 APPENDIX 1667

NOMINATIONS OF WILLIAM J. LYNN III TO BE DEPUTY SECRETARY OF DEFENSE; ROBERT F. HALE TO BE UNDER SECRETARY OF DEFENSE (COMPTROLLER) AND CHIEF FINANCIAL OFFICER; MICHÈLE FLOURNOY TO BE UNDER SECRETARY OF DEFENSE FOR POLICY; AND JEH CHARLES JOHNSON TO BE GENERAL COUNSEL, DEPARTMENT OF DEFENSE

THURSDAY, JANUARY 15, 2009

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:36 a.m. in room SD-106, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Reed, Akaka, E. Benjamin Nelson, Webb, McCaskill, McCain, Inhofe, Chambliss, Graham, Thune, and Wicker.

Other Senators present: Senators Hagan, Begich, Menendez, and Udall.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Jonathan D. Clark, counsel; Gabriella Eisen, counsel; Richard W. Fieldhouse, professional staff member; Creighton Greene, professional staff member; Michael J. Kuiken, professional staff member; Peter K. Levine, general counsel; William G.P. Monahan, counsel; John H. Quirk V, professional staff member; Arun A. Seraphin, professional staff member; Russell L. Shaffer, counsel; and William K. Sutey, professional staff member.

Minority staff members present: Joseph W. Bowab, Republican staff director; William M. Caniano, professional staff member; Richard H. Fontaine, Jr., deputy Republican staff director; David M. Morriss, minority counsel; Lucian L. Niemeyer, professional staff member; Diana G. Tabler, professional staff member; Richard F. Walsh, minority counsel; and Dana W. White, professional staff member.

Staff assistants present: Kevin A. Cronin, Jessica L. Kingston, and Christine G. Lang.

Committee members' assistants present: Bethany Bassett and Jay Maroney, assistants to Senator Kennedy; James Tuite, assistant to Senator Byrd; Elizabeth King, assistant to Senator Reed; Bonnie Berge, assistant to Senator Akaka; Christopher Caple, assistant to Senator Bill Nelson; Christiana Gallagher, assistant to Senator Ben Nelson; Jon Davey, assistant to Senator Bayh; Jennifer Park and Gordon I. Peterson, assistants to Senator Webb; Stephen C. Hedger and Elizabeth McDermott, assistants to Senator McCaskill; Anthony J. Lazarski and Nathan Reese, assistants to Senator Inhofe; Clyde A. Taylor IV, assistant to Senator Chambliss; Adam G. Brake, assistant to Senator Graham; Jason Van Beek, assistant to Senator Thune; Brian W. Walsh, assistant to Senator Martinez; and Erskine W. Wells III, assistant to Senator Wicker.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody.

The committee meets today to consider the nominations of Bill Lynn to be Deputy Secretary of Defense; Robert Hale to be Under Secretary of Defense (Comptroller); Michèle Flournoy to be Under Secretary of Defense for Policy; and Jeh Charles Johnson to be General Counsel of the Department of Defense (DOD).

This is the first meeting of the 111th Congress, so I want to begin by welcoming back all of our members, starting with our ranking member—although he's not here at the moment, he can't be here until a little later in the hearing. We all know that Senator McCain had hoped to be serving in a somewhat different position, but we're delighted to have him back, and we welcome the huge contribution that he has made, and will continue to make, to this committee, to Congress, and to the Nation.

I also want to extend a special welcome to our new members: Senator Hagan, who is here, Senator Begich who is here—I did not see Senator Udall, he's not here yet. They—although technically not members yet of the committee—are going to be members both technically and in reality, in a few days. So we've invited them to join us at today's hearing and they'll be free to ask questions if they'd like, later on. We're delighted to have you both here.

The Senate Armed Services Committee has, I think, and our new members particularly will find out, a real determination to act on a bipartisan basis. We are a committee that historically has acted that way, it's been our hallmark. It's been something we've been very proud of, it's something we protect.

The commitment to national defense is not a partisan commitment on the part of any Member of Congress, and it is surely something which we feel very strongly about, this common commitment to the security of our Nation, and to the men and women in uniform who put themselves in harm's way for our good.

We look forward to working with you. I know every member of the committee feels that way, regardless of party affiliation. This year our committee is in a unique position because we have a new administration, but we do not have a new nominee for Secretary of Defense.

We asked Secretary Gates to return to the committee on January 27, to provide us with his views, and the views of the incoming ad-

ministration on challenges facing DOD. That hearing is going to give us the opportunity to ask many of the questions that we might have asked a new nominee.

Today we're going to hear from nominees for four of the most senior positions at DOD who serve directly under the Secretary. We welcome our nominees and their families to today's hearing. We will tell our nominees' families something that many of them already know from previous experience. That is that senior DOD officials put in long hours, and they make sacrifices for the Nation's good, and their families make sacrifices, as well, to make it possible for the officials to serve our country, and to take out the kind of time that is necessary from their lives, and that will also come from your lives.

So we thank the families for their service, as well as our nominees for their willingness to serve our Nation. We'll ask the nominees to introduce their families as we call upon them later, for their opening statements.

Each of our nominees has a distinguished career of public service, and a strong commitment to the Nation's defense. They are exceptionally well-qualified, and the committee looks forward to working with them, and hopefully a swift confirmation.

Mr. Lynn served in DOD from 1993 to 2001, first as Director of Program Analysis and Evaluation (PA&E) and then as DOD Comptroller.

Mr. Hale served in the Department as Air Force Comptroller from 1994 to 2001. Before that, he spent 12 years as the head of the Defense Unit of the Congressional Budget Office (CBO).

Ms. Flournoy served as Principal Deputy Assistant Secretary of Defense for Strategy in the 1990s, and helped prepare the 2001 Quadrennial Defense Review (QDR).

Mr. Johnson has served as General Counsel of the Air Force from 1998 to 2001.

Mr. Lynn also gained, we think, his most important experience before he went to the Pentagon, and that is when he spent 6 years working with this committee as Senator Kennedy's military legislative assistant. We look forward to having Senator Kennedy back with us, he is looking very good, and sounding good. We look forward to his coming back.

But in the meantime, Bill, we want to make reference to the fact that you cut some of your teeth here, with this committee, and that will serve you in good stead, we believe, in your new position.

If confirmed, our nominees will resume substantial responsibility for leading DOD at a critical time. Almost 200,000 U.S. soldiers, sailors, airmen, and marines are deployed far from home. As we meet here, they're in Iraq and Afghanistan and Kuwait and other theaters around the world.

After more than 7 years of war, our military—particularly our ground forces—are stressed. Many of our troops have been worn out, their families have been faced—as they have—with repeated deployments. Our equipment is being used up.

At the same time, DOD spends hundreds of billions of dollars every year on the acquisition of products and services. The Government Accountability Office (GAO) reported last year that cost overruns on the Department's 95 largest acquisition programs now

total almost \$300 billion over the original program estimates, even though the Department has cut unit quantities and reduced performance expectations on many programs to reduce costs.

At a time when the Federal budget is under extraordinary strain, as a result of the economic crisis we face, we cannot afford this kind of continued inefficiency.

Our Nation faces a host of challenges at home and abroad. Our witnesses today are going to help the Department and this country face those challenges. I'm confident that our nominees—working with the President-elect, Secretary Gates, others in the incoming administration, and with this committee—will do everything in their power to ensure that our Nation meets the challenges that face us. We look forward to hearing their views.

As I indicated, Senator McCain has informed us that he will be here later in the morning, and we will then give him an opportunity to make an opening statement. But in his absence we will call upon Senator Inhofe to make whatever statement that he might wish to make before we call upon those that are going to be introducing our nominees.

STATEMENT OF SENATOR JAMES M. INHOFE

Senator INHOFE. Thank you, Mr. Chairman.

First of all, I am sitting in for Senator McCain until he arrives, and he has a statement I'd like to enter into the record at this point.

Chairman LEVIN. It will be made part of the record.

[The prepared statement of Senator McCain follows:]

PREPARED STATEMENT BY SENATOR JOHN MCCAIN

Thank you, Senator Levin.

I join you in welcoming our nominees. I thank them for their willingness to serve in the new administration, and I look forward to working with Secretary Gates and the new members of his leadership team on the numerous challenges facing the Department of Defense (DOD).

Mr. Lynn, Ms. Flournoy, Mr. Hale, and Mr. Johnson have each previously served in important positions in the Department. I appreciate their previous contributions, and I particularly want to acknowledge the support provided by their spouses and family members, several of whom are in attendance today, and thank them as well.

If confirmed for your new positions, you will be responsible for the achievement of vital national security objectives. I'd like to underscore some of these objectives.

IRAQ

We must continue our success in Iraq. Supporting our military leaders as they implement the U.S.-Iraq Status of Forces Agreement needs to be among our highest priorities—even as we turn our attention increasingly to the war in Afghanistan. Ensuring the final defeat of al Qaeda in Iraq, continuing to improve security for the Iraqi people in cooperation with the Iraqi Army and police, and supporting conditions that will guarantee the success of Iraq's fragile democracy are essential.

As we draw down forces in Iraq, we must not create opportunities for al Qaeda and sectarian extremists to re-emerge. I was pleased to read reports yesterday of Senator Biden's pledge that the incoming administration will not withdraw troops in a manner that will threaten Iraqi security.

AFGHANISTAN

Afghanistan poses a central challenge to the United States and our allies. I believe we need a comprehensive civil-military plan, backed by the troops and resources necessary to implement it, in order to prevail in Afghanistan. Our strategy and tactics must be reviewed and modified to respond to the growing threat posed by the Taliban. A holding action in that troubled nation has not succeeded and will not succeed. I believe our allies in NATO can be persuaded to increase their con-

tributions, and I intend to do all I can to achieve this goal. I look forward to hearing the witnesses' plans in this regard.

GUANTANAMO BAY

The President-elect has clearly stated his intent to direct the closure of the detention camp at Guantanamo Bay. I agree wholeheartedly with this decision, but recognize that carrying it out will raise difficult questions about the transfer of the detainees and the procedures that will be used to determine their status and culpability. I look forward to working with the administration as they address these issues, and I would invite the nominees to comment on the way forward.

ACQUISITION REFORM

I continue to believe that acquisition reform at DOD is critical. Especially in these turbulent economic times, America cannot afford the costly weapons procurement failures and mismanagement of the past. We must have personnel, procedures, and systems in place which ensure decisionmaking that is responsive to our national security imperatives in a fiscally responsible manner. While we have made some progress in reforming the system over the last few years, we need to do much more. To this end, I call for a comprehensive audit of the DOD budget aimed at identifying the unnecessary, wasteful programs and procurements that should be terminated or suspended immediately; changes to the Nunn-McCurdy law designed to reinforce the process by which cost estimates are independently assessed and to strengthen congressional oversight over chronically poor performing weapons programs; and the establishment and adequate resourcing of an Office of Independent Assessment to provide the Department and Congress independent assessments of cost, technological maturity, and performance.

EARMARKS

Fully consistent with acquisition reform, we must continue to demand complete elimination of earmarks, and transparency into congressionally-directed changes. I am pleased at the comments of the President-elect in this regard.

READINESS AND PERSONNEL

Continued support for the men and women of the Armed Forces and their families remains my highest priority. Every effort must be made to recognize and respond to the sacrifices of the families of our deployed servicemembers, and we must continue to find ways to help our heroic wounded warriors recover and move on to new challenges in service and in life. The Army and Marine Corps need more Active-Duty personnel, and, despite budgetary pressures, I expect the new administration to support this critical requirement.

I am also concerned about the ability of our combat units to be trained and ready for the next fight. Army leadership testified last year about the deteriorating condition of our current unit readiness, which has affected the strategic depth of our combat units to be able to respond to threats against U.S. national security interests in areas other than Iraq and Afghanistan. The Navy and Air Force also have expressed concerns about reduced current unit readiness rates due to aging and worn out equipment and systems. Congress has provided over \$25 billion in the past 3 years towards the reset of equipment and material for Active and Guard forces returning from deployments. Even with these resources, we still are faced with a serious strategic risk.

Again, I appreciate our nominees' service, and, Senator Levin, I thank you for your many courtesies over the years, and I look forward to working together with you and all the members of the committee as we begin the 111th Congress.

Senator INHOFE. Also, I've had a chance to get to know—not as well as I hope to later on—our new members, Kay Hagan and Mark Udall.

Mark, you have baggage. One of the things we always do when we have new members coming on the committee, you read about them, and I'm very pleased that you made the decision to get on this committee. All three of you are going to be great additions. I look forward to working with you.

I see my friend, Ike Skelton, here. I worked under his leadership for many years. We were on the House Armed Services Committee

and I'm glad you're here to lend your support as I am doing at this time.

Let me just make one comment, and that is that most of you—all of you, I guess—had experience back when things were really different, back in the 1990s. Sometimes I look back, somewhat wistfully, at the days of the Cold War. Things were predictable then. We had an enemy out there, we knew who the enemy was, we knew how the enemy thought.

Now everything is asymmetrical, we have threats that are totally different than the threats that existed in the 1990s. I know that you all have been keeping up with that.

I had a very good conversation between flights, a few days ago, with President-elect Obama. He called—I was actually in Memphis, between flights, and we had a chance to talk. I was complimentary of him on what he's done with the defense and other appointments and nominations, and the fact that Secretary Gates is going to be staying on. General Jim Jones, I just think that was a great idea to do that. Of course, Eric Shinseki—we've all served with him, and think so much of him.

You folks will be working with these people, and I'm looking forward to supporting you. I'm looking forward to working with you. As we get into the problems that are there, I think we'll have debate from time to time, disagreement, right up here around this table. But we all respect each other, we all want one ultimate goal, and that is to defend this country and everybody in it.

With that, I'll turn it back to you, Mr. Chairman.

Chairman LEVIN. Thank you so much, Senator Inhofe. We're delighted today to have with us colleagues to introduce our nominees. The first colleague who I'll call on is a member of the committee, and an incredibly valuable member of the committee and the Senate.

Senator Reed, do you want to make your introduction first? Then I think we'll call upon Representative Skelton, and then Senator Menendez in terms of your schedule, if that's all right. We'll call upon you third in terms of the order of the witnesses will be appearing. But also to accommodate Representative Skelton who I know has to get back to the House.

Senator Reed.

STATEMENT OF HON. JACK REED, U.S. SENATOR FROM THE STATE OF RHODE ISLAND

Senator REED. Thank you very much, Mr. Chairman. It's an honor to be here today. I'm particularly pleased with the appointments that the President-elect has made, beginning with Secretary Gates. The gentlemen and the lady that are here today, are representative of the superb quality, patriotism, and commitment that has been evidenced by all of the appointments, to date, at DOD.

I want to join Chairman Skelton in recognizing Michèle Flournoy. We've had an opportunity over many years to work together, she is superbly prepared for this job, and someone that I admire immensely.

But my great task, and indeed a great honor, is to introduce Bill Lynn. As you've indicated, Mr. Chairman, Bill has a superb career, embracing service here, on Senator Kennedy's staff, as a military

legislative assistant. Service in the Pentagon, in the Program Analysis and Evaluation Office, as the Director, and as Comptroller. I don't think anyone knows more about the intricacies of the budget and the institutional culture of the Pentagon than Bill Lynn. He certainly knows a bit about Congress.

He also is someone who, over the last several years, has been a significant participant with Raytheon Company, and their major operations with respect to supporting DOD. Bill combines the three pillars, I think, of someone who has to be successful in this job as Deputy Secretary—knowledge of Congress, intricate knowledge of the Pentagon, and knowledge of the contractors who support the operations at the Pentagon.

He is, besides being experienced, a man of great character and integrity. Bill graduated from Dartmouth College, with a law degree from Cornell Law School, and a Masters in Public Affairs from the Woodrow Wilson School. He is a superb choice.

Today, he is joined by his wife, Mary Murphy. Their young daughter, Catherine, is at home—supposedly watching on TV. I—from practical experience—suggest it's probably not C-SPAN, it's Sprout. But, nevertheless, they have shouldered the challenge, not only of service to the Nation, but parenthood, and I commend them for both.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you so much, Senator Reed.

We will make part of the record a statement of Senator Kennedy, welcoming Bill Lynn here. We will put that statement in the record in the same place, right next to the introduction by Senator Reed.

[The prepared statement of Senator Kennedy follows:]

PREPARED STATEMENT BY SENATOR EDWARD M. KENNEDY

It's an honor to join in welcoming Bill back to the Senate Armed Services Committee, and I look forward to his confirmation. The Department of Defense and the Nation will benefit from Bill's extraordinary level of experience, expertise, and integrity on matters of vital importance to our Armed Forces and our national security at this critical time in our history. The brave men and women of our Nation's armed services and their families will have a devoted servant and outstanding advocate in Bill.

I've known Bill for many years. He did an outstanding job as my legislative assistant on committee issues from 1987 to 1993. Since then, he has excelled in a number of challenging and demanding positions in both the public and private sectors and his knowledge, background and command of Defense Department policy, procedure, and budget are broad and deep.

From 1993 to 1997, Bill served as Director of Programs Analysis and Evaluation in the Office of the Secretary of Defense, steering and overseeing all aspects of the Department's strategic planning process and going on to become Comptroller of the Department in charge of the budget and fiscal planning. He then furthered his experience with comprehensive departmental budget and fiscal planning and assumed the position of Under Secretary of Defense (Comptroller).

In the private sector, Bill's leadership has contributed to the continued strength of America's vital defense and homeland security capabilities during an unprecedented period of challenge and crisis.

This compelling array of defense skills across government, industry, and the national security community and commitment, will greatly benefit the Obama administration, and I strongly support his nomination.

Chairman LEVIN. Ike Skelton, our dear friend, chairman of the House Armed Services Committee, it's one of the great pleasures of being chairman of this committee, is the opportunity to work with my counterpart over at the House.

Ike, welcome.

**STATEMENT OF HON. IKE SKELTON, U.S. REPRESENTATIVE
FROM THE STATE OF MISSOURI**

Representative SKELTON. Thank you very much, Mr. Chairman, Senator Inhofe. It's good to be with you today, and it's a thrill to be here, especially to see my friend and colleague from Missouri, Claire McCaskill, who's distinguished herself so well back home, as well as here.

It's also interesting to note, Mr. Chairman, that there are four members from the House on the committee, if I'm correct, three former members of our committee—the House Armed Services Committee—and I know that speaks very well for their continued service for the national security.

Mr. Chairman, I couldn't be more delighted today than I am in support of the nomination of Michèle Flournoy to be the Under Secretary of Defense for Policy. She and I have spent many hours together. I could talk long about her professional qualifications and excellent personal qualities. But, in deference to your preference for brevity, I will not do so.

I've gotten in the habit, Mr. Chairman, of asking each of the Service Chiefs from time to time, whether their war colleges are producing graduates who are capable of engaging in high-level discussion of strategy with someone at the level of George C. Marshall. In truth, the question is a little bit unfair, because very few of its civilians are capable of such a discussion ourselves. We're entrusted as much—or really more so—with decisions about overall strategy.

However, the Senate has the opportunity to confirm just such an individual as Michèle Flournoy. She is nominated for exactly the job within DOD for which her remarkable skills are uniquely suited.

Michèle developed a sterling reputation during her highly decorated service in the Department during the 1990s, she served as both Deputy Assistant Secretary of Defense for Strategy, as well as the Principal Deputy Assistant Secretary of Defense for Strategy and Threat Reduction.

Among many other accomplishments, Michèle was a leading figure in the development and performance of the first two QDRs in 1997 and 2001. Her hallmark in these efforts was an insistence on rigorous analysis and reliance on hard data and modeling at a time when the use of these tools on issues of planning and strategy were poorly understood.

She continued her public service in recent years by serving on the Defense Policy Board and the Defense Science Board Task Force for Transformation. She also served as Professor at the National Defense University, where she led its QDR Working Group in 2001.

Not least among her contributions during this time was her work in educating Members of Congress—including me—and I know, also, Senator Reed, in the deep nuances of military readiness, and the best way to restore it.

In 2007, Michèle cofounded the Center for a New American Security, to provide analysis and advocacy for a strong, pragmatic, na-

tional security strategy for our country. This group has quickly become known as that rare animal—a think-tank focused on developing pragmatic solutions to difficult national security problems.

Her leadership on their Project Solarium which took the name from President Eisenhower's attempt to put together a strategy—is examining new approaches to our national security strategy has been extremely important. I know that I need not remind anyone on this committee about the pressing need we face for a pressing and balanced review of our global strategy, as well as those in Afghanistan and in Iraq.

The President-elect has chosen exactly the right person to assist him, as well as Secretary Gates, in this effort in ensuring that this Nation is focused on the challenges around the corner that we don't yet have a clear view of.

Finally, I would say that Michèle understands the significant personnel and readiness issues facing our military. She understands that the senior leaders at the Pentagon have to be more than just policy wonks, but also responsible stewards, serving the needs of the military families as well as the taxpayers of our country.

She's married to Scott Gould, a 26-year veteran of the United States Navy, thereby a military spouse herself, of many years' standing. Her ability to put policy decisions in this context will serve her, the Secretary, and our Nation, well.

Michèle's qualifications are exemplary. Her judgment, her knowledge, her character all are first-rate. Confirming her will bring credit to this committee, as well as to DOD, and Mr. Chairman, to our Nation.

I urge you to confirm as expeditiously as possible, this lady for this very high-level position. Thank you so much.

Chairman LEVIN. Thank you, Representative Skelton. We very much appreciate your coming by this morning, as I know Ms. Flournoy does.

Now, another good friend of ours, a good friend of the men and women in the military, Senator Menendez.

**STATEMENT OF HON. ROBERT MENENDEZ, U.S. SENATOR
FROM THE STATE OF NEW JERSEY**

Senator MENENDEZ. Thank you. Thank you, Mr. Chairman—to you and all of the distinguished members of the committee. I'm honored to appear before you today to introduce Jeh Johnson on his nomination hearing to serve as the next General Counsel of DOD. I am confident that the committee—and the full Senate—will conclude that he is exceptionally well-qualified to serve in this important position with great distinction.

Jeh Johnson's distinguished legal career has included both public service as well as private practice; his private practice with a prominent New York-based law firm of Paul, Weiss, Rifkind, Wharton & Garrison, he is a graduate of Morehouse College and Columbia University Law School.

In 1989 and 1991, he was a Federal prosecutor in the Southern District of New York, where he was responsible for investigating and prosecuting cases involving public corruption. He then resumed a successful private practice in the litigation department of

Paul, Weiss, which included being elected a fellow in the prestigious American College of Trial Lawyers.

But he is not a stranger to the Defense Department. In 1998, he left private practice at Paul, Weiss to take the position of General Counsel at the Department of the Air Force. He served as Air Force General Counsel for over 2 years, and during that time, gained a solid understanding of the unique challenges and demands of being one of the top attorneys within our largest government agency. He is, without a doubt, ready now to serve as the senior legal authority at the Defense Department.

The lawyers at DOD will have to deal with some very complex and difficult issues in the months ahead. No doubt, there are other equally difficult issues than those that we see now, and those will lie over the horizon.

In remarks that he made to a conference of Air Force Judge Advocates General in 2007, Jeh Johnson said that, "In the absence of a Constitutional amendment, an act of Congress, or some new interpretation of the constitution of the laws by the courts, the rule of law does not change. It remains consistent throughout changing times." As legal advisor in DOD, your challenge is to provide consistent advice and guidance to policymakers and commanders about what the rule of law means.

I am confident that Jeh Johnson will provide just such advice and guidance to policymakers and commanders, as General Counsel to DOD, for them to be able to—not only pursue the rule of law—but meet their challenge in defending and protecting our Nation. He will do so with intellect and integrity that have been the hallmarks of his life, and I'm pleased to present such a distinguished individual from the State of New Jersey to this committee.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you so much, Senator Menendez.

Let me now call on our witnesses for their opening statements, and when I call on you, perhaps you would introduce those who accompany you here today.

First, Bill Lynn. Let me call on you for any opening statement you might wish to give us, and introduce your family.

STATEMENT OF WILLIAM J. LYNN III, NOMINEE TO BE DEPUTY SECRETARY OF DEFENSE

Mr. LYNN. Thank you very much, Mr. Chairman.

Chairman Levin, Senator Inhofe, and members of the committee, it's a privilege to appear before this committee. I'm particularly honored to return to the committee where I—as the chairman noted—spent so many years.

I'm also honored that President-elect Obama has nominated me for the position of Deputy Secretary of Defense. I appreciate the confidence that he and Secretary Gates have placed in me, and if confirmed, I look forward to the opportunity to serve again with the dedicated men and women of our Armed Forces, particularly those serving in combat operations, including more than 140,000 in Iraq, and more than 30,000 in Afghanistan.

Mr. Chairman, I'm particularly grateful to you, and to Senator McCain, for your exceptional efforts to act on our nominations so expeditiously. This is our first war-time transition in many years,

and reducing any gaps in civilian leadership at the Pentagon is critical.

I also want to thank Senator Reed for the kind introduction. The Senator's leadership on issues of national security is inspiring. I look forward to working with Senator Reed and all of the members of the committee on the great challenges facing us.

Let me express my gratitude to Senator Kennedy who—as the chairman noted—is unable to attend this hearing. Senator Kennedy has been a superb boss, a great mentor, and a loyal friend. His leadership and courage are unsurpassed, and I—with the chairman—look forward to seeing him, again, back here very soon.

Finally, I want to thank my wife, Mary, who's here in the audience, and my daughter, Catherine, who Senator Reed noted is not here, to avoid disruption for the committee. They're embarking on this journey with me. They don't know where it will take us, precisely, but they do know—as the chairman noted—there will be numerous sacrifices, and I greatly appreciate their support.

This committee is noted for its bipartisan commitment to national security, and for its attention to the needs of our men and women in uniform, particularly at a time we're engaged in two wars. I appreciate the decades of experience on defense matters that are resident on this committee, and I commit to continuing in supporting Secretary Gates' effort to engage Congress, and this committee in particular, in constructive and candid discussions.

I approach this confirmation hearing, and if confirmed, this position, with humility. Serving as the chief management officer of an organization as large and diverse as DOD is a task that no one is truly qualified to perform. If the Senate confirms me in this position, I have two co-equal responsibilities. On one hand, I'll work alongside the Secretary to advance our national security strategy. On the other hand, as the chief management officer, I will have primary responsibility for ensuring the smooth functioning of a vast, and sometimes unwieldy, bureaucracy.

There are serious challenges facing the Department today, and the next Deputy Secretary will have the responsibility to assist the Secretary in a myriad of critical tasks.

If confirmed for this important position, I would focus on three initial challenges. First, during a transition in a time of war, it is essential that the Department execute a smooth transition of leadership as quickly as possible. To that end, I would work with the Secretary and Congress to assemble a top-quality cadre of civilian leaders. As part of that effort, I would also place a high priority on strengthening the capabilities of the career staff who are essential to address the many near-term challenges, as well as the longer-term tasks of the Department.

A second challenge will be to conduct at least three sets of major program and budget reviews in the first few months of the new administration. These include a review of the 2009 supplemental appropriation, revisions to the draft fiscal year 2010 budget, and its timely submission to Congress, and finally, the expeditious completion of the QDR.

In the QDR, a key task will be to lay the foundation for an effective force for the 21st century that establishes the right balance among capabilities for addressing irregular and counterinsurgent

warfare, potential longer-term threats from a high-end, or a near-term competitor, and the proliferation of threats from rogue states, or terrorist organizations.

A third challenge will be to pursue an active reform agenda for the management of the Department as a whole. If confirmed, I would devote considerable time and energy to improving the Department's processes for strategic planning, program and budget development, and acquisition oversight.

At a time when we face a wide range of national security challenges and unprecedented budget pressures, acquisition reform is not an option, it is an imperative. It is time to improve all aspects of the Department's acquisition and budget processes, so that every dollar we spend at the Pentagon is used wisely and effectively to enhance our national security.

Mr. Chairman, members of the committee, thank you again for the honor of appearing before your committee, and for your efforts to schedule such a prompt hearing. I look forward to answering your questions, and if you see fit to confirm me for this position, I stand ready to serve to the best of my ability.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you so much. Our next nominee is Robert Hale, nominated to be Under Secretary of Defense and Chief Financial Officer.

Mr. Hale.

STATEMENT OF ROBERT F. HALE, NOMINEE TO BE UNDER SECRETARY OF DEFENSE (COMPTROLLER) AND CHIEF FINANCIAL OFFICER

Mr. HALE. Thank you Chairman Levin, Senator Inhofe, and all of the members of the committee. I want to thank the committee for having this hearing, and again, express my appreciation—joining Mr. Lynn—in thanking you for the expedited nature of it.

I'm very grateful to the confidence President-elect Obama has placed in me by indicating his intent to nominate me for this position, and then also the support of Secretary Gates. If confirmed, I'll be honored to serve as the Under Secretary of Defense (Comptroller), and the Chief Financial Officer of the Department of Defense.

I especially want to thank my family, as you said, Mr. Chairman. This is a journey that will take a considerable amount of their time, as well, or take me away from them. Particularly Susan Hale, my wife of 35 years, who's right back here.

I thank Sue in advance for putting up with all of the long hours that I know are coming. I have two grown sons, Scott and Michael, who live and work in California, and unfortunately were not able to be here at the hearing, but I certainly want to acknowledge them, they are very much important parts of my life.

Mr. Chairman, the responsibilities of the DOD Comptroller are many and varied. I served for 7 years as the Assistant Secretary of the Air Force for Financial Management and Comptroller, 12 years before that—as the chairman mentioned—as head of the National Security Division at CBO. I am well-aware of the challenges that the DOD Comptroller faces.

