband Global Communications-2 (WGS-2) capability). We are also working to improve our troops' communication capabilities and equipment at the small-unit level to support such critical functions as Command and Control (C2), MEDEVAC requests, and "call for fire" support. Where it makes sense, we are leveraging emerging commercial capabilities in country, such as cellular telephone networks. Communications is a critical enabler for our forces, and we are making a concerted effort to ensure delivery of the very best capabilities we can wherever needed.

Question. News reports indicate that Afghan resentment over civilian deaths resulting from U.S. counterterrorism operations and U.S. or NATO airstrikes continues to grow. In July, General McChrystal issued a new directive limiting the use of airstrikes and assaults against homes in order to reduce the incidents of civilian casualties. General McChrystal called for avoiding "the trap of winning tactical vic-

tories—but suffering strategic defeats—by causing civilian casualties or excessive damage and thus alienating the people.”

Do you support restraints on the use of airpower and home entries to reduce civilian casualties even if this increases the risks to U.S. forces?

Answer. Any time an innocent person is killed our mission becomes more difficult and our men and women in Afghanistan understand this. In addition to the tragic loss of life, all of the leadership is aware of the negative repercussions that result from civilian casualties. As such, General McChrystal has published a new tactical directive that provides guidance to subordinate commanders, and the force, on controlled use of munitions and tactical techniques to better safeguard the population and reduce civilian casualties. I recognize, as does General McChrystal, that the carefully controlled and disciplined employment of force entails some risks to our troops—we must work to mitigate that risk wherever possible, but excessive use of force resulting in an alienated populace will produce far greater risk to the accomplishment of our mission. I have every confidence in the ability of our forces to operate effectively and to succeed in this challenging environment under the current guidelines.

PAKISTAN

Question. Administration officials have said that “no improvement” is possible in Afghanistan without progress in Pakistan or, similarly, that you can’t succeed in Afghanistan without “solving” Pakistan.

Do you agree that no improvement is possible in Afghanistan without solving Pakistan’s control of its border region?

Answer. The Government of Pakistan (GoP) has been conducting continuous operations within the border regions of the Northwest Frontier Province and the Federally Administered Tribal Areas since August 2008. Pakistan’s ability to conduct sustained operations against terrorists and other extremist groups who seek safe haven along the Afghanistan-Pakistan border is vitally important to our regional strategy. The GoP’s long-term commitment to reconstruction, economic development, and building the capacity of their security forces contributes greatly to our efforts in concert with ISAF to stabilize Afghanistan.

Question. How would you describe the linkage between progress in Afghanistan and developments in Pakistan?

Answer. Afghanistan and Pakistan stability are inextricably linked as extremist threats transcend regional boundaries. The strategy we have for Afghanistan and Pakistan is regionally focused in recognition of the fact that what happens in one country affects the other. Clearly, addressing extremist safe havens and cross border activities is essential to success in Afghanistan. Our strategy develops Pakistan’s counterinsurgency capabilities and simultaneously pursues long-term approaches to promote stable, democratic governance and sound economic policies to provide opportunity for the people of Pakistan.

Question. What are the strategic risks in tying Afghanistan’s future too closely to developments in Pakistan?

Answer. The ability of extremists in Pakistan to undermine our efforts in Afghanistan is known, which is why our new approach to the strategy for Afghanistan and Pakistan is regionally focused. U.S. and international support to the Government of Pakistan in their efforts against extremism is an imperative. While we continue to enhance our bilateral relationship with each country based on its own merits, we cannot ignore the ties between the two countries by delinking Afghanistan’s future from developments in Pakistan. Without effective action against these groups in Pakistan, Afghanistan will face an enduring threat to its long-term stability.

Question. What is your assessment of how the Pakistan Army leadership perceives the threat to Pakistan from militant extremists located along the Afghanistan-Pakistan border?

Answer. Pakistan’s leaders recognize that extremist groups pose a growing threat to Pakistan’s national security and long-term stability. Pakistan’s civilian and military leaders have publicly expressed their commitment to countering this threat. They understand that insurgencies cannot be defeated in months but rather in decades. Pakistan’s military must sustain its action against extremist groups within its borders and provide humanitarian assistance to mitigate the threat. Ongoing operations in the North West Frontier Province and the Federally Administered Tribal Areas are a promising start. U.S. leaders engage regularly with the Government of Pakistan to convey both our concern about these threats and our political support and we are augmenting their efforts through military and economic assistance and cooperation.

Question. Through the Pakistan Counterinsurgency Fund, the United States is providing significant assistance to train and equip the Pakistan Frontier Corps and build the capacity of the Pakistan Army to conduct counterinsurgency operations.

Would you agree that in order for U.S. military assistance to Pakistan to be effective, Pakistan's leadership must make it clear to the Pakistani people that confronting the threat posed by al Qaeda, the Taliban and other militant extremists is essential for the sake of Pakistan's own security interests?

Answer. Indications from Pakistan senior leadership and outside observers are that Pakistan's military operations along the border currently have the support of the Pakistani population as the Pakistani people are becoming increasingly aware of the threat posed by extremist organizations. It is important for the Government of Pakistan and the Pakistan military to have the support of the population for these operations, without which we could not effectively provide U.S. military assistance. We also understand that the population needs a whole-of-government approach to the problems Pakistan faces or support for the government and military operations could erode. Our broad assistance efforts support this approach by improving Pakistan's military/security capabilities and assisting the Government of Pakistan to make improvements in education, agriculture, job creation, long-term economic development, as well as governance in order to improve the lives of the Pakistani people.

Question. What steps would you recommend taking to ensure that U.S. military assistance provided to Pakistan is used to enhance Pakistan's efforts to confront the threat posed by militant extremists on its territory and deny safe haven to groups conducting cross-border incursions into Afghanistan?

Answer. We have two primary funding authorities for providing assistance to Pakistan that support the Pakistan security forces efforts against extremist groups along the Afghan-Pakistan border. These are the Pakistan Counterinsurgency Fund (PCF)/Pakistan Counterinsurgency Capability Fund (PCCF) and Foreign Military Finance (FMF). PCF/PCCF provides the combatant commander a flexible, responsive funding source to meet near-term counterinsurgency requirements of Pakistan security forces along the border. FMF supports aspects of our Af-Pak strategy and counterinsurgency requirements and helps build the capabilities of Pakistan's conventional forces in order to provide key enablers and supporting activities for the fight. FMF also reinforces the longer-term U.S.-Pakistan military-to-military relationship and the broader goal of building a long-term effective partnership with Pakistan. I believe we have the mechanisms and authorities in place to help fund the equipment/assistance the Pakistanis need to ensure we are meeting the goals for which these funding mechanisms were intended.

Question. What additional steps, if any, would you recommend to ensure transparency and accountability for reimbursements paid to Pakistan from Coalition Support Funds for support provided to the United States relating to OEF?

Answer. Coalition Support Funds (CSF) provide reimbursement to Pakistan for expenses incurred while conducting operations in support of U.S. efforts against extremist/terrorist organizations and are a key element toward meeting our objectives in the Afghan-Pakistan strategy. We continue to work with the Pakistan military to improve CSF processes, and ensure appropriate accountability and transparency for CSF. We recently sent a team to Pakistan to review, with the Pakistan military, the CSF documentation and other requirements in order to improve accountability and timeliness of payments.

Question. In your view, what should be done to press the Pakistan Government to confront the Afghan Taliban shura operating out of the city of Quetta in Baluchistan?

Answer. The United States should continue to support the Government of Pakistan to expand their capabilities and help them confront and defeat militant extremism wherever it may be in Pakistan. The Quetta Shura bears the ideological standard for the Taliban—we must continue to work with Pakistan to approach the Taliban as a regional threat to both Afghanistan and Pakistan. Taliban groups throughout the region derive their operational guidance from commanders at the local and tribal level. Ongoing operations in the North West Frontier Province and the Federally Administered Tribal Areas target the threat's current center of gravity at the local commander and tribal level. They are a promising start, and strengthen the GoP's legitimacy in the eyes of the Pakistani people. U.S. leaders must continue to engage Pakistan and encourage the government to continue to take sustained action against militant extremists throughout Pakistan.

Question. What is your assessment of the current level of cooperation between Afghanistan and Pakistan in confronting the threat of militant extremists in the border region?

Answer. The relationship between Afghanistan and Pakistan continues to improve from just a few years ago and the leadership of both countries continues to engage in discussion with a goal of enhancing the relationship including greater cooperation. Pakistan's leaders are increasingly convinced of the demonstrated benefits of cross-border cooperation. This cooperation also occurs at the lower levels through border coordination and other activities in order to meet the challenge of dealing with extremist threats in the border region. There is more that can be done and the United States continually works to facilitate and improve the cooperation between these two countries and with coalition forces on the Afghanistan side of the border.

Question. To what extent can actions by India, particularly with respect to troop levels along the India-Pakistan border, help or hinder U.S. efforts in Pakistan and Afghanistan?

Answer. India and Pakistan share a common regional threat of violent extremism. Our strategy is regionally focused and acknowledges that what happens in one country affects the other. Al Qaeda and associated extremist organizations are targeting India, as well as Pakistan, Afghanistan, our allies in the Middle East, Europe, Australia, and the U.S. Homeland. We continue to encourage increased contact across the Line of Control, senior-level bilateral engagement and trade. Our strategy seeks opportunities to build India-Pakistan confidence. While there are no immediate options or quick-fixes, continued demonstration of U.S. long-term commitment to regional security will reduce tensions between Pakistan and India and enhance the will and capacity of Pakistanis to move decisively against extremists.

JOINT IMPROVISED EXPLOSIVE DEVICE DEFEAT ORGANIZATION

Question. DOD has taken inconsistent positions on the disposition of ad hoc, but critical, entities created to respond to the urgent needs of combat forces in Iraq and Afghanistan. The Secretary of Defense has recently stated in testimony before the Senate Appropriations Committee, Subcommittee on Defense, that the ISR task force should be phased out, while at the same time, the Department has decided to institutionalize Joint Improvised Explosive Device Defeat Organization (JIEDDO). Some have expressed concern about the possible hasty demise of the ISR task force, while others have expressed concern about the premature decision to make JIEDDO permanent. While JIEDDO reports to the Deputy Secretary of Defense, the Office of the JCS plays an active role in reviewing and validating urgent operational needs emerging from Iraq and Afghanistan.

What are your views of JIEDDO and its role within the Department and within the Department's process for responding to urgent operational needs?

Answer. The Joint IED Defeat Organization is effective in its mission to lead, advocate, and coordinate the Department's C-IED efforts in support of combatant commanders. They are a highly valued capability that continues to demonstrate the agility to respond quickly to urgent operational needs by providing essential material and nonmaterial solutions to counter known, newly deployed and emerging IED threats.

Question. What are your views of the criteria the Department is using to determine which institutions should become permanent and which should not, and to demonstrate how these criteria are being consistently applied across organizations?

Answer. Organizations are often created in response to shortfalls identified by combatant commanders. There are several venues, including Senior Warfighter Forums (SWarFs) and Deputies Advisory Working Groups (DAWGs), to review and make recommendations to the Department leadership as to whether an organization should become permanent. In the case of JIEDDO, the C-IED SWarF and the DAWG concluded that the nature of the IED threat and continued combatant commanders' need for rapid solutions necessitated an enduring organization with the agility to rapidly respond to changing urgent operational needs. In addition to its rapid acquisition capability, JIEDDO's operations and information fusion support, and their ability to support time-sensitive joint C-IED training requirements, are well suited to meet these urgent operational needs.

COUNTERNARCOTICS

Question. Recently, senior U.S. Government officials have indicated that the United States will begin to increase alternative crop development, public information, and interdiction programs, rather than continuing or expanding ongoing eradication efforts. This has been viewed as a u-turn of the U.S. counternarcotics strategy in Afghanistan and has been greeted with skepticism from some senior Afghan officials.

What is your view of this ongoing change in strategy?

Answer. I understand the interagency's intent to rebalance its counternarcotics strategy and focus resources on those programs that will contribute directly to breaking the narcotics-insurgency-corruption nexus and help connect the people of Afghanistan to their government. I believe we need a multi-pronged approach that targets laboratories, traffickers, and movement of drugs, and facilitators at the same time we work to provide alternative income opportunities for farmers.

Question. What is your assessment of the eradication policy the United States has pursued in recent years?

Answer. The efforts of the U.S. Government to support and fund the Afghan Government's eradication efforts have shown little success. The funding and energy for eradication programs should be redistributed to other counternarcotics activities that have proven far more successful such as interdiction, public information, and alternative development.

Question. Do you believe that this shift in policy is adequately resourced?

Answer. If the resources dedicated to the eradication programs of the U.S. counternarcotics strategy were redistributed to interdiction, rule of law, public information, and alternative development, this would be a step in the right direction. However, General McChrystal has just completed an initial assessment for the Secretary of Defense, and we need to review the assessment to determine if the shift in counter-narcotics policy is adequately resourced. Additionally, SRAP, NSC, and the interagency are in the process of reviewing our CN Strategy for Afghanistan.

Question. What role do you believe DOD will play in each component of the new strategy?

Answer. DOD's counter-narcotics mission is to support the combatant commander and law enforcement, through information sharing, training and equipping, infrastructure, and emergency assistance. DOD's main focus is on interdiction efforts to decrease narcotics trafficking and processing in Afghanistan while building Afghan capacity to disrupt and dismantle significant drug trafficking organizations. A nexus exists between narcotics and the insurgency as well as corruption and criminality. Recent decisions by the NATO Defense Ministers and the Secretary of Defense, at the request of the Afghan Government, provided the guidance and authorities for both ISAF forces and the U.S. military to target the trafficking and production of narcotics where the nexus exists. Additionally, the recent change to DOD's international counternarcotics policy enabled more robust support and integration of capabilities with civilian law enforcement agencies operating in Afghanistan.

COUNTERDRUG OPERATIONS

Question. DOD expends more than \$1 billion per year in the fight against illegal narcotics trafficking. For much of the last two decades, the fight against illegal narcotics has taken place within the Western Hemisphere, but in recent years, counternarcotics operations have expanded to Afghanistan, West Africa, and Asia. U.S. commanders in Afghanistan have identified success against narcotics traffickers as fundamental to the success of their mission to root out the Taliban and al Qaeda. Despite this expanding focus to other parts of the globe and the focus of U.S. commanders in Afghanistan, the Department often views counternarcotics operations as the job of Federal law enforcement agencies.

Please discuss your views of the DOD's counternarcotics mission and the apparent tension that exists within the Department about the proper role of the military.

Answer. Illegal narcotics and their proceeds fuel terrorism, regional instability, and organized crime. They are a serious, evolving, and global threat—which no country can defeat alone. All agencies with counternarcotics responsibilities must work together to ensure our collective tactics, techniques, and procedures provide the agility required to counter such an asymmetric, adaptable threat. Although Federal law enforcement agencies are responsible for the majority of counternarcotics missions, DOD is a critical supporting member of the team. Combating drug trafficking and related threats requires a whole of U.S. Government approach along the continuum of drug production, interdiction, investigations, intelligence and information sharing, eradication, capability and capacity building, demand reduction, and alternative livelihood development and partnerships. These are important counternarcotics elements whether combating drugs in the United States, the Western Hemisphere, or the poppy fields of Afghanistan.

Within the United States, DOD is the lead Federal agency for the detection and monitoring of aerial and maritime transit of illegal drugs into the United States (10 U.S.C. 124). We carry out this mission in support of the counterdrug activities of Federal, State, local, and international partner law enforcement agencies through our Geographic Combatant Commands (GCCs), their subordinate commands and task forces, and as a full partner in interagency counterdrug intelligence and oper-

ations coordination and “fusion” centers located throughout the country. These include the El Paso Intelligence Center, the U.S. Customs and Border Protection Air and Marine Operations Center in Riverside, CA, and Office of National Drug Control Strategy’s High Intensity Drug Trafficking Areas. In addition, DOD supports 54 State and territorial counterdrug task forces through the National Guard Counterdrug Governors’ State Plans (32 U.S.C. 112). These 2,600 National Guard soldiers and airmen leverage DOD resources and unique capabilities to act as catalysts to better coordinate State and local law enforcement efforts with those of the Federal Government in attacking both the supply and demand for illicit drugs in our Homeland.

Lastly, within the Department there is a healthy, constructive, and continuous dialogue about the proper role of the military in counternarcotics activities. As you well know with two major combat operations on going and a steady state requirement for the defense of the homeland, resources are always a limiting factor. It is this competition of resources that forces all of the United States to scrutinize each mission to ensure our military members support interagency activities that not only add measurable value to our whole-of-government counterdrug efforts, but enhance, rather than detract from the readiness of our military and civilian members.

STRATEGIC COMMUNICATIONS

Question. Over the past few years, DOD has funded a growing number of counterterrorism and counterradicalization strategic communications programs. While the Department does not have a separate budget outlining its strategic communication activities, the Government Accountability Office reports that DOD “spent hundreds of millions of dollars each year” to support its information operations outreach activities, including recent initiatives funded by the JIEDDO and GCCs. Many of these ongoing programs are in support of operations in Iraq and Afghanistan, but Military Information Support Teams from United States SOCOM are also deploying to U.S. embassies in countries of particular interest around the globe to bolster the efforts of the Department of State and the U.S. Agency for International Development (USAID).

What are your views on DOD’s strategic communications role and its integration into overall U.S. foreign policy objectives?

Answer. Quite honestly, I am not a fan of the term strategic communications. I believe that we are best served by a communications policy that aligns deeds and words, and that builds on America’s historic reputation for being credible and reliable—saying what we mean and doing what we say. The Department of State is the designated lead for U.S. Government communication efforts at the national level, developing and coordinating “whole-of-government” foreign policy objectives and supporting programs for the communications efforts through the NSC. Our military activities are integrated with and support these objectives and programs. All of our servicemembers have an important role to play—aligning our actions and communications activities at the tactical, operational and strategic levels in a manner that minimizes “say-do” gaps, and represents our national interests and values in a culturally appropriate manner.

Question. What is your view of the apparently expanded role of the U.S. military in supporting U.S. strategic communications programs led by the State Department and the USAID in countries other than Iraq and Afghanistan?

Answer. As noted above, I believe that the military performs a vital role in national communication programs, and one that remains consistent with our authorities and responsibilities. We provide worldwide forward-deployed military communications resources and unique capabilities in support to State and USAID efforts. Over the past decade, military activities supporting these “whole-of-government” programs have expanded in concert with growing regional challenges and our global engagement posture. However, they are but one component of extensive collaboration with our interagency partners to promote national policy objectives. We often find that DOD has capability and capacity that, when coupled with State and AID programs, provides a powerful lever to advance U.S. Government interests and objectives. I appreciate Congress’s continuing support for further development of these important capabilities.

IRAN

Question. What options do you believe are available to the United States to counter Iran’s growing influence in the Middle East region?

Answer. Iran continues to be one of the most destabilizing regional actors with regard to Iraq, Afghanistan, and the broader Middle East region, and therefore must be taken into account as we execute and develop future policy. Our policy and

strategy regarding Iran requires close coordination of all elements of national and international power. The President has articulated an initial policy of reaching out to Iran, which I fully support. I also support current diplomatic and economic initiatives with regard to Iran, to include U.N. actions (both sanctions and financial measures), regional initiatives, and international pressure. I fully support the Department of State's Gulf Security Dialogue initiative to strengthen and reassure our regional partners. This includes military aspects such as capacity building, border security, missile defense, and proliferation security initiatives.

Question. In your view, does Iran pose a near-term threat to the United States by way of either its missile program or its nuclear program?

Answer. While these programs will not threaten the U.S. Homeland in the near term, Iran's posturing can threaten U.S. interests in the region. These include Iranian use of proxies in Iraq, Afghanistan, Lebanon, the Palestinian territories, on the African continent, and even in the tri-border region of South America.

Question. If you believe either of these programs pose a near-term threat, what in your view are the best ways to address such a threat?

Answer. I will continue to support current initiatives with regard to Iran, to include engagement, U.N. actions, regional initiatives (to include reassuring our regional partners), financial measures, and international pressure. We encourage Iran to fulfill its responsibility with regard to international agreements to the Non-proliferation Treaty, of which Iran is a signatory, and the additional protocol.

Question. Other than nuclear or missile programs, what are your concerns, if any, about Iran?

Answer. A primary concern is Iranian malicious activity throughout the region through the use of proxies in an effort to extend Iranian influence into sovereign nations by providing weapons, technology, training, and finance. This can be seen through Iranian support to HAMAS and Hizballah, as well as interference within Afghanistan and Iraq. I am concerned Iran's continued malign activities will impact stability and potentially the regional economy. It is important to maintain and strengthen our relationships with our regional partners and allies, by continuing to build partner capacity, as well as land and maritime security to counter Iranian malign influence in the region. I will continue to work in close coordination with all applicable U.S. Government departments to ensure our policies toward Iran take a regional approach.

Question. What concerns, if any, does the election related unrest in Iran raise from a military perspective?

Answer. I am concerned that the growing influence of Iran's Islamic Revolutionary Guard Corps over Iranian politics will result in the militarization of Iranian foreign policy. Nonetheless, at the moment I do not project any significant changes to Iran's overall foreign policy objectives. I have observed no positive effects on the Iranian military as a result of recent election unrest.

CHINA

Question. China has an increasingly significant role in the security and stability of the Asia-Pacific region and the United States must determine how best to respond to China's emergence as a major regional and global economic and military power.

What is your assessment of the current state of U.S.-China military relations?

Answer. Relations between the U.S. and Chinese militaries are consistent with years past. The moratorium in exchanges unilaterally imposed by the People's Republic of China last year has been lifted, permitting the continuation of military-to-military exchanges. The increasing number of exchanges notwithstanding, I am concerned about China's continued lack of transparency with regard to People's Liberation Army modernization, capability, and strategic intent. I am hopeful that we can keep the substance and the tone of our military relationship with China on a positive trajectory.

Question. How would you characterize the quality of U.S.-China military-to-military engagements to date and what should be the U.S. goal for such engagements in the future?

Answer. U.S.-China military-to-military relations, as constituted, provide opportunities for exchange and dialogue on a representational level, but are not yet sufficient to provide enhanced understanding of China's intentions or capabilities. Moreover, the relationship is fragile, and vulnerable to perceived slights. Our goal is to establish continuous communication channels that are open not only when relations are good, but in periods of turbulence as well. We have recently had several engagements including Defense Consultative Talks, the Chief of Staff of the Army's visit, and Special Military Maritime Consultative Agreement dialogues. These indicate a

gradual willingness on the part of China to engage in a more substantial relationship, and I welcome this.

U.S. RELATIONS WITH RUSSIA

Question. U.S. relations with Russia, although strained over a variety of issues, have improved recently in some areas. At the Moscow Summit in July, you signed a new strategic framework for U.S.-Russian military-to-military engagement with your Russian counterpart.

What do you believe are the potential benefits and opportunities to improve U.S.-Russian relations either through military-to-military programs or other cooperative actions that you would recommend?

Answer. We have witnessed positive developments in our interaction with Russia since the Presidents agreed at the Moscow Summit to pursue a more constructive relationship based on mutual security interests. While we will undoubtedly continue to experience challenges in our bilateral relationship, we are committed to a course change with Russia, which will require strategic focus, effort, and discipline. The Strategic Framework General Makharov and I signed at the Summit puts our Nations' militaries on a more pragmatic and reciprocal path to cooperation in areas where we share common interest, such as counterterrorism, counterproliferation, crisis response, peacekeeping and anti-piracy. In those areas, I believe we can make the most progress towards achieving operational capability for combined missions and in formulating common strategic approaches to the challenges that face both nations. Additionally, militaries of the size and capabilities possessed by our Nations should remain engaged in constructive communications and dialogue, not only to foster understanding and address unforeseen consequences, but also to promote positive cooperation and enhance regional and global peace and stability. Enhanced communications will aid in mitigating our strategic differences and will serve to cultivate a positive change in Russia's policy approach

MISSILE DEFENSE COOPERATION WITH RUSSIA

Question. In an interview with a Russian newspaper before the July Moscow summit meeting, President Obama said the following: "We have not yet decided how we will configure missile defense in Europe. But my sincere hope is that Russia will be a partner in that project. If we combine our assets on missile defense, the United States, Russia, and our allies will be much safer than if we go it alone. I see great potential here, and I hope to have a robust discussion with President Medvedev about these possibilities for cooperation on missile defense when I am in Moscow next week."

Do you agree with the President that missile defense cooperation with Russia would serve our mutual security interests and could enhance our security against potential missile threats from nations like Iran?

Answer. Yes. We remain interested in exploring cooperative opportunities that would complement our missile defense architecture. As an example, we believe the Russian Garbarla Radar in Azerbaijan and the Armavir radar in southern Russia could be additive to our missile defense architecture and provide helpful information for early ballistic missile warning detection. It would go a long way towards reassuring the Russians that our missile defense efforts in Europe are not directed towards their nation. While we are realistic about Russian willingness to join the United States in this endeavor, cooperation could be an important element in a broader strategic partnership between the United States and Russia aimed at addressing the key security challenges facing both our Nations.

BALLISTIC MISSILE DEFENSE

Question. With the fiscal year 2010 budget request, Secretary Gates has refocused the Department's missile defense program on effective theater missile defenses to protect our forward deployed forces, allies, and friends against existing short- and medium-range missile threats from nations like North Korea and Iran. The budget request would provide \$900 million in increased funding for more of the Terminal High Altitude Area Defense and Standard Missiles-3 interceptors, and more Aegis Ballistic Missile Defense ships.

Do you agree with Secretary Gates' decision to increase the focus on effective theater missile defenses to defend our forces against existing regional (short- and medium-range) missile threats from nations like North Korea and Iran?

Answer. Yes. Our forces are increasingly threatened by shorter-range ballistic missiles and the proliferation of dangerous technologies among rogue regimes and non-state actors. In addition, states like Iran and North Korea continue to develop

longer-range ballistic missiles with which to threaten the United States and our allies and friends.

Question. The administration is considering a number of options for possible missile defense in Europe against a potential future Iranian missile threat, including the previously proposed deployment of missile defense capabilities in Poland and the Czech Republic.

From a technical standpoint, do you believe there are a number of possible options for a missile defense in Europe, and do you believe a land-based Standard Missile-3 (SM-3) interceptor could provide a useful capability against future Iranian missile threats, both to Europe and potentially to the United States?

Answer. Yes. I believe there are a number of technical alternatives for missile defense architectures in Europe. Land- and sea-based SM-3 interceptors, along with the necessary sensors and warning from both ground and space, could be key components of an alternative technical architecture.

Question. The fiscal year 2010 budget request for the Missile Defense Agency includes an initiative to develop the capability to intercept ballistic missiles early in their flight, sometimes referred to as the “ascent phase.” This initiative would use the SM-3 interceptor along with existing and near-term sensors. If this capability is developed successfully, it could permit the United States to intercept long-range missiles from nations like North Korea well before the Ground-based Midcourse Defense system would have to be used to defend the Nation.

What is your view of the potential value of an early intercept or ascent-phase intercept capability?

Answer. An early or ascent-phase intercept capability would improve defense of theater areas and the homeland, and we are considering options for that potential capability. This defense capability would allow more intercept opportunities and potentially conserve interceptors by allowing more shoot-look-shoot vice salvo engagements. As a hedge against evolving future threats, destroying a threat missile early in flight reduces the effectiveness of the missile’s countermeasures.

SECURITY FORCE ASSISTANCE

Question. Secretary Gates has repeatedly called for strengthening the civilian capacity and capabilities of the U.S. Government, and has also stressed the importance of fostering the capabilities of international allies and partners. What is less clear, however, is whether DOD’s military and stability support capabilities, in terms of resources and requirements, ought to shrink, as the capabilities of U.S. Government civilian agencies and international partners grow.

To what extent, if any, should assumptions about future growth in or availability of U.S. Government civilian capacity and capabilities shape calculations of Defense Department requirements, force structure, and investment decisions?

Answer. I would suggest that this is about growing overall U.S. Government capacity rather than simply shifting existing capacity. DOD requires substantial and enduring capabilities to conduct stability operations to succeed in contingencies where a non-permissive environment either disallows or severely constrains the deployment of civilian professionals.

That said, the U.S. Government also requires a robust civilian expeditionary capability for contingencies where the security environment is permissive—and not just for post-conflict stabilization, but also to conduct stability operations on a preventive basis—to help partners solve problems before they become crisis that may require military interventions.

On several occasions, my predecessors and I—and the Secretary of Defense—have testified before Congress regarding the national strategic importance of this civilian expeditionary force. Moreover, the Joint Staff and OSD have been working in earnest with the State Department and Congress on development of this civilian expeditionary capability since 2004. Unfortunately, progress has been very slow. It took almost 5 years to get authorization to establish a Civilian Response Corps (CRC) under the aegis of the State Coordinator for Reconstruction and Stabilization. In fiscal year 2009, Congress appropriated \$75 million for the CRC, which has since resulted in the recruiting of 67 of 250 CRC-Active component personnel (the full-time first responders) and 530 of 2000 CRC-Standby component personnel (those assigned other full-time duties but who train and volunteer to deploy when available). S/CRS hopes to have all 250 CRC-A and 1,000 CRC-S in place by the end of fiscal year 2010. We are pleased with this recent progress, but frankly, the small size of the CRC suggests DOD must continue to prepare for situations where its capabilities may be overwhelmed or where the threat situation prohibits their deployment.

Question. To what extent, if any, should assumptions about future growth in, or the availability of, the military capabilities of our international partners and allies

shape calculations of Defense Department requirements, force structure, and investment decisions?

Answer. We do account for allied and partner capabilities as we consider investment decisions, although we do so on the margins. However, we do not see any large increase in partner capacity forthcoming. There are exceptions; however. For example, as we consider worldwide distribution of missile defense assets, we continually assess (and encourage) the contributions of partner nations. OEF and OIF resulted in an intensive 8-year effort to build the capacity of our coalition partners to work with us. At the height of our efforts in Iraq, we had 34 countries and 25,000 coalition troops deployed. Right now in Afghanistan, we have 41 countries and 37,000 deployed troops fighting along side us. I consider this a substantial accomplishment. These coalition forces have reduced requirements for the deployment of U.S. forces and reduced the risk to U.S. forces that are deployed. However, there is much more we can do and we need your help in three areas.

First, we need authorization to use Section 1206 Global Train and Equip authority to train and equip coalition partners. DOD appreciates the recent clarification provided by the Committees on Armed Services of the House and Senate (HASC and SASC), respectively in their reports on the National Defense Authorization Act (NDAA) for Fiscal Year 2010 bills, which endorse the use of section 1206 to train and equip partners for participation in coalition operations in Afghanistan. We look forward to clarification being included in the NDAA for Fiscal Year 2010 bill that emerges from conference.

We currently have an appropriation that allows the United States to loan equipment, called the Defense Coalition Readiness Program, but our partners cannot keep it. This greatly complicates the problem of fielding coalition partners who have no way to maintain their readiness once a deployment is complete. Foreign partners such as Georgia, Jordan, Columbia, and many others are willing to conduct multiple deployments over a period of years, so it makes little sense to let their capabilities atrophy between each deployment and start over from scratch each time.

Second, the ceiling of \$350 million on section 1206 authority needs to increase. Every geographic commander has cited section 1206 as the most important program they have to address rapidly threats and opportunities in their theater. Annual global demand is about \$800 million per year and, once proposals vetted, we have about \$500 million in quality strategic programs operating under a \$350 million cap. If we expand the use of section 1206 to train and equip coalition partners, the demand will only grow.

Third, for 3 years now, we have requested that Congress grant U.S. authority to establish a standing inventory of equipment that we know almost every coalition partner will need to deploy to the warfight. This year, we requested an appropriation of \$22 million in addition to the authority. The lack of this authority creates very long lead times in the provision of equipment to foreign partners because they are often standing in line behind our own force requirements. In some cases, the lack of this authority has delayed deployment of coalition partners by 8–10 months, which simply increases risks to U.S. forces.

Question. A major operational effort in both Afghanistan and Iraq will be building their military and police forces' capability such that these forces can eventually take on the responsibility for securing their populations and fighting insurgents.

What organizational and operational realignments in military structure and resources, if any, are necessary to create, train, equip, and deploy U.S. personnel or units to meet these increased requirements for security force assistance?

Answer. SOCOM is currently designated as the proponent for Security Forces Assistance (SFA) within DOD. In this role, they lead development of joint SFA doctrine; lead the development of joint SFA training and education for individuals and units; lead the identification of required joint SFA capabilities across all warfighting domains; lead the development of joint SFA mission essential ask lists; collaborate with Joint Staff and JFCOM, in coordination the Services and GCCs, to develop global joint sourcing solutions that recommend the most appropriate forces for validated SFA requirements; serve as a source of SFA expertise to Joint Task Forces or Combatant Command Headquarters; coordinate through OSD other U.S. Government agencies on future SFA-related initiatives, strategies, concepts and plans; and assist USD (P&R) in identifying critical SFA skills, training, and experience.

Additionally, as you may know, several years ago we established the Joint Center for International Security Assistance to capture and analyze security force assistance lessons from contemporary operations in order to advise combatant commands and Military Departments on appropriate doctrine, practices, and proven tactics, techniques, and procedures to prepare for and conduct security force assistance missions efficiently. That activity currently reports to me, but that alignment is under review. Finally, I should mention that all SFA-related activities in the Department

are under review in the current Quadrennial Defense Review, which is assessing gaps in SFA capabilities, alignment of responsibilities and authorities, and SFA process.

With respect to your questions on police, DOD requires some capability to train and equip police forces to succeed in contingencies where a non-permissive environment either disallows or severely constrains the deployment of civilian professionals. But my strong preference is that the U.S. Government develops a civilian expeditionary capability that includes a robust police training component. Until this exists, DOD will have to fill the gap, as we have done in Iraq and Afghanistan.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations. These include the global train and equip authority (section 1206) and the security and stabilization assistance authority (section 1207). There is growing debate over whether these temporary authorities should reside in DOD or the Department of State, if they are continued beyond their current authorizations.

What should be our strategic objectives in building the capacities of partner nations?

Answer. Building the capacity of foreign partners to counter terrorism and promote regional stability around the world is an investment in a preventive strategy that is fundamental to our national strategy. There are several reasons why this is true. First, we can save American lives and reduce stress on U.S. forces by helping partners solve problems before they become crises that require major U.S. military interventions. Second, the United States does not have sufficient military forces to deny terrorists sanctuary everywhere in the world. So we must rely on partners: helping to build their capacity and creating networks of partners working together to counter terrorism. Third, if properly trained and equipped, foreign forces can often be more effective than U.S. forces because they know the language, politics, culture, and human terrain. Fourth, the enemy uses as a recruiting tool the large U.S. military footprints abroad. Capable foreign forces can alleviate requirements for large U.S. military footprints. Finally, the United States is at peace with many countries where terrorists enjoy sanctuary or where instability threatens our security interests. So we must work with and through them to help reduce terrorist space, capability, and influence and to help promote stability.

These concepts are now firmly embedded in our defense guidance documents and the Services and combatant commands have earnest efforts underway to implement that guidance. In DOD's Guidance for Employment of the Force, preservation of peace and security is as important as combat operations. DOD's Guidance for Development of the Force now puts a premium on development of U.S. capabilities to assist foreign partners. Our global counterterrorism plan, which has both kinetic and indirect lines of operation, now prioritizes the indirect lines (working with and through partners) as the decisive and priority lines. Two sweeping DOD Directives require the Services and combatant commands to develop capabilities to conduct stability operations and irregular warfare that are on par with combat capabilities. Finally, we have created the DOD Building Partnerships (BP) portfolio, one of nine portfolios that together are inclusive of all of the activities of the Department. Our BP portfolio gives the United States a horizontal look across BP programs and activities within DOD so we can make better investment decisions in this important area.

Question. What is your assessment of these temporary capacity-building authorities, in particular section 1206 and section 1207?

Answer. As stated above, each geographic commander has cited section 1206 as the most important program he has to address rapidly threats and opportunities in their theater. State Department Ambassadors also speak very highly of this program. We consider it our gold standard security assistance program. It is critical to reducing military risk on a preventative basis. I will continue to advocate for a permanent authority.

Section 1206's flexibility allows it to meet urgent and emerging threats or opportunities. Funds are not earmarked, but allocated against priorities using a merit-based process. It requires joint DOD-Department of State formulation and approval of programs. This has brought about significantly improved interagency cooperation and effectiveness in meeting goals in the areas of building partnership capacity.

In addressing train-and-equip authorities, the recent mark-up by the HASC recognized the significant and "fundamental distinction of purpose between [FMF] requirements generated on behalf of the partner nation (consistent with U.S. policy), and [section 1206] requirements generated through a DOD-led assessment of United

States' national security needs" This recognition by the HASC is a significant and positive shift in philosophy.

Section 1206 needs to be kept closely tied to DOD's mission. It should not be used to: (1) backfill State FMF shortfalls; (2) fund activities with long production times that will not meet priority military needs; (3) fund programs appropriately funded by other means (e.g., counternarcotics funds); or (4) serve as a tool of near-term convenience (e.g., a political quid pro quo).

There are some perpetual misconceptions about section 1206 and DOD's appropriate role in security assistance that I would like to clear up. Foremost, the program is often portrayed as a DOD run on a State Department mission. However, DOD has executed train and equip missions on behalf of the Secretary of State for decades. Section 1206 introduces only two innovations. It allows DOD to pay for security assistance programs, and it allows DOD to vote on which programs are implemented. In other words, complaints about section 1206 are driven by concerns over budgetary jurisdictions that have nothing to do with national security or the prerogatives of the Department of State. The Secretary of State exercises oversight of the program and DOD simply "pays" and also "votes."

In my view, this shared jurisdictional model is a very good one. DOD requires shared jurisdiction with State over the provision of security assistance in cases where we bear the preponderance of risk, including risk to the lives of our servicemembers. In my mind, there are four clear cases: (1) Combat operations where security assistance is a strategic imperative (i.e. Iraq Security Forces Fund, Afghanistan Security Forces Fund); (2) Security assistance to partners that directly affect the outcome of combat operations (Pakistan Counterinsurgency Capabilities Fund); (3) Security assistance to partners who will deploy with the United States for combat operations or other multi-national operations; and (4) Security assistance to respond to urgent threats or opportunities, to help partners solve problems before they become crises requiring major military interventions (e.g. section 1206).

Our requirement for section 1207 Security and Stabilization Assistance authority is similar. DOD should be able to effect cash transfer to State for the execution of civilian assistance programs that buy down military risk. Stability in Haiti, for instance, has remained a concern. We know from historical experience that instability led to mass migration, triggering deployment of U.S. forces to restore stability. We therefore supported a set of section 1207 civilian programs that ultimately resulted in stabilization of Cite Sole, which for decades has been the major source of political instability in the capital. Those section 1207 programs created an environment that was permissive enough to pave the way for millions of dollars of follow-up aid that reinforced the initial effort. Georgia is another good example. After Russia's invasion of Georgia last year, section 1207 was the most flexible and responsive program the U.S. Government had to provide food and livelihood support to Internally Displaced Persons and to rebuild police capacity. This was the first aid received by the Government of Georgia. It was critical to restoring stability, which was very much in our national security interest. Not every section 1207 program is going to succeed or turn a country around, but we need the ability to look for opportunities like this to buy down security risks.

Question. What role should the combatant commander play in determining the security assistance requirements within the commander's area of responsibility?

Answer. The Secretary of Defense tasks GCCs to develop plans to achieve desired theater end states that support enhancement of U.S. security and that of our allies. One of the most important tools they employ in the development of those plans is security assistance. But their plans are developed in coordination with country teams that include military security cooperation officers, and combatant command plans must also support Embassy mission strategic plans. The section 1206 program exemplifies this model. Joint formulation of program proposals is highly encouraged and has become the norm, and Embassy and combatant command concurrence is required for any proposal to be considered. It is also important to note the critical role of the foreign partner, who must also agree to the program in support of a shared security interest.

Question. What should be the relationship of the global train and equip authority to other security assistance authorities, such as DOD counternarcotics assistance and State Department foreign assistance and foreign military financing?

Answer. We are diligent in our deconfliction of section 1206 with counternarcotics (CN) funds and have disapproved section 1206 proposals that were clearly aimed at subsidizing CN efforts. That said, Congress has disapproved some section 1206 proposals in SOUTHCOM that we considered valid. In particular, we would like to use section 1206 in SOUTHCOM to train and equip professional SOFs to build additional defensive layers along our southern water border. Some Congressional staff have expressed the view that a terrorist threat must be extant in SOUTHCOM in

order to use global train and equip. That is a pre-September 11 view of the world. Any terrorist organization can buy its way into the illicit networks and routes to our South. We would like the flexibility to train and equip foreign SOFs that may not otherwise be a priority for counternarcotics funding.

With respect to foreign military financing (FMF), we consider this to be a long-term strategic tool that is of importance to DOD and the United States, but this program does operate under a number of significant constraints. The administration has initiated a review of security assistance authorities, which will address some of these current constraints, and Congress will likely see the results of that review in the form of change proposals in the next legislative cycle. I would prefer to defer on any other particulars pending the outcome of that review.

Question. In the last few years, some of the security assistance provided has gone to countries that may have troubling records on human rights issues or civilian control of the military in the past. How do authorities like section 1206 seek to ensure the near term, national security critical benefits of the assistance we provide do not produce long-term negative consequences?

Answer. Train-and-equip programs like section 1206 help our partners gain security capabilities that can stabilize ungoverned areas, consequently depriving terrorist organizations of potential safe havens. This authority also assists our partners in securing their national borders, restoring legitimate authority, and establishing the rule of law—all elements that strengthen democracy and governance.

The Department's current train-and-equip programs are implemented according to statutory requirements that no equipment, supplies, or training that are prohibited may be provided by any provision of law, nor may a capacity-building program be provided for any foreign country that is otherwise prohibited from receiving such type of assistance under any other provision of law. Both the General Counsel of DOD and the Legal Adviser at the Department of State certify that each project complies with all legal requirements before they are approved by the Secretaries of Defense and State. In particular, we rely heavily on our colleagues at the Department of State for the vetting of recipient units in accordance with the Leahy amendments.

In addition to abiding by the statutory requirements, before implementing any train-and-equip program, we carefully assess, in close consultation with the Department of State, the potential political and military implications a program may have on partner nations. Program development and collaboration in the field between the chief of mission and the combatant commander is the first step in a rigorous inter-departmental process to target our security assistance toward appropriate military units within a country. This process continues in Washington through close coordination by the regional and functional offices at the Departments of Defense and State and culminates in approval by the Secretary of Defense, with the concurrence of the Secretary of State.

Special efforts must be made to avoid human rights violations that can result from myopic security assistance efforts. As you are aware, under section 1206, we are not authorized to provide equipment, supplies, or training to a foreign military unit unless it has been vetted for information regarding human rights violations by the Department of State. Both Departments consider the protection of human rights as a paramount concern, and we devote a considerable amount of time, analysis, and effort in critically vetting every proposed train-and-equip program to ensure the units receiving assistance do not have a history of human rights abuses. In addition to their role in vetting recipient units in accordance with the Leahy amendments, we also rely on our colleagues at the State Department to assess human rights and foreign policy implications broadly as part of the requirement for the Secretary of State's concurrence in all section 1206 programs.

Military train-and-equip programs must uphold the cornerstones of democracy—human rights and fundamental freedoms, and the rule of law. Please be assured that we share your concerns about promoting human rights, building enduring stability, and creating an environment for good governance to prevail.

Question. In a speech to the Nixon Center in January, you argued for a whole-of-government approach and said that the military should be more willing to say when the Armed Forces are not “the best choice to take the lead.” You also said you would support transferring DOD resources to other U.S. Government departments when needed.

What factors do you believe should be considered in determining those situations in which the Armed Forces should step back from taking the lead in favor of other civilian agencies?

Answer. In a permissive environment, I believe the State Department should have the lead in the conducting of stability operations; with DOD in a supporting role,

if required. This is playing out in our planning for the responsible drawdown in Iraq.

Question. Do you continue to see a need to be able to transfer DOD resources to other U.S. Government departments?

Answer. Yes. We routinely run into situations where other Departments have the authority to conduct an activity that is critical to DOD, but they lack the funding to provide the support we need. I believe we should consider an authority whereby DOD could exercise cash transfers to other Departments in certain circumstances—to reduce risk to the lives of our servicemembers or other Government employees, for instance, or to pay for an activity that will significantly reduce the cost of DOD operations. I would cite as an example our desire to provide air traffic control equipment to a particular Central Asian country, which would enable it to handle more of our logistics flights into Afghanistan. Because this nation's air traffic control is provided by a contractor, DOD is challenged to find the authority to fund a capability that could save the U.S. Government millions of dollars in transportation costs.

COMBATANT COMMAND STRUCTURE

Question. In recent years, U.S. Africa Command and U.S. Southern Command have adopted command structures that embed civilian personnel from other government agencies, such as the State Department, the Drug Enforcement Agency, the Federal Bureau of Investigation, and others.

What is your view of this type of command structure and do you believe it should be adopted by the other GCCs?

Answer. There is a clear need to continue our efforts to improve DOD/Interagency coordination. We continually assess and analyze our interagency cooperation and coordination efforts, and will press forward with best practices and solutions. Nevertheless, there is no "one-size-fits-all" combatant commander structural model for improving interagency coordination. I believe it is particularly appropriate for combatant commands that are not actively engaged in or potentially confronted by major combat operations, to investigate the feasibility of new structures and processes that support this goal.

SOUTHCOM, for example, has adopted a strategy-focused staff organization with a goal of seamless interface with interagency counterparts. AFRICOM, on the other hand, has eliminated the traditional J-code structure, combining complimentary functions and significant structural modifications to accommodate the interagency. Importantly, we have seen improvement in interagency participation and coordination in both commands.

I would point out, however, that our other combatant commands are actively pursuing, and achieving, a high degree of interagency integration and cooperation.

All of these efforts strongly suggest we are on a positive trajectory toward our goal of achieving a comprehensive, integrated government-wide approach.

SPECIAL OPERATIONS COMMAND

Question. The Commander of SOCOM recently submitted a number of proposals to OSD designed to improve the coordination between SOCOM and the Services related to personnel management issues, including assignment, promotion, compensation, and retention of SOFs. Included in these proposals was a modification of section 167 of title 10, U.S.C., that would change the role of the SOCOM Commander from "monitoring" the readiness of special operations personnel to "coordinating" with the Services on personnel and manpower management policies that directly affect SOFs.

Do you support a change to title 10, U.S.C., to give the Commander of SOCOM greater influence on personnel management decisions and policies related to SOFs?

Answer. I support the coordination between SOCOM and the Services related to personnel issues. OSD has directed this close coordination and included language in DOD Directive 5100.01 that meets the intent of SOCOM Commander's proposals. In discussion with the SOCOM Commander and the Services, I believe that a modification to section 167 of title 10, U.S.C. is not needed at this time.

Question. Earlier this year, the Commander of SOCOM testified that "We are and will be dependent upon our Service partners for key force enablers. The non-availability of these force enablers has become our most vexing issue in the operational environment."

Do you agree that there is a shortage of enablers for missions carried out by SOFs? If so, how should these shortages be addressed?

Answer. Yes. Over the past few years, we have significantly grown our SOF combat capabilities, but did not proportionally grow enablers for those SOF elements.

Since SOF elements are not sized or resourced to maintain a large support structure, the bulk of SOF enabler support must be provided by the Services or GCCs.

To address these shortfalls, SOCOM has begun several initiatives focused on internal reprioritization, growing their own force structure, and force management. Although SOCOM currently estimates their current enabler shortage through 2015 to be approximately 30–35 percent, their proposed QDR 2010 initiatives would reduce those shortages by 10 percent. SOCOM is currently considering a variety of other initiatives, including GCC and Service provided support, to address the remaining shortfalls, and once complete, will forward those for my review.

ARMY GROUND COMBAT VEHICLE PROGRAM

Question. The Department's fiscal year 2010 budget request includes cancellation of the family of armored manned ground vehicles in the Future Combat Systems (FCS) program. In announcing his decisions to restructure FCS and cancel the manned ground vehicle, and then again later in a speech at the Army War College, Secretary Gates emphasized his commitment to help the Army get a new ground combat vehicle (GCV) in 5 to 7 years and promised to protect the Army's future year's funds that had been aligned with the FCS program for this purpose.

What, in your view, is the appropriate schedule for developing a new GCV system?

Answer. I support Secretary Gates' commitment to help the Army field a new GCV in 5 to 7 years. In the fiscal year 2010 FCS budget decision, an important factor was the need to focus that investment on delivering useful military capability sooner than later. I think the timeline proposed by the Army is reasonable. It will help allow inclusion of the lessons from the current fight over time, to see what changes are needed, and incrementally make these changes.

Question. What is the operational urgency, if any, in fielding a new GCV in a 5–7 year timeframe?

Answer. We have learned much over the last 8 years of war. The Department must strike a balance between what equipment is needed for today's fight with what equipment is desired for the future. Persistent conflict and the complex nature of the threat are re-defining the timelines for modernization. The enemy is more rapidly adapting its tactics to exploit weaknesses in our current combat vehicles, even as enhancements are made to counter those changing threats. Some of our combat vehicles have increased vulnerabilities due to space, weight, and power limitations that cannot be resolved by further upgrades alone as with the Bradley Fight Vehicle and the M113 family of vehicles. Despite our enhancements, survivability and vehicle protection requirements clearly demonstrate the need for a faster and more flexible GCV acquisition approach to field capabilities quickly and efficiently, when and where needed. The Joint Staff is supporting the Army as they fundamentally relook their requirements for a new GCV, as well as the BCT modernization strategy. The Army is also working closely with the Marine Corps in this refocused effort, and is scheduled to outline its requirements way ahead to the JROC this fall.

Question. Are you confident that DOD will protect the Army's original FCS funds to start and sustain a new ground vehicle modernization program?

Answer. Yes. The Department is committed to start a new GCV modernization program that strikes the right balance to address the span of threats current and in the future that we will likely face. There will be challenges ahead to reset, reconstitute, and revitalize our force with investments that pay dividends today, tomorrow, and well into the future.

Question. If confirmed, what actions will you take to ensure that DOD provides the funds as promised?

Answer. If confirmed, I will remain fully committed to providing the best possible military advice to our Nation's leaders and to ensure the necessary resources are provided to strike the right balance to prevail in our current conflicts while also maintaining, equipping, and preparing the force for the challenges of tomorrow. I believe that the new GCV modernization program is part of the Army effort to strike this balance.

INTELLIGENCE, SURVEILLANCE, AND RECONNAISSANCE

Question. Recently, the Office of Operationally Responsive Space (ORS) launched the TACSAT 3 small satellite with a payload, know as Artemis, that can be used by commanders in the field. ORS is also in the process of developing an additional small satellite, ORSSAT 1, specifically designed to be taskable by the commanders in the field.

In your view, how will these small satellites provide additional needed ISR capability not currently available in Afghanistan and elsewhere?

Answer. Small, low cost satellites can provide the joint warfighter with highly responsive capabilities to meet unanticipated or otherwise unmet needs.

TACSAT-3 was designed to assess the military utility of hyper-spectral imaging and test real-time data downlink to a theater. Once the demonstration is complete, residual capability/capacity may be available to the warfighter to support theater needs.

ORS-1 is intended to exercise our ability to quickly provide capability to the warfighter. Once built and launched, it is anticipated it will meet specific CENTCOM needs.

Lessons learned from these activities might not only assist filling current joint warfighter needs, but also improve our Nation's ability to provide options to meet future joint warfighter needs.

REDUCTIONS IN NUCLEAR WEAPONS

Question. The President has made a commitment with Russian President Medvedev to bilaterally reduce the number of operationally deployed nuclear warheads.

Do you believe reductions in the total number of warheads, both reserve and operationally deployed are feasible?

Answer. I believe the United States, with similar reductions by Russia, can reduce the total number of nuclear warheads, and still maintain an effective deterrent. The New Strategic Arms Reduction Talks (START) Treaty negotiations do not address nuclear weapons in Reserve status, only operationally deployed weapons. The proposed range of 500-1,100 strategic delivery vehicles (which includes heavy bombers, ICBMs and SLBMs) and a limit of 1,500-1,675 warheads will be sufficient to maintain U.S. strategic deterrence. The currently ongoing Nuclear Posture Review is looking at these potential reductions in both its international dimensions and from a stockpile and infrastructure perspective and is fully informing our START Follow-On negotiating team. This review will help United States ultimately decide on the supportable limits.

Question. Do you believe reductions in the total number of START accountable delivery systems could also be reduced in a bilateral context?

Answer. Yes. In the Joint Understanding issued by both President Obama and Russian President Medvedev, it stated that each nation would determine for itself the composition and structure of its strategic offensive arms. This is as in past agreements, where the United States has opted to maintain a larger force structure of delivery vehicles with a smaller number of warheads associated with each. The Russian Federation has done the opposite and has maintained fewer strategic delivery vehicles with a larger number of warheads associated with each. Therefore, while the number of START accounted delivery systems can be reduced, these sovereign choices may require a negotiated range of delivery vehicles.

Question. If your answer to the two questions above is yes, how should capabilities and requirements be evaluated to identify which warheads and delivery systems could be retired and dismantled?

Answer. The Nuclear Posture Review, which has been underway for several months, is examining that exact issue. Specific reductions in warhead types or delivery systems have to be studied carefully to assess the impact on military requirements while being cognizant of the challenges associated with maintaining a rapidly aging stockpile. The review is taking into consideration practical reductions in the role and number of nuclear weapons in order to strengthen our nuclear deterrent and enhance the security environment. The review is looking at over 100 separate program items and is taking into consideration maintenance of the nuclear triad and its associated warheads. The final recommendations will be a product of national security strategy guidance, stability and stockpile management. In addition, we will evaluate our capabilities and requirements with a continued focus on major power stability and an increased emphasis on extended deterrence and assurance of our allies and friends.

NUCLEAR FORCE STRUCTURE

Question. With the recent changes in operations and management in the Air Force designed to address the problems from the last decade that culminated in the mistaken transport of nuclear weapons on a B-52 bomber, there appear to be significant improvements in the nuclear enterprise. One of the underlying causes of the many problems was a lack of attention and support for the nuclear enterprise from senior military and civilian leadership.

How will you ensure that the senior leadership is provided?

Answer. The mission of safeguarding our vital nuclear capabilities and maintaining our nuclear deterrence mission requires leadership at the highest levels. Even though the Air Force has made good strides in addressing some of the problems from the last decade, there is more to be done.

Work is already underway to place a greater emphasis on the nuclear deterrent mission within the Joint Staff and the Services. I have directed standup of an organization on the Joint Staff headed by a senior executive service civilian to focus on the nuclear mission, and am devoting additional staff resources to enhance development of nuclear strategy, plans, policies, exercises, and analysis. I am also directing the Joint Staff to assess resourcing and timelines for developing curricula to educate joint officers in deterrence theory and nuclear doctrine in order to provide for future leadership.

I am providing pertinent program inputs to enhance the requirements development process via the Vice Chairman of the JCS, who serves as my representative to the Nuclear Weapons Council. The Vice Chairman is also deeply involved in addressing many of the issues and concerns associated with strengthening the nuclear enterprise within the department. This is an important leadership role that I take very seriously and will continue to emphasize as we work to bolster confidence in our nuclear deterrence capabilities.

I also strongly support the Services' efforts to correct the mistakes of the recent past and prevent their reoccurrence, as well as strengthen senior leadership involvement within the greater U.S. nuclear enterprise. I fully endorse the changes made by the Air Force to date, including forming a strategic deterrence and nuclear integration directorate within the Air Staff and their recent standup of a new major "Air Force Global Strike Command," which will be responsible for the organize, train, and equip functions for nuclear operations within their service component.

Question. Some concern has been expressed that future reductions in nuclear weapons and delivery systems will once again undermine the ability to manage the nuclear enterprise effectively.

How will you ensure that the necessary reductions in the nuclear arsenal do not undermine the need to maintain the arsenal and ensure that it is secure and accounted for?

Answer. The security and reliability of our Nation's nuclear stockpile is of paramount importance. We must be vigilant against the tendency to believe that a reduction coincides with a de-emphasis. The Air Force has taken significant steps over the last 2 years to improve its organizational alignment and command focus. The Services, U.S. Strategic Command, and the Joint Staff are also working closely with the National Nuclear Security Administration and the Department of Energy to ensure that the nuclear enterprise remains effective in supporting the stockpile even as we continue to reduce the number of nuclear weapons.

We need top down focus on the recapitalization of an aging DOD and Department of Energy infrastructure. I view this as a critical requirement, and plan to work closely with the Commander, U.S. Strategic Command, the Service Chiefs, and congressional leadership to place greater emphasis on the need to invest for a safe, secure, and effective nuclear arsenal.

GUANTANAMO BAY DETENTION FACILITY

Question. Do you support closing the detention facility at the Guantanamo Bay Naval Base?

Answer. Yes, I have said so publicly since 2005. I support the President's decision to close the detention facilities at Guantanamo Bay. On 22 January 2009, President Obama signed Executive Order 13492 ordering the closure of the detention facilities at Guantanamo Bay within 1 year. We are making every effort to meet that deadline.

The Joint Staff and DOD are working with departments and agencies across the U.S. Government to conduct a comprehensive review of our detention policy and to develop a plan for closure of the detention facilities at Guantanamo Bay.

FUTURE OF NATO

Question. In your view, what existing or new missions should be the focus of NATO's strategic efforts over the next 5 years?

Answer. NATO should concentrate its strategic efforts first on Afghanistan. This will require continuing emphasis on sustaining and increasing the international community's support and resourcing of our efforts on the ground in Afghanistan. Strategic outreach, engagement, and cooperation with the international community, to include the European Union and the United Nations, and other appropriate organizations remain critical to this approach.

I believe that other strategic priorities for NATO include: the move to deterrent presence in Kosovo; consolidating gains and further capacity-building in ISFs through the NATO Training Mission-Iraq (NTM-I); and counter-piracy efforts in the Horn of Africa. This latter mission is closely linked to NATO support to the African Union, which can address some of the root causes of piracy.

Question. In your view, how should NATO proceed on the issue of further enlargement of the alliance over the next 5 years?

Answer. The question of NATO enlargement is largely a political one that must be addressed by President and Congress for the United States, and by the governments of the other 27 NATO nations.

Question. Are you satisfied with the progress of NATO member nations, particularly new member nations, in transforming their militaries, acquiring advanced capabilities, and enhancing their interoperability with the United States and other NATO member nations? Where do you see room for improvement?

Answer. Yes. While Allied progress in these three areas varies from nation to nation, each nation is continuing, within its own means and capabilities, to make progress. Much of this progress is driven by the increasing demands of the many ongoing NATO-led operations, particularly, the operation in Afghanistan. The participation of the Alliance and of each of its individual member states over the past 6 years in ISAF is producing forces that are increasingly more deployable and sustainable. It has also resulted in the development of enhanced Alliance capabilities, and has significantly improved the interoperability between not only U.S. and other allied forces, but also between the 28 NATO nations and the 14 other partner nations participating in this operation.

Despite the Alliance's accomplishments, I believe that NATO must continue to develop its capability for response to evolving threats and challenges in new ways. Cyber warfare and counter-piracy are areas in which the Alliance can further its ability to work in a comprehensive manner with other international organizations like the European Union, the United Nations, the World Bank, and non-governmental organizations. Working in concert with these entities clearly enhances the Alliance's ability to address emerging threats as well as existing challenges in Iraq and Afghanistan. There is also work to do on the defense investment front. Only five European nations consistently meet the NATO goal of investing at least 2 percent of GDP in defense. Many NATO countries need to invest more.

Question. What steps if any could or should NATO take, in your view, to reduce tensions with Russia?

Answer. NATO should continue to use the NATO-Russia Council (NRC) as the primary mechanism for Russian and Allied consultation, consensus building, co-operation, joint decision and joint action, and as the forum for dialogue with Russia with a view towards resolving problems and building practical co-operation. In fact, the NRC Foreign Ministers met in Greece on 27 June where, among other things they identified common security interests, such as the stabilization of Afghanistan, arms control, non-proliferation of weapons of mass destruction and their means of delivery, crisis management, counterterrorism, counternarcotics, and counterpiracy.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. In connection with your first nomination to be Chairman of the JCS, you answered questions on your support for U.S. accession to the United Nations Convention on the Law of the Sea.

Do you stand by your answers provided at that time expressing support for U.S. accession to the convention?

Answer. I continue to stand by my answers. I am on record in Senate and House hearings on the United Nations Law of the Sea Convention in 2003 and 2004 fully supporting United States accession to it. In all there have been eight full committee congressional hearings since 2003. All views have been fully aired. The time has come to stop going over the same ground. I urge the Senate to provide its advice and consent as soon as possible. Since President Reagan's direction in March 1983, U.S. Armed Forces have been implementing and relying on the Convention around the world.

By remaining outside the Convention, we give up the firmer foundation of treaty law for navigational rights vital to our global mobility. There are significant national security impacts from failing to join the Convention.

- The United States must accede to the Convention to remain the leader in the development of the law of the sea and to protect our national security.
- With over 150 countries that have ratified the Convention (including all our major allies except Israel and Turkey), the failure to join maintains the United States in non-party status with Iran, North Korea, Syria, and Venezuela.

- Global security depends upon a partnership of maritime nations sharing common goals and values. One of the most important of those values is respect for the rule of law. By failing to join the Convention, some countries doubt our commitment to act in accordance with international law.
- The United States is outside the process that influences law of the sea developments such as the International Tribunal for the Law of the Sea, the International Seabed Authority (where we would have blocking authority on deep seabed claims), and the Commission on the Limits of the Continental Shelf (which will rule on claims by Arctic nations, such as Russia).
- We do not have access to the sole process for gaining international recognition with legal certainty of our sovereign resource rights beyond 200 nautical miles, especially in the Arctic where Russia has already made efforts to stake its claims. The United States is the only Arctic nation not a party to the Convention.

Question. Military and civilian leaders in DOD have consistently articulated their support for accession to the convention and have stressed the benefits for our national security.

What is being done within DOD and the Military Departments to help secure U.S. accession to the Law of the Sea Convention?

Answer. We have continued to express our clear support for the Convention to the new administration, as we did with the past administration. We were pleased to see that the Convention is listed as one of the Obama administration's Treaty priorities. We have strongly advocated for the Convention in the Interagency Ocean Policy Task Force, in which the Joint Staff participates. Finally, and most important, our military continues to rely on the provisions of the Convention—for example: in the conduct of counter-piracy operations in the Horn of Africa, to transit through the Strait of Hormuz, or to conduct military activities in the Pacific—demonstrating by our actions that the Convention helps the United States protect our national security.

UNITED NATIONS PEACEKEEPING

Question. In recent testimony before the House Committee on Foreign Affairs (July 29, 2009), Ambassador Susan Rice, U.S. Ambassador to the United Nations, stated that the United States “is willing to consider directly contributing more military observers, military staff officers, civilian police, and other civilian personnel—including more women I should note—to U.N. peacekeeping operations.” She also pointed out that the United States currently has 93 personnel assigned to U.N. operations, fewer than 65 other member states including the other 4 permanent members of the U.N. Security Council.

What is your view on whether the United States should contribute more military personnel to both observer and staff positions in support of U.N. peacekeeping operations?

Answer. Current U.S. military operations proscribe any substantial commitments of U.S. forces to U.N. Peacekeeping missions and I do not see that changing for the foreseeable future. However, as our commitments change we will weigh opportunities for a more active role in support of U.N. Peacekeeping Operations.

I consider U.N. peacekeeping operations to be extremely important and cost effective in comparison to unilateral operations. The United States contributes slightly more than one-quarter of the U.N. peacekeeping budget, and when requested, we coordinate support to U.N. operations such as airlift, intelligence, and the deployment of highly skilled military staff officers/observers to assist the U.N. in the planning and conduct of peacekeeping operations. The U.N. currently has about 95,000 uniformed peacekeepers deployed worldwide and this number is growing. These peacekeepers help promote stability and help reduce the risks that major U.S. military interventions may be required to restore stability in a country or region. Therefore, the success of these operations is very much in our national interest.

By law, I maintain a small division in support of the U.N. Military Staff Committee. These officers directly support Ambassador Rice and we are in the process of boosting that staff from 3 to 10. This division is working closely with U.N. Force Generation Services to increase the number of U.S. staff officers and observers assigned to U.N. peacekeeping operations. In addition, these officers are working to ensure U.N. peacekeeping mandates have realistic objectives and attainable goals.

Finally, my staff, in coordination with the State Department and combatant commands, also assists with development and execution of plans to grow peacekeepers around the world through the Global Peacekeeping Operations Initiative. As of June 2009, over 81,000 military personnel from 75 countries have been trained.

Question. What are the advantages and disadvantages of contributing additional military personnel to U.N. operations?

Answer. In some circumstances, U.S. participation and leadership can act as a catalyst that encourages other nations to participate. We recognize that some countries might be more inclined to contribute military forces if the United States commits forces to U.N. peacekeeping efforts, especially specialized capabilities and skills that are in short supply. In addition, U.S. participation can certainly improve the prospects for mission success because we do have the most capable military forces in the world. That said, however, U.S. military forces are not necessarily what the U.N. needs the most from the United States. There are political and regional sensitivities that need to be taken into consideration when deploying Western troops to developing nations. So it is often more efficacious for the United States to contribute enabling capabilities, either unilaterally or together with partners, and in some circumstances, skilled military staff that have high mission leverage but a small footprint.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important to this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to the appropriate and necessary security protection, with respect to your responsibilities as the Chairman of the JCS?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JIM WEBB

QUADRENNIAL DEFENSE REVIEW

1. Senator WEBB. Admiral Mullen, during the new administration's Quadrennial Defense Review (QDR), it is important that we do not lose sight of the larger aspects of national strategy that can fall away at the expense of today's short- and mid-term ground commitments in Iraq and Afghanistan. In our current strategic environment, these commitments can affect force structure in the short-term but really not play out to our national advantage in the long-term. We need a viable force structure that addresses our long-term strategic interests. The roles and missions of the Marine Corps dating to the Key West agreements in 1948 revolve around a narrowly defined amphibious warfare mission. However, the reality is that the Marine Corps has served as the Nation's initial-reaction force for more than 200 years—a force ready to act decisively to preserve the peace on foreign shores short of war, to protect American lives abroad, to fight insurgents, and, since World War I, to participate in extensive land campaigns. Will the QDR address this contradiction and formally recognize the Marine Corps' enduring role as the Nation's force in readiness?

Admiral MULLEN. The QDR is in progress and is planned for a February 2010 submission. The QDR will assess strategies and capabilities needed to address today's conflicts and tomorrow's projected threats but will not specifically address the roles of the Marine Corps or other Services. A separate draft directive, DOD Directive 5100.1, "Functions of the Department of Defense and Its Major Components"

will address the functions of the Marine Corps with respect to specific warfighting requirements as well as those of the other Services. This directive, once approved, should help to resolve discrepancies between previously directed roles and missions and the current use and expectations of the Marine Corps.

2. Senator WEBB. Admiral Mullen, you testified in 2007 that a Navy fleet of 313 ships equates to one reflecting “maximum acceptable risk”. As a maritime nation, we should improve the quality and strength of our seapower. Its recent trajectory—with today’s Navy numbering 286 deployable battle force ships—is not encouraging. Importantly, China is seeking not only to expand its economic and political influence, but also to expand its territory. China’s military modernization has directly supported this endeavor. The PLA [People’s Liberation Army] Navy is developing blue water capabilities that will enable it to project power into Southeast Asia and beyond to the Indian Ocean and Arabian Sea. Despite these trends, several recent news reports have suggested that the QDR will recommend reductions in the number of the Navy’s aircraft carriers. What is your personal view on the need for the Navy to maintain a fleet with a minimum of 313 ships and 11 deployable aircraft carriers as now mandated by law?

Admiral MULLEN. I support the warfighting analysis that underpins 313 ships as well as that behind 11 deployable aircraft carriers. The QDR is in progress and is planned for a February 2010 submission and will examine the projected strategic environment and address threats posed by the use of advanced technology in all domains (air, land, sea, space, and cyberspace). As a broad, overarching review, the QDR will provide the Services with the strategic framework and guidance to develop specific capabilities to address projected future requirements. I too am concerned with the projected size of the Navy. We need to build to a Navy of at a minimum of 313 ships. We also need a balanced Navy in terms of capabilities and a robust industrial base based on a predictable shipbuilding plan.

QUESTIONS SUBMITTED BY SENATOR CLAIRE MCCASKILL

COALITION SUPPORT FUNDS

3. Senator MCCASKILL. Admiral Mullen, I was concerned to read an article from the New York Times on September 15, 2009, suggesting that the Pakistani Army may be committing hundreds of murders of civilians in the Swat Valley, allegedly to prevent the spread of Taliban support. The reports come from Swat residents and human rights organizations. The Pakistani Army has acknowledged that bodies have turned up, but its spokesmen assert that the killings are the result of civilians settling scores vice any actions by its members. I urge the Department of Defense (DOD) to look into this report to determine its credibility. I have consistently raised concerns about the DOD’s Coalition Support Funds (CSF) program created after September 11 to reimburse countries like Pakistan for their logistical activities and military operations aimed at defeating terrorism in concert with U.S. strategic objectives. As you may know since late 2001, Pakistan has received almost \$6 billion in CSF, which equates to about 80 percent of the total \$7.6 billion allocated to all allied nations under the CSF program. The Pakistani Army has not always applied these funds with prudence, and oversight for the CSF funds has been spotty. The possibility that the Pakistani Army could be receiving U.S. funds while potentially harming Pakistani civilians is of great concern and should be investigated. Does DOD have information (unclassified or classified) confirming or denying this recent story about the murders of civilians by the Pakistani Army? If so, please provide a detailed summary of the validity or inaccuracy of this report.

Admiral MULLEN. [Deleted.]

4. Senator MCCASKILL. Admiral Mullen, what oversight mechanisms are in place to monitor activities by Pakistani forces operating in places like the Swat Valley on behalf of the U.S. Government to ensure that human rights abuses are not being conducted and subsequently funded by the U.S. taxpayer via CSF or other programs?

Admiral MULLEN. Our training programs with the Pakistan Military (PAKMIL) incorporate human rights training and stress the need to conduct counterinsurgency operations in compliance with the Law of War including the Geneva Conventions. DOD and Department of State have established Human Rights Vetting procedures to comply with the Leahy Amendment for all training and assistance programs provided to the PAKMIL. CSF is a reimbursement for operating expenses incurred by Pakistani security forces but is paid to the Pakistan government’s general fund. The

PAKMIL provides periodic updates to our Embassy in Islamabad on their planned operations. The U.S. Government monitors the reimbursement of operating expenses; however, international bodies oversee allegations of human rights abuses.

5. Senator MCCASKILL. Admiral Mullen, please provide your most recent assessment of the Pakistani Army's ability, training, equipping, and resolve at addressing terror threats to the United States that exist in its border areas.

Admiral MULLEN. Pakistan has made improvements and progress toward addressing their domestic security concerns, especially with regard to the areas that have been historical terrorist safe havens. It is a dramatic step forward and should be recognized here in the United States as progress by the Government of Pakistan (GoP) as well.

The PAKMIL is in the fifth month of a sustained counterinsurgency campaign in the Northwest Frontier Province (NWFP) and portions of the Federally Administered Tribal Areas. Our train and equip program with our ally is directly tied to enhancing their counterinsurgency capability and supports the U.S. Government Strategic Implementation for our Afghanistan-Pakistan Strategy. It is a pivotal part of our regional security plan and has direct impact on the Afghan insurgency by reducing transnational terrorism threats to the United States and our allies. Our support to the Pakistanis is paying dividends and we should continue to support their efforts to defeat terrorist and insurgent groups contributing to improved regional stability. The successful operations in Swat, Makaland, Bajur, Bunner, and Lower Dir are partly attributable to our training and equipping efforts.

Our team in Islamabad concludes that U.S. Government ability to dialog with the GoP is enhanced by our willingness to commit to the GoP through our efforts with Foreign Military Financing and Pakistan Counterinsurgency Capability Fund.

6. Senator MCCASKILL. Admiral Mullen, are you confident that CSF being sent to Pakistan are actually being used to reimburse that government for legitimate operations in the fight against terrorism in that region and, if so, on what basis?

Admiral MULLEN. Yes; I am confident that the CSF is being used for legitimate operations. Over the past year we have seen significant increases in Pakistan's efforts to improve their counterinsurgency capabilities. CSF is only one part of our efforts and should be viewed as part of a broader security assistance program, which not only provides for reimbursement for military operations against terrorist organizations, but also builds counterinsurgency capabilities and provides for military modernization of the PAKMIL.

The CSF reimbursement process is deliberate and thorough, with several checks and balances built into the process. The U.S. Embassy in Islamabad receives and endorses the claim, U.S. Central Command (CENTCOM) validates that the costs were incurred in support of Operation Enduring Freedom. The Office of the Secretary of Defense (OSD) Comptroller evaluates for reasonableness and alignment with previous claims. Our embassy in Islamabad is working closely with Pakistan to ensure that the process for substantiating Pakistan's claims for reimbursement is as thorough and transparent as possible. We continue to work with the PAKMIL to constantly improve CSF processes and efficiencies, while ensuring appropriate accountability and transparency for CSF.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

WEAPON SYSTEMS ACQUISITION REFORM ACT OF 2009

7. Senator MCCAIN. Admiral Mullen, the recently enacted Weapon Systems Acquisition Reform Act of 2009 focused on ensuring that DOD can execute contracts for major weapons on a fixed-price basis by helping the Department mete out, and understand, technological and development risk and get reliable cost estimates early in those programs' acquisition cycles. However, for fixed-price contracts to really work, requirements must be stable and clear. What specific steps has the Joint Staff taken, and do you anticipate will be taken, to help ensure the requirements of the recently enacted Weapon Systems Acquisition Reform Act of 2009 to implement much needed changes to the "requirements" process?

Admiral MULLEN. We agree that requirements must be stable and clear to support improved acquisition performance. However, we have reviewed many programs that have underperformed and the problem in these cases has not normally been with "Joint Requirements Oversight Council (JROC) approved" requirements, but rather with "derived" requirements. To address this issue, my basic plan is to:

- Get the requirement right before we start development.

- Require Program Managers to brief the Configuration Steering Board on the impacts of modifications to derived requirements before approving changes.

There are many areas where we can make process improvements to get the requirements right. These include:

- Modifying our requirements process to ensure that COCOMs take the lead in definition of new capability attributes. We will leverage the work of the Senior Warfighter Forums in this area and have mandated use of their attributes and metrics in our capability documents.
- Streamlining the capabilities based assessment (CBA) at the front end of the requirements process. Changes will help ensure the CBA provides a clear statement of operational requirements to support a subsequent Analysis of Alternatives and serves as a solid foundation for further evaluation of trades in cost, schedule, and performance.
- Continuing experiments to further involve the warfighter in the requirements development process. The JROC is conducting experiments that delegate requirements authority to functional combatant commands. The respective Combatant Command's Deputy Commander acts as Chair of the Joint Capabilities Board and serves as principal advisor to the JROC.
- Building a solid Requirements Manager Certification process to ensure that the people developing requirements have a better understanding of acquisition processes, and are aware of the potential impact of changing requirements once a program has been initiated.
- Reviewing the development and implementation of Key Performance Parameters. We are currently assessing the Net-Ready Key Performance Parameter (KPP) and the application of the Energy Efficiency KPP to ensure their impacts are well understood in current and future development efforts. Working with OSD, we will ensure that requirements parameters are properly defined, are testable and are achievable within the prescribed timeline.

We are committed to improving acquisition performance and have already implemented many of the specific reforms called for in the Acquisition Reform Act. This includes:

- Facilitating increased involvement in requirements development and decision making by our core customer, the Combatant Commanders.
- Requiring early coordination with OSD AT&L and the COCOMs on Initial Operational Capability timelines for new capability development efforts.
- Inviting additional OSD advisors to participate in JCB and JROC deliberations. This includes not only those mandated by Congress (AT&L, CAPE, and Comptroller) but also others that play a vital role in requirements definition to include DOT&E.

Once new requirements are developed, we will continue to work with OSD to ensure that they are properly translated to systems requirements and then are not changed without senior level review and approval.

8. Senator MCCAIN. Admiral Mullen, the Joint Capabilities Integration and Development Systems (JCIDS)—the process by which the Joint Staff defines acquisition requirements and evaluation criteria for future defense programs—is much too complex and needs to be revised. What principles do you think should guide specific revisions to the JCIDS?

Admiral MULLEN. Changes to our requirements process should be based on the following principles:

- Clear assignment of responsibility and accountability. The level of documentation required and the necessity to defend the analysis needs to reside with the advocate.
- Different capability needs require different levels of analysis and documentation. “Leap ahead” technology efforts require a diligent approach while merely replacing existing capability may allow more streamlined assessment.
- The development of Information Technology (IT) capabilities needs to be recognized as different and should be governed by processes that are able to leverage the most current technology without repeated trips through the requirements approval process.
- Administrative systems must require documents to move faster than the capability need.
- Requirements determination is more credible when informed by affordability and technical executability.

We have made incremental changes to JCIDS since its inception almost 7 years ago and just made a major change recently, in March 2009. These changes were

based on the principles above. We are still evaluating the effects of these modifications.

9. Senator MCCAIN. Admiral Mullen, do you have any specific ideas on how the JCIDS should be revised to help the Department manage requirements creep?

Admiral MULLEN. We have conducted numerous program reviews over the last few years, many as a result of poor cost and schedule performance. When the poor performance has been related to requirements “creep” it has generally not been due to changes in JROC level KPPs but rather as a result of changes at the “derived” requirements level. The root causes for the poor performance at this level of requirements oversight is not the result of people doing bad things they are trying to get it right. Rather it is about not managing derived requirements in a structured manner with the appropriate amount of oversight. We must require our Program Management, Acquisition Professional, Requirements Management and Financial Management Team to carefully translate JROC approved requirements into “derived” requirements and mandate a thorough review by all parties before allowing any changes. I believe JCIDS should be revised or canceled.

DEFENSE SCIENCE BOARD REPORT ON FULFILLING URGENT OPERATIONAL NEEDS

10. Senator MCCAIN. Admiral Mullen, in July 2009, the Defense Science Board published a report on DOD’s ability to fulfill urgent operational needs. It basically concludes that current approaches to implementing rapid responses to urgent needs are not sustainable. Citing several institutional barriers to rapid fielding of proven technologies, the report recommends formalizing a dual acquisition path by standing up a new organization and funding stream dedicated to rapid acquisition and fielding. What aspects of the report do you agree or disagree with?

Admiral MULLEN. I am in agreement with many of the report’s findings. Specifically,

1. All of DOD’s needs cannot be met by the same acquisition process.
2. Rapid is countercultural and will be undersupported in traditional processes.
3. Rapid responses must be based on proven technology and robust manufacturing processes.
4. An integrated triage process is needed.
5. Institutional barriers—people, funding, and processes—are powerful inhibitors to successful rapid acquisition and fielding of new capabilities.
6. Secretary of Defense should formalize a dual acquisition path, one rapid and one deliberate.

I am also in agreement with the establishment of a fund for rapid acquisition and fielding. I believe that the determination of an appropriate funding level and characterization of this fund should be more fully studied. I disagree with the report’s recommendation for establishment of a new agency—The Rapid Acquisition and Fielding Agency (RAFA). If the focuses of RAFA are on speed, utilizing existing technologies, and acquisition of a “75 percent solution”, then without creating another organizational layer, the existing Service and joint processes should be improved and more fully leveraged.

SERVICE-SPECIFIC RAPID ACQUISITION AUTHORITY

11. Senator MCCAIN. Admiral Mullen, over the last few months, there has been an increase by the Services and certain commands in using their Service-specific rapid acquisition authorities to field urgent capability in the Afghanistan theater. It is not surprising that there has been an increase in the use of those authorities—particularly with regard to close air support and intelligence-surveillance-reconnaissance capabilities. I have concerns, however, about the possibility that those Services and commands might not be going about the right way—that they may be using those authorities to develop and buy new, complex weapon systems for which the broader Defense Acquisition System (the “milestone system”) is better suited.

Our objective here is first and foremost that our servicemembers in theater have the weapons they need when they need it. But (however well-intended), attempts to acquire weapons systems with high technology or development risk or with substantial training or sustainment requirements in a way that frustrates the Department from fielding them as intended, does not serve our servicemembers. I am concerned that attempts by those Services and commands to use processes that were intended to satisfy discrete “unit-level” requirements to acquire larger, more complex weapons systems that should probably be pursued as larger programs-of-record, will just not work. That has repercussions on our servicemembers in theater.

Do you and your vice chairman (who chairs the JROC) share this concern? If so, how do you intend to address how the Services or commands use Service-specific rapid acquisition authorities to develop, buy, and field weapons systems that should probably be vetted (from a requirements perspective), developed, and procured under the broader defense acquisition systems?

Admiral MULLEN. We understand the concern and have worked to ensure that the needs of the Warfighter are met through the appropriate process, rapid or deliberate. While there is some risk inherent in having an alternate path for acquiring solutions, the Services and combatant commanders have done a credible job of ensuring that the needs requested through the rapid process meet the "urgent and compelling" standard intended by Congress. As the urgent need is being met, the sponsors have reviewed capabilities and, as appropriate, transitioned them to Programs of Record as additional development is dictated. This is an ongoing process. Recent examples include development of follow-on Counter Radio-controlled IED Electronic Warfare and Biometrics capabilities. Though solutions in both areas were initially developed through the JUONs process, continuing development is following a more deliberate path through JCIDS, all while still providing needed solutions for the current fight.

QUESTIONS SUBMITTED BY SENATOR ROGER F. WICKER

QUADRENNIAL DEFENSE REVIEW

12. Senator WICKER. Admiral Mullen, in your prepared testimony you address end strength questions regarding all four Services, and you also address acquisition reform and management. Do you expect the ongoing QDR to provide specific guidance or identify specific requirements for force structure within the Services?

Admiral MULLEN. The QDR will address emerging security challenges and explore ways to improve the balance of efforts and resources to achieve our near-term objectives, prepare for future contingencies, and institutionalize counterinsurgency and security force assistance capabilities. A key product of the QDR will be the Force Planning Construct, a framework used by the Department to plan for prevailing in current conflicts while defending the homeland, building partner capacity, deterring potential adversaries and if necessary, conducting large scale operations. This planning construct will provide a framework for identifying critical capabilities and capacity shortfalls and inform military Departments and Combatant Commands' resource planning processes for fiscal year 2012 and beyond. Early QDR insights were captured in an update to the Guidance for the Development of the Force, signed by the Secretary of Defense in July 2009 and incorporated into Service 2011 budget submissions. The final QDR report is expected to provide Services enough specificity and strategic focus to develop their program recommendations.

13. Senator WICKER. Admiral Mullen, do you expect the QDR to address the Navy's stated requirement for 313 ships?

Admiral MULLEN. Not in direct terms. The QDR is not complete, and is planned for a February 2010 submission, but as a broad, overarching review, the QDR will provide guidance to each of the Services by means of a strategic framework for developing annual programs that address today's conflicts and tomorrow's threats. The Services, in turn, will develop program recommendations for specific capabilities and capacities necessary to meet these future challenges.

14. Senator WICKER. Admiral Mullen, through the QDR process, DOD works to identify the projected threats to national security and the resources needed to defend against them. Will the QDR address the threats DOD identified but chose not to resource due to fiscal or other constraints, and if so, will it disclose in what areas we are assuming risk?

Admiral MULLEN. The QDR is not complete, and is planned for a February 2010 submission, but it will develop the framework to meet projected future threats and force requirements within a resource-informed context. This framework will influence Service programs that will be reviewed within a resource-constrained environment. Risk will be assessed in a joint context and informed by those resource constraints. I will comment on risk in the mandated Chairman's QDR Assessment.

QUESTIONS SUBMITTED BY SENATOR DAVID VITTER

AFGHANISTAN

15. Senator VITTER. Admiral Mullen, you recently expressed concerns about the “serious and deteriorating” situation in Afghanistan. General Stanley McChrystal recently submitted a new assessment of the situation there that emphasizes a change in strategy, and he is soon expected to request thousands of additional troops. What is your current understanding of the goals of our efforts in Afghanistan?

Admiral MULLEN. The principle goal of our efforts in Afghanistan and Pakistan was outlined by the President in his 27 March policy speech. The President gave us a clear mission: disrupt, dismantle, and defeat al Qaeda and its extremist allies and prevent Afghanistan from becoming a safe haven again.

General McChrystal concluded in his recent assessment, and I concur, that we need to change our operational approach in order to be successful. We must become more population-centric in our approach and less enemy-centric. The goals of General McChrystal’s new approach are to change the operational culture of the International Security Assistance Force (ISAF) to focus on protecting the people, understanding their environment, and building relationships with them, and transforming ISAF processes to be more operationally efficient and effective, creating more coherent unity of command within ISAF, and fostering stronger unity of effort across the international community. Ultimately, the objective is to defeat the Taliban insurgency and reduce the threat of al Qaeda (AQ) being able to use the region to plan further attacks on the United States.

The enemy in Afghanistan is not the insurgent; the enemy is fear. If we can remove the fear under which so many Afghans live, if we can supplant it with security and good governance, then we can provide the people of Afghanistan an alternative to Taliban rule. If they have an alternative to Taliban rule, they will choose it. The majority of Afghans have indicated that they do not support the Taliban. It is through fear and intimidation that the Taliban influence the people and garner support for their insurgency. Recognizing that the ideology shared by al Qaeda and the Taliban knows no border and that this area remains the epicenter of violent Islamic fundamentalism, an Afghanistan resistant to extremism and free of such sanctuary, will help bolster the efforts of neighboring Pakistan to follow suit. On the other hand, if the Taliban succeed in governing at the state level—as they have already succeeded in many local areas—al Qaeda could reestablish the safe havens they enjoyed in Afghanistan at the end of the last decade and the internal threat to Pakistan by extremism will only worsen. Such a sanctuary would pose a regional as well as a global threat to security.

16. Senator VITTER. Admiral Mullen, as specifically as possible, can you define what a successful completion of the mission in Afghanistan will entail?

Admiral MULLEN. I see a successful completion of the mission as a stable Afghan Government which is capable of providing security and basic services to its citizens.

Increasing the capacity of Afghan National Security Forces (ANSF) to provide security to the Afghan people is a critical component of this effort. The ANSF will eventually replace ISAF forces and security mission for their country. An ANSF that can manage the insurgency and provide sustained security would be one of the indicators that our mission in Afghanistan is complete. Another key indicator is a Government of the Islamic Republic of Afghanistan (GIROA) that can address the corruption and ineffectiveness of national, district and provincial level leadership and governance.

We also support Afghan counterterrorism measures that target specific al Qaeda members and their support networks. As the Afghan Government strengthens its ties to its people it will help set conditions that are needed to prevent the return of al Qaeda extremists.

All elements of national power—diplomatic, informational, military, and economic—must be brought to bear for successful completion of our mission. This requires better civil-military coordination and a significant change in the management, resources, and focus of our foreign assistance. Our approach to defeating al Qaeda must be one that builds trust with Afghans and Pakistanis while applying all instruments of power. We require these diverse instruments to deny sanctuary to al Qaeda and the Taliban and to generate a stable and secure Afghanistan which will prevent al Qaeda’s return after the withdrawal of coalition forces while we sustain partnership and commitment to political and economic development in that nation. We can accomplish the mission we’ve been assigned, but we will need resources

matched to the strategies, civilian expertise matched to military capabilities and the continued support of the American people.

Success requires governance that is acceptable to the Afghan people. It is not unreasonable to expect that the GIRoA can eventually develop the capacity to address the basic needs of the people.

17. Senator VITTER. Admiral Mullen, do you intend to support General McChrystal's expected request for additional troops?

Admiral MULLEN. I have provided my best military advice to the Secretary of Defense and to the President with respect to General McChrystal's resource request. However, as the Afghanistan-Pakistan strategy discussions are ongoing, and the President has not yet made a decision, I do not feel it is appropriate at this time to get in front of his decisionmaking process.

18. Senator VITTER. Admiral Mullen, General McChrystal's assessment indicates that U.S. strategy in Afghanistan will shift from primarily fighting the Taliban to increasing security for civilians, combating corruption in local governments, and increased training of Afghan security forces. General McChrystal has also begun to implement new strategies geared toward limiting civilian casualties, particularly by limiting the use of airstrikes. In what ways does the overall shift in strategy reflect a different understanding of our ultimate objectives in Afghanistan?

Admiral MULLEN. Doctrinal counterinsurgency strategy recognizes that success is not based solely on the insurgents. Success is achieved when the population rejects the insurgent and the root causes that drive the people to support the insurgent cause. General McChrystal notes this in his assessment and that it supports our ultimate objective in Afghanistan.

By focusing on limiting civilian casualties, General McChrystal is addressing one of the populations' most significant concerns. Any time an innocent person is killed our mission becomes more difficult and our men and women in Afghanistan understand this. In addition to the tragic loss of life, all of the leadership is aware of the negative repercussions that result from civilian casualties. As such, General McChrystal's new tactical directive provides guidance to subordinate commanders, and the force, on controlled use of munitions and tactical techniques to better safeguard the population and reduce civilian casualties, which is our moral and legal responsibility pursuant to international obligations under the Law of War. There has been no change to our rules of engagement in Afghanistan, and there is nothing in the tactical directive that precludes a commander's right to protect his forces from imminent threats.

I recognize, as does General McChrystal, that the carefully controlled and disciplined employment of force entails some risks to our troops—we must work to mitigate that risk wherever possible, but excessive use of force resulting in an alienated populace will result in increased risk to the accomplishment of our mission. I have every confidence in the ability of our forces to operate effectively and to succeed in this challenging environment under the current guidelines.

Ultimately, keeping Afghanistan from serving as a safe haven for al Qaeda in the long term will require a legitimate government that has the support of the majority of the Afghan people.

19. Senator VITTER. Admiral Mullen, are you concerned that this shift in strategy might limit the ability of our troops to aggressively pursue Taliban forces and other combatants in Afghanistan?

Admiral MULLEN. I do not think that General McChrystal's guidance precludes our troops from effectively dealing with the enemy. An effective counterinsurgency strategy has a kinetic element to it. It also has a counterterrorism element to it and, given his background, I believe General McChrystal understands this better than most. When our troops are in contact they can ask for whatever they need and I fully expect them to receive every asset that is available.

Our new operational focus, as outlined in General McChrystal's assessment report, is population-centric. This approach is designed to separate the enemy from the population, and recognizes that the good will of the Afghan people is a strategic center of gravity. In carrying out this new approach, our forces will continue to aggressively pursue enemy forces. Aggressive pursuit is not always kinetic in nature. Developing better relationships with our Afghan partners, engaging key leaders, and ensuring good governance are all important means of pursuing and defeating the enemy.

20. Senator VITTER. Admiral Mullen, are you optimistic about efforts to build civic infrastructure and pursue long-term economic development in Afghanistan, given that nation's long history of political instability and turmoil?

Admiral MULLEN. I am realistic and understand the troubled history of Afghanistan. We need to be patient, and adjust our expectations to the long-term instead of thinking we can make substantive changes in the short-term. It takes time to rebuild government institutions and commerce in a country that has endured what Afghanistan has over the last 30 years. If the Government of the Islamic Republic of Afghanistan can adequately address the insurgency and our strategy is properly resourced then I believe the country can make progress. This begins by providing the population with enduring security so that the Afghan people can improve their everyday lives. Improvements in security, coupled with economic development at the local level, set the conditions necessary to enable Afghans to reject the Taliban as a source of legitimate authority.

Afghanistan has a weak central government with whom we are working to help build legitimacy, competence and capacity. We must focus our efforts now on key ministries in Kabul such as Defense, Interior, Intelligence, Finance, and Agriculture to ensure we build capacity in the institutions that are most critical for current and long-term stability. In addition to strengthening these ministries we must increase capacity at the provincial, district, and sub-district levels where governments suffer from the same ills as the central government. The Afghan Government—at all levels—must be able to provide basic services if it is to gain the confidence and support of the Afghan people.

I agree with General McChrystal that the President's regional civil-military strategy gives us the best opportunity for stabilizing Afghanistan, building governance capacity, developing civic infrastructure, and providing for that country's long-term economic development.

21. Senator VITTER. Admiral Mullen, considering Afghanistan's role as a leading exporter of narcotics, can we realistically pursue viable agricultural alternatives and increased law enforcement as a means of reducing the impact of the drug trade on Afghanistan's instability?

Admiral MULLEN. There is no one simple way of attacking the narcotics problem in Afghanistan. This is a complex problem that must be dealt with holistically. We recognize the narco-terror nexus, and as such, we are developing a whole of government approach. Our counter-narcotics plan is being developed with interagency coordination. The plan focuses on breaking the nexus between drug traffickers and the insurgents, reducing drug production and processing, interdiction, and providing realistic economic alternatives for farmers currently engaged in poppy cultivation.

QUESTION SUBMITTED BY SENATOR SUSAN COLLINS

EQUIPMENT IN AFGHANISTAN

22. Senator COLLINS. Admiral Mullen, while at Camp Leatherneck I was fortunate enough to have lunch with some marines from Maine who told me that when they arrived in Afghanistan in May, they did not have all of the equipment they needed for some time. This was very troubling news. What is being done to ensure that our troops are fully equipped when they are deployed?

Admiral MULLEN. Ensuring that servicemembers are deployed with their required combat equipment remains a critical Service and combatant commander priority. Properly equipping forces involves coordinating equipment and personnel arrival across strategic and operational logistics infrastructure.

In order to properly equip deploying units and meet the established arrival date, the Services, U.S. Transportation Command (TRANSCOM), and CENTCOM continue to coordinate the arrival of personnel and equipment in Afghanistan. In the case of the Marines, challenges associated with the deployment were based on conscious decisions by the Marine Corps to globally source equipment and personnel, bypassing normal deployment procedures in order to rapidly develop the largest initial combat capability possible.

Since the Marines' deployment to RC-South, strategic logistics infrastructure and performance improvements have been made in both the Central Asian States and Pakistan. Since the initial deployment of the Marines, CENTCOM, European Command, and TRANSCOM matured the Northern Distribution Network that includes both air and ground lines-of-communication through the Caucasuses, Russia, and the Central Asian States. Furthermore, the capability of Pakistan ground line-of-communications have expanded and become more dependable.

Operational logistics infrastructure in Afghanistan has also improved significantly since the initial Marine deployments into RC–South. There are a total of eight airfields in RC–South that have been or are being improved in order to increase logistics support to the forces deployed including airfield expansions at Forward Operating Base Dwyer and Camp Bastion (Leatherneck). Enhancements of route security and expansion of the road network continues into RC–South. Future expansion of logistics infrastructure include the expansion of Shindand and Herat Airfields in RC–West and the continued enhancement of security and expansion of the road network in RC–South and RC–West.

[The nomination reference of ADM Michael G. Mullen, USN, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
May 20, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment as the Chairman of the Joint Chiefs of Staff and appointment to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., sections 152 and 601:

To be Admiral

ADM Michael G. Mullen, 9509.

[The biographical sketch of ADM Michael G. Mullen, USN, which was transmitted to the committee at the time the nomination was referred, follows:]

TRANSCRIPT OF NAVAL SERVICE FOR ADM MICHAEL GLENN MULLEN, USN

04 Oct. 1946 Born in Los Angeles, CA
05 June 1968 Ensign
05 June 1969 Lieutenant (junior grade)
01 July 1971 Lieutenant
01 Oct. 1977 Lieutenant Commander
01 June 1983 Commander
01 Sep. 1989 Captain
01 Apr. 1996 Rear Admiral (lower half)
05 Mar. 1998 Designated Rear Admiral while serving in billets commensurate with that grade
01 Oct. 1998 Rear Admiral
21 Sep. 2000 Designated Vice Admiral while serving in billets commensurate with that grade
01 Nov. 2000 Vice Admiral
28 Aug. 2003 Admiral, Service continuous to date

Assignments and duties:

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by ADM Michael G. Mullen, USN, in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR–228
Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Michael G. Mullen.
2. **Position to which nominated:**
Chairman of the Joint Chiefs of Staff.
3. **Date of nomination:**
May 20, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
October 4, 1946; Hollywood, CA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Deborah Morgan Mullen.
7. **Names and ages of children:**
LT John Stewart Mullen, USN, 30 years old.
LT Michael Edward Mullen, USN, 28 years old.
8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.
None.
9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corpora-

tion, firm, partnership, or other business enterprise, educational, or other institution.

None.

10. **Memberships:** List all memberships and offices held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Advisory Council to the Board of Governors of the American National Red Cross.

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognition for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

National Order of the Legion of Honor (France) awarded on May 12, 2007.

Grand Officer of the Order of the Italian Republic (Italy) awarded on April 14, 2007.

Honorary Doctor of Science from Grove City College.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MICHAEL G. MULLEN.

This 1st day of May, 2009.

[The nomination of ADM Michael G. Mullen, USN, was reported to the Senate by Chairman Levin on September 24, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on September 25, 2009.]

**NOMINATIONS OF CHRISTINE H. FOX TO BE
DIRECTOR OF COST ASSESSMENT AND PRO-
GRAM EVALUATION, DEPARTMENT OF DE-
FENSE; FRANK KENDALL III TO BE DEPUTY
UNDER SECRETARY OF DEFENSE FOR AC-
QUISITION AND TECHNOLOGY; GLADYS
COMMONS TO BE ASSISTANT SECRETARY

ENVIRONMENT**

THURSDAY, OCTOBER 22, 2009

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:37 a.m. in room SH-216, Hart Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Reed, Udall, Hagan, Burris, McCain, Inhofe, Sessions, Chambliss, and Thune.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Terence K. Laughlin, professional staff member; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; Jason W. Maroney, counsel; Roy F. Phillips, professional staff member; Russell L. Shaffer, counsel; and William K. Sutey, professional staff member.

Minority staff members present: Joseph W. Bowab, Republican staff director; Pablo E. Carrillo, minority investigative counsel; Lucian L. Niemeyer, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Paul J. Hubbard and Jennifer R. Knowles.

Committee members' assistants present: Carolyn A. Chuhta, assistant to Senator Reed; Christopher Caple, assistant to Senator Bill Nelson; Patrick Hayes, assistant to Senator Bayh; Gordon I. Peterson, assistant to Senator Webb; Roger Pena, assistant to Senator Hagan; Lindsay Kavanaugh, assistant to Senator Begich; Roosevelt Barfield, assistant to Senator Burris; Anthony J. Lazarski

and Jared Young, assistants to Senator Inhofe; and Lenwood Landrum, assistant to Senator Sessions.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets today to consider the nominations of: Christine Fox, to be Director of Cost Assessment and Program Evaluation (CAPE); Frank Kendall III to be Deputy Under Secretary of Defense for Acquisition and Technology; Gladys Commons to be Assistant Secretary of the Navy for Financial Management and Comptroller; and Terry Yonkers to be Assistant Secretary of the Air Force for Installations and Environment.

We welcome our nominees and their families to today's hearing. Senior Department of Defense (DOD) officials put in long and often uncertain hours. We appreciate the sacrifices that our families are willing to make to serve our country. Their families deserve equal gratitude for the support that they provide that is so essential to the success of these officials.

Each of our nominees has a distinguished background. Ms. Fox is the President of the Center for Naval Analyses (CNA), the Navy's Federally-Funded Research and Development Center, where she has worked as a defense analyst for the last 28 years.

Mr. Kendall has served as DOD's Director of Tactical Warfare Programs and as Assistant Deputy Under Secretary of Defense for Defense Systems, before returning to the private sector, where he consults on strategic planning, engineering management, and technology assessment issues.

Ms. Commons has served DOD as a budget analyst and comptroller for more than 30 years, most recently as Comptroller of the Military Sealift Command, Principal Deputy Assistant Secretary of the Navy for Financial Management, and Comptroller of the Marine Corps Research, Development, and Acquisition Command.

Mr. Yonkers worked for the Air Force for 22 years, serving as Deputy Assistant Secretary for Environment, Safety, and Occupational Health, and as Director of Environmental Programs for the Air Force Base Conversion, before returning to the private sector to advise clients on engineering, energy, and environmental programs beginning in 2002.

If confirmed, each of our nominees will play a critical role in the management of DOD and the Military Services. The Director of CAPE is a new position that we established in the Weapons Systems Acquisition Reform Act that we enacted earlier this year. We established the position of CAPE Director to ensure that the budget assumptions underlying acquisition programs are sound and that the Department faces up to the real costs of unrealistic requirements. We and the public have had our fill of cost overruns caused by overly optimistic assumptions at the beginning of programs.

To be successful in this position, the new director will have to be an independent truth-teller in the mold of the Director of the Congressional Budget Office and DOD's Director of Operational Test and Evaluation.

The Deputy Under Secretary of Defense for Acquisition and Technology is the number two official in the office responsible for

managing an acquisition system that spends about \$400 billion a year and too often falls short of what is needed.

The Assistant Secretary of the Navy for Financial Management and Comptroller is responsible for managing the Navy's budget and for placing the Department on the road to an auditable financial statement.

The Assistant Secretary of the Air Force for Installations and Environment is responsible for managing Air Force bases and test ranges and for addressing such difficult issues as energy conservation and environmental encroachment.

These are all formidable tasks that play an essential role in the successful operation of DOD.

Senator McCain.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you, Mr. Chairman.

I join you in welcoming our nominees and their families, and I thank them for their willingness to serve in these key leadership positions. Mr. Kendall, the nominee to be the Deputy Under Secretary of Defense for Acquisition and Technology, has broad experience as an Active Duty Army officer, as an acquisition official in the Office of the Under Secretary of Defense for Acquisition, and in the private sector. Ms. Fox, the first nominee for the position of Director of CAPE, is currently the President of the CNA. She has worked for over 25 years as a defense programs evaluator and research manager with a focus on operations, cost, and acquisition, manpower, readiness and technology issues and programs.

If Mr. Kendall and Ms. Fox are confirmed—and I am confident that they will be—they will each play a vital role in implementing the provisions of the Weapons Systems Acquisition Reform Act of 2009. This legislation places singular emphasis on improving the chances for success by obtaining reliable independent cost estimates and assessments of technological maturity early, before the Department makes decisions committing billions of taxpayers' dollars to buying new weapons systems. The Act, which became law in May of this year, also gives the Department various tools and enhanced capabilities in the areas of systems engineering and developmental testing.

I'll be interested in hearing your evaluation of the methods available to you to successfully fulfill your responsibilities and address the problem of out of control cost growth in our largest, most expensive weapons systems.

Mr. Yonkers, the nominee to be the Assistant Secretary of the Air Force for Installations, Environment, and Logistics, has over 20 years of civilian service in the Air Force in positions relating to environmental engineering and compliance and closure.

The Air Force, like all the Services, is facing enormous challenges in balancing its requirements for operational readiness and wartime support with the objectives of military construction, infrastructure management, environmental compliance, and enhanced quality of life for its personnel. We appreciate the experience and energy you will bring to this position.

Similarly, Ms. Commons, the nominee to be the Navy Comptroller, has extensive experience in financial management in the

Department of the Navy, including service as a Principal Deputy Assistant Secretary of the Navy for Financial Management and Comptroller for over 6 months, serving as the Acting Assistant Secretary. I thank you for coming out of retirement to serve our sailors and marines once again.

I look forward to the testimony of the nominees today. I again thank them and their families who are here today for their service to the Nation.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

I am going to now call on Senator Reed for an introduction.

STATEMENT OF HON. JACK REED, U.S. SENATOR FROM THE STATE OF RHODE ISLAND

Senator REED. Thank you very much, Mr. Chairman.

I'm very pleased to introduce Frank Kendall. Frank and I have been classmates. We've known each other, I've calculated, about 42 years. Frank has served as an air artillery officer in the U.S. Army. He's commanded a battery, and I think that gives him a good starting point, because essentially all he does ultimately affects the young soldiers, sailors, airmen, and marines that serve us so well. Having led some of those young people years ago, that gives you a good perspective.

But as others have pointed out, he has had a distinguished career in civilian defense operations, as well as serving in DOD as a civilian. I can't think of anyone who has the experience and the capabilities to do this job. Welcome, Frank.

Mr. KENDALL. Thank you, Senator Reed.

Chairman LEVIN. Thank you very much, Senator Reed.

Senator Burriss has asked that his statement be made a part of the record and we'll insert that here.

[The prepared statement of Senator Burriss follows:]

PREPARED STATEMENT BY SENATOR ROLAND W. BURRIS

Thank you, Mr. Chairman, and welcome nominees.

I am again pleased with the nominations that President Obama has chosen to run these essential positions with our Government. The President and I agree that the candidates before us today show the dedicated leadership that is so integral to serving the American people. The Nation is looking to you nominees to play a major role in redirecting our efforts to benefit and protect all of our citizens—including servicemembers and taxpayers alike.

Now, I would like to take a moment to commend the President on his selection of these nominees and I look forward to these nominations moving quickly as we work on the ambitious agenda we have all undertaken. There is an opportunity for our partnership to foster real change and I look forward to our mutual cooperation for the benefit of this great Nation.

Thank you, Mr. Chairman.

Chairman LEVIN. There are also two letters of introduction which we'll make part of the record: a letter from Senator Warner relative to Ms. Fox and a letter from Senator Mikulski relative to Mr. Yonkers.

[The information referred to follows:]

STATEMENT OF SENATOR MARK WARNER AT THE
CONFIRMATION HEARING FOR MS. CHRISTINE FOX TO BE
DIRECTOR, COST ANALYSIS AND PROGRAM EVALUATION

Chairman Levin, Ranking Member McCain, distinguished members of the committee, it is my distinct privilege to express my support for the President's nominee for Director, Cost Analysis and Program Evaluation, and a fellow Virginian, Ms. Christine Fox. With Christine today is her husband of 21 years, Dr. Alan Brown.

Mr. Chairman, as you know the defense acquisition process faces enormous challenges. We must work together to find better methods for procuring weapons for our Armed Forces. The good news is that we have found the right person for the job. Christine will take a sharp pencil to this task in her new position as the Director, Cost Analysis and Program Evaluation.

I know that because I have seen Christine's work first-hand, when I served on CNA's Board of Trustees. She was then the President of the Center for Naval Analyses, a Federally Funded Research and Development Center for the Department of the Navy. Christine impressed me then as someone who had an extensive depth of knowledge on many of the most important defense issues of the time.

Not only was she considered a top-flight analyst, a trade she honed as an operations analyst focusing on tactics development and test and evaluation, but she was clearly a leader who was respected throughout the organization. It was that tremendous work ethic and reputation that resulted in Christine being promoted within the organization to serve as Vice President and Director of CNA's Operations Evaluation Group, the Division responsible for all of CNA's analytic support to the operating forces and Combatant Commanders, and later President of CNA.

Mr. Chairman and members of the Committee, Christine is an individual of the highest caliber, and I am confident that she will bring the same level of integrity, leadership, and openness to this important position as she has demonstrated at the Center for Naval Analyses.

Mr. Chairman, Christine will represent our nation well, and I offer my strongest recommendation for her nomination.

1338

BARBARA A. MIKULSKI
MARYLAND

United States Senate
WASHINGTON, DC 20510-2003

October 19, 2009

The Honorable Carl Levin
Chairman
Senate Committee on Armed Services
Washington, DC 20510

The Honorable John McCain
Ranking Member
Senate Committee on Armed Services
Washington, DC 20510

Dear Chairman Levin and Senator McCain:

I am writing to support the confirmation of Mr. Terry A. Yonkers as Assistant Secretary of the Air Force for Installations, Environment and Logistics. I have three criteria that I use to evaluate executive branch nominees: competence, integrity, and commitment to the core mission of the Department. Based on these criteria, I support Mr. Yonkers to be our next Assistant Secretary of the Air Force for Installations, Environment and Logistics.

Mr. Yonkers has shown his competence and commitment to mission throughout his distinguished career. He has been a dedicated public servant with more than 22 years with the Department of the Air Force. His experience with the Air Force in developing strategic policy for environmental issues and directing the Air Force's Base Realignment and Closure Agency has given him the intimate knowledge of Air Force military installations and issues. He is well-poised to address and act upon Air Force installation and environmental concerns.

Mr. Yonkers has demonstrated his ability to manage a diverse team of civilians and career military and has shown how his leadership can make a tangible impact. His understanding of the DOD planning, programming, budgeting and resource policy will enable him to hit the ground running in this important appointment. Mr. Yonkers' more recent experience with private industry with ARCADIS, Inc. brings efficiencies and innovation to the Department of the Air Force in this time to tightening budgets and resources.

His confirmation will help enable the United States Air Force to address many of today's pressing questions with the leadership of a seasoned professional who is well-versed in shaping policy for infrastructure, environmental, safety and occupational health. I look forward to working with Mr. Yonkers as the Assistant Secretary of the Air Force for Installations, Environment and Logistics and have confidence in his honesty, his integrity, and ability to effectively manage the wide-ranging needs of our Air Force installations while keeping a close eye on environmental concerns. I look forward to his meeting those challenges and his leadership in the Air Force.

Sincerely,

Barbara A. Mikulski
United States Senator

Chairman LEVIN. I will now call on our nominees. First we'll call on Ms. Fox, and as each of you give us your opening comments feel free, if you wish, to introduce your family or anybody who is here with you. Ms. Fox.

STATEMENT OF CHRISTINE H. FOX, NOMINEE TO BE DIRECTOR OF COST ASSESSMENT AND PROGRAM EVALUATION, DEPARTMENT OF DEFENSE

Ms. FOX. Thank you, Senator. Chairman Levin, Ranking Member McCain, and distinguished members of the Senate Armed Services Committee. Thank you for the opportunity to appear before you today. I am grateful that President Obama had the confidence in

me to nominate me for the position of Director, CAPE. I also want to thank Secretary Gates for his support of my nomination. If confirmed, I would be very honored to serve in this position.

Even though he could not be here today, I would like to thank Senator Warner for providing his very kind introductory remarks for the record. Senator Warner's personal endorsement means a great deal to me.

My husband, Dr. Alan Brown, is here with me today. I want to introduce him to you and give him my special thanks. He has always given me strong support and encouragement, and without that support I would not be here today.

As you have made clear in the Weapon Systems Acquisition Reform Act of 2009, you believe that high-quality, independent analysis should play an important role in ensuring that weapons systems are procured in an effective and efficient way. If confirmed, I would work to ensure that high-quality analyses are produced and available to inform the important decisions in the acquisition process. I have served as a defense analyst for a number of years, and if confirmed, I would draw from those years of experience to help achieve the goals of your legislation and to assist the Secretary of Defense.

Thank you again for the opportunity to appear before you today. I will do my best to respond to your questions.

Chairman LEVIN. Thank you very much, Ms. Fox.

Mr. Kendall.

STATEMENT OF FRANK KENDALL III, NOMINEE TO BE DEPUTY UNDER SECRETARY OF DEFENSE FOR ACQUISITION AND TECHNOLOGY

Mr. KENDALL. Thank you, Mr. Chairman. Chairman Levin, Ranking Member McCain, and distinguished members of the Senate Armed Services Committee. Thank you for the opportunity to appear before your committee today. I am grateful for the confidence that President Obama has shown in me by nominating me to be the Deputy Under Secretary of Defense for Acquisition and Technology. I want to thank Secretary Gates, Deputy Secretary Lynn, and Under Secretary Carter for their support for my nomination. If confirmed, I will be deeply honored to serve.

I'd also like to thank my classmate from West Point, Senator Reed, for his support and his very kind introduction today.

Finally, I would like to thank my family for their support. Elizabeth Halpern, my wife, is with me today and I want to introduce her to you and offer her my special thanks and appreciation. My two sons are also here and I want to thank Scott and Eric Kendall for all their support and patience, particularly during my earlier time in the Pentagon from 1986 to 1994.

Eric is a member of the National Guard and an Iraq war veteran. If I am fortunate enough to be confirmed, he and his fellow soldiers, sailors, airmen, and marines will be foremost in my thoughts as I confront the Department's acquisition problems.

I am keenly aware of the high priority that this committee, Congress, the President, and the Secretary of Defense have placed on improving the results achieved by the defense acquisition system. The United States of America has the most well equipped military

in the world, but I believe that we can do much better at equipping and sustaining our forces. I believe that my background in operational units, in defense research and development organizations, in the Office of the Secretary of Defense (OSD), and the defense industry have all prepared me to make a contribution to achieving this goal.

But I have no illusions about the magnitude of the challenge that the Department faces. If the Senate confirms me in this position, I will make every effort to live up to the confidence that will have been placed in me.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Mr. Kendall.

Ms. Commons.

STATEMENT OF GLADYS COMMONS, NOMINEE TO BE ASSISTANT SECRETARY OF THE NAVY FOR FINANCIAL MANAGEMENT AND COMPTROLLER

Ms. COMMONS. Mr. Chairman, distinguished members of the committee: It is an honor and privilege to appear before you today as President Obama's nominee for Assistant Secretary of the Navy for Financial Management and Comptroller. Thank you for the opportunity to be here today. I also want to thank Secretary Ray Mabus for his confidence in me. If confirmed, I will be honored to serve as the Assistant Secretary of the Navy, Financial Management and Comptroller.

I want to thank my family for their support. My husband of almost 40 years, Bill, is here today. My sons Billy and James and my daughter-in-law Nicole are also here. My daughter Krystal, a first year law student at Columbia University, could not be here today, but I want to thank her for being an important part of my life.

The duties and responsibilities of the Assistant Secretary of the Navy for Financial Management and Comptroller are significant. I have served in various financial management positions within the Department of the Navy, including almost 8 years as Principal Deputy Assistant Secretary. I have and will take seriously the public trust and stewardship of the resources committed to the Department.

If confirmed, I will work within the Department and with the Under Secretary of Defense-Comptroller to obtain the resources our sailors, marines, and civilians need to meet the national security requirements placed upon them by this Nation.

I understand the need to develop budgets that are balanced and supported by accurate, timely, and reliable data. I will support the goals and initiatives Secretary Mabus has established for the Department.

In closing, I am honored to have been nominated for this position. If confirmed, I will do my best to perform the responsibilities of this position.

Thank you.

Chairman LEVIN. Thank you very much, Ms. Commons.

Mr. Yonkers.

STATEMENT OF TERRY A. YONKERS, NOMINEE TO BE ASSISTANT SECRETARY OF THE AIR FORCE FOR INSTALLATIONS AND ENVIRONMENT

Mr. YONKERS. Thank you, Mr. Chairman, Ranking Member McCain, and distinguished members of the Senate Armed Services Committee. It's a tremendous honor for me to be here today and be the nominee for the position of the Assistant Secretary of the Air Force for Installations and Environment. I want to thank President Obama, Secretaries Gates and Donley, for their trust and confidence in me to carry out the very important roles and responsibilities of this position.

I would like to thank Senator Mikulski for her very kind remarks and introductions.

Finally, I want to thank my wife and my family for their undying support and understanding. If I may, Mr. Chairman, I brought a gaggle this morning, so I would like to introduce: my wife of almost 40 years, Mari; my daughter Tammy; my son-in-law John Lightle; and my granddaughters Mearah and Auri, who bring real meaning and balance to my life. My son Timmothy serves with the Department of Homeland Security down at Jacksonville, FL, and was unable to be here today.

I'm deeply humbled and honored by this nomination. In my mind there is no greater calling than public service. The 22 years I spent in the service of the Air Force were the most gratifying and fulfilling time of my professional life.

The installation and environment challenges the Air Force faces today are many and diverse. Things such as energy security, environmental security, climate change, quality of life and safety of our service men and women are of paramount importance.

If confirmed, I look forward to working with Secretary Donley, General Schwartz, the entire OSD and Air Force team to meet these challenges and do everything I can to make sure all the members of the Air Force, total force, enjoy quality facilities and a decent quality of life.

As I thought about reentering public service, my friends and family asked me: Why do you want to do this, especially having been in the Pentagon during the events of September 11, 2001. For me, sir, it's very clear: because I want to serve and I want to try and make a difference.

I thank you, Mr. Chairman, for the opportunity to address the committee and will attempt to answer any of the questions that you have for me.

Chairman LEVIN. Thank you all very much.

There's now a set of standard questions which we ask of all nominees, and I would ask you to answer together. Have you adhered to applicable laws and regulations governing conflicts of interest?

Ms. FOX. Yes.

Mr. KENDALL. Yes.

Ms. COMMONS. Yes.

Mr. YONKERS. Yes, sir.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Ms. FOX. No.

Mr. KENDALL. No.

Ms. COMMONS. No.

Mr. YONKERS. No, sir.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Ms. FOX. Yes.

Mr. KENDALL. Yes.

Ms. COMMONS. Yes.

Mr. YONKERS. Yes, sir.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to Congressional requests?

Ms. FOX. Yes.

Mr. KENDALL. Yes.

Ms. COMMONS. Yes.

Mr. YONKERS. Yes.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Ms. FOX. Yes.

Mr. KENDALL. Yes.

Ms. COMMONS. Yes.

Mr. YONKERS. Yes, sir.

Chairman LEVIN. Do you agree if confirmed to appear and testify upon request before this committee?

Ms. FOX. Yes.

Mr. KENDALL. Yes.

Ms. COMMONS. Yes.

Mr. YONKERS. Yes.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Ms. FOX. Yes.

Mr. KENDALL. Yes.

Ms. COMMONS. Yes.

Mr. YONKERS. Yes.

Chairman LEVIN. Let's try a 7-minute first round for questions.

Ms. Fox, I think you would agree and have already said that DOD's systematic use of overly optimistic cost and schedule estimates has been one of the causes of the poor performance of major defense acquisition programs. My question is this, if confirmed, will you be tough, independent, and ready to tell senior DOD officials how much programs are really going to cost, regardless of how unpopular your advice may be.

Ms. FOX. Yes, Mr. Chairman, I will.

Chairman LEVIN. The Weapons Systems Acquisition Reform Act places great emphasis on making early tradeoffs between costs, schedule, and performance so that we do not lock in what Secretary Gates has called "exquisite requirements" early in the process and then pursue them without regard to cost implications.

One of the ways that we sought to address this issue was by requiring the new CAPE Director to participate in the requirements-

setting process of the Joint Requirements Oversight Council (JROC) for the purpose of ensuring that JROC is aware of the cost implications of the choices that it makes. Are you familiar with that requirement, Ms. Fox?

Ms. FOX. Yes, sir, I am.

Chairman LEVIN. Will you ensure that JROC is aware of the cost consequences of the requirements choices, so that we can establish programs that are realistic both in terms of technology and cost?

Ms. FOX. Yes, Mr. Chairman, I will.

Chairman LEVIN. The Government Accountability Office (GAO) has estimated that operating and support costs account for 60 to 70 percent of the total life cycle cost of a weapons system, far more than the initial acquisition cost. Although the Department spends hundreds of billions of dollars on operating and support costs, it still lacks effective systems for estimating, tracking, and controlling such costs.

Ms. Fox, what steps would you take if confirmed to address that problem?

Ms. FOX. Mr. Chairman, I am aware that operating and support costs account for a major part of the life-cycle costs and, if confirmed, I would conduct an assessment of the analytic tools that are available today to estimate operating and support costs. I also would work with the CAPE organization and the Services to develop better ways to analyze and illuminate the costs associated with operations and support.

Chairman LEVIN. Now, the Quadrennial Defense Review (QDR) will define the Department's force modernization plans. It's scheduled to be completed early next year. The QDR is also expected to reach a balance between the Department's needs for current and future capabilities and between conventional operations and irregular, unconventional, and stability type operations.

Ms. Fox, what role do you expect to play, if confirmed, in the final development of the QDR?

Ms. FOX. Mr. Chairman, it is my understanding that the CAPE organization has provided analysis to the Secretary of Defense and the rest of the Department throughout the QDR. If confirmed, I would get familiar with that analysis and do whatever I could to assist in bringing the QDR to an effective closure.

Chairman LEVIN. Thank you.

Mr. Kendall, the cost overruns on the Department's 97 largest acquisition programs now total almost \$300 billion over the original program estimates, and the programs are an average of 22 months behind schedule, even though the Department has cut unit quantities and reduced performance expectations on many programs in an effort to expedite production and hold costs down.

We enacted the Weapons Systems Acquisition Reform Act earlier this year in an effort to begin to address that problem, among other problems. Are you familiar with the Weapons System Acquisition Reform Act?

Mr. KENDALL. Yes, I am, Mr. Chairman.

Chairman LEVIN. Will you make the implementation of that Act a top priority of your office, if you're confirmed?

Mr. KENDALL. Absolutely, Mr. Chairman.

Chairman LEVIN. As a result of the mergers in the defense industry over the last 2 decades, we've seen a number of cases in which the same company may be responsible for building a weapons system and for providing the Government with independent advice on the same weapons system. Now, section 207 of the Acquisition Reform Act requires the Department to promulgate new regulations to address organizational conflicts of interest of that kind.

Do you agree that it is problematic to have the same company acting as the prime contractor or a major subcontractor for a weapons system and at the same time working as a system engineering and technical assistance contractor providing us with the advice on that same system?

Mr. KENDALL. I do, Mr. Chairman.

Chairman LEVIN. If confirmed, will you ensure that the regulations adopted by the Department are as tough as they need to be to ensure that we get fair, independent, impartial advice from those systems engineering and technical assistance contractors?

Mr. KENDALL. Yes, I will, Mr. Chairman.

Chairman LEVIN. Over the last 8 years the Department's spending on acquisition programs has more than doubled, but the acquisition workforce has remained essentially unchanged in numbers and in skills. Mr. Kendall, in response to our advance policy questions, you stated that you do not believe that the acquisition workforce is large enough and that it has the skills needed to perform its assigned function.

Two years ago we established an acquisition workforce development fund to ensure that DOD will have the workforce that it needs to ensure that the billions of dollars that we spend on acquisition programs every year get the planning, management, and oversight that they need. Do you agree that the Department needs to take strong action to rebuild its acquisition workforce, including not only contracting officers and contract managers, but also systems engineers, software engineers, developmental testers, and cost estimators?

Mr. KENDALL. Yes, I do, Mr. Chairman.

Chairman LEVIN. Will you, if confirmed, ensure that the Department undertakes the systematic planning needed to identify the critical gaps in its acquisition workforce and that the acquisition workforce development fund is fully funded and is used for its intended purpose?

Mr. KENDALL. Mr. Chairman, I'll certainly do whatever I can to strengthen the acquisition workforce.

Chairman LEVIN. Including those steps?

Mr. KENDALL. I'll do whatever I can to ensure that it's fully funded, yes, sir.

Chairman LEVIN. Is there some reluctance to take those specific steps? Did I phrase that in a way which causes you pause?

Mr. KENDALL. No, Mr. Chairman. The only concern I have is that in a budgeting process I would not be the final decision authority on funds to go into any given account.

Chairman LEVIN. I understand.

Mr. KENDALL. I'm not able to commit to that.

Chairman LEVIN. Fair enough. Thank you.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

Mr. Yonkers, I've been involved for quite a number of years now in the alternative fuels that we are looking at for our various capabilities out there, the first one being the coal-to-liquid that we're using in our B-52s. Now we've expanded that to C-17s, F-15s, and others. I felt that back in 2007 when they had the energy bill, section 526 made it very difficult, made it impossible, to actually use some of these alternative fuels.

In 2008, July 2008, DOD wrote saying that DOD supported my legislation, which was to repeal section 526, supported my legislation in part because section 526 requires an analysis which may never be possible and it potentially affects our national security. What they're saying here is that with section 526 we can't do it, essentially.

I think we know that section is targeted at fuel derived from the Canadian oil sand and the Air Force's coal-to-liquids program. The program's been a successful program and I'd like to know your feelings about it and what you intend to do in the future in terms of alternative fuels?

Mr. YONKERS. Let me address the question this way, Senator. First of all, I am familiar with the Air Force's effort to certify all of the platforms for alternative fuels, be they synthetic, biofuels, or other alternatives. I guess where I stand on most of this right now is that all options are on the table. I think what we need to do is take a look at every one of those options and evaluate them, see what makes the most sense for the U.S. Air Force, and then go with those options.

At the same time, I feel that it's necessary to comply with the law, specifically the provisions of the Energy Act of 2007, and also to be very sensitive to the greenhouse gas emissions and the role of climate change or potential impacts as a result of those.

What I would seek sir, is a balance between all of those and coming out with a solid, good rationale and decision for a path forward.

Senator INHOFE. If you feel that all of the above, you're open to all the alternatives, having section 526 in there as it is today, that eliminates those options, so you don't have those options, isn't that correct? Would you then support repealing 526?

Mr. YONKERS. I really don't know, sir, at this time exactly what the implications of that section of the law.

Senator INHOFE. All right, that's fine.

Ms. Fox, everyone agrees that we need to improve the acquisition process. We have now this new bureaucracy, I would describe it, that's in place to do that. You had stated it's likely that additional staff will be needed along with organizational changes to fulfill the expanded CAPE, as we refer to this. How can you do this without just expanding one more or creating another level of bureaucracy? Do you see a conflict there or do you think that you'll be able to control that?

Ms. FOX. Sir, I would hope that expanding the analytic talent in CAPE would not add to the bureaucracy, because I do not believe more bureaucracy is the solution. It is more the need to expand the talent in the organization to meet the needs—

Senator INHOFE. That's good enough, Ms. Fox. I just wanted to get you aware that there is concern there. I always remember what

President Ronald Reagan said many years ago in one of the greatest speeches of all time in my opinion, "there's nothing closer to life eternal on the face of this Earth than another government agency once formed." I look at this as perhaps falling in that category.

Secretary Gates has often called acquisition cost overruns the reason for cancellation of programs. One of those programs that was the reason, the major reason that it was cancelled, was the Future Combat System, which is something that I felt very strongly about. I think in looking at that problem of cost overruns I would like to have, and I assume that Mr. Kendall and Ms. Fox would both want to address this, adhering to the old Nunn-McCurdy rules, which were not really about as stringent as the Weapons System Acquisition Reform Act. But the 15 percent or more of program growth would have to notify Congress, would you still intend to comply with that?

Ms. FOX. Yes, sir.

Senator INHOFE. Okay.

Mr. KENDALL. Yes, sir.

Senator INHOFE. According to the March 2009 GAO report there's been a 17 percent increase in the challenges to Federal contracts. We've been watching this come up. That's a huge thing and I think some of these perhaps are somewhat frivolous in these challenges. But do you have any suggestion, any of you, how we can try to address this as a problem, these challenges to the contracts? This 17 percent increase is pretty dramatic.

Mr. KENDALL. Senator Inhofe, I think we have to be careful that all of our procurements are done fairly, objectively, and transparently so that there is no basis really to challenge them. That's the first thing we have to do.

I think industry now, as there are perhaps fewer opportunities, is more inclined to challenge them and that may be something that's impacting that figure also.

Senator INHOFE. All right. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Inhofe.

Senator REED.

Senator REED. Thank you very much, Mr. Chairman, and thank you all for your willingness to serve.

Ms. Fox, let me follow up with a similar line of questioning. There are many changes involved in the Weapons System Acquisition Reform Act. One is to transform the Cost Analysis Improvement Group into the CAPE Group. You've already indicated, as Senator Inhofe suggested, that you think there are more resources necessary. Could you be more specific? Also, in this transition how much flexibility will you have in this organization of getting new people in, downsizing if you have to, and upsizing? Can you comment?

Ms. FOX. Yes, sir, I can. The Weapon System Acquisition Reform Act does expand the responsibility of the organization, and for that reason I believe that we will need to add analytic talent in the organization. Doing that carefully, in a way that maintains quality, I do consider to be a challenge, but an important one that I would address.

It is my understanding the Department already has allocated some additional billets to the CAPE organization.

Senator REED. Do you have an idea of when this organization will be up and running to your satisfaction?

Ms. FOX. I'm sorry, Senator, I do not have enough information at this time to give you an assessment.

Senator REED. One of the things that you're going to have to do, Ms. Fox, in your organization is to make a risk assessment, essentially a confidence level, that the program will stay within the estimated costs, 50 percent, 60 percent, 70 percent. How comfortable do you think you are with that sort of estimate? Is it too much to ask for that kind of estimate, or do you need a range of like X percent to Y percent? How do you proceed on that point?

Ms. FOX. Senator, I believe that a risk assessment is a vital part of cost estimation. If you don't have a feeling of how much risk you're accepting, the cost estimate for a program won't be a very valuable number. But I do believe the range and the accuracy of risk assessments will have to be determined on a case-by-case basis, so I can't give you one number. But I believe it's very important, and I believe it's doable.

Senator REED. In many cases we find operation and support costs associated with the project rise just as quickly as the other costs. Is that going to be part of your estimate, too?