I also had the honor early in my career of spending a couple of years as an Active-Duty officer in the United States Navy, several more years in the drilling Reserve, so I have a sense, I think, of the culture of the brave men and women who serve in uniform.

With that as background, and if confirmed, my top priority will be to help DOD obtain the necessary resources, so that the men and women of the Department can meet our national security objectives.

As Mr. Lynn indicated, an early high priority will be an expedited review of the second portion of the fiscal year 2009 supplemental, and an expedited review of the fiscal year 2010 budget request.

I understand the importance of working with this committee, as with the appropriating committees in all of Congress, as we seek to accomplish these critical goals. At a time when we have tens of thousands of Americans serving overseas and in harm's way, we all need to work together to be sure they have the resources that they need.

The committee and Congress have also charged the DOD comptroller with the authority and responsibility for overseeing defense financial management, financial operations in the Department. We need to make continued improvements in how we pay our people, how we pay our vendors. We need to improve financial systems, and approve the way we account for funds in the Department. These latter two items are fundamental to the goal of continued progress toward auditable financial statements. This, overall, will be another high priority for me.

The Department also needs better financial information in order to spend the dollars that are appropriated to it efficiently and effectively, and I think wise spending of defense dollars is always important, but it's especially important right now, as the Nation weathers this really serious economic crisis.

I'm well aware of the daunting and longstanding challenges associated with improving financial operations and financial management in the Department, but if confirmed, I will certainly pledge my best efforts with this committee and many others, to accomplish these goals.

Another priority, Mr. Chairman, the Department must have a capable and well-trained workforce in order to accomplish defense financial management. We have the best systems in the world, we can have the best accounting practices, if we don't have the people out there that are well-trained, and in adequate numbers, it's not going to work.

I'm familiar with this workforce through my current job as the Executive Director of the American Society of Military Comptrollers, a nonprofit professional association. If confirmed, I plan to spend some time supporting DOD, the military departments, and the agencies as they seek to recruit, train, and retain the right defense financial management workforce so that we can do this job well into the 21st century.

In closing, Mr. Chairman, I'd again like to thank President-elect Obama and Secretary Gates for selecting me as the nominee for this position. If the Senate confirms me as the Under Secretary of

Defense (Comptroller), I will make every effort to live up to the confidence that you will have placed in me.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you so much, Mr. Hale.

We notice now another of our new Senators, Senator Udall, has joined us. We're delighted to have you as a Member of the Senate, and a member of this committee, welcome.

Senator UDALL. Thank you.

Chairman LEVIN. Our next nominee is Michèle Flournoy, to be Under Secretary of Defense for Policy.

Ms. Flournoy, welcome.

STATEMENT OF MICHÈLE FLOURNOY, NOMINEE TO BE UNDER SECRETARY OF DEFENSE FOR POLICY

Ms. FLOURNOY. Thank you, Mr. Chairman and Senator Inhofe, members of the committee, it is truly an honor to appear before you today as President-elect Obama's nominee for the Under Secretary of Defense for Policy. Serving our Nation in this capacity would be a great privilege, and I'm grateful both to President-elect Obama, and to Secretary Gates, for choosing me for this position.

I'm also very grateful to Representative Skelton for that kind introduction, and for being such a wonderful colleague and mentor to me over the years. I was very honored by his presence here today.

I also, particularly, want to thank my family for being here, my husband and partner in all things, Scott Gould, and my children, Alec, Victoria, and Aidan—they are my foundation and my joy, and I could not even contemplate public service without their steadfast love and support.

If confirmed, I look forward to working closely with this committee in shaping our Nation's defense policy. Over the years, the Senate Armed Services Committee has shown a strong, consistent—and as you said, Mr. Chairman—a bipartisan commitment to advancing our Nation's security, and to caring for the men and women in uniform. I appreciate Congress' critical role under our Constitution in providing for the common defense, and I also appreciate this committee's willingness to expedite the confirmation process, when more than 200,000 soldiers, sailors, airmen, and marines are deployed in harm's way, supporting operations in Iraq, Afghanistan, and elsewhere.

At this time of war we owe them—and we owe the American people—the smoothest transition possible between administrations.

At this moment in our history, the United States—as you all know—faces a daunting number of national security challenges, but also some very hopeful opportunities. We can, and we must, restore our Nation's global standing, and protect America, our interests, and our allies from attack.

We can, and must, craft whole of government, integrated strategies to deal more effectively to defeat threats like violent extremism, and the proliferation of weapons of mass destruction (WMD).

We can, and must, rebalance our efforts in Iraq and Afghanistan, and ultimately achieve successful outcomes in both.

We can, and must, work to reduce the strains on our forces, the brave men and women in uniform, and their families who have

rendered such extraordinary service—and tireless service—to this Nation.

We can, and must, restore the economic power that underwrites our military strength, and prepare for a very complex and uncertain future. This is a critical time for our country, the stakes are high, the resources are tight, and the need to make hard choices is pressing.

If I am confirmed by this committee, and by the Senate, as Under Secretary of Defense for Policy, I promise you that I will work diligently to help the President-elect and Secretary Gates responsibly conclude the war in Iraq, and continue the fight against al Qaeda and its associated movement. I will work closely with inter-agency partners, and international partners, to support the stabilization of Afghanistan.

Working with our colleagues at the State Department, I will engage with our allies and our partners, to advance common security interests, and help build their capacity to move forward. I will do my best to help the U.S. military adapt to the challenges of the 21st century. I will also do my best to ensure that our brave men and women in uniform have what they need to be successful in the field, and that they have the peace of mind, knowing that their families are receiving the support that they deserve.

Over the course of my career, I have been truly blessed, with remarkable opportunities to contribute to U.S. national security and defense policy, in government, and in the think-tank world.

If confirmed, I assure you that I will work very hard to ensure that DOD implements the President-elect's national security strategy in a way that is both principled and pragmatic. I pledge to listen to the best available civilian and military advice, and to offer my own best advice and counsel to the Secretary of Defense and the President-elect.

In closing, I just, again, want to thank President-elect Obama for nominating me for this position, Secretary Gates for supporting my nomination, and my family and my friends for their love and support. I am both honored and humbled to be before you today, and if the Senate chooses to confirm me in this position, I hope to fully justify your trust, and I look forward to working closely with all of you and your staff, going forward.

Thank you.

Chairman LEVIN. Thank you so much, Ms. Flournoy.

Now we have the nominee to be General Counsel of the Department of Defense, Jeh Charles Johnson.

Mr. Johnson.

**STATEMENT OF JEH CHARLES JOHNSON, NOMINEE TO BE
GENERAL COUNSEL, DEPARTMENT OF DEFENSE**

Mr. JOHNSON. Thank you, Mr. Chairman, Senator Inhofe.

I want to thank the members of the committee and the staff for expediting the review of our nominations. I want to obviously acknowledge and thank the President-elect for designating me to be the nominee for General Counsel of DOD, and for the support of Secretary Gates. I've gotten to know him a little bit over the last several weeks, and I am as impressed as everyone else seems to be with Secretary Gates and his leadership of the Department.

Obviously, I want to thank my family. My wife, Susan, is here behind me—my wife of 15 years—my sister and brother-in-law from Alabama are here, my two children could not be here today. My son's obligations to his World Civ class overrode his desire to appear before this committee. [Laughter.]

I also want to note some friends of mine from the Air Force from when I was General Counsel of the Air Force. Retired Major General Bill Morman, former Judge Advocate General of the Air Force, is here today. I also want to note the presence of Judge Stucky from the Court of Appeals for the Armed Forces, former counsel to this committee.

I appeared here for confirmation 10 years ago, in front of Chairman Strom Thurmond. I first worked for the United States Senate in 1978 as an intern for Pat Moynihan, and so my respect for the United States Senate is enormous. If confirmed, I look forward to working with the Senate, with this committee, and I look forward to supporting the men and women in uniform who sacrifice so much.

Thank you.

Chairman LEVIN. Thank you so much, Mr. Johnson.

Now there are some standard questions which we ask of all of our nominees. I'll ask you all to answer together on these questions.

Have you adhered to applicable laws and regulations governing conflicts of interest? [All four witnesses answered in the affirmative.]

Have you assumed any duties, or undertaken any actions which would appear to presume the outcome of the confirmation process? [All four witnesses answered in the negative.]

Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record in hearings? [All four witnesses answered in the affirmative.]

Will you cooperate in providing witnesses, and brief written response to congressional requests? [All four witnesses answered in the affirmative.]

Will those witnesses be protected from reprisal for their testimony or briefings? [All four witnesses answered in the affirmative.]

Do you agree, if confirmed, to appear and testify, upon request, before this committee? [All four witnesses answered in the affirmative.]

Do you agree to provide documents, including copies of electronic forms and communication, in a timely manner, when requested by a duly-constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents? [All four witnesses answered in the affirmative.]

Thank you. I think we'll try an 8-minute first round. We have four witnesses, so there will likely be a second round, but in order to give everybody an opportunity to ask questions, we'll start with an 8-minute first round.

Mr. Lynn, you've made reference to the cost growth and other problems on DOD's major acquisition programs, and those problems have reached crisis proportions. Last spring, as I mentioned, GAO reported that the cost overruns on the Department's 95 larg-

est system acquisition programs now total roughly \$300 billion over original program estimates, even though we have cut unit quantities and reduced performance expectations on many programs, in an effort to hold down costs.

In response to a pre-hearing question, you note that some of this cost growth is a result of “a reluctance” to balance performance demands, particularly in the early stages of programs, when decisions have a major impact on subsequent cost and schedule outcomes. The Department recently instituted an organization, which is called the “tri-chair” committee, bringing together senior officials that are responsible for acquisition, budget, and requirements, in an effort to better balance cost, schedule, and performance early in the acquisition cycle.

My question to you is, if confirmed, do you anticipate continuing that process, or a similar process, to ensure the tradeoffs between cost, schedule, and performance of a major weapons system are fully considered, before it’s too late?

Mr. LYNN. Mr. Chairman, I certainly agree with the thrust of your comments, that the key to getting a handle on programs costs is to ensure that we are able to establish the requirements upfront, and adhere to those requirements, unless there is some overriding need, but not to regularly change those. It’s critical to do that upfront.

I’m aware of the tri-chair process, I haven’t had time to study it, but I think the direction that goes—the setting of requirements—is done at the highest level, and that any changes later in the program be also approved at the highest levels, is the right principle.

Chairman LEVIN. A year ago, Mr. Lynn, we established an Acquisition Workforce Development Fund, to ensure that the Department will have the workforce that it needs to ensure that the billions we spend on acquisition programs every year get the planning, management, and oversight they need.

Over the last 8 years, the Department’s spending on acquisition programs has more than doubled, but the acquisition workforce has remained essentially unchanged in numbers and in skills. If confirmed, will you ensure that the Acquisition Workforce Development Fund is fully implemented, and used for the intended purpose of rebuilding the acquisition workforce?

Mr. LYNN. I agree with the Chairman that rebuilding the acquisition workforce is a critical tenant in improving our overall acquisition process. As you’ve noted, Mr. Chairman, we’ve had an increase in the program costs and not a corresponding increase in the acquisition workforce.

I’d add to that, there’s also a bubble of retirement. Many of the current workforce is eligible for retirement, they’re going to need to be replaced with expert personnel, and I think the mechanism that the committee has put in place for the Acquisition Workforce Development Fund is going to be an important part of improving and developing the future cadres of our acquisition workforce.

Chairman LEVIN. Mr. Hale, will you agree to keep that mechanism in place, or a similar mechanism?

Mr. HALE. Mr. Chairman, we will definitely work with the committee to make sure that we support from the Comptroller’s shop,

the Acquisition Fund, and more generally, the improvement in acquisition planning.

Chairman LEVIN. Thank you.

Mr. Lynn, Ms. Flournoy, and Mr. Johnson, this question is for all three of you. I've spoken to each of you about my concerns regarding the use of contractors in Iraq and Afghanistan, to perform functions that have historically been performed by government personnel.

I think you're aware of recently enacted legislation with regard to private security contractors, and contract interrogators. Now, I have a few short questions for each of you. Would you agree that the Department needs to undertake a comprehensive review of whether, and to what extent, it is appropriate for contractors to perform functions like performing private security in high-threat environments, and interrogation of detainees, and that the congressional views expressed in two sections of the National Defense Authorization Act for Fiscal Year 2009 should be fully considered in the course of that review?

First, would you agree with the need to undertake that review, Mr. Lynn?

Mr. LYNN. I do agree, Mr. Chairman, that we do need a baseline to understand what the appropriate roles are for the military, for civilian personnel, and for contractors, and we ought to base our judgments on the size of each of those forces on those judgments.

Chairman LEVIN. Will you undertake that review?

Mr. LYNN. I will certainly work on that review. My understanding is Secretary Gates has asked Admiral Mullin to begin, at least, a piece of that, and we'll be working—together with Admiral Mullin, under the direction of Secretary Gates—on that matter.

Chairman LEVIN. Okay.

Ms. Flournoy, do you agree with the need for that review?

Ms. FLOURNOY. I do, sir. Yes.

Chairman LEVIN. Okay, thank you.

Mr. Johnson.

Mr. JOHNSON. Yes, Senator, I do. I know from our conversations with Secretary Gates that he is concerned about increased accountability of private contractors in the field.

Chairman LEVIN. Now, for each of you, would you agree that long-term policy decisions about the roles that may or may not be performed by contractors should guide our future force structure, rather than being driven by limitations on our existing forces?

Mr. Lynn?

Mr. LYNN. That was the thrust of my earlier comment, Mr. Chairman.

Chairman LEVIN. Ms. Flournoy.

Ms. FLOURNOY. Yes, sir, I agree with that.

Chairman LEVIN. Mr. Johnson.

Mr. JOHNSON. Yes, sir.

Chairman LEVIN. Would each of you agree that while policy decisions on these issues should be informed by the views of our uniformed military, that they must ultimately be made by Congress, the President, and the civilian leadership of DOD?

Mr. Lynn.

Mr. LYNN. I agree with that.

Chairman LEVIN. Ms. Flourney.

Ms. FLOURNOY. I do, as well, sir.

Chairman LEVIN. Mr. Johnson.

Mr. JOHNSON. Yes.

Chairman LEVIN. This is for you, Ms. Flourney.

President-elect Obama has called for additional combat troops for Afghanistan. The Defense Department has plans for sending up to four combat brigades and support units, or 30,000 additional U.S. soldiers to Afghanistan, potentially doubling the nearly 32,000 soldiers currently serving there.

Secretary Gates has said that most of these combat brigades will not be available for deployment to Afghanistan until late spring or early summer, in part due to continuing deployments in Iraq. It's now been reported that the Department is saying that the additional troops for Afghanistan will not be fully deployed by the end of the summer. Do you support a proposal, first of all, to nearly double the U.S. troop presence in Afghanistan?

Ms. FLOURNOY. Senator, I do believe that we need to substantially plus-up the size of our forces in Afghanistan to secure and stabilize the environment there, yes.

Chairman LEVIN. How aggressive should we be in our efforts to get the additional U.S. combat troops to Afghanistan faster?

Ms. FLOURNOY. I actually think the intent of both President-elect Obama and Secretary Gates is to move as quickly as possible. I have not yet been briefed on the details in terms of what would be required to do that, but I do believe that in principle, we should be moving as quickly as possible.

Chairman LEVIN. What would you think about drawing down U.S. forces in Iraq faster, in order to accelerate the deployment of additional forces in Afghanistan?

Ms. FLOURNOY. Again, Senator, I think the key principle is to shift the emphasis, but to do so in a very responsible manner. I, again, have not been briefed on the details of what's possible there, but I do look forward to looking into that, and getting back to discussing that with this committee.

Chairman LEVIN. Okay, thank you.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

First of all, as we were having opening remarks, I wrote down a couple of things that were said.

Mr. Hale, having the necessary resources—I was glad to hear that because—and I think Ms. Flourney, you said essentially the same thing—restore economic power to the military. I think that's a recognition that there's no cheap way out of this thing. I know a lot of people used to talk about a percentage of gross domestic product that should go toward military, but it won't serve any useful purpose to talk about that.

I think there are some areas where we just have to recognize that we are faced—as I said in my opening statement—with, in my opinion, greater threats than we have been in the past, because of the asymmetrical nature of the enemy.

Each of us up here on this committee has programs that we have watched work in the field. Rather than just to hear testimony from various committees here in Washington, see how they work on the

ground. I have some that I think work very well, and I would like to ask Mr. Lynn and Ms. Flournoy your opinions of these.

First of all, the International Military Education and Training (IMET) program is an education program, I'm sure you're familiar with that. Ironically, back in the beginning of that program, we were doing the IMET program as if we were doing a favor to them—I'm talking about other countries—who would be sending their officer material to be trained in the United States.

The more I served—was in the field, and observed this program—the more I felt that this was something that really, we're doing for ourselves. There's no better relationship than one that comes from training. I've seen some of the officers go back to their countries—whether it's in Africa or elsewhere—and they have an allegiance that is there.

Second, if we don't do it, either China is going to do it, or somebody else is going to do it. That's one of the programs that I have strong feelings about.

Next are the train-and-equip programs—the section 1206, 1207, and 1208 programs. It's been my opinion, as we go around, that by doing this, we can avoid having our own troops have to do a lot of the things that they otherwise can be trained to do for us.

The third one is the Commander's Emergency Response Program (CERP). I think they've changed the name of that, they always do that to confuse us, I think. But nonetheless, this allows the commanders in the field to have a greater latitude of what they can do. Some of the experiences that I had, early on, in Baghdad when it appeared that if the commander were in a position to take care of some of the transmitting problems, of electricity into some of the neighborhoods—they could do it, and do it cheaper—a lot cheaper—than going through the lengthy process of acquisition to get these things done.

These are three of the programs that I feel personally very strongly about, and I'd like to know if you have any comments about your feelings toward IMET, train-and-equip, and CERPs.

Mr. LYNN. Let me respond, first, Senator Inhofe, and then turn to Ms. Flournoy.

I agree with you, Senator, overall, the military exchanges, the military training programs, should be seen in the light of a benefit to the United States, not as a favor to someone else. They develop relationships that we build on over decades, they provide an understanding for us of other country's militaries and how they operate, and equally importantly, they provide these other countries senior leadership when these individuals rise to the senior leaders, as many of them do. It provides them with an understanding of how we operate, and the strengths of this Nation.

Just one comment on CERP. I agree it's a very important program, Senator. I think we have to be conscious that we have to balance the importance of knowledge at the front end that those commanders on the ground understand, I think, best the needs that are right in front of them.

On the other hand, we have to have appropriate controls of taxpayer dollars. We have to ensure that we have a process that both gives the flexibility that's needed on the ground and assurance that the money is spent in an appropriate manner.

Ms. FLOURNOY. Senator, thank you for that.

I believe that all three of the programs—well, the two programs that you mentioned, IMET and the train-and-equip authorities—are very critical to our engagement with other militaries, and to building partner capacity—helping them to be able to do more alongside us, where we have common interests.

On CERP, in particular, I think the intention of that program was originally for force protection and also to assist affected populations in counterinsurgency and stability operations, and so forth. I think it's a very critical tool for our military in the field. I would also say that all of these, really, are most effective when they're part of an integrated, sort of whole of government approach to a particular country, or to a particular region. So, I would hope that we would view and use them in the future in that context.

Senator INHOFE. I think I would agree with your response to this. I would only ask that you get into this, look at some of the examples where, Mr. Lynn, we've actually saved a lot of money, on the example that I used on the transmission situation. It was about 10 percent of what it would have cost, having to go through the whole thing.

Second, another program that I have been very interested in. The African continent is so important. When we had that divided up into three commands, it wasn't working very well. Of course, we had the Pacific Command, the European Command, and the Central Command. They're doing a great job with that program right now. But it is really suffering in terms of getting the resources necessary for it.

It is my hope when we established the Africa Command (AFRICOM), that we would actually have the headquarters in Africa someplace, thinking, perhaps in Ethiopia or some of the other places where it would have worked better.

Unfortunately, even though it's my experience talking to the presidents, and I'm talking about including Yoweri Museveni (President of Uganda), Meles Zenawi (Prime Minister of Ethiopia), Paul Kagame (President of Rwanda), and all of the rest of them, that they think it would work better, but they can't sell the idea.

It's going to require, I think, more resources for AFRICOM than they have had before, and I'd just like to ask Mr. Lynn and Mr. Hale if you would be willing to get into that, and to see how well it's working, and perhaps they have transportation needs, and other needs to make that program work better.

Mr. LYNN. Thank you, Senator. We certainly will look at AFRICOM. I certainly agree that it's a far better situation to have a unified command, have responsibility for the continent, rather than divide it up under three different commands. This is an important initiative. We need, certainly, to look at the resources, and I'd undertake to do that.

Senator INHOFE. Yes, sir?

Mr. HALE. We'll certainly support him from the Comptroller's standpoint.

Senator INHOFE. All right. Finally, my time is about to expire, we have had discussions in this committee, and we've had a lot of discussions—some pretty lively—on the floor, about the Future Combat System (FCS). My goal has always been that we give our kids

that are out there the best resources that are available and all of these resources that are better than our prospective opponents.

Things like the non-line of sight cannon. It happened that we're still relying on the old Paladin, which is World War II technology. There are five countries, including South Africa, that have a better artillery piece than we do.

I would hope that you would look very carefully on all of the elements—some 12 to 15 elements of a FCS—that you could bring me into your discussion, your thinking process. Because some of us have a greater interest than others do in those programs. Any thoughts on the FCS that you'd like to share? Any of you?

Mr. LYNN. Senator, I think the fundamental premise that you stated is absolutely right, that the elements that are in the FCS are going to be essential to the modernization of the Army towards the next generation of equipment. We will want to do, I think, a complete review of that program, and the underlying technologies need to be part of the future force, and we'll certainly work with you and with the other Members of Congress, as we undertake that review.

Senator INHOFE. I appreciate it very much. My time is expired.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Inhofe.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman. I thank you for allowing me to make just a few comments. I was over at the Senate Homeland Security and Governmental Affairs Committee introducing Governor Janet Napolitano to the committee. She's been nominated for Secretary of Homeland Security.

I would like to congratulate the nominees. We look forward to a rapid confirmation.

Mr. Lynn and Ms. Flournoy, we've had other encounters in the past, and welcome Mr. Hale and Mr. Johnson. We look forward to your rapid confirmation and movement to the floor of the Senate, so you can get to work.

I'd also like to say welcome to the new members of the committee, and we look forward to working with them.

Mr. Chairman, I've forgotten how many years now this makes that you and I have worked together, I look forward to a very productive year—or two—in very challenging times. Thank you for all of the cooperation that you have displayed, which is a long tradition of this committee of bipartisanship. I look forward to working with you.

Gentleman, and Ms. Flournoy, we have very great challenges over in DOD. Some very tough decisions are going to have to be made, whether it be the F-22, or whether it be the larger issue of our engagement—disengagement—in Iraq, or further engagement in Afghanistan, as well as all of the myriad of other challenges that we face.

I look forward to working with you. I congratulate you and your families, and I appreciate your willingness to serve.

I thank you, Mr. Chairman.

Chairman LEVIN. Thank you so much, Senator McCain. You and your staff, as always, are playing an instrumental role in the suc-

cess of this committee, and we are grateful for that, and all that you do.

It's the rule of the committee, here, the tradition that we call on members, we go back and forth between Democrats and Republicans, but for the new members, we do that on the basis of an "early bird" rule.

Senator Reed has just arrived in time to ace out Senator Webb. [Laughter.]

He didn't want any questions. I already had asked Senator McCain. Thank you so much.

Senator Reed.

Senator REED. This is the first and last time I'll ace out Senator Webb. Forgive me.

Senator WEBB. I doubt that. [Laughter.]

Senator REED. Again, I think the President-elect has chosen a superb team.

Let me address a general question to both Mr. Lynn and Ms. Flournoy. Secretary Gates has written his fundamental concern is that there's not commensurate institutional support, including in the Pentagon for the capabilities needed to win today's wars, and some of their likely successors, which raises a host of issues that the tradeoff for preparing for conventional warfare against near peer competitors, versus irregular asymmetrical warfare.

It also raises the issue of the integration of private contractors into the operations of DOD, and it raises the issue of the intergovernmental activities necessary—particularly to conduct irregular warfare, asymmetrical warfare. I'm sure my colleagues have touched on some of these issues.

But I wonder if—first Mr. Lynn, and then Ms. Flournoy—you could give us an idea of your views at the moment on these complex issues?

Mr. LYNN. Thank you, Senator.

I think Secretary Gates has it right, I think the fundamental challenge in doing the next QDR which will start, if confirmed, as soon as we get there, is to balance between the near-term needs of the force in the field, and the longer-term threats that are perhaps beyond the horizon, but still out there.

That's complicated by what you mentioned, Senator, that there's a tension between the potential for a high-end, near-peer threat, as well as a lower-end counterinsurgency, and the types of equipment, types of forces, types of training, types of doctrine that you would use for one, don't necessarily apply fully to the other. Establishing that balance, I think, is going to be critical in the next QDR.

Ms. FLOURNOY. Senator, I would agree. I think looking at the initial review that the Department will undertake, I think the first question is going to be how do we strike the right balance, set the right priorities, allocate risk in current operations between Iraq, Afghanistan, larger operations around the world to combat terrorism.

But then as we look forward, in the QDR, thinking about what kinds of warfare do we really need? As we want the force as a whole to be full-spectrum, we're going to have to make choices that essentially allocate risk along that spectrum.

I really am looking forward, if confirmed, to working with members of this committee to try to frame and form those judgments going forward, so that we have a force that is robust across the spectrum.

Senator REED. Let me raise another issue, Mr. Lynn, which touches on almost everything we do today. That is the issue of energy. First of all, internal to your responsibilities to run the Department efficiently, you have to have a much more energy-efficient approach not just in simply management, but also in terms of the strategic challenges that poses.

I saw, yesterday, where the Army took delivery of about several thousand vehicles, I believe, electric vehicles for use on various forts around the country. That might be an example of forward thinking. But, can you comment at all about the two issues, here. Internally—how to be more energy effective—is that going to be one of your priorities? Then, internationally, if any comments you would want to make.

Mr. LYNN. I think the President-elect has made a new energy policy one of his priorities, so it will certainly be one of mine. The Department is, I think, a critical component of the President-elect's direction in this area, not just that we can make progress in terms of energy efficiency, the threat of global warming, but as, I think, you were alluding to, the potential cost savings for the Department of moving away from an oil-based dependency are huge. Whether it's fuel cells or synthetic fuels or other mechanisms, the potential in a time of real budget stress for the Department to make that kind of savings makes it an essential initiative on that basis, as well.

Senator REED. Thank you.

Just let me ask Mr. Johnson, and then Mr. Hale a question.

Mr. Johnson, over the last several years, many of the uniformed lawyers in DOD—and some of their civilian counterparts—had serious misgivings about policies that were being pursued. As much as a comment, but also assurance that you will, one, listen to these uniformed officers, that you'll make sure that their opinions are respected, and at least passed along, and that you, yourself, will be actively engaged, and seeking out—particularly when there are tough questions—both sides of the argument. Is that something you can assure us?

Mr. JOHNSON. Senator, when I was General Counsel of the Air Force I think that we had, between the civilian and military lawyers in the Department, as good a working relationship as ever existed in the Department. I'd like to think that the Judge Advocates General (JAGs) would say the same thing.

My style of legal analysis, decisionmaking, putting together recommendations for the Secretary is collaboration. I want all points of view. I'd want to hear from the two-star, now three-star Judge Advocate, as well as the major who works the issue, who understands it better than anybody.

If I know that the military lawyers in the Department have a strong view about something, have an opinion about something, that the Secretary is considering, I had no problem with bringing the JAG in with me to the Secretary's Office, so that I would express my General Counsel's view, and he had an opportunity to ex-

press his view, and the Secretary would make up his own mind about what to do.

From a practical point of view, if you're wrestling with tough legal issues, you have every interest in wanting to get the input of the cross-section of lawyers across the Department. We have many excellent military lawyers who, frankly, have experiences and viewpoints that, as a civilian, I don't share. I want to know what they think.

Senator REED. Thank you, Mr. Johnson.

Finally, Mr. Hale, one of the realities of the last several years has been robust supplemental appropriations. I think that is not something that you're going to enjoy as Comptroller. Have you given any thought as to how you rebalance the budget system, given the fact that we have to get away from these big supplementals?

Mr. HALE. Senator, we need to move away from supplementals, I think the Secretary has said that, the Chairman of the Joint Chiefs has said that—I certainly agree. We're going to need a supplemental in fiscal year 2009 for the second portion, without question. I think after that, and if confirmed, I need to look at how quickly we can make that happen, obviously, working with Mr. Lynn if he's confirmed and others in the Department. But we do need to move away from supplementals.

Senator REED. Thank you very much, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Reed.

Senator Chambliss.

Senator CHAMBLISS. Thank you very much, Mr. Chairman.

Let me welcome each of you, and thank you for your willingness to serve. All of you are making a real commitment to America, and for that we appreciate it very much. We look forward to moving you into position in a hurry, so as Senator McCain said, you can get to work.

Particularly, I want to welcome Mr. Johnson. As has been stated, he is a graduate of Morehouse College, one of the premiere institutions in the country. I'm not prejudiced just because it's in Atlanta, but we certainly know that he is well-educated, and we look forward to working with you, Mr. Johnson.

To Mr. Lynn, Ms. Flournoy, Mr. Hale—one of the things that I think is a very smart decision of the Department over the last several years is to purchase major weapons systems on multi-year contracts. It's saved, literally, millions and millions of dollars for the Government and allowed us to buy more weapons systems than we would have been able to do otherwise within the budget constraints that we've had.

The F-22 has been a success in that standpoint, as well as the C-17 and the C-130. I'm not sure what else we could include down the road, but I would simply say to you, I hope as you go through the budget process—which is going to be extremely difficult, we all know that—that we give great consideration to trying to figure out, at least lots of weapons systems that we know we're going to have to buy. Let's look at moving into multi-year contracts on as many of these different lots of weapons systems as we can.

If any of you have any comment one way or the other, relative to multi-years, I would appreciate that.

Mr. LYNN. Senator, I think multi-year contracting does offer an opportunity to get savings. I think you have to look at it on a case-by-case basis and see if the economic order quantities, and the up-front justify the commitment over a multi-year period, but I think when we find cases that occurs, the savings to the Department are certainly well-needed, as you suggested.

Mr. HALE. I certainly share that view. I'm mindful that we have a tough challenge to make ends meet in DOD, so I encourage the components to look where it's appropriate, at things like multi-year contracting.

Senator CHAMBLISS. Mr. Lynn, you and I talked the other day about depot maintenance, and the issue of modifications being an issue that may be revisited by the Department, with respect to whether or not modifications are going to be included within the definition of depot maintenance, and how that's going to affect 50/50. I would simply ask you for the record, if this discussion does come up, and there is any consideration of changing current statutes relative to the definition of modifications within depot maintenance, that you commit that you're going to come back and discuss this with us before any kind of major shift in that is done.

Mr. LYNN. I do commit, Senator, that we'll discuss any major changes in depot policy with members of this committee, as well as other appropriate Members of Congress.

Senator CHAMBLISS. Ms. Flournoy, I—along with Senator Levin—serve on the Board of the Western Hemisphere Institute for Security Cooperation (WHINSEC), which has been a very effective entity in dealing with our neighbors to the south. We've obviously had some controversy with respect to WHINSEC, but with the changes that have been made, we now are providing a valuable service to our country because of the relationship that's been developed with Central and South American neighbors, particularly as it regards the emerging threats.

I think this has the potential to be—if not the next hot spot—certainly one of the hot spots relative to WMD, drug trafficking, weapons trafficking, as well as other issues. As this policy with respect to WHINSEC is reviewed, I would simply ask that you, number one, keep an open mind, listen to the commanders at Northern Command and Southern Command who are openly, very much in support of what we're doing at WHINSEC right now, and I don't know how familiar you are with it, but if you have any comments relative to that, I would appreciate it.

Ms. FLOURNOY. Sir, I have not had the opportunity yet to be briefed on details. I am generally familiar, but I would certainly pledge to keep an open mind, and hear all views going forward, and I do share your belief—fundamentally—that engagement with WHINSEC—not only because of the transnational threats, but because of all kinds of opportunities that exist for our country in relations with our neighbors. But that's a critical strategic issue and I will, if confirmed, give it strong attention.

Thank you.

Senator CHAMBLISS. Again, to all of you, thank you for your willingness to serve, we look forward to a very strong working relationship with the Department, as we've always had.

Thank you.

Thanks, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Chambliss.

Senator WEBB.

Senator WEBB. Thank you, Mr. Chairman.

Mr. Chairman, I fully understand the time constraints on this process. I would say that it's also a bit difficult to prepare for nominations each of which has such responsibilities. Having gone through two confirmations in this committee, each time sitting there for several hours by myself while you, actually, and others had your way with me.

It's a pretty short time period to be able to do all of this. I would hope that all of you would pledge to us to remain available over the next several months, if we have follow-up questions to clarify some of these matters.

Chairman LEVIN. If I can interrupt you—

Senator WEBB. Yes.

Chairman LEVIN. That's a very important point. We are going to keep the record open for questions. In addition to your request, which I would expect that they would honor, that they always be available to us, but they be particularly available to us in the next few months because of the way in which we have compacted these hearings, it's an important point.

Senator WEBB. Thank you, Mr. Chairman.

A minor point, but Mr. Johnson, a counsel on my staff has some specific questions with respect to your replies to written questions. I think he wants some further clarification. You were very lawyerly and precise in your responses, he may want just a little more information on a couple of areas. If you could contact our office at some point today, I don't want to take up my time during the hearing on it. They're probably small points.

Mr. JOHNSON. I would be happy to do that, Senator.

Senator WEBB. Great, thank you.

Mr. JOHNSON. I apologize for being lawyerly.

Senator WEBB. We would expect that, and we will always follow up.

Mr. Lynn, we had, I think, a very fruitful meeting with you, yesterday. I appreciate your time, and listening to your comments today, the second and the third points that you made about your goals, I think, are very relevant to where we need to go. When you speak of the need to really get into proactive reform measures, I want to work with you on that. We had a long conversation about this whole notion of independent contractors.

There is, I think, a fallacy right now when people start talking about "the total force" as Active, Reserve, and independent contractors. Having spent a great deal of my life, early on, working on the total force, when something fell into long-term, semi-permanent independent contractors, that was essentially viewed as a flaw in the total force, not a part of it.

We have a situation now where we probably have more independent contractors in Iraq than we do military people, and I don't think that's healthy for the country.

Your second point about making a commitment to really scrub the budget—this year's, next year's—and to bring the type of tightness to this budget that we haven't seen in awhile, is very impor-

tant to me, and actually, Ms. Flournoy, you have written about this. There's an article here from the Washington Quarterly, where you went into your own views about the environment that we're now going to be in, and how important it is to really put a new sense of responsibility and accountability into this process.

In that regard, I'm going to ask you about this Mayport issue, both of you. This decision by the Navy to relocate a nuclear carrier to Mayport, FL, with the additional requirement that it has to refit the process down there in order to enable it to handle nuclear carrier facilities—they haven't done this in 47 years. Forty-seven years ago, we started having nuclear carriers here in Norfolk. There was never a decision—at the height of the Cold War—to do something like this.

The United States Navy, right now, has put forward a budget that is \$4.6 billion in unfunded priorities—unfunded requirements. They have a shipbuilding program that is behind schedule. They have about 276, I think, ships. They had 568 when I was Secretary of the Navy. They're trying to get to 313.

They have, in my view, a lamentable record over the past several years in terms of their aircraft procurement programs, and they want to take \$1 billion—which is what it's going to end up being, if you look at history—above these amounts in order to create a redundant facility in Mayport, FL.

I'm not asking for an answer from you today, but what I would like from you is a commitment to examine this at the Office of the Secretary of Defense (OSD) level.

You and I talked yesterday a good bit about the processes of the Defense Resources Board—which I sat on for 4 years—and I certainly think this is an item—whether I was representing Virginia or not, if I were in the Pentagon today, I would be saying the same thing. We have \$4.6 billion in unfunded requirements? We're going to put this on top of it? How are we going to build the aircraft fleet back where it needs to be? We have empty squadrons out there—how are we going to get to 313 ships—which is a floor?

Ms. Flournoy, you've mentioned in a lot of the stuff you've written about, how important it is now for us to re-engage in terms of our maritime strategy around the world.

I'm asking for your commitment to take a look at this at the OSD level, in terms of strategy and budget priorities.

Mr. LYNN. Senator, we're going to have to look at the entire Navy program as well as the other Services. As you suggest, this is a major budget item. We'll commit to you that we will review it with you and Congress, about where we think we need to go on this program.

Senator WEBB. All right.

Ms. FLOURNOY. Senator, I would just add that from a policy or strategy perspective, I think we need to take a look at our global posture, including our home porting and basing structure is going to be, certainly, on the table in the QDR, going forward. I would hope that it would be.

Senator WEBB. We're entering a period where DOD, and I think the people at this table understand it—other people in DOD have to realize that these budgets are going to get a lot tighter, these programs are going to have to be justified. We haven't even seen

a clear strategic justification for this. All we've seen is a little bit of rhetoric. We have the briefings from the Navy—it's not there.

I appreciate your saying you will look at this, and we will continue to discuss it.

Ms. FLOURNOY, you suffer from the same problem that I do, in that you are a rather prolific writer, so you have a large paper trail behind you on a lot of these different issues. But I would like a few clarifications, and if my time runs out, I may stay for a second round.

You have written in the past, that you believe that there should be a residual force in Iraq of approximately 60,000 American military, do you still believe that?

Ms. FLOURNOY. Sir, I'm not willing to stand behind that number at this time, given that when I wrote that, we were in a somewhat different circumstance. There was no Status of Forces Agreement (SOFA) commitment, for example, the security environment was somewhat different.

What I do believe is that I think there's a very strong commitment to implementing the SOFA, to bringing U.S. forces out of the combat role.

I don't know what the long-term support for Iraqi forces in our long-term relationship is going to look like. I don't know if the Iraqi Government will want any U.S. forces in Iraq, once we reach the end of the SOFA. So, I think it's an open question.

I would not want to be digging my heels on any particular number or posture at that point in time. I think the key thing is to implement the SOFA, and to reduce our role and our numbers there. I think a little bit down the road, we will have a better sense of what a security cooperation relationship with Iraq, going forward, looks like.

Senator WEBB. My time is up in this round—but I want to make sure I fully understand what you're saying. Do you believe that the U.S. strategy for that region requires a long-term presence of the U.S. military in Iraq?

Ms. FLOURNOY. Not necessarily.

Senator WEBB. So, you don't believe it's a requirement?

Ms. FLOURNOY. I don't think we know, yet. I don't think we know where we'll be at the end of 2011. The honest answer is, I don't know. But what I can say is if I am in this position, I would welcome the opportunity to continue to look at this, to discuss it with you, and other members of the committee—

Senator WEBB. This needs to be clarified.

Ms. FLOURNOY. Yes.

Senator WEBB. You don't see—and I'm not trying to put words in your mouth—from what I'm hearing, you would not analogize the situation in Iraq to, for instance, the basing system that we have in Korea, in that—

Ms. FLOURNOY. No, sir, I would not.

Senator WEBB. American military presence in Iraq is a regional requirement—

Ms. FLOURNOY. I do not think Korea provides the right metaphor for what our relationship, long-term, with Iraq may, or should, be.

Senator WEBB. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Webb.

Senator Graham.

Senator GRAHAM. Thank you, Mr. Chairman.

Continuing along Senator Webb's line of thought, do you believe our relationship, militarily, with Kuwait, has been beneficial?

Ms. FLOURNOY. Yes, I do, sir.

Senator GRAHAM. What about the United Arab Emirates?

Ms. FLOURNOY. Yes, sir.

Senator GRAHAM. The point is, whatever relationship we have with Iraq is yet to be determined, I think that's a fair answer. The SOFA has a 2011 date on it with the ability to renegotiate a long-term agreement. As I understand it, their navy and air force are almost nonexistent, so I encourage you to keep that line of thinking up. Let's evaluate each year where we are with Iraq, and make a good decision that when we leave that we have a stable partner behind, that like Kuwait and other partners in the region, has been very beneficial in terms of our long-term strategic interests.

I applaud you for that kind of thinking, and nobody here expects you to make a decision 3 years out until we look at the information.

Now, one of the things that we're going to be dealing with in this new administration is the closing of Guantanamo Bay. I can assure you in this regard, a fresh start at the Pentagon is welcome.

Where I stand, in terms of looking at detainee policy, Mr. Johnson, you come with great recommendation and high opinion by the military lawyers. The chairman hit on a very important point, along with Senator Reed, we need to make sure we do not make the mistakes of the past.

I look forward to working with you, as well as the uniformed lawyers, to make sure that as we go forward, and when we close Guantanamo Bay—which I think we will—that we make some very wise decisions as a Nation. To make sure we humanely treat detainees, regardless of who they are, and what their ideology may be. That we have a transparent justice system, and that we also protect the Nation against people who are committed to our destruction.

In that regard, Mr. Lynn, one thing I would ask from you—there's been a report in the media that 61 of the detainees who have been released have gone back to the fight in some form. I don't know if that's accurate or not, but if you play the role of Gordon England, it will be up to you, really, under the current system—and I think we want to maybe change that, quite frankly—as to who stays and who goes.

Two things—see if you can confirm how many people have gone back to the fight. Define what the fight is. Also, see if you can tell us, of the detainees that have been captured, how many of them were inappropriately detained? So that we can make a logical decision, going forward, about what kind of system to employ.

There's two things we want to be sensitive of. We don't want to put someone in custody, long-term, who's in the wrong place at the wrong time. We don't want to let people go who present a military threat in the future. We have to do that based on a system that's competent, that's transparent, and that has checks and balances.

Now, as we go forward, Mr. Lynn, what is your view of long-term detention policy when it comes to people that we have captured

that may not be subject to the normal criminal process? Have you thought about that much?

Mr. LYNN. Thank you, Senator. I'm aware of the role that, at least, the current Deputy Secretary plays, in terms of the detention release policy. I think the new administration will be looking at that, and I can't tell you right now whether I would be continuing that role or not. You're correct—I think that's going to be reevaluated.

In answer to your specific question, clearly where possible, we want to prosecute. There are going to be circumstances where that's not going to be possible, and we're going to have to evaluate those individually. There's clear authority to hold enemy combatants. There's discussion as to what actually constitutes an enemy combatant, but we have that authority, and—

Senator GRAHAM. Would you think a member of al Qaeda should be classified as an enemy combatant?

Mr. LYNN. I'd have to know more circumstances than simply that, Senator, really, to fully answer the question.

Senator GRAHAM. Okay, well, if I gave you a situation where the evidence was conclusive that this person was a part of an organization called al Qaeda that was actively involved with activity with al Qaeda, would they be a good candidate to be considered an enemy combatant?

Mr. LYNN. Without quite going down the line of your hypothetical, Senator, I think there are certainly cases that al Qaeda operatives would be considered enemy combatants.

Senator GRAHAM. Okay.

Mr. Johnson, when it comes to the criminal law—domestic criminal law and military law—do you see a difference between what the military justice system can do, and traditional domestic criminal law regarding detaining enemy combatants?

Mr. JOHNSON. Yes, Senator, I believe I do.

First, let me preface my remarks by saying, I'm pretty much a traditionalist when it comes to the essential mission of the military. I believe that implicit in the ability of the military to do its job is the inherent ability to detain an enemy combatant captured on the battlefield. I think that's implicit in the job. I believe that the Supreme Court would say the same thing, and, in fact, it did, in the *Hamdan* decision.

When Congress passed the authorization for the use of military force, the Supreme Court determined that, implicit in that was the authority to detain an enemy combatant—

Senator GRAHAM. If I could interrupt you right there. If a person is, in fact, detained as an enemy combatant, as I understand the law of armed conflict, once that decision has been properly made, there is no requirement to release them back to the fight if they still present a military threat.

Mr. JOHNSON. If, in fact, Senator, that person was properly captured, and the circumstances suggest in your hypothetical that you posed is, in fact, a member of al Qaeda—

Senator GRAHAM. Right.

Mr. JOHNSON. The al Qaeda that Congress had in mind in 2001.

Senator GRAHAM. Right.

Mr. JOHNSON. Then, I think the answer to your question is yes.

Senator GRAHAM. I look forward to working with you to clean up what is, quite frankly, a mess. The Military Commissions Act that was originally passed by our committee that enjoyed complete Democratic support, and three Republicans, may be a good document to look at in terms of how you would try somebody who is alleged of committing a war crime against the United States. This idea, how you detain someone that we believe to be an enemy combatant, indefinitely, is a thorny issue. But I think we can get there.

My goal would be to tell the world that the reason this person is in prison, under military control, is not because we say so, but because there's competent evidence to suggest they're part of an enemy force that's been reviewed by an independent court, outside of DOD, and that more than one person reached that conclusion.

If we could accomplish that goal, I think we'll improve our image and keep America safe. Just as sure as we're sitting here, we're going to pick somebody up in Afghanistan, and there are 900 people imprisoned in Afghanistan, that's going to have high intelligence value, may not be subject to trial in the United States, but presents a very serious threat to our national security and our troops in the field. Let's get ahead of that in a bipartisan manner, and I think this team can deliver. I think you're outstanding nominees, and I look forward to supporting you all.

Thank you.

Chairman LEVIN. Thank you, Senator Graham.

Senator Ben Nelson.

Senator BEN NELSON. Thank you, Mr. Chairman. I want to add my appreciation for your decision to serve, and certainly I am impressed with the comments that you've all made this morning, as well as your written statements.

We're fighting two wars, and we're preparing for threats that emerge in the future, and are emerging right now. So the challenges that you're going to face are, needless to say, daunting. But I believe that you have the capacity to help us all deal with those emerging, as well as continuing, threats that we face today. I have a question regarding—and as chairman of the Personnel Subcommittee in the past—I certainly have a question regarding dwell time, as it might relate not only to the current circumstances, but to the future circumstances with the reduction of forces in Iraq, and an increase in Afghanistan.

Mr. Lynn, we've already had challenges, meeting the goals for dwell time between deployments for troops with certain specialties. What do you consider a minimum for dwell time, under the circumstances we face today, and will that—in some respects—change as this transition goes forth?

Mr. LYNN. Senator, I don't have a specific minimum at this point, prior to review, but I agree with the thrust of your question—deploying forces on repeated tours with 3, 6, 9 months only, between those tours is a long-term detriment to the quality of the force. I think it's often been said that you recruit individuals and you retain families. I believe strongly that's the case.

I think we have to be true to our military families and increase the dwell time to a level that reduces the burden on those families.

Senator BEN NELSON. I know that Secretary Gates is committed to increasing it, and we all are. I guess the practicalities that we're

going to face in terms of that transition are certainly going to have to be dealt with. I'm assuming that both you and Ms. Flournoy will do everything within your power to get the dwell time as generous as possible, under all circumstances.

Mr. LYNN. Absolutely, Senator.

Senator BEN NELSON. Mr. Hale, you said something about working diligently to get to the point of an audit. Do you honestly think that it's possible to get an audit of DOD?

Mr. HALE. Senator, the Department has a plan. You're probably familiar with it, the Financial Improvement and Audit Readiness Plan, and I think the Department is working toward it. I'm mindful that the hardest things have been put to the end, and that there are enormous challenges remaining. I think at this point I'm not prepared to answer, definitively, your question, but I'd take your point, and if I'm confirmed, that's certainly something I want to look at.

We may need to look at some priorities. What do we do first that would be most helpful? The goal of the audit, in my view, is just not simply to have an unqualified opinion, but to verify that we have good financial information. There may be some priorities we can impose on the audit, that lead most quickly to getting verification that we have good data.

Senator BEN NELSON. In response to your answer, would it be possible to have, let's say, the equivalent of a partial audit in certain areas, that could be stairstepped? In other words, there are some high priority areas where probably the challenges are the greatest, in terms of getting an audit. There are going to be other areas where the necessity of an audit is stronger than, perhaps, some others. Are you going to look at trying to do this in some rational, stairstepping process?

Mr. HALE. I think the answer is yes. There are some limits on partial audits, and the degree to which they can be done, but consistent with those limits—or abiding by those limits—I think we do need to look at priorities.

Senator BEN NELSON. But your goal is to, essentially, at some point, get an unqualified audit?

Mr. HALE. That is the law, and we are trying to pursue it. So, yes, it remains a goal. If confirmed, I certainly want to look at this issue. I'm mindful of the challenges.

Senator BEN NELSON. It's Herculean.

To increase public support for crucial nuclear security programs, and to achieve effective allocation of resources, Mr. Hale, what is your opinion on the possible recommendation for the executive branch to submit—as part of the annual budget request—both an unclassified, and a classified accounting of all nuclear weapons-related spending?

Mr. HALE. Senator, that's a good question. I have to confess, I know about it only in general terms. I think that's one where borrowers learn more if I'm confirmed, and get back to you with a specific answer to the committee.

Senator BEN NELSON. Because generally what we get is fairly sketchy, if it's related to something that's classified. Perhaps it is sketchy, in total, as well. But I'm hopeful that you'll look at that

very carefully. I think it's a great recommendation, I hope we can see it followed.

Ms. Flournoy, as we've talked in the past, the shortages of mid-level officers is continuing to be a problem for our military. The mid-level, because many of those mid-career warfighters are opting out of the military, because of the high-demand, high-stress deployment tempo, which puts this in connection with the previous question about dwell time. Do you have any thoughts about whether we can continue to have incentives? Or have we reached the point where incentives are not going to be sufficient to help us retain those mid-level career officers?

Ms. FLOURNOY. Senator, I think you've put your finger on something that's very important to the long-term health of the All-Volunteer Force. I would hope that, going forward, the Department would take a close look at this issue.

I think when you think about incentives, we have to define that broadly, not just financial incentives, but educational opportunities, career development opportunities, flexibility, and so forth. I think we are asking so much of the people who serve, and particularly our officer corps—our field-grade officer corps today—that if we're going to retain these incredibly skilled, experienced people, we're going to have to look anew at their career paths, at their incentives, and so forth. I would hope, if confirmed, to have an opportunity to be part of that examination.

Senator BEN NELSON. I would assume that would apply, as well, to the professional ranks, with physicians, dentists, and other professional areas? The challenge there is both recruiting in the professional ranks, officers, but the retention is true in both cases—of our warfighters as well as those who provide the backup services.

Ms. FLOURNOY. Yes.

Senator BEN NELSON. I see that my time is expired. Thank you very much, all of you, and we look forward to working with you in the days ahead.

Thank you.

Chairman LEVIN. Thank you so much, Senator Nelson.

Senator Thune.

Senator THUNE. Thank you, Mr. Chairman. I want to thank our nominees for their willingness to serve their country, and many of you have had careers in public service, and it's a great calling. We appreciate your willingness to answer that call again.

Thank you for being here, thank you for the opportunity to meet with you individually, as well, and pull some of these questions.

I do want to expand upon some of these issues that perhaps, have been covered, at least at some level already. But I'd like to get Mr. Lynn's and Ms. Flournoy's response to some questions relating to energy issues. Like I said, I think some of that ground has perhaps been covered. But, as we all know, we spend an awful lot of money every single year, sending that money to unfriendly foreign nations to purchase oil, some of which ends up in terrorist hands, and perhaps then is used by those organizations to destroy us, and to attack Americans.

Our military is, of course, one of the biggest consumers of energy and of oil. The Air Force, alone, is the Federal Government's larg-

est energy buyer, and spent \$5.6 billion for aviation fuel in fiscal year 2007.

As we all know, too, in 2007, 2008, oil prices reached record highs, which had a direct impact on the Air Force's readiness. Now we have oil prices that have come down, compared to what they were only a few months ago, and we tend to put those issues on the back burner, and get a little bit complacent, which I think is a big mistake.

I think it's important that we look at ways that we can prevent that sort of crisis in the future, when those fuel prices go up again—which we know they will. That's why I've been pleased that the Secretary of the Air Force, Mike Donley, has signed an Air Force Energy Program Policy Memorandum last month which, among other things, establishes the goals of certifying the entire Air Force fleet, to use synthetic fuel blends by early 2011, and to acquire 50 percent of the Air Force domestic aviation fuel requirement be an alternative fuel blend by 2016.

My question is, do you think that the Air Force's energy initiatives regarding synthetic and alternative fuels is worthy of Department-wide consideration?

Mr. LYNN. Thank you, Senator. Let me come back to your specific question, just make a couple of general points that—I agree with your emphasis on the energy area. The President-elect, as a general policy, extending well beyond the Department, is committed to reducing the oil dependency, given the foreign sources of supply, given the global warming implications, and so on. The Department will certainly be a critical part as the largest government consumer of energy.

As you suggest, there's a second reason, beyond those broad policy reasons. The financial implications to the Department of relying on oil are severe and have the potential to get much worse. There's an enormous savings out there if we can move away from that, as you indicated.

Finally, I'd add one thing to yours. There's an operational benefit if we can move away from oil-based products, in that a huge part of the logistics strain of the United States military is just providing fuel to the forward forces. To the extent that we can find other, more efficient ways of supplying energy, whether they're fuel cells or other means, I think it will allow the military to perform the mission in a more effective way.

For all of those reasons, I agree with the thrust of your comments. I'm not completely familiar with Secretary Donley's initiative, but your description is certainly compelling, and we'll take a close look at it—and what kind of broader application it might have, if confirmed.

Senator THUNE. Ms. Flourney?

Ms. FLOURNOY. Senator, I would agree that, given the size of the enterprise, DOD has an opportunity to be a leader in areas of conservation and efficiencies, alternative fuels, and so forth. I have not had the opportunity to look at the specific proposal you put on the table, but I look forward to having that opportunity.

I would also just underscore the importance of thinking about energy security and climate change together, and as key elements of the future that DOD has to grapple with in its military planning.

I think this goes beyond current practices in how we use energy, but also to understanding how some of these energy trends are going to change the security environment that the U.S. military operates in 10, 15, 20 years out.

Senator THUNE. The RAND Corporation recently issued a study that estimates that synthetic fuel would reduce the U.S.'s reliance on foreign oil by as much as 15 percent, while possibly generating up to \$60 billion in domestic revenue each year.

One of the things that I've been advocating, and we've worked with my colleagues on the committee the last couple of years in the defense authorization bill, is to try to and get some procurement authority, multi-year procurement authority for purchasing synthetic fuel. The question I have is, would the Defense Department be supportive of efforts by Congress to provide incentives to promote private sector investment in synthetic fuel production, such as expanding the military's multi-year procurement authority for purchasing domestically-produced synthetic and alternative fuels? I would direct the question, again, to Mr. Lynn and Ms. Flournoy.

Mr. LYNN. Senator, I would have to look at the question, and I pledge to you that I would do so, but I can't make a commitment prior to that kind of review.

Senator THUNE. Okay.

Ms. FLOURNOY. I'm afraid I'm going to say the same thing.

Senator THUNE. I expected that response. But I do look forward to working with you, and hope we can find a way to make that happen. I think it will incentivize a lot greater participation by the private sector in expanding synthetic fuel production, if we have that type of multi-year procurement authority.

As you probably know—and again, I would direct this to Mr. Lynn and Ms. Flournoy—the 2006 QDR stated the Department plans to develop a new land base penetrating long-range strike capability that would be fielded by 2018. Secretary Gates recently discussed that new national defense strategy in an article that was published in this month's edition of *Foreign Affairs Journal*, and it stated the U.S.'s ability to strike from over the horizon will be at a premium, and will require shifts from short-range to long-range systems, such as the next-generation bomber.

In your view, will the next-generation bomber be vital to our national defense strategy, and what steps would the Department take to ensure that the next-generation bomber is able to achieve initial operational capability by 2018, which is currently the goal?

Mr. LYNN. Senator, the review of the next-generation bomber program, and the underlying strategic premises that led to it, is going to be one of the central parts of the QDR that we'll undertake, if confirmed.

The general trend, I think you're right, as we've moved towards more of an expanded view to look at Pacific scenarios, as well as European scenarios, the range of aircraft has certainly become a more important variable. The proliferation and the sophistication of air defenses have made stand-off almost essential to survivability. Both those strategic trends, I think, continue, but we're going to have to evaluate each program within those trends in this QDR that's coming forward.

Senator THUNE. Yes.

Ms. Flournoy, anything to add to that?

Ms. FLOURNOY. I would agree with that. I think the need for a long-range precision strike that can penetrate the most sophisticated enemy air defenses is absolutely critical. Hopefully the Department will use the QDR to examine the range of possible capabilities that will actually get us to meeting that need. Certainly the long-range bomber will be part of that discussion, a central part of that discussion.

Senator THUNE. Mr. Chairman, I see my time is expired, so I want to thank our nominees for their service. We look forward to your speedy confirmation, thank you.

Chairman LEVIN. Thank you, Senator Thune.

After Senator McCaskill, I'm going to have to leave for a few minutes, and then Senator Webb is kindly going to take over for that period of time.

Senator McCaskill.

Senator MCCASKILL. Thank you, Mr. Chairman.

I'd like to begin with Mr. Johnson, if I could. Procurement fraud in DOD—in the 1990s, between 130 and 391 cases per year were referred for criminal prosecution. In 2007, that number was a whopping 11. Now, at the same time, you had the same drop-off in civil fraud cases. This defies common sense. We've had a massive explosion of procurement during the conflict in Iraq, and I would like to get a commitment from you today that this would be one of your highest priorities, as we strive to tell the taxpayers of this country that we get it, that they have been fleeced, in many instances, and our military has been shortchanged as a result of some of the procurement fraud that has gone on during the Iraq conflict, and that what is rumored to be a backlog of these cases that exist right now, would be immediately forwarded to the Department of Justice for appropriate prosecution.

Mr. JOHNSON. Senator, I agree, given the growth of procurement dollars, that a dramatic fall-off like that—I'm an optimist in life, but I tend to doubt that it's because there's so much less procurement fraud out there in 2007.

My recollection is, I actually prosecuted procurement fraud when I was a prosecutor, and this is obviously a very important area and I certainly would make that a priority. Yes.

Senator MCCASKILL. Thank you very much.

Mr. Hale, you and I had a chance to visit about the scandal at the Defense Contracting Audit Agency (DCAA). Obviously, the credibility of contracting is split apart at its core, if the very agency that's supposed to be looking over everyone's shoulder has the kind of problems that were documented by GAO, I mean, nothing's worse than an audit agency being found not to be compliance with auditing standards in government. It doesn't get any worse than that.

Part of the examination of that scandal disclosed the lawyer for the audit agency wrote a letter to the whistleblower. I want to make sure that I share it with both you and Mr. Johnson, because it is the most egregious example I have ever seen of an unethical and completely inappropriate memo, saying to this person, "Be quiet. You are not supposed to talk about this stuff to anyone, Con-

gress or anyone else.” It is enough to make your blood boil, when you read this memo.

At the time, I asked what kind of action had been taken against the lawyer that wrote this memo? I got two excuses. One, the Special Counsel’s investigation was still open, making any action inappropriate. Then, unfortunately for you Mr. Johnson, they passed the buck to you. That, in fact, the lawyer at the DCAA is in your chain of command, rather than the DCAA’s chain of command.