Ms. FOX. Yes, sir. I think getting a handle on operational support costs and the methods for estimating them is an important part. But I don't have enough information yet to tell you exactly how we will do that.

Senator REED. Thank you.

Mr. Kendall, one of the things that we have observed over the last 7 or 8 years has been the discovery of a need for an item of equipment in a combat zone—Iraq, Afghanistan—and it seems a slow response to get that equipment out. The Mine Resistant Ambush Protected vehicle is one example, but that's one of hundreds probably. What can we do to make the system more rapid and more effective?

Mr. KENDALL. Senator Reed, I understand that the Department has addressed this problem. I haven't had a chance to review exactly what steps they've taken. I know there are offices that are set up specifically to do things very rapidly.

I would agree that a separate track, with much more streamlined processes, is necessary to support operational forces, and if confirmed, I would review that carefully to make sure that's being done as effectively as it can be.

Senator REED. You would not only look at that, but you'd also, I would presume, be responsible for that structure, the offices that would do that, the way it would be expedited?

Mr. KENDALL. As I understand it, right now those all do fall under acquisition. Some of them fall under the Director, Defense Research and Engineering. Some of them would fall directly under me as a line manager and others in my broader role in the organization.

Senator REED. Let me ask you another question, which is the defense industrial base is always an issue of concern. Can you give us a quick assessment from your perspective?

Mr. KENDALL. Sir, I can't give a complete assessment because I haven't had an opportunity to review any detailed data or to do one. But the industrial base is obviously of very great concern. I grew up in this business during the Cold War when we had a very robust, very broad industrial base. It's shrunk a lot since that time. I think there is a very open question as to the health of the base in certain areas and I think it needs to be reviewed on a case-by-case basis, particularly some segments of the industrial base. It's a very important priority for me.

Senator REED. Thank you.

Ms. Commons, this is a question that you probably are not involved with in detail, but it's one you're going to have to confront. In 2009, the Navy had substantial shortfalls in their personnel accounts and it was significant because it was delaying bonuses and freezing pay, et cetera. I've been told, particularly by my colleagues, you have to pay troops. They get very upset if they're not paid, the soldiers, sailors.

I wonder if you can give us any insight on this and anything that you would do to avoid this problem in the future?

Ms. COMMONS. Yes, sir. I know that funding the personnel account has been a challenge. I'm familiar with the reprogramming that had to take place in 2009 and I think that if confirmed I would have to look at the personnel accounts to see that they are fully funded. That would be my goal, to review those accounts to make sure that they are in fact fully funded for the troops.

Senator REED. Thank you very much, Ms. Commons.

Mr. Yonkers, Senator Inhofe raised the issue that I'm interested in. That is the efforts within the Department of the Air Force to use biofuels, to do a lot of interesting research. I think in your capacity you're going to be at the forefront of these efforts. They have broader applications, more than just Air Force and DOD. I would encourage your efforts, your energy, your enthusiasm, and your vision to do that. Thank you for your willingness to serve.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Reed.

Senator Chambliss.

Senator CHAMBLISS. Thank you, Mr. Chairman.

Let me thank all four of you for your willingness to serve and your families for their commitment, too.

Mr. Yonkers, you and I discussed several issues related to depots and military housing last week during your courtesy call to my office, which I appreciate very much, and I wanted to follow up on just a couple of things this morning. The National Defense Authorization Act for Fiscal Year 2010 will address the most important depot issue that we've been working on recently, which is the inclusion of major modifications in the definition of "depot maintenance". We talked about it in some detail.

I think you understand how important it is that this type of work continues to be done in the depots. For the record, I'd just like your confirmation that, if confirmed, you will comply with the provision in the National Defense Authorization Act for Fiscal Year 2010, not

make any adjustments in DOD's interpretation of the relevant provisions in the law prior to consulting with Congress, and in particular this committee.

Mr. YONKERS. Yes, sir, if confirmed, I will do that.

Senator CHAMBLISS. Thank you.

Second, we also discussed the privatized housing issue, as I noted, in most cases DOD privatized housing projects have worked extremely well and we are getting first-class housing to our men and women at a faster rate with private sector involvement. But there have been a couple of particular situations that have not worked so well. The situation with American Eagle projects at Moody Air Force Base and three other Air Force bases is a glaring exception to the positive trend, and again I'd just like your assurance that if confirmed you'll be committed to properly overseeing these projects, keeping Congress, and in particular this committee, apprised of any problems that arise with respect to those issues.

Mr. YONKERS. Yes, sir, I will if confirmed.

Senator CHAMBLISS. Thank you.

Ms. Fox, if confirmed, you would obviously be the first Director of Cost and Assessment and Program Evaluation. We obviously have high hopes for what your position can do in terms of helping curb what has been a history of spiraling cost growth within the acquisition and procurement sector of DOD. The chairman has already alluded to the numbers. Based upon your resume, I see you have extensive experience in defense analysis and management.

Based upon your experience, what do you think are the key problems with our current processes?

Ms. FOX. Sir, I believe that getting accurate cost estimates in front of decisionmakers as early as possible could help very much with the problem of spiraling costs. I also believe changing requirements after programs have been started is a large factor contributing to cost growth in acquisition programs. These are just two of many factors that we will need to look at in CAPE, sir, if I am confirmed.

Senator CHAMBLISS. Your second point is particularly well taken. I can think of a number of weapons systems that I have had personal involvement in where that's exactly what's happened. We task our defense industrial base to build us a weapon system and then all of a sudden we keep moving the goal post on them.

I think the chairman and Senator McCain's bill does address this in a very strong way, and again we're going to be looking to you for your guidance to Congress, as well as to the various Services, not to continue to move those goal posts.

Do you agree with the premises of the Weapons Acquisition Reform Act in terms of where it identifies and corrects problems in the system?

Ms. FOX. Yes, sir, I do.

Senator CHAMBLISS. Are there any other suggestions that you might have at this point that could help us in that respect?

Ms. FOX. Sir, not at this time. If confirmed, I would certainly look for them, but I have no suggestions to offer at this time.

Senator CHAMBLISS. I would just encourage you that as you go through this, we are not the experts here. It's you folks that we rely on. So if you see where there are additional improvements that

we could be making, I know the chairman, Senator McCain, and all members of the committee are interested in making sure that we truly do reform this acquisition process, because that's where we're spending a lot of taxpayer money that, frankly, we all agree we ought not to be spending. Please don't hesitate to let us know and give us justified criticism if we can make additional improvements.

Mr. Kendall, one of the things you discussed in your advance policy questions is the challenge of maintaining the strength and resiliency of our national defense industrial base. In your opinion, what has changed in the defense industrial base over the last 10 to 20 years?

Mr. KENDALL. There have been some changes in the industrial base that have basically resulted from changes in what the Defense Department has bought and how it has bought it. We've had fewer new starts, so there are fewer opportunities for design teams to do their work. Quantities have been smaller. In general, there's been a lot of consolidation in the industrial base as a result.

I'm concerned about these things. I have not seen a detailed analysis of the exact effects and at this point I'm not prepared to talk about corrective action. But I do think it's a high priority we need to look at very carefully.

Senator CHAMBLISS. You're certainly very correct in pointing out that the shrinking industrial base has been a real issue. I'm not sure that any of us know what the answer is, but again I'll say the same thing as I did to Ms. Fox, that as you get your legs under you in your new position if you see any areas that we can improve the policy related to this process, particularly to make sure that we maintain that strong industrial base, which certainly we need, we would appreciate you letting us know and don't hesitate to provide information to us on that issue.

Mr. KENDALL. Absolutely, Senator.

Senator CHAMBLISS. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Chambliss.

Senator Thune.

Senator THUNE. Thank you, Mr. Chairman.

I, too, want to thank our nominees for your willingness to serve and the commitment that your families make as well to that. Thank you for being here today and for the good work that you will do for our country.

Mr. Yonkers, as you may know, the Air Force is currently in the process of drafting an environmental impact statement (EIS) for the proposed air space expansion of the Powder River Complex, which will be located above South Dakota, Wyoming, Montana, and North Dakota. The draft EIS was originally scheduled to be published this past summer, but due to some delays I understand the draft EIS is now due out next spring or summer.

I have a deep and abiding interest in assisting the Air Force in completing this initiative to expand the Powder River Complex because I believe it will save a tremendous amount of dollars for the Air Force in terms of fuel costs and aircraft wear and tear. My question is: Are you familiar with that proposed air space expansion at the Powder River Complex? If so, what are your views on that expansion? If you're not familiar with it, I'd be interested in

maybe having you furnish your views for the record once you do get familiarized with that subject.

Mr. YONKERS. Thank you, Senator, for the comment. I am not familiar with this particular issue, but I'm pretty familiar with the National Environmental Policy Act (NEPA) process and the reasons for it and the utility for going through that process. I'm very sensitive to the needs of the Air Force and other members of the Department with regard to these kinds of requirements, and if I'm confirmed I'll certainly look into it and get back with you specifically with any issues or questions that you may have.

Senator THUNE. I would appreciate that, when you're confirmed, if you could take a look at that and just maybe provide some of your thoughts about it. It is a work in progress. Clearly, there are some delays associated with it. Your familiarity with the NEPA process might be useful in helping us sort through those issues and hopefully make sure that it stays on track for next spring.

I understand the concern about making sure that everything's done right and by the book to avoid any future problems down the road, and I'm certainly sympathetic to that. But it is something I think that would make a lot of sense for the Air Force from the standpoint of fuel costs and wear and tear on aircraft, as I said. I would like to at some point circle back with you on that.

One other question I wanted to raise has to do with a policy that's been put in place by the Air Force. Last year Secretary Donley signed the Air Force energy policy, which among other things established a couple of goals with respect to using alternative fuels in the Air Force aircraft fleet. Senator Inhofe alluded to this a little bit, but our goal is to test and certify the aircraft fleet on a 50-50 alternative fuel blend by 2011. By 2016, the Air Force also plans to acquire 50 percent of the Air Force's domestic aviation fuel requirement via an alternative fuel blend in which the alternative component is derived from some domestic source.

My question would be how well is the Air Force proceeding toward reaching these alternative fuel goals? Do you think those goals are realistic, and if you are confirmed, what will you do in this very influential position to have the Air Force reach these goals?

Mr. YONKERS. First of all, again, I appreciate your question. I'm not real familiar with the total portfolio of the Air Force's energy portfolio. I am familiar with that section of law with regards to the balancing between the synthetic fuels and the conventional fuels and trying to balance the greenhouse gas emissions from those.

At this point in time it would be safer to say that if I'm confirmed I'll look into that as well. It's certainly one of those areas that I think is a top priority for the Air Force, not only in terms of looking at those alternatives, but the energy efficiencies of the renewables and all of the things that were incorporated in the energy law as well as the recent executive order by President Obama and the executive order signed by President Bush.

Senator THUNE. Secretary of the Navy Ray Mabus announced last week plans to field what he dubbed "the great green fleet" by 2016. Part of that plan would be to fuel the carrier strike groups aircraft using only renewable biofuels. If confirmed, I assume you would plan on partnering with the other Services in order to col-

laborate and coordinate research and development of these types of renewable biofuels?

Mr. YONKERS. Yes, sir, and even outside DOD and the Military Services, with the Department of Energy and other agencies of Government that have those kinds of responsibilities.

Senator THUNE. Good. The Air Force is the largest purchaser of aviation fuels. Tremendous cost. If there's any spike in price of fuels, of course, it has a great impact on cost to the Air Force. But just as importantly, if not more importantly, is this dangerous reliance we have on foreign fuels. That's why those goals I hope become reality in terms of the Air Force being able to transition to fuels that are sourced domestically, so that we don't have to deal with the uncertainty of what's going to happen in the Middle East with regard to fuel supply.

These are issues that I hope that you'll really undertake to achieve those goals and to work on integrating more of the domestic fuels and the biofuels into the mix.

I appreciate that, Mr. Chairman, and thank you all again for your service.

Senator REED [presiding]. Thank you very much.

Senator Sessions.

Senator SESSIONS. Thank you, Senator Reed.

I congratulate all of you on your nominations. I think the Senate will do its duty and you'll move right along.

Mr. Kendall, the recently released request for proposal by the Air Force marks the third attempt in nearly a decade to acquire a replacement for the KC-135 refueling tanker. The first two attempts were marred by controversy. First there was a leasing scandal, and people went to jail over that; and then a bid protest. Do you believe that it's possible, given the outcomes of those attempts, that there might have been overcompensation in the development of the current request for proposal (RFP) and that as a consequence of that overcorrection to make the RFP foolproof or technically unassailable that an unintended consequence might be that the warfighter gets a less capable platform or is in some ways disadvantaged?

Have you had a chance to look at that and will you comment on it?

Mr. KENDALL. Senator Sessions, I have not. I am sorry; I can't really give an answer to your question.

Senator SESSIONS. If you were bidding on the purchase of a house or some other important item in your life, I think we would all know that price alone is not the most important thing. There are other qualities that go into making the kind of selection that Americans do every day. You want a good price, but you want a good price for the best value and the capabilities you get.

Do you believe that under normal circumstances the best value for the warfighter is what we should be seeking?

Mr. KENDALL. In general, Senator Sessions, I would agree with you, best value, in which obviously price is a very important factor.

Senator SESSIONS. Some have contended that the best price in this would be just to reproduce the existing KC-135. Originally the Air Force proposed and their goal was to obtain a game-changer, a step up in quality and capabilities. It's just something I know will be in your portfolio. It will be an important issue. It's the Air

Force's number one priority in acquisition and we are way behind schedule, and I hope that—and you will be a leader in this—will just make up your mind to do the best and fair bid and call it like it is. I think that's all we can ask, but I think we have a right to ask for that. Don't you?

Mr. KENDALL. Absolutely, Senator Sessions.

Senator SESSIONS. Do you see, Mr. Kendall, similarities between the goal for the current acquisition plan for the replacement aerial refueling tanker and the newly proposed plan for the Littoral Combat Ship? I'll just follow up to say that some might call an over-emphasis on basic costs, just the lowest cost, seems to be a theme in those two bids. I realize cost is a very important component. I don't deny that. But do you have any concerns that, despite all the affirmations to the contrary, we are trending toward an acquisition strategy that is based on low-cost shootouts?

Mr. KENDALL. As I said earlier, Senator Sessions, cost is a very important factor, but in many procurements it should not be the only factor. There are other things that contribute to value as well. I share your views on that.

Senator SESSIONS. I would agree. These ships are quite different in their capabilities.

Mr. Chairman, I thank our members for this hearing. I will probably submit some written questions as follow-up. I wish you all success, and if you are fortunate to be confirmed, I know that you will commit yourself to making sure our military men and women have the best value systems that can help them be successful as they serve America, often in harm's way.

Senator REED. Thank you very much, Senator Sessions.

Ladies and gentlemen, thank you for your excellent testimony, your willingness to serve, and the willingness of your family to support that service. There are no questions that I can see, so I will use my temporary power to adjourn the hearing.

[Whereupon, at 10:35 a.m., the committee adjourned.]

[Prepared questions submitted to Christine H. Fox by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Currently, I have no changes to the Act that I would recommend.

If so, what areas do you believe might be appropriate to address in these modifications?

N/A.

DUTIES AND RESPONSIBILITIES

Question. The Weapon Systems Acquisition Reform Act (WSARA) of 2009 established the position of Director of Cost Assessment and Program Evaluation (D/CAPE) and makes that official "responsible for ensuring that cost estimates are fair, reliable, and unbiased, and for performing program analysis and evaluation func-

tions currently performed by the Director of Program Analysis and Evaluation.” The duties and responsibilities of this new position are set forth in section 139c of title 10, U.S.C. and in section 2334 of such title (addressing independent cost estimation and cost analysis). If confirmed, you would be the first D/CAPE.

Question. What is your understanding of the primary duties and responsibilities of the D/CAPE?

Answer. I have read the law signed by the President and I understand that D/CAPE is responsible for providing independent cost estimates for all major acquisition programs; ensuring that program cost and schedule estimates are properly prepared and considered in the Department’s deliberations on major acquisition programs; providing guidance and oversight for Analyses of Alternatives (AOAs) to ensure that the Department considers the full range of program and non-materiel solutions. Additionally, D/CAPE is responsible for leading the development of improved analytical skills and competencies within the cost assessment and program evaluation workforce of the Department of Defense (DOD).

Question. Do you believe that the D/CAPE has the authority needed to carry out the duties and responsibilities assigned by statute?

Answer. Yes.

Question. Do you see any need for modifications in the duties and responsibilities of the D/CAPE?

Answer. Not at this time. If confirmed, I would evaluate any need for modifications to the duties and responsibilities in the law.

Question. Assuming you are confirmed, what additional duties, if any, do you expect the Secretary of Defense to assign to you in accordance with sections 113 and 139c(b)(1)(B) of title 10, U.S.C.?

Answer. If confirmed, I expect the Secretary to assign me the duties and functions commensurate with the D/CAPE position, and any others he may deem appropriate.

QUALIFICATIONS

Question. If confirmed as D/CAPE, you will be the principal official in DOD responsible for cost estimation and cost analysis for acquisition programs; for review, analysis, and evaluation of acquisition programs; and for related matters.

What background and experience do you have that you believe qualifies you for this position?

Answer. I have served as a defense analyst, leader, and manager for nearly 30 years. I have personally conducted analyses on a broad range of issues spanning the conduct of military operations, operational testing, and systems trade-offs. I have overseen the analysis of program evaluation, acquisition, and cost issues. As the leader of a Federally Funded Research and Development Center (FFRDC), I have been responsible for providing independent, objective analyses to military and civilian leaders across the Defense Department. I have hired, trained, and developed numerous analysts and have set the analytic standard that governed their performance.

Question. What background and experience do you have in the acquisition of major weapon systems?

Answer. I have considerable experience as a manager and leader of acquisition analysis in an FFRDC environment. I have analytic experience with all phases of the acquisition process from Analysis of Alternatives through operational testing and finally, to the introduction of a new system to fielded forces.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the D/CAPE?

Answer. The WSARA of 2009 is intended to reform defense acquisition processes and to bring cost growth under control. The additional responsibilities and requirements placed upon the new CAPE organization, and the need to tailor CAPE to meet these requirements will be a tremendous challenge. The size, shape, and organization of the CAPE workforce must be reviewed in detail, and the new organization tailored to satisfy the law, and to continue providing the Secretary of Defense with the necessary support that he needs.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I expect to immediately undertake a review of the organization and its ability to fully meet statutory requirements, with the goal to provide clear recommendations regarding changes to organizational structure and additional resource demands. Given the sweeping nature of the changes involved with the law,

I fully expect that additional staff and resources are necessary to comply with the statutory requirements.

RELATIONSHIPS

Question. If confirmed, what would be your working relationship with:
The Secretary of Defense.

Answer. The D/CAPE provides the Secretary and Deputy Secretary of Defense unbiased advice, supported by strong analysis, on how to make rational trade-offs in a resource constrained environment. The Director is the principal advisor to the Secretary for cost assessment and program evaluation. If confirmed, I would closely interact with the Secretary to ensure his directives, goals, and themes are reflected in the programs of DOD.

Question. The Deputy Secretary of Defense.

Answer. If confirmed, I would expect to interact with the Deputy Secretary to provide unbiased recommendations concerning resource allocation, programmatic alternatives, and cost assessments.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics.

Answer. If confirmed, I would work closely with the Under Secretary of Defense (Acquisition, Technology, and Logistics) (USD(AT&L)) to ensure that acquisition plans and decisions are appropriately supported with accurate and unbiased estimates of the costs to develop and procure weapon systems. The CAPE director must also provide the USD(AT&L) frequent input about the viability, execution ability, and affordability of programs that support the national military strategy.

Question. The Under Secretary of Defense (Comptroller).

Answer. If confirmed, I would work closely with the Under Secretary of Defense (Comptroller) to ensure the necessary integration of developing the Future Years Defense Program with budget plans.

Question. The Under Secretary of Defense for Intelligence.

Answer. If confirmed, I would work closely with the Under Secretary of Defense (Intelligence) to coordinate assessments of special access and compartmented intelligence programs since the CAPE Director has oversight of all DOD resource allocation, including intelligence programs. The central importance and complexity of intelligence to our tactical, operational, and strategic operations requires regular interactions with the primary intelligence official, and his staff.

Question. The Joint Requirements Oversight Council (JROC).

Answer. If confirmed, I would work as an advisor to the Joint Requirements Oversight Council for assessing the resource requirements and programmatic risk of desired capabilities. I would not be a member of the JROC, however I would attend meetings and provide assessments of programs, if invited. The importance of requirements to the acquisition process makes interaction with the JROC members a key imperative for the Director of CAPE.

Question. The Defense Business Systems Management Committee (DBSMC).

Answer. If confirmed, I would ensure regular interaction with the DBSMC, providing assessments and advice.

Question. The Director of Operational Test and Evaluation (DOT&E).

Answer. If confirmed, I would ensure a close working relationship with the DOT&E, and ensure that CAPE and DOT&E freely share information and data. I believe that operational testing is critical to ensuring that weapon systems developed within DOD meet requirements, are reliable, and are cost effective. Careful consideration of operational testing results often point to weaknesses inherent in programs that impact costs, as well as pointing to considerations important for later programs.

Question. The Service Secretaries.

Answer. Service Secretaries provide critical oversight of their departments, particularly regarding plans, programs, and policies. If confirmed, I would endeavor to establish close working relationships with Service Secretaries, working together to solve key problems relating to each Service.

Question. The Chiefs of Staff of the Military Services.

Answer. Service Chiefs have responsibilities to organize, man, train, and equip their Services to meet warfighting requirements and support combatant commanders. Their title 10 responsibility for planning and programming of resources, as well as to develop acquisition programs, ensure regular interaction between the Director of CAPE and Chiefs of Staff of the Military Services. If confirmed, I would ensure that I quickly develop close working relationships with Service Chiefs in order to jointly meet the many challenges within DOD.

Question. The combatant commanders.

Answer. The combatant commanders are the key consumers of the “products” developed in the Pentagon—the forces, programs, and other capabilities necessary to implement the National Security Strategy. It is imperative to meet the needs of the combatant commanders. If confirmed, I would endeavor to understand the needs of the combatant commanders and to advocate for programs that support their requirements. I would ensure that I know and react to their needs.

Question. The heads of the defense agencies.

Answer. The defense agencies have responsibilities to develop programs and budget to meet their requirements. If confirmed, I would be sensitive to the needs of the defense agencies and be available to help address their challenges.

Question. The Service acquisition executives.

Answer. If confirmed, I would work closely with Service acquisition executives to provide analysis, to meet the challenges of troubled programs, and if required, develop alternatives to meet defense needs.

Question. The program executive officers and program managers of major defense acquisition programs.

Answer. If confirmed, I would work closely with program executive officers and program managers to provide analysis to help meet the challenges of troubled programs and if required, develop alternatives to meet defense needs.

Question. The cost estimating offices of the military departments.

Answer. If confirmed, I would ensure a close working relationship with the cost estimating offices of the military departments, ensuring that independent cost estimates fully represent the Service acquisition plans. The cost estimating offices of the military departments provide the baseline data and plans that form the basis for cost estimates for acquisition programs.

ORGANIZATION AND STAFFING

Question. What is your understanding of the extent to which the Department has made the changes necessary to establish the office of the D/CAPE, in accordance with the statutory requirements?

Answer. My understanding is that the Department has taken preliminary steps to establish the office of the D/CAPE in accordance with the statutory requirements and some early planning has been accomplished. If confirmed, I would review these plans and move rapidly to transitioning the new CAPE organization to meet the goals of the WSARA.

Question. What steps do you believe you will need to take, if confirmed, to ensure that the office of the D/CAPE is fully functional and organized in a manner consistent with statutory requirements?

Answer. If confirmed, I would develop a strategic plan to transition the organization into fulfilling its expanded roles and responsibilities in a way that both meets the intent of WSARA and the needs of the Department. It is likely that additional staff will be needed along with organizational changes to fulfill the expanded CAPE responsibilities and fully comply with the statutory requirements of WSARA.

Question. Do you see the need for any changes in the structure, organization, or reporting relationships of the office of the D/CAPE?

Answer. Not at this time. If confirmed, I would evaluate the current structure, organization, and reporting relationships of the office of the D/CAPE and recommend adjustments, if needed. If confirmed, I would assess these issues and recommend changes as necessary.

Question. Section 139c(d)(8) of title 10, U.S.C., requires the D/CAPE to lead “the development of improved analytical skills and competencies within the cost assessment and program evaluation workforce of the Department of Defense.” Section 2334(f) of title 10, U.S.C., requires the Secretary of Defense to ensure that the D/CAPE has sufficient staff of military and civilian personnel to enable the Director to carry out the duties and responsibilities of the Director under this section.”

Do you believe that the office of the D/CAPE currently has sufficient staff of appropriately qualified and trained personnel to carry out its duties and responsibilities?

Answer. No. I believe that the Government staff of the legacy Cost Analysis Improvement Group, which has already transitioned to Cost Assessment within CAPE, will need to grow substantially to meet the expanded cost assessment responsibilities and requirements in WSARA. The Government staff of Program Evaluation within CAPE is also likely to grow to fulfill new responsibilities within WSARA. If confirmed, I would move rapidly to develop, mature, and execute early transition and strategic plans so that CAPE will help the Department realize the program performance goals established by the President and Congress.

Question. What steps do you plan to take, if confirmed, to assess the staffing needs of your office and ensure that you have sufficient staff of appropriately qualified and trained personnel to carry out your duties and responsibilities?

Answer. If confirmed, I would review the assessments and planning done to date, and would provide further guidance as required to fully implement the WSARA. I do foresee the need for additional staff given the requirements specified in the statutory regulations.

Question. What is your view of the current staffing of cost assessment and cost estimating functions of the military departments and defense agencies?

Answer. I do not have detailed knowledge of the staffing of cost assessment and cost estimating functions of the military departments and defense agencies. However, if confirmed, as I develop the strategic plan for CAPE, I intend to examine closely its relationships with the military department and defense agency counterparts to ensure the larger DOD cost community is well positioned to support the goals of WSARA.

Question. If confirmed, what role if any do you expect to play in ensuring that the cost assessment and cost estimating functions of the military departments and defense agencies have sufficient staff of appropriately qualified and trained personnel to carry out their duties and responsibilities?

Answer. The WSARA establishes the Director, Cost Assessment and Program Evaluation in the role as the primary advocate for the entire DOD cost community. If confirmed, I would work to ensure that cost assessment and cost estimating functions for the entire Department have sufficient resources and are provided the necessary guidance and authorities that are essential to improve the performance of DOD programs.

ACQUISITION PROCESS

Question. What is your understanding of the role of the D/CAPE in the acquisition process?

Answer. My understanding is that the D/CAPE will play several key roles in the acquisition process. The D/CAPE is responsible for providing guidance and oversight for AOAs to ensure that the Department, at the earliest point possible, considers the full range of program and non-materiel alternatives that might provide the needed military capabilities, as quickly as possible, at the lowest possible cost. The D/CAPE is also responsible, throughout the entire acquisition process, for ensuring that program cost and schedule estimates are properly prepared and considered in the Department's deliberations on major acquisition programs and that the program is likely to achieve the desired capabilities.

Question. What is your view of the significance of sound, unbiased cost estimating throughout the acquisition process?

Answer. I believe that sound and unbiased cost and schedule estimates, including thorough risk assessments, are absolutely essential for effective acquisition decision-making and oversight. Achieving the goal of reducing cost and schedule growth in the Department's portfolio of acquisition programs will not be possible if good cost estimates are not available and considered throughout the acquisition process.

Question. What is your understanding of the role of the D/CAPE in the requirements and resource-allocation processes?

Answer. On the requirements side, the Director is an advisor to the Joint Requirements Oversight Council for assessing the resource requirements and programmatic risk of a desired capability. On the resources side, the Director is responsible for executing the planning and programming phases of the Department's planning, programming, budgeting, and execution system (PPBES).

Question. Do you see the need for any additional processes or mechanisms to ensure coordination between the budget, acquisition, and requirements systems of DOD and ensure that appropriate trade-offs are made between cost, schedule, and performance requirements early in the acquisition process?

Answer. The WSARA assigns greater authorities and responsibilities to the D/CAPE in the requirements and acquisition process for programs that have not achieved Milestone B approval. If confirmed, I intend to use these authorities to the fullest extent to ensure that programs are properly initiated and are postured for success. I would evaluate and recommend adjustments, if needed, in the current requirement, acquisition, and budget processes to facilitate trade-offs and to ensure program success.

Question. Do you believe that the current investment budget for major systems is affordable given increasing historic cost growth in major systems, costs of current operations, projected increases in end strength, and asset recapitalization?

Answer. I do not have detailed knowledge of the trade-offs between the current investment budget and the other pressures on resources within the total provided to the Department.

Question. If not, what role do you see for the D/CAPE in addressing this issue?
 Answer. If confirmed, I would evaluate these trade-offs and recommend adjustments, if needed, and provide management direction as necessary to ensure that we have an affordable, long-term investment strategy.

Question. Many acquisition experts attribute the failure of DOD acquisition programs to a cultural bias that routinely produces overly optimistic cost and schedule estimates and unrealistic performance expectations. As Senator Levin explained at a June 2008 hearing, “contractors and program offices have every reason to produce optimistic cost estimates and unrealistic performance expectations, because programs that promise revolutionary change and project lower costs are more likely to be approved and funded by senior administration officials and by Congress.”

Do you agree with the assessment that overly optimistic cost and schedule estimates and unrealistic performance expectations contribute to the failure of major defense acquisition programs?

Answer. Yes.

Question. What steps if any would you take, if confirmed, to ensure that the Department’s cost, schedule, and performance estimates are realistic?

Answer. I do not have sufficient knowledge to offer a complete assessment at this time; however, if confirmed, one key step I would take is to advocate use of Independent Cost Estimates, developed or approved by the D/CAPE, at acquisition milestones and other key decision points in the acquisition process.

Question. Do you believe that early communication between the acquisition, budget, and requirements communities in DOD can help ensure more realistic cost, schedule, and performance expectations?

Answer. Yes.

Question. If so, what steps if any would you take, if confirmed, to assist in such communication?

Answer. If confirmed, I would consider expanding the joint deliberations that have been developed between the acquisition, requirements, and PPBE processes.

I would also consider improvements in information systems in the acquisition, budget, and requirements community to enable improved sharing of information between these communities, and to enhance the transparency of the information both within and outside of the Department.

Question. Nearly half of DOD’s 95 largest acquisition programs have exceeded the so-called “Nunn-McCurdy” cost growth standards established in section 2433 of title 10, U.S.C., to identify seriously troubled programs. The cost overruns on these major defense acquisition programs now total \$295 billion over the original program estimates, even though the Department has cut unit quantities and reduced performance expectations on many programs in an effort to hold costs down.

What role do you see for the D/CAPE in controlling the out-of-control cost growth on DOD’s major defense acquisition programs?

Answer. I expect that the enhanced WSARA requirements for program certifications will help to place programs on a sound foundation at key decision points in the acquisition process. For new programs, the new 2366a requirements at Milestone A will be effective in helping to establish realistic program definition and cost and schedule targets, as early as possible, to help reduce future cost growth. For programs already underway, the 2366b certifications required for programs beyond Milestone B will be effective in putting troubled programs on a more stable footing and reducing further cost growth.

Question. In the Budget Blueprint that supports the fiscal year 2010 Presidential budget request, the administration committed to “set[ting] realistic requirements and stick[ing] to them and incorporat[ing] ‘best practices’ by not allowing programs to proceed from one stage of the acquisition cycle to the next until they have achieved the maturity to clearly lower the risk of cost growth and schedule slippage.”

What role do you see for the D/CAPE in helping to ensure that the Department makes good on this commitment?

Answer. D/CAPE is the principal official in DOD responsible for cost and schedule estimation and for assessing expected program effectiveness.

Question. Over the last several years, the Government Accountability Office (GAO) has prepared a series of reports for this Committee comparing the DOD approach to the acquisition of major systems with the approach taken by best performers in the private sector. GAO concluded that private sector programs are more successful because they consistently require a high level of maturity for new technologies before such technologies are incorporated into product development pro-

grams. The Department has responded to these findings by adopting technological maturity goals in its acquisition policies.

How important is it, in your view, for the Department to mature its technologies with research and development funds before these technologies are incorporated into product development programs?

Answer. In my view it is critical for programs to reach the appropriate level of maturity before proceeding to the next acquisition stage.

Question. What role do you see for the D/CAPE in helping to ensure that the key components and technologies to be incorporated into major acquisition programs meet the Department's technological maturity goals?

Answer. If confirmed, I would ensure that technology risks and maturity levels are fully incorporated in the cost and schedule assessments, including Independent Cost Estimates, prepared for all major programs.

DOD has increasingly turned to incremental acquisition and spiral development approaches in an effort to make cost, schedule, and performance expectations more realistic and achievable.

Question. Do you believe that incremental acquisition and spiral development can help improve the performance of the Department's major acquisition programs?

Answer. Yes, I believe that incremental acquisition and spiral development could be an effective way to reduce acquisition risk and should be considered whenever appropriate across DOD's portfolio of acquisition programs.

Question. In your view, has the Department's approach to incremental acquisition and spiral development been successful? Why or why not?

Answer. I do not have the detailed knowledge to make an informed assessment. I believe that the use of this approach must be considered, on a case-by-case basis, with all factors assessed and weighed in the decision. If confirmed, I would advocate for the consideration and evaluation of spiral development and incremental acquisition strategies in all applicable situations.

Question. What steps if any do you believe are needed to ensure that the requirements process, budget process, and testing regime can accommodate incremental acquisition and spiral development approaches?

Answer. I do not have sufficient knowledge to offer a detailed assessment at this time; however, I believe that these areas need to be flexible enough to support incremental acquisition and spiral development approaches.

Question. How should the Department ensure that the incremental acquisition and spiral development programs have appropriate baselines against which to measure performance?

Answer. The Department is required to prepare and measure performance against rigorous acquisition program baselines for major acquisition programs, including acquisition programs that employ these concepts. If confirmed, I would ensure realistic independent cost and schedule estimates are prepared for all major acquisition programs, including the programs that employ these concepts.

Question. The poor performance of major defense acquisition programs has also been attributed to instability in funding and requirements. In the past, DOD has attempted to provide greater funding stability through the use of multi-year contracts. More recently, the Department has sought greater requirements stability by instituting Configuration Steering Boards to exercise control over any changes to requirements that would increase program costs.

What are your views on multi-year procurements? Under what circumstances do you believe they should be used?

Answer. In general, I believe that multi-year procurement strategies can result in savings. I recognize that multi-year contracts offer the possibility of cost savings from economic order quantities. If confirmed, I would ensure the CAPE organization prepares unbiased analyses to quantify the resultant savings from the use of multi-year procurement strategies, and to assess the impact on the Department of reductions in acquisition and budget flexibilities.

Question. What is your opinion on the level of cost savings that constitute "substantial savings" for purposes of the defense multi-year procurement statute, 10 U.S.C. § 2306b?

Answer. I do not have sufficient knowledge to offer a specific opinion at this time; however, determining substantial savings will likely require consideration on a case by case basis. I believe that consideration should include the potential trade-off between cost savings and reductions in acquisition and budget flexibilities.

Question. Under what circumstances, if any, do you believe that a multi-year contract should be used for procuring weapons systems that have unsatisfactory program histories, e.g., displaying poor cost, scheduling, or performance outcomes but which might otherwise comply with the requirements of the defense multi-year procurement statute, 10 U.S.C. § 2306b?

Answer. I believe it is likely that the employment of multi-year strategies should be evaluated on a case-by-case basis. If confirmed, I would consider all relevant factors, including past program performance, in deliberations on possible employment of multi-year procurement strategies.

Question. How would you analyze and evaluate proposals for multi-year procurement for such programs?

Answer. If confirmed, I would ensure that proposals for multi-year procurement would be carefully and fairly assessed, with consideration of the original savings projections for historical programs, and compared with acquisition strategies that do not employ multi-year procurement. I would also ensure that multi-year savings projections are compared with actual savings achieved from historical programs.

Question. If confirmed, what criteria would you apply in assessing whether procuring such a system under a multi-year contract, is appropriate and should be proposed to Congress?

Answer. Although I do not have sufficient knowledge to recommend specific criteria at this time, some criteria to consider include a review of all statutory and regulatory requirements and, potentially, an assessment of the trade-offs between cost savings and reductions in acquisition and budget flexibilities.

Question. Under what circumstances, if any, should DOD ever break a multi-year procurement?

Answer. I believe that the extraordinary circumstances that would lead to the break in a multi-year procurement should be carefully considered on a case-by-case basis. Some factors to consider could include a dramatic change in the national security situation, a change in the fiscal environment facing DOD, or a significant change in the acquisition program itself.

Question. What other steps if any would you recommend taking to increase the funding and requirements stability of major defense acquisition programs?

Answer. If confirmed, I would take actions to ensure that independent cost estimates developed or approved by the D/CAPE are fully funded in the Future Years Defense Program, that changes to programs and cost estimates are properly tracked over time, that program cost performance is tracked consistent with the metrics specified in WSARA, and that proposed changes to programs that influence costs are fully evaluated and considered prior to implementation of changes to programs.

If confirmed, I would also recommend a careful examination of the Operations and Support costs for the Department. These accounts sometimes contribute to instability in acquisition programs by demanding a greater percentage of available resources than originally expected, thereby undermining acquisition plans. Realistically funding these accounts, and controlling cost growth where possible, may help stabilize mid- and long-term acquisition plans.

COST ASSESSMENT

Question. Section 2334 of title 10, U.S.C., requires the D/CAPE to prescribe policies and procedures for the conduct of cost estimation and cost analysis for the acquisition programs of DOD.

What are the major issues that you believe should be addressed in policies and procedures for the conduct of cost estimation and cost analysis for DOD acquisition programs?

Answer. I do not have enough detailed information to make an assessment. If confirmed, I would evaluate the current policies and procedures for the conduct of cost estimation and cost analysis for DOD acquisition programs and recommend adjustments, if needed.

Question. What is your view on DOD policies and procedures currently in place for the conduct of cost estimation and cost analysis for DOD acquisition programs? Are there any significant gaps that you would like to fill or significant changes that you would like to make?

Answer. I do not have enough detailed information to make an assessment. If confirmed, I would evaluate the current policies and procedures for the conduct of cost estimation and cost analysis for DOD acquisition programs and recommend adjustments, if needed.

Question. Section 2334(a)(6) requires the Director to conduct independent cost estimates and cost analyses for certain major defense acquisition programs and major automated information system programs at key points in the acquisition process and "at any other time considered appropriate by the Director or upon the request of the Under Secretary of Defense for Acquisition, Technology, and Logistics."

In your view, does the office of the Director currently have the staffing and resources necessary to perform this function, or will additional resources be required?

Answer. I believe that in order to fully comply with the statutory requirements of WSARA significant additional staffing and resources will be needed, beyond those that had previously been provided to the Cost Analysis Improvement Group. If confirmed, I would move rapidly to develop, mature, and execute early transition and strategic plans so that CAPE will help the Department realize the program performance goals established by the President and Congress.

Question. What is your view of the extent to which it would be appropriate to use Federally Funded Research and Development Centers (FFRDCs) or other contractors to assist in this function?

Answer. It is my understanding that the Department has underway a major initiative to reestablish the Government acquisition workforce. Even with this trend, however, there are numerous functions, such as cost analysis research, that an FFRDC or a support contractor could provide to assist the Department in meeting its cost estimating requirements.

Question. Are there particular points in the acquisition process, other than those required by statute, at which you think that independent cost estimates and cost analyses would be appropriate?

Answer. The current acquisition process in the Department is event-driven and episodic in nature, and is driven primarily by the key milestones identified in statute. In my view, the new WSARA requirements will drive the Department to a model involving more continuous involvement of the cost analysis community. If confirmed, I would support a more continuous involvement of CAPE in following and tracking program performance, updating previous cost and schedule estimates, and in evaluating new program risks as they are identified.

Question. The Director is required to "[r]eview all cost estimates and cost analyses" conducted by the military departments and defense agencies for major defense acquisition programs and major automated information system programs other than those covered by section 2334(a)(6). At certain points in the acquisition process, the Director is required to determine whether such estimates are reasonable.

In your view, does the office of the Director currently have the staffing and resources necessary to perform this function, or will additional resources be required?

Answer. No. I believe that in order to fully comply with the statutory requirements of WSARA significant additional staffing and resources will be needed, beyond those that had previously been provided to the Cost Analysis Improvement Group. If confirmed, I would move rapidly to develop, mature, and execute early transition and strategic plans so that CAPE will help the Department realize the aggressive program performance goals established by the President and Congress.

Question. What is your view of the extent to which it would be appropriate to use FFRDCs or other contractors to assist in this function?

Answer. The cost estimating community is currently involved in the DOD insourcing initiative since many of the functions performed in this community are inherently governmental in nature. Even with this trend, however, there are numerous functions, such as cost analysis research, that an FFRDC or a support contractor could provide to assist the Department in meeting its cost estimating requirements.

Question. What action would you expect to take, if confirmed, if you were to determine that a cost estimate or cost analysis conducted by one of the military departments or defense agencies in connection with a major defense acquisition program or major automated system program was not reasonable?

Answer. If confirmed, in this situation I would direct the Deputy Director for Cost Assessments in CAPE to prepare a separate independent cost estimate. I would recommend that the program not be permitted to proceed until the new independent cost estimate was completed, considered, and properly funded in the Future Years Defense Program.

Question. Section 2334(a) also requires the Director to issue guidance relating to the proper selection of confidence levels in cost estimates for major defense acquisition programs and major automated information system programs. Section 2334(d) requires the Director (and the head of the agency responsible for the estimate) to disclose the confidence level for the estimate, the rationale for selecting the confidence level, and "if such confidence level is less than 80 percent, the justification for selecting a confidence level of less than 80 percent."

Do you support the disclosure requirement in section 2334(d)?

Answer. Yes.

Question. What is your view of the appropriate confidence level for a cost estimate for a major defense acquisition program or major automated information system program?

Answer. If confirmed, I would ensure that a complete discussion of program risk, its assessment and quantification, and the extent to which risk mitigation measures

are funded, would be a part of the preparation and documentation of every independent cost estimate conducted or overseen by CAPE. I believe that the confidence level or degree to which funding is provided to cover risks, both known and unknown, is best established on a case-by-case basis, in the context of the overall Departmental priorities and risk posture.

Question. In your view, should the confidence level vary, depending on the stage of the acquisition process that the program has reached?

Answer. Yes.

Question. What do you see as the possible consequences of selecting an inappropriate confidence level of a cost estimate?

Answer. The consequences of selecting an inappropriate confidence level for a cost estimate depend on many factors, including the size of the program, the extent to which the specific program has already experienced cost growth, and the performance of other programs in the larger DOD acquisition portfolio. The consequences could range from having a significant effect on many programs within the larger DOD acquisition portfolio, as resources are moved to pay for large cost overruns, to having a relatively small effect on a single acquisition program.

Question. Do you see the need for any change in the legislation regarding confidence levels for estimates?

Answer. I have no recommended changes at this time. If confirmed, I would evaluate the current statutory requirements, policies, and procedures for the development and setting of confidence levels for DOD acquisition programs and recommend adjustments, if needed.

PROGRAM EVALUATION

Question. Section 139c(d)(5) of title 10, U.S.C., makes the D/CAPE responsible for “[r]eview, analysis, and evaluation of programs for executing approved strategies and policies, ensuring that information on programs is presented accurately and completely.” Section 139c(d)(7) makes the Director responsible for “[a]ssessments of alternative plans, programs, and policies with respect to the acquisition programs of the Department of Defense.”

What is your view of the significance of independent review, analysis, and evaluation of programs, and assessments of alternative programs, to the effective management of DOD?

Answer. Independent analyses and evaluation of programs help identify underlying risk in programs—whether cost, schedule or performance risk. I believe that identifying these risks and offering the means to mitigate them will position the Department leadership to make informed decisions for acquiring and resourcing program plans.

Question. Do you see the need for any changes or improvements to the organization, process, or methodology used by the Department for such review, analysis, and assessments?

Answer. It is highly likely that additional staff will be needed along with organizational changes to fulfill the expanded CAPE responsibilities and fully comply with the statutory requirements of WSARA. I am not aware of the need to make any changes or improvements to the process or methodology at this time. However, if confirmed I would review the process and methodology and make recommendations for improvements, as appropriate.

Question. Does the D/CAPE have the staffing and resources needed to carry out this function?

Answer. Given the additional responsibilities spelled out in the WSARA law, I believe that the Director may need additional staff and resources to carry out this function. If confirmed, I plan to focus immediately on organizational changes necessary to fully comply with the intent of the legislation and the resulting impact on resources.

Question. How do you believe that the D/CAPE should interact with Service acquisition executives, program executive officers, program managers, and other program officials in preparing independent evaluations of major defense acquisition programs?

Answer. Preparation of independent evaluations of major defense acquisition programs is highly dependent on gaining unfettered access to information about the programs. I believe that the D/CAPE must create strong relationships with Service acquisition executives and other program subordinates to ensure continued access to the information. At the same time, I believe that the Director must make clear that the analyses done by the Cost Assessment and Program Evaluation organization maintain the necessary independence and continue to be unbiased and reliable in developing recommendations based on the analyses.

PLANNING, PROGRAMMING, BUDGETING, AND EXECUTION SYSTEM

Question. What role do you expect to play, if confirmed, on matters relating to the planning and programming phases of the Planning, Programming, Budgeting and Execution (PPBE) system?

Answer. If confirmed, I expect the Secretary of Defense would assign me all of the duties, functions, and responsibilities currently specified in the Department's directives for the former position of Director, Program Analysis and Evaluation. Specifically I expect that I would be one of the Secretary's primary advisors on all program evaluation matters. Further, I expect that I would coordinate the performance of the Program Review and ensure a close working relationship with the Under Secretary of Defense (Comptroller) as he coordinates the performance of the Budget Review. I expect that I would analyze, evaluate, and provide alternative plans and programs for U.S. defense objectives and evaluate programs to ensure execution of approved strategies and policies. I anticipate performing critical reviews of requirements, capabilities, and life-cycle costs of current and proposed defense programs, including reviews of AOAs and to establish guidance for AOAs.

Question. What role do you expect to play, if confirmed, in the preparation of materials and guidance for the PPBE system?

Answer. If confirmed, I would direct preparation for overarching guidance for the programming phase of PPBE. I also expect that I would prepare and coordinate closely with the Under Secretary of Defense (Comptroller) in the preparation of Fiscal Guidance to the Defense components. Further I would expect to coordinate with the Under Secretary of Defense (Policy) in implementation of strategic policy decisions reached through processes such as the Quadrennial Defense Review. I expect that I would continue to prepare and deliver to Congress the Future Years Defense Program for DOD.

Question. Do you see the need for any changes or improvements to the PPBE system?

Answer. I do not have any recommendations at this time.

ANALYSES OF ALTERNATIVES

Question. The D/CAPE is responsible for the formulation of study guidance for AOAs for major defense acquisition programs and the performance of such analyses, as directed by the Secretary of Defense.

Do you believe that DOD has been making appropriate use of AOAs in connection with major defense acquisition programs?

Answer. I do not have sufficient knowledge at this time to offer an assessment of the Department's use of analysis of alternatives. I believe AOAs can identify areas where tradeoffs can be made to reduce cost, schedule, and performance risk.

Question. Do you see the need for any change in the timing, content, or approach that the Department takes to AOAs in connection with major defense acquisition programs?

Answer. No. The analysis of alternatives is usually done prior to Milestone A, thereby offering the earliest opportunity to influence the acquisition strategy and program content. If confirmed, I would ensure that the analysis of alternatives continues to be updated, as appropriate, as the program proceeds to a full-rate production decision.

Question. Do you believe that the office of the D/CAPE and other relevant components of the Department are appropriately organized and staffed to carry out effective AOAs in connection with major defense acquisition programs?

Answer. Properly organized, yes. Properly staffed, no—it is highly likely that additional staff will be needed along with organizational changes to fulfill the expanded CAPE responsibilities and fully comply with the statutory requirements of WSARA.

OPERATING AND SUPPORT COSTS

Question. Section 2334(e) of title 10, U.S.C., requires the Director to review and report on existing systems and methods of DOD for tracking and assessing operating and support costs on major defense acquisition programs.

Do you think that the Department is currently doing an adequate job of estimating operating and support costs for major defense acquisition programs?

Answer. I appreciate the challenges of estimating operating and support costs of increasingly complex weapon systems with ever-changing operational missions. The WSARA of 2009 requires a review of systems and methods used for developing estimates of operating and support costs. I am advised that a team led by the Cost Assessment and Program Evaluation directorate is examining the adequacy of systems

and methods used for developing estimates of these costs. If confirmed, I would review the study team's finding and conclusions and recommend adjustments, if needed.

Question. Do you think that the Department is currently doing an adequate job of tracking and assessing operating and support costs for major defense acquisition programs?

Answer. I recognize that effective systems and methods must be in place to ensure that budgets and programs reflect the most current experience in operating and support costs. The WSARA of 2009 requires a review of systems and methods used for tracking and assessing operating and support costs. I am advised that a team led by the Cost Assessment and Program Evaluation directorate is examining these systems and methods. If confirmed, I would review the study team's finding and conclusions and recommend adjustments, if needed.

Question. What would be your view of a "Nunn-McCurdy"-type system for programs that substantially exceed estimates for operating and support costs?

Answer. I understand the importance of controlling the operating and support costs of our major weapon systems. I also know that this is a complicated problem—many factors contribute to increases in operating and support cost growth. I am advised that the Cost Assessment and Program Evaluation directorate has begun assessing the feasibility and advisability of establishing some form of baseline for operating and support costs, as required in the WSARA of 2009. If confirmed, I would make a review of the team's progress on this question a near-term priority.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the D/CAPE?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR ROLAND W. BURRIS

NEW POSITION

1. Senator BURRIS. Ms. Fox, how would you define success as the first person to fill this position?

Ms. FOX. The Weapon System Acquisition Reform Act (WSARA) of 2009 is intended to bring cost growth under control and to reform defense acquisition processes so that equipment is provided to U.S. forces in a timely manner. I would view success as making a positive contribution to those goals. The additional requirements and responsibilities assigned to the new Cost Assessment and Program Evaluation (CAPE) organization, and the need to tailor CAPE to meet those requirements, will also be a tremendous challenge. If I can leave CAPE in a strong position to achieve the goals of WSARA, I would consider that a success.

2. Senator BURRIS. Ms. Fox, do you feel that this position is an oversight arm for the Under Secretary of Defense (Comptroller) and the Services Comptrollers?

Ms. FOX. I plan to work closely with the Under Secretary of Defense (Comptroller) to ensure that the processes the Department uses to develop its budget plans and build the Future Years Defense Program are carefully integrated. I also plan to

work with the Department of Defense (DOD) and Service Comptrollers to ensure that the information provided to Congress in the budget, in the Future Years Defense Program, and in reports on acquisition programs is accurate and internally consistent.

3. Senator BURRIS. Ms. Fox, do you plan to work to implement a DOD standard for determining cost estimates, assessments, and requirements?

Ms. FOX. The WSARA establishes the Director of Cost Assessment and Program Evaluation as the primary advocate for the DOD cost community. I plan to evaluate the policies and procedures the Department currently uses in developing cost estimates and preparing cost analyses for acquisition programs, and I will recommend adjustments, if needed. I will also work to ensure that appropriate guidance is provided for cost assessment and cost-estimating functions department-wide and that these functions are given the resources and authorities necessary to improve the performance of DOD programs.

ACQUISITION PROCESS

4. Senator BURRIS. Ms. Fox, does the acquisition process need to be overhauled DOD-wide?

Ms. FOX. The acquisition process for major defense programs will require modification to fully implement the statutory requirements established by the WSARA. I plan to work closely with the Under Secretary of Defense for Acquisition, Technology, and Logistics to ensure that any modifications to the Department's acquisition regulations are consistent with statutory requirements and the goals of WSARA.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

FIXED-PRICE CONTRACTING

5. Senator MCCAIN. Ms. Fox, we in this committee and DOD have pursued initiatives designed to reduce development and technological risks associated with major weapons programs so as to maximize the use of fixed price-type contracts. What do you think about the feasibility of greater use of fixed price contracts, and how would you evaluate the Department's commitment or ability to move towards use of more fixed price-type contracts (and less cost-reimbursable contracts) to buy major weapons systems?

Ms. FOX. I believe that the use of fixed-price contracts is appropriate in the later stages of major weapons programs that involve both development and production activities. I believe that the specific point at which to make the transition from cost-type to fixed-price contract vehicles is best determined on a case-by-case basis. The criteria that the Department currently considers in establishing the transition point include the military requirements for the program in question, the technical definition of the program, the design stability of the end-items to be procured, the availability of information on actual costs, and the overall risk posture and priorities associated with the program. These seem reasonable to me at this time. There are cases, however, when a fixed-price contract would make sense for the entire program. An example would be a program that entails no or minimal development activities—such as acquisition efforts involving procurement of off-the-shelf items.

AUTHORITIES UNDER THE WEAPONS SYSTEMS ACQUISITION REFORM ACT OF 2009

6. Senator MCCAIN. Ms. Fox, you bring a wealth of analytical and research management experience to this new position, and we went to great lengths to ensure that you have the independence, resources, and access needed to provide the advice and information that Secretary Gates, Under Secretary Carter, and all the participants in DOD procurement and acquisition require to succeed. What do you consider to be the most important aspects and legal authorities of this new position?

Ms. FOX. The WSARA legislation makes clear that the CAPE director is responsible for providing independent cost estimates for all major acquisition programs and for ensuring that program cost and schedule estimates are properly prepared and considered in the Department's deliberations on major acquisition programs. The legislation further authorizes the CAPE director to provide guidance and oversight of Analyses of Alternative. Through this authority, the CAPE director can ensure that the full range of program and non-materiel solutions is considered in ac-

quisition decisions. These two authorities together are critical to the CAPE director's ability to achieve the goals of WSARA.

7. Senator MCCAIN. Ms. Fox, if confirmed, what resources or additional authorities do you think you may require?

Ms. FOX. The WSARA of 2009 is intended to reform defense acquisition processes and to bring cost growth under control. The additional requirements and responsibilities assigned to the new CAPE organization, and the need to tailor CAPE to meet those requirements, will be a tremendous challenge. The size, shape, and organization of the CAPE workforce must be reviewed in detail, and the new organization must be tailored to satisfy the law and to continue providing the Secretary of Defense with the analytic support that he needs.

COST ESTIMATING

8. Senator MCCAIN. Ms. Fox, if confirmed as the Director of Cost Assessment and Program Evaluation, you will be called on to testify before Congress on your independent cost estimates and analyses of major weapons programs. What cost estimate information do you think it is important for Congress to have when considering funding for major defense acquisition programs? For example, should Congress be looking at a point estimate or a range estimate?

Ms. FOX. In support of funding decisions in the authorization and appropriation processes, Congress needs accurate and complete information regarding the cost estimates that form the basis for the President's budget request, the Future Years Defense Program, and the Selected Acquisition Reports submitted for major weapon programs. Understanding the risks associated with a program's cost estimate is critically important in that regard. For example, in many instances the unit cost of a weapon system is influenced to a large degree by the number of items procured in each year of the program. Providing information of this sort to decisionmakers in DOD and Congress should result in more balanced and informed decisions in both the executive and legislative branches of Government.

9. Senator MCCAIN. Ms. Fox, in your view, is it sufficient to know the confidence level of a cost estimate or do we need to know the major cost risk drivers of a program?

Ms. FOX. I plan to ensure that a complete discussion of program risk, its assessment and quantification, and the extent to which risk-mitigation measures are funded is part of the preparation and documentation of every independent cost estimate produced or overseen by CAPE. I believe that the confidence level, or the degree to which funding is provided to cover risks, both known and unknown, is best established on a case-by-case basis, in the context of the Department's overall priorities and risk posture.

10. Senator MCCAIN. Ms. Fox, what, if anything, would you do to help us get a good understanding of the cost risk drivers?

Ms. FOX. I plan to ensure that every independent cost estimate produced or overseen by CAPE includes a complete discussion of program risk, its assessment and quantification, and the extent to which risk mitigation measures have been funded in the program's budget. Toward that end, I hope to strengthen the discussion of cost risks in the budgetary and acquisition materials that the Department provides to Congress for major defense programs.

11. Senator MCCAIN. Ms. Fox, do you believe that major defense acquisition programs should be budgeted to an independent cost estimate?

Ms. FOX. Yes, I believe that the budget requests for major defense acquisition programs should generally be consistent with resource requirement projections from independent cost estimates.

12. Senator MCCAIN. Ms. Fox, independent cost estimating aside, do you believe that major defense acquisition programs should be budgeted to a specific confidence level?

Ms. FOX. I believe that the confidence level, or the degree to which funding is provided to cover risks, both known and unknown, is best established on a case-by-case basis, in the context of the Department's overall priorities and risk posture. For example, in the early development phases of a program, when more than one materiel solution is under consideration, it might be appropriate to base the initial budget requests on the higher-cost solution. Such an approach would provide high con-

vidence that the best solution for the Department can be pursued within programmed resources over the longer term.

13. Senator MCCAIN. Ms. Fox, should DOD budget for certain high risk programs, such as those that involve significant leaps in technology, at a higher confidence level?

Ms. FOX. I believe that the confidence level, or the degree to which funding is provided to cover risks, both known and unknown, is best established on a case-by-case basis, in the context of the Department's overall priorities and risk posture. In certain situations involving high-priority missions and high-risk programs, it may be necessary to establish budgets at higher confidence levels for the programs.

14. Senator MCCAIN. Ms. Fox, in a number of programs, such as the CVN-78 and DDG-1000, DOD relies on new production or design efficiencies to generate cost savings. But, the Government Accountability Office has found that "labor hour savings based on efficiencies often did not materialize as expected." When developing a cost estimate, to what extent would you consider new manufacturing or design processes as generating cost savings?

Ms. FOX. The cost estimates prepared in CAPE are based on actual costs reported by defense contractors and DOD components for current and historical defense programs. The database of actual costs for previous defense programs is maintained by the Defense Cost and Resource Center within CAPE and is available to all Government personnel in DOD. When a cost estimate is developed by CAPE, it reflects cost savings associated with new manufacturing or design processes only to the degree to which those savings have been proven and realized and are reflected in the actual cost reports for DOD programs.

15. Senator MCCAIN. Ms. Fox, to what extent are you concerned that operations and support costs are not taken into sufficient account when key procurement decisions are made on a major weapons systems throughout its acquisition cycle?

Ms. FOX. It is important that operations and support costs be considered in decisions involving the acquisition of long-term capital assets in DOD. I appreciate the challenges of estimating operating and support costs of increasingly complex weapon systems with frequently changing operational missions. The WSARA of 2009 requires a review of systems and methods used for developing estimates of operating and support costs. A team led by the Cost Assessment and Program Evaluation directorate is examining the adequacy of systems and methods used for developing estimates of these costs. I plan to review the study team's finding and conclusions and will recommend adjustments to the procedures the Department uses to estimate operations and support costs, if needed.

[The nomination reference of Christine H. Fox follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
October 1, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Christine H. Fox, of Virginia, to be Director of Cost Assessment and Program Evaluation, Department of Defense (New Position).

[The biographical sketch of Christine H. Fox, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF CHRISTINE FOX

EDUCATION

Garfield High School, May 1972, H.S. Diploma
BS, Mathematics, George Mason University, May 1976
MS, Applied mathematics, George Mason University, August 1980

EMPLOYMENT RECORD

Center for Naval Analyses:

May 2004–Present: President
 2001–2004: Vice President and Director, Operations Evaluation Group
 1994–2001: Team Leader, Operational Policy Team
 1992–1994: Director, Antiair Warfare Department
 1989–1992: Program Director, Fleet Tactics and Capabilities
 1987–1989: Team Leader, Third Fleet Tactical Analysis Team
 1986–1987: Field Representative, Tactical Training Group, Pacific
 1985–1986: Project Director, Electronic Warfare
 1983–1985: Field Representative, Fighter Airborne Early Warning Wing, Pacific
 1981–1983: Analyst, Air Warfare Division

Institute for Defense Analyses:

1979–1981: Member, Computer Group

HONORS AND AWARDS

Outstanding Alumna of the Year; George Mason University, College of Science;
 March 2008
 NASA Public Service Medal; Return to Flight Task Force; August 2005
 The CNA Corporation Board of Trustees Distinguished Service Award; April 2004
 International Women's Year Award; Contribution to Aerospace/Aviation; 1995

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Christine H. Fox in connection with her nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
 Christine H. Fox.

2. **Position to which nominated:**
 Director, Cost Analysis and Program Evaluation (CAPE).

3. **Date of nomination:**
 October 1, 2009.

4. **Address:** (List current place of residence and office addresses.)
 [Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

May 26, 1955; Bethesda, MD.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Alan C. Brown.

7. Names and ages of children:

None.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

George Mason University, August 1972 to May 1976, BS in Mathematics, May 1976

George Mason University, August 1976 to August 1980, MS in Applied Sciences, August 1980

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

CNA, July 1981–present

Current title: President, Center for Naval Analyses; May 2004–present

Previous title: Vice President, Operations Evaluation Group, 2001–2004

Previous title: Team Leader, Operational Policy Team, 1994–2001

Adjunct professor at Syracuse University, National Security Studies, periodically beginning April 1996 through November 2000.

Part-time consultant to George Washington University from December 1998 to April 1999.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

NASA, Return to Flight Task Force, December 2003–March 2005.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Advisory Board, Applied Physics Laboratory, University of Washington (unpaid position).

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, Council on Foreign Relations, June 2009–present.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

My husband and I have consistently made small donations to the Democratic National Committee (DNC). We do not have records. We believe they were always about \$50 and totaled approximately \$100/year. We have requested a record from the DNC but have not received it.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Outstanding Alumna of the Year; George Mason University, College of Science; March 2008.

NASA Public Service Medal; Return to Flight Task Force; August 2005.

The CNA Corporation Board of Trustees Distinguished Service Award; April 2004. International Women's Year Award; Contribution to Aerospace/Aviation; 1995.

15. Published writings: List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

[The nominee responded and the information is contained in the committee's executive files.]

16. Speeches: Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

No formal speeches.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

CHRISTINE H. FOX.

This 7th day of October, 2009.

[The nomination of Christine H. Fox was reported to the Senate by Chairman Levin on October 27, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on October 28, 2009.]

[Prepared questions submitted to Frank Kendall III by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Currently, I see no specific changes in the Act that I would recommend.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. N/A.

DUTIES

Question. Section 133a of title 10, U.S.C., describes the role of the Deputy Under Secretary of Defense for Acquisition and Technology (DUSD(AT)).

Assuming you are confirmed, what duties do you expect that the Under Secretary of Defense for Acquisition, Technology, and Logistics USD(AT&L) will prescribe for you?

Answer. If confirmed, my statutory responsibilities under section 1333a of title 10 would be to be the principal advisor to the USD(AT&L) and the Secretary of Defense for matters relating to acquisition and the integration and protection of technology. Dr. Carter and I have discussed my role in the USD(AT&L) organization, and if confirmed I will also be acting as his principle deputy. The model that we have discussed is that of a Chief Executive Officer and Chief Operating Officer with me in the Chief Operating Officer role under Dr. Carter’s supervision.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I have over 35 years experience in the areas of national security, defense, and acquisition. My education includes degrees in engineering, business, and law. I served on Active Duty in the Army for over 10 years including in operational units and research and development commands. As a civil servant I worked as a systems

engineer and systems analyst. I spent over 8 years in the Pentagon on the Under Secretary for Acquisition's staff first as Assistant Deputy Under Secretary for Strategic Systems (Defense Systems) and then as Director, Tactical Warfare Programs. Outside of Government, I have been the Vice President of Engineering for Raytheon Company and a consultant on national security and acquisition related matters, principally program management, technology assessment, and strategic planning, for a variety of defense companies, think tanks, and Government laboratories or research and development organizations.

Question. Do you believe that there are any additional steps that you need to take to enhance your expertise to perform these duties?

Answer. No.

Question. Do you believe that any significant changes should be made in the structure and decisionmaking procedures of the Department of Defense (DOD) with respect to acquisition matters?

Answer. I am not aware of any changes that need to be made at this time. The Weapons System Acquisition Reform Act of 2009 addressed this question and I understand that it is currently being implemented. If confirmed, I intend to keep an open mind, assess historical changes, and work within DOD and with Congress in an open and transparent manner on any recommendations concerning the structure or decisionmaking procedures for acquisition.

QUALIFICATIONS

Question. If confirmed, you will be responsible for assisting the Under Secretary in the management of an acquisition system pursuant to which DOD spends almost \$400 billion each year.

What background and experience do you have that you believe qualifies you for this position?

Answer. As indicated above, I have over 35 years experience in the areas of national security, defense, and acquisition. My education includes degrees in engineering, business, and law. I served on Active Duty in the Army for over 10 years including in operational units and research and development commands. As a civil servant I worked as a systems engineer and systems analyst. I spent over 8 years in the Pentagon on the Under Secretary for Acquisition's staff first as Assistant Deputy Under Secretary for Strategic Systems (Defense Systems) and then as Director, Tactical Warfare Programs. Outside of Government, I have been the Vice President of Engineering for Raytheon Company and a consultant on national security and acquisition related matters, principally program management, technology assessment, and strategic planning, for a variety of defense companies, think tanks, and Government laboratories or research and development organizations.

Question. What background or experience, if any, do you have in the acquisition of major weapon systems?

Answer. My most extensive experience was in my previous positions in the Under Secretary of Defense for Acquisition's office from 1986 to 1994. During this period I had oversight responsibility, first for all strategic defense programs, and then for all tactical warfare programs. During my period as Director of Tactical Warfare Programs from 1989 to 1994, I chaired the Conventional Systems Committee, now called the Overarching Integrated Product Team, which was responsible for preparing for Defense Acquisition Board (DAB) decisions for the Under Secretary for Acquisition. In this capacity I was responsible to the Under Secretary for approximately 100 DAB reviews covering systems from all three military departments that spanned the spectrum of major weapon systems. After I left Government service in 1994, I was involved with a number of major weapons systems programs in my capacity as Vice President of Engineering at Raytheon. As an independent consultant I spent several years providing technical management and program management consulting to the Lead System Integrator for the Future Combat Systems program. During the period 1997 to 2008 I was also involved in reviews of a number of major acquisition programs, either as an independent consultant or as a member of a Government advisory board.

RELATIONSHIPS

Question. In carrying out your duties, what would be your relationship with: The Secretary of Defense.

Answer. If confirmed, I would support the Secretary of Defense's priorities in acquisition and technology.

Question. The Deputy Secretary of Defense.

Answer. If confirmed, I would support the Deputy Secretary's priorities in matters of acquisition and technology.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics.

Answer. The Under Secretary of Defense for Acquisition, Technology, and Logistics would be my immediate supervisor. If confirmed, I would be the principal advisor to the USD (AT&L) for matters relating to acquisition and the integration and protection of technology. In addition I would assist the USD(AT&L) in the performance of his duties relating to Acquisition and Technology and in any other capacity that he might direct.

Question. The other Under Secretaries of Defense.

Answer. There are many actions that require coordination among the offices of the Under Secretaries of Defense. If confirmed, I would support the USD(AT&L) in working with the other Under Secretaries of Defense to best serve the priorities of DOD.

Question. The Deputy Chief Management Officer of DOD.

Answer. If confirmed, I would work with the Deputy Chief Management Officer to support the effective and efficient organization of business operations throughout DOD.

Question. The Assistant Secretaries of Defense.

Answer. If confirmed, I would work with the USD(AT&L) to cooperate with the Assistant Secretaries of Defense to best equip the Services and implement DOD priorities.

Question. The DOD General Counsel.

Answer. If confirmed, I would work with the General Counsel's office to ensure all actions are legal, ethical, and within regulatory guidelines.

Question. The Director of Operational Test and Evaluation (DOT&E).

Answer. If confirmed, I would work with the DOT&E to ensure appropriate testing oversight for DOD acquisition programs.

Question. The Director of Cost Assessment and Program Evaluation.

Answer. If confirmed, I would work with the Director of Cost Assessment and Program Evaluation to support their efforts to provide DOD with independent analysis and resourcing assessments for weapons systems programs.

Question. The Director of Defense Research and Engineering (DDR&E).

Answer. If confirmed, I would work with the DDR&E to rapidly field technologies and capabilities to support ongoing operations, and to ensure the Department and the Nation maintain a strong technical and engineering foundation to reduce the cost, acquisition time, and risk of our major defense acquisition programs.

Question. The Director of Developmental Testing.

Answer. If confirmed, I would work with the Director of Developmental Testing to ensure that there is strong involvement early in program formulation, and that comprehensive, independent developmental testing assessments of program maturity and performance are available to inform acquisition decisions.

Question. The Director of System Engineering.

Answer. If confirmed, I would rely on the expertise and advice of the Director, Systems Engineering, encourage early involvement in supporting acquisition programs, and consider his independent assessments and recommendations in decisions pertaining to Major Defense Acquisition Programs.

Question. The Acquisition Executives in the Military Departments.

Answer. If confirmed, I would make communication and coordination with Service Acquisition Executives a top priority in daily management. I would engage with the Acquisition Executives to ensure effective oversight of acquisition programs in their areas, support transparency in sharing information about program status, take appropriate remedial actions to rectify problems, actively engage in departmental processes to improve acquisition outcomes, and support the policies and practices of the Department. I would also expect them to champion best practices and share ideas and concerns with each other, with me, and members of my organization.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. If confirmed, I would support the Vice Chairman in general, but particularly in his role as a member of the DAB. I would also seek to ensure the requirements and acquisition processes work more effectively together in terms of stabilizing requirements, and ensuring requirements established for acquisition programs are achievable within appropriate cost, schedule, and technical risk.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the DUSD(AT)?

Answer. If confirmed, I believe there are a number of daunting challenges that will have to be confronted and it would be impossible to list them all. The highest

priority challenge would be supporting the war effort through rapid acquisition and delivery of effective capabilities to our forces engaged in combat and other counter-insurgency or counter-terror operations. Next, I anticipate a major challenge in ensuring that the Department's acquisition programs are executed within cost, schedule, and performance goals. I understand that many programs are falling short in this area and I would work to regain control of existing programs and to ensure that new programs do not repeat these problems. There is a challenge and opportunity in growing both the size and capability of the acquisition workforce particularly in the areas of program management, engineering, contracting, and cost estimating. I also believe there is a need to improve the efficiency and effectiveness of the transition of technologies from the science and technology (S&T) community into acquisition programs. Finally, maintaining the strength and resiliency of our national defense industrial base is a challenge that I anticipate will require attention.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I would use my experience to leverage the resources and expertise of the Defense Department, industry and other organizations to address these issues.

Question. What do you consider to be the most serious problems in the management of acquisition functions in DOD?

Answer. I believe the top issues are effective and transparent oversight of our major programs to identify and rectify problems early; establishing acquisition programs that appropriately balance cost, schedule, performance, and risk; restricting unrealistic or unaffordable requirements appetites; strengthening both the acquisition workforce and our industrial base; and efficiently utilizing our investments in S&T.

Question. What management actions and timetables would you establish to address these problems?

Answer. I am not familiar enough with the position and the current situation to propose any actions or timetables at this time.

ACQUISITION ORGANIZATION

Question. Section 906 of the National Defense Authorization Act for Fiscal Year 2010 would realign the Deputy Under Secretaries (DUSDs) within the office of the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(ATL)).

What is your view of the changes made by section 906? Do you see the need for any changes to this legislation?

Answer. I do not know what the impact of these changes would be in practice; however, I do not see the need for any changes at this time.

Question. Do you believe that the office of the USD(ATL) is appropriately structured to execute its management and oversight responsibilities?

Answer. Yes.

Question. Do you believe that any change is needed in the duties and responsibilities of the DUSDs serving under the USD(ATL)?

Answer. I have not had an opportunity to review those responsibilities and do not have any recommended changes at this time.

Question. What role do you expect to play, if confirmed, in the realignment of the responsibilities of the DUSDs in accordance with the requirements of section 906?

Answer. If confirmed, I would expect to advise the Secretary of Defense, the Deputy Secretary of Defense, and the USD(AT&L) on the enacted requirements.

Question. Do you see the need for any changes in the relationship between the USD(ATL) and senior acquisition officials in the military departments?

Answer. Not at this time.

Question. Do you see the need for any additional processes or mechanisms to ensure coordination between the budget, acquisition, and requirements systems of DOD and ensure that appropriate trade-offs are made between cost, schedule, and performance requirements early in the acquisition process?

Answer. I am not familiar enough with current procedures to make a recommendation at this time. If confirmed, I would examine these issues and recommend appropriate changes if I perceived that any were necessary. My experience is that there is an unavoidable overlap between budget, acquisition, and requirements procedures that is best addressed by continuous cooperation and coordination among the individuals with responsibilities for those processes.

Question. What do you believe should be the appropriate role of the Service Chiefs in the requirements, acquisition, and resource-allocation process?

Answer. The Service Chiefs have a key role to play in the development of capability needs and in the planning and allocation of resources consistent with those

needs. Although Service Chiefs do not play a formal role in the acquisition chain of command, if confirmed I would respect, encourage, solicit, and certainly welcome their advice and inputs.

Question. What do you believe should be the appropriate role of the combatant commanders in the requirements, acquisition, and resource-allocation processes?

Answer. Combatant commanders advise on capability needs, priorities, and allocation of resources consistent with those needs. I am particularly sensitive to the need for the acquisition system to address urgent needs of the combatant commanders in support of wartime operations. If confirmed, I would respect and encourage their advice and solicit their input on meeting their needs effectively.

Question. Do you see the need for any changes in the structure or operations of the Joint Requirements Oversight Council (JROC)?

Answer. I am not familiar enough with current procedures with regard to the JROC to recommend any changes at this time.

MAJOR WEAPON SYSTEM ACQUISITION

Question. The investment budget for weapon systems has grown substantially over the past few years to more than \$150 billion per year. An increasing share of this investment is being allocated to a few very large systems such as the Joint Strike Fighter, Future Combat Systems, and Missile Defense.

Do you believe that the current investment budget for major systems is affordable given increasing historic cost growth in major systems, costs of current operations, projected increases in end strength, and asset recapitalization?

Answer. I believe the investment budget will come under increasing pressure in the future. If confirmed, I would work to control both the growth in costs of existing programs, as well as seek to ensure the Department has a sustainable and affordable investment strategy for the longer term.

Question. If confirmed, how do you plan to address this issue?

Answer. If confirmed I would make this issue a top priority. Both the budget process and the acquisition process for individual programs provide vehicles to address this problem. I would advise the USD(AT&L) in his role in both of these processes and other Department leadership as appropriate to address this issue.

Question. What would be the impact of a decision by the Department to reduce purchases of major systems because of affordability issues?

Answer. There could be impacts on short- and long-term national security, sustainment of the existing force structure, the health of the industrial base, and international implications. Each program decision would have to be considered both individually and collectively to determine the impact.

Question. Nearly half of DOD's 95 largest acquisition programs have exceeded the so-called "Nunn-McCurdy" cost growth standards established in section 2433 of title 10, U.S.C., to identify seriously troubled programs. Section 206 of the Weapon Systems Acquisition Reform Act of 2009 tightened the standards for addressing such programs.

What steps if any would you take, if confirmed, to address the out-of-control cost growth on DOD's major defense acquisition programs?

Answer. If confirmed, I would review the portfolio of programs to assess the degree to which they may still have cost problems and propose appropriate measures on a case by case basis to address those problems. It would be my intent to ensure future programs start off on a sound technical and fiscal footing to reduce the risk of future growth in costs. Emphasis would be placed on realistic overall cost estimates, executable program plans, and well understood and achievable technical requirements. Acquisition strategies should provide strong incentives to successful program execution. I would also enforce policies and measures such as the statutory provisions recently enacted to discipline the system and stabilize it over time.

Question. What steps if any do you believe that the Department should consider taking in the case of major defense acquisition programs that exceed the critical cost growth thresholds established in the "Nunn-McCurdy" provision?

Answer. I believe the current statutory provision provides the authority to take appropriate measures, including major restructuring or termination.

Question. Do you believe that the office of the Under Secretary of Defense for Acquisition, Technology, and Logistics, as currently structured, has the organization and resources necessary to effectively oversee the management of these major defense acquisition programs? If not, how would you address this problem?

Answer. Yes, to the best of my knowledge, however if confirmed I will review the organization and resources available to me to determine if changes are required.

Question. Do you see the need for any changes to the Nunn-McCurdy provision, as revised by section 206?

Answer. Not at this time.

Question. What principles will guide your thinking on whether to recommend terminating a program that has experienced “critical” cost growth under Nunn-McCurdy?

Answer. If confirmed, I would use the five criteria listed in the law. They address whether the capability is essential to the national security and whether there are other alternatives that can provide the capability at less cost. They also address whether we now have reasonable cost and schedule estimates and the management to achieve them. The law also requires consideration from where the funding will come.

Question. In the Budget Blueprint that supports the fiscal year 2010 Presidential budget request, the administration committed to “set[ting] realistic requirements and stick[ing] to them and incorporat[ing] ‘best practices’ by not allowing programs to proceed from one stage of the acquisition cycle to the next until they have achieved the maturity to clearly lower the risk of cost growth and schedule slip-page.”

If confirmed, how would you help ensure that the Department makes good on this commitment?

Answer. Advanced technology is essential to maintaining the operational superiority of our weapon systems, but there must be a balance between pursuing desirable technology goals and ensuring adequate maturity before committing to major development programs that depend on new technology. If confirmed, I would seek to ensure programs do not proceed unless they are ready in all respects to advance to the next stage in the acquisition process. This requires a detailed review of the specific risks associated with each program. If confirmed, I would work closely with the DDR&E and other appropriate offices to ensure that adequate reviews are conducted.

SYSTEMS ENGINEERING AND DEVELOPMENTAL TESTING

Question. One of the premises for the Weapon Systems Acquisition Reform Act of 2009 was that the best way to improve acquisition outcomes is to place acquisition programs on a sounder footing from the outset by addressing program shortcomings in the early phases of the acquisition process. The Defense Science Board Task Force on Developmental Test and Evaluation reported in May 2008 that “the single most important step necessary” to address high rates of failure on defense acquisition programs is “to ensure programs are formulated to execute a viable systems engineering strategy from the beginning.”

Do you believe that DOD has the systems engineering and developmental testing organizations, resources, and capabilities needed to ensure that there is a sound basis for key requirements, acquisition, and budget decisions on major defense acquisition programs?

Answer. I have not had an opportunity to fully study the adequacy of both systems engineering and the developmental test and evaluation organizations in DOD and the Services. If confirmed, I would, with the DDR&E, review the entire acquisition organization, including Systems Engineering and Developmental Testing to ensure changes are implemented as necessary to best accomplish the mission.

Question. If confirmed, what role do you expect to play, in working with the new Director of Systems Engineering and the new Director of Developmental Testing to address this problem?

Answer. If confirmed, I would work closely with both directors to establish a clear strategy for improving the capabilities of the technical workforce. I would also seek their expertise and active involvement in programs in their early stages to ensure the best technical approaches are being used to reduce program risk to acceptable levels and to ensure that programs are ready to proceed to production and operational testing.

Question. Do you believe that the Nation as a whole is producing enough systems engineers and designers and giving them sufficient experience working on engineering and design projects to ensure that DOD can access an experienced and technically trained systems engineering and design workforce? If not, what do you recommend should be done to address the shortfall?

Answer. I have not had the opportunity to fully study the level of shortfall, if any, in the national technical workforce today. I am concerned that the demographics of the national security workforce will present a problem within the next 5 or 10 years, if not sooner. If confirmed, I would work within the Department to understand and to mitigate these issues.

TECHNOLOGICAL MATURITY

Question. Over the last several years, the Government Accountability Office (GAO) has prepared a series of reports for this Committee comparing the DOD approach to the acquisition of major systems with the approach taken by best performers in the private sector. GAO concluded that private sector programs are more successful than DOD programs because they consistently require that new technologies achieve a high level of maturity before such technologies may be incorporated into product development programs. Section 104 of the Weapon Systems Acquisition Reform Act of 2009 addresses this issue by tightening technological maturity requirements for major defense acquisition programs.

How important is it, in your view, for the Department to mature its technologies with research and development (R&D) funds before these technologies are incorporated into product development programs?

Answer. It is very important for acquisition programs to use mature technologies and to carefully manage the risk associated with new technology insertion. Chances of program success go down dramatically when the risks associated with technologies that have not been demonstrated adequately are accepted. One effective way to mature technologies is through the use of DOD R&D funds.

Question. What steps if any would you take, if confirmed, to ensure that the key components and technologies to be incorporated into major acquisition programs meet the Department's technological maturity goals?

Answer. If confirmed, I would work with the DDR&E to ensure that the technology risk associated with defense acquisition programs is properly tailored to the phases of development to avoid program disruption or failure. The principal tool to accomplish this goal would be a rigorous, independent assessment process conducted by the DDR&E. If confirmed, I would review current processes with the DDR&E to determine their adequacy.

Question. Do you believe that the Department should make greater use of prototypes, including competitive prototypes, to ensure that acquisition programs reach an appropriate level of technological maturity, design maturity, and manufacturing readiness before receiving Milestone approval?

Answer. Yes.

Question. If so, what steps do you believe the Department should take to increase its use of such prototypes?

Answer. I believe the Department should insist on the use of competitive prototyping whenever viable. If confirmed, I would strongly encourage the use of competitive prototyping provisions in acquisition strategies.

Question. Section 2366a of title 10, U.S.C., requires the Milestone Decision Authority for a major defense acquisition program to certify that critical technologies have reached an appropriate level of maturity before Milestone B approval.

What steps if any will you take, if confirmed, to make sure that DOD complies with the requirements of section 2366a?

Answer. If confirmed, I would assist the USD(AT&L) in his role as chair of the DAB and Milestone Decision Authority (MDA) for Acquisition Category (ACAT) 1 programs in fulfilling this requirement. This would include supporting the use of independent technology readiness assessments to ensure compliance with section 2366a.

Question. What steps if any will you take to ensure that the DDR&E is adequately staffed and resourced to support decisionmakers in complying with the requirements of section 2366a?

Answer. If confirmed, I would work with DDR&E and other members of the OSD and military Service staffs to evaluate the adequacy of resources available to meet the challenges of complying with the requirements of section 2366a.

Question. Are you satisfied that technology readiness assessments adequately address systems integration and engineering issues which are the cause of many cost overruns and schedule delays in acquisition programs?

Answer. I am not familiar enough with current practices to provide an opinion at this time. If confirmed, I would work to ensure that systems integration, engineering, as well as technology maturity issues are properly addressed and coordinated.

Question. Do you plan to follow the recommendation of the Defense Science Board Task Force on the Manufacturing Technology Program and require program managers to make use of the Manufacturing Readiness Level tool on all programs?

Answer. I believe strongly that manufacturing technology is important and deserving of DOD support. I also agree that manufacturing readiness is important to program success and should be assessed rigorously before programs pass into production. If confirmed, I intend to review the specific recommendations of the DSB

report and to take action to strengthen the use of Manufacturing Readiness Levels, if needed.

Question. Beyond addressing technological maturity issues in acquisition programs, what other steps should the Department take to increase accountability and discipline in the acquisition process?

Answer. There are a great number of factors that contribute to the failure of programs to meet their schedule, cost and performance goals. As Secretary Gates has said, there is no "silver bullet" that will address all of the factors. In addition to excessive technology risk, failures can originate in acquisition strategies that do not properly motivate the Department's suppliers, unrealistic requirements, optimistic cost estimates and schedules, poor detailed program planning, poor engineering practices, and inefficient production rates, just to name a few. If confirmed, I would commit to examining all these factors both as systemic problems and in each program that comes before the USD(AT&L) for a decision. If confirmed, I would work tenaciously to minimize the frequency and the impact of all of these problems, in part by focusing on the individuals responsible for executing the Department's programs; the Program Managers and Program Executive Officers.

UNREALISTIC COST, SCHEDULE, AND PERFORMANCE EXPECTATIONS

Question. Many acquisition experts attribute the failure of DOD acquisition programs to a cultural bias that routinely produces overly optimistic cost and schedule estimates and unrealistic performance expectations. Section 101 of the Weapon Systems Acquisition Reform Act of 2009 is designed to address this problem by establishing an independent Director of Cost Assessment and Performance Evaluation, who is charged with ensuring the development of realistic and unbiased cost estimates to support the Department's acquisition programs.

Do you agree with the assessment that overly optimistic cost and schedule estimates and unrealistic performance expectations contribute to the failure of major defense acquisition programs?

Answer. Yes.

Question. If confirmed, how do you expect to work with the Director of the new office to ensure that the Department's cost, schedule, and performance estimates are realistic?

Answer. During my 8 years in the Under Secretary for Acquisition's office I worked very closely with the Cost Analysis Independent Group (CAIG) and relied heavily on their expertise. If confirmed, I would expect to work closely with CAPE and to rely on their independent estimates, as well as other sources of information, to ensure thorough and objective reviews of programs coming before the USD(AT&L) for acquisition decisions.

Question. Section 201 of the Weapon Systems Acquisition Reform Act of 2009 seeks to address this problem by promoting early consideration of trade-offs among cost, schedule, and performance objectives in major defense acquisition programs.

Do you believe that early communication between the acquisition, budget and requirements communities in DOD can help ensure more realistic cost, schedule, and performance expectations?

Answer. Yes.

Question. If so, what steps if any would you take, if confirmed, to ensure such communication?

Answer. I believe the key is leadership that is committed in all three processes to working together. If confirmed, I would work closely with the leaders in requirements, acquisition, and budgeting to ensure that our actions are coordinated and collaborative.

Question. DOD has increasingly turned to incremental acquisition and spiral development approaches in an effort to make cost, schedule, and performance expectations more realistic and achievable.

Do you believe that incremental acquisition and spiral development can help improve the performance of the Department's major acquisition programs?

Answer. Yes.

Question. What risks do you see in the Department's use of incremental acquisition and spiral development?

Answer. I am not familiar with the Department's record with regard to implementing these approaches. If confirmed, I would support the use of these practices where appropriate.

Question. In your view, has the Department's approach to incremental acquisition and spiral development been successful? Why or why not?

Answer. I am not familiar enough with the Department's experience with these strategies to have an opinion as to their success or failure. If confirmed, I will review the results that have been obtained to date.

Question. What steps if any do you believe are needed to ensure that the requirements process, budget process, and testing regime can accommodate incremental acquisition and spiral development approaches?

Answer. I am not familiar enough with the Department's experience with these strategies to have an opinion as to whether additional steps to ensure the requirements, budget and testing processes are needed. If confirmed, I will review the results that have been obtained to date.

Question. How should the Department ensure that the incremental acquisition and spiral development programs have appropriate baselines against which to measure performance?

Answer. I am not familiar enough with the Department's experience with baselines for these strategies to have an opinion as to whether appropriate baselines are being maintained or what changes are necessary. If confirmed, I will review the results that have been obtained to date.

FUNDING AND REQUIREMENTS STABILITY

Question. The poor performance of major defense acquisition programs has also been attributed to instability in funding and requirements. In the past, DOD has attempted to provide greater funding stability through the use of multi-year contracts. More recently, the Department has sought greater requirements stability by instituting Configuration Steering Boards to exercise control over any changes to requirements that would increase program costs.

Do you support the use of Configuration Steering Boards to increase requirements stability on major defense acquisition programs?

Answer. Yes.

Question. What other steps if any would you recommend taking to increase the funding and requirements stability of major defense acquisition programs?

Answer. I am not familiar enough with the current practices in the Department that seek to address funding and requirements stability to be able to make a recommendation.

FIXED PRICE-TYPE CONTRACTS

Question. Recent Congressional and DOD initiatives attempt to reduce technical and performance risks associated with developing and producing major defense acquisition programs so as to minimize the use of cost-reimbursable contracts.

Do you think that the Department should move towards more fixed price-type contracting in developing or procuring major defense acquisition programs? Why or why not?

Answer. I do think that the Department should, when possible, consider the more frequent use of fixed price type contracts in developing or procuring major defense acquisition programs. I believe that fixed price contracts offer several advantages to stability, schedule and cost for appropriate programs. There are circumstances in which fixed price contracts are not appropriate, including in the development of entirely new designs, when contractors assume greater risk and are more likely to face very high losses. If confirmed, I will ensure acquisition contracts are designed to provide the greatest benefit to the warfighter and the taxpayer.

TECHNOLOGY TRANSITION

Question. The Department continues to struggle with the transition of new technologies into existing programs of record and major weapons systems and platforms. Further, the Department also has struggled with moving technologies from DOD programs or other sources rapidly into the hands of operational users.

What impediments to technology transition do you see within the Department?

Answer. I believe there may be several issues with technology transition, but I have not seen any data that would confirm the root causes or their relative significance. If confirmed, I would work with the DDR&E to understand the magnitude and impact of these factors and to develop measures that would improve technology transition.

Question. What steps if any will you take, if confirmed, to enhance the effectiveness of technology transition efforts?

Answer. Overcoming the impediments would be a priority for me. If confirmed, I intend to work with the DDR&E to understand this issue and to devise and implement further measures to overcome these impediments.

Question. What can be done from a budget, policy, and organizational standpoint to facilitate the transition of technologies from S&T programs and other sources, including small businesses, venture capital funded companies, and other nontraditional defense contractors, into acquisition programs?

Answer. It is very important that defense tap into these sources, which are some of the most innovative in the world, for technology that can be applied to weapons systems. I believe that R&D and acquisition processes and policies must make it easier for such entities to contribute to defense and if confirmed, I would work with the DDR&E to develop specific measures to achieve that goal.

Question. Do you believe that the Department's S&T organizations have the ability and the resources to carry technologies to higher levels of maturity before handing them off to acquisition programs?

Answer. I am not familiar enough with the current S&T programs and the maturity levels they are able to achieve to answer this question definitively.

Question. What steps if any do you believe the Department should take to ensure that research programs are sufficiently funded to reduce technical risk in programs so that technological maturity can be demonstrated at the appropriate time?

Answer. I believe technologies that are necessary or desirable to meet proposed acquisition program needs should be identified early and that specific maturation programs should be defined and agreed to by the S&T and development communities and that those programs should be collaboratively managed. I am not aware of the extent to which this is currently being done. If confirmed, I would review this area to determine if changes are necessary.

Question. What role do you believe Technology Readiness Levels (TRLs) and Manufacturing Readiness Levels (MRLs) should play in the Department's efforts to enhance effective technology transition and reduce cost and risk in acquisition programs?

Answer. TRLs and MRLs should serve as management tools to gauge the maturity of technologies that might be adopted by acquisition programs to meet performance or cost goals or adopted to achieve desired production capabilities.

MULTI-YEAR CONTRACTS

Question. The statement of managers accompanying section 811 of the National Defense Authorization Act for Fiscal Year 2008 addresses the requirements for buying major defense systems under multi-year contracts as follows: "The conferees agree that 'substantial savings' under section 2306b(a)(1) of title 10, U.S.C., means savings that exceed 10 percent of the total costs of carrying out the program through annual contracts, except that multi-year contracts for major systems providing savings estimated at less than 10 percent should only be considered if the Department presents an exceptionally strong case that the proposal meets the other requirements of section 2306b(a), as amended. The conferees agree with a Government Accountability Office finding that any major system that is at the end of its production line is unlikely to meet these standards and therefore would be a poor candidate for a multi-year procurement contract."

What are your views on multi-year procurements? Under what circumstances do you believe they should be used?

Answer. In general, I favor multi-year procurement strategies if they provide substantial savings and if there is a firm commitment to the planned procurement. I believe that multi-year procurements can offer substantial savings through improved economies in production processes, better use of industrial facilities, and a reduction in the administrative burden in the placement and administration of contracts. The potential for multi-year procurement can be a power incentive to suppliers to reduce cost and negotiated price but it also has the disadvantage of reducing the government's flexibility during the years the strategy is being executed. Some factors in deciding whether a program should be considered for multi-year procurement are: savings when compared to the annual contracting methods; validity and stability of the requirement and funding; associated technical risks; degree of confidence in the estimates of both contract costs and anticipated savings; and promotion of national security.

Question. What is your opinion on the level of cost savings that constitute "substantial savings" for purposes of the defense multi-year procurement statute, title 10, U.S.C. § 2306b?

Answer. I understand that there has been much debate over the threshold on the level of cost savings that constitutes "substantial savings." In my view the 10 percent figure cited in the conference manager's statement is a reasonable benchmark, but I would agree that it should not be an absolute definition, as the managers' statement provides. I agree with the need to ensure that the savings achieved from

multi-year contracts are substantial, not only in terms of dollars but also in terms of the relative difference in price that the Department would otherwise pay for an annual procurement.

Question. If confirmed, under what circumstances, if any, do you anticipate that you would support a multi-year contract with expected savings of less than 10 percent?

Answer. The complexity of each situation makes a general answer difficult. I believe that multi-year contracting can provide cost savings, and therefore it should be considered as an option to best serve the warfighter and taxpayer. The total magnitude of the savings that could be achieved and the firmness of the procurement plan would be key considerations.

Question. If confirmed, under what circumstances, if any, would you support a multi-year contract for a major system at the end of its production line?

Answer. The complexity of each situation makes a general answer difficult, but it could be appropriate in some circumstances to consider a program for multi-year procurement when it is nearing the end of production. As indicated above, the total magnitude of the savings that could be achieved and the firmness of the procurement plan would be key considerations.

Question. Under what circumstances, if any, do you believe that a multi-year contract should be used for procuring weapons systems that have unsatisfactory program histories, e.g., displaying poor cost, scheduling, or performance outcomes but which might otherwise comply with the requirements of the defense multi-year procurement statute, 10 U.S.C. § 2306b?

Answer. Additional analysis and careful review of all information should be completed whenever a multi-year contract is being considered for use in procuring weapon systems that have shown unsatisfactory program histories, but which otherwise comply with the statutory requirements. The Department would need to examine very carefully all risk factors to determine if a multi-year procurement would be appropriate.

Question. Under what circumstances, if any, should DOD ever break a multi-year procurement?

Answer. The cancellation of a multi-year contract should be a very rare event. However, there are circumstances when it could occur. One such event would be the failure to fund a program year. Another would be the failure of the contractor to perform, which ultimately could lead to a decision to terminate for default. In these circumstances, breaking a multi-year procurement could be appropriate or even required.

CONTINUING COMPETITION AND ORGANIZATIONAL CONFLICTS OF INTEREST

Question. The Defense Science Board Task Force on Defense Industrial Structure for Transformation recommended last summer that “DOD must increase its use of creative competitive acquisition strategies, within limited budgets, in order to ensure long-term innovation and cost savings, at both prime and critical sub-tier elements. Competition would not be required beyond the competitive prototype phase, as long as the current producer continuously improves performance and lowers cost—but other contractors should always represent a credible option if costs rise or performance is unacceptable.” Section 202 of the Weapon Systems Acquisition Reform Act of 2009 requires DOD to take steps to promote continuing competition (or the option of such competition) throughout the life of major defense acquisition programs.

Do you agree with the recommendation of the Defense Science Board? Do you believe that continuing competition is a viable option on major defense acquisition programs?

Answer. Yes, I believe that Department should use competitive acquisition strategies whenever possible. Competition is a powerful force in the marketplace, and I believe the Department should strive to use that kind of leverage as much as possible in its programs. I believe that Department should increase its use of creative competitive acquisition strategies as much as possible to ensure long-term innovation and cost savings.

Question. In your view, has the consolidation of the defense industrial base gone too far and undermined competition for defense contracts?

Answer. I do not have enough information to provide a definitive answer.

Question. If so, what steps if any can and should DOD take to address this issue?

Answer. It is my understanding that the Department continues to discourage mergers and acquisitions among defense materiel suppliers that are not in the Department’s interest or injurious to national security. I believe the Department should continue to work closely with the antitrust agencies in evaluating defense-

related mergers and mitigating negative impacts to ensure a robust, innovative, and competitive defense industry. If confirmed, I would work to adjust DOD transaction evaluation procedures/criteria as appropriate and I would look for creative ways to provide for competition in our programs.

Question. Section 203 of the Weapon Systems Acquisition Reform Act requires the use of competitive prototypes for major defense acquisition programs unless the cost of producing such prototypes would exceed the lifecycle benefits of improved performance and increased technological and design maturity that prototypes would achieve.

Do you support the use of competitive prototypes for major defense acquisition programs?

Answer. Yes, very much so. I believe that competitive prototypes provide an effective mechanism to mature key technologies, refine requirements, support preliminary design, improve cost estimation and reduce total costs. This does not mean competitive full scale prototypes are always the best acquisition approach, and I believe there are circumstances where there would not be a good business case for them. In these cases, prototyping at the subsystem level could be a preferred and viable strategy.

Question. Under what circumstances do you believe the use of competitive prototypes is likely to be beneficial?

Answer. I believe competitive prototypes could be beneficial in all cases where technologies are immature, alternative design concepts are available, requirements lack refinement, cost estimates are inadequately informed by demonstrated technical capability, and where competition is likely to drive down total cost.

Question. Under what circumstances do you believe the cost of such prototypes is likely to outweigh the potential benefits?

Answer. Given the long-term benefits that result from effective prototyping, I expect that there will be few instances where the cost of prototyping will outweigh the benefits. In some instances, such as where the materiel solution is based on mature, well integrated technologies and demonstrated designs, prototyping may be redundant. In addition, there are likely to be instances, such as some ship development programs, where the cost to develop competitive full system prototypes could be prohibitive. In those instances, I would focus on prototyping the subsystems with the greatest technical risk. Competitive prototyping requires the existence of viable competitors of course, but even in instances where there is only one viable supplier, risk reduction prototypes prior to Engineering and Manufacturing Development are likely to be beneficial to total program cost.

Question. Section 207 of the Weapon Systems Acquisition Reform Act requires the Department to promulgate new regulations to address organizational conflicts of interest on major defense acquisition programs.

What steps if any do you believe DOD should take to address organizational conflicts of interest in major defense acquisition programs?

Answer. Even the perception of an Organizational Conflict of Interest (OCI) may taint the integrity of the competitive procurement process. I support the requirements of the Weapons Systems Acquisition Reform Act and, if confirmed, would work with the Secretary in developing new Defense Federal Acquisition Regulation Supplement provisions and regulations or policies to tighten existing requirements to avoid, neutralize, or mitigate OCIs, to include limiting a contractor's ability to compete on certain future requirements. Additionally, I support the Department's activities to remedy OCIs when identified in the course of its review of defense-related mergers. If confirmed, I would highlight the sensitivity of the issue with the acquisition community and work to ensure that it is adequately reviewed when considering acquisition strategies and source selections.

Question. What are your views on the lead system integrator approach to managing the acquisition of major weapon systems?

Answer. The lead system integrator label has been applied to what are in reality "super-primes" with responsibilities for both systems integration and delivering baskets of multiple defense products. I believe that there is a need for systems integration across weapons systems, but there are other strategies to accomplish this goal then super-prime lead systems integrators. I also believe that inherently governmental functions should not be transferred to contractors.

Question. What are your views on the use of system engineering and technical assistance contractors that are affiliated with major defense contractors to provide "independent" advice to the Department on the acquisition of major weapon systems?

Answer. I believe that Systems Engineering and Technical Assistance support contractors are currently providing critical support to the Department's acquisition workforce. However, I believe these contractors should not be used to perform inher-

ently governmental functions and they should not be used in a situation where a conflict of interest or the appearance of a conflict of interest would exist. If confirmed, I would support the Department's efforts to increase Government staff and reduce its reliance on contractors and as indicated above I would work to implement the Weapons System Acquisition Reform Act provisions strengthening the conflict of interest regulations and policies.

Question. What lines do you believe the Department should draw between those acquisition responsibilities that are inherently governmental and those that may be performed by contractors?

Answer. When it comes to acquisition responsibilities, I believe that only Government personnel may make value judgments and decisions that obligate government funds and commit the Government contractually. I believe that contractors can support these functions, but that the Government must have the depth of expertise to analyze, validate, and understand any contractor provided information or analysis and make its own judgments about the obligation of Government funds and the management of Government contracts. I also recognize that a number of other important functions within the defense acquisition community should be retained for Government-only performance. Given the current workforce mix and the level of contracted support to acquisition functions, I believe a careful review is needed to assess the degree to which the Department has become too dependent on contractors.

Question. If confirmed, what steps if any would you take to ensure that defense contractors do not misuse their access to sensitive and proprietary information of DOD and other defense contractors?

Answer. It is my understanding that USD(AT&L) has issued guidance to information assurance and acquisition personnel to ensure strong measures are in place to prevent disclosure of this information at the individual contract level. I believe existing law covers misuse of this type of information and regulations will be strengthened as a result of WSARA mandated conflict of interest provisions. If confirmed, I would carefully review these measures to ensure they provide sufficient protection of sensitive and proprietary information and I would support the effort to strengthen regulations designed to prevent conflicts of interest that might provide incentives to misuse.

Question. If confirmed, what steps if any would you take to ensure that defense contractors do not unnecessarily limit competition for subcontracts in a manner that would disadvantage the Government or potential competitors in the private sector?

Answer. I believe that competition at both the prime and subcontract level is essential to the Department. If contractors are limiting competition at the subcontract level in a manner disadvantageous to the Government, it is unacceptable. If confirmed, I would review the Department's safeguards against this potential situation.

DEFENSE ACQUISITION TRANSFORMATION REPORT

Question. In February 2007, the Secretary of Defense submitted a report to Congress entitled "Defense Acquisition Transformation Report to Congress".

If confirmed, to what extent would you support and continue implementation of the defense acquisition reform initiatives set forth in that report? In particular, please discuss your views regarding the following aspects of transformation:

Answer.

- **Portfolio Management:** In general, I support the premise of Capability Portfolio Management, which is intended to provide an enterprise-level, horizontal (cross-component) view to better balance and harmonize joint warfighter capability needs. If confirmed, I would review the current construct to ensure it enables better-integrated and balanced advice across the full spectrum of capability needs to DOD senior leadership.
- **Tri-Chair Concept Decision:** I support harmonizing and ensuring good communication exists across the major Department processes for requirements, resources and acquisition and, if confirmed, would pursue management mechanisms that further those aims.
- **Time-Defined Acquisitions:** I am not familiar with the extent to which this concept has been implemented or what the effectiveness has been. I would agree that schedule is a key aspect of DOD acquisition decisionmaking and emphasizing time can force a much more realistic consideration of acquisition approaches and alternative technologies that can be fielded. Shorter times can also create less opportunity for requirement growth; and reduce the risk of technology and manufacturing obsolescence, but they can also increase risk if applied unrealistically. This approach may be most applicable to urgent oper-

ational needs, but again I am not familiar with how it has been implemented to date.

- Investment Balance Reviews: As with portfolio reviews, I believe there is value in looking broadly across the Department to assess the opportunities and national security threats across all the Services and to determine where to best focus our future investments.
- Risk-Based Source Selection: It is my understanding this initiative is to use techniques that enhance the quality of requests for proposals and source selections by improving technical criteria and making the Department a “smarter” buyer. If confirmed, I would review these efforts to ascertain whether they are effective and should be further strengthened.
- Acquisition of Services Policy: It is my understanding this policy imposed changes in the way the Department manages and reviews the performance of service contracts. I am aware that the Department spends more on service contracts than it does on major weapons systems, so this is an area of great concern.
- Systems Engineering Excellence: I believe that sound systems engineering is critical to acquisition programs throughout their life but especially in their early stages. If confirmed, I would encourage early and effective systems engineering and I would work closely with the Director of Systems Engineering to ensure the Department’s programs utilize sound systems engineering practices. I would also work to grow the size and the quality of the Government’s systems engineering workforce and to ensure that the industrial basis has adequate capacity in this area.
- Award Fee and Incentive Policy: I support linking award fee and incentive payments to objective measureable acquisition outcomes such as cost, schedule, and technical performance. If confirmed, I would intend to assess such initiatives and related policy and make any adjustments necessary to ensure that their intended purposes are being met.
- Open, Transparent, and Common Shared Data Resources with Defense Acquisition Management Information Retrieval (DAMIR): I am not familiar with DAMIR, but I understand that it currently provides enterprise visibility to acquisition program information. If confirmed, I would review the effectiveness of DAMIR and support initiatives focusing on implementation of open, transparent, and common shared data resources and steps that would improve the management of the Department’s programs.
- Restructured Defense Acquisition Executive Summary (DAES) Reviews: In my experience, the DAES reviews provide a forum for OSD to work with the Services and Agencies to evaluate program execution. I believe these kinds of oversight reviews are critical and must be based on objective information aimed at identifying problems early, getting to their root, and fixing them. I think it is equally important to learn what is working well and why. If confirmed, I would review this process to assess its effectiveness at meeting these goals and consider options to improve the process.
- Policy on Excessive Pass-Through Charges: I fully support ensuring that pass-through charges on contracts or subcontracts that are entered into for or on behalf of DOD are not excessive in relation to the cost of work performed by the relevant contractor or subcontractor.

Question. Are there other initiatives or tools discussed in the Defense Acquisition Transformation Report that you view as particularly likely, or unlikely, to be productive in achieving acquisition reform?

Answer. If confirmed, I would review the report fully to understand any additional proposed ways and means to improve the effectiveness and efficiency of the acquisition system and I would take appropriate action to implement those that are likely to be productive.

OPERATION OF THE DEFENSE ACQUISITION SYSTEM

Question. On December 2, 2008, the Department promulgated a new version of DOD Instruction 5000.02, the key guidance on the Department’s acquisition of major weapon systems. The revised instruction restructured the management framework for translating capability needs and technology opportunities into stable, affordable, and well-managed defense acquisition programs.

What is your assessment of the new version of this instruction and the extent of its implementation to date?

Answer. The new instruction is a constructive step, and if confirmed, I would ensure that it is effectively implemented and seek to improve upon it consistent with the Secretary’s guidance to improve acquisition.

Question. If confirmed, what steps would you take to continue implementation of the new version of DOD Instruction 5000.2 and improve upon it?

Answer. If confirmed, I would monitor the implementation and effectiveness of the new policies. If necessary, I would alter these or introduce additional policies to ensure that our programs comply with the Instruction and achieve cost, schedule, and performance objectives.

CONTRACTING FOR SERVICES

Question. Over the past 8 years, DOD's spending on contract services has more than doubled, with the estimated number of contractor employees working for the Department increasing from an estimated 730,000 in fiscal year 2000 to an estimated 1,550,000 in fiscal year 2007. As a result, the Department now spends more for the purchase of services than it does for products (including major weapon systems).

Do you believe that DOD can continue to support this rate of growth in its spending on contract services?

Answer. It is my understanding the rate of growth in this area may have leveled off somewhat over the past year or so and that Secretary Gates is committed to scale back the role of contractors in support services. If confirmed, I would intend to work with the Department's senior leadership to address the underlying question about whether the Defense Department is adequately staffed, quantitatively and qualitatively, to carry out its responsibilities. Even if the Department decreases its spending on contracted services while increasing funding for new civilian billets to perform functions previously accomplished by contractors, the Department would need to ensure there are a sufficient number of qualified Government civilian or military personnel dedicated to perform meaningful oversight of contractor activities. I believe that the Department also needs to look carefully at the content of the services that DOD is contracting for to ensure that these taxpayer dollars are being spent efficiently and on services that are truly needed.

Question. Do you believe that the current balance between Government employees (military and civilian) and contractor employees is in the best interests of DOD?

Answer. One of the biggest surprises to me in becoming familiar with current staffing levels since my nomination is the extent to which Government employees have been replaced by contractors since I left the Department 15 years ago. I understand that during this past year, Secretary Gates has committed to alter the mix between Government employees and contractor employees and that efforts are underway to in-source a number of functions. I am not familiar enough with the current situation to assess where the correct balance lies, but I fully support Secretary Gates' initiative and as the Department moves forward with in-sourcing I would, if confirmed, work to help ensure that a more appropriate balance is achieved.

Question. What steps if any would you take, if confirmed, to control the Department's spending on contract services?

Answer. If confirmed, I would work with the Department's senior leadership to analyze not only the amount of spending on contracted services, but also the degree to which contracted services are employed in the various functional support areas. As stated above, I believe that we need to look carefully at the content of the services that DOD is contracting for to ensure that these taxpayer dollars are being spent efficiently and on services that are truly needed.

Question. At the request of the committee, GAO has compared DOD's practices for the management of services contracts to the practices of best performers in the private sector. GAO concluded that leading companies have achieved significant savings by insisting upon greater visibility and management over their services contracts and by conducting so-called "spend" analyses to find more efficient ways to manage their service contractors. Section 801 of the National Defense Authorization Act for Fiscal Year 2002 required DOD to move in this direction. Sections 807 and 808 of the National Defense Authorization Act for Fiscal Year 2008 built on this provision by requiring inventories and management reviews of contracts for services.

Do you believe the Department is providing appropriate stewardship over service contracts?

Answer. I do not have sufficient knowledge to make an assessment at this time. If confirmed, ensuring appropriate oversight of service contracts would be a high priority for me.

Question. Do you believe that the Department has appropriate management structures in place to oversee the expenditure of more than \$150 billion a year for contract services?

Answer. I have not had an opportunity to assess the management structures that are in place, but if confirmed, I would work with the Department's senior leadership

to make the necessary adjustments in order to implement President Obama's direction to carry out robust and thorough management and oversight of contracts, including contracts for services.

Question. Do you believe that the Department should conduct a comprehensive analysis of its spending on contract services, as recommended by GAO?

Answer. Although I am not familiar with the specific GAO recommendations regarding a comprehensive analysis, I agree that a comprehensive analysis of spending on contracted services is necessary. I understand some efforts are underway, but I do not know the extent to which such a review may have already been carried out. If confirmed I would work to ensure that this is done effectively.

Question. Do you support the use of management reviews, or peer reviews, of major service contracts to identify "best practices" and develop lessons learned?

Answer. Yes.

Question. If confirmed, will you fully comply with the requirement of section 807 of the National Defense Authorization Act for Fiscal Year 2008, to develop an inventory of services performed by contractors comparable to the inventories of services performed by Federal employees that are already prepared pursuant to the Federal Acquisition Inventory Reform (FAIR) Act?

Answer. Yes.

Question. What additional steps if any would you take, if confirmed, to improve the Department's management of its contracts for services?

Answer. If confirmed, I would make a point of emphasizing to senior leaders the vital role they must play in diligently managing service contracts in a way that maximizes the benefit to the warfighter and the taxpayer. I would assist the USD(AT&L) in identifying and reviewing, and as appropriate implementing, additional steps that would improve the management of contracts for services.

CONTRACTOR PERFORMANCE OF CRITICAL GOVERNMENTAL FUNCTIONS

Question. Over the last decade, the Department has become progressively more reliant upon contractors to perform functions that were once performed exclusively by Government employees. As a result, contractors now play an integral role in areas as diverse as the management and oversight of weapons programs, the development of personnel policies, and the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as DOD employees.

In your view, has DOD become too reliant on contractors to support the basic functions of the Department?

Answer. Although I do not have detailed knowledge, it appears to me that the Department may have become overly reliant on support contractors. If confirmed, I would be particularly focused on ensuring we make the necessary adjustments to ensure the Defense Acquisition Workforce is not overly reliant on support contractors.

Question. Do you believe that the current extensive use of personal services contracts is in the best interest of DOD?

Answer. I do not have detailed knowledge of this subject and am unable to make a judgment, but I am concerned that this may be a problem that needs addressing and if confirmed I would work to understand the situation and take appropriate action as needed within the scope of my responsibilities.

Question. What is your view of the appropriate applicability of personal conflict of interest standards and other ethics requirements to contractor employees who perform functions similar to those performed by Government employees?

Answer. I am not familiar with the details of how personal conflict of interest standards are being applied to contractor employees today. I do believe that support contractor employees who have access to sensitive or source selection sensitive information, should be subject to similar ethical standards as the Government employees they support.

Question. U.S. military operations in Iraq and Afghanistan have relied on contractor support to a greater degree than any previous U.S. military operations. According to widely published reports, the number of U.S. contractor employees in Iraq and Afghanistan have exceeded the number of U.S. military deployed in those countries.

Do you believe that DOD has become too dependent on contractor support for military operations?

Answer. I am not familiar enough with the details of how contractor support is being used to support military operations to have a firm opinion. I know that contractors are providing many necessary services in support of military operations and that the numbers are large, but I do not know if the Department has become too

dependent on their support. It is my understanding that Deputy Secretary Lynn issued a directive to the Secretaries of the military departments and combatant commanders to undertake a review of all contracted services for possible in-sourcing as a part of a Total Force Management Strategy. If confirmed, I would work with the senior leadership of the Department to carry out this directive and to take any necessary corrective action within the scope of my responsibilities.

Question. What risks do you see in the Department's reliance on such contractor support? What steps do you believe the Department should take to mitigate such risk?

Answer. I believe the largest risks with such a large reliance on contractor support is assured availability of those services in combat zones in the future and the Department losing critical core knowledge of inherently governmental functions. The first step in mitigating such risk is to ensure the senior leaders have accurate information so that they have a clear understanding of the risks given the current work-force mix between military, civilian and contractors. Once the risks are fully understood, mitigating options should be considered as needed.

Question. Do you believe the Department is appropriately organized and staffed to effectively manage contractors on the battlefield?

Answer. I do not have the knowledge necessary to provide a definitive answer. It is my understanding that there have been shortcomings in recent years, and if confirmed, I would intend to actively participate in taking action to address any such shortcomings.

Question. What steps if any do you believe the Department should take to improve its management of contractors on the battlefield?

Answer. It is my understanding the USD(AT&L) has developed guidance and tools to improve the management of contractors on the battlefield and is developing additional guidance at this time. If confirmed, I would review these initiatives and take steps to ensure appropriate attention is given to this issue.

PRIVATE SECURITY CONTRACTORS

Question. The Special Inspector General for Iraq Reconstruction (SIGIR) recently reported that Federal agencies including DPD have spent more than \$5 billion for private security contractors in Iraq since 2003. Over this period, there have been numerous reports of abuses by private security contractors, including allegations of contractors shooting recklessly at civilians as they have driven down the streets of Baghdad and other Iraqi cities. In September 2007, employees of Blackwater allegedly opened fire on Iraqis at Nisour Square in downtown Baghdad, killing more than a dozen Iraqis and wounding many more. Most recently, private security contractors were reported to have engaged in inappropriate activities at the U.S. embassy in Kabul.

Do you believe DOD and other Federal agencies should rely upon contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. I believe that the use of private security contractors, and more generally the use of contractors in wartime, deserves careful review and other alternatives should be considered, particularly in highly hazardous public areas. I also believe that if physical security contractors are used that they should not be allowed to operate with legal impunity for their actions.

Question. In your view, has the U.S. reliance upon private security contractors to perform such functions risked undermining our defense and foreign policy objectives in Iraq and Afghanistan?

Answer. I believe that all Americans and American employees in combat theaters, including military personnel and contractors, must display proper conduct or they will undermine our objectives. The failure to do so can have and has had an effect on defense and foreign policy objectives. In my view even if there is a compelling need for private security contractors, despite any risks associated with their use, they must be properly screened, trained, supervised, and held accountable for any misconduct.

Question. What steps if any would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. I believe that using private security contractors in any area of combat operations must be fully coordinated across the Government to ensure there are consistent procedures and policies for all such contractors. There must also be effective legal accountability for the actions of private security contractors and as stated

above they must be properly screened, trained, and supervised. If confirmed, I would review further steps that should be taken to ensure that this is the case.

Question. Do you support the extension of the Military Extraterritorial Jurisdiction Act to private security contractors of all Federal agencies?

Answer. I am not an expert in this area, but it is my understanding that DOD has consistently supported unambiguous application of the Military Extraterritorial Jurisdiction Act (MEJA) to all U.S. Government private security contractors operating in contingency areas. In the absence of another effective mechanism to ensure legal accountability I would support the extension of MEJA to all Federal agencies.

Question. What is your view of the appropriate application of the Uniform Code of Military Justice (UCMJ) to employees of private security contractors operating in an area of combat operations?

Answer. I support the use of appropriate civilian and military legal processes to enforce accountability for the actions of all contractors deployed to an area of combat operations. I believe that in the absence of an effective civil legal system that the UCMJ could provide an acceptable alternative for holding people accountable for their actions; however, I understand that there may be legal issues associated with applying the UCMJ to civilian contractors that might have to be resolved.

Question. Office of Management and Budget Circular A-76 defines "inherently governmental functions" to include "discretionary functions" that could "significantly affect the life, liberty, or property of private persons."

In your view, is the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations an inherently governmental function?

Answer. I understand that DOD's position is that the decision to use private security contractors (including subcontractors) is in compliance with current U.S. Government policy and regulations. I have no basis to question that legal position.

Question. In your view, is the interrogation of enemy prisoners of war and other detainees during and in the aftermath of hostilities an inherently governmental function?

Answer. The role of DOD contractors in various circumstances raises issues of appropriateness, and if confirmed I would intend to participate in shaping policies regarding the appropriate use of contractors to the extent appropriate given the scope of my responsibilities.

Question. Do you see a need for a comprehensive reevaluation of these issues now?

Answer. I believe this type of evaluation could support efforts to strengthen current operations as well as to more fully understanding the appropriate roles and capabilities of contractors supporting the Department in future operations, but I am not familiar with any reviews that may have been conducted or be in progress.

GOVERNMENT CONTRACTING REFORM

Question. In a memorandum to the heads of all Federal agencies, the President on March 4, 2009, directed a Government-wide review of contracting procedures, stating that "executive agencies shall not engage in noncompetitive contracts, except in those circumstances where their use can be fully justified and where appropriate safeguards have been put in place to protect the taxpayer."

If confirmed, what role would you play in determining whether the use of non-competitive contracts could be fully justified?

Answer. If confirmed, I would continue to emphasize the importance of competition. I would also review the existing processes to see if additional guidance or adjustments are required pursuant to the President's guidance. For programs whose acquisition strategies are reviewed by the USD(AT&L), I would expect to be involved in the determination as to whether competition had been appropriately provided for in the acquisition strategy and I would work closely with the Service acquisition executives and agency heads to ensure that competitive opportunities are maximized. It is also my understanding that the Department is taking steps to reinvigorate the role of the Competition Advocate to ensure that they are actively participating in acquisition strategy determinations and are engaged in the review of noncompetitive contracts.

Question. In your opinion, how would the direction in this memo affect the use of single-award and multiple-award Indefinite Delivery/Indefinite Quantity (IDIQ) contracts?

Answer. I support the direction in the memo emphasizing competition and appropriate use of various contract types and to my knowledge, the memo will not restrict the use of single and multiple award IDIQ contracts. It is my understanding that the Department does not support the use of single-award IDIQ contracts unless they

are absolutely necessary. If confirmed, I would intend to review these practices pursuant to the President's guidance.

CONTRACTING METHODS

Question. The Office of Federal Procurement Policy and DOD have long agreed that Federal agencies could achieve significant savings and improved performance by moving to "performance-based services contracting (PBSC)." Most recently, the Army Environmental Program informed the committee that it has achieved average savings of 27 percent over a period of several years as a result of moving to fixed-price, performance-based contracts for environmental remediation. Section 802 of the National Defense Authorization Act for Fiscal Year 2002, as amended, established performance goals for increasing the use of PBSC in DOD service contracts.

What is the status of the Department's efforts to increase the use of PBSC in its service contracts?

Answer. I am not yet in a position to provide the status of the Department's efforts to increase the use of "performance based services" methodologies in service contracts. However, if confirmed, I would review the Department's efforts to increase the use of PBSC.

Question. What additional steps if any do you believe the Department needs to take to increase the use of PBSC and meet the goals established in section 802?

Answer. I am not yet in a position to express a view on this subject. If confirmed, I would assess the Department's efforts in this area and ensure that appropriate steps are taken.

Question. In recent years, DOD has relied heavily on time-and-materials contracts for the acquisition of services. Under such a contract, the Department pays a set rate per hour for contractor services, rather than paying for specific tasks to be performed. In some cases, contractors have substituted less expensive labor under time-and-materials contracts, while continuing to charge Federal agencies the same hourly rates, resulting in effective contractor profits of 25 percent or more.

What is your view of the appropriate use of time-and-materials (T&M) contracts by DOD?

Answer. In my view, the use of T&M contracts often represents a poor business arrangement for the Government. If confirmed, I would engage to fully support appropriate limitations on the use of T&M contracts.

Question. What steps if any do you believe the Department should take to minimize the abuse of time-and-materials contracts?

Answer. It is my understanding that the Department has taken steps to minimize the abuse of T&M contracts but I do not have detailed knowledge of those actions. If confirmed, I would review the various initiatives and determine what, if any, additional measures are necessary to limit the use and abuse of T&M contracts.

Question. Section 852 of the John Warner National Defense Authorization Act for Fiscal Year 2007 requires DOD to promulgate regulations prohibiting excessive "pass-through" charges on DOD contracts. Pass-through charges are charges added by a contractor for overhead and profit on work performed by one of its subcontractors, to which the contractor provided no added value. In some cases, pass-through charges have more than doubled the cost of services provided to DOD.

What is your view of the regulations promulgated by DOD to implement the requirements of section 852?

Answer. While I have not had the opportunity to analyze this matter sufficiently in order to form an opinion, if confirmed, I would carefully review the regulations being implemented. I do believe that effective regulations to prevent excessive "pass-through" profits are necessary.

Question. What additional steps if any do you believe the Department should take to address the problem of excessive pass-through charges?

Answer. I do not have enough information to make a recommendation at this time.

INTERAGENCY CONTRACTING

Question. GAO recently placed interagency contracting—the use by one agency of contracts awarded by other agencies—on its list of high-risk programs and operations. While interagency contracts provide a much-needed simplified method for procuring commonly used goods and services, GAO has found that the dramatic growth of interagency contracts, the failure to clearly allocate responsibility between agencies, and the incentives created by fee-for-services arrangements, have combined to expose DOD and other Federal agencies to the risk of significant abuse and mismanagement. The DOD Inspector General and the General Services Administration Inspector General have identified a long series of problems with interagency

contracts, including lack of acquisition planning, inadequate competition, excessive use of T&M contracts, improper use of expired funds, inappropriate expenditures, and failure to monitor contractor performance. DOD, in conjunction with the General Services Administration and the Office of Management and Budget, is taking a number of actions to improve training and guidance on the use of this contract approach.

If confirmed, what steps if any will you take to monitor and evaluate the effectiveness of the actions currently underway or planned regarding DOD's use of other agencies' contracts?

Answer. I am not yet in a position to offer recommendations on this subject. However, interagency contracting can be an efficient and effective method to meet mission requirements, but it must be done in a way that gives best value to the taxpayer. If confirmed, I would carefully review and evaluate whether or not current or planned actions are effective and assess whether additional measures are warranted.

Question. Do you believe additional authority or measures are needed to hold DOD or other agency personnel accountable for their use of interagency contracts?

Answer. I am not yet in a position to express a view on this subject. However, if confirmed, I would review and evaluate whether or not additional authorities or measures are warranted.

Question. Do you believe contractors have any responsibility for assuring that the work requested by DOD personnel is within the scope of their contract?

Answer. My understanding is that the primary responsibility for ensuring work is within the scope of the contract rests with the contracting officer. I believe that if a contractor is uncertain whether or not supplies or services ordered are within scope of their contract they should consult with the contracting officer before expending any resources on the requested work.

Question. Do you believe that DOD's continued heavy reliance on outside agencies to award and manage contracts on its behalf is a sign that the Department has failed to adequately staff its own acquisition system?

Answer. I am not aware of the extent to which this practice is being followed nor of the extent to which it may reflect a problem with Department staffing levels, so I am not yet in a position to express a view on this subject; however, if confirmed, I would examine whether or not the Department is adequately staffed to manage and execute its contracts. The Department should only utilize the expertise of non-DOD agencies operating under Congressional authority to acquire supplies and services if those agencies have demonstrated that they contract for our goods and services efficiently, effectively, in accordance with DOD policy and if they provide a cost effective alternative to direct DOD management.

ACQUISITION OF INFORMATION TECHNOLOGY

Question. Most of the Department's Major Automated Information System (MAIS) acquisitions are substantially over budget and behind schedule. In particular, the Department has run into unanticipated difficulties with virtually every new business system it has tried to field in the last 10 years.

Do you believe that unique problems in the acquisition of business systems require different acquisition strategies or approaches?

Answer. Yes.

Question. What steps if any do you believe DOD should take to address these problems?

Answer. I have not had an opportunity to review how the Department is currently addressing the acquisition of business systems so it would be premature for me to express an opinion. If confirmed, I would review the current practices to see if changes are necessary.

Question. If confirmed, how would you work with the Chief Information Officer (CIO) of DOD to take these steps?

Answer. If confirmed, I would work closely with the DOD CIO and I would ensure the OUSD (AT&L) staff and the DOD CIO staff work closely together to identify and take any steps needed to improve the acquisition of the Department's business systems.

Problems with computer software have caused significant delays and cost overruns in a number of major defense programs. Section 804 of the National Defense Authorization Act for Fiscal Year 2003 required DOD to establish a program to improve the software acquisition process.

Question. What steps if any would you take, if confirmed, to address delays and cost overruns associated with problems in the development of software for major weapon systems?

Answer. If confirmed, I would review the implementation of section 804 and make any necessary recommendations for improvement. I believe many of the challenges in the past were the result of factors such as inadequate technical maturity, undisciplined or poorly understood requirements, poor configuration management practices, the lack of disciplined and mature software development processes, and shortages of qualified people. If confirmed, I would work to identify the root causes of the Department's software development problems, identify solutions and implement appropriate corrective action.

Question. What role if any do you believe that the Chief Information Officer of DOD should play with regard to the acquisition of information technology that is embedded in weapon systems?

Answer. Information technology is ubiquitous and integral to any weapon system today and I believe the Chief Information Officer of DOD can and should play a key role in advising on information technology and interoperability matters affecting weapon systems.

Question. Section 804 of the National Defense Authorization Act for Fiscal Year 2010 would require the Secretary of Defense to establish a new acquisition process for information technology programs.

Do you believe that the acquisition of information technology (IT) systems is sufficiently different from the acquisition of other systems to justify the development of a unique acquisition process?

Answer. While the acquisition of IT systems is similar to the acquisition of other systems in many ways, I believe they are sufficiently different that the Department should consider an alternative or tailored IT acquisition process but I have not had an opportunity to examine specific proposals. If confirmed, I would review any existing proposals and take appropriate action.

Question. If so, what do you see as the unique features that would be desirable for an information system acquisition process? What types of information technology programs do you believe should be covered by the new process?

Answer. I have not reviewed this subject in any detail, however some features of the new process that might be desirable include: relatively short duration increments/releases of capability; better informed cost estimates; and more frequent progress reviews. I also believe that strong incentive provisions should be a key feature of any dedicated information systems acquisition process.

ACQUISITION WORKFORCE

Question. Over the last 15 years, DOD has reduced the size of its acquisition workforce by almost half, without undertaking any systematic planning or analysis to ensure that it would have the specific skills and competencies needed to meet DOD's current and future needs. Since September 11, 2001, moreover, the demands placed on that workforce have substantially increased. While DOD has started the process of planning its long-term workforce needs, the Department does not yet have a comprehensive strategic workforce plan needed to guide its efforts.

Do you believe that DOD's workforce is large enough and has the skills needed to perform the tasks assigned to it?

Answer. Not at this time, but I know that actions are underway to improve the situation. Secretary Gates has announced his intent to increase the size of the DOD acquisition workforce by approximately 20,000. If confirmed, improving both the size and the quality of the acquisition workforce would be a high priority for me.

Question. In your view, what are the critical skills, capabilities, and tools that DOD's workforce needs for the future? What steps will you take, if confirmed, to ensure that the workforce will, in fact, possess them?

Answer. The needed skills include program management, systems engineering, other engineering disciplines, test planning and management, contracting, cost estimating, risk management, pricing, manufacturing process management, and quality control among the capabilities that are essential for ensuring sound acquisition outcomes. If confirmed, I would actively support Secretary Gates' initiative to increase the size of the acquisition workforce and I would work to ensure that a balanced set of capabilities exists to fulfill the Department's roles in acquisition.

I believe the Department must attract talented people into the acquisition workforce; give them challenging work; retain capable people; and ensure all the Department's acquisition employees are fully trained and qualified for the mission critical work they are asked to perform. If confirmed, I would strive to ensure a high quality, high performance work environment where employees are valued and effective members of the DOD acquisition workforce are properly rewarded for their efforts.

Question. Do you agree that the Department needs a comprehensive human capital plan, including a gap analysis and specific recruiting, retention and training goals, to guide the development of its acquisition workforce?