I would like your comment, Mr. Hale, about what you intend to do about the lawyer—I’m sure that lawyer is still there—and I would like some comment about what will happen to this lawyer, who basically said to someone who was trying to right a wrong, “Be quiet or you’re going to pay.”

Mr. HALE. Senator, I am concerned about the issues at DCAA, as we talked about yesterday. It is also an ongoing investigation, I want to see that investigation completed, and if I’m confirmed, I will commit to you that I’ll be sure to review it, to solicit help from the Department’s lawyers, and figure out what the right strategy is. But at the moment, I can’t say what that is, but you have my attention, the issue is important, and we, if I’m confirmed, will certainly seek a resolution.

Senator MCCASKILL. I certainly understand that employees within DOD have a standard of conduct. But I also understand, we can’t do our job in oversight, if they are all stifled. I wanted to make sure that they understand that there are certain times, an obligation to come forward, and talk about what is happening internally.

Mr. Johnson, I didn’t mean to cut you off. Did you have anything to add?

Mr. JOHNSON. I obviously am not familiar with the particular circumstances here. I agree with Mr. Hale, this is something important to look into.

Just as a practical matter, my experience in life is, if you tell somebody to be quiet and go sit in a corner, it’s probably going to come back and bite you, at some point.

Senator MCCASKILL. It did.

Mr. JOHNSON. Right.

Senator MCCASKILL. Yes, in this instance, it did.

Finally, Mr. Lynn, first of all, all of you, I appreciate your service. All of you are not coming back for the glory or the money, you’re coming back because you want to serve, and I thank all four of you for that. I don’t mean, by directing this question to you, to any way impugn your integrity.

But the revolving door is an important issue for us to talk about, between the Pentagon, and the defense contracting community. You went directly from the Pentagon to a defense contractor. You are coming back directly from a defense contractor—one of the largest defense contractors—into DOD. In that role, you have a major responsibility over acquisition and procurement. This is troubling to a lot of people who are just looking at this situation.

We have gone a long way in Congress to try to begin to stop the revolving door. We haven’t done as well as we’d like to, but there’s a whole lot of attention in the public about the revolving door between working in Congress and lobbying in Congress. Frankly,

there isn't as much attention in the defense sector. It's an incestuous business, what's going on, in terms of the defense contractors, and the Pentagon, and the highest levels of our military.

I'd like to give you an opportunity to speak to it, since you're an example of it. [Laughter.]

Mr. LYNN. Senator, when I left the Department, I followed the strict ethics procedures, and didn't have any contact with the Department for the period that's set by law. On coming back into the Department, there are equally strict ethics procedures on what issues I can handle, and what issues I can't. I will be working with the General Counsel's Office to ensure I follow those ethics procedures completely.

Senator MCCASKILL. Do you feel like you could be somebody who could be a reformer, in this regard? Do you sense that there's something else that we need to do? Do you sense that there may not be a problem that there is, maybe, too much short-cutting of picking up the phone, and dialing into the Pentagon from a defense contract agency because of former friends that are there, and vice versa? I mean, do you have any sense that reform is needed here?

Mr. LYNN. Well, I—

Senator MCCASKILL. Do you hear the hopeful tone in my voice?

Mr. LYNN. I do hear the tone, Senator.

I'm not aware whether the DCAA case, you probably have more familiarity with the details as to whether that was people leaving DCAA and contacting back to DCAA, I hadn't heard that, but perhaps you know more. I think we need to keep—

Senator MCCASKILL. The best example I can give you is the Thunderbird scandal. That was somebody who had left the military and was working for a contractor, and reached back in the get a contract, a sweetheart contract, no bid, noncompetitive contract for some public relations work for the Air Force Thunderbirds—that's one example, I can give you some other examples.

Mr. LYNN. Senator, I certainly believe that we need to maintain the highest ethical standards. I pledge to you that I will do that personally.

In terms of your hopefulness that we can reform, I will work to not only ensure that we follow the highest ethical standards, but that we have the transparency that provides the public with the belief, the understanding that indeed those standards are being followed. It's not just the reality, it's the perception, and I understand that, and we plan to work on both.

Senator MCCASKILL. Okay. Thank you all very much. I look forward to working with you.

Senator WEBB [presiding]. Thank you, Senator McCaskill.

Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman.

In the absence of Chairman Levin and Ranking Member McCain, I am definitely honored to be on this committee, and I am excited about being here and working with all of you.

North Carolina has one of the largest military footprints of any State in the country, and we're very proud that in North Carolina, our long-term support of the military—and as a member of this Armed Services Committee—I truly hope to be able to provide the

support and advocacy that the many North Carolina men and women in our Armed Forces deserve.

To the nominees, I want to offer you my congratulations. None of you would be here before this committee, if not for your competence, and your records of service. Should you all be confirmed, I am confident that you will serve our Armed Forces with distinction. So, thank you on that regard.

As I mentioned, and I hope you know that the military is very important to North Carolina, and North Carolina is important to the military. It's my hope that, should you be confirmed, we can work closely together in the year to come.

The people of North Carolina are very pleased about the results of the Base Realignment and Closure (BRAC) Commission, and the Army and Marine Corps "Grow the Force" initiative. Both Fort Bragg and Camp LeJeune are slated to receive a large influx of personnel. The Fort Bragg and Pope Air Force Base BRAC Regional Task Force are ultimately expecting total gains of about 40,000 military and civilian personnel in and around the city of Fayetteville. I think that those changes are ultimately going to be a great thing for the military and the State of North Carolina.

But in the meantime, there is a lot to be done in the surrounding communities to get ready for that increase in personnel that we're going to be seeing in the next few years. Obviously, it's a welcome challenge.

We, in fact, are likely to see a large increase in funding for State and local construction projects, as a part of the economic recovery package that will be considered soon. I hope that in North Carolina some of that funding can be devoted to school construction for the added military personnel and people, and the infrastructure upgrades around the bases.

In the case of Fort Bragg, some of these projects will be essential to ensuring the security of the Nation's largest Army post. But it's very important that BRAC be implemented as smoothly and efficiently as possible.

Mr. Lynn, let me ask you a question. Do you foresee any significant barriers to an efficient and timely implementation of BRAC? I would ask that you would work with me and the committee to ensure as smooth and orderly a transition as possible.

Mr. LYNN. Thank you, Senator. I agree with the Senator that the BRAC process has been an incredibly important process for the Department as it right-sizes its infrastructure to the new size of the force over a couple of decades, and that's been something that's gone through, I think, five iterations now, and we wouldn't have been able to get anywhere close to the right-sized infrastructure without that.

I would pledge to you that we would want to protect the integrity of that process. I can't get into specific commitments on individual programs or projects, but it's certainly something we would want to work with you and ensure that the process remains as strong as it has been.

Senator HAGAN. Thank you.

Again, congratulations to all of you. I certainly do look forward to working very closely with you in the years to come.

Thank you, Mr. Chairman.

Senator WEBB. Thank you, Senator Hagan.

Senator Begich.

Senator BEGICH. Thank you, Mr. Chairman.

There's good and bad being last. The good is, everyone knows there's only about 8 minutes left.

Senator WEBB. Just for the record, Senator, there will be a second round.

Senator BEGICH. I know, I'm saying from this round.

Senator WEBB. Don't think it's going to be over in 8 minutes.

Senator BEGICH. This round, and the bad is, lots of the questions have been asked.

I'm going to give a couple, very parochial, but before I do that—Mr. Lynn, your earlier comment about your child, I clearly understand that. If my son were here, it would be totally disruptive, and I'm not sure how it would all go.

To you, your family, I'm watching your son, here—I'm going to get some lessons of how you do this for 2 hours—very good, I give you great credit, there.

I'm going to ask two very parochial questions, but then I'll ask a couple of general questions. I'll leave them to you, Mr. Lynn, and you can direct them to whoever would like to answer them.

Contrary to popular belief, we really don't see Russia from most of Alaska, just for the record. [Laughter.]

But Russian military jets often push the envelope and make flyovers along the Alaska border, prompting intercepts to launch from Elmendorf Air Force Base and other Alaskan military installations.

Alaska also finds itself the closest American State to North Korea, and Alaskans often get nervous when China and Taiwan start arguing, because of our proximity to the Pacific Rim.

Anchorage, Alaska's port has been deemed one of the Nation's top 16 strategic ports because of its vital mission of launching the Stryker Brigade from Fort Richardson and Fort Wainwright in Fairbanks. In short, Alaska truly, in my belief, is on the front-line of the national defense. What is your assessment of the strategic importance of Alaska when it comes to America's interest on the Northern Pacific Rim?

Mr. LYNN. Clearly, as the Senator stated, Alaska plays a very important role in terms of the U.S. military posture in the Pacific Region, both in terms of the ballistic missile defense capabilities that are resident there, as well as the forces from all of the Services that are in Alaska. I don't want to say one State is more important than another, but clearly, Alaska's size and position makes it a critical element of our national security.

Senator BEGICH. Let me ask you another question, again, very specific to Alaska, but yet to the national defense. We're very proud, in this Nation, to be the first fully-deployed in operational defense against ballistic missile attack, at Fort Greeley, the Ground-Based Midcourse Defense (GMD) system.

First conceived under the Clinton administration, in a very strong, bipartisan approach here in Congress, including members of this committee, the GMD is an important element in homeland security, providing a deterrent, and if necessary, active defense against threats around the globe.

This past December, the program completed another successful intercept test by detecting, intercepting, and destroying a target warhead over the Pacific.

I remain, and continue to be, very supportive of this testing of the GMD system against a wide range of targets, and I strongly encourage the Pentagon to adequately fund the GMD, including testing, operations, maintenance at Fort Greeley and other Alaska sites, and expansion of the Fort Greeley interceptor inventory, especially if we do not immediately deploy interceptors in Europe.

For either one of you, or whoever would like to answer this—can you give me your opinion and thought of how you would support this type of system?

Mr. LYNN. Why don't I start and ask Ms. Flournoy to follow?

Senator BEGICH. Very good.

Mr. LYNN. Senator, I think missile defense programs should be treated like all defense programs, and that is that one, they should be based, fundamentally, on a judgment of the threat that we face. Then they need to do the best that we have to meet that threat, and diffuse it.

Second, they need to be cost-effective. We need to follow a program that's going to get the best return for the taxpayers, and then finally, we need to follow a strong testing regime to make sure that, in fact, they will work to do the mission that they've been intended to you.

I think the missile defense program, as you've said, the GMD program in Alaska is proceeding down those paths. Without making any specific commitments on that, that would be the approach that we would take to that program, as well as the other missile defense programs.

Senator BEGICH. Thank you.

Ms. FLOURNOY. Senator, I would agree with Mr. Lynn's remarks. I would only just add that I think there are some imminent vehicles for looking at a broad review of missile defense, not only for long-range systems, but medium- and shorter-range systems. I think that will be an important element of both the QDR and the upcoming budget and program reviews.

I would just underscore the need to look at these things holistically, and to look across the board to try to look at how best we can prioritize. So, I look forward to discussing the Alaska system in that context with you, going forward.

Senator BEGICH. Thank you very much.

Mr. Chairman, I don't know how the timing works, this is my first time. So, I'm going to keep rapping until someone tells me, or a hook comes, right? Okay. [Laughter.]

I didn't hear any discussion, as I'm a former mayor of Anchorage, AK, and we do a lot of work, we have—in the State population, 11 percent of our population are veterans, another 4 percent are Active military. A very large percent of our population is related—indirect and directly—to the military.

The program we worked a lot on was family support. I'd be interested—and you don't have to go into the detail here, but this is my opinion from a mayor's perspective, looking in, that there is good support, but not enough.

An example I would give you, in Anchorage, we have our Women, Infant, and Children program satellite office on the base, because of the needs. I have personal opinions about why that should not be that case. But, can you tell me, as you mentioned, about reform and some of the activities you're going to take, where are you going to include the support for families on base, off base, and those kind of necessary elements, that I truly believe from a mayor's perspective, as a former mayor, were there, but not as aggressive as they could have been?

I know, as a mayor, we did a lot with the military, great relationship, and actually started with the U.S. Conference of Mayors, a new committee to get other mayors to do the same thing, because we think mayors have a great role in supporting the military that connects to them. But how do you see support and resources to support those families?

Mr. LYNN. Senator, we're well aware that we've recruited, we've trained, we've equipped the best military force the world's ever seen. We're equally well aware that we're not going to retain that force, and we're not going to retain that capability, unless we treat our military families right. So, we will provide the resources that military families need to be able to sustain the kinds of activities, the wars that we're fighting and that we know that the families at home are at least as burdened by these deployments as the men and women who deploy themselves, so we need to find and support the programs that support those families.

Senator BEGICH. Will you have, in your process, some sort of strategic plan on how you'll do that?

Mr. LYNN. It will certainly be a critical element as we develop the budgets and programs, starting with the fiscal year 2010 program, and anything else, actually, that's needed in the fiscal year 2009 supplemental.

Senator BEGICH. Another question, kind of broader, as the Arctic continues to be a new frontier in a lot of ways, Alaska is going to be right up there. Have you, or do you have any commentary regarding how the military will engage in Arctic policy?

Mr. LYNN. I'm afraid I don't, but maybe Ms. Flourney?

Ms. FLOURNOY. I don't have a comment on current policy, but what I can tell you is that's a great example of what I was referring to when I talked about thinking about energy security and climate change in our military planning, in our scenario development, and so forth. As things change in the high north, then you're going to see implications for the U.S. military that we need to try to anticipate and plan for. I would hope that some of our longer-range planning and thinking would take that and other energy developments into account.

Senator BEGICH. Thank you very much.

I have my cue card, my time is up.

Chairman LEVIN [presiding]. Senator Webb will start our second round.

Senator WEBB. Thank you, Mr. Chairman.

First, I would like to express my appreciation that Senator Nelson raised this issue of dwell time. I would like to give you another group of thoughts on this. I hope you'll keep in mind, as someone

who wrote and introduced the dwell-time amendment in 2007, and someone who also wrote and introduced the GI bill.

We have a tendency inside the Pentagon—I spent 5 years in the Pentagon—of looking at these issues simply in terms of retention. Specifically, as the dialogue went back and forth, we talked about how important it is to retain field-grade officers. In the Pentagon, you're hanging around generals, admirals, and captains, and you get a lieutenant colonel in front of you, and you tend to think he's a lower-ranking officer. In a rifle company, a lieutenant colonel is God. We tend to forget, in this environment—and I say that as someone whose son and son-in-law both are enlisted in the Marines right now—we tend to forget that 70 percent of those who enlist in the Marine Corps, and 75 percent of those who enlist in the Army, leave the Service at or before the end of their first enlistment.

We have a stewardship to those people, that's quite a bit different than the way we address the career force. These multiple deployments, with very short time periods in between, have an emotional impact that stay with people to the end of their lives. I say that as someone whose first job in Government was working as a counsel on the House Veterans Committee, 32 years ago, dealing with the problems of people who served in Vietnam.

So, part of it's a retention issue, part of it is how we deploy the force, but the traditional dwell-time ratio has always been two to one, until we hit this period. Two years here for 1 year gone. One year here for 6 months gone. We got all the way down to below 1 to 1. The Commandant of the Marine Corps has been very specific about trying to get it back to 2 to 1, we tried to pass an amendment just saying it ought to be 1 to 1.

Whatever your political thoughts are about the wars we're fighting, or anything else, we need a safety net under these people for their long-term emotional health.

So, when you're getting the visits of all of these high rankers, and we're talking about retention, and we tend to do it constantly on this committee, please do not forget that the issue is much larger than retention. It is the long-term welfare of our citizen soldiers who step forward to serve.

Ms. Flournoy, I waited for a second round, because I think it's very important to hear from you on two other issues with respect to your views on where the Department should be going. I say this with a little bit of a sense of history of what happened in the last administration with the first occupant of the position that you're about to move into.

We'll need to understand clearly what your views are on these issues as we move forward. The first is Afghanistan. You mentioned that you support the notion of an immediate and fairly large-scale increase of the American military into Afghanistan. Can you please articulate your view of this strategy in military terms, and what the endpoint is, where we will see that our mission is complete?

Ms. FLOURNOY. That is the question, Senator. What I would say is that I think our objective in Afghanistan has to be to create a more stable and secure environment that allows longer-term sta-

bilization, and prevents Afghanistan from returning to being a safe haven for terrorism.

I think job number one, or one of the top jobs for this new administration, is going to be crafting the strategy that you're asking for. In doing so, not just for the military piece, and how many troops we're going to deploy, but for the U.S. Government as a whole, working with our North Atlantic Treaty Organization (NATO) allies, working with the Afghan Government, working with international donors. We need a comprehensive strategy that articulates the end-state we're trying to achieve, and then bring all of the elements of national power—not just the military—to bear on trying to achieve it.

I can't tell you what that strategy is, yet. But I do know that President-elect Obama and Secretary Gates have both been very clear that they're committed to developing that as an early priority going forward.

Senator WEBB. I would hope that in this process, we can end up with a clearly articulated end-point. I think that was the great failure in Iraq. If you cannot clearly articulate when the commitment will be ended, then we tend to move sort of in an ad hoc way, based on the situation of the moment, and all around the world, we tend to end up staying in different places, and not necessarily resolving problems in a way that fits our national interest.

My second question regards NATO expansion. I spent a good bit of time working in NATO, when I was Assistant Secretary of Defense. This is not the NATO that I was working with in the 1980s. In my view, NATO was kind of broken down into three pieces. This is my concern, anyway, and I would like to hear your views on this.

We have the United States having moved into position—even more so than in the 1980s—of being the military guarantor. We have the traditional countries of NATO moving into their historic relationships with Central and Eastern Europe—there's nothing wrong with that, it's to be expected, and it's healthy for Germany, particularly—and then we have, in my view, picked up a worrisome set of dependencies, for lack of a better term. Not allies, in the traditional sense of the word. What do you think about that? What do you think about the further expansion that's on the table?

Ms. FLOURNOY. Senator, I think this is one of those issues where the upcoming NATO summit's going to offer a great opportunity to sort of elevate the discussion between the United States and our allies, on what is the alliance and what is our purpose, here?

I think that NATO expansion originally started out as being very much about creating a Europe that's whole and free. I think that's still a worthwhile objective. But, I think going forward, there's a sense of, we need to have some clear criteria for membership, and also evaluate it on a case-by-case basis.

I'm not prepared to go country-by-country and give you that evaluation from where I sit now, given that I haven't been deeply involved in these issues for awhile. But I do think that the question you're raising of the purpose and nature of expansion going forward is important to inform case-by-case judgments going forward on which additional members would make sense, and which would not.

Senator WEBB. Obviously, stability is one issue. But being mandatorily committed to coming to the defense of a country that has been allowed into the NATO alliance, as in the situation last year with Georgia—is very troublesome. Europe has a very tangled history when it comes to this, if you go back and examine the period leading up to World War I. There's a lot of resonance in terms of the tangled commitments that were made. I would hope that we could proceed forward in a very careful way, in terms of making any more mandatory obligations as to where our military would be used.

I thank all of you for your time today, and I wish you the best, and I obviously am going to support your nominations, and I look forward to working with you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Webb.

I have a number of additional questions that I want to ask right now, but I want to join my voice with that of Senator Webb on the NATO expansion issue, the caution that is essential.

For the reason that he gives, which is the requirement that we come to the assistance of all members, but also because of the veto that every member has on any military activity—it's a very serious matter. There's no easy way to address it. We've gone into this in prior years, as to whether that ought to be modified in some way. But it's really important that any member meet all of the requirements of NATO, to reduce the likelihood that there will be such a veto, if all but one member of NATO wants to take action, and one member refuses—that's it.

But there's also, of course, the issue that Senator Webb raises, about the requirement of using military action to come to the support of any nation that feels it's been attacked. The complication and complexity of that kind of a decision, it seems to me, was highlighted by the recent activity of Russia and Georgia.

I want to add my voice to the caution that Senator Webb, I believe, expressed on that.

With the time remaining—we have votes in 10 minutes, and even if I'm alone here, I have more than 10 minutes of questions. But let me start off, first, on Iraq. You have addressed, Ms. Flournoy, one aspect of the Iraq issue, and the difficulty of knowing what the facts will look like down the line, in terms of what our future commitments, if any, ought to be to Iraq.

But one of the issues, of course, would be whether or not the Iraqi people ratify the SOFA. What happens if public opinion comes out in opposition to the referendum? I would just ask you whether you agree that would also be a fact, which complicating complexity, which would need to be thrown into the mix here?

Ms. FLOURNOY. Absolutely, Senator.

Chairman LEVIN. On Afghanistan, and I think all of us have a lot of questions relative to Afghanistan, and some have already been asked, but here are a few additional ones.

I have believed for a long time that the Afghan National Army ought to be placed in the position where it's most needed. Where it's most needed is where the greatest threat is, and the greatest threat is along the border. Yet, we don't see—as far as I can tell—the Afghan Army being located along that border.

On top of that, there was a commitment made to President Bush that the Afghan Border Police would be put under the jurisdiction of DOD. The Afghan Army is an army that is very highly motivated, highly professional. Their fierce dislike of the Taliban comes from a long history, and they have the willpower to take on that issue along the border. There's a contrast there with the Border Police, and I won't go into too many details, but the Border Police does not have that kind of professionalism, or willpower.

I'm just asking you and urging you to look into the question, Ms. Flournoy, of the location of the Afghan Army, whether we should ask the Afghans to locate more of their army along the border. That border is a threat, not only to Afghanistan, but the areas in Pakistan which harbor the terrorists, Taliban leaders, and extremists are a threat directly to this country.

I would ask you to take on, as one of your early policy issues, the question of not just the border, which is obviously high-up on your radar already, but the question, specifically, of the Afghan Army, where we should urge that it be located, whether the Border Police should be part of the Ministry of Defense, or the Ministry of Interior—and there's a huge different in Afghanistan, in terms of the professionalism of those ministries.

Whether, indeed, a commitment was made to President Bush, relative to that Border Police. Whether that commitment's been kept, because those cross-border incursions from Pakistan, again, not only represent a huge threat to Afghanistan, but the presence of that safe haven in Pakistan, I know, is now allegedly being addressed more by the Pakistanis, and that's great.

But I have my skepticism as to whether their heart is totally in it, and whether or not they're going to succeed, and that means that either if the Pakistan heart is not in it, whether there's any ambiguity there, or whether they're unsuccessful even with the willpower, puts a great onus on the Afghans to control their own border, and to stop that incursion.

I would ask you, and to the extent you're going to be interested and involved—I know you're interested, Mr. Lynn, but involved in this issue—I would ask both of you to put some real specific focus on those issues, would you do that?

Mr. LYNN. Absolutely, Mr. Chairman.

Ms. FLOURNOY. Absolutely.

Chairman LEVIN. Missile defense, I think Senator Begich asked one part of that question, but I come at it from a similar angle, I think to the one that was discussed by Mr. Lynn. Let me just ask this question of you, Mr. Lynn. Do you agree that the Missile Defense Agency, and the missile defense programs of the Department, should be subject to regular processes for budgetary, acquisition, testing, and policy oversight, rather than being managed outside of ordinary management channels?

Mr. LYNN. Mr. Chairman, I think that all of our military programs should be managed through those regular programs, that would include missile defense. I would think any exceptions should be rare, and fully justified.

Chairman LEVIN. Thank you.

Ms. Flournoy, on the European missile defense issue—do you believe it would be important to review the proposed European mis-

sile defense deployment in the broader security context of Europe, including our relations with Russia, the Middle East, and to consider that deployment, as part of a larger consideration of ways in which to enhance ours and European security?

Ms. FLOURNOY. Yes, I do, sir. I think it's an important candidate issue for the upcoming QDR.

Chairman LEVIN. Thank you.

Mr. Lynn, the Air Force and the Navy have been reducing their end strengths in recent years, but have announced that they are halting the reductions, short of previously stated goals. Can you give us your thoughts on the current size of the Active Force, both the Air Force and Navy size, but also the Army and Marine Corps who have been steadily increasing under the requirements established by this Congress, that have pushed very hard for increases in the size of the Army and Marines? But comment, if you will, specifically on the stated goals of the Air Force and the Navy, and whether they should be kept, or whether they ought to be modified?

Mr. LYNN. Mr. Chairman, I think that's going to be a central part of the review in the next QDR. I think any strategic review has to include within it a thorough review of the force structure, because it's the first element in terms of how we address the threat, is the force structure that we develop. Most of the budget implications, at least the initial budget implications, flow from those judgments. So, we need to start with those judgments. But, I couldn't pre-judge at this point, the results.

Chairman LEVIN. That's fine.

Over the past 2 years, we've spend a huge amount of time working with DOD and the Department of Veterans Affairs (VA) to improve the care and treatment of our wounded warriors. We've adopted Wounded Warrior legislation which was comprehensive, to try to address some of the problems which were very visible and dramatically disclosed by the Washington Post series of articles that related to Walter Reed Army Medical Center. But it was a much deeper problem that we addressed, in terms of the relationship between the Departments—DOD and the VA—to try to make sure there were seamless transition, that there were common standards and criteria for assessments, including disability ratings, and we made some major reforms in that area.

Mr. Lynn, if confirmed, will you ensure that the Department continues to work with the VA to make sure that the wounded servicemembers and their families receive the treatment that they need and deserve? Will you assure us that this issue is going to remain at a high visibility level in the Department throughout the period of transition, and beyond?

Mr. LYNN. Absolutely, Mr. Chairman.

Chairman LEVIN. Let me address this question to both of you, Mr. Lynn, Ms. Flournoy, about U.S.-Russia relations, and what steps you believe should be taken to improve the relationship in the near-term, mid-term, and long-term. What issues face the Department now, which can affect that U.S.-Russia relationship, and how important is it that we try to improve that relationship?

Why don't you start, Mr. Lynn, and then I'll go to Ms. Flournoy.

Mr. LYNN. Mr. Chairman, the Russians still have the largest nuclear arsenal, and in that context alone, we need to pay attention to that critical relationship. We need to develop that relationship as far as we can, we have a Strategic Arms Reduction Treaty renewal to evaluate, as to whether that's the right way forward. We have ongoing relationships in terms of the Nunn-Lugar program. That's an important way that we've been able to reduce the threat of the proliferation of those nuclear weapons.

At the end of the day, Mr. Chairman, this is one of the most critical relationships, both for defense and foreign policy reasons, that the Nation has.

Chairman LEVIN. Ms. Flournoy?

Ms. FLOURNOY. Some of our most vital interests—preventing further nuclear proliferation, preventing the use of nuclear weapons by terrorists—it's very difficult for the United States to safeguard those interests without very deep, and broad, international cooperation. When you look at the nature of some of the tasks, getting Russia to help police nuclear materials, ensure the safety of nuclear weapons arsenals, and so forth, they're a very critical partner in that regard.

I guess I would start from the premise that we do have some very important common interests, and although recent Russian behavior—particularly with regard to Georgia, with regard to energy supplies in Europe and so forth, have been great cause for concern.

I would hope that going forward, the new administration would reopen a strategic dialogue with Russia that would seek to identify areas—both of cooperation, and areas where we would like to see more constructive behavior, from Russia, going forward. But, I think it's an absolutely critical relationship that we need to be working actively, going forward.

Chairman LEVIN. Ms. Flournoy, the Chairman of the Joint Chiefs recently spoke about the need for a whole of government approach, and the limits of the use of military power as a tool of U.S. foreign policy. Admiral Mullin stated that our Armed Forces ought to be willing to say when it believes that the military is not the best choice to take the lead, in place of our civilian department, and agencies of government. He emphasized the need to provide our civilian departments—including State Department, U.S. Agency for International Development, Agriculture, and Justice, with the resource that they need to take the lead, even if that means less resources for DOD. I'm wondering whether you agree with that? I think Secretary Gates has spoken, even before Chairman Mullin, very eloquently about these issues. I'm wondering whether or not you basically agree with that?

Ms. FLOURNOY. I do agree, sir. Both in the need for much more integrated approaches using all of the elements of national power to achieve objectives, but also in the need to invest in building capacity of our non-military instruments, to be able to perform alongside our military.

Chairman LEVIN. All right, thank you.

Mr. Lynn and Ms. Flournoy, the recovery operations in North Korea for American prisoners of war who have been missing in action since the Korean War is an important humanitarian effort,

and it should not be caught up, or tied to the political and strategic issues surrounding North Korea.

Since the inception of the bilateral operations in 1996 in North Korea, until their untimely suspension by Secretary Rumsfeld in 2005, this program was seen by both parties as a humanitarian program. It's incredibly important to the families of those missing servicemembers that their remains be recovered.

Will you seek to resume those operations in cooperation with the North Koreans, Mr. Lynn?

Mr. LYNN. Mr. Chairman, I'm going to have to become more familiar with that program, but I'll endeavor to do that, as a high priority.

Chairman LEVIN. Thank you.

Ms. Flournoy, are you familiar with that program?

Ms. FLOURNOY. I'm aware that it was stopped, but I am not too familiar with the details, but I'd be happy to look into it, sir.

Chairman LEVIN. Thank you.

Mr. Johnson, the convening authority for military commissions for DOD was quoted yesterday as saying that she declined to refer a detainee case for prosecution, because "his treatment was torture." She said it was abuse of an uncalled for and clearly coercive nature, to use her words. Now, assuming that Ms. Crawford's statements are accurate, would you agree that these interrogation techniques are inconsistent with Common Article III of the Geneva Conventions, the requirements of the Army Field Manual, and should not be used by DOD?

Mr. JOHNSON. Yes, Mr. Chairman, I believe that and I also believe that such things are inconsistent with American values.

Chairman LEVIN. Mr. Lynn and Ms. Flournoy, would you agree with that?

Mr. LYNN. I certainly agree that our interrogation techniques need to follow the Geneva Conventions and the Army Field Manual.

Chairman LEVIN. Ms. Flournoy, would you agree?

Ms. FLOURNOY. I would agree with Mr. Lynn's statement.

Chairman LEVIN. With Mr. Johnson's statement?

Ms. FLOURNOY. Yes. I believe that torture should never be used by the United States, under any circumstances.

Chairman LEVIN. But, would you agree that the description which she gave met the legal definition of torture? Or are you not in a position to—

Ms. FLOURNOY. Sir, I am not in a position, I am not familiar with that particular case, I'm sorry.

Chairman LEVIN. All right.

Mr. Johnson, according to an article in yesterday's Washington Post, the evidence against detainees at Guantanamo Bay is "in a state of disarray." Apparently, so chaotic that it's impossible to prepare for a fair criminal trial. If confirmed, would you personally review the evidence against the Guantanamo detainees, for the purpose of determining—in consultation with other appropriate administration officials—how to proceed with those cases?

Mr. JOHNSON. If confirmed, Mr. Chairman, I anticipate being part of an inter-agency review with respect to the manner in which such cases are brought, and to take a good look at the evidence

against the detainees—both with respect to potential criminal prosecutions, and their continued detention, yes, sir.

Chairman LEVIN. Do you have a view as to whether or not it's preferable or appropriate to try detainees who are going to be charged with criminal offenses before military commissions, rather than Article III courts?

Mr. JOHNSON. Senator, first of all, I have predispositions. I don't, at this point, have an informed view. If confirmed, I'd want to get in there and learn a lot more about this subject, and learn about the nature of the evidence that we have on some of these detainees, so I think I know what I don't know.

But I do have some predispositions on this subject, which I think are similar to the President-elect's. I think that it is preferable that we proceed in Article III civilian courts. I do not rule out the possibility and the need for prosecutions in some form of Uniformed Code of Military Justice court-martial or a properly constituted military commission. Military commissions have existed since before World War II. I have some qualms and some issues with how they are currently constituted, and I think the new administration will take a serious look at that.

But I think that, if I could add this—we need to also be mindful of the future, not just the 250 or so detainees at Guantanamo. We are certainly going to have detainees in the future, so we need to build a system that has credibility and survives legal scrutiny for the future as well as the people that are currently there.

Chairman LEVIN. In that review, I would recommend that you take a look at the debates and decision of this committee and Congress, relative to those procedures. There was some reference to that by Senator Graham, and I would urge you to take a look at the decisions, the debates, the issues which we confronted, and ultimately divided on. But, for a time, we thought, at least a pretty good majority—bipartisan majority—to put in place.

If you would just take a look at that history, that, I think, will inform some of your thinking as to what direction we need to go in this area.

Mr. JOHNSON. Thank you.

Chairman LEVIN. Can you do that?

Mr. JOHNSON. Yes, sir.

Chairman LEVIN. On access to documents, Mr. Johnson, the Senate Armed Services Committee has conducted an extensive investigation into the treatment of detainees in U.S. custody. For a long period of time, at least, that investigation was impeded by objections from the Department of Defense, and particularly by the Office of the General Counsel, to providing requested documents and information to the committee.

There were a number of excuses that were provided to us, for why documents and information were withheld, including claims that the communications were "deliberative" or that advice was "pre-decisional," or other privileges. None of those privileges, and a number of others that were asserted, were recognized, or ever have been recognized, by Congress or the Courts as a basis for withholding documents from Congress.

The objections that the Department raised delayed our investigation and report. I would ask you this—whether you would agree

that a good working relationship between the Department and the committees of Congress is in the interest of everybody? It's important for the Department to cooperate to the maximum extent practical with requests for documents and information made in the performance of our oversight function.

Mr. JOHNSON. Mr. Chairman, I do and I will undertake this if any member of the committee or your committee staff believes that DOD has asserted an objection that does not have a basis in law, I want to know about that right away.

Chairman LEVIN. Okay.

Mr. JOHNSON. I'd appreciate a phone call directly to me.

Chairman LEVIN. That's great. After you're confirmed, we'll not only make certain that that happens in the future, and hopefully is not needed, but we're going to ask you to take a look at some of the documents that are denied us, the reasons for them, and to see whether or not you are able to make them available, based on prior requests.

Mr. JOHNSON. Yes.

Chairman LEVIN. Okay.

The President-elect has made a very strong commitment to openness and transparency in government and you're going to be right in the center of that when it comes to oversight, and your decisions will be important in that regard, and we welcome your commitment to that kind of openness and transparency.

Mr. Lynn, President-elect Obama said that it's possible for us to keep the American people safe, while adhering to our core values and ideals, and that's what he intends to carry forward in the new administration. Would you agree that restoring America's moral leadership globally is essential to our security?

Mr. LYNN. Yes, sir.

Chairman LEVIN. Will you agree that sending the clear signal that the United States does not engage in torture, or cruel, inhumane or degrading treatment, which are prohibited by our anti-torture laws, that that clear signal will enhance our standing globally, and enhance our security?

Mr. LYNN. I do.

Chairman LEVIN. Finally, I don't want to leave you too much off the hook, Mr. Hale, because you're—

Mr. HALE. That's quite all right, Mr. Chairman.

Chairman LEVIN. I know your family and you would be disappointed if that were true, so let me ask you this. Our current defense plans and programs are extremely expensive. You have a huge budget deficit. What we're going to need you to do is to work, obviously, with the leadership of the Department to work with us to find places where we can save money. We know where we have to spend money. We're going to spend money to support our men and women in uniform, to give them everything they need to prevail on their missions, and we're going to give our military families the support that they deserve. We're going to provide the equipment that's essential, and the healthcare that's essential.

What we cannot do is spend money either on systems we don't need, or excesses that we've seen too much of.

I think you're familiar, are you, with some of the Inspector General's reports on expenditures in Iraq?

Mr. HALE. Yes, in general terms.

Chairman LEVIN. We're talking tens of billions, maybe hundreds of billions of unaccounted for dollars. So we're going to need your energy to not just help us reform business systems, which we need to do, and we need all your help, I guess, in the area of reforming acquisition. I know a number one priority, or one of the top priorities I guess, not quite number one, but one of the top priorities of the new administration is acquisition reform.

But you're going to be in a key position, Mr. Hale, we're going to need your full energy and your passion in this area if we're going to succeed.

We have a vote on, now, in the Senate, and you've been here a long time.

Ms. Flournoy, I particularly want to compliment your children.

Ms. FLOURNOY. Thank you, aren't they wonderful?

Chairman LEVIN. They're great. I want to compliment all of you for your answers, and for your commitments in working with this committee.

But I really want to embarrass your children, Ms. Flournoy, because of all of the people here this morning, I think they've been the most outstanding. [Laughter.]

With that, again, we will move these nominations as quickly as we can. There are some things that have to be given to this committee which are not yet available to this committee. We expect they'll be fully routine, but nonetheless, they have to be provided. We're just going to bring your nominations as quickly to fruition as we can in terms of confirmation.

With that, we congratulate you, we thank you for your service, and again, thank your families. We thank all of the families and friends who have shown up here today in support of these nominees, and we will stand adjourned.

[Whereupon, at 12:24 p.m., the committee adjourned.]

[Prepared questions submitted to William J. Lynn III by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense (DOD) Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. As the executive director of the Defense Organization Project at the Center for Strategic and International Studies, I was involved in developing the analytical work that served as a foundation for the eventual Goldwater-Nichols Act. I believe that Act has yielded enormous benefits to the Department through strengthened joint operational commanders, better joint advice in the Pentagon, and improved acquisition management structures. At this time, I do not see the need for any specific changes. If confirmed, my subsequent experience in the Deputy Secretary of Defense position could potentially suggest needed changes and I would consult with Congress on any such issues.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I believe the Department's acquisition management processes and organizations should be a high priority for review by the new administration with the objective of improving the cost controls and responsiveness of that system. That review could potentially suggest changes to certain aspects of Goldwater-Nichols. I also believe it will be important to address recommendations for interagency reform.

RELATIONSHIPS

Question. What is your understanding of the relationship between the Deputy Secretary of Defense and each of the following:

The Secretary of Defense.

Answer. I expect the Deputy to be able to perform any of the duties of the Secretary, but to be largely focused on the daily operations of the Department. The Secretary and the Deputy would work together to develop defense strategy and policy, but the Deputy would serve largely as the Department's Chief Operating Officer, responsible for the operation of DOD and implementation of national defense policy and strategy. This will include financial management, personnel policies, acquisition management and integrity, oversight of military departments' roles, base realignment and closure (BRAC), Quadrennial Defense Review (QDR) management, legislative affairs, public affairs and the like.

Question. The Under Secretaries of Defense.

Answer. If confirmed, my role as Chief Operating Officer would be to ensure collaboration across the various offices of the Under Secretaries of Defense. I would further provide that the Secretary's guidance and priorities are understood and implemented, and that matters requiring the Secretary's attention are raised to his level.

Question. The Deputy Chief Management Officer (DCMO) of DOD.

Answer. As a direct reporting relationship, the DCMO would provide feedback on the progress of the Department toward achieving its management goals. The DCMO would also work closely with me, if confirmed, to determine future changes to our strategic plan. The DCMO would routinely interact with the Military Department Chief Management Officers (CMOs) to ensure success.

Question. The Assistant Secretaries of Defense (ASD).

Answer. If confirmed, for direct reporting ASDs the relationship would be the same as with the Under Secretaries. For those reporting to an Under Secretary, I would rely primarily on that Under Secretary to manage each area.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff.

Answer. The Chairman is the principal advisor to the President and National Security Council. If confirmed, I will work closely to coordinate any issues with the Chairman and Vice Chairman.

Question. The Secretaries of the Military Departments.

Answer. If confirmed, I will work closely with the Secretaries of the Military Departments to ensure that the policies of the President and the Secretary of Defense are carried out in their respective military departments.

Question. The Chief Management Officers of the Military Departments.

Answer. If confirmed, one of my most important duties would be to ensure that the Department can carry out its strategic plan. Interactions with the military department CMOs would largely be through the DCMO. This would allow for monitoring and measuring of the Department's progress by establishing performance goals and measures for improvement.

Question. The Service Acquisition Executives.

Answer. If confirmed, I will be actively involved in setting acquisition policy. However, I would expect most policy coordination to occur through the USD(AT&L). My objective would be to ensure acquisition policy, procedures, and regulations are followed and appropriate improvements pursued.

Question. The Chiefs of Staff of the Services.

Answer. If confirmed, I will work to ensure the Service Chiefs are aware of the Secretary's guidance and their concerns are coordinated with the Secretary.

Question. The Director of National Intelligence (DNI).

Answer. If confirmed, I would, together with the Secretary of Defense, routinely interact with the DNI. More detailed coordination will occur between the DNI's staff and the USD(I).

Question. The Inspector General of DOD.

Answer. If confirmed, I would encourage the Inspector General to carry out his/her duties in accordance with the Inspector General Act while ensuring there are no barriers to independence or mission accomplishment.

Question. The General Counsel of DOD.

Answer. If confirmed, I will seek advice from the General Counsel on all relevant subjects.

Question. The Chief of the National Guard Bureau.

Answer. If confirmed, I will work closely with the Chief of the National Guard Bureau to understand all Guard-related issues and to ensure he understands the Secretary's guidance.

Question. The Judge Advocates General of the Services.

Answer. The Services' Judge Advocates General have important roles in their respective Services. However, the majority of Service Judge Advocate General issues would be coordinated through the Office of the General Counsel.

DUTIES OF THE DEPUTY SECRETARY OF DEFENSE

Question. Section 132 of title 10, U.S.C., provides that the duties of the Deputy Secretary of Defense are to be prescribed by the Secretary of Defense.

Assuming that you are confirmed, what duties do you expect the Secretary to prescribe for you?

Answer. If confirmed, I expect to function as a traditional deputy, serving as the alter ego to the Secretary of Defense in a variety of forums. However, I expect the Secretary would continue to focus primarily on external aspects of the Defense Department, while I would focus on the internal management functions of the Department, similar to that of a Chief Operating Officer. Those functions would most likely be particularly focused on the Department's planning, budgeting, acquisition, personnel, and management activities.

Question. What background and expertise do you possess that you believe qualify you to perform these duties?

Answer. My background includes service in two previous civilian positions in the Defense Department, more recent experience in defense industry, and previous work in support of Congress. I believe these three bodies of experience will provide a solid foundation for performing the duties of the Deputy Secretary of Defense, if confirmed. I served as the Under Secretary of Defense (Comptroller) from 1997 to 2001. In that position, I was the chief financial officer for DOD and the principal advisor to the Secretary of Defense for all budgetary and fiscal matters. From 1993 to 1997, I was the Director of Program Analysis and Evaluation (PA&E) in the Office of the Secretary of Defense, where I oversaw the Defense Department's strategic planning process. I currently serve as senior vice president of Government Operations and Strategy at Raytheon Company, leading the company's strategic planning. Before entering DOD in 1993, I served for 6 years on the staff of Senator Edward Kennedy as liaison to the Senate Armed Services Committee. Earlier in my career, I worked as a Senior Fellow at the National Defense University and on the professional staff at the Institute for Defense Analyses, and served as the executive director of the Defense Organization Project at the Center for Strategic and International Studies. Although I believe my background provides a solid foundation for the position, I also recognize that the job of Deputy Secretary of Defense encompasses a very diverse set of challenges and responsibilities, and I also know that the Defense Department and its programs have undergone significant changes in the 8 years since I left government service. So I have much to learn and my success in fulfilling the duties of the position will be dependent on the knowledge and advice of the civilian experts and military servicemembers in the Department.

Question. Do you believe there are actions you need to take to enhance your ability to perform the duties of the Deputy Secretary of Defense?

Answer. The Defense Department has experienced profound changes over the 8 years since I left government service in 2001. If confirmed, I will need to receive extensive information and advice from the civilian and military professionals in the Department on recent developments on operations, defense programs, and organizational and process changes. I believe it is important to establish strong working relationships with the senior leaders in the Joint Staff and the military departments and to establish an atmosphere of open communications so that I can assist the Secretary with the benefit of the best information and advice available for decision-making. I also look forward to the opportunity to spend time with Deputy Secretary England and previous incumbents of the office to receive the benefit of their experience and wisdom.

Question. What changes to section 132, if any, would you recommend?

Answer. Based on my previous experience in the Department, I believe the statutory authorities for the Office of the Secretary of Defense are appropriate for the effective performance of the assigned duties. So at this time, I have no changes to recommend, though, if confirmed, my view could change at a later date based on experience in the position.

Question. Section 132 was amended by section 904 of the National Defense Authorization Act for Fiscal Year 2008, to provide that the Deputy Secretary serves as the Chief Management Officer (CMO) of DOD. The Deputy Secretary is to be assisted in this capacity by a DCMO.

What is your understanding of the duties and responsibilities of the Deputy Secretary in his capacity as CMO of DOD?

Answer. If confirmed, my most important duty as DOD CMO will be to ensure that the Department can carry out its strategic plan. To do this, I will ensure the Department's core business missions are optimally aligned to support the Department's warfighting mission. I will develop and maintain a strategic management plan for business reform, and will monitor and measure the Department's progress by establishing performance goals and measures for improving and evaluating overall economy, efficiency, and effectiveness of the Department's business operations.

Question. What background and expertise do you possess that you believe qualify you to perform these duties and responsibilities?

Answer. My previous service as Under Secretary of Defense (Comptroller) included major responsibilities for the oversight and improvement of the Department's financial management processes and organizations, and I devoted considerable time and attention to those aspects of my responsibilities. Although the responsibilities of the Deputy Secretary are far broader, I believe my experience as Comptroller provides a strong foundation for the CMO duties. In addition, as Director of the Office of PA&E, I was responsible for the Department's strategic planning. My experience in that area has also been broadened over the past 6 years through my experience with industry strategic planning.

Question. Do you believe that the CMO and DCMO have the resources and authority needed to carry out the business transformation of the DOD?

Answer. My understanding is that an office has been established and funded, and a career senior executive civilian has been appointed as Assistant DCMO to provide continuity in overseeing business transformation initiatives. The DCMO has been added to the membership of all of the Department's senior decision boards, and the DCMO has been named as vice-chair of the Defense Business Systems Management Committee (DBSMC). The charter of the Business Transformation Agency (BTA) has been amended so that the Director of BTA reports directly to the DCMO. Finally, the military departments have established CMO organizations, which will oversee newly established Business Transformation Offices. This provides a framework for ensuring integrated information sharing and collaborative decisionmaking across the Department. These organizational changes occurred after I left government service, so, if confirmed, I will need to review their effectiveness and determine, in consultation with the DCMO, whether any additional authorities or resources are appropriate.

Question. What role do you believe the DCMO of DOD should play in the planning, development, and implementation of specific business systems by the military departments?

Answer. I expect the DCMO will provide integrating guidance and liaison with the Director of the BTA and the CMOs of the military departments. The DCMO will also work to resolve policy impediments to implementing cross-functional solutions across the Department.

Question. Do you believe that the DCMO should have clearly defined decision-making authorities, or should the DCMO serve exclusively as an advisor to the Deputy Secretary in his capacity as CMO?

Answer. The DCMO is a new position that did not exist during my tenure in the Department, and the position has not yet been filled and fully implemented. I believe some time will be needed to review the Department's experience with the operation of the new position in order to determine the precise authorities and relationship to the Deputy Secretary.

Question. What changes, if any, would you recommend to the statutory provisions establishing the positions of CMO and DCMO?

Answer. I would defer any recommendations regarding potential changes to statutory provisions pending experience with the new position and time to review its operation within the Department.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Deputy Secretary of Defense?

Answer. See below.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. There are an enormous number of challenges facing DOD today, and the next Deputy Secretary will have the responsibility to assist the Secretary of Defense in addressing a large number of critical tasks. If confirmed for this important position, I would focus on three initial challenges. First, during a transition in a time of war, it is essential that the Department executes a smooth transition of the leadership as quickly as possible. To that end, I would work with the Secretary and Congress to assemble a top-quality cadre of civilian leaders with the expertise and experience to effectively perform the duties of the key positions that must be filled. As part of that effort, I would also place a high priority on strengthening the capabilities of the career staff, which is essential to address the many near-term tasks facing the Department as well as the longer-term challenges. A second challenge will be to conduct at least three sets of major program and budget reviews in the first few months of the new administration. These include review of the second fiscal year 2009 supplemental appropriation submission, revisions to the draft fiscal year 2010 budget and its timely submission to Congress, and the expeditious completion of the QDR and the associated formulation of a defense strategy and the fiscal year 2011 defense program and budget. In the QDR, I believe a key task will be to lay the foundation for an effective force for the 21st century and to establish the right balance among capabilities for addressing irregular warfare and counterinsurgent operations, potential longer-term threats from a high-end or near-peer competitor, and proliferation threats from rogue states or terrorist organizations. A third major challenge will be to pursue an active reform agenda for the management of the Department. In particular, if confirmed, I would devote a considerable portion of my time and energies to efforts to improve the Department's processes for strategic planning, program and budget development, and acquisition oversight. Improving the Department's record on cost control, and the credibility of its budget and cost forecasts, would be a priority objective for those efforts.

PRIORITIES

Question. What broad priorities would you establish, if confirmed, with respect to issues which must be addressed by DOD?

Answer. My first priority, if confirmed, would be to work with Secretary Gates to provide the resources needed to support our forces currently engaged in operations in Iraq, Afghanistan, and other parts of the world. That includes meeting the military end strength goals needed to support those operations while easing the deployment burdens on our servicemembers and their families. It also includes ensuring the effectiveness of the programs needed to support the readiness and quality of life of those forces and the equipment they need to operate effectively with adequate protection. While I believe the needs of the current operations must be the highest priority, the Department's leaders must also address the longer-term recapitalization and modernization needs of the force. To that end, another key priority, if confirmed, would be to provide strong leadership and management of the QDR and the various program and budget formulation efforts that will be needed over the next few months. The priorities in those efforts would be to oversee the development of an integrated strategy, program, and budget for meeting the challenges of the 21st century. Meeting the recapitalization and modernization needs of the forces will also require acquisition programs and processes that deliver effective equipment in a timely manner and within cost targets so that the Department can sustain the confidence of Congress and the taxpayers that public funds are being used effectively.

FISCAL YEAR 2010 PRESIDENT'S BUDGET REQUEST

Question. What role do you expect to play, if confirmed, in the development of the President's budget request for DOD for fiscal year 2010?

Answer. If confirmed, I would expect to oversee the development of the fiscal year 2010 budget request, working with Secretary Gates to ensure that it reflects his strategic vision. I would work with the Office of Management and Budget (OMB) to shape the Department's fiscal year 2010 fiscal controls in a way that allows the Department to achieve the Nation's national security goals.

Question. What steps do you expect the incoming administration to take to formally review the Department's 2010 budget request and, as necessary, make those changes required to ensure that the budget request fully conforms with the policies of the incoming administration and the needs of DOD?

Answer. My understanding is that the Department has prepared a draft fiscal year 2010 budget baseline that is ready for review by the new administration. Although that budget will eventually be submitted by President Obama, there will be only a limited amount of time for DOD and OMB to make revisions prior to submission to Congress in the late-March to mid-April timeframe. This is a problem com-

mon to all new administrations. The review of the fiscal year 2010 budget request will, of necessity, have to be limited in scope, addressing the key initiatives of the new administration such as ground forces end strength, quality of life programs, and selected acquisition programs. A broader review would be conducted as part of the QDR and the associated formulation of the fiscal year 2011 defense program and budget.

Question. What steps do you believe need to be taken to ensure an appropriate level of investment in the future force in the face of pressing requirements for completing the mission in Iraq and Afghanistan, for resetting of the force, and for meeting ongoing operational commitments across the globe?

Answer. If confirmed, I will vigorously review the Department's resources requirements and work to ensure that any budget request provides sufficient resources to achieve the appropriate level of investment in the future force to meet the Nation's national security needs.

Question. In the John Warner National Defense Authorization Act for Fiscal Year 2007, section 1008, Congress required that the President's annual budget submitted to Congress after fiscal year 2007 include a request for the funds for ongoing operations in Iraq and Afghanistan and an estimate of all funds expected to be required in that fiscal year for such operations.

What problems, if any, do you anticipate the Department will encounter in complying with this budgeting requirement?

Answer. The fiscal year 2009 defense budget passed by Congress last year did not include funding for current war operations. In addition, the fiscal year 2009 supplemental appropriation enacted by Congress last year provided funds for war operations for roughly half of the fiscal year. As a result, as Secretary Gates recently indicated, substantial additional funds will be needed for the remainder of the fiscal year. The draft request prepared by the Department will need to be reviewed by the new administration, and it will also need to be updated to reflect expanded deployments to Afghanistan. For the fiscal year 2010 budget, as indicated above, there will be limited time available to review and revise the draft prepared by the current administration. A key issue for that review will be the formulation of new guidelines for what costs are appropriate for supplemental requests and identifying items that should be funded in the base budget. An objective should be for the Department to work with Congress to move away from dependence on supplementals for predictable items, and any supplemental requests should be carefully reviewed against strict and consistent criteria and should be provided to Congress early in the year with full explanatory information.

Question. If confirmed, what steps will you take to ensure that the Department complies with the requirements of this provision?

Answer. If confirmed, Secretary Gates and I will work with the White House and OMB to comply with the requirements of this provision.

MANAGEMENT ISSUES

Question. If confirmed, what key management performance goals would you want to accomplish, and what standards or metrics would you use to judge whether you have accomplished them?

Answer. The Department has a long history of using performance information to manage. When I last served in the Department, I oversaw initial efforts to produce a Department-wide set of performance plans and reports under Government Performance and Results Act (GPRA). Therefore, I know first-hand the challenges of identifying key management performance goals—and for establishing metrics supporting those goals that capture results accurately for an entity as varied, complex, and large as DOD. I know the Department has a suite of established performance goals, standards, and metrics. If confirmed, I would need to work with Secretary Gates to align the strategic outcomes of the Department to the defense missions assigned to us by the President before I would be in a position to select which of these I would retain, change, or revise. In general, it is important that the Department establish goals that focus on outcomes, not activities or programs. Any supporting measures should account for all aspects of performance, including but not limited to financial performance and savings.

Question. GPRA is intended to provide managers with a disciplined approach—developing a strategic plan, establishing annual goals, measuring performance, and reporting on the results—for improving the performance and internal management of an organization. The Government Accountability Office (GAO) has reported that DOD's initial Strategic Management Plan, issued in July 2008, fails to meet statutory requirements to address performance goals and key initiatives to meet such goals.

What steps would you take, if confirmed, to ensure that the Department meets statutory requirements for a Strategic Management Plan?

Answer. The Department is on record that it will provide performance goals and key initiatives in its July 2009 update to the Strategic Management Plan. If confirmed, a priority will be to work with Secretary Gates to review this plan for any revisions.

Question. Section 2222 of title 10, U.S.C., requires that the Secretary of Defense develop a comprehensive business enterprise architecture and transition plan to guide the development of its business systems and processes.

Do you believe that a comprehensive, integrated, enterprise-wide architecture and transition plan is essential to the successful transformation of DOD's business systems?

Answer. I believe that a federated enterprise-wide architecture and transition plan can contribute significantly to the development of business systems and processes.

Question. What steps would you take, if confirmed, to ensure that DOD's enterprise architecture and transition plan meet the requirements of section 2222?

Answer. It is a common challenge throughout government to bring new systems on line, while keeping legacy systems in place. Therefore, if confirmed, I will ensure that the Department adheres to the necessary goals and milestones. I also will work to ensure that architecture efforts are synchronized across all the military departments and defense agencies.

Question. What are your views on the importance and role of timely and accurate financial and business information in managing operations and holding managers accountable?

Answer. There is no question that financial and business information is a primary tool in managing operations well and establishing a fact trail that holds managers accountable for results. The Department is a complex enterprise that requires input from many diverse programs and activities to achieve its goals. Therefore, our financial and business information should be viewed within the context of overall mission performance across the Department.

Question. How would you address a situation in which you found that reliable, useful, and timely financial and business information was not routinely available for these purposes?

Answer. If confirmed, I would take steps to make sure that any such gaps were filled. However, the Department cannot afford to optimize for all information needs. If confirmed, it will be my responsibility to set priorities for identifying what kinds of information should be routinely available to decisionmakers, and to guide investments in new technology and business processes accordingly.

Question. What role do you envision playing, if confirmed, in managing or providing oversight over the improvement of the financial and business information available to DOD managers?

Answer. If confirmed, I will work to develop a refined Defense Strategy and Strategic Management Plan. Once our priorities are defined, I will ask the Department's senior military and civilian leaders to identify key performance goals and measures. This is an example of an area where I will rely on the DCMO leadership to guide the Department in aligning financial and business information systems and initiatives to achieve the goals of the defense strategy.

Question. The Department has chosen to implement the requirement for an enterprise architecture and transition plan through a "federated" approach in which the BTA has developed the top level architecture while leaving it to the military departments to fill in most of the detail. The Comptroller General has testified that "the latest version of the [business enterprise architecture] continues to represent the thin layer of DOD-wide corporate architectural policies, capabilities, rules, and standards" and "well-defined architectures [do] not yet exist for the military departments."

If confirmed, would you continue the federated approach to business enterprise architecture and transition plan?

Answer. Yes, this approach has value, as it shares the responsibility and accountability for architectural development and transition planning at the appropriate level of the Department. This is an example of an area where, if confirmed, I will rely on the DCMO and the Military Department CMOs to help continue and extend an important business transformation initiative to all components of the Department.

Question. What is your understanding of the extent to which the military departments have completed their share of the federated architecture and transition plan?

Answer. My understanding is that each military department is at a different place in the development of their component level architectures. Accordingly, this is an area that, if I am confirmed, will require my review, working through the DCMO.

Question. If confirmed, how would you work with the Secretaries and Chief Management Officers of the military departments to ensure that a federated architecture meets the requirements of section 2222 and the GAO framework?

Answer. If confirmed, I will ask the DCMO to work with the Military Department CMOs to ensure adherence to the DOD Federated Strategy guidance for architecture development and implementation.

FINANCIAL MANAGEMENT

Question. You were the Under Secretary of Defense (Comptroller) prior to 2001 and testified before the committee about financial management issues in that capacity.

What is your understanding of the efforts and progress that have been made in DOD since 1999 toward the goal of being able to produce a clean audit?

Answer. My understanding is the Department has made significant strides toward a clean audit but still has substantial work left to achieve the objective. If confirmed, I will ensure that appropriate actions are taken to continue progress toward meeting clean audit goals.

Question. Do you believe that the Department can achieve a clean audit opinion through better accounting and auditing, or is the systematic improvement of the Department's business systems and processes a prerequisite?

Answer. I do not believe the Department's clean opinion goals can be met without improvements to its business systems and processes.

Question. When do you believe the Department can achieve a clean audit?

Answer. I have not had the opportunity to review the Department's current plan for clean audit, including the goals for timing. If confirmed, I will review the plan and ensure that appropriate actions are taken to make progress toward meeting clean audit goals.

ACQUISITION OF BUSINESS SYSTEMS

Question. Most of the Department's business transformation programs are substantially over budget and behind schedule. In fact, the Department has run into unanticipated difficulties with virtually every new business system it has tried to field in the last 10 years.

Do you believe that unique problems in the acquisition of business systems require different acquisition strategies or approaches?