Answer. In general, yes. I am not familiar with what the Department has done in this regard, but I believe that a comprehensive human capital plan that addresses recruiting and hiring, recognition and retention, and training and workforce development would be beneficial.

Question. What steps if any do you think are necessary to ensure that the Department has the ability it needs to attract and retain qualified employees to the acquisition workforce?

Answer. If confirmed, I would do all I can to ensure we have a properly sized, highly qualified, professional acquisition workforce. I understand that the largest numbers of people in the acquisition workforce are engineering, scientific and technical professionals, followed by business-oriented people, such as contracting officers. The acquisition workforce must be agile, flexible, and prepared to adapt our buying practices to match our national security needs. To attract and retain high quality people the Department must provide challenging and rewarding work and competitive compensation. I believe that there is nothing more inherently rewarding than serving one's country as the men and women of our Armed Forces and our civilian employees do and I will work to see that this attitude permeates our recruiting and retention efforts.

Question. What are your views regarding assertions that the acquisition workforce is losing its technical and management expertise and is beginning to rely too much on support contractors, Federally-Funded Research and Development Centers (FFRDCs), and, in some cases, prime contractors for this expertise?

Answer. My impression is that this is the case, at least to some degree; however, I have not reviewed any data that would confirm the extent of the problem. High quality government professionals are critical to protecting the interests of the warfighter and the taxpayer. I believe that it is important that the Department strike the right balance between our organic capability and contractor support personnel. If confirmed, I would work to understand how many support contractors we have, what they are doing, and at what cost and I would work to better understand the roles of FFRDCs and any limitations on their contributions. Once I have this information I would be in a position to assess the magnitude of the problem and to develop specific recommended solutions as needed.

Question. What is the appropriate tenure for program managers and program executive officers to ensure continuity in major programs?

Answer. I believe that program managers and program executive officers need to be in their positions long enough to be accountable for their decisions in successfully meeting appropriate milestones. The people who take on the responsibilities of these positions must be fully qualified professionals. I am aware that there are statutory tenure requirements prescribed for these and other key leadership positions, which I support. If confirmed, I would examine closely how well this policy is being implemented.

Question. Section 852 of the National Defense Authorization Act for Fiscal Year 2008 established an Acquisition Workforce Development Fund to help DOD address shortcomings in its acquisition workforce. The fund would provide a minimum of \$3 billion over 6 years for this purpose.

Do you believe that the Acquisition Workforce Development Fund is needed to ensure that DOD has the right number of employees with the right skills to run its acquisition programs in the most cost effective manner for the taxpayers?

Answer. Yes.

Question. If confirmed, what steps if any will you ensure that the money made available through the Acquisition Workforce Fund is spent in a manner that best meets the needs of DOD and its acquisition workforce?

Answer. Working with the USD(AT&L), I would, if confirmed, review the process and initiatives in place to ensure critical resources are allocated to the greatest needs.

PROCUREMENT FRAUD, INTEGRITY, AND CONTRACTOR RESPONSIBILITY ISSUES

Question. Recent acquisition scandals have raised concerns about the adequacy of existing mechanisms to uphold procurement integrity and prevent contract fraud.

What is your view of the adequacy of the tools and authorities available to DOD to ensure that its contractors are responsible and have a satisfactory record of integrity and business ethics?

Answer. I have not had an opportunity to review the existing tools and authorities and am not in a position to comment or make a recommendation.

Question. In your view, are current “revolving door” statutes effective?

Answer. I do not have any information that would permit me to assess the effectiveness of the current “revolving door” statutes.

Question. What tools other than law enforcement measures could be used to help prevent procurement fraud and ethical misconduct?

Answer. It is my understanding that the Department’s Panel on Contracting Integrity has developed tools and information to identify and root out fraud. Specifically, the Panel has drafted a handbook of acquisition fraud indicators in scenario form for training and awareness. I have not reviewed these products, however, if confirmed, I would assess these tools to determine whether existing measures are adequate.

Question. Are there sufficient enforcement mechanisms to ensure compliance with laws and regulations?

Answer. To the best of my knowledge there are sufficient enforcement mechanisms under existing laws and regulations.

“BUY AMERICA”

Question. “Buy America” issues have been the source of considerable controversy in recent years. As a result, there have been a number of legislative efforts to place restrictions on the purchase of defense products from foreign sources.

What benefits do you believe the Department obtains from international participation in the defense industrial base?

Answer. I do not have any information that would allow me to assess the degree to which these benefits are being realized in practice, however the potential benefits are many. I believe international participation in the defense industrial base serves to promote the interoperability, standardization, and rationalization of the conventional defense equipment used by the Armed Forces of the United States, its allies and other friendly governments. It also can help to avoid or reduce duplication in research and development initiatives and can lead to economies of scale in production of systems. These attributes can lead to savings in terms of the time and money needed to develop, produce, support, and sustain the materiel needed and used by our warfighters. In many cases, it enables the Department to achieve the advantages of competition in contracting, which includes the ability to obtain world class, best value products for our warfighters. Further, international participation in the defense industrial base encourages development of mutually beneficial industrial linkages that enhance U.S. industry’s access to global markets and exposes U.S. industry to international competition, helping to ensure that U.S. firms remain innovative and efficient.

Question. Under what conditions, if any, would you support the imposition of domestic source restrictions for a particular product?

Answer. In certain instances, involving national security or the preservation of a key defense technology, design capability, or production capability, domestic source restrictions may be advisable. The Department holds (and, I understand, has exercised) the authority to “self-impose” such domestic source restrictions.

Question. Section 831 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 requires the Secretary of Defense to ensure that the U.S. firms and U.S. employment in the defense sector are not disadvantaged by unilateral procurement practices by foreign governments, such as the imposition of offset agreements in a manner that undermines the U.S. industrial base.

What steps if any do you believe the Department should take to implement this requirement?

Answer. I am not familiar enough with the ongoing steps to make a recommendation. I understand that DOD participates in an Interagency Working Group consisting of representatives from the Departments of Labor, Commerce, State and the U.S. Trade Representative to consult with other nations about limiting the adverse effects of offsets. The interagency team, chaired by the USD(AT&L), conducts consultations with foreign nations and domestic entities, including defense contractor associations and labor organizations regarding the effect of offset requirements. If confirmed, I intend to support the Secretary of Defense to make every effort to ensure that the policies and practices of the Department reflect the goal of establishing an equitable trading relationship between the United States and its foreign defense trade partners.

Question. The Defense Science Board Task Force on “Defense Industrial Structure for Transformation” found in July 2008 that U.S. policy regarding “Buy America” and the “Berry Amendment” inhibits the Nation from gaining the security and economic benefits that could be realized from the global marketplace.

What is your opinion of “Buy America” legislation and the “Berry Amendment”?

Answer. I have not had the opportunity to review the Defense Science Board Report or to evaluate its recommendations and I am not adequately familiar with the details of the existing restrictions to evaluate their costs and benefits. If confirmed, I would review this area and make recommendations for change that I concluded were needed.

THE DEFENSE INDUSTRIAL BASE

Question. What is your view of the current state of the U.S. defense industry?

Answer. I have not had the opportunity to review a detailed assessment of the health of the industrial base. Our defense and technology industrial base does develop, produce, and support militarily superior defense systems that are the most capable in the world; however I am concerned that some trends in defense investment may be having a negative effect on the Nation's industrial base. If confirmed, I would work to understand this situation in depth and to assess the need for actions that might be necessary or prudent to ensure the continued health of the industrial base.

Question. Do you support further consolidation of the U.S. defense industry?

Answer. I believe that the competitive pressure of the marketplace remains the best vehicle to shape an industrial environment that supports the defense strategy and that preserving competition is important to national security. As indicated in response to a previous question, I do not have enough information to provide a definitive answer about the acceptability of further consolidation, but I suspect that the situation varies depending on the industrial base sector considered. If confirmed, I would work with the Director of Industry Policy and others to understand this situation. If confirmed, I would also oppose business combinations when it is necessary to do so in order to maintain appropriate competition and develop and/or preserve industrial and technological capabilities (at all levels of the supply chain) that are essential to defense.

I support the Department's overall policy to review each proposed merger, acquisition, and teaming arrangement on its particular merits in the context of the individual market and the changing dynamics of that market. If confirmed, I would work with Department leadership to evaluate options to address continued consolidation.

Question. What is your position on foreign investment in the U.S. defense sector?

Answer. Generally, with appropriate security protections, I am not opposed to foreign investment in the defense sector; however, each investment must be considered on its own merits. Foreign firms can enhance competition which can lower costs of specific defense systems, as well as provide for the inclusion of leading edge technologies which have been developed abroad. In addition, such investment in the long-run will increase interoperability between the United States and its allies. Nevertheless, the Department must ensure that foreign investment in the defense sector does not create risks to national security. I support strong DOD participation in the Committee on Foreign Investment in the U.S. (CFIUS) which conducts national security reviews of foreign acquisitions of U.S. firms. I also support strong DOD participation in implementation of the export control laws to help ensure that defense-relevant U.S. technologies resident in foreign-owned firms with DOD contracts are not transferred overseas or to foreign nationals without proper authorization.

Question. What steps if any do you believe DOD should take to ensure the continued health of the U.S. defense industry?

Answer. If confirmed, I would support the Department's current strategy to rely as much as possible on competitive free market forces to create, shape, and sustain the industrial and technological capabilities needed to provide for the Nation's defense. However, I also believe that the Department needs to thoroughly understand the current and projected health of the industrial base across the spectrum of defense products and at all levels of the supply chain and should be willing to take action, within the range of options available to the Department, to ensure the continued health of the base where necessary. If confirmed, I would work to ensure sound acquisition practices that would inherently strengthen the industrial base, and I would include industrial base considerations as a factor in acquisition decisions where appropriate.

MANUFACTURING ISSUES

Question. The recent Defense Science Board (DSB) study on the Manufacturing Technology Program made a number of findings and recommendations related to the role of manufacturing research and capabilities in the development and acquisition of defense systems.

Have you reviewed the findings of the DSB Task Force on the Manufacturing Technology Program?

Answer. Not in detail, however I have been made aware of some of the recommendations in the report.

Question. What recommendations, if any, from the Task Force would you plan to implement if confirmed?

Answer. I understand that the overarching recommendation of the DSB report was to give "leadership emphasis" to manufacturing technology, and, if confirmed, I would definitely do so. Manufacturing technology can be an enabler for weapons systems production and a source of major cost savings. I also understand that the DSB recommended that manufacturing readiness should be assessed more rigorously before programs pass into production. I would agree that manufacturing readiness is an important consideration in the decision to enter production and if confirmed I would review current processes to ensure that manufacturing readiness is properly assessed.

Question. What incentives do you plan to use to enhance industry's incorporation and utilization of advanced manufacturing processes developed under the manufacturing technology program?

Answer. I have not reviewed the incentives the Department is currently using and can not comment on their adequacy or whether additional steps are necessary. In general, competitive pressure should provide the most cost effective manufacturing technologies, but where those pressures do not exist other mechanisms may have to be implemented. If confirmed, I would work to identify and implement appropriate mechanisms.

SCIENCE AND TECHNOLOGY

Question. What, in your view, is the role and value of science and technology programs in meeting the Department's transformation goals and in confronting irregular, catastrophic, traditional and disruptive threats?

Answer. I believe science and technology play a large role as the Department takes on the challenge of accomplishing an expanded range of missions, just as it does in improving the Department's capabilities for current missions. The threats to our national security have expanded into cyberspace as well as physical space. The threats the Nation faces have also expanded to include terrorist groups, insurgencies, and innovative competitors who seek to defeat our existing technical advantages. I believe the Department needs science and technology programs that respond to current, emerging, and future threats of all types.

Question. If confirmed, what direction will you provide regarding funding targets and priorities for the Department's long-term research efforts?

Answer. I have not had the opportunity to review the Department's planned technology investments in detail and I understand there are a number of reviews in progress that could shape the future direction of the Department. If confirmed, I would carefully review all technology funding portfolios in light of the results of these reviews in order to assess whether the Department's funding targets and priorities are aligned with its strategic direction.

Question. What specific metrics would you use, if confirmed, to assess whether the Department is making adequate investments in its basic research programs?

Answer. If confirmed, I would work with the DDR&E and the military Services and agencies to assess the adequacy of the Department's investments in basic research. There are a number of metrics available to assess whether the Department is making an adequate investment in basic research. Metrics to consider include: growth or decline in real dollars of the basic research program; change in number of projects; proportion of DOD-funded researchers in key science disciplines; trends in the number of patents that result by field, and number of students supported by the basic research program investments.

Question. Do you feel that there is sufficient coordination between and among the science and technology programs of the military Services and defense agencies?

Answer. I am aware that there are coordination mechanisms in place for the Department's S&T program. If confirmed, I would look at this issue more closely in cooperation with the DDR&E to determine if current coordination is adequate. At this time I do not have the information to make an assessment of the adequacy of the existing coordination mechanisms.

Question. What is the Department's role and responsibility in addressing national issues related to science, technology, engineering, and mathematics (STEM) education and workforce development?

Answer. I believe that the Department should take a proactive role in ensuring that the Nation has an adequate STEM workforce. In addition to encouraging

STEM workforce development through its research investments and education outreach efforts, I believe DOD needs to work closely with the Office of Science and Technology Policy, the National Science Foundation, and other Federal components concerned with science, engineering and mathematics education adequacy.

Question. What steps if any would you take to support efforts to ensure that the Nation has the scientific and technical workforce needed for its national security technological and industrial base?

Answer. I am aware of several activities within DOD, such as the National Defense Education Program and the National Security Science and Engineering Fellows program, that aim to expand the pool of scientists and engineers able to contribute to the national security technological and industrial base. If confirmed, I would work with the DDR&E to determine how well these programs and others like them meet the Department's science and technical workforce needs.

Question. How would you use science and technology programs to better reduce technical risk and therefore potentially reduce costs and schedule problems that accrue in large acquisition programs?

Answer. Science and technology programs, particularly in applied research and advanced development, can have a substantial impact on improving technological readiness, and thereby reduce technical risk. I believe there is an opportunity to expand the ties from these programs to large acquisition programs, particularly between Milestones A and B. If confirmed I will work with the DDR&E and the Service acquisition executives to ensure that this linkage is strengthened.

Question. Do you feel that the science and technology programs of DOD are too near-term focus and have over emphasized technology transition efforts over investing in revolutionary and innovative research programs?

Answer. I do not have the information to make this assessment at this time. If confirmed, I would review the balance between near- and far-term innovative research. The DOD S&T program should be balanced so there are opportunities for both a capabilities pull, responding to the warfighter's needs, and a technology push, responding to the promise of new technology. If confirmed, I would work with the DDR&E to ensure that this is the case.

Question. Are you satisfied that the Department has a well articulated and actionable science and technology strategic plan?

Answer. I have not had the opportunity to review the Department's existing science and technology strategic plans. If confirmed, I would work with the DDR&E and others to ensure the plans have clear and actionable guidance.

Question. Do you see a need for changes in areas such as hiring authority, personnel systems, financial disclosure and ethics requirements, to ensure that the Department can recruit and retain the highest quality scientific and technical workforce possible?

Answer. I believe any modern enterprise needs effective tools, to shape the workforce and attract the most capable people. This principle holds true for the Department. If confirmed, I would take all possible steps to ensure the Department is competitive; however I have not had the opportunity to review the Department's current efforts to recruit and retain high quality technical people so I am not in a position to recommend changes at this time.

Question. The DDR&E has been designated as the Chief Technology Officer (CTO) of DOD.

In your view, what is the appropriate role of the CTO of DOD?

Answer. The role of the CTO of the Department is defined in the DDR&E charter. I understand that the charter defines the role of the DDR&E as the Principal Staff Assistant to the Under Secretary (AT&L) and the Secretary on all technical matters. As CTO, the DDR&E should provide guidance to shape the DOD S&T program and develop technology options for the Department. The CTO should also contribute significantly to ensuring that major acquisition programs are conducted with acceptable technological risk.

Question. What authority should the DDR&E have over the Defense Advanced Research Projects Agency (DARPA)?

Answer. My understanding is that as the Department's primary corporate research activity, DARPA reports to DDR&E. The DDR&E should have all authorities necessary to ensure DARPA is effective in meeting its mission, including budgetary authority and authority over selection of agency leadership.

Question. What authority should the DDR&E have over other Service and Agency science and technology efforts?

Answer. The DDR&E should provide oversight responsibilities of the Service and Agency programs, consistent with the DDR&E charter.

Question. Do you see the need for any changes in organizational structure, workforce, or availability of resources to improve the effectiveness of the Office of the DDR&E?

Answer. At this time I have no specific recommendations for changes. I believe science and technology is critical to maintaining military superiority across a broad range of crises and military operations. Ensuring the technological superiority of our Armed Forces requires a strong DDR&E. I am aware that the DDR&E has taken steps to strengthen his organization, and I look forward to working with the DDR&E on any additional efforts that are needed.

DEFENSE LABORATORIES

Question. What is your view on the quality of the DOD laboratories as compared to the DOE national laboratories, Federal laboratories, academic laboratories, and other peer institutions?

Answer. I have no information that would allow me to make a valid comparison of the quality of these institutions. The DOD laboratories I have worked with employ a talented and mission-oriented workforce, and constitute an important Departmental resource for the Nation's national security. That said, I am certain improvements can be made. If confirmed, I would work with the DDR&E in examining the capabilities and long-term requirements of the DOD laboratories, and develop, with the Services, recommendations to enhance the capabilities of the DOD laboratories.

Question. What metrics will you use, if confirmed, to evaluate the effectiveness, competitiveness, and scientific vitality of the DOD laboratories?

Answer. The effectiveness, competitiveness, and scientific vitality of the DOD laboratories could be gauged by a combination of factors, including external review of their research programs and the Service parent organizations' assessment of their effectiveness in meeting Service requirements and other needs. These in turn are influenced by the ability to attract and retain a talented workforce, and the adequacy and robustness of their physical infrastructure. I believe collaboration with universities, industry, and other laboratories also constitute an important contributor and measure of our laboratories' effectiveness in fostering and recognizing world class research and development. The single most important factor, however, would be the laboratories success in developing and transitioning technologies, by whatever mechanism, to our warfighters.

Question. What steps if any will you take, if confirmed, to increase the mission effectiveness and productivity of the DOD laboratories?

Answer. At this time I do not have the information necessary to make specific recommendations. If confirmed, I would work with the DDR&E to ensure that DOD Labs operate at maximum effectiveness and productivity.

Question. Do you see value in enhancing the level of technical collaboration between the DOD laboratories and academic, other Federal, and industrial scientific organizations?

Answer. Yes. The effectiveness and competitiveness of our laboratories can only be helped by enhanced technical collaboration with other research and development organizations.

Question. Do you feel that past investments in research equipment; sustainment, repair and modernization; and facility construction at the DOD laboratories have been sufficient to maintain their mission effectiveness and their standing as world class science and engineering institutions?

Answer. I do not have the information that would allow me to make this assessment at this time. If confirmed, I would work with the DDR&E to understand whether the Department's investments in the DOD laboratories have been adequate.

DARPA

Question. Has DARPA struck an appropriate balance between investments in near-term technology programs that are tied to current battlefield needs and investments in longer term, higher risk, and revolutionary capability development?

Answer. From my previous years in the Pentagon, I am very much aware of the critical role DARPA has in developing new technologies and capabilities for the Department's warfighters and weapons systems, as well as for the Nation. I do not currently have insight into DARPA's investment balance between near- and far-term technologies, but if confirmed, I would work with the DDR&E to ensure that DARPA continues to meet the far reaching technology needs of DOD.

Question. Do you believe that DARPA has adequately invested in the academic research community?

Answer. I do not have current insight into the DARPA investment portfolio, so I have no real basis upon which to assess if DARPA is adequately invested in the academic research community. I do believe that a sound DOD S&T program invests in a balanced supplier base—including internal DOD laboratories, industry, and universities.

Question. What are the major issues related to DARPA investments, management, and research outcomes that you will seek to address?

Answer. If confirmed, I would work with the DDR&E to investigate the current DARPA investments, management, and research outcomes to determine which, if any, issues need to be addressed. I do not currently have sufficient information to make an evaluation.

TEST AND EVALUATION

Question. The Department has, on occasion, been criticized for failing to adequately test its major weapon systems before these systems are put into production.

What are your views about the degree of independence needed by the DOT&E in ensuring the success of the Department's acquisition programs?

Answer. The independence of the DOT&E is an important aspect of ensuring the Department's acquisition programs are realistically and adequately tested in their intended operational environment. I am aware of concerns that testing can be perceived as creating additional cost and delays in delivering capability, especially in the context of pressing real world operations. If confirmed, I would seek the advice of the DOT&E on testing and evaluation issues as a partner in the acquisition process, while allowing for the necessary independent viewpoints.

Question. Are you concerned with the level of test and evaluation conducted by the contractors who are developing the systems to be tested?

Answer. In general, I believe contractors are an important and integral part of the test and evaluation process during system development. However, in the past, implementation of acquisition reform the Department may have delegated too much of the early developmental test and evaluation responsibility to the contractors without adequate Government participation or oversight. If confirmed, my emphasis would be on integrating contractor and government test efforts to ensure that the Department's products in development are adequately and efficiently tested and that test results provide a reliable indicator of program progress toward meeting requirements.

Question. What is the impact of rapid fielding requirements on the standard testing process? If confirmed, how will you work to ensure that all equipment and technology that is deployed to warfighters is subject to appropriate operational testing?

Answer. I believe that rapid fielding requirements require rapid performance from the entire acquisition team, including the test and evaluation community. With a rapid fielding requirement, it is necessary to adjust the scope and amount of testing to address the key issues and risks that affect safety and the system's use in combat and to gain early insights into the capabilities and limitations of the system being acquired. In rapid fielding, particularly of commercial items, the focus needs to be on understanding what is being bought and whether it is acceptable, not whether the system meets a set of rigid requirements. If confirmed, I would work with all stakeholders to ensure test and evaluation processes support rapid fielding without delaying our response to these urgent requirements a moment more than is absolutely necessary.

Question. Do you believe that the developmental testing organizations in DOD and the military Services are adequate to ensure an appropriate level of developmental testing, and testing oversight, on major defense acquisition programs?

Answer. I have not had the opportunity to review the adequacy of the Department's testing resources. If confirmed I would work with the DOT&E, the Director of Developmental Testing, the Service Acquisition Executives, and others to assess the adequacy of existing and planned test resources.

Question. The National Defense Authorization Act for Fiscal Year 2003 included several provisions to improve the management of DOD test and evaluation facilities.

Are you satisfied with the manner in which these provisions have been implemented?

Answer. I understand the National Defense Authorization Act for Fiscal Year 2003 led to the establishment of the Defense Test Resource Management Center (TRMC) to plan for and assess the adequacy of the Major Range and Test Facility Base (MRTFB). This office leads developing the Department's Strategic Plan for T&E Resources and certifies the adequacy of Service and Agency Test and Evaluation budgets. If confirmed, I would consult with the TRMC Director and review the adequacy of the Department's responses to these legislative mandates.

Question. Do you believe that the Department should take any additional steps to improve the management of its test and evaluation facilities?

Answer. At this time I am not aware of any additional steps that should be taken, however, I have not had the opportunity to review the current situation. If confirmed, I would consult with the Department's stakeholders and assess any additional steps necessary to improve management of T&E facilities.

Question. As systems grow more sophisticated, networked, and software-intensive, DOD's ability to test and evaluate them becomes more difficult. Some systems-of-systems cannot be tested as a whole until they are already bought and fielded.

Are you concerned with DOD's ability to test these new types of systems?

Answer. Absolutely, testing and developing software-intensive programs in a net-centric, systems-of-systems (SoS) environment is a challenge.

Question. What steps, if any, do you believe the Department should take to improve its test and evaluation facilities to ensure adequate testing of such systems?

Answer. I do not have sufficient information to make a recommendation at this time.

BALLISTIC MISSILE DEFENSE

Question. When it was created in 2002, the Missile Defense Agency (MDA) was exempted from normal acquisition rules and processes in order to field an initial set of missile defense capabilities on an expedited basis. That fielding has now taken place, although numerous upgrades and corrections are being implemented. Each of the elements of the Ballistic Missile Defense System (BMDS) would normally meet the criteria for a Major Defense Acquisition Program (MDAP), but none of them has been managed as an MDAP. Furthermore, for most of MDA's existence, all its programs were funded with Research, Development, Test, and Evaluation (RDT&E) funds, even for non-RDT&E activities.

What management and acquisition changes or improvements if any do you believe are warranted for the ballistic missile defense programs?

Answer. I have not had an opportunity to review the ballistic missile defense programs and am not in a position to recommend any changes or improvements.

Question. Do you believe that the Under Secretary of Defense for Acquisition, Technology, and Logistics should have the same responsibilities relative to the ballistic missile defense acquisition programs as for all other MDAPs?

Answer. I have not had an opportunity to review this issue. At this point, however, I see no reason why the Under Secretary of Defense for Acquisition, Technology, and Logistics, should not have the same responsibilities for the ballistic missile defense programs as for all MDAPs.

Question. If confirmed, what steps if any would you plan to take to ensure that the ballistic missile defense programs of DOD follow sound acquisition and management practices and processes?

Answer. I am not adequately familiar with current practices at this time to make an assessment of their effectiveness.

Question. For many years DOD and Congress have agreed on the principle that major weapon systems should be operationally effective, suitable, survivable, cost-effective, affordable, and should address a credible threat.

Do you agree that any ballistic missile defense systems that we deploy operationally must be operationally effective, suitable, survivable, cost-effective, affordable, and should address a credible threat?

Answer. Yes.

Question. If confirmed, what steps if any would you take to ensure that the BMDS and each of its elements meet these criteria?

Answer. Rigorous and realistic testing of missile defenses is imperative. I understand that the Missile Defense Agency presently is executing a plan which includes the use of a Development/Operational Testing approach that allows the U.S. Strategic Command warfighter community (which includes all Combatant Commanders) and all the Service Operational Test Agencies to be integral parts of the test program. If confirmed, I would need to review these plans and the proposed test activities to determine whether additional steps or other emphases are necessary or appropriate.

Question. Today, there are many hundreds of short- and medium-range ballistic missiles that can reach forward-deployed U.S. military forces, allies, and other friendly nations. A Joint Staff study, the Joint Capabilities Mix study, has repeatedly concluded that the United States needs about twice as many Standard Missile-3 and Terminal High Altitude Area Defense interceptors just to achieve the minimum inventory needs of regional combatant commanders to defend against such threats.

Do you agree that U.S. missile defense efforts should be prioritized on providing effective defenses against existing ballistic missile threats, especially the many hundreds of short- and medium-range ballistic missiles that are currently within range of our forward-based forces, allies, and other friendly nations?

Answer. If confirmed, I would review the balance among the elements of the ballistic missile defense program in light of the results of ongoing Department strategic reviews and take action to influence plans accordingly based on the results of those reviews.

Question. What do you believe should be the appropriate role of the combatant commanders and the military in determining requirements, force structure, and inventory levels for ballistic missile defense forces?

Answer. Combatant commanders are the ultimate employers of the capabilities that the acquisition community delivers. As such, they should have a strong voice in determining the priorities for requirements, force structure, and necessary inventory levels. Title 10 provides for the military departments to have responsibility to organize, train, and equip the forces employed by the combatant commands. MDA serves as the materiel developer for ballistic missile defenses and as such has a role in determining what capabilities are achievable and what inventory quantities are feasible at what cost. These three roles are interdependent. At this point in time I am not aware of any reason to adjust these roles.

Question. For many years, Congress and DOD have agreed on the principle of “fly before you buy,” namely demonstrating that a weapon system will work in an operationally effective, suitable, and survivable manner before deciding to acquire and deploy such systems. This demonstration requires rigorous, operationally realistic testing, including independent Operational Test and Evaluation (OT&E), to provide an accurate assessment of how weapon systems will perform in combat conditions. The DOT&E has expressed concerns that the testing of the Ground-Based Mid-course Defense system has not been sufficient to provide confidence in its operational capability.

Do you agree that ballistic missile defense testing needs to be operationally realistic, and should include Operational Test and Evaluation, in order to assess operational capabilities and limitations of ballistic missile defense systems, prior to making decisions to deploy such systems?

Answer. I agree that operationally realistic testing should be conducted prior to making decisions to deploy such systems.

Question. If confirmed, what steps if any would you take to ensure that the BMDS, and each of its elements, undergoes independent operational test and evaluation?

Answer. If confirmed, I will work with the Missile Defense Agency and the DOT&E to see what testing is planned to ensure that adequate tests are conducted.

Question. The Missile Defense Agency has developed ballistic missile defense systems and capabilities and procured the initial inventories of missile defense element weapon systems. However, the military departments are notionally intended to procure, operate, and sustain these missile defense systems.

What do you believe is the appropriate role for the military departments in the procurement, operation, and sustainment of ballistic missile defense systems, and at what point do you believe these systems should be transitioned and transferred to the military departments?

Answer. I understand the Missile Defense Agency and the military departments are in the process of preparing overarching and element-specific Memorandum of Agreements to define responsibilities and relationships in preparation for Ballistic Missile Defense System (BMDS) operations and deployment. If confirmed, I would work with the Missile Defense Agency and the military departments to ensure processes and policies are in place to accomplish the transition and transfer in a timely manner and within budget. At this point in time I have not had the opportunity to assess the most appropriate point at which responsibility for these systems should be transferred to the military departments.

SMALL BUSINESS INNOVATION RESEARCH PROGRAM

Question. What do you see as the major successes and challenges facing the DOD Small Business Innovation Research (SBIR) program?

Answer. I have not had an opportunity to review the SBIR program in depth and am not in a position to comment on its major successes and challenges. If confirmed, I would make this program a high priority.

Question. What steps would you take to ensure that DOD has access to and invests in the most innovative small businesses?

Answer. If confirmed, I would evaluate current efforts and look broadly for ways to improve our access to the research, ideas, and products of the most innovative small businesses.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the USD(AT&L)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR BILL NELSON

GULF RANGE—OIL DRILLING

1. Senator BILL NELSON. Mr. Kendall, in a 2005 letter (see attached), Secretary of Defense Donald Rumsfeld stated that “above surface and permanent structures are incompatible with military training” in the Eastern Gulf of Mexico (the “Gulf Range Complex”). Given the increases in the lethality and capability of today’s weapons development programs, the scope of testing and evaluation evolutions requires more, not less, range space. What requirements are necessary to maintain the viability of America’s largest testing and evaluation range in the Eastern Gulf of Mexico?

1401

THE SECRETARY OF DEFENSE
1000 DEFENSE PENTAGON
WASHINGTON, DC 20301-1000

NOV 30 2005

The Honorable John Warner
Chairman, Committee on Armed Services
225 Russell Building
Washington, DC 20510

Dear Mr. Chairman:

Thank you for your letter of October 7, 2005, concerning the potential effect of Department of Interior-administered oil and gas leasing on military training and readiness in the Eastern Gulf of Mexico. The Department of Defense (DoD) fully supports the national goal of exploration and development of our nation's offshore oil and gas resources. The DoD, the Department of the Interior, and affected states have worked together successfully for many years to ensure unrestricted access to critical military testing and training areas, while also enabling oil and gas exploration in accordance with applicable laws and regulations.

DoD conducts essential military testing and training in many of the 26 Outer Continental Shelf (OCS) planning areas. Prior analysis and existing agreements with Interior recognize that areas east of the 86° 41' line in the Gulf of Mexico (commonly know as the "Military Mission Line") are especially critical to DoD due to the number and diversity of military testing and training activities conducted there now, and those planned for the future. In those areas east of the Military Mission Line, drilling structures and associated development would be incompatible with military activities, such as missile flights, low-flying drone aircraft, weapons testing, and training.

As the planning process for Interior's new 5-year OCS oil and gas leasing program proceeds, DoD will continue both to evaluate its military requirements and to work with Interior to ensure the 2007-2012 oil and gas program, and any future lease sales resulting from it, strike the proper balance between our nation's energy and national security goals.

Sincerely,

A handwritten signature in black ink, appearing to read "R. M. Gates".

cc:
The Honorable Carl Levin
Ranking Member

Mr. KENDALL. I do not have enough information at this time, on either DOD's test ranges in general or the specific situation with regard to the Gulf Range Complex, to be able to answer this question definitively, but I am aware that there are concerns about the adequacy of DOD's test ranges. If confirmed, I will work closely with the Director, Test Resource Management Center, the Director, Developmental Test and Evaluation, and the Director Operational Test and Evaluation, to ensure the DOD has adequate testing resources consistent with the testing requirements for increasingly capable new weapons.

2. Senator BILL NELSON. Mr. Kendall, how might future weapons development programs be impacted if the Gulf Range Complex is encroached upon by petroleum extraction?

Mr. KENDALL. I am not familiar enough with the issue to make an assessment. I do believe, however, that we will need to ensure that we strike the proper balance between our Nation's energy and national security goals and if confirmed I will work to ensure that DOD's needs are adequately taken into account in striking that balance.

3. Senator BILL NELSON. Mr. Kendall, what data is available to show the number, type, and requirements necessary for the testing and evaluation mission?

Mr. KENDALL. I have not been privy to any data pertaining to the broad T&E mission or the specific mission of the Gulf Range Complex. If confirmed, I would examine the available data on the requirements for the testing and evaluation mission to assess its adequacy and implications.

QUESTIONS SUBMITTED BY SENATOR MARK BEGICH

KODIAK LAUNCH COMPLEX

4. Senator BEGICH. Mr. Kendall, if confirmed, you will have purview over the adequacy of existing and planned test resources for the Department of Defense (DOD). Kodiak Launch Complex (KLC) in Alaska was built in response to Missile Defense Agency (MDA) test resource requirements for Ground-Based Midcourse Defense. However, it has recently come to my attention that MDA plans to terminate a long standing operations and sustainment contract with KLC, thereby jeopardizing the viability of the facility. KLC is a national treasure that has the capabilities to support a host of DOD customers requiring launch capability. I understand designation as a Major Range and Test Facility Base (MRTFB) would ensure KLC had adequate sustainment dollars so it could continue serving its customer in a cost-effective, efficient manner. I encourage you to consider designating KLC as a MRTFB. If confirmed as the Deputy Under Secretary of Defense for Acquisition and Technology, will you review recent decisions that are negatively impacting national test assets like KLC?

Mr. KENDALL. If confirmed, I will review all national test assets within my purview and the recent decisions impacting them, including those impacting the KLC.

ACQUISITION PROCESS

5. Senator BEGICH. Ms. Fox and Mr. Kendall, does the acquisition process need to be overhauled DOD-wide?

Mr. KENDALL. I understand that the DOD has recently substantively revised and improved the policies and procedures that govern the Department's acquisition system and that other changes are in progress. Some of those policy changes are included in DOD Instruction 5000.02, Operation of the Defense Acquisition System, issued in December 2008. In addition I understand that changes responding to the direction in the Weapon Systems Acquisition Reform Act of 2009 are in place or underway. At this time I am not in a position to make a judgment as to whether a DOD wide overhaul is needed. If confirmed, I would ensure that all acquisition policies and procedures are closely monitored to ensure objectives are being achieved and to identify any additional needed changes. My view at this time is that the DOD should fully implement and evaluate the impact of these recent changes before considering whether another major DOD-wide overhaul is needed.

6. Senator BEGICH. Mr. Kendall, should DOD acquisition programs be a multi-year?

Mr. KENDALL. I believe that the use of multi-year procurement should be dependent on the circumstances of each program. Multi-year procurements can offer savings for the Department and the taxpayer through improved economies in production processes, better use of industrial facilities, and a reduction in administrative processing and complexity. Multi-year procurements would generally not be appropriate if projected savings are insignificant and if future order quantities are uncertain. If confirmed, I would support application of multi-year contracting when properly justified and authorized by law.

7. Senator BEGICH. Mr. Kendall, can you give me an example of a civilian sector technology that should be leveraged?

Mr. KENDALL. There are many examples of commercial technology that DOD can leverage. Commercial items—such as software, information technology, microcircuits and related electronic devices—are already embedded in many defense-unique applications including some of the Department's most highly advanced systems. Cutting-edge work in many areas of critical importance to the Department, including work on computer and communications technology, is being done in the private sector. In areas like these, where commercial industry drives much of the innovation and pays for the bulk of the research and development, the Department should acquire the best available technology and either employ it directly or militarize it to meet unique military needs. I believe this can be done at a fraction of the time and cost it would take if the Department tried to develop the technology itself and that the DOD should be aggressively looking for opportunities to leverage commercial technology.

CONTRACT OVERSIGHT

8. Senator BEGICH. Mr. Kendall, should DOD or the unified commanders provide oversight and manage contractors on the battlefield?

Mr. KENDALL. I believe that there are important roles for the Office of the Secretary of Defense (OSD), DOD agencies, military Services, and the combatant commanders in oversight and management of contracts and of contractors on the battlefield. I understand that USD(AT&L) develops policy and provides guidance and tools for the management and overall oversight of contracts and contractors supporting contingency operations. I also understand that the management of DOD contracts flows through the contracting organization, which may be a DOD agency, a Service organization, a specific command organization or a non-DOD organization such as the Department of State. At the operational level, however, combatant commanders currently play, and in my view should continue to play, a critical role in formulating and enforcing policies and procedures governing the conduct of all contractor personnel in the areas of operation under their control.

CONTRACT AWARDING

9. Senator BEGICH. Mr. Kendall, should DOD review the awarding of contracts as they relate to large defense contractors and small business, minority- and women-owned businesses?

Mr. KENDALL. I understand that Federal Acquisition Regulations require contracting officers to afford small businesses (including minority- and women-owned small businesses) maximum practicable opportunities to participate in acquisitions as prime contractors and as subcontractors. In my opinion, DOD should review the implementation of this policy, however, I am not aware of the degree to which DOD currently reviews the awarding of contracts to small business, minority and women owned businesses. If confirmed, I would assess the current review procedures to determine their adequacy.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

ACQUISITION RISK 20 YEARS AGO AND NOW

10. Senator MCCAIN. Mr. Kendall, you have a lot of experience with DOD acquisition stretching back to the 1980s and, as the Director of Tactical Warfare Programs in OSD, you were a witness to one of industry's and DOD's most spectacular—and expensive—failures, the Navy's A-12 Avenger program, which continues in litigation to this day. Looking back on the systemic problems that led to the demise of the A-12, what improvements in DOD and Service acquisition systems that would prevent another A-12 have been implemented, and, perhaps more importantly, what vulnerabilities still exist?

Mr. KENDALL. In my opinion, the A-12 was a “perfect storm” of acquisition mistakes. The list of mistakes would include the following: it was a fixed-price development contract for an ambitious and risky development program with options for not-to-exceed initial production lots that in theory, but not practice, placed all the risks of shortfalls in performance on the contractor; to my knowledge, there were no competitive risk reduction prototypes or focused technology maturation efforts prior to entering Engineering and Manufacturing Development; the schedule and cost assumptions were very aggressive; technical performance margins were inadequate; the acquisition strategy was that two primes would form a joint venture for the development program and then compete for production—a situation that discouraged

cooperation; the contractors profit model, and their willingness to absorb losses in the development program, depended on the Government procuring large quantities of aircraft, an assumption that quickly changed as the cold war came to an end; the program was initially a highly classified "black program" which limited external oversight; and my understanding is that problems within the program were concealed to "protect" the program from budget cuts and closer scrutiny, preventing early corrective action.

I would like to be confident that the changes of the last 20 years guarantee that none of these problems could occur again, but I am not in a position to make that statement. I understand there have been a number of improvements in DOD acquisition policies and procedures over the last 20 years, most recently the new DOD 5000.2 acquisition regulation and the changes being implemented under the Weapons System Acquisition Reform Act. That DOD and Congress are still searching for ways to more effectively manage defense acquisition programs and that the DOD continues to encounter problems in cost, schedule, and performance are strong indicators that more action is needed. If confirmed, I would work to implement the changes that have been initiated, to assess their effectiveness, to identify more opportunities for improvement, and to implement those opportunities. It is very clear to me that we still have more to do to improve DOD acquisition planning and execution, even if DOD never experiences a failure as dramatic as the A-12 again.

11. Senator McCAIN. Mr. Kendall, considering the current authorities and responsibilities of the Under Secretary and Deputy Under Secretary for Acquisition and Technology, please describe how you and your OSD team would be able to detect an acquisition program in trouble and take corrective measures . . . or can a debacle like the A-12 happen again?

Mr. KENDALL. At this time, I believe that the current authorities and responsibilities of the USD(AT&L) and the PDUSD(AT&L) are adequate to permit the actions necessary to detect that a program is in trouble and take corrective action. I have not had an opportunity to assess how these authorities and responsibilities are currently being utilized and implemented and if more changes are needed. I believe that the most recent version of DOD Instruction 5000.02 is designed to ensure that acquisition programs are set up initially for success, that problems are proactively identified, and appropriate changes made as required. Similarly the recent Weapons Systems Acquisition Reform Act provides a number of measures designed to prevent or detect and correct problems and to discipline the system to avoid debacles like the A-12. If confirmed, I would work to ensure that these changes and other measures are implemented effectively and to identify any other actions or policies that might be required to prevent problems, identify them when they occur, and to ensure timely corrective action.

FIXED-PRICE CONTRACTING

12. Senator McCAIN. Ms. Fox and Mr. Kendall, we in this committee and DOD have pursued initiatives designed to reduce development and technological risks associated with major weapons programs so as to maximize the use of fixed price-type contracts. What do you think about the feasibility of greater use of fixed-price contracts, and how would you evaluate the Department's commitment or ability to move towards use of more fixed price-type contracts (and less cost-reimbursable contracts) to buy major weapons systems?

Mr. KENDALL. I believe that there are opportunities for greater use of fixed-price contracting, but that we should only use fixed price contracts when the risk allocated to the contractor is reasonable. More specifically, I think that when we have a thorough understanding of our requirements and can communicate them clearly, when the needed technologies are mature, when we have a solid design foundation, and when costs and schedules are reasonably predictable, then we have the basis for considering a fixed-price development or production contract.

RAPID ACQUISITION REFORM

13. Senator McCAIN. Mr. Kendall, at his confirmation hearing last March, Under Secretary of Defense Ashton Carter testified that, particularly in the context of ongoing combat operations in theater, he considered issues with the rapid acquisition process to be a top challenge facing the acquisition community today. Do you agree with that view? If so, why?

Mr. KENDALL. I agree with Dr. Carter that rapid acquisition remains a top challenge. Operations Iraqi Freedom and Enduring Freedom have clearly demonstrated

the importance of having specific departmental structures capable of rapidly responding to urgent warfighting needs. My view is that the time consuming processes associated with the formal acquisition system are not compatible with meeting urgent operational needs. If confirmed, rapid acquisition will be a matter of the highest priority for me.

14. Senator MCCAIN. Mr. Kendall, in the context of rapid acquisitions, do you see value in a more streamlined path by which the Department can procure military-purpose items that require no development by the government, and that can, therefore, be acquired on firm fixed-price basis?

Mr. KENDALL. I definitely see value in the development of a streamlined path for rapid acquisition and in that context, I believe there will be opportunities to employ fixed-price contracts when we can clearly state our requirements and those requirements can be satisfied by nondevelopmental items or items for which development is limited, straightforward, and low risk.

15. Senator MCCAIN. Mr. Kendall, might such a path, particularly when coupled with competition, incentivize smaller contractors to develop relevant technologies on their own in the shortest time possible at the most reasonable cost to the taxpayer and help terminate seemingly endless, budget-busting development programs, which preclude rapidly fielding needed capability to the warfighter?

Mr. KENDALL. I agree that a rapid acquisition path can provide incentives for small contractors to develop relevant technologies in a comparatively short time compared to the normal acquisition process, particularly in a competitive situation. This approach, however, is best suited for products that are not inherently highly complex designs of new capabilities that require longer and more disciplined development programs. Some programs, by their very nature, require substantial development investments spanning a period of years. I believe that rapid acquisition programs, particularly in wartime, can provide great value to DOD, but they can't always substitute for more complex and highly structured major weapon systems programs. I'm not in a position to comment on the best balance between rapid acquisition programs and more traditionally structured programs or the extent to which rapid acquisition could displace traditionally structured programs, but I do see a need for both types of programs.

MILITARY PURPOSE NONDEVELOPMENTAL ITEMS

16. Senator MCCAIN. Mr. Kendall, while the Department should always acquire commercial items and commercially available off-the-shelf items of supply when those items fulfill requirements, do you agree that in some cases attempts to adapt commercial items for military purposes through military research and development funding has resulted in program cost problems, excessive delays, and even terminations? The Armed Reconnaissance Helicopter is one example.

Mr. KENDALL. I'm not familiar with the details of the Armed Reconnaissance Helicopter program or of other cases in which DOD has attempted to modify commercial items to meet military needs, but I have no doubt that these types of problems have occurred. In general, I believe that expanding the use of commercial items in DOD systems, including using commercial platforms as the basis for military products, can offer opportunities for reduced cycle time, faster insertion of new technology, lower life cycle costs, greater reliability and availability, and support from a robust industrial base. However, I also believe that no matter what the acquisition approach chosen by DOD, there is the potential to underestimate risks, costs, and schedules and to impose requirements that lead to cost problems, delays, and terminations. If confirmed, I would work to ensure that DOD selects the most effective approach to meeting its requirements and that the plans to field the desired capability are realistic, whatever the acquisition approach.

17. Senator MCCAIN. Mr. Kendall, in the context of traditional procurements, what are your views on items that are developed by industry without any Government funding that are determined to meet a military requirement but do not necessarily meet the definition of commercial items?

Mr. KENDALL. At this time, I am not aware of any reason why items like those described shouldn't be acquired by DOD or couldn't be acquired under existing policies. If confirmed, I will assess whether there are obstacles to procuring noncommercial items developed by industry without Government funding.

18. Senator MCCAIN. Mr. Kendall, outside the context of rapid acquisitions, do you believe the Department should explore ways that do not involve Government funding for research and development to encourage industry to produce nondevelopmental items that could meet military needs?

Mr. KENDALL. In my view, industry's independent research and development efforts can offer critical and often unanticipated capabilities to DOD. I believe that the Department should be open-minded about how nondevelopmental products could be acquired and used by the Armed Forces. Given the accelerating rate of innovation in the private sector and the internal capabilities of the defense industrial base, I also believe it is important to encourage efforts in this area. If confirmed, I would assess the steps DOD is currently taking to encourage industry to produce nondevelopmental items that meet military requirements in order to determine whether additional steps are appropriate.

QUESTION SUBMITTED BY SENATOR JEFF SESSIONS

TANKER COMPETITION

19. Senator SESSIONS. Mr. Kendall, following the previous competition, Boeing now has access to the Northrop/EADS team's pricing data. Do you feel that it is fair for Boeing to have such a strategic advantage?

Mr. KENDALL. In my opinion DOD should make every effort to ensure that all its competitive procurements are fair and open. Unfortunately, I do not have enough knowledge of the situation with regard to the data Boeing was provided to express an opinion on its impact or what might be done to correct any lack of fairness.

[The nomination reference of Frank Kendall III follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
August 5, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Frank Kendall III, of Virginia, to be Deputy Under Secretary for Acquisition and Technology, vice James I. Finley, resigned.

[The biographical sketch of Frank Kendall III, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF FRANK KENDALL III

EDUCATION

Rensselaer Polytechnic Institute, Sept. 1966 to June 1967
U.S. Military Academy, West Point, NY, 1967–1971, B.S., June 1971
California Institute of Technology, Pasadena, CA, 1971–1973, MS, Aerospace Engineering, 1972, Aeronautical Engineer Degree, 1974
Long Island University, C.W. Post Center, 1977–1980, MBA, June 1980
Georgetown University Law Center, 2000–2003, J.D., Feb. 2004

EMPLOYMENT RECORD

January 2008 to Present: Managing Partner, Renaissance Strategic Advisors, Arlington, VA.

2004 to Present: Attorney, self employed, Falls Church, VA.

1997 to Present: Private Consultant, self-employed, Falls Church, VA.

1994–1996: Vice President of Engineering, Raytheon Co. Lexington, MA

1994: Vice President, SAIC, McLean, VA

1989–1994: Director of Tactical Warfare Programs, Office of the Secretary of Defense Washington, DC. (title changed at various points, "Acting" Director, 1989 to 1991)

1986–1989: Assistant Deputy Under Secretary of Defense for Defense Systems, Office of the Secretary of Defense, Washington, DC.

1982–1999: U.S. Army Reserve; retired with the rank of Lieutenant Colonel
 1982–1986: U.S. Army Ballistic Missile Defense Systems Command, various civil service positions in engineering management and systems analysis
 1967–1982: Active Duty U.S. Army; left Active Duty with the rank of Captain (includes time as West Point Cadet, 1967–1971)

HONORS AND AWARDS

Military Awards, U.S. Army:

Meritorious Service Medal with oak leaf cluster
 Army Commendation Medal
 National Service Medal

Federal Civilian Awards:

Defense Distinguished Civilian Service Medal
 Secretary of Defense Meritorious Civilian Service Medal
 Presidential Rank Award of Distinguished Executive (SES)
 Presidential Rank Award of Meritorious Executive (SES)
 Army Commander's Award for Civilian Service

Other Awards:

Defense Industrial Preparedness Association Gold Medal
 Rodney Smith Memorial Award for Excellence in Engineering (U.S. Military Academy)

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Frank Kendall III in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Frank Kendall III.
2. **Position to which nominated:**
Deputy Under Secretary of Defense (Acquisition and Technology), Department of Defense.
3. **Date of nomination:**
August 5, 2009.
4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

January 26, 1949; Pittsfield, MA.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Eva Elizabeth Halpern.

7. Names and ages of children:

Scott McLeod Kendall, age 32; and Eric Sten Kendall, age 27.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Pittsfield High School, 1963–1966, H.S. Diploma, June 1966

Rensselaer Polytechnic Institute, Sept. 1966 to June 1967

U.S. Military Academy, West Point, NY, 1967–1971, B.S., June 1971

California Institute of Technology, Pasadena, CA, 1971–1973, MS, Aerospace Engineering, 1972, Aeronautical Engineer Degree, 1974

Long Island University, C.W. Post Center, 1977–1980, MBA, June 1980

Georgetown University Law Center, 2000–2003, J.D., Feb. 2004

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

1999 to Present: Private Consultant, self-employed, Falls Church, VA. Independent consultant to various defense contractors, government organizations, and Federally funded laboratories in the areas of technical management, program management, systems engineering, systems analysis, and strategic planning.

2004 to Present: Attorney, self-employed, Falls Church, VA. Worked as a consultant on human rights issues and represented individual clients, almost entirely on a pro bono basis and primarily individual asylum cases.

January 2008 to Present: Managing Partner, Renaissance Strategic Advisors, Arlington, VA. Partner in a small aerospace and defense consulting firm. The firm's work is in the areas of strategic planning, merger and acquisition support and support to start-up aerospace and defense companies.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

1967–1982: Active Duty U.S. Army; left Active Duty with the rank of Captain

1982–1999: U.S. Army Reserve; retired with the rank of Lieutenant Colonel

1982–1986: U.S. Army Ballistic Missile Defense Systems Command, various civil service positions in engineering management and systems analysis

1986–1989: Assistant Deputy Under Secretary of Defense for Defense Systems, Office of the Secretary of Defense, Washington, DC.

1989–1994: Director of Tactical Warfare Programs, Office of the Secretary of Defense Washington, DC.

1994–2004: Member and Vice Chairman, Defense Intelligence Agency Science Advisory Board

1995–2004: Member, Army Science Board

1995–2009: Consultant on the Defense Science Board on various studies

1998 (approximate) Consultant on the Naval Studies Board

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Managing Partner, Renaissance Strategic Advisors, LLC, Arlington, VA (provides consulting services to a variety of aerospace and defense contractors or related businesses)

Self-employed as a Private Consultant and Attorney at Law, sole proprietorships. (Inactive consulting agreements with Institute for Defense Analysis, SAIC, JSA Partners, Centra Technologies).

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Board Member, Amnesty International USA, New York, NY

Board Member and Board Chair, Tahirih Justice Center, Falls Church, VA

Associate member, Sigma Xi, Research Society

Member, Phi Kappa Phi, Honor Society

Member, American Bar Association

Member, American Immigration Lawyers Association

Member, Virginia Bar Association

Member, New York State Bar Association
 Member, Virginia Trial Lawyers Association
 Member, Association of the U.S. Army
 Member, Navy League
 Member, Air Force Association
 Member, National Defense Industries Association
 Member, Association of Graduates, USMA.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

No offices held.

Participated as a volunteer in the Kerry and Obama campaigns, no formal affiliation or position.

Participated the Democratic Voter Protection program in the 2004 and 2008 elections as a volunteer.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Military Awards, U.S. Army:

Meritorious Service Medal with oak leaf cluster
Army Commendation Medal
National Service Medal

Federal Civilian Awards:

Defense Distinguished Civilian Service Medal
Secretary of Defense Meritorious Civilian Service Medal
Presidential Rank Award of Distinguished Executive (Senior Executive Service)
Presidential Rank Award of Meritorious Executive (Senior Executive Service)
Army Commander's Award for Civilian Service

Other Awards:

Defense Industrial Preparedness Association Gold Medal
Rodney Smith Memorial Award for Excellence in Engineering (U.S. Military Academy)
Four year ROTC scholarship to Rensselaer Polytechnic Institute (used 1 year of scholarship before attending West Point)

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

"The Sentry Ballistic Missile Defense System" with Mr. Tom Purdue, Journal of Defense Research (1982) (classified publication, best recollection of title)

"Exploiting the Military Technical Revolution; A Concept for Joint Warfare," Strategic Review (spring 1992)

"Defense Contractor and Government Relationships," RDA Magazine (1995) (approximate title and date)

"Drawing the Line: Three Case Studies in Procurement Ethics," Program Manager Magazine (July–August 1998)

"Reclaim American Values; Prisoner Treatment Hands Power to Enemies," with LTG Charles Otstott (Ret.), Defense News (April 16, 2007)

"End Impunity for U.S. Contractors in Iraq" Op Ed, The Topeka Capital Journal (August 10, 2007)

Guantanamo Military Commissions Observer Blog Postings for Human Rights First:

"Today's Score From Guantanamo; Constitution-1, No-Constitution 3" Human Rights First (July 18, 2008)

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

NDIA Test and Evaluation Conference, Power Point presentation "Been There, Done That; or How I Learned to Love Defense Acquisition" March 8, 2005.

[Nominee responded and the information is contained in the committee's executive files.]

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

FRANK KENDALL III.

This 1st day of October, 2009.

[The nomination of Frank Kendall III was reported to the Senate by Chairman Levin on December 2, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 4, 2010.]

[Prepared questions submitted to Gladys Commons by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the war-fighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Goldwater-Nichols has effectively enhanced civilian control and delineated many important relationships within the Department of Defense (DOD). At this time, I am not aware of the need for any changes to Goldwater-Nichols. If con-

firm, however, any changes that I identify will be forwarded to the Under Secretary and the Secretary of the Navy.

DUTIES OF THE ASSISTANT SECRETARY OF THE NAVY (FINANCIAL MANAGEMENT AND COMPTROLLER)

Question. What is your understanding of the duties and functions of the Assistant Secretary of the Navy (Financial Management and Comptroller)?

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) is responsible for all financial management activities and operations within the Department of the Navy. This position is also responsible for advising the Secretary of the Navy on all financial management matters.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I have over 30 years of comptroller and financial management experience within DOD. I first began working in the Department in 1971 as a Budget Analyst within the Office of Naval Research. Over the next 30 years, I served as a Supervisory Budget Analyst at Naval Facilities Engineering Command, a Budget Officer within Headquarters Marine Corps, and the Comptroller of the Marine Corps Research, Development and Acquisition Command. In 1994, I became the Principal Deputy Assistant Secretary of the Navy for Financial Management and Comptroller. During this tenure, I served for 7 months as Acting Assistant Secretary of the Navy for Financial Management and Comptroller. From 2002–2004, just prior to my retirement from Federal Service, I served as comptroller of Military Sealift Command.

Question. Do you believe that there are any actions that you need to take to enhance your ability to perform the duties of the Assistant Secretary of the Navy (Financial Management and Comptroller)?

Answer. While I have relevant experience for the position, I believe learning and the need for improvement are lifelong, continuing processes. If confirmed, I will increase my knowledge by learning more about current specific issues regarding the Department's budget through discussions with subject matter experts and by studying existing documents.

MAJOR CHALLENGES

Question. In your view, what are the major challenges that will confront the Assistant Secretary of the Navy (Financial Management and Comptroller)?

Answer. I believe that there are three major challenges facing the next Assistant Secretary of the Navy (Financial Management and Comptroller). First, the next Assistant Secretary will need to balance the budget while ensuring that the requirements and systems needed by the warfighter are provided during two ongoing military conflicts. Second, the Assistant Secretary will need to ensure that accurate, reliable and timely financial information is available to leadership to assist during critical periods of decisionmaking. Third, the Assistant Secretary will need to continue ongoing efforts to recruit, train, and develop the financial management workforce.

Question. Assuming you are confirmed, what plans do you have to address these challenges?

Answer. In order to ensure that these challenges are met, if confirmed, I will work closely with the Under Secretary of Defense (Comptroller), the Secretary and Under Secretary of the Navy, the Chief of Naval Operations and the Commandant of the Marine Corps.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Assistant Secretary of the Navy (Financial Management and Comptroller)?

Answer. If confirmed, my priorities will be three-fold. First, I will aim to provide accurate, reliable, and timely financial management information to the Department's military and civilian leadership. Second, I will ensure that the Department remains a good steward of the taxpayer's dollars. Third, I am committed to the continual development of a professional financial management workforce.

RELATIONSHIPS

Question. What is your understanding of the relationship between the Assistant Secretary of the Navy (Financial Management and Comptroller) and each of the following:

The Secretary of the Navy.

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) is the principal assistant and advisor to the Secretary and Under Secretary of the Navy on fiscal and budgetary matters. The Assistant Secretary of the Navy (Financial Management and Comptroller) also performs such other duties as the Secretary or Under Secretary may prescribe.

Question. The Under Secretary of the Navy.

Answer. As stated above, the Assistant Secretary of the Navy (Financial Management and Comptroller) serves as a principal assistant and advisor to the Under Secretary of the Navy.

Question. The other Assistant Secretaries of the Navy

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) works directly with the other Assistant Secretaries of the Navy to ensure that the financial management activities of their respective organizations are supported.

Question. The General Counsel of the Navy

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) must work closely with the General Counsel of the Navy to ensure that all fiscal law requirements for the Department are satisfied.

Question. The Chief of Naval Operations.

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) should ensure that the Chief of Naval Operations has the financial support necessary to execute his duties and responsibilities.

Question. The Commandant of the Marine Corps.

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) should ensure that the Commandant of the Marine Corps has the financial support necessary to execute his duties and responsibilities.

Question. The Under Secretary of Defense (Comptroller).

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) must work closely with the Under Secretary of Defense (Comptroller) to ensure the appropriate development and execution of the budgetary and fiscal policies and initiatives of the President, the Secretary of Defense, and Secretary of the Navy.

Question. The Deputy Chief Management Officer of the Department of Defense.

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) must work with the Deputy Chief Management Officer of the Department of Defense to ensure the implementation of business systems architecture and to help identify business process improvements.

Question. The Assistant Secretaries for Financial Management of the Army and Air Force.

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) must work closely with these individuals to ensure that decisionmaking at all levels reflects the strongest cooperation possible between the military Services.

Question. The Chief of Legislative Affairs for the Department of the Navy.

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) should work closely with the Chief of Legislative Affairs to ensure that all budgetary and legislative matters are properly conveyed to the appropriate Members of Congress.

CIVILIAN AND MILITARY ROLES IN THE NAVY BUDGET PROCESS

Question. What is your understanding of the division of responsibility between the Assistant Secretary of the Navy (Financial Management and Comptroller) and the senior military officers responsible for budget matters in Office of the Chief of Naval Operations and Headquarters, Marine Corps, in making program and budget decisions, including the preparation of the Navy Program Objective Memorandum, the annual budget submission, and the Future Years Defense Program?

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) is responsible for all budget matters within the Department. The senior military officers, including the Director of the Office of Budget, serve as principal military advisors to me in my capacity to oversee the development of the Department's Program Objective Memorandum.

BUSINESS TRANSFORMATION

Question. DOD recently established the Business Transformation Agency (BTA) to strengthen management of its business systems modernization effort.

What is your understanding of the mission of the BTA and how its mission affects the responsibilities of the Assistant Secretary of the Navy (Financial Management and Comptroller)?

Answer. It is my understanding that the BTA provides the framework for DOD's future business environment. I understand that the Department of the Navy is allowed to execute plans within this framework and has the flexibility to support unique mission requirements as necessary. The overall goal to improve business operations throughout DOD should support Department of the Navy efforts to provide decisionmakers accurate, reliable, and timely financial information.

Question. What is your understanding of the role of the Assistant Secretary of the Navy (Financial Management and Comptroller) in providing the Navy's views to the BTA, or participating in the decisionmaking process of the BTA, on issues of concern to the Navy?

Answer. The Departments are participants in the governance process, as well as key implementers. The Assistant Secretary should be involved in establishing and implementing DOD-wide financial management standards and improvement programs that affect the Department of the Navy. If confirmed, I would be an active participant, providing input to support the development of improved Department of the Navy business operations.

Question. Section 908 of the Duncan Hunter National Defense Authorization Act (NDAA) for Fiscal Year 2009 requires each of the military departments to establish an Office of Business Transformation to transform the budget, finance, accounting, and human resource operations of the military department.

What is your understanding of the mission of the Navy Business Transformation Office and how its mission affects the responsibilities of the Assistant Secretary of the Navy (Financial Management and Comptroller)?

Answer. My understanding of the mission of the Department of the Navy Business Transformation Office is that they are to improve the effectiveness and efficiency of the Department's business operations through optimizing its underlying end-to-end business process. While the overall responsibilities of the office would remain unchanged, the Assistant Secretary of the Navy (Financial Management and Comptroller) has the opportunity to leverage existing DON organizational processes and the integration of acquisition, finance and logistics functions to increase the effectiveness and efficiency of DON business operations. This will support on-going efforts to provide accurate, reliable and timely financial information and assist the Assistant Secretary of the Navy (Financial Management and Comptroller) in performing their statutorily authorized responsibilities.

Question. What is your understanding of the role of the Assistant Secretary of the Navy (Financial Management and Comptroller) in the transformation of the budget, finance, and accounting operations of the Department of the Navy?

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) is responsible for the budget, finance, and accounting operations of the Department of the Navy. If confirmed, I will work closely with the Department's civilian and military leaders to ensure that budget, finance, and accounting operations are considered in changes to DON business processes. I will provide leadership and advice in the financial management functional area and ensure that those efforts are aligned with DOD priorities to achieve auditable financial statements.

Question. Do you believe that the organizational structure of the Department of the Navy is properly aligned to bring about business systems modernization and financial management improvements?

If not, how do you believe the Department should be restructured to more effectively address this issue?

Answer. Yes, I believe that it is. However, there have been many changes in the organizational structure since I retired in 2004. I need to be made more aware of these new structures and to see how they align.

FINANCIAL MANAGEMENT AND ACCOUNTABILITY

Question. DOD's financial management deficiencies have been the subject of many audit reports over the past 10 or more years. Despite numerous strategies and initiatives, problems with financial management and data continue.

What do you consider to be the top financial management issues that must be addressed by the Department of the Navy over the next 5 years?

Answer. During these difficult economic times, the top financial management issues will be the development of a balanced budget that meet the Department's warfighting priorities; ensuring the availability of accurate, reliable, and timely financial information; the capability to produce auditable financial statements; and continued recruitment, development, and training of the financial management workforce.

Question. If confirmed, how would you plan to ensure that progress is made toward improved financial management in the Navy?

Answer. If confirmed, I would work closely with civilian and military leaders within the Department and the Office of the Secretary of Defense (OSD) (Comptroller) to ensure the allocation of sufficient resources to the Department's warfighting priorities. I would also continue ongoing efforts to improve financial management systems and processes to achieve auditable financial statements.

Question. If confirmed, what private business practices, if any, would you advocate for adoption by DOD and the Department of the Navy?

Answer. I am not currently aware of any private business practice that I would advocate for adoption. However, if confirmed, I will certainly be willing to consider any of the best financial management practices within the private sector, other well-run Federal or State Government agencies or the nonprofit sector to see if they could be adapted to the Department's processes.

Question. What are the most important performance measurements you would use, if confirmed, to evaluate changes in the Navy's financial operations to determine if its plans and initiatives are being implemented as intended and anticipated results are being achieved?

Answer. Some key performance measures to determine if the plans and initiatives are being implemented as intended and anticipated results are being achieved include timely distribution and allocation of funds, timely obligation of funds, funds balance with Treasury (net percent unreconciled), percent of invoices paid on time, timeliness of financial data (date of information), percent of vendor payments made electronically, interest penalties paid, etc. If confirmed, I would use these metrics along with the scheduled timelines included in the Department's Financial Improvement Plan to evaluate changes in the Navy's financial operations.

Question. Section 1003 of the NDAA for Fiscal Year 2010 would establish an objective for DOD to ensure that its financial statements are validated as ready for audit by not later than September 30, 2017. The provision would require the Department to establish interim goals, including objectives for each of the military departments.

What, in your view, would be a reasonable objective for the Department of the Navy to ensure that its financial statement is validated as ready for audit?

Answer. I understand that the Department has a Financial Improvement Plan and is making progress toward achieving auditable financial statements. However, there remains a substantial amount of work to be done to improve our business systems and processes. There are also difficult issues that must be addressed, such as the valuation of major weapon systems and equipment. I have not had the opportunity to review the plan in detail and could not at this time predict a reasonable date for ensuring the auditability of the Department's financial statement.

Question. What interim objectives do you believe the Department of the Navy should establish, to demonstrate measurable progress toward a financial statement that is validated as ready for audit?

Answer. I am not currently in a position to recommend interim goals. I am confident that work is being performed within the Department to develop objectives which would help demonstrate measurable progress. If confirmed, I will review the objectives that have been prepared and determine whether they appear to be reasonable and effective at demonstrating measurable progress. My intention would be to adjust or recreate these objectives as appropriate.

Question. What is the role of the Assistant Secretary of the Navy (Financial Management and Comptroller) in this effort?

Answer. The Assistant Secretary of the Navy (Financial Management and Comptroller) provides the overall leadership within the Department to achieve auditable financial statements. However, the ability to produce auditable statements is influenced by all the business operations and processes within the Department. If confirmed, I will work with the civilian and military leadership, process owners and the OSD Comptroller to meet the requirement for auditable financial statements.

Question. If confirmed, how will you work with the Chief Management Officer of the Department of the Navy and the Navy Business Transformation Office in this effort?

Answer. The business practices within the Department are beyond the control of the Assistant Secretary of the Navy (Financial Management and Comptroller). However, these processes are critical to ensure an auditable financial statement. For this reason, if confirmed, I will work closely with the Chief Management Officer of the Department as well as the Navy Business Transformation Office.

SUPPLEMENTAL FUNDING AND ANNUAL BUDGETING

Question. Since September 11, 2001, DOD has paid for much of the cost of ongoing military operations through supplemental appropriations, and the fiscal year 2010 budget included a full-year request for overseas contingency operations.

What are your views regarding the use of supplemental appropriations to fund the cost of ongoing military operations?

Answer. I believe that it is important to move away from the use of supplemental appropriations. All requirements for military operations should be included within the budget. Such a move is easier to perform in stable times. However, during times of conflict, when new and emergent requirements arise, this becomes very difficult. When these new requirements emerge, it is essential that we identify a funding mechanism to support these requirements.

AUTHORIZATION FOR NATIONAL DEFENSE PROGRAMS

Question. Do you believe that an authorization pursuant to section 114 of title 10, U.S.C., is necessary before funds for operations and maintenance, procurement, research and development, and military construction may be made available for obligation by DOD?

Answer. Yes. If confirmed, I will respect the views and prerogatives of the Department's oversight committees. As the Department has in the past, I will continue to work closely with the committee as necessary to achieve a resolution of the issues.

INCREMENTAL FUNDING OF SHIPS

Question. Both the executive and legislative branches have traditionally followed a policy of full funding for major capital purchases such as ships. In recent years, the Department of the Navy has been using alternative funding methods for the purchase of ships, such as incremental funding in the shipbuilding account, or by the purchase of an initial ship of a class of ships through RDT&E funds, and thereby incrementally funding the lead ship.

What is your opinion of these types of funding strategies and of the pros and cons of incrementally funding ship construction?

Answer. The Office of Management and Budget and OSD (Comptroller) policies require full funding of programs when procured. I do not have sufficient insight into the alternative funding methods used by the Department in recent years. If confirmed, I will review the funding strategies in the shipbuilding accounts to ensure that they comply with fiscal law and OMB and OSD policy. I believe that funding Naval ship construction is an important challenge and if confirmed, will work within the Navy and with OSD (Comptroller) to identify funding strategies that would benefit the Department and the taxpayer.

BUDGETING FOR THE NAVY'S NEXT GENERATION ENTERPRISE NETWORK

Question. As part of its efforts to close out the Navy/Marine Corps Intranet (NMCI) contract, the Department of the Navy is planning to purchase infrastructure and a Government purpose rights license from the incumbent NMCI contractor. The Navy asked Congress for special authority to spread out these purchase costs over several years; however, one of the reasons that the Navy was unable to budget in advance for these expenses is that the Navy is only now completing negotiations on the price of these items.

Why weren't the costs of infrastructure and a Government purpose rights license negotiated upfront on the NMCI contract, rather than waiting until this late in the contract?

Answer. The NMCI acquisition strategy was developed almost 10 years ago. While development of the strategy was not under the purview of the Assistant Secretary of the Navy (Financial Management and Comptroller), I believe at the time it was based on prevailing best industry practices and the resultant lower cost to the Department and taxpayer. Under this strategy, the Department would adopt a commercial off-the-shelf solution and would not have to facilitate and/or own equipment which would become obsolete because of the rapidly changing technological environment.

Question. In your opinion, are there regulatory changes that should be made to prevent the Navy from repeating such occurrences and permit the Navy to budget for such expenses in advance?

Answer. I do not believe regulatory changes are necessary. I believe the Department needs the flexibility to adopt best industry practices when they result in savings to the Department and the taxpayer.

DEFENSE INTEGRATED MILITARY HUMAN RESOURCES SYSTEM

Question. To address pay and personnel record keeping, and other personnel management requirements, DOD is developing the Defense Integrated Military Human Resources System (DIMHRS), an integrated, joint military personnel and pay system envisioned for use by all the Services.

What is your understanding of the status of the development and implementation of DIMHRS in the Department?

Answer. I understand that DIMHRS is DOD's solution for integrated record keeping. However, I do not have detailed information concerning the status of its development and implementation. If confirmed, I will look into the status of DIMHRS development and implementation.

Question. What is your understanding of the Navy and Marine Corps views of the pros and cons of implementing DIMHRS?

Answer. I understand that there are many benefits associated with an integrated record system. However, I do not have sufficient knowledge to comment on the Navy and Marine Corps views concerning the implementation of DIMHRS. If confirmed, I will work closely with the civilian and military leaders of the Department regarding the development and implementation of DIMHRS.

PERSONNEL BUDGET SHORTFALLS

Question. During fiscal year 2009, the Navy experienced significant shortfalls in its personnel accounts that required a reprogramming to overcome, as well as other stopgap measures taken to avoid Anti-Deficiency Act violations, such as a reduction in advertising, a delay of new bonuses, a freeze of some civilian hiring, and a delay of new permanent change of station moves until the new fiscal year.

In your opinion, has the Navy corrected the issues and revised the budget assumptions that gave rise to the personnel funding shortfall?

Answer. At this time I do not know if the Navy has corrected the issues and revised the budget assumptions that gave rise to the personnel funding shortfall during fiscal year 2009. If confirmed, I am committed to reviewing the personnel accounts to ensure that they are fully funded consistent with existing fiscal law, regulations and OSD directives.

Question. Does the Navy continue to assume risk in its personnel accounts, and if so, where and to what extent?

Answer. I do not have insight into the risk assumed in the personnel accounts. If confirmed, I commit to review the accounts to ensure adequate funding for the force structure budgeted.

LABORATORY DIRECTED RESEARCH AND DEVELOPMENT

Question. Section 219 of the NDAA for Fiscal Year 2009 authorized the Secretary of Defense, in consultation with the Secretaries of the military departments, to ". . . establish mechanisms under which the director of a defense laboratory may use an amount of funds equal to not more than 3 percent of all funds available to the defense laboratory . . . to fund innovative basic and applied research and several other purposes at these laboratories." Similar to the model of the Department of Energy Laboratory Directed Research and Development program, the purpose of section 219 is to provide funding and discretion to the Navy's laboratory and technical center directors, to support the continued infusion of new ideas that support Navy missions, and in particular to authorize the directors to exercise some discretion in investing in promising technologies and other laboratory activities.

What should the role and authority of the Navy comptroller's organization be in implementing this statute?

Answer. The role of the Navy Comptroller organization in implementing this statute is to develop a budgetary strategy which ensures funds are available for the purposes set forth in section 219. The Comptroller organization would also be responsible for developing the appropriate financial and accounting methods for implementation of section 219. If confirmed, I will ensure that the financial strategy and financial and accounting methods are in place to support the statute.

Question. How would you intend to enable the laboratory director's discretion over such funding to support its effective implementation, similar to the Department of Energy model?

Answer. I understand that efforts are underway to provide the necessary guidance for successful implementation of the statute and to enable laboratory directors to initiate and oversee their local section 219 programs. If confirmed, I will work with the Assistant Secretary of the Navy (Research, Development and Acquisition) who

has programmatic oversight of the program, and Office of the Secretary of Defense (Comptroller) to ensure successful implementation.

BUDGETING TO ADDRESS OPERATIONAL NEEDS AND TECHNOLOGICAL OPPORTUNITIES

Question. The Services are often faced with situations in which an urgent operational need or a new technological opportunity arises on a timeline that is inconsistent with the relatively slow budgeting and programming process.

How should the Navy change its processes so that its budgeting, programming, and planning processes are more adaptable to emerging operational needs and technological opportunities?

Answer. Every effort should be made to include any operational needs or technological opportunities within the budget. It is impossible, however, to include everything and still meet the deadlines imposed for timely submission. To the extent that the needs are known, they are included in the budget. If confirmed, I will review the processes to see if changes can be made that will be more adaptable to emerging operational needs and technological opportunities.

CONGRESSIONALLY DIRECTED SPENDING

Question. Congress often provides the Navy with additional resources for research, procurement, operation and maintenance, and other activities above the President's recommended levels.

If confirmed, how will you work with Congress during the authorization and appropriations process to ensure that proposed congressional funding items are reviewed for their military value and technical merit before their inclusion in legislation?

Answer. If confirmed, I will maintain an open dialogue with Congress to ensure that the needs of the Department as well as the administration are conveyed.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of the Navy (Financial Management and Comptroller)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this Committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR ROLAND W. BURRIS

PRIORITY OF FUNDING

1. Senator BURRIS. Ms. Commons, what future systems should have priority of funding to support warfighters?

Ms. COMMONS. Future requirements are currently being reviewed as part of the Department of Defense (DOD) Quadrennial Defense Review. The results of this review will shape the Department of the Navy's (DON) priorities. I view my role as ASN (FM&C) as one of supporting the warfighting priorities of the CNO and CMC, under the direction of the Secretary of the Navy. I will seek to ensure that our cost estimates, budgets, and financial operations inform and optimize the attainment of program priorities of the Secretary, CNO, the CMC, the DOD leadership, the President, and Congress.

2. Senator BURRIS. Ms. Commons, is there a conflict between Marine Corps and Navy funding priorities in the out-years of the current program objective memorandum (POM)?

Ms. COMMONS. I am not aware of a conflict between Marine Corps and Navy funding priorities in the out-years of the current POM. Issues arising during the POM process are handled in accordance with the Secretary of the Navy's guidance. Secretary Mabus has established a leadership governance council to be the principal decisionmaking body for DON, and the vehicle through which we work the POM approval process. The council consists of two bodies, the senior group is made up of the Secretary, Under Secretary and two Service chiefs and a subordinate group chaired by the Under Secretary includes the Service vice chiefs, Assistant Secretaries, General Counsel, two Deputy Under Secretaries, and several others. These groups will meet throughout the POM process to review options and determine resolution of a wide range of DON issues. The final POM product will be a Departmental product which reflects the results of these deliberations.

JOINT OPERATIONS

3. Senator BURRIS. Ms. Commons, how do you intend to support the current and future joint operations that the unified commanders are executing?

Ms. COMMONS. The Navy and Marine Corps as DOD Service components effectively man, train, and equip forces to provide mission-ready, joint-capable forces and enforce the importance of sustained and persistent cooperation and collaboration in times of relative peace to mitigate situations that could lead to conflict and crisis and support all combatant command (COCOM) operations. The Navy supports these multiple COCOM requirements as vetted and prioritized through the Joint Staff. Additionally, the Navy is the COCOM Support Agent for two COCOMS; U.S. Joint Forces Command and U.S. Pacific Command. In this role, per DOD Directive 5100.3, Navy provides the administrative and logistic support for missions or tasks directly assigned to the combatant command headquarters or their joint subordinate commands.

HOMELAND SECURITY AND CIVIL AUTHORITIES

4. Senator BURRIS. Ms. Commons, is there a role for you to play in homeland security and support to civil authorities?

Ms. COMMONS. The Department of Navy (DON) will have a role in homeland security and assistance to civil authorities as directed by and consistent with Executive Orders and applicable laws and directives. The use of DON resources to support these efforts will be dependent on legal provisions.

FINANCIAL OVERSIGHT

5. Senator BURRIS. Ms. Commons, do you believe that the current financial internal controls are sufficient to perform your ability to limit waste, fraud, and abuse?

Ms. COMMONS. Yes. The DON has a robust Managers' Internal Control Program based on OMB Circular A-123. This program requires: (1) establishing controls over operational, business, and financial processes; (2) testing them on a regular schedule; and (3) reporting the results of the testing. In addition, as part of the Navy's ongoing Financial Improvement Program, we are strengthening financial controls to support audit readiness. Current controls are adequate to limit waste, fraud, and abuse; the future control environment will be increasingly effective.

DEFENSE INTEGRATED MILITARY HUMAN RESOURCES SYSTEM

6. Senator BURRIS. Ms. Commons, are there any financial impediments to implementing the Defense Integrated Military Human Resources System (DIMHRS)?

Ms. COMMONS. No, there are no financial impediments associated with the Navy's use of the DIMHRS Core. The Service has developed a Program Office cost estimate and the program is fully funded for execution in fiscal year 2010 and fiscal year 2011. As we evaluate the delivered core capabilities of DIMHRS, we will be able to fully define our plan for the future integrated pay and personnel system, and address total resource requirements.

AUDITABLE FINANCIAL STATEMENTS

7. Senator BURRIS. Ms. Commons, you acknowledge in your responses to the committee's advance policy questions that a top financial management goal is ensuring the availability of accurate, reliable, and timely financial information and the capability to produce auditable financial statements. Based on your experience as a Comptroller, what specifically must be done to ensure the goal of auditable financial statements is achieved?

Ms. COMMONS. The DON will continue to execute its two-prong strategy to establish robust controls over business systems and processes impacting financial reporting: (1) DON will continue the execution of the Financial Improvement Program and; (2) DON will continue the progressive implementation of Navy Enterprise Resource Planning (ERP) throughout the Department. The Financial Improvement Program's primary goal is to establish robust internal controls over business processes impacting financial reporting. In tandem, as more major commands implement Navy ERP, business and financial controls throughout the Navy will be strengthened and standardized. Departmental internal controls will be regularly tested and corrective actions will be implemented if necessary which will lead to accurate, auditable financial reports.

As a first step toward auditable financial statements in DON, the Marine Corps has achieved audit readiness on its Statement of Budgetary Resources. An independent private auditor is now examining this assertion and will offer an opinion in November 2010. Not only is this an important milestone on the path to auditability for DON and DOD, but all of the Services will leverage the lessons learned by the Marine Corps during the audit. This will result in more effective preparations for future audits of financial statements within DOD.

8. Senator BURRIS. Ms. Commons, you state in your responses that "a substantial amount of work must be done to improve our business systems and processes." We have been hearing this for a long time in Congress. What do you consider to be the most pressing changes that must be accomplished to bring about improvement during your tenure if confirmed as Assistant Secretary?

Ms. COMMONS. We must continue to lead change in the Departmental business and financial culture. The changes will be based on establishing robust internal controls over business processes and systems. As these controls are established, we must also regularly monitor their effectiveness through testing, report the results, and make adjustments when necessary to ensure the controls are operating as intended. The Financial Improvement Program stresses a strengthened regime of internal controls over business processes.

Navy ERP, as it continues to be rolled out, will standardize and shore up system and process controls. Navy ERP will also require the acquisition, logistics, and financial communities to jointly retool their policies and procedures for the efficiency of the entire enterprise.

To augment Navy ERP and the Financial Improvement Program, we must continue to field a talented, highly-trained workforce. This investment in human capital is necessary and will yield a favorable return.

[The nomination reference of Gladys Commons follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
September 29, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Gladys Commons, of Virginia, to be an Assistant Secretary of the Navy, vice Douglas A. Brook, resigned.

[The biographical sketch of Gladys Common, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF GLADYS COMMONS

EDUCATION

1969 - Fayetteville State University, Bachelor of Science
 1979 - American University, Masters of Public Financial Management
 1987 - Industrial College of the Armed Forces, No degree granted

EMPLOYMENT RECORD

2002–2004 - Comptroller of the Military Sealift Command
 Mar.–Oct. 1998 - Acting Assistant Secretary of the Navy for Financial Management and Comptroller
 1994–2002 - Principal Deputy Assistant Secretary of the Navy for Financial Management and Comptroller
 1987–1994 - Comptroller of the Marine Corps Research, Development, and Acquisition Command
 1983–1986 - Budget Officer and Head of the Materiel Program and Budget Branch, Materiel Division, Installation and Logistics Department, Headquarters Marine Corps.
 1980–1983 - Supervisory Budget Analyst and Branch Head of the Budget and Operations Branch, Naval Facilities Engineering Command.
 1977–1980 - Lead Budget Analyst, Operations Program/Budget Division, Naval Data Automation Command
 1971–1977 - Budget Analyst, Office of Naval Research
 1969–1971 - Claims Representative, Social Security Administration

HONORS AND AWARDS

The Presidential Rank Award of Meritorious Executive (2000)
 Department of Defense Meritorious Civilian Service Award (2002)
 Department of the Navy Distinguished Civilian Service Award (3) (1998, 2001, 2004)
 The American Society of Military Comptrollers President's Award (2000)
 Numerous Outstanding and Sustained Superior Performance Awards (1974–2004)

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Gladys Commons in connection with her nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Gladys Lee Commons,
Gladys J. Commons,
Gladys Lee James (Maiden).
2. **Position to which nominated:**
Assistant Secretary of the Navy (Financial Management and Comptroller).
3. **Date of nomination:**
September 29, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
November 2, 1948; Maple Hill, NC.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Willie Commons, Jr.
7. **Names and ages of children:**
Willie Commons III, age 33; James McCarthur Commons, age 28; and Krystal Renee Commons, age 22.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
C.F. Pope High School, 1961–1965, High School Diploma, May 1965
Fayetteville State University, 1965–1967, 1968–1969, Bachelor of Science, May 1969
University of North Carolina at Chapel Hill, 1967–1968, No degree granted
American University, 1977–1979, Masters of Public Financial Management, June 1979
Industrial College of the Armed Forces, 1986–1987, No degree granted
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
Retired. March 2004–Present
Election Officer. County of Fairfax, Virginia Korean Baptist Church, 7200 Ox Road, Fairfax Station, VA (1 day elections in 2007, 2008, 2009)
Comptroller. Military Sealift Command, 914 Charles Morris Court, Bldg. 210, Washington Navy Yard, Washington, DC, 10/2002–03/2004
Principal Deputy Assistant Secretary of the Navy (Financial Management and Comptroller, 1000 Navy, Room 4E768, Pentagon, Washington, DC, 02/1994–10/2002
10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.
2002–2004 Comptroller of the Military Sealift Command
Mar.–Oct. 1998 - Acting Assistant Secretary of the Navy for Financial Management and Comptroller
1994–2002 - Principal Deputy Assistant Secretary of the Navy for Financial Management and Comptroller
1987–1994 - Comptroller of the Marine Corps Research, Development and Acquisition Command.
1983–1986 - Budget Officer and Head of the Materiel Program and Budget Branch, Materiel Division, Installation and Logistics Department, Headquarters Marine Corps.
1980–1983 - Supervisory Budget Analyst and Branch Head of the Budget and Operations Branch, Naval Facilities Engineering Command.
1977–1980 - Lead Budget Analyst, Operations Program/Budget Division, Naval Data Automation Command
1971–1977 - Budget Analyst, Office of Naval Research
1969–1971 - Claims Representative, Social Security Administration
11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational or other institution.
None.
12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Warner Baptist Church - Beaconsess.
13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

The Presidential Rank Award of Meritorius Executive (2000)

Department of Defense Meritorius Civilian Service Award (2002)

Department of the Navy Distinguished Civilian Service Award (1998, 2001, 2004)

The American Society of Military Comptrollers President's Award (2000)

Numerous Outstanding and Sustained Superior Performance Awards (1974–2004)

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

GLADYS COMMONS.

This 14th day of October, 2009.

[The nomination of Gladys Commons was reported to the Senate by Chairman Levin on October 27, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on October 28, 2009.]

[Prepared questions submitted to Terry A. Yonkers by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?
 Answer. I have seen the benefits of the Goldwater-Nichols Act in terms of jointness, provision of military advice to the President, and interagency cooperation. At this time I see no specific changes in the act that I would recommend.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Currently I am not aware of any specific proposals being considered. If confirmed, I would work with the Secretary of the Air Force on any proposed changes that pertain to installations, environmental, energy, safety, or logistics concerns.

DUTIES

Question. What is your understanding of the duties and functions of the Assistant Secretary of the Air Force for Installations and Environment?

Answer. The Assistant Secretary of the Air Force for Installations, Environment and Logistics is responsible for the overall supervision of all matters pertaining to Air Force installations, environment and logistics. The Assistant Secretary provides guidance, direction, and oversight for all matters pertaining to the planning, acquisition, sustainment and disposal of Air Force real property and natural resources, environmental program compliance, energy management, safety and occupational health of its personnel and life cycle integrated logistics support.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I have nearly 40 years of professional experience as an environmental engineer, program manager, and policy director. I served 22 years of my professional career with the Department of the Air Force working environmental, safety, occupational health issues at all command levels within the Air Force. I previously served as the acting Deputy Assistant Secretary of the Air Force (Environment, Safety, and Occupational Health (ESOH)) with worldwide responsibility for the Air Force's ESOH programs and policies and an annual ESOH budget in excess of \$2 billion. I spent 3 years of my Pentagon experience assigned to Air Force budget committees with responsibility for making corporate level decisions regarding allocation of Air Force fiscal, fixed, and personnel assets. I served as the Chief of Environmental Programs for the Air Force's Base Realignment and Closure Office and was instrumental in standing up the organization, developing the policies and procedures for expediting the clean up of contaminated sites and returning properties to local communities for productive reuse and managing an annual budget of over \$400 million. I spent nearly 10 years of my Air Force career in the Pentagon and have worked with my counterparts in the Office of the Secretary of Defense (OSD) and the military Services to develop practical and effective solutions to any number of ESOH challenges.

My 15 years of private sector experience provides different perspectives that will provide balance and enhance my ability to deal with the challenges of this position. Four of those years included working for Southern California Edison Company learning the electrical generation and distribution business and the planning and licensing procedures to bring nuclear, hydroelectric, solar, wind, and fossil fuel facilities on-line. The last 7 years have been spent as a Senior Vice President with ARCADIS-US, Inc. as a business development manager and strategic advisor to the company's global construction and environmental business interests.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Assistant Secretary of the Air Force (Installations and Environment)?

Answer. Yes. I will need to become reacquainted with the issues and challenges facing the Air Force in those areas for which I will have responsibility. I will need to build a working relationship with the Air Force team and my counterparts in OSD and the military Services as well as the senior leadership in other Federal agencies and communities who will be key to helping accomplish the mission of the Air Force. If confirmed, within the first few months I plan to visit a number of air bases (Active, Reserve, and Guard) and the Logistics Centers (Hill AFB, Tinker AFB, and Robins AFB) to hear first hand from those on the front lines what challenges and recommendations they have to improve business practices and effectiveness of their jobs. I will meet with the Air Force services centers responsible for executing the energy, logistics, environmental, family housing and construction projects so critical to the Air Force mission and quality of life. If confirmed, I will also plan to meet with key members of agencies like the Environmental Protection Agency, Department of Energy, Department of Interior, General Services Administration,

Council on Environmental Quality (and others) to outline how we can work together to develop synergies and achieve solutions to mutual problems.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of the Air Force would prescribe for you?

Answer. I would expect the Secretary to prescribe the duties and functions commensurate with the position and consistent with those specified in law.

RELATIONSHIPS

Question. If confirmed, what would be your professional relationship with: Secretary of the Air Force.

Answer. If confirmed, I will meet and communicate with the Secretary of the Air Force on a regular and as required basis. I will provide him with my honest assessment and advice and support him in the implementation of his decisions and policy.

Question. Under Secretary of the Air Force.

Answer. If confirmed, I will work closely with the Under Secretary especially on energy issues and initiatives and advise and assist in the execution of those Air Force programs for which he/she is responsible.

Question. Air Force Chief of Staff.

Answer. The Chief of Staff of the Air Force, except as otherwise prescribed by law, performs his duties under the authority, direction, and control of the Secretary of the Air Force and is directly responsible to the Secretary. If confirmed, I would, as the senior civilian charged with policy decision for installations and environment initiatives, work hand in hand with the Chief of Staff to carry out the duties prescribed by the Secretary of the Air Force.

Question. Air Force Vice Chief of Staff.

Answer. If confirmed, I will similarly work closely with the Vice Chief of Staff of the Air Force on installations, logistics, and environment issues.

Question. Deputy Under Secretary of Defense for Installations and Environment.

Answer. If confirmed, I plan to foster a harmonious working relationship with all my civilian contemporaries in OSD. I will communicate openly and directly with the Deputy Under Secretary of Defense for Installations and Environment in articulating the views of the Department of the Air Force.

Question. Other Assistant Secretaries of the Air Force.

Answer. If confirmed, I will establish and maintain close and professional relationships with each of the Assistant Secretaries and seek to foster an environment of cooperative teamwork, working together on the day-to-day management and long-range planning needs of the Air Force.

Question. Assistant Secretaries of the Army and Navy for Installations and Environment.

Answer. If confirmed, I will move quickly to establish and maintain a close and professional relationship with the Assistant Secretaries of the Army and Navy for Installations and Environment. I believe coordination with them will be critical in meeting national goals in energy and environmental security, installation management, housing and utility privatization.

Question. General Counsel of the Air Force.

Answer. The Air Force General Counsel has a significant role to play in virtually all policy decisions in the Air Force. If confirmed, I expect to have a strong relationship with The General Counsel and consistently seek his sound legal advice.

Question. Judge Advocate General of the Air Force.

Answer. If confirmed, I expect to establish a strong relationship with the Judge Advocate General of the Air Force as the Air Force's senior military legal counsel and senior leader of the Air Force Judge Advocate Corps.

Question. Deputy Chief of Staff of the Air Force for Installations and Logistics.

Answer. If confirmed, I will move quickly to establish a close and active professional relationship with the Deputy Chief of Staff for Installations and Logistics. This relationship will be critical, and if confirmed, one of my first tasks will be to meet with him to understand his priorities and how we can work together to meet our respective responsibilities.

Question. Civil Engineer of the U.S. Air Force.

Answer. A close working relationship is equally vital with the Civil Engineer of the United States Air Force. If confirmed, I will act quickly to meet with the Civil Engineer to understand his priorities and explore opportunities to work together.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that confront the Assistant Secretary of the Air Force for Installations and Environment?

Answer. Enhancing our ability to carry out the Air Force mission in the most efficient and cost-effective manner will always be a priority made even more pronounced with expected budgets. I anticipate challenges in finding the right balance between maintaining a high status of readiness while optimizing the use of our scarce resources in the areas of military construction, infrastructure management, depot maintenance and logistics, and environmental compliance. Energy security and meeting the goals of the Energy Acts and Executive Orders will be a priority that presents challenges with tremendous opportunities especially in the areas of renewable energy technologies and application. If confirmed, I look forward to meeting the evolving challenges presented by global climate change and control of greenhouse gases and the implications these may have on national security. Quality of life programs implemented through Military Construction, Family Housing, and the Air Force's safety and occupational health programs will also continue to present budget challenges as the Air Force balances resources allocations.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will take the following initial actions: (1) articulate a clear vision, expectations, and priorities in those areas for which I will be responsible consistent with national priorities and the Air Force mission; (2) evaluate existing policies and procedures within the department to make sure they are aligned with the vision and path forward; (3) evaluate whether the organizational structure is optimal to meet the vision and requirements of the Air Force; (4) continue to recruit the best and the brightest and give the leadership team the support and flexibility they need to do their jobs; (5) look outside the department and harness the best ideas, processes and technologies being successfully used in the private sector as well as other government agencies; and (6) establish reasonable metrics to judge performance and establish feedback loops to ensure these metrics and policies are being implemented effectively and efficiently.

Question. What do you consider to be the most significant problems in the performance of the functions of the Assistant Secretary of the Air Force for Installations and Environment?

Answer. I am not in a position at this time to know what the most serious problems are with respect to the responsibilities of the Assistant Secretary of the Air Force (Installations, Environment, and Logistics). However, I know from experience that national priorities will change and we must be open minded and flexible in the way we approach problems and issues. We must continue to adjust to meet these emerging priorities and challenges staying focused on meeting the missions of the Air Force in the most responsible, efficient and cost-effective manner possible. If confirmed, one of my first tasks will be to understand the short- and longer-term issues facing the Air Force in Installations, Environment, and Logistics and consider how these challenges affect other Air Force programs. Once this evaluation is completed, I should have a good idea of which problems are most pressing and which present the highest risk and also understand the unintended consequences of taking one option as opposed to another.

Question. If confirmed, what management actions and timelines would you establish to address these problems?

Answer. I would initiate the review of Air Force programs immediately, evaluate the risks and prioritize the most pressing problems that will require focused attention. I will collaborate with my counterparts in DOD, the military services and within the Air Force where those issues overlay or may impact the responsibilities of others and develop a plan to address these issues.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Assistant Secretary of the Air Force for Installations and Environment?

Answer. If confirmed, I will establish priorities consistent with those of the President of the United States, the Secretary of Defense, and the Secretary of the Air Force.

Question. Do you have any specific plans to help improve the quality of life for Air Force families who are under considerable strain as a result of repeated deployments?

Answer. I am not in a position at present to develop specific plans with respect to improving the quality of life of our airmen and their families. However, I clearly recognize the pressures repeated deployments have placed on our Air Force families. If confirmed, I will work in concert with the Secretary of the Air Force and the other Services to institute positive change in those areas that can be influenced by the

installations and environment portfolio. The Assistant Secretary of the Air Force for Installations and Environment has responsibility for, among other things, two largely distinct programs—the military construction program and the environmental program.

Question. In the competition for resources inherent in the DOD budget process, which of these two major programs do you believe should have priority in terms of funding? Why?

Answer. I am not in a position at present to comment on the relative funding priorities of construction and environmental programs. However, I can say with confidence, we have outstanding professionals on the SAF/IE team who have dedicated their lives to working these programs. If confirmed, I will work with these experts and ensure the final decisions that are made are in the best interest of the Air Force, the Department of Defense (DOD), and most importantly, our Nation.

MILITARY CONSTRUCTION

Question. Over the last several years, the Air Force has had the smallest share of DOD's overall military construction program. Additionally, the military construction programs of the Air National Guard and the Air Force Reserve have been substantially underfunded.

What would be your highest priorities for allocating military construction funding for the Air Force over the next several years?

Answer. The military construction program priorities should fall in line with overall Air Force priorities. Today, those priorities are reinvigorating the nuclear enterprise, partnering with the joint and coalition team to win today's fight, developing and caring for airmen and their families, modernizing air and space inventories, and regaining acquisition excellence. If confirmed, I will work to ensure that those top priorities receive appropriate military construction funding.

Question. If confirmed, what would be your intention with regard to the funding levels for military construction for the Guard and Reserve in future budget requests?

Answer. If confirmed, I will ensure that the Air Reserve components are treated equitably within the corporate process and receive their fair share of Air Force resources.

FAMILY HOUSING AND PRIVATIZATION

Question. In recent years, DOD and Congress have taken significant steps to improve family housing. The housing privatization program was created as an alternative approach to speed the improvement of military family housing and relieve base commanders of the burden of managing family housing. If confirmed for the position of Assistant Secretary of the Air Force for Installations and Environment you will have a key role in decisions regarding military family housing.

What are your impressions of the overall quality and sufficiency of Air Force family housing both in the United States and abroad?

Answer. I'm not in a position to judge the quality and sufficiency of the Air Force's family housing at this time. However, one of my first tasks, if confirmed, will be to make an evaluation of how the Air Force is doing with regard to family housing and meeting the goals of the department as well as the expectations of our service men and women.

Question. What are your views regarding the privatization of family housing?

Answer. Quality family housing communities are critical to the men and women of the Air Force and their families. If confirmed, I will ensure our military members and their families are provided access to safe, quality and affordable housing so that they may better carry out the Air Force mission. From my limited understanding, I believe the family housing privatization program has made significant progress in improving the housing and quality of life for airmen and their families.

Question. What is your view of the structure and general goals of the Air Force's current housing privatization program?

Answer. I understand that the Air Force goal is to privatize 100 percent of its housing in the United States and overseas by 2010. I understand the Air Force is on a path to meet this goal and I will do everything within my power to ensure the Air Force achieves its goal.

Question. Do you believe the housing program should be modified in any way? If so, how?

Answer. I do not have any specific changes I can recommend today. However, if confirmed, I plan on exploring all avenues to partner with industry in the most effective and mutually beneficial way. If I uncover any areas where legislative help is needed, I will request congressional assistance.

Question. In light of the bankruptcy of American Eagle, does the Air Force intend to change the nature of its individual agreements with privatization contractors to the same sort of LLC arrangement as the other Services maintain?

Answer. I am not currently in a position to comment on the details of the American Eagle initiative. However, if confirmed I will review the Air Force Housing Privatization program to better understand the best practices within DOD and the Air Force and implement any necessary modifications.

Question. The Air Force has stated as its goal to privatize 100 percent of military family housing in the continental United States (CONUS), Hawaii, Alaska, and Guam by the end of fiscal year 2010.

What is your understanding regarding the status of this privatization goal and when do you expect the Air Force will finish its housing privatization efforts?

Answer. The Air Force continues to remain committed to providing high quality housing to airmen and their families. The Air Force continues to work towards the goal of privatization of 100 percent of CONUS bases by the end of fiscal year 2010.

BASE CLOSURE AND REALIGNMENTS

Question. The 2005 Defense Base Realignment and Closure (BRAC) process is currently underway. What do you see as the roles and responsibilities of the Department of the Air Force in implementing BRAC decisions?

Answer. I believe the Air Force's roles and responsibilities are to implement the final decisions of the 2005 BRAC expeditiously and efficiently in the best interest of the local community, the Federal Government, the Air Force, and the American taxpayer.

Question. What would your role be, if confirmed, in carrying out these responsibilities?

Answer. If confirmed, I will ensure the Air Force has the proper resources and policies in place to properly implement the BRAC 2005 decisions, fulfill its statutory obligations and meet the mission needs of the Air Force, other Services, and defense agencies. I will also seek to cooperate with State and local governments, environmental regulators, and redevelopment authorities and the private sector to implement the decisions with consideration for the interests of all stakeholders.

Question. If confirmed, what priorities would you set for the process of disposal of any property at Air Force bases affected by BRAC decisions?

Answer. I understand the Air Force has implemented a BRAC Master Plan that considers a number of criteria to facilitate disposal of property. I will take a close look at this master plan and evaluate if it meets the goals and expectations for property disposal commensurate with the local community's redevelopment plans and objectives. Historically, environmental cleanup issues have impeded the disposal and unrestricted use of BRAC properties. I also want to determine if environmental cleanup of BRAC properties can be improved both in terms of schedule and unrestricted use and adjust the BRAC program accordingly.

Question. The DOD installation closure process resulting from BRAC decisions has historically included close cooperation with the affected local community in order to allow these communities an active and decisive role in the reuse of property.

In your view, what are the roles and responsibilities of the Department of the Air Force within the 2005 BRAC property disposal process with respect to working with local communities?

Answer. Collaboration and communication are critical to success. If confirmed, I would work closely with the communities and State and local agencies affected by the BRAC 05 closures, ensure environmental cleanup is performed, and utilize all available assets to place the property into the hands of the local communities in a timely manner. This approach can ensure that the community will quickly recover from the impacts of base closure and realignments.

Question. If confirmed, what goals would you establish to assist affected communities with economic development, revitalization, and re-use planning of property received as a result of the BRAC process?

Answer. If confirmed, I want to understand the communities' redevelopment plans and schedules. The Air Force needs to work closely with the Office of Economic Adjustment (OEA) to ensure that affected communities have all the resources necessary to accomplish their comprehensive planning for the reuse of base property. I will evaluate the Air Force's BRAC Master Plan and environmental cleanup program to ensure these are in line with community development planning.

Question. Is the Air Force moving aggressively to implement the joint basing agreements that were mandated by BRAC 2005?

Answer. I understand the Air Force is working with OSD and the other military Services to implement the joint basing decisions mandated by BRAC 2005. Meeting the joint basing goals will be one of my priorities if confirmed, and I am fully committed to this challenge.

Question. What do you see as the main concerns related to the implementation of BRAC-directed joint basing agreements?

Answer. I am not familiar with specific concerns with BRAC-directed joint basing agreements at this time. However, if confirmed, I will focus my initial efforts to ensure the Air Force has moved smartly and quickly to put the right foundational elements in place to support a seamless transition to a joint base with minimal impact to the mission and the base population.

Question. Will the Air Force have any trouble finishing the BRAC 2005 round on time?

Answer. The Air Force reports its BRAC 2005 program is on track and will be complete with implementing its recommendations within the statutory time limit.

INVESTMENT IN INFRASTRUCTURE

Question. Witnesses appearing before the committee in the past have testified that the military Services underinvest in both the maintenance and recapitalization of facilities and infrastructure compared to private industry standards. Decades of underinvestment in our installations has led to substantial backlogs of facility maintenance activities, created substandard living and working conditions, and made it harder to take advantage of new technologies that could increase productivity. If confirmed, what recommendations would you have for restoring and preserving the quality of our infrastructure?

Answer. If confirmed, I will review the current and future requirements for our infrastructure, to ensure that the Air Force can support its missions and the Secretary of the Air Force's priorities.

ENHANCED USE LEASES

Question. Congress has provided the authority for each of the Service Secretaries to lease underutilized non-excess property and to use revenues generated by those leases to enhance infrastructure and operating costs on those installations. This so-called "enhanced use lease" (EUL) authority is being used in different ways and for different purposes by each of the military departments. The Air Force, after some hesitation, seems to be embracing EUL opportunities including the recent implementation of a creative agreement at Hill Air Force Base in Utah.

What is your understanding of the EUL authority?

Answer. I understand that Congress provided EUL authority to the military Services and that it applies to underutilized property that has not been declared excess. I understand the Service Secretaries can enter into lease arrangements with private sector providers in exchange for infrastructure and operating cost considerations. I understand that the EUL must be shown to promote the national interest or be in the public interest.

Question. What do you see as the future of the Air Force's EUL program?

Answer. If confirmed, I will build upon the successes of the Air Force's EUL program. I view the EUL program as a significant asset management tool for the Air Force. Accordingly, it will help reduce the amount of underutilized assets, and create resources that can supplement Air Force goals and mission requirements.

Question. What EUL projects do you see as most viable in the near term?

Answer. If confirmed, I will continue the efforts underway and will focus on opportunities to support the Air Force's ongoing renewable energy and infrastructure initiatives. Further, I will continue traditional real estate transactions as the real estate market continues to rebound.

Question. If confirmed, what will be the main concentration of the EUL program?

Answer. I believe the EUL program will provide Air Force the ability to leverage assets and establish long-term relationships with private and government partners. These efforts will cultivate meaningful support and improvement for Air Force installations and surrounding communities by enhancing future economic growth. Further, I believe the program can help substantially in achieving the Air Force's and DOD's energy and water efficiency goals.

Question. Will you consider the authority to provide support to energy initiatives?

Answer. Yes. If confirmed, I will ensure the Air Force considers and continues seeking out energy opportunities looking at all renewable energy options as well as how we can support Smart Grid technologies and applications.

Question. Will you continue to focus on the construction of facilities and in-kind reimbursement to base operating costs?

Answer. Yes. I believe it is essential for the AF to leverage its non-excess real estate assets to obtain private sector capital to offset operating costs and for facility construction. These are “win/win” projects that will help installation commanders sustain base operations and meet their most urgent needs.

Question. The Congressional Budget Office has expressed concern that EUL authority could be used to acquire expensive facilities through long-term leases that commit DOD to make payments (rather than receiving payments) over an extended period of time. Do you believe that it would be appropriate to use EUL authority to commit future years DOD funds for long-term projects to acquire facilities that have not received approval through the normal budgeting process?

Answer. No. My understanding of the EUL authority is that acquiring facilities through long-term leasing committing future years funding is not allowed.

Question. If confirmed, how would you address proposals to use EUL authority in this manner?

Answer. Based upon my current understanding of EUL authority, I would not support any such proposals.

BASE OPERATING SUPPORT

Question. In your view, is the Air Force receiving adequate funding for base operating support?

Answer. If confirmed, I will review the current and future requirements for base operating support funding to ensure that the AF can support its missions.

Question. Based on your experience, how might the Department of the Air Force distribute base operating funds to best ensure sound investment of constrained resources?

Answer. I believe our commanders are in the best position to determine how best to allocate limited base operating support dollars. I am committed to ensuring our Wing commanders have the resources to execute their missions at the tactical level.

AIR FORCE LABORATORY AND TEST CENTER RECAPITALIZATION

Question. There has been concern over the adequacy of recapitalization rates of the Department’s laboratory facilities and test centers. Historically, Air Force laboratories and test centers do not appear to have fared well in the internal Air Force competition for limited military construction and facility sustainment funds.

What metrics would you use to assess the amount of investment in the recapitalization of Air Force laboratories and test centers to determine its adequacy?

Answer. I am not currently in a position to comment on Air Force laboratory and test center recapitalization but if confirmed, I will actively work to establish the right metrics to assess their recapitalization rates.

Question. How would you propose to address this recapitalization issue for the Air Force laboratories and test centers?

Answer. I am not currently in a position to comment on Air Force laboratory and test center recapitalization. However, if confirmed, I will work with the appropriate OSD and Air Force leadership to address the recapitalization of Air Force laboratories and test centers.

JOINT STRIKE FIGHTER BASING DECISIONS

Question. The Air Force intends to announce soon a down select of bases for the future bed down of the F-35 Lightning.

What is your understanding of the Air Force’s process for making basing decisions for the Joint Strike Fighter?

Answer. It is my understanding that the Air Force has a comprehensive process which evaluates every basing decision including the beddown of major weapon systems. The process is initiated by the Air Force Major Commands taking into account a number of criteria such as facility and infrastructure requirements, airspace, environmental and energy demand/impacts, logistic support requirements and quality of life support facility requirements. These requirements are arrayed against possible beddown locations and reviewed by an Executive Steering Group and finally by the Secretary and the Chief. The results of this initial analysis is the release of a candidate basing list.

Once the possible basing alternatives have been identified, the Air Force begins the National Environmental Policy Act (NEPA) process including coordination with the public and local communities. The NEPA analysis culminates in a record of decision followed by an announcement of the preferred beddown.

Question. Based on your understanding of the basing decision process, including the implications of the NEPA, what is your view on how the decision process can

best suit the needs of the Department while also complying with the legal and regulatory requirements associated with such decisions?

Answer. I see NEPA as an excellent tool and well suited to assist the Air Force in making better, more informed, basing decisions when looking at a set of reasonable alternatives. This informed decisionmaking further assists the Air Force in mitigating potential impacts to a broad spectrum of environmental issues including air and water quality; noise and encroachment; and endangered species and historic preservation—all of which have a basis in regulatory guidance.

Question. What factors contribute to the possibility of litigation filed in response to basing decisions like the one underway within the Department of the Air Force with respect to the Joint Strike Fighter?

Answer. Factors that can contribute to the possibility of litigation include—but are not limited to—issues associated with the Clean Air Act, Endangered Species Act, aircraft noise, and historic preservation or simply not appropriately complying with the NEPA process.

ENVIRONMENTAL RESTORATION

Question. Over the past several years, the Air Force has maintained level funding in its installation restoration accounts, but more still needs to be done to remediate the long legacy of environmental contamination.

What do you see as the main priorities for clean-up within the Air Force program?

Answer. The prevention of exposure hazards and the remediation of contaminated land are the main priorities of the Air Force environmental restoration program. The Air Force has set a goal of having Remedies-in-Place or Responses Complete (RIP/RC), whichever comes first, by fiscal year 2012 (2 years ahead of the DOD goal of 2014) and the completion of Site Inspections of currently identified Military Munitions Response Program (MMRP) sites by fiscal year 2010.

Question. What will you do to ensure that adequate funding is requested and received to ensure that clean-ups under the Installation Restoration Program and under the Military Munitions Remediation Program continue apace?

Answer. If confirmed, I will work with Air Force leadership and the corporate structure programming and budgeting process to ensure adequate funds are available to meet aggressive restoration goals.

Question. Based on your experiences in both the government and private sectors, what changes, if any, in the DOD restoration program do you think could help expedite clean-up efforts at active and former defense sites?

Answer. DOD is doing a good job cleaning up its contaminated sites and, if confirmed, I will work with the Deputy Under Secretary for Installations & Environment to review the department's cleanup program and metrics.

Question. At the beginning of 2009, there were 11 sites within DOD that were listed on the National Priority List (NPL) but were not yet covered by signed inter-agency Federal Facility Agreements (FFA). Seven of the 11 were Air Force sites.

What is your understanding of the status of these agreements and do you believe it is important to have signed FFA for NPL sites?

Answer. I fully support working as partners with the Environmental Protection Agency and State regulators in NPL cleanup agreements. To that end, it is important to have signed FFA in place.

POLLUTION PREVENTION

Question. In each annual budget request since at least fiscal year 2006, the Air Force has requested over \$80 million for pollution prevention programs. However, for fiscal year 2010, the Air Force requested less than \$45 million.

What is your understanding of the reasons for this significant reduction in pollution prevention funding?

Answer. If confirmed, I will review the budget request for pollution prevention programs to ensure that they are adequate to meet the challenges the Air Force faces.

Question. If confirmed, what would be your intentions with regard to future funding for pollution prevention programs?

Answer. I believe funding for pollution prevention is an investment in the future that will reduce maintenance costs, create a healthier and safer work place for military and civilian workers, and meet the goals and expectations of the Department. If confirmed, I will review requirements for Air Force pollution prevention programs to ensure that they are adequate to meet the challenges the Air Force faces and comply with the new executive order.

ENERGY POLICY

Question. The Secretary of the Air Force, in a June 16, 2009, memorandum, established the Assistant Secretary of the Air Force for Installations and Environment as the Office of Primary Responsibility supporting the Under Secretary of the Air Force in his capacity as the Department's Senior Energy Official.

If confirmed, what would your responsibilities be for setting and implementing energy policy within the Department?

Answer. If confirmed, I will support the Under Secretary of the Air Force, in his or her role as the Air Force's Senior Energy Official, and will oversee implementation of the energy program throughout the Air Force. My responsibilities would include working with the Secretary and the Under Secretary of the Air Force, the other Assistant Secretaries, and the Air Force Chief of Staff and Vice Chief of Staff to develop overarching energy policy within the U.S. Air Force.

Question. What do you see as the key elements of the Air Force's energy strategy?

Answer. I understand the Air Force's stated goals are to reduce energy demand, increase the availability and types of energy supplies, and change the Air Force's culture to make energy a consideration in all we do. If confirmed, I will continue to support these goals.

Question. What is your understanding of the energy conservation goals within the Air Force and DOD?

Answer. Congress and the President have established various energy conservation goals that will reduce dependence on foreign sources of energy and help sustain the Air Force's mission readiness and responsiveness on a global scale. These goals include reducing the Air Force's facility and ground vehicle energy consumption each year, while increasing the amount of renewable energy and alternative fuels we use.

Question. If confirmed, what steps would you take to promote energy conservation within the Department of the Air Force?

Answer. I strongly support energy conservation, and I will encourage energy conservation using both traditional and innovative strategies to ensure that the Air Force meets or surpasses all energy standards and goals. If confirmed, I will continue to endorse the Air Force's energy vision to make energy a consideration in every activity. I will also continually encourage the sharing of best practices with sister Services, Federal agencies, and other stakeholders outside of the Air Force to identify those ideas and initiatives that can lead to greater energy security.

Question. With respect to renewable energy, which strategies do you believe provide the best prospects for meeting the energy needs at Air Force installations and in the ground fleet?

Answer. If confirmed, I will promote the development and use of renewable and alternative energy at facilities and in ground vehicles and equipment. I will work with the other Assistant Secretaries and the Commanders at the Major Commands and installations to identify potential opportunities to expand the availability and use of renewable and alternative energies. Likewise, I will work with OSD (Deputy Under Secretary, Installations and Environment) to identify research and development opportunities and investments that will support meeting the department's energy goals.

Question. What renewable technologies and fuel types have the most potential for certification and use by aircraft?

Answer. If confirmed, I will perform a comprehensive review of Air Force efforts regarding the specific technologies and fuel types and recommend to the Secretary of the Air Force and Chief of Staff of the Air Force those alternative fuel sources that I believe would be worthwhile to pursue further.

Question. With respect to aviation fuel requirements, what examples, if any, can you provide of policies or initiatives currently in practice that both conserve fuel use and cost while balancing appropriate readiness levels and pilot training requirements?

Answer. While I have not had the opportunity to examine all of the Air Force's initiatives in this area, I am aware that the Air Force's published policy calls for operational aviation effectiveness through validating mission and training requirements, moving flight training to simulators when practical, and developing a fuel conservation culture within the aviation operations community. I know the Air Force has taken proactive steps in these areas. If confirmed, I will encourage continued efforts to conserve fuel use and cost while optimizing readiness and training.

ENCROACHMENT ON MILITARY INSTALLATIONS

Question. The encroachment of commercial development near military installations has negatively impacted Air Force operations at military airfields and ranges.

What do you see as the main constraints on the Air Force's ability to use its facilities, including training ranges?

Answer. Operations at facilities and ranges are affected by a variety of constraints including development in the clear zones, height of buildings and structures, and commercial facilities that affect the electronics on aircraft particularly radar. Training may be moved or delayed because of seasonal or time of day restrictions. In other instances operations can be affected by competition for airspace or incompatible development adjacent to our test and training ranges, or under our Military Training Routes, and Special Use Airspace.

Question. If confirmed, what policies or steps would you take to curtail the negative impacts on operations and training resulting from encroachment?

Answer. I believe that we need to work closely with local communities as they develop their land use plans. If confirmed, I will ensure encroachment issues are treated comprehensively and that the appropriate programs or initiatives are implemented to address potential readiness problems. We need to understand the community needs and they need to know how land use planning can affect our ability to meet military training and readiness needs. If confirmed, I will ensure the Air Force has a comprehensive encroachment policy and management program that supports proactive engagement on encroachment challenges with a broad range of tools and strategies.

Question. How can the Air Force address the issues of encroachment around its bases in the United States, particularly with respect to encroachment caused by residential development?

Answer. The best way to address the issues of incompatible development is to actively establish long-term working relationships with our local communities and participate in the local land use planning processes.

OCCUPATIONAL SAFETY

Question. In 2006, the Secretary of the Air Force implemented within the Air Force the Occupational Safety and Health Administration's (OSHA) Voluntary Protection Program (VPP).

What is your understanding of the Air Force's VPP?

Answer. I understand VPP is a voluntary program where the Air Force takes proactive steps and conducts self-assessments to meet the health and safety standards set by OSHA. I know that similar voluntary programs have been successfully adopted in the private sector. I see the VPP program as a tool to stay focused on the Air Force's health and safety programs and to constantly improve the Air Force's already good health and safety record.

Question. If confirmed, what would be your responsibilities under the VPP?

Answer. I believe my primary responsibility lies in overseeing VPP implementation and providing policy guidance for the Air Force Safety Center, major commands and installations.

Question. If confirmed, how will you ensure that safety programs under your cognizance are effective and successful?

Answer. If confirmed, I will work closely with the Air Force Vice Chief of Staff as co-chair of the Air Force Environment, Safety and Occupational Health Council to monitor performance and provide guidance as needed. I will partner with the Air Force Chief of Safety to ensure policy implementation fosters improved workforce safety and mission execution.

LOGISTICS

Question. Within the Department of the Air Force, the Assistant Secretary of the Air Force for Installations and Environment also has responsibility for logistics.

What is your understanding of these responsibilities?

Answer. I understand SAF/IE has overall responsibility for installations, energy, environment, safety and occupational health, and weapon systems logistical support for the Department of the Air Force. Specific to logistics the Assistant Secretary (I&E) provides guidance, direction, and oversight for all matters pertaining to the formulation, review, and execution of plans, policies, programs, and budgets for logistics.

Question. If confirmed, what would be your priorities with respect to materiel support, supply chain management, and sustainment?

Answer. If confirmed, my priorities will be to advocate for and support the resources within the corporate structure to meet the logistic functions of the Air Force. I will continue to seek process improvements to reduce the cost, energy, and environmental footprint of the Air Force's logistics centers while improving the Air Force's ability to meet the warfighting mission. I will continue to support research

and development into new materials and technologies that will improve the performance, cost, and sustainability of Air Force weapon systems. Maintaining the robust technology sustainment capabilities organic to the three Logistics Centers, in my view, is critical to meeting the sustainment challenges of the Air Force and will be a priority for me, if confirmed.

Question. What initiatives are you aware of within the Department of the Air Force that are designed to account for the full life cycle costs of munitions, particularly as those costs relate to disposal, unexploded ordnance and munitions-constituent contamination?

Answer. I am not aware of any specific initiatives, however, I fully understand our responsibilities to be good stewards of the environment and if confirmed I will ensure we comply with the environmental laws as established by Congress.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information. Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of the Air Force for Installations and Environment?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR BILL NELSON

AGING AIR FORCE INFRASTRUCTURE

1. Senator BILL NELSON. Mr. Yonkers, if confirmed, you would be responsible for the Air Force's aging range infrastructure at Eglin Air Force Base (AFB), Cape Canaveral, and Tyndall AFB. For example, Cape Canaveral's critical communications hub, the "X/Y building," needs to be replaced at a cost of \$21 million. Additionally, the Air Force has identified over \$55 million in required electrical and water upgrades for the Eastern Range. These are critical systems for access to space. Moreover, critical research, development, test, and evaluation infrastructure at Eglin AFB and Tyndall AFB is crumbling. Your advance policy questions note that the Air Force is behind military construction (MILCON) funding for base infrastructure. Please provide your views on the historical underfunding of MILCON for launch, research, test, and evaluation infrastructure.

Mr. YONKERS. I believe that maintaining and enhancing installation infrastructure to carry out the Air Force mission in the most efficient and cost-effective manner should always be a priority. I would anticipate the Air Force to continue to work through challenges in finding the right balance between maintaining a high status of readiness while optimizing the use of their scarce resources in the areas of military construction and infrastructure management. If confirmed, I look forward to helping the Air Force in this endeavor.

2. Senator BILL NELSON. Mr. Yonkers, how will you work with the Secretary of the Air Force to rebalance funding priorities for infrastructure improvements throughout the Air Force, specifically launch, research, test, and evaluation infrastructure?

Mr. YONKERS. If confirmed, I look forward to participating in corporate level decisions regarding allocation of Air Force fiscal resources to ensure infrastructure im-

provements, specifically launch, research, test and evaluation infrastructure, are properly considered in enterprise-wide resource balancing.

3. Senator BILL NELSON. Mr. Yonkers, how might divestment or enhanced use lease arrangements help with addressing this need?

Mr. YONKERS. In my view, divestment and enhanced use lease arrangements are two of the tools available to the Air Force in the management and modernization of its infrastructure. I believe divestment and enhanced use lease arrangements are opportunities for the Air Force to leverage the expertise and capital of the private sector to assist the Air Force in improving its infrastructure and facilities.

AIR FORCE HOUSING PRIVATIZATION

4. Senator BILL NELSON. Mr. Yonkers, will you review the existing agreements between the Air Force and housing privatization developers?

Mr. YONKERS. If confirmed, I intend to conduct a review of the Air Force's existing agreements with the housing privatization developers.

5. Senator BILL NELSON. Mr. Yonkers, will you review the Army's and the Navy's housing privatization procedures and identify those practices that are disparate? Once you have completed your review, would you seek to implement those "best practices" that yield the best housing for the servicemember, security for the Government, and value for the taxpayer? Please provide your findings and conclusions.

Mr. YONKERS. If confirmed, I intend to undertake a review of the Army and Navy housing privatization procedures and take full advantage of best practices that may be applied to the Air Force housing privatization program in order to provide quality housing that the Air Force members and their families expect and deserve.

QUESTIONS SUBMITTED BY SENATOR MARK BEGICH

BASE REALIGNMENT AND CLOSURE

6. Senator BEGICH. Mr. Yonkers, the 2005 Base Realignment and Closure (BRAC) process is currently underway. As a result of BRAC, Elmendorf AFB and Fort Richardson will become a joint base. What concerns or challenges relating to the implementation of joint basing agreements do you foresee?

Mr. YONKERS. I am not familiar with specific concerns with BRAC-directed joint basing agreements at this time. However, if confirmed, I will focus my initial efforts to try to ensure the Air Force moves smartly and quickly to put the right foundational elements in place to support a seamless transition to a joint base with minimal impact to the mission and the base population.

7. Senator BEGICH. Mr. Yonkers, how will you ensure that joint basing agreements are executed in a manner least disruptive to the base population and missions?

Mr. YONKERS. If confirmed, I will work with my counterparts in the Army and Navy to ensure the military departments and bases involved in each joint base take great care to pre-plan their joint base transition function-by-function to minimize disruptions to base personnel, missions, and surrounding communities.

8. Senator BEGICH. Mr. Yonkers, in your answers to the advance policy questions you list factors that will contribute to the possibility of litigation in response to Joint Strike Fighter (JSF) basing populations that include aircraft noise, historic preservation, the Clean Air Act, and the Endangered Species Act. How does the current bed-down strategy attempt to mitigate some of the issues you identified that may lead to litigation?

Mr. YONKERS. As a Government agency, I would expect the Air Force to comply with all laws and regulations governing clean air, historic preservation, noise, endangered species, and the National Environmental Policy Act (NEPA). I understand part of the bed-down strategy is for the Air Force to conduct an Enterprise-Wide look which includes environmental factors as well as operational criteria to identify candidate bases having the greatest potential to accommodate the F-35 training and operational mission. I also understand that the Air Force will conduct a NEPA analysis as required by law based on this candidate list.

QUESTIONS SUBMITTED BY SENATOR ROLAND W. BURRIS

JOINT OPERATIONS

9. Senator BURRIS. Mr. Yonkers, how do you intend to support the current and future joint operations that the unified commanders are executing?

Mr. YONKERS. If confirmed, providing support to the joint warfighter would be a priority for me. I have not yet had the opportunity to be read-in on current and future joint operations. If confirmed, I would work quickly to become knowledgeable on joint operational matters and the underlying support provided by the Air Force installations, environment, and logistics portfolio of capabilities.

HOMELAND SECURITY AND CIVIL AUTHORITIES

10. Senator BURRIS. Mr. Yonkers, is there a role for you to play in homeland security and support to civil authorities?

Mr. YONKERS. If confirmed, I would work quickly to understand the extent of my responsibilities and the assets available in the Air Force installations, environment, and logistics portfolio to fully support homeland security and civil authorities to meet our national objectives.

ENCROACHMENT

11. Senator BURRIS. Mr. Yonkers, what actions in terms of encroachment on all Air Force bases do you need to take to perform your duties?

Mr. YONKERS. I believe the most effective encroachment prevention and mitigation is accomplished at the installation level. If confirmed, one of my primary responsibilities will be to ensure the commanders at the bases have the policy, guidance, and resources needed to address encroachment challenges. I understand the Air Force currently has encroachment management initiatives to look at a number of these issues.

At the corporate Air Force level, if I am confirmed, I expect my responsibilities will include ensuring that the Air Force has clear and well articulated policies regarding encroachment, and engaging with other Federal agencies having jurisdictions over federal lands or programs that could impact the Air Force's ability to carry out its flying and other operational missions and find ways to resolve encroachment problems.

CONSERVATION

12. Senator BURRIS. Mr. Yonkers, how important is green technology in implementing the energy policy in the Air Force?

Mr. YONKERS. I am well aware of the important role that green technologies play in meeting energy security, efficiency, and conservation goals. While I am not familiar with everything the Air Force is doing using green technologies, if confirmed, I will perform a comprehensive review of efforts in this area to ensure that the Air Force meets or surpasses all energy standards and goals.

13. Senator BURRIS. Mr. Yonkers, do you see future opportunities for the Air Force to partner with civilian agencies with its conservation initiatives?

Mr. YONKERS. Yes. It is my view that partnering is crucial to leveraging research and development technology efforts and best business practices across the federal government, as well as technology and specialized skills found in the civilian agencies. If confirmed, I would look forward to working with other federal agencies to ensure the Air Force uses all the tools available to achieve energy conservation goals.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

F-35 JOINT STRIKE FIGHTER BASING DECISIONS

14. Senator MCCAIN. Mr. Yonkers, the Air Force intends to select bases for the future stationing of the F-35 JSF for training and operations at both Active and Air Guard installations, a matter of critical concern to local communities. Implementation of this selection process will undoubtedly take up a majority of your time if confirmed as Assistant Secretary. In your opinion, should the internal Air Force assessments of installations and ranges used to select bases for the F-35 be open and transparent to allow review by local communities affected by the basing decisions?

Mr. YONKERS. I understand that the Air Force is reviewing basing options for the F-35. Consistent with my previous Air Force experience, I would expect them to follow an open and transparent process by engaging interested Congressional Members and explaining the rationale for their strategic basing decisions. Additionally, the Environmental Impact Analysis Process that the Air Force would conduct in compliance with the NEPA, is very transparent and open to public comment and participation. All inputs received as a result of this "open public process" would be evaluated in decision making before the final Record of Decision is signed identifying the final basing locations.

15. Senator MCCAIN. Mr. Yonkers, if confirmed, how would you ensure an open, transparent process?

Mr. YONKERS. If confirmed, I understand one of my responsibilities would be to chair the Air Force Strategic Basing Executive Steering Group (SB-ESG) which oversees basing decisions and is intended to ensure a standardized, transparent, and repeatable process in determining overall Air Force basing opportunities. As the SB-ESG evaluates basing decisions, I would work to ensure the Air Force shares information with appropriate congressional members and responds to questions throughout the process. Additionally, I would expect to use the Environmental Impact Analysis Process to solicit comments from members of the community and community leaders. This should help ensure a process that incorporates public concerns and comments as part of the final basing decisions issued in the Record of Decision.

16. Senator MCCAIN. Mr. Yonkers, concerning the objective data being used by the Air Force to assess bases, do you agree that a public review of this data will ensure that Air Force leaders have accurate and current information prior to subsequent basing decisions?

Mr. YONKERS. I believe the Air Force has implemented a new Strategic Basing Process which should help ensure congressional members, State and local officials and the communities surrounding all Air Force installations are informed on what basing decisions are being made and the reasoning behind the decisions. I have read the basing process and agree it should ensure the data used to make up the objective basing scores will be accurate, current, and verifiable. This process, in conjunction with the Environment Impact Analysis Process required for all basing decisions will ensure that all operational and environmental facets are appropriately assessed as part of the final basing decision.

17. Senator MCCAIN. Mr. Yonkers, what is your understanding of the current Air Force plan for a public review of the data used to assess bases for the F-35?

Mr. YONKERS. I am aware of the Air Force Strategic Basing process but do not have insight into the current Air Force plan for the public review of the data used to assess bases for the F-35. If confirmed, I will support the Air Force's commitment to following a standardized, transparent and repeatable process for making basing decisions.