Answer. I understand there are a myriad of reasons for the failure to deliver these systems, some based on the way responsibilities are divided and many based on technical complexities. Based on my experience with financial management systems during my service as Under Secretary of Defense (Comptroller), many of the problems are based in culture and the failure to fix the underlying business process before buying the business system. Therefore, the approach to acquisition must be tailored to the unique challenges of each business area. In many instances, to achieve progress, it may be necessary to do more than simply upgrade the business systems, but instead change the underlying approach to the business processes.

Question. If confirmed, how would you work with the DCMO and the Under Secretaries of Defense to address these problems?

Answer. If confirmed, I would empower the DCMO to resolve the cross-functional issues that the Department faces in fielding business transformation programs. I believe cultural and business process alignment is required for any business transformation effort.

BUSINESS TRANSFORMATION AGENCY

Question. Four years ago, the Secretary of Defense established the BTA to ensure an organizational focus for business transformation efforts within the Department. The Director of BTA reports to the DCMO in his capacity as vice chairman of the DBSMC.

What role do you believe the BTA should play in improving the business operations and business systems of the DOD?

Answer. Working with the principal staff assistants, BTA is responsible for developing enterprise level business processes, standards, and data elements, and ensuring that they are accurately reflected in the Business Enterprise Architecture. BTA also has the responsibility of delivering certain Enterprise-wide business capabilities and working with the Combatant Commands to identify and satisfy operational business needs of the warfighter.

Question. What role do you expect to play, if confirmed, in the supervision and management of the activities of the BTA?

Answer. The Director of BTA will report to the DCMO. However, if confirmed, I will set key priorities for performance that business operations and business systems must achieve, and the DCMO will be accountable to me for ensuring that BTA demonstrates how those priorities are reflected in the Department's enterprise architecture and enterprise-wide system investments.

Question. Do you see the need for any changes in the BTA, or the statutes authorizing the BTA? If so, what changes would you recommend?

Answer. I have no changes to recommend at this time.

MAJOR WEAPON SYSTEM ACQUISITION

Question. What are your views regarding the defense acquisition process and the need for reform?

Answer. I believe the management of defense acquisition programs needs to be improved substantially to achieve better outcomes with regard to delivering effective equipment within reasonable cost and schedule objectives. A number of studies over the years have observed significant problems of cost growth, schedule slips, and insufficient responsiveness to urgent warfighter needs. These problems have reached the point where they have the potential to erode the credibility of the Department in this area and the confidence of Congress and the taxpayers that public funds are being used effectively. It is not clear that reform efforts over the past several years have achieved the desired objectives in terms of better outcomes in cost and schedule control as well as responsiveness. If confirmed, a high priority would be to review acquisition processes with the objective of improving stability, realism, accountability, and effective execution.

Question. If confirmed, how would you improve all three aspects of the acquisition process—requirements, acquisition, and budgeting?

Answer. I believe there are critical linkages among requirements, acquisition managing, and budgeting. To achieve effective outcomes, all three areas must be addressed in an integrated way, which requires active involvement by the Deputy Secretary of Defense, working closely with the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) and other key officials in the Department. I believe effective acquisition programs require realism and stability, together with accountability for effective execution of program outcomes. To promote these principles, I believe the overall defense program needs to be realistic and balanced within the programming and budgeting process. Within the acquisition process, realism and stability can be fostered through greater emphasis on independent assessments of costs, technology readiness, and testing maturity, particularly during the early stages of programs. Successful programs also require a careful balancing among cost, schedule, and performance goals. From my observation, the current requirements and acquisition processes have a reluctance to balance performance demands, particularly in the early stages of programs when decisions have a major impact on subsequent cost and schedule outcomes. Early cost and technology maturity assessments of the impacts of various performance requirements have the potential to achieve a better balance among cost, schedule, and performance, thus leading to better outcomes in subsequent program execution.

Question. Do you believe that the current investment budget for major systems is affordable given increasing historic cost growth in major systems, costs of current operations, projected increases in end strength, and asset recapitalization?

Answer. I believe this is a major challenge facing the Defense Department and that addressing these trends should be a central theme of the QDR conducted later this year. If current trends continue, it will be very difficult to sustain a force large enough to meet the demands associated with both near-term operations and the long-term defense strategy. A key task for the QDR will be to formulate a strategy, force structure, and overall defense program that are in balance and are affordable within the national resources available for defense.

Question. What steps would you take, if confirmed, to address out-of-control cost growth on DOD's major defense acquisition programs?

Answer. If confirmed, I would assign this as a key priority for the new USD(AT&L). Central themes would be greater competition, stability, realism, and accountability. Close integration of the requirements, acquisition, and resource processes is key to achieving these objectives, as is better balancing of cost, schedule, and performance objectives. I also believe that improvements can be made through greater emphasis on, and attention to, independent assessments of costs, technology readiness levels, and testing maturity.

Question. What steps do you believe that the Department should consider taking in the case of major defense acquisition programs that exceed the critical cost growth thresholds established in the “Nunn-McCurdy” amendment?

Answer. Congress recently passed legislation revising the methodology for establishing cost baselines used for the purposes of establishing Nunn-McCurdy thresholds. I believe this type of approach has the potential to change institution incentives in a way that will promote greater realism and accountability in the management of acquisition programs. If confirmed as Deputy Secretary, I would assess the impact of this change on institutional behavior and examine other measures that would promote the objective of enhancing realism and accountability as a central theme in improving acquisition management.

CONTRACTING FOR SERVICES

Question. Over the past 8 years, DOD’s spending on contract services has more than doubled with the estimated number of contractor employees working for the Department increasing from an estimated 730,000 in fiscal year 2000 to an estimated 1,550,000 in fiscal year 2007. As a result, the Department now spends more for the purchase of services than it does for products (including major weapon systems).

Do you believe that DOD should continue to support this rate of growth in its spending on contract services?

Answer. Service contractors provide a valuable function to DOD. But if confirmed, I would support efforts by the USD(AT&L) and other leaders to review the level of contracting services required in keeping with President-elect Obama’s pledge to have the Department improve its strategy for determining when contracting makes sense.

Question. Do you believe that the current balance between government employees (military and civilian) and contractor employees is in the best interests of the DOD?

Answer. DOD requires some mix of Federal employees and contractors to carry out its mission effectively. If confirmed, I would support efforts to help ensure the appropriate balance in that mix.

Question. What steps would you take, if confirmed, to control the Department’s spending on contract services?

Answer. Service contractors provide a valuable function to DOD, but there has been substantial growth in this area over the past decades. If confirmed, I intend to review the Department’s policies and procedures and make any necessary adjustments.

CONTRACTOR PERFORMANCE OF CRITICAL GOVERNMENTAL FUNCTIONS

Question. Over the last decade, the Department has become progressively more reliant upon contractors to perform functions that were once performed exclusively by government employees. As a result, contractors now play an integral role in areas as diverse as the management and oversight of weapons programs, the development of personnel policies, and the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as DOD employees.

In your view, has DOD become too reliant on contractors to support the basic functions of the Department?

Answer. Over the last several years, the Defense Department has implemented very large reductions in the government workforce, and I believe a careful review is needed of whether, in the process, DOD has become too dependent on contractors to perform inherently governmental functions. Congress has recently codified a definition of inherently governmental functions and required a review by the Department. I believe this review provides a mechanism to address this important question.

Question. Do you believe that the current extensive use of personal services contracts is in the best interest of DOD?

Answer. I am not familiar with the degree to which DOD is using personal services contracts. I do know, however, that there are statutory restrictions that govern the use of personal services contracts. If confirmed, I will ensure that if personal services contracts are being used in a manner that is inappropriate, that practice is ended immediately.

Question. U.S. military operations in Iraq have relied on contractor support to a greater degree than any previous U.S. military operations. According to widely published reports, the number of U.S. contractor employees in Iraq exceeds the number of U.S. military deployed in that country.

Do you believe that DOD has become too dependent on contractor support for military operations?

Answer. See below.

Question. What risks do you see in the Department's reliance on such contractor support? What steps do you believe the Department should take to mitigate such risk?

Answer. See below.

Question. Do you believe the Department is appropriately organized and staffed to effectively manage contractors on the battlefield?

Answer. See below.

Question. What steps, if any, do you believe the Department should take to improve its management of contractors on the battlefield?

Answer. It is my understanding that Secretary Gates has tasked Admiral Mullen to personally oversee a Department-wide review of contractor roles and missions. If confirmed, I will work with the Secretary and Chairman Mullen in this review and implement recommendations where appropriate, and if necessary, work with Congress to institutionalize reforms.

PRIVATE SECURITY CONTRACTORS

Question. Do you believe DOD and other Federal agencies should rely upon contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. As a general matter, DOD should use all elements of the "total force" (military forces, DOD civilians, and contractors) to address the full spectrum of operational requirements. President-elect Obama has cited the need to improve transparency in how private security contractors are utilized and to establish clear standards regarding Rules of Engagement, personnel policies, and communications guidelines. If confirmed, I will work with the Department and interagency process, as well as with the committee, to address these issues.

Question. In your view, has the United States' reliance upon private security contractors to perform such functions risked undermining our defense and foreign policy objectives in Iraq?

Answer. I do not have a view on this matter. If confirmed, I will review this issue and keep Congress informed.

Question. What steps would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. I do not have any specific recommendations at this time. But, if confirmed, I will review the question of private security contractors and work with the committee on any needed changes.

Question. How do you believe the ongoing operations of private security contractors in Iraq are likely to be affected by the new Status of Forces Agreement (SOFA) between the United States and Iraq?

Answer. It is my understanding that since January 1, U.S. Government private security contractors no longer have immunity from host nation law. Furthermore, they must comply with host nation registration and licensing and, therefore, they already have been impacted. Many contractors already have had other contractual relationships within Iraq and already have been subject, for those contracts, to Iraqi law and regulations. For all contractors, the SOFA has meant substantially more liaison and coordination with Iraqi authorities at all levels.

Question. Do you support the extension of the Military Extraterritorial Jurisdiction Act to private security contractors of all Federal agencies?

Answer. Yes.

Question. What is your view of the appropriate application of the Uniform Code of Military Justice to employees of private security contractors operating in an area of combat operations?

Answer. If confirmed, I will review this issue in conjunction with the advice of the General Counsel.

CONTRACTOR PERFORMANCE OF INFORMATION OPERATIONS

Question. In October 2008, DOD announced a plan to award contracts in excess of \$300 million to U.S. contractors to conduct "information operations" through the Iraqi media.

What is your view on the effectiveness of information operations conducted by the United States through the Iraqi media?

Answer. I have not had an opportunity to become familiar with the details of these programs. If confirmed, I would be happy to look into these matters and discuss them with the committee.

Question. Do you believe that it is appropriate for the United States to pay for media campaigns to build up support for the government and the security forces of Iraq at a time when the Iraqi Government has a surplus of tens of billions of dollars?

Answer. See previous answer.

Question. Do you believe that the U.S. Government, or the Iraqi Government, should be responsible for developing a message to build up support for the government and security forces of Iraq, and for developing media campaigns for this purpose?

Answer. See previous answer.

Question. In your view, is DOD's use of private contractors to conduct information operations through the Iraqi media appropriate?

Answer. See previous answer.

Question. Do you see a risk that a DOD media campaign designed to build up support for the government and security forces of Iraq could result in the inappropriate dissemination of propaganda inside the United States through the internet and other media that cross international boundaries?

Answer. See previous answer.

Question. A spokesman for the Iraqi Government has been quoted as saying that any future DOD information operations in the Iraqi media should be a joint effort with the Iraqi government. According to a November 7, 2008 article in the Washington Post, the spokesman stated: "We don't have a hand in all the propaganda that is being done now. It could be done much better when Iraqis have a word and Iraqis can advise."

Do you believe that DOD information operations through the Iraqi media should be conducted jointly with the Iraqis?

Answer. I have not had an opportunity to become familiar with the details of these programs. If confirmed, I would be happy to look into these matters and discuss them with the committee.

Question. Under what circumstances do you believe that it is appropriate for the DOD to conduct information operations in a sovereign country without the knowledge and support of the host country?

Answer. See previous answer.

IRAQ

Question. What, in your view, are the greatest challenges facing the Department in implementing the U.S.-Iraq SOFA and what actions, if any, would you recommend to maximize the chances of success in meeting the requirements for the withdrawal of U.S. forces?

Answer. I have not had the opportunity to review any plans regarding the repositioning and redeployment of U.S. forces in Iraq. If confirmed, I would review such plans and make any necessary recommendations to the Secretary of Defense.

Question. What do you believe is the appropriate role for the United States in reconstruction activities in Iraq going forward?

Answer. I support the President-elect's views on bringing in Iraq's neighbors to help with reconstruction efforts. I also believe American policy should continue to be supportive in working by, with, and through our Iraqi partners and that the U.S. role in reconstruction should focus on capacity development and assisting our Iraqi partners in prioritizing, planning, and executing their reconstruction projects.

AFGHANISTAN

Question. What, in your view, are the main challenges facing United States and coalition forces in Afghanistan?

Answer. Our strategic objective is a stable and secure Afghanistan in which Al Qaeda and the network of insurgent groups, including the Taliban, are incapable of seriously threatening the Afghan state and resurrecting a safe haven for terrorism.

Question. What changes, if any, would you recommend to our current strategy in Afghanistan?

Answer. Achieving our strategic objectives in Afghanistan will require a more integrated and comprehensive approach to security, economic development, and governance. All of the instruments of national power and persuasion must be harnessed in order to be successful. It is imperative that we improve coordination and cooperation between Afghanistan and its neighbors and that there be better unity of effort

among our coalition partners, international institutions, and the Government of Afghanistan.

Question. Do you support an expansion of U.S. forces in Afghanistan? If so, would you support drawing down U.S. forces in Iraq faster in order to increase U.S. force levels in Afghanistan sooner?

Answer. President-elect Obama consistently stated throughout the campaign that he believed the deteriorating security conditions in Afghanistan required additional U.S. and international forces. If confirmed, I will work carefully with the Secretary and Congress in balancing the demands of our Iraq and Afghanistan deployments while ensuring the military is ready to meet other challenges.

Question. Do you believe that there is a need to develop a comprehensive civil-military plan for Afghanistan, akin to that used in Iraq?

Answer. Yes.

Question. How do you assess the contributions of North Atlantic Treaty Organization (NATO) allies to the effort in Afghanistan, and how do you believe that the United States can persuade them to increase their efforts as the United States does so?

Answer. Afghanistan would be less secure without the contributions and sacrifices of our NATO allies and other international security assistance force partners. President-elect Obama and Secretary Gates have both called for greater contributions with fewer caveats from our NATO allies. By providing better American leadership in Afghanistan, and by committing more of our own resources to the challenge, the United States will be better positioned to persuade our allies to do more.

Question. One of the main threats to U.S. and coalition forces in Afghanistan comes from cross-border attacks by the Taliban and extremist militants who find safe haven in Pakistan's border regions.

What in your view needs to be done to eliminate the threat posed by Taliban and extremist militants hiding out across the Afghan-Pakistan border?

Answer. Both President-elect Obama and Secretary Gates have cited the need to eliminate the terrorist sanctuary in the border regions of Pakistan, but there is no purely military solution. The United States must have an integrated strategy to promote development and combat terrorism across the Afghanistan-Pakistan border region.

Question. The cultivation of poppies and trafficking of opium has reached alarming proportions in Afghanistan. Some estimate that over 50 percent of Afghanistan's gross national product is associated with the illegal opium trade and that Afghanistan is at risk of failing as a nation state. Coalition strategies for countering the opium trade have not been effective to date.

What should be the role of the U.S. military forces in the counterdrug program in Afghanistan?

Answer. The international community must play a role in helping the Afghan government to strengthen Afghan institutions, including the judicial and law enforcement system, intelligence service, and Afghan National Security Forces, that will increasingly take the lead in combating narcotics in Afghanistan. While current NATO rules of engagement restrict NATO forces from direct operations against the narcotics industry, NATO can assist in training Afghan counternarcotics forces.

Question. What are the main challenges facing the United States and international community's reconstruction efforts in Afghanistan?

Answer. I have not had the opportunity to review the reconstruction effort in Afghanistan; however, if confirmed, will make this a high priority.

Question. What would be your priorities for addressing those challenges?

Answer. If confirmed, I look forward to working across the interagency and with international partners to create a truly comprehensive civil-military strategy to build the necessary foundation for a stable and secure Afghanistan.

PAKISTAN

Question. In your view, is the Pakistani Government doing enough to combat the threat posed by militant groups along the Afghan-Pakistan border and to fight terrorism in general? If not, what more should it be doing?

Answer. I have not reviewed this area but, if confirmed, will review it as a high priority.

Question. What changes, if any, would you recommend in the United States approach to Pakistan on these issues?

Answer. See above.

Question. Tensions between Pakistan and India have increased as a result of the horrific attacks in Mumbai, India.

In your view, what impact has this rise in tensions between Pakistan and India had on the stability of the South Asia region, generally, and on the prospects for security in Afghanistan?

Answer. India, Pakistan, and Afghanistan are linked by history, culture, language, and trade, and regional stability cannot be achieved without the cooperation of all three countries. It is in America's national interest to play a constructive role in helping defuse the recent rise in tensions and to help derive from the tragic attacks in Mumbai an opportunity for further cooperation between three of America's crucial allies.

IRAN

Question. Do you believe it would be in the United States' interest to engage Iran in a direct dialogue to promote regional stability and security, to dissuade Iran from pursuing a nuclear weapons program, or for other purposes?

Answer. I support the President-elect's view that the United States should be willing to engage with all nations, friend or foe, and be willing, with careful preparation, to pursue direct diplomacy. Furthermore, I fully support the President-elect's view that we should not take any options off the table, but that we should employ tough, direct diplomacy backed by real incentives and pressures, to prevent Iran from acquiring nuclear weapons and end their support of terrorist organizations such as Hezbollah.

Question. What more do you believe the United States and the international community could be doing to dissuade Iran from pursuing a nuclear weapons program?

Answer. I have no recommendations in this area. But if confirmed, I will review it as a high priority.

CHINA

Question. What do you believe are China's political-military objectives regarding Taiwan, the Asia-Pacific region, and globally?

Answer. Broadly, the overriding objectives of China's leaders appear to be to ensure the continued rule of the Chinese Communist Party, to continue China's economic development, to maintain the country's domestic political stability, to defend China's national sovereignty and territorial integrity, and to secure China's status as a great power. Within this context, preventing any moves by Taipei toward de jure independence is a key part of Beijing's strategy. Within each dimension there lies a mix of important challenges and opportunities for the United States that will continue to deserve priority attention.

Question. What is your view of the U.S. policy of selling military equipment to Taiwan, despite China's objections?

Answer. U.S. policy on arms sales to Taiwan is based on the 1979 Taiwan Relations Act, which provides that the United States will make available to Taiwan defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability. That policy has contributed to peace and stability in the region for nearly 30 years and is consistent with the long-standing U.S. calls for peaceful resolution of the Taiwan issue in a manner acceptable to the people on both sides of the Taiwan Strait. If confirmed, I would work closely with Congress and the interagency to ensure the continued effective implementation of this longstanding policy.

Question. How do you believe the United States should respond to China's military modernization program?

Answer. The pace and scale of Chinese modernization, coupled with the lack of transparency surrounding both capabilities and intentions, are a source of concern for the United States as well as for its allies and the region more broadly. An appropriate U.S. response would include efforts to fully comprehend the future direction of China's programs, active engagement to reduce the potential for miscalculations and to manage unwanted competition, and, finally, defense preparedness to ensure we retain our edge in areas that are critical to achieving specific operational objectives. If confirmed, I would seek to ensure that DOD places a high priority on this issue and would consult closely with Committee members on appropriate U.S. responses.

Question. What is your assessment of the current state of U.S.-China military-to-military relations, and do you favor increased military-to-military contacts with China?

Answer. Much more can be done to improve the U.S.-China military-to-military relationship, both in terms of the quality and the quantity of exchanges between the Armed Forces of our countries. If confirmed, I would look closely at exchanges with the Chinese armed forces at all levels and across a range of issues, including the

recently opened dialogue on nuclear policy and strategy, which I understand is a priority for Secretary Gates. If confirmed, I look to engage in a wide range of areas where we can encourage China to act responsibly both regionally and globally.

NORTH KOREA

Question. What is your assessment of the threat posed to the United States, its forward deployed forces, and its allies by North Korea's ballistic missile and weapons of mass destruction (WMD) capabilities and the export of those capabilities?

Answer. North Korea poses a serious threat to the United States, the rest of Asia, and the world through its missile and WMD programs and proliferation of associated technologies, materials and systems. North Korea's continuing nuclear ambitions compound this situation. Strong alliances, regional partnerships and forward military presence remain key means to deal with these threats. U.S. national capabilities are also an essential element in deterring the threat and defending our interests. Additionally, in the event of a DPRK collapse, the United States would need to work closely with the Republic of Korea (ROK) to rapidly and safely secure loose nuclear weapons and materials.

Question. In your view, how should U.S. forces be sized, trained, and equipped to address this threat?

Answer. If confirmed, I would work closely with Chairman of the Joint Chiefs of Staff, senior military commanders and members of this committee to ensure that the U.S. military has the capabilities needed to deal with the range of threats North Korea poses and that our contingency planning is adaptive and responsive.

Question. In your view, what steps, if any, should be taken to maintain or strengthen deterrence on the Korean peninsula?

Answer. Maintaining a strong alliance between the United States and the ROK remains central to effective deterrence on the Peninsula. Our alliance with Japan is likewise a critical factor in security and stability in the wider Asia-Pacific region, including on the Peninsula. If confirmed, I would work hard to continue strengthening these alliances.

REPUBLIC OF SOUTH KOREA

Question. If confirmed, what measures, if any, would you recommend to improve the U.S.-ROK security relationship?

Answer. If confirmed, I would work with Congress to complete the realignment of U.S. forces on the Korean peninsula and return facilities our forces no longer require. I would also work to ensure that our command and control relationships with Korea and our contingency plans remain appropriate to the situations we face. Additionally, I believe it is important to ensure the U.S. and Korean publics continue to understand the enduring mutual benefits derived from this alliance.

Question. What is your view regarding the timing of the transfer of authority for wartime operational command to the ROK?

Answer. As Secretary Gates said following his meeting with the Korean Minister of Defense last October, the ROK military forces and U.S. forces are on track to complete the alliance agreement to transition wartime operational control in 2012. This effort will enable the ROK military to take the lead role in the defense of its nation. If confirmed, I will work with the Secretary and this Committee to ensure that the important transition in command relationships is carried out in a manner that strengthens deterrence and maintains a fully capable U.S.-ROK combined defense posture on the Korean Peninsula.

U.S. AFRICA COMMAND

Question. On October 1, 2008, U.S. Africa Command (AFRICOM) was authorized Unified Command status.

What do you see as the role of AFRICOM in U.S. African policy, in development assistance, and in humanitarian engagement?

Answer. The Department of State and U.S. Agency for International Development lead U.S. foreign policy and development engagements abroad, to include in Africa. President-elect Obama has argued that AFRICOM should promote a more united and coordinated engagement plan for Africa. If confirmed, I would take steps to implement that vision.

COMBATING TERRORISM

Question. How can the Department best structure itself to ensure that all forms of terrorism are effectively confronted?

Answer. I do not have enough information to recommend changes in the Department's structure for confronting terrorism at this time. If confirmed, I look forward to evaluating the Department's structure for counter-terror efforts.

Question. What changes, if any, would you recommend to the Defense Intelligence Community to ensure optimal support to combating terrorism and other homeland security efforts?

Answer. I have not had the opportunity to review this area. But, if confirmed, I will work with the USD (Intelligence) and the Intelligence Community to review this area for any improvements.

WAR ON DRUGS

Question. DOD serves as the single lead agency for the detection and monitoring of aerial and maritime foreign shipments of drugs flowing toward the United States.

What is your assessment of the ongoing efforts of the United States to significantly reduce the amount of drugs illegally entering into our Nation?

Answer. If confirmed, I will work with my interagency colleagues to assess the U.S. Government's efforts to date and craft a strategic way forward.

Question. In your view, what is the appropriate role of DOD in U.S. counterdrug efforts?

Answer. The Department's global focus, organization, expertise, and its ability to act as an honest broker complement law enforcement goals, and make it an effective actor in counterdrug efforts. DOD brings important tools and global capabilities to interagency efforts to counter both terrorist and international criminal networks.

ENGAGEMENT POLICY

Question. One of the central pillars of our recent national security strategy has been military engagement as a means of building relationships around the world. Military-to-military contacts, Joint Combined Exchange Training exercises, combatant commander exercises, humanitarian demining operations, and other engagement activities have been used to achieve this goal.

Do you believe that these activities contribute positively to U.S. national security?

Answer. Military-to-military contacts contribute to U.S. national security in a variety of important ways. Such activities can build capacity among partner nations to participate in coalition operations to counter terrorism and other transnational threats, potentially relieving stress on U.S. forces. They can help harmonize nations' views of common security challenges. Military-to-military activities can also help sustain investments made by other U.S. assistance programs. Finally, when performed effectively, military-to-military activities should show by example how military forces can act effectively while respecting human rights and civilian oversight.

Question. If confirmed, would you support continued engagement activities of the U.S. military?

Answer. If confirmed, I will support continued U.S. military-to-military engagement. I believe the current and emerging security environment will require robust engagement with the militaries of our partners and allies around the world.

Question. What improvements, if any, would you suggest to the interagency process for undertaking these activities?

Answer. None at this time.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations. These include the global train-and-equip authority (section 1206) and the security and stabilization assistance authority (section 1207).

In your view, what should be our strategic objectives in building the capacities of partner nations?

Answer. One of the greatest threats to international security is the violence that is sparked when human security needs are not met by governments. This creates space for terrorists, insurgents, and other spoilers to operate and, as the September 11 attacks demonstrated, to threaten the United States and its allies. The goal, therefore, is to close this space through efforts that strengthen bilateral relationships; increase access and influence; promote militaries that respect human rights, civilian control of the military and the rule of law; and build capacity for common military objectives. In addition to promoting regional and global security, enhanced partner capacity reduces the risk of future military interventions and reduces stress on U.S. Armed Forces.

Question. Secretary Gates has called for an expansion of the Government's resources devoted to instruments of nonmilitary "soft power"—civilian expertise in reconstruction, development, and governance.

Do you agree with Secretary Gates that there is a need to expand the Government's resources devoted to the ability of civilian departments and agencies to engage, assist, and communicate with partner nations?

Answer. Yes. The President-elect and Secretary Gates have both made clear their strong desire to see more robust non-military instruments of national power. If confirmed, I will certainly make it my priority to assist in this effort.

Question. In your view, what should be the role of DOD, vis-à-vis the civilian departments and agencies of the Government, in the exercise of instruments of soft power?

Answer. Generally, the Department's role should be to support, not lead, in the exercise of "soft power." Where DOD plays a vital role is in helping to promote—through the full gamut of planning, exchanges, exercises, operations, and bilateral defense relationships—the conditions that enable these instruments to be applied with maximum beneficial effect.

STABILITY OPERATIONS

Question. The U.S. experience in Iraq has underscored the importance of planning and training to prepare for the conduct and support of stability operations in post-conflict situations.

In your view, what are the appropriate roles and responsibilities between DOD and other departments and agencies of the Federal Government in the planning and conduct of stability operations?

Answer. In stabilizing post-conflict environments, success depends upon the integrated efforts of both civilian and military organizations in all phases of an operation, from planning through execution. Ideally, civilian agencies should lead in areas such as building accountable institutions of government, restoring public infrastructure and in reviving economic activity. Military forces, in turn, are best suited to help provide a safe and secure environment and to assist in building accountable Armed Forces.

Question. In developing the capabilities necessary for stability operations, what adjustments, if any, should be made to prepare U.S. Armed Forces to conduct stability operations without detracting from its ability to perform combat missions?

Answer. The most important lesson is that 21st century conflict is "full spectrum." That is, the military cannot be prepared only for combat. They must plan and train with their civilian counterparts and be prepared to operate effectively in all phases of conflict. That said, the military should also be prepared to undertake critical non-military tasks when the civilian agencies cannot operate effectively, either due to the security environment or, more likely, due to lack of capacity. Indeed, the need for greater capabilities and capacity in civilian agencies has been a recurring lesson for the entire government. Finally, we need to obtain better situational awareness of the underlying drivers—political, cultural, and economic—of stability and conflict so as to ensure that our actions will meet our objectives and not trigger unintended consequences.

SPECIAL OPERATION FORCES

Question. Do you believe that the force size, structure, and budget of the Special Operations Command is sufficient, given the current roles and missions of Special Operation Forces (SOF)? If not, why not, and what changes would you recommend, if confirmed?

Answer. DOD SOF have been significantly strengthened in recent years, which I believe is an entirely appropriate response to the demands of the current national security environment. I have not had a chance to review in detail any possible organizational issues associated with force structure or resources required for SOF. However, the next QDR will consider SOF capabilities.

RUSSIA

Question. What are the areas of engagement with Russia that are most beneficial from a DOD perspective? How would you recommend carrying out such engagement?

Answer. If confirmed, I will make it a priority to assess areas where greater military-to-military and other exchanges with Russia might be beneficial.

Question. Is it in the U.S. interest to extend the duration of the Strategic Arms Reduction Treaty (START), or, alternatively, to negotiate a new treaty that will offer similar benefits to both parties and further reduce their nuclear forces?

Answer. If confirmed, I will make it a priority to review to determine the best path forward with respect to START, the Moscow Treaty, and any successor agreements.

DOD'S COOPERATIVE THREAT REDUCTION PROGRAM

Question. In your view, what are the nonproliferation and threat reduction areas in which DOD's Cooperative Threat Reduction (CTR) program should focus in the next 4 years?