18. Senator MCCAIN. Mr. Yonkers, please provide the current planning timeline for the Air Force to select bases and commence F-35 operations.

Mr. YONKERS. I'm not in a position at this time to know the details of the Air Force plans or schedule to select bases and commence F-35 operations. If confirmed, I look forward to understanding the Air Force timeline and how I can best support it.

AMELIORATING THREAT OF LITIGATION

19. Senator MCCAIN. Mr. Yonkers, you mentioned in answers provided to the committee prior to this hearing about a question concerning potential litigation as a result of the NEPA process that "Factors that can contribute to the possibility of litigation include—but are not limited to—issues associated with the Clean Air Act, Endangered Species Act, aircraft noise, and historic preservation or simply not appropriately complying with the NEPA process." If confirmed, what would you propose to mitigate these factors related to the F-35, so that basing decisions can be implemented quickly?

Mr. YONKERS. The NEPA is a process that requires identification, assessment, and mitigation of possible environmental impacts. The NEPA evaluation includes impacts to air quality, water quality, endangered species, historic buildings and assets, impacts from noise, and a number of other environmental factors. If confirmed, I will become knowledgeable about the F-35 NEPA process and its progress as well

as the mitigation measures proposed in the mitigation plan to ensure the F-35 basing decisions can be implemented as quickly as practicable.

PROCESS FOR AWARDING IN INDEFINITE DELIVERY/INDEFINITE QUANTITY CONTRACTS

20. Senator McCAIN. Mr. Yonkers, the Air Force recently awarded to several vendors an indefinite delivery/indefinite quantity contract, known as Worldwide Environmental Restoration and Construction 2009 (WERC 09), to provide a range of environmental remediation and clean-up services with an estimated cost of \$3.0 billion over the next 5 years. As the nominee to be the Assistant Secretary of the Air Force for Installations and Environment, your position will require you to provide overall policy and guidance for the Air Force's environmental programs, including determining budgets and funding decisions regarding environmental actions. The amount of the funds requested annually for Air Force environmental programs in budget requests to Congress will have a direct impact on the number and amount of delivery orders issued under WERC 09. Furthermore, your office will provide the primary appointed civilian oversight Air Force environmental programs, including the execution of delivery orders carried out by the Air Force Center for Engineering and the Environment (AFCEE) under WERC 09. If confirmed as Assistant Secretary of the Air Force for Installations and Environment, what roll and responsibilities would you have, if any, in assisting in the development of Air Force budgets for environmental program?

Mr. YONKERS. I understand the requirements and initial budget estimates for the Air Force's environmental program are identified at the installation, major command, or service center level and then vetted through the Air Force corporate process. One of the final steps of this process is a roll-up of all Air Force programs and requirements at the Air Force Council level which I will be a member, if confirmed. The Council's responsibility is to balance the critical needs of the Air Force across all program areas and make recommendations to the Secretary and the Chief of Staff of the Air Force to be incorporated into the DOD's President budget.

21. Senator McCAIN. Mr. Yonkers, are you aware of the process that AFCEE will use to award each delivery order under WERC 09? If so, please describe them.

Mr. YONKERS. I am generally aware that the AFCEE is responsible for executing the environmental programs for the Air Force including the development of task orders, evaluation of responses to proposals, award of those task orders and overseeing the performance of contractors in completing the work required under a task order. I also understand that the AFCEE develops the criteria including the contracting method used to evaluate proposals and award each delivery order. I understand and expect that AFCEE would follow a similar process with regard to task orders awarded under WERC 09.

22. Senator McCAIN. Mr. Yonkers, in your opinion, for the selection of contractors for task or delivery orders, is the current process open, transparent, and based on competitive assessments of the best value to the Government? Why or why not?

Mr. YONKERS. It is my understanding that the Civil Engineer who reports through command channels to the Chief of Staff of the Air Force is responsible for execution of the Air Force's environmental program. The actual development of task orders and the selection of awardees are the responsibility of the AFCEE. I understand that AFCEE uses industry days and other such venues to help them develop appropriate acquisition strategies for their contracts and that these venues are open to all contractors. Generally, I believe the AFCEE uses competitive assessments in accordance with laws and guidance, when awarding task orders.

23. Senator McCAIN. Mr. Yonkers, are you aware of any Air Force policy or guidance that would govern the award of task or delivery orders that are to be awarded to each contractor under WERC 09? If so, please explain.

Mr. YONKERS. I am aware that Air Force policies and instructions already in place establish broad goals and objectives with regard to the Air Force's environmental programs and expectations. These policies and instructions cover a wide array of environmental programs and requirements covering the four main pillars of the Air Force's environmental program: remediation, pollution prevention, compliance, and natural/cultural resources. I am not aware that any of these policies govern or intend to govern the award of any task or delivery order under WERC 09. WERC 09 is executed by AFCEE, under the direction of Air Force Civil Engineering, and within the chain of command of the Air Force Chief of Staff.

24. Senator MCCAIN. Mr. Yonkers, what role would you have, if any, in issuing task orders under WERC 09 to prime contractors under this program?

Mr. YONKERS. If confirmed, I understand I would have no role in the issuance, governance, or execution of task orders under WERC 09. WERC 09 is managed and executed by AFCEE under the direction of Air Force Civil Engineering, and within the chain of command of the Air Force Chief of Staff.

25. Senator MCCAIN. Mr. Yonkers, in your opinion, do the processes that apply to the award to task or delivery orders eliminate the potential of influence or subjective award of a delivery order? Why or why not?

Mr. YONKERS. From my limited understanding, the current process appears open, transparent, and designed to minimize the potential for influence or subjective award. I understand the authority to award task orders resides solely with the Contracting Officer. There are checks and balances within the award process and separate lines of authority that prevent undue influence within the award process.

26. Senator MCCAIN. Mr. Yonkers, are the processes to be used by AFCEE for task or delivery order awards formally published and adopted as a regulation or other guiding document? If so, please provide those regulations or other documents to your response.

Mr. YONKERS. I understand the Federal Acquisition Regulation addresses and governs the award of task orders and delivery orders.

27. Senator MCCAIN. Mr. Yonkers, what special steps, if any, would you take to ensure that others might not purposefully or inadvertently make decisions that might result in the inappropriate awarding of task or delivery orders under this program?

Mr. YONKERS. I understand the Assistant Secretary (Installations, Environment, and Logistics) does not have a role in the execution or governance of task orders administered by the AFCEE or other Air Force service centers. From my experience, I believe that the acquisition processes and professionals, especially contracting officers are very good at complying with both the letter and intent of the procurement laws. I believe that the process, including numerous checks and balances are in place to avoid inadvertent decisions or inappropriate award of task or delivery orders.

If confirmed, I would continue to support the separation of policy and execution authority. I would work closely with the General Counsel of the Air Force to eliminate any appearance of influence by the Assistant Secretary (Installations, Environment, and Logistics) on the task order selection process.

[The nomination reference of Terry A. Yonkers follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
August 3, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Terry A. Yonkers of Maryland, to be an Assistant Secretary of the Air force, vice William Anderson, resigned.

[The biographical sketch of Terry A. Yonkers, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF TERRY A. YONKERS

EDUCATION

Hemet High School, attended 1963–1967 (diploma awarded June 1967)
Mt San Jacinto JC, attended 1967–1969 (degree: AA awarded June 1969)
University of California, Riverside, attended 1969–1972 (BS, biology, awarded June 1972)
University of California, Riverside, 1972–1973 (Secondary Teaching Credential awarded June 1973)

National Defense University, 1992–1993 (Diploma of completion awarded July 1993)
 Federal Executive Institute, 1997 Carnegie Mellon University, Program for Executives, 1999
 Massachusetts Institute of Technology, Seminars in International Relations and National Security, 2000
 George Mason University, 1998–2000 (Masters of Public Admin awarded Jan 2001)

EMPLOYMENT RECORD

2002 to present. ARCADIS U.S., Inc. 630 Plaza Drive, Highlands Ranch, CO.
 Senior Vice President, Federal Business Development Director, Jan. 2000–June 2001. U.S. Air Force, 1660 Pentagon, Washington DC.
 Acting Deputy Assistant Secretary (Environment, Safety, and Occupational Health). Nov. 1996–Dec. 2000, U.S. Air Force, 1660 Pentagon, Washington DC.
 Supervisory Environmental Engineer and Special Assistant to the Assistant Secretary for Manpower, Reserve Affairs, Installations and Environment.
 1990–1996. Air Force Base Conversion Agency (BRAC), Director of Environmental Programs.
 1986–1990. Air Force Systems Command, Deputy Director of Environmental Programs.
 1984–1986. Air Force Regional Civil Engineer, Dallas Region. Environmental Engineer and Regulatory Liaison.
 1980–1984. Air Force Flight Test Center, Edwards AFB, CA. Environmental Engineer.

HONORS AND AWARDS

Air Force Outstanding Civilian Service Award (May 2002)
 Secretary of Air Force—Letter of Recognition (March 2000)
 Air Force National Capital Region Work Force Mentoring Program, Certificate of Appreciation (September 2001/2000)
 Air Force Organizational Excellence Award (1998)
 Air Force Systems Command finalist for General Thomas D. White award (1986)

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Terry A. Yonkers in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior

to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Terry Arthur Yonkers.
2. **Position to which nominated:**
Assistant Secretary of the Air Force (Installations, Environment, and Logistics).
3. **Date of nomination:**
August 3, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
August 5, 1949; Hemet, CA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Mari Helen Yonkers (Maiden Name: Norwood).
7. **Names and ages of children:**
Timothy Raul Yonkers, age 38; Tammara Jonese Lightie, age 35.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Hemet High School, attended 1963–1967 (diploma awarded June 1967).
Mt San Jacinto JC, attended 1967–1969 (degree: AA awarded June 1969)
University of California, Riverside, attended 1969–1972 (BS, biology, awarded June 1972)
University of California, Riverside, 1972–1973 (Secondary Teaching Credential awarded June 1973)
National Defense University, 1992–1993 (Diploma of completion awarded July 1993)
Federal Executive Institute, 1997
Carnegie Mellon University, Program for Executives, 1999
Massachusetts Institute of Technology, Seminars in International Relations and National Security, 2000
George Mason University, 1996–2000 (Masters of Public Admin awarded Jan 2001)
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
July 2002 to present. ARCADIS U.S., Inc. 630 Plaza Drive, Highlands Ranch, CO, Senior Vice President, Federal Business Development Director
Jan. 2000–June 2002. U.S. Air Force, 1660 Pentagon, Washington DC, Acting Deputy Assistant Secretary (Environment, Safety, and Occupational Health).
Nov. 1996–Dec. 2000. U.S. Air Force, 1660 Pentagon, Washington DC, Supervisory Environmental Engineer and Special Assistant to the Assistant Secretary for Manpower, Reserve Affairs, Installations and Environment. Represented the ASAF on corporate POM and budget committees, developed, and managed environmental policies and programs, spearheaded special projects e.g., SAF/MI manpower and re-organization initiative.
10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.
1990–1996, Air Force Base Conversion Agency (BRAC), Director of Environmental Programs
1986–1990, Air Force Systems Command, Deputy Director of Environmental Programs
1984–1986, Air Force Regional Civil Engineer, Dallas Region. Environmental Engineer and Regulatory Liaison
1980–1984, Air Force Flight Test Center, Edwards AFB, CA. Environmental Engineer
11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
Senior Vice President, ARCADIS U.S., Inc.
12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
President, Ashley II Homeowners Association, Davidsonville, MD.

Society of American Military Engineers, Chairman of Global Climate Change Committee.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Hillary Clinton for President, 9/18/2007 - \$1,000

Sestak for Congress, 6/18/2007 - \$500

09/27/2007 - \$500

12/27/2007 - \$200

06/23/2009 - \$300

Obama Victory Fund, 9/18/2008 - \$1,000

Obama for America, 9/30/2008 - \$1,000.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Air Force Outstanding Civilian Service Award (May 2002)

Secretary of Air Force - Letter of Recognition (March 2000)

Air Force National Capital Region Work Force Mentoring Program, Certificate of Appreciation (September 2001/2000)

Air Force Organizational Excellence Award (1998)

Air Force Systems Command finalist for Gen. Thomas D. White award (1986)

15. Published writings: List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

The Military Engineer, "Climate Changes & National Security", co-author.

Magazine of the Society of American Military Engineers, No. 657, Jan.-Feb. 2009.

16. Speeches: Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. Commitment to testify before Senate committees: Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

TERRY A. YONKERS.

This 28th day of August, 2009.

[The nomination of Terry A. Yonkers was reported to the Senate by Chairman Levin on December 2, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 4, 2010.]

**NOMINATIONS OF DR. CLIFFORD L. STANLEY
TO BE UNDER SECRETARY OF DEFENSE
FOR PERSONNEL AND READINESS; ERIN C.
CONATON TO BE UNDER SECRETARY OF
THE AIR FORCE; AND LAWRENCE G. ROMO
TO BE DIRECTOR OF THE SELECTIVE SERV-
ICE SYSTEM**

THURSDAY, NOVEMBER 19, 2009

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:35 a.m. in room SH-216, Hart Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, E. Benjamin Nelson, Udall, Burris, McCain, Thune, and LeMieux.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Jonathan D. Clark, counsel; Madelyn R. Creedon, counsel; Gabriella Eisen, counsel; Creighton Greene, professional staff member; Gerald J. Leeling, counsel; Jason W. Maroney, counsel; William G.P. Monahan, counsel; John H. Quirk V, professional staff member; and William K. Sutey, professional staff member.

Minority staff members present: Joseph W. Bowab, Republican staff director; Daniel A. Lerner, professional staff member; Lucian L. Niemeyer, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Jennifer R. Knowles and Breon N. Wells.

Committee members' assistants present: Christopher Caple, assistant to Senator Bill Nelson; Ann Premer, assistant to Senator Ben Nelson; Patrick Hayes, assistant to Senator Bayh; Gordon I. Peterson, assistant to Senator Webb; Jennifer Barrett, assistant to Senator Udall; Roosevelt Barfield, assistant to Senator Burris; Anthony J. Lazarski, assistant to Senator Inhofe; Jason Van Beek, assistant to Senator Thune; and Brian W. Walsh, assistant to Senator Martinez.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets today to consider the nominations of Dr. Clifford Stanley to

be Under Secretary of Defense for Personnel and Readiness; Ms. Erin Conaton to be Under Secretary of the Air Force; and Mr. Lawrence Romo to be Director of the Selective Service System.

We welcome our nominees and their families to today's hearing. Senior Department of Defense (DOD) officials put in long and uncertain hours and we appreciate very much the sacrifices all of our nominees make to serve their country, their continuing sacrifices in most of their cases. But their families deserve equal gratitude for the support that they provide, because that support is essential to the success of these officials.

Today's nominees are highly qualified for the positions to which they've been nominated. Dr. Stanley served 33 years in the Marine Corps, became the Marines' first African American regimental commander, and retired in 2002 as a two-star general. Since that time, Dr. Stanley has served as Executive Vice President of the University of Pennsylvania and President of Scholarship America.

If confirmed, he will be the principal advisor to the Secretary of Defense on the recruitment, retention, pay and benefits, health care, readiness, and quality of life of the men and women of our Armed Forces. He will also be the primary official responsible for shaping and developing DOD's 680,000-person civilian workforce as the Department implements the Secretary's new hiring plan.

Ms. Conaton has served as Research Staff Director for the Hart-Rudman Commission on National Security in the 21st Century, a professional staff member of the House Armed Services Committee, and most recently as the Staff Director of the House Armed Services Committee. If confirmed, she will be the second-ranking official in the Department of the Air Force and will serve as the Chief Management Officer of the Air Force. Previous Under Secretaries have also been designated DOD's Executive Agent for Space. We do not know yet whether Ms. Conaton will exercise this responsibility.

Ms. Conaton is, of course, well known to all members of our committee for her hard work, and her capable leadership in our conferences on the National Defense Authorization Act. I am confident that we're going to be able to forgive her for her persistence in supporting the House position in these conferences, and I think the person sitting to her right is very well aware of just how well she did in her persistence and how she accomplished things which should not have been accomplished.

Mr. Romo retired as a lieutenant colonel after a career in the Air Force Reserves. He's currently Soldier and Family Assistance Program Manager for the Army's Fifth Recruiting Brigade and an Admissions Liaison Officer for the Air Force Academy. If confirmed, he will be responsible for managing the Selective Service System of our country.

We look forward to the testimony of our nominees and to their speedy confirmation. I now call upon Senator McCain, and then we will quickly call upon our dear friend, Ike Skelton, for an introduction.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you, Mr. Chairman. I welcome our friend Congressman Skelton, Chairman of the House Armed Services Committee, who is here with a mistaken mission this morning.

But we're always happy to see him and we very much appreciate the environment that persists, thanks to the efforts of Ms. Conaton and our staff, that makes us work successfully together and maintaining a record of defense authorization bills being signed by the President of the United States for many years now.

I welcome all the nominees and their families. I thank them for their willingness to serve in these key leadership positions. Dr. Stanley, the nominee to be the Under Secretary of Defense for Personnel and Readiness, has a distinguished 33-year career as a Marine Corps officer, culminating in his assignments as Commanding General, Marine Corps Air-Ground Combat Center, Twentynine Palms, and Deputy Commanding General, Marine Corps Combat Development Command in Quantico. His employment as President of Scholarship America demonstrates his commitment to public service and the importance of education and personnel development.

The manpower and readiness challenges facing DOD and the Services in this 8th year of the war on terrorism are many. In your advance policy question responses, you identified the challenges of continuing to sustain the All-Volunteer Force and ensuring appropriate compensation and personnel policies, quality health care, and essential support to military families and wounded warriors. I agree with you and I would add that the challenge of formulating policies and programs aimed at ensuring the highest possible readiness of our personnel and operational units during a time of great stress, at preventing sexual assaults and suicides, at bringing under control the rising costs of personnel as an overall part of the DOD budget without eroding readiness, at restructuring the national safety personnel system and creating an acquisition workforce that is capable of delivering weapons systems on time and within budget.

Dr. Stanley, I would be remiss if I didn't mention the challenge that will probably fall under your purview of eliminating or changing the DOD homosexual conduct policy. As I've stated before, I believe that the current "Don't Ask, Don't Tell" policy works, is not a failure, as some have proclaimed. I would be opposed to any attempt to modify existing policy in ways that will harm military readiness or place upon the shoulders of military leaders an extra burden that they simply do not need.

If change in policy is contemplated, it should be accompanied by input and studies by the Joint Chiefs, input by people like yourself, hearings, and votes before this fundamental policy, which has worked successfully in my view, is changed for political reasons.

Ms. Conaton, the nominee for the position of Under Secretary of the Air Force, is currently the Staff Director for the House Armed Services Committee, and I know you'll be missed by Chairman Skelton. You'll be missed by all of us. You've done an outstanding job and I congratulate you for all the work you've done. You'll be an asset to Secretary Donley and General Schwartz, and I congratulate you on your nomination.

Mr. Romo is the nominee to be the Director of the Selective Service System. An Air Force Academy graduate, Mr. Romo served over 20 years in the Air Force and Air Force Reserve. Since 1999, as a civilian employee of the Army's Recruiting Command he has head-

ed up the Soldier-Family Assistance Program in the San Antonio, TX, region.

The Selective Service System, while an independent agency, continues to be an important element in our national defense planning. The all-volunteer military as a strategic national resource has never been more capable and respected. I certainly hope we'll never face the requirement to reinstate the draft. It's essential that we retain the Selective Service System and the means to do so.

I look forward to the testimony of the nominees today and I again thank them and all their families for their service.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain. I am going to submit Senator Burriss' statement for the record.

[The prepared statement of Senator Burriss follows:]

PREPARED STATEMENT BY SENATOR ROLAND W. BURRIS

Thank you, Mr. Chairman, and welcome nominees.

I am again pleased with the nominations that President Obama has chosen to run these essential positions within our Government. The President and I agree that the candidates before us today show the dedicated leadership that is so integral to serving the American people. The Nation is looking to you nominees to play a major role in redirecting our efforts to benefit and protect all of our citizens—including servicemembers and taxpayers alike.

Now, I would like to take a moment to commend the President on his selection of these nominees and I look forward to these nominations moving quickly as we work on the ambitious agenda we have all undertaken. There is an opportunity for our partnership to foster real change and I look forward to our mutual cooperation for the benefit of this great Nation.

Thank you Mr. Chairman.

Chairman LEVIN. Now we're going to call upon our good friend Chairman Ike Skelton of the House Armed Services Committee for an introduction. We welcome you enthusiastically, Ike. It's always great to see you.

**STATEMENT OF HON. IKE SKELTON, U.S. REPRESENTATIVE
FROM THE STATE OF MISSOURI**

Mr. SKELTON. Thank you, Senator. It's an honor to be here this morning, Mr. Chairman, Senator McCain. It's a bittersweet moment for me. I'm here to recommend and urge the confirmation of Erin Conaton, the Staff Director of the House Armed Services Committee, to be the Under Secretary of the U.S. Air Force.

Seldom is there a combination or confluence of talent, good judgment, knowledge, devotion to duty, common sense, and, as we say in Missouri, good get-along, particularly someone who is of the tender age of Erin Conaton. She's a remarkable young lady.

We on the Armed Services Committee have been the beneficiaries of her hard work, good judgment, and fantastic talent. I know that the Air Force will be in good hands. She's a good manager. She handles people very well. She's respectful and her knowledge is as good as anyone I have ever run into in a position comparable to hers.

I ask that my formal remarks be placed in the record.

Educated at Georgetown, Tufts University, on the Hart-Rudman Commission as a staffer, as you mentioned in your opening remarks, she came as a staff member of the House Armed Services Committee, and when I became the ranking member she was the

ranking staff director, and now since we've been in the majority she has been the director and has run the House Armed Services Committee as well as anyone in the history of my some 33 years in this Congress.

I'm privileged to know her. We are all privileged to have been the beneficiaries of her fantastically first-rate work, and she's a good friend. I know that our country will be in not just good hands, but better hands, with her as Under Secretary of the Air Force.

I sincerely urge her confirmation and I know she will make us all proud.

[The prepared statement of Representative Skelton follows:]

PREPARED STATEMENT BY REPRESENTATIVE IKE SKELTON

Thank you, Mr. Chairman and Senator McCain.

I'm honored to speak today in support of Erin C. Conaton's nomination to be the Under Secretary of the Air Force. Most of you are already well-acquainted with Erin, and some of you have worked with her throughout the years of her tenure as a staff member on the House Armed Services Committee.

I have come to depend upon Erin Conaton as a trusted advisor and friend since she joined the House Armed Services Committee staff in 2001. While I am not happy about the prospect of losing her to the Pentagon and no longer working with her on a daily basis, I know that her talents are suited to taking on the responsibilities of Under Secretary of the Air Force.

The combination of Erin's integrity, intelligence, and experience in the ways of Capitol Hill and the Pentagon would make her extremely valuable to any organization, and I believe the Air Force would be very fortunate to have her on board. There is no doubt in my mind that the Pentagon, the Obama administration, and our country would be well served by Erin's confirmation by the Senate.

Erin has an impressive academic and professional background. She holds a bachelor's degree from Georgetown University's School of Foreign Service and a master's degree from the Fletcher School of Law and Diplomacy at Tufts University. Before becoming a congressional staffer, Erin was highly recommended to me as a result of her outstanding work as the Research Staff Director for the U.S. Commission on National Security/21st Century, also known as the Hart-Rudman Commission.

Erin joined the House Armed Services Committee staff in 2001, serving as a professional staff member covering a range of defense policy issues. In 2005, she became the committee's minority staff director. At the start of the 110th Congress in 2007, Erin assumed the post of majority staff director, serving all of the members of our committee and overseeing the committee's 70-person staff.

In the 9 years that I have had the privilege to know and work closely with Erin, she has consistently demonstrated her leadership ability, mastery of national security issues, and dedication to our men and women in uniform. Erin's work ethic is unparalleled, but more importantly, she has a rare gift for getting along with people. Despite the demands of working on Capitol Hill, Erin is unflappable and approaches every challenge with a level head, whether working with Members of Congress, congressional staff, or administration officials.

I'm delighted that the Obama administration recognized that Erin Conaton would be an excellent nominee for the next Under Secretary of the Air Force. I can't brag on her enough, and I respectfully urge the Senate Armed Services Committee to recommend that the Senate confirm Erin's nomination as quickly as possible. I know Erin will make us proud as she continues her career in public service with the Department of the Air Force.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Chairman Skelton. I know how much that extraordinary tribute and introduction means to Ms. Conaton, and it does mean a great deal to us as well.

Your entire statement will of course be made a part of the record. We know that you have a heavy load on your schedule, so that you are excused. You're free to leave at any time that you wish.

Let me now ask all three of our witnesses the standard questions, and then we'll call upon each of them for their opening statements. They can introduce families or whoever else that is with

them that they would like to introduce. Here are the standard questions that we ask all three of you:

Have you adhered to applicable laws and regulations governing conflicts of interest?

Dr. STANLEY. Yes.

Ms. CONATON. Yes, Senator.

Mr. ROMO. Yes, sir.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Dr. STANLEY. No, Senator.

Ms. CONATON. No, Senator.

Mr. ROMO. No, Senator.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Dr. STANLEY. Yes, Senator.

Ms. CONATON. Yes, Senator.

Mr. ROMO. Yes, Senator.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to Congressional requests?

Dr. STANLEY. Yes, Senator.

Ms. CONATON. Yes, Senator.

Mr. ROMO. Yes, Senator.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Dr. STANLEY. Yes, Senator.

Ms. CONATON. Yes, Senator.

Mr. ROMO. Yes, Senator.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Ms. CONATON. Yes, Senator.

Dr. STANLEY. Yes, Senator.

Mr. ROMO. Yes, Senator.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Mr. ROMO. Yes, Senator.

Ms. CONATON. Yes, Senator.

Dr. STANLEY. Yes, Senator.

Chairman LEVIN. Okay. Now I think in terms of the order here for you to give your opening statements and introduce people who accompany you today, we'll first call upon you, Dr. Stanley, then Ms. Conaton, and then Mr. Romo. That'll be the order.

Dr. Stanley.

STATEMENT OF DR. CLIFFORD L. STANLEY, NOMINEE TO BE UNDER SECRETARY OF DEFENSE FOR PERSONNEL AND READINESS

Dr. STANLEY. Thank you, Senator. Good morning. Chairman Levin, Senator McCain, members of the committee, I appreciate the opportunity to appear here today. I thank President Obama for

having the confidence in me to nominate me to be the Under Secretary of Defense for Personnel and Readiness of DOD. I am also appreciative to Secretary Gates and Deputy Secretary Lynn for their support.

My wife, Rosalyn, and daughter, Lieutenant Commander Angela Stanley, U.S. Navy, are here today. Accompanying my wife is our service dog and family companion, Juno. Not present today, but serving in uniform, is my niece, Air Force Staff Sergeant Michelle Stanley.

My wife's support throughout my career and the inherent challenges associated with special needs as we moved from duty station to duty station have afforded me added insights into the needs of military families. The service of our daughter, niece, and many friends still serving has kept me current on many of the issues shared by both men and women currently serving in uniform.

The President and Congress, particularly the members of this committee, are working together to support our military, their families, and Defense Department personnel serving our Nation. If confirmed, I will do my best to ensure optimal standards of personnel support and operational readiness.

That concludes my statement.

Chairman LEVIN. Thank you very much, Dr. Stanley.

Ms. Conaton.

STATEMENT OF ERIN C. CONATON, NOMINEE TO BE UNDER SECRETARY OF THE AIR FORCE

Ms. CONATON. Thank you, Chairman Levin. Let me just say at the outset, thank you to you, Senator McCain, and to Representative Skelton, for those extraordinarily kind words.

It's an honor to appear before all of you today and an honor to be nominated for this position. At the outset, I would like to thank President Obama for nominating me and Secretary Gates, Deputy Secretary Lynn, and Secretary Donley for supporting this nomination. If confirmed, I greatly look forward to working with all of them.

My current boss and mentor, Chairman Skelton, likes to note Cicero's adage that gratitude is the greatest of all virtues. I've always agreed with him in this and all things, and in that regard I need to say a few more words of thanks.

First, I have a lot of friends and family here today. It's not an understatement to say that I would not be here without their unwavering support. I'd like to acknowledge my parents, Stan and Pat; my aunt and uncle, Judy and Tom; my brother and sister-in-law, Sean and Erin; my sister and her partner, Meg and Drew. But most especially, I'm thrilled that my 2-year-old niece Nora can be here today and that her 4-year-old brother William was able to be excused from pre-school to be here with us.

Chairman LEVIN. He would have probably been here even if he weren't excused. [Laughter.]

Ms. CONATON. I think that's right.

Second, I'm confident that I would not be nominated for this position if it was not for the gentleman from Missouri, Chairman Ike Skelton. I have benefited greatly from his wisdom, counsel, and from his friendship. He's already provided me some additional wis-

dom in the event that I'm confirmed by reminding me that I should always ask myself, what would Harry Truman do.

I have to admit that the prospect of not working directly with him every day made the choice to accept this nomination very difficult. I can only hope that I will make him proud if confirmed to this position.

Finally, I would like to thank the tremendous staff associated with this committee and the staff of the House Armed Services Committee, which I have been privileged to lead. These staffs, both those who work in member offices and those who serve the committees directly, are extraordinary professionals. I have been privileged to work with them over these years and I have learned much from our debates, deliberations, and friendships.

Mr. Chairman, this committee knows well the challenges facing the Air Force and has been instrumental in efforts to address them. The Air Force is a great Service, with a proud history and a commitment to service shared by the nearly 700,000 members of the Air Force family, Active Duty, Reserve, National Guard, and civilians. If confirmed, I would consider it a privilege to become part of that family and to help Secretary Donley, General Schwartz, and General Chandler in their strong leadership of this Service. I would also welcome the opportunity to contribute to the joint effort, working with the other Services, the team that makes up the Office of the Secretary of Defense, and Congress.

I also would like to say what an honor it is to be on the same panel as Dr. Stanley and Mr. Romo, and I would look forward to working with both of them.

With that, Mr. Chairman, I thank you, Senator McCain, and the committee again for this opportunity, and I look forward to your questions.

Chairman LEVIN. Thank you so much, and again our thanks for your great service to the House committee and the way in which you've worked with our staff as well. I know your comments are appreciated by them and appreciated by us.

Mr. Romo.

**STATEMENT OF LAWRENCE G. ROMO, NOMINEE TO BE
DIRECTOR OF THE SELECTIVE SERVICE**

Mr. ROMO. Chairman Levin, Ranking Member McCain, and members of the committee, good morning. I'm indeed honored and humbled that President Obama has expressed his confidence in me to become the 12th Director of Selective Service. Pending Senate confirmation, I look forward to serving my country in this unique position.

At one time or another, I think most of us have dreamt about being in place in charge of an organization where we can make a difference. If I am confirmed as Director, you will be placing me in a fortunate situation as someone who is very interested in national security and our Armed Forces. I believe I am highly qualified to preserve the best aspects of a proud agency that has a distinguished 69-year history, while making improvements to operational efficiency, motivating employees and volunteers, and boosting morale.

The Selective Service System is an important Federal agency with dedicated people doing terrific work, but there is always room for improvement. I know about people and I have studied how the Selective Service System operates. I understand its importance to national defense and readiness as America's only proven defense manpower insurance for our Nation's all-volunteer military. I stand ready to make the needed improvements to the agency's structure and priorities and defend its budget and necessary existence as a key component of our national defense.

Because of personal experiences with the military and our wonderful veterans, I also understand and believe in the role that every young man must play with regard to the Selective Service. I will encourage the 2 million men reaching age 18 every year in the United States that they must live up to their patriotic, legal, and civic obligation to help provide for the common defense by registering with the Selective Service.

With your support, I stand ready to take up the challenges of this important assignment, and I thank you for considering me. I want to thank you all for the service you do to our country.

Chairman LEVIN. Thank you so much, Mr. Romo.

Let me start asking questions of Dr. Stanley. Dr. Stanley, our servicemembers and their families are under severe stress. One component of the stress is the repeated and lengthy combat deployments, especially in the Army and the Marine Corps, and the lack of adequate dwell time for our servicemembers. What can you tell us about your views on that issue and what would be your plans and hopes in terms of that challenge?

Dr. STANLEY. Yes, Senator. As I alluded to in my opening statement, the All-Volunteer Force is actually going to be one of the top priorities, if confirmed.

The All-Volunteer Force is actually one of the highest priorities. Under that subset of the All-Volunteer Force is, of course, wounded warrior, dwell time issues, family issues, the stress that's affecting our military today. So if confirmed, I promise that that will be one of the top priorities that I'll be focusing on as Under Secretary of Defense for Personnel and Readiness.

Chairman LEVIN. Dr. Stanley, in April, Secretary Gates determined that DOD had gone too far in relying on service contractors to perform basic functions and announced that the Department would seek to substitute civilian employees for contractors in critical roles. He stated: "Our goal is to hire as many as 13,000 new civil servants in fiscal year 2010 to replace contractors and up to 30,000 new civil servants in place of contractors over the next 5 years."

Would you agree that the civilian employee workforce of the Department plays a critical role in the success of the Department's activities, and if confirmed will you make the planning and management of that change and of the civilian workforce a high priority?

Dr. STANLEY. Yes, Senator, I would and I do.

Chairman LEVIN. Our servicemembers have now been fighting in Operations Enduring Freedom and Iraqi Freedom for many years, and the wear on our servicemembers and their families continues to grow. Timely access to mental health care for both servicemembers and their families must be a priority as these brave men

and women work through what they've experienced in combat and the hardships that they faced at home while their loved ones are away at war.

What efforts should be undertaken to increase the number of mental health professionals available to servicemembers and their families?

Dr. STANLEY. Mr. Chairman, as I understand it, we know that the mental health stress on our troops, their families, and really also the entire DOD is very significant. If confirmed, this would be an area that I would put a lot of emphasis in. We know that right now probably one of the most important things that I could do if confirmed would be to actually ensure that we have the right people selected to help with that process of selecting the best people as we look at these difficult, challenging issues of stress within the Armed Forces.

Chairman LEVIN. By the way, I didn't announce this before, but let's have a 9-minute first round for questioning.

Senator McCain made reference to the "Don't Ask, Don't Tell" policy. The President has made it clear that he would like to see that Federal statute repealed. You will be responsible for leading the implementation of any change in the policy within DOD if that policy is changed. Before it's changed, there will, of course, be significant input from the uniformed military and from others. There will be hearings, of course, before any change is voted on, and then there will be votes to determine whether in fact such a change should take place.

If you are confirmed, will you give us your best objective opinion on the question of whether or not "Don't Ask, Don't Tell" should be maintained or dropped?

Dr. STANLEY. Yes, Senator, I will.

Chairman LEVIN. Ms. Conaton, the Under Secretary position also serves as the chief management officer of the Air Force, as I mentioned. We established that provision in 2007 out of the frustration that we had with the inability of the military departments to modernize their business systems and their processes. We chose to have the Under Secretary serve concurrently as chief management officer because no other official in the Air Force other than the Secretary sits at a high enough level to cut across stovepipes and implement comprehensive change.

I think you've given us one of the great opportunities that we'll have to achieve a comprehensive change because you know this subject so well. Will you make modernization of the Air Force's business systems and processes a top priority?

Ms. CONATON. Yes, Senator, I will.

Chairman LEVIN. Give us an idea, if you can, how you're going to balance your duties as the chief management officer with the other duties that you'll have as Under Secretary?

Ms. CONATON. Yes, thank you, Chairman Levin. My understanding of the roles and responsibilities of this position is that as Under Secretary of the Air Force I would be responsible for being the principal assistant and deputy to the Secretary and to take on such roles and responsibilities as he sees as appropriate.

In addition to that, you point out rightly—and obviously I was involved from the Hill perspective in helping to give the responsi-

bility to this position for chief management officer. I think you're right to point out the daunting nature of that task. I've been informed that the Air Force already has an office dedicated to the chief management officer's responsibilities up and running. If confirmed, I'll look forward to working with them to see how far along they are and be able to give you by best assessment of where we stand and to balance those duties with the other things that Secretary Donley would ask me to take on.

Chairman LEVIN. The efforts to improve business systems in DOD, for instance by purchasing commercial off-the-shelf systems, frequently fail because too many people in the Department want to keep doing things the same way that they've always been done, refuse to give up unique business processes and data requirements that don't fit into new systems.

Instead of instituting approaches that have worked in the private sector, the Department ends up spending hundreds of millions, indeed billions, to tailor off-the-shelf systems to interface with obsolete systems and to meet the unique demands of DOD users. Now, such changes have resulted in delays, duplication, added expense, and system failure.

Do you believe that you will have the authority needed to work across stovepipes and to drive the change in the Air Force's business processes that is so needed, so much needed to effectively implement new business systems?

Ms. CONATON. Yes, Mr. Chairman, I believe that is the intent of the law as it was passed by this Congress and that is the way it is being implemented in the Department. If I find upon confirmation that there are additional authorities needed, I would certainly let this committee know that.

Chairman LEVIN. That was my next question: Will you let us know promptly when you've run into those obstacles if you need additional authorities, because this has been a longstanding goal of this committee, indeed the House committee and Congress. So if you'll do that we would appreciate it.

Ms. CONATON. Yes, Mr. Chairman.

Chairman LEVIN. On the question of the next tanker aircraft, do you agree that the new tanker is needed, first of all, I assume?

Ms. CONATON. Yes, sir.

Chairman LEVIN. But will you, in your role, to the extent that you are involved, will you bring to that role the neutrality, the fairness, the objectivity which is so essential?

Ms. CONATON. Yes, Mr. Chairman. My sense and my commitment is to ask questions upon confirmation that would lead to this competition being concluded to the best interests of the warfighter. I think it's very important that this be a fair and open competition and that it be clear to those who see the results how the decision was made, and I would look forward to being able to ask those questions in a neutral and objective manner.

Chairman LEVIN. Thank you.

The issue of climate change and the interrelated issue of energy use, and that particularly involves the potential for renewable energy use, that issue has been receiving huge and needed attention throughout the Government, including here on Capitol Hill. The largest user of fossil fuels in the Federal Government is DOD,

which creates a significant carbon footprint, and as a result is going to need to do its part to reduce carbon emissions in the years to come.

Can you give us your views on this challenge and this essential effort, so that we can reduce this footprint in a significant way?

Ms. CONATON. Mr. Chairman, I concur with you that DOD and indeed the Department of the Air Force are significant users of fossil fuels, including in the case of the Air Force for aviation fuel. In my capacity as staff director at House Armed Services Committee, I'm aware that the Air Force has put in place goals for reducing that and for increasing the percentage of renewable fuels that are part of the fleet's operation.

If confirmed, I believe that energy policy will be a critical area to look at and one of the responsibilities that I would look forward to taking on. Thank you.

Chairman LEVIN. Thank you.

My time is up. I have asked that Senator Ben Nelson take over the chairmanship here because I must leave, and I'm very much appreciative of his willingness to do so. According to our early bird rule, I will call on Senator Udall next and then turn the gavel over to Senator Nelson.

Senator Udall, you're next.

Senator UDALL. Thank you, Mr. Chairman.

I wanted to start out by giving a special welcome to Ms. Conaton. I served in the House Armed Services Committee and many people would probably think all that I know is tied to Chairman Skelton, but it's actually tied to Ms. Conaton's mentorship and her great friendship. So this is an exciting day for me as well as for you.

If I might, I'd like to share a concern with you. It's a comment at this time, not a question. I'm sure you're aware that the Air Force recently came out with its Joint Strike Fighter (JSF) candidate basing selection. I'm still trying to understand how the Air Force arrived at some of its calculations, and I intend to schedule a briefing with the Air Force soon to get some more clarity. I wanted to just let you know that's a concern of mine and it'll continue to be a concern of mine as we move forward.

But again, welcome, and I look forward to your confirmation process moving quickly and getting to the point where you no longer have to say "if confirmed," but it'll be "I have been confirmed and now I can go to work."

Ms. CONATON. Thank you, Senator.

Senator UDALL. Great to see you here today.

Mr. Romo, if I might, a comment as well that I could direct your way. As I understand it, current DOD policy prevents individuals who fail to register with the Selective Service within the legal timeframe between the ages of 18 and 26 from joining the military. That seems fair to me. But the same policy also prevents them from ever obtaining a Federal job, and waivers to the policy are permitted, as there should be, at times when circumstances could explain why an individual didn't fit into that timeframe.

But my office has petitioned for a number of Coloradans, without success. It seems that, frankly, in some cases the punishment may exceed the crime. I'd like to follow up with you and see if there isn't

some remedy in those cases that have merit. I just wanted to bring that to your attention.

Mr. ROMO. Thank you for the question, Senator Udall, and thank you for serving the people of Colorado. I spent a good time there at the Air Force Academy and I enjoyed my experience. Maybe not the first year, but I enjoyed the other years.

Senator UDALL. Not the first year.

Mr. ROMO. But in answer to your question, our job is to implement the policy that the President and Congress directs. You set the standards in the statutes and, candidly, it's up to you to decide which way you want to direct us. If you say for us to look at different processes, we'll be happy to look which way you want to go.

My job when I'm in there, if confirmed, is to assess and evaluate the situation and to optimize the procedure and processes. For example, we want to do a quicker turn-around when you have inquiries when somebody is looking to get a certificate that they registered for Selective Service for a student loan, a Federal grant. We want to make sure we have a quick turn-around because 90 days is unacceptable right now, what I've been told. But that's my position right now.

Senator UDALL. Thank you for that interest and clarification. Again, I look forward to working with you to see if we can resolve some of these cases in Colorado and perhaps look more broadly in those cases where, as I said, the punishment may exceed the crime or the oversight.

Dr. Stanley, great to have you here. I can find fault with only one part of your application. It's that you seem to have no family members serving in the U.S. Army. You have all the other Service branches covered. [Laughter.]

I'd like to follow up on the same line of questioning and comments that the chairman directed your way, starting with the mental health of our service men and women. At Fort Carson in Colorado and across the country at many installations, there's a combination of combat stress and repeated deployments, mental illness, failures of leadership, drug and alcohol problems that have led to broken soldiers, broken families, and increased incidence of suicides and homicides.

You know and I know there's a stigma attached to mental health issues, not just in the military community, but in society at large, quite frankly. We can't pass laws to eliminate it. I wish we could some days. So it's all the more critical, I believe, for our military leaders to stand up and demonstrate the courage to talk about this. Our military leaders must work to change the culture.

I would note, General Mark Graham, he just left his post at Fort Carson after a very significant 2 years, was one of those leaders.

Will you commit to helping in this effort, is the question I'd like to direct to you.

Dr. STANLEY. Yes, Senator, absolutely. I'm aware of the stigma associated with mental health issues, particularly anyone going to seek counseling for mental health, having served on Active Duty as well as even in my current experience. If confirmed, I certainly will look into that.

Just for the record, Senator, my father and my brother served in the U.S. Army.

Senator UDALL. I'm glad I gave you that opportunity to clarify the record. That was my intent. [Laughter.]

Let me move to "Don't Ask, Don't Tell," if I might, a sensitive topic, but an important topic. As a commander, you saw and experienced "Don't Ask, Don't Tell" being implemented. I'm sure you're aware that gays and lesbians are already serving in our Armed Forces and thousands of gays and lesbians are civilian employees at DOD. Today you'll be looking at "Don't Ask, Don't Tell" as a soon to be very senior member of the President's DOD leadership team. We all heard the Commander in Chief say last month that he intends to end "Don't Ask, Don't Tell," and I thought the President sent a clear message to every servicemember in uniform, straight and gay, regardless of Service or rank, that this change was coming.

Some in Congress believe the President is prepared to include repeal of "Don't Ask, Don't Tell" among his policy recommendations to Congress in the defense budget that he submits to us early next year. Is that a recommendation you're prepared to support?

Dr. STANLEY. Senator, I clearly recognize that this is a very sensitive issue, and it's an issue that I'm prepared to address if confirmed. I certainly will be taking input from all sources. This is DOD, it's outside of the government, it's Congress, the Senate—in general, a lot of input, the Service Chiefs in particular and our commanders, all the way down really from the deck plate down to the squad level.

This is a very challenging subject, but one that I know we can get our arms around. I have to provide, based upon that input, a recommendation to Secretary Gates. Based upon whatever I get, which I don't know right now—and I enter this discussion or know what we're talking about with no preconceived notions. I fully expect that it will be a challenge, but I am up for that challenge, if confirmed.

Senator UDALL. Thank you for that forthright answer. I look forward to working with you further, when you're confirmed if I have anything to say about it. I would associate myself with the remarks of the chairman on "Don't Ask, Don't Tell" as well.

Again, I want to thank the panel for your willingness to serve, for your wonderful and illustrious careers that you've had already, and I know our men and women in uniform will be well served by all three of you and the important work that you're about to undertake.

Mr. Chairman, thank you and I yield back any time I have. Thanks.

Senator BEN NELSON [presiding.] Thank you, Senator.

First of all, thank you all for your willingness to serve in these new responsibilities.

According to the list, I call upon myself to begin my questioning. Dr. Stanley, Secretary Gates announced earlier this year and Chairman Levin referred to it as well that the Department would scale back the role of outside contractors in support services. The goal as I understand it is to reduce the number of support service contractors from the current 39 percent to 26 percent and replace them with full-time Government employees.

I understand DOD's efforts to efficiently utilize its resources and I realize that an overreliance on contractors can lead to the erosion of the in-house capacity that's essential to effective government performance as well. But I want to be assured that this policy is grounded in a very thoughtful analysis that considers both base mission and local community implications as well.

If DOD makes these conversions without a strategic plan in place, we have the potential to erode our industry base in key mission areas as well. From the information that's been provided to me by U.S. Strategic Command (STRATCOM) in Nebraska, it appears that STRATCOM's current conversion plan will reduce the contractor population to 227, or 22 percent of the total workforce, by 2015. My sense is that for too many years we were outsourcing too much, with too little emphasis on why and whether it was justified.

But regardless of the makeup of the workforce of the Department, outsourcing or insourcing, it just has to make sense and be oriented towards the best utilization of resources, both money and people. So what review of these base level decisions like the decisions at Offutt and STRATCOM will DOD be undertaking to ensure that those decisions are both appropriate and consistent with the direction provided by the Secretary?

Dr. STANLEY. Yes, Senator. As I understand your question, we are looking at DOD reducing the number of contractors overall. I am not aware of all the details yet. I am aware that the Air Force has been working on some of this, but I sense that the contractor issue is much bigger than even that.

If confirmed, I will certainly take this on as a responsibility within my Department to coordinate with all the Services to ensure that we have equitable as well as reasonable and responsible strategic planning in the details of that, and also work very closely with Congress and this committee to ensure that we move forward properly.

Senator BEN NELSON. The consistency is extremely important, so that what we do accomplish is what the goal sets out for us, and that is the wise use of resources, both money and people, in the best possible manner. A strategic plan of some sort I think would be important to assure that process is both consistent and we get the best use of the resources. I'll be looking forward to further information on that as you develop your efforts.

As part of that process of putting together a strategic plan, I hope that you would approach it on a business case analysis process. I think the best decisions are typically made when there is a strategic effort under way and you can give it a good business basis for the decision, as opposed to establishing a number and work backwards toward reaching that. That's why I was a little concerned when I saw that a number had been achieved rather than doing it on a case by case basis to establish what the number should be.

Dr. Stanley also, as you have already been asked questions related to personnel and readiness, it's a broad portfolio. Can you identify what will be your top priorities, perhaps your top three priorities, in seeking that personnel and readiness role that is going to be so vital to the future of our military?

Dr. STANLEY. Yes, Senator. I would have to say that the All-Volunteer Force is number one and it's the umbrella. It's the piece that actually covers everything, because it's so all-encompassing. As you already stated, the portfolio of the Under Secretary of Defense for Personnel and Readiness is a broad portfolio.

But right under that, I'd have to look at our wounded warriors and the stress and all of the things that go along with that, because that's so significant as we now are at war on two fronts, which is very significant, and we have thousands of marines, sailors, airmen, and Army soldiers, who are actually committed and will be committed, depending on decisions that are going to be made.

That's the wounded warriors, the stress, all the things that we don't know about. Then I'd have to say families. We cannot sustain the All-Volunteer Force if we don't have our families, not only on board, but taking care of our families, and we can't have our deployed people actually worried about what's happening with families back here. There's so much that has to be addressed there. Of course, there's schools, there's other exceptional issues that relate to families, employment opportunities for spouses, things like that, that are significant issues.

I would say that starts out the three. I almost hesitate to stop there because there are significant issues in the All-Volunteer Force.

Senator BEN NELSON. Part of the taking care of families and our servicemembers probably includes the compensation arrangements that we're constantly trying to improve to be more competitive, to keep the All-Volunteer Force rather than to lose it due to competition from the outside.

Dr. STANLEY. Yes, Senator.

Senator BEN NELSON. Do you have any particular thoughts about the compensation package at the moment, what you might be doing to look at improving it, modifying it? It's not always just about salary. It includes a number of other pieces as well.

Dr. STANLEY. Senator, if confirmed, it's certainly going to be an issue that I'll be looking at. That's why I was almost hesitating to stop at three.

Senator BEN NELSON. I'll let you have four.

Dr. STANLEY. Yes, absolutely. There is a balancing now. We're now talking about not only the compensation, but also how much we can afford in an All-Volunteer Force, what in fact should we be paying out in terms of compensation, what shouldn't we be doing. There's always going to be a yin and a yang when it comes, because for every stimulus there's going to be some reaction.

The bottom line is that the compensation piece is something, if confirmed, I'd have to look at very closely because I know that health care costs, as well as the personnel costs in general, are eating our organization, our DOD, and our Nation, and we have to address that. It's an issue we have to balance.

Of course, this goes into equipment, all the other issues associated with that. There is not an endless stream of money and I am very much aware of that. So if confirmed, that will be part of that priority list.

Senator BEN NELSON. Very good. Thank you.

Ms. Conaton, during the Air Force posture hearing earlier this year the KC-X tanker was listed as one of the Air Force's top procurement priorities, and I expect that one of your biggest challenges will be, as already mentioned, awarding the contract to build this next generation of aerial refueling tankers.

Once you get this vital contract awarded, do you have an estimated time line and strategic vision for how the National Guard units that have the KC-135s might be rolled into fielding the plan?

Ms. CONATON. Senator, I do not at this point, not being confirmed, have a detailed sense of how the Guard will play with this. I guess I would say generally that the tanking, the aerial refueling capacity, is critical, not only to the Air Force, but truly to the totality of the Services, given the joint fight, and the Guard as part of the total force of the Air Force is critical. That would be one of the things I'd be very happy to look at more carefully if confirmed, is how the Guard will play in the replacement of current KC-135 aircraft.

Senator BEN NELSON. With the new role of the Guard in the military today, obviously they'll play a very vital role in our readiness as it would relate to the new tankers. So having a plan in place to field it is going to be vital. I hope that will be a high priority in connection with the awarding of the contract and the detailing of everything that follows the awarding of the contract with the fielding of the plan.

Ms. CONATON. Yes, Senator.

Senator BEN NELSON. Thank you.

Senator BURRIS.

Senator BURRIS. Thank you, Mr. Chairman.

I am very interested in these high-level positions and found it necessary to be here to listen to the testimony of these very important appointments. Unfortunately, I didn't have the opportunity to be visited personally by any of you, so I really instructed my staff so I could be here to see who would be taking these high-level positions. I must say that the President has selected very well. I am looking forward to your responsibility in these important positions that you've been appointed and entrusted to.

Just permit me to ask a couple simple questions. I want to ask Dr. Stanley in reference to "Don't Ask, Don't Tell." If confirmed, Doctor, you will move in immediately and I would assume that there are some cases pending for dismissal. What is your position on that situation if you were to come in contact with them? I know you say you have to follow the law, but we also have the President saying that we intend to make some changes in that law, which was passed by this Congress.

I'd just like to hear a little bit more on your position on that, please.

Dr. STANLEY. Senator, forgive me if I make sure, if I repeat the question back, but you're talking about pending cases, what would be my position on those pending cases?

Senator BURRIS. That's correct.

Dr. STANLEY. If confirmed and there are pending cases there, they would fall under the existing statute as I would understand it. Not sure where, as I sit here right now, if confirmed, that I would be directly involved in what's going on in the Service pur-

view right then. But that's about all I can say about that at this time because I'm tissue paper-thin on your question there.

Senator BURRIS. It's a very sensitive issue, Dr. Stanley, and we're hoping that we can get something done in this Congress in reference to that that would free up your hands and we would not even be bothered with this issue, because we need all the volunteers who will commit to serve this country of ours to be able to serve and to serve in the capacity as honorable and as brave as their capacity will allow them to.

But let me ask you this question. My colleague Senator Blanche Lincoln has put a bill into the Senate called the Selective Service Continuum of Care Act, which would provide advance physical and dental screening to our Reserve components prior to deployment. If you are confirmed, Doctor, how would you address the need for pre-deployment screening and care of our national Reserve component?

Dr. STANLEY. Senator, I'm not aware of the specific law or amendment or what's being put forward right now. This is the first I've heard of that. However, on the overall issue of our Reserve and our Guard and pre-deployment issues in general, I'm very much aware and believe that we should do more with that.

I know it's an area that we'd be looking at. If confirmed, I certainly am committed to ensuring that our Guard and Reserve continue to ratchet up. I'm going back to my time when I was on Active Duty and I know that was an area we needed work on. As I was getting ready for this confirmation hearing, I know there's more work that needs to be done.

Senator BURRIS. Good to have experience, right? You've been there, done that, right?

Ms. Conaton, if confirmed, how would you plan to work with the new Director of Cost Assessment and Program Evaluation (CAPE), a position that has been created this past year to advise the Secretary of Defense on program cost efficiency?

Ms. CONATON. Senator, as you rightly point out, that new position was created by this committee and this Congress as part of an effort to get weapons system acquisition reform jump-started in the Department. I think it's a very important step. I think the acquisition challenges that the Department faces are not unique to one Service. They're across the board. I think one of the critical things about the position that you mentioned, the Director of CAPE, is to get accurate and precise cost estimates at the beginning of a program so that we have greater confidence in the ability of the program to continue forward without significant cost overruns.

But both costs and requirements are a critical issue to deal with at the beginning of a weapons system program. I would look forward to working with the director.

Senator BURRIS. Also, what priority would you place on the U.S.'s advancement of unmanned drones and their use in surveillance missions? Do you believe that unmanned aircraft pilots should also be trained to fly manned aircraft as well?

Ms. CONATON. Senator, we all are aware of how important unmanned systems have become, although it's been pointed out to me that there is still a person controlling that aircraft, so to say that it's unmanned is perhaps a little bit of a stretch.

Senator BURRIS. Not in the cockpit.

Ms. CONATON. Not in the cockpit, that's correct, sir.

Senator BURRIS. In the drone cockpit, a cockpit in Las Vegas or somewhere.

Ms. CONATON. Yes, sir.

Senator BURRIS. Or Nevada, whatever.

Ms. CONATON. I think they've been critical in the missions of intelligence, surveillance, and reconnaissance. As we all know, we have two wars going and the commanders in the theater have a tremendous demand for those types of capabilities. I think Unmanned Aerial Vehicle systems are things that we're going to be continuing to look at over the next couple of years.

As to the role of what the pilot training should be for this, that would be an area that I would want to look at more closely if confirmed. I know that the Air Force is doing a lot of thinking about that. I know how important that issue is. I appreciate you putting it back on my radar screen and it's something I would look carefully at if confirmed.

Senator BURRIS. Thank you.

Mr. Romo, on the Selective Service, which all the 18-year-old males must register. Do you have any idea how many or what type of a failure there is in registering of 18-year olds?

Mr. ROMO. Certainly. When I was a young officer, I was in Strategic Air Command at Offutt. "Peace Is Our Profession" was our motto. Why? Because we have deterrence. We have different levels of deterrence. That was obviously a nuclear deterrent when I was a missile launch officer. But we have a deterrent with the Selective Service System that's essential for our national security.

Right now we have an All-Volunteer Force that works tremendously. I have the great fortune of working with a recruiting brigade of Recruiting Command and these soldiers do a tremendous job in getting some recruits for us, for our volunteer Army.

But it's essential that we maintain an optimal amount of security and register these young men when they're 18 years old. There are over 6,000 young men that turn 18 years old every day in this country.

Senator BURRIS. Say that again? I'm sorry, I didn't hear that.

Mr. ROMO. Over 6,000 young men have their 18th birthday every day in our country.

It's up to us to register those young men by having an optimal marketing plan. We have a tremendous registration rate of 90 percent and we want to make sure that we raise that, at least minimally maintain that. But that's why we do it, so we can maintain a deterrent. We have two wars going on and if the President and Congress direct us to have a draft we are ready, and we want to show our foes that we are ready to have the draft to supplement the volunteer force if we have somebody that threatens us.

Senator BURRIS. Mr. Romo, would you look at that marketing budget, because I'm pretty worldly in reading news, but I don't even recall hearing any type of advertising recently or in the last 5 or 6 years that young men turning 18 are required to register. I heard about it when the law came out, but I don't hear that regularly. I'm just wondering whether or not we're really doing enough promotion in regards to that.

Mr. ROMO. I had a great briefing by the public affairs of the Selective Service, and I will ensure that they will send to you the ways they currently market. With the wars going on, we have to be very creative. What I mean by that is creative for marketing, but creative in using the least amount of dollars for the marketing. They do air public service radio spots, for example, and they market through the State directors and the volunteer local boards that they do have all around the country. So there are many ways, but specifically I'll make sure that they send that to you.

We do have a great relationship, by the way, with the Military Entrance Processing Command (MEPCOM) at Great Lakes, IL. We do have a data center and a regional center there.

Senator BURRIS. I don't think you have a problem with those. The Navy recruits are coming to Great Lakes by the ton. I was up there the other day and God knows I really appreciate how those young people are coming forward. The Navy shapes them up and ships them out. I'll tell you, they'll be ship-shape when they leave there.

Mr. Chairman, thank you very much. I want to commend our witnesses this morning. I'm very impressed and look forward to your being confirmed and carrying out your duties. God bless you and good luck.

Senator BEN NELSON. Thank you, Senator.

Senator LeMieux.

Senator LEMIEUX. Mr. Chairman, thank you very much.

First of all, I want to thank all of the folks that are here today who are up for confirmation for your service to the public. It strikes me that we don't thank people enough for the time that they spend working for the people, and you all have long and storied careers doing that. So thank you for dedicating yourself to public service.

Dr. Stanley, I'd like to start with you if I may and ask you a few questions. We're all seeing these reports about the stress that our military is under, both fighting out in the field and here back in the States. I'm concerned, as I know you are, about the suicide rate that's rising. I want to read a few statistics and facts for you and then ask you a question.

We learned recently that 99 soldiers killed themselves in 2006, the highest rate of military suicide in the 26 years the military has been keeping statistics. In 2007 we had 115, in 2008 133, and as of this Monday, we have 140 Active Duty Army soldiers that have committed suicide. The suicide rate for the Army for 2008 was calculated at roughly 20.2 per 100,000 soldiers, which is the first time since the Vietnam war that it's higher than the adjusted civilian rate.

In your position to be in charge of personnel and readiness, these have to be big issues, to make sure that, one, the people that are enlisting into the military are not only physically but mentally ready, and that once they enlist and become members of our armed services, that they continue to have the support they need, and the training they need, and the counseling they need to endure the very difficult duty of fighting a war.

I would like for you, if you would, sir, to speak to those issues and what plans you have to make sure that our troops are ready

on the front end and continue to be mentally strong throughout their time in the armed services.

Dr. STANLEY. Yes, Senator. I guess the first thing to say is that in the priorities I laid out that was actually at the very top. It's among my top three. The All-Volunteer Force in itself, when we look at the quality of people who are coming in, but also focusing on our wounded warriors and those injured, the stress associated with combat and those who are pending combat, has been very significant. I'm aware of it.

Suicide is not new, but it's going off the page here. It's been something that I've been personally familiar with from my time on Active Duty. Even one suicide is too many. So with that, you have the commitment, if confirmed, this will be an area that will be a priority. It's not only in terms of what's working right now, but also looking at better ways to do what we're doing, because we have to work with the Services, work with the Service Chiefs, and then have the kind of environment, because of the cultures of our different Services, to be able to work together, because what they don't need right now is for me to come down and say, this is what you're going to do.

I think it's important that we have to work together. I'm looking forward to that opportunity if confirmed, because I think leadership more than anything right now and working as a team at DOD is absolutely critical at this time, and our civilian support, too, and Congress.

Senator LEMIEUX. Thank you, Doctor.

Let me ask you another question, if I can, on a different topic. I know that you have personal experience with this and I wanted you to speak to your views about military personnel who have disabled spouses or children. I view, and I know that many do, that public service is not just done by the person who's involved in the public service, whether it's the military or it's here working in Congress. It's done by our families.

We have to take care of the whole family unit. I know this is something that touches your heart and I would be interested in what goals you have with respect to these exceptional family members who have these challenges and what we can do to support them as well.

Dr. STANLEY. Yes, Senator. I'm smiling because if I flub this one my wife's going to take care of me.

Senator LEMIEUX. We don't want that to happen.

Dr. STANLEY. No, sir.

I will tell you that at no point in my career—and we've been married 38 years—have my decisions been alone, even as a commander, a commanding general—I've had somebody right there with me. We talked about my decision to retire. We talked about my decision to move to different duty stations. It wasn't that I was going to even think about refusing the Commandant's orders. The fact is that I literally had a family. I still have a family and that's very important.

I bring that to the table of experience not to say that it's omnipotent or all-knowing, but it's a very sensitive area. Then when you start talking about exceptional family issues, from autism to any range of different issues, I'm very sensitive to that also. Again I go

back to an earlier question here, working with our separate Service cultures, working in areas where duty stations, we have great people in our military, but there are a lot of things they don't know or understand about the sensitivities dealing with the only special school for this particular ailment. The architectural barriers that you would face in one duty station as opposed to another. Employment of the spouse, that you can work in certain duty stations—this is now with disabilities—but you can't work over here. Going overseas, fine, but if you go to certain duty stations the architectural issues are going to be a challenge, as well as the schooling and things like that.

Now, does that say that I know everything? No, Senator. But what it does tell me, I'm awfully sensitive to how complex these issues are and how much I'll be ready to do it. Quite frankly, even if I'm confirmed in this position, I'm not going to be doing it without having the spousal support. I have to stop there, Senator.

Senator LEMIEUX. I appreciate that answer. Thank you. I know you're going to do a great job.

If I may ask, Mr. Chairman, I have one question of Ms. Conaton. The military is extremely important to my home State of Florida, and certainly the Air Force is extremely important to Florida. We are very pleased with these JSFs going to Eglin and to the training of them and having training there. I want to know if you have any thoughts on what the role will be. I think there are 59 planned at Eglin and we're going to maybe potentially have more. I don't know if you're up to speed on that yet, but we think that we're well suited at Eglin to train for these JSFs, and I want to get your comments and thoughts on that.

Ms. CONATON. Thank you, Senator. I am not yet fully briefed, not yet being over with the Air Force, on the basing plans. I know how important the training mission is and I recognize the significant contribution that Eglin has made in that regard. If I'm confirmed, I'll be very happy to work with you to understand your concerns more and to see what is actually being planned inside the Air Force.

Senator LEMIEUX. Maybe we'll have a chance to go there together and work on that issue.

Ms. CONATON. I'd welcome that. Thank you.

Senator LEMIEUX. Mr. Chairman, that's all the questions I have.

Senator BEN NELSON. Thank you, Senator.

I have no further questions, but let me say to all of you and to your families and friends, thank you for your service, your commitment, and we look forward to a rather speedy confirmation. Thank you all.

We are adjourned.

[Whereupon, at 10:43 a.m., the committee adjourned.]

[Prepared questions submitted to Dr. Clifford L. Stanley by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delin-

eated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Not at this time.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. N/A.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. During my 33 years of serving in the Marine Corps, I experienced first hand the sacrifices that our Armed Forces make and the daunting challenges the Department of Defense (DOD) faces now and in the future. I served in a diversified number of positions including the Commander of the Marine Corps Combat Development Command, the Assistant Deputy Chief of Staff for Manpower and Reserve affairs at Marine Corps Headquarters. After my wife's paralysis in 1975, she and I personally lived the trials disabled servicemembers and their families encounter today. After retiring from the Marine Corps, I served as the President of Scholarship America where I implemented sweeping reforms that moved this organization forward while overcoming latent bureaucracy and financial challenges. These experiences along with a lifetime devotion to inspiring others towards leadership, education and diversity, have given me a strong appreciation of the formidable tasks ahead.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Under Secretary of Defense for Personnel and Readiness?

Answer. I believe the most important challenge is continuing to properly sustain the Nation's all volunteer force, particularly during this time of conflict. This includes ensuring appropriate compensation and personnel policies that recognize the talent and sacrifices of our servicemembers. Ensuring quality health care and, particularly, mental health support will be paramount. DOD must deliver world-class support to families and to wounded, ill, and injured servicemembers. At the same time, I understand that our current engagements have illuminated the need to change the way the Department conducts operations. As the Quadrennial Defense Review charts a course for the Department of the future, the Under Secretary for Personnel and Readiness will need to make sure that the human resource systems for civilian and military personnel, Active and Reserve, produce servicemembers and employees who are trained and equipped with skills to realize that future.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. Although I do not have specific recommendations at this time, if confirmed, I would review the plans that are currently in place to address these challenges, and determine whether they need to be modified or amplified. I would intend to collaborate with my colleagues in the Office of the Secretary of Defense, the Military Services, and the Joint Staff in charting the right course for the Department.

DUTIES

Question. Section 136 of title 10, U.S.C., provides that the Under Secretary of Defense for Personnel and Readiness, subject to the authority, direction and control of the Secretary of Defense, shall perform such duties and exercise such powers as the Secretary of Defense may prescribe in the areas of military readiness, total force management, military and civilian personnel requirements, military and civilian personnel training, military and civilian family matters, exchange, commissary and nonappropriated fund activities, personnel requirements for weapons support, National Guard and Reserve components, and health affairs.

Assuming you are confirmed, what duties do you expect the Secretary of Defense will prescribe for you?

Answer. If confirmed, I expect the Secretary of Defense would assign me all of the duties, functions, and responsibilities currently mandated by law and specified in the Department's directives for the position of Under Secretary of Defense for Personnel and Readiness.

Question. In carrying out these duties, what would be your relationship with the following officials:

The Secretary of Defense,

Answer. If confirmed, I would serve the Secretary as his principal advisor and advocate for the management of human resources in the Department.

Question. The Deputy Secretary of Defense,

Answer. If confirmed, I would serve the Deputy Secretary as his principal advisor and advocate for the management of human resources in the Department.

Question. The Chairman and the other members of the Joint Chiefs of Staff,

Answer. If confirmed, I would coordinate with the Chairman of the Joint Chiefs of Staff to ensure that he has all the information and support necessary to perform the duties of principal military advisor to the President, National Security Council, and Secretary of Defense.

Question. The Principal Deputy Under Secretary of Defense for Personnel and Readiness (PDUSD(P&R)).

Answer. If I am confirmed, PDUSD(P&R) would be my principal staff assistant and advisor in all matters relating to the management and well-being of the military and civilian personnel in the DOD Total Force structure.

Question. The Assistant Secretary of Defense for Health Affairs (ASD(HA)).

Answer. If I am confirmed, ASD(HA) would be my principal advisor for all DOD health policies, programs, and force health protection activities.

Question. The Assistant Secretary of Defense for Reserve Affairs (ASD(RA)).

Answer. If I am confirmed, ASD(RA) would be my principal advisor for all Reserve component matters in DOD.

Question. The DOD General Counsel,

Answer. If confirmed, I would anticipate regular communication, coordination of actions, and exchange of views with the General Counsel and the attorneys assigned to focus on personnel and readiness policy matters. I would expect to seek and follow the advice of the General Counsel on legal, policy, and procedural matters pertaining to the policies promulgated from the USD(P&R).

Question. The DOD Inspector General,

Answer. The DOD Inspector General is in charge of promoting integrity, accountability, and improvement of DOD personnel, programs, and operations to support the Department's mission and serve the public interest. If confirmed, I would fully assist in any investigations or issues that relate to personnel and readiness.

Question. The Chief of the National Guard Bureau,

Answer. The Chief, National Guard Bureau is a principal advisor to the Secretary of Defense, through the Chairman of the Joint Chiefs of Staff, on matters involving non-Federalized National Guard forces and on other matters as determined by the Secretary of Defense. If confirmed, I would work through ASD(RA) to ensure effective integration of National Guard capabilities into a cohesive Total Force.

Question. The Service Secretaries,

Answer. If confirmed, I would work closely with the Secretaries of the Military Departments on all matters relating to the management and well-being of military and civilian personnel in the DOD Total Force structure.

Question. The Assistant Secretaries for Manpower and Reserve Affairs of the Army, Navy, and Air Force,

Answer. If confirmed, I would work with these officials as partners in carrying out the human resource obligations of the Services.

Question. The Deputy Chiefs of Staff of the Army and Air Force for Personnel, the Chief of Naval Personnel, and the Deputy Commandant of the Marine Corps for Manpower and Reserve Affairs.

Answer. If confirmed, I would work closely with these officers to ensure that DOD attracts, motivates, and retains the quality people it needs.

Question. The combatant commanders.

Answer. If confirmed, I would foster mutually respectful working relationships that translate into providing the Total Force capabilities needed to complete combat missions.

Question. The Joint Staff, particularly the Director for Manpower and Personnel (J-1)?

Answer. If confirmed, I would seek a close coordinating relationship and open channels of communication with the Joint Staff regarding personnel and readiness policy issues.

SYSTEMS AND SUPPORT FOR WOUNDED WARRIORS

Question. Servicemembers who are wounded and injured performing duties in Operations Enduring Freedom and Iraqi Freedom deserve the highest priority from their Service for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from Active Duty, if required, and con-

tinuing support beyond retirement or discharge. Yet, as the revelations at Fort Stewart in 2003 and Walter Reed in 2007 revealed, the Services were not prepared to meet the needs of returning wounded servicemembers.

What is your assessment of the progress made to date by DOD and the Services to improve the care, management, and transition of seriously ill and injured servicemembers and their families?

Answer. Although I cannot make a complete assessment at this time, it is my opinion the DOD is improving in these areas, but I believe there is still much to be done. If confirmed, I would work to further the progress for our wounded warriors and their families. I would ensure that the Office of Wounded Warrior Care and Transition Policy continues to ensure wounded, ill, injured, and transitioning warriors receive quality care and seamless transition support. I would also work to ensure DOD continues collaborative efforts with the Department of Veterans Affairs on compensation and benefits, transition assistance, and care coordination.

Question. What are the strengths upon which continued progress should be based?

Answer. The greatest strength is the Department's commitment to take care of its wounded warriors and their families.

Question. What are the weaknesses that need to be corrected?

Answer. The challenges lie in being continually vigilant to ensure recovering servicemembers and families receive the full care that they need and deserve.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase support for wounded servicemembers and their families, and to monitor their progress in returning to duty or to civilian life?

Answer. I do not have any specific recommendations at this time. If confirmed, I would make providing needed care and support for servicemembers, veterans, and their families one of my top priorities.

Question. Studies conducted as a result of the revelations at Walter Reed point to the need to reform the disability evaluation system.

What is your assessment of the need to streamline and improve the disability evaluation system?

Answer. I do not have enough information to make a complete assessment at this time but if confirmed, I would work to create improvements in the system.

Question. If confirmed, how will you address any need for change?

Answer. If confirmed, I would work closely with the Department of Veterans Affairs toward reform of the disability evaluation system. I fully support the Department's efforts towards providing a comprehensive, fair, and timely medical and administrative processing system to evaluate injured or ill servicemembers' fitness for continued service.

DISABILITY SEVERANCE PAY

Question. Section 1646 of the Wounded Warrior Act, included in the National Defense Authorization Act (NDAA) for Fiscal Year 2008, enhanced severance pay and removed a requirement that severance pay be deducted from VA disability compensation for servicemembers discharged for disabilities rated less than 30 percent incurred in the line-of-duty in a combat zone or incurred during the performance of duty in combat-related operation as designated by the Secretary of Defense. In adopting this provision, Congress relied on the existing definition of a combat-related disability contained in title 10, U.S.C. 1413a(e). Rather than using the definition intended by Congress, DOD adopted a more limited definition of combat-related operations, requiring that the disability be incurred during participation in armed conflict.

If confirmed, will you reconsider the Department's definition of combat-related operations for purposes of awarding enhanced severance pay and deduction of severance pay from VA disability compensation?

Answer. It is my understanding that an evaluation is being conducted on the DOD's definition. If confirmed, I would ensure that process includes in its review the intentions of the legislation.

HOMOSEXUAL CONDUCT POLICY

Question. The current Homosexual Conduct Policy, commonly referred to as "Don't Ask, Don't Tell," went into effect in February 1994 after months of congressional hearings and debate resulting in the enactment of a Federal statute. Although there have been some changes in how this policy has been implemented, the basic policy has not changed. President Obama has made it clear that he intends to work with the military and with Congress to repeal the policy.

What is your view on repealing or changing this policy?

Answer. If confirmed, I would work closely with the Service Secretaries and Chiefs to provide the Secretary of Defense the best advice possible on the way forward regarding this issue.

Question. In your view, would changing this policy have an adverse impact on unit cohesion and good order and discipline in the military?

Answer. If Congress revises the Homosexual Conduct Policy statute and if confirmed, I would work closely with the Services to ensure the revising of this policy is done in a way that maintains our highest state of military readiness.

Question. If confirmed, what role would you play in efforts to repeal or change this policy?

Answer. If Congress changes the law and if confirmed, I, as the Under Secretary for Personnel and Readiness, would be responsible for leading the implementation of the change in the policy within DOD.

Question. If the policy is changed by Congress, would you recommend a phase-in period for implementation of the new policy?

Answer. If the statute is changed and if confirmed, I would consult with the Service Secretaries and Chiefs to ensure the implementation of the new policy is done in a way that maintains our highest state of military readiness.

Question. If confirmed, what role will you play in implementing a new policy?

Answer. If the statute is changed and if confirmed, I would lead the effort to implement a new policy while carefully considering the advice of and working closely with the Service Secretaries, the Service Chiefs, and the Chairman of the Joint Chiefs of Staff. I would ensure that this change is done in a way that maintains our highest state of military readiness.

MUSLIMS IN THE MILITARY

Question. Last week's fatal attack against soldiers and civilian employees at Fort Hood was allegedly carried out by a Muslim Army officer. There is a risk that heightened sensitivities arising out of this attack could lead to harassment or prejudice against Muslims in the military. Correspondingly, there have been fears expressed about the susceptibility of Muslims in uniform to arguments that current combat operations are, in effect, a war against Islam.

What is your assessment of the role that Muslims play today in our Armed Forces?

Answer. I believe that men and women of our Armed Forces volunteer to defend our Constitution and the freedoms that document afford us. Each servicemember, regardless of their faith affiliation, or the lack thereof, is pivotal to the success of our national security efforts.

Question. If confirmed, what steps, if any, would you take to address the potential for harassment against Muslims in the military and to improve the ability of the Services to identify and respond to any member who displays violent tendencies based on beliefs?

Answer. In order to safeguard the rights of servicemembers, there must be both formal and informal feedback procedures that quickly identify and assess any harassment, should it occur. Responses to grievances, or any identified shortcomings in command climate assessments, must be quick, thoughtful, and effective. If confirmed, I would review the viability of these feedback systems, and take measures to correct them as appropriate.

DIVERSITY IN THE MILITARY

Question. How do you define diversity in the Armed Forces?

Answer. In a broad context, I believe diversity is the combination of attributes from all walks of American life. Some key aspects of diversity are race, ethnicity, and gender which are the attributes most associated when we talk about "looking like America."

Question. Do you believe that achieving greater diversity is a priority for DOD?

Answer. Yes.

Question. Please describe examples in which improved diversity has led to greater organizational effectiveness in your experience.

Answer. I believe that every organization improves with more diversity. Diverse perspectives and views make organizational decisions more inclusive, effective, and successful.

Question. If confirmed, what steps would you take to ensure that continued progress toward diversity goals is achieved without violating reverse discrimination principles of law?

Answer. If confirmed, I would seek to understand the efforts of DOD to effectively promote diversity. I think that diversity is a leadership issue, so as part of my ini-

tial engagement, I would consult with the Department's senior leaders while monitoring progress toward achieving the Department's goals.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The Department has in recent years developed comprehensive policies and procedures to improve the prevention of and response to incidents of sexual assault, including providing appropriate resources and care for victims of sexual assault. However, numerous incidents of sexual misconduct involving military personnel in Iraq and Afghanistan are still being reported. Victims and their advocates claim that they are victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate treatment for the victim. They assert that their command fails to respond appropriately with basic medical services and with an adequate investigation of their charges followed by a failure to hold assailants accountable.

Do you consider the current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. It is my understanding that the Department has put considerable effort into the development of policies and programs designed to address sexual assault. If confirmed, I would review those policies to ensure they provide the appropriate care to victims and hold offenders accountable.

Question. What problems, if any, are you aware of in the manner in which this new confidential reporting procedure has been put into operation?

Answer. I have not been informed of any specific problems in the implementation of the confidential reporting option, called restricted reporting. I am aware that the restriction of no investigation when a victim chooses restricted reporting has concerned commanders responsible for the actions of their unit members. I believe that the Department must find a balance between victim care and offender accountability but the most important is to have victims come forward and get the support they need following an assault.

Question. What is your view of the steps the Services have taken to prevent sexual assaults in combat zones?

Answer. I do not have enough information to make an assessment at this time, but I am aware the Department has focused on educating servicemembers deploying to combat zones about how to prevent sexual assault and what to do should it occur. If confirmed, I would vigorously continue efforts to eliminate sexual assaults.

Question. What is your view of the adequacy of the training and resources the Services have in place to investigate and respond to allegations of sexual assault?

Answer. I cannot make an assessment at this time, but if confirmed, evaluating the adequacy of training and resources allocated to sexual assault investigation and response would be a top priority.

Question. If confirmed, what actions will you take to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults?

Answer. Sexual assault reaches across the Department, and as such, outreach and accountability efforts need to have the same reach. If confirmed, I would ensure that the Department has the right structure in place to engage the Departmental leadership, and the leadership of other agencies such as the Departments of Veterans Affairs, Health and Human Services, and Justice, in planning, guiding, and evaluating our efforts.

RELIGIOUS GUIDELINES

Question. What is your understanding of current policies and programs of DOD regarding religious practices in the military?

Answer. The Department does not endorse the establishment of religion, but it does guarantee its free exercise. The Department and the Military Services ensure servicemembers may observe the tenets of their respective religions, including the right to hold no specific religious conviction or affiliation.

Question. Do these policies accommodate, where appropriate, religious practices that require adherents to wear particular articles of faith?

Answer. My understanding is that wearing particular articles of faith are permissible so long as the articles are neat and conservative, do not negatively impact the readiness, good order or discipline of the unit and the mission is not jeopardized. If confirmed, I would continue to evaluate this issue.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. Yes.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. My experience, and my belief, is that the military chaplaincy has done an admirable job in ministering amidst the pluralistic environment of the military. Even as chaplains express their faith, they and their commanders also are asked to be as inclusive as possible when ministering to an interfaith group. I believe that as a group, military chaplains work to balance these responsibilities well.

SERVICE ACADEMIES

Question. What do you consider to be the policy and procedural elements that must be in place at each of the Service Academies in order to prevent and respond appropriately to sexual assaults and sexual harassment and to ensure essential oversight?

Answer. I believe the Department's sexual assault and sexual harassment policies provide a foundation for combating sexual misconduct at the Service Academies. There must be policies and procedures that encourage victims to come forward and that hold offenders accountable, as well as effective training programs. It is my understanding that the academies have institutionalized prevention and response programs. I further understand that the Department reviews the efforts of the Academies annually. If confirmed, I would continue that oversight and determine whether additional measures need to be taken.

Question. What is your assessment of corrective measures taken at the U.S. Air Force Academy to ensure religious tolerance and respect, and of Air Force guidelines regarding religious tolerance that were promulgated in August 2005?

Answer. I do not have enough information to make an assessment at this time. I believe it is imperative that leaders, at all levels, must continue to ensure that every member of DOD respects the spirit and intent of laws and policies surrounding the free exercise of religion.

WOMEN IN COMBAT

Question. The expanding role of women and the implementation of women-in-combat policies in the Armed Forces is a matter of continuing interest to Congress and the American public.

Does DOD have sufficient flexibility under current law relating to women in combat to make changes to assignment policy for women when needed?

Answer. In my opinion, yes.

Question. Do you believe any changes in the current policy for women in combat are needed?

Answer. I am not aware of any changes necessary at this time. It is my understanding that Department policy and practices are reviewed on a recurring basis to ensure compliance and effective use of manpower. If confirmed, I would continue that process.

RISING COSTS OF MEDICAL CARE

Question. In testimony presented to Congress in February, 2009, the Assistant Director of the Congressional Budget Office asserted that "medical funding accounts for more than one-third of the growth projected for operations and support funding between 2009 and 2026." In April, 2009, Secretary Gates told an audience at Maxwell Air Force Base that "health care is eating the Department alive."

What is your assessment of the long-term impact of rising medical costs on future DOD plans?

Answer. I am informed that Governmental estimates indicate these costs could rise to nearly 12 percent of the DOD budget in just a few years. If confirmed, I would research means to ensure that DOD provides quality care, and it does so in a way that provides the best value for our servicemembers and their families.

Question. If confirmed, what actions would you initiate or recommend to the Secretary to mitigate the effect of such costs on the DOD top-line?

Answer. I cannot make specific recommendations at this time. If confirmed, I would work closely with our healthcare leadership in DOD to examine every opportunity to assure military beneficiaries are provided the highest quality care possible while managing cost growth and to provide that advice to the Secretary of Defense.

Question. What reforms in infrastructure, benefits, or benefit management, if any, do you think should be examined in order to control the costs of military health care?

Answer. I believe that to control the costs of military health care we need to research all possibilities. If confirmed, I would examine the costs of our direct care facilities, seeing where efficiencies can be gained and investing wisely in infrastructure requirements. In the long term, the promotion of healthy life styles and prevention among our beneficiaries will also help reduce the demand for health services.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel and related entitlement spending continues to rise and is becoming an ever increasing portion of the DOD budget.

What actions do you believe can be taken to control the rise in personnel costs and entitlement spending?

Answer. I am aware that an increasing proportion of the Department's finite resources are devoted to personnel related costs. At the same time, I believe we cannot fail to adequately provide for and support our all volunteer force and their families. This includes maintaining a sufficient rotation base for both our Active and Reserve personnel. If confirmed, I know achieving a "right sized" mix of Active Duty, Reserve, civilians, and contractors is imperative. An important part of this challenge will be striking the right balance between personnel, recapitalization, and operational and support costs, while ensuring that related entitlements are appropriate and well-reasoned.

Question. If confirmed, what actions will you take to avoid a requirement for massive end-of-year reprogramming to cover personnel costs?

Answer. If confirmed, I would work closely with the Services and the DOD Comptroller to monitor personnel costs and program execution throughout each year. End-strength, recruiting, and personnel movement/PCS are examples of areas where proactive management can ensure that these programs are realistically funded and minimize the scope of any end-of-year reprogramming.

Question. What is your assessment of the cost effectiveness of the Services' use of bonuses to encourage recruiting and retention?

Answer. It is my impression that recruiting and retention bonuses are cost-effective tools available to the Services in achieving strength and experience objectives. They provide an effective and easily targetable incentive without the long-term costs associated with entitlements or across-the-board incentives but they must be continually examined to ensure proper implementation and efficacy.

MENTAL HEALTH ISSUES

Question. The final report of the DOD Task Force on Mental Health, issued in June 2007, found evidence that the stigma associated with mental illness represents a "critical failure" in the military, preventing individuals from seeking needed care. The report states, "Every military leader bears responsibility for addressing stigma; leaders who fail to do so reduce the effectiveness of the servicemembers they lead." In light of increasing suicide rates in the Services and the increase in the number of servicemembers diagnosed with post-traumatic stress, it is more important than ever to ensure that servicemembers and their families have access to mental health care and that the stigma associated with seeking such care is eliminated.

In your view, what actions are necessary to alleviate this stigma?

Answer. I believe that reducing our servicemembers' reluctance to seek psychological help is at a critical juncture. If confirmed, I would work to ensure that anti-stigma efforts target command and the servicemembers. Educating leaders on the critical nature of mental health in individual readiness reinforces the importance of seeking assistance for mental health problems.

Question. What is your view of the need for revision of military policies on command notification when servicemembers seek mental health care?

Answer. I am informed that recent updates provide more explicit guidance to better balance patient confidentiality rights and the commander's right to know for operational and risk management decisions. This is a very sensitive area and if confirmed, I would favor efforts to continuously refine policies to strike the right balance between an individual's health care privacy and the commanders' responsibilities to their fellow servicemembers and to the mission.

Question. If confirmed, what actions will you take to ensure that sufficient mental health resources are available to servicemembers in theater, and to the servicemembers and their families upon return to home station?

Answer. I am generally aware of the Department's recent efforts to determine workforce requirements necessary to meet the mental health needs of our servicemembers and their families. Achieving the military and civilian workforce

goals and fully utilizing all the medical, educational, and counseling resources at the Department's disposal will help meet these critical needs.

OFFICER MANAGEMENT ISSUES

Question. If confirmed as the Under Secretary of Defense for Personnel and Readiness, you would have significant responsibilities with regard to officer management policies, the promotion system, and recommending officers for nomination to positions of authority and responsibility.

Do you believe the current DOD procedures and practices for reviewing the records of officers pending nomination by the President are sufficient to ensure the Secretary of Defense and the President can make informed decisions?

Answer. Yes.

Question. Are these procedures and practices fair and reasonable for the officers involved?

Answer. Yes.

Question. If confirmed, what changes, if any, would you make to the officer management system?

Answer. I have no specific recommendations at this time. If confirmed, I would make an assessment of the officer management system a priority.

GENERAL AND FLAG OFFICER NOMINATIONS

Question. Under DOD Instruction 1320.4, adverse and alleged adverse information pertaining to general and flag officers must be evaluated by senior leaders in the Services and in the Office of the Secretary of Defense prior to nomination for promotion.

If confirmed, what role would you play in the officer promotion system, particularly in reviewing general and flag officer nominations?

Answer. If confirmed, I would ensure all procedures and practices regarding general and flag officer nominations allow the leadership to thoroughly vet all officer records and enable the Department to nominate the best qualified officers for consideration by the President.

Question. What is your understanding of the ability of the Services to timely document credible information of an adverse nature for evaluation by promotion selection boards and military and civilian leaders?

Answer. I genuinely and fully appreciate the importance of fully considering credible adverse information during the evaluation of military candidates for advancement. If appointed, I would make certain that these procedures are viable and strong, and that the Secretary of Defense and the President have all the information on nominations required to make a fully informed decision.

Question. If confirmed, what steps will you take to ensure that only the best qualified officers are nominated for promotion to general and flag officer rank?

Answer. If confirmed, I would ensure the most careful review of all general and flag officer nominations at the highest levels of the military and civilian leadership of the Department. Nominations including adverse or alleged adverse information should be intensely scrutinized.

TECHNICAL TRAINING OF GENERAL AND FLAG OFFICERS

Question. Do you believe that the appropriate numbers of general officers in the Military Services have advanced training and degrees in scientific, acquisition, and technical disciplines, and that career paths for officers with technical skills are appropriate, so as to ensure that the Department can better execute complex acquisition programs, adapt to a rapidly changing technological threat environment, and make informed investment decisions of DOD resources?

Answer. Although I cannot make a detailed assessment, I believe the Department must sustain officer development programs that are responsive to ever-changing and emerging needs. This imperative is particularly acute in the technical, scientific, and acquisition arenas. If confirmed, I would work with the Department's senior leaders to create a responsive personnel and training program.

Question. If not, what will you do to address this deficiency?

Answer. Identifying appropriate skills and education to maintain currency in the technological threat environment is a continuous process. If confirmed, I would aggressively seek to ensure that human resource policies and practices are fully adaptable to the needs of the Nation in this dynamic, and often complex, environment.

READINESS RESPONSIBILITIES

Question. Section 136 of title 10, U.S.C., gives the Under Secretary of Defense for Personnel and Readiness certain responsibilities for military readiness. Some important issues that affect military readiness, however, such as logistics and materiel readiness, have been placed under the jurisdiction of the Under Secretary for Acquisition, Technology, and Logistics. Furthermore, the secretaries of the Military Services have the title 10 responsibilities for most readiness issues including training, equipping, and maintaining the military forces.

If confirmed, where would the readiness responsibilities of these other officials end, and where would your readiness responsibilities begin?

Answer. I view the responsibilities of the Under Secretary for Personnel and Readiness as to advise the Secretary on all matters of readiness. These include oversight of military training, personnel and medical readiness, and the analysis of broad mission assessments from the combatant commanders to the readiness of key units in support of the Secretary's deployment decisions. As for readiness responsibilities across the Department, if confirmed, I would work collaboratively with OSD, Joint Staff, and Service colleagues to ensure our forces are ready to execute the National Military Strategy.

Question. What specific readiness issues would you and your subordinates be assigned?

Answer. That would depend on the type of readiness issues. If confirmed, I would direct the readiness staff to focus on the identification of readiness and training issues. For those identified, the action would be taken up by the appropriate lead within the Department. For example, personnel retention issues would be addressed by the military personnel policy and our Military Service partners. Other issues, such as H1N1 response, would be led by the ASD for Health Affairs, leaders at NORTHCOM and in the interagency.

Question. Would you recommend any changes to the current organization to more effectively align some of these responsibilities?

Answer. Not at this time.

Question. In 1999, Congress required the Department to develop and implement a new readiness reporting system, uniformly applied, which would provide decision makers with more accurate and reliable assessments and data regarding the actual capabilities and readiness of U.S. forces. In June 2002, DOD issued a directive establishing the Defense Readiness Reporting System (DRRS) and requiring that all military departments align their readiness reporting processes with DRRS. Since then, DOD and the Services have taken a number of developmental steps, but DRRS is not yet fully operational and aligned with the Services' reporting processes. According to a Government Accountability Office study released in September 2009, entitled "DOD needs to strengthen management and oversight of the DRRS" (GAO-09-518), the Department has yet to successfully plan, organize, resource, and execute relevant or necessary interoperability, user, and other tests to validate DRRS for deployment as the Department's readiness reporting system replacement.

In your view, what is the importance to the mission and activities of the Department of an accurate, reliable, and timely system for the measurement and reporting of the readiness of military forces?

Answer. I believe the Department needs accurate and timely readiness assessments of military forces. These are the gauge by which we measure the ability to execute the missions assigned by the President and Secretary of Defense. Accurate assessments allow the Department to effectively plan and manage its forces, and signal where capability shortfalls exist or assets are needed.

Question. What is your understanding and assessment of the Department's current readiness reporting systems, the DRRS program, and the progress made to date developing and deploying DRRS? If confirmed, what actions, if any, would you direct to improve the development and deployment of DRRS?

Answer. I do not have detailed knowledge on the current situation, but it is my understanding the DRRS effort is focused toward establishing accurate mission assessments from our combatant commanders and the Military Services. If confirmed, I would personally review DRRS implementation to ensure we are meeting the needs of the senior leadership and a unity of effort across the Department to drive this important effort to a fully operational capability.

ACTIVE-DUTY END STRENGTH

Question. In the recently enacted NDAA for Fiscal Year 2010, Congress authorized higher Active-Duty end strengths for all the Services.

In your view, what is the appropriate Active-Duty end strength for each of the Services?

Answer. I cannot make an informed assessment at this time. I believe strongly that our forces, both Active and Reserve, must be large enough to not only satisfy deployed demands, but also have a rotation base that recognizes the personal needs of our volunteers and their families. If confirmed, I would devote considerable attention to this important issue.

Question. What challenges will the Services face in maintaining these higher end strengths?

Answer. Foremost, the challenge of monitoring and responding to retention and recruiting trends, especially as the economy improves. Recruiting challenges could include education level, aptitude, weight, and medical issues that render a number of potential recruits ineligible.

MEDICAL PERSONNEL RECRUITING AND RETENTION

Question. DOD continues to face significant shortages in critically needed military medical personnel in both the Active and Reserve components. The committee is concerned that growing medical support requirements will compound the already serious challenges faced in recruitment and retention of military medical, dental, nurse, and behavioral health personnel.

If confirmed, will you undertake a comprehensive review of the medical support requirements for DOD and the sufficiency of the plans to meet recruiting and retention goals in these specialties?

Answer. Yes.

Question. What legislative and policy initiatives, including bonuses and special pays, do you think may be necessary to ensure that the Military Services can continue to meet medical support requirements?

Answer. Although I do not have any specific recommendations at this time, I believe there may be a need for more flexible recruiting and retention strategies such as the recently granted authority to use bonuses and special pays as needed to recruit, hire, and retain medical specialties.

DWELL TIME

Question. For many military members, dwell time goals are not being met, and recent testimony suggests that dwell time will not improve appreciably over the next 12–18 months.

In your view, what can be done to increase dwell time for both Active and Reserve component members, and when will these improvements be seen?

Answer. From my perspective the largest impact to dwell time will come from the balance of the drawdown in Iraq and the President's upcoming decision on the force plans for Afghanistan. Increases in end strength for the Army, the Marine Corps, and Special Operations Forces over the past several years should translate into dwell times increasing.

Question. In your view, would additional Army end strength in 2011 or 2012 improve dwell time ratios and reduce stress on the force, and if so, what numbers of Active and Reserve component members would be necessary?

Answer. I do not have enough information to make an assessment at this time. I would defer to the analysis of the Quadrennial Defense Review as to whether current end strength increases are sufficient in light of anticipated strategy and projected needs.

OPERATIONAL AND PERSONNEL TEMPO

Question. Section 136 of title 10, U.S.C., states that the Under Secretary of Defense for Personnel and Readiness, subject to the authority, direction, and control of the Secretary of Defense, is responsible for the monitoring of operations and personnel tempo of the Armed Forces, and to establish uniform standards, where practicable, for the deployment of personnel.

In your view, how will shifting resources from Iraq to Afghanistan affect personnel tempo and dwell time ratios?

Answer. The Iraq drawdown should increase the dwell time for our units as fewer forces will need to be deployed. How much this would increase dwell time depends on the level of forces needed for Afghanistan. There will be more clarity on this issue when the strategy and commensurate force plans for Afghanistan are finalized.

Question. In your view, what will be the effect on recruiting, retention, and readiness of the Army and Marine Corps of the current rates of operations and personnel tempo through 2010?

Answer. I do not have enough information to assess the impacts on readiness. It is my understanding that current rates of operations and personnel tempo have not

negatively impacted recruiting and retention. If confirmed, I would monitor these areas carefully as the Department's recent successes may be due to current economic factors.

Question. In your judgment, what would be the impact on the current rates of operations and personnel tempo of assigning principal responsibility for crisis and consequence management for natural, domestic disasters to Reserve component forces?

Answer. I cannot make an informed assessment at this time. If confirmed, I would certainly study this matter closely.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. Over the past 8 years, the National Guard and Reserves have experienced their largest and most sustained employment since World War II. Numerous problems arose in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical readiness, monitoring, antiquated pay systems, limited transition assistance programs upon demobilization, and lack of access to members of the Individual Ready Reserve. Reserve Force management policies and systems have been characterized in the past as "inefficient and rigid" and readiness levels have been adversely affected by equipment stay-behind, cross-leveling, and reset policies.

What is your assessment of advances made in improving Reserve component mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. It is my understanding that improvements have been made in increasing the alert and mobilization times prior to mobilization; however, we need to ensure that we provide predictability to servicemembers, their families and employers. If confirmed, I would monitor this issue as I believe strongly that National Guard and Reserve personnel deserve first-class mobilization and demobilization procedures, health screening, and transition assistance programs.

Question. What do you consider to be the most significant enduring changes to the administration of the Reserve components aimed at ensuring their readiness for future mobilization requirements?

Answer. It is my understanding that one of the most significant enduring changes is in the implementation of service force generation plans, which have transitioned many of the Reserve components into an operational force. This enables units to train for a mission prior to mobilization and deploy and redeploy on a predictable time line.

Question. Do you see a need to modify current statutory authorities for the mobilization of members of the National Guard and Reserves?

Answer. Not at this time. If confirmed, I would review existing authorities and determine if any modifications are necessary.

Question. Do you believe that National Guard and Reserve personnel should be mobilized to perform duties that should more appropriately be assigned to civilians deployed to Afghanistan?

Answer. I do not have detailed knowledge on this matter, but it is my understanding that some Guard and Reserve personnel have been utilized to provide a bridge to meet immediate operational needs until more civilians are available to respond to the requirements.

MEDICAL AND DENTAL READINESS OF THE RESERVES

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the Committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Reserves?

Answer. I do not have any recommendations at this time. If confirmed, I would review these reporting responsibilities and recommend changes as appropriate.

Question. How would you improve upon the Department's ability to produce a healthy and fit Reserve component?

Answer. I do not have specific recommendations at this time, but I believe strongly that command emphasis and individual accountability must be in place for producing and maintaining a healthy and fit force. Both medical and dental readiness requires senior level attention and direction.

LESSONS LEARNED

Question. What do you believe are the major lessons learned from Operation Enduring Freedom and Operation Iraqi Freedom which you would seek to address if confirmed as Under Secretary of Defense for Personnel and Readiness?

Answer. Our Nation's Total Force is a combination of interrelated components: Active, Reserve, and civilian, and all are necessary for a successful campaign. Success also depends on the care given to those deployed and to their families as we keep the trust of our Nation by properly caring for our warriors and their families. We must ensure that the force is adaptive in acquiring necessary skills, such as foreign language capability to meet today's missions.

DEFENSE PRISONER OF WAR/MISSING PERSONNEL OFFICE

Question. Some survivors of Prisoners of War (POW)/Missing in Action (MIA) military personnel and their advocates allege that insufficient attention and resources are being committed to recovery of U.S. personnel missing from conflicts from World War II to the present.

In view of the mission of Defense Prisoner of War/Missing Personnel Office (DPMO), do you think that this organization, as well as the Joint POW/MIA Accounting Command should receive greater resources in terms of personnel and budget than is currently the case?

Answer. The DPMO is under the purview of USD(Policy), and I respectfully defer to USD Flournoy on the appropriate levels of personnel and budget to support DPMO's mission.

Question. Do you believe the Under Secretary of Defense for Personnel and Readiness should have a larger role in the oversight of the POW/MIA accounting community?

Answer. DPMO has an important mission that I fully support. If confirmed, I would work closely with USD(Policy) to provide any assistance she may need from me.

MILITARY QUALITY OF LIFE

Question. In January 2009, the Department published its second Quadrennial Quality of Life Review, which focused on the importance of key quality of life factors for military families, such as family support, child care, education, health care and morale, welfare, and recreation services.

How do you perceive the relationship between quality of life improvements and your own top priorities for military recruitment and retention?

Answer. Quality of life efforts impact the recruitment and retention of military personnel and are key to maintaining the All-Volunteer Force. Satisfaction with various aspects of military life by the servicemember and the family affects members' decision to reenlist. If confirmed, I would assess how effectively our programs meet the needs of servicemembers and their families, and ensure that they are contributing positively to recruitment, retention, and readiness.

Question. If confirmed, what further enhancements to military quality of life would you make a priority, and how do you envision working with the Services, combatant commanders, family advocacy groups, and Congress to achieve them?

Answer. I would aggressively pursue the President's agenda to improve quality of life for military families by focusing our efforts on identifying the clearest possible understanding of the needs of our force and their families, and rapidly responding to gaps or shortfalls with quality programs. We must communicate effectively to ensure families know how to access available support when they need it.

FAMILY SUPPORT

Question. Military members and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of growing concerns among military families as a result of the stress of frequent deployments and the long separations that go with them.

What do you consider to be the most important family readiness issues for servicemembers and their families, and, if confirmed, how would you ensure that family readiness needs are addressed and adequately resourced?

Answer. If confirmed, I would make family readiness issues one of my top priorities. I would prioritize and resource appropriately quality physical and mental healthcare, spouse career assistance, childcare, other elements of dependant support, and education needs.

Question. How would you address these family readiness needs in light of global rebasing, BRAC, deployments, and growth in end strength?

Answer. If confirmed, I would continue the Department's current approach to identify and address family readiness needs, to gather information from commands, servicemembers and families, professional organizations, and researchers about these and other stressors.

Question. If confirmed, how would you ensure support to Reserve component families related to mobilization, deployment and family readiness, as well as to Active Duty families who do not reside near a military installation?

Answer. If confirmed, I would ensure that the Department's Yellow Ribbon Program is properly focused and funded to address the issues faced by members of the Guard, Reserve, and their families. The program should provide information, access, referrals, and outreach to military members and their families. This needs to be underwritten by a coordinated, community based network of care encompassing DOD, VA, State, local, and private providers. My goal would be a full range of services available to Active, Guard, and Reserve members and their families.

Question. If confirmed, what additional steps will you take to enhance family support?

Answer. If confirmed, I would encourage the implementation of flexible family support programs that meet the needs of our servicemembers and their families whether they live on military installations, near military installations, or far from military installations.

ACCESS TO HEALTH CARE

Question. As evidenced in a family support hearing held by the Subcommittee on Personnel earlier this year, one of the major concerns for military family members is access to health care. Military spouses told the Subcommittee that the health care system is inundated, and those stationed in more remote areas may not have access to adequate care.

If confirmed, what steps would you take to ensure complete access to health care for the families of servicemembers?

Answer. If confirmed, I would strive to deliver on our obligation to fully support the families of our servicemembers with a health care organization that anticipates and meets all of their health care needs with an accessible, top quality system that puts the patient and family at the center of its focus.

OFFICE OF COMMUNITY SUPPORT FOR MILITARY FAMILIES WITH SPECIAL NEEDS

Question. In the NDAA for Fiscal Year 2010 (section 563), Congress required the establishment of an Office of Community Support for Military Families With Special Needs within the Office of the Under Secretary of Defense for Personnel and Readiness. The purpose of this office is to enhance and improve DOD support for military families with special needs, be they educational or medical in nature.

In your view, what should be the priorities of this Office of Community Support for Military Families With Special Needs?

Answer. If confirmed, I would support the establishment of this office and work with the Services to identify and make available those programs that already exist that can provide special services to this population. Medical and education programs for military families with special needs would be a high priority for me.

Question. If confirmed, how would you ensure outreach to those military families with special needs dependents so they are able to get the support they need?

Answer. If confirmed, I would ensure increased communication effort to reach families with special needs, to include base newspapers, commissaries and exchanges, childcare centers and youth facilities, DOD schools, and a variety of DOD and Service Web sites, blogs, and social media outlets.

MEDICAL RESEARCH PROGRAMS

Question. What do you see as the highest priority medical research investment areas for DOD?

Answer. I believe the highest priorities are to address critical research capability gaps related to the treatment and recovery of wounded warriors, such as the diagnosis and treatment of Traumatic Brain Injury, Post Traumatic Stress Disorder, and other elements of combat-related stress, development of improved prosthetics, treatment of eye injury, and other deployment and battlefield-related injuries.

Question. If confirmed, how will you assess the amount of investment made in these research areas to determine if they are sufficient to meet DOD goals and requirements?

Answer. If confirmed, I would review the current research portfolio to ensure it prioritizes and resources research appropriately.

Question. How will you ensure that DOD medical research efforts are well coordinated with similar research programs within the private sector, academia, the Services, the Department of Veterans Affairs, and the National Institutes of Health?

Answer. If confirmed, I would support coordination efforts to ensure that research is being conducted jointly, building on and partnering with industry, academia, and

other Government agencies to ensure the greatest return to our warfighters. I am aware that joint technology coordinating groups have been established to engage with those partners to ensure that our research reflects the best interests of our soldiers, sailors, airmen, and marines.

Question. How will you ensure that new medical technologies (including drugs and vaccines) are independently and adequately tested before their use by DOD organizations and personnel?

Answer. If confirmed, I would ensure that the Department applies the highest standards of the Food and Drug Administration (FDA) to ensure new medical technologies, drugs, and vaccines are safe and effective before they are adopted for use in the Department.

Question. What are your biggest concerns related to the DOD medical research enterprise?

Answer. Although I do not have detailed knowledge of the entire research portfolio, I am especially interested in ensuring the responsiveness of the research program to medical readiness and our warfighters medical needs.

TRICARE SUPPORT CONTRACTS

Question. TRICARE managed care support contracts are among the largest service support contracts in DOD, and are a critical element of ensuring access to health care for DOD's 9.3 million beneficiaries. After months of delay, three vendors were selected for performance under the so-called T-3 TRICARE contracts, however, GAO has sustained protests filed in two of these contracts. If confirmed, large health care and information technology contracts and acquisitions will be under your purview.

How will you assess the adequacy and appropriateness of the Office of P&R's acquisition and contracting processes, and what steps would you take to improve them?

Answer. I am informed that care for all DOD beneficiaries will continue without interruption under extensions of the Department's current TRICARE contracts. If confirmed, I would conduct a review of the existing acquisition workforce to ensure that they are properly trained and staffed, understand their responsibilities, and are aligned within the organization in accordance with the principles and guidelines from the Office of Management and Budget (OMB) and the Department, as well as good management practices. I would also evaluate the existing policies and processes governing the contracting for DOD health care and complementary products to determine if the Department is leveraging the best practices of government and industry in meeting these acquisition challenges. Finally, I would partner with subject matter experts in the Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics to seek their ideas and support to implement these solutions.

ARMED FORCES RETIREMENT HOME

Question. Although defined as an independent Government entity, the Armed Forces Retirement Home (AFRH) is subject to the authority, direction and control of the Secretary of Defense. As such, the committee expects oversight of not only the quality of operations of the AFRH in serving our Nation's veterans, but also prudent business planning for its future financial viability.

If confirmed, what would be your relationship with the Chief Operating Officer (COO) of the AFRH?

Answer. The Secretary of Defense has delegated oversight responsibilities to the USD(P&R) and the PDUSD(P&R). These responsibilities include the appointment, performance evaluation, and compensation of the COO, appointment of the Home(s) Directors, Deputy Directors, Associate Directors, and members of the local Board(s) of Trustees. If confirmed, I would exercise oversight responsibilities and ensure medical care and retirement community services meet or exceed those established in law. I would ensure the local Board(s) of Trustees operate consistently with statute, provide guidance to the COO and Directors of the facilities, and provide me with an annual assessment of all aspects of AFRH. I would ensure health care accreditation is maintained and all findings from the recently completed DOD Inspector General (IG) comprehensive management and medical services inspection are resolved. I would also ensure staff and resident concerns are addressed through climate assessments and frequent monitoring of AFRH and DOD IG hotline complaints and I would be responsive to all complaints to ensure appropriate corrective action is taken.

Question. What is your view of the challenges that the Department faces in ensuring the highest quality service and care for veterans, as well as ensuring the future viability of the home in challenging economic times?

Answer. If confirmed, the highest quality of care and services for residents would be a primary focus of mine. I would maintain accreditation by the Commission on Accreditation of Rehabilitation Facilities and Continuing Care Accreditation Commission (CARF/CCAC) for independent, assisted living and long-term care.

It is my understanding that one of the biggest challenges in 2010 will be the opening of a new facility in Gulfport, MS, with resident occupancy beginning in October. Another significant project is approved for 2010 construction at AFRH–Washington.

MORALE, WELFARE, AND RECREATION

Question. Morale, Welfare, and Recreation (MWR) programs are critical to enhancement of military life for members and their families, especially in light of frequent and lengthy deployments. These programs must be relevant and attractive to all eligible users, including Active Duty and Reserve personnel and retirees.

What challenges do you foresee in sustaining MWR programs and, if confirmed, what improvements would you seek to achieve?

Answer. From my own military experience, I know that commanders have long appreciated the benefits of strong MWR programs so critical to *Espirit de Corps*, stress reduction, and personal health and well-being. Although there are very extensive installation MWR facilities and programs, I believe there is an immediate challenge in ensuring that MWR programs for our deployed forces meet their needs. In the longer term, I believe the Department needs to understand what programs are valued by servicemembers and their families in order to make wise investments. In addition, there is a need to understand where gaps exist. The MWR customers need to be involved in expressing their needs and satisfaction with our programs and policies. If confirmed, these are all areas I would aggressively pursue.

COMMISSARY AND MILITARY EXCHANGE SYSTEMS

Question. Commissary and military exchange systems are critical quality of life components for members of the Active and Reserve Forces and their families.

What is your view of the need for modernization of business policies and practices in the commissary and exchange systems, and what do you view as the most promising avenues for change to achieve modernization goals?

Answer. The commissary and exchange operate within a broad structure of military community and family support programs and policies that have a profound impact on the military quality of life and standard of living. The commissary and exchange programs and policies must continue to evolve to meet the needs and expectations of our changing force and a changing marketplace. We need to ensure commissaries and exchanges provide the necessary support for today's total military force.

I believe management efforts should be aimed at reducing overhead and pursuing new avenues to reach our military families who do not live on military installations. The commissary system should deliver customer savings and also achieve high satisfaction ratings.

The military exchange resale community must continue to work, individually and collaboratively, to adapt marketing and selling practices, invest in technologies, and improve merchandise availability to be more responsive to military customers.

Question. In the Ronald W. Reagan NDAA for Fiscal Year 2005, Congress required the Secretary of Defense to establish an executive governing body for the commissary and exchange systems to ensure the complementary operation of the two systems.

What is your understanding of the purpose, composition and performance of the executive governing body?

Answer. The Department established the DOD Executive Resale Board as the governing body to provide advice to the USD(P&R) regarding the complementary operation of the commissary and exchange systems. The Board works to resolve issues and has been instrumental in pursuing matters of mutual benefit to the elements of the military resale system. The Board is chaired by the PDUSD(P&R), and members include both the senior military officers and civilians who oversee and manage the commissary and exchanges systems.

Question. If confirmed, what would your role be with respect to the governing body, and what would your expectations be for its role?

Answer. The Secretary designated the PDUSD(P&R) as the chairperson of the Executive Resale Board. If confirmed, I would ensure the Board would continue to meet regularly to review operational areas of mutual interest to the commissary and exchange systems.

CIVILIAN PERSONNEL SYSTEMS

Question. Section 1113 of the NDAA for Fiscal Year 2010 repealed the statutory authority for the National Security Personnel System (NSPS), and required that all NSPS employees be converted to other personnel systems by no later than January 1, 2012.

If confirmed, will you ensure that NSPS employees are converted to other personnel systems as quickly as practical, and with as little disruption to their organizations and their work as possible?

Answer. Yes.

Question. Section 1113 also provides DOD with extensive personnel flexibilities for its civilian employees that are not available to other agencies. In particular, section 9902(a) of title 5, U.S.C., as added by section 1113, directs the Department to establish a new performance management system for all of its employees. Section 9902(b) directs the Department to develop a streamlined new hiring system that is designed to better fulfill DOD's mission needs, produce high-quality applicants, and support timely personnel decisions.

What experience have you had in the development and implementation of civilian human resource management systems?

Answer. During my military career, I worked extensively with both military and civilian human resource systems, particularly when I served at Marine Corps Headquarters for Manpower and Reserve affairs and also as the Commanding General of Marine Corps Air Ground Combat Center at Twentynine Palms, CA. During my tenure at the Center, we were honored to receive the Department of the Navy's Nathaniel Stinson Equal Employment Opportunity Award. As the President of Scholarship America, I worked extensively at addressing human resource challenges.

Question. Do you agree that DOD's civilian employee workforce plays a vital role in the functioning of the Department?

Answer. Yes.

Question. What is your view of the personnel flexibilities provided by section 1113?

Answer. I understand these flexibilities have been provided by Congress to better enable the Department to meet its mission requirements. If confirmed, I would explore these flexibilities and work to implement those that would best support the Department's mission and the well-being of the workforce.

Question. If confirmed, will you make it a priority to implement these flexibilities in a manner that best meets the needs of the Department and promotes the quality of the Department's civilian workforce?

Answer. Yes.

Question. How will you approach this task?

Answer. If confirmed, I would work to assess which flexibilities more effectively support mission accomplishment, while addressing the well-being of the workforce. I would ensure these flexibilities are implemented in an expeditious, fair, and transparent manner. Furthermore, I would establish assessment criteria and conduct periodic assessments to ensure the flexibilities are meeting the stated objectives.

Question. Section 1112 of the NDAA for Fiscal Year 2010 directs the Department to develop a Defense Civilian Leadership Program to recruit, train, and advance a new generation of civilian leaders for the Department. Section 1112 provides the Department with the full range of authorities available for demonstration programs under section 4703 of title 5, U.S.C., including the authority to compensate participants on the basis of qualifications, performance, and market conditions. These flexibilities are not otherwise available to DOD.

Do you agree that the Department needs to recruit highly qualified civilian personnel to meet the growing needs of its acquisition, technical, business, and financial communities?

Answer. Yes.

Question. In your view, has the existing civilian hiring process been successful in recruiting such personnel and meeting these needs?

Answer. Although I believe the Department currently has a highly talented workforce, I wholeheartedly support the initiatives to streamline and reform the civilian hiring process. There is much work to be done in this area, and if confirmed, I would ensure that the Department is actively engaged in the Government-wide initiative to reform civilian hiring and aggressively pursues improvements within the Department.

Question. If confirmed, will you make it a priority to implement the authority provided by section 1112 in a manner that best meets the needs of the Department and promotes the quality of the Department's civilian workforce?

Answer. Yes.

HUMAN CAPITAL PLANNING

Question. Section 115b of title 10, U.S.C., as added by section 1108 of the NDAA for 2010 requires the Secretary of Defense to develop and annually update a strategic human capital plan that specifically identifies gaps in the Department's civilian workforce and strategies for addressing those gaps. Section 115b requires that the plan include chapters specifically addressing the Department's senior management, functional, and technical workforce and the Department's acquisition workforce.

Would you agree that a strategic human capital plan that identifies gaps in the workforce and strategies for addressing those gaps is a key step toward ensuring that the Department has the skills and capabilities needed to meet future challenges?

Answer. Yes.

Question. Do you see the need for any changes in the requirements of section 115b, regarding the requirement for a strategic human capital plan?

Answer. I have no recommendations at this time. If confirmed, I would look at the strategic human capital planning that the Department has conducted over the past years against the section 115b requirements to determine if any changes may be needed to improve the Department's overall workforce planning effort.

Question. If confirmed, will you ensure that DOD fully complies with these requirements?

Answer. Yes.

BALANCE BETWEEN CIVILIAN EMPLOYEES AND CONTRACTOR EMPLOYEES

Question. In recent years, DOD has become increasingly reliant on services provided by contractors. Over the past 8 years, DOD's civilian workforce has remained essentially unchanged in size. Over the same period, the Department's spending on contract services has more than doubled, with the estimated number of contractor employees working for the Department increasing from an estimated 730,000 in fiscal year 2000 to an estimated 1,550,000 in fiscal year 2007. As a result of the explosive growth in service contracts, contractors now play an integral role in the performance of functions that were once performed exclusively by government employees, including the management and oversight of weapons programs, the development of policies, the development of public relations strategies, and even the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as Federal employees.

Do you believe that the current balance between civilian employees and contractor employees is in the best interests of DOD?

Answer. If confirmed, I would support the Secretary's initiative announced with the fiscal year 2010 budget to reduce the number of support service contractors from the current 39 percent of the workforce to the pre-2001 level of 26 percent. I believe the desired outcome of the Department's in-sourcing initiative is a balanced total workforce of military, Government civilians, and contractor personnel that appropriately aligns functions to the public and private sector, and results in the best value for the taxpayer.

Question. In your view, has DOD become too reliant on contractors to perform its basic functions?

Answer. If confirmed, I would support the Department's ongoing efforts to critically examine currently contracted functions. Striking a balance between Government and contractor performance that ensures uncompromising Government control of critical functions, while providing best value to the taxpayer, is imperative.

Question. Do you believe that the current extensive use of personal services contracts is in the best interest of DOD?

Answer. I cannot make an informed assessment at this time. It is my understanding that, as part of the Department's in-sourcing initiative, all contracts for Services will be reviewed to ensure unauthorized personal services are not being provided.

Question. Do you believe that DOD should undertake a comprehensive reappraisal of "inherently governmental functions" and other critical government functions, and how they are performed?

Answer. I am informed that the Office of Management and Budget is reviewing the definition of "inherently governmental" function and the manner in which agencies identify critical functions to be performed by Federal employees. If confirmed, I would review the OMB study and evaluate if a reappraisal of the Department's critical and "inherently governmental" functions is required.

Question. If confirmed, will you work with other appropriate officials in DOD to address these issues?

Answer. Yes.

ACQUISITION WORKFORCE

Question. Over the past 15 years, DOD has dramatically reduced the size of its acquisition workforce, without undertaking any systematic planning or analysis to ensure that it would have the specific skills and competencies needed to meet current and future needs. Since September 11, 2001, moreover, the demands placed on that workforce have substantially increased. Section 852 of the NDAA for Fiscal Year 2008 established an Acquisition Workforce Development Fund to help DOD address shortcomings in its acquisition workforce. The fund would provide a minimum of \$3 billion over 6 years for this purpose.

Do you believe that DOD acquisition workforce is large enough and has the skills needed to perform the tasks assigned to it?

Answer. No. If confirmed, I would fully support the Secretary's goal to add approximately 20,000 acquisition workforce professionals to the Department over the next 5 years.

Question. Do you support the use of the DOD Acquisition Workforce Development Fund to ensure that DOD has the right number of employees with the right skills to run its acquisition programs in the most cost effective manner for the taxpayers?

Answer. Yes.

LABORATORY PERSONNEL DEMONSTRATION PROGRAM

Question. The laboratory demonstration program founded on section 342 of the NDAA for Fiscal Year 1995 as amended by section 1114 of the NDAA for Fiscal Year 2001, section 1107 of the NDAA for Fiscal Year 2008, section 1108 of the servicemember for Fiscal Year 2009, and section 1105 of the NDAA for Fiscal Year 2010, paved the way for personnel management initiatives and new flexibilities at the defense laboratories. These innovations have been adopted in various forms throughout other DOD personnel systems.

If confirmed, will you fully implement the laboratory demonstration program and the authorities under these provisions?

Answer. Yes.

Question. If confirmed, will you ensure that the directors of the defense laboratories are provided the full range of personnel flexibilities and authorities provided by Congress?

Answer. Yes.

SCIENTIFIC AND TECHNICAL WORKFORCE

Question. Do you feel that DOD's research and technology organizations (e.g., DARPA, laboratories, and technical centers) have sufficiently innovative and flexible personnel systems to enable them to compete successfully to hire a very limited pool of clearable scientists and engineers in the face of competition from industry, academia, federally funded R&D centers, and other Federal (non-DOD) laboratories?

Answer. I cannot make an informed assessment at this time. If confirmed, I would explore with DOD's research and technology organizations whether they have the flexibilities they need to compete successfully for the scientists and engineering talent and to address shortfalls, as appropriate.

Question. What new personnel system innovations and flexibilities would you delegate to DOD technical organizations to enable them to better compete for technical talent?

Answer. Although I have no recommendations at this time, if confirmed, I would explore with the DOD technical organizations the additional flexibilities they may need to better enable them to meet their mission requirements.

DEFENSE CIVILIAN INTELLIGENCE PERSONNEL SYSTEM

Question. Section 1114 of the NDAA for Fiscal Year 2010 suspends the implementation of the Defense Civilian Intelligence Personnel System (DCIPS) for 1 year, and requires that a review of DCIPS be conducted by an independent organization.

What is your view of DCIPS?

Answer. I do not have detailed knowledge of the program. I am informed that an independent review of DCIPS will be undertaken shortly and, if confirmed, I would look forward to the results of that review.

Question. If confirmed, will you ensure that the independent review required by section 1114 is carried out as required, and is used to guide the Department's decisions on the further implementation of DCIPS?

Answer. Yes.

FOREIGN LANGUAGE PROFICIENCY

Question. A Foreign Language Transformation Roadmap announced by the Department on March 30, 2005, directed a series of actions aimed at transforming the Department's foreign language capabilities, to include revision of policy and doctrine, building a capabilities based requirements process, and enhancing foreign language capability for both military and civilian personnel.

In your view, what should be the priorities of the Federal Government to expanding the foreign language skills of civilian and military personnel and improving coordination of foreign language programs and activities among the Federal agencies?

Answer. DOD is the Nation's largest employer of personnel with foreign language skills, both civilian and military. If confirmed, I would support efforts to educate a broader pool of Americans with skills in critical languages. I believe the Nation must build a globally-competent workforce by educating a larger pool of language and internationally competent high school and college graduates from which DOD and other Federal Government agencies can recruit.

Question. If confirmed, what steps would you take to identify foreign language requirements, and to design military and civilian personnel policies and programs to fill those gaps?

Answer. It is my understanding that the Department is currently engaged in building programs to address the need for language capability in its forces and its civilian workforce. If confirmed, I would work with the Joint Staff and the military departments to ensure that requirements are identified within the force, and that training, education, and personnel management programs are designed to meet those requirements.

Question. What is your assessment of an appropriate time frame within which results can be realized in this critical area?

Answer. If confirmed, I would support efforts to build foundational language capability within the Department. Language acquisition, particularly at advanced levels, takes a considerable amount of time, this is particularly true in the more difficult languages. To improve language proficiency and regional expertise in the officer corps, the Department needs to start early in servicemembers' careers and grow capability over time.

DEFENSE INTEGRATED MILITARY HUMAN RESOURCES SYSTEM

Question. The Department and the Services continue to work toward adoption of Defense Integrated Military Human Resources System (DIMHRS) as a cross-service, fully integrated personnel and pay system. Under the proposed timeline, the Army is the first in line to launch DIMHRS, with the Air Force, Navy, and Marine Corps to follow. Recent reports indicate technical difficulties have postponed the Army's launch date.

What is your assessment of the need for an integrated, cross-Service personnel and pay system?

Answer. The functional needs that formed the basis for DIMHRS still exist. However, it is my understanding that each service will be allowed to build their own integrated, personnel and pay systems using the original DIMHRS configured software investment to the maximum extent practical. If confirmed, I would assess this plan to ensure that it meets DOD's needs.

Question. What metrics would you use to assess the Department's and Services' progress in developing and deploying DIMHRS?

Answer. I believe the best metrics for determining success are improved accuracy and timeliness of military compensation and better tracking of our servicemembers as they change status from Active to Reserve/Guard, and possibly back, and compliance with policies and laws governing personnel and pay eligibility.

Question. What is the status of the implementation of DIMHRS?

Answer. I do not have details of the status of DIMHRS, but it is my understanding that since implementation of DIMHRS is now a service responsibility, there are specific implementation plans or schedules for each service. If confirmed I intend to closely monitor each service's progress and implementation.

Question. If confirmed, what changes, if any, would you recommend to the implementation schedule and process currently in place?

Answer. I do not have any recommended changes at this time. If confirmed, I would review and assess the current schedule and process.

Question. If confirmed, what role do you plan to play in oversight over and direction of Service efforts to develop and deploy DIMHRS?

Answer. The USD(P&R) is responsible and accountable for any system whose primary purpose is Human Resources Management (HRM) activities within the DOD. If confirmed I would review and assess the current direction and effort the Services are taking in development and deployment of their respective systems. I would actively participate in the governance structure to include the NDAA 2010 mandated DIMHRS Transition Council and would focus on compliance with enterprise standards the individual service systems must support.

GI BILL BENEFITS

Question. Last year Congress passed the post-September 11 Veterans Educational Assistance Act that created enhanced educational benefits for servicemembers who have served at least 90 days on Active Duty since September 11. The maximum benefit would roughly cover the cost of a college education at any public university in the country.

What is your assessment of the effect of the post-September 11 Veterans Educational Assistance Act on recruiting and retention of servicemembers?

Answer. The post-September 11 GI Bill only became effective on August 1, 2009, so it is premature to fully gauge the impact of the post-September 11 GI Bill on either recruiting or retention. If confirmed, I would monitor the effects of the implementation of this act very closely.

Question. What is your view of the effectiveness of the transferability provisions contained in the act on retention of mid- and late-career servicemembers?

Answer. Since participation requires substantial time in service, and a commitment to additional service, the impact promises to be positive, even though it has just begun. I am informed that almost 80,000 career servicemembers have taken advantage of this provision. If confirmed, I would monitor the effects of the provisions of this act very closely.

QUADRENNIAL REVIEW OF MILITARY COMPENSATION

Question. The Department recently completed work on the 10th Quadrennial Review of Military Compensation (QRMC), releasing Volume I of its report in February 2008 and Volume II in July 2008. Among other recommendations, the QRMC proposes a new defined benefit retirement plan that more resembles the benefits available under the Federal Employee Retirement System than the current military retirement benefit; increasing TRICARE fees for retirees; and the adoption of dependent care and flexible spending accounts for servicemembers.

What is your assessment of the QRMC recommendations, particularly the proposed new defined retirement plan?

Answer. I have not reviewed this report in detail, but I know that one of its major recommendations was the consolidation of special and incentive pays—a provision already enacted and now being implemented.

It is my understanding that the 10th QRMC explored and examined alternatives to the current compensation system and proposed alternatives for the Department to consider. If confirmed, I look forward to reviewing this and other proposals with the Military Departments and Services.

Question. Do you believe that servicemembers should have access to flexible spending arrangements?

Answer. I don't have a recommendation at this time but, if confirmed, I would review this issue carefully.

LEGISLATIVE FELLOWSHIP PROGRAM

Question. Each year, the Services assign mid-career officers to the offices of Members of Congress under the Legislative Fellows Program. Upon completion of their legislative fellowships, officers are supposed to be assigned to follow-on positions in their Services in which they effectively use the experience and knowledge they gained during their fellowships.

What is your assessment of the value of the Legislative Fellows program to DOD?

Answer. I believe this program is a valuable educational experience for our military and civilian members. Fellows coming to Congress from DOD provide a valuable perspective. From my past experiences, I know that those with the clear understanding of how the Department interacts with Congress are advantaged when they move to senior leadership positions.

Question. What is your assessment of the career development and the utilization of officers who have served as legislative fellows?

Answer. I do not have sufficient insight to make an assessment, but I believe the experiences and insights legislative fellows gain are valuable in senior leadership positions.

Question. What do you consider to be the appropriate number of legislative fellows by Service each year?

Answer. I cannot make a specific recommendation, but it is my understanding that DOD expanded from 26 to 100 legislative fellows over the past 2 years. If confirmed, I would review this program and recommend changes as appropriate.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Under Secretary of Defense for Personnel and Readiness?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR EVAN BAYH

RESET ISSUES

1. Senator BAYH. Dr. Stanley, after years of persistent combat in Iraq and Afghanistan the readiness of our Armed Forces continues to be consumed as soon as it is created. Congress and particularly this committee have consistently resourced every funding request and dedicated billions of dollars specifically for reset. I understand the demand for forces and operational tempo remains high and we are here to help you, yet after years of investing and attempting to restore the readiness of our Armed Forces, it appears we still have not made any progress toward that goal. What needs to be done to address this continued decline in readiness?

Dr. STANLEY. There is no doubt persistent operations around the globe have challenged our ability to keep our forces ready. In my view, efforts underway to address the challenges of persistent combat have been effective. Our forces have been upgraded with advanced equipment and new capabilities to address today's complex operations and irregular warfare. While I would strive to make improvements in the process and improve readiness, currently I believe that our forces are fully capable and ready for the missions assigned to them.

DEFENSE READINESS REPORTING SYSTEM

2. Senator BAYH. Dr. Stanley, in 1999, Congress required the Department of Defense (DOD) to develop and implement a new readiness reporting system, uniformly applied, which would provide decision makers with more accurate and reliable assessments and data regarding the actual capabilities and readiness of U.S. forces. In June 2002, DOD issued a directive establishing the Defense Readiness Reporting System (DRRS) and requiring that all military departments align their readiness reporting processes with DRRS. Since then, DOD and the Services have taken a number of developmental steps, but DRRS is not yet fully operational and aligned with the Services' reporting processes. According to a Government Accountability Office (GAO) study released in September 2009, the Department has still yet to successfully plan, organize, resource, and execute relevant or necessary interoperability, user, and other tests to validate DRRS for deployment as the Department's readi-

ness reporting system replacement. After 10 years, why have we still not fully implemented DRRS?

Dr. STANLEY. It is my understanding that DRRS should be fully operational by the end of fiscal year 2011, and, if confirmed, I would work to achieve that goal.

CUTS TO OPERATIONS AND MAINTENANCE

3. Senator BAYH. Dr. Stanley, as you well know readiness rates within the Services continue to deteriorate. One disturbing trend which could exacerbate the overall readiness of the Services would be funding cuts to operation and maintenance (O&M) accounts. Rising costs, reprogramming requests, and other needs of the Department often require offsets which historically have been taken out of O&M. How do you see this trend progressing and what affects do you anticipate it having on overall readiness of the Services?

Dr. STANLEY. Sufficient levels of funding are essential to ensure our forces are fully trained and unit equipment is properly maintained. The budgeting process takes place on an annual basis, and the only way to improve the process is to remain actively engaged year round. If confirmed, I would work to ensure that these accounts are responsibly funded and maintained.

QUESTIONS SUBMITTED BY SENATOR MARK BEGICH

HEALTHCARE FOR MILITARY IN ALASKA

4. Senator BEGICH. Dr. Stanley, Active Duty military, their families, and retirees face many challenges accessing health care in Alaska. The military treatment facilities at Forts Wainwright and Elmendorf are top quality and provide many services to military members and their families. However, many specialties are either not available at the military treatment facilities or at capacity, and cannot accommodate all customers. Many civilian specialists in Alaska do not participate in the TRICARE network. As a result, certain health care needs of military members and their families in Alaska are not being met. If confirmed, what steps would you take to improve access to healthcare in Alaska?

Dr. STANLEY. It is my understanding that existing access challenges for health care services for servicemembers stationed in Alaska partly depend on the part of the State in which a servicemember is stationed and that other challenges have been created by the deployment of health care professionals. At the same time, I have been informed that a number of areas in Alaska possess an impressive range of services from basic care to specialty medical treatments. While the circumstances surrounding limitations on health care services vary, and are complex, if confirmed, I pledge to work to improve these services to the best of my ability so that our servicemembers have access to the fullest spectrum of health care possible; they deserve no less.

5. Senator BEGICH. Dr. Stanley, if confirmed, please describe how you would work with TRICARE Management Agency as they work to increase the TRICARE network in Alaska to provide for better access to health care for our servicemembers and their families.

Dr. STANLEY. I have been informed that TRICARE is currently reviewing its processes for recruiting health care providers in Alaska, and a number of initiatives to improve these processes are under consideration to increase the number of providers, ensure both beneficiary and provider satisfaction, with the ultimate aim to increase confidence in the quality of the TRICARE-authorized provider base in Alaska. If confirmed, I would use this ongoing process as a starting point to improve health care for servicemembers stationed in Alaska.

KOSOVO REST AND RECUPERATION

6. Senator BEGICH. Dr. Stanley, servicemembers deployed to Kosovo, typically national guardsmen, are authorized a mid-tour leave for rest and recuperation (R&R). However, the current regulations only authorize funding for travel from Kosovo to Baltimore, MD (BWI) as the point of embarkation in the United States. Travel from BWI to the servicemember's R&R location is then paid for by the servicemember. For those from Alaska, this can cost as much as \$1,400 round trip, much more than their counter parts in the lower 48 contiguous States. This is an unacceptable financial burden many National Guard members cannot afford, especially those from remote Alaskan villages where they may be the only wage earner in the family. The

impact of this financial burden may deter recruitment and retention of economically challenged Alaskan Natives. At my urging, the Secretary of the Army proposed adding two additional points of embarkation be authorized; Houston, TX and Los Angeles, CA. The Army's proposal was sent to the Under Secretary of Defense for Personnel and Readiness (USD (P&R)) on June 3, 2009. I have since followed up with the P&R office multiple times, but in the past 5 months no progress or final determination has been made. The unit from Alaska stationed in Kosovo has since redeployed. However, other units that deploy to Kosovo in the future will continue to bear the unfair financial burden. If confirmed, what action, if any, will you take on this matter and what do you believe is an appropriate length of time to address and respond to matters of interest to Members of Congress?

Dr. STANLEY. If confirmed, I would look into this issue and pursue possible remedies. Additionally, I pledge to ensure that matters of interest to Members of Congress are answered in a timely manner.

QUESTION SUBMITTED BY SENATOR ROLAND W. BURRIS

SELECTED RESERVE CONTINUUM OF CARE ACT

7. Senator BURRIS. Dr. Stanley, my colleague, Senator Blanche Lincoln, has a bill called the Selected Reserve Continuum of Care Act, which would provide advanced physical and dental screenings to our Reserve component prior to deployment. If you are confirmed, how would you address the need of pre-deployment screenings and care of our Nation's Reserve component?

Dr. STANLEY. If confirmed, I would ensure that DOD continues to strive for excellence in maintaining the medical and dental health of our members for a fully operational and ready Total Force. I would work with Secretary Gates to provide our servicemembers with all appropriate levels of health care.

QUESTIONS SUBMITTED BY SENATOR SAXBY CHAMBLISS

MILITARY VOTING

8. Senator CHAMBLISS. Dr. Stanley, this year Congress passed landmark legislation known as the Military and Overseas Voter Empowerment Act (MOVE Act) designed to help one of our most disenfranchised voting blocks in America; our military servicemembers serving overseas. If confirmed, will you pledge to give Bob Carey and the Federal Voting Assistance Program all the personnel and support they need to carry out this new legislation?

Dr. STANLEY. If confirmed, I would ensure that P&R supports the implementation of legislation.

9. Senator CHAMBLISS. Dr. Stanley, one of the provisions in the MOVE Act not adopted by Congress was sec. 590(b) of S.1390, a provision based upon legislation crafted by Senator Cornyn as part of his bill, S. 1265. This provision would have established voting assistance centers at military installations, under the specific terms of the National Voter Registration Act (or the "motor-voter" law). DOD opposed this provision and it was ultimately removed from the bill. If confirmed, will you review the Department's position on this issue and pledge to work with the appropriate congressional offices to reach an agreeable solution to ensure we provide military servicemembers and their families the proper amount of voting assistance?

Dr. STANLEY. I support the Deputy Secretary's decision, as stated in the December 16, 2009 letters to Senators Schumer and Cornyn, that DOD "will designate all military installation voting assistance offices as NVRA agencies." It is my understanding, that the Department is currently developing those regulations and is coordinating with the Department of Justice to ensure correct implementation of the relevant statutory authorities.

10. Senator CHAMBLISS. Dr. Stanley, specifically, regarding section 583(b) of the recently enacted National Defense Authorization Act for Fiscal Year 2010, what are your thoughts in relation to how you would advise the Secretary of Defense regarding exercising the authority granted to him to designate voting assistance offices on military installations as voter registration agencies under section 7(a)(2) of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-5(a)(2))?

Dr. STANLEY. I support the Deputy Secretary's decision, as stated in the December 16, 2009 letters to Senators Schumer and Cornyn, that DOD "will designate all military installation voting assistance offices as NVRA agencies." It is my under-

standing, that the Department is currently developing those regulations and is coordinating with the Department of Justice to ensure correct implementation of the relevant statutory authorities.

END STRENGTH

11. Senator CHAMBLISS. Dr. Stanley, for years Congress felt that the end strength of our military was insufficient to conduct two wars, properly reset our forces and give them the amount of dwell time they need, and continue to prepare for future wars. This year, Congress passed legislation authorizing fiscal year 2010 Active Duty end strengths for the Army, of 562,400; the Marine Corps, of 202,100; the Air Force, of 331,700; and the Navy, of 328,800. It also authorizes the Secretary of Defense to increase the Army's Active Duty end strength by 30,000 above 2010 levels during fiscal year 2011 and fiscal year 2012 if sufficient funding is requested in the budgets for those fiscal years. If confirmed, will you pledge to review all demands across our military, taking into consideration the demands of tasks outside of deployments as well as a part of deployments to ensure we properly size the military?

Dr. STANLEY. If confirmed, one of my top priorities would be an ongoing examination of demands placed on our troops and their families. Our servicemembers (Active and Reserve) continue to perform extraordinarily well in light of the great demands we have placed upon them. I believe strongly that we cannot fail to have the right numbers and kinds of uniformed personnel to win our wars, and to deter potential adversaries. I understand that our Active and Reserve forces must be large enough to not only satisfy deployed demands, but also have a rotation base with requisite dwell time to accommodate both essential non-deployment challenges (such as training) and the personal needs of our troops and their families. I know that Secretary Gates shares my concerns on this issue, and I would work diligently with him to ensure that our force rotations maximize the length of dwell time and enhance military life for servicemembers and their families.

12. Senator CHAMBLISS. Dr. Stanley, if confirmed, will you also review policies on properly identifying servicemembers down to the individual level who are in violation of existing dwell time/deployment time ratio guidelines to ensure we are not overusing individuals and properly using those with little to no deployment time?

Dr. STANLEY. Yes.

FORT GORDON/WOUNDED WARRIOR CARE

13. Senator CHAMBLISS. Dr. Stanley, there is no more important task than properly caring for wounded warriors and their families. I am particularly proud of the work being done at Augusta, GA in this regard. Fort Gordon and the Medical College of Georgia have developed an interagency model for supporting our wounded warriors through the continuum of care that is truly innovative and impressive. If confirmed, will you look into this model and assess its potential for expansion?

Dr. STANLEY. Yes.

14. Senator CHAMBLISS. Dr. Stanley, if confirmed, will you also review the Medical College of Georgia Nursing School's program to train Federal Recovery Coordinators for Wounded Warriors and the potential for a Recovery Coordinator Center of Excellence at Fort Gordon?

Dr. STANLEY. Yes.

[The nomination reference of Dr. Clifford L. Stanley follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
October 15, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Clifford L. Stanley, of Pennsylvania, to be Under Secretary of Defense for Personnel and Readiness, vice David S.C. Chu, resigned.

[The biographical sketch of Dr. Clifford L. Stanley, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DR. CLIFFORD STANLEY

EDUCATION

University of Pennsylvania, 2003–2005, Doctorate, 05/2005
 Johns Hopkins University, 1975–1977, Masters, 05/1977
 South Carolina State University, 1965–1969, Bachelors, 05/1969
 Theodore Roosevelt High School, 1962–1965, Diploma, 06/1965

EMPLOYMENT RECORD

President, Scholarship America, 07/2004–07/2009
 Executive Vice President, University of Pennsylvania, 10/2002–10/2003
 Deputy Commanding General, Marine Corps Combat Development Command, Quantico, VA, 07/2000–09/2002
 Commanding General, Marine Corps Air Ground Combat Center, Twentynine Palms, CA, 07/1998–07/2000
 Director of Marine Corps Public Affairs, Pentagon, Washington, DC, 07/1996–07/1998
 Assistant Deputy Chief of Staff, Manpower Reserve Affairs (Manpower Policy), Washington, DC, 06/1994–07/1996
 Fleet Marine Officer, USS *Mount Whitney*, Norfolk, VA, 08/1993 to 05/1993. Infantry Regimental Commander/Assistant Chief of Staff G–4, 1st Marine Division, Camp Pendleton, CA, 07/1991–07/1993
 Head, Marine Corps Combat Development Command Battle Assessment Team, Quantico, VA and Saudi Arabia, 02/1991–06/1991
 Advisor for POW/MIA Affairs and Assistant for Australia and New Zealand, Office of the Secretary of Defense, Pentagon, Washington, DC, 09/1989–02/1991
 White House Fellows Program, Office of the Director of the FBI, Washington, DC, 06/1988–08/1989
 Student, National War College, Fort McNair, Washington, DC, 06/1987–06/1988
 Battalion Commander/Depot Inspector, Marine Corps Recruit Depot, Parris Island, SC, 06/1986–06/1987
 Executive Officer Infantry Battalion, 2nd Marine Division, Camp Lejeune, NC, 06/1984–06/1986
 Student, Marine Corps Command and Staff College, Quantico, VA, 07/1983–06/1984
 Special Assistant and Marine Corps Aide, Office of the Assistant Secretary of the Navy, Manpower and Reserve Affairs, Pentagon, Washington, DC, 10/1981–07/1983
 Officer in Charge, Infantry Writer Unit, Ceremonial Parade Commander, Marine Barracks 8th and I, Washington, DC, 06/1979–10/1981
 Infantry Company Commander, 3rd Marine Division, Okinawa, Japan, 05/1978–06/1979
 Student, Amphibious Warfare School, Quantico, VA, 08/1977–06/1978
 Instructor, United States Naval Academy, Annapolis, MD, 07/1974–08/1977
 Infantry Company Commander, 2nd Marine Division, Camp Lejeune, NC, 08/1973–08/1974
 Platoon Commander, Officer Candidate School, Quantico, VA, 07/1972–08/1973
 Supply Officer, Marine Corps Combat Development Command, Quantico, VA, 05/1971–07/1972
 Supply Officer, Headquarters Battalion, 3rd Marine Division, Okinawa, Japan, 06/1970–05/1971
 Student, Supply Officer School, Camp Lejeune, NC, 03/1970–05/1970.
 Student, The Basic School, Quantico, VA, 10/1969–03/1970.

 Scholarship America Scholarship created in my honor

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Dr. Clifford L. Stanley in connection with his nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES

Room SR-228
 Washington, DC 20510-6050
 (202) 224-3871

COMMITTEE ON ARMED SERVICES FORM
 BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
 Clifford Lee Stanley.
2. **Position to which nominated:**
 Under Secretary of Defense for Personnel and Readiness.
3. **Date of nomination:**
 October 15, 2009.
4. **Address:** (List current place of residence and office addresses.)
 [Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
 March 31, 1947; Washington, DC.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
 Married to Rosalyn Hill Stanley (Maiden Name: Rosalyn Yvonne Hill).
7. **Names and ages of children:**
 Angela Yvonne Stanley; age 34.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
 University of Pennsylvania—2003 to 2005—Doctorate—05/2005
 Johns Hopkins University—1975 to 1977—Masters—05/1977

South Carolina State University—1965 to 1969—Bachelors—05/1969
Theodore Roosevelt High School—1962 to 1965—Diploma—06/1965

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

President, Scholarship America, Minneapolis, MN, dates of employment: 07/2004 to 07/2009.

Executive Vice President, University of Pennsylvania, Philadelphia, PA, dates of employment: 10/2002 to 10/2003.

Deputy Commanding General, Marine Corps Combat Development Command, Quantico, VA, dates of employment: 07/2000 to 09/2002.

Commanding General, Marine Corps Air Ground Combat Center, Twentynine Palms, CA, dates of employment: 07/1998 to 07/2000.

Director of Marine Corps Public Affairs, Washington, DC, dates of employment: 07/1996 to 07/1998.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Member, Secretary of the Navy Advisory Committee on Naval History, 08/2008 to Present.

Member, Naval Research Advisory Committee, 12/2007 to 11/2008.

Assistant Deputy Chief of Staff, Manpower and Reserve Affairs (Manpower Policy), Washington, DC, 06/1994 to 07/1996.

Fleet Marine Officer, USS *Mount Whitney*, Norfolk, VA, 08/1993 to 05/1993.

Infantry Regimental Commander/Assistant Chief of Staff G-4, 1st Marine Division, Camp Pendleton, CA, 07/1991 to 07/1993.

Head Marine Corps Combat Development Command Battle Assessment Team, Quantico, VA and Saudi Arabia, 02/1991 to 06/1991.

Advisor for POW/MIA Affairs and Assistant for Australia and New Zealand, Office of the Secretary of Defense, Pentagon, Washington, DC, 09/1989 to 02/1991.

White House Fellows Program, Office of the Director of the FBI, Washington, DC, 06/1988 to 08/1989.

Student, National War College, Fort McNair, Washington, DC, 06/1987 to 06/1988.

Battalion Commander/Depot Inspector, Marine Corps Recruit Depot, Parris Island, SC; 06/1986 to 06/1987.

Executive Officer Infantry Battalion, 2nd Marine Division, Camp Lejeune, NC, 06/1984 to 06/1986.

Student, Marine Corps Command and Staff College, Quantico, VA, 07/1983 to 06/1984.

Special Assistant and Marine Corps Aide, Office of the Assistant Secretary of the Navy, Manpower and Reserve Affairs, Pentagon, Washington, DC, 10/1981 to 07/1983.

Officer in Charge, Infantry Writer Unit, Ceremonial Parade Commander, Marine Barracks 8th and I, Washington, DC, 06/1979 to 10/1981.

Infantry Company Commander, 3rd Marine Division, Okinawa, Japan, 05/1978 to 06/1979.

Student, Amphibious Warfare School, Quantico, VA, 08/1977 to 06/1978.

Instructor, U.S. Naval Academy, Annapolis, MD, 07/1974 to 08/1977.

Infantry Company Commander, 2nd Marine Division, Camp Lejeune, NC, 08/1973 to 08/1974.

Platoon Commander, Officer Candidate School, Quantico, VA, 07/1972 to 08/1973.

Supply Officer, Marine Corps Combat Development Command, Quantico, VA, 05/1971 to 07/1972.

Supply Officer, Headquarters Battalion, 3rd Marine Division, Okinawa, Japan, 06/1970 to 05/1971.

Student, Supply Officer School, Camp Lejeune, NC, 03/1970 to 05/1970.

Student, The Basic School, Quantico, VA, 10/1969 to 03/1970.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Member, Board of Director, Seminars International, Inc.

Member, Board of Director, Marine Corps Heritage Foundation

Trustee, Spalding University

Parliamentarian and Chair of Membership Committee, South Carolina State University Foundation

Limited Partner, New Horizons Investments (LLC)

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Life Member, Kappa Alpha Psi Fraternity
 Life Member, South Carolina State University Alumni Association
 President, Men's Club, Grace Baptist Church of Germantown
 Member, Board of Deacons, Grace Baptist Church of Germantown
 Life Member, National Naval Officers Association
 Life Member, White House Fellows Foundation and Association
 President/Board Chair, Pat McCormick Educational Foundation

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

Not applicable.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Not applicable.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

6/21/2008—\$100 contribution to Obama campaign
 3/23/2008—\$500 contribution for Carlos Del Toro campaign
 3/09/2008—\$100 contribution to Obama campaign
 3/03/2008—\$50 contribution to Obama campaign
 Spouse made \$50 contribution to Obama campaign some time before March 2008.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Honorary Doctor of Laws Degree from Spalding University
 Honorary Doctor of Laws Degree from South Carolina State University
 NAACP Meritorious Service Award
 NAACP Roy Wilkins Award
 Defense Distinguished Service Medal
 Legion of Merit Medal
 Defense Meritorious Service Medal
 Meritorious Service Medal (2 awards)
 Navy Commendation Medal
 Navy Achievement Medal
 Honor Graduate from Johns Hopkins University
 Honor Graduate Marine Corps Command and Staff College
 White House Fellow
 American Legion Award for inspirational leadership
 South Carolina State University Hall of Fame
 Clifford L. Stanley Park (named in my honor), Twentynine Palms, CA
 Department of the Navy Nathaniel Stinson EEO Award
 Order of the Sword (honor received from enlisted marines)
 Employee of the Year in Minneapolis/St. Paul Minnesota
 Scholarship America Scholarship created in my honor

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Doctoral Dissertation: The Importance of Character Development in American Colleges and Universities (2005).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

CLIFFORD L. STANLEY.

This 2nd day of November, 2009.

[The nomination of Dr. Clifford L. Stanley was reported to the Senate by Chairman Levin on December 2, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on February 9, 2010.]

[Prepared questions submitted to Erin C. Conaton by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater Nichols Act provisions?

Answer. I believe strongly that Goldwater Nichols has had major and positive impacts on U.S. military operations and authorities. My view has been informed by my years at the House Armed Services Committee in oversight of this law and its implications for the current force. At this time I am not aware of any reason to amend the Goldwater-Nichols Act. If I am confirmed, I will be mindful of the need to periodically review organizational and management frameworks to ensure their continued validity and consistency with the provisions of Goldwater-Nichols.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. If I identify areas that I believe merit changes, I will propose those changes through the appropriate established process.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. If confirmed, I will bring over a decade of broad experience in national security policy and programs to this position. In my experience on the House Armed Services Committee since 2001, I have been involved in shaping legislation and conducting oversight of the choices and challenges facing our military since September 11 and through the wars in Iraq and Afghanistan, including the issues facing the U.S. Air Force. I have worked closely with the Military Services, the national security interagency community, and a variety of oversight committees in Congress. I have also helped the chairman and members of the House Armed Services Committee to grapple with tough fiscally-constrained trade-offs among programs and to consider the implications of changes in defense law and policy. Finally, I bring the experience of managing a highly experienced, professional staff in support of the members of the committee and the U.S. military. I believe I could use these skills and my experience to benefit the Air Force and the broader Department of Defense (DOD) if I am confirmed.

DUTIES

Question. Section 8015 of title 10, U.S.C., states the Under Secretary of the Air Force shall perform such duties and exercise such powers as the Secretary of the Air Force may prescribe.

What is your understanding of the duties and functions of the Under Secretary of the Air Force?

Answer. The position of the Under Secretary of the Air Force is established by law within the Office of the Secretary of the Air Force. Subject to the Secretary of the Air Force's direction and control, the Under Secretary exercises the full authority of the Secretary to conduct the affairs of the Department of the Air Force (except as limited by law, regulation, or limitations imposed by DOD or the Secretary of the Air Force). The Under Secretary also serves as the Chief Management Officer (CMO) of the Air Force pursuant to section 904 of the National Defense Authorization Act (NDAA) for Fiscal Year 2008, and, if designated by the Secretary of the Air Force, as DOD Executive Agent for Space.

Question. What recommendations, if any, do you have for changes in the duties and functions of the Under Secretary of the Air Force, as set forth in section 3015 of title 10, U.S.C., or in DOD regulations pertaining to functions of the Under Secretary of the Air Force?

Answer. At this time, I am unaware of any reason to change the duties and functions of the Under Secretary as set out in title 10 and pertinent DOD regulations. If I am confirmed and I identify areas that I believe merit changes, I will propose those changes through the appropriate established processes.

Question. Assuming you are confirmed, what additional duties, if any, do you expect will be prescribed for you?

Answer. If confirmed, I look forward to working with the Secretary of the Air Force to further understand his vision and how I can best support him and his goals for the Air Force. I expect the Secretary to prescribe for me duties relating to the Under Secretary of the Air Force's responsibilities, particularly in the role of CMO.

Question. Section 904(b) of the NDAA for Fiscal Year 2008, directs the Secretary of a military department to designate the Under Secretary of such military department to have the primary management responsibility for business operations. Previously the Under Secretary of the Air Force had special responsibilities for space programs including the acquisition responsibility for space programs.

Answer. If confirmed, will you be responsible for acquisition of Air Force space programs in addition to the business operations responsibilities?

Currently the organization and management of space issues within the Air Force headquarters is under internal review, as well as through the Quadrennial Defense Review and Space Posture Review processes. These reviews and studies will inform and assist the Air Force in developing the way ahead, to include lines of authority and organizational structures. If confirmed, I would expect to be a major participant in these ongoing processes and would look forward to working with this committee to understand any new organizational construct or responsibilities that result from these reviews.

RELATIONSHIPS

Question. If confirmed, what would be your working relationship with: The Secretary of Defense.

Answer. The Secretary of Defense is responsible for all matters within DOD. The Secretary of the Air Force is subject to the authority, direction and control of the Secretary of Defense, and the Under Secretary of the Air Force works for the Secretary of the Air Force. From 2002–2007, the Secretary of the Air Force designated the Under Secretary of the Air Force to perform the duties of the DOD Executive Agent for Space. In this role, the Under Secretary developed, coordinated, and integrated policy, plans, and programs for space systems and major defense space acquisitions. If confirmed and designated by the Secretary of the Air Force to perform the duties of the DOD Executive Agent for Space, I would look forward to working closely with the Secretary of Defense on space-related matters.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense assists the Secretary of Defense in carrying out his duties and responsibilities and performs those duties assigned by the Secretary of Defense or by law. If confirmed, I will work closely with the Deputy Secretary of Defense on a range of matters. In particular, I would look forward to working with and supporting the Deputy Secretary of Defense in his role as CMO of DOD.

Question. The Deputy Chief Management Officer of DOD.

Answer. The Deputy CMO of DOD is the senior official responsible for assisting the Secretary of Defense and the Deputy Secretary of Defense, acting as the CMO, to effectively and efficiently organize the business operations of DOD. The Office of the Deputy CMO supervises and oversees the Defense Business Transformation Agency and the DOD Performance Improvement Officer. If confirmed, I would look forward to developing an effective working relationship with the Deputy CMO, particularly in my capacity as the Air Force CMO.

Question. The Director of the Business Transformation Agency.

Answer. The Director of the Business Transformation Agency heads an organization which is responsible for guiding the Department's business operations modernization. The Director reports to the Deputy Under Secretary of Defense for Business Transformation (AT&L). The Business Transformation Agency fosters transformational business operations in order to support American warfighters and seeks to provide accountability by systematically improving business processes, enterprise resource planning systems and investment governance. If confirmed, I anticipate working very closely with the Director of the Business Transformation Agency on matters affecting the Air Force, pursuant to section 908 of the NDAA for Fiscal Year 2009 and other applicable laws.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman of the Joint Chiefs of Staff is the principal military advisor to the President, the National Security Council, and the Secretary of Defense. If confirmed, I will work closely with the Chairman through the Chief of Staff of the Air Force on appropriate matters affecting the Air Force.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. The Vice Chairman has the same statutory authorities and obligations of the other members of the Joint Chiefs of Staff. If confirmed, I will work closely with the Vice Chairman through the Chief of Staff of the Air Force on appropriate matters affecting the Air Force.

Question. The Secretary of the Air Force.

Answer. Subject to the authority, direction and control of the Secretary of Defense, the Secretary of the Air Force is responsible for and has the authority necessary to conduct all affairs of the Department of the Air Force. The Under Secretary of the Air Force is subject to the authority, direction and control of the Secretary of the Air Force. If confirmed, I expect to be assigned a wide range of duties and responsibilities by the Secretary involving, but not limited to, organizing, supplying, equipping, training, maintaining, and administering the Air Force. I look forward to working closely with the Secretary as his deputy and principal assistant.

Question. The Chief of Staff of the Air Force.

Answer. The Chief of Staff of the Air Force is subject to the authority, direction and control of the Secretary of the Air Force, presides over the Air Staff, and is a principal advisor to the Secretary. In addition, he is a military adviser to the President, the National Security Council, and the Secretary of Defense. If confirmed, I would foster a close working relationship with the Chief of Staff to ensure that policies and resources are appropriate to meet the needs of the Air Force and respect his additional responsibilities as a member of the Joint Chiefs of Staff.

Question. The assistant Secretaries of the Air Force.

Answer. If confirmed, I will assist the Secretary in building a close relationship with the assistant Secretaries of the Air Force to carry out the goals and priorities of the Department. I understand the importance of teamwork and information sharing and will make this a top priority. If confirmed, I look forward to working with the assistant Secretaries to further the Secretary's vision for the Air Force.

Question. The General Counsel of the Air Force.

Answer. As the Chief Legal Officer of the Air Force, the General Counsel of the Air Force is the senior civilian legal advisor to Air Force senior leaders and all officers and agencies of the Department of the Air Force. If confirmed, I would look forward to developing a good working relationship with the General Counsel.

Question. The Inspector General of the Air Force.

Answer. The Inspector General of the Air Force is a general officer who is detailed to the position by the Secretary of the Air Force. When directed, the Inspector General inquires into and reports on matters affecting the discipline, efficiency and economy of the Air Force. He also proposes programs of inspections and investigations as appropriate. If confirmed, I would look forward to developing a good working relationship with the Inspector General.

Question. The Surgeon General of the Air Force.

Answer. The Surgeon General of the Air Force is the functional manager of the Air Force Medical Service and provides direction, guidance and technical management of Air Force medical personnel at facilities worldwide. The Surgeon General advises the Secretary of the Air Force and Air Force Chief of Staff, as well as the assistant Secretary of Defense for Health Affairs, on matters pertaining to the medical aspects of the air expeditionary force and the health of Air Force personnel. If confirmed, I would look forward to developing a good working relationship with the Surgeon General.

Question. The Air Force Business Transformation Office.

Answer. The Air Force Business Transformation Office is responsible for assisting the Under Secretary of the Air Force in performing the duties of Air Force CMO

as they relate to improving the effectiveness and efficiency of Air Force business operations. The Air Force Deputy CMO has been designated as the Director of the Air Force Business Transformation Office. The office advises Air Force senior leadership on establishment of strategic performance goals, management of Air Force-wide cross functional activities to meet those goals and implementation of continuous process improvement initiatives. If confirmed, I anticipate a very active and involved role with the Air Force Business Transformation Office on matters affecting the Air Force-wide business operations.

Question. The Judge Advocate General of the Air Force.

Answer. The Judge Advocate General of the Air Force is the senior uniformed legal advisor to Air Force senior leaders and all officers and agencies of the Department of the Air Force and provides professional supervision over The Judge Advocate General's Corps in the performance of their duties. If confirmed, I would look forward to developing a good working relationship with The Judge Advocate General.

Question. The Chief of the National Guard Bureau.

Answer. The Chief of the National Guard Bureau is the senior uniformed National Guard officer responsible for formulating, developing, and coordinating all policies, programs, and plans affecting Army and Air National Guard personnel. Appointed by the President, he serves as principal adviser to the Secretary of Defense through the Chairman of the Joint Chiefs of Staff on National Guard matters. He is also the principal adviser to the Secretary and Chief of Staff of the Air Force on all National Guard issues and serves as the department's official channel of communication with the Governors and Adjutants General. If confirmed, I will look forward to developing a good working relationship with the Chief of the National Guard Bureau on appropriate matters affecting the Air Force.

Question. The Under Secretaries of the Military Services.

Answer. If I am confirmed, I will work diligently to foster a close working relationship with the Under Secretaries of the Army and Navy. I look forward to sharing information and expertise that will assist in the management of the Department of the Air Force and our coordination with the other Services on matters of mutual interest, particularly in our capacities as CMOs for our respective Services.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges, if any, that you would confront if confirmed as Under Secretary of the Air Force?

Answer. This is a time of great challenges, for DOD generally and for the Air Force in particular. Current strategic reviews, ranging from the QDR to the Nuclear and Space Posture Reviews, will reassess the strategic environment within which the military is operating, presumably with attendant implications for the missions, force structure, and operations of the joint force. The Air Force has come through a period of challenge with regards to its nuclear enterprise and its acquisition processes. The Service also must contend with balancing the need to support the joint warfighter in the current conflict while ensuring we can prevail in the next fight, whatever that may be. There is a need to balance modernization of current platforms and to continue to invest in new capabilities that will be needed in future conflicts. The Air Force must also ensure that it can continue to recruit, train, deploy, and retain highly-skilled airmen and to support those airmen and their families. At a time of great fiscal challenge for our Nation, these challenges will continue to pose hard choices for the Service in its overall budget, particularly in the investment accounts.

If confirmed, I look forward to understanding these challenges more clearly and to working closely with DOD and Air Force leadership, along with this committee, to develop strategies for addressing the major challenges facing the Air Force.

Question. If confirmed, how would you prioritize and what plans would you have, if any, for addressing these challenges?

Answer. In my view, the Secretary and Chief of Staff have laid out clear priorities—reinvigorating the nuclear enterprise; partnering with the joint and coalition team to win today's fight; developing and caring for airmen and their families; modernizing air and space inventories, organizations, and training; and recapturing acquisition excellence. Since the Secretary and Chief were confirmed last year, the Air Force has made much progress. If confirmed, I look forward to working with senior DOD and Air Force leadership—as well as this committee—to ensure continued progress is made. All of these priorities will require sustained leadership and effort with an eye toward ensuring the best support for the warfighter and the wise use of taxpayer resources.

MANAGEMENT OF SPACE ACTIVITIES

Question. The Under Secretary of the Air Force is traditionally designated as the DOD Executive Agent for Space. In this role, the Under Secretary develops, coordinates, and integrates policy, plans and programs for space systems and major defense space acquisitions.

Will you be designated as the DOD Executive Agent for Space?

Answer. If confirmed, I will be assigned a wide range of duties and responsibilities subject to the authority, direction and control of the Secretary of the Air Force. Recently, the Under Secretary of the Air Force has also served as the DOD Executive Agent for Space. The roles and responsibilities for the Air Force in space policy and programs are currently under review both by DOD and the Air Force. Based on that review, I expect the Secretary of the Air Force to make a judgment about the best organizational construct for accomplishing the Air Force's space mission. I anticipate being an active participant in those deliberations and to serving in whatever capacity for space policy and programs that the Secretary finds most appropriate and beneficial to the Air Force. Beyond this specific area, I look forward to working as the Secretary's deputy and principal assistant across the range of his responsibilities.

Question. As the DOD Executive Agent for Space, how will you ensure that each of the Military Services remains fully engaged in and knowledgeable about space programs and the advantages that such programs can bring to the warfighter?

Answer. If confirmed and designated by the Secretary of the Air Force as the DOD Executive Agent for Space, I would foster a close working relationship with the Under Secretaries of the Army and Navy, as well as the appropriate Under and Assistant Secretaries of Defense and the Defense Advanced Research Projects Agency, to ensure space acquisition planning, programming and budgeting are synchronized to continue to deliver the best space capability to the warfighter.

Question. What is your view of the relationship of the Under Secretary of the Air Force, as the Executive Agent for Space, to the Under Secretary of Defense for Policy, and the assistant Secretary of Defense for Networks and Information Integration with regard to space policy and systems?

Answer. If confirmed and designated by the Secretary of the Air Force as DOD Executive Agent for Space, I would work collaboratively with both these individuals and their organizations to shape space policy to maintain continuity of existing space services while improving how the department acquires new space systems. The Executive Agent for Space responsibilities can most successfully be accomplished with close coordination with these organizations for the development of space policy and the integration of space systems into broader departmental efforts.

Question. In your view, what are the authorities of the Executive Agent for Space regarding: (1) the budgets, programs, and plans of the various Service and Defense Agency space programs; and (2) milestone decisions for space acquisition programs of the various Services and Defense Agencies?

Answer. With respect to planning, budgeting, and programming, I view the authorities of the DOD Executive Agent for Space as an integration function across the entire department and space communities. If confirmed, I view the synchronization of space budgets between the Services and the coordination of space and non-space acquisitions as paramount to delivering fully integrated weapon systems to the battlefield. If designated by the Secretary of the Air Force as the Executive Agent for Space, I would communicate our progress annually in the National Security Space Plan, which is an assessment of space plans and architectures of the DOD Components developed in coordination with several other Federal agencies.

Currently, the Under Secretary of Defense for Acquisition, Technology and Logistics has milestone decision authority for space acquisition programs. If confirmed, I look forward to assisting the Under Secretary in managing and delivering space capabilities to the warfighter.

OPERATIONALLY RESPONSIVE SPACE

Question. Congress established an Office for Operationally Responsive Space (ORS) to explore the concept of providing military commanders the capability to rapidly launch rockets with small satellites designed to support a specific area of operations with communications and other sensors and to reconstitute space based capabilities if lost.

What is your view of the goals and current capabilities of ORS and the status of efforts to develop and acquire small satellite capability?

Answer. While I am familiar with the congressional goals of ORS, if confirmed, I will need to familiarize myself more deeply to evaluate the current status and progress the ORS Office has made toward these goals. The Nation continues to need

the ability to rapidly reconstitute and augment warfighters' space capabilities with solutions that can be delivered in operationally relevant timelines. If confirmed and appropriate to the responsibilities assigned to me by the Secretary, I will work closely with the other Services, members of the Intelligence Community, and the larger space enterprise to develop a responsive space capability to address emerging needs of our Theater Commanders.

SPACE LAUNCH

Question. On May 2, 2005, Boeing and Lockheed Martin announced plans to merge the production, engineering, test, and launch operations associated with providing Evolved Expendable Launch Vehicle (EELV) services to the U.S. Government. The companies believed the merger could save \$100–150 million per year for the U.S. Government while continuing to provide assured access to space.

Answer. These cost savings have not yet materialized and it appears as if the cost of an individual launch is in fact increasing.

Question. If confirmed how would you ensure that this merger does in fact result in cost savings to the U.S. Government?

Answer. It is my understanding that, per congressional direction, the OSD Cost Analysis and Program Evaluation office is conducting a validation of the savings brought about by the merger. The Air Force is supporting this effort, and is partnering with industry as the consolidation of workforce and facilities proceeds. If confirmed, I would plan to become more familiar with these efforts to evaluate the actual cost savings and other benefits of the merger.

Question. Maintaining assured access to launch has been the national security goal of the Air Force. In your view is that goal achieved with the EELV vehicles or is there a need for alternative launch options?

Answer. I firmly believe in the continued national security need for assured launch access. It is my understanding that by maintaining the Atlas V and Delta IV families of launch vehicles, the EELV program achieves assured access to space as laid out in the administration's current Space Transportation Policy (NSPD-40). If confirmed and consistent with the duties assigned to me by the Secretary, I plan to develop a more informed answer to this question and to understand more fully the committee's concerns on this issue.

Question. The increasing pace of space launches has stressed the launch processing capability of the ranges. What in your view is needed to increase the launch throughput at the east and west coast ranges?

Answer. I am not yet informed enough on this specific question to give a complete answer. If confirmed and consistent with the duties assigned to me by the Secretary, I plan to develop a more informed answer to this question and to understand more fully the committee's concerns on this issue.

MILITARY SPACE ACQUISITION POLICY

Question. The present generation of military space systems are being modernized in virtually every mission area, including: (1) strategic missile warning; (2) assured communications; (3) navigation; and (4) intelligence and surveillance. At the same time, virtually every one of these modernization programs has suffered substantial problems with regard to cost, schedule, and technical performance. As a result of the budgetary pressure on future space programs, the most recent space acquisition programs, the Space Radar and Transformational Satellite programs were cancelled.

In your view what are the key execution problems that have caused the schedule delays and budgetary increases in space development programs?

Answer. Over the past decade and a half the Air Force has attempted to adapt to the changing landscape of the industrial base, the force structure, and the increasing requirement needs of the warfighter—resulting in increased complexity and the pursuit, in several cases, of not yet mature technologies. I think the Air Force needs to focus on stabilizing requirements, ensuring technical maturity, instilling fiscal discipline and on improving and increasing the acquisition workforce.

Question. If confirmed, what steps would you take to correct problems in the space acquisition process?

Answer. It is my view that the Air Force needs to focus on increasing the size and capabilities of the acquisition workforce, stabilizing requirements, and instilling fiscal discipline. If confirmed, I will work with Air Force and DOD leadership and this committee to ensure the Air Force acquisition process is held to the highest standards and executed with professionalism and integrity, and in the best interest of the taxpayer.

NEXT GENERATION MILITARY COMMUNICATIONS CAPABILITIES

Question. The demand for military communications capabilities continues to grow at a rapid pace.

With the cancellation of the Transformational Satellite Communications System (TSAT) program what are your thoughts on how the Air Force can meet the growing demand for communications and increased bandwidth requirements?

Answer. With the cancellation of the TSAT, there is a need to maintain the Advanced Extremely High Frequency for protected communications and Wideband Global Satellite Communications systems for wideband communications to ensure continuity of service to our warfighters. If confirmed and consistent with the duties assigned to me by the Secretary, I will familiarize myself more deeply with the details of these programs, looking for ways to leverage the significant technology investment with TSAT and for opportunities to field some of those capability advances into other systems.

AIRCRAFT RECAPITALIZATION

Question. If confirmed, what role would you plan in efforts to recapitalize the Air Force aircraft inventory and how would you prioritize the recapitalization effort?

Answer. If confirmed, my role in the recapitalization would be to support the ongoing efforts of the Secretary and Chief of Staff. One of the Air Force's five priorities is to "modernize our aging air and space inventories." To accomplish this effort, I would continue to focus on the Air Force's top procurement priorities included in the fiscal year 2010 presidential budget request: specifically, the KC-X tanker program, the Joint Strike Fighter (F-35), the MQ-9 Reaper, and space programs working closely with the Air Force and OSD senior leadership.

LONG-RANGE BOMBERS

Question. The B-1s, B-2s, and B-52s will begin to be retired in the 2030 time-frame.

Do you believe that the United States needs to develop a new manned bomber?

Answer. I believe that the Air Force must ensure that it can continue to provide long-range persistent strike capabilities to the President in his role as Commander in Chief. Given the anticipated life expectancy of the current force, now is an appropriate time for DOD and the Air Force to consider what options are available to continue to provide such capability. The bomber force provides a broad-based set of options across the spectrum of national security challenges: from the assurance they provide to our regional allies, to their deterrent effect on potential adversaries, through the full spectrum of conventional warfare, and as a critical component of our Nation's nuclear triad.

Question. It is my understanding that options for a future long-range persistent strike aircraft—whether manned or unmanned—are under consideration in the context of the Quadrennial Defense Review. If confirmed, I look forward to working with the senior DOD and Air Force leadership on the consideration of these options.

What role do you see for unmanned bombers?

Answer. This is a critical question confronting DOD and the Air Force. While I am familiar with some of the debate on this issue from my role to date on a congressional oversight committee, I would look forward, if confirmed, to understanding better the considerations and challenges for the Air Force, including the benefits and military utility of "the man or woman in the cockpit" for the future bomber force.

More generally, we have enjoyed great success in the current fights with unmanned aerial systems (UASs) in the mission sets of intelligence/surveillance/reconnaissance and light attack in permissive environments where we are unchallenged in the air, space, and cyber domains. If confirmed, I will continue the Air Force's development of UASs and the UAS roadmap to ensure we expand UAS mission areas commensurate with industry's ability to develop reliable, effective systems that support the needs of the combatant commanders.

Question. When, in your view, must a decision on this issue be made?

Answer. I think our first step on a decision should be made as an outcome of the ongoing Quadrennial Defense Review and Nuclear Posture Review, as Secretary Gates has stated. If confirmed, I will work closely with Secretary Donley to ensure the Air Force provides its best analysis of the current and projected state of global power capabilities and its best options to the Secretary of Defense.

PROMPT GLOBAL STRIKE

Question. What, in your view, is the definition of prompt global strike?

Answer. It is my view that Prompt Global Strike is the capability to provide rapid, precise conventional strikes for anti-access and high value targets anywhere in the world. Prompt Global Strike enables the United States to deter and/or strike global targets conventionally with timeframes reduced from days to hours.

Question. What steps do you believe are needed to achieve the goal of prompt global strike?

Answer. My current view is that there are several steps needed to achieve the goal of prompt global strike. First, we need to have a high fidelity intelligence, surveillance, and reconnaissance. Next, we must have a robust command and control network that enables rapid decisionmaking and that provides safeguards to assure other nations of our intent. Finally, we need the capability to provide rapid, precise global strike even in the absence of forward presence. If confirmed, I would look at this area in more depth to familiarize myself with the Air Force's current thinking and plans.

DUTIES AND RESPONSIBILITIES AS CHIEF MANAGEMENT OFFICER

Question. Section 904 of the NDAA for Fiscal Year 2008 designates the Under Secretary of the Air Force as the Air Force's CMO. Section 908 of the NDAA for Fiscal Year 2009 requires the CMO of each of the military departments to carry out a comprehensive business transformation initiative, with the support of a new Business Transformation Office.

What is your understanding of the duties and responsibilities of the Under Secretary as the CMO of the Department of the Air Force?

Answer. It is my understanding that the responsibilities of the CMO, consistent with section 904 of the NDAA for Fiscal Year 2008, include the following: ensuring the Air Force's capability to carry out DOD's strategic plan in support of national security objectives; ensuring the core business missions of the Department of the Air Force are optimally aligned to support the Department's warfighting mission; establishing performance goals and measures for improving and evaluating overall economy, efficiency, and effectiveness and monitoring and measuring this progress; and working with DOD's CMO to develop and maintain a strategic plan for business reform. Under section 908 of the NDAA for Fiscal Year 2009, the CMO is also responsible for carrying out an initiative for business transformation for the Air Force. If confirmed, I will ensure the core function and missions of the Air Force are optimally aligned to support the joint warfighting mission. I intend to fulfill the requirements of the law by establishing performance goals and measures for improving and evaluating the overall economy, efficiency, and effectiveness of Air Force programs.

Question. What background and expertise do you possess that you believe qualify you to perform these duties and responsibilities?

Answer. During my time as Staff Director of the House Armed Services Committee, I was involved in the hearings and deliberations that resulted in the NDAA's for Fiscal Year 2008 and Fiscal Year 2009. I believe that this background, along with my oversight of both acquisition policy and national military policy generally, will position me well to help improve Air Force business and mission transformation to support of COCOMs and joint/coalition partners. If confirmed, I would look forward to the challenge of helping the Air Force meet the intent of these important laws.

Question. Do you believe that the CMO and the Business Transformation Office have the resources and authority needed to carry out the business transformation of the Department of the Air Force?

Answer. While I have not yet had an opportunity to conduct an in-depth review of these authorities, I have favorable first impressions. If, upon further analysis, I become convinced more resources are required to affect transformation, I would work closely with the Secretary to ensure the Air Force is applying sufficient effort to this important issue.

Question. What role do you believe the CMO and the Business Transformation Office should play in the planning, development, and implementation of specific business systems by the military departments?

Answer. Consistent with the laws that established them, the CMO and the Business Transformation Office should work with the Secretary and Chief to set transformation priorities aligned to DOD and Air Force needs. They should work to ensure business systems solutions make economic sense and are feasible; build on or replace existing systems; and enforce sound execution through application of the DOD certification process, pursuant to the NDAA for Fiscal Year 2005 and amplified in the NDAA for Fiscal Year 2010, that requires all business systems over \$1 million in modernization cost be certified as meeting a mission need and supported by a business case.

Question. What changes, if any, would you recommend to the statutory provisions establishing the position of CMO and creating the Business Transformation Office?

Answer. I am not yet familiar enough with the functioning of the Air Force office to make recommendations at this time. If confirmed, I will continue to assess the requirement for additional or modified authorities and look forward to working with this committee to ensure that the objectives of the CMO, as intended by Congress, are met.

Question. Section 2222 of title 10, U.S.C., requires that the Secretary of Defense develop a comprehensive business enterprise architecture and transition plan to guide the development of its business systems and processes. The Department has chosen to implement the requirement for an enterprise architecture and transition plan through a “federated” approach in which the Business Transformation Agency has developed the top level architecture while leaving it to the military departments to fill in most of the detail. The Air Force’s business systems, like those of the other military departments, remain incapable of providing timely, reliable financial data to support management decisions. In particular, the Government Accountability Office has reported that the Air Force has not yet followed DOD’s lead in establishing new governance structures to address business transformation; has not yet developed comprehensive enterprise architecture and transition plan that plug into DOD’s federated architecture in a manner that meets statutory requirements; and instead continues to rely upon old, stovepiped structures to implement piecemeal reforms.

If confirmed, what steps, if any, would you take to ensure that the Air Force develops the business systems and processes it needs to appropriately manage funds in the best interest of the taxpayer and the national defense?

Answer. If confirmed, I will work with the Air Force comptroller to ensure that Air Force funding execution is more visible in real time to senior leaders. While I have not yet been briefed in detail on the status and challenges for Air Force systems, I would work to ensure that our systems and processes achieve the outcome of enhancing our ability to manage funds; ensure a detailed schedule is put in place and managed to achieve that outcome; and ensure audits are conducted to validate performance.

Question. Do you believe that a comprehensive, integrated, enterprise-wide architecture and transition plan is essential to the successful transformation of the Air Force’s business systems?

Answer. Yes, I do.

Question. What steps would you take, if confirmed, to ensure that the Air Force’s enterprise architecture and transition plan meet the requirements of section 2222?

Answer. If confirmed, I will engage the business transformation staff in a detailed review of how the Air Force is developing and using its business enterprise architecture to manage transformation. I would make it a priority to meet very early on with the Deputy CMO and Business Transformation staff to validate the current state of the Air Force business enterprise architecture and its alignment to the DOD architecture. I would focus our review on how the architecture is being applied within the Air Force governance process, and would direct and implement any needed improvements.

Question. What are your views on the importance and role of timely and accurate financial and business information in managing operations and holding managers accountable?

Answer. I think timely financial information is critical in managing the operations of large organizations. I understand the frustration of many at the difficulty in achieving audits of DOD financial statements and appreciate congressional efforts, through section 1003 of the NDAA for Fiscal Year 2010, to motivate the Department to move more expeditiously to producing auditable statements. If confirmed, I will be active in supporting the Secretary of the Air Force’s continued focus on financial issues within the Department.

Question. How would you address a situation in which you found that reliable, useful, and timely financial and business information was not routinely available for these purposes?

Answer. If confirmed, I would use that situation as an opportunity to improve the process of providing such financial and business information. I would make this area a priority, especially if it aligns to the major strategic mission priorities of the organization, and assign actions with accountability for corrections. Finally, I would provide active follow-up to ensure the needed results were achieved.

Question. What role do you envision playing, if confirmed, in managing or providing oversight over the improvement of the financial and business information available to Air Force managers?

Answer. If confirmed, I will focus on establishing the priorities for business performance improvements on behalf of the Secretary of the Air Force and report on progress toward achieving these goals. As the CMO, I would expect to be an active and key member of the Air Force governance process, enforcing Department priorities in decisions regarding programs, organizations and processes across the functional staff and Air Force Major Commands.

ACQUISITION ISSUES

Question. What are your views regarding the need to reform the process by which the Department of the Air Force acquires major weapons systems?

Answer. Reforming the acquisition process for major weapons systems is a critical issue for the Air Force, as well as for DOD more broadly. I am familiar with some of the past challenges in this area, as well as many of the concerns that motivated Congressional action through the Weapons System Acquisition Reform Act of 2009. My initial impression is that the Air Force has taken focused actions to reform its acquisition processes and is continuing to work to make further improvements. If confirmed, I would expect to learn more about the challenges facing Air Force acquisition and to help the leadership team take further steps to keep requirements in check and improve cost, schedule, and performance measures.

Question. What steps would you recommend to improve that process?

Answer. If confirmed, I would continue the acquisition improvements begun by the Secretary of the Air Force and the Chief of Staff in May 2009. As I understand it, these improvements seek to address the major acquisition improvement areas laid out in the Weapons Systems Acquisition Reform Act of 2009. Specifically, I believe the Air Force should continue to improve the size and training of the workforce; control requirements; create financial and budget stability in major defense programs; improving major source selection processes; and address clear lines of acquisition authority and accountability across the Air Force.

Question. If confirmed, what role do you expect to play in the major defense acquisition programs of the Department of the Air Force?

Answer. If confirmed, I will assist the Secretary of the Air Force in his goal of recapturing acquisition excellence. His initiative includes efforts to revitalize the Air Force acquisition workforce, improve the requirements generation process, instill budget and financial discipline, improve Air Force major systems source selections, and establish clear lines of authority and accountability within our acquisition organizations. I would look forward to helping the Secretary to achieve his acquisition goals in whatever capacity he believes I am best suited to serve.

Question. Department-wide, nearly half of DOD's 95 largest acquisition programs have exceeded the so-called "Nunn-McCurdy" cost growth standards established in section 2433 of title 10, U.S.C. The cost overruns on these major defense acquisition programs now total \$295 billion over the original program estimates, even though the Department has cut unit quantities and reduced performance expectations on many programs in an effort to hold costs down. Many of those programs are being executed by the Department of the Air Force.

What steps, if any and if confirmed, would you take to address the out-of-control cost growth on the Department of the Air Force's major defense acquisition programs?

Answer. I am in support of the principles that motivated the Weapons Acquisition Reform Act of 2009. I think that law lays out both the drivers of program challenges and the need to take very seriously any critical breaches of Nunn-McCurdy thresholds. As such and if confirmed, my analysis of the Air Force's acquisition programs would focus on the assumptions used in establishing program baselines. Such baselines must be based on realistic schedule and technical assumptions and accurate cost estimates. If confirmed, I will place an emphasis on realistic budgeting based on improved program cost estimates.

Question. What principles will guide your thinking on whether to recommend terminating a program that has experienced "critical" cost growth under Nunn-McCurdy?

Answer. The direction provided by Nunn-McCurdy and by the Weapon Systems Acquisition Reform Act of 2009 is essential in determining whether to terminate or continue a program that has experienced a critical cost growth. I agree with the new law that, when such breaches occur, we must understand what the root cause of that breach is. I further agree with the presumption for termination that must guide one's analysis and also the requirement that, if a program is restructured, it should be required to receive new milestone approval before proceeding. While there are programs that will be essential to national security, I believe the Department must undertake hard analysis in looking at the alternatives in such a case.

Question. Many experts have acknowledged that DOD may have gone too far in reducing its acquisition work force, resulting in undermining of its ability to provide needed oversight in the acquisition process.

Do you agree with this assessment?

Answer. Yes.

Question. If so, what steps do you believe the Department of the Air Force should take to address this problem?

Answer. If confirmed, I will continue Air Force's efforts to increase the size of and improve the training of the acquisition workforce.

Question. Section 852 of the NDAA for Fiscal Year 2008 establishes a Defense Acquisition Workforce Development Fund (DAWDF) to provide the resources needed to begin rebuilding the Department's corps of acquisition professionals.

Do you believe that a properly sized workforce of appropriately trained acquisition professionals is essential if the Air Force is going to get good value for the expenditure of public resources?

Answer. Yes.

Question. What steps do you expect to take, if confirmed, to ensure that the Air Force makes appropriate use of the funds made available pursuant to the DAWDF?

If confirmed, I will join the Service Acquisition Executives in monitoring and guiding the use of DAWDF against the Air Force plan and provide course corrections if Air Force needs dictate and as may be required by OSD direction, congressional guidance, and acquisition law.

Question. Would you agree that shortened tours as program managers can lead to difficulties in acquisition programs? If so, what steps would you propose to take, if confirmed, to provide for stability in program management?

Answer. Yes, I believe program management tenure is important to program stability. If confirmed, I will support the Air Force's commitment to add rigor in the management of tenure.

Question. Major defense acquisition programs in the Department of the Air Force and the other Military Departments continue to be subject to funding and requirements instability.

Do you believe that instability in funding and requirements drives up program costs and leads to delays in the fielding of major weapon systems?

Answer. Yes.

Question. What steps, if any, do you believe the Air Force should take to address funding and requirements instability?

Answer. Emphasis needs to be placed on realistic budgeting based on improved program cost estimates. In my view, there is a need to stabilize program funding and to improve the requirements generation process to minimize changes during the weapons system's development process. If confirmed, I look forward to understanding the Air Force's existing situation in more depth and to identifying any additional steps that should be taken.

Question. The Comptroller General has found that DOD programs often move forward with unrealistic program cost and schedule estimates, lack clearly defined and stable requirements, include immature technologies that unnecessarily raise program costs and delay development and production, and fail to solidify design and manufacturing processes at appropriate junctures in the development process.

Do you agree with the Comptroller General's assessment?

Answer. Yes.

Question. If so, what steps do you believe the Department of the Air Force should take to address these problems?

Answer. I believe the acquisition reform steps recently put in place by Congress, OSD, and the Air Force will have a beneficial impact toward improving the acquisition process. It is critical to continue the revitalization of the Air Force acquisition workforce, improve the requirements generation process, instill budget and financial discipline, improve Air Force major systems source selections, and establish clear lines of authority and accountability within acquisition organizations. The Weapon Systems Acquisition Reform Act and regulations require preliminary design review prior to engineering and manufacturing development, giving more credibility to program cost baselines.

Question. By some estimates, DOD now spends more money every year for the acquisition of services than it does for the acquisition of products, including major weapon systems. Yet, the Department places far less emphasis on staffing, training, and managing the acquisition of services than it does on the acquisition of products.

What steps, if any, do you believe the Air Force should take to improve the staffing, training, and management of its acquisition of services?

Answer. It is my understanding the Air Force has implemented a multi-functional team approach to services acquisition both pre- and post-award; engaged general of-

ficers and senior executive leaders in oversight and management in each major command across the Air Force; and developed training courses now run out of the Defense Acquisition University (DAU). If confirmed, I will seek to become more knowledgeable about ongoing Air Force initiatives.

Question. Do you agree that the Air Force should develop processes and systems to provide managers with access to information needed to conduct comprehensive spending analyses of services contracts on an ongoing basis?

Answer. I agree the Air Force needs such processes and systems and that they should be consistent with Defense Department expectations. As of yet, there is not a single system across DOD that has this capability. Having clear OSD expectations would be critical in the development of such a system. In the interim, it is my understanding that the Air Force is using existing data systems such as Federal Procurement Data System-Next Generation and Contract Business Information System. If confirmed, I will work with DOD to encourage development of consistent expectations across DOD.

Question. Recent congressional and DOD initiatives have attempted to reduce technical and performance risks associated with developing and producing major defense acquisition programs, including ships, so as to minimize the need for cost-reimbursable contracts.

Do you think that the Air Force should move towards more fixed price-type contracting in developing or procuring major defense acquisition programs? Why or why not?

Answer. I believe that fixed price-type contracting should be used to the greatest degree appropriate. However, each contract has to be evaluated on a case by case basis to determine the appropriateness of this contract type. Its use would be appropriate when technologies are mature enough to enable accurate cost and schedule estimates by the industry offerors competing for a contract. The use of a fixed-price type contract, where appropriate, permits an equitable and sensible allocation of program risk between the Government and the contractor. I will certainly keep this consideration in mind, if confirmed, in considering options for future contracts. This recent focus on increased use of fixed price and fixed price incentive contract types is consistent with recent USD(AT&L) emphasis in this area.

Question. Section 811 of the NDAA for Fiscal Year 2008 amended section 2306b of title 10, U.S.C. to ensure that DOD enters multiyear contracts only in cases where stable design and stable requirements reduce risk, and only in cases where substantial savings are expected. The statement of managers accompanying the conference report addressed the requirements for buying major defense systems under multiyear contracts as follows: "The conferees agree that 'substantial savings' under section 2306b(a)(1) of title 10, U.S.C., means savings that exceed 10 percent of the total costs of carrying out the program through annual contracts, except that multiyear contracts for major systems providing savings estimated at less than 10 percent should only be considered if the Department presents an exceptionally strong case that the proposal meets the other requirements of section 2306b(a), as amended. The conferees agree with a Government Accountability Office finding that any major system that is at the end of its production line is unlikely to meet these standards and therefore would be a poor candidate for a multiyear procurement contract."

Answer. If confirmed, will you ensure that the Air Force fully complies with the requirements of section 2306b of title 10, U.S.C., as amended by section 811 of the NDAA for Fiscal Year 2008 (Public Law 110-181) with respect to programs that are forwarded for authorization under a multiyear procurement contract?

Answer. Yes.

Question. If confirmed, under what circumstances, if any, do you anticipate that you would support a multiyear contract with expected savings of less than 10 percent?

Answer. In my opinion, 10 percent savings is a reasonable target for the "substantial savings" threshold. Based on what I know at this point, there is no specific Air Force program that I am aware of that would justify a multiyear contract with projected savings of less than 10 percent. Approval of multiyear procurement authority has historically depended on the ability to obtain significant savings, a sufficiently stable weapon system design, an adequately validated requirement, and a commitment to stable funding over the life of the contract.

Question. If confirmed, under what circumstances, if any, would you support a multiyear contract for a major system at the end of its production line?

Answer. I am aware of the statement of manager's language that accompanied section 811 in the NDAA for Fiscal Year 2008. This language endorsed the finding of the Government Accountability Office "that any major system that is at the end of its production line is unlikely to meet these standards and therefore would be

a poor candidate for a multiyear procurement contract.” I agree with this conclusion. There are no specific circumstances I can imagine at this point that would argue for an exception to this general argument against the use of a multiyear contract at the end of a production line.

Question. What is your understanding of the new requirements regarding the timing of any Air Force request for legislative authorization of a multiyear procurement contract for a particular program?

Answer. My understanding is that by no later than 1 March of the year in which the Secretary requests legislative authority to enter into a multiyear contract for a particular program, the Secretary must determine that each of the requirements laid out in section 811 of the NDAA for Fiscal Year 2008 have been met by the contract and provide the basis for such determination to the congressional defense committees.

AIR FORCE SCIENCE AND TECHNOLOGY

Question. What do you see as the role that Air Force science and technology programs will play in continuing to develop capabilities for current and future Air Force systems?

Answer. If confirmed, this is an area on which I would need to increase my familiarity, but I see the goal of Air Force science and technology programs continuing to be support of the warfighter with superior systems. I would expect the Air Force Science and Technology program to continue to focus on the Air Force strategic priorities—winning today’s fight, modernizing our air and space inventories, and recapturing acquisition excellence.

Question. What in your view have been the greatest contributions of Air Force science and technology programs to current operations?

Answer. One of the enduring strengths of the Air Force has been the continual stream of advanced technologies and capabilities that have flowed out of the laboratory and gone into the development centers and Programs of Record with eventual transition to the warfighter. For example, the contributions of the Global Positioning System, smart weapons, and new technologies to help identify battlefield targets have had a profound impact on current operations.

Question. What metrics would you use, if confirmed, to judge the value and the investment level in Air Force science and technology programs?

Answer. Based on my current knowledge and without a deep understanding of the Air Force’s efforts in this area, I believe the ultimate metric is to assess what has been transitioned into operational use. If confirmed, I will be guided by Air Force strategic priorities—to win today’s fight, modernize our air and space inventories, and recapture acquisition excellence, and specifically, the goal to bolster intelligence, surveillance and reconnaissance, cyber and advanced conventional weapons support to the joint warfighter.

AIR FORCE LABORATORIES AND RESEARCH, DEVELOPMENT AND ENGINEERING CENTERS

Question. What role should Air Force laboratories play in supporting current operations and in developing new capabilities to support Air Force missions?

It is my view that the Air Force science and technology program—including the labs—should continue to develop and transition innovative and relevant technologies; build and nurture a technically skilled, highly educated and adaptive workforce able to provide effective solutions for today’s issues; and conduct innovative research to maintain our technological edge over potential adversaries.

If confirmed, how will you ensure that the Air Force laboratories and research and development centers have the highest quality workforce, laboratory infrastructure, resources, and management, so that they can continue to support deployed warfighters and develop next generation capabilities?

Answer. If confirmed, I will spend time educating myself on the details of the Air Force’s current initiatives in this area. The quality of the workforce is a critical consideration. In that regard, I would expect to work closely with the Air Force leadership to ensure the service is taking full advantage of the expedited hiring authorities to rebuild the workforce with the highest quality talent available and appropriately using all authorities for training these individuals. I will rely on and support the senior leadership of the acquisition community to assess and invest in infrastructure, including workforce, research facilities and funds necessary to support the future technology needs of the Air Force. It is my understanding that the results of the assessment of laboratory health and infrastructure required by the NDAA for Fiscal Year 2010 will form the basis for decisions on required infrastructure investments.

Question. Do you support the full utilization of authorities established by Congress under the Laboratory Personnel Demonstration program that is currently being run in many Air Force Research, Development, and Engineering Centers (RDECs)?

Answer. I fully support the intent behind the Lab Demo program—to improve recruitment and retention of high-quality employees and to shape the laboratory work force into a more flexible structure that can effectively respond to rapid changes in the technology market place. If confirmed, I will work with the laboratory leadership to monitor the Lab Demo program to ensure it remains effective for its primary purpose and propose changes to the program as they become required.

Question. Do you believe that all RDECs in the Air Force's Research, Development, and Engineering Command (RDECOM) need enhanced personnel authorities in order to attract and retain the finest technical workforce? Would you support expansion of the Laboratory Personnel Demonstration authorities to all of RDECOM's laboratories and engineering centers?

Answer. Yes, I believe the Lab Demo project has helped the Air Force recruiting and retention of highly qualified scientists and engineers. I don't yet have sufficient knowledge of the implications of expanding the program, but if confirmed, I look forward to being briefed in greater detail on potential expansion.

Do you believe that the Air Force's laboratories and engineering centers should have a separate, dynamic personnel system, uniquely tailored to support laboratory directors' requirements to attract and retain the highest quality scientific and engineering talent?

Answer. If confirmed, I look forward to learning more about and addressing this issue, looking carefully at the Air Force's experience with the Lab Demo program.

Question. How will you assess the quality of Air Force laboratory infrastructure and the adequacy of investments being made in new military construction and sustainment of that infrastructure?

Answer. I am aware that a provision in the NDAA for Fiscal Year 2010 directs the Secretary of Defense to report to Congress on the health of the Department's laboratory infrastructure. A Joint Assessment team, including representatives from the Air Force, has been formed to collect data and perform the analysis as required by the act. If confirmed, I will work closely with the leadership of the acquisition community to ensure that the Air Force Research Laboratory continues to have adequate infrastructure for meeting the Air Force technology requirements and warfighter needs.

AIR FORCE INFORMATION TECHNOLOGY PROGRAMS

Question. What major improvements would you like to see made in the Air Force's development and deployment of major information technology systems?

Answer. If confirmed, this is an area I would want to explore in greater depth. My current view, however, is that major information technology systems should be developed and deployed in conjunction with other DOD components to the maximum extent possible. A major information technology system would likely have applicability to organizations other than just the Air Force. Therefore, the Air Force should be partnering with those organizations to ensure unity of effort in development and sustainment of non stove-piped solutions.

Question. How will you encourage process and cultural change in organizations so that they maximize the benefits that new enterprise information technology systems can offer in terms of cost savings and efficiency?

Answer. Again, this is an area in which I look forward to becoming more expert, if confirmed. In order to maximize the benefits of new enterprise information technology, the Air Force should couple its existing process improvement program with IT systems that can effectively meet the requirements of those processes. I see great benefit in reducing the time airmen spend on administrative work and using that time to focus on operational requirements. If confirmed, I will strive to make that happen.

Question. What is the relationship between Air Force efforts at implementing enterprise information technology programs and supporting computing services and infrastructure to support Air Force missions and efforts being undertaken by the Defense Information Systems Agency (DISA) and the Assistant Secretary of Defense for Networks and Information Integration?

Answer. The Air Force and DISA have always had a strong relationship. It is my understanding that the Air Force has already taken steps to move computing services to the DISA Defense Enterprise Computing Centers. A pilot program is underway and the Air Force will use the results of this program to plan for the future

migration of services across the country. If confirmed, I will continue to foster that relationship.

HOUSING PRIVATIZATION

Question. DOD has been engaged in the privatization of many of its support functions. Among the most significant privatization efforts is military family housing units and utility systems.

In your view, what challenges does the Air Force face in implementing housing privatization and, if confirmed, how would you propose addressing those challenges?

Answer. I believe that such housing privatization efforts can be beneficial for the Department as they leverage private sector resources for the betterment of the force. I think it is important to ensure that any private investment is providing a quality product for our airmen and their families. I do not know of any specific challenges with Air Force housing privatization. If confirmed, I plan on learning more about the Air Force's experiences and challenges. Once I am more familiar with the specifics of the Air Force program, I look forward to working with this committee on any specific areas that raise concern. It is critical that the Air Force remains committed to providing high quality housing to airmen and their families.

Question. What adjustments, if any, would you anticipate as a result of the current lending environment?

Answer. From my limited exposure to this area, the current credit market is delaying closure of some of the Air Forces' privatization deals. If confirmed, I will work with current and future privatization project owners to evaluate what adjustments, if any, need to be made in order to ensure success of this important program.

Question. What actions would you propose, if any, to accommodate installations where there are housing shortfalls beyond the ability of the current privatization agreement?

Answer. Quality housing communities are critical to Air Force members and their families. I understand the Air Force is currently determining on-base housing requirements. If confirmed, I will work with Air Force leadership, local community leaders, and privatization partners to ensure Air Force housing privatization deals are agile enough to accommodate unforeseen housing shortfalls. I am committed to ensuring our military members and their families are provided access to safe, quality and affordable housing.

Question. What are your views regarding barracks privatization?

Answer. If confirmed, I will make access to quality housing for unaccompanied airmen a priority. I will work with the Air Force's senior military leadership to review and determine the most beneficial means to provide housing within the dormitory system, whether acquisition is pursued through traditional military construction avenues or privatization will have to be determined to meet the goals of the department as well as the expectations of our service men and women.

INVESTMENT IN INFRASTRUCTURE

Question. Witnesses appearing before the committee in recent years have testified that the Military Services under-invest in their facilities compared to private industry standards. Decades of under-investment in our installations have led to increasing backlogs of facility maintenance needs, created substandard living and working conditions, and made it harder to take advantage of new technologies that could increase productivity.

What is your assessment of Air Force infrastructure investment?

Answer. If confirmed, I will review the current and future requirements for our infrastructure, to ensure that the Air Force can support its mission requirements and the Secretary of the Air Force's priorities.

Question. If confirmed, what actions, if any, would you propose to increase resources to reduce the backlog and improve Air Force facilities?

Answer. If a thorough review of infrastructure investment indicates the Air Force is taking too much risk, then if confirmed, I will work closely with Air Force leadership to make appropriate fiscal adjustments to reduce the backlog and improve facilities.

IMPLEMENTATION OF BASE CLOSURES AND REALIGNMENTS

Question. The Defense Base Realignment and Closure (BRAC) process has resulted in the required closure or realignment of numerous major Air Force installations. The DOD installation closure process resulting from BRAC decisions has historically included close cooperation with the affected local community in order to allow these communities an active role in the reuse of property.

If confirmed, would you change any of the existing efforts to assist affected communities with economic development, revitalization, and re-use planning of property received as a result of the BRAC process?

Answer. Close cooperation between military installations is vital during the BRAC closure process. If confirmed, I will review Air Force efforts at BRAC-impacted communities to ensure the Air Force is meeting the full spirit and intent of BRAC by allowing communities an active role in determining reuse of properties.

Question. What, in your view, are the advantages or disadvantages, if any, of the use of no cost Economic Development Conveyances as a means of early property transfers under BRAC as opposed to seeking for full fair market value?

Answer. I understand the debate that exists on the use of no cost EDCs. If confirmed, I would want to understand more fully the Air Force's historical experience and their view of the specific advantages and disadvantages of economic development conveyances.

SYSTEMS AND SUPPORT FOR WOUNDED WARRIORS

Question. Air Force personnel who are wounded and injured performing duties in Operations Enduring Freedom and Iraqi Freedom deserve the highest priority from the Air Force for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from Active Duty if required, and continuing support beyond retirement or discharge.

What is your assessment of the progress made to date by the Air Force and DOD to improve the care, management, and transition of seriously ill and injured Air Force personnel and their families?

Answer. I believe that DOD and the Air Force are committed to providing our Wounded Warriors the best care possible. I have been advised that the Air Force has increased its number of Recovery Care Coordinators, and it has modified promotion, evaluation, and retention policies that previously put combat wounded airmen at a disadvantage. I believe that wounded airmen who wish to continue to serve should be given every opportunity to do so. If confirmed, I would continue the Air Force's commitment to review and assess all efforts ensuring that we are meeting the needs of our wounded airmen and their families.

Question. What are the strengths upon which continued progress should be based?

Answer. It is my understanding that the recovery care coordinator program is the key to ensuring airmen receive full-spectrum care, and I have been advised that the Air Force plans to convert contract positions to civil service to provide a more stable workforce of trained professionals providing a high level of personalized care.

Question. What are the weaknesses that need to be corrected?

Answer. It is my understanding that the Air Force wants to improve the program by earlier identification of wounded airmen's abilities and capabilities. If confirmed, I will join the Air Force's effort to evaluate the current process and do what is necessary to insert the identification of abilities and capabilities sooner in the process, to help wounded airmen make more timely career decisions.

Question. What is your assessment of the need to streamline and improve the disability evaluation system?

Answer. I support the attention that has been given to the Disability Evaluation System Pilot Program by DOD and Department of Veteran Affairs at 27 military installations across the United States. This is an area that will continue to need attention and aggressive efforts at streamlining and improvement. If confirmed, I would look forward to working with DOD and Air Force leadership to continue such improvements.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase support for wounded Air Force personnel and their families, and to monitor their progress in returning to duty or to civilian life?

Answer. If confirmed, I will work with the Secretary of the Air Force to continue to assess the efficiency and appropriateness of the Air Force's Warrior and Survivor Care Program to ensure the Air Force meets the needs of our wounded airmen.

HOMOSEXUAL CONDUCT POLICY

Question. The current homosexual conduct policy, commonly referred to as "Don't Ask, Don't Tell," went into effect in February 1994 after months of congressional hearings and debate resulting in the enactment of a Federal statute. Although there have been some changes in how this policy has been implemented, the basic policy has not changed. President Obama has made it clear that he intends to work with the military and with Congress to repeal the policy.

What is your view on repealing or changing this policy?

Answer. The President has stated an intent to work with Congress to repeal this policy. It is my understanding that he has entered into a dialogue with the Secretary of Defense and the Chairman of the Joint Chiefs of Staff about how to best proceed in this effort. I further understand that DOD intends to follow the law in this matter as it currently exists and to follow it however it may be changed. I support the Department's commitment to the law and to working with Congress on a way forward as regards this policy.

Question. In your view, would changing this policy have an adverse impact on unit cohesion and good order and discipline in the Air Force?

Answer. I understand that the Air Force is committed to maintaining good order and discipline, and ensuring a climate of mutual respect. If confirmed, I would work to understand the view of the senior leadership of the service as to whether there would be any possible impact on unit cohesion, as well as good order and discipline.

Question. If confirmed, what role would you play in efforts to repeal or change this policy?

Answer. If confirmed, I will work closely with the Secretary of the Air Force to assess, advise and support him throughout review of the current policy.

Question. If the policy is changed by Congress, would you recommend a phase-in period for implementation of the new policy?

Answer. If confirmed, I would advise development of a thorough, complete and deliberate plan to implement any new policy, giving careful attention to the counsel of military leaders.

Question. If confirmed, what role will you play in implementing a new policy?

Answer. If confirmed, I will work closely with the Secretary of the Air Force to assess, advise and support him in the implementing any new policy.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. The Department has in recent years developed comprehensive policies and procedures to improve the prevention of and response to incidents of sexual assaults, including providing appropriate resources and care for victims of sexual assault. However, numerous incidents of sexual misconduct involving military personnel in Iraq, Kuwait, and Afghanistan are still being reported. Victims and their advocates claim that they are victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate treatment for the victim. They assert that their command fails to respond appropriately with basic medical services and with an adequate investigation of their charges followed by a failure to hold assailants accountable.

Do you consider the current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. I am advised that DOD and Air Force leadership have assertively developed and executed policies that have led to an improved environment for all airmen. I am also advised that the combined aspects of the revised sexual assault prevention and care program, including a confidential reporting process, appear to be serving Air Force personnel well. This is a critical issue. Those who serve must know that they can come forward confidentially to report a crime and that such reporting will be taken seriously. If confirmed, I will give this issue careful attention and work for constant improvement.

Question. What problems, if any, are you aware of in the manner in which this new confidential reporting procedure has been put into operation?

Answer. I am not aware of specific changes that are needed at this time. If confirmed, I will ensure I understand the current status of this effort in the Air Force and work with the Secretary on any areas identified for improvement.

Question. What is your view of the steps the Air Force has taken to prevent sexual assaults in combat zones?

Answer. I understand that the Air Force deploys a fully trained Sexual Assault Response Coordinator (SARC) to each of our Air Expeditionary Wings and intends to support an additional location. I believe it is vital to have a robust sexual assault training and awareness program in a deployed environment to ensure all personnel, regardless of military branch, know that the SARC is there to support them.

Question. What is your view of the adequacy of the training and resources the Air Force has in place to investigate and respond to allegations of sexual assault?

Answer. I have been informed that since 2006, all airmen entering basic training and all pre-commissioning programs are educated about sexual assault, their reporting options, and how to seek assistance if they have been a victim of this crime. I also understand that additional education and training courses are ready to implement across the Air Force this year to reach airmen throughout their time in the Air Force regardless of the length of their service. If confirmed, I will assess wheth-

er additional steps should be taken to support victims and hold offenders accountable.

Question. If confirmed, what actions will you take to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults?

Answer. If confirmed, I will fully support the Secretary's oversight of the Air Force's Sexual Assault Prevention and Response Program. This is a problem though that does not affect the Air Force alone. In that regard, I would greatly support sustained partnerships with DOD and Congress, and with national subject matter experts and advocacy groups to get it right. Senior leadership must send a clear message that sexual assault is a criminal action and cannot and will not be tolerated in the Air Force. All servicemembers must have confidence that senior leaders will take any accusation seriously and that any evidence of a crime will result in prosecution.

RELIGIOUS GUIDELINES

Question. What is your understanding of current policies and programs of DOD regarding religious practices in the Air Force?

Answer. It is my understanding that the Air Force actively supports free exercise of religion, mutual respect, and accommodation. If confirmed, I would continue the Air Force's commitment to upholding the free exercise of each person's religious convictions under the Constitution, and review policies as necessary to assure continued compliance with the First Amendment.

Question. Do these policies accommodate, where appropriate, religious practices that require adherents to wear particular articles of faith?

Answer. I understand that they do.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. I understand that they do.

Question. In your opinion, do existing policies and practices regarding public prayers offered by Air Force chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. I understand that they do.

AIR FORCE ACADEMY

Question. What do you consider to be the policy and procedural elements that must be in place at the Air Force Academy in order to prevent and respond appropriately to sexual assaults and sexual harassment and to ensure essential oversight?

Answer. I understand the Academy has institutionalized a comprehensive program of both prevention and response to sexual assault and sexual harassment. If confirmed, I will support vigilant oversight of this issue.

Question. What is your assessment of corrective measures taken at the Air Force Academy to ensure religious tolerance and respect, and of Air Force guidelines regarding religious tolerance that were promulgated in August of 2005?

Answer. I understand that corrective measures taken by the Air Force meet the constitutional obligations of protecting free exercise of religion rights of servicemembers with different beliefs, including no religious beliefs, and guard against governmental establishment of religion, and promote mutual respect. If confirmed, I will support vigilant oversight of this issue.

RISING COSTS OF MEDICAL CARE

Question. In testimony presented to Congress in February 2009, the Assistant Director of the Congressional Budget Office asserted that "medical funding accounts for more than one-third of the growth projected for operations and support funding between 2009 and 2026." In April 2009, Secretary Gates told an audience at Maxwell Air Force Base that the cost of "health care is eating the Department alive."

What is your assessment of the long-term impact of rising medical costs on future Air Force plans?

Answer. My view is that the rising cost of health care costs is a tremendous problem for all Services. In the Air Force over the last 5 fiscal years, medical costs have increased almost 8 percent annually. DOD and the Services must strike a balance between maintaining its compact with servicemembers and their families to provide them high-quality medical care and the costs associated with this function which is taking up an increasingly great portion of the defense budget. Congress is also a critical partner in any decisions affecting medical care for servicemembers. If con-

firmed, I would work with the Secretary of the Air Force, appropriate officials in OSD and the other Services, and Congress to further address this issue.

Question. If confirmed, what actions would you recommend to mitigate the effect of such costs on the Air Force top-line?

Answer. The challenge of military health care costs cannot be solved in one service alone. TRICARE is a Department-wide system and any efforts to deal with rising costs must be dealt with across that system. Working to increase the utilization of the direct care system should lower costs as we recapture care that is being delivered in the private sector. Leveraging strategic partnerships across all services as well as civilian trauma centers, university medical centers, and the VA can provide a broad range of clinical opportunities for our entire medical team which in turn reduces expenditures in the private sector. For that reason, if confirmed, I will look forward to working with OSD, senior leadership from the Air Force and other Services, and Congress to strike the appropriate balance for these competing priorities.

Question. What reforms in infrastructure, benefits, or benefit management, if any, do you think should be examined in order to control the costs of military health care?

Answer. Reforms in these areas, in order to be effective, would need to be addressed across DOD. Doing so would necessitate working with a range of infrastructure, healthcare, and military personnel experts from OSD, the Services, and Congress to identify effective options. If confirmed, I would look forward to being an active participant in these efforts.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel and related entitlement spending continue to soar and is becoming an ever increasing portion of the DOD and Air Force budgets.

What actions do you believe can be taken to control the rise in personnel costs and entitlement spending?

Answer. Personnel costs and entitlement spending now constitute a significant portion of DOD's budget. In the Air Force, 34 percent of the fiscal year 2010 budget supports pay and allowance for the Active Duty, Guard, Reserve, and civilian workforce. A major goal of the Air Force leadership is caring for airmen and their families. Part of that effort must be the recruitment and retention of the highest quality airmen and providing for them in their retirement. The Air Force, and the broader Department, must recognize, however, the pressure this puts on other parts of the budget. If confirmed, I will work with the rest of the Air Force leadership to continue to balance personnel costs with other high priority Air Force requirements.

Question. If confirmed, what actions will you take to avoid a requirement for massive end-of-year reprogramming to cover personnel costs?

Answer. If confirmed, I will work closely with Financial Management in DOD and Air Force to ensure budgeting is accurate. In addition, I will monitor execution, end-strength, and incentives to ensure a proper balance.

Question. What is your assessment of the Air Force's use of bonuses?

Answer. My understanding is that the Air Force has a relatively small bonus program compared to the other services; and its strategy is to surgically target bonuses towards those airmen with the skills most needed to accomplish its mission. From my knowledge to date, I believe the Air Force is using bonus programs judiciously and effectively to meet its retention goals.

Question. What is your assessment of the Air Force's use of aviation career incentive pay or assignment incentive pay for UAS operators, both those who are rated pilots and those who are not?

Answer. I have not yet had an opportunity to review the use of aviation career incentive pay for UAS operators. If confirmed, I will look into this issue.

MENTAL HEALTH ISSUES

Question. The final report of the DOD Task Force on Mental Health, issued in June 2007, found evidence that the stigma associated with mental illness represents a "critical failure" in the military, preventing individuals from seeking needed care. The report states, "Every military leader bears responsibility for addressing stigma; leaders who fail to do so reduce the effectiveness of the servicemembers they lead." In light of increasing suicide rates in each of the Services and the increase in the number of servicemembers experiencing symptoms of post-traumatic stress, it is more important than ever to ensure that servicemembers and their families have access to mental health care and that the stigma associated with seeking such care is eliminated.

In your view, what actions are necessary to alleviate this stigma?

Answer. I strongly agree with the assessment of the Task Force and believe it is incumbent on every senior leader to ensure access to mental health care and to reduce the stigma associated with utilizing such services. If confirmed, I will examine efforts currently underway to address any stigma associated with accessing mental health services and work to ensure that all servicemembers understand that seeking help for problems in any area of their lives is a sign of strength. I will also work to ensure that Air Force leaders at every level consistently re-enforce the message that seeking help is a sign of strength and is supported.

Question. What is your view of the need for revision of military policies on command notification when Air Force personnel seek mental health care?

Answer. If confirmed, I will review existing policies in this area and make any recommendations necessary to ensure that these policies strike the proper balance between providing privacy for those seeking mental health care and the needs of the Air Force to maintain the ability to safely conduct the mission.

Question. If confirmed, what actions will you take to ensure that sufficient mental health resources are available to servicemembers in theater, and to Air Force personnel and their families upon return to home station?

Answer. It is my understanding that 45 Air Force mental health professionals are deployed in support of the joint warfighting effort. I support Air Force efforts to provide mental health services to those in combat. If confirmed, I would like to understand the additional needs that exist both for the joint deployed force and for Air Force personnel and their families once they return to home station and would plan to review the effectiveness of recruitment and retention efforts currently in place.

MEDICAL PERSONNEL RECRUITING AND RETENTION

Question. DOD and the Air Force continue to face significant shortages in critically needed military medical personnel in both the Active and Reserve components. The committee is concerned that growing medical support requirements will compound the already serious challenges faced in recruitment and retention of military medical, dental, nurse, and behavioral health personnel.

If confirmed, will you undertake a comprehensive review of the medical support requirements for the Air Force and the sufficiency of the plans to meet recruiting and retention goals in these specialties?

Answer. Yes. If confirmed, I will partner with The Surgeon General, Air Force A1, and Air Force Recruiting Service for this comprehensive review.

Question. What legislative and policy initiatives, including bonuses and special pays, do you think may be necessary to ensure that the Air Force can continue to meet medical support requirements?

Answer. Bonuses and special pays are important tools that help the Air Force retain quality medical service personnel. I am not aware of any new requirements for legislative or policy initiatives in this area. If confirmed, I will review the Air Force's programs for recruiting and retaining military and civilian medical personnel in order to identify areas that may benefit from new policy or legislative initiatives.

MILITARY QUALITY OF LIFE

Question. In January 2009, the Department published its second Quadrennial Quality of Life Review, which focused on the importance of key quality of life factors for military families, such as family support, child care, education, health care, and morale, welfare, and recreation services.

How do you perceive the relationship between quality of life improvements and your own top priorities for Air Force recruiting and retention?

Answer. I believe there is a direct relationship between Quality of Life programs and success in the recruiting and retention of airmen. Quality of Life programs are the cornerstone of regenerating, sustaining, and retaining the military's most important asset—its people. Our airmen are only as strong as the network of family and friends around them and it is crucial that we take care of families so our airmen can focus on the mission.

Question. If confirmed, what further enhancements to Air Force quality of life programs would you make a priority, and how do you envision working with the Department, combatant commanders, family advocacy groups, and Congress to achieve them?

Answer. If confirmed, I will support policies and programs that enable the Air Force to achieve and sustain a "Ready Air Force Family." I will support the Secretary of the Air Force's efforts to work closely with DOD and Service counterparts, combatant commands, and Congress to identify, resource, and execute the programs

that will most effectively provide our military members and their families a quality of life that will sustain them and retain this most important national resource.

FAMILY SUPPORT

Question. Military members and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of growing concerns among military families as a result of the stress of frequent deployments and the long separations that go with them.

What do you consider to be the most important family readiness issues for Air Force personnel and their families, and, if confirmed, how would you ensure that family readiness needs are addressed and adequately resourced?

Answer. Military families deserve our continued support. Important issues center on available and adequate child care, spouse employment, quality education for children, family separation during deployments and subsequent reintegration, and financial readiness.

Question. If confirmed, I will work closely with DOD and Air Force leadership to gain a more comprehensive understanding of the issues facing Air Force families, including approaches to resourcing existing programs. Based on that, I hope to make a more informed judgment on the adequacy of funding for these important programs.

How would you address these family readiness needs in light of global rebasing, BRAC, deployments, and growth in end strength?

Answer. I believe that each of the factors mentioned in the question above increases the demand for family support services. If confirmed, I look forward to gaining a broader understanding of the specific impact of these issues and will foster an environment of support for all airmen and their families regardless of where they reside.

Question. If confirmed, how would you ensure support to Reserve component families related to mobilization, deployment and family readiness, as well as to Active Duty families who do not reside near a military installation?

Answer. The Reserve component is a critical part of the Air Force's Total Force approach and these families are equally deserving of support. There are additional challenges in providing effective support to Reserve families who may not live in close proximity to a base or to other military families. If confirmed, I will need to gain a broader understanding of these issues and the range of possible options for addressing them. My intent would be to foster an environment of support for all airmen and their families regardless of where they reside.

Question. If confirmed, what additional steps will you take to enhance family support?

Answer. In my capacity as staff director for the House Armed Services Committee, I have general knowledge of family support issues from multi-Service perspective. If confirmed, I will work closely with the Air Force leadership to explore and understand Air Force family support programs in more detail.

ACCESS TO HEALTH CARE

Question. As evidenced in a family support hearing held by the Subcommittee on Personnel earlier this year, one of the major concerns for military family members is access to health care. Military spouses tell us that the health care system is overwhelmed, and those stationed in more remote areas may not have access to adequate care.

If confirmed, what steps would you take to ensure complete access to health care for the families of servicemembers?

Answer. I concur with the subcommittee that this is a critical issue; adequate high-quality health care should be what military families can expect. If confirmed, I look forward to understanding more fully the challenges faced specifically by the Air Force and to identify options for addressing these challenges, particularly to ensuring that the Air Force medical service has the appropriate manpower at each installation to execute the Family Health Initiative.

MORALE, WELFARE, AND RECREATION

Question. Morale, Welfare, and Recreation (MWR) programs are critical to enhancement of military life for members and their families, especially in light of frequent and lengthy deployments. These programs must be relevant and attractive to all eligible users, including Active Duty and Reserve personnel members and families assigned overseas, and personnel deployed in support of military training and operations.

What challenges do you foresee in sustaining MWR programs, and, if confirmed, what improvements would you seek to achieve?

Answer. The challenge continues to be maintaining the delicate balance of funding warfighting needs and family member support programs. MWR programs are needed to regenerate airmen and provide comfort for their families so human performance is optimized. If confirmed, I will continue to emphasize the importance of these programs to support the well-being of all our airmen.

BALANCE BETWEEN CIVILIAN EMPLOYEES AND CONTRACTOR EMPLOYEES

Question. In recent years, the Air Force and DOD have become increasingly reliant on services provided by contractors. Over the past 8 years, DOD's civilian workforce has remained essentially unchanged in size. Over the same period, the Department's spending on contract services has more than doubled, with the estimated number of contractor employees working for the Department increasing from an estimated 730,000 in fiscal year 2000 to an estimated 1,550,000 in fiscal year 2007. As a result of the explosive growth in service contracts, contractors now play an integral role in the performance of functions that were once performed exclusively by government employees, including the management and oversight of weapons programs, the development of policies, the development of public relations strategies, and even the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as Federal employees.

Do you believe that the current balance between civilian employees and contractor employees is in the best interests of the Air Force and DOD?

Answer. I agree with President Obama's government contracting memorandum of March 4, 2009, directing the executive departments and agencies to ensure that contracts are not wasteful or inefficient, that contracts are designed to meet Federal Government needs, and that inherently governmental functions are not outsourced. Congress through recent NDAs has taken productive efforts to emphasize the importance of not outsourcing inherently governmental activities and to grow the acquisition workforce. If confirmed, I would work with the Secretary of the Air Force and leaders across the Air Force to assess this matter so as to ensure compliance with the law and with the President's policy.

Question. In your view, has the Air Force become too reliant on contractors to perform its basic functions?

Answer. I believe DOD generally has become too reliant on contractors to perform basic functions. While I am not specifically familiar yet with the Air Force's contracting approach, I continue to believe that inherently governmental functions should not be outsourced, consistent with President Obama's government contracting memorandum of March 4, 2009. If confirmed, I would work with the Secretary of the Air Force and leaders across the Air Force to assess this matter so as to ensure compliance with the law and with the President's policy.

Question. Do you believe that the current extensive use of personal services contracts is in the best interest of the Air Force?

Answer. The Federal Acquisition Regulation restricts the use of personal services contracts. If confirmed, I would work with the Secretary of the Air Force and leaders across the Air Force to ensure compliance with applicable law and policy.

Question. Do you believe that the Air Force and DOD should undertake a comprehensive reappraisal of "inherently governmental functions" and other critical government functions, and how they are performed?

Answer. I fully support the principles and policies set forth in President Obama's memorandum of March 4, 2009. That memorandum directs the Office of Management and Budget, in coordination with the Secretary of Defense, among others, to develop and issue "government-wide guidance to assist branch agencies in reviewing, and creating processes for ongoing review of, existing contracts in order to identify contracts that are wasteful, inefficient, or not otherwise likely to meet the agency's needs and to formulate appropriate corrective action in a timely manner." I believe that any such review must include a review of inherently governmental functions and other critical government functions and how they are performed. If confirmed, I will support any such review and corrective action, particularly as it relates to matters under the purview of the Under Secretary of the Air Force.

Question. If confirmed, will you work with other appropriate officials in DOD to address these issues?

Answer. If confirmed, I will work collaboratively with appropriate Air Force and DOD officials to ensure these matters are addressed in the best interest of the Air Force and DOD.

CIVILIAN PERSONNEL SYSTEMS

Question. Section 1113 of the NDAA for Fiscal Year 2010 repealed the statutory authority for the National Security Personnel System (NSPS), and required that all NSPS employees be converted to other personnel systems by no later than January 1, 2012.

Answer. If confirmed, will you ensure that Air Force NSPS employees are converted to other personnel systems as quickly as practicable, and with as little disruption to their organizations and their work as possible?

Answer. Yes.

Question. Section 1113 also provides DOD with extensive personnel flexibilities for its civilian employees that are not available to other agencies. In particular, section 9902(a) of title 5, U.S.C., as added by section 1113, directs the Department to establish a new performance management system for all of its employees. Section 9902(b) directs the Department to develop a streamlined new hiring system that is designed to better fulfill DOD's mission needs, produce high-quality applicants, and support timely personnel decisions.

Do you agree that the Air Force's civilian employee workforce plays a vital role in the functioning of the Department?

Answer. Yes.

Question. What is your view of the personnel flexibilities provided by section 1113?

Answer. I understand that the Air Force is already an active participant in DOD and government-wide teams looking into options for a possible new civilian hiring system and performance management system. In the interim, I believe that the flexibilities granted by Congress can help ensure that the Department is able to hire high quality applicants during this period of transition. If confirmed, I will do everything I can to ensure and facilitate Air Force's continued participation in these important projects and to execute the changes in law as intended by Congress.

Question. If confirmed, will you make it a priority to implement these flexibilities in a manner that best meets the needs of the Air Force and promotes the quality of the Air Force's civilian workforce?

Answer. Yes.

DEFENSE INTEGRATED MILITARY HUMAN RESOURCES SYSTEM

Question. The Department and the Services continue to work toward adoption of the Defense Integrated Military Human Resources System (DIMHRS) as a cross-Service, fully integrated personnel and pay system. Under the proposed timeline, the Army is the first in line to launch DIMHRS, with the Air Force, Navy, and Marine Corps to follow. Recent reports indicate technical difficulties have postponed the Army's launch date.

What is your assessment of the need for an integrated, cross-Service personnel and pay system?

Answer. The integration of both personnel and pay into one common system will provide several key benefits for both the Air Force and for DOD. Some of these benefits are; the retirement of outdated legacy systems (reducing maintenance costs), the reduction of payroll errors, the ability to leverage the latest in industry technology, and the improved delivery of human resource information to our airmen.

Question. What is the status of the implementation of DIMHRS in the Air Force?

Answer. It is my understanding that per USD (AT&L) direction, the Air Force is evaluating the DIMHRS product as built to date to assess how best to use the DIMHRS solution to the maximum extent possible. If confirmed, I intend to look into the issue and to become more familiar with the status of DIMHRS implementation in the Air Force.

Question. If confirmed, what changes, if any, would you recommend to the implementation schedule and process currently in place for the Air Force?

Answer. If confirmed, I would ensure the Air Force progresses in a measured approach to the program, considering lessons learned throughout each phase of the build-out increments to ensure DIMHRS is leveraged to the maximum extent possible. As I learn more about Air Force implementation, I would assess any changes that might be needed.

Question. If confirmed, what role do you plan to play in oversight over and direction of Air Force efforts to develop and deploy DIMHRS?

Answer. If confirmed, my duties as the CMO for the Air Force would be to work closely with the Air Force acquisition and functional communities. I would ensure appropriate metrics for effective management are applied, and would strive to identify efficiencies via business process reengineering, policy changes and reducing customization of commercial technology.

GI BILL BENEFITS

Question. Last year, Congress passed the post-September 11 Veterans Educational Assistance Act that created enhanced educational benefits for servicemembers who have served at least 90 days on Active Duty since September 11. The maximum benefit would roughly cover the cost of a college education at any public university in the country.

What is your assessment of the effect of the post-September 11 Veterans Educational Assistance Act on recruiting and retention of servicemembers for service in the Air Force?

Answer. In my current capacity as Staff Director, I have heard from a broad variety of servicemembers how much they value and appreciate the new GI Bill. Traditionally, educational benefits have been a strong consideration for members who want to enter Military Service; as well as, an incentive for members to continue serving to maximize educational opportunities. I believe that these new educational benefits will have a positive impact on recruitment and retention. If confirmed, I will ensure that there is a process to assess the impact of this important new benefit on Air Force recruiting and retention.

Question. What is your view of the effectiveness of the transferability provisions contained in the act on retention of mid- and late-career servicemembers?

Answer. I am aware that the transferability provisions were highly sought by many servicemembers and their families. My initial assessment, from my current position, is that these provisions are having a beneficial effect. But if confirmed, I would familiarize myself with the relevant data and monitor the impact of the provision on retention of mid- and late-career servicemembers.

QUADRENNIAL REVIEW OF MILITARY COMPENSATION

Question. Last year, the Department released the 10th Quadrennial Review of Military Compensation (QRMC). Among other recommendations, the QRMC proposes a new defined benefit retirement plan that more resembles the benefits available under the Federal Employee Retirement System than the current military retirement benefit; increasing TRICARE fees for retirees; and the adoption of dependent care and flexible spending accounts for servicemembers.

What is your assessment of the QRMC recommendations, particularly the proposed new defined retirement plan?

Answer. I believe that any reduction in pay, allowances or benefits could have an adverse effect on morale and retention. But any new proposal should be carefully considered to understand the direct and second-order implications. If confirmed, I will ensure that any new proposal is reviewed to understand the consequences of implementation and assess whether support is in the best interest of military personnel.

Question. Do you believe that servicemembers should have access to flexible spending arrangements?

Answer. Flexible spending accounts can provide employees with options and should be given consideration. If confirmed, I would ensure that full and fair consideration is given to any program that offers advantages to personnel, particularly if there is no adverse budgetary impact.

LEGISLATIVE FELLOWSHIP PROGRAM

Question. Each year, the Services assign mid-career officers to the offices of Members of Congress under the Legislative Fellows Program. Upon completion of their legislative fellowships, officers are supposed to be assigned to follow-on positions in their services in which they effectively use the experience and knowledge they gained during their fellowships.

What is your assessment of the value of the Legislative Fellows program to the Air Force and to the career development of the officers involved?

Answer. I am a strong supporter of the Legislative Fellows program from my experience with the House Armed Services Committee. The Legislative Fellows program can provide mid-career officers with an invaluable experience as it exposes top tier officers, on track to be future Air Force senior leaders, to the inner workings of the legislative process as it relates to DOD issues. Additionally, the relationships they form with civilian leaders and their staffs in Congress can benefit the officer, especially as he or she progresses into senior officer ranks.

Question. What is your assessment of the Air Force's utilization of officers who have served as legislative fellows?

Answer. My understanding is that the Air Force been successful in properly utilizing fellows after they complete the program. Every effort is made to assign them

to follow on positions which utilize their legislative experience. If confirmed, I would look more carefully at the utilization of prior legislative fellows.

MANAGEMENT AND DEVELOPMENT OF THE SENIOR EXECUTIVE SERVICE

Question. The transformation of the Armed Forces has brought with it an increasing realization of the importance of efficient and forward thinking management of senior executives.

What is your vision for the management and development of the Air Force senior executive workforce, especially in the critically important areas of acquisition, financial management, and the scientific and technical fields?

Answer. I believe that the Senior Executive Service is crucial to providing the consistent leadership and continuity of excellence in these critical career fields. It is my understanding that the Air Force has implemented a rigorous corporate approach to overall management of the senior executive corps, which facilitates recruitment, development, compensation, and succession planning for senior civilian leaders. If confirmed, I will continue to support this approach.

Question. Over the last 10 years, the Air Force budget has almost doubled, but the number of senior executives in the Department of the Air Force has remained almost unchanged.

Do you believe that the Air Force has the number of senior executives it needs, with the proper skills to manage the Department into the future?

Answer. I have not yet had the opportunity to review the number of Air Force senior executives and their associated skill sets. If confirmed, I will look into the issue.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Under Secretary of the Air Force?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR MARK BEGICH

HEALTHCARE FOR MILITARY IN ALASKA

1. Senator BEGICH. Ms. Conaton, Active Duty military, their families, and retirees face many challenges accessing health care in Alaska. The military treatment facilities at Forts Wainwright and Elmendorf are top quality and provide many services to military members and their families. However, many specialties are either not available at the military treatment facilities or at capacity, and cannot accommodate all customers. Many civilian specialists in Alaska do not participate in the TRICARE network. As a result, certain health care needs of military members and their families in Alaska are not being met. If confirmed, what steps would you take to improve access to healthcare in Alaska?

Ms. CONATON. If confirmed, I look forward to working with the other Services, the Coast Guard, the Health Affairs office in the Office of the Secretary of Defense, and Congress to explore ways to increase healthcare access in Alaska. I would also seek Air Force discussions with the TRICARE Management Agency, the Department of Veterans Affairs, and Indian Health Service to identify potential options for improv-

ing the health care not only for TRICARE beneficiaries, but for other Federal beneficiaries and residents of the State of Alaska.

2. Senator BEGICH. Ms. Conaton, if confirmed, please describe how you would work with TRICARE Management Agency (TMA) as they work to increase the TRICARE network in Alaska to provide for better access to health care for our servicemembers and their families.

Ms. CONATON. It is my understanding that the Air Force, other Services, and Coast Guard are already engaged with the TMA to increase access for our TRICARE beneficiaries in Alaska. If confirmed, I look forward to familiarizing myself on this issue and learning more about the Air Force plans and progress.

QUESTIONS SUBMITTED BY SENATOR ROLAND W. BURRIS

COST ASSESSMENT AND PROGRAM EVALUATION

3. Senator BURRIS. Ms. Conaton, if confirmed, how do you plan to work with the new Director of Cost Assessment and Program Evaluation (CAPE) position that has been created this past year to advise the Secretary of Defense on program cost efficiency?

Ms. CONATON. Based on my involvement in the passage of the Weapon Systems Acquisition Reform Act (WSARA) of 2009 from my current position with the House Armed Services Committee, I believe strongly in the benefits of the new Director of CAPE. This position should help greatly in improving the cost effectiveness and accountability of Department of Defense (DOD) programs. If confirmed, I would fully support the CAPE Director to help ensure that the Air Force incorporates accurate and precise cost estimates into program cost, technical, and schedule baselines early in the life of a program. These measures are critical to acquisition program success and increased congressional and public confidence in Air Force programs. I would strive to work effectively with the CAPE Director to meet the new direction set forth in the WSARA, aggressively utilize resources available through the Workforce Development Fund, and support and execute the Secretary of the Air Force's acquisition improvement plan.

UNMANNED SYSTEMS

4. Senator BURRIS. Ms. Conaton, what priority will you be placing on U.S. advancement of unmanned drones and their use in surveillance missions?

Ms. CONATON. If confirmed, the advancement of unmanned aerial systems (UASs) and their use in intelligence, surveillance, and reconnaissance missions will be a high priority for me. General Schwartz has previously said that UASs are a game-changing capability. The effects they provide have emerged as one of the most in-demand assets the Air Force provides the Joint Force. If confirmed, I look forward to working with Secretary Donley and General Schwartz to fully understand their perspective on these issues and further expand this capability.

5. Senator BURRIS. Ms. Conaton, do you believe that unmanned aircraft pilots should also be trained to fly manned aircraft as well?

Ms. CONATON. It is my understanding that the Air Force has developed a new model to train pilots of unmanned aerial systems in a way that does not require them to fly a manned airframe beyond their Initial Flight Training (IFT). Given the significant and rapidly increasing demand for UAS support, I think it is appropriate for the Air Force to look at nontraditional means of meeting the demand for UAS pilots. If confirmed, I look forward to gaining a greater understanding of the Air Force's plans in this regard.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

ENVIRONMENTAL IMPACT STUDIES FOR THE STATIONING OF THE F-35 LIGHTNING

6. Senator MCCAIN. Ms. Conaton, the Air Force recently announced 10 candidate bases for the stationing of the F-35 Lightning, also known as the Joint Strike Fighter. Within the next 2 months, the Air Force will start the Environmental Impact Study (EIS) required by the National Environmental Policy Act. As you may know, the Air Force has encountered problems with a similar assessment for the stationing of F-35s at Eglin Air Force Base (AFB), resulting in a delay in construction of facilities, a reduction in the number of F-35s to be stationed at Eglin AFB, and a lawsuit

by a local community. If confirmed, what actions would you propose to ensure the same issues for the Air Force do not delay the upcoming EIS?

Ms. CONATON. If confirmed, I would work to ensure the Air Force follows through on its new basing process which—as I understand it—was developed based on lessons learned from the initial, BRAC-directed, F-35 beddown. I understand this new process takes an enterprise-wide look to identify the best-suited candidate base for the mission, and should allow the Air Force to more deliberately plan for contingencies that arise from fielding complex weapon systems, such as the F-35. If confirmed, I look forward to working with all of the players involved in this decision, including this committee, to avoid future delays.

7. Senator MCCAIN. Ms. Conaton, in your opinion, is the Air Force adequately addressing the concerns over the noise associated with F-35 operations?

Ms. CONATON. As I am not yet confirmed, I have not had access to details regarding noise concerns with F-35 operations. If confirmed, I look forward to understanding this issue better and providing a more detailed response.

8. Senator MCCAIN. Ms. Conaton, what else can be done to allow communities to accurately and objectively understand the true impact F-35 operations will have with regards to noise?

Ms. CONATON. I understand the Air Force is conducting the necessary noise analysis as part of the EIS process. I believe it is important for the public to have an accurate understanding of the impact of F-35 noise. If confirmed, this is an area I would want to explore in greater depth.

9. Senator MCCAIN. Ms. Conaton, can you provide for the record an estimated timeline for the Air Force to achieve the major milestones in the EIS through the Record of Decision in order to meet the operational need dates for the F-35?

Ms. CONATON. I have not yet had the opportunity to review the Air Force timeline of the EIS for the F-35. If confirmed, I look forward to working with Secretary Donley and Congress to help ensure an appropriate basing strategy for the F-35.

UNDER SECRETARY OF THE AIR FORCE AS EXECUTIVE AGENT FOR SPACE

10. Senator MCCAIN. Ms. Conaton, in the past, the Under Secretary of the Air Force has been designated as the Air Force's executive agent for space programs. However, prior to leaving office 10 months ago, John Young, the former Under Secretary of Defense for Acquisition, Technology, and Logistics expressed doubts that the Under Secretary of the Air Force, who must balance the competing interests of all Air Force programs, is the right person for this task. What are your views on this issue?

Ms. CONATON. I understand the organization and management of space issues within the Air Force headquarters is under internal review, as well as through the Quadrennial Defense Review and Space Posture Review processes. Based on my limited knowledge, I am hopeful these reviews and studies will sufficiently inform and assist the DOD and the Air Force in developing the way ahead, to include lines of authority and organizational structures. If confirmed, I would expect to work collaboratively with leaders across the DOD on a wide range of duties and responsibilities that the Secretary of the Air Force would assign to me.

11. Senator MCCAIN. Ms. Conaton, do you think that DOD and the Air Force might be better off with a non-Service specific, joint approach, as advocated by former Under Secretary Young?

Ms. CONATON. The roles and responsibilities for the Air Force in space policy and programs are currently under review both by DOD and the Air Force. Based on that review, I expect the Secretary of Defense and the Secretary of the Air Force to make a judgment about the best organizational construct for accomplishing DOD's and the Air Force's space missions. I anticipate being an active participant in those deliberations and to serving in whatever capacity for space policy and programs that the Secretary finds most appropriate and beneficial to the Air Force. Beyond this specific area, I look forward to working as the Secretary's deputy and principal assistant across the range of his responsibilities.

ACQUISITION REFORM

12. Senator MCCAIN. Ms. Conaton, in May 2009, Air Force leadership completed an Air Force acquisition improvement plan (AIP), which laid out how the Air Force

intends to reform its procurement of major weapons systems. Among the critical areas where the Air Force found problems was “overstated and unstable requirements that are difficult to evaluate during source selection”. Do you agree with that finding?

Ms. CONATON. Yes.

13. Senator MCCAIN. Ms. Conaton, what steps do you think the Air Force should take to prevent it from happening?

Ms. CONATON. I understand the Air Force is taking corrective actions to improve how program requirements are translated into system requirements for evaluation in a source selection. The AIP requires leadership involvement early in the development of program requirements of major weapons systems, including certifying that operational requirements are feasible, i.e., technically achievable and executable within the estimated schedule and budgeted life-cycle cost. Further, I understand that the Air Force plans to use multifunctional independent review teams for all competitive acquisitions over \$50 million, to assess critical decision points within the business and contract clearance process. If confirmed, this is an area I would expect for focus on in more depth.

14. Senator MCCAIN. Ms. Conaton, do you see value in pursuing incremental acquisition strategies that deliver early, if only partial, operational capability, rather than strategies that deliver the 100 percent solution?

Ms. CONATON. Yes, I see significant value in pursuing incremental acquisition strategies to get needed capability to warfighters earlier, especially in this time of rapidly evolving technology and threats.

15. Senator MCCAIN. Ms. Conaton, how important is it to freeze program requirements at contract award and to require that any subsequent changes to “key performance parameters” be accompanied by adequate funding and schedule considerations that are reviewed (and agreed on) by the Chief of Staff prior to validation by the Joints Requirements Oversight Council (JROC)?

Ms. CONATON. Being involved from my current position in the drafting and passage of the Weapons System Acquisition Reform Act, I am convinced that getting a handle on requirements early in a program is critical. It is crucial to freeze program requirements at contract award and to require that any subsequent changes to “key performance parameters” be accompanied by funding and schedule considerations agreed on by the Chief of Staff prior to validation by the JROC. Freezing requirements helps to stabilize programs, reduce acquisition risk and improve the requirements generation process both for the Air Force and its industry partners by minimizing requirement changes during the weapons system’s development process.

16. Senator MCCAIN. Ms. Conaton, one critical area that the Air Force identified for reform in its May 2009 acquisition improvement plan was the need for clear lines of authority and accountability within the Air Force’s acquisition organizations. According to the Air Force, the hierarchical wing/group/squadron structure has diminished “functional mentoring and support,” which once provided Air Force contracting officers with the sense of authority that allowed necessary independent decisionmaking. The Air Force’s findings seem to be that, under the current organizational structure, the best and brightest of the Air Force uniformed acquisition work force aren’t being allocated to where they are most needed and the Air Force seems to be structurally limited in being able to develop new uniformed talent for that work force. Do you share those concerns? If so, how can those shortcomings be corrected within the existing organizational structure?

Ms. CONATON. I share the concerns raised by the Secretary of the Air Force and the Chief of Staff in the May 2009, Acquisition Improvement Plan. Based on my current knowledge, I concur with the Air Force realignment of the current Wing/Group/Squadron organizational structure to a Directorate/Division/Branch structure for most acquisition organizations. I understand that this realignment is manpower neutral and is designed to improve clear lines of authority and accountability within the acquisition organizations. I believe it will strengthen functional management, improving hiring, training, and development of personnel in addition to supporting the independence of the contracting function. The strength and quality of the acquisition workforce is a key issue and one that I would expect to focus on, if confirmed.

17. Senator MCCAIN. Ms. Conaton, in 2008, GAO sustained bid protests on two of the Air Force’s highest acquisition priorities—the KC-X aerial refueling tanker replacement program and the Combat Search and Rescue helicopter replacement program (CSAR-X). In its May 2009 Air Force acquisition improvement plan, Air

Force leadership agreed that those GAO decisions (and other events) required that the Air Force needed to re-examine its procedures for large system acquisition source selections. In doing so, the Air Force recognized two critical areas that needed to be addressed: “incomplete source selection training that has lacked ‘lessons learned’ from the current acquisition environment” and “the delegation of decisions on leadership and team assignments for major defense acquisition program source selections have been too low.” Do you agree with that appraisal?

Ms. CONATON. Yes, I agree with that appraisal.

18. Senator MCCAIN. Ms. Conaton, what specific step do you think should be taken to ensure that Air Force personnel have the required experience and training to conduct source selections—particularly on major weapons programs?

Ms. CONATON. I understand the Air Force is identifying acquisition professionals with recent source selection experience and using them for major weapons systems acquisitions. The recency of experience, along with the prerequisite acquisition training and certification, should provide the Air Force the necessary skill sets needed for source selections. If confirmed, I look forward to learning more in this area to further develop my initial assessment.

INTERNATIONAL TRAINING OF F-16 PILOTS BY THE AIR FORCE

19. Senator MCCAIN. Ms. Conaton, for the past 20 years, 95 percent of the international F-16 pilot training undertaken by the Air Force as part of the foreign military sales program has been conducted by the 162nd Air National Guard Fighter Wing based at Tucson Airport in Arizona, in part due to the great flying weather and access to the Barry M. Goldwater Range. There is an initiative pending within the Air Force concerning the U.S. military location to support training of international F-16 pilots from the Netherlands and Singapore. A decision to shift a part of this training to another area of the country away from adequate training ranges should be based on assessing the best value to the Government and the most effective venue for international pilot training and not on creating new missions for underutilized units or political concerns. If confirmed, can you review this initiative and report back to the committee on the factors being considered by the Air Force regarding this decision?

Ms. CONATON. I am not yet familiar with the current Air Force thinking on this training. If confirmed, I would be happy to take a closer look at this initiative and discuss what I learn with the committee.

[The nomination reference of Erin C. Conaton follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
November 10, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Erin C. Conaton of the District of Columbia, to be Under Secretary of the Air Force, vice Ronald M. Sega, resigned.

[The biographical sketch of Erin C. Conaton, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ERIN C. CONATON

EDUCATION

The Fletcher School of Law and Diplomacy, Tufts University, Aug. 1993–May 1998; received Master of Arts in Law and Diplomacy, May 1995; completed all requirements for Ph.D. other than dissertation from 1995–1998

School of Foreign Service, Georgetown University, Aug. 1988–May 1992; received Bachelor of Science in Foreign Service, May 1992

EMPLOYMENT RECORD

Staff Director, Committee on Armed Services, U.S. House of Representatives, 2007–2009

Minority Staff Director, Committee on Armed Services, U.S. House of Representatives, 2005–2007

Professional Staff Member, Committee on Armed Services, U.S. House of Representatives, 2001–2005

Research Staff Director, U.S. Commission on National Security/21st Century (Hart-Rudman Commission), 2000–2001

Research Associate, U.S. Commission on National Security/21st Century (Hart-Rudman Commission), 1998–2000

Graduate Fellow, Central Intelligence Agency, January–March 1998

Summer Associate, Overseas Private Investment Corporation, summer 1995

Summer Graduate Fellow, National Security Council, summer 1994

Director of Client Services, Yield Enhancement Strategists, Pearl River NY, 1993

Financial Analyst, Salomon Brothers Inc. New York, NY, 1992–1993

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Erin C. Conaton in connection with her nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Erin Cathleen Conaton.

2. **Position to which nominated:**

Under Secretary of the Air Force.

3. **Date of nomination:**

November 10, 2009.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

September 26, 1970; Hackensack, NJ.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Single.

7. **Names and ages of children:**

None.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

The Fletcher School of Law and Diplomacy, Tufts University, 1993–1998, received Master of Arts in Law and Diplomacy in May 1995; continued onto the Ph.D. and left completing all requirements except the doctoral dissertation.

School of Foreign Service, Georgetown University, 1988–1992, graduated with a Bachelor of Science in Foreign Service in May 1992.

Immaculate Heart Academy, Washington Township, NJ, 1984–1988; received high school diploma, 1988.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Staff Director, Committee on Armed Services, U.S. House of Representatives, Washington DC, January 2007–present.

Minority Staff Director, Committee on Armed Services, U.S. House of Representatives, Washington DC, September 2005–January 2007.

Professional Staff Member, Committee on Armed Services, U.S. House of Representatives, Washington DC, June 2001–September 2005.

Research Associate and then Research Staff Director, U.S. Commission on National Security/21st Century (Hart-Rudman Commission), September 1998–June 2001.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Graduate Fellow, Central Intelligence Agency, January–March 1998

Summer Graduate Fellow, National Security Council, summer 1994

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

N/A.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, Women in International Security

Class Agent, Fletcher School of Law and Diplomacy Class of 1995

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

N/A.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Volunteer member of defense policy team for Obama/Biden Campaign

Volunteer member of defense policy team for Kerry/Edwards Campaign

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

6/16/08 - Obama/Biden Campaign, \$500

7/27/08 - Obama/Biden Campaign, \$1,000

10/08/08 - Obama/Biden Campaign, \$800

11/03/06 - Democratic Congressional Campaign Committee, \$200

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

1998, National Finalist, White House Fellows Program

1996–1997, International Security Studies Fellowship, The Fletcher School of Law and Diplomacy, Tufts University

1993–1997, Jacob K. Javits Fellowship, U.S. Congress and U.S. Department of Education, Washington, DC

1992, Graduated magna cum laude, Phi Beta Kappa from Georgetown University as a School of Foreign Service Scholar and recipient of Dean's Citation for Service

15. Published writings: List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Conaton, Erin C. and Laurent L. Jacque. Management and Control of Foreign Exchange Risk (A Guide for Instructors). Kluwer Academic Press, 1997.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

N/A.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ERIN C. CONATON.

This 15th day of November, 2009.

[The nomination of Erin C. Conaton was reported to the Senate by Chairman Levin on December 2, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 4, 2010.]

[Prepared questions submitted to Lawrence G. Romo by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. If confirmed as the Director of Selective Service what would be your principal responsibilities and duties?

Answer. The principal responsibilities of the Director are noted in the Military Selective Service Act: to be ready to provide both trained and untrained manpower to the Armed Forces in the numbers and timeframes requested by the Department of Defense (DOD), and to be prepared to manage an Alternative Service Program for those men classified as conscientious objectors. This charter implies that Selective Service be organized, staffed, and trained to perform these tasks.

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. Actually, my entire career has taken me on a path leading to this appointment. I have an affinity for military service: beginning as an USAF Academy graduate, a serving officer in the Active and Reserve components, and am currently working for the U.S. Army as a civilian. Public service is my life’s preoccupation, both in and out of uniform. I believe that, even beyond a proven ability to build productive relationships among communities, the Texas Legislature, and the Federal Government, I was appointed to this position because of my familiarity with DOD, my demonstrated commitment to a strong national defense, and a career of public service.

RELATIONSHIPS

Question. The mission of the Selective Service System (SSS) is to provide manpower to the Armed Forces in time of national emergency and to manage an Alternative Service Program for men classified as conscientious objectors during a draft.

If confirmed, what would your relationship be to the Secretary of Defense and the Under Secretary of Defense for Personnel and Readiness?

Answer. It is clear that the chief customer of Selective Service is the Secretary of Defense. Today, Selective Service receives its guidance on the number of conscripts that may be required in a crisis, as well as the desired timeframes from the manpower planners in his Department. The Agency’s primary contact within

DOD is the Under Secretary for Personnel and Readiness. The SSS also works very closely with the Military Entrance Processing Command which also comes under his structure. As necessary, there is also direct liaison with the Office of the Secretary of Defense regarding SSS policy issues. Over many years, these relationships have worked well and I will ensure that they continue.

Question. If confirmed, what would your relationship be to the Assistant Secretaries for Manpower in the Military Services; the uniformed personnel chiefs of the Military Services; the Chief of the National Guard Bureau; the Reserve component chiefs; and the manpower officials in the Joint Staff?

Answer. As an independent civilian Agency, Selective Service's principal interface with DOD is the Under Secretary of Defense for Personnel and Readiness. Joint and Service manpower officials express their needs up their chain of command to OSD. This said, Selective Service has historically responded to the Services on Service-unique issues. For example, the SSS has been assisting individual Service recruiting efforts by including a recruiting brochure for the Active and Reserve components in our registration acknowledgment envelope mailed to more than 94,000 men each week. As Director, I will meet with the Service Secretaries as necessary. The Chief of the Bureau and the Reserve Chiefs support the Agency by placing 150 National Guard and Reserve officers in Selective Service assignments and assisting with the registration of young men.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Director of the SSS?

Answer. There are four: getting the registration message out to the public given budget limitations, maintaining the registration compliance rate above the 90 percent range, assuring the public that if a draft is reinstated it will be fair and equitable, and defending the System against challenges from those who believe that our Nation no longer needs our capability.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. To heighten awareness of the registration requirement among men 18 through 25 years old I would focus more mass mailings to targeted shortfall areas, augmented with public service advertising. This would expand the reach and frequency of the registration message. In support of this approach, I would add momentum and sustainability by encouraging more States to link driver's permits and licenses to the Federal registration requirement. Finally, I would ensure a top-to-bottom review of all mobilization programs to determine the exact costs for readiness and whether the proper level of readiness has been achieved. Selective Service needs to be as ready and capable as is necessary to fulfill its responsibilities. With the foregoing accomplished, justification for the Agency and its mission would be self-evident.

MOST SERIOUS PROBLEMS

Question. What do you consider to be the most serious problems in the performance of the functions of the SSS?

Answer. I believe they are two: eroding public awareness of the Federal registration requirement and the loss of trained personnel from the Agency. I am sensitive to the fact that the public awareness task is never completed because another 6,000+ young men turn 18 years old every day in the United States and excellent Selective Service employees are leaving for retirement or other jobs. Trained, dedicated personnel are the lifeblood of any service organization like Selective Service.

Question. What plans do you have for addressing these challenges?

Answer. One of my first actions would be to spend about 60 days assessing the structure, budget, and programs of the System. Given the sizeable Agency investment in information technology over several years, a smarter realignment of programs and people is possible. New assignments and new challenges ought to excite staff and aid retention. Resources should be available for reprogramming in sync with priorities that I will set.

MILITARY PERSONNEL AND THE SELECTIVE SERVICE SYSTEM

Question. The SSS is authorized to use military members, from both the Active and Reserve components, to accomplish its mission. Currently, about 150 members of the National Guard and Reserve fulfill their military training obligations with the SSS.

Please describe the current military manpower requirements of the SSS and any initiatives taken by DOD and each of the Services to lower the number of uniformed military personnel who support the SSS.

Answer. Over the years, OSD and the Military Services have been most cooperative in satisfying the Agency's military requirements, and working with them, Selective Service has reduced its uniformed assets. Since the mid-1990s, SSS has continuously realigned and updated those requirements. So the Agency now has assigned only 150 part-time National Guard and Reserve officers instead of 728 in 1993. Field grade officer positions were reduced by about 22 percent. Finally, SSS has eliminated all full-time military—from 19 in 1994 to 0 in 2005.

Question. To your knowledge, have there been proposals to substitute civilian positions for Active Duty or Reserve component personnel, and what are your views about such an initiative?

Answer. Yes, SSS has proposed replacing higher cost Active Duty positions with civilians. Although there has been a 100 percent reduction in Active Duty officers (19 in 1994 to 0 in 2005), there has not been a one-for-one replacement with civilians. In fact, civilian full-time staff has also gone down from 277 in 1992 to 136 in 2008. Further, the Agency has never sought replacements for its declining number of part-time Reserve component personnel. Declining military and civilian personnel has been compensated for by applying more automation, changing policies, reshaping the organization, and smart staff training. These approaches have worked and the Agency has been doing more with less, so there is no need to surge employees of any type.

Question. What are your personal views about the requirement for military personnel to operate and manage the SSS?

Answer. While there is a benefit from military representation in the Agency, and the SSS currently has this with part-time National Guard and Reserve officers, Congress created Selective Service to be the independent, civilian buffer between the end user of conscripts, DOD, and American society. This approach has been working for over 69 years. But I do not believe that it is appropriate for military personnel to occupy decision-making positions; these ought to be civilian.

COORDINATION WITH SECONDARY SCHOOLS

Question. The SSS has cultivated ties with organizations representing secondary school principals and counselors and community organizations in an effort to ensure knowledge of the requirements of law and voluntary compliance.

What Selective Service programs exist to inform and influence parents, teachers, and other organizations regarding the requirement to register with the SSS, and how widespread are these programs?

Answer. SSS is already reaching out to influencers, schools, young men themselves, and other groups. Some are national in scope, such as radio Public Service Announcements to all the major media markets, high school kits to volunteer Selective Service registrars in 18,051 schools, and awareness materials to professional associations which deal with youth: National Association of Secondary School Principals, National School Boards Association, American Association of Collegiate Registrars and Admissions Officers, and the National Association of Financial Aid Administrators. Examples of national influencer groups include: The League of United Latin American Citizens, National Urban League, Organization of Chinese Americans, and the National Congress of American Indians. Additionally, several programs focus on local or regional communities, such as YMCAs, local ethnic media, immigration services organizations, and others. These local efforts are concentrated in areas of low registration compliance. Finally Selective Service has an extensive network of 10,000 civilian Board Members who are ambassadors for our programs in virtually every county in America.

Question. What is your understanding of the level of voluntary participation by secondary schools in assisting the Selective Service in achieving compliance by male students?

Answer. The Nation's secondary schools are supportive. The Selective Service registrars in 18,051 high schools are volunteer staff or faculty members who distribute SSS awareness materials, approach young men directly to register, and send them to the library to register on the Internet at www.sss.gov. Today, SSS has 87 percent of the Nation's high schools participating with registrars.

Question. If confirmed, would you recommend imposing legal obligations on school systems that received Federal funding to assist in overcoming ignorance of the law and apathy toward compliance?

Answer. There is no doubt that a legal mandate would foster greater registrations, however, it might be perceived as the Government being too heavy handed. I believe that the programs already in place at SSS are working, and improvement will come as more and more States adopt driver's license legislation supporting the

Federal registration law. But registration awareness remains a challenge and has to be continuously evaluated. If confirmed, this will be one of my priorities.

ASSISTANCE TO MILITARY RECRUITING

Question. What programs, if any, does the SSS have in place to assist military recruiting?

Answer. The SSS is assisting military recruiting by placing information about military opportunities available in all Active and Reserve components in its registration acknowledgments. These are mailed to more than 188,000 men each month. So, DOD piggybacks on a routine SSS mailing. One very big selling point is the fact that SSS names and addresses are the most accurate to be found anywhere because they are recently submitted by the men themselves. Therefore, there is no wasted postage to contact them. DOD expressed its satisfaction by replacing its previous joint program with the SSS mailing.

Question. What are your views and recommendations about additional methods the SSS might use in assisting in recruiting efforts?

Answer. Conceptually, there should be additional ways that SSS might aid in this area if we put our heads together. However, all would involve a change in law. Some would be seen as aggressive. For example, if reenlistment rates or enlistments themselves fall in the Reserve components as a result of many protracted deployments, SSS might draft exclusively for them. A variation of this could be a National Guard and Reserve draft, in which the military person completes his basic and advanced training on Active Duty, then performs a full-time homeland security mission in the United States for a period of time, followed by a part-time assignment in a Guard or Reserve unit. The Nation is definitely not at this point currently; and I am sure DOD remains satisfied with the current arrangement only.

Question. What are your views and recommendations about initiatives DOD might implement to assist the SSS in achieving higher compliance rates?

Answer. I cannot think of anything additional that DOD might do for the SSS to achieve higher registration compliance. The Department already provides SSS its commercially-developed recruiting list and has given full-page ad space in one of its publications. Additionally, each Service ensures a new recruit is registered with Selective Service or registers him through the enlistment contract as he processes into the military. So DOD is already helping the SSS.

STATE BY STATE COMPLIANCE

Question. For years the SSS has issued "report cards" by State measuring the percentage of eligible men turning 20 who have registered in accordance with the law.

What programs and requirements used by States have proven most successful in achieving above average compliance rates?

Answer. The two most successful programs at the State level which foster registration compliance are State driver's license legislation and laws which parallel the Federal Solomon and Thurmond amendments. Driver's license legislation links a driver's permit, license, license renewal, and State ID card to registering by means of the license application or submitting one's Selective Service number. The SSS now has 37 States, 3 Territories, and the District of Columbia participating. This is a wonderful source of registrations because every young man wants a license as soon as he can get it. The other great source of registrations is State law which links a man's eligibility for State-funded higher education benefits and State jobs to the Federal registration requirement. To date, 21 States and Territories have enacted both of these laws.

Question. What recommendations, if any, do you have for legislation or for new programs at both the Federal and State level, for increasing compliance levels nationwide?

Answer. At the Federal level, I currently see no need for new or adjusted legislation. However, we hope that at the State level driver's license legislation might eventually include all 50 States and every U.S. territory.

Question. In your view, is the current budget of the SSS sufficient to prevent declines in compliance rates?

Answer. The past couple of years' worth of slippage in compliance rates is really due to changes in priorities for resources at SSS, not the lack of resources themselves. I think that SSS knows what works and what does not in registration compliance. If confirmed, I intend to do an assessment of the current needs of the SSS.

INCENTIVES TO INDIVIDUALS FOR COMPLIANCE

Question. Selective Service registration currently is a requirement for a number of opportunities, including Federal student loans, job training, employment, and U.S. citizenship.

In your view, is it appropriate to require registration with the SSS as a prerequisite for these Federal programs?

Answer. Yes. Together with Congress and most State legislatures, I believe that it is not too much to ask men seeking a government benefit or opportunity to be in compliance with the law.

Question. Are there any additional incentives that you consider appropriate to encourage more young men to register in a timely manner?

Answer. I believe that SSS has the bases covered. From its point of view, the one that needs to be expanded, the one that is the most productive source of registrations is driver's license legislation. But this is dependent upon the wishes of the 10 States that have not yet enacted such legislation.

PERFORMANCE OF THE SELECTIVE SERVICE SYSTEM

Question. Past Directors of Selective Service have indicated that the address information of Selective Service registrants is accurate because of provisions for voluntary submission of changes and through reliance on the U.S. Postal Service's National Change of Address system.

What is your estimate of the current accuracy of the address information of Selective Service registrants in the prime induction group?