Answer. I anticipate that the President-elect will require the State Department, Department of Energy, and DOD to much more closely coordinate nuclear risk reduction efforts. The congressional initiative to expand the geographic reach of the Nunn-Lugar CTR program beyond the former Soviet Union is an important step toward reducing WMD threats and building global partnerships. If confirmed, I will work closely with Congress, other U.S. government agencies, and global partners to strengthen our efforts to prevent WMD proliferation and terrorism.

TACTICAL FIGHTER PROGRAMS

Question. Perhaps the largest modernization effort that we will face over the next several years is the set of programs to modernize our tactical aviation forces with fifth generation tactical aircraft equipped with stealth technology, to include the F-22 and the Joint Strike Fighter (JSF).

Based on current and projected threats, what are your views on the requirements for and timing of these programs?

Answer. The F-22 is the most advanced tactical fighter in the world and, when combined with the F-35 JSF, will provide the Nation with the most capable and lethal mix of fifth generation aircraft available for the foreseeable future. The tremendous capability of the F-22 is a critical element in the Department's overall tactical aircraft force structure requirements, as it replaces our legacy F-15 fleet. The F-35 will provide the foundation for the Department's tactical air force structure. It will replace the legacy F-16 aircraft for the Air Force and the F/A-18 and AV-8 aircraft for the Navy and Marine Corps, as well as numerous legacy aircraft for the international partners participating in the F-35 program. A critical question is the appropriate mix between the F-22 and the F-35. If confirmed, I would expect this to be a key issue for the early strategy and program-budget reviews that the Department will conduct over the next few months.

Question. Even if all of the current aircraft modernization programs execute as planned, the average age of the tactical, strategic, and tanker fleet will increase. Aging aircraft require ever-increasing maintenance, but even with these increasing maintenance costs, readiness levels continue to decline.

Can both the maintenance of the legacy force and the modernization efforts be affordable at anywhere near the current budget levels?

Answer. Clearly, the operational tempo and the increased employment of the Nation's aircraft to execute the global war on terrorism are extracting a toll on the existing equipment and the personnel who maintain that equipment. If confirmed, I would expect the QDR and the associated processes to formulate the fiscal year 2011 defense program and budget to examine the question of how best to balance the force structure and modernization programs needed to meet the demands of the strategy within available resources.

Question. Some critics believe that there is still too much service parochial duplication in procuring new systems.

Do you agree with these critics? If so, what would you recommend to ensure more jointness in procurement?

Answer. There are individual cases that can be identified to support both sides of the debate. The Department's largest acquisition program, the JSF, is certainly an example of how the Services have been able to work together to procure common systems when the mission needs, operating environments, and operational tactics are sufficiently similar to allow common solutions. However, our Nation has evolved to a defense structure with separate services because of the broad nature of our defense posture, which operates across the globe in the air, land, maritime, and space domains. In an organization as large and complex as the U.S. DOD, there is a need for specialization among organizational sub-elements, which in our system are structured around the traditional military departments. This has been an effective structure, but it does inevitably create "seams" among the sub-elements. In turn, there are inevitably issues that cut across those seams. These are not necessarily a result of parochialism, but they do require an overarching corporate process to address those seam issues. In my experience, this is one of the critical functions of the Office of the Secretary of the Defense and the Joint Staff. If confirmed as Dep-

uty Secretary, I would regard promoting joint solutions, where appropriate, to be one of my key functions, working in close cooperation with the Vice Chairman of the Joint Chiefs of Staff.

UNMANNED SYSTEMS

Question. Congress has established a goal that by 2015, one-third of the aircraft in the operational deep strike force aircraft fleet and one-third of operational ground combat vehicles will be unmanned.

Do you support this goal?

Answer. I support the goal of increasing operational capability through the expanded use of unmanned systems. I believe that substantial progress has been made in this area in recent years and that more will be needed in the coming years. If confirmed, I expect this would be a focus area for the program and budget reviews that will be conducted this year, as well as the QDR. At this time, I do not have a view on the exact portion of capability that should be obtained through unmanned systems, though I expect more insight on this question would be obtained during those reviews.

Question. What is your assessment of DOD's ability to achieve this goal?

Answer. If confirmed, I will review DOD's progress towards achieving this goal during the QDR and other program and budget reviews that must be conducted later this year.

Question. What steps do you believe the Department should take to achieve this goal?

Answer. I believe this issue should be an area of focus during the QDR and the other program and budget reviews that must be conducted later this year.

JOINT IMPROVISED EXPLOSIVE DEVICE DEFEAT OFFICE

Question. The Deputy Secretary of Defense issued a directive granting full authority and responsibility to the Joint Improvised Explosive Device Defeat Office to lead the Department's efforts in fighting the improvised explosive device (IED) threat.

What are your views regarding the Department's process for addressing the combatant commander's requirements for the fielding of IED countermeasures?

Answer. I agree with Secretary Gates—this is a vitally important mission that requires a level of effort beyond the business-as-usual approach. I understand IEDs have been the most frequent cause of casualties to our Armed Forces in Iraq that consequently has demanded a cross-functional organization with a strong mandate from the senior leadership to streamline acquisition, budgetary, testing, and other processes.

Question. What else can and should be done to get this critical capability to the warfighters?

Answer. The current approach appears to be sound, but if confirmed, I will continually evaluate its effectiveness, seek the advice of senior operational commanders, and remain open to options that would improve our responsiveness and effectiveness in this crucial area.

READINESS IMPACT OF CONTINGENCY OPERATIONS

Question. Over the past several years, military units have been increasingly deployed to contingency operations around the world. Participation in these operations disrupt operating budgets, cause lost training opportunities, and accelerate wear and tear on equipment. Additionally, increased tempo of operations impacts quality of life and could jeopardize retention of high-quality people.

What ideas do you have with regard to how to reduce the impact of these operations on both near- and long-term readiness and modernization programs?

Answer. I agree with both Secretary Gates and President-elect Obama that restoring a semblance of balance to the operational tempo of our military forces, particularly the Army and Marine Corps, is very important to ensure the future health of the All-Volunteer Force. If confirmed, I look forward to balancing the necessity of contingency deployments with readiness concerns, and working closely with the committee on this important subject.

INFORMATION ASSURANCE

Question. Protection of military networks, information, and communications is critical to DOD operations. The Department's Inspector General has noted that the Department does not yet have a comprehensive enterprise-wide inventory of information systems which makes reliable evaluation of the security of information systems impossible.

What is your assessment of the security of the Department's information systems?

Answer. See below.

Question. What Department-wide policies or guidance do you believe are necessary to address information and cyber security challenges for current and future systems?

Answer. I recognize that cyber infrastructure is a critical asset to the Department. If confirmed, I will familiarize myself with ongoing efforts to secure DOD's information systems and address cyber challenges in the development of new capabilities.

TEST AND EVALUATION

Question. What is your assessment of the appropriate balance between the desire to reduce acquisition cycle times and the need to perform adequate testing?

Answer. I support rigorous independent testing and evaluation to provide accurate and objective information on the capabilities and limitations of defense systems to both acquisition executives and the warfighters. When systems are urgently needed in the field, the imperative for accurate and objective test and evaluation (T&E) assessments is just as important but should be addressed through efforts to expedite the T&E process, as has been accomplished successfully for such urgent efforts as the MRAP vehicle program.

Question. Under what circumstances, if any, do you believe we should procure weapon systems and equipment that has not been demonstrated through T&E to be operationally effective, suitable, and survivable?

Answer. In extremely rare circumstances, it might be necessary to field a system prior to operational testing in order to address an urgent gap in a critical capability. But even in such cases, operational evaluation should still be conducted at the earliest opportunity to assess the system's capabilities and limitations and identify any deficiencies that might need to be corrected.

Question. Congress established the position of Director of Operational Test and Evaluation to serve as an independent voice on matters relating to operational testing of weapons systems. As established, the Director has a unique and direct relationship with Congress which allows him to preserve his independence.

Do you support the Director of Operational Test and Evaluation's ability to speak freely and independently with Congress?

Answer. Yes.

FUNDING FOR SCIENCE AND TECHNOLOGY INVESTMENTS

Question. In the past, the QDR and the Department's leaders have endorsed the statutory goal of investing 3 percent of the Department's budget into science and technology programs.

Do you support that investment goal?

Answer. If confirmed, I plan to place a high priority on maintaining a robust science and technology program for the Department. Basic science and technology research ensures the Department remains on the cutting edge of combat capability and is responsive to the warfighter.

Question. How will you assess whether the science and technology investment portfolio is adequate to meet the current and future needs of the Department?

Answer. Determining the suitability of the Department's science and technology program is a complex challenge. The Department should take a holistic approach, assessing the opportunities and threats across all the Services, to determine where to best focus investment and energy.

TECHNOLOGY STRATEGY

Question. You were a member of the National Academy's panel that produced the report "Rising Above the Gathering Storm" recommending doubling investments in defense basic research over 7 years.

What is your assessment of the Department's ability to develop a responsive research strategy capable of quick reaction but which is also designed to include sustained investments in the development of a set of capabilities based on threat predictions and identification of related technology gaps?

Answer. See below.

Question. How should the Department proceed to implement the National Academy's recommendations regarding basic research investments?

Answer. While not a participant in "Rising Above a Gathering Storm," I support its foundational principles of developing knowledge-based resources through education and research to maintain our country's competitive edge.

BALLISTIC MISSILE DEFENSE

Question. Do you agree that any ballistic missile defense systems that we deploy operationally must be operationally effective, suitable, survivable, cost-effective, affordable, and should address a credible threat?

Answer. The effectiveness of missile defense systems must be viewed not as a stand alone capability, but as part of an overarching strategy to counter the proliferation and deter the use of ballistic missiles. The criteria to demonstrate the operational effectiveness, suitability, and survivability should be collaboratively determined early in the development of missile defense systems by the operational test community and Missile Defense Agency, and independently evaluated by the Director of for Operational Test and Evaluation. Based on independently validated cost estimates, DOD must compare the cost and effectiveness of missile defense systems. We then must determine the priority of funding and timeframe to develop missile defense systems.

Question. Do you agree that U.S. missile defense efforts should be prioritized on providing effective defenses against existing ballistic missile threats, especially the many hundreds of short- and medium-range ballistic missiles that are currently within range of our forward-based forces, allies, and other friendly nations?

Answer. Our development and deployment of missile defenses is only one component of a strategy to counter the proliferation and deter use of ballistic missiles of all ranges. This development and deployment should be proportional to the types and ranges of ballistic missile threats existing today, but should also deter today's pursuit by many countries to acquire greater inventories, ranges, and accuracies of ballistic missiles.

Question. Do you agree that ballistic missile defense testing needs to be operationally realistic, and should include Operational Test and Evaluation, in order to assess operational capabilities and limitations of ballistic missile defense systems, prior to making decisions to deploy such systems?

Answer. The criteria to demonstrate the operational effectiveness, suitability, and survivability should be collaboratively determined early in the development of missile defense systems by the operational test community and Missile Defense Agency, and independently validated by the Director of for Operational Test and Evaluation. DOD must clearly understand and consider the capabilities and limitations of ballistic missile defense systems prior to any deployment decisions.

Question. If the United States and Russia could agree on a cooperative approach on missile defense issues, do you believe it would be in the security interest of the United States to pursue such an effort?

Answer. A critical step to counter the proliferation of ballistic missile technologies and inventories is to demonstrate the ability of the international community to observe all ballistic missile testing and exercises around the world. Cooperative efforts to combine today's considerable U.S. and Russian ballistic missile surveillance assets, and link them to international organizations such as NATO, would demonstrate the U.S. and Russia's resolve to stop proliferation. Additionally, it would be an important confidence building step for further cooperative development of missile defense capabilities in the interest of the security of both the United States and Russia.

CHEMICAL WEAPONS ELIMINATION AND THE CHEMICAL WEAPONS CONVENTION

Question. Do you agree that the United States should make every effort to meet its treaty obligations, including its obligations under the Chemical Weapons Convention (CWC)?

Answer. See below.

Question. Would you take steps, if confirmed, to raise the priority of the Department's efforts to eliminate the U.S. chemical weapons stockpile as close to the CWC deadline as possible?

Answer. The United States has a long history and tradition of meeting and strictly complying with international treaties. I understand that we will have destroyed 90 percent of our stockpile by the treaty mandated date of 2012, and will even have started to eliminate the facilities that performed the actual destruction. Because of a decision to use an alternative destruction technology rather than the incineration method currently in use at each facility today, two new destruction facilities must be built to destroy that last 10 percent of the stockpile. If confirmed, I will review the progress of facility construction and eventual chemical weapons elimination at those two remaining facilities to ensure that we complete destruction of our total stockpile as rapidly and safely as possible.

NUCLEAR WEAPONS AND STOCKPILE STEWARDSHIP

Question. As the stockpile continues to age, what do you view as the greatest challenges with respect to assuring the safety, reliability, and security of the stockpile?

Answer. The safety, reliability, and security of our nuclear weapons needs to be a top priority of DOD. The greatest challenge is not technical, but rather the restoration of a proactive, zero-defect culture in the stewardship of nuclear weapons in the operational force. Secretary Gates has focused a great deal of attention on this issue, and, if confirmed, I would intend to support his efforts to address the problems.

Question. Would you support substantial reductions in the U.S. nuclear stockpile?

Answer. The President-elect has indicated that he believes the United States should lead an international effort to deemphasize the role of nuclear weapons. Toward that end, he intends to open discussions with Russia and with other nuclear powers with an aim toward reducing global nuclear weapons stockpiles. Such negotiations would require close coordination with other Departments and, if confirmed, I would intend to perform whatever role the Secretary designates for me in that effort.

ACTIVE-DUTY END STRENGTH

Question. What is your view of the adequacy of the existing Active-Duty Army and Marine Corps end strength to support current missions including combat operations in Iraq and Afghanistan?

Answer. If confirmed, I know that this is a question that will require my immediate attention. It must, among other things, consider both the potential contributions of our Guard and Reserve Forces, and the adequacy of a "rotation base" sufficient to assure that we meet the needs of our volunteers and their families.

Question. Do you believe the planned increases in end strength for the Army and the Marine Corps are affordable and necessary?

Answer. The President-elect supports the expansion of our ground forces, and I understand that the Department has made significant progress toward those goals. If confirmed, I will review these plans, as well as the associated housing, training, and equipment programs to support our ground forces.

TREATMENT OF WOUNDED WARRIORS

Question. In November 2008, the acting Comptroller General identified care for service members as one of the most urgent issues facing Congress and the new administration.

If confirmed, what will you do to ensure that injured service members receive the quality health care that they need for as long as they need it, including diagnosis and treatment of traumatic brain injury, post-traumatic stress disorder, and other mental health conditions?

Answer. Providing needed care and support for servicemembers, veterans, and their families is a continuing and urgent priority for Congress and the Department. If confirmed, I will make research on prevention and treatment of traumatic brain injury, post-traumatic stress disorder, and other mental health conditions a priority.

Question. The Wounded, Ill, and Injured Senior Oversight Committee (SOC), co-chaired by the Deputy Secretary of Defense and the Deputy Secretary of Veterans Affairs, has improved the cooperation between the Departments of Defense and Veterans Affairs, the two Federal agencies charged with the care of our military personnel and veterans, and their families. Because of reports that the SOC would discontinue operations and to ensure that senior leadership of the new administration would remain focused on this issue, Congress required the Secretaries of Defense and Veterans Affairs to continue the operation of the SOC through December 31, 2009.

What is your view of the value of the SOC?

Answer. As I understand it, the SOC has engaged the senior leadership of both departments in finding joint solutions to support the wounded warrior. This is a unique and valuable forum for addressing the major issues confronting us.

Question. If confirmed, will you continue the operation of the SOC, and what role do you expect to play?

Answer. If confirmed, I will review the work of the committee and our current and future challenges in coordination with the Department of Veterans Affairs. As envisioned by Congress, the SOC will continue to address those challenges through this year, and I anticipate that I would continue to co-chair it with the Deputy Secretary of VA.

DISABILITY SEVERANCE PAY

Question. Section 1646 of the Wounded Warrior Act, included in the National Defense Authorization Act for Fiscal Year 2008, enhanced severance pay and removed a requirement that severance pay be deducted from VA disability compensation for service members discharged for disabilities rated less than 30 percent incurred in line of duty in a combat zone or incurred during the performance of duty in combat-related operation as designated by the Secretary of Defense. In adopting this provision, Congress relied on an existing definition of a combat-related disability (see 10 U.S.C. 1413a(e)). Rather than using the definition intended by Congress, the DOD adopted a more limited definition of combat related operations, requiring that the disability be incurred during participation in armed conflict.

If confirmed, will you reconsider the Department's definition of combat-related operations for purposes of awarding enhanced severance pay and deduction of severance pay from VA disability compensation?

Answer. If confirmed, I will review the rationale behind this decision to ensure that all wounded warriors are treated fairly.

FAMILY SUPPORT

Question. Throughout the global war on terrorism, military members and their families in both the Active and Reserve components have made tremendous sacrifices in support of operational deployments. Senior military leaders, however, have warned of growing concerns among military families as a result of the stress of frequent deployments and the long separations that go with them.

What do you consider to be the most important family readiness issue for servicemembers and their families, and, if confirmed, what role would you play to ensure that family readiness needs are addressed and adequately resourced?

Answer. I will have to look into this if confirmed, but I believe it may come down to building resiliency so that families are better prepared to meet the challenges of frequent moves and deployments—including psychological, social, financial, and educational.

Question. If confirmed, what would your priorities be for improving and sustaining quality of life for military members and their families?

Answer. Maintaining robust quality of life programs for our military servicemembers is one of the highest priorities of the President-elect. If confirmed, I would make this one of the focus areas for the expedited review of the fiscal year 2010 budget request, as well as the QDR and the formulation of the fiscal year 2011 defense program. Areas of emphasis would be medical care and child care facilities and other programs that assist our servicemembers in sustaining the burden of deployments.

Question. If confirmed, how would you ensure support for Reserve component families and Active Duty families who do not reside near a military installation?

Answer. I am familiar with a general pattern of much-needed improvement here recently, through the implementation of partnerships with State and community based services. But I know we have much to do, and look forward to being involved in this, if confirmed.

SUSTAINING THE MILITARY HEALTH CARE BENEFIT

Question. In your view, what elements of the military health care system require reform and what steps would you take, if confirmed, to accomplish reform?

Answer. Health care costs continue to grow nationally and DOD is not exempt. If confirmed, I will work closely with our health care leadership in DOD to examine every opportunity to ensure military beneficiaries are provided the highest quality care possible in the most cost effective manner.

Question. In light of the continuing growth of health care costs both in the military and civilian sectors, if confirmed, how would you address the issue of cost control?

Answer. I am told that governmental estimates indicate these costs could rise to nearly 12 percent of the DOD budget in just a few years, and that the congressionally-directed task force on the future of military health care provided useful insights. If confirmed, I will look at all these alternatives to ensure that DOD provides quality care in an affordable manner.

Question. What is your understanding of the requirements of 10 U.S.C. section 1102(d) concerning the disclosure of medical quality assurance information?

Answer. Section 1102 protects information about a specific provider or patient. However, I am told that these data can be released in an aggregate statistical man-

ner to inform both military and non-military medical providers in advancing the resolution of systemic health care problems.

Question. If confirmed, do you agree to provide information requested by the committee in order to exercise its legislative and oversight responsibilities concerning medical quality assurance?

Answer. Yes.

NATIONAL CAPITAL REGION MEDICAL ISSUES

Question. The BRAC 220 decision to consolidate the Walter Reed Army Medical Center and the National Naval Medical Center at Bethesda is one of the most significant realignments in the history of military medicine. The outgoing Deputy Secretary of Defense established a joint task force (JTF) charged with review of design, transition, staffing and operation of the new, consolidated medical center, integration of clinical services and medical education programs, and enhanced support for wounded warriors and their families.

If confirmed, what steps would you take to ensure that the highest quality care is maintained for military beneficiaries and wounded warriors before, during, and after the transition to the new medical facility?

Answer. Care for our wounded warriors is Secretary Gates' top concern, next to the war. I understand that DOD has set up a JTF to make sure high quality service is not terminated at one facility until a successor facility is fully ready. If confirmed, I look forward to evaluating measures to achieving that end.

Question. How would you ensure that the new facilities and medical capabilities are achieved in the most effective and timely manner possible?

Answer. Care for our wounded warriors is the Secretary's number one concern next to the war itself. Wounded warriors deserve the most current capabilities and facilities we can provide. I note that there is a robust effort now in place to improve and expand medical care in the NCR overseen by the JTF National Capital Region Medical (CAPMED). If confirmed, I will oversee and support the JTF CAPMED's efforts to ensure this effort achieves success.

NATIONAL SECURITY PERSONNEL SYSTEM

Question. Section 1106 of the National Defense Authorization Act for Fiscal Year 2008 restored the collective bargaining rights of civilian employees included in the National Security Personnel System (NSPS) established by the DOD pursuant to section 9902 of title 5, U.S.C. Under section 1106, the Department retains the authority to establish a new performance management system (including pay for performance) and streamlined practices for hiring and promotion of civilian employees.

What is your view of the NSPS, as currently constituted?

Answer. I am generally familiar with the purpose and goals of NSPS, as well as the concerns expressed by Members of Congress and employee representatives. However, I have not reviewed the details of the system. If confirmed, I will conduct a thorough review of the program, in coordination with leadership from the Office of Personnel Management and other stakeholders, so I may gain a full understanding of the system.

Question. If confirmed, how will you evaluate its success or failure to meet its goals?

Answer. If confirmed, I will work with and seek the views of the appropriate stakeholders both within and outside the Department to gain a full understanding of NSPS and the extent to which it is meeting program goals and congressional intent. I am well aware of the important role civilian employees play in supporting the Department's critical mission, and I understand NSPS will be a priority issue for the Department.

Question. Do you support the pay-for-performance approach adopted for civilian employees in the NSPS?

Answer. I have not had a chance to thoroughly examine the details of the NSPS pay-for-performance. If confirmed, I will review the entire system, including this component. I am mindful of the importance of good performance management in achieving organizational results, as well as the need for fairness and transparency in any civilian personnel system.

Question. Do you believe that the Department needs streamlined authority for hiring and promotion of civilian employees to meet its human capital needs?

Answer. Although I have not yet fully examined NSPS streamlined hiring and promotion authorities, I am mindful of the challenges faced by the Department and the Federal Government to attract and retain a high quality civilian workforce, particularly in light of the fact that a large portion of the Federal workforce is eligible to retire or nearing retirement eligibility. Given the important role of the DOD civil-

ian workforce in supporting national security, our ability to compete for talent will become increasingly important. If confirmed, this will receive my early attention.

Question. In your view, is it viable in the long run for the DOD to maintain two separate systems (NSPS and the General Schedule) for its civilian employees?

Answer. If confirmed, I will conduct a full review of NSPS, including the status of the Department's implementation plan. The issue of maintaining two systems will certainly be a part of that review.

Question. What changes, if any, would you recommend to the NSPS authorizing legislation?

Answer. I am not aware of any immediate need for legislative changes at this time. However, if confirmed, I will fully examine the program and confer with congressional stakeholders in assessing the need for any statutory changes.

Question. What changes, if any, would you recommend to the NSPS regulations?

Answer. I understand the regulations jointly issued by the Department and the Office of Personnel Management provide much of the detail concerning NSPS. However, I have not had a chance to fully review those regulations or the NSPS program. If confirmed, I will make that an early priority.

HUMAN CAPITAL PLANNING

Question. Section 1122 of the National Defense Authorization Act for Fiscal Year 2006, as amended by section 1102 of the John Warner National Defense Authorization Act for Fiscal Year 2007 and section 851 of the National Defense Authorization Act for Fiscal Year 2008, requires the Secretary of Defense to develop and annually update a strategic human capital plan that specifically identifies gaps in the Department's civilian workforce and strategies for addressing those gaps. DOD has not yet produced a strategic human capital plan that meets the requirements of these provisions.

Would you agree that a strategic human capital plan that identifies gaps in the workforce and strategies for addressing those gaps is a key step toward ensuring that the Department has the skills and capabilities needed to meet future challenges?

Answer. See below.

Question. Do you see the need for any changes in the requirements of sections 1122, 1102, and 851, regarding the requirement for a strategic human capital plan?

Answer. I have not had the opportunity to become familiar with this area. If confirmed, I will solicit views of others, including Secretaries of the Military Departments, and Under Secretary of Defense for Personnel and Readiness (USD(P&R)). I will ensure that we keep the committee abreast of our progress.

Question. If confirmed, will you ensure that DOD fully complies with these requirements?

Answer. If confirmed, I will work to support any objectives in this area.

ALL-VOLUNTEER FORCE

Question. The All-Volunteer Force came into existence over 35 years ago and, since its inception, volunteer soldiers, sailors, airmen, and marines have helped to win the Cold War, defeat aggression during the Persian Gulf War, keep peace in the former Yugoslavia, combat terrorism in Iraq and Afghanistan, and defend freedom around the world.

Are you committed to the All-Volunteer Force?

Answer. Yes.

Question. Under what conditions, if any, would you support reinitiation of the draft?

Answer. The Nation should certainly preserve that option, but whether and when to use it would be a momentous decision.

Question. What factors do you consider most significant to the success of the All-Volunteer Force?

Answer. The focus should be on supporting military servicemembers and their families. In addition to maintaining strong compensation programs, efforts such as assuring quality education for children and a meaningful career for the military spouse are high on the agenda of today's generation of military servicemembers.

Question. What changes in pay, compensation, and benefits, if any, are needed in your view to sustain recruiting and retention?

Answer. I will have to look into this more, if confirmed, but to achieve success we must treat people fairly in terms of compensation, benefits, and quality of life.

RECRUITING STANDARDS

Question. Recruiting highly qualified individuals for military service and retaining highly trained and motivated personnel for careers present unique challenges, particularly while the Nation is at war. Criticism has been aimed at the Department for allowing relaxed enlistment standards in the Army with respect to factors such as age, intelligence, weight, and physical fitness standards, citizenship status, tattoos, and past criminal misconduct.

What is your assessment of the adequacy of current standards regarding qualifications for enlistment in the Armed Forces?

Answer. See below.

Question. In your view, does the Army have adequate procedures in place to ensure recruitment of only fully qualified individuals?

Answer. I am not fully familiar with the details of the current service standards and procedures, but if confirmed, I would work closely with the USD(P&R) to review recruiting standards for all the Services.

Question. What is your understanding of the status, cost (to date), and feasibility of implementation of the Defense Integrated Military Human Resources System (DIMHRS)?

Answer. See below.

Question. Do you believe that it is preferable to have a consolidated approach to human capital management systems for all four military Services, or to allow each of the Services to develop its own systems?

Answer. I am not fully familiar with the details of DIMHRS and efforts to consolidate the Services' human capital management systems but, if confirmed, I plan to examine them closely.

DETAINEE TREATMENT POLICY

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the United States Government, regardless of nationality or physical location, shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is the prohibition in the best interest of the United States? Why or why not?

Answer. In my view, this prohibition is in the best interest of the United States. I also believe that the Department's leadership should always be mindful of multiple considerations when developing standards for detainee treatment, including the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts.

Question. If confirmed, will you take steps to ensure that all relevant DOD directives, regulations, policies, practices, and procedures fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the DOD Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. Do you believe that the United States has the legal authority to continue holding alleged members and supporters of al Qaeda and the Taliban as enemy combatants?

Answer. Yes. As a general matter, the United States is authorized to detain those individuals determined to be enemy combatants. I cannot comment on the circumstances of the detention of specific individuals, which, in many cases, is the subject of pending litigation.

Question. Do you believe that the Combatant Status Review Tribunals convened by DOD to provide Guantanamo Bay, Cuba (GTMO), detainees an opportunity to contest designation as enemy combatants provide detainees with appropriate legal standards and processes?

Answer. If I am confirmed, I expect that I and others will examine this issue carefully.

Question. What role would you expect to play, if confirmed, in reviewing the status of GTMO detainees and determining whether the United States should continue to hold such detainees?

Answer. At present the Deputy Secretary of Defense is delegated the responsibility to determine whether a GTMO detainee should be released or transferred,

upon the recommendation of an Administrative Review Board. I anticipate that the new administration will review the current process and may make changes to it.

Question. Do you support closing the detention facility for enemy combatants at GTMO?

Answer. Yes. As both President-elect Obama and Secretary Gates have stated, the detention facility at GTMO has become a liability for the United States.

Question. In order to mitigate the risk associated with the release of GTMO detainees, do you believe DOD should establish some form of rehabilitation training for enemy combatants held at GTMO?

Answer. I understand that the efforts in Iraq to rehabilitate and reconcile detainees have been fairly successful. If confirmed, I would help explore whether such a program could be tailored appropriately and successfully implemented for the population at GTMO.

Question. What other ways could the United States use to encourage or entice our allies or other nations to accept detainees from GTMO? Would monetary support or sharing of technology for monitoring detainees be helpful inducements?

Answer. If confirmed, I would work closely with the State Department to seek new ways to encourage our allies and friends to assist us in transferring those detainees from GTMO who can be safely returned to their home countries or resettled in a third country when that is not possible.

Question. The Military Commissions Act of 2006 authorized the trial of "alien unlawful enemy combatants" by military commission and established the procedures for such trials.

In your view, does the Military Commissions Act provide appropriate legal standards and processes for the trial of alien unlawful enemy combatants?

Answer. If confirmed, I intend to carefully confer with the Secretary and the OGC as to whether the Military Commissions Act strikes the right balance between protecting U.S. national security interests and providing appropriate legal standards and processes for a fair and adequate hearing.

Question. Under what circumstances, if any, do you believe that it would be appropriate to use coerced testimony in the criminal trial of a detainee?