Answer. It is highly accurate. Actual mailings average over a 97 percent successful contact rate.

Question. What additional steps is the SSS taking to ensure the accuracy of address information?

Answer. Use of the Postal National Change of Address System is supplemented with changes provided by the registrant himself from our acknowledgment mailing to him at his residence, through changes a registrant mails in to the SSS using a card at any Post Office, from changes he provides by telephone, and with address updates he supplies on the Internet. So our procedures are working.

MILITARY CONSCRIPTION

Question. The demands placed on our military forces over the past 8 years have led to calls by some to reinstate the draft. Legislative proposals have been introduced in the Senate and the House of Representatives that would require all young men and women in the United States to perform a period of military service or a period of civilian service in furtherance of the national defense and homeland security.

What are your views on reinstating the draft to support the current wars?

Answer. I see Selective Service as a service organization and, as such, it does not make policy; it responds to and implements policy. Policymaking is the realm of this committee and the administration. If confirmed, it would be my job to lead the Agency in conducting a timely, fair, and equitable draft if Congress and the President so direct. It would not be within my purview to determine when and if such a draft is necessary.

Question. Women now make up a significant portion of our military, and their service has been invaluable. In your opinion, should women be required to register for Selective Service?

Answer. Since the founding of the Nation, the United States has never drafted women. To do so would require presidential policy and congressional lawmaking decisions. The primary customer, DOD, has taken the position that there is no military necessity to register, let alone, draft females, especially since a general draft would be intended to replace combat casualties and women can volunteer. As a matter of longstanding law and policy, the Nation continues to exclude women from front-line, ground combat assignments. If confirmed, it would be my job to lead the Agency in conducting a timely, fair, and equitable draft if Congress and the President so direct. It would not be within my purview to determine whether registration should be expanded to include women.

Question. Are there any circumstances under which you would recommend reinstating the draft? If so, what are these circumstances?

Answer. If confirmed, it would be my job to lead the Agency in conducting a timely, fair, and equitable draft if Congress and the President so direct. It would not be within my purview to determine when and if such a draft is necessary. Historically the Nation's policymakers have considered a draft when confronted with very

serious threats from a hostile adversary or group of adversaries, or if a conflict was to be protracted over several years and volunteers were too few, or if there appeared to be no other solution to filling critical vacancies in the Armed Forces. This call belongs to others.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Absolutely. I see it as a matter of integrity and principle that the Agency Head be the facilitator between Selective Service and Congress in an ongoing dialogue. I have mentioned public awareness of the registration requirement, but the other type of awareness is Agency awareness by the oversight committees. This can only be achieved if I am responsive; if confirmed, I intend to be responsive.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Director of Selective Service?

Answer. If confirmed, I envision my job as Director to be the lead in the exchange of information between the committee and the SSS. Selective Service is a public agency doing the public's business. It can only retain its program credibility if what it does is open to public view and congressional scrutiny.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. I assure you that, if confirmed, I and Selective Service will be forthright and responsive in any communications to or from a congressional committee.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes, if confirmed I shall provide documents in a timely manner and will also consult if there is any delay or denial of documents.

[The nomination reference of Lawrence G. Romo follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
October 28, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Lawrence G. Romo, of Texas, to be Director of the Selective Service, vice William A. Chatfield, resigned.

[The biographical sketch of Lawrence G. Romo, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF LAWRENCE G. ROMO

Lawrence G. Romo, Lieutenant Colonel USAFR (Retired), is the current Soldier and Family Assistance Program Manager for the U.S. Army 5th Recruiting Brigade, responsible for the family programs of seven Recruiting Battalions in a multi-State area. As an integral part of the Team Well-Being Program, he ensures enhanced wellness of soldiers and family members. Further, he is an Admissions Liaison Officer for the U.S. Air Force Academy, having performed this function for 29 years as both an additional and primary military duty. Since 1988, Mr. Romo has served annually on various Congressional Service Academies Nomination Selection Panels.

Prior to these duties, he served in various U.S. Air Force assignments both on Active Duty and in the Reserve. He served as a USAF Academy Admissions Advisor, in various positions supporting the operation of the Minuteman Missile Weapon and

Launch System, in Training Operations, and as an Air Transportation Officer. Upon retiring from the U.S. Air Force Reserve, Mr. Romo was the USAF Academy Liaison Officer Director for South Texas.

He joined the Federal Civil Service in 1987 serving from 1987 until 1992 as an item manager for the Directorate of Special Weapons, and from 1992 through 1999, he was the Transition Assistance Program Specialist at Kelly Air Force Base.

Mr. Romo is also the Chairman of Bexar County Veterans Committee and a member of the American Legion, American GI Forum, Association of U.S. Army, and the Military Officers Association of America. Currently, he serves as Chairman of the San Antonio Commission for Children and Families for the City of San Antonio, TX. He earned his Bachelor of Science degree from the USAF Academy and a Master of Education degree from Montana State University-Northern (formerly Northern Montana College).

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Lawrence G. Romo in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Lawrence Guzman Romo, Nickname: Larry.
2. **Position to which nominated:**
Selective Service System Director.
3. **Date of nomination:**
October 28, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
July 13, 1956; San Antonio, TX.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Birgit Romo (Maiden Name: Haase).
7. **Names and ages of children:**
None.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

USAF Academy, Attendance dates: July 1974–May 1978, Bachelor of Science Degree awarded May 1978.

Northern Montana College (now called Montana State University-Northern), March 1981–May 1983, Masters of Education Degree awarded June 1983.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

09/09 to Present - Soldier Family Assistance Program Manager, 5th Recruiting Brigade, 2503 Dunstan Rd, Fort Sam Houston, TX. Administer a variety of social service type programs for U.S. Army Recruiting Command (USAREC) soldiers and family members for seven battalions in a multi-State area.

09/99 to 09/08 - Soldier Family Assistance Program Manager, HQ San Antonio Recruiting Battalion, 1265 Buck Rd, Suite SA, Fort Sam Houston, TX; Administer a variety of social service type programs for over 250 U.S. Army Recruiting Command (USAREC) soldiers and family members in south and central Texas.

05/98 to Present - USAF Admissions Liaison Officer, hours per week: 4; part-time, LTC (Ret) USAF Reserves, 2304 Cadet Road, USAF Academy, CO. Serve as a volunteer Air Force Admissions Liaison Officer working with and interviewing students parents, civic leaders in areas cities/towns, high schools and junior colleges on obtaining USAF Academy/AFROTC College scholarship opportunities information.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Commission for Children and Families, Appointed by Councilwoman Delicia Herrera July 2007 (est.)–Present

Bexar County Veterans Advisory Committee, Appointed by County Commissioner Sergio Rodriguez, Aug. 2006–Present

Served on City of San Antonio Bond Advisory Committee, Appointed by Councilwoman Delicia Herrera, Sep. 2007 (est.)

Served on City of San Antonio Police Chief Selection Advisory Committee, Appointed by Councilwoman Delicia Herrera, Feb. 2006 (est.)

Served on City of San Antonio District 6 Parks and Recreation Committee, Appointed by Councilman Enrique Barrera, Oct. 2001 (est.)

Served on Initial Base Redevelopment Committee for Reuse of Kelly AFB, 1998 (est.), appointed by Kelly AFB and San Antonio City Council

Serve as a Volunteer USAF Admissions Liaison Officer, May 2006–Present

Served as a USAF Reserves Officer, as the USAF Admissions Liaison Officer Director, Deputy Director, May 1998–Apr. 2006

Served as a USAF Reserves Officer, as an Air Transportation Officer, 433 Airlift Wing and a Additional Duty USAF Admissions Liaison Officer, Feb. 1986–Apr. 1998

Served as an Active Duty USAF Officer, as a Deputy Commander for Operations and Training, USAF Basics Military Training School, July 1984–Jan. 1986

Served as an Active Duty USAF Officer in Minuteman Missile Operations positions as a Codes Controller, Combat Crew Flight Commander, Combat Crew Commander and Combat Crew Deputy Commander, Apr. 1980–June 1984

Served as an Active Duty USAF Officer, USAF Training programs for Pilot and Minuteman Missile Operations, July 1979–Mar. 1980

Served as an Active Duty USAF Officer, as a USAF Academy Minority Affairs Admissions Advisor, June 1978–June 1979

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Wood Glen Homeowners Association

Alamo Silver Wings Airborne Association

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Chairman, City of San Antonio Commission for Children and Families, City Commission, June 2007–Present

Chairman, Bexar County Veterans Advisory Committee, County Board/Committee, June 2006–Present

Member, American Legion Post #2, Veterans Service Organization and Nonprofit, June 2001–Present

2nd Vice Commander, American Legion Post #2, Veterans Service Organization and Nonprofit, June 2007–May 2008

Commissioner, Fiesta San Antonio Commission, Event Organizing Nonprofit, 1984–2004

Member, Fiesta San Antonio Commission, Event Organizing Nonprofit, 1984–Present
 Member, Beethoven Maennerchor, Social and Nonprofit, 1998–Present
 Member, North San Antonio Hills Lions Club, Service Organization and Nonprofit, 2002–Present
 Member, Knights of Columbus, Service Organization and Nonprofit, 2004–Present
 Member, American GI Forum, Veterans Service and Nonprofit, 2001–Present
 Member, Military Office Association of America (MOAA), Veterans Service Organization and Nonprofit 2007–Present
 Member, USAF Academy Association of Graduates, University Alumni Group and Nonprofit, 1978–Present
 Member, Association of the U.S. Army, Military/Veterans Service Organization, 2007–Present
 Member, Regional Clean Air and Water, Civic, 2004–Present
 President, Wood Glen Homeowners Association, Not for Profit, 2001–Oct. 2009
 Member, Alamo Silver Wings Airborne Association, Military/Veterans Service Organization, 2004–Present.
 Member, AARP, Seniors Advocacy, 2006–Present.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

Bexar County Democratic Party Precinct Chair, May 2003 (est.)–Present
 Candidate, City Council, San Antonio District 6, May 2001 and May 2005

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Chairman, Texas Democratic Veterans, Political Caucus Group, Oct. 2005–Oct. 2009

Precinct Chairman/Advisor, Bexar County Democratic Party Central Executive Committee, Political, May 2000–Present

GLBT Allies Member, Stonewall Democrats (San Antonio), Political Party Advocacy Group, 2006 (est.)–Present

Member, Northwest Democrats (Bexar County), Political Party Advocacy Group, 2001–Present

Member, Veterans for John Kerry, Campaign Organization, 2004

Member, Mission Democrats (Bexar County), Political Party Advocacy Group, 2008–Present

Treasurer, Frances Carnot for State Representative, Campaign Organization, 2008

Member, National Veterans and Hispanic Steering Committees for Hillary Clinton, Campaign Organization, Oct. 2007–May 2008

Southwest Regional Coordinator, Veterans for Obama, Campaign Organization, June 2008–Nov. 2008

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

2007–2008 - Contributed \$561 to the Hillary Clinton for President Campaign, I estimate three separate \$100 checks during this time period with the other amounts each under \$100 for a total of \$561.

2008 - I gave the Barack Obama for President Campaign no more than \$150 total, probably less, during this time period with each amount under \$100.

2006 - Barbara Radnofsky for U.S. Senator - Estimate I gave Barbara Radnofsky for U.S. Senator Campaign one check for \$100 and a few other donations under \$100 each for a total of no more than \$250.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

April 1974 - USAF Academy Appointment/Scholarship

July 1974 - National Defense Service Medal

May 1978 - Awarded BS degree from the USAF Academy, CO

May 1978 - Air Force Training Ribbon

May 1980 - Promoted to First Lieutenant, USAF

May 1980 - Combat Readiness Medal

May 1982 - Promoted to Captain, USAF

May 1982 - Air Force Longevity Service Award Ribbon

May 1983 - Small Arms Expert Marksmanship Ribbon

June 1983 - Awarded Master Education degree from Northern Montana College, MT

May 1984 - USAF Squadron Officer School Graduate
 June 1984 - Air Force Outstanding Unit Award
 September 1984 - Awarded Air Force Commendation Medal
 January 1986 USAF Air Command and Staff College Graduate
 May 1992 - Promoted to Major, USAF Reserves
 February 1996 - Reserve Component Service Medal
 May 1998 Awarded Air Force Commendation Medal
 May 1999 Promoted to Lieutenant Colonel, USAF Reserves
 February 2002 USAF Air War College Graduate
 December 2002 (est.) - Awarded Air Force Meritorious Service Medal
 February 2004 Selected as the U.S. Army Recruiting Command Runner-up Civilian Employee of the Year for 2003

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Letter to the Editor, "Risky Bullis Business," San Antonio Express-News (July 24, 2008).

Over the past several years I also have made several blog posts on the following Web sites: www.texasdemocraticveterans.org, latinosfortexas.com, changethecaucus.org, and burntorangereport.com.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

LAWRENCE G. ROMO.

This 13th day of November, 2009.

[The nomination of Lawrence G. Romo was reported to the Senate by Chairman Levin on December 2, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on December 3, 2009]

NOMINATIONS OF DOUGLAS B. WILSON TO BE ASSISTANT SECRETARY OF DEFENSE OF PUBLIC AFFAIRS; DR. MALCOLM ROSS O'NEILL TO BE ASSISTANT SECRETARY OF THE ARMY FOR ACQUISITION, LOGISTICS, AND TECHNOLOGY; MARY SALLY MATIELLA TO BE ASSISTANT SECRETARY OF THE ARMY FOR FINANCIAL MANAGEMENT AND COMPTROLLER; PAUL LUIS OOSTBURG SANZ TO BE GENERAL COUNSEL OF THE DEPARTMENT OF THE NAVY; JACKALYNE PFANNENSTIEL TO BE ASSISTANT SECRETARY OF THE NAVY FOR INSTALLATIONS AND ENVIRONMENT; AND DR. DONALD L. COOK TO BE DEPUTY ADMINISTRATOR FOR DEFENSE PROGRAMS, NATIONAL NUCLEAR SECURITY ADMINISTRATION

THURSDAY, DECEMBER 17, 2009

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:38 a.m. in room SD-G50, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Burr, Thune, and Burr.

Also present: Senator Shaheen.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Madelyn R. Creedon, counsel; Jessica L. Kingston, research assistant; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; Roy F. Phillips, professional staff member; Arun A. Seraphin, professional staff member; Russell L. Shaffer, counsel; and William K. Sutey, professional staff member.

Minority staff members present: Daniel A. Lerner, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Kevin A. Cronin and Paul J. Hubbard.

Committee members' assistants present: Carolyn A. Chuhta, assistant to Senator Reed; Nick Ikeda, assistant to Senator Akaka; Greta Lundeberg and Yariv Pierce, assistants to Senator Bill Nelson; Patrick Hayes, assistant to Senator Bayh; Gordon I. Peterson, assistant to Senator Webb; Lindsay Kavanaugh, assistant to Senator Begich; Roosevelt Barfield, assistant to Senator Burr; Jason Van Beek, assistant to Senator Thune; Brian W. Walsh, assistant to Senator LeMieux; and Chris Joyner, assistant to Senator Burr.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody.

The committee meets today to consider the nominations of Douglas Wilson to be Assistant Secretary of Defense for Public Affairs; Malcolm Ross O'Neill to be Assistant Secretary of the Army for Acquisition, Logistics, and Technology; Mary Sally Matiella to be Assistant Secretary of the Army for Financial Management and Comptroller; Paul Luis Oostburg Sanz to be General Counsel of the Department of the Navy; Jackalyne Pfannenstiel to be Assistant Secretary of the Navy for Installations and Environment; and Donald Cook to be Deputy Administrator for Defense Programs of the National Nuclear Security Administration (NNSA).

We welcome all of our nominees and their families to today's hearing. We appreciate the sacrifices that our nominees are willing to make to serve their country, but their families also deserve our gratitude for the support that they provide, which is essential to the success of these officials.

All of today's nominees are well qualified for the positions to which they've been nominated.

Mr. Wilson has capped a distinguished career in public service by serving as Deputy Assistant Secretary of Defense for Public Affairs from 1997 to 2001. He is currently the Executive Vice President of the Howard Gilman Foundation, President of the Leaders Project, and Chairman of the Board of Directors of the Public Diplomacy Collaborative at Harvard University. Mr. Wilson's family moved from Michigan to Arizona more than 50 years ago, but enough time has passed so we can forgive that. [Laughter.]

Dr. O'Neill has served in the U.S. Army, rising to the command of the Army Laboratory Command, and has served as director of the Ballistic Missile Defense Organization. He went on to work as Vice President and Chief Technical Officer of Lockheed Martin from 2000 to 2006. He is currently the Chairman of the Board on Army Science and Technology of the National Academies.

Ms. Matiella has worked for 29 years in accounting and budget positions with the Army Air Force Defense Finance and Accounting Service in the Office of the Secretary of Defense. She has also served as Chief Financial Officer for the Forest Service, and Assistant Chief Financial Officer for accounting at the Department of Housing and Urban Development.

Ms. Pfannenstiel served as chairman of the State of California Energy Commission from 2004 until 2009. She also chaired the Governor's Climate Action Team Subgroup on Energy and Land Use, and worked on the creation of California's low carbon fuel standards.

Dr. Cook worked at Sandia National Laboratories for 28 years, rising to serve as program director for Sandia's Infrastructure Program and Security Technologies Program before leaving to become the managing director of the Atomic Weapons Establishment in the United Kingdom from 2006 to 2009. Dr. Cook is a graduate, I proudly say, of the University of Michigan.

Finally, Mr. Oostburg served as chief minority counsel for the House Committee on International Relations from 2001 to 2006, when he took his current position as general counsel of the House Armed Services Committee (HASC). We've come to know Mr. Oostburg from our conferences with the House over the last 3 years. We appreciate his work on a series of very difficult issues, including the Military Commissions Act of 2009 and the terrorism exception to the Foreign Sovereign Immunities Act.

We will miss your presence in our conferences, but at least we still have Congressman Skelton. That will make up for it. We look forward to working with you in your new capacity.

Now, if confirmed, our nominees will all play critical roles in helping to manage the Department of Defense (DOD) and the Department of Energy, at a time when we are fighting two wars and when we face a wide array of difficult acquisition, management, and financial challenges.

We look forward to the testimony of our nominees and to their speedy confirmation.

Now, before I call on our dear friend Congressman Skelton for his introduction, I'm going to ask our nominees standard questions. You can each answer, if you would, at the same time, simultaneously.

The first question. Have you adhered to applicable laws and regulations governing conflicts of interest?

[All six witnesses answered in the affirmative.]

Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

[All six witnesses answered in the negative.]

Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record in hearings?

[All six witnesses answered in the affirmative.]

Will you cooperate in providing witnesses and briefers in response to congressional requests?

[All six witnesses answered in the affirmative.]

Will those witnesses be protected from reprisal for their testimony or briefings?

[All six witnesses answered in the affirmative.]

Do you agree, if confirmed, to appear and testify, upon request, before this committee?

[All six witnesses answered in the affirmative.]

Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly-constituted committee, or to consult with the committee regarding the basis for any good-faith delay or denial in providing such documents?

[All six witnesses answered in the affirmative.]

Chairman Skelton, we're delighted, again, to see you here. I want you to know that this is the first time this committee—perhaps any committee—has met in this reconstituted room. I just hope that you will not report to the House the magnificent digs that we in the Senate now have—[Laughter.]

—because we know that there would be a claim, at our next conference, for some kind of funding for some new House committee room. So, if you could just keep this fairly to yourself, we would very much appreciate it.

We're always delighted to see you, Ike.

Chairman Skelton.

**STATEMENT OF HON. IKE SKELTON, U.S. REPRESENTATIVE
FROM THE STATE OF MISSOURI**

Mr. SKELTON. Thank you very much, Chairman Levin.

This is a bittersweet moment for me. The barbershop song, "Wedding Bells are Breaking up that Old Gang of Mine." I could rewrite that and say, "The Pentagon is breaking up that old gang of mine," because this will be the third person of the outstanding staff that we have in the HASC that will be going to work somewhere else, like the Pentagon.

Chairman LEVIN. Is there some strategic purpose here, to take over the Pentagon?

Mr. SKELTON. I didn't think you'd find out. [Laughter.]

Paul Oostburg is an outstanding lawyer. This comes from my being a country lawyer, and having grown up around lawyers, and knowing them my entire life. He is as good as they come. Undergraduate at Georgetown, Harvard Law School, a master's degree at Princeton, he's extremely well educated. I think he spent some excellent time as clerk for a Federal judge in Puerto Rico. His ability to grasp complex issues, give sound advice on a myriad number of issues—he helped rewrite the Commissions Act that we cleaned up in the Defense bill this year; he also helped with detainee policy, counternarcotics, issues relating to U.S. Southern Command, and many other issues where we needed sound legal advice.

I cannot brag on him enough. He is truly an outstanding human being, an outstanding lawyer, and he will make the Navy proud. We'll miss him. But, when you have someone that is so talented, that has the finest work ethic available, you can't help but pat him on the back and wish them well, and that's what I do.

I wholeheartedly recommend him as general counsel to the U.S. Navy. The Navy will be all the better for it.

Thank you.

[The prepared statement of Representative Skelton follows:]

PREPARED STATEMENT BY REPRESENTATIVE IKE SKELTON

Thank you, Mr. Chairman and Senator McCain.

I'm honored to speak today in support of the nomination of Paul Oostburg Sanz to be the General Counsel of the U.S. Navy. Many of you, and certainly many of your staff members, have gotten to know Paul in his current position as General Counsel of the House Armed Services Committee.

Paul Oostburg Sanz became General Counsel of the House Armed Services Committee in January 2007, just at the time I had the honor to begin serving as committee chairman. In the almost 3 years since, Paul has played a critical role in day-to-day operations of the committee and has also been a trusted advisor on the legal issues facing the Department of Defense.

It is no exaggeration to say that Paul's ability to grasp complex issues, his attention to detail, and his years of experience on Capitol Hill were instrumental in helping our committee and Congress to achieve the enactment of the last three annual National Defense Authorization Acts.

Our committee and Congress have particularly benefited from Paul's expertise on matters related to detainee policy and the Military Commissions Act, as well as issues related to counternarcotics, matters related to U.S. Southern Command, and international legal issues.

A look at Paul's resume gives you a good idea about the breadth and diversity of his experience. He earned a law degree at Harvard University Law School and earned a Master's in Public Affairs degree from Princeton University.

His international experience includes service as Peace Corps English teacher in Guinea-Bissau, and work in South Africa conducting political party training during the historic 1994 national elections. Paul also worked on conflict-resolution issues for the U.S. Embassy in Liberia, and on democracy and governance programs for the U.S. Agency for International Development Mission in Mozambique.

Before coming to Capitol Hill, Paul clerked for a U.S. District Court Judge in Puerto Rico. From May 2001 to December 2006, Paul served as the Deputy Chief Counsel for the House Committee on International Relations, providing strategic and procedural counsel to our distinguished colleague, the late Congressman Tom Lantos, who at that time was the committee's ranking member.

It is clear that Paul has the education, experience, and intellectual gifts to be an excellent General Counsel for the U.S. Navy. I also believe Paul has the temperament to serve our country exceptionally well in this position. In the time I have worked with Paul, he has approached every problem and every challenge thrown his way with a calm demeanor and rational analysis. Then he gets to work, and his hard work pays off.

Paul is such a talented and decent person that I am not surprised he has been offered a nomination to serve this administration. The prospect of Paul's departure from the Hill gives me no joy, but I am happy that his talents have been recognized and that our country will continue to benefit from his service.

I commend the Obama administration for nominating Paul Oostburg Sanz as the next General Counsel of the Navy, and I respectfully urge the Senate Armed Services Committee to recommend that the Senate confirm Paul's nomination as quickly as possible.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you so much, Chairman Skelton.

We know how much that introduction means to Mr. Oostburg, and it means a great deal to us, that you come over here again, to take your time. We know that you have a schedule to meet, and so you, of course, are free to leave at any time you so choose.

Mr. SKELTON. Thank you very much.

Chairman LEVIN. Thank you again, Ike.

Our next introduction will be by a great friend of the Senate and all of the members of the Senate.

Senator Shaheen.

**STATEMENT OF HON. JEANNE SHAHEEN, U.S. SENATOR FROM
THE STATE OF NEW HAMPSHIRE**

Senator SHAHEEN. Thank you very much, Chairman Levin.

I'm delighted to be here this morning, and appreciate your holding this hearing.

I want to congratulate each of the nominees before the committee today, and thank you all for choosing to assume these very important leadership positions at Defense and Energy. I look forward to voting on your nominations on the floor of the Senate. Hopefully, we'll get that done before too long, as soon as we get healthcare done.

Chairman LEVIN. We hope before that, actually. [Laughter.]

Senator SHAHEEN. Yes. Good, yes, we do.

I've had the opportunity, like Senator Levin, to hold a number of hearings in Foreign Relations for nominees, and I always feel like it's a wedding, because everybody's so pleased, and friends and family are here, and it's a wonderful time. Congratulations to each of you.

I'm, really, especially proud to be here today to express my strong support for Doug Wilson, President Obama's nominee to be the new Assistant Secretary of Defense for Public Affairs at DOD. Doug has a distinguished 30-year career in public and private sectors. He has served throughout the U.S. Government as a diplomat, legislative advisor, foreign policy expert, and communications strategist, and he will bring invaluable skills, deep knowledge, extraordinary poise, and a strong character to a very important and challenging position at the Defense Department.

I've had the pleasure of knowing Doug for over 25 years. We first met in 1983, when both of us were working for former Senator Gary Hart, trying to get him elected President. Doug had served as Senator Hart's chief foreign policy advisor, and became his deputy campaign manager during that 1984 presidential campaign.

Doug is a graduate of Stanford University and the Fletcher School of Law and Diplomacy, and began his career in the U.S. Foreign Service, serving in posts throughout Europe. He went on to become the Director of Congressional and Intergovernmental Affairs at the U.S. Information Agency, and later, the senior advisor there. He served in DOD, under President Bill Clinton and Secretary William Cohen, as Deputy Assistant Secretary of Defense for Public Affairs, an experience which obviously will serve him very well in this new position.

During his time at the Pentagon, Doug coordinated strategic communications and public relations for the Department on critical defense issues, including defense reform, base closures, and North Atlantic Treaty Organization (NATO) expansion. His impressive tenure at DOD twice earned him the DOD Medal for Distinguished Public Service, the Pentagon's most prestigious civilian honor.

Doug returns to public service from the nongovernmental community, where he serves as the Executive Vice President of the Howard Gilman Foundation. In that capacity, he has managed the charitable organization's domestic and international policy programs. He also co-founded, with former Defense Secretary Cohen, the Leaders Project, which identifies and brings together successor generation leaders from around the world to discuss key international and security issues.

I'm also proud to recognize Doug's tenure as the Chairman of the Board of Directors at Harvard's Public Diplomacy Collaborative. As the former Director of Harvard's Institute of Politics, I like to mention that whenever possible.

Mr. Chairman, today DOD faces some of the most difficult and complex challenges in our history. We're at war in two countries, our men and women in uniform and their families face multiple deployments and increasing physical and mental strain. As we know, our financial resources are constrained. But yet, our country continues to underpin security and stability around the globe. We need the very best people we are able to get, to assume these critical challenges.

I am so pleased to be here to give my unqualified endorsement for Doug Wilson as a nominee to this new position. I hope he will move very quickly through the committee and through the Senate.

Thank you, Mr. Chairman.

[The prepared statement of Senator Shaheen follows:]

PREPARED STATEMENT BY SENATOR JEANNE SHAHEEN

Chairman Levin, Ranking Member McCain, and all of my colleagues on the Senate Armed Services Committee, thank you for holding this hearing to consider a number of important nominees for critical positions in our Department of Defense (DOD).

During my time in the Senate, I have had the pleasure of chairing a number of nomination hearings for the Senate Foreign Relations Committee, and I always enjoy the opportunity to participate in these events . . . to see the families and friends that have supported each of the nominees . . . to hear their unique backgrounds and experiences . . . and to listen to their optimism and hope on taking on these new and exciting challenges.

I want to congratulate each of the nominees before the committee today and thank you all for choosing to take on these important leadership roles. I look forward to voting on your nominations on the Senate floor and to working with you in the coming years.

I am proud to be here today to express my strong support for Douglas Wilson, President Obama's nominee to be the new Assistant Secretary of Defense for Public Affairs at DOD.

Doug has a distinguished 30 year career in the public and private sectors, and has served throughout the U.S. Government as a diplomat, legislative advisor, foreign policy expert, and communications strategist. He will bring invaluable skills, deep knowledge, extraordinary poise, and a strong character to an important and challenging position at DOD.

I have had the great pleasure of knowing Doug for over 25 years. I first met him in 1984 during the Presidential campaign of then-Senator Gary Hart. Doug had served as Senator Hart's Chief Foreign Policy Advisor and became his Deputy Campaign Manager during his 1984 Presidential campaign.

A graduate of Stanford University and the Fletcher School of Law and Diplomacy, Doug began his career in the U.S. Foreign Service, serving in posts throughout Europe. He went on to become the Director of Congressional and Intergovernmental Affairs at the U.S. Information Agency (USIA) and later the Senior Advisor to the Director of USIA.

Doug served in DOD under President Bill Clinton and Secretary William Cohen as Deputy Assistant Secretary of Defense for Public Affairs, an experience which will serve him well as he takes on this new challenge. During his time in the Pentagon, Doug coordinated strategic communications and public relations for the Department on critical defense issues including defense reform, base closures, and NATO expansion. His impressive tenure at DOD twice earned him the DOD Medal for Distinguished Public Service, the Pentagon's most prestigious civilian honor.

Doug would return to public service from the nongovernmental community, where he serves as the Executive Vice President of the Howard Gilman Foundation. In that capacity, he manages the charitable organization's domestic and international policy programs. He also cofounded, with former Defense Secretary Cohen, The Leaders Project which identifies and brings together successor generation leaders from around the world to discuss key international and security issues.

As a former Director of Harvard University's Institute of Politics, I am also proud to recognize Doug's tenure as the Chairman of the Board of Directors at Harvard's Public Diplomacy Collaborative.

Mr. Chairman, today, DOD faces some of the most difficult and complex challenges in its history. We are at war in two countries. Our men and women in uniform and their families face multiple deployments and increasing physical and mental strain. Our resources are constrained, yet, our country continues to underpin security and stability around the globe. We need our best people in place if we are to meet these critical challenges.

I am fully confident that Douglas Wilson's lifetime of distinguished service, valuable experiences, and impressive successes will serve him well as the Assistant Secretary of Defense for Public Affairs. I fully support his nomination and hope that the committee will favorably report him to the full Senate for expeditious consideration.

I want to commend the President for an excellent choice and thank the committee once again for holding this hearing today. Congratulations to you all.

Chairman LEVIN. Thank you so much, Senator Shaheen. We greatly appreciate your being with us, and I know how much Mr. Wilson does, as well. Thank you.

We are now going to ask our witnesses to make their opening statements. Please feel free to introduce any family members or other friends that you might have with you today. We know how important it is that you have the support of family and friends, as I mentioned before.

We'll start with you, Mr. Wilson.

STATEMENT OF DOUGLAS B. WILSON, NOMINEE TO BE ASSISTANT SECRETARY OF DEFENSE FOR PUBLIC AFFAIRS

Mr. WILSON. Thank you very much, Mr. Chairman.

I very much appreciate the opportunity to come before you and this committee today to discuss the position of Assistant Secretary of Defense for Public Affairs, for which President Obama has nominated me for your consideration.

I'm grateful to the President for this nomination. I'm grateful, as well, to Secretary Gates and to Deputy Defense Secretary Lynn for their confidence in me in support of this nomination.

Senator Jeanne Shaheen has been a friend for well over 25 years. She is one of the most decent and able people I have ever met in public life, and I'm greatly honored that she would take time from a very busy schedule to have appeared here today on my behalf.

Mr. Chairman, I know that you and many of your colleagues will remember the late Doc Cook who was the former head of Washington Headquarters Services, known as "the Mayor of the Pentagon." Doc used to always say to us that when you see a frog on top of a fencepost, you know that he had help getting there. My family and friends have helped this frog, throughout my life. I'm very lucky to have several here today, including my partner of 15 years. Neither my sister from California nor my parents, who have lived for over 60 years in Tucson, AZ, where I grew up and where our family home remains, were able to be here today, but I know they share my pride in being nominated for this position.

Mr. Chairman, I am the son of a U.S. veteran. My father, Charles Wilson, as we discussed, is himself the son of a Jewish delicatessen owner from Detroit. It was Dexter Street, by the way.

Chairman LEVIN. It was on Dexter.

Mr. WILSON. Yes, sir.

Chairman LEVIN. What was the name?

Mr. WILSON. It was Wilson's Deli, on Dexter.

Chairman LEVIN. Oh, it was Wilson's. All right.

Mr. WILSON. Yes, sir.

Chairman LEVIN. Thank you.

Mr. WILSON. Thank you, sir.

He is one of the last surviving members of the military team that participated in the battle of Iwo Jima in World War II. Last year, he shared his Iwo Jima diary with me. In that diary his language is sparse and direct, and it deals with the details on which he needed to focus to provide and care for the Navy Seabee platoon he commanded. It was a very strong and very personal reminder

of the duties and obligations to our men and women in uniform that all who are privileged enough to serve in a leadership position at the Pentagon must carry with them at all times.

The position of Assistant Secretary of Defense for Public Affairs has been filled by some truly outstanding individuals, including Pete Williams and the late Ken Bacon. If confirmed, I will strive to live up to the standards of professionalism, credibility, fairness, accuracy, and trust that they set in supporting our men and women in uniform and in dealing with those who report on their activities.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you so much, Mr. Wilson.

Dr. O'Neill, you're next.

STATEMENT OF DR. MALCOLM ROSS O'NEILL, NOMINEE TO BE ASSISTANT SECRETARY OF THE ARMY FOR ACQUISITION, LOGISTICS, AND TECHNOLOGY

Dr. O'NEILL. Yes, sir.

Mr. Chairman and members of the Senate Armed Services Committee, thank you for the opportunity to appear before you today as a nominee for the position of Assistant Secretary of the Army for Acquisition, Logistics, and Technology.

I'd like to take a moment to introduce my wonderful wife, Judy, who is sitting behind me; my beautiful daughter, Bonnie Long, who is sitting next to Judy; her husband, Brad; and my precious grandchildren, Charles Wesley, Mary Kate, and John Gregory Long. My son, John Hai, his wife, Becky, and his two small children are in San Diego, where I hope they are watching us on video.

Today, I seek your consent to my serving as an Assistant Secretary of the Army. I understand that you will evaluate my qualifications and potential to fulfill the requirements of the job. I am ready to contribute experience, dedication, ethical discipline, and hopefully a few new ideas to serve in this position.

I'm certainly humbled by the challenge to our Nation and its leadership posed by the multifaceted needs for such a position. I'm aware that the job is a difficult one, and that many issues can be identified in each functional area.

These are very hard times economically, so it's even more important today to manage our acquisition systems very carefully. The Army must obtain maximum value for its investment. Experience is vital, since lessons learned often lead to success. I've been in the acquisition, logistics, and technology business for 43 years, and I served 34 years on Active Duty as an Army officer, both in peacetime and combat.

My first acquisition job was on the source selection team for what was called SAM-D, which is now called the Patriot Missile System. My most recent technology job was chairing the Board on Army Science and Technology for the National Academies and the National Research Council.

In 1991, I was selected as the first Director of the Army Acquisition Corps, and I became convinced that the key to program management success was people. I still believe that today. I also believe that technology can be the difference-maker on the battlefield. For this reason, the interaction between the technologists and the

warfighter must be almost continuous. Army leadership must aggressively pursue future system options and stimulate an information exchange between warfighters, industry, academia, and Army technologists.

I also believe that logistics demands intensive management and close cooperation between operational forces and the sustaining base.

Our soldiers, their families, other Americans, our friends worldwide, and our national leaders expect the Army's best effort. If confirmed, I'll use my training and experience in each functional area to help keep the Army strong, up to date, efficient, and effective. I believe that I possess the background, experience, and commitment necessary to perform the functions of the Assistant Secretary of the Army for Acquisition, Logistics, and Technology.

Senator, I look forward to your comments and questions.

Chairman LEVIN. Thank you so much, Dr. O'Neill.

Ms. Matiella.

STATEMENT OF MARY SALLY MATIELLA, NOMINEE TO BE ASSISTANT SECRETARY OF THE ARMY FOR FINANCIAL MANAGEMENT AND COMPTROLLER

Ms. MATIELLA. Mr. Chairman, distinguished members of the committee, it is an honor and a privilege to appear before you today as President Obama's nominee for Assistant Secretary of the Army for Financial Management and Comptroller. I am truly humbled and deeply honored by the President's nomination and by Secretary McHugh's support of my nomination. Thank you so much for the opportunity to be here.

Allow me to thank my family. Their love, support, and encouragement made it possible for me to be here today. My son, Frank, is here, in support of my being here. He works here in Washington, DC, as a proud graduate of the College of William and Mary, and he resides in Rosslyn. Unfortunately, my husband, Frank, of 34 years, and a career Air Force officer, my daughter, Maria Alexandra, and my son-in-law, Justin, were not able to be here today. I do want to say that Alexandra and Justin both graduated from Michigan Tech, up in Houghton, MI. So, I know northern Michigan pretty well. It's beautiful.

Chairman LEVIN. It's already had 100 inches of snow up there. [Laughter.]

Ms. MATIELLA. Yes. I'll stay with it, it's beautiful.

I also want to thank my extended family: my deceased father, Arturo; my mother, Angelina; my sisters, Joanna and Josie; my brothers, Abraham, Art, and Gilbert. This extended family has truly supported me, my whole life.

The Office of the Assistant Secretary of the Army for Financial Management and Comptroller is tackling many difficult challenges. There is an urgent need to develop balanced budgets that are supported by accurate, timely, and reliable data. If confirmed, I will not only draw upon my experiences, but will draw upon the experiences and suggestions of this committee and all of the staff of the Army to tackle these challenges.

I have 29 years' experience in Federal financial management, both in DOD and in other Federal departments. In these 29 years,

I've held a variety of positions: budget analyst for the Air Force; systems accountant for U.S. Army South, Director of Accounting for the Defense Finance and Accounting Service, accountant for the Office of the Under Secretary of Defense Comptroller, Chief Financial Officer for the U.S. Department of Agriculture Forest Service, and Assistant Chief Financial Officer for the Department of Housing and Urban Development.

In this variety of experiences, I've obtained many lessons learned, and I've also seen a lot of best practices. It is the application of these best practices, this knowledge, that I hope to bring to the office of the Assistant Secretary of the Army for Financial Management and Comptroller. These best practices are what's going to help me bring, hopefully, improvements to the Office of Financial Management and Comptroller.

In closing, I am honored to have been nominated for Assistant Secretary of the Army for Financial Management and Comptroller. If confirmed, I promise to direct all my experiences and abilities to tackling the Army's many financial management challenges.

I look forward to addressing your concerns and questions.

Thank you.

Chairman LEVIN. Thank you Ms. Matiella.

Mr. Oostburg.

**STATEMENT OF PAUL LUIS OOSTBURG SANZ, NOMINEE TO BE
GENERAL COUNSEL OF THE DEPARTMENT OF THE NAVY**

Mr. OOSTBURG. Thank you Mr. Chairman, and good morning, members of the committee.

At first, let me just thank you for your introductory remarks.

I have to truly say that, if confirmed, I will miss engaging with your committee through your very able staff. It's something that I'd truly miss.

It is an honor and privilege to appear before you this morning. Let me first extend my appreciation to President Obama, Secretary Mabus, and Under Secretary Work for the trust and confidence they have placed in me with the nomination to serve as the 22nd General Counsel of the Department of the Navy.

I also want to express my gratitude to the Honorable Ike Skelton, my current boss and chairman of the HASC, as well as to Erin Conaton, the current staff director of the committee. Both Chairman Skelton and Erin have been tremendous supporters and mentors who have allowed me the great privilege to serve the people and the men and women in military as my current post as general counsel to the HASC.

Chairman Skelton, as many of you know, is a remarkable lawyer himself, and a great statesman—and from his introductory remarks of me, he is also very generous—which has made the experience of working for him, and with the extraordinarily talented professional staff of the committee, all the more rewarding. I cannot thank him and my colleagues on the committee enough.

Mr. Chairman, I am joined this morning by my family. Let me begin with my mother, Carmen Oostburg, who has encouraged me to excel throughout my life, and who, as a military wife, knows well the importance of the cause that I'm about to and hope to serve. I also am joined by my sister, Carmen, my in-laws, who

drove up from North Carolina to be here, Moselle and Pete Knigh—Pete, incidentally, also served in the Air Force—my sparkling daughter, Keira, and, of course, my bride of 7 years, Tonya, who is always my true north and safe harbor.

I will be remiss if I do not also mention my brother, Egbert, who is a lieutenant in the Navy, and his family, Eva, Sebastian, Julie, Sabrina, and Jackson. They live in San Diego and could not make the trek today.

Also not here, but remembered every day, is my late father Egbert, who joined the Air Force, soon after my siblings and I were born in Puerto Rico, and retired as a surgeon, after many years of service.

Mr. Chairman, more than anything, I especially appreciate the opportunity to serve that this nomination affords. My several years working as general counsel on HASC, and before that, on the House Committee on Foreign Relations, have given an intimate, up-close look at the sacrifices that our sailors, marines, other servicemembers, and their families, make on our behalf every day. We all are indebted to them, and I count myself among the fortunate to have a chance to repay that debt, in a small way, with my service in a civilian capacity. I can think of no higher honor. It is because of their sacrifice that I pledge, if confirmed, not only to maintain the sterling reputation of the nearly 700 attorneys of the Office of the General Counsel for the Department of the Navy, but also, in cooperation with our uniformed colleagues in the Offices of the Navy Judge Advocate General and the Marine Corps Staff Judge Advocate, and under the leadership of the Secretary of the Navy, to lead the office in maximizing the ability of the Department of the Navy to defend the Nation within the law.

Again, thank you, and I look forward to your questions.

Chairman LEVIN. Thank you.

Ms. Pfannenstiel?

STATEMENT OF JACKALYNE PFANNENSTIEL, NOMINEE TO BE ASSISTANT SECRETARY OF THE NAVY FOR INSTALLATIONS AND ENVIRONMENT

Ms. PFANNENSTIEL. Thank you, Mr. Chairman and distinguished members of the Senate Armed Services Committee. It's an honor to appear before you today.

I'm deeply grateful to President Obama for nominating me to this important position, and to Secretary Mabus and Under Secretary Work, for their support.

Before I begin, I'd like to introduce my son, Matt Deutsch, and his friend, Whitney Wallace. They're both graduates of Wake Forest Law School and attorneys in North Carolina. I'm grateful that they could drive up to be with me today. My other son, Steven, is a sophomore at George Washington University. He had just returned to California, after his final exams, and was not able to get back here in time. With me also are my sister, Kathy Pratt, from Maine, and my companion, Dan Richard.

I'm sorry my parents could not make the trip from Connecticut. They would have taken considerable interest and pride in this proceeding.

Both of my grandfathers, as well as my father's mother, served in the Navy. During World War II, my father was on the crew of the USS *Finback* when that submarine rescued the future President, George H.W. Bush, after his plane was shot down over the Pacific.

I recognize momentous challenges facing the Assistant Secretary of the Navy for Installations and Environment. It is no small task to maintain our facilities in a state of readiness, to preserve the quality of life for our sailors and marines and their families, and to meet and exceed our environmental obligations. Moreover, Secretary Mabus has raised the bar for the Department of the Navy by committing that we will be leaders among the Services, the Federal Government, and the Nation, in achieving aggressive goals for energy efficiency. His initiatives are tied directly to our national security interests, but achieving them we will have other benefits, including better use of limited resources and healthier communities. I would be honored to assist him in achieving these goals.

If confirmed, I will carry out the policy directives of the President, Congress, the Secretary of Defense, and the Secretary of the Navy. My priorities would be to assure that the naval and marine facilities have the necessary support to accomplish their mission, to assist the Secretary of the Navy in achieving his aggressive energy goals, and to work closely with Members of Congress, State and local officials, and the public to mitigate the impact of our installations on the local communities.

I look forward to working with this committee.

Thank you.

Chairman LEVIN. Thank you very much, Ms. Pfannenstiel.

Dr. Cook.

STATEMENT OF DR. DONALD L. COOK, NOMINEE TO BE DEPUTY ADMINISTRATOR FOR DEFENSE PROGRAMS, NATIONAL NUCLEAR SECURITY ADMINISTRATION

Dr. COOK. Mr. Chairman and members of the committee, I'm honored to be the President's nominee for the position of Deputy Administrator for Defense Programs at the Department of Energy's NNSA.

I appreciate the confidence placed in me by Secretary Chu and NNSA Administrator D'Agostino.

If confirmed, I'll work with Congress to ensure safe and efficient operations of the nuclear weapon complex while also preparing NNSA's defense programs for the future in order to meet the demanding challenges of the 21st century.

Now, I'd like to introduce two family members who are with me today, and also thank my wife, Peggy, who could not be here, for her support and willingness to allow me to pursue this position. Peggy is in Seattle with our older daughter, Julia Cook Dombrowski, and our newly born granddaughter. With me are our younger daughter, Cynthia Cook, a member of the U.S. Foreign Service and currently public affairs officer with the U.S. Consulate in Dhahran, Saudi Arabia and our son-in-law, Cynthia's husband, Brad Carlson, also with the Foreign Service as a special agent in the Diplomatic Security Service, on assignment in Washington, DC.

My entire career has been dedicated to either the U.S. or the United Kingdom (U.K.) nuclear deterrent programs. Up until my most recent assignment, this covered areas of small science, big science, engineering development, major construction projects, infrastructure projects, and security investments required to meet an increased threat.

From 2006 to 2009, as I served as the Managing Director and the Chief Executive Officer of the Atomic Weapons Establishment in the United Kingdom. That assignment gave me a good understanding of manufacturing processes for special material components, qualification of weapon components and subsystems, assembly, transport, support and service, including surveillance, and, finally, decommissioning, dismantlement, disassembly, and disposal.

Communication and productive interaction with the Ministry of Defense, the local community, the nuclear regulatory authorities, and the workforce of both employees and contractors, was important to success.

I believe that my experience in both the United States and the United Kingdom, made possible through the special relationship of the 1958 Mutual Defense Agreement, qualifies me to perform the duties and functions of the Deputy Administrator for Defense Programs, and I hope that you'll agree.

In my view, the major challenges confronting the Deputy Administrator for Defense Programs are the changes required in the nuclear weapons stockpile and the nuclear weapons complex as both continue to age. At the very least, these changes include, first, progressing to a smaller stockpile; second, applying recognized, but as yet undeployed, means of improving the safety, the security, and the effectiveness of warheads, without changing the military requirements, and without recourse to underground nuclear testing; and then, third, to do both the first and second with a workforce that is now nearly completely different from the workforce that put the complex and the stockpile in place.

Safety and security must be an intrinsic part of the job, not add-ons. It's my view that giving the directors of the labs and plants accountability for the "whats"—that means the outputs, including good safety and security—as an inherent part of the job, but without instructing them on the "hows," the process of doing it, would improve not only the productive work outputs, but also safety and security. This viewpoint is based on personal experience in both the United States and in the United Kingdom.

The Nuclear Deterrent Program is inherently a complex, high-technology program. The quality of understanding of the underlying science of weapon performance in an aging stockpile, including weapon safety and weapon security, is extremely important. Capital investments made by Congress in the Stockpile Stewardship Program over the last decade have enabled important improvements in understanding.

But, the most advanced experimental and computational facilities or advanced manufacturing facilities are not worth much without the right people to run them and use them. If confirmed, working to retain and develop critical nuclear weapons expertise in both the NNSA Federal employee workforce and the contractual workforce will be a high priority of mine.

I am impressed with program elements such as NNSA's Stockpile Stewardship Academic Alliances and Future Leaders Program, and I want to continue them. I support efforts, such as mentoring young weapon designers, most of whom have never participated in a nuclear test, with real work. I believe that some of the best people are drawn to the hardest problems. Articulating those problems clearly, so that they can be undertaken and solved, will be one of my objectives.

In addition, if confirmed, I would pursue effective contract mechanisms that support cultivation of critical skills at all contractor sites.

I'm mindful of the relationship between Defense Programs and Congress. Defense Programs is fortunate to have received good support for the nuclear weapons program. I have pledged to meet regularly with Members of Congress and key staff to support an open dialogue.

With your approval, it would be my great privilege to serve the Nation and to lead the dedicated men and women of Defense Programs in the challenges that lie ahead.

I thank you for your consideration.

Chairman LEVIN. Thank you, Dr. Cook.

Senator Burr is our acting ranking member here this morning, and I'm wondering, because Senator McCain is tied up on the floor, whether or not, you might wish to give an opening statement.

Senator BURR. Mr. Chairman, I do not wish to give an opening statement, but I would ask unanimous consent to enter into the record Senator McCain's opening statement.

Chairman LEVIN. We thank you very much for that. That statement, of course, will be made part of the record.

[The prepared statement of Senator McCain follows:]

PREPARED STATEMENT BY SENATOR JOHN MCCAIN

Thank you, Senator Levin.

I join you in welcoming our nominees and their families, and I thank them for their willingness to serve in these key leadership positions.

I'll start by recognizing my Arizona constituent, Maria Matiella, who has been nominated to be the Assistant Secretary of the Army for Financial Management and Comptroller. As a resident of Tucson, with a BA and MBA from the University of Arizona, she is, not surprisingly, extremely well-qualified for this position.

Ms. Matiella began her 29 years of Federal service in 1980, serving in various key budgetary positions in the Air Force, Army, and Department of Defense (DOD), culminating in her assignment as Director of Accounting for the Defense Finance and Accounting Service from 1995 to 1998. She served most recently as Assistant Chief Financial Officer for Accounting for the Department of Housing and Urban Development from 2004 through 2008. She is also a military spouse—her husband, Francisco, is a retired Air Force officer. Thank you for your desire to serve again.

Douglas Wilson is the nominee to be the Assistant Secretary of Defense for Public Affairs. Mr. Wilson is well-qualified, having served as the Principal Deputy Assistant Secretary of Defense for Public Affairs from 1997 through 1999, and with a variety of public interest organizations in the private sector since then.

Paul Oostburg Sanz, the nominee to be the General Counsel of the Department of the Navy, will be introduced by Chairman Skelton, who, at this point has seen both his committee's chief of staff and, now, committee counsel jump ship. We welcome the distinguished chairman of the House Armed Services Committee, and we thank him for his generosity to the Department and his participation today.

Jackalynne Pfannenstiel, the nominee for Assistant Secretary of the Navy for Installations and Environment, has extensive experience in energy policy and regulation in California, and served as Commissioner and Chairman of the California Energy Commission. You will, no doubt, have a lot of heavy lifting ahead of you, but

I trust you will have strong support from the Navy and Marine Corps, and I compliment you on your willingness to serve in the Department of the Navy.

Dr. Malcolm O'Neill, the nominee to be the Assistant Secretary of the Army for Acquisition, Technology, and Logistics, retired from Active Duty in the Army in 1996 as a lieutenant general. He served as the Director of the Ballistic Missile Defense Organization and Commander of the U.S. Army Laboratory Command. With his strong acquisition and research and development background, Dr. O'Neill will play a vital role in implementing the provisions of the Weapon Systems Acquisition Reform Act of 2009 and in striving to ensure that key procurement and modernization programs in the Army, including the successor to the Future Combat System, are successfully managed.

Finally, Dr. Donald Cook has been nominated to be Deputy Administrator for Defense Programs in the National Nuclear Security Administration. Dr. Cook has extensive experience in key positions at Sandia National Laboratories, and most recently, as the Managing Director of the Atomic Weapons Establishment for the United Kingdom from 2006 to 2009. Like our other nominees today, he is also highly qualified for this position.

I look forward to the testimony of the nominees today, and I again thank them and their families for their service.

Chairman LEVIN. Let's have an 8-minute first round for questioning.

Let me start with you, Mr. Wilson. In 2003 and 2004, the Assistant Secretary of Defense for Public Affairs established a group of retired military officers to act as surrogates, supporting the Department's views while appearing on TV and radio programs, and as military analysts. The officers received favorable access from the Pentagon, and all those who raised questions or concerns did not receive that kind of access.

The issue is still under investigation by the DOD Inspector General, but in response to the committee's advance policy questions, you said that "It is inappropriate and contrary to Department policies to selectively benefit any individuals or groups, including retired military personnel, by providing them special treatment or increased access to Department officials." I'm wondering, if confirmed, Mr. Wilson, will you review applicable Department directives and issue any additional guidance that may be needed to ensure that the Department does not provide different access or favorable access or benefits on a selective basis to individuals who support the administration's views?

Mr. WILSON. Yes, I will, if confirmed, Senator. Access should be provided on an equal and balanced basis, and if confirmed, I do plan to review those policies.

Chairman LEVIN. In August 2009, Stars and Stripes reported that the Office of Assistant Secretary of Defense for Public Affairs had used a private contractor to profile journalists seeking to report on ongoing combat operations, categorizing them as either positive, negative, or neutral. Now, Secretary Gates put an end to that profiling within the last few months, when that practice became public. In your response to the committee's advance policy questions, you said that "I don't believe in any system that rates reporters based on a perception that their reporting is positive or negative. In my view," you said, "we should never be a party to efforts to place so-called 'friendly reporters' into embeds while blocking so-called 'unfriendly reporters.'"

My question is, if confirmed, will you review applicable Department directives, issue, again, any guidance that may be necessary to ensure that public funds are not used to profile reporters and

to differentiate among reporters, based on whether or not their reporting is “friendly?”

Mr. WILSON. Yes, Senator, if confirmed I will do that.

Chairman LEVIN. Is it your view that in the selection of radio and television talk shows that are broadcast by the Armed Forces Radio and Television Service (AFRTS), that there should be an effort to assure fairness and balance?

Mr. WILSON. Yes, I do believe that, Senator.

Chairman LEVIN. As a matter of fact, because the AFRTS is a publicly-owned entity that broadcasts to our men and women in uniform in circumstances that often preclude competition, does not the Armed Forces Radio and Television have a—indeed, a greater responsibility for fairness and balance than other media outlets might have?

Mr. WILSON. Senator, I believe the Armed Forces Radio and Television Service has a responsibility to present fair, balanced, and accurate programs and information. If confirmed, I intend to make sure that those standards are met.

Chairman LEVIN. Thank you. Dr. O’Neill, a couple years ago, the Gansler Commission reported on significant deficiencies in the Army acquisition workforce. We’ve learned that the shortages in the Army workforce extend to virtually every aspect of acquisition, including program managers, system engineers, software engineers, developmental testers, and cost estimators. We’ve enacted a Defense Acquisition Workforce Development Fund, and Secretary Gates has announced an aggressive hiring plan to address this problem. If confirmed, will you make it a top priority to rebuild the Army acquisition workforce and to ensure that the Army has a workforce that’s appropriately staffed, qualified, trained, and organized to accomplish its mission?

Dr. O’NEILL. Yes, sir.

Chairman LEVIN. Dr. O’Neill, major Army modernization efforts have not had a great deal of success over the last few decades, in many instances. Strategies, plans, investment priorities have changed, from digitization to Force 21, to Army After Next, to Interim Force, to Objective Force, to Future Combat System (FCS) and modularity, and with each change in uniformed or civilian leadership. Now it remains to be seen whether the restructuring of Army modernization efforts last year, with the cancellation of the ground vehicle portion of the FCS program, is going to provide an opportunity to apply the lessons of the last decade and to gain and develop a more sound and more stable modernization strategy.

What steps do you believe we need to take for the Army to avoid the mistakes of the recent past and to develop a stable modernization program that lives up to its technological and affordability promises?

Dr. O’NEILL. Senator, the FCS program was a very large program. It had a single integrating contractor, called a “lead system integrator.” The task was very difficult. The amounts of resources that were required were very large. I think that the management challenge was a bit too much.

What Secretary Gates has done is, he has directed the Army to take the concept of the Future Combat System, turn it into a num-

ber of chewable, as it were, pieces, and have an overall integration effort to pull those pieces together.

The combat vehicle is being reconsidered. As it presently exists, it has been canceled. The non-line-of-sight cannon has been canceled, as of this month.

If confirmed, one of my first goals will be to take a detailed look at the remnants—the residuals of the Future Combat System, and see how we can organize those to be success-oriented.

Chairman LEVIN. Is there going to have to be a much greater emphasis now, going back to research and development of the new system?

Dr. O'NEILL. Yes, sir. Exactly. The ideas, I think, that led to some of the cost overruns and schedule slippages were that decisions were made in anticipation of successful testing of the maturation of technologies that weren't as simple as we thought. I think that's one of the guidelines for a future acquisition management; and that is, to ensure that the research has matured to an adequate level before you make the kinds of decisions, moving into engineering development, building systems. I think the idea of competitive prototyping is key in that regard.

Chairman LEVIN. Thank you.

Senator Burr.

Senator BURR. Thank you, Mr. Chairman.

Mr. Chairman, I'd like to highlight the good judgment of the administration to have nominated individuals with North Carolina ties. [Laughter.]

In full disclosure to the committee, I think it's important that I say I show great favor towards anybody who graduated from Wake Forest, because it shows good judgment by not just the students, but the parents. I congratulate those two law school students. [Laughter.]

Mr. Oostburg Sanz, are you aware of the widespread contamination of the Camp Lejeune water system that existed in the 1950s through the 1980s?

Mr. OOSTBURG. Yes, Senator.

Senator BURR. You may also be aware that in 1989 the Environmental Protection Agency designated Camp LeJeune as a National Priority Listed site, and under title 42, U.S.C., the Agency for Toxic Substances and Disease Registry (ATSDR) at Centers for Disease Control (CDC), and I quote "shall" conduct public health assessments, and, if they deem it necessary, conduct human health effects studies of National Priority Listed sites.

The Congressional Research Service has stated that in their reading of title 42, the Navy, as the primary responsible party for Camp LeJeune's site, is statutorily required to fund such studies.

Would you agree that the Navy has a statutory responsibility, here, to act as promptly as they can?

Mr. OOSTBURG. Yes, Senator.

Senator BURR. Would you think it's reasonable to seek information that will inform the public if there's a higher rate of death among those who served at Camp LeJeune, and if those rates were higher from that death?

Mr. OOSTBURG. Yes, Senator.

Senator BURR. Ms. Pfannenstiel, again, I congratulate you on the successful graduation of students. That's only surpassed by the success of getting a job, these days, for those of us that have recent college graduates.

You have quite a background in utilities, as a commissioner in California, and a long tenure with a company. Let me just ask you. In California, were Pacific Gas and Electric Company (PG&E) to be identified as a party responsible for a site where environmental contamination occurred, would the State of California allow PG&E to direct the State's investigation of the site, and permit it to determine the amount of funding it provided for the investigation?

Ms. PFANNENSTIEL. That seems unlikely, Senator.

Senator BURR. A little bit of background. Currently the Department of the Navy, the primary party responsible for Camp LeJeune, for the Marine Corps, is asserting that it can determine which Federally funded and statutorily mandated scientific studies will be conducted to investigate water contamination that occurred at the base between 1957 and 1987. Title 42, U.S.C. vests the authority to determine the need and scope of research conducted on the National Priority Lists solely with ATSDR at the CDC. ATSDR is authorized to conduct its research independent from the primary responsible party. That makes common sense, whether you're in California or whether you're in the Federal Government.

Essentially, what the Department of the Navy's doing with respect to withholding funds for key government studies which will investigate the environmental contamination at Camp LeJeune, the Navy's refusing to fund a mortality study, recommended by the U.S. Government scientists, and we don't know if the death rate for marines and sailors who lived at Camp LeJeune is greater than that of marines from other bases.

In light of the documented levels of contaminants present in the tapwater at Camp LeJeune, do you think it makes sense to conduct a study that would help us determine those death rates?

Ms. PFANNENSTIEL. Senator, my understanding is that the studies are ongoing, that the Navy has funded, and continues to fund, the studies that you referenced.

My further understanding is that there are other studies that are being proposed. While I have not been privy to the results of the studies, it is my understanding that as the studies are completed, other studies will be funded, as indicated by the Navy.

Senator BURR. You are correct that there are ongoing studies, and the two most crucial to determine what I just covered are the mortality study and the health study, which have yet to be funded by the Department of the Navy for ATSDR. It's absolutely crucial that funding commitment happen before we get to the end of January, or all of a sudden we restart the clock and there's another 6 months. Do I have a commitment from both of you that you'll do everything within your power to see that the Navy fulfills its statutory obligation?

Mr. Oostburg Sanz?

Mr. OOSTBURG. Absolutely. If confirmed, my primary responsibility, as chief legal officer of the Department of the Navy, is to make sure it's in full compliance with all applicable laws that apply

to the Department of the Navy. Certainly, to the extent that there's an obligation on the Department of the Navy to conduct a study which it has yet not conducted, I would work with my colleagues in the Department to make sure that occurred.

Senator BURR. Thank you.

Ms. Pfannenstiel?

Ms. PFANNENSTIEL. Certainly, Senator. If I'm confirmed into this position, I will commit to investigate and see what studies need to be done and what the status is.

Senator BURR. To further follow up, it is not the function of the Navy to determine which studies; solely the statutory responsibility of an agency within the CDC, under title 42, U.S.C.

If I could turn to Dr. O'Neill, for just a second, with regard to the Army's Family Medium Tactical Vehicles (FMTVs).

Chairman LEVIN. Senator Burr, excuse me for 1 minute.

Senator BURR. Yes.

Chairman LEVIN. I'm going to have to leave for a couple minutes. When you're done, could you turn it over to Senator Burris? I will be back, however, in a few minutes.

Senator BURR. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you.

Senator BURR. I appreciate that.

With regard to the FMTV contract award decision, on December 14, the Government Accountability Office (GAO) ruled that the Army's capability evaluation in the bid process was flawed. This is a major issue, because capability was 40 percent of the FMTV rebuy evaluation. I'm sure that the Navy, in doing its due diligence and reexamining the capability factor within the bid, will look at different levels of in-place and qualified capabilities, such as proper tooling, eco-facilities, and a qualified cab design, all of which impact production and raise cost-related risk.

Would you agree with that?

Dr. O'NEILL. Yes, Senator, I agree.

Senator BURR. Since the Weapons Systems Acquisition Reform Act of 2009 was unanimously passed by Congress in May—happened to be the same time that the FMTV rebuy competition was taking place—it would now be prudent to review the FMTV rebuy within the guidelines of this new required process, to ensure the American taxpayers and our soldiers get the best product at the best value.

Would you agree with that, as well?

Dr. O'NEILL. Senator, I agree, in principle, but I must say that I have not yet been briefed in detail on the situation with regard to FMTV. I have read, in the newspaper—and it makes all the sense in the world, with the Reform Act introducing concepts like Cost Assessment and Program Evaluation—very reasonable things to do. I certainly am inclined to be very positive about that approach in relooking at FMTV.

But, as I said, I am not privy to the decisions being made by the Army at this time in response to the GAO sustaining of the protest.

Senator BURR. Thank you for that, and I will assure you that we've learned, in Washington, if it's printed in the paper, it must be fact. [Laughter.]

You can take that to the bank.

FMTV is a multibillion-dollar program that meets the definition of a major defense acquisition program. Since the GAO has determined that the Army did not evaluate 40 percent of Oshkosh correctly, this would be a great opportunity for you to take a pause and to reevaluate the entire process, in light of the above-mentioned legislation. Would you see that as the right opportunity to take advantage of?

Dr. O'NEILL. Senator, I think it would be a good time, if confirmed, for me to play a strong role, depending upon how quickly a resolution of this matter needs to be done.

Senator BURR. Dr. O'Neill, I appreciate that.

I would yield the microphone to my good friend Senator Burr.

Senator BURRIS [presiding]. Thank you, Senator Burr. I appreciate that.

If you've noticed a difference, his family couldn't spell; they forgot the "I-S." [Laughter.]

It's a pleasure for me to be with these distinguished nominees, and I would like to thank our witnesses for appearing before this committee as we consider your nomination for the various offices in DOD—the Army, the Navy—and, of course, with the National Nuclear Security Administration.

As this country fights two wars, ongoing in Afghanistan and Iraq, we need strong leaders within DOD to ensure that we take care of our soldiers and our personnel serving in the military, and be responsible for the taxpayers as we spend billions and billions of taxpayers' dollars.

Now, we have sought, in this budget, which we're hoping to pass very shortly in the Defense appropriation, major increases on behalf of our Service personnel that's serving, also those who have served. This Congress is committed to doing what we can for those who allow us to do what we do here in America. By coming on board with these positions that you've been nominated to, and, hopefully, shortly confirmed to, you have the obligation of making sure that personnel who protect us get the best that we can give to them. I would just like to ask a few questions.

First, to Mr. Wilson. What do you envision will be your role in addressing whether photographs, purportedly showing the abuse of detainees in Iraq and Afghanistan, should be released, and whether doing so endangers U.S. troops serving abroad? If you have a situation arising similar to what happened at Abu Ghraib, what would be your reaction, if you're confirmed, sir?

Mr. WILSON. Senator, I am familiar with the example that you give, from what I've read in the papers. According to the directive which outlines the duties of the Assistant Secretary of Defense for Public Affairs, I would certainly be involved in, and have a primary responsibility for, decisions regarding the release of such photographs.

Senator BURRIS. Thank you.

Dr. O'Neill, in the advance policy questions, you stated, "The Army should use the type of contract that is best suited for the acquisition at hand, considering primarily complexity and risk." In evaluating contracts, under what condition would fixed-price contracts be more suitable?

Dr. O'NEILL. Senator, fixed-price contracts are very suitable. Fixed-price contracts are the contracts you want to get as close as possible to, because you make an agreement to pay so much for "the thing." What you have to have for fixed-price instruments is good knowledge of what you are buying. The easiest thing is to buy from a catalog or when you go to the showroom, and you look at the car, you buy the car. Fixed-price contracting is where you want to go. You want to push toward that. You want to push away from time and materials, where you tell somebody that you're going to give them so much money and so long to do something, but we're not quite sure what that is, or cost-plus type contracts, where you tell a person, "We're going to do this program, and we'll pay what we think it costs, but the cost might increase." Fixed-price contracting should be our goal, and fixed-price contracting can be done, where you can write a specification for delivery of a particular object.

Senator BURRIS. Under what circumstances, Doctor, would a non-competitive contract be justified? What safeguards can be put in place to protect the taxpayer?

Dr. O'NEILL. Senator, you would have a noncompetitive contract when and if you were in a situation where you couldn't establish a ball game, as it were; there was no one else who could do the job.

Senator BURRIS. Are you talking about sole-sourcing?

Dr. O'NEILL. That's sole-sourcing, yes, sir. That would be a non-competitive.

Senator BURRIS. How about emergency situations?

Dr. O'NEILL. Also in an emergency situation, where, for example, you have a contractor who has already demonstrated that he's doing something, and you need to double that production, for example; you realize that no other industry in America has the necessary capital equipment, trained people, you need it in the field in 2 years. What you do is, you tell that company, "You're going to get a sole-source extension to double the production of that piece of equipment."

Senator BURRIS. Lastly, Doctor, what would you do to address and limit cost overruns and cost-plus contracts? What are some of the tools to address this issue?

Dr. O'NEILL. To work with cost-plus, what I would do is try to buy the thing in stages, reduce the risk, eliminate risk, insofar as you can, and, as the risk approaches zero, then you go from a cost-type contract to a firm fixed-price contract.

Senator BURRIS. Thank you.

Ms. Matiella, you're going to be the Assistant Secretary of the Army, and the Chief Financial Management and Comptroller. Is that correct?

Ms. MATIELLA. If confirmed.

Senator BURRIS. We'll take care of that.

I notice on your resumé—you have an excellent resumé. You're also a certified public accountant?

Ms. MATIELLA. Yes, I am.

Senator BURRIS. Okay, that's not on your resumé, that I saw.

Ms. MATIELLA. Oh, gee.

Senator BURRIS. Okay. Because I thought, if you're going to be a comptroller—of course, I was a comptroller of the State of Illinois, and I was not a certified public accountant. That's the reason why I raised that question.

Ms. MATIELLA. Yes.

Senator BURRIS. I thought maybe you were trying to get elected. You know about the financial statements and all that, that's going to be necessary to keep track of the accounting process.

Ms. MATIELLA. Yes, I do.

Senator BURRIS. Okay. Now, what do you do to increase the transparency of the Army's budget? What would you do, Madam Assistant Secretary, if confirmed?

Ms. MATIELLA. If confirmed, I would look into where we are, in terms of systems. The data comes in. It has to be visible through the system. So make sure that the systems are in place that would show that kind of visibility and that kind of transparency. I think that would be one of my focuses, if confirmed.

Senator BURRIS. Mr. Oostburg, what role should the general counsel play in addressing allegations of fraud and abuse of contracting for the wars in Iraq and Afghanistan?

Mr. OOSTBURG. The Office of General Counsel and, if confirmed as general counsel, the leader of that office, my primary responsibility would be to make sure the Department of the Navy fully complies with all the laws and regulations of this great country. The Office of the General Counsel currently has at least two assistant general counsels that are dedicated to acquisition issues. There's a dedicated staff that, their main focus, day to day, is to ensure that these types of issues are addressed; and, working in cooperation with our uniformed colleagues in the Navy Judge Advocate and the Marine Corps Staff Judge Advocate's Office, we would make sure that the Department fully complies with all acquisition.

Senator BURRIS. Mr. Chairman, my time is expired. May I have leave to have a couple more minutes?

Chairman LEVIN [presiding]. Of course.

Senator BURRIS. Thank you, Mr. Chairman.

Ms. Pfannenstiel, you are up for the position of the Assistant Secretary of the Navy for Installations and Environment. Do you know Secretary Mabus?

Ms. PFANNENSTIEL. Yes, I do, Senator.

Senator BURRIS. I won't hold it against you. [Laughter.]

He's a good friend of mine. Got to do a good job for him, okay?

Ms. PFANNENSTIEL. I will. Thank you.

Senator BURRIS. What do you foresee will be your working relationship with the Environmental Protection Agency and other State regulatory agencies with this position?

Ms. PFANNENSTIEL. My understanding is that the position of Assistant Secretary for Installations and Environment is a representative of the Department of the Navy, with many other State and Federal agencies, including the Environmental Protection Agency.

Senator BURRIS. Okay. Following up on a question that Senator Burr had raised, once the scientific studies for water contamination at Camp Lejeune have been completed, what type and level of information-sharing would you do with those affected by the contamination, and the Secretary of Veterans Affairs? I also serve on the

Veterans Affairs Committee, and we had some damaging testimony from children born at Camp LeJeune that there are now males suffering from breast cancer. That is unconscionable that we have that type of a situation existing in our military bases. Then there's denial, in some instances, by some of our Services. Could you respond to that, please?

Ms. PFANNENSTIEL. Yes, Senator Burris. When the information is complete, when the Navy has received the results of the studies that are ongoing, there will be, I understand—that will determine what steps need to be taken. My understanding is that there has been an effort, even at this point, to reach out, to try to communicate with all of the past Service people and families and civilian contractors who were at the Fort during the period of time of the contamination. Now, if I'm confirmed into this position, I would certainly be in a place to see the results and make sure that the communications were as extensive as possible.

Senator BURRIS. I think you did about as best as you could with that question. I appreciate that. Don't want to commit yourself.

Dr. Cook, I just need a clarification. You're going to be in the Defense Department, but you're working with the NNSA in it. Where are you housed?

Dr. COOK. Let's see, Senator Burris. I'm nominated for the Deputy Administrator of the NNSA, which is a part of the Department of Energy.

Senator BURRIS. Not DOD.

Dr. COOK. That's correct. But, it works very closely with DOD.

Senator BURRIS. Oh, I see. How closely?

Dr. COOK. Meetings somewhere occurring every single day.

Senator BURRIS. So, you're going to be wearing two hats.

Dr. COOK. The national security enterprise includes DOD, the Department of Energy, Department of Homeland Security, and other Federal Government departments. But the hat that I'll be wearing is a fairly clear one, and I'm sure I'll be held accountable for it, if confirmed.

Senator BURRIS. Good luck, to all of you. I'll look forward to you being confirmed. You all are doing a great service.

Thank you very much, Mr. Chairman, I appreciate the extra time.

Chairman LEVIN. Thank you very much, Senator Burris.

Ms. Matiella, let me ask you, I understand that during your service in the Agriculture Department, that you led the Forest Service to its first unqualified audit opinion, and if you are confirmed, you would work towards establishing priorities for the preparation of auditable financial statements. What challenges did you face when you were doing that audit for the Forest Service, on the path to a clean audit?

Ms. MATIELLA. The first challenge was communicating the expectations and the requirements to the folks out in the field. At that point, financial management was very spread out throughout the whole United States. So, communicating the requirements.

Number two, was ensuring that the documentation was in place. All of the data has to be supportable. We have to make sure that, in fact, all of the obligation records, all the expense and revenue records were in place.

Once we felt comfortable that we had the supportable data, then we worked with the auditors to help them obtain that documentation. We also implemented a general ledger transaction-driven accounting system, which was critical. That was Joint Financial Management Improvement Program-certified.

We had the system in place, the documentation in place, the expectations were clear, and we worked very closely, not only with headquarters, but the auditors.

Chairman LEVIN. Any particular challenges that you see in realizing a clean audit for the Army, if you're confirmed?

Ms. MATIELLA. Well—

Chairman LEVIN. You may not be able to foresee them, but, if you do foresee them, you can share them with us now.

Ms. MATIELLA. I'll share the fact that the issues of documentation, proper systems, laying out policies and procedures would be a challenge for DOD, as it is for every department in the Government. We all, generally—and that's what's good about me having spent time in different departments, is, I can see that we have generally, the same kinds of challenges.

Chairman LEVIN. Okay. Thank you.

Mr. Oostburg, the Chief of Naval Operations (CNO) recently stated that the Navy is going to assign female sailors to submarines, starting in 2011. What is your understanding of the status of this change in policy? What role would you expect to play in implementing a new policy? What is your understanding of the conclusions and lessons that have been learned from Operation Iraqi Freedom and Operation Enduring Freedom about the feasibility of current policies regarding women in combat?

Mr. OOSTBURG. Senator, my understanding is that Secretary Mabus, the CNO, and others in the leadership of the Department of the Navy are very much committed to ensuring that women in the Navy and Marine Corps have as fulsome opportunity to serve as possible, and part of that is allowing women to serve on submarines.

With regard to legal implications of that assignment, as far as I know at this time, I'm not aware of any, but certainly there are manpower considerations, such as making sure that there is not just an adequate number of women that are assigned to any particular submarines, but that the types of assignments are such that they are able to support one another. I would imagine those same types of considerations are at play with regard to other assignments within the Department of the Navy. If confirmed as chief legal officer and working with my colleagues in the uniformed Services, I would hope to help the Secretary implement those changes.

Chairman LEVIN. Now, there's going to be some deliberation and discussion, and perhaps change, in the "Don't Ask, Don't Tell" policy, which went into effect in 1994, after months of congressional hearings and debate. What role, if you are confirmed, do you expect to play in deliberations over efforts relative to that policy, to repeal or change that policy?

Mr. OOSTBURG. Senator, as I understand, DOD and the various Services are undergoing a very thorough review of what changes need to perhaps be suggested to Congress with regard to changes

in the law. In addition, they're looking to see how they can change the implementation of the policy as it currently stands. Certainly, there's the case out of the Ninth Circuit which has some implications with regard to how administrative separation occurs, and what considerations need to be taken into account in those instances. If confirmed, I would look to give my best legal advice to the Secretary as he helps to formulate his response to how the existing law and policies are enacted.

Chairman LEVIN. Okay. Ms. Pfannenstiel, the Department of the Navy has a number of valuable properties which need to be conveyed, or perhaps will be conveyed, as part of the recent Base Realignment and Closure (BRAC) round. The Department has some properties that they have retained which go back as far as the 1993 BRAC round, so no longer being used by the Navy. The question is the disposal of those properties.

Now, the committee provided some new legislative direction in the National Defense Authorization Act for Fiscal Year 2010, which was aimed at expediting transfer of those properties to local redevelopment authorities. We provided clear flexibility, where perhaps there had been too much rigidity before. But, we gave great discretion to the Department now to use many number of different paths and routes to dispose of those properties. We're hoping that we're going to see some real progress in the next 6 months in that effort.

Will you make it a high priority to expedite the transfer of these properties, in a manner which is equitable, both to the Department and to local communities?

Ms. PFANNENSTIEL. Yes, Senator, I will. If I am confirmed into the position, then clearly the conveyance of the properties that have been identified under the BRAC process is a high priority, and I will certainly commit to you that I will make it one of my highest priorities.

Chairman LEVIN. Thank you very much.

Senator Thune.

Senator THUNE. Thank you, Mr. Chairman.

I want to thank all our nominees for their service and willingness to serve, and congratulate you on your nominations. We look forward to working with you, as your process moves forward.

If I might, Mr. Chairman, I'd like to direct one question to Dr. Cook.

As you may know, in the National Defense Authorization Bill for Fiscal Year 2010, there was a provision passed stating that it's the intent of Congress that modernization of the nuclear weapons complex, among other things, is key to enabling further reductions in the nuclear forces of the United States. My question is, what are your views on modernizing the nuclear weapons complex?

Dr. COOK. Thank you for the question, Senator.

It is a complex subject by itself. The state of the nuclear weapon complex and the state of the nuclear weapon stockpile are, in fact, intertwined. Human capital—the amount of capability to understand adequately the changes that are required in the nuclear weapon stockpile after the armed services, DOD, and U.S. Strategic Command (STRATCOM) decide the changes that are required, then they need to be supported by the NNSA. Certainly, the NNSA will help inform the decision. But, in fact, the work that's required

is specific to each of the weapon systems that comprise the U.S. nuclear deterrent. The nuclear weapon complex can cover the range of possibilities that is required, but it would be useful to understand the details of the changes in the nuclear weapon stockpile that need to be made. Certainly, all who work in the area are hopeful that the Nuclear Posture Review, which will be—is scheduled to be released on February 1—help in that decision, and then we can proceed.

The difficulty in changing the nuclear weapon complex itself, as downsizing or some elements of revitalization are made, is to make a set of decisions which are inherently intertwined over the next few years, that we don't regret a decade or two beyond. There are a number of studies that are going on; they're looking very carefully at the kind of changes that are required. All of this, however, comes in an assumption of the future nature of the deterrent that we need.

I hope I've answered part of your question. If not, you can certainly follow up.

Senator THUNE. Okay. I appreciate that. We may follow up with you. It bears on a lot of other issues, including the Strategic Arms Reduction Treaty negotiations and everything else. Many of us believe that that is essential, that we modernize the stockpile. We look forward to working with you on that.

Dr. COOK. Thank you very much.

Senator THUNE. Mr. Chairman, that's all I had. Thank you.

Thank you all, again, for your service.

Chairman LEVIN. Thank you, Senator Thune.

Ms. Pfannenstiel, the Navy's use of active sonar systems that search for underwater threats by emitting sound into the water, has been challenged by a number groups, including State governments, including groups that have a particular interest in this issue, alleging that the use of the systems does not comply with certain regulatory and legal requirements.

What is your understanding, if you have one, of the effect of these systems on marine life, particularly marine mammals?

Ms. PFANNENSTIEL. I understand that the Navy is sponsoring—and is, in fact, the major sponsor, around the world, in the study of the effects on marine mammals—and that study is underway. There clearly needs to be remediation, if there is, in fact, an effect that the Navy finds from the studies. Meanwhile, while the studies are underway, I understand that the Navy is taking whatever remedial action is necessary, awaiting the results.

Chairman LEVIN. Are you going to be actively involved in the Navy's effort to basically “go green” at its installations and purchases?

Ms. PFANNENSTIEL. Yes, sir, if confirmed, I expect to work with the Secretary on the initiatives he has offered on the green proposals.

Chairman LEVIN. All right. Will you make that a high priority?

Ms. PFANNENSTIEL. That would be a very high priority with me, Senator.

Chairman LEVIN. Good. Thank you.

Dr. Cook, there's been reference made to a nuclear weapons treaty. One of the treaties which is under consideration is the Com-

prehensive Test Ban Treaty. If the President submits that treaty again to the Senate, can you tell us, what role would you be playing in addressing the technical question of whether or not the United States can maintain a stockpile safely, securely, and reliably, without testing?

Dr. COOK. Yes, thank you for the question, Senator.

If confirmed as Deputy Administrator for Defense Programs at NNSA, the role that I would play would be informing, as deeply as possible, the technical choices that are available in the present stockpile to extend the life. I would, as asked, maintain an open relationship with Congress and would ensure that the NNSA provides answers to all the questions.

I believe that it's a very important time. The United States has not required an underground nuclear test since September 1992 and, at present, doesn't have a current need to do so. The nature in which the choices for the deterrent are made, as I indicated to Senator Thune, are critically dependent on the resources that—again, the humans we have and the understanding, but also the facilities.

My own view is that it is possible to continue a vital nuclear deterrent without recourse to underground nuclear testing, if certain capabilities are available on a continuing basis. But, they come to the core, those that are required for good people, good experimental information, advanced computation, to determine whether something is likely either to work or not. Without that, a nuclear test might be required. But, with that, we can determine that one would not be required by the approach that we take.

Chairman LEVIN. With that being those three elements, I believe, that you just identified?

Dr. COOK. Yes, sir.

Chairman LEVIN. Again, we thank you all for your previous service to our Nation, to your willingness to continue to serve in the positions to which you've been nominated. We hope that the committee can act promptly on your nominations. Whether or not we're successful in some of the other more public endeavors that we're involved in, we hope that we can move your nominations promptly so that the Nation can have a Christmas gift, perhaps, in having you all confirmed. I can't guarantee that, but we'll do everything we can.

We will stand adjourned.

[Whereupon, at 11:01 a.m., the committee adjourned.]

[Prepared questions submitted to Douglas B. Wilson by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. No. I agree with the emphasis in the Goldwater-Nichols Act on jointness and the establishment of unified and specified combatant commanders. The effectiveness of joint operations has been clearly demonstrated in Iraq and Afghanistan. I strongly support continued and increased efforts to improve the jointness of our military forces.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. N/A.

RELATIONSHIPS

Question. If confirmed, what would your working relationship be with: The Secretary of Defense.

Answer. If confirmed, I anticipate having regular interaction with the Secretary in order to remain abreast of his insights, priorities, and decisions. I will offer him my counsel and stand ready to serve him on the full range of issues facing the Department from a communication perspective. I will assist the Secretary in fulfilling the Department's communications responsibilities to Congress, within and across the administration, to the general public, and—of critical importance—within the Department to civilian and military personnel.

Question. The Deputy Secretary of Defense.

Answer. If confirmed, I anticipate my relationship with the Deputy Secretary will be much the same as my relationship with the Secretary of Defense.

Question. The Under Secretaries of Defense.

Answer. My role—and the role of the entire Department of Defense (DOD) Public Affairs team—would be to provide communications counsel and support at all levels in the Department. The Under Secretaries play a critical role in policy development and implementation, and if confirmed, I would look forward to engaging with all of them to develop effective communication with Congress, within the administration and to their key public and private sector audiences.

Question. The Assistant Secretary of Defense for Legislative Affairs.

Answer. The Assistant Secretary for Legislative Affairs has set the highest standards and has assigned the highest priority to keeping Congress fully informed on all aspects of the Department. If confirmed, I'll look forward to working very closely with Assistant Secretary King to ensure that the Office of Public Affairs helps her and helps the Secretary to meet those standards regarding our communications with Congress on all national security and defense-related matters.

Question. The DOD General Counsel.

Answer. I take the legal responsibilities and obligations of public affairs work very seriously. If confirmed, I will be pro-active in working with the General Counsel and his office to ensure that our communication activities are implemented according to regulation and statute. I believe that it is particularly important during wartime that we communicate to Congress and to the broader public the legal framework and the many unique legal aspects of DOD activities.

Question. The Service Secretaries.

Answer. The Service Secretaries have a most important role in the department's internal communications in keeping with their title 10 responsibilities. They also interact regularly with Members of Congress and their staffs. If confirmed, I would work closely with them, and in close consultation with the service public affairs chiefs, to help and support them as they discharge these responsibilities, and—through the Defense Media Activity (DMA)—ensure communications consistency, clarity, and regularity.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. If confirmed, I would expect to work with the Chairman and with the relevant press and public affairs personnel of his office to help communicate with our forces across DOD, and with Congress and the public, as appropriate.

Question. The Members of the Joint Chiefs of Staff.

Answer. If confirmed, I would expect to work with the Chiefs as with the Service Secretaries, as appropriate and relevant to help communicate with our forces. In addition, I would look forward to working with the Chiefs to assist them in communicating the Department's messages and policies to Congress and the public, as appropriate.

Question. Senior Uniformed Officers Responsible for Public Affairs, including the Army's Chief of Public Affairs, Navy's Chief of Information; Marine Corps' Director of Public Affairs; and Air Force's Director of Public Affairs.

Answer. If confirmed, I anticipate frequent interaction with the senior Public Affairs professionals from the services. I believe these are critical relationships for the Assistant Secretary of Public Affairs; together, we must and will work to find the

best ways to gather facts and communicate information clearly, credibly, and consistently about the wide variety of programs, operations, and issues affecting the Department and Services.

Question. The Pentagon Press Corps.

Answer. As a former Principal Deputy Assistant Secretary of Defense for Public Affairs, I understand the importance of establishing a strong working relationship with the Pentagon Press Corps. If confirmed, I will work hard to ensure that my relationships with the members of the Pentagon Press Corps are based on mutual trust, fairness, and respect for the roles and responsibilities which define the respective positions we hold.

DUTIES

Question. DOD Directive 5122.05 of September 2008, describes the responsibilities and functions of the Assistant Secretary of Defense for Public Affairs (ASD(PA)).

What is your understanding of the duties and functions of the ASD(PA)?

Answer. I understand the responsibilities of the position outlined in the directive. In this position, if confirmed, I would serve as the principal staff assistant and advisor to the Secretary and Deputy Secretary of Defense for setting DOD policy and execution on news media relations, public information, internal information, community relations, public affairs and visual information training and audio visual matters, and for Department representation on inter-departmental communications matters.

Question. Assuming you are confirmed, what changes, if any, in the duties and functions of ASD(PA) do you expect that the Secretary of Defense would prescribe for you?

Answer. If confirmed, I do not anticipate changes in the duties and functions of the position as described in the directive at this time.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I have served in public and private sector roles in strategic communication, foreign policy, national security policy and public diplomacy. These include service as a Principal Deputy ASD(PA) in DOD, as a congressional director and senior advisor at the former U.S. Information Agency, as a congressional staffer and in the field as a Foreign Service Information Officer. I have also led global research-based communications efforts for private-sector clients such as Microsoft, and for the past 8 years have focused on identifying and bringing together successor generation leaders from around the world and from all walks of life in my capacity as Board Member and Executive Vice President of the non-profit Howard Gilman Foundation. Taken together, I believe this experience has given me a deep understanding of the importance of communicating fairly, credibly, accurately, and regularly with Congress, the American people and international audiences. I have learned in particular that communication is a two-way process, involving listening as well as transmitting information and messages.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next ASD(PA)?

Answer. I believe the next ASD(PA) will not only be responsible for effectively communicating Department information and messages to Congress, to the American public, and to international audiences—but he or she will also be responsible for working even more closely with colleagues and counterparts who also have communications responsibilities within the national security framework—diplomatic, intelligence, foreign assistance, public diplomacy, legal and financial, both within the administration and within Congress. All involved must work together to develop credible and consistent message frameworks as well as both rapid pro-active and rapid-response communications efforts within those frameworks. All of this must be done within a continually-changing technological environment shaped by the many communications and social networking tools available not just to government communicators but to individuals, groups and mass audiences. The challenge here will be to understand that these new tools are themselves not a “one-size-fits-all” panacea, but instead must be tailored for use when and where they can be effective, either singly or in combination with other communications tools.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I plan to make every effort to ensure that my daily activities and those of the entire Office of Public Affairs team are governed by DOD Directive 5122.05 and in particular by the longstanding Principles of Information now incorporated within that Directive. If confirmed, I also plan to make every effort to

reach out as appropriate to my counterparts and colleagues who share national security communications responsibilities—and to working with the Assistant Secretary of Defense for Legislative Affairs to reach out as appropriate to Congress—to focus on ways to better ensure that our individual and collective communications efforts are mutually reinforcing; play to the strengths we each bring to supporting America’s national security objectives; better understand the strengths and weaknesses of the new communications and social media tools in realizing our policy goals; and take into account the specific audiences we each are addressing, be they domestic and/or international, as we develop and implement our individual and collective communications efforts. We must ensure that those efforts are reliable, credible, trustworthy, and help accomplish the goals that the administration and Congress have set.

RESPONSIBILITIES

Question. DOD Directive 5122.05 provides that the ASD(PA) shall “ensure a free flow of news and information to the news media, the general public, the internal audiences of the Department of Defense, and the other applicable fora, limited only by the security restraints in DOD Directive 5200.1 and any other applicable statutory mandates or exemptions.”

What guidelines would you use, if confirmed, to determine what information can and cannot be released to the news media and the public?

Answer. The Department has longstanding Principles of Information, which are included as an enclosure to DOD Directive 5122.5. If confirmed, I would work to ensure that conclusions we reach regarding the dissemination of information are consistently based upon and reflect the principles outlined.

Question. Aside from restrictions related to classified and sensitive-source materials, if confirmed, what restrictions, if any, would you apply in approving material prepared for release by DOD officials?

Answer. As a general matter, the first principle of information is that it is “DOD policy to make available timely and accurate information so that the public, Congress, and the news media may assess and understand the facts about national security and defense strategy.”

There will be times when judgment is applied to a particular piece or class of information that warrants additional consideration on the basis of source, sensitivity of ongoing operations, the need to verify facts, and other factors. Judgments of this nature must be applied all the time, but the principle remains the same: accurate and fast.

Question. If confirmed, how would you attempt to ensure that media representatives are given maximum access to ongoing military operations in Iraq and Afghanistan in order to be able to provide fair and accurate reporting?

Answer. Perhaps the best and most effective way to ensure such access is to encourage news media to take full advantage of embedding opportunities. These opportunities were specifically designed to promote maximum access to ongoing military operation in Iraq and Afghanistan, and if confirmed, I would intend to continue this policy and facilitate these opportunities to the maximum extent possible.

CONTRACTOR PERFORMANCE OF INFORMATION OPERATIONS

Question. In October 2008, DOD announced a plan to award contracts in excess of \$300 million to U.S. contractors to conduct “information operations” through the Iraqi media.

What is your understanding of the appropriate scope of DOD information operations and the relationship between DOD information operations and the Department’s public affairs activities?

Answer. Information operations are distinct and separate from Public Affairs operations. Information operations encompass a wide variety of activities and capabilities that go far beyond efforts to engage local media.

I believe it is important that public affairs, information operations, and other disciplines that operate in the global information environment work closely together to achieve synchronized effects and prevent conflicting messages and information. It is my understanding that DOD has a standing committee, the Global Engagement Strategic Coordination Committee (GESCC), where stakeholders meet to share information and coordinate DOD activities in the information environment, as well as other fora and processes to ensure both internal Department and interagency coordination. It is my understanding that DOD is putting processes and mechanisms in place to ensure that influence efforts are disciplined, accountable, effective, and appropriately targeted.

Question. If confirmed, what role, if any, do you expect to play in determining the appropriate scope of DOD information operations through the media?

Answer. I would expect that my office will work closely with Information Operations to understand how Commanders are trying to shape their operational environment and ensure that information activities are complementary, synchronized, credible and support U.S. Government and DOD goals. I expect to work with offices across DOD through the GESCC and other internal and interagency forums to coordinate and manage DOD information activities.

Question. What is your view on the effectiveness of information operations conducted by the United States through the Iraqi media?

Answer. It is my understanding that Information Operations is not the only means by which the U.S. Government engages the Iraqi population via the Iraqi media. Public Affairs and key leader statements and interviews are just a few of the many other ways to make a message available to the media. Effectiveness is achieved when Public Affairs, Information Operations, and other disciplines closely coordinate their activities to ensure consistency; credibility and appropriateness of activities and messages.

Question. Do you believe that it is appropriate for the United States to pay for media campaigns to build up support for the government and the security forces of Iraq at a time when the Iraqi Government has a surplus of tens of billions of dollars?

Answer. I have limited knowledge of the Iraqi Government's resources. That said, I believe that building support among the population for Iraqi governmental institutions and the rule of law is essential to the success of the U.S. mission in Iraq. Toward that end, it may be appropriate at some level to ensure resourcing for communication campaigns to further that goal. I believe the emphasis should always be on reinforcing the Iraqi Government's capabilities to communicate to their people. As with any allocation of U.S. taxpayer resources, DOD must be mindful of its responsibilities to the taxpayers, and use good judgment when allocating our resources.

Question. Do you believe that the U.S. Government, or the Iraqi Government, should be responsible for developing a message to build up support for the government and security forces of Iraq, and for developing media campaigns for this purpose?

Answer. Ideally, the Iraqi Government should develop its message and we should work closely with them to support and assist them in getting that message to the Iraqi people. Programs that build support for the Iraqi Government and security forces lead to increased force protection for U.S. forces. The responsibility for force protection rests with our military commanders. We need to retain the ability to develop messages and communicate those messages effectively to protect our service-members and achieve our objectives—but it is my understanding that, as we continue the transition to full Iraqi control of security, the need for and appropriateness of independent U.S. campaigns in this arena is decreasing.

Question. In your view, is DOD's use of private contractors to conduct information operations through the Iraqi media appropriate?

Answer. Private contractors can be a valuable asset for DOD, providing access to skills and expertise (e.g. media content development, media campaign development, media production, linguistic services, and cultural assessments) that are not widely resident in U.S. Government agencies. That said, it is my understanding that, as we continue the transition to full Iraqi control of security, the need for and appropriateness of independent U.S. campaigns in this arena, including by private contractors, is decreasing. I also want to stress my firm belief in close and ongoing oversight of all contractor activities.

Question. Do you see a risk that a DOD media campaign designed to build up support for the government and security forces of Iraq could result in the inappropriate dissemination of propaganda inside the United States through the internet and other media that cross international boundaries?

Answer. I have been informed that U.S. military commanders disseminate content in the foreign target audience language, dealing with regional issues, on sites that are of interest to the target audience. Indeed, our commanders take significant measures to prevent "inappropriate dissemination inside the United States." That said, we live in a continuous global information environment, where any product that is disseminated will likely migrate around the world. In this environment, it is always possible that some products might be picked up by users in the United States and/or republished—while that is a legitimate concern, I would respectfully characterize this result not as "inappropriate dissemination of propaganda inside the United States", but as the unintended consequences of living in a communications environment where technology sometimes seems to be ahead of the efforts to

regulate its application and effects. I understand that DOD is working to enhance and increase its governance mechanisms for its information activities—both Information Operations (IO) and Public Affairs (PA)—and if confirmed, I will work closely with my IO counterparts in DOD to ensure that we make every effort to identify and correct cases where information activities directed at foreign audiences create confusion within the United States. If confirmed, I will also work to ensure that DOD web-based influence efforts are in compliance with DOD policy.

Question. A spokesman for the Iraqi Government has been quoted as saying that any future DOD information operations in the Iraqi media should be a joint effort with the Iraqi Government. According to a November 7, 2008 article in the Washington Post, the spokesman stated: “We don’t have a hand in all the propaganda that is being done now. It could be done much better when Iraqis have a word and Iraqis can advise.”

Do you believe that DOD information operations through the Iraqi media should be conducted jointly with the Iraqis?

Answer. I believe that all of our engagement now—not just information operations—with the Iraqi media should either be conducted jointly or at least closely coordinated with the Iraqis.

Question. Under what circumstances do you believe that it is appropriate for DOD to conduct information operations in a sovereign country without the knowledge and support of the host country and without acknowledgement of U.S. sponsorship?

Answer. I would not be able to give a knowledgeable or comprehensive response to this question without knowing more about current issues and implications relevant to presenting a meaningful response. If confirmed, I believe I will be able to respond to this question in a fuller and more knowledgeable way.

RETIRED MILITARY OFFICERS

Question. In April 2008, the New York Times reported that DOD had accorded special treatment and valuable access to retired military personnel who provided favorable commentary to the media, while not offering similar access to other analysts and cutting off access to some retired military personnel who provided less favorable commentary.

What is your view of the appropriate relationship between DOD and retired military personnel who offer commentary on DOD operations and activities to the media?

Answer. I am aware of the controversy that took place more than a year ago regarding the relationship between DOD and retired military personnel who offer commentary on DOD operations and activities to the media. Retired military personnel who offer commentary on DOD operations and activities to the media should be afforded the same access to publicly releasable information as members of the media in accordance with the principles of DOD Public Affairs. If confirmed, I will take a critical look at past practices so that we ensure equal access as we go forward.

Question. What is your view of the propriety of DOD providing preferred treatment or increased access to retired military personnel who provide favorable commentary to the media?

Answer. It is inappropriate and contrary to DOD policies to selectively benefit any individuals or groups, including retired military personnel, by providing them special treatment or increased access to DOD officials.

Question. What is your view of the propriety of DOD reducing access to retired military personnel who provide unfavorable commentary to the media?

Answer. Speedy and widespread access to DOD publicly releasable information must be made available to all, regardless of an individual’s point of view. Such access is essential to maintaining the trust and confidence of our citizenry, regardless of the media commentary that follows.

Question. Do you believe that DOD’s existing rules and regulations adequately address this issue, or are additional rules and regulations needed?

Answer. I don’t now know all of the Department’s existing rules and regulations relevant to this issue, but if confirmed, I’ll examine the Department’s existing policies and directives to ensure they appropriately address the issue of equal access to publicly releasable information.

PROFILING OF REPORTERS

Question. In August 2009, Stars and Stripes (S&S), the editorially independent daily newspaper for the military community, reported that DOD was using a Washington public relations firm to compile profiles of reporters covering U.S. military operations in Afghanistan. According to the article, the profiles included ratings and

pie charts purporting to depict whether the work of individual journalists was “positive,” “negative,” or “neutral,” as well as advice on how best to place a reporter with a military unit to ensure positive coverage and “neutralize” negative stories.

What is your view of the propriety of DOD rating journalists as “positive,” “negative,” or “neutral”?

Answer. While I am not familiar with all aspects of this case, I understand that the contract to assess reporters and their work had been issued by one particular command in Afghanistan and that the contract is no longer in effect. I don’t believe in any system that “rates” reporters based on a perception that their reporting is positive or negative. Our focus should be the accuracy of the facts conveyed, and if and when errors are made, we should act to correct the record.

DOD has a long history of enabling news media representatives of all kinds—print, photo, TV and radio—to view the Department’s operations first-hand, regardless of any perception that a particular reporter or his or her news product was “supportive” or “non-supportive” on a given military issue. If confirmed, I fully intend to continue in this tradition.

Question. In your view, should DOD be taking affirmative action to manage the placement of individual reporters to ensure positive coverage and neutralize negative stories?

Answer. No. In my view, we should never be a party to efforts to place so-called “friendly reporters” into embeds while blocking so-called unfriendly reporters.

Question. Do you believe that DOD’s existing rules and regulations adequately address this issue, or are additional rules and regulations needed?

Answer. I am not completely familiar with all of the DOD’s existing rules and regulations regarding this issue—particularly those which may have been designed and implemented after I completed my tenure as Principal Deputy ASD(PA). From what I do know, I believe DOD has an effective set of ground rules in place for the media to embed in a fair and impartial way. While I recognize there is not always a perfect relationship between the Department and the media or the military and the media, if confirmed, I will work to foster a mutual respect between the Department and the media for one another’s professional needs and do my utmost to strengthen and improve these working relationships.

PRINCIPLES OF INFORMATION AND PRIVACY INTERESTS

Question. Under the Principles of Information included in DOD Directive 5122.05, it is stated that “information will be withheld only when disclosure would adversely affect national security, threaten the safety or privacy of the men and women of the Armed Forces, or if otherwise authorized by statute or regulation.” The Privacy Act is one of the laws that control access to information in government systems of records, however, it is unclear about what standards the Department applies in determining what information would violate individual privacy and should be withheld.

What other standards, legal or otherwise, should be applied by the Department in determining what information relating to individuals who are involved in newsworthy incidents shall be made available to the public?

Answer. I believe in maximum disclosure and minimum delay consistent with the facts, circumstances and privacy and security considerations of each case. If confirmed, I would apply these principles, including to those cases that require the involvement of the Department’s Office of General Counsel.

Question. Under what circumstances, if any, do you believe the Privacy Act would justify withholding from public disclosure information regarding actions taken by senior DOD officials in their official capacity?

Answer. I recognize that DOD is required by law to protect the privacy of individuals—including DOD civilian and military employees and contractors. However, there are numerous mechanisms, such as the Freedom of Information Act which offer means by which information can be requested relating to official actions of DOD personnel. I believe the department has to strike the right balance between an individual’s right to privacy and the public’s right to know.

Question. Under what circumstances, if any, do you believe the Privacy Act would justify withholding information from Congress?

Answer. If confirmed, my focus would be on being responsive to Congress and the public. I would consult with department’s legal authorities for an assessment and guidance in any instance where Federal statute or government directives limit that ability.

STARS AND STRIPES

Question. S&S is an editorially independent news organization, but it is also authorized and funded in part by DOD. In the past, representatives of the Society of Professional Journalists have asserted that the Office of the Secretary of Defense (OSD) and the American Forces Information Service (AFIS) have attempted to improperly use command influence in shaping the editorial content of the S&S newspapers and Web site.

In your opinion, what is the appropriate journalistic role of the S&S newspapers and internet-based outlets within DOD?

Answer. S&S has a long and rich history of serving the military community. The S&S organization has been established to be journalistically and editorially independent, and I can see no reason to change that.

Question. What is your understanding of the role and responsibilities of the ASD(PA) and the Director of AFIS with regard to the operation of and reporting in the S&S newspapers?

Answer. DOD Directive 5122.11 prescribes clear oversight and policy guidance roles over S&S for both the ASD(PA) and the Director of DMA, the organization that replaced AFIS.

Question. The S&S Ombudsman serves as an independent advocate for the First Amendment rights of the organization's reporters and staff, as well as an intermediary between the staff, the Defense Department, the military commands and the readers.

Do you support the assignment of an independent Ombudsman for S&S?

Answer. Yes, I do support the role of an independent Ombudsman.

Question. What guidance would you provide, if confirmed, with regard to the role, responsibilities and functions of the S&S Ombudsman?

Answer. If confirmed, I expect to work with the Ombudsman and to rely upon him or her to provide advice and counsel on the proper functioning of the S&S.

Question. In the past, S&S Ombudsmen have reported that access to information varies from base to base and is a continuing issue for S&S reporters. The Ombudsman stated that the failure to revise and update the governing directive, DOD Directive 5122.11, dated October 5, 1993 (certified as current in 2004), "leaves open the chances of misunderstanding and conflict between the paper and commands over the role of S&S reporters, especially on base."

In your view, is the guidance for access of S&S reporters to sources and information on military installations clearly articulated in governing policy directives?

Answer. I have not reviewed governing policy directives since I concluded my tenure as Principal Deputy ASD(PA) in January 2001. If confirmed, I will review those policy directives to ensure there is clarity and consistency.

Question. If confirmed, will you agree to review DOD Directive 5122.11 and to revise and update it if warranted?

Answer. Yes.

Question. Rising costs of producing a newspaper, competition with the internet and commercial news sources, and budgetary pressures to cut costs have raised questions about the level of support that the Department and military commanders throughout the chain of command should give to S&S.

In your opinion, what efficiencies, if any, regarding business operations, operating expenses, sources of income, and DOD guidance regarding command sponsorship of need to be implemented to achieve more effective and efficient operations.

Answer. My understanding is that S&S has already taken a number of actions to streamline operations, conserve resources and save money. If confirmed, I will work to ensure that, at a time when financial resources are not unlimited, that this vital service continues to provide news and information to the military community as efficiently and cost-effectively as possible.

SOCIAL NETWORKING SITES AND DOD

Question. Social networking web sites such as Facebook, Twitter, and MySpace present unique challenges for the Armed Forces with respect to protection of classified or official information and vulnerability for hackers to gain access to military networks.

If confirmed, what will your responsibilities be with respect to establishing DOD-wide policies relating to access to social networking sites on military computers or phones?

Answer. It is my understanding that senior Department officials are currently reviewing a number of issues surrounding use of social networking sites and internet based capabilities and will be determining DOD-wide policies relating to access to social networking sites from military computer systems. The public affairs role will

be to provide policy and public affairs guidance on the best and most effective use of these communication tools.

Question. What do you view as the key issues in determining whether there should be a uniform DOD policy in this regard? Do you think that each Service should establish its own policies with respect to conditions for access to such networking sites?

Answer. To the extent Internet-based capabilities provide enterprise functionality, their use requires an enterprise-wide policy that will enable the joint collaboration that DOD needs to be successful in the current communications environment. Coordinated DOD policy on internet capabilities and social networking must take into account the real security and bandwidth concerns that apply to certain missions, and we must recognize that commanders in those situations must retain the flexibility to regulate their environments. If confirmed, I am prepared to help consider, develop and implement DOD policies within this framework.

REVIEW OF THE EARLY BIRD

Question. On a daily basis, the Office of the Secretary of Defense compiles current news articles from around the Nation and the world and provides them on the <http://ebird.osd.mil>.

Please describe the policies and review mechanisms currently in place that are relied on to select articles for publication in the Early Bird?

Answer. The Early Bird aims to provide a representative, balanced and impartial sampling of articles, broadcast segments, and online reporting/commentary reflecting important developments on the key issues with which the Defense Department is dealing.

There are broad guidelines to ensure that the Early Bird presents timely and accurate news and media commentary. My understanding is that the ASD(PA) and other members of the OSD/PA team regularly review Early Bird procedures to ensure that this daily news compendium remains useful to senior DOD decisionmakers and that it adapts to the changing news media landscape.

Question. What do you consider to be the appropriate objectives in publishing the Early Bird and, if confirmed, what standards would you rely upon to achieve these objectives?

Answer. I believe the Early Bird should provide a daily news compendium that provides an objective, representative sampling of news and commentary reflecting important developments on the key short- and long-term issues with which the Defense Department is dealing. The information should be chosen on a non-political basis and should be timely and relevant. If confirmed, I will make every effort to ensure that the Early Bird gives its readers a representative, balanced and impartial daily monitor of defense-related newspaper, broadcast, cable, and online (including blogs) news and opinion.

FREEDOM OF INFORMATION ACT

Question. If confirmed, what would your role and responsibilities be, if any, with regard to DOD's implementation of the requirements and interpretation of the Freedom of Information Act?

Answer. If confirmed, I would do my part to ensure that information sought under the act would be released expeditiously, although it is my understanding that Washington Headquarters Services is the DOD proponent responsible for the Freedom of Information Act program.

Question. If confirmed, what responsibilities would you have within DOD under the Privacy Act and how would you fulfill those responsibilities?

Answer. Public officials across Government have an obligation to respect and protect the privacy of individuals. The need to provide information to the public quickly and accurately in accordance with the principles of information must always take into account the importance we must attach to not violating the privacy of individuals as a result of disclosing that information.

If confirmed, I will work to ensure that the Department's communications and public affairs personnel understand their obligations and that training is available to ensure that.

DETAINEE PHOTOS

Question. In October 2008, the U.S. Court of Appeals for the Second Circuit ruled in favor of a Freedom of Information Act request regarding photographs purportedly showing the abuse of detainees in Iraq and Afghanistan. In October 2009, Congress passed and the President signed a statute authorizing DOD to withhold such photographs from disclosure if such disclosure would endanger U.S. troops serving

abroad. After the Secretary of Defense signed the required certification on November 30, 2009, the Supreme Court vacated the Second Circuit ruling.

What is your view of the extent to which photographs and other information regarding U.S. military operations should be withheld from the public and the press on the ground that the disclosure of such photographs and information would endanger U.S. troops serving abroad?

Answer. I understand that current DOD media ground rules for combat operations are based on two important and overriding principles: protecting the operational security of our forces and preserving the sanctity of our next-of-kin notification process. I believe these principles, and not questions regarding potential embarrassment that are not directly linked to protecting the operational security of our forces, should remain the guiding factors. I also believe strongly that the families of those killed or wounded in service of our country should be notified, in person whenever possible, by uniformed representatives, not notified through news media reports. The Defense Department and the members of the press corps each have roles and responsibilities that define their actions, and each are responsible for exercising good judgment in carrying out those roles and responsibilities. I believe that news organizations should apply those standards and take into account the wishes of the family before publishing photos of dead or mortally wounded servicemembers.

Question. How, in your view, should we draw the line between the withholding of information to protect U.S. troops and the withholding of information to save the United States from potential embarrassment over improper or inappropriate conduct?

Answer. I believe the DOD Principles of Information appropriately draw that line. Those Principles state, in part, that information will not be classified or otherwise withheld to protect the Government from criticism or embarrassment but it does allow for information to be withheld when disclosure would adversely affect national security, threaten the safety or privacy of U.S. Government personnel or their families, violate the privacy of the citizens of the United States, or be contrary to law.

Question. Do you believe that the Freedom of Information Act, the Privacy Act, and DOD implementing policies adequately address this issue, or are additional statutory changes or regulatory guidance needed?

Answer. With the additional authorities granted by the President, I think the current rules, regulations, and authorities now in place allow the Department to conduct military operations with the maximum amount of transparency possible, addressing the need to “make available timely and accurate information so that the public, Congress, and the news media may assess and understand the facts about national security and defense strategy”, as outlined in the Principles of Information, while also fulfilling the very real need to do everything we can to safeguard the lives of our troops. If confirmed, I would plan to work on an ongoing basis with the Department’s legal authorities to ensure that the Freedom of Information Act, the Privacy Act and DOD implementing policies are reviewed regularly and, when or if necessary, updated to continue to meet these standards.

AMERICAN FORCES RADIO AND TELEVISION SERVICE

Question. DOD Regulation 5120.20–R includes in the mission of the American Forces Radio and Television Service (AFRTS) a responsibility “(t)o provide U.S. military members, DOD civilians, and their families stationed outside the Continental United States and at sea with the same type and quality of American radio and television news, information, sports, and entertainment that would be available to them if they were in the CONUS.” In describing policy for political programming, this regulation states “All AFRTS political programming shall be characterized by its fairness and balance” and shall maintain “equal opportunities” for political programs.

What is your understanding of the term “political programming” as used in DOD Regulation 5120.20–R and how it applies to programs featuring partisan political commentary?

Answer. My understanding is that AFRTS, like all U.S. radio and television networks and stations, must follow Federal Communications Commission (FCC) policies and definitions. The FCC defines “political programming” as programming paid for by a political candidate or organization. If confirmed, I shall ensure that AFRTS continues to adhere to the FCC policies on Political Broadcasting and Cablecasting, which requires “equal opportunities” for political candidates and organizations.

Question. What is your understanding of the concept of “fairness and balance” in the context of the Armed Forces and AFRTS?

Answer. My understanding is that “Fairness and Balance” requires AFRTS to provide an impartial selection of political programming chosen from all U.S. national

commercial and public networks, and that AFRTS and its outlets maintain the same “equal opportunities” balance offered by these sources.

Question. What is your understanding of the process and procedures used to select and oversee political programming broadcast on the AFRTS network?

Answer. My understanding is that there are published policies and procedures in place within AFRTS to ensure that the decisionmaking process and procedures are properly documented and meet the requirements of applicable DOD directives and regulations for providing uncensored and “fair and balanced” programming for the AFRTS audience. If confirmed, I will actively work to ensure ongoing review that these procedures are implemented.

Question. What effect do listener surveys and statistical data regarding national popularity, if any, have on program selection? In your view, what effect should they have?

Answer. My understanding is that AFRTS conducts audience surveys at both the worldwide and local level. I have been informed that the results of these surveys are combined with weekly U.S. national programming ratings from Nielsen (television), Arbitron (radio), and monthly ratings from Talkers Magazine (radio talk/commentary programs) as guides in selecting programming for distribution on AFRTS. Since the AFRTS mission is to provide the best and most popular American television and radio programming to its audience, these surveys, the AFRTS demographics, and national ratings are important tools for determining AFRTS programming selection and scheduling, and should continue to be among the important barometers in ensuring that AFRTS provides fair and balanced programming for its listeners.

Question. If confirmed, how will you ensure that the requirement for fairness and balance and equal opportunity in political programming is fulfilled?

Answer. I believe that the dedicated corps of civil servants and Active Duty military personnel who are responsible for AFRTS programming have made every effort to ensure the fairness and balance of AFRTS programming for over 67 years. I have great respect for the men and women who serve in both civilian and military capacities at the Department, including the men and women responsible for AFRTS programming, and if confirmed, I will both rely on their professionalism and experience, and ensure that they continue to comply with the applicable DOD directives and regulations.

AMERICAN FORCES INFORMATION SERVICE

Question. American Forces Information Service (AFIS) produces news, feature articles, and television reports on all aspects of military life. These products focus on what senior defense leaders are saying on all aspects of military life. News and feature articles are uploaded throughout the day, 7 days a week. Television news reports are available daily on the Web and are broadcast on the Pentagon Channel.

In your view, what long-term goals should the Department support for AFIS?

Answer. I believe that the Department long-term goals for DMA should be that DMA provide the very best internal communications services and products possible, and that it is fully resourced to accomplish this mission. (See below for an explanation of the transition from AFIS to DMA)

Question. If confirmed, would you support expanding or increasing AFIS services?

Answer. If confirmed, my intent in this area would be to ensure DMA adopts and maximizes the use of the most relevant and effective media technology; e.g. social media, to communicate the Department’s policies, programs and activities to the Department’s internal audience. (See below for an explanation of the transition from AFIS to DMA)

Question. In December 2008, the DOD Inspector General reported that Assistant Secretaries of Defense for Public Affairs had failed to appoint an AFIS Director for more than 7 years. The Inspector General reported that this failure had allowed the misuse of AFIS budgetary resources to support OASD(PA) programs, jeopardized AFIS resources, and subjected those resources to abuse.

If confirmed, what steps if any would you take to ensure appropriate segregation of duties between the policy and oversight functions in the OASD(PA) and the operational functions that AFIS performs?

Answer. First, it is my understanding that the 2005 Defense Base Closure and Realignment Commission recommendations required the DOD to consolidate Service Media Activities into a DOD Field Activity under the ASD(PA)—with the new Defense Media Activity (DMA) to be located at Fort Meade, MD. As a result of this consolidation, on October 1, 2008, AFIS and Service personnel and resources were placed under operational control of DMA (no longer AFIS). My understanding is that new DOD directives published recently for the OASD(PA) and DMA organiza-

tions, and guidance provided previously by the Principal Deputy ASD for Public Affairs have already provided policies and made organizational changes that ensure an appropriate segregation of the policy and oversight functions in OASD(PA) and the operational duties of DMA. If confirmed, I will continue to enforce those policies and sustain the organizational changes.

AMERICA SUPPORTS YOU

Question. In November 2004, DOD established the America Supports You (ASY) program, with the stated objective of showcasing and communicating to U.S. military members the support of the American people, as expressed by individuals and through community groups, corporations, businesses, and other organizations. In December 2008, the DOD Inspector General reported that the Office of the ASD(PA) had inappropriately transferred funds to S&S to finance ASY activities; awarded more than \$8 million in contracts to a public relations firm managed by a close friend of a senior official in the office; allowed the firm to use the ASY name and logo to collect monetary donations for a privately-managed ASY fund; engaged in inappropriate fundraising activities, including the solicitation of contributions from corporations; and used the ASY program to solicit support from celebrities and the media.

What is your understanding of the current status of the ASY program?

Answer. It is my understanding that the ASY program has been reviewed and redesigned as a communications outreach initiative that is part of the broader DOD Community Relations mission. But I am not familiar with all of the specifics of the redesigned program.

Question. What is your view of the program?

Answer. I am not familiar with the details of the ASY program as currently constituted. I believe that it is important to make sure that our men and women in uniform know what thousands of individual citizens, community groups, businesses and others are doing to support them and their families both at home and abroad. But any programs through which the Department communicates that information to the military must be designed and administered in financially and legally responsible ways. If confirmed, I will review the Inspector General Audit report and ensure appropriate internal management controls are in place so that any and all community relations initiatives are carried out within the framework of DOD policies and regulations.

Question. What role do you believe DOD should play in engaging with community groups, corporations, businesses, and individuals to solicit or encourage support for military members engaged in missions overseas?

Answer. Having served as the Principal Deputy ASD(PA), I know that the civilian and military staff who works in the Office of Community Relations work very hard to foster public awareness and understanding of DOD missions, personnel, facilities, equipment and programs through various activities. Engaging with key sectors of U.S. society enables the Office of Community Relations to provide information, facts and figures that promote that awareness and understanding. When members of the public ask how they can help our men and women in uniform, the Department helps to serve the men and women of the military by being able to respond to those questions, and inform the public about ways in which they can engage and support the troops and their families.

Question. To what extent do you believe it is appropriate for DOD to engage public relations firms to assist it in engaging with the American public in support of military members engaged in missions overseas?

Answer. I believe that private contractors can often provide access to skills and expertise that may not be readily available in the Department. However, there should be appropriate oversight of all contractor activities.

Question. Do you believe that DOD's existing rules and regulations adequately address these issues, or are additional rules and regulations needed?

Answer. I am not familiar with changes or updates that may or may not have been made to existing DOD rules and regulations since I concluded my tenure as Principal Deputy ASD(PA). At this point, it is my sense that the Department's existing rules and regulations do address the issue of fostering community relations and public awareness of DOD missions, people, facilities, equipment, and programs. However, I believe that the public and the military are best served by a process of ongoing policy review, to ensure that as the world and missions change, the Department can be adaptable. If confirmed, I would be committed to regular evaluation of organizational structures and effective use of internal management controls to ensure that Public Affairs policies, programs, and guidelines remain relevant, balanced, and fair.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the ASD(PA)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee of Congress, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Question for the record with answer supplied follows:]

QUESTION SUBMITTED BY SENATOR ROLAND W. BURRIS

RELEASE OF PHOTOS

1. Senator BURRIS. Mr. Wilson, what do you envision will be your role in addressing whether photographs purportedly showing the abuse of detainees in Iraq and Afghanistan should be released to the public and whether doing so will endanger U.S. troops serving abroad?

Mr. WILSON. Department of Defense Directive 5122.05 outlines the responsibilities and functions of the Assistant Secretary of Defense for Public Affairs as the Principal Staff Assistant and advisor to the Secretary and Deputy Secretary of Defense for communications and media relations including news media relations, public liaison, and community relations. I believe that directive outlines the role I would play, if confirmed, in addressing whether such photographs should be released to the public and whether doing so will endanger U.S. troops serving abroad.

Within that framework, I also pledge to adhere, if confirmed, to the Principles of Information encoded in Directive 5122.05, which state that "Information will not be classified or otherwise withheld to protect the Government from criticism or embarrassment. Information will be withheld only when disclosure would adversely affect national security or threaten the safety or privacy of the men and women of the Armed Forces."

With the additional authorities granted by the President, I think the current rules, regulations, and authorities now in place allow the department to conduct military operations with the maximum amount of transparency possible, while also fulfilling the very real need to do everything we can to safeguard the lives of our troops.

[The nomination reference of Douglas B. Wilson follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
December 3, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Douglas B. Wilson, of Arizona, to be an Assistant Secretary of Defense, vice Dorrance Smith, resigned.

[The biographical sketch of Douglas B. Wilson, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DOUGLAS B. WILSON

EDUCATION

College:

1968–1972: Stanford University, Stanford, CA: Bachelor's degree in political science, Phi Beta Kappa

Graduate School:

1972–23: Fletcher School of Law and Diplomacy, Tufts University, Medford, MA, Master's degree in international relations

EMPLOYMENT RECORD

Current Job:

June 2009–present: Executive Vice President (Policy), The Howard Gilman Foundation

Previous Jobs:

July 2007–June 2009: President, The Leaders Project
 September 2005–September 2007: Vice President and Managing Director, Seattle Office, Penn, Schoen & Berland;

- September 2007–April 2008, Senior Consultant, Penn, Schoen & Berland, LLC

March 2002–September 2005: Vice President, The Cohen Group

- May–November 2004: Arizona State Director, Kerry-Edwards 2004

January 2001–March 2002: Vice President for Strategic Development, Business Executives for National Security

July 1997–March 1999; June 2000–January 2001 –Deputy Assistant Secretary of Defense for Public Affairs and Principal Deputy Assistant Secretary of Defense for Public Affairs

March 1999–June 2000: Political Director, Democratic Leadership Council

January–July 1997: Senior Advisor, U.S. Information Agency

May–November 1996: Arizona State Director, Democratic Coordinated Campaign

January 1993–May 1996: Director, Office of Congressional and Intergovernmental Affairs, U.S. Information Agency

May 1989–January 1993: Founder and President, Douglas Wilson & Associates, Inc.

August 1987–May 1989: Chief of Trade and Protocol, City of Phoenix, and Executive Director, Phoenix Sister Cities Commission (Note: I also served in both positions on contract with my company, Douglas Wilson & Associates, from May 1989–June 1992)

June 1981–May 1987: Foreign Policy Advisor to Senator Gary Hart

- Served with the “Hart for President” campaign 1983–June 1984

October 1974–June 1981: Foreign Service Information Officer, U.S. Information Agency

- Director, American Cultural Center and Deputy Public Affairs Officer, U.S. Consulate-General, Naples, Italy (1974–1975)
- Deputy Program Officer, U.S. Embassy, Rome, Italy (1975–1977)
- Assistant Cultural Affairs Officer, U.S. Embassy, London (1977–1979)
- First Secretary for Press and Information, U.S. Embassy, London (1979–1981)

Consultancy:

2002–December 1, 2009: Consultant (communications) for The Boeing Company

September 2008–April 2009: Periodic consultant (communications) for Compass Partners (Sammamish, Washington)

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details

the biographical, financial and other information of the nominee. The form executed by Douglas B. Wilson in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228
Washington, DC 20510-6050
(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM
BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Douglas Barry Wilson.
2. **Position to which nominated:**
Assistant Secretary of Defense for Public Affairs.
3. **Date of nomination:**
December 3, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
November 29, 1950; Tucson, AZ.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Divorced since 1987, ex-wife: Jane Daniel.
Partner since 1996: Thomas W. Wharton.
7. **Names and ages of children:**
None.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
1964-1968: Rincon High School, Tucson, AZ—high school diploma.
1968-1972: Stanford University, Stanford, CA: Bachelor's degree in Political Science, Phi Beta Kappa.
1972-1923: Fletcher School of Law and Diplomacy, Tufts University, Medford, MA—Master's degree in international relations.
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
June 2009-present: Executive Vice President (Policy), The Howard Gilman Foundation. Work from home office in Delaware. Foundation is located in New York City, NY.
June 2002-Dec. 2009: Consultant (communications),The Boeing Company. Work from home office in Delaware. Reporting offices are in Arlington, VA (Rosslyn and Crystal City).
May 2002-June 2009: President, The Leaders Project, nonprofit organization focusing on identifying and bringing together successor generation leaders from around the world and from all walks of life to promote the development of new networks and new thinking on issues of current and continuing international concern.

I am cofounder and have been president of the organization since its inception in 2002. I was paid by the organization from July 2007–June 2009. Worked from home in Seattle, WA, July 2007–June 2008. Worked from home in Rehoboth Beach, DE, June 2008–June 2009.

September 2005–April 2008. Penn, Schoen & Berland, LLC. (PSB) a research-based strategic communications firm. I served full-time as Vice President and Managing Director of the firm's Seattle Office from September 2005–September 2007, when I became a part-time employee of the firm in order to turn my attention full time to The Leaders Project. Worked from PSB offices in Bellevue, WA, from September 2005–September 2007. Worked from home in Seattle, WA from September 2007–April 2008.

March 2002–September 2005: Vice President, The Cohen Group (TCG) a strategic consulting firm headed by former U.S. Secretary of Defense William Cohen. My work was primarily in strategic communications. Worked from TCG offices in Washington, DC.

- May–November 2004. With concurrence of my employer, I took a leave of absence to serve as Arizona State Director for the 2004 Kerry-Edwards Presidential campaign, working from Arizona Democratic Party offices in Phoenix, AZ.

January 2001–March 2002: Vice President for Strategic Development for Business Executives for National Security (BENS), a nonprofit organization which brings together business executives from across the Nation to apply their experience and expertise to national security issues. I worked from BENS offices in Washington, DC.

July 1997–March 1999; June 2000–January 2001: First as Deputy Assistant Secretary of Defense for Public Affairs, then as Principal Deputy Assistant Secretary of Defense for Public Affairs. I worked at the Pentagon.

March 1999–June 2000: Political Director for the Democratic Leadership Council (DLC). I worked at DLC headquarters in Washington, DC.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

January 1993 - Assistant to USTR-designate. Assisted U.S. Trade Representative-designate Mickey Kantor during Bush-Clinton transition period, including help as requested with organization of USTR office and Senate confirmation proceedings.

August 1987–June 1992 - Chief of Trade and Protocol and Executive Director, Phoenix Sister Cities Commission, City of Phoenix, AZ. First as a free-lance contractor, then as head of consulting firm (see above), created and developed a fully-integrated international office for the City of Phoenix and coordinated Phoenix Sister Cities Commission programs.

October 1994–July 1997 - U.S. Information Agency. From October 1994–June 1996, I was the Director of Congressional and Intergovernmental Affairs. From January 1997–July 1997, I was a senior advisor to the director.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Founding Chairman, Board of Directors, The Public Diplomacy Collaborative at Harvard University

Executive Vice President (Policy), The Howard Gilman Foundation

Member, Board of Directors, Third Way (nonprofit organization)

Member, Board of Directors, National Security Network (nonprofit organization)

Member, Board of Directors, HDI (Humpty-Dumpty Institute) (nonprofit organization)

Member, Board of Directors, U.S. Center for Citizen Diplomacy (nonprofit organization)

Periodically do consulting work for Compass Partners, a research-based communications partnership based in Seattle, WA (Sammamish).

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

See answer to question 11 above.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

September–November 1992: Volunteered as Political Director for the Arizona Clinton-Gore presidential campaign.

June–November 1996: Director, Arizona Democratic Coordinated Campaign

May–November 2004: Arizona State Director, Kerry-Edwards 2004 presidential campaign

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

May–November 2004: Arizona State Director, Kerry-Edwards 2004 presidential campaign

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

\$2,000 - 2004 Kerry for President
 \$2,000 - 2004 Lieberman for President
 \$1,000 - 2004 Gephardt for President
 \$500 - February 23, 2004, Arizona Democratic Party
 \$1,000 - March 30, 2004 Erskine Bowles for U.S. Senate (NC)
 \$500 - May 13, 2004 - Raul Grijalva for U.S. Congress (AZ)
 \$1,500 - June 25, 2004 - Raul Grijalva for U.S. Congress (AZ)
 \$500 - May 3, 2005 - Friends of Martin O'Malley
 \$1,000 - June 27, 2005 - Arizona Democratic Party
 \$1,000 - September 28, 2005 - Cantwell 2006
 \$500 - April 24, 2006 - Friends of Tammy Duckworth
 \$1,000 - October 23, 2006 - Harry Mitchell for Congress
 \$2,300 - July 14, 2007 - Hillary Clinton for President
 \$2,300 - October 18, 2007 - Hillary Clinton for President (Contribution returned after her campaign ended)
 \$1,000 - February 26, 2008 - Jeanne Shaheen for Senate
 \$2,300 - June 19, 2008 - Obama for America
 \$2,300 - September 22, 2008 - Obama Victory Fund
 \$1,000 - May 19, 2009 - Richard Aborn for District Attorney (NYC)
 \$1,000 - September 29, 2009 - Martin O'Malley Campaign
 \$500 - September 2009 - Tommy Sowers for Congress
 \$1,000 - November 16, 2009 - Pete for Indiana, Peter Buttegieg Campaign for Indiana State Treasurer

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Tucson Daily Citizen Annual Community Achievement Award (1968)
 Nominee, USIA's Leonard Marks Foundation Award for Creative Diplomacy (1980)

USIA Nominee, William Jump Award for Exemplary Achievement in Public Administration (1981)

American Political Science Association Congressional Fellowship (1981–82)
 Department of Defense Medal for Distinguished Public Service (1999 and 2001)
 U.S. Coast Guard Meritorious Public Service Award (1999)

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

"Soviet-Egyptian Relations: Opportunities and Complications," *Stanford Quarterly Review* (winter 1972).

"British Television Through Foreign Eyes," *Television: The Journal of the Royal Television Society* (London) (May–June 1981 issue).

"An article I wrote about the withdrawal of former U.S. Senator Gary Hart from the 1988 presidential race appeared in several publications in May 1987, including the *Arizona Republic* and the *International Herald Tribune*.

I worked in Phoenix from 1987 until 1992, and wrote several guest opinion pieces for *The Arizona Republic*, including articles on Senator Hart, foreign policy and Arizona economic development.

Dallas Morning News: November 1, 2003: Jill Schuker & Doug Wilson: Public diplomacy demands investment in people.

Des Moines Register, August 25, 2008, Guest column: Use public diplomacy to boost U.S. image.

Change for America Transition Book - Center for American Progress (November 2008) - I wrote the chapter on Public Diplomacy.

Huffington Post - I am a periodic guest blogger on the Huffington Post, and have written three blogs to date:

August 15, 2009: Remembering Ken Bacon

August 8, 2005: PeterJennings

July 10, 2005: Campaign for American Leadership in the Middle East

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

I have given a number of presentations, but none were formal or from prepared text, and none were on topics directly related to the position for which I've been nominated.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

DOUGLAS B. WILSON.

This 14th day of December, 2009.

[The nomination of Douglas B. Wilson was reported to the Senate by Chairman Levin on February 2, 2010, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on February 11, 2010.]

[Prepared questions submitted to Dr. Malcolm Ross O'Neill by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. This milestone legislation is now more than 20 years old and has served our Nation well. I believe that the framework established by Goldwater-Nichols has significantly improved inter-Service and joint relationships and promoted the effective execution of responsibilities. However, the Department, working with Congress, should continually assess the law in light of improving capabilities, evolving threats, and changing organizational dynamics. Although I am currently unaware of any reason to amend Goldwater-Nichols, if confirmed, I hope to have an opportunity to assess whether the challenges posed by today's security environment require amendments to the legislation.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. As noted above, I have no specific proposals to modify Goldwater-Nichols. As with any legislation of this magnitude, however, I believe it may be appropriate to review past experience with the legislation with a view toward identifying any areas in which it can be improved upon, and then consider with Congress whether the act should be revised.

Question. Do you see the need for any change in the roles of the civilian and military leadership of the Department of the Army regarding the requirements definition, resource allocation, and acquisition processes?

Answer. I have no specific proposals regarding the roles and assigned missions at this time, however, it may be appropriate to review roles of the civilian and military participants in this process with a view toward identifying areas that can be improved upon.

Question. What do you believe should be the appropriate role of the Service Chiefs in the requirements, acquisition, and resource-allocation process?

Answer. It is my belief that the existing role of Service Chiefs in overseeing the Joint Requirements Oversight Council (JROC) in validating joint capabilities requirements is appropriate. Similarly, their collaboration in the resource allocation process is very important.

Question. What do you believe should be the appropriate role of the combatant commanders in the requirements, acquisition, and resource-allocation processes?

Answer. In my view the existing warfighting responsibilities of combatant commanders, and their role as cited in the Defense Department Reorganization Act of 1986, is appropriate. I support the Weapon Systems Acquisition Reform Act language that the input of combatant commanders must be considered in the development of joint requirements.

Question. Do you see the need for any changes in the structure or operations of the JROC?

Answer. I have no current basis to assess the effectiveness of either the structure or organization of the JROC at this time. However, based upon my past interaction with the JROC, I always felt that the USD(ATL) should have been a full member for the purpose of providing technical insights on various system options. Also, under certain circumstances, it would be helpful for Service Acquisition Executives to be invited to participate in the JROC.

DUTIES

Question. Section 3016(b)(5)(A) of title 10, U.S.C., states that the principal duties of the Assistant Secretary of the Army for Acquisition, Logistics, and Technology (ASA(ALT)) shall be the overall supervision of acquisition, technology, and logistics matters of the Department of the Army.

What is your understanding of the duties and functions of the ASA(ALT)?

Answer. The ASA(ALT) is one of five assistant Secretaries of the Army. The principal duty of the ASA(ALT) is the overall supervision of acquisition, logistics, and technology matters within the Department of the Army. The ASA(ALT) serves, when delegated, as the Army Acquisition Executive, the Senior Procurement Executive, the Science Advisor to the Secretary, and as the senior research and development official for the Department of the Army. The ASA(ALT) also serves, when delegated, as the Army Science Advisor to the Secretary, and as the senior research and development official for the Department of the Army. The ASA(ALT) appoints, manages, and evaluates program executive officers and direct-reporting program managers and manages the Army Acquisition Corps and the Army Acquisition Workforce. The ASA(ALT) executes the DA procurement and contracting functions, including exercising the authorities of the agency head for contracting, procurement, and acquisition matters pursuant to laws and regulations, the delegation of contracting authority; and the designation of contracting activities. He or she oversees the Army Industrial Base and Industrial Preparedness Programs and ensures the production readiness of weapon systems. The ASA(ALT) oversees all DA logistics management functions, including readiness, supply, services, maintenance, transportation, and related automated logistics systems management.

Question. What recommendations, if any, do you have for changes in the duties and functions of the ASA(ALT), as set forth in section 3016(b)(5)(A) of title 10, U.S.C., or in Department of Defense (DOD) regulations pertaining to functions of the ASA(ALT)?

Answer. I have no specific recommendations at this time. If confirmed, however, I look forward to the opportunity to serve in the position before recommending any potential changes in the duties and functions of the ASA(ALT).

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. Most recently, I served as a consultant and Chairman of the Board on Army Science and Technology (S&T) of the National Academies, responsible for leading a team of scientists, engineers, and policy experts who discern key Army technical issues and define the areas in which studies by the National Research Council can assist the Army to exploit advanced technologies in Army systems.

From 2000 until my retirement from Lockheed Martin in 2006, I was Vice President and Chief Technical Officer of Lockheed Martin Corporation and provided staff supervision for Lockheed Martin's approximately 60,000 engineers and scientists,

planned the independent R&D investment portfolio across the corporation, and sponsored cooperative technology development efforts with GE Global Research Center and Sandia National Laboratory.

My acquisition, logistics, and technology experience spans 43 years. I was a career Army officer serving for 34 years, having served as a uniformed acquisition specialist at the end of my career. I have a Ph.D. in Physics from Rice University, was a program manager for Defense Advanced Research Projects Agency (DARPA), the North Atlantic Treaty Organization (NATO), the Army, and the Strategic Defense Initiative Organization. I commanded the Army Laboratory Command and served in the Office of the Assistant Secretary of the Army for Research, Development and Acquisition. As Director of the Ballistic Missile Defense Organization, I was head of a contracting agency. All of these positions have cumulatively prepared me for this position if confirmed.

Question. What background or experience do you have in the acquisition of major weapon systems?

Answer. I was a program manager for DARPA, NATO, the Army, and the Strategic Defense Initiative Organization. Also, I was Director of the Ballistic Missile Defense Agency, an independent procurement activity reporting directly to the U.S. Department of Agriculture.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the ASA(ALT)?

Answer. I believe that my experience provides a unique mix of qualifications that will enable me, if confirmed, to discharge the responsibilities of the Office. However, one must become familiar with the current situation and should always be looking for opportunities to expand knowledge to make well-informed decisions. If confirmed, I welcome the opportunity to visit Iraq and Afghanistan to better understand the acquisition footprint and how we can better support the soldiers on the ground.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of Defense and the Secretary of the Army would prescribe for you?

Answer. If confirmed, I would expect that I would be held accountable for the Army's acquisition, logistics, and technology efforts.

RELATIONSHIPS

Question. In carrying out your duties, what would be your relationship with: The Secretary of the Army.

Answer. If confirmed, I will support the Secretary of Army's priorities in acquisition, logistics, and technology.

Question. The Under Secretary of the Army.

Answer. If confirmed, I will support the Under Secretary of the Army, both in his role as the Under Secretary and in his role as Chief Management Officer.

Question. The Chief of Staff of the Army.

Answer. If confirmed, I will work with the Chief of Staff of the Army to ensure that our soldiers receive world class equipment and support to perform their missions within available resources.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)).

Answer. If confirmed, I will work with the USD(AT&L) in connection with Army acquisition, logistics, and technology programs, and I will support the USD(AT&L) in the discharge of his responsibility to supervise DOD acquisition. I assume that my duties as Army Acquisition Executive will bring me into close working contact with the USD(ATL), and I am confident that our collaboration will be very beneficial for the Army and DOD.

Question. The Director of Cost Assessment and Program Evaluation.

Answer. If confirmed, I will work with the Director of Cost Assessment and Program Evaluation to support their efforts to provide DOD with independent analysis and resourcing assessments for weapons systems programs.

Question. The Director of Operational Test and Evaluation.

Answer. If confirmed, I will work with the Director of Operational Test and Evaluation to ensure appropriate operational testing oversight for Army acquisition programs.

Question. The Director of Procurement and Acquisition Policy.

Answer. If confirmed, I will work with the Director of Procurement and Acquisition Policy to ensure appropriate oversight for Army acquisition programs, procurement and contracting.

Question. The Director of Defense Research and Engineering.

Answer. If confirmed, I will work with the Director of Defense Research and Engineering to rapidly field technologies and capabilities to support ongoing operations and to ensure the Army and the Nation maintain a strong technical and engineering foundation to reduce the cost, acquisition time, and risk of our major defense acquisition programs.

Question. The Director of Systems Engineering.

Answer. If confirmed, I will rely on the expertise and advice of the Director, Systems Engineering, encourage early involvement in supporting acquisition programs, and consider his independent assessments and recommendations in decisions pertaining to Major Defense Acquisition Programs.

Question. The Director of Developmental Testing.

Answer. If confirmed, I will work with the Director of Developmental Testing for oversight of developmental testing for Army acquisition programs.

Question. The Joint Requirements Oversight Council.

Answer. If confirmed, I will work with the JROC to ensure maximum collaboration with other Military Services for joint programs to the benefit of the Department.

Question. The Service Acquisition Executives of the other Military Departments.

Answer. If confirmed, I will collaborate with the other Service Acquisition Executives to share information about relevant acquisition programs, seek opportunities to improve acquisition processes, and support the policies and practices of the Department.

Question. The Assistant Secretary of the Army for Civil Works.

Answer. If confirmed, I will work with the Assistant Secretary of the Army for Civil Works where relevant to Army acquisition programs and management of contracting.

Question. The Chief Systems Engineer of the Army.

Answer. If confirmed, I will ensure that the Chief Systems Engineer will become a highly visible and vital player within the ASA(ALT) office.

Question. The Commander of the Defense Contract Management Agency.

Answer. If confirmed, I will work with the Commander of the Defense Contract Management Agency to ensure effective administration of Army contracts.

Question. The Defense Business Systems Management Committee.

Answer. If confirmed, I will work with the Defense Business Systems Management Committee in connection with Army acquisition, logistics, and technology programs.

Question. The Business Transformation Agency.

Answer. If confirmed, I will work with the Business Transformation Agency in connection with Army acquisition, logistics, and technology programs.

Question. The Assistant Secretary of Defense for Networks and Information Integration.

Answer. If confirmed, I will work with the Assistant Secretary of Defense for Networks and Information Integration in connection with Army acquisition, logistics, and technology programs.

Question. The Chief Information Officer of the Army.

Answer. If confirmed, I will work with the Chief Information Officer of the Army in connection with Army acquisition, logistics, and technology programs.

Question. The General Counsel of the Army.

Answer. If confirmed, I will work with the General Counsel to ensure all Office of the ASA(ALT) actions comport with law, regulation, and policy.

Question. The Inspector General of the Army.

Answer. If confirmed, I will work with the Inspector General of the Army in connection with Army acquisition, logistics, and technology programs.

Question. The Surgeon General of the Army.

Answer. If confirmed, I will work with the Surgeon General of the Army in connection with Army acquisition, logistics, and technology programs.

Question. The Army Business Transformation Office.

Answer. If confirmed, I will work with the Army's Chief Management Officer and the Office of Business Transformation in connection with Army acquisition, logistics, and technology programs.

Question. The Judge Advocate General of the Army.

Answer. If confirmed, I will work with the Judge Advocate General of the Army when appropriate.

Question. The Auditor General of the Army.

Answer. If confirmed, I will work with the Auditor General of the Army in connection with Army acquisition, logistics, and technology programs.

Question. The Chief of the National Guard Bureau.

Answer. If confirmed, I will work with the Chief of the National Guard Bureau to ensure that the National Guard receives world class equipment to perform their missions within available resources.

Question. The Director of the Army National Guard.

Answer. If confirmed, I will work with the Director of the Army National Guard to ensure that our soldiers receive world class equipment and the best logistic support to perform their missions within available resources.

Question. The Principal Military Deputy to the Assistant Secretary of the Army for Acquisition, Technology, and Logistics.

Answer. If confirmed, I will work with the Principal Military Deputy to the Assistant Secretary of the Army for Acquisition, Logistics, and Technology to ensure that appropriate oversight and direction is provided to the Army acquisition workforce and Army acquisition programs, policies, procedures and contracting efforts.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the ASA(ALT)?

Answer. I believe the principal challenge facing the ASA(ALT) is effectively supporting the Army during a time of war while concurrently achieving essential and efficient modernization.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will work closely with senior Department of the Army officials, as well as the Office of the Secretary of Defense, to address these challenges and meet the acquisition priorities of the Secretary of the Army. Meeting these challenges will require a holistic focus on the overall Acquisition system that includes requirements generation, the allocation of fiscal resources, and sound acquisition program management. I would maintain emphasis on enhancing the acquisition workforce and on adopting sound business practices to ensure that the Army achieves the maximum benefit from its scarce fiscal resources.

Question. What do you consider to be the most serious problems in the management of acquisition functions in the Army?

Answer. I believe the shortage of human capital in the skill sets and quantities required presents an enormous challenge in executing the Army's acquisition mission.

Question. What management actions and timetables would you establish to address these problems?

Answer. I expect that it will take several years before the right skill sets are resident within the Army acquisition workforce, but I believe the Army has the flexibilities today to deliver warfighting capability more rapidly, and if confirmed, I will work to institutionalize those enablers and will also pay close attention to human capital planning and development.

MAJOR WEAPON SYSTEM ACQUISITION

Question. Do you believe that the Army's current investment budget for major systems is affordable given historic cost growth in major systems, costs of current operations, projected increases in end strength, and asset recapitalization?

Answer. I have not had the opportunity to assess the Army's current investment strategy for its' major defense acquisition systems; however, if confirmed I will become familiar with the various competing interests associated with the fielding of modern capability and the resource environment that supports this process.

Question. If confirmed, how do you plan to address this issue?

Answer. If confirmed, I would work with the Army resource and requirements communities to assess the Army's major weapons systems programs to ensure that the Army's investment strategy for those systems is both affordable and operationally relevant.

Question. What would be the impact of a decision by the Army to reduce purchases of major systems because of affordability issues?

Answer. I do not yet have access to the information needed to assess what impact reducing the purchase of major systems would have on the Army. If confirmed, I will carefully consider potential impacts and ensure that any decisions made in this area is fully informed and based on all available information.

Nearly half of DOD's 95 largest acquisition programs have exceeded the so-called "Nunn-McCurdy" cost growth standards established in section 2433 of title 10, U.S.C., to identify seriously troubled programs. Section 206 of the Weapon Systems Acquisition Reform Act of 2009 tightened the standards for addressing such programs.

Question. What steps if any would you take, if confirmed, to ensure sufficient transparency of technology development programs to ensure that uncontrolled cost growth or breaches of critical cost growth thresholds established in the “Nunn-McCurdy” provision are identified for appropriate action?

Answer. The Weapon System Acquisition Reform Act of 2009 reinforces the oversight and reporting process for major programs. It will take some time for the results of these actions to be seen in individual acquisition programs. If confirmed, I would insist on clarity and rigor in the oversight of major programs to ensure the acquisition process supports the needs of the force and is a responsible steward of the resources available.

Question. What steps if any would you take, if confirmed, to address out-of-control cost growth on Army’s major defense acquisition programs?

Answer. It is my understanding that cost growth in many Army programs has resulted from emerging requirements arising from operating in a wartime environment. If confirmed, I would insist on clarity and rigor in the oversight of major programs to ensure the acquisition process supports the needs of the force and is a responsible steward of the resources available.

Question. What steps if any do you believe that the Army should consider taking in the case of major defense acquisition programs that exceed the critical cost growth thresholds established in the “Nunn-McCurdy” provision?

Answer. I am not currently familiar with the specific requirement imposed by law in cases where a program experiences a “critical” Nunn-McCurdy breach. However, to the extent that the law requires that actions be taken to determine whether a program should continue or be terminated, I will, if confirmed, insist on strict compliance with all statutory and regulatory requirements associated with the Nunn-McCurdy reporting process.

Question. Do you believe that the office of the ASA(ALT), as currently structured, has the organization and resources necessary to effectively oversee the management of these major defense acquisition programs?

Answer. I have not yet had the opportunity to assess this matter. If I am confirmed, I intend to conduct an assessment to ensure that the Office of the ASA(ALT) is structured and adequately resourced to effectively oversee the management of the Army’s major defense acquisition programs.

Question. If not, how would you address this problem?

Answer. If confirmed, I intend to conduct an assessment to ensure that the Office of the ASA(ALT) is structured and adequately resourced to effectively oversee the management of the Army’s major defense acquisition programs. If the structure of the ASA(ALT) office was not sufficient in either organization or resourcing to accomplish its statutory mission, I would make that fact clear to Army, DOD, and congressional leadership. I believe that, with the cooperation of executive and legislative bodies, we could work to resolve any issues of this nature.

Question. Do you see the need for any changes to the Nunn-McCurdy provision, as revised by section 206?

Answer. I am currently unaware of any reason to amend the Nunn-McCurdy provision as revised by section 206 of the Weapon System Reform Act of 2009. However, if confirmed; I will have an opportunity to assess whether the challenges posed by the cost growth in major programs require amendments to the legislation.

Question. What principles will guide your thinking on whether to recommend terminating a program that has experienced “critical” cost growth under Nunn-McCurdy?

Answer. It is my view that a decision on whether to recommend terminating a program that has experienced critical cost growth under Nunn-McCurdy must be made on a case by case basis and must be fully coordinated with all stakeholders.

SYSTEMS ENGINEERING AND DEVELOPMENTAL TESTING

Question. One of the premises for the Weapon Systems Acquisition Reform Act of 2009 was that the best way to improve acquisition outcomes is to place acquisition programs on a sounder footing from the outset by addressing program shortcomings in the early phases of the acquisition process. The Defense Science Board (DSB) Task Force on Developmental Test and Evaluation reported in May 2008 that “the single most important step necessary” to address high rates of failure on defense acquisition programs is “to ensure programs are formulated to execute a viable systems engineering strategy from the beginning.”

Do you believe that the Army has the systems engineering and developmental testing organizations, resources, and capabilities needed to ensure that there is a sound basis for key requirements, acquisition, and budget decisions on major defense acquisition programs?

Answer. Based on previous experiences, I believe the answer may be no. If confirmed, I will assess the state of the Army's capability in this discipline.

Question. If not, what steps would you take, if confirmed, to build such organizations, resources, and capabilities in the Army?

Answer. See response above.

Question. Do you believe that the Nation as a whole is producing enough systems engineers and designers and giving them sufficient experience working on engineering and design projects to ensure that the Army can access an experienced and technically trained systems engineering and design workforce?

Answer. No. The development of system engineering talent and the expanding of system engineering curricula in universities to include systems-of-systems is a major focus of industry. Good systems engineers are earning top dollar. More well-trained systems engineers can only benefit the United States.

Question. If not, what do you recommend should be done to address the shortfall?

Answer. If confirmed, I will work to enhance DOD's ability to compete with industry for this talent.

TECHNOLOGICAL MATURITY

Question. Over the last several years, the Government Accountability Office (GAO) has reported that private sector programs are more successful than DOD programs because they consistently require that new technologies achieve a high level of maturity before such technologies may be incorporated into product development programs. Section 104 of the Weapon Systems Acquisition Reform Act of 2009 addresses this issue by tightening technological maturity requirements for major defense acquisition programs.

How important is it, in your view, for the Army to mature its technologies with research and development funds before these technologies are incorporated into product development programs?

Answer. In my view, it is very important to mature technologies within the research and development program. Research and development should be used to reduce program risk, by demonstrating that component technologies can be integrated into systems and perform as required in a relevant environment. Making the investment to mature technologies in research and development can reduce the risk of costly overruns in subsequent phases of the development process.

Question. What steps if any would you take, if confirmed, to ensure that the key components and technologies to be incorporated into major acquisition programs meet the Army's technological maturity goals?

Answer. If confirmed, I will ensure that all technologies are peer reviewed for maturity before they transition to a program of record, and ensure the application of recent DOD policy requiring early systems engineering activities prior to Milestone B.

Question. Do you believe that the Army should make greater use of prototypes, including competitive prototypes, to ensure that acquisition programs reach an appropriate level of technological maturity, design maturity, and manufacturing readiness before receiving Milestone approval?

Answer. Yes.

Question. If so, what steps do you believe the Army should take to increase its use of such prototypes?

Answer. It is my understanding that the use of competitive prototyping is already a key part of Army development programs. If confirmed, I will continue to emphasize its importance and ensure adequate resources are made available to support prototyping.

Question. Section 2366a of title 10, U.S.C., requires the Milestone Decision Authority for a major defense acquisition program to certify that critical technologies have reached an appropriate level of maturity before Milestone B approval.

What steps if any will you take, if confirmed, to make sure that the Army complies with the requirements of section 2366a?

Answer. If confirmed, I will ensure the Army conducts Technology Readiness Assessments (TRA) to document that technologies have reached an appropriate level of maturity before receiving Milestone B approval. I will also ensure that processes, tools, and resources are available to meet the requirements of section 2366a, and also ensure that MDAs are aware of their responsibilities as they pertain to section 2366a.

Question. What is your view of the recommendation of the DSB Task Force on the Manufacturing Technology Program that program managers should be required to make use of the Manufacturing Readiness Level tool on all programs?

Answer. While I have not had the opportunity to assess the DSB's recommendation, it has been my view, that program managers should be very sensitive to the manufacturing maturity of their systems, since the cost and performance of their programs could be significantly affected by a mistake in this area. Manufacturing Readiness Levels provide a tangible measure of manufacturing maturity which can be useful in helping them identify manufacturing risks earlier in the process.

Question. Beyond addressing technological maturity issues in acquisition programs, what other steps should the Army take to increase accountability and discipline in the acquisition process?

Answer. Although I have not had the opportunity to fully assess the current acquisition process, if confirmed, I will assess current milestone review and reporting processes and, in coordination with appropriate stakeholders and the Office of the Secretary of Defense, make appropriate adjustments, as appropriate.

UNREALISTIC COST, SCHEDULE, AND PERFORMANCE EXPECTATIONS

Question. Many acquisition experts attribute the failure of DOD acquisition programs to a cultural bias that routinely produces overly optimistic cost and schedule estimates and unrealistic performance expectations. Section 101 of the Weapon Systems Acquisition Reform Act of 2009 is designed to address this problem by establishing an independent Director of Cost Assessment and Performance Evaluation, who is charged with ensuring the development of realistic and unbiased cost estimates to support the Department's acquisition programs.

Do you agree with the assessment that overly optimistic cost and schedule estimates and unrealistic performance expectations contribute to the failure of major defense acquisition programs?

Answer. Yes.

Question. If confirmed, how do you expect to work with the Director of the new office to ensure that the Army's cost, schedule, and performance estimates are realistic?

Answer. The Director, CAPE has a key role in the 2366a and 2366b certification process, and as such, if confirmed, I will work closely with him to ensure that cost, schedule, and performance estimates are performed early, independently validated, and managed throughout a program's life cycle.

Question. Section 201 of the Weapon Systems Acquisition Reform Act of 2009 seeks to address this problem by promoting early consideration of trade-offs among cost, schedule, and performance objectives in major defense acquisition programs.

Do you believe that early communication between the acquisition, budget and requirements communities in the Army can help ensure more realistic cost, schedule, and performance expectations?

Answer. If confirmed, I will work closely with the requirements and budget communities to ensure that we are enabling the rapid delivery of capability to our warfighters with acceptable risk, and work to establish a culture within the acquisition community to team with their counterparts in the requirement and budget communities to this end as well.

Question. If so, what steps if any would you take, if confirmed, to ensure such communication?

Answer. If confirmed, I will work closely with the requirements and budget communities to ensure that we are enabling the rapid delivery of capability to our warfighters with acceptable risk, and work to establish a culture within that acquisition community to team with their counterparts in the requirement and budget communities to this end as well.

Question. DOD has increasingly turned to incremental acquisition and spiral development approaches in an effort to make cost, schedule, and performance expectations more realistic and achievable.

Do you believe that incremental acquisition and spiral development can help improve the performance of the Army's major acquisition programs?

Answer. I do not have firsthand knowledge regarding the Army's experience with spiral development or incremental acquisition process. However, in my experience, spiral development adds cost and schedule delays in achieving the objective capability. As long as interim capability is useful, and time to reach objective capability is not fixed, this is an excellent way to reduce performance risk. If confirmed, I will seek to apply these tools when appropriate in managing the Army's acquisition portfolio.

Question. What risks do you see in the Army's use of incremental acquisition and spiral development?

Answer. See response above.

Question. In your view, has the Army's approach to incremental acquisition and spiral development been successful? Why or why not?

Answer. See response above.

Question. What steps if any do you believe are needed to ensure that the requirements process, budget process, and testing regime can accommodate incremental acquisition and spiral development approaches?

Answer. See response above.

Question. How should the Army ensure that the incremental acquisition and spiral development programs have appropriate baselines against which to measure performance?

Answer. See response above.

FUNDING AND REQUIREMENTS STABILITY

Question. The poor performance of major defense acquisition programs has also been attributed to instability in funding and requirements. In the past, DOD has attempted to provide greater funding stability through the use of multi-year contracts. More recently, the Department has sought greater requirements stability by instituting Configuration Steering Boards to exercise control over any changes to requirements that would increase program costs.

Do you support the use of Configuration Steering Boards to increase requirements stability on major defense acquisition programs?

Answer. I am aware that Configuration Steering Boards have been instituted throughout DOD, and I fully support the objectives behind their establishment. If confirmed, I will have an opportunity to more fully assess whether these forums are achieving the desired results.

Question. What other steps if any would you recommend taking to increase the funding and requirements stability of major defense acquisition programs?

Answer. I believe that funding and requirements stability is an essential component of successful acquisition programs. If confirmed, I would work closely with senior officials within the Army and the Office of the Secretary of Defense to improve this aspect of the Department's business practices.

FIXED PRICE-TYPE CONTRACTS

Question. Recent Congressional and DOD initiatives attempt to reduce technical and performance risks associated with developing and producing major defense acquisition programs so as to minimize the use of cost-reimbursable contracts.

Do you think that the Army should move towards more fixed price-type contracting in developing or procuring major defense acquisition programs? Why or why not?

Answer. It is my opinion that the Army should use the type of contract that is best suited for the acquisition at hand, considering primarily complexity and risk, and also any other factors that may be relevant to effectively incentivize efficient and economical contractor performance. If confirmed, I will ensure that Army acquisition strategies reflect sound business judgment in selecting the appropriate contract type.

TECHNOLOGY TRANSITION

Question. The Department continues to struggle with the transition of new technologies into existing programs of record and major weapons systems and platforms. Further, the Department also has struggled with moving technologies from DOD programs or other sources rapidly into the hands of operational users.

What impediments to technology transition do you see within the Army?

Answer. In my view, the most significant impediment to technology transition is the alignment in schedule and funding of acquisition programs with the availability of the mature technologies. Assessment of technological maturity, i.e. the Technology Readiness Level of the desired improvement is also a major consideration. Close and continuous coordination between technology developers and acquisition programs is a key to ensuring successful technology transition.

Question. What steps if any will you take, if confirmed, to enhance the effectiveness of technology transition efforts?

Answer. If confirmed, I will ensure that acquisition programs coordinate with the S&T developers to transition mature technologies as appropriate.

Question. What can be done from a budget, policy, and organizational standpoint to facilitate the transition of technologies from S&T programs and other sources, including small businesses, venture capital funded companies, and other nontraditional defense contractors, into acquisition programs?

Answer. It is my understanding that the Army is engaged in a variety of initiatives to effectively transition technologies to the soldier. If confirmed, I look forward to becoming more familiar with the various programs and policies that impact on the Army capability to transition capability from the S&T base to acquisition programs.

Question. Do you believe that the Army's S&T organizations have the ability and the resources to carry technologies to higher levels of maturity before handing them off to acquisition programs?

Answer. See response above.

Question. What steps if any do you believe the Army should take to ensure that research programs are sufficiently funded to reduce technical risk in programs so that technological maturity can be demonstrated at the appropriate time?

Answer. If confirmed, I will work with all stakeholders to ensure that the Army S&T effort is resourced to accomplish its mission.

Question. What role do you believe Technology Readiness Levels and Manufacturing Readiness Levels should play in the Army's efforts to enhance effective technology transition and reduce cost and risk in acquisition programs?

Answer. Although I have not had the opportunity to fully assess this issue, it is my view that Technology Readiness Levels provide a standardized metric to identify the maturity of new technologies, or existing technologies used in a new or novel fashion. By ensuring that new technologies are at adequate maturity levels to warrant continued progression through the acquisition process, the Army mitigates the risk of having schedule and cost overruns that can result from having immature technology matured within an acquisition program. It is my understanding that Manufacturing Readiness Levels are an evolving tool, and if confirmed I will evaluate their effectiveness in reducing cost and risk in acquisition programs.

MULTI-YEAR CONTRACTS

Question. The statement of managers accompanying section 811 of the National Defense Authorization Act for Fiscal Year 2008 addresses the requirements for buying major defense systems under multi-year contracts as follows: "The conferees agree that 'substantial savings' under section 2306b(a)(1) of title 10, U.S.C., means savings that exceed 10 percent of the total costs of carrying out the program through annual contracts, except that multi-year contracts for major systems providing savings estimated at less than 10 percent should only be considered if the Department presents an exceptionally strong case that the proposal meets the other requirements of section 2306b(a), as amended. The conferees agree with a GAO finding that any major system that is at the end of its production line is unlikely to meet these standards and therefore would be a poor candidate for a multi-year procurement contract."

What are your views on multi-year procurements?

Answer. I am convinced that multi-year procurements can bring useful savings to acquisition programs, stimulate private investment by industry, and improve the health of supporting activities, i.e. subcontractors, training agencies, sustainers, etc. It is my understanding that current Federal acquisition policy addresses how and when multi-year procurements should be used. If confirmed, I will work to ensure that this procurement approach is applied properly.

Question. Under what circumstances do you believe they should be used?

Answer. Multi-year contracts should be used when the use of such a contract will result in substantial savings over the costs of annual contracts, and the contracts will result in increased efficiency, through reduced administrative burden and substantial continuity of production or performance.

Question. What is your opinion on the level of cost savings that constitute "substantial savings" for purposes of the defense multi-year procurement statute, title 10, U.S.C. § 2306b?

Answer. I have not formed an opinion on the subject at this time; however, if confirmed, I will examine the issue and, if warranted, offer suggestions for revision.

Question. If confirmed, under what circumstances, if any, do you anticipate that you would support a multi-year contract with expected savings of less than 10 percent?

Answer. I have not yet formed an opinion on this subject. If confirmed, I will insure that Army acquisition practices remain transparent and support any decision reached regarding savings associated with multi-year procurements.

Question. If confirmed, under what circumstances, if any, would you support a multi-year contract for a major system at the end of its production line?

Answer. See response above.

Question. Under what circumstances, if any, do you believe that a multi-year contract should be used for procuring weapons systems that have unsatisfactory program histories, e.g., displaying poor cost, scheduling, or performance outcomes but which might otherwise comply with the requirements of the defense multi-year procurement statute, title 10 U.S.C. § 2306b?

Answer. See response above.

Question. Under what circumstances, if any, should the Army ever break a multi-year procurement?

Answer. See response above.

CONTINUING COMPETITION AND ORGANIZATIONAL CONFLICTS OF INTEREST

Question. The DSB Task Force on Defense Industrial Structure for Transformation recommended last summer that “DOD must increase its use of creative competitive acquisition strategies, within limited budgets, in order to ensure long-term innovation and cost savings, at both prime and critical sub-tier elements. Competition would not be required beyond the competitive prototype phase, as long as the current producer continuously improves performance and lowers cost – but other contractors should always represent a credible option if costs rise or performance is unacceptable.” Section 202 of the Weapon Systems Acquisition Reform Act of 2009 requires DOD to take steps to promote continuing competition (or the option of such competition) throughout the life of major defense acquisition programs.

Do you agree with the recommendation of the DSB?

Answer. I am not yet familiar with the details of this DSB study. If confirmed, I would carefully consider these recommendations for their potential implementation in appropriate circumstances.

Question. Do you believe that continuing competition is a viable option on major defense acquisition programs?

Answer. In general, I agree with this statement. I understand, however, that the availability of technical data is often a limiting factor to using competitive contracts for major weapon systems. If confirmed, I intend to look in to this area with a view toward improving the Army’s ability to compete major weapon systems when appropriate.

Question. In your view, has the consolidation of the defense industrial base gone too far and undermined competition for defense contracts?

Answer. No, not yet, but it could happen. I believe that the interests of the government are always best served by an industrial base that is sufficiently broad to support meaningful competition.

Question. If so, what steps if any can and should the Army take to address this issue?

Answer. I support the need for DOD review, in conjunction with the Department of Justice and the Federal Trade Commission, of any mergers which would further limit competition. If confirmed, I would ensure that Army acquisition managers look beyond their specific programs to also assess the impact of consolidation on future programs.

Question. Section 203 of the Weapon Systems Acquisition Reform Act requires the use of competitive prototypes for major defense acquisition programs unless the cost of producing such prototypes would exceed the lifecycle benefits of improved performance and increased technological and design maturity that prototypes would achieve.

Do you support the use of competitive prototypes for major defense acquisition programs?

Answer. Yes.

Question. Under what circumstances do you believe the use of competitive prototypes is likely to be beneficial?

Answer. If confirmed, I will examine this issue to ensure the Army optimizes the use of prototyping.

Question. Under what circumstances do you believe the cost of such prototypes is likely to outweigh the potential benefits?

Answer. See response above.

Question. Section 207 of the Weapon Systems Acquisition Reform Act requires the Department to promulgate new regulations to address organizational conflicts of interest on major defense acquisition programs.

Do you agree that organizational conflicts of interest can reduce the quality and value of technical support services provided to the Army and undermine the integrity of the Army’s acquisition programs?

Answer. Yes.

Question. What steps if any do you believe the Army should take to address organizational conflicts of interest in major defense acquisition programs?

Answer. I cannot list any specific steps at this time, however, if confirmed, I will work with the Office of the Secretary of Defense to determine and implement appropriate policies, procedures, and other measures necessary to address this problem.

Question. What are your views on the use of system engineering and technical assistance contractors that are affiliated with major defense contractors to provide “independent” advice to the Army on the acquisition of major weapon systems?

Answer. I support the applicable statutory and regulatory guidance that governs the use of such contractor personnel. If confirmed, I will work to ensure that Army acquisition programs closely adhere to the guidance in this area.

Question. What lines do you believe the Army should draw between those acquisition responsibilities that are inherently governmental and those that may be performed by contractors?

Answer. The Army must continue to ensure that inherently governmental functions are performed only by government employees. If confirmed, I will work with senior leaders throughout the DOD to provide the acquisition workforce with clear guidance concerning inherently governmental functions.

If confirmed, what steps if any would you take to ensure that defense contractors do not misuse their access to sensitive and proprietary information of the Army and other defense contractors?

Answer. If confirmed, I will review the issue and determine the best method to ensure that defense contract employees are informed regarding the potential misuse and safeguarding of sensitive and proprietary information of both the Army and other defense contractors.

Question. If confirmed, what steps if any would you take to ensure that defense contractors do not unnecessarily limit competition for subcontracts in a manner that would disadvantage the government or potential competitors in the private sector?

Answer. If confirmed, I will evaluate the issue and work with my staff to develop or reinforce policies that will encourage defense contractors to utilize competitive procedures for the award of subcontracts so that the government and potential private sector competitors are not disadvantaged.

LEAD SYSTEM INTEGRATORS

Question. Section 802 of the National Defense Authorization Act for Fiscal Year 2008 prohibits new contracts for lead systems integrator (LSI) functions in the acquisition of a major system after October 1, 2010.

What is your view of the benefits and risks of using LSI to help the Army manage major defense acquisition programs?

Answer. While I am not yet in position to offer an informed view of the benefits and risks associated with using a LSI, I understand that there is a general perception of lack of Government control and oversight over a program that employs the LSI as the prime contractor.

Question. Do you believe that the Army currently has the capacity to manage its major defense acquisition programs without the assistance of lead system integrators?

Answer. I am not yet in position to provide an informed assessment of whether the Army currently has the capacity to manage its major defense acquisition programs without a LSI. I believe that the Army’s acquisition community should be structured organizationally to manage its major acquisition programs with or without the utilization of LSIs.

Question. If not, what steps would you take, if confirmed, to ensure that the Army develops the required capability?

Answer. If confirmed, I would examine the size and the age of the acquisition workforce and its impact on the oversight of acquisition programs today and into the future. The October 2007 “Report of the Commission on Army Acquisition and Program Management in Expeditionary Operations,” often referred to as the Gansler Commission Report, recommended an increase in the stature, quantity, and career development of military and civilian contracting personnel and recommended additional training and tools for overall contracting activities. I understand that the Army is in the process of implementing these recommendations.

OPERATING AND SUPPORT COSTS

Question. Operating and support (O&S) costs far exceed acquisition costs for most major weapon systems. Yet, DOD has placed far less emphasis on the management of O&S costs than it has on the management of acquisition costs.

Do you believe that the Army has appropriate organizations, capabilities, and procedures in place to monitor and manage O&S costs?

Answer. It has been my experience that O&S costs have not been managed as intensely and professionally as acquisition costs. If confirmed, I will review this issue to ensure the Army manages O&S costs as intensely and professionally as acquisition costs.

Question. If not, what steps would you take, if confirmed, to develop such organizations, capabilities, and procedures?

Answer. See response above.

CONTRACTING FOR SERVICES

Question. Over the past 8 years, DOD's spending on contract services has more than doubled, with the estimated number of contractor employees working for the Department increasing from an estimated 730,000 in fiscal year 2000 to an estimated 1,550,000 in fiscal year 2007. As a result, the Department now spends more for the purchase of services than it does for products (including major weapon systems).

Do you believe that the Army can continue to support this rate of growth in its spending on contract services?

Answer. If confirmed, I will conduct an assessment of the acquisition of services to include organization, policy and processes to ensure the Army has an effective management structure in place that is properly resourced.

Question. Do you believe that the current balance between Government employees (military and civilian) and contractor employees is in the best interests of the Army?

Answer. It is my opinion that a blended workforce of military, Government civilians, and contractor employees is necessary. If confirmed, I will lead the effort to identify the best mix of resources that would be in the best interest of the Army.

Question. What steps if any would you take, if confirmed, to control the Army's spending on contract services?

Answer. If confirmed, I will lead the effort to conduct strategic spend analyses of the Army's service contracts. This will hopefully generate useful recommendations to enhance the Army's overall management of the service contracting process.

Question. At the request of the committee, the GAO has compared DOD's practices for the management of services contracts to the practices of best performers in the private sector. GAO concluded that leading companies have achieved significant savings by insisting upon greater visibility and management over their services contracts and by conducting so-called "spend" analyses to find more efficient ways to manage their service contractors. Section 801 of the National Defense Authorization Act for Fiscal Year 2002 required DOD to move in this direction. Sections 807 and 808 of the National Defense Authorization Act for Fiscal Year 2008 built on this provision by requiring inventories and management reviews of contracts for services.

Do you believe that the Army has appropriate organizations, capabilities, and procedures in place to manage its service contracts?

Answer. At this time I have no basis to offer a response. If confirmed, I will assess the Army's organizations, capabilities, and procedures in place to manage its service contracts.

Question. If not, what steps would you take, if confirmed, to develop such organizations, capabilities, and procedures?

Answer. If confirmed, I will use the results of my analysis to determine the optimum organizations, capabilities and procedures for the management of service contracts.

Question. Do you believe that the Army should conduct a comprehensive analysis of its spending on contract services, as recommended by GAO?

Answer. See response above.

Question. Do you support the use of management reviews, or peer reviews, of major service contracts to identify "best practices" and develop lessons learned?

Answer. I understand the Army has implemented peer reviews to address statutory requirements for independent management reviews of contracts for services, and for the sharing of lessons learned gleaned from those reviews. If confirmed, I will continue to study and support the mechanisms that effectively facilitate the identification of best practices and sharing of lessons learned to benefit the Army enterprise, including peer reviews.

Question. If confirmed, will you fully comply with the requirement of section 807 of the National Defense Authorization Act for Fiscal Year 2008, to develop an inventory of services performed by contractors comparable to the inventories of services

performed by Federal employees that are already prepared pursuant to the Federal Acquisition Inventory Reform Act?

Answer. If confirmed, I will support the Office of the Assistant Secretary of the Army for Manpower and Reserve Affairs to ensure compliance with section 807 in reporting and maintaining the inventory of contractor activities, as well as identifying activities that should be considered for conversion to employees of DOD.

Question. What additional steps if any would you take, if confirmed, to improve the Army's management of its contracts for services?

Answer. If confirmed, I will investigate what steps the Army has taken thus far in response to recent GAO testimony on Acquisition Reform.

CONTRACTOR PERFORMANCE OF CRITICAL GOVERNMENTAL FUNCTIONS

Question. Over the last decade, the Department has become progressively more reliant upon contractors to perform functions that were once performed exclusively by Government employees. As a result, contractors now play an integral role in areas as diverse as the management and oversight of weapons programs, the development of personnel policies, and the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as DOD employees.

In your view, has the Army become too reliant on contractors to support the basic functions of the Department?

Answer. If confirmed, I will assess the Army's reliance on contractors to determine the appropriate mix of military personnel, civilian employees, and contractors. This assessment will include the Army's ongoing effort to increase the acquisition workforce.

Question. Do you believe that the current extensive use of personal services contracts is in the best interest of the Army?

Answer. If confirmed, I will review this issue to fully understand the extent to which personal services contracts are currently used and whether their use is appropriate.

Question. What is your view of the appropriate applicability of personal conflict of interest standards and other ethics requirements to contractor employees who perform functions similar to those performed by Government employees?

Answer. In my opinion, appropriate personal conflict of interest standards and other ethics requirements should be applied to contractor employees when they are performing functions similar to those performed by Government employees. It is my understanding that standards and requirements are applied to contractor employees in a manner consistent with the Federal Acquisition Regulation (and its Defense and Army supplements). It is also my understanding that this subject has been studied and is being further studied by DOD as to the appropriate way to accomplish the goal. If confirmed, I will use the resources of my office to ensure that such standards and requirements are applied as intended. The Army must always be an honest and transparent steward of the taxpayer dollars.

Question. U.S. military operations in Iraq and Afghanistan have relied on contractor support to a greater degree than any previous U.S. military operations. According to widely published reports, the number of U.S. contractor employees in Iraq and Afghanistan have exceeded the number of U.S. military deployed in those countries.

Do you believe that the Army has become too dependent on contractor support for military operations?

Answer. In my opinion, contractors provide vital life, safety, and health support to both wartime and peacetime military operations. Their contributions allow the military personnel to focus more on warfighting operations. In the absence of contractor support, the Army would be required to significantly increase its strength level in order to provide comparable support. That said, we should constantly evaluate whether the use of contractors provides the greatest effectiveness and efficiency in support of the mission. We should ensure that the Army maintains core competencies within its ranks, and does not inappropriately contract out inherently governmental functions.

Question. What risks do you see in the Army's reliance on such contractor support?

Answer. In my opinion, the Army has come to rely on such support as an essential element of its ability to conduct operations. This situation presents potential operational risks in future situations where comparable contract support may be unavailable. It also may result in the Government incurring excessive costs for this support.

Question. What steps do you believe the Army should take to mitigate such risk?

Answer. From what I have read, the number of qualified Contracting Officer Representatives has increased allowing for the requisite degree of oversight of contractor performance. Additionally, I understand that the Office of the Secretary of Defense is fielding a database to better track information on contractor personnel and contracts performed in Iraq and Afghanistan.

Question. Do you believe the Army is appropriately organized and staffed to effectively manage contractors on the battlefield?

Answer. I believe the Army's initiatives in increased contracting manpower authorizations and training have been a critical first step which will lead to more effective utilization of operational contract support. However, in my opinion, it will take time to fill the increased authorizations with properly trained acquisition professionals, and fully train the non-acquisition commanders and staffs.

Question. What steps if any do you believe the Army should take to improve its management of contractors on the battlefield?

Answer. In my opinion, the Army has made significant strides in developing new Policy, Doctrine, Organizations, Material solutions and Training focused on improving Operational Contract Support. It is my opinion that continued Army senior leader emphasis on the full implementation of these initiatives is required.

GOVERNMENT CONTRACTING REFORM

Question. In a memorandum to the heads of all Federal agencies, the President on March 4, 2009, directed a Government-wide review of contracting procedures, stating that "executive agencies shall not engage in noncompetitive contracts, except in those circumstances where their use can be fully justified and where appropriate safeguards have been put in place to protect the taxpayer."

If confirmed, what role would you play in determining whether the use of non-competitive contracts could be fully justified?

Answer. I fully support the President's direction in this important area. It is my understanding that, subject to direction by the Secretary of the Army, the ASA(ALT) serves as the Army's senior procurement executive. If confirmed, in that capacity I would be responsible for reviewing and approving all noncompetitive contracts over \$78.5 million, as well as for the promulgation of Army-specific policy relating to competition.

Question. In your opinion, how would the direction in this memo affect the use of single-award and multiple-award Indefinite Delivery/Indefinite Quantity contracts?

Answer. In principle, I believe that either contract vehicle may be used consistent with the need for competition. It is essential, however, that competition be fully considered during the acquisition planning process to ensure selection of the most appropriate contract type. If confirmed, I would carefully assess this issue in conjunction with the Director of Defense Procurement and Acquisition Policy.

CONTRACTING METHODS

Question. The Office of Federal Procurement Policy and DOD have long agreed that Federal agencies could achieve significant savings and improved performance by moving to performance-based services contracting (PBSC). Most recently, the Army Environmental Program informed the committee that it has achieved average savings of 27 percent over a period of several years as a result of moving to fixed-price, performance-based contracts for environmental remediation. Section 802 of the National Defense Authorization Act for Fiscal Year 2002, as amended, established performance goals for increasing the use of PBSC in DOD service contracts.

What is the status of the Army's efforts to increase the use of PBSC in its service contracts?

Answer. I understand that the Army is making strides in using PBSC and if confirmed, this is an area that I intend to study.

Question. What additional steps if any do you believe the Army needs to take to increase the use of PBSC and meet the goals established in section 802?

Answer. See response above.

Question. In recent years, DOD has relied heavily on time-and-materials contracts for the acquisition of services. Under such a contract, the Department pays a set rate per hour for contractor services, rather than paying for specific tasks to be performed. In some cases, contractors have substituted less expensive labor under time-and-materials contracts, while continuing to charge Federal agencies the same hourly rates, resulting in effective contractor profits of 25 percent or more.

What is your view of the appropriate use of time-and-materials contracts by the Army?

Answer. I understand that time-and-material contracts are the least preferred contract type. They may be appropriate in limited circumstances such as when the requirement cannot be defined and work must start. Once the requirement becomes better defined, however, time-and-materials contracts should be replaced with fixed-price or cost type contracts.

Question. What steps if any do you believe the Army should take to minimize the abuse of time-and-materials contracts?

Answer. If confirmed, I will work to ensure that the Army reviews its contract portfolio on a regular basis to identify those that can be converted to other more appropriate contract vehicles.

Question. Section 852 of the John Warner National Defense Authorization Act for Fiscal Year 2007 requires DOD to promulgate regulations prohibiting excessive “pass-through” charges on DOD contracts. Pass-through charges are charges added by a contractor for overhead and profit on work performed by one of its subcontractors, to which the contractor provided no added value. In some cases, pass-through charges have more than doubled the cost of services provided to DOD.

What is your view of the regulations promulgated by DOD to implement the requirements of section 852?

Answer. If confirmed, I intend to review regulations promulgated to implement section 852.

Question. What additional steps if any do you believe the Army should take to address the problem of excessive pass-through charges?

Answer. I am not familiar with the degree to which excessive pass-through charges are a problem in Army contracting. If confirmed, I will review this matter to determine what additional steps, if any, may be necessary.

INTERAGENCY CONTRACTING

Question. GAO recently placed interagency contracting—the use by one agency of contracts awarded by other agencies—on its list of high-risk programs and operations. While interagency contracts provide a much-needed simplified method for procuring commonly used goods and services, GAO has found that the dramatic growth of interagency contracts, the failure to clearly allocate responsibility between agencies, and the incentives created by fee-for-services arrangements, have combined to expose DOD and other Federal agencies to the risk of significant abuse and mismanagement.

If confirmed, what steps if any will you take to monitor and evaluate the effectiveness of the actions currently underway or planned regarding Army’s use of other agencies’ contracts?

Answer. If confirmed, I will ensure that the Army’s acquisition workforce implements these policies and procedures by making interagency contracting an item of special interest in Army program management reviews.

Question. Do you believe additional authority or measures are needed to hold Army or other agency personnel accountable for their use of interagency contracts?

Answer. I understand that recent guidance was issued by the Government to provide for adequate measures of accountability. If confirmed, I will ensure that the Army implements these policies and procedures.

Question. Do you believe contractors have any responsibility for assuring that the work requested by Army personnel is within the scope of their contract?

Answer. Yes, in my view contractors have a responsibility to ensure the work they perform is within the scope of their contract. A contract is a bilateral document and both parties have responsibilities. If confirmed, I will ensure that the Army acquisition workforce reinforces this concept.

Question. Do you believe that the Army’s continued heavy reliance on outside agencies to award and manage contracts on its behalf is a sign that the Army has failed to adequately staff its own acquisition system?

Answer. While I would not characterize it as a failure to adequately staff the Army’s acquisition system, the Army’s compliance with downsizing directives has possibly resulted in an over reliance on outside agencies to award contracts.

ACQUISITION OF INFORMATION TECHNOLOGY

Question. Most of the Department’s Major Automated Information System (MAIS) acquisitions are substantially over budget and behind schedule. In particular, the Department has run into unanticipated difficulties with virtually every new business system it has tried to field in the last 10 years.

Do you believe that unique problems in the acquisition of business systems require different acquisition strategies or approaches?

Answer. If confirmed, I will review whether different strategies are appropriate for MAIS acquisitions.

Question. What steps if any do you believe the Army should take to address these problems?

Answer. See response above.

Question. If confirmed, how would you work with the Chief Information Officer of the Army to take these steps?

Answer. If confirmed, I intend to work closely with the Army Chief Information Officer in all matters under his purview.

Question. Problems with computer software have caused significant delays and cost overruns in a number of major defense programs. Section 804 of the National Defense Authorization Act for Fiscal Year 2003 required DOD to establish a program to improve the software acquisition process.

What steps if any would you take, if confirmed, to address delays and cost overruns associated with problems in the development of software for major weapon systems?

Answer. I have not been briefed on the Army's delays and cost overruns associated with problems in the development of software for major weapon systems. If confirmed, I will make the study of this matter a priority.

Question. Section 804 of the National Defense Authorization Act for Fiscal Year 2010 would require the Secretary of Defense to establish a new acquisition process for information technology programs.

Do you believe that the acquisition of information technology systems is sufficiently different from the acquisition of other systems to justify the development of a unique acquisition process?

Answer. Not at this time, but if confirmed, this is a matter that I will review and assess in greater depth.

Question. If so, what do you see as the unique features that would be desirable for an information system acquisition process?

Answer. See response above.

Question. What types of information technology programs do you believe should be covered by the new process?

Answer. I am not in a position at this time to make recommendations in this area. However, if confirmed, I will review the acquisition process for the Department's IT programs.

ACQUISITION WORKFORCE

Question. Over the last 15 years, DOD has reduced the size of its acquisition workforce by almost half, without undertaking any systematic planning or analysis to ensure that it would have the specific skills and competencies needed to meet DOD's current and future needs. Since September 11, 2001, moreover, the demands placed on that workforce have substantially increased. While DOD has started the process of planning its long-term workforce needs, the Department does not yet have a comprehensive strategic workforce plan needed to guide its efforts.

Do you believe that Army's workforce is large enough and has the skills needed to perform the tasks assigned to it?

Answer. I understand the Secretary of Defense announced on April 6, 2009, an initiative to grow the capacity and capability of the defense acquisition workforce by 20,000 new personnel by fiscal year 2015, and that the Army is in the process of implementing this initiative. If confirmed, I will assess the composition the Army's acquisition workforce in all discipline areas to determine if there are any shortages or gaps in necessary skills.

Question. In your view, what are the critical skills, capabilities, and tools that the Army's workforce needs for the future? What steps will you take, if confirmed, to ensure that the workforce will, in fact, possess them?

Answer. At this time, I am not sufficiently informed as to which critical skills sets, capabilities and tools are needed by the Army's workforce. If confirmed, I will evaluate the state of the current acquisition workforce in light of existing and future program needs. Generally speaking, I believe there is a need for talent in system engineering, and the S&T discipline. I have read also that the Army has taken steps to build the size and skill level of its contracting workforce, and if confirmed, I will assess the health of this community to determine if additional emphasis is needed.

Question. Do you agree that the Army needs a comprehensive human capital plan, including a gap analysis and specific recruiting, retention and training goals, to guide the development of its acquisition workforce?

Answer. I agree that a comprehensive human capital plan would be useful in evaluating current workforce capabilities and determining future needs and gaps. An

Army acquisition human capital plan should be aligned with an overarching Army plan and also be consistent with a DOD human capital plan, specifically as it relates to the acquisition community.

Question. What steps if any do you think are necessary to ensure that the Army has the ability it needs to attract and retain qualified employees to the acquisition workforce?

Answer. I believe it is essential that the Army has effective recruiting and retention tools. At this time I cannot suggest specific steps that should be undertaken, but if confirmed, I would assess this area to determine whether changes in regulation or policy may be needed.

Question. What are your views regarding assertions that the acquisition workforce is losing its technical and management expertise and is beginning to rely too much on support contractors, FFRDCs, and, in some cases, prime contractors for this expertise?

Answer. It is well known that since the end of the Cold War, the Army has seen a significant reduction in the size of its Government/acquisition workforce. This situation has resulted in a tremendous loss of managerial and technical expertise. Concurrently, workload has increased substantially, which has resulted in a growing reliance on support contractors. If confirmed, I will further study this area and work to appropriately rebalance the acquisition workforce.

Question. What is the appropriate tenure for program managers and program executive officers to ensure continuity in major programs?

Answer. I understand that tenure requirements for program managers are based on the Acquisition Category level of the Program and range from 3 to 4 years. I also understand that the Army and/or Defense Acquisition Executive have the authority to adjust the tenure requirement based on unique aspects of the program. I believe this policy represents the appropriate balance between program continuity and the professional development of the workforce.

Question. Section 852 of the National Defense Authorization Act for Fiscal Year 2008 established an Acquisition Workforce Development Fund to help DOD address shortcomings in its acquisition workforce. The fund would provide a minimum of \$3 billion over 6 years for this purpose.

Do you believe that the Acquisition Workforce Development Fund is needed to ensure that the Army has the right number of employees with the right skills to run its acquisition programs in the most cost effective manner for the taxpayers?

Answer. Yes, I believe the Defense Acquisition Workforce Development Fund is essential to carry out Secretary of Defense's guidance to grow the capacity and capability of the defense acquisition workforce. Providing the emphasis and resources to support the recruiting and hiring, training and development, and retention of this workforce is crucial.

Question. If confirmed, what steps if any will you ensure that the money made available through the Acquisition Workforce Fund is spent in a manner that best meets the needs of the Army and its acquisition workforce?

Answer. If confirmed, I will ensure decisions on use of the Fund are supported by appropriate analysis, and that the Army has meaningful metrics in place to ensure the Fund is executed in a manner consistent with its statutory purpose.

PROCUREMENT FRAUD, INTEGRITY, AND CONTRACTOR RESPONSIBILITY ISSUES

Question. Recent acquisition scandals have raised concerns about the adequacy of existing mechanisms to uphold procurement integrity and prevent contract fraud.

What is your view of the adequacy of the tools and authorities available to the Army to ensure that its contractors are responsible and have a satisfactory record of integrity and business ethics?

Answer. A number of tools and authorities have been developed over the years to ensure contractors are responsible and have a satisfactory record of integrity and business ethics. If confirmed, I will become familiar with current authorities and ensure that the Army does business with contractors that have a satisfactory record of integrity and business ethics.

Question. In your view, are current "revolving door" statutes effective?

Answer. In my opinion, they are effective, but require continued monitoring and oversight.

Question. What tools other than law enforcement measures could be used to help prevent procurement fraud and ethical misconduct?

Answer. In my opinion, aggressive oversight of contractor and government performance is critical to minimizing procurement fraud and ethical misconduct.

Question. Are there sufficient enforcement mechanisms to ensure compliance with laws and regulations?

Answer. Yes, I believe that there are sufficient enforcement mechanisms to ensure compliance with laws and regulations.

“BUY AMERICA” AND THE DEFENSE INDUSTRIAL BASE

Question. “Buy America” issues have been the source of considerable controversy in recent years. As a result, there have been a number of legislative efforts to place restrictions on the purchase of defense products from foreign sources.

What benefits do you believe the Army obtains from international participation in the defense industrial base?

Answer. Based on my experience, foreign firms often bring innovation and cost control. I also recognize that the United States is a major exporter of defense equipment and that reciprocal trade arrangements have been beneficial to U.S. defense contractors. If confirmed, I will look for opportunities to avail ourselves of needed defense technologies from all sources.

Question. Under what conditions, if any, would you support the imposition of domestic source restrictions for a particular product?

Answer. If confirmed, I will comply with all applicable laws and departmental policy prohibiting foreign purchases.

Question. What is your opinion of “Buy America” legislation and the “Berry Amendment”?

Answer. See response above.

Question. What is your view of the current state of the U.S. defense industry?

Answer. The U.S. defense industry has been generally stable over the last decade largely because of defense spending levels.

Question. Do you support further consolidation of the U.S. defense industry?

Answer. The interests of the Army are usually best served by maintaining competitive markets for required products and services. I will support DOD in reviewing, in conjunction with the Department of Justice and the Federal Trade Commission, proposed mergers which may impact DOD’s competition objectives.

Question. What is your position on foreign investment in the U.S. defense sector?

Answer. I believe it is important for DOD to carefully review foreign investments in U.S. firms providing defense technology in order to minimize risk to national security.

Question. What steps if any do you believe the Army should take to ensure the continued health of the U.S. defense industry?

Answer. If confirmed, I will ensure that the Army continually assesses the condition of the U.S. industrial base and take appropriate steps to ensure its viability.

ARMY MODERNIZATION

Question. In general, major Army modernization efforts have not been successful over the past decade. Since the mid-1990’s, Army modernization strategies, plans, and investment priorities have evolved under a variety of names from Digitization, to Force XXI, to Army After Next, to Interim Force, to Objective Force, to Future Combat System (FCS) and Modularity. Instability in funding, either as provided by DOD or Congress, has been cited by the Army and others as a principal cause of program instability. For the most part, however, the Army has benefited from broad DOD and Congressional support for its modernization and readiness programs even when problems with the technical progress and quality of management of those programs have been apparent—the Armed Reconnaissance Helicopter is a recent example.

What is your assessment of the Army’s modernization record?

Answer. The Army’s modernization record clearly depicts the complexities of an Army in transition during a time of war. I believe that the Army must continue to adapt to a rapidly changing threat environment. If confirmed, I look forward to working with the Secretary of Defense and Congress to equip and modernize the force.

Question. If confirmed, what actions, if any, would you propose to take to achieve a genuinely stable modernization strategy and program for the Army?

Answer. Stable, predictable Total Obligation Authority allows the Army to balance its needs, chart a course, and stick to it. If confirmed, I would work with the Secretary of the Army, Secretary of Defense, and Congress to arrive at that stable funding level, and subsequently, a stable modernization program.

Question. What is your understanding and assessment of the Army’s modernization investment strategy?

Answer. I understand that the Army’s Modernization Investment Strategy is built on assessing the likelihood of evolving threats and planning future capabilities to mitigate that threat. It is an imprecise science, and requires almost constant review

and correction, and must balance investments in future development with improvements to today's equipment. If confirmed, I plan a thorough review of these investments.

Question. In your view does the Army's modernization investment strategy appropriately or adequately address current and future capabilities that meet requirements for unconventional or irregular conflict?

Answer. My preliminary assessment is that the Army is making appropriate investments to counter unconventional and irregular threats. The key for me, if confirmed, will be to ensure the Army successfully balances current and future initiatives.

Question. If confirmed, what other investment initiatives, if any, would you pursue in this regard?

Answer. I do not have sufficient knowledge to make an accurate assessment at this time. If confirmed, I intend to conduct a full review of the Army's investment initiatives.

Question. If confirmed, what actions, if any, would you propose to ensure that all these initiatives are affordable within the current and projected Army budgets?

Answer. I believe one of the strengths of the Defense Program is to specifically address affordability and the out-year projection of long-term funding requirements. Those processes have been strengthened by initiatives within OSD and by Congress. If confirmed, I believe I would have the required visibility and management structure that would allow me to provide these judgments to Congress.

Question. In your view, what trade-offs would most likely have to be taken should budgets fall below or costs grow above what is planned to fund the Army's modernization efforts?

Answer. While I do not have sufficient insight into what actions might be required, any trade-offs must occur after all areas of risk are carefully considered in coordination with the Secretary of Defense and Congress.

ARMY WEAPON SYSTEM PROGRAMS

Question. What is your understanding and assessment of the following research, development, and acquisition programs?

Early Infantry Brigade Combat Team Modernization

Answer. While I am not yet in a position to provide an informed assessment of the Early Infantry Brigade Combat Team modernization program, I understand that the Army's goal is to improve the situational awareness, survivability, and lethality of the soldiers who travel into harm's way through a comprehensive and dedicated process of incremental improvements. It is my understanding that the Early Infantry Brigade Combat Team Modernization program takes the best equipment available that was developed under the former future combat systems program and inserts them into the units that need them the most, the Infantry Brigades.

Ground Combat Vehicle

Answer. I am not yet in a position to provide an informed assessment of the Ground Combat Vehicle program. I have been advised, however, that the Ground Combat Vehicle is likely to be a new design that uses the best assets of the current combat vehicles as well as proven technology from the cancelled Manned Ground Vehicles program.

Stryker Combat Vehicle, including the Stryker Mobile Gun Variant

Answer. I am not yet in a position to offer an informed assessment of the Stryker program; however, I understand that Stryker variants have been in production since 2004 and that this system has been used successfully in Iraq and is preparing to deploy to Afghanistan.

Joint Light Tactical Vehicle (JLTV)

Answer. While I am not yet in a position to provide an informed assessment of JLTV, I understand that it is a relatively new joint Service developmental program which consists of a family of vehicles with companion trailers, capable of performing multiple mission roles.

Armed Aerial Scout (AAS) Helicopter

Answer. I understand that the AAS program is needed to meet existing capability gaps in the area of manned aerial reconnaissance. I have been informed that the Army is currently studying alternatives to meet the gaps, and if confirmed, I will undertake a thorough review of this program.

M1 Abrams Tank Modernization

Answer. The Abrams Tank has been an integral part of the Army's force structure for decades and requires modernization. I am not yet in a position to provide an informed assessment of this effort. If confirmed, I will become more familiar with this program.

M2 Bradley Infantry Fighting Vehicle Modernization

Answer. The Bradley also has been an integral part of the Army's force structure for decades and requires modernization. I am not yet in a position to provide an informed assessment of this effort. If confirmed, I will become more familiar with this program.

Warfighter Information Network-Tactical (WIN-T)

Answer. I am not able to provide an informed assessment of the WIN-T program. I understand that WIN-T is the Army's network modernization program that is absolutely essential to the Army. It delivers the high speed secure voice, video, and data, while allowing for full mobility of the network. If confirmed, I will become more familiar with this program.

Logistics Modernization Program (LMP)

Answer. I am not able to provide an informed assessment on LMP at this time. I understand this Program is the ongoing effort to modernize the primary business systems of the Army Materiel Command (AMC) Commodity Commands. If confirmed, I will become more familiar with this program.

Joint Tactical Radio System (JTRS)

Answer. I understand that JTRS is a DOD initiative to develop a family of software-programmable tactical radios that provide mobile, interoperable, and networked voice, data and video communications. At this time, however, I am not able to provide an assessment of the JTRS program. If confirmed, I will become more familiar with this program.

UH-58D Kiowa Warrior Safety and Life Extension Program

Answer. It is my understanding that the Kiowa Warrior life extension program is a necessary upgrade to improve aircraft performance safety and reliability. At this time, however, I am not able to provide an assessment of the Kiowa Warrior life extension program. If confirmed, I will become more familiar with this program.

MINE RESISTANT AMBUSH PROTECTED VEHICLES

Question. If confirmed, what would you propose should be the Army's long-term strategy for the utilization and sustainment of its large Mine Resistant Ambush Protected (MRAP) vehicle fleet?

Answer. I understand that the MRAP vehicles were procured in response to a Joint Urgent Operational Need Statement from Multi-National Corps-Iraq in June 2006. While I am not yet in position to provide an informed assessment of MRAPs, if confirmed, I would work to determine the appropriate long-term strategy for the utilization and sustainment of the Army's fleet of MRAPs.

RESIDUAL FUTURE COMBAT SYSTEMS LEAD SYSTEMS INTEGRATOR CONTRACT

Question. The FCS program has now devolved into three elements: a new ground combat vehicle (GCV) program, a plan to continue small technology spin outs to infantry brigades in increments, and a residual effort to develop software based on the system-of-systems common operating environment system. Plans for restructuring the spin outs for an early fielding to select infantry brigades appear to be close to completion. However, most of the base contract for what used to be FCS remains in place, including the Lead System Integrator (LSI) fee structure, with only the manned ground vehicle portions terminated.

What is your understanding and assessment of the former and restructured elements of the now terminated FCS program?

Answer. While I am not yet in a position to provide an informed assessment of the former and restructured elements of the terminated FCS program, I understand that the Army terminated its LSI relationship with The Boeing Company. Boeing now serves as a traditional prime contractor under the revised contract for Engineering, Manufacturing, and Development (EMD).

Question. What is your understanding and assessment of the FCS program's residual LSI management concept and contract?

Answer. I understand that under the revised contract for EMD, Boeing is performing the functions of a prime contractor and conducts the normal systems engi-

neering and integration work that is required for any developmental program. If confirmed, I would examine the FCS program's residual LSI management concept and contract in order to provide an informed assessment.

Question. In your view, what should be the current and future role of the LSI and, if confirmed, what modifications, if any, would you propose to the LSI contract and fee structure; on what timeline?

Answer. It is my understanding that the Army has terminated its LSI relationship with The Boeing Company. If confirmed, I will review this matter and make recommendations as appropriate.

MANAGEMENT OF THE GROUND COMBAT VEHICLE PROGRAM

Question. As of December 2009, Program Executive Office-Integration, the former Program Executive Office responsible for oversight and management of the terminated FCS program, will oversee and manage the new GCV program. This is despite the fact that Program Executive Office-Ground Combat Systems has the depth of expertise and experience necessary to successfully oversee and manage the development of tracked combat vehicles for the Army.

What is your understanding and assessment of this management structure for the Army's next generation GCV?

Answer. I am not yet in a position to provide an informed assessment of the management structure for the Army's next generation GCV. I have been advised, however, that the current management structure under Program Executive Office-Integration for development of the Ground Combat Vehicle leverages the last 8 years of Manned Ground Vehicles development.

Question. If confirmed, what current or future modifications, if any, would you propose making to the oversight and management structure of the GCV program?

Answer. If confirmed, I will become more familiar with this program and make modifications as required.

MODULARITY

Question. Modularity refers to the Army's fundamental reconfiguration of the force from a division-based to a brigade-based structure. The new modular brigade combat team is supposed to have an increased capability to operate independently based upon increased and embedded combat support capabilities such as military intelligence, reconnaissance, and logistics. Although somewhat smaller in size, the new modular brigades are supposed to be just as or more capable than the divisional brigades they replace because they will have a more capable mix of equipment—such as advanced communications and surveillance equipment. To date, the Army has established over 80 percent of its planned modular units, however, estimates on how long it will take to fully equip this force as required by its design has slipped from 2011 to 2019.

What is your understanding and assessment of the Army's modularity transformation strategy?

Answer. It is my understanding that the Army's modular transformation was designed to create a more expeditionary capable force that will address the full-spectrum of missions emerging from a post-Cold War strategy. I have been advised that the Army continuously addresses changes to its unit designs by incorporating lessons learned and changes in technology that keep the formations relevant and effective. If confirmed, I look forward to making an assessment of the strategy.

Question. In your view, what are the greatest equipment and sustainment challenges in realizing the transformation of the Army to the modular design?

Answer. I have been advised that the Army faces two major challenges with regard to transformation—restoring balance to a force experiencing the cumulative effects of 8 years of war and setting conditions for the future to fulfill the Army's strategic role as an integral part of the Joint Force. The Army must sustain equipment in the current fight while modernizing future capabilities.

Question. If confirmed, what actions or changes, if any, would you propose relative to the Army's modular transformation strategy and plans for equipping and sustaining the force?

Answer. I am not yet in a position to provide an informed assessment on the Army's modular transformation strategy and plans for equipping and sustaining the force. If confirmed, I would closely examine the transformation strategy to ensure a focus on resources that sustain the current fight while making critical investments to Army modernization.

MANUFACTURING ISSUES

Question. The recent DSB study on the Manufacturing Technology Program made a number of findings and recommendations related to the role of manufacturing research and capabilities in the development and acquisition of defense systems.

Have you reviewed the findings of the DSB Task Force on the Manufacturing Technology Program?

Answer. I have not yet reviewed the findings of the DSB Task Force on the Manufacturing Technology Program.

Question. What recommendations, if any, from the Task Force would you plan to implement if confirmed?

Answer. If confirmed, I will review the Army's current funding and implementation strategy and look for opportunities to increase effectiveness and efficiency.

Question. What incentives do you plan to use to enhance industry's incorporation and utilization of advanced manufacturing processes developed under the manufacturing technology program?

Answer. The Army invests in manufacturing technology areas that promise to provide the most military capability or cost reduction to end items in production. The Army's industry partners benefit from this investment by their increased competitive advantage.

SCIENCE AND TECHNOLOGY

Question. What, in your view, is the role and value of S&T programs in meeting the Army's transformation goals and in confronting irregular, catastrophic, traditional and disruptive threats?

Answer. It is my understanding that the Army's S&T investment strategy is shaped to foster innovation and accelerate/mature technology to enable Future Force capabilities while exploiting opportunities to rapidly transition technology to the Current Force. It is my view that the S&T program should retain the flexibility to be responsive to unforeseen needs identified through current operations.

Question. If confirmed, what direction will you provide regarding funding targets and priorities for the Army's long-term research efforts?

Answer. I believe that it is important to maintain a balanced and responsive S&T portfolio. If confirmed, I will review S&T investment, objectives, and metrics and determine an appropriate future strategy.

Question. What specific metrics would you use, if confirmed, to assess whether the Army is making adequate investments in its basic research programs?

Answer. It is my understanding the Army currently has a number of periodic reviews of its in-house and extramural basic research programs. If confirmed, I intend to carefully evaluate these reviews to derive appropriate metrics for the Army's basic research investments.

Question. Do you feel that there is sufficient coordination between and among the S&T programs of the military services and defense agencies?

Answer. Coordination between these S&T programs is vitally important. If confirmed, I will assess the coordination process.

Question. What is the Department's role and responsibility in addressing national issues related to science, technology, engineering, and mathematics education and workforce development?

Answer. I believe the Army, which is significantly dependent on S&T to fulfill its national defense mission, has effective policies and programs in place to help maintain the technical edge our Nation needs to ensure its security and to be globally competitive. It is important to recognize that the Army not only needs to attain and retain the talent today, but also needs to develop a talented future workforce to maintain the technical edge. If confirmed, I plan to continue and strengthen, where necessary, Army educational outreach programs and initiatives.

Question. What steps if any would you take to support efforts to ensure that the Nation has the scientific and technical workforce needed for its national security technological and industrial base?

Answer. If confirmed, I will take advantage of the current legislative authorities and encourage full participation and engagement throughout the Army's laboratory complex to build the Nation's scientist, mathematician, engineering and technician talent pool, including reaching underrepresented populations, and recruiting and retaining the highest quality workforce.

Question. How would you use S&T programs to better reduce technical risk and therefore potentially reduce costs and schedule problems that accrue in large acquisition programs?

Answer. In my view, it is very important to mature technologies within the research and development program. Research and development should be used to re-

duce program risk, by showing that component technologies can be integrated into systems and perform as required in a relevant environment. Making the investment to mature technologies in research and development can reduce the risk of costly overruns in the product development phase.

Question. Do you feel that the S&T programs of the Army are too near-term focus and have over emphasized technology transition efforts over investing in revolutionary and innovative research programs?

Answer. If confirmed, I will assess this balance, solicit guidance regarding levels of acceptable risk, and rebalance S&T investments accordingly.

Question. Are you satisfied that the Army has a well articulated and actionable S&T strategic plan?

Answer. If confirmed, I will assess the Army plan and determine if it provides an appropriate path for the evolution of Army S&T.

Question. Do you see a need for changes in areas such as hiring authority, personnel systems, financial disclosure and ethics requirements, to ensure that the Army can recruit and retain the highest quality scientific and technical workforce possible?

Answer. If confirmed, workforce quality will be one of my highest priorities. There are tools in place, including direct hire authority and flexible personnel system to grow and maintain a high quality workforce. I look forward to working with Congress on maintaining and enhancing these authorities as appropriate.

DEFENSE LABORATORIES

Question. What is your view on the quality of the Army laboratories as compared to the DOE national laboratories, Federal laboratories, academic laboratories, and other peer institutions?

Answer. In my view, the quality of the Army laboratories compares favorably to other laboratories and institutions. If confirmed, I will undertake a review of Army laboratory capability with a view toward enhancing their capability.

Question. What metrics will you use, if confirmed, to evaluate the effectiveness, competitiveness, and scientific vitality of the Army laboratories?

Answer. If confirmed, I will work closely with my staff to identify and develop appropriate metrics to evaluate laboratory effectiveness. It is my understanding that the Army currently conducts peer reviews annually to assess the vitality of the laboratories.

Question. What steps if any will you take, if confirmed, to increase the mission effectiveness and productivity of the Army laboratories?

Answer. If confirmed, I will work to ensure that the Army laboratories have the best possible workforce, facilities, and processes to meet the technology needs of the Army. I intend to closely monitor the effectiveness of the laboratories and implement improvements as necessary.

Question. Do you see value in enhancing the level of technical collaboration between the Army laboratories and academic, other Federal and industrial scientific organizations?

Answer. I believe there is value in technical collaboration and it is my understanding a strong collaboration between Army, industry and universities already exists. The Army's S&T program is shaped collaboratively through close partnerships with warfighters, S&T developers across DOD, other Federal agencies, industry, academia, and international partners. If confirmed, I would work to ensure that the Army continues to collaborate when appropriate.

Question. Do you feel that past investments in research equipment; sustainment, repair and modernization; and facility construction at the Army laboratories have been sufficient to maintain their mission effectiveness and their standing as world class science and engineering institutions?

Answer. I am not sufficiently informed to determine if past investments have been adequate to support the Army's research facilities; however, maintaining appropriate levels of funding in this area for the future will be critical. Recent legislative authorities provided by Congress will be helpful in maintaining mission effectiveness and standing of Army research facilities.

TEST AND EVALUATION

Question. The Department has, on occasion, been criticized for failing to adequately test its major weapon systems before these systems are put into production.

What are your views about the degree of independence needed by the Director of Operational Test and Evaluation in ensuring the success of the Army's acquisition programs?

Answer. I believe it is appropriate to have an independent operational test and evaluation authority separate from the materiel developer to plan and conduct operational tests, report results, and provide evaluations on operational effectiveness, operational suitability, and survivability.

Question. Are you concerned with the level of test and evaluation conducted by the contractors who are developing the systems to be tested?

Answer. If confirmed, I will examine the amount of reliance the Army has on system contractors performing developmental testing to confirm none are performing inherently governmental functions. It is my understanding that system evaluations are generally performed by Army organizations.

Question. What is the impact of rapid fielding requirements on the standard testing process?

Answer. I understand that the Army test and evaluation community has adjusted processes as necessary and has worked diligently ensuring systems fielded to soldiers are safe, effective, and reliable. If confirmed, this is an area that I would further study to determine whether any enhancements are appropriate.

Question. If confirmed, how will you work to ensure that all equipment and technology that is deployed to warfighters is subject to appropriate operational testing?

Answer. If confirmed, I will provide policy and oversight in this area, as well as continue the effective working relationship that the Army acquisition community has with the Army and DOD test community.

Question. Do you believe that the developmental testing organizations in the Army are adequate to ensure an appropriate level of developmental testing, and testing oversight, on major defense acquisition programs?

Answer. I am not fully informed at this time to make an appropriate assessment of this matter. If confirmed, I will review this area and work closely with the Army and DOD test community to optimize this capability.

Question. If not, what steps would you take, if confirmed, to address any inadequacies in such organizations?

Answer. If confirmed, I will monitor the status of these organizations to ensure that they remain capable of accomplishing their mission.

Question. As systems grow more sophisticated, networked, and software-intensive, DOD's ability to test and evaluate them becomes more difficult. Some systems-of-systems cannot be tested as a whole until they are already bought and fielded.

Are you concerned with Army's ability to test these new types of systems?

Answer. I am aware that testing of system-of-systems requires consideration of live, virtual, and constructive test capabilities. I understand that system-of-systems testing is challenging; if confirmed, I will work to continue to ensure that system capabilities and limitations are clearly established before testing of these systems.

Question. What steps, if any, do you believe the Army should take to improve its test and evaluation facilities to ensure adequate testing of such systems?

Answer. If confirmed, I will provide support to the Army test and evaluation community and support efforts to ensure that they are properly resourced.

SMALL BUSINESS INNOVATION RESEARCH PROGRAM

Question. What do you see as the major successes and challenges facing the Army Small Business Innovation Research (SBIR) program?

Answer. I understand that the Army has a successful SBIR program that has transitioned technology to the soldier. If confirmed, I will make every effort to ensure that the SBIR program reaches out to innovative small businesses that have not traditionally dealt with the military.

Question. What steps would you take if confirmed to ensure that the Army has access to and invests in the most innovative small businesses?

Answer. A cornerstone of the SBIR program is the identification of innovative approaches to Army requirements. If confirmed, I will continue to effectively communicate Army needs to the thousands of innovative small businesses through an aggressive outreach program to the small business community as well as continuing to develop high impact SBIR topics that can provide innovative solutions to soldier needs. Close coordination among the SBIR program, small businesses and the Acquisition community ensures that these innovative solutions will be available to the soldier.

Question. What steps would you take if confirmed to ensure that successful SBIR research and development projects transition into production?

Answer. If confirmed, I will take all steps available to maximize the opportunity for the successful transition of SBIR technology into production.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the ASA(ALT)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR KAY HAGAN

ARMY RESEARCH OFFICE

1. Senator HAGAN. Dr. O'Neill, North Carolina hosts the Army Research Office, which reports to the Army Research Lab within Army Materiel Command. I believe their location in Durham is of great benefit to the Army due to the cluster of high-end industry and university research being conducted in the Research Triangle. In 2009, North Carolina published a Defense Asset Inventory and Target Industry Cluster Analysis that identified the State's industry, academic, and research and development (R&D) capacity to support key functional technological areas to include: fuel and power; unmanned systems; human factors; performance materials; command control, communications, computers, intelligence, surveillance, and reconnaissance; and reset. If confirmed, please highlight where the Army Research Office's work can connect to your focus areas within the Army Secretariat of Acquisition, Logistics, and Technology?

Dr. O'NEILL. The Army Research Office is the primary conduit through which basic research activities that are of interest to the Army, and performed at academic institutions, are funded and managed. These research efforts are fundamental to providing scientific and technical solutions for the warfighter across the entire spectrum of Army operations. The Army Research Office benefits from its proximity to leading universities from its headquarters in Research Triangle Park. If confirmed, I would ensure that the Army continues to take advantage of the technical expertise and industrial base found in North Carolina, and across the country in order to achieve its modernization objectives.

2. Senator HAGAN. Dr. O'Neill, can you comment on how you can ensure the Army's overall R&D efforts, to include, the Army Research Office, are coordinated and resources leveraged?

Dr. O'NEILL. I believe that it is important to maintain a balanced and responsive science and technology (S&T) portfolio in order to develop, accelerate and mature technologies. The Army Science and Technology Master Plan is the Army's strategic plan for the S&T enterprise and helps ensure research is well coordinated and leveraged across the Army research and development complex. The Army also coordinates with the S&T programs of the other Military Services and defense agencies through the Defense S&T Reliance 21 Program. Finally, the Army works closely with its partners in academia and industry to ensure we are leveraging the full capabilities of the country in supporting the warfighter. If confirmed, I would ensure that these well-established and effective processes continue.

QUESTIONS SUBMITTED BY SENATOR ROLAND W. BURRIS

CONTRACTING IN THE ARMY

3. Senator BURRIS. Dr. O'Neill, in your advance policy responses, you stated that the "Army should use the type of contract that is best suited for the acquisition at hand, considering primarily complexity and risk." In evaluating contracts, under what situations would fixed price contracts be more suitable?

Dr. O'NEILL. A firm fixed-price contract is suitable for acquiring commercial items or for acquiring other supplies or services when the contracting officer can establish fair and reasonable prices at the outset, such as when: (a) There is adequate price competition; (b) There are reasonable price comparisons with prior purchases of the same or similar supplies or services made on a competitive basis or supported by valid cost or pricing data; (c) Available cost or pricing information permits realistic estimates of the probable costs of performance; or (d) Performance uncertainties can be identified and reasonable estimates of their cost impact can be made, and the contractor is willing to accept a firm-fixed price representing assumption of the risks involved.

4. Senator BURRIS. Dr. O'Neill, under what circumstances would a noncompetitive contract be justified, and what safeguards can be put in place to protect the taxpayer?

Dr. O'NEILL. The Competition in Contracting Act provides seven general exceptions to the baseline requirement for full and open competition. It is my understanding that the most commonly used exceptions are: (i) when supplies or services are available from only one responsible source; (ii) unusual and compelling urgency; and (iii) preservation of the industrial mobilization capabilities. While these authorities have been in existence for many years, I believe their use must be carefully scrutinized and that noncompetitive contracts should be used only when fully justified by the underlying facts.

In a noncompetitive environment, the receipt of contractor cost or pricing data and the use of independent government cost estimates can assist the contracting officer in ensuring that the contract price is fair and reasonable. Additional safeguards include increased oversight, internal controls, risk assessments, and quality management.

5. Senator BURRIS. Dr. O'Neill, what will you do to address and limit cost overruns in cost-plus contracts?

Dr. O'NEILL. I believe that it is important to: (i) adequately define contract requirements and develop realistic cost estimates in the first instance; (ii) to fully and clearly communicate those requirements to industry during the proposal and evaluation process; and (iii) to provide vigorous program and contract oversight. Additionally, in appropriate circumstances, the use of contract incentives can be beneficial. If confirmed, I would ensure that Army policies placed appropriate emphasis on cost control, and I would hold acquisition managers accountable for results.

6. Senator BURRIS. Dr. O'Neill, what are some tools to address this issue?

Dr. O'NEILL. In addition to the points summarized in my preceding response, an important technique to control costs is the Earned Value Management System (EVMS). EVMS provides a systematic means for contractors to plan the timely performance of work; budget resources; account for costs and measure actual performance against plans. More importantly, it provides early warning of significant deviations from a contractor's plan to permit corrective actions. If confirmed, I will ensure that Army program managers make full use of this important tool.

[The nomination reference of Dr. Malcolm Ross O'Neill follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
December 3, 2009.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Malcolm Ross O'Neill of Virginia, to be an Assistant Secretary of the Army, vice Claude M. Bolton, Jr., resigned.

[The biographical sketch of Dr. Malcolm Ross O'Neill, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DR. MALCOLM ROSS O'NEILL

CIVILIAN EDUCATION

Ph.D., Department of Physics, Rice University, Houston, TX, Aug. 1972–May 1975
 MA, Department of Physics, Rice University, Houston, TX, Aug. 1968–May 1970
 BS, Department of Physics, DePaul University, Chicago, IL, Aug. 1958–May 1962

MILITARY EDUCATION

Field Artillery Officer Basic, 1962
 Ranger, 1962
 Airborne, 1963
 Jumpmaster, 1963
 Ordnance Guided Missile Course, 1964
 Military Assistance (Advisor), 1964
 Defense Language Institute (Vietnamese), 1965
 Ordnance Career Course, 1968
 Command and General Staff College, 1972
 Defense Systems Management College, 1974
 Army War College, 1980

EMPLOYMENT RECORD

2006–present, Consultant, Self-employed and Chairman, Board on Army Science and Technology, The National Academies, Washington, DC
 2000–2006, Vice President and Chief Technical Officer of Lockheed Martin Corporation Chief Technical Officer
 1996–2000, Vice President, Mission Success and Operations, in the Space and Strategic Missiles Sector Operations and Best Practices, Lockheed Martin Corp.
 1993–1996, Director, Ballistic Missile Defense Organization, Department of Defense (on Active Duty as a Lieutenant General, U.S. Army)
 1990–1993, Deputy Director, Strategic Defense Initiative Organization (SDIO), Department of Defense (on Active Duty, U.S. Army)
 1989–1990, Director, Deputy for Program Assessment and International Cooperation, Office of Assistant Secretary of the Army for Research Development and Acquisition, (on Active Duty, U.S. Army)
 1987–1989, Commander, U.S. Army Laboratory Command (on Active Duty, U.S. Army)
 1985–1987, Director, Kinetic Energy Weapons, SDIO, Department of Defense (on Active Duty, U.S. Army)
 1983–1985, Program Manager, Multiple Launched Rocket System, U.S. Army (on Active Duty, U.S. Army)
 1981–1983, Deputy Program Manager, NATO Patriot Management Organization, Munich, Germany (on Active Duty, U.S. Army)
 1977–1980 Program Manager, Strategic Fire Control and Talon Gold, Defense Advanced Research Projects Agency, Department of Defense (on Active Duty, U.S. Army)
 1974–1976, R&D Coordinator, U.S. Army High Energy Laser Project Office, Redstone Arsenal, AL (on Active Duty, U.S. Army)
 1970–1971, Assistant Chief of Staff (Ammunition), Danang Support Command, U.S. Army, Vietnam (on Active Duty, U.S. Army)
 1966–1967, Aide de Camp to Commanding General, U.S. Army Missile Command, Redstone Arsenal, AL (on Active Duty, U.S. Army)
 1966–1966, Instructor, Ordnance Guided Missile School, Redstone Arsenal, AL (on Active Duty, U.S. Army)
 1965–1966, Advisor, 21st Recon Company, 21st ARVN Division (on Active Duty, U.S. Army)
 1962–1964, Forward Observer/Platoon Leader, Mortar Battery, 1st Battle Group, 187th Infantry, 82nd Airborne Division (on Active Duty, U.S. Army)

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the

advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Dr. Malcolm Ross O'Neill in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Malcolm Ross O'Neill.
2. **Position to which nominated:**
Assistant Secretary of the Army for Acquisition, Logistics, and Technology.
3. **Date of nomination:**
December 3, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
March 25, 1940; Chicago, IL.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to former Judy Maxine Hester.
7. **Names and ages of children:**
Bonnie Kathleen Long, 39; John Hai O'Neill, 38.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Senn High School, Chicago, IL, 1954-1958.
DePaul University, Chicago, IL, 1958-1962, BS Physics, 1962.
Rice University, Houston, TX, 1968-1970, MA Physics, 1970.
Rice University, Houston, TX, 1972-1974, PhD Physics, 1975.
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
VP, Mission Success and Operations, Space and Strategic Missiles Sector, Lockheed Martin Corporation, Bethesda, MD, 1996-2000.
VP, Chief Technical Officer, Lockheed Martin Corp., Bethesda, MD, 2000-2006.
Consultant, Self-Employed, Vienna, VA, 2006-Present.
10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.
Officer, U.S. Army 1962-1996, Retired as Lieutenant General.
Member, U.S. Air Force Scientific Advisory Board, 2001-2004.
Member, Board of Visitors, Defense Acquisition University, Fort Belvoir, VA.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Member, Board of Visitors, Clark School of Engineering, University of Maryland.
 Member, Board of Affiliates, Sloan Masters Program, Rice University.
 Director, Draper Laboratory, Cambridge, MA.
 Director, Edmund Optics Corporation, Barrington, NJ.
 Director, Information Systems Labs, San Diego, CA.
 Director, Electronic Warfare Associates, Herndon, VA.
 Chairman, Board on Army Science and Technology of the National Academies, Washington, DC.
 Consultant, UT-Battelle LLC, Oak Ridge National Lab, Oak Ridge, TN.
 Consultant, Vanguard Research Inc., Arlington, VA.
 Consultant, Physical Sciences, Inc., Andover, MA.
 Consultant, Lockheed Martin Corporation, Bethesda, MD.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, National Academy of Engineering, Washington, DC.
 Honorary Fellow, American Institute of Aeronautics and Astronautics, Washington, DC.
 Member, National Defense Industrial Association, Washington, DC.
 Member, American Association for Advancement of Science, Washington, DC.
 Member, Association of the U.S. Army, Washington, DC.
 Member, U.S. Tennis Association, Washington, DC.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

No political offices held; have never been a candidate for any political office.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

No political memberships, offices held or services rendered to any parties or election committees.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

In years 2004 and 2005 contributed approx. \$2,000 each year to Lockheed Martin Political Action Committee.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Illinois State Scholarship
 Distinguished Military Student, De Paul University
 Rice University Fellowship Society of Sigma Xi (Science honor society)
 Distinguished Graduate, Army Ordnance Guided Missile School, AL
 Distinguished Graduate, Defense Language Institute, Monterey, CA
 Honor Graduate, Ordnance Career Course, Aberdeen Proving Grounds, MD
 Honor Graduate, Army Command and Staff College, Fort Leavenworth, KS
 Army Commendation Medal
 Airborne, Ranger, Combat Infantryman Badges
 Bronze Star for Valor with Oak Leaf Cluster
 Vietnamese Cross of Gallantry with Gold Star
 Bronze Star for Merit with Oak Leaf Cluster
 Purple Heart with Oak Leaf Cluster
 Air Medal
 Legion of Merit with Oak Leaf Cluster
 Meritorious Service Medal
 Defense Superior Service Medal
 Defense Distinguished Service Medal
 Order of St. Barbara (U.S. Army Artillery)
 U.S. Army Ordnance Hall of Fame
 Gold Medal of American Defense Preparedness Association

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

"Electron Spin Polarization in LEED from Tungsten (001)," Phys Rev Ltrs, 1974

(est.)

"Artificial Intelligence Aids Logisticians," Army Logistics. July–August 1990.

“Ballistic Missile Defense: 12 Years of Achievement,” Defense Issues, Volume 10, Number 37, April 1995.

“BMDO Focussed on the Road to the Future,” BMP Monitor, 22 Mar 1996.

“Redirecting U.S. Missile Defence,” International Defence and Security Development, No. 1, 1994.

“The U.S. Theatre Missile Defence Programme,” Defence and Security Review, 1995.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

[Nominee responded and the information is contained in the committee’s executive files.]

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MALCOLM ROSS O’NEILL.

This 15th day of December, 2009.

[The nomination of Dr. Malcolm Ross O’Neill was reported to the Senate by Chairman Levin on February 2, 2010, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 4, 2010.]

[Prepared questions submitted to Mary Sally Matiella by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for changes to any Goldwater-Nichols Act provisions?

Answer. I am not aware at this time of any changes that are required. If confirmed, this will be an area I will examine in depth.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. This is an area I will need to examine. If I am confirmed and I identify any changes I think are needed, I will coordinate my recommendations through the appropriate Army and Defense Department process.

DUTIES OF THE ASSISTANT SECRETARY OF THE ARMY FOR FINANCIAL MANAGEMENT AND COMPTROLLER

Question. What is your understanding of the duties and functions of the Assistant Secretary of the Army for Financial Management and Comptroller?

Answer. I understand that the Assistant Secretary of the Army for Financial Management and Comptroller is responsible for directing and managing the financial management activities, operations, and comptroller functions of the Department of Army, and for advising the Secretary of the Army on these matters.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I believe my background qualifies me to serve as Assistant Secretary of the Army (Financial Management and Comptroller). I have 29 years of Federal employment working in accounting and budget positions with the Army, Air Force, Defense Finance and Accounting Service, and the Office of the Secretary of Defense. I also have served as the Assistant Chief Financial Officer (CFO) for Accounting at the Department of Housing and Urban Development and as the CFO for the Department of Agriculture Forest Service. I have a record of improving financial management practices. For example, as CFO, I led the Forest Service to its first unqualified audit opinion. I am a Certified Public Accountant and a Certified Defense Financial Manager.

Question. Do you believe that there are any actions that you need to take to enhance your ability to perform the duties of the Assistant Secretary of the Army for Financial Management and Comptroller?

Answer. I believe you always need to look for ways to improve your overall understanding of fiscal issues. If confirmed, I will immediately immerse myself into the many fiscal challenges facing the Army today and incorporate any lessons learned from the past into future financial operations.

RELATIONSHIPS

Question. What is your understanding of the relationship between the Assistant Secretary of the Army for Financial Management and Comptroller and each of the following:

The Secretary of the Army.

Answer. The Assistant Secretary of the Army (Financial Management and Comptroller) is the principal advisor to the Secretary of the Army on financial matters and directs Comptroller and Financial Management functions of the Department of the Army.

Question. The Under Secretary of the Army.

Answer. My relationship to the Under Secretary would mirror that of the Secretary of the Army.

Question. The other Assistant Secretaries of the Army.

Answer. My relationship with the other Assistant Secretaries would support the responsibility I would have, if confirmed, to advise the Secretary of the Army on financial Management functions and activities of the Department of the Army.

Question. The General Counsel of the Army.

Answer. If confirmed, I would consult and coordinate with the General Counsel on all legal matters within financial management and comptroller responsibilities.

Question. The Deputy Under Secretary of the Army for Business Transformation.

Answer. I have been informed that this position has been disestablished and that the business transformation duties formerly assigned to this position now fall under the responsibility of the Under Secretary of the Army in his role as the Chief Management Officer (CMO). If confirmed, I would work closely and collaboratively with the CMO to ensure that all approved Business Transformation Initiatives are fully supported.

Question. The Under Secretary of Defense (Comptroller).

Answer. If confirmed, I would work closely with the Under Secretary of Defense (Comptroller) to ensure the Army financial management and comptroller policies, practices, and systems dovetailed with those of the office of the Under Secretary of Defense (Comptroller).

Question. The Deputy CMO of the Department of Defense (DOD).

Answer. If confirmed, I would support the Under Secretary of the Army in his role as the CMO with any financial advice required in interactions with the Deputy CMO of DOD.

Question. The Director of the Business Transformation Agency (BTA).

Answer. The BTA provides support for the Army's financial management transformation efforts, particularly in business process areas impacting other DOD activities. I understand the Army and BTA are currently collaborating to transform business processes to improve how we pay our vendors and manage our accounts receivable.

Question. The Assistant Secretary of Defense for Networks and Information Integration/Chief Information Officer.

Answer. If confirmed, I would work to include the Chief Information Officer in all financial management system planning and decisionmaking.

Question. The Director of Cost Assessment and Program Evaluation.

Answer. If confirmed, I would support the Director of Cost Assessment and Program Evaluation in fulfilling his or her role of providing independent assessments. I would also work the Director to ensure the success of the Planning, Programming, Budgeting, and Execution (PPBE) process.

Question. The Chief of Staff of the Army

Answer. If confirmed, I would work closely with the Chief of Staff of the Army on resourcing and financial management issues.

Question. The Assistant Secretaries for Financial Management of the Navy and the Air Force.

Answer. If confirmed, I will work closely with the Navy and Air Force Assistant Secretaries for Financial Management to maintain awareness of current issues and ensure that Army financial management and comptroller decisions consider best practices, are better informed, and reflect Service cooperation and consistency when appropriate.

MAJOR CHALLENGES

Question. In your view, what are the major challenges that will confront the Assistant Secretary of the Army for Financial Management and Comptroller?

Answer. Any Assistant Secretary of the Army for Financial Management will be challenged to improve the financial management systems and processes to ultimately allow the Army to receive a clean audit on the financial statements. In addition, it is imperative that the continuing Overseas Contingency Operations are properly funded to ensure the men and women in combat have all the necessary resources required to fight and win. The Army must continue to develop defendable and executable budgets, with proper accountability and transparency, that support the priorities of the Secretary of Defense and the Secretary of the Army, under the guidance of the President.

Question. Assuming you are confirmed, what plans do you have to address these challenges?

Answer. If confirmed, I will work closely with the Under Secretary of Defense (Comptroller), the other Services, and the Army leadership to achieve a unified approach to addressing challenges. I will make every effort to ensure that the resources required are justified and accountable.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Assistant Secretary of the Army for Financial Management and Comptroller?

Answer. If confirmed, I will work towards establishing priorities for the preparation of auditable Financial Statements. I will also work to ensure that there are adequate resources to support Army priorities including Overseas Contingency Operations and Family Support Programs.

CIVILIAN AND MILITARY ROLES IN THE ARMY BUDGET PROCESS

Question. What is your understanding of the division of responsibility between the Assistant Secretary of the Army for Financial Management and Comptroller and the senior military officer (the Director, Army Budget) responsible for budget matters in the Army Financial Management office in making program and budget decisions, including the preparation of the Army Program Objective Memorandum, the annual budget submission, and the Future Years Defense Program?

Answer. I understand the Assistant Secretary of the Army (Financial Management and Comptroller) is responsible for all financial matters within the Department of the Army. The Military Deputy for Budget is the senior military officer within ASA(FM&C) and he is responsible for budget matters. This Military Deputy falls under the Assistant Secretary for Financial Management and Comptroller's direct supervision. I also understand the Assistant Secretary for Financial Management and Comptroller has oversight responsibilities on all financial aspects of the Program Objective memorandum preparation and submission. Direct responsibility for this process belongs to the Army G-8, who is also a senior military officer. Financial Management and Accountability DOD's financial management deficiencies have been the subject of many audit reports over the past 10 or more years. Despite numerous strategies and attempts at efficiencies, problems with financial management and data continue.

Question. What do you consider to be the top financial management issues that must be addressed by the Department of the Army?

Answer. I believe the Army's most pressing financial management challenge is producing timely, reliable, and accurate financial information that is capable of passing an audit. I understand the DOD Comptroller directed the Department of the Army to achieve an audit of the Statement of Budgetary Resources, and establish existence and completeness of mission critical assets. If confirmed, I will work with the DOD Comptroller and the Under Secretary of the Army in his role as CMO to support these objectives.

Question. If confirmed, how would you plan to ensure that progress is made toward improved financial management in the Army?

Answer. If confirmed, I will ensure the Army has a solid plan to achieve the comptroller's objectives of an audit of the Statement of Budgetary Resources, and establish existence and completeness of mission critical assets and that the plan is linked to the Department's enterprise transition plan (ETP) and Financial Improvement and Audit Readiness (FIAR) plan.

Question. If confirmed, what private business practices, if any, would you advocate for adoption by DOD and the Department of the Army?

Answer. I am not currently in a position to advocate for the adoption of any specific business practices for the Army. If I am confirmed, I will study how the Department does business now and work with the DOD and Army chief management officers (CMOs) and the BTA to identify any private business practices that may help to improve Army financial management.

Question. What are the most important performance measurements you would use, if confirmed, to evaluate changes in the Army's financial operations to determine if its plans and initiatives are being implemented as intended and anticipated results are being achieved?

Answer. If confirmed, I will rely on metrics established in the Army's Financial Improvement Plan (FIP) and the DOD FIAR Plan as the basis for measuring financial operations performance. I would also assess if there are any other performance measures available that would help the Army better evaluate itself.

Question. The BTA was established in DOD to strengthen management of its business systems modernization effort.

What is your understanding of the mission of this Agency and how its mission affects the responsibilities of the Assistant Secretary of the Army for Financial Management and Comptroller?

Answer. I understand the BTA was established to improve the management of business systems and systems modernization efforts. If confirmed, I will work with the BTA to ensure the Army's business systems and modernization efforts conform to its standards as codified in the DOD Business Enterprise Architecture (BEA).

Question. What is your understanding of the role of the Assistant Secretary of the Army for Financial Management and Comptroller in providing the Army's views to the Agency, or participating in the decisionmaking process of the Agency, on issues of concern to the Army?

Answer. My understanding is the Assistant Secretary's role is to collaborate with the BTA in the development of the BEA and ETP, and to ensure the Army's financial management modernization efforts conform with these efforts.

Question. Section 904 of the National Defense Authorization Act for Fiscal Year 2008 designated the Under Secretary of the Army as the CMO of the Army. Section 908 of the National Defense Authorization Act for Fiscal Year 2009 required the establishment of a Business Transformation Office within the Army to assist the CMO in carrying out his duties.

Question. If confirmed, what would your role be in the Department's business modernization effort?

Answer. I understand the law designated the Under Secretary as the Army's CMO and that the Secretary of the Army charged the CMO with the responsibility to effectively and efficiently organize the Army's business operations. If confirmed I will ensure the Army's financial modernization efforts support and complement the CMO's business transformation initiatives.

Question. What is your understanding of the relative responsibilities of the Deputy Under Secretary of the Army for Business Transformation and the Assistant Secretary of the Army for Financial Management and Comptroller (ASA(FM&C)) in Army business systems modernization and improvements in financial management?

Answer. It is my understanding that the position of the Deputy Under Secretary of the Army for Business Transformation has been disestablished and that the business transformation duties formerly assigned to this position now fall under the responsibility of the Under Secretary of the Army in his role as the CMO. Further, the Secretary of the Army has established an Office of Business Transformation to

assist the CMO. If confirmed as the ASA(FM&C) I would be responsible for directing and managing the financial activities, operations, and systems of the Department of the Army in accordance with established standards and capabilities and for maintaining and annually revising a 5-year plan describing the activities the Army proposed to conduct over the next 5 fiscal years to improve financial management. In my view, it appears likely that the duties of the CMO and the ASA(FM&C) will be complementary and that a close and collaborative relationship between the CMO and the ASA(FM&C) will work to the mutual benefit of the Army as a whole.

Question. Do you believe the organizational structure of the Department of the Army is properly aligned to bring about business systems modernization and improvements in the financial management of the Army?

Answer. I am not sufficiently familiar with the Army's implementation of the Business Transformation Office to have an opinion on whether the Army is properly aligned to bring about business modernization; however, I believe that establishment of the CMO and Business Transformation Office can only facilitate the Army's ability to modernize business systems and improve its financial management.

Question. If not, how do you believe the Department should be restructured to more effectively address these issues?

Answer. I do yet have an opinion on whether the Army is properly aligned or needs to be restructured. I do believe the establishment of the CMO and Business Transformation Office should help the Army modernize business systems and improve its financial management.

Question. Section 2222 of title 10, U.S.C., requires DOD to develop a BEA and Transition Plan to ensure that the Department's business systems are capable of providing timely, accurate, and reliable information, including financial information, on which to base management decisions. The Department also prepares an annual FIAR plan aimed at correcting deficiencies in DOD's financial management and ability to receive an unqualified "clean" audit. Section 376 of the National Defense Authorization Act for Fiscal Year 2006 required that the FIAR plan be systematically tied to the actions undertaken and planned pursuant to section 2222.

If confirmed, what role would you expect to play in the formulation of the Army's contribution to the BEA and Transition Plan and the FIAR plan?

Answer. If confirmed, I expect to play a significant role in ensuring the Army's FIP and financial business systems modernization efforts align with the Department's BEA and FIAR plan.

Question. What steps would you take, if confirmed, to ensure that the Army's contribution to the FIAR plan is systematically tied to actions undertaken and planned in accordance with section 2222?

Answer. If confirmed, I will ensure the Army's FIP provides the appropriate measures to correct deficiencies preventing the Army from providing timely, reliable, and accurate financial information and that the Army's plan is linked to the Department's FIAR plan. At this time, I am unfamiliar with section 2222, but if confirmed, I will learn about it and ensure the Army complies with it.

Question. The Comptroller General has testified that DOD should fix its financial management systems before it tries to develop auditable financial statements. He explained that: "Given the size, complexity, and deeply ingrained nature of the financial management problems facing DOD, heroic end-of-the-year efforts relied on by some agencies to develop auditable financial statement balances are not feasible at DOD. Instead, a sustained focus on the underlying problems impeding the development of reliable financial data throughout the Department will be necessary and is the best course of action."

Do you agree with this statement?

Answer. I do agree with this statement. If confirmed, I will ensure the Army develops and implements financial improvements that correct underlying problems, including those associated with financial management systems, and that these improvements result in sustainable business processes enabling the Army to produce timely, reliable, and accurate financial information. With the production of timely, reliable, and accurate financial data, obtaining an unqualified audit opinion becomes an achievable goal.

Question. What steps need to be taken in the Army to achieve the goal stated by the Comptroller General?

Answer. I believe the Army needs to implement improvements supported by sustainable business processes and modern financial systems with the full support and commitment of the Army leadership.

PERSONNEL BUDGET SHORTFALLS

Question. During the last few fiscal years, the Army has experienced significant shortfalls in its personnel accounts that required a reprogramming to overcome. Last year, the shortfall was nearly \$2 billion and was primarily corrected via supplemental appropriations.

Has the Army corrected the issues and revised the budget assumptions that gave rise to the previous years' personnel funding shortfalls?

Answer. I have no direct knowledge of the steps the Army has or has not taken to correct these issues. If confirmed, I will make this a priority early in my tenure as the Assistant Secretary of the Army (Financial Management and Comptroller) and take any actions I believe appropriate after studying the issues and coordinating with the Under Secretary of Defense (Comptroller).

Question. Does the Army continue to assume risk in its personnel accounts, and if so, where and to what extent?

Answer. I do not yet know about where or to what extent the Army is accepting any risk in its personnel accounts. If I am confirmed, I will make this issue a priority.

DEFENSE INTEGRATED MILITARY HUMAN RESOURCES SYSTEM

Question. For several years, the Department has been working on the Defense Integrated Military Human Resources System (DIMHRS), an integrated joint military personnel and pay system for all the Military Services, as a means to eliminate obsolete legacy payroll and personnel management systems.

What is your understanding of the Army's requirement for DIMHRS and the adequacy of the current version of DIMHRS to meet the Army's requirements?

Answer. I am not fully aware of the issues with the Army's current personnel and payroll systems. If confirmed, I will familiarize myself with the available systems and work with the CMO and Assistant Secretary of the Army for Manpower and Reserve Affairs to determine what system is appropriate for the Army's future personnel and payroll management systems.

SUPPLEMENTAL FUNDING AND ANNUAL BUDGETING

Question. Since September 11, 2001, DOD has paid for much of the cost of ongoing military operations through supplemental appropriations. The fiscal year 2010 budget includes a full-year request for overseas contingency operations.

What are your views regarding the use of supplemental appropriations to fund the cost of ongoing military operations?

Answer. I believe that the long term reliance on supplemental appropriations to fund an ongoing conflict is problematic. If confirmed, this will be an issue I will want to study further.

AUTHORIZATION FOR NATIONAL DEFENSE PROGRAMS

Question. Do you believe that an authorization pursuant to section 114 of title 10, U.S.C., is necessary before funds for operations and maintenance, procurement, research and development, and military construction may be made available for obligation by the Department of the Army?

Answer. The U.S. Code specifically states that such authorization is necessary before funds for the appropriations listed above may be obligated or expended. If confirmed, I will follow the law, policies, and procedures directed by the Under Secretary of Defense (Comptroller) in dealing with any specific line items which might fall under the "appropriated but not authorized" category.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this Committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of the Army for Financial Management and Comptroller?

Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate Committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee of Congress, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Question for the record with answer supplied follows:]

QUESTION SUBMITTED BY SENATOR ROLAND W. BURRIS

ARMY BUDGET

1. Senator BURRIS. Ms. Matiella, what will you do to increase transparency of the Army budget?

Ms. MATIELLA. Throughout my career in Federal Service it has been a goal to provide transparency to both budget formulation and execution. I have found if an agency has financial statements capable of receiving an unqualified audit opinion, then it has budgetary and proprietary data that is transparent, accurate, and credible, and thus, meets the data requirements of the Army's many stakeholders. I see it as one of my main responsibilities to ensure the Army has the policies, staff, and systems in place to facilitate audit readiness, which will ultimately lead to greater budget transparency and accountability. If confirmed, I pledge to work closely with the congressional committees to provide timely and accurate information to facilitate understanding of the Army's financial position and requirements.

[The nomination reference of Mary Sally Matiella follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
November 20, 2009.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Mary Sally Matiella, of Arizona, to be Assistant Secretary of the Army, vice Nelson M. Ford, resigned.

[The biographical sketch of Mary Sally Matiella, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF MARY SALLY MATIELLA

EDUCATION

University of Arizona, Tucson, AZ, Bachelor of Arts, 1973
University of Arizona, Tucson, AZ, Master of Business Administration, 1976
George Washington University, Washington DC, Educational Specialist, 2007
George Washington University, Washington DC, Doctoral studies in Human and Organizational Learning, all but dissertation (ABD)

PROFESSIONAL EDUCATION

Air Command and Staff College, in seminar, 1990
Professional Military Comptroller School, 1991
Air War College, in seminar, 1991
Defense Resource Management School, 1998
Federal Executive Institute, 2000
Senior Managers in Government, 2003

EMPLOYMENT HISTORY

2004–2008, Assistant Chief Financial Officer for Accounting, Department of Housing and Urban Development, Washington DC
 2001–2004, Chief Financial Officer (CFO), USDA Forest Service, Washington DC
 1999–2001, Staff Accountant, Office of the Under Secretary of Defense, Comptroller, Pentagon, Arlington, VA
 1995–1998, Director of Accounting, Defense Finance and Accounting Service (DFAS)–SB, CA
 1994–1995, Director of the CFO Implementation Office, DFAS–DE, Denver, CO
 1992–1994, Staff Accountant, CFO Implementation Office, DFAS–DE, Denver, CO
 1989–1992, Systems Accountant, Directorate of Accounting, DFAS–DE, Denver, CO
 1986–1989, Senior Systems Accountant, Accounting Policy, Procedures and Systems Branch, Fort Clayton, Panama
 1983–1986, Systems Accountant, Accounting Systems Development Branch, Air Force and Accounting Service, Denver, CO
 1980–1983, Budget Analyst, Ramstein Air Force Base, Ramstein, Germany
 1978–1980, Auditor, TX Dept of Mental Health and Mental Retardation, Austin, TX
 1977–1978, Management Analyst, University of Texas, Austin, TX

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Mary Sally Matiella in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Mary Sally Matiella.

2. **Position to which nominated:**

Assistant Secretary of the Army for Financial Management and Comptroller.

3. **Date of nomination:**

November 20, 2009.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

June 21, 1951; Three Rivers, TX.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Francisco Alberto Matiella.

7. Names and ages of children:

Maria Alejandra Matiella-Novak, 31.

Francisco Jose Matiella, 27.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Pueblo High School, Tucson, AZ, 1965–1969, High School Diploma, 1969.

University of Arizona, Tucson, AZ, 1968–1973, BA, 1973.

University of Arizona, Tucson, AZ, 1973–1976, MBA, 1976.

George Washington University, Washington DC, 2006–2007, EdS 2007.

George Washington University, Washington DC, 2006–present, EdD (all but dissertation).

Certificates/Licenses:

Certified Public Accountant (Colorado)

Certified Defense Financial Manager (Virginia)

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Assistant Chief Financial Officer for Accounting; Department of Housing and Urban Development; 451 7th St, SW, Washington DC; April 2004–August 2008.

Chief Financial Officer; USDA Forest Service; 201 14th Street, SW, Washington DC; December 2001–April 2004.

Staff Accountant; OUSD Comptroller; Pentagon, Arlington, VA; January 1999–December 2001.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Governing Board Audit Committee, Tucson School Board, Tucson Unified School District; member; unpaid; April 2009 to present.

Director of Accounting, Defense Finance and Accounting Service (DFAS)–SB, CA; 1995–1998.

Director of the CFO Implementation Office, DFAS–DE, Denver, CO; 1994–1995.

Staff Accountant, CFO Implementation Office, DFAS–DE, Denver, CO; 1992–1994.

Systems Accountant, Directorate of Accounting, DFAS–DE, Denver, CO; 1989–1992.

Senior Systems Accountant, Accounting Policy, Procedures and Systems Branch, Fort Clayton, Panama; 1986–1989.

Systems Accountant, Accounting Systems Development Branch, Air Force and Accounting Service, Denver, CO; 1983–1986.

Budget Analyst, Ramstein Air Force Base, Ramstein, Germany; 1980–1983.

Auditor, Texas Department of Mental Health and Mental Retardation, Austin, TX; 1978–1980.

Management Analyst, University of Texas, Austin, TX; 1977–1978.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Academy of Management, member

Association of Government Accountants, member

American Society of Military Comptrollers, member

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

USDA Secretary's Group Honor Award for Excellence, 2003.

Office of the Secretary of Defense, Award for Excellence, 2001.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Formal Speeches: None.

Powerpoint presentation: Federal Financial Management Conference, Washington DC, March 11, 2008. Topic: Intragovernmental Business Practices.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MARIA SALLY MATIELLA.

This 15th day of December, 2009.

[The nomination of Mary Sally Matiella was reported to the Senate by Chairman Levin on February 2, 2010, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on February 11, 2010.]

[Prepared questions submitted to Paul Luis Oostburg Sanz by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Goldwater-Nichols was very effective in clarifying the chain of command, strengthening civilian leadership of the military, and enhancing the ability of the Services to act jointly. I am not currently aware of any need to change Goldwater-Nichols at this time. If confirmed, I am committed to supporting the intent of Goldwater-Nichols and forwarding any suggestions for change to the Secretary and Under Secretary of the Navy.

If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I am not currently aware of any modifications that are needed to Goldwater-Nichols.

DUTIES

Question. What is your understanding of the duties and functions of the General Counsel of the Department of the Navy?

Answer. The General Counsel is the chief legal officer of the Department, and legal opinions issued by the General Counsel are the controlling legal opinions within the Department. However, the General Counsel cannot derogate the authority of the Judge Advocate General of the Navy under section 5148(d) of title 10, U.S.C., and other applicable law. The General Counsel provides legal advice, counsel, and guidance to the Secretary, the Under Secretary, the Assistant Secretaries, and their staffs. He is also responsible for providing legal services throughout the Department in a variety of fields, including: acquisition law, including international transactions; business and commercial law; real and personal property law; civilian personnel and labor law; fiscal law; environmental law; intellectual property law; intelligence law; ethics and standards of conduct; and Freedom of Information Act and Privacy Act law. He is responsible for litigation in the areas enumerated above, and oversees all litigation affecting the Department. The General Counsel also serves as the Suspending and Debarring Official and Designated Agency Ethics Official for the Department, and assists the Under Secretary of the Navy in overseeing the Naval Criminal Investigative Service.

In addition, per section 5019 of title 10, U.S.C., the Secretary of the Navy may prescribe other duties and functions for the General Counsel as the Secretary deems appropriate.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. The responsibilities of the General Counsel of the Department of the Navy are quite broad. Overall, it is essential for the General Counsel to possess sound legal and analytical skills, with a willingness to work collaboratively with individual experts over a variety of fields. The General Counsel of the Navy must have strong managerial skills as well as possess effective leadership abilities. I believe that my work as General Counsel for the House Armed Services Committee (HASC) and other previous work experiences in Federal Government and elsewhere have prepared me well to execute the duties of General Counsel of the Department of the Navy, if confirmed.

For nearly 3 years, I have served as the chief legal officer for the HASC. My principal responsibility in this position has been to advise the Chairman and the Staff Director of the HASC in the development, consideration, and enactment of the annual National Defense Authorization Acts (NDAA). A significant part of that process has been identifying, negotiating, and resolving approximately 100 jurisdictional claims by numerous congressional committees related to the NDAA. As General Counsel of the HASC, I also have provided legal counsel to the HASC on criminal investigations involving former HASC members or other members, personnel-related matters, compliance with professional ethical obligations under the rules of the House of Representatives and current law, and other issues such as responding to Freedom of Information Act requests. In addition, I have advised the Chairman and other HASC Members on detainee policy, the activities of the Department of Defense (DOD) to counter the illicit narcotics trade, and matters related to the U.S. Southern Command. For each of these substantive policy areas, I have conducted oversight of administration policies and programs, drafted legislative proposals, been prepared to testify before the HASC, as well as negotiated directly with senior administration officials, Members of Congress, and outside interest groups.

From 2001 to 2006, I was the Deputy Chief Counsel for the Democratic Staff of the House International Relations Committee. In that position, I fulfilled many similar counsel and legislative responsibilities that I would later perform on the HASC. Before beginning work in Congress, I clerked for Judge José A. Fusté in the U.S. District Court for the District of Puerto Rico for nearly 2 years. Prior to receiving a law degree from Harvard Law School and a Master in Public Affairs from Princeton University, I conducted political party training in South Africa during the first all-inclusive national elections, as a Project Officer for the Joint Center for Political and Economic Studies, and served as a Peace Corps volunteer in Guinea-Bissau, West Africa, teaching English in secondary schools.

As a result of my background and these professional experiences, I understand the general challenges and opportunities of the Department, appreciate the intersection of legal and policy questions, have established many working relationships in DOD and elsewhere in the administration, and developed experience managing peo-

ple and processes to achieve high-stakes outcomes. All of which will permit me to perform efficiently and effectively the duties of General Counsel, if confirmed.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the General Counsel of the Department of the Navy?

Answer. I am confident that I possess the requisite legal expertise and leadership skills to be the next General Counsel of the Department of the Navy. If confirmed, I anticipate requesting further information about the major legal challenges facing the Department so as to sharpen my understandings of these matters and be able to provide more nuanced counsel to the Secretary and Under Secretary of the Navy. In addition, I strongly believe that establishing and maintaining productive working relationships with the career civil servants in the Office of General Counsel (OGC) and throughout the Department as well as the Judge Advocate General of the Navy, the Staff Judge Advocate to the Commandant of the Marine Corps, the General Counsel of DOD, and the General Counsels of the other Services, is paramount. If confirmed as the General Counsel, I hope to benefit from their knowledge and judgment as we seek to best serve our sailors, marines, their families, and the civilian employees of the Department.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of the Navy would prescribe for you?

Answer. If confirmed, I expect that the Secretary will rely upon me as the chief legal officer of the Department. I expect that the Secretary will require my candid and objective legal advice on all issues facing the Department of the Navy. I also anticipate that the Secretary will expect me to continue the collaborative relationship which currently exists between the General Counsel, the Judge Advocate General of the Navy, and the Staff Judge Advocate to the Commandant of the Marine Corps so as to further the interests of the uniformed men and women of the Department.

Question. In carrying out your duties, how will you work with the General Counsel of DOD?

Answer. The General Counsel of the DOD is the chief legal officer of DOD. If confirmed, I will work closely with the General Counsel of DOD on matters of mutual interest or concern. If confirmed, I also expect to collaborate and coordinate with the General Counsels of the other military departments, defense agencies, other agencies, and Congress, when necessary and appropriate.

MAJOR CHALLENGES

Question. In your view, what are the major challenges that will confront the General Counsel of the Department of the Navy?

Answer. The Department of the Navy faces many substantive issues in future years. These must be addressed with timely, accurate, and well reasoned legal advice. It is essential that the Department possess a robust cadre of military and civilian attorneys. If confirmed, my major challenge will be to ensure that sufficient resources exist to continue to hire and retain the talented and dedicated professionals who are needed to meet the diverse and changing requirements of the Department and that these professionals have opportunities to perfect their craft and excel throughout their careers in the Department of the Navy.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will review the resources, organization, and operation of the Office of the General Counsel, and work in collaboration with the Judge Advocate General of the Navy and the Staff Judge Advocate to the Commandant to identify opportunities for growth and resource requirements.

Question. What broad priorities will you establish in terms of issues which must be addressed by the Office of the General Counsel of the Department of the Navy?

Answer. If confirmed, my highest priorities will be to ensure that the Department of the Navy receives the highest quality legal advice and services and that the attorneys of the Office of the General Counsel continue to explore ways to strengthen cooperation with their uniformed colleagues in the offices of the Judge Advocate General of the Navy and the Staff Judge Advocate to the Commandant of the Marine Corps.

RELATIONSHIP WITH THE JUDGE ADVOCATE GENERAL AND THE STAFF JUDGE ADVOCATE TO THE COMMANDANT OF THE MARINE CORPS

Question. What is your understanding of the role and authority of the Judge Advocate General of the Navy vis-a-vis the General Counsel of the Navy and the Staff Judge Advocate to the Commandant of the Marine Corps (SJA CMC)?

Answer. The Judge Advocate General of the Navy is responsible for providing legal and policy advice to the Secretary of the Navy on military justice, administrative law, claims, investigations, operational and international law, legal assistance, civil law, environmental law, intelligence, and litigation involving matters under his practice areas. If confirmed, I anticipate that we will consult with each other on matters of mutual interest or concern relating to military justice. With respect to civil law matters involving Navy and Marine Corps components, my understanding is that primary responsibility is divided, by major subject area, between the Office of the General Counsel and the Office of the Judge Advocate General. I am certain that there will be situations in which our responsibilities overlap and create seams in the administration of legal services. In those instances, I would expect that we would work together to ensure a collaborative approach.

Question. In carrying out your duties, if you are confirmed, how will you work with the Judge Advocate General of the Navy and the SJA CMC?

Answer. If confirmed, it is paramount that I, the Judge Advocate General of the Navy, and Staff Judge Advocate to the Commandant have a working relationship that builds upon the strong tradition of partnership among the three legal offices and continues to consult, communicate, and cooperate to the greatest extent possible for the benefit of our clients throughout the Department of the Navy.

Question. How are the legal responsibilities of the Department of the Navy allocated between the General Counsel and the Judge Advocate General and the SJA CMC?

Answer. The General Counsel is the chief legal officer of the Department of the Navy, and the principal legal advisor to the Secretary of the Navy, the Assistant Secretaries, and their staffs, and is the head of the Office of the General Counsel. The Office of the General Counsel's practice includes business and commercial law, environmental law, personnel and labor law, fiscal law, intellectual property law, and ethics, among other subjects. The Judge Advocate General of the Navy also reports directly to the Secretary of the Navy and generally provides legal services in the areas of military justice, international law, matters associated with military operations, environmental law, military personnel law, administrative law, claims, and ethics. The Staff Judge Advocate to the Commandant of the Marine Corps is the senior military lawyer to the Commandant, and his responsibilities largely parallel those of the Judge Advocate General of the Navy. Although the responsibilities of the General Counsel, the Judge Advocate General, and Staff Judge Advocate to the Commandant will overlap on occasion, I understand that the three offices have recently agreed to a strategy for collaborating on issues of mutual interest or concern, called "One Mission, One Team: A 21st Century Strategic Vision for Legal Support in the U.S. Department of the Navy."

Question. How will you ensure that legal opinions of your office will be available to Navy and Marine Corps attorneys, including judge advocates?

Answer. I understand that the legal opinions of the Office of the General Counsel are disseminated throughout the Department of the Navy via normal Departmental distribution processes. If confirmed, I expect to continue this practice and identify, if necessary, new digital media for more targeted and timely distributions.

Question. In response to attempts within DOD to subordinate legal functions and authorities of the Judge Advocates General to the General Counsels of DOD and the Military Services, Congress enacted legislation prohibiting any officer or employee of DOD from interfering with the ability of the Judge Advocates General of the Military Services and the legal advisor to the Chairman of the Joint Chiefs of Staff to provide independent legal advice to the Chairman, Service Secretaries, and Service Chiefs.

What is your view of the need for the Judge Advocate General of the Navy and the SJA CMC to provide independent legal advice to the Secretary of the Navy and the Chief of Naval Operations, and the Commandant of the Marine Corps?

Answer. The Judge Advocate General of the Navy and the Staff Judge Advocate to the Commandant of the Marine Corps must be in a position to provide their best independent legal advice to the Secretary of the Navy, the Chief of Naval Operations, and the Commandant of the Marine Corps, as appropriate. Effective decisionmaking cannot occur without their candid, honest, and objective analysis.

Question. What is your view of the responsibility of Navy and Marine Corps judge advocates to provide independent legal advice to military commanders?

Answer. It is the responsibility of Navy and Marine Corps judge advocates to provide independent legal advice to military commanders. This advice must be free of any improper external influence.

Question. If confirmed, would you propose any changes to the current relationships between the Judge Advocate General, the SJA CMC, and the General Counsel?

Answer. I am not aware of any changes that are required to the current relationships between the uniformed judge advocates and the General Counsel of the Department of the Navy. I am aware of the independent review directed by Section 506 of the National Defense Authorization Act for Fiscal Year 2010. If confirmed, I will study closely the findings of that Commission and, if appropriate, consider any of their recommendations for improving these relationships.

Question. Article 6 of the Uniform Code of Military Justice (UCMJ) gives primary jurisdiction over military justice to the Judge Advocates General of the Army, Navy, and Air Force and, in the Marine Corps, to the Commandant of the Marine Corps.

How do you view the responsibilities of the Navy General Counsel in the performance of military justice matters with regard to the Judge Advocate General of the Navy and the SJA CMC?

Answer. The Judge Advocates General of the Military Services have primary jurisdiction over the performance of military justice. If confirmed, as the chief legal officer of the Department of the Navy, I will have an interest in the administration of military justice and, as an example, anticipate participating in the Secretary of the Navy's review of the DOD's Inspector General's report on the court-martial appellate review process within the Department of the Navy, as required by the Senate Armed Services Committee in the committee's report accompanying this year's defense authorization bill. If confirmed, I would endeavor to continue the close working relationship with the Judge Advocate General of the Navy and Staff Judge Advocate to the Commandant of the Marine Corps, in which we share information and work collaboratively when necessary to resolve issues of policy and matters pertaining to specific cases.

ATTACKS AT FORT HOOD

Question. The recent attack that resulted in the deaths of 12 soldiers and 1 civilian employee and the wounding of many more at Fort Hood was allegedly carried out by a Muslim Army medical officer. Media reports indicate that warning signs of the Major's extremist views were observed but not documented in official personnel records that were shared with the FBI.

In your view, do current Navy and Marine Corps policies limit the ability to include information in official records that may assist in the identification of potential threats?

Answer. I am not aware of the policies that currently exist within the Department of the Navy in this matter. If confirmed, I will look into this issue and allow for this type of information to be included in official personnel records.

Question. Do current Navy and Marine Corps procedures hinder the ability to share this type of information with other official agencies charged with identifying and monitoring potential extremist or terrorist activities?

Answer. I am not aware of the procedures currently in operation to address this issue. If confirmed, I will inquire into these procedures and provide my recommendations to the Secretary and Under Secretary of the Navy regarding the impact of existing procedures on the monitoring of potential threats.

Question. What is your understanding of how the Department of the Navy balances the need to identify and respond to potentially harmful extremist views held by soldiers against individual privacy and respect for the right of sailors and marines to hold and express personal beliefs?

Answer. The proper balance between individual privacy rights and the need to identify threats is very difficult to attain. I am not aware of how the Department currently balances these interests. If confirmed, I will inquire into this issue and provide my recommendations to the Secretary and Under Secretary of the Navy.

Question. Do you see a need for a change in this balance?

Answer. I am not aware of a need to change this balance at this time.

ATTORNEY RECRUITING AND RETENTION ISSUES

Question. If confirmed, how do you assess your ability to hire and retain top quality attorneys and provide sufficient opportunity for advancement?

Answer. It is my understanding that the Department of the Navy continues to hire outstanding civilian attorneys. If confirmed, I will work with the senior staff of the Office of the General Counsel to address any recruiting and retention issues.

Question. In your view, does the Department of the Navy have a sufficient number of civilian and military attorneys to perform its missions?

Answer. I do not know whether there are a sufficient number of attorneys to perform their ongoing missions. I am familiar with the Department of the Navy's Center for Naval Analyses (CNA) assessment regarding JAG Corps manning. If confirmed, I will work with the Judge Advocate General of the Navy and the Staff

Judge Advocate to the Commandant of the Marine Corps to ensure the Department has a sufficient number of highly skilled lawyers to meet its requirements.

Question. In your view, what incentives to successful recruiting and retention of attorneys, if any, need to be implemented or established?

Answer. I am not currently aware of any new incentives that need to be implemented at this time.

DETAINEE ISSUES

Question. What role do you expect to play, if confirmed, in helping DOD and the Department of the Navy address legal issues regarding detainees?

Answer. As General Counsel of the HASC, I have closely monitored the policies and activities of DOD relating to detainees and have worked on related legislation. If confirmed, and if requested, I would expect to play an active role in assisting the General Counsel of DOD, the Judge Advocate General of the Navy and the Staff Judge Advocate to the Commandant in addressing this complicated issue.

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the U.S. Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is the prohibition in the best interest of the United States? Why or why not?

Answer. This prohibition is in the national security interests of the United States and generally in the best interest of our country.

Question. Do you believe that the phrase “cruel, inhuman, or degrading treatment or punishment” has been adequately and appropriately defined for the purpose of this provision?

Answer. Yes, I do, with the understanding that the scope of the definition will continue to evolve with the case law on the Constitutional prohibition against cruel, unusual, and inhumane treatment or punishment.

Question. What role do you believe the General Counsel of the Navy should play in the interpretation of this standard?

Answer. Within the guidance provided by the General Counsel of DOD, the legal interpretation of the standard by the General Counsel of the Navy, as approved by the Secretary of the Navy, should be controlling within the Department of the Navy.

Question. What role do you believe the Judge Advocates General of the Navy and the SJA CMC should play in the interpretation of this standard?

Answer. The Judge Advocate General of the Navy and the SJA CMC should also play a prominent role in the interpretation of this standard. If confirmed, and if called upon to offer any guidance on this standard, I will work with the Judge Advocate General of the Navy and the Staff Judge Advocate to the Commandant to incorporate their unique perspectives that are informed by the Navy JAG Corps’ and the Marine judge advocates’ field experiences.

Question. If confirmed, will you take steps to ensure that all relevant Navy and Marine Corps directives, regulations, policies, practices, and procedures fully comply with the requirements of Section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. Yes, I will.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2–22.3, issued in September 2006, and in DOD Directive 2310.01E, the DOD Detainee Program, dated September 5, 2006?

Answer. Yes, I do.

Question. Section 2441 of title 18, U.S.C., as amended by the Military Commissions Act of 2006, defines grave breaches of Common Article 3 of the Geneva Conventions, including torture and cruel and inhuman treatment.

In your view, does section 2441 define these terms in a manner that provides appropriate protection from abusive treatment to U.S. detainees in foreign custody and to foreign detainees in U.S. custody?

Answer. If confirmed, I expect to review this issue more closely and work with the General Counsel of DOD to promote the “golden rule.”

CONTRACTORS ON THE BATTLEFIELD

Question. U.S. military operations in Iraq have relied on contractor support to a greater degree than any previous U.S. military operations. The extensive involvement of contractor employees in a broad array of activities—including security functions—has raised questions about the legal accountability of contractor employees for their actions.

Do you believe that current DOD and Department of the Navy regulations appropriately define and limit the scope of security functions that may be performed by contractors in an area of combat operations?

Answer. I have not had an opportunity to become familiar with the specific provisions of the Department's regulations in this area. If confirmed, I will review these regulations as soon as possible.

Question. What changes, if any, would you recommend to such regulations?

Answer. If confirmed and after reviewing the regulations, I will make such recommendations as may be necessary.

Question. Do you believe that current DOD and Department of the Navy regulations appropriately define and limit the scope of contractor participation in the interrogation of detainees?

Answer. Although I am not familiar with the Department's regulations in this area, I know that section 1038 of the National Defense Authorization Act for Fiscal Year 2010 (P.L. 111-84) prohibits contractors from interrogating detainees but permits contractors to perform some supporting roles with regard to these interrogations.

Question. What changes, if any, would you recommend to such regulations?

Answer. If confirmed and after reviewing the regulations, I will make such recommendations as may be necessary.

Question. OMB Circular A-76 defines "inherently governmental functions" to include "discretionary functions" that could "significantly affect the life, liberty, or property of private persons".

In your view, is the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations an inherently governmental function?

Answer. I have not had the opportunity to be briefed on this issue. If confirmed, I will carefully review the governing regulations to provide the appropriate legal advice and guidance.

Question. In your view, is the interrogation of enemy prisoners of war and other detainees during and in the aftermath of hostilities an inherently governmental function?

Answer. Yes, and I am aware that Congress enacted section 1057 of the National Defense Authorization Act for Fiscal Year 2009 (P.L. 110-417) affirming this position.

Question. What role do you expect to play, if confirmed, in addressing the issue of what functions may appropriately be performed by contractors on the battlefield?

Answer. If confirmed, and if requested, I would expect to play an active role in assisting the General Counsel of DOD in addressing this complicated issue.

Question. The Military Extraterritorial Jurisdiction Act (MEJA) was enacted in 2000 to extend the criminal jurisdiction of the U.S. courts to persons employed by or accompanying the Armed Forces outside the United States.

In your view, does MEJA provide appropriate jurisdiction for alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. I am generally aware of the MEJA provisions and appreciate the importance of appropriate accountability over all persons supporting our Armed Forces wherever they may be located. See, e.g., section 861(a)(6) of the National Defense Authorization Act for Fiscal Year 2008 (P.L. 110-181). If I am confirmed, it will be a high priority of mine to achieving that objective.

Question. What changes, if any, would you recommend to MEJA?

Answer. At this time, I am not aware of any legislative changes that are needed to be made to MEJA.

Question. What role would you expect to play, if confirmed, in developing administration recommendations for changes to MEJA?

Answer. If confirmed, and if requested, I would expect to play an active role in assisting the General Counsel of DOD in addressing this complicated issue.

Question. Section 552 of the National Defense Authorization Act for Fiscal Year 2007 extended criminal jurisdiction of the military courts under the UCMJ to persons serving with or accompanying an armed force in the field during time of declared war or a contingency operation, such as our current operations in Iraq and Afghanistan.

In your view, does the UCMJ provide appropriate jurisdiction for alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. I understand and appreciate the importance of appropriate accountability over all persons supporting our armed forces wherever they are located. I do not

now have an informed view about whether the UCMJ currently provides the appropriate jurisdictional reach.

Question. What is your view of the procedures agreed upon by DOD and the Department of Justice to reconcile jurisdictional responsibilities under MEJA and the UCMJ?

Answer. I am generally aware that there are procedures to reconcile these responsibilities, but I do not now have an informed view about whether the procedures strike the appropriate balance in the exercise of criminal jurisdiction.

Question. What changes, if any, would you recommend to the UCMJ to ensure appropriate jurisdiction for alleged criminal actions of contractor employees?

Answer. I am not prepared to recommend any changes to the UCMJ at this time.

Question. What are your views on the impact of Article 12 of the Status of Forces Agreement between the United States and Iraq on U.S. jurisdiction over contractor personnel pursuant to either MEJA or the UCMJ?

Answer. I have not had the opportunity to study this issue, but if confirmed, I will carefully review the SOFA, MEJA, and UCMJ to provide the appropriate legal advice and guidance.

Question. How are jurisdictional matters arising out of Article 12 being addressed?

Answer. I am not aware of how jurisdictional matters arising out of Article 12 are currently being addressed. However, if confirmed, I will carefully review all applicable authorities to provide the appropriate legal advice and guidance to the Department of the Navy.

MANPOWER REQUIREMENTS FOR NAVY AND MARINE CORPS JUDGE ADVOCATES

Question. The CNA recently completed a study of manpower requirements for the Navy's Judge Advocate Generals Corps in which it concluded that the Navy is significantly understrength for its various legal missions, including combat service support in Iraq and Afghanistan. Section 506 of the National Defense Authorization Act for Fiscal Year 2010 established an independent panel to review the judge advocate requirements of the Navy and Marine Corps and make appropriate recommendations.

What is your understanding of the CNA study's findings with respect to manpower in the Navy JAG Corps?

Answer. I am generally aware of the CNA report, but I have not had an opportunity to review its findings. As discussed earlier, and if confirmed, I will be committed to ensuring that the Department possesses a robust cadre of military and civilian attorneys.

Question. What is your understanding of the total numbers of judge advocates on Active Duty in the Navy and Marine Corps vis-a-vis the Army and the Air Force?

Answer. It is my understanding that the Navy and Marine Corps have fewer judge advocates than the Army and the Air Force. This is due to a number of factors, including the size of the Services and the different functions performed by the uniformed lawyers within each Service. For example, many of the legal functions performed by judge advocates in the Army and Air Force are performed by attorneys in the OGC of the Department of the Navy. Additionally, the Marine Corps does not have a separate Judge Advocate Corps. As a result, all of their judge advocates also fill line billets at various stages of their careers.

Question. If confirmed, will you review the judge advocate manning within the Navy and Marine Corps, determine whether current active-duty strengths are adequate to support their missions, and support the independent review panel in the accomplishment of its study and recommendations?

Answer. Yes, I will.

ROLE OF WOMEN IN MILITARY SERVICE

Question. The Chief of Naval Operations recently stated that the Navy will assign female sailors to submarines starting in 2011.

What is your understanding of the issues that must be resolved in order for women to successfully perform submarine duty?

Answer. Other than the need to provide official notification to Congress, I am not currently aware of any legal issues which need to be addressed in order to implement this policy. I understand, however, that there are manpower and personnel considerations which must be addressed to implement the policy successfully.

Question. If you are confirmed, what role would you expect to have in changing this policy, and what would your role, if any, be in implementing the new policy?

Answer. If confirmed, I would expect to coordinate with the Judge Advocate General of the Navy to advise the Secretary of the Navy on any legal implications associated with the implementation of the new policy.

Question. What are your views on opening additional specialties to women serving in the Navy or the Marine Corps?

Answer. At this time, I am not aware of any legal impediments to opening additional specialties to women within the Navy or the Marine Corps.

WOMEN IN COMBAT

Question. Current DOD policies regarding the combat role of women in uniform have been in effect since 1994.

What is your understanding of the conclusions and lessons that have been learned from Operation Iraqi Freedom and Operation Enduring Freedom about the feasibility of current policies regarding women in combat?

Answer. I have not had an opportunity to review any lessons learned from the participation of women in Operation Iraqi Freedom and Operation Enduring Freedom. If confirmed, I will make the review of the current policies a priority, seek to be informed by field experiences as relayed by the Judge Advocate General of the Navy and the Staff Judge Advocate to the Commandant of the Marine Corps, and work directly with the Secretary and Under Secretary of the Navy to address any legal concerns that may have arisen from the review of current policies in the context of these operations. At the end of this process, I would expect to propose to the Secretary and Under Secretary of the Navy changes to current policy, if they are warranted.

Question. What is your assessment of Navy and Marine Corps compliance with the requirements of laws relating to women in combat?

Answer. It is my understanding that the Navy and Marine Corps are in compliance with these requirements.

Question. In your view, should the current policy regarding assignment of women in combat be revised to reflect the realities of the modern battlefield, effective counter-insurgency requirements, and changing societal expectations regarding roles for female sailors and marines?

Answer. I have not had an opportunity to review this matter in depth. If confirmed, I will work directly with the Secretary and Under Secretary of the Navy to address any legal concerns associated with any proposed changes to this policy.

RELIGIOUS GUIDELINES

Question. What is your understanding of current policies and programs of DOD and the Department of the Navy regarding religious practices in the military?

Answer. It is my understanding that current policies and programs regarding religious practices are initiated through the Secretary of Defense and his staff. Each Service Secretary may supplement the overall guidance.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. I have not had an opportunity to review these policies. If confirmed, I am committed to reviewing the current policies to ensure that an appropriate balance has been reached between these important interests.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious belief?

Answer. See my response to the immediately preceding question.

HOMOSEXUAL CONDUCT POLICY

Question. The current Homosexual Conduct Policy, commonly referred to as "Don't Ask, Don't Tell," went into effect in February 1994 after months of congressional hearings and debate resulting in the enactment of a Federal statute (title 10 U.S.C. section 654). Although there have been some changes in how this policy has been implemented, the basic policy has not changed. President Obama has made it clear that he intends to work with the military and Congress to repeal the policy.

What is your view of the current policy, as stated in section 654?

Answer. I have not had an opportunity to review the current policy. It is my understanding, though, that the policy is currently being reviewed within the administration and DOD.

Question. What is your view on repealing or changing this policy?

Answer. The current policy and any proposed changes to it will likely have significant legal and other implications. Without having had an opportunity to become fully informed about this policy, its implementation, and the ongoing review by DOD, I am not in a position at this time to offer an informed view on the effects of repealing or changing this policy.

Question. In your view, would changing this policy have an adverse impact on good order and discipline in the military?

Answer. See my answer to the immediately preceding question.

Question. If confirmed, what role would you play in efforts to repeal or change this policy?

Answer. If confirmed, I would expect to advise the Secretary of the Navy on all legal matters associated with the repeal or change to this policy.

Question. If the policy is changed by Congress, would you recommend a phase-in period for implementation of the new policy?

Answer. See my answer to the preceding question regarding my view on repealing or changing the current policy.

Question. If confirmed, what role will you play in implementing a new policy?

Answer. If confirmed, I would expect to advise the Secretary of the Navy on all legal matters associated with the implementation of a new policy.

ROLE IN THE OFFICER PROMOTION AND CONFIRMATION PROCESS

Question. What is your understanding of the role of the General Counsel of the Navy in ensuring the integrity and proper functioning of the officer promotion process?

Answer. Military personnel matters are primarily under the cognizance of the respective service Judge Advocates. The Secretary of the Navy is responsible for the proper functioning of the Department of the Navy's promotion selection process. If confirmed, I would envision a close working relationship with the Judge Advocate General of the Navy and Staff Judge Advocate to the Commandant of the Marine Corps to resolve issues of policy and matters pertaining to specific cases.

Question. Do you see any need for change in this role?

Answer. I am not aware of any need for change at this time.

GENERAL AND FLAG OFFICER NOMINATIONS

Question. Under DOD Instruction 1320.4, adverse and alleged adverse information pertaining to general and flag officers must be evaluated by senior leaders in the Services and in the Office of the Secretary of Defense prior to nomination for promotion and certain assignments.

If confirmed, what role, if any, would you play in the officer promotion system, particularly in reviewing general and flag officer nominations?

Answer. General and flag officer nominations are also within the primary cognizance of the Judge Advocate Generals of each Military Service. If confirmed, and when requested, I would provide advice on cases of Department of the Navy nominees with adverse, or potentially adverse, information in order to ensure that such information is properly evaluated and reported to the Senate Armed Services Committee.

Question. What is your understanding of the role of the General Counsel of the Department of the Navy in ensuring the legal sufficiency of statutory selection board processes?

Answer. See my answer to the preceding question.

Question. What is the role, if any, of the General Counsel of the Department of the Navy in reviewing and providing potentially adverse information pertaining to a nomination to the Senate Armed Services Committee?

Answer. See my answer to the preceding question.

MILITARY PERSONNEL POLICY AND CASES

Question. In your view, what role, if any, should the General Counsel and attorneys assigned to the OGC play in military personnel policy and individual cases, including cases before the Board for Correction of Naval Records?

Answer. The General Counsel plays an important role in ensuring that military personnel policies are consistent with law and implemented in a fair and consistent manner. If confirmed, I would work closely with the Secretary of the Navy, the Assistant Secretary of the Navy (Manpower and Reserve Affairs) to ensure that these policies are formulated and applied in a fair and consistent manner.

SEXUAL ASSAULT PREVENTION AND RESPONSE POLICY

Question. Numerous cases of sexual misconduct involving servicemembers have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They asserted that the military failed to respond appropriately by providing basic services, including medical attention and criminal investigations of their charges.

What is your understanding of the resources and programs the Navy and Marine Corps have in place in deployed locations to offer victims of sexual assaults the medical, psychological, and legal help they need?

Answer. It is my understanding that the Department has endeavored to improve the delivery of assistance to all victims of sexual assault, wherever they are located. I also know that one of the Secretary of the Navy's top manpower priorities is eliminating sexual assaults from Navy and Marine Corps ranks and placing the total force on the cutting edge of all sexual assault prevention and response-related programs. If confirmed, I am committed to reviewing the Department of the Navy's policies and procedures to ensure that victims of sexual assault receive the care and services that they need.

Question. What is your view of the steps the Navy and Marine Corps have taken to prevent sexual assaults on female soldiers at their home stations and when they are deployed?

Answer. The prevention of sexual assault has been a key issue for the Department of the Navy for some time. It is my understanding that the Department of the Navy has implemented measures which are designed to cultivate a culturally aware and educated work environment within the Department that is intolerant of sexual assault. If confirmed, I am committed to enforcing a climate that is intolerant of sexual assault.

Question. What is your view of the adequacy of the training and resources the Navy and Marine Corps have in place to investigate and respond to allegations of sexual assault?

Answer. Although I know the Department of the Navy is committed to eliminating sexual assaults from within its ranks, I have not had the opportunity to review the Department's communication, training, and education strategies. If confirmed, I will review this program and provide oversight in all areas under my authority to prevent sexual assaults and protect sexual assault victims.

Question. Do you consider the current Navy and Marine Corps sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. I have not had the opportunity to study the effectiveness of Navy and Marine Corps confidential reporting policies and procedures. If confirmed, I will study these policies and procedures to ensure the Department of the Navy continues to promote programs which assist victims and encourage the reporting of sexual assaults.

Question. Specifically, do you think Sexual Assault Response Coordinators should be afforded a confidentiality privilege in order to help them perform their duties more effectively?

Answer. I have not had the opportunity to review the specific role of Sexual Assault Response Coordinators within the Department of the Navy's overall sexual assault prevention and response program. If confirmed, I will review all aspects of the Department of the Navy's program to ensure that all legal means are employed to support victims and investigate alleged offenders fully and fairly.

WHISTLEBLOWER PROTECTION

Question. Section 1034 of title 10, U.S.C., prohibits taking retaliatory personnel action against a member of the Armed Forces as reprisal for making a protected communication. By definition, protected communications include communications to certain individuals and organizations outside of the chain of command.

If confirmed, what actions will you take to ensure that senior military leaders understand the need to protect servicemembers who report misconduct to appropriate authorities within or outside the chain of command?

Answer. It is my understanding that the Department of the Navy fully implements applicable law, regulations, and rules on whistleblower protections. If confirmed, I, in concert with the Navy JAG, will act to ensure that prospective commanding and executive officers are briefed before they take their positions and continue to receive training during their commands on the need to protect servicemembers who report misconduct. I, in concert with the Navy JAG, will further act to ensure that military members whose actions are protected are not sub-

ject to illegal reprisals or retaliation. If a case of illegal reprisal comes to my attention, I will work to ensure that it is addressed in accordance with the law.

SUPPORT TO NAVAL INSPECTOR GENERAL

Question. What role, if any, do you think the General Counsel of the Navy should have in reviewing the investigations and recommendations of the Naval Inspector General?

Answer. The General Counsel must provide independent and objective legal advice to the Secretary and Under Secretary of the Navy concerning the Inspector General's duties and responsibilities. This execution of this obligation, however, must respect the Inspector General's independence and not infringe upon the Inspector General's authority. If confirmed, I will establish a productive working relationship with the Naval Inspector General and the Deputy Naval Inspector General for Marine Corps matters, while maintaining strong working relationships with the Judge Advocate General of the Navy and the Staff Judge Advocate to the Commandant of the Marine Corps.

CIVILIAN ATTORNEYS

Question. Judge advocates in the Armed Forces benefit from an established career progression, substantial mentoring and training opportunities, and exposure to a broad spectrum of legal areas and leadership responsibilities. By contrast, civilian attorneys in the military departments normally do not have established career programs and may do the same work for many years, with promotion based solely upon longevity and vacancies.

What is your understanding of the personnel management and career development system for civilian attorneys?

Answer. The Department of the Navy is different from other Military Services in that its OGC, which is largely composed of civilian attorneys, is responsible for legal support in acquisition, business and commercial law, real and personal property law, and other areas. Responsibility for several other areas of practice, including environmental law, is shared with Navy and Marine Corps judge advocates. While I am not familiar with Navy OGC's career development program, I understand that Navy OGC is centrally managed, with career development for its attorneys being an important priority. If confirmed, I will continue to look for ways that the OGC can assist in the career development of its civilian attorneys.

Question. In your view does that system need revision? If so, what do you see as the major problems and what changes would you suggest?

Answer. I am not aware of any necessary revisions at this time.

CLIENT

Question. In your opinion, who is the client of the General Counsel of the Department of the Navy?

Answer. The Department of the Navy is the client.

ACQUISITION ISSUES

Question. What role should the General Counsel play in ensuring that Navy and Marine Corps procurement programs are executed in accordance with the law and DOD acquisition policy?

Answer. The General Counsel plays a critical role in ensuring compliance with acquisition laws and current DOD acquisition policy. Acquisition integrity is critical to the effectiveness of the Department of the Navy's procurement program. It is essential for the General Counsel to be actively involved in ensuring compliance to all legal obligations in order to ensure this integrity.

Question. What role should the General Counsel play in ensuring that ethics provisions on conflict of interest are followed both by Navy and Marine Corps personnel and by Navy and Marine Corps contractors?

Answer. The General Counsel is the Designated Agency Ethics Official (DAEO) and the Suspending and Debarring Official (SDO) within the Department of the Navy. In his capacity as the DAEO, it is the General Counsel's responsibility to ensure that all ethics provisions, especially those dealing with conflicts of interest, are properly understood and followed within the Department. In his capacity as the SDO, the General Counsel ensures that the Department does business only with responsible contractors.

Question. Allegations of fraud and abuse during contingency contracting in Iraq and Afghanistan have been widespread.

What role should the General Counsel play in ensuring that Navy and Marine Corps personnel are properly trained in contingency contracting and are supervised in the performance of their duties?

Answer. The General Counsel must have an active role in ensuring that all contingency contracting personnel of the Department of the Navy are adequately trained and supervised.

DETECTING CONFLICTS OF INTEREST

Question. Personal and organizational conflicts of interest have become a major concern. DOD's expanded use of private contractors being tasked to perform key functions that the Services had formerly performed in-house and the new requirement to fill thousands of DOD civilian positions with experienced, qualified individuals present challenges in preventing conflicts of interest and the appearance of conflicts of interest.

What do you think the Department of the Navy should do, and what should the General Counsel's role be, in ensuring that the Navy and Marine Corps identify personal and organizational conflicts of interest and take the appropriate steps to avoid or mitigate them?

Answer. It is incumbent upon the Department to ensure that an efficient and effective process for reviewing potential personal and organizational conflicts of interest exists. If confirmed, I am committed to evaluating the current processes established within the Department and, should it be necessary, modifying them so that they can effectively identify these potential conflicts of interest.

Question. What is your understanding of the steps the Navy and Marine Corps take to identify and address potential conflicts of interest during the hiring process?

Answer. I am not currently aware of the processes undertaken within the Department to identify and address potential conflicts of interest in the hiring process. If confirmed, I am committed to evaluating these and, should I deem necessary, modifying them so that they can be most effective.

Question. Recent reports have raised concerns about potential personal conflicts of interest by contractor employees, including retired general and flag officers ("senior mentors") who advise senior government officials.

What is your understanding of existing statutes and regulations pertaining to personal conflicts of interest by contractor employees who advise senior government officials?

Answer. I am familiar with the recent series of press articles addressing the concerns associated with the "senior mentors" programs. It is my understanding that existing ethics regulations are intended to address the problems associated with the potential conflicts of interest associated with hiring personnel to assist DOD. If confirmed, I will make it a high priority to review these regulations and the current practice with regard to the hiring of "senior mentors" in order to assist the Secretary in determining what changes in policy may need to be made.

Question. Do you see any need for changes to these statutes and regulations?

Answer. It is my understanding that DOD is currently evaluating the hiring practices associated with "senior mentors" and that guidance may be forthcoming. If confirmed, I am committed to working with the General Counsel of DOD and coordinating with the General Counsels of the other military departments and agencies on this matter.

Question. What role do you see for the General Counsel in identifying and addressing potential conflicts of interest by employees of Navy and Marine Corps contractors?

Answer. The General Counsel must play a primary role in identifying and addressing potential conflicts of interest within the Department of the Navy.

LEGAL ETHICS

Question. What is your understanding of the action a Department of the Navy attorney or a Navy or Marine Corps judge advocate should take if the attorney becomes aware of improper activities by a Department of the Navy official who has sought the attorney's legal advice and the official is unwilling to follow the attorney's advice?

Answer. Every attorney of DOD is under a professional obligation to comply faithfully with all applicable laws and regulations. It is my understanding that there may also be Departmental regulations on this obligation. If a Department of the Navy attorney learns of improper activities by an official who has sought his or her legal advice but is unwilling to follow it, the attorney should immediately notify his or her legal supervisor (or the senior lawyer in the next higher level of his or her organization) for review and appropriate action by that higher level attorney.

Question. Do you believe that the present limits on pro bono activities of government attorneys are generally correct as a matter of policy or does the policy need to be reviewed and revised?

Answer. To my knowledge, the present limits on pro bono activities are appropriate. If confirmed, I will encourage attorneys of the Department of the Navy to participate in bar association activities for their professional development.

Question. In your view, do the laws, regulations and guidelines that establish the rules of professional responsibility for attorneys in the Department of the Navy provide adequate guidance?

Answer. If confirmed, I will examine the adequacy of the professional responsibility rules for attorneys in the Department, and make appropriate modifications or issue supplemental guidance, if warranted.

LITIGATION INVOLVING THE DEPARTMENT OF THE NAVY

Question. What is your understanding of the relationship between the Department of the Navy and the Department of Justice with respect to litigation involving DOD?

Answer. The Department of Justice has statutory responsibility to represent the United States, its agencies, and its officers, including DOD, in all litigation matters. Department of the Navy attorneys will assist counsel at the Department of Justice in cases in which the Department of the Navy is a party or has an interest.

Question. In your view, does the Department need more independence and resources to conduct its own litigation or to improve upon its current supporting role?

Answer. I am currently not aware of the need for more independence or resources to conduct litigation, but, if confirmed, I will review this issue.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. The United Nations Convention on the Law of the Sea (UNCLOS) is currently pending in the Senate. Military and civilian leaders in DOD have consistently articulated their support for accession to the Convention and have stressed the benefits for our national security.

What are your views on accession by the United States to UNCLOS?

Answer. I support U.S. accession to the UNCLOS. It is my understanding that there are important national security interests furthered by U.S. accession and that this is a priority of the Secretary of the Navy, the Chief of Naval Operations, and the administration.

Question. From a national security standpoint, what do you see as the legal advantages and disadvantages of the United States being a party to UNCLOS?

Answer. It is my understanding that the UNCLOS secures important rights relating to the freedom of navigation. Failure to be a party to the Convention forces the United States to rely solely upon customary international law to enforce our views relating to international law.

Question. During testimony before the Senate Armed Services Committee in June 2009, Secretary Mabus stated his strong support for U.S. accession to UNCLOS.

What do you see as the role of the General Counsel of the Department of the Navy in the accession process?

Answer. It is my understanding that the Judge Advocate General of the Navy has primary responsibility for advising the Secretary on the UNCLOS. The Judge Advocate General of the Navy has the responsibility within the Department to report directly to the Secretary of the Navy on international law as well as matters associated with military operations. As such, if confirmed, I would expect that the General Counsel's primary responsibility will be to assist the Judge Advocate General of the Navy and the Secretary of the Navy in developing their strategy to support the accessions process.

Question. If confirmed, what should you do to support and advance the Navy Secretary's desire to join UNCLOS?

Answer. If confirmed, I will work directly with the Secretary of the Navy and provide the guidance and support that he deems necessary to advance his desire for accession to the UNCLOS.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the General Counsel of the Department of the Navy?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Question for the record with answer supplied follows:]

QUESTION SUBMITTED BY SENATOR ROLAND W. BURRIS

GENERAL COUNSEL'S ROLE IN CONTRACTING ABUSE

1. Senator BURRIS. Mr. Oostburg Sanz, what role should the general counsel play in addressing allegations of fraud and abuse of contracting for the wars in Iraq and Afghanistan?

Mr. OOSTBURG SANZ. Fraud and abuse in Department of Defense contracting hampers the ability of the warfighter to accomplish mission objectives effectively and efficiently. Such attenuation is particularly unacceptable during contingency operations and merits the full attention of senior leaders.

With regard to the wars in Iraq and Afghanistan, although the U.S. Army is the executive agent for contracting in those theaters, the General Counsel of the Department of the Navy plays a critical role in addressing fraud and abuse in contracting there. It is my understanding that allegations of fraud and abuse in contingency contracting in Iraq and Afghanistan involving Department of the Navy personnel and contracts are handled by the Acquisition Integrity Office (AIO) under the direction of the Assistant General Counsel (Acquisition Integrity), a senior executive who reports directly to the General Counsel. AIO works closely with the Naval Audit Service and the Naval Criminal Investigative Service (NCIS) to develop effective approaches to deterring fraud and protecting the Department of the Navy from contractors in the United States and overseas whose conduct has established that they are not responsible business partners. With regard to contingency contracting, I understand that AIO also works closely with the Special Inspector General for Iraq Reconstruction.

If confirmed, combating fraud and abuse in contracting involving the Department of the Navy, particularly as it relates to ongoing contingency operations, will be a priority for me as I supervise the AIO and assist the Under Secretary of the Navy in overseeing the proper operation of the NCIS.

[The nomination reference of Paul Luis Oostburg Sanz follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
November 20, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Paul Luis Oostburg Sanz, of Maryland, to be General Counsel of the Department of the Navy, vice Frank R. Jimenez.

[The biographical sketch of Paul Luis Oostburg Sanz, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF PAUL LUIS OOSTBURG SANZ

EDUCATION

	Dates Attended	Degree Received	Date Degree Granted
Harvard Law School	Aug. 1995–May 1999	J.D.	~June 1999
Princeton University	Aug. 1994–May 1997	M.P.A.	~June 1997
University of Cape Town, South Africa ¹	~Jan.–Dec. 1990	N/A	N/A
Georgetown University	~Aug. 1988–May 1991	B.S.F.S.	~June 1991
Midwestern State University ²	~Aug. 1987–May 1988	N/A	N/A

¹ I studied at UCT for 1 year as part of a self-designed study abroad program through Georgetown University. Although I did not receive a degree from UCT, my studies in South Africa helped me satisfy the curricula requirements for obtaining an African Studies Certificate upon graduation from Georgetown University.

² I studied at MSU for my freshman year of college before transferring to Georgetown University.

EMPLOYMENT RECORD

	Employer	Dates of Employment
General Counsel	House Committee on Armed Services	Jan. 2007–Present
Democratic Deputy Chief Counsel ..	House Committee on International Relations	~May 2001–Dec. 2006
Judicial Law Clerk	U.S. District court for the District of Puerto Rico	~Aug. 1999–May 2001
Summer Associate	Wilmer Cutler Pickering	~May 1999–July 1999
Teaching Fellow	Harvard University	~Jan. 19999–May 1999
Research Assistant	Professor Anne-Marie Slaughter	~Fall 1998
Summer Clerk	Treasury Department	~July 1998–Aug. 1998
Summer Associate	Chadbourne & Parke	~May 1998–July 1998
Student Attorney	Harvard Legal Aid Bureau	~Aug. 1997–May 1999
Summer Graduate Fellow	U.S. AID/Maputo, Mozambique	~May 1997–Aug. 1997
Intern	Chief Judge Anne Thompson	~Feb. 1997–May 1997
Graduate Intern	Merrill Lynch	~Oct. 1996–Dec. 1996
Summer Associate	Ropes & Gray	~June 1996–aug. 1996
Graduate Intern	U.S. Embassy/Monrovia, Liberia	~June 1995–Aug. 1995
Project Officer	Joint Center for Political and Economic Studies	~Jan. 1994–July 1994
Volunteer	Peace Corps	~July 1991–Oct. 1993

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Paul Luis Oostburg Sanz in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior

to the hearings and will also be published in any hearing record as well as made available to the public.

1. Name: (Include any former names used.)

Paul Luis Oostburg Sanz, aka Paul L. Oostburg.

2. Position to which nominated:

General Counsel, Department of the Navy.

3. Date of nomination:

November 20, 2009.

4. Address: (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

October 21, 1969; Aguadilla, Puerto Rico.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Tonya T. Robinson.

7. Names and ages of children:

Keira Luisa Oostburg, age: 2.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

	Dates Attended	Degree Received	Date Degree Granted
Harvard Law School	Aug. 1995–May 1999	J.D.	June 1999
Princeton University	Aug. 1994–May 1997	M.P.A.	June 1997
University of Cape Town, South Africa ¹	Jan.–Dec. 1990	N/A	N/A
Georgetown University	Aug. 1988–May 1991	B.S.F.S.	June 1991
Midwestern State University ²	Aug. 1987–May 1988	N/A	N/A

¹ I studied at UCT for 1 year as part of a self-designed study abroad program through Georgetown University. Although I did not receive a degree from UCT, my studies in South Africa helped me satisfy the curricula requirements for obtaining an African Studies Certificate upon graduation from Georgetown University.

² I studied at MSU for my freshman year of college before transferring to Georgetown University.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

	Employer	Location of Work	Dates of Employment
General Counsel	House Committee on Armed Services	Washington, DC	Jan. 2007–Present
Democratic Deputy Chief Counsel	House Committee on International Relations	Washington, DC	~May 2001–Dec. 2006
Judicial Law Clerk	U.S. District Court for the District of Puerto Rico	San Juan, PR	~Aug. 1999–May 2001

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

	Employer	Dates of Employment
Summer Clerk	Treasury Department	~July 1998–Aug. 1998
Summer Graduate Fellow	U.S. AID/Maputo, Mozambique	~May 1997–Aug. 1997
Graduate Intern	U.S. Embassy/Monrovia, Liberia	~June 1995–Aug. 1995
Volunteer	Peace Corps	~July 1991–Oct. 1993

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

N/A.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Maryland Bar.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

N/A.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

John Kerry for President Campaign, Volunteer, 2004.

Bob Menendez for Senate Campaign, Volunteer, 2006.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Barack Obama for President, 2008, \$1,750.

John Kerry for President, 2004, \$400.

(These contributions include amounts made by my wife Tonya on our behalf. The source for this information is the Federal Election Commission Web site, <http://www.fec.gov/>, and it is consistent with our recollection.)

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Reginald Lewis Fellowship, Harvard Law School.

John Parker Compton Fellowship, Princeton University.

Edmund A. Walsh Scholarship, Georgetown University.

Magna Cum Laude, Georgetown University.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

PAUL LUIS OOSTBURG SANZ.

This 15th day of December, 2009.

[The nomination of Paul Luis Oostburg Sanz was reported to the Senate by Chairman Levin on February 2, 2010, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 4, 2010.]

[Prepared questions submitted to Jackalyne Pfannenstiel by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of

the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I believe the Goldwater-Nichols defense reforms have been very effective, and I am not aware of the need for any modifications.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I am not aware of the need for any modifications to Goldwater-Nichols, but if confirmed, I will work with the Secretary of the Navy and Under Secretary of the Navy on any proposed changes that pertain to Navy installations or the environment.

DUTIES

Question. What is your understanding of the duties and functions of the Assistant Secretary of the Navy for Installations and Environment?

Answer. The Assistant Secretary of the Navy (Installations and Environment) formulates policy and procedures for the effective management of the Navy and Marine Corps real property, housing and other facilities; environmental protection ashore and afloat; safety and occupational health for both military and civilian personnel. This position is also responsible for the timely completion of closures and realignments of installations under base closure laws.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I possess extensive experience in the public and private sectors that translates well to the Department of the Navy. From 2004 until the beginning of this year, I served as a commissioner and Chairman of the California Energy Commission, a State regulatory body with authority over power plant licensing, building and appliance efficiency standards, and energy policy development. As a commissioner, my responsibilities included licensing major new power plants for the State. The Energy Commission was the lead environmental agency for these major infrastructure projects and we interacted extensively with the local communities to minimize and mitigate their impacts. Also, I led the development of California's integrated energy policy plan and chaired the Governor's Climate Action Team subgroup on Energy and Land Use. I participated in the creation of California's low carbon fuel standards and spearheaded implementation of the State's solar home initiative, creating a working group comprised of home builders and solar industry companies. Prior to my role at the Energy Commission, I served as an independent energy consultant, providing assistance to wind energy development projects, as well as helping local housing authorities manage energy costs in public housing facilities. Previously, I spent 20 years at Pacific Gas and Electric Company and its parent, PG&E Corporation. In 1987, I was promoted to Vice President of Strategic Planning at PG&E, the first woman to become a corporate officer. In 1988, I led the company's participation in a multi-party energy efficiency collaborative proceeding which produced many of California's innovative regulatory policies promoting energy efficiency and demand response. I am currently a member of the Board of Trustees of Clark University and I chair the committee on university facilities. I am also a Director of Energy Recovery, Inc., a company that makes efficient flow devices for seawater desalination plants.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Assistant Secretary of the Navy for Installations and Environment?

Answer. I am confident that there is much that I can do to enhance my abilities to perform the duties of the Assistant Secretary of the Navy for Installations and Environment. If confirmed, I will seek to learn more about the individual facilities within my purview, as well as the different requirements associated with military construction. Using my significant managerial experience, I would expect to parlay the expertise and views of those within the Department of the Navy, as well as those of the Secretary of Defense and the other Military Departments, to develop efficient and effective policies for the Department's use of our installations and the environment. If confirmed, I will also seek and listen to the advice and counsel of Congress, and the communities in which we operate, to find ways to be the best steward of the Department of the Navy's properties.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of the Navy would prescribe for you?

Answer. If confirmed, I would expect the Secretary of the Navy to prescribe the duties and functions stated above. Additionally, I would expect that the Secretary will request that I rely upon my years of experience in the area of energy development, policy and management to assist him in meeting the aggressive energy goals he recently laid out for the Department, including increasing our use of alternative energy and sailing the "Great Green Fleet."

RELATIONSHIPS

Question. If confirmed, what would be your professional relationship with: The Secretary of the Navy.

Answer. If confirmed, I will seek to carry out the goals and priorities of the Secretary of the Navy.

Question. The Under Secretary of the Navy.

Answer. If confirmed, I will work directly with the Under Secretary and seek his counsel and guidance as I work to support his efforts to carry out the goals and priorities of the Secretary of the Navy.

Question. The Chief of Naval Operations.

Answer. If confirmed, I will provide the support that the Chief of Naval Operations requires to execute his duties and responsibilities and achieve the mission of the Navy.

Question. The Commandant of the Marine Corps.

Answer. If confirmed, I will provide the support that the Commandant requires to execute his duties and responsibilities and achieve the mission of the Marine Corps.

Question. The Deputy Under Secretary of Defense for Installations and Environment.

Answer. If confirmed, I will work with the Deputy Under Secretary of Defense for Installations and Environment to develop and execute the policies and initiatives of the President, the Secretary of Defense, and the Secretary of the Navy.

Question. The other Assistant Secretaries of the Navy.

Answer. If confirmed, I will work as part of the team to ensure that we present the best collaborative approach to supporting the goals and priorities of the Secretary of the Navy.

Question. The Assistant Secretaries of the Army and Air Force for Installations and Environment.

Answer. If confirmed, I will work closely with the Assistant Secretaries of the Army and Air Force for Installations and Environment to strengthen the cooperation between the Services. I will work to foster a cordial and productive working relationship with these colleagues.

Question. The General Counsel of the Navy.

Answer. If confirmed, I will work closely with the General Counsel of the Navy to ensure that the programs we execute, and the policies we develop are consistent with the law.

Question. The Judge Advocate General of the Navy.

Answer. If confirmed, I will work closely with the Judge Advocate General of the Navy to ensure that the programs we execute and the policies we develop are consistent with the areas of law contained within his purview. I would also expect to work directly with the Judge Advocate General of the Navy on areas of mutual interest.

Question. The Director of Naval Energy Policy.

Answer. If confirmed, I will work with the Director of Naval Energy Policy to identify and implement policies and practices that best support the needs of the Department of the Navy.

Question. Commander, Naval Facilities Engineering Command.

Answer. If confirmed, I will work with the Commander, Naval Facilities Engineering Command to identify and implement policies and practices that best support the needs of the Department of the Navy.

Question. Commander, Navy Installations Command.

Answer. If confirmed, I will work with the Commander, Navy Installations Command to identify and implement policies and practices that best support the needs of the Department of the Navy, our sailors, marines, and their families.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that confront the Assistant Secretary of the Navy for Installations and Environment?

Answer. There are many significant challenges confronting the next Assistant Secretary of the Navy for Installations and Environment. The most significant of these

includes the Guam military construction projects; the completion of all Base Realignment and Closure (BRAC) 2005 actions prior to the statutory deadline, ensuring that the Department of the Navy has the right infrastructure at the right time for the right cost to support the country's warfighters and their families, and establishing the programs necessary to meet the Department's aggressive energy goals.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I plan to work closely with Congress, the Secretary of the Navy, the Chief of Naval Operations, the Commandant of the Marine Corps, the Deputy Under Secretary of Defense (Installations and Environment), as well as other governmental and nongovernmental organizations to devise practicable solutions to address these challenges and maximize successful outcomes for all parties involved.

Question. What do you consider to be the most significant problems in the performance of the functions of the Assistant Secretary of the Navy for Installations and Environment?

Answer. I am not aware of any significant problems in the performance of the functions of the Assistant Secretary of the Navy for Installations and Environment.

Question. If confirmed, what management actions and timelines would you establish to address these problems?

Answer. If confirmed, I will work closely with the Secretary and the Under Secretary of the Navy to develop a strategic plan to address significant problems that arise.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Assistant Secretary of the Navy for Installations and Environment?

Answer. If confirmed, I will establish priorities consistent with those of the President, the Secretary of Defense, and the Secretary of the Navy. In broad terms, I will assist the Secretary of the Navy in meeting the aggressive energy goals he recently laid out for the Department, work closely with Members of Congress and State and local officials and the public to remain fully transparent when considering projects and processes with environmental impacts, and seek to allocate funding to develop the right infrastructure at the right time at the right cost to support our warfighters and their families.

Question. Do you have any specific plans to help improve the quality of life for Navy and Marine Corps families who are under considerable strain as a result of repeated deployments?

Answer. Not at this time, but having grown up in a Navy town, I am very aware of the tremendous sacrifices made by Navy and Marine Corps families. If confirmed, I will be committed to identifying and implementing quality of life initiatives.

Question. The Assistant Secretary of the Navy for Installations and Environment has responsibility for, among other things, two largely distinct programs—the military construction program and the environmental program.

In the competition for resources inherent in the Defense Department budget process, which of these two major programs do you believe should have priority in terms of funding? Why?

Answer. Military construction programs and environmental programs are not mutually exclusive. Although they would certainly compete for the same limited resources, the development of these programs must be done in conjunction with each other. All military construction is predicated upon sound environmental planning. Accordingly, these two programs must work hand-in-hand to further the strategic vision and goals of the Secretary of the Navy.

MILITARY CONSTRUCTION

Question. Over the last several years, the Department of the Navy has had an increasingly larger share of the Defense Department's overall military construction (MILCON) program. Initiatives related to growing the Marine Corps and the relocation of marines from Okinawa to Guam will consume much of the growth over the next several years.

In addition to those initiatives, which are largely externally driven, what would be your highest priorities, if confirmed, for allocating military construction funding for the Department of the Navy over the next several years?

Answer. If confirmed, I will seek to allocate funding to develop the right infrastructure at the right time at the right cost to support our warfighters and their families.

Question. Do you think these initiatives will consume so much of the Department of the Navy MILCON budget that it will crowd out other programs such as housing ashore for shipboard sailors, and other quality of life programs for sailors, marines, and their families?

Answer. Although we find ourselves in an austere fiscal environment, I am cautiously optimistic that we will be able to meet all of these challenges.

GUAM

Question. Over the next several years one of the Department of the Navy's most significant MILCON investments will be in the relocation of 8,000 marines and their families from Okinawa to Guam. There are a number of provisions enacted in the National Defense Authorization Act (NDAA) for Fiscal Year 2010 related to this Guam realignment.

Does the flexibility included in these provisions provide the Secretary of the Navy with the necessary authorities to occupy the Futenma Replacement Facility on Okinawa, establish special purpose entities to construct infrastructure projects, and provide the necessary labor force to complete the \$4 billion construction program on Guam?

Answer. I have not had an opportunity to develop a thorough understanding of the issues associated with the relocation of marines and their families from Okinawa to Guam. From the information that I have seen at this point, I generally believe that the Department of the Navy is moving along the right track and that the law has provided the Department significant flexibility.

Question. When will the Department of the Navy provide the Senate Armed Services Committee with the Guam Master Plan so that the costs and timing of construction contracts for the entire project will be totally transparent?

Answer. My understanding is that the Department will be able to provide the Guam Master Plan after the Draft Environmental Impact Statement (DEIS) is released, currently expected to be in the summer of 2010.

Question. What is your understanding of when the Department of the Navy anticipates that the Record of Decision (ROD) for the Guam Environmental Impact Statement will be signed?

Answer. I understand that the Department plans to release the ROD in the summer of 2010.

OUTLYING LANDING FIELD

Question. The Department of the Navy has been actively engaged for a number of years in seeking another Outlying Landing Field (OLF) to augment Naval Auxiliary Landing Field Fentress in support of flight operations at Naval Air Station Oceana and Naval Station Norfolk.

What is your understanding of the current status of the Environmental Impact Statement (EIS) for the OLF?

Answer. It is my understanding that the Navy has delayed the release of the DEIS for the Outlying Landing Field and that the Outlying Landing Field timeline will now coincide with the commencement of the EIS process for homebasing of the F-35C Navy Joint Strike Fighter.

Question. When do you anticipate the ROD will be signed for that EIS?

Answer. I believe that the Outlying Landing Field ROD will be signed upon completion of the EIS process, in accordance with the National Environmental Policy Act.

Question. Based on your understanding of the process, when would you expect the Department of the Navy to request funds for any land acquisition associated with the process?

Answer. I do not have that information, but I would expect that this is being discussed as part of the Department of Defense's (DOD) budget planning for submission in the fiscal year 2010 budget.

BASE CLOSURE AND REALIGNMENTS

Question. The 2005 Defense BRAC process is currently underway.

What do you see as the roles and responsibilities of the Department of the Navy in implementing BRAC decisions?

Answer. I believe the Department of the Navy's primary responsibility is to ensure that we comply with all BRAC statutory requirements.

Question. What would your role be, if confirmed, in carrying out these responsibilities?

Answer. If confirmed, I will serve as the Department of the Navy's primary senior leader charged with meeting our BRAC responsibilities. Accordingly, I will work

closely with Congress, the Secretary of the Navy, the Chief of Naval Operations, the Commandant of the Marine Corps, the Deputy Under Secretary of Defense (Installations and Environment), as well as other governmental and non-governmental organizations as appropriate in order to execute these statutory requirements.

Question. If confirmed, what priorities would you set for the process of disposal of any property at Navy and Marine Corps bases affected by BRAC decisions?

Answer. If confirmed, I believe my top priority is to meet the statutory deadline of 2011. It is my desire to implement BRAC decisions in a timely and fiscally responsible manner while working with environmental regulators and local communities to expedite environmental clean-up and disposal of the property.

Question. The DOD installation closure process resulting from BRAC decisions has historically included close cooperation with the affected local community in order to allow these communities an active and decisive role in the reuse of property.

In your view, what are the roles and responsibilities of the Department of the Navy within the 2005 BRAC property disposal process with respect to working with local communities?

Answer. I believe that the Department of the Navy is responsible for working with local communities to ensure an orderly and transparent transition from public ownership to private ownership.

Question. If confirmed, what goals would you establish to assist affected communities with economic development, revitalization, and re-use planning of property received as a result of the BRAC process?

Answer. If confirmed, I would seek to optimize re-use opportunities for affected communities and advocate for transitions that are as seamless and timely as allowed under current law.

Question. In your opinion, is the Department of the Navy moving aggressively enough to implement the joint basing agreements that were mandated by BRAC 2005?

Answer. I have not been made aware of all of the Department's implementation plans. I would expect that the Department is moving forward with the other Military Services on an aggressive timeline to implement joint basing as mandated by BRAC 2005. If confirmed, I will review this progress and ensure that the Navy is moving as aggressively as possible.

Question. What do you see as the main concerns related to the implementation of BRAC-directed joint basing agreements?

Answer. I believe the main concerns are implementing these agreements in accordance with BRAC timelines and making sure that common levels of support are provided to our warfighters and families that live and work on our bases.

Question. Will the Department of the Navy have any trouble finishing the BRAC 2005 round on time?

Answer. I expect that the Department of the Navy has an aggressive set of plans and milestones to implement BRAC 2005, and it is my understanding that the Department is on track to meet the 2011 statutory deadline.

Question. Although the Department of the Navy has made good progress in turning over properties from prior rounds of BRAC to local communities, there remain several properties that are both valuable and problematic. Congress provided new authority in the NDAA for Fiscal Year 2010 aimed at expediting the process and at removing legislative impediments that have caused friction between the Department and local communities.

Do you believe that those new authorities will be sufficient to jump start these long stalled negotiations?

Answer. I understand that there are a number of conveyances that have been delayed for long periods of time. I believe that there now exists an appropriate "toolbox" of authorities to help convey all BRAC property.

Question. What is a reasonable period of time to show substantial progress?

Answer. I have not had an opportunity to review the status of all conveyances, so I am unable to make such an assessment; however, if confirmed, I will study each conveyance—particularly those at critical stages of negotiation—to set forth a reasonable period of time to show substantial progress.

INVESTMENT IN INFRASTRUCTURE

Question. Witnesses appearing before the committee in the past have testified that the Military Services under-invest in both the maintenance and recapitalization of facilities and infrastructure compared to private industry standards. Decades of under-investment in DOD installations has led to substantial backlogs of facility maintenance activities, created substandard living and working conditions, and

made it harder to take advantage of new technologies that could increase productivity.

If confirmed, what recommendations would you have for restoring and preserving the quality of our infrastructure?

Answer. I have not had an opportunity to study what new approaches might benefit the Department of the Navy's ability to restore and preserve infrastructure. If confirmed, I will closely examine the way that we manage our inventory, and will work with the Secretary of the Navy and the Chief of Naval Operations to make sure the quality of our infrastructure is the highest possible.

Question. This underinvestment in infrastructure is particularly acute in naval shipyard facilities. If confirmed, how do you plan on addressing this shortfall?

Answer. I have not had an opportunity to study the extent of the investment in our naval shipyard facilities. If confirmed, I will work closely with ASN (RD&A) and the Chief of Naval Operations to develop a plan for addressing this matter.

ENHANCED USE LEASES

Question. Congress has provided the authority for each of the Service Secretaries to lease underutilized non-excess property and to use revenues generated by those leases to enhance infrastructure and operating costs on those installations. This so-called "enhanced use lease" (EUL) authority is being used in different ways and for different purposes by each of the Military Departments.

What is your understanding of the EUL authority?

Answer. My understanding is that the enhanced use lease authority is a valuable tool in the Department's infrastructure management toolbox. My understanding is that the Navy can use this authority to partner with industry and the outside community to maximize the use of Department property.

Question. What do you see as the future of the Department of the Navy's EUL program?

Answer. I understand that there are several promising EUL opportunities that the Department of the Navy is currently examining.

Question. What Navy and Marine Corps EUL projects do you see as most viable in the near term?

Answer. Because I am not aware of all the current projects or those projects being considered, I could not identify the most viable in the near term. If confirmed, I would need to examine all of our projects more fully before making such an assessment.

Question. If confirmed, what will be the main concentration of the EUL program?

Answer. Broadly speaking, if confirmed, I will utilize the EUL program to ensure our warfighters and their families have the highest quality environment in which to live and work and that the Department's real estate is put to the highest valued uses.

Question. Will you consider the authority to provide support to energy initiatives?

Answer. If confirmed, I would consider this authority for a wide range of uses, including energy initiatives. I believe that the enhanced use lease authority appears well suited to putting energy initiatives in place at many bases around the world.

Question. Will you continue to focus on the construction of facilities and in-kind reimbursement to base operating costs?

Answer. I understand that accepting construction of facilities and in-kind reimbursement to base operating costs is a proven way to structure lease consideration, but each EUL proposal is different. If confirmed, I will be open to considering any package that makes a specific proposal work.

Question. The Congressional Budget Office has expressed concern that EUL authority could be used to acquire expensive facilities through long-term leases that commit DOD to make payments (rather than receiving payments) over an extended period of time.

Do you believe that it would be appropriate to use EUL authority to commit future-years DOD funds for long-term projects to acquire facilities that have not received approval through the normal budgeting process?

Answer. I have not yet had an opportunity to study this issue, but if confirmed, I certainly will do so.

Question. If confirmed, how would you address proposals to use EUL authority in this manner?

Answer. Since I have not had an opportunity to study this issue, I do not know how I would address such proposals if confirmed.

BASE OPERATING SUPPORT

Question. What is your understanding of the base operating support requirements of the Department of the Navy and Marine Corps?

Answer. My understanding is that the base operating support requirements of the Department of the Navy are critical to the overall mission readiness of our Navy and our Marine Corps. These requirements enable a wide spectrum of support programs and initiatives ranging from the energy that runs our bases to the child care centers that look after our family members.

Question. In your view, is the Department of the Navy receiving adequate funding for base operating support?

Answer. I have not had an opportunity to review base operating support funding in detail, so I cannot make specific judgments or assessments about the adequacy of funding for such a large and complex set of requirements. If confirmed, I will closely examine funding levels to ensure the highest quality living and working conditions for our sailors, marines, and their families.

Question. How might the Department of the Navy distribute base operating funds to best ensure sound investment of constrained resources?

Answer. I do not yet have an understanding of the options available to distribute base operating funds. If confirmed, I am committed to learning the methods and processes we have in place across the Department to guide our investment decisions and our distribution of resources.

FAMILY HOUSING AND PRIVATIZATION

Question. In recent years, DOD and Congress have taken significant steps to improve family housing. The housing privatization program was created as an alternative approach to speed the improvement of military family housing and relieve base commanders of the burden of managing family housing. If confirmed for the position of Assistant Secretary of the Navy for Installations and Environment you will have a key role in decisions regarding military family housing.

What are your impressions of the overall quality and sufficiency of Navy and Marine Corps family housing both in the United States and abroad?

Answer. My initial overall impressions of the quality and capacity of family housing are extremely positive. I've seen that the Department of the Navy has taken huge strides in just the past few years to improving the quality and amount of our housing inventory.

Question. What are your views regarding the privatization of family housing?

Answer. I understand that family housing privatization has been a great success story that has allowed the Department to partner with private industry to leverage their expertise and market incentives for the benefit of our sailors, marines, and their families.

Question. What is your view of the structure and general goals of the Department of the Navy's current housing privatization program?

Answer. I believe the structure and general goals of the Department's housing privatization program are sound.

Question. Do you believe the housing program should be modified in any way? If so, how?

Answer. I am not currently aware of any necessary modifications to the housing program.

ENVIRONMENTAL RESTORATION

Question. Over the past several years, the Department of the Navy's environmental restoration budget request has been trending down from about \$300 million in 2008 to just under \$286 million for 2010 despite the fact that the Department of the Navy still has substantial cleanup obligations.

What do you see as the main priorities for clean-up within the Department of the Navy program?

Answer. The Department of the Navy's priorities for clean-up are established by the Secretary of the Navy, and, if confirmed, I will work closely with the Secretary to ensure that those priorities are implemented.

Question. What will you do to ensure that adequate funding is requested and received so that clean-ups under the Installation Restoration Program and under the Military Munitions Remediation Program continue apace?

Answer. If confirmed, I will ensure that I fully understand the clean-up priorities, as established by the Secretary of the Navy, and will work with the Secretary, as well as Members of Congress, to ensure that adequate funding for clean-up is both requested and received.

Question. In August 2009, the Deputy Under Secretary of Defense for Installations and Environment signed a memorandum that sets forth the benefits of green and sustainable remediation practices and encourages the military departments to consider and implement such strategies where appropriate. The Department of the Navy continues to employ dig and haul strategies at large cleanup sites. One such site is Camp Pendleton's Stuart Mesa, a 400-acre site at which bioremediation was considered but rejected in favor of digging up, removing and disposing of the contaminated soil.

What is your view of bioremediation technologies and other sustainable remediation strategies, in general?

Answer. I believe bioremediation is an exciting possibility which, as it continues to be developed, could present a viable alternative to current "dig and haul" techniques. It is my understanding that the bioremediation project at Stuart Mesa was not as effective as hoped. As bioremediation technologies continue to be developed, however, I am hopeful that they can attain a level of effectiveness where they can be employed more widely.

Question. If confirmed, what will you do to ensure the Department of the Navy actively considers and implements green and sustainable remediation strategies where appropriate?

Answer. If confirmed, I will weigh all viable options when considering clean-up technologies. The priority is to ensure a safe and effective restoration of the site, and if green and sustainable strategies prove to be effective, they should be considered as viable alternatives.

PAST WATER CONTAMINATION AT CAMP LEJEUNE

Question. For more than 10 years, the Department of the Navy has been trying to understand and resolve issues associated with past water contamination suspected at Camp Lejeune in North Carolina. However, aspects of this matter remain unresolved, including the nature and extent of various scientific studies into the potential human exposure.

If confirmed, what will you do to help ensure that all reasonable actions are taken to resolve this matter as expeditiously as possible?

Answer. The Department of the Navy is committed to ensuring the health and safety of all its personnel—both past and present. I know that the Department has commissioned numerous scientific studies to inquire into a possible connection between past water contamination at Camp Lejeune and health issues of personnel who served there. I have not, however, been made privy to their results. If confirmed, I will ensure that the Department, using the information from these studies, acts promptly and in accordance with all applicable laws to resolve this important matter.

ENCROACHMENT ON MILITARY INSTALLATIONS

Question. Encroachment by commercial and residential development on military installations has negatively impacted Navy and Marine Corps operations at military airfields and training ranges and, as has been seen with Navy efforts to locate a new Outlying Landing Field on the east coast, development of new facilities can be problematic.

What do you see as the main constraints on the Department of the Navy's ability to use its facilities, including training ranges?

Answer. I am not aware of any constraints on the Department of the Navy's ability to use its facilities. I believe that the Department has completed or is completing EISs for its training ranges, and that these ranges are operated in accordance with the results.

Question. If confirmed, what policies or steps would you take to curtail the negative impacts on operations and training resulting from encroachment?

Answer. If confirmed, I would work closely with Federal, State, and local entities to ensure that the needs of the Department are properly balanced against the needs of local communities adjacent to our installations.

Question. How can the Department of the Navy address the issues of encroachment around its bases in the United States, particularly with respect to encroachment caused by residential development?

Answer. I believe the Department of the Navy must take a two-pronged approach to addressing issues of encroachment around its bases. First, it is important to communicate concerns with local communities. Second, where appropriate, the Department should seek to purchase additional land surrounding its bases.

ENERGY POLICY

Question. In October 2009, Secretary Mabus announced various energy goals for the Department of the Navy including the creation of a “Green Strike Group” composed of nuclear vessels and ships powered by biofuels by 2012 and deploying that fleet by 2016; by 2015, reducing petroleum use in its 50,000 commercial vehicle fleet by 50 percent; producing at least half the shore-based energy requirements from renewable sources, such as solar, wind and ocean generated by the base; and by 2020, ensuring at least 40 percent of the Department of the Navy’s total energy consumption comes from alternative sources.

If confirmed, what would your responsibilities be for setting and implementing energy policy within the Department?

Answer. If confirmed, my responsibilities would be to support the Secretary’s Navy Energy Office and work towards meeting the Secretary’s aggressive energy goals, particularly those goals regarding shore-based energy use.

Question. What do you see as the advantages and disadvantages of Secretary Mabus’ goals, including the implications for Department of the Navy’s overall budget both in the near term and over time?

Answer. I believe that the Secretary’s aggressive energy goals can provide the entire Department with a clear line of sight, a clear objective, and a powerful leadership mandate in the energy arena.

Question. What renewable technologies and fuel types have the most potential for certification and use by aircraft?

Answer. I do not have enough information at this time to know what renewable technologies and fuel types have the greatest potential in an aviation setting. If confirmed, I will closely examine this issue.

Question. With respect to aviation fuel requirements, what examples, if any, can you provide of policies or initiatives currently in practice that both conserve fuel use and cost while balancing appropriate readiness levels and pilot training requirements?

Answer. I am aware that the Department is working on the development of the use of alternative fuels for certain aircraft. I do not, however, have enough information at this time to provide in-depth analysis of this program.

Question. What is your view of the adequacy of Department of the Navy funding to meet statutory and regulatory energy conservation goals?

Answer. I know that statutory and regulatory conservation goals help the Department reduce energy costs; however, I have not had an opportunity to study funding levels. If confirmed, I will review funding levels with a specific eye toward meeting these goals.

Question. Do you believe that significant additional funding will be needed in future years to meet such goals?

Answer. I do not know the current funding levels and I have not been privy to all of the future initiatives under consideration by Secretary Mabus. If confirmed, I will aggressively review this data and would ensure that the necessary funding is available to meet these goals.

Question. What is your view of the utility of algae fuels and what concerns do you have about their use for the “green fleet”?

Answer. I am excited about the possibilities associated with the use of algae fuels, but I have not studied the practical application of this alternative energy source for the “Great Green Fleet.” If confirmed, I will study this innovative concept.

Question. What is your view of the risks of biofueling for algae fuels and the relative low fuel density of such fuels, compared to currently-used diesel fuels?

Answer. I have not had an opportunity to study these risks, but if confirmed, will do so.

IMPLICATIONS OF CLIMATE CHANGE

Question. What do you see as the national security implications of climate change for the United States?

Answer. I know that the Department of the Navy, through the Task Force on Climate Change, is studying the issue of climate change and its potential effects on national security. One area identified as having possible national security implications is how the reduction of sea ice in the Arctic will allow for shipping to pass through the Arctic.

Question. What do you believe will be the impact of climate change on the Navy and Marine Corps mission?

Answer. The impact of climate change upon the mission of the Navy and Marine Corps would clearly be dependent upon the severity of the problem. If climate

change results in significant sea level rise, some of our shoreline facilities may be negatively impacted.

DEPARTMENT OF THE NAVY LABORATORY AND TEST CENTER RECAPITALIZATION

Question. There has been concern over the adequacy of recapitalization rates of the Department's laboratory facilities and test centers. Historically, Navy technical centers, laboratories, and test centers do not appear to have fared well in the internal Navy competition for limited military construction and facility sustainment funds.

What metrics would you use to assess the amount of investment in the recapitalization of Navy technical centers, laboratories, and test centers to determine its adequacy?

Answer. This is a complicated matter. The recapitalization rates issue extends beyond an investment in infrastructure, because it has a direct bearing on other areas in the Secretariat, most notably Research Development and Acquisition (RD&A). I have not had an opportunity to assess the amount of investment required, but if confirmed, I will closely examine the issue and work directly with the Under Secretary and Assistant Secretaries to determine the appropriate metrics to use.

Question. How would you propose to address this recapitalization issue for the Navy technical centers, laboratories, and test centers?

Answer. I have not had an opportunity to study the recapitalization issue, but if confirmed, I will work with ASN (RD&A) and other stakeholders to ensure we properly recapitalize our technical centers, laboratories, and test centers.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of the Navy for Installations and Environment?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR KAY HAGAN

CAMP LEJEUNE

1. Senator HAGAN. Ms. Pfannenstiel, on December 14, the Director of the Agency for Toxic Substances and Disease Registry (ATSDR) sent a letter to Acting Assistant Secretary of the Navy for Installations and Environment regarding its fiscal year 2010 Annual Plan of Work for Camp Lejeune. Gaps in funding remain, in particular the mortality study proposed by ATSDR. The letter represents the final step in the dispute resolution section of the Memorandum of Understanding between the Department of the Navy and ATSDR. ATSDR is the Government agency responsible for assessing the presence and nature of health hazards at Environmental Protection Agency (EPA) National Priority List sites, such as Camp Lejeune. Congressional Research Service (CRS) environmental law experts add that the Navy and Marine Corps are obligated under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) to fund all human health studies proposed by ATSDR with respect to water contamination around Camp Lejeune—this includes the mortality study, despite the fact that it was not specified in the National Defense Authorization Act for Fiscal Year 2008. Recently, Senators Burr, Bill Nel-

son, LeMieux, and I sent a letter to Secretary of the Navy Raymond Mabus urging the Navy to fully fund the mortality study. The mortality study is the least expensive of all of ATSDR's proposed studies at Camp Lejeune (\$1.8 million). It is also essential to the scientific validity of the health survey in order to understand whether Camp Lejeune residents were adversely affected by exposure to contaminated water. What steps will you take to work with the North Carolina and Florida Senators to consider funding the mortality study?

Ms. PFANNENSTIEL. I have not had an opportunity to be thoroughly briefed on this issue. If confirmed, I would welcome the opportunity to work with these Senators in conjunction with the scientists currently working on this matter.

QUESTIONS SUBMITTED BY SENATOR ROLAND W. BURRIS

ENVIRONMENTAL CONCERNS

2. Senator BURRIS. Ms. Pfannenstiel, what do you foresee will be your working relationship with the EPA and other State regulatory agencies?

Ms. PFANNENSTIEL. If confirmed, I plan to continue the collaborative relationships we have with EPA and the State regulatory agencies to jointly develop solutions to sustain and improve our environment while preserving the Department's ability to train the warfighter.

3. Senator BURRIS. Ms. Pfannenstiel, once the scientific studies for water contamination at Camp Lejeune have been completed, what type and level of information-sharing will you do with those affected by the contamination and the Secretary of Veterans Affairs?

Ms. PFANNENSTIEL. If confirmed, I intend to provide the broadest dissemination possible of this information.

[The nomination reference of Jackalyne Pfannenstiel follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
December 3, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Jackalyne Pfannenstiel, of California, to be an Assistant Secretary of the Navy, vice Buddie J. Penn.

[The biographical sketch of Jackalyne Pfannenstiel, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF JACKALYNE PFANNENSTIEL

EDUCATION

Clark University, Worcester, MA, Bachelor of Arts, Economics, 1969
University of Hartford, West Hartford, CT, Master of Arts, Economics, 1978

EMPLOYMENT RECORD

Consultant, Self-employed, Piedmont, CA, 01/09–Present
Commissioner and Chairman, California Energy Commission, Sacramento, CA, 05/04–01/09
Consultant, Self-employed, Piedmont, CA, 01/01–05/04
Vice President, PG&E Corporation, San Francisco, CA, 07/80–12/00
Economist, California Public Utilities Commission, 02/78–06/80
Economist, Connecticut Public Utilities Commission, 10/74–01/78
Statistician, Connecticut Department Social Services, 07/70–10/74
Teacher, The Stockbridge School, 01/70–06/70
Substitute Teacher, 09/69–01/70

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Jackalyne Pfannenstiel in connection with her nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES
 Room SR-228
 Washington, DC 20510-6050
 (202) 224-3871

COMMITTEE ON ARMED SERVICES FORM
 BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Jackalyne Pfannenstiel.
2. **Position to which nominated:**
Assistant Secretary of the Navy for Installations and Environment.
3. **Date of nomination:**
December 3, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
September 7, 1947; Norwich, CT.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Single.
7. **Names and ages of children:**
Matthew Richard Deutsch, age 26.
Steven Randolph Deutsch, age 19.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Norwich Free Academy, Norwich, CT, 1961-1965, High School Diploma, 1965
Clark University, Worcester, MA, 1965-1969, BA, Economics, 1969
University of Hartford, West Hartford, CT, 1974-1978, MA, Economics, 1978
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
Consultant, Self-employed, Piedmont, CA, 01/09-Present
Commissioner and Chairman, California Energy Commission, Sacramento, CA, 05/04-01/09
Consultant, Self-employed, Piedmont, CA, 01/01-05/04
Vice President, PG&E Corporation, San Francisco, CA, 02/87-12/00
10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

City of Piedmont, City Center Advisory Committee, 2000–2001

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Trustee, Clark University, Worcester, MA

Director, Energy Recovery Inc., San Leandro, CA

Consultant, San Francisco-Shanghai Sister City Committee, San Francisco, CA

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

None.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

May 2005, California League of Conservation Voters, \$250

July 2005, Democratic National Committee, \$100

November 2005, Bob Foster for Mayor (Long Beach), \$250

March 2006, Ignacio De La Fuente for Mayor (Oakland), \$100

April 2006, Bob Foster for Mayor (Long Beach), \$250

May 2006, Diane Feinstein for Senate, \$100

June 2006, Jerry Brown for Attorney General, \$1,000

October 2006, John Garamendi for Lieutenant Governor, \$250

May 2007, Carol Liu for State Senate, \$500

July 2007, Barack Obama for President, \$1,000

June 2008, Solidarity PAC, \$500

August 2008, Barack Obama for President, \$2,300

June 2009, Equality California, \$173

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Clark University, 4-year scholarship, 1965–1969.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

“Mandating Demand Response,” Public Utilities Fortnightly, January 2008 (with Ahmad Faruqi)

“Integrated Energy Policy Report,” California Energy Commission, 2007 (Lead Commissioner)

“Energy-efficient Buildings,” Voter, League of Women Voters of California, winter 2006

“Implementing Marginal Cost Pricing in the Electric Utility Industry,” Applications of Economic Principles in Public Utility Industries. University of Michigan, 1981

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

While I have given talks and presentations on energy matters over the past 5 years, few have been formal speeches and none have been written. Most have been done using Power Point slides and a few, with notes, absent slides.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JACKALYNE PFANNENSTIEL.

This 15th day of December, 2009.

[The nomination of Jackalyn Pfannenstiel was reported to the Senate by Chairman Levin on February 2, 2010, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on March 4, 2010.]

[Prepared questions submitted to Dr. Donald L. Cook by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES AND QUALIFICATIONS

Question. What is your understanding of the duties and functions of the Deputy Administrator for Defense Programs?

Answer. The Deputy Administrator for Defense Programs is primarily responsible for maintaining a safe, secure, and effective nuclear weapons stockpile. This is accomplished by ensuring the safe and efficient operations of the nuclear weapons complex, and preparing Defense Programs for the future, to include necessary changes in both the nuclear weapons complex and nuclear weapons stockpile in order to meet the challenges of the 21st century.

Question. What background and experience do you possess that you believe qualify you to perform these duties?

Answer. My undergraduate training in Nuclear Engineering at the University of Michigan and graduate training in Plasma Physics at the Massachusetts Institute of Technology gave me an understanding and an appreciation for both the science and the engineering involved in the nuclear weapon program. My entire career has been dedicated to either the U.S. or the United Kingdom (U.K.) nuclear deterrent programs. Up until my most recent assignment, this covered areas of small science, big science, engineering development, major construction projects, infrastructure projects and security investments required to meet an increased threat. From 2006 to 2009, I served as Managing Director and CEO of the Atomic Weapons Establishment (AWE) in the U.K. That assignment gave me a good understanding of manufacturing processes for special material components, qualification for weapon use, assembly, transport, support in service including surveillance, and finally decommissioning, dismantlement, disassembly, and disposal. Communication and productive interaction with the Ministry of Defence (MOD), the local community, nuclear regulatory authorities, and the AWE workforce of employees and contractors was important to success. I believe my experience in both the U.S. and U.K. qualifies me to perform the duties and functions of the Deputy Administrator for Defense Programs.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Deputy Administrator for Defense Programs?

Answer. I trust that my background and experience show me to be appropriately qualified to be the Deputy Administrator for Defense Programs, and I hope the Senate will agree. To enhance my knowledge of the current issues facing Defense Programs, if confirmed, I plan to immediately engage with those people who can help me better understand the complexities and challenges before Defense Programs. This will include meeting with staff and managers in key parts of the program, both at Headquarters and in the field, along with National Nuclear Security Administration (NNSA) and the Department of Energy (DOE) management, key partners such as the Department of Defense (DOD), Defense Nuclear Facilities Safety Board (DNFSB), and Congress. I realize that if I am confirmed, I will be leading an organization with a long history of scientific and technical accomplishments—my immediate challenge will be to learn how I can continue to lead this exceptional group and to help build upon activities and processes that can make the organization even more productive than it is today.

Question. Assuming you are confirmed, what additional or new duties and functions, if any, do you expect that the Administrator of NNSA would prescribe for you other than those described above?

Answer. I am unaware of any additional duties and functions that the NNSA Administrator would prescribe for me. If confirmed, I will work with the Administrator to clarify his expectations and strive to be a valued part of the team.

RELATIONSHIPS

Question. If confirmed, how will you work with the following officials in carrying out your duties:

The Secretary of Energy, Dr. Steven Chu.

Answer. I have great respect for Secretary Chu and look forward to working with him through the NNSA Administrator on Defense Programs issues. The NNSA is fortunate to have a Cabinet Secretary representing the United States in the administration who can understand the technical complexities of nuclear weapons and who can work with the Secretaries of Defense, State, and Homeland Security on cross-cutting interagency issues and policies concerning the Nation's security.

Question. The Deputy Secretary of Energy, Dr. Daniel Poneman.

Answer. The Deputy Secretary serves as the Department's Chief Operating Officer and I expect to have regular interaction on issues that affect both NNSA and other organizations within the Department. From major construction projects to cyber security to pension policies to DOE Orders, there are many issues in which the Deputy Secretary plays a key role. I will also expect to work closely with the Under Secretary of Energy for Science on scientific matters that cross over from NNSA to other parts of the DOE.

Question. The Other Deputy Administrators of the NNSA—NA-20 not nominated; Mr. Ken Baker acting—NA-30 ADM Kirkland Donald, USN.

Answer. The Deputy Administrators for Defense Nuclear Nonproliferation and Naval Reactors would be my peers if confirmed. In my role at the Atomic Weapons Establishment, I had accountability for working in partnership with U.K. Government authorities in response to radiological and nuclear threats to the U.K., and for producing the uranium oxide fuel stock for U.K. Trident submarines, so these areas are not unfamiliar to me. I plan to meet with the Deputies and Associate Administrators to better familiarize myself with the individuals and their specific program responsibilities if confirmed.

Question. The Assistant Secretary of Energy for Environmental Management, Dr. Ines R. Triay.

Answer. The Deputy Administrator for Defense Programs needs to have a special working relationship with the Assistant Secretary for Environmental Management (EM) in ensuring that NNSA supports and facilitates the cleanup of legacy waste and contamination at NNSA sites. As we move towards a smaller stockpile, decrease the number of sites with special nuclear materials, and consolidate these materials across the complex we will need to work hand-in-hand as one Department to meet our goals.

Question. The other relevant Assistant Secretaries of DOE—Patricia Hoffman, Office of Electricity Delivery & Energy Reliability (Acting); Cathy Zoi, Office of Energy Efficiency & Renewable Energy; Dr. James Markowsky, Office of Fossil Energy; Dr. Warren F. Miller, Jr., Office of Nuclear Energy; Betty Nolan, Office of Congressional and Intergovernmental Affairs (Acting); and David Sandalow, Office of Policy and International Affairs.

Answer. I look forward to working with the other Assistant Secretaries within DOE, if confirmed. DOE is a unique place with many talented leaders in both NNSA and other DOE organizations. In order to be most effective there must be close collaboration. As we move towards further diversification at our national laboratories, I see myself working with the Office of Science in particular for the greater good of NNSA, the Office of Science, and the Nation.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics, Dr. Ashton (Ash) Carter.

Answer. The Under Secretary of Defense for Acquisition, Technology, and Logistics (AT&L) is the Chairman of the Nuclear Weapons Council (NWC)—focal point for the relationship between DOE and DOD. My role would be to support the NWC collectively by dealing directly with the Under Secretary of Defense (AT&L), the NNSA Administrator (as DOE's voting member to the NWC), and the distinguished members from U.S. Strategic Command, the Office of the Under Secretary of Defense (Policy), and the Vice Chairman of the Joint Chiefs of Staff on all NNSA-specific matters relevant to the NWC. Specifically, I would work with the Under Secretary of Defense (AT&L) by attending NWC meetings and being heavily involved in all NWC matters.

Question. The Under Secretary of Defense for Policy, Ms. Michèle Flournoy.

Answer. The Under Secretary of Defense for Policy is a member of the NWC—focal point for the relationship between the DOE and DOD. While the NNSA Administrator serves as the NWC voting member for DOE and would most likely deal directly with the Under Secretary of Defense (Policy), the Deputy Administrator manages all NNSA issues relating to Defense Programs. Specifically, I would deal directly with the Under Secretary of Defense for Policy on nuclear weapons policy matters, in coordination with the NNSA Administrator.

Question. The Secretaries of the Navy and the Air Force—SECNAV, Mr. Raymond Edwin (Ray) Mabus; and SECAF, Mr. Michael (Mike) Donley.

Answer. Strong partnerships with the Secretaries of the Navy and the Air Force are of vital importance when dealing with issues related to nuclear security and Defense Programs. If confirmed as the Deputy Administrator, I would seek to further cooperative relations with the Secretaries of the Navy and the Air Force to help fulfill the NNSA mission.

Question. The Commander of U.S. Strategic Command, General Kevin (Chili) Chilton.

Answer. The Commander of U.S. Strategic Command is a member of NWC. The NNSA Administrator and I would deal directly with Gen. Chilton, the Commander of U.S. Strategic Command (STRATCOM). The Deputy Administrator is fundamentally important to the Strategic Command relationship for all nuclear weapon program activities. One of the Commander's most important duties related to NNSA is providing the Annual Assessment Report to the President—a candid report on the safety, effectiveness and expected performance of the nuclear weapons stockpile, based on information from Defense Program advisors and the national laboratories. Since the STRATCOM Commander is responsible for deploying the nuclear weapons stockpile Defense Programs and Strategic Command must have a close relationship at many levels. I expect that, if confirmed as the Deputy Administrator for Defense Programs, I would spend a significant amount of time working with the Commander and his staff, particularly during the present period of stockpile changes.

Question. The Assistant Secretary of Defense for Special Operations and Low Intensity Conflict, Mr. Michael G. (Mike) Vickers; the Commander of U.S. Special Operations Command (SOCOM), ADM Eric T. Olson, USN.

Answer. Special Operations and Low Intensity Conflict are included in NNSA's overall support to and coordination with the DOD in a number of areas. As part of NNSA's support, Defense Programs provided a full-time resident liaison to Special Operations Command to facilitate its access to the unique capabilities of DOE's national laboratories and to enhance the already close working relationship with DOE and NNSA. If confirmed by the Senate, I will ensure DOE's unique nuclear capabilities, skills and assets are properly available to DOD and other Federal entities.

Question. The Assistant to the Secretary of Defense for Nuclear, Chemical, and Biological Defense Programs, Mr. Andrew (Andy) Weber.

Answer. The Deputy Administrator for Defense Programs deals with the Assistant to the Secretary of Defense for Nuclear, Chemical and Biological Defense Programs on a regular basis. The Assistant to the Secretary is the Chairman of the NWC Standing and Safety Committee, the flag officer or Senior Executive Service "working level" group in the NWC system. In this capacity, I would expect to spend time working with the Assistant to the Secretary, particularly during the present period of stockpile changes.

Question. The Director of the Defense Threat Reduction Agency, Mr. Kenneth A. Myers III.

Answer. The Defense Threat Reduction Agency (DTRA) works with the NNSA's Offices of Defense Programs, Defense Nuclear Nonproliferation, and Emergency Operations on a number of issues, ranging from individual weapon system Project Officer Groups to hosting DTRA-sponsored work at NNSA sites and collaborating on nonproliferation issues. If confirmed, I would work directly with the Director of DTRA to further our common goals.

Question. Officials in the Intelligence Community.

Answer. DOE is a member of the Intelligence Community. Within DOE, the Director of the Office of Intelligence and Counterintelligence has primary responsibility for Departmental interactions with the Director of National Intelligence and other Intelligence Community components. I am committed to continuing to revitalize our national laboratories and production plants into a leaner and more cost-effective Nuclear Security Enterprise. However, I am mindful that our design laboratories and production facilities are national assets that support a large number of defense, security, and intelligence activities. As the role of nuclear weapons in our Nation's defense evolves and the threats to national security continue to grow, the focus of this enterprise must also change and place its tremendous intellectual capacity and

unique facilities in the service of addressing other challenges related to national defense. We are taking steps to move in this direction, including functioning as a national science, technology, and systems engineering resource to other agencies with national security responsibilities. Each of the NNSA national laboratories maintains a Field Intelligence Element, responsible for conducting analysis and technical work to fulfill DOE's intelligence responsibilities. The strong collaborative relationship with other elements of the intelligence community, which is already good, will be deepened further by improving access to advanced computational capabilities and special purpose, low-volume manufacturing capabilities existing in NNSA. If confirmed, I will give my strong support to this cooperation and ensure that the Intelligence Community continues to have excellent access to the national security laboratories and other assets of the Office of Defense Programs.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges and problems confronting the Deputy Administrator for Defense Programs?

Answer. In my view, the major challenges confronting the Deputy Administrator for Defense Programs are the changes required in the nuclear weapons stockpile and nuclear weapons complex as both continue to age. While Defense Programs have made significant improvements in meeting near-term commitments, relief on legacy stockpile requirements has not been provided. At the same time, modernization of many nuclear facilities is necessary due to aging of the facilities, the evolution of modern safety standards and the increasing concerns about security of nuclear material. Being requirements driven, NNSA needs to articulate and refine its plans to change the complex in order to support the required stockpile changes, both in the near term of 5 to 10 years and the longer term of 10 to 30 years, even when the details of the future requirements are not known precisely.

Question. What are the operational challenges and problems, including challenges and problems related to safety and security?

Answer. The operational challenges, in my view, stem from the intersection of a lack of detailed knowledge of future requirements and the fact that dealing with anything nuclear involves long time-scales and substantial costs. Therefore there must be a balance between risk, cost, and benefit rather than focusing strictly on the lowest risk path. Without this balance, over time, this leads to risk avoidance, which proves to be very costly, time-consuming, and unproductive. In my view, the major challenges confronting the Deputy Administrator for Defense Programs are how best to deal with a large set of interconnected cost-benefit-risk tradeoffs across a complex that is large, expensive, and old—and in a time when the outputs of the complex are required to change. At the very least, these changes include: (1) progressing to a smaller stockpile; (2) applying recognized—but as yet undeployed—means of improving the safety, security, and effectiveness of warheads without changing military requirements and without recourse to underground nuclear testing; and (3) doing the first and second with a workforce that is nearly completely different from the workforce that put the complex and the stockpile in place. Safety and security must be an intrinsic part of “the job”, not add-ons. It is my view that giving the directors of the labs and plants accountability for the “whats”—the outputs, including good safety and security as an inherent part of the job, without instructing them on the “hows”—the process of doing it—i.e., via DOE orders, would improve not only productive work outputs, but also safety and security. This viewpoint is based on personal experience in the United States and the United Kingdom.

Question. Does the fact that production facilities are embedded in the national security laboratories impact your approach for sustaining safety and security?

Answer. No. I believe that the consequences of failure to manage safety and security may be higher in areas that deal with production of special nuclear material components than in Research and Development (R&D), but the consequence of loss of classified information may well be higher in R&D areas than in manufacturing operations. Additionally, the hazards implicit in some R&D operations are just as high as in some manufacturing operations. At AWE, I found it interesting that there were fewer mistakes made in safety in high hazard manufacturing or R&D operations than in lesser hazard manufacturing or R&D operations. Those in the high hazard operations recognized they had to be trained and aware of the consequences, or they would not be able to make it home at the end of the day.

Question. If confirmed, what plans do you have for addressing these challenges and problems?

Answer. If confirmed, I plan to meet the challenges of combining near-term deliverable requirements with longer-term changes to the complex and the stockpile by articulating the common elements of planning scenarios, by setting clear expecta-

tions, and through consistent personal communications. In my years at AWE, neither I nor my executive board had the luxury of “dodging” hard choices because we were accountable for the outputs to MOD in both the near and far terms. If confirmed, I would also continue to strengthen the notion of an integrated nuclear weapons complex where everyone has accomplishment metrics, is rewarded for success, and accountability is clear.

Question. If confirmed, what management actions and timelines would you establish to address these challenges and problems?

Answer. If confirmed, I will commit my personal involvement and that of Defense Programs management to work aggressively with the national security laboratories, production sites, and other interested parties such as Congress, DOD, and the DNFSB to deal with the issues involving managing benefit, risk, and cost across the nuclear weapons complex. I do not yet have a specific timeline in mind with regard to management actions, but I will develop one as soon as I am confident I understand the specific challenges we face collectively and in the individual programs.

Question. If confirmed, what broad priorities would you establish to address the issues that would confront the Deputy Administrator for Defense Programs?

Answer. My highest priorities would be the same as my predecessors have had—to maintain the safety, security, and effectiveness of the nuclear weapons stockpile while positioning the complex for future changes. NNSA must continue to meet its near-term deliverables to DOD while looking to the future. I believe NNSA can adequately do both—and must in order to fulfill its responsibilities to the Nation.

Question. In your previous capacity for the United Kingdom Atomic Weapons Establishment you were responsible for managing the nuclear weapons complex. What aspects of this experience do you believe you could apply to address the challenges and problems facing the NNSA complex, including challenges and problems relating to operating safety?

Answer. My role as Managing Director and CEO of the Atomic Weapons Establishment in the U.K. from 2006 to 2009 gave me a good understanding of manufacturing processes for special material components, qualification for weapon use, assembly, transport, support in service including surveillance, and finally decommissioning, dismantlement, disassembly, and disposal. Communication and productive interaction with the MOD, the local community, nuclear regulatory authorities, and the AWE workforce of employees and contractors was important to success. While there are important differences between the U.S. and U.K. programs, (8 sites vice 2; 8 site offices vice 1, and 1,000s of warheads vice hundreds), as the contractor, I had full accountability for the operations from R&D through dismantlement, I had a single executive board reporting to me, and although I had two strongly regulated Nuclear Licensed sites, I was not instructed how to do the job in detail or through prescriptive orders. The latter was a tremendous benefit. Over the course of 3 years, I developed—with the MOD customer—an “eyes-on, hands-off” relationship that proved highly productive. That is, the MOD managed the contract rather than the contractor which allowed me to better do my job. If confirmed I would apply appropriate parts of this learning to the U.S. complex, and work with the structure as it exists to perform as one integrated complex where possible.

OVERALL MANAGEMENT

Question. Do you believe that there are any organizational or structural issues in the NNSA that should be addressed to improve management and operations of the Office of the Deputy Administrator for Defense Programs, or that you would address if confirmed? If so, what are these issues and how would you address them, if confirmed?

Answer. Continuous improvement requires innovative thinking and fresh ideas. I do not believe in changing just for the sake of change, but if there are ideas to improve an area that is not performing or functioning adequately well, then I believe the benefit of making a change is worth the cost and risk to put it in place. At present, I have a concern about two areas. The first is the reporting level for the Defense Programs Site Offices. At one time, they reported to the head of Defense Programs. Later, when NNSA was formed, they reported to the Administrator, but this caused a decoupling of safety and security from mission deliverables and it did not work well. Today, the site offices report two levels below the Deputy Administrator for Defense Programs. I sense that it may be better to have the sites and the site offices to report into the same level—the Deputy Administrator level. The second concern is the visibility of science within Defense Programs. The nuclear deterrent program is inherently a complex, high-technology program. The quality of understanding of the underlying science of weapon performance in an aging stockpile, including safety and security, is extremely important. In the event that a CTBT is

brought forward for consideration, whether ultimately ratified or not, a hard examination of the scientific underpinning of warhead knowledge will be essential. If confirmed, I will assess the organizational structure of Defense Programs and make recommendations to the Administrator and Principal Deputy Administrator. I will seek their thoughts on potentially improved ways of doing business—if prospective changes are viewed to be beneficial, cost effective, and managed.

Question. Do you believe that the expertise of DOE personnel serving outside the NNSA can be helpful to you if confirmed?

Answer. I strongly believe this to be true and very beneficial. If confirmed, I will work with the entire DOE and make full use of the resources available within and outside of NNSA. Not only is it required that we cooperate in many areas with other parts of the Department, but I know there are many personnel that can provide assistance and advice helpful to Defense Programs. In particular, I know and look forward to working closely with Dr. William Brinkman, Director of the Office of Science, Dr. Steven Koonin, Under Secretary for Science, and Dr. Inès Triay, Assistant Secretary of Energy for Environmental Management.

Question. If so, what expertise do you believe would be helpful and how would you utilize this expertise if you are confirmed?

Answer. If confirmed, I will make it a high priority to understand the full scope of DOE's available resources. I understand that Defense Programs works closely with many offices, such as the Office of Engineering and Construction Management; the Office of Health, Safety and Security; the Chief Financial Officer; the Office of Environmental Management; and DOE's Chief Information Officer. These offices, and others within the Department, have expertise that can contribute to the success of the missions of the Office of Defense Programs and NNSA.

Question. Are you aware of any limitations on the authority of the Deputy Administrator for Defense Programs to draw on that expertise?

Answer. There are no limits that I am aware of to drawing on the expertise of other offices in DOE. I view these other offices, such as the Office of Engineering and Construction Management, the Office of Science, and the Office of Health, Safety and Security as important assets to the NNSA and Defense Programs. For example, these Offices provide valuable external reviews and recommendations regarding our activities and facilities.

Question. What is your view of the extent to which the NNSA is bound by the existing rules, regulations, and directives of DOE and what flexibility, if any, do you believe you would have in implementing such rules, regulations, and directives that would pertain to the Office of the Deputy Administrator for Defense Programs?

Answer. My understanding is that NNSA must comply with rules, regulations, and directives issued by the Secretary of Energy and the Deputy Secretary. The NNSA Administrator is responsible for ensuring that NNSA and its contractors comply with these requirements, and that responsibility flows down to the Deputy Administrator for Defense Programs. Some rules and regulations provide specific exemption procedures that NNSA can invoke if the NNSA Administrator concludes an exemption is warranted. In addition, the DOE Departmental Directives Program Manual provides a general exemption procedure that allows NNSA to deviate from DOE directives. This manual also permits Departmental elements, including NNSA, to issue "supplemental directives" that may be used to implement requirements in directives, assign responsibilities and establish procedures within a particular Departmental element. Finally, under the NNSA Act, the NNSA Administrator has authority to issue NNSA-specific policies, "unless disapproved by the Secretary."

Question. NNSA, in large measure, was created in response to security lapses at the Los Alamos National Laboratory. However, security lapses, particularly at Los Alamos, have continued to occur. Section 3212(b)(10) of the National Defense Authorization Act for Fiscal Year 2000 provides that the Administrator has authority over, and is responsible for all programs and activities of the administration, including "administration of contracts, including the management and operations of the nuclear weapons production facilities and the national security laboratories."

If confirmed, how would you plan to assist the Administrator of the NNSA to prevent security lapses at NNSA facilities?

Answer. Security of nuclear weapons, nuclear material and design information is an extremely important challenge of paramount importance to national security. I have a good understanding of the nuclear weapon program and the likely impact that a loss of classified information or material could have on the United States. My knowledge and emphasis on nuclear security will help the Administrator, the Chief of Defense Nuclear Security, the Associate Administrator for Defense Nuclear Security, and the Site Office Managers focus appropriately on the importance of security at our sites and while nuclear material is on the road in the control of the Office of Secure Transportation. Any breach in security could bring grave con-

sequences to our Nation. If confirmed, I will do everything in my power to ensure that the complex remains safe and secure, and we will take immediate actions to remedy any marginal system. Practically speaking, some initiatives such as leveraging technology to the fullest extent possible and consolidating nuclear materials to fewer locations will take time and funding, but they will have a large and positive impact. I commit to being a strong advocate for security within the nuclear weapons complex. Although the record is not unblemished, I understand that NNSA has made progress in this area by holding M&O contractors accountable for lapses and by improving Federal oversight of cyber security and the protection of classified information. A personal sense of accountability by each worker within the nuclear weapons complex is important. At AWE, we focused on intensive training of all new recruits as part of their new employee training program. Periodic refreshers for existing workers and quantitative case studies were useful, but instilling a sense of personal accountability is an important goal. If confirmed, I will support actions that are improving the current posture.

Question. The Deputy Administrator for Defense Programs is responsible for activities occurring at NNSA laboratories and production sites across the country, including "directing, managing and overseeing the nuclear weapons production facilities and the national security laboratories."

What are your views on the appropriate roles and responsibilities of field managers relative to those of Defense Programs Headquarters managers in carrying out these responsibilities?

Answer. If confirmed, I look forward to gaining a thorough understanding of the perspectives of both field and Headquarters managers. There is generally close cooperation between field and Headquarters managers in Defense Programs, with Headquarters setting expectations through a number of program and contract mechanisms, while field managers provide daily oversight of the contracts and the M&O contractors perform the duties. Trust and communication are vital to success and essential to productivity and smooth operations.

Question. What is your view of Defense Programs' organizational structure?

Answer. I do not have a clear view at this time. If confirmed, I will take a hard look at the structure, the reporting relationships, and the clarity of accountabilities. I think it very important that I understand why the structure is what it is, how the current structure operates and what potential improvements might be effective before recommending any change.

Question. In your view, is there a well-delineated and consistent chain of command and reporting structure from the field staff to headquarters staff and from the contractors to Federal officials?

Answer. From what I have learned to date, I believe there is an established chain of command and reporting structure in place at NNSA, but to remain strong and effective with new personnel, it needs to be constantly utilized and reinforced. If confirmed, I will take a close look at the reporting structure, assess its strengths and weaknesses, and recommend any changes for improvement that are merited.

Question. What changes, if any, would you recommend in the Defense Programs organization or structure or in the overall NNSA organization or structure?

Answer. At this time, it is my feeling that I do not understand adequately the strengths and weaknesses of the current organization aside from the two concerns detailed in an answer to a previous question. If confirmed, I will take a close look at the DP organization and reporting structure and, when completed, recommend any changes for improvement that are merited. The review would include, but not be limited to, perspectives from Headquarters, Federal Site Offices, and NNSA laboratories and plants.

WEAPONS PROGRAMS PERSONNEL

Question. If confirmed, what specific steps would you take to retain critical nuclear weapons expertise in both the NNSA and the contractor workforce and to attract new expertise?

Answer. If confirmed, working to retain and develop critical nuclear weapons expertise in both the NNSA and the contractor workforce will be a high priority of mine. Throughout my own career, I have given selected people highly demanding technical and administrative challenges because I knew they could accomplish them, and in doing so, would grow to become capable of even greater challenges. The most advanced experimental and computational facilities, or advanced manufacturing facilities, are not worth much without the right people to use them. I am impressed with programs such as NNSA's Stockpile Stewardship Academic Alliances and Future Leaders Program, and want to continue support for them. I support efforts such as mentoring young weapon designers, most of whom have never participated in a

nuclear test, with real work. I believe that some of the best people are drawn to the hardest problems. Articulating those problems clearly, so that they can be undertaken and solved, will be one of my objectives. In addition, if confirmed, I would pursue effective contract mechanisms that support cultivation of critical skills at all contractor sites.

Question. Do you support retaining the capability to re-manufacture every component expected to be found in the stockpile in the near term?

Answer. First and foremost, I support maintaining the safety, security, and effectiveness of the nuclear weapons stockpile without a return to underground testing. This often requires the re-manufacture of components, but sometimes that is not the most prudent approach. Planning for stockpile changes and for changes to the nuclear weapon complex may eliminate the need to retain the capability to remanufacture every component expected to be found in the present stockpile. Many components cannot be reproduced because the materials are no longer available due to prohibitions on their use by regulation or to loss of the tech base that provided them. I have no simple prescription to offer. Looking at each weapon system, and at each component in each system, is required. As aging continues, the need for a more robust surveillance program increases to avoid surprises. The Phase 6.X process for assessing weapon system life extension requirements is rigorous and comprehensive. Recommendations from life extension studies are presented to the President at appropriate stages. The President and Congress ultimately make the final decisions regarding appropriate steps to take to extend the life of any particular nuclear weapon system.

Question. What do you see as the most pressing re-manufacturing needs?

Answer. In discussions with Defense Programs staff, the most pressing remanufacturing needs appear to involve secondaries made at the Y-12 National Security Complex, plutonium primaries, and the material that sits between the two. These are extremely intricate nuclear components that need to be made in quantities high enough to satisfy the projected needs of STRATCOM and the Military Services, especially if a problem develops in the stockpile. If confirmed, I look forward to learning more about these and related issues and contributing to a solution.

Question. In addition to or in lieu of remanufacturing each component of a nuclear weapon, what in your view are the activities that can sustain nuclear weapons expertise at the national laboratories and the manufacturing facilities?

Answer. I have a view that important capabilities are ultimately retained and sharpened by using them. In the work done at the national security laboratories for customers outside NNSA, there is the opportunity to do engineering development and manufacturing of specialty items and precision components, at low volumes, usually with much shorter delivery times than are required in the nuclear weapon program. Across government, the threat reduction program has challenges and needs that can help NNSA keep parts of its nuclear weapons expertise sharp. I have personal experience in this area from AWE, but it is also the case in the United States.

STOCKPILE STEWARDSHIP PROGRAM

Question. The Stockpile Stewardship Program (SSP) has successfully supported the annual nuclear weapons certification effort for the last 17 years. Many new, experimental facilities, including the National Ignition Facility and the Dual Axis Radiographic Hydrodynamic Test facility are coming on line and have started to be used for experimentation.

In your view, what other capabilities, if any, would be needed to ensure that the stockpile is safe, secure and reliable without nuclear weapons testing?

Answer. In my view, the SSP has been successful and is on an appropriate path for continued success. Due to the highly integrated nature of the SSP and constrained budgets, Defense Programs has not planned for much redundancy in capabilities in the future. The National Ignition Facility and the Dual Axis Radiographic Hydrodynamic Test Facility, and other high profile facilities and capabilities, each play a complementary role in the SSP. Together, they provide increased confidence in the safety, security and effectiveness of the stockpile as their technical capabilities are developed. This confidence is subjective and not "pass/fail". I trust the ingenuity and resourcefulness of the people who make up the SSP will meet the challenge to continue to support the stockpile. If confirmed, I will work to provide the most appropriate tools for them to do so.

Question. In your view is the SSP fully coordinated with DOD, and if not what would you plan to do if confirmed to improve the coordination?

Answer. In my view, the SSP appears to be well coordinated with DOD. There is good communication between DOE and DOD at many levels, ranging from routine

tasks such as warhead maintenance and surveillance to more policy-oriented issues such as stockpile and complex changes. If confirmed, I commit to fostering good communications between the Departments.

Question. The NNSA previously supported an effort to develop a new nuclear warhead to be a replacement for an existing warhead, without nuclear weapons testing.

In your view what approach would you recommend to maintaining or sustaining the stockpile in the future?

Answer. I believe that the SSP is capable of meeting the challenge of making changes to the nuclear weapons stockpile in a number of ways, without either changing the military requirements or resorting to underground nuclear testing. There is a suite of Life Extension approaches, ranging from incremental changes of components to replacement of subsystems that could work effectively to extend the U.S. nuclear deterrent for decades. At the component level, technologies may change without altering fit, form, or function. At the subsystem level, technologies and units may change, but without altering military requirements. Because there is a "test pedigree" associated with subsystems, changes may be undertaken with confidence without resorting to underground testing. It is my view that one of the least desirable approaches to stockpile maintenance is having a weapon system that ages in place, while less surveillance is done, and no changes are even considered because doing so may be seen as politically incorrect. I do not mean to say this is happening, but I do mean to say that if it happened, this would be unacceptable. In Richard Feynman's words after the Challenger explosion, "For a successful technology, reality must take precedence over public relations, for nature cannot be fooled." By undertaking a range of life extension approaches—not just one—Defense Programs has an opportunity, in concert with the DOD and Congress to: (1) reduce the numbers of currently stockpiled weapons; (2) incorporate advanced safety and security features to maintain positive assurances against theft, loss, and/or misuse of these replacement warheads; and (3) improve confidence in the effectiveness of the nuclear weapons stockpile through better scientific understanding to reduce uncertainties, while making modest changes to increase performance margins.

Question. Have you had the opportunity to review both the classified and unclassified summary of the recent JASON report on the stockpile life extension program?

Answer. I have read the unclassified summary of the report but have not yet read the classified version.

Question. If so, what is your view of the report? Are there significant aspects of the report with which you disagree?

Answer. The unclassified summary provides insufficient detail for a technical judgment. I intend to read the classified report as soon as one is provided to me.

COMPLEX REVITALIZATION

Question. If confirmed you will play a key role in the steps to modernize and downsize the nuclear weapons complex.

Do you agree that there should be a net reduction in the footprint of the nuclear weapons complex?

Answer. I do agree, based on an expectation that the footprint, reduced appropriately over time, should have the expected return of cost savings without losing productivity or the ability of Defense Programs to meet mission requirements and deliverables. Requirements include not just weapon parts, but capabilities as well. The challenge that is with the United States today is determining how best to reduce the footprint over the next several years without regretting the decisions a decade or two from now. Achievement of this objective will require improved clarity of future mission requirements and the best set of integrated planning tools we can muster.

Question. If confirmed, what will be your highest priorities in ensuring the modernization of the complex?

Answer. If confirmed, Complex Revitalization will be a key initiative that I will pursue as Deputy Administrator. I also understand that NNSA has followed the well-established National Environmental Policy Act process for informing its decisions on Complex Revitalization and that several important decisions have been made in the past 2 years. I will continue to work with our interagency partners as we revitalize the nuclear weapons complex to support present and future requirements as those requirements become clearer.

THIRD-PARTY FINANCING

Question. If confirmed, will you review all proposals for third-party financing and ensure that no such proposal will be implemented unless it is cost effective and con-

sistent with applicable DOE, Office of Management and Budget, and General Services Administration rules and regulations?

Answer. Yes. If confirmed, I would carefully review all proposals for third-party financing of Defense Programs facilities and confer with all concerned parties, including our congressional committees, to ensure that before implementation, any third-party financing proposal is cost-effective and consistent with all applicable rules and regulations.

FACILITIES AND INFRASTRUCTURE

Question. The Facilities and Infrastructure Recapitalization Program (FIRP) was established to address long-deferred maintenance backlogs in the nuclear weapons complex, particularly at the manufacturing facilities.

Do you believe that this program has been successful?

Answer. Yes, in large part. I saw first-hand the dedication of NNSA employees both at Headquarters and in the Site Offices, as well as the dedication of employees at the NNSA sites. Many achievements were made in reducing the backlog of deferred maintenance and several key reductions in footprint were made across the complex as part of the program.

Question. When the FIRP expires, what in your view is needed to ensure that buildings are adequately maintained in the future?

Answer. I have not been able to have the breadth of discussions yet to form an opinion. If confirmed, I will take the time to have the required discussions, form a view, and make recommendations to the Administrator. We know, however, that maintaining our infrastructure suffers from competing priorities in a severely constrained fiscal environment. If confirmed, my goal will be to establish a stable funding base which we can then manage against as we assess our infrastructure needs and priorities.

Question. The Readiness in the Technical Base and Facilities program (RTBF) is responsible for construction and operation of facilities. If confirmed, what steps will you take to ensure that surplus buildings are torn down or transferred so that they will not need long-term maintenance?

Answer. If confirmed, Complex Revitalization will be a key initiative that I will pursue as Deputy Administrator. A central part of Complex Revitalization is ensuring that surplus buildings are either torn down so that they will not need long-term maintenance or transferred to other programs that need them and are committed to supporting their proper maintenance. I expect to work closely with the Offices of Infrastructure and Environment within the NNSA and Environmental Management in DOE (and other organizations) to achieve these objectives. I understand that both of these Offices have well-established programs for dealing with excess facilities. As the former Managing Director and Chief Executive Officer of the Atomic Weapons Establishment I am familiar with these issues and I will pay close attention to these concerns.

Question. If confirmed, will you support including the cost of tearing down those buildings that are being replaced within the total project cost of any new construction?

Answer. If confirmed, I would support steps to minimize financial liabilities on the Weapons Activities account by including the cost of decommissioning, dismantlement, and demolition of buildings that are being replaced within the total project cost of any new construction. This was achieved in the Microsystems and Engineering Sciences Applications (MESA) project, an area for which I had personal accountability while I was still at Sandia National Laboratories, and it worked well. To portray the full scope of projects, we must present the full scope and cost of new construction, to include demolition of old buildings.

Question. DOE and NNSA often build one of a kind or first of a kind buildings. Some of the past construction have a history of being over budget and behind schedule and many have run into technical difficulties. In addition, new operational facilities must meet the operational safety standards of DOE.

If confirmed, what steps will you take to ensure that NNSA construction projects are managed to be completed within budget and on time?

Answer. If confirmed, one of my highest priorities will be to demand accountability across the nuclear weapons complex, in both the Federal and contractor workforce. We must keep commitments to achievement of key milestones for cost and schedule on construction projects. I understand that improving project management is one of the six "Focus Areas" that is already being emphasized by NNSA. I expect to learn more about this and the other focus areas, and ask fundamental questions such as: (1) do we have the right people in place to do the job; (2) are we using all available appropriate resources within NNSA, within DOE, and even

outside DOE; and (3) are the commitments we have made still reasonable (have circumstances or requirements changed, and if so, how are they being managed)?

If confirmed, I will work with the Federal Project Directors within NNSA and seek help from all available sources. I recognize that project management skills are critical to the success of NNSA construction projects. If confirmed, I intend to leverage my 30 years of experience working with many outstanding people in the nuclear weapons complex to develop and improve Defense Programs' capability in construction management. Today, there are proven quantitative methodologies, such as Earned Value Management systems, that can identify problematic cost and schedule "trajectories" at an earlier stage. I look forward to meeting with staff from the Office of Facility and Infrastructure Acquisition and Operations and the Office of Infrastructure and Environment to discuss both general project management within NNSA and to review progress on specific high-profile projects.

Question. What additional costing, project management and design skills do you believe are needed in the Federal staff of the Office of Defense Programs or in the NNSA?

Answer. I am not yet in a position to say what additional costing, project management, and design skills are needed in the Federal staff of Defense Programs or NNSA, but I understand this is an area of emphasis within NNSA. Because this is such an important area to the success of Complex Revitalization and the very future of the nuclear weapons complex, I will ensure that good project management within Defense Programs remains a high priority and I will set clear expectations and provide support for Federal and contractor staff to obtain the skills that are necessary for success. I also believe there needs to be a forum where all parties can bring suggestions forward to both arrive at the right conclusion, and to ensure the needed buy-in and cooperation that will garner broad support.

Question. At what point in the Critical Decision timeline do you believe an independent cost estimate should be performed for a construction project, and why?

Answer. Based on my understanding of the Critical Decision timeline, I believe an Independent Cost Estimate should be performed for complex and high cost projects prior to setting the project baseline at Critical Decision 2 (Approve Performance Baseline), 60–70 percent design complete. This is early enough in the process to make an impact and correct issues, but far enough along that there is appropriate fidelity in the estimated project design, scope, and schedule.

Question. If confirmed, will you work to ensure that all design issues impacting operational safety requirements are fully resolved before Critical Decision 3?

Answer. If confirmed, I will work to ensure that all design issues impacting operational safety requirements are fully resolved well before Critical Decision 3 (Approve Start of Construction). Due to the importance of operational safety requirements, they should be resolved as soon as possible in the design process, and certainly before construction begins. This is also consistent with the Department's standard, DOE Standard 1189–2008, Integration of Safety into the Design Process.

Question. If confirmed, what steps will you take to ensure that nuclear and other operational safety issues are fully addressed in the design of new NNSA buildings?

Answer. If confirmed, I intend to have Defense Programs follow the Department's standard, DOE Standard 1189–2008, Integration of Safety into the Design Process. This new standard requires early identification of Safety Class systems and other safety related requirements early in the project life cycle, just after approval of Mission Need. These measures ensure that all safety requirements are articulated, validated and understood early in the project life cycle.

Question. What in your view are the construction and maintenance priorities for the NNSA?

Answer. I have not had the opportunity to have the in-depth discussions with NNSA staff to form a view, but if confirmed, I will work to form an accurate view quickly. On the basis of my current understanding, two important, albeit expensive, construction priorities are the Uranium Processing Facility (UPF) at the Y-12 National Security Complex and the Chemistry and Metallurgy Research Replacement facility (CMRR) at Los Alamos National Laboratory.

STOCKPILE MANAGEMENT/LIFE EXTENSION PROGRAMS

Question. If confirmed, you will be responsible for managing the stockpile including the life extension programs for existing nuclear warheads.

What is your general assessment of the effectiveness of the ongoing and planned life extension programs?

Answer. I believe the Life Extension Programs (LEP) are highly effective for extending the near-term life of warheads in the nuclear weapons stockpile. I am familiar with the LEPs for the W87 (Intercontinental Ballistic Missile warhead) and the

B61-7/11 (strategic bombs). I understand there are production challenges with re-starting a unique component needed for the W76 (Submarine Launched Ballistic Missile warhead) LEP, but that is being appropriately addressed. I understand that defects continue to be discovered in the legacy stockpile. The process of significant finding investigations (SFI) is used in the way intended to draw conclusions based upon facts uncovered in detailed exploration of such defects. The SFI process works and provides information that helps guide refurbishment schedules. The NPR is scheduled for delivery to Congress February 1, 2010 and this will also help guide refurbishment schedules. If confirmed, I am committed to finding effective ways to support the NPR policy.

Question. How well, in your view, does the nuclear weapons complex—encompassing the laboratories and the production sites—function as an integrated complex and, externally, with DOD in executing the life extension programs?

Answer. My impression is that the nuclear weapons complex, including all the sites, works relatively well together and with DOD. I understand that there is a strong emphasis on complex-wide milestones and that some of the performance fees at the sites are inter-related. That is a very strong motivator for integrated success, and one that I would plan to continue, if confirmed.

Question. Do you believe the efficiency with which NNSA manages the execution of the life extension programs can be improved, and if so, how?

Answer. I am yet not aware of a specific way to improve the management of the Life Extension Programs (LEP), but because of their importance to Defense Programs and the continued health of the nuclear weapons stockpile, I expect to personally review the execution of the LEPs, if confirmed.

Question. What in your view will be the challenges facing the NNSA if it is determined that any individual weapon will require a modification, such as a new component for example, to meet safety security or reliability requirements?

Answer. If confirmed, my approach to resolving challenges with weapon systems will be to first articulate the challenge facing the NNSA, clearly communicate that problem to all stakeholders, including our congressional committees and explain the projected way ahead. I will then seek support from both the congressional authorizing and appropriating committees in an effort to efficiently resolve the problem. Parallel to these efforts, I will work to ensure we have the human capital and specialized skills necessary to perform the work so risk is properly managed.

COMPREHENSIVE TEST BAN TREATY

Question. From a technical perspective do you believe that the stockpile can be maintained without the need for a resumption of explosive nuclear weapons testing?

Answer. Yes, in large part due to the increased understanding and successes brought about by the SSP and attention given to training people in design, development, manufacturing, and qualification in an era where nuclear testing has not been done since September 1992. In your view what are the essential capabilities that must be in place to sustain the stockpile without nuclear weapons testing?

The essential capabilities are those that are already supported by the SSP which evolve as greater understanding of the current stockpile improves. If confirmed, I am willing to discuss this further in a closed session.

SAFETY AND SECURITY OF THE NUCLEAR WEAPONS STOCKPILE

Question. The Deputy Administrator for Defense Programs is responsible for assuring the safety and security of nuclear weapons from a design perspective.

If confirmed, will you work with DOD to identify necessary options to improve the safety and security of nuclear weapons from a design perspective?

Answer. Absolutely. If confirmed, I expect to work closely with all of our inter-agency partners, specifically General Chilton, Commander U.S. STRATCOM, as well as the Military Services. I expect to work in partnership with these entities to satisfy the requirements set by the Military Services. If confirmed, this will be an important part of the work that I do as Deputy Administrator for Defense Programs.

ROLE OF THE NNSA COMPLEX IN MEETING OTHER NATIONAL SECURITY CHALLENGES

Question. The nuclear weapons complex, as a result of the billions spent on expanding capabilities to sustain nuclear weapons, including the advance computing capabilities, supports many aspects of national security research and development including DOD and the Intelligence Community.

Do you believe that this work in support of others should be sustained?

Answer. Yes. Not only is the work valuable, it is essential to attracting people, sustaining skills, and building capabilities to support NNSA's mission. I believe

strongly in the work done by the NNSA national security laboratories for government departments outside the NNSA.

Question. In your view does this work allow the nuclear weapons complex to maintain its nuclear skills?

Answer. Yes. Because the work required by other Government departments is often associated with strong technical challenge and demanding timescales, it helps sharpen the abilities of those who do the work to respond both accurately and quickly.

Question. Do you believe that there should be any changes or improvements to the work for others program such as those identified in the recent report of the DOE Inspector General?

Answer. I have not yet been able to read the report by the DOE Inspector General, but I commit to doing this and recommending any changes or improvements to the work for others program that I see in addition to those in the DOE Inspector General's report.

REGULATION, STANDARDS, AND OVERSIGHT

Question. Concern over what is often deemed excessive or burdensome regulations, standards, and oversight, is often expressed with respect to the nuclear weapons complex.

If confirmed will you review the applicable regulations, standards, and internal oversight activities and make any necessary changes to ensure that the complex is managed safely, securely, and in a cost efficient manner?

Answer. Yes. Based on my experience in both the U.K. and the U.S. nuclear weapons enterprises we must find a more practical way to accomplish work safely, securely, and efficiently with due respect to our environment in order to achieve required program outputs in less costly ways.

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

Question. If confirmed, will you ensure that the DNFSB is provided full and complete information on a timely basis to ensure that it can execute its statutory responsibilities?

Answer. Yes. If confirmed, I plan to foster a strong relationship and frequent communication with the DNFSB. On a personal note, I, and the executive board that reported to me at AWE, worked closely with the Nuclear Installations Inspectorate (NII), the key U.K. regulatory body for nuclear licensed sites. This rigorous and respectful interaction was enabled by mandatory in-depth technical training of all NII employees so that peer-to-peer technical discussions and debates were possible.

Question. If confirmed will you work with the DNFSB to resolve any technical issues promptly?

Answer. Yes. It would be unreasonable, though, for me to imply that this could be done without consideration of available financial and human resources to achieve this objective.

NOTIFICATION OF CONGRESS

Question. If confirmed, will you notify Congress promptly of any significant issues in the safety, security or reliability of the nuclear weapons stockpile?

Answer. Yes. If confirmed, I would promptly notify Congress of any issues affecting the nuclear weapons stockpile and nuclear weapons complex. I understand that the officials in the Office of Defense Programs often brief congressional members and their staffs about the state of the stockpile and complex. I would continue that practice, whether or not there are emerging issues. Good, accurate communication is to everyone's advantage. I pledge to make myself available to address issues of concern.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Deputy Administrator for Defense Programs?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Question for the record with answer supplied follows:]

QUESTION SUBMITTED BY SENATOR ROLAND W. BURRIS

WORKING RELATIONSHIP

1. Senator BURRIS. Dr. Cook, what working relationship do you have with the Department of Defense's (DOD) Nuclear Regulatory Agency?

Dr. COOK. The National Nuclear Security Administration (NNSA) has a strong relationship with the Department of Defense. The Departments of Defense and Energy regulate separately the nuclear facilities within the Departments, while the Nuclear Regulatory Commission regulates civilian nuclear facilities. While there is not a Nuclear Regulatory Agency within DOD, the Defense Nuclear Facilities Safety Board (DNFSB) provides information to Congress on Defense Nuclear Facilities both within DOD and the Department of Energy, including NNSA. NNSA Defense Programs (NA-10) provides regular updates to DNFSB on nuclear facilities operated by NNSA contractors at the nuclear weapons laboratories, production plants, and the Nevada Test Site. These updates include plans and status for upgrades or replacements aimed at improvement of safety in the NNSA facilities, many of which were originally constructed in the 1940s, 1950s, and 1960s.

If confirmed, I plan to foster a strong relationship and frequent communication with the DNFSB. I would also work with the DNFSB to resolve any technical issues promptly, but it would be unreasonable for me to imply that this could be done without consideration of available financial and human resources to achieve this objective.

[The nomination reference of Dr. Donald L. Cook follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
December 3, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Donald L. Cook, of Washington, to be Deputy Administrator for Defense Programs, National Nuclear Security Administration, vice Robert L. Smolen, resigned.

[The biographical sketch of Dr. Donald L. Cook, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH BY DR. DONALD L. COOK

Dr. Donald L. Cook served as Managing Director and Chief Executive Officer of the Atomic Weapons Establishment (AWE) in the United Kingdom (U.K.) from 2006 to 2009. In this capacity, he was accountable for AWE's performance on the contract with the U.K. Ministry of Defence, which includes support of the U.K. Trident warheads and development and sustainment of capability in nuclear weapon design, engineering development, manufacturing, qualification, assembly, transport, support in service, and finally, decommissioning, dismantlement, and disposal. AWE has an annual budget of \$1.2 billion, an employee workforce of 5,000 staff, and is managed by a consortium of Serco, Lockheed Martin, and Jacobs Engineering.

Prior to heading AWE, Dr. Cook worked at Sandia National Laboratories, Albuquerque, New Mexico for 28 years in Pulsed Power Sciences, Microtechnologies, Infrastructure, and Security. From 1999–2006, he was Director of the MESA Program Center, accountable for design and construction of the Microsystems and Engineering Sciences Applications (MESA) complex. In 2003, he assumed Program Director responsibilities for Sandia's Infrastructure Program and for Sandia's Safeguards and Security Technologies Program, which responded to a new Design Basis Threat.

From 1977–1999, Dr. Cook led efforts in pulsed power accelerator design and experimentation, fusion research, hydrodynamics, radiography, diagnostic development, and computational code development. He managed the Sandia Fusion Research Department from 1984–1993 and was Director of Pulsed Power Sciences from 1993–1999. Work during this period included construction and development of a number of accelerators, including the Z-machine.

Dr. Cook is a graduate of the University of Michigan and the Massachusetts Institute of Technology, and a Fellow of the American Association for the Advancement of Science and the Institute of Physics. He is married to the former Margaret Ann Kramer, with two grown daughters, Julia and Cynthia. The Cooks are residents of Seattle, WA.

Dr. Cook is well-qualified for appointment to the position of Deputy Administrator for Defense Programs, NNSA/DOE, by virtue of his career-long experience and accomplishments in many aspects of the U.S. and U.K. nuclear deterrents. These include science, technology, engineering, manufacturing, and executive leadership across functions required for maintaining the warheads for an effective nuclear deterrent while in service. His most recent assignment at AWE was a tremendous privilege made possible under the 1958 Mutual Defense Agreement between the U.S. and the U.K. Governments.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Dr. Donald L. Cook in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Donald Lloyd Cook.
2. **Position to which nominated:**
Deputy Administrator for Defense Programs, NNSA.
3. **Date of nomination:**
December 3, 2009.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
January 7, 1948; Ypsilanti, MI.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Margaret Kramer.

7. **Names and ages of children:**
Julia Alison Cook Dombrowski; age 33.
Cynthia Lauren Cook; age 30.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

University of Michigan, 1966–1970

BSE (Nuclear Engineering), 1970

Massachusetts Institute of Technology, 1970–1976

SM Nuclear Engineering (Applied Plasma Physics), 1974

ScD Nuclear Engineering (Applied Plasma Physics), 1976

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Director of Pulsed PowerSciences, Sandia National Laboratories, Albuquerque, NM, 1993–1999.

Director of MESA Program Center, Sandia National Laboratories, Albuquerque, NM, 1999–2006.

From May–December 2005, I was part of the Lockheed Martin-University of Texas bid team for the management and operations of the Los Alamos National Laboratory.

Managing Director, Atomic Weapons Establishment, Aldermaston, United Kingdom, 2006–2009 (Lockheed Martin Corporation is one of three parent companies of AWE).

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Deployed to DOE Defense Programs Science Council in Washington, DC, for 4 months in 1997, while employed by Sandia National Laboratories.

Sandia National Laboratories (1977–2006).

Francis Bitter National Magnet Laboratory [MIT] (1976–1977).

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Special Advisor to Managing Director, Atomic Weapons Establishment, Aldermaston, United Kingdom.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, American Physical Society (APS), 1970–2009

Member, American Nuclear Society (ANS), 1977–2009

Fellow, American Association for the Advancement of Science (AAAS), 1976–2009

Fellow, Institute of Physics (IoP), United Kingdom, 2009

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

John Kerry for President, \$500

Tom Udall for Senator, \$100

Barack Obama for President, \$100

Barack Obama Inaugural, \$250

Lockheed Martin political action committee, \$1,000, 2008; \$750, 2009

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Eagle Scout, 1963
 Phi Eta Sigma (Undergraduate honor society), 1968
 Tau Beta Pi (Engineering honor society), 1970
 National Defense Education Act (NDEA) Traineeship, 1970–1973
 General Electric Foundation Fellowship, 1974–76
 Sigma Xi (Science honor society), 1976
 SNL Award for excellence in leadership of Inertial Confinement Fusion program, 1993
 Fusion Leadership Award (Fusion Power Associates), 1993
 Recognition for outstanding programmatic performance (DOE/SNL), 1996, 1998
 Engineering Achievement Award (NM Society of Professional Engineers), 1997
 Recognition of service to Defense Nuclear Security Program (DOE/NNSA), 2004
 Sandia President's Quality Award (highest level) for MESA Project Execution, 2004
 Elected Fellow, American Association for the Advancement of Science (AAAS), 2004
 Lockheed Martin Annual Meeting Award (for MESA Project Execution), 2005
 Lockheed Martin Nova Award (highest) for EVM accreditation of Sandia Sites, 2006
 University of Michigan Distinguished Alumni Award (Nuclear Engineering), 2008
 Elected Fellow, Institute of Physics (IoP), U.K., 2009

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Numerous Technical Conference Reports and Journal articles; no books.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

DONALD L. COOK.

This 15th day of December, 2009.

[The nomination of Dr. Donald L. Cook was reported to the Senate by Chairman Levin on May 5, 2010, with the recommendation that the nomination be confirmed. As of the date this volume was sent to press, Dr. Cook's nomination had not yet been confirmed by the Senate.]

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

COMMITTEE ON ARMED SERVICES FORM

FINANCIAL AND OTHER INFORMATION REQUESTED OF NOMINEES

INSTRUCTIONS TO THE NOMINEE: Information furnished in Parts B through F will be retained in the committee's executive files and will not be made available to the public unless specifically directed by the committee.

Name:

PART B—FUTURE EMPLOYMENT RELATIONSHIPS

1. Will you sever all business connections with your present employers, business firms, business associations or business organizations if you are confirmed by the Senate?

2. Do you have any plans, commitments or agreements to pursue outside employment, with or without compensation, during your service with the government? If so, explain.

3. Do you have any plans, commitments or agreements after completing government service to resume employment, affiliation or practice with your previous employer, business firm, association or organization?

4. Has anybody made a commitment to employ your services in any capacity after you leave government service?

5. Is your spouse employed and, if so, where?

6. If confirmed, do you expect to serve out your full term or until the next Presidential election, whichever is applicable?

PART C—POTENTIAL CONFLICTS OF INTEREST

1. Describe all financial arrangements, deferred compensation agreements, and other continuing dealings with business associates, clients or customers.
2. Indicate any investments, obligations, liabilities, or other relationships which could involve potential conflicts of interest in the position to which you have been nominated.
3. Describe any business relationship, dealing or financial transaction which you have had during the last 10 years, whether for yourself, on behalf of a client, or acting as an agent, that could in any way constitute or result in a possible conflict of interest in the position to which you have been nominated.
4. Describe any activity during the past 10 years in which you have engaged for the purpose of directly or indirectly influencing the passage, defeat or modification of any legislation or affecting the administration and execution of law or public policy.
5. Explain how you will resolve any potential conflict of interest, including any that may be disclosed by your responses to the above items. (Please provide a copy of any trust or other agreements.)
6. Do you agree to provide to the committee any written opinions provided by the General Counsel of the agency to which you are nominated and by the Attorney General's office concerning potential conflicts of interest or any legal impediments to your serving in this position?

PART D—LEGAL MATTERS

1. Have you ever been disciplined or cited for a breach of ethics for unprofessional conduct by, or been the subject of a complaint to any court, administrative agency, professional association, disciplinary committee, or other professional group? If so, provide details.
2. Have you ever been investigated, arrested, charged or held by any Federal, State, or other law enforcement authority for violation of any Federal, State, county or municipal law, regulation or ordinance, other than a minor traffic offense? If so, provide details.
3. Have you or any business of which you are or were an officer ever been involved as a party in interest in any administrative agency proceeding or civil litigation? If so, provide details.
4. Have you ever been convicted (including a plea of guilty or nolo contendere) of any criminal violation other than a minor traffic offense?
5. Please advise the committee of any additional information, favorable or unfavorable, which you feel should be considered in connection with your nomination.

PART E—FOREIGN AFFILIATIONS

1. Have you or your spouse ever represented in any capacity (e.g., employee, attorney, business, or political adviser or consultant), with or without compensation, a foreign government or an entity controlled by a foreign government? If so, please fully describe such relationship.
2. If you or your spouse has ever been formally associated with a law, accounting, public relations firm or other service organization, have any of your or your spouse's associates represented, in any capacity, with or without compensation, a foreign government or an entity controlled by a foreign government? If so, please fully describe such relationship.

3. During the past 10 years have you or your spouse received any compensation from, or been involved in any financial or business transactions with, a foreign government or an entity controlled by a foreign government? If so, please furnish details.

4. Have you or your spouse ever registered under the Foreign Agents Registration Act? If so, please furnish details.

PART F—FINANCIAL DATA

All information requested under this heading must be provided for yourself, your spouse, and your dependents.

1. Describe the terms of any beneficial trust or blind trust of which you, your spouse, or your dependents may be a beneficiary. In the case of a blind trust, provide the name of the trustee(s) and a copy of the trust agreement.

2. Provide a description of any fiduciary responsibility or power of attorney which you hold for or on behalf of any other person.

3. List sources, amounts and dates of all anticipated receipts from deferred income arrangements, stock options, executory contracts and other future benefits which you expect to derive from current or previous business relationships, professional services and firm memberships, employers, clients and customers.

4. Have you filed a Federal income tax return for each of the past 10 years? If not, please explain.

5. Have your taxes always been paid on time?

6. Were all your taxes, Federal, State, and local, current (filed and paid) as of the date of your nomination?

7. Has the Internal Revenue Service ever audited your Federal tax return? If so, what resulted from the audit?

8. Have any tax liens, either Federal, State, or local, been filed against you or against any real property or personal property which you own either individually, jointly, or in partnership?

(The committee may require that copies of your Federal income tax returns be provided to the committee. These documents will be made available only to Senators and the staff designated by the Chairman. They will not be available for public inspection.)

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

COMMITTEE ON ARMED SERVICES QUESTIONNAIRE ON BIOGRAPHICAL
AND FINANCIAL INFORMATION REQUESTED OF CERTAIN SENIOR
MILITARY NOMINEES

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES FOR CERTAIN SENIOR MILITARY POSITIONS

INSTRUCTIONS TO THE NOMINEE:

Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

If you have completed this form in connection with a prior military nomination, you may use the following procedure in lieu of submitting a new form. In your letter to the Chairman, add the following paragraph to the end:

"I hereby incorporate by reference the information and commitments contained in the Senate Armed Services Committee form 'Biographical and Financial Information Requested of Nominees for Certain Senior Military Positions,' submitted to the Committee on [insert date or your prior form]. I agree that all such commitments apply to the position to which I have been nominated and that all such information is current except as follows:" [If any information on your prior form needs to be updated, please cite the part of the form and the question number and set forth the updated information in your letter to the Chairman.]

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
2. **Position to which nominated:**
3. **Date of nomination:**
4. **Address:** (List current place of residence and office addresses. Also include your office telephone number.)
5. **Date and place of birth:**
6. **Marital Status:** (Include name of husband or wife, including wife's maiden name.)
7. **Names and ages of children:**
8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational or other institution.

10. **Memberships:** List all memberships and offices held in professional, fraternal, scholarly, civic, business, charitable and other organizations.

11. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

13. **Personal views:** Do you agree, when asked before any duly constituted committee of the Congress, to give your personal views, even if those views differ from the Administration in power?

COMMITTEE ON ARMED SERVICES FORM

FINANCIAL AND OTHER INFORMATION REQUESTED OF NOMINEES

INSTRUCTIONS TO THE NOMINEE: Information furnished in Parts B through E will be retained in the committee's executive files and will not be made available to the public unless specifically directed by the committee.