Answer. If confirmed, I anticipate looking carefully with the OGC at whether use of coerced testimony is ever appropriate in the criminal trial of a detainee.

Question. What role would you expect to play, if confirmed, in determining whether GTMO detainees should be tried for war crimes, and if so, in what forum?

Answer. As I understand the current structure under the Military Commissions Act, the Convening Authority makes the decision on which cases are referred to a military commission. If confirmed, I anticipate reviewing with the OGC the current process to determine whether to recommend any changes to it.

Question. What role would you expect to play, if confirmed, in reviewing the Military Commissions Act and developing administration recommendations for any changes that may be needed to that Act?

Answer. If confirmed, I anticipate reviewing the Military Commissions Act with the OGC to determine whether to recommend any legislative proposals to change it.

Question. In the past 2 years, significant changes have been made in Iraq in the way detention operations have been conducted in a counterinsurgency environment, including through the establishment of reintegration centers at theater internment facilities.

What do you consider to be the main lessons learned from the changes to detention operations in Iraq?

Answer. As we begin to transition detention operations and facilities to full Iraqi control, it is vital that we do our best to ensure that the increased quality of our facilities and our approach to detainee operations is maintained, as this line of operation is a critical component of successful counterinsurgency doctrine and practice.

Question. What should be done to incorporate those lessons learned into DOD doctrine, procedures, and training for personnel involved in detention and interrogation operations?

Answer. I believe that a lot of these lessons are being captured today, and are reflected in new doctrine and directives.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Secretary of Defense?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JACK REED

DEFENSE LABORATORIES

1. Senator REED. Mr. Lynn, in your view, how does the quality of the Department of Defense (DOD) laboratories compare to the quality of the national laboratories and to industry and academic laboratories?

Mr. LYNN. I view a healthy science and technology (S&T) program, which includes high-performing DOD laboratories, as important to the overall national security. We should view DOD laboratories as providing a dedicated set of capabilities for the Armed Forces; but the Department should work with other agency and university laboratories where it is the Nation's and Department's best interest. This includes the Department of Energy national laboratories, National Aeronautics and Space Administration research centers, the National Institute of Standards and Technology, as well as universities and industry. The mix of the strengths of all laboratories is important to DOD.

2. Senator REED. Mr. Lynn, what steps do you plan to take in terms of infrastructure improvement, management practices, and personnel authorities to empower laboratory directors to revitalize their institutions and perform their designated technology development missions?

Mr. LYNN. The ability of the DOD laboratories to support the Department's missions through research and technology development is important for our national security. The Department must attract and retain a workforce that is competitive, with hiring mechanisms that provide flexibility to recruit the best, and a workforce environment that will retain and reward them. To this end, if confirmed, I will be evaluating the effectiveness of the existing personnel demonstration programs conducted at many of DOD's laboratories, the S&T Reinvention Laboratories, to identify which authorities have proven to be effective in addressing workforce recruitment, retention, technical qualifications and imbalances; improving laboratory quality and effectiveness; and assessing whether there are authorities or management approaches that DOD may choose to implement across its entire S&T workforce. If confirmed, I will also review other relevant authorities available to the Department to assess their effectiveness and identify new opportunities that may be available for the Department to pursue.

SMALL BUSINESS RESEARCH

3. Senator REED. Mr. Lynn, do you feel the Department does an adequate job of accessing the innovation potential of our Nation's small advanced technology businesses?

Mr. LYNN. I believe that the Department is doing a good job of accessing the innovation potential of small advanced technology businesses. I am told that DOD invests a significant part of its annual Research and Development (R&D) budget to access the innovation potential of our Nation's small advanced technology businesses, both as prime and subcontractors.

Small businesses make a significant contribution towards our Nation's economic strength. The statistics on American small business show that they represent 99.7 percent of all employer firms, employ about half of all private sector employees,

have generated 60–80 percent of all new jobs over the last decade, and produce more than half of the nonfarm private Gross Domestic Product. In the technology sector, small businesses produce 13 times more patents per employee than large firms and hire 40 percent of all high tech (scientists, engineers, computer scientist) workers. (Source: Small Business Administration Frequently Asked Questions Sept. 2008.)

Small businesses are important to our Nation's military strength. Small businesses offer such attributes as flexibility, agility, responsiveness, and lower operating costs. Small businesses are also one of the best sources of technological innovation, which the Department uses to develop solutions to meet the needs of the warfighter.

I understand that the Small Business Innovation Research (SBIR) program is the Department's premier program focused on accessing small business innovation for the benefit of the warfighter. This program sets aside 2.5 percent of the Department's extramural R&D budgets in excess of \$100 million for the program. In fiscal year 2007, the SBIR program awarded 2,849 contracts with a budget of \$1.2 billion. Over 60 percent of SBIR projects historically continue to receive funding from other sources as the innovative products migrate into defense and commercial applications. These statistics, as well as other tools for small businesses including sample proposals are available on the SBIR/Small Business Technology Transfer Web site.

4. Senator REED. Mr. Lynn, what steps should the Department take to better involve small business in DOD research and acquisition efforts?

Mr. LYNN. The Department has a good record of working with small businesses. In addition to contracting directly with small businesses, the Department encourages its prime contractors to offer small, innovative firms maximum possible opportunity to compete for government contracts.

I understand that the Department is proactive in its efforts to involve small businesses in research and acquisition. Each military department and defense agency has an Office of Small Business Programs that advocates on behalf of small businesses and undertakes to ensure all statutory and regulatory requirements relating to small business contracting are met. These offices work with the acquisition community and industry to provide maximum practicable opportunities to small businesses. The Department's small business workforce sponsors and participates in numerous outreach and training activities to make small businesses aware of DOD research and acquisition contracting opportunities.

If confirmed, it will be necessary for me to make an assessment of the current situation before making any recommendations for improving small business participation in the Department's research and acquisition efforts. This assessment would need to consider such matters as the long term, strategic goals to be achieved, through better involvement of small businesses, for both the warfighter and the taxpayer.

MANUFACTURING AND INDUSTRIAL BASE ISSUES

5. Senator REED. Mr. Lynn, how would you assess the health of our Nation's defense and technology industrial bases in terms of their ability to meet DOD near- and far-term needs?

Mr. LYNN. Generally, my viewpoint is that our Nation's defense and technology industrial bases, while perhaps not as robust as they were before the world-wide wave of industrial consolidation that began in the mid-1990s, remain today and for the foreseeable future the most innovative, reliable, and cost-effective in the world. I believe this primarily because our defense and technology industrial bases continue to consistently develop, produce, and support militarily-superior defense systems that are the envy of the world. If confirmed, I would work to better sustain and leverage those bases by ensuring that DOD decisions and funding support the cost-effective creation and preservation of industrial and technological capabilities essential to defense; and increasing the Department's use of the highly-competitive commercial marketplace by encouraging use of dual-use technologies, processes, and material. Finally, I think that industrial globalization is a reality that the Department must address. Given the interconnectivity of supply chains, the Department's challenge is to leverage the benefits of the global commercial industrial base, while also recognizing and minimizing the risks in doing so.

6. Senator REED. Mr. Lynn, what steps should the Department take to strengthen the Nation's capacity to design, test, and manufacture weapons systems and other defense technologies?

Mr. LYNN. In my opinion, the Department must better leverage its buying power via an acquisition system that effectively balances realistic requirements, stable/sufficient funding, and sufficient time to strengthen the Nation's capacity to design, test, and manufacture the world's most capable weapon systems and defense technologies. If confirmed, I would support the Department's current strategy to rely on market forces to the maximum extent possible to create, shape, and sustain the industrial and technological capabilities needed to provide for the Nation's defense. However, I think it is also important to recognize that the Department (through its budget, acquisition, and logistics processes) can create market forces capable of harnessing the innovation potential in the industrial/technological base. In addition, when it becomes necessary to intervene in the marketplace, the Department has tools available—for instance, the Defense Production Act Title III Program and the Manufacturing Technology Program—which help to focus industry attention on critical technology development, accelerate technology insertion into manufacturing processes, create or expand critical production facilities, and direct production capacity towards meeting the most urgent warfighter needs. Finally, I believe that the acquisition initiatives recently posed by Secretary Gates hold great promise in strengthening our Nation's defense industrial capabilities—i.e., freezing requirements earlier for proposed systems, improving production contracts, employing prototypes to learn more about competing proposals, planning better, and balancing rapid and lengthy acquisition timelines.

IMPORTANCE OF INFORMATION SHARING TO NATIONAL SECURITY

7. Senator REED. Mr. Lynn, the September 11 attacks illustrated a fundamental failure by our Government to share information effectively in order to detect and prevent the attack by “connecting the dots.” The 9/11 Commission identified 10 lost “operational opportunities” to derail the attacks. Each involved a failure to share information between agencies. In the aftermath of the September 11 attacks, major efforts have been made to improve information-sharing. Through legislation and Executive orders these efforts were designed to effect a “virtual reorganization of Government” with communities of interest working on common problems across agency boundaries and between Federal, State, and local governments, and the private sector. While we have established the necessary legal structures, I am concerned that implementation is lacking. What is your view on the importance of information-sharing to our national security and what steps will you take to improve the Government's ability to share information in a trusted environment?

Mr. LYNN. Information-sharing is an important part of a whole-of-government approach to combating terrorism and providing for national security. The right information must be shared at the right time not only with Federal, State, and local governments but also with international friends and allies. I will work to ensure the Department is committed to the trusted sharing of information with these key partners.

8. Senator REED. Mr. Lynn, in the wake of September 11, Congress and President Bush put enhanced information-sharing forward as a major goal by passing the Intelligence Reform and Terrorism Prevention Act of 2004 and the 9/11 Commission Recommendations Implementation Act of 2007. The information-sharing environment established by this legislation is designed to enable our Government to use information in new and more powerful ways. While improved information-sharing enhances our national security, it also presents the risk that the Government will use these powerful new authorities to acquire vast amounts of data. This has the potential to infringe on privacy and civil liberties. As the 9/11 Commission said, this increase in governmental power “calls for an enhanced system of checks and balances.” What steps will you take to ensure that, as information-sharing is enhanced, new and more powerful protections are developed to safeguard privacy and civil liberties and how will you help make sure that the American public trusts that the Government will respect their privacy?

Mr. LYNN. The Nation's security should not require the abandonment of our values, privacy, or civil liberties. As Deputy Secretary of Defense, I will work to ensure that all matters within the full range of my authority are consistent with the Constitution and the law.

QUESTION SUBMITTED BY SENATOR DANIEL K. AKAKA

CHINA'S MILITARY TRANSFORMATION

9. Senator AKAKA. Mr. Lynn, our military has experienced strains after nearly 7 years of warfare. It is imperative that we support our forward-deployed forces engaged in current operations but we must not overlook other important developments in the international system. For example, China's continued investment in their military transformation has the potential to alter the balance of power in the Asia-Pacific region. In March 2007, Beijing announced a 19.47 percent increase in its military budget from 2006 to approximately \$45.99 billion. In light of China's continued military modernization efforts, do you believe that U.S. forces in the Pacific Command are fully prepared to address any possible threats related to China's modernization, particularly with regards to Pacific Command's forward basing requirements?

Mr. LYNN. Forward basing of U.S. forces and alliance capabilities are important during peacetime and crisis. As such DOD has undertaken a series of force realignments in Korea, Japan, and Guam, including the forward-basing of the *George Washington* to Japan. These posture realignments will position our forces in the Pacific to be more fully prepared to address any military contingency in the Asia-Pacific region, including those that may involve China. Basing, posture, and future capabilities are important issues that DOD should address further in the Quadrennial Defense Review (QDR).

QUESTIONS SUBMITTED BY SENATOR BILL NELSON

SURVIVOR BENEFIT PLAN/DEPENDENCY AND INDEMNITY COMPENSATION OFFSET

10. Senator BILL NELSON. Mr. Lynn, for 8 years I have worked to eliminate the unjust offset between the DOD Survivor Benefit Plan (SBP) and the Department of Veterans Affairs Dependency and Indemnity Compensation (DIC). Under current law, if the surviving spouse of a servicemember is eligible for SBP, that annuity is offset by the amount of DIC received. I would like to work with DOD to devise a plan to eliminate the offset over time; it is the least we can do for the widows, widowers, and orphans of our servicemembers. What is the proper balance of discretionary and mandatory spending that will not only ensure our national defense, but will also take care of our servicemembers, veterans, and their families?

Mr. LYNN. While I have not yet had an opportunity to be briefed on this subject, it's important to be fair to our veterans' and their surviving family members. If confirmed, I will look into this area to ensure our veterans and their families are treated fairly.

11. Senator BILL NELSON. Mr. Lynn, what would a plan look like that would eliminate the SBP-DIC offset over 4 years and over 10 years?

Mr. LYNN. As noted in the answer to the prior question, I will need to explore this subject more fully with the goal of ensuring our veterans and their families are treated fairly.

BASE REALIGNMENT AND CLOSURE COMMISSION

12. Senator BILL NELSON. Mr. Lynn, in November 2005, the Base Realignment and Closure Commission (BRAC) of 2005 went into effect. Full funding of BRAC 2005 is imperative because the Services must build infrastructure to support the mandated force movements. Two BRAC 2005 conclusions that affect Florida are the establishment of Initial Aircraft Training for the F-35 Lightning II Joint Strike Fighter and the beddown of the 7th Special Forces Group at Eglin Air Force Base. The BRAC 2005 law expires in 2011. Explain how DOD will support the Services' funding requests necessary to implement the BRAC 2005 law before expiration of the BRAC 2005 mandate.

Mr. LYNN. While I am not yet familiar with the budget details of the Services, it is my understanding the Department has tasked the applicable components to fully fund all BRAC 2005 actions to meet the September 15, 2011 deadline.

NAVY DECISION TO ESTABLISH A SECOND AIRCRAFT CARRIER HOMEPORT

13. Senator BILL NELSON. Mr. Lynn, in 2006, the Navy began an environmental impact statement to determine the environmental impact of homeporting additional

surface ships at Naval Station Mayport, FL. Since 2005, congressional and military leadership have reaffirmed the importance of dispersing the Atlantic Fleet in two ports. In February 2005, then Chief of Naval Operations, Admiral Clark, stated that it was his view that, "over-centralization of the [carrier] port structure is not a good strategic move . . . the Navy should have two carrier-capable homeports on each coast." He went on to say, ". . . it is my belief that it would be a serious strategic mistake to have all of those key assets of our Navy tied up in one port."

Deputy Secretary of Defense Gordon England, as the former Secretary of the Navy, testified to the Senate Armed Services Committee that the Navy needed to disperse its Atlantic coast carriers: "My judgment is that [dispersion] is still the situation . . . a nuclear carrier should be in Florida to replace the [U.S.S. *John F. Kennedy* to get some dispersion."

The current Chief of Naval Operations, Admiral Roughead, recommended to Secretary of the Navy Winter that Naval Station Mayport should be made capable of homeporting a nuclear aircraft carrier homeport to reduce the risk to our Atlantic Fleet carriers should Norfolk become incapacitated. The current Chairman of the Joint Chiefs of Staff, Admiral Mullen, agrees with Admiral Roughead's recommendation.

On January 14, the Navy made its decision to make Naval Station Mayport a carrier homeport and plans to request the necessary funding for its implementation in its fiscal year 2010 budget request. Understanding the fiscal challenges facing our country and the constrained defense budget, how will you approach this funding priority among the many priorities facing the military?

Mr. LYNN. I have not yet had the opportunity to explore the details of this move. However, if confirmed, I will examine this decision and its impact on the fiscal year 2010 POM to ensure the Department's strategy and funding match.

14. Senator BILL NELSON. Mr. Lynn, the principle of strategic dispersal is decades old. What is your understanding of the principle of strategic dispersal and what are your thoughts of Secretary of the Navy Donald Winter's implementation of this principle with respect to Naval Station Mayport?

Mr. LYNN. Strategic dispersal is a protective measure that allows forces to be less vulnerable to a single critical attack. However, in many cases dispersal also increases costs by reducing economies of scale. If confirmed, I will seek to strike a balance of developing an effective basing strategy that the Department can afford.

SEXUAL ASSAULTS IN IRAQ AND AFGHANISTAN

15. Senator BILL NELSON. Mr. Lynn, untold numbers of sexual assaults have been committed in Iraq and Afghanistan by executive branch contractors and employees. In 2007, I sent letters regarding sexual assault to the Secretaries of Defense and State and the Attorney General. On December 13, 2007, I wrote to Secretary of Defense Gates, requesting that he launch an investigation by the Defense Department's Inspector General (DOD/IG) into rape and sexual assault cases in Iraq and Afghanistan. Following my letters, the DOD/IG stated that the Army Criminal Investigation Command (CID) investigated 41 sexual assaults in Iraq in 2005, 45 sexual assaults in 2006, and 38 sexual assaults in 2007. These numbers are limited to only 3 years worth of investigations by the Army in Iraq. They do not include investigations for both theaters of operations nor all the Services operating in Iraq and Afghanistan. Consequently, there could be many additional investigations and assaults that have not been investigated. Also, because the DOD/IG would not provide information on the status of its investigations, it remains unclear how many of these cases have been prosecuted and/or processed within the military or criminal justice systems. If confirmed, how will you work with your counterparts at the Departments of State, Justice, and other executive branch departments with regard to contractor crimes in Iraq and Afghanistan?

Mr. LYNN. Sexual assault is a crime and an affront to our values. The Department recognizes even one sexual assault is too many and in 2004 established the DOD Sexual Assault and Prevention Office to provide policy and procedures to address the issues encountered by victims of sexual assault worldwide. If confirmed, I will continue to support the Office of the General Counsel in their efforts to coordinate with other Federal agencies to ensure the criminals perpetrating these acts are prosecuted.

QUESTIONS SUBMITTED BY SENATOR EVAN BAYH

TROOP LEVELS IN AFGHANISTAN

16. Senator BAYH. Mr. Lynn, as the U.S. military continues to draw down our forces in Iraq, how does the new administration propose to balance the needs of maintaining security in Iraq with its pledge to increase our troop levels in Afghanistan by as many 30,000 servicemembers?

Mr. LYNN. The Department must continue to listen to the assessments of our military commanders in the field, United States Central Command, and the Joint Chiefs of Staff to develop and provide the President the right options. Getting troop levels in Iraq and Afghanistan right is a critically important issue that, if confirmed, I will follow closely.

17. Senator BAYH. Mr. Lynn, how do these requirements square with the readiness levels and operational tempo we have demanded of our troops?

Mr. LYNN. Our force's current operational tempo and associated readiness levels present a continuing challenge for the Department. Rotation timelines, increased allied contributions, and a strong interagency plan must all be considered to properly meet current and future taskings. Current plans to increase the Army and Marine Corps would also help reduce these pressures.

RESOURCES FOR IRAQ AND AFGHANISTAN

18. Senator BAYH. Mr. Lynn, according to the recently signed Status of Forces Agreement with Iraq, American combat troops will begin leaving Iraq very soon. How do you plan to address the significant need for equipment recapitalization and reset while also weaning the Department off of supplemental budget requests?

Mr. LYNN. As the Department addresses the fiscal year 2010 budget, recapitalization and reset are part of a wide span of important requirements that must be balanced. This process will present many tough choices for DOD leadership as they respond to the economic environment.

19. Senator BAYH. Mr. Lynn, what risks does DOD face by continuing to rely so heavily on the supplemental process?

Mr. LYNN. Supplemental appropriations are an important tool for the government to respond to contingency requirements. But the core defense budget needs should proceed through the normal authorization and appropriations process to ensure proper balance and appropriate oversight.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

TROOP LEVELS IN AFGHANISTAN

20. Senator MCCAIN. Mr. Lynn, General McKiernan has spoken of increasing U.S. troops in Afghanistan by something on the order of four combat brigades. Do you support this request?

Mr. LYNN. Secretary Gates has highlighted the current troop shortfalls in basic security and training in the face of an increasingly active Taliban. At current levels, our forces are challenged to provide a foundation of security while at the same time supporting our broader efforts to train Afghan security forces. The Department needs to examine General McKiernan's request in that context.

21. Senator MCCAIN. Mr. Lynn, would increasing the number of troops in Afghanistan require us to draw down in Iraq faster than we otherwise might?

Mr. LYNN. If confirmed, I will assist Secretary Gates in his review of possible options to provide to the President.

22. Senator MCCAIN. Mr. Lynn, how large do you believe the Afghan National Army (ANA) and the Afghan National Police (ANP) should ultimately be?

Mr. LYNN. Both the Government of Afghanistan and the international community have agreed an increase in Afghan security forces is required for the Afghans to assume primary responsibility for their own security. This planned expansion would bring the ANA to 134,000 and the ANP to 82,000. It is not yet clear whether these levels will be sufficient over the long run. The ultimate number will require continued assessment and evaluation to determine.

NATO SUPPORT IN AFGHANISTAN

23. Senator MCCAIN. Mr. Lynn, the Afghanistan mission is an important test of the North Atlantic Treaty Organization's (NATO) out-of-area capability. Yet, NATO commanders continue to have difficulty persuading allies to contribute forces to International Security Assistance Force or to provide NATO forces the appropriate equipment for their tasks. Secretary Gates testified last year that he is worried about the alliance evolving into a two-tiered alliance, in which you have some allies willing to fight and die to protect people's security, and others who are not. How do you assess the contributions of NATO allies to the war in Afghanistan?

Mr. LYNN. NATO and other non-NATO partner nation contributions, both military and civilian, are an important component of the international mission in Afghanistan. While NATO contributions have increased over time, their growing involvement will continue to play a pivotal role in the stabilization and security of Afghanistan.

24. Senator MCCAIN. Mr. Lynn, what steps would you recommend to persuade NATO nations to increase their efforts in concert with our own?

Mr. LYNN. NATO and other international contributions are an important component of the international mission in Afghanistan. If confirmed, I will examine future strategy options in part for their proposed steps to increase partner contributions.

GUANTANAMO BAY

25. Senator MCCAIN. Mr. Lynn, President-elect Obama has said he wants to close the military detention facility at Guantanamo Bay (GTMO). If confirmed, how would you go about executing the President-elect's policy? How would you approach this challenge?

Mr. LYNN. As both President Obama and Secretary Gates have stated, the detention facility at GTMO has become a liability for the United States. If confirmed, I would work closely with the State Department to seek new ways to encourage our allies and friends to assist us in transferring those detainees from GTMO who can be safely returned to their home countries or resettled in a third country when that is not possible.

ACTIVE-DUTY END STRENGTH

26. Senator MCCAIN. Mr. Lynn, the President-elect and the Secretary of Defense have endorsed significant increases in the Active-Duty strengths of the Army and Marine Corps and these Services have been working hard to accelerate this growth. Please discuss your concerns about the rising cost of personnel and how you anticipate this will affect the ability of the Services to recapitalize its equipment.

Mr. LYNN. All of our servicemembers, Active and Reserve, continue to perform extraordinarily in light of the demands we have placed upon them. However, as the President has stated, we do believe increases in our ground forces are necessary. Moreover, we cannot fail to have the right numbers and kinds of uniformed personnel to win our wars, and to deter potential adversaries. While our force, Active and Reserve, must be large enough to satisfy deployment needs, there must be a base that recognizes the personal needs of our volunteers and their families. At the same time, our volunteers must have the weapons, equipment and support that will enable mission success. Striking the right balance between personnel, recapitalization, and operational and support costs is a challenging imperative that will be central to the fiscal year 2010 budget and the QDR. We look forward to working with Congress.

CHIEF OF THE NATIONAL GUARD BUREAU AND THE JOINT CHIEFS OF STAFF

27. Senator MCCAIN. Mr. Lynn, do you think the Chief of the National Guard Bureau should be a member of the Joint Chiefs of Staff? Why or why not?

Mr. LYNN. In recognition of its increased role in recent years, the Chief of the National Guard Bureau was raised to a four-star position in December 2008. If confirmed, I will evaluate this very recent adjustment over time before recommending further changes in the Joint Chiefs of Staff structure.

RETIREES AND THE COST OF DOD HEALTH CARE

28. Senator MCCAIN. Mr. Lynn, for the last 3 years, the administration has tried—without success—to gain approval for increases in the annual premiums for DOD-provided health care paid for by military retirees under the age of 65. What are your views about the need for change in this regard?

Mr. LYNN. The amount of funding budgeted for healthcare must be in balance with all of the other essential requirements that must be funded in the DOD budget. DOD established the Task Force on the Future of Military Healthcare in accordance with the provisions of the NDAA for Fiscal Year 2007. The Task Force reviewed several aspects of military healthcare including “the beneficiary and government cost sharing structure” and provided recommendations to promote the provision of quality, cost-effective healthcare for DOD beneficiaries. I will utilize the Task Force’s recommendations as a reference when evaluating the benefit and government cost-sharing options for implementation to ensure that DOD continues to provide quality care in a manner that also provides the best value for our service-members and our Nation.

FUNDING FOR WOUNDED WARRIOR CARE

29. Senator MCCAIN. Mr. Lynn, in your answers to pre-hearing policy questions you indicated that you will supervise the development of the Department’s 2010 budget submission. I urge you to pay particular attention to funding of wounded warrior care and research. Congress has provided significant increases in funding for traumatic brain injury (TBI) and post-traumatic stress disorder (PTSD) research and treatment, as well as programs critical to supporting family needs, through supplemental appropriations. These conditions are enduring requirements in support of warfare, and far too important to rely on supplemental appropriations. Will we see the Department’s full funding requirements for TBI and PTSD in the budget which you develop and submit to Congress in March or April of this year?

Mr. LYNN. I certainly agree that funding for wounded warrior care and research, such as that which was provided through prior supplemental appropriations, is an important priority for DOD. If confirmed, I will personally review the fiscal year 2010 budget to ensure that wounded warrior care is funded appropriately.

“SOFT POWER”

30. Senator MCCAIN. Mr. Lynn, Secretary Gates has called on Congress to provide more funding for the State Department’s Foreign Service and the U.S. Agency for International Development. Just a few days ago, Admiral Mullen expressed the same views commenting that our national security and foreign policy requires “a whole-of-government approach to solving modern problems” and “we need to reallocate roles and resources in a way that places our military as an equal among many in government—as an enabler, a true partner.” Admiral Mullen went on to say that “as an equal partner in government, I want to be able to transfer resources to my other partners when they need them.” What thoughts do you have on these remarks calling for more resources for civilian agencies responsible for “soft power,” including the Departments of State, Justice, Commerce, and Agriculture?

Mr. LYNN. A successful whole-of-government approach requires greater investment in our non-military instruments of power. Our civilian institutions need to have the will and capacity to support more integrated approaches for national strategies to be effective.

31. Senator MCCAIN. Mr. Lynn, should Congress provide greater flexibility for the military to transfer funding during a crisis?

Mr. LYNN. More flexible spending authorities would allow the Department to be more responsive and adaptable during a crisis.

CYBER SECURITY AND CYBER THREATS

32. Senator MCCAIN. Mr. Lynn, the United States heavily depends on our cyber-infrastructure—possibly more than any other nation. What do you think the greatest threat to the United States is in terms of cyber security and cyber threats?

Mr. LYNN. Our ability to conduct business, communicate, and operate through cyberspace is one of our Nation’s greatest strengths. Indeed, the United States does depend upon cyberspace and its associated information technology infrastructure. DOD relies upon global data and telecommunication networks, much of which is

owned and operated by the commercial sector, to conduct full spectrum land, sea, air, and space operations. Adversaries could potentially acquire a capability to deny or disrupt the Department's access to those networks, or impact operations by diminishing our confidence in the reliability of those networks. Bad actors in cyberspace can range from insider threats to malicious hackers, criminal organizations to nation-states. Although nation-states can invest greater resources and acquire more sophisticated capabilities than non-state actors, all are a cause for concern. As Estonia experienced in 2007, it only takes a small but committed group of malicious hackers to bring a technologically sophisticated government to a standstill. Threats to cyber-infrastructure are not solely through cyberspace, we must maintain awareness of physical vulnerabilities to key communications nodes, electrical power sources, satellite or ground relay links, and underground or undersea cables. The range of potential adversaries is such that there is no "greatest" threat, only the enduring need to remain vigilant, and continually improve security, reliability, and resiliency of our critical information networks.

33. Senator MCCAIN. Mr. Lynn, how is DOD organized to address cyber threats?

Mr. LYNN. Commander, U.S. Strategic Command (CDRUSSTRATCOM) has the DOD lead for cyberspace operations per the 2008 Unified Command Plan. CDRUSSTRATCOM has designated Commander, Joint Functional Component Command—Network Warfare (JFCC—NW), as the lead for the planning, integration, and, as directed, execution of the full spectrum of military cyberspace operations. The Director of the National Security Agency is dual-hatted as Commander, JFCC—NW. Joint Task Force—Global Network Operations (JTF—GNO) is under the operational control of JFCC—NW. The Director of the Defense Information Systems Agency is dual-hatted as Commander, JTF—GNO. CDRUSSTRATCOM has designated JTF—GNO as the lead for directing the operation and defense of the Department's Global Information Grid. In addition, the Department is a major partner, as well as a key enabler of the Comprehensive National Cybersecurity Initiative, working closely with interagency partners to provide support to efforts aimed at securing U.S. Government networks and the national cyber infrastructure.

34. Senator MCCAIN. Mr. Lynn, is the current structure adequate to address this threat?

Mr. LYNN. I consider your question to be of utmost importance to DOD and to the Nation. As a nominee for the Deputy Secretary of Defense, I will refrain from answering this question because I do not have the proper insights into this complex question. I can tell you however, that if confirmed, I will address this critical issue to determine if DOD is optimally structured and organized to conduct a wide range of cyber missions now and into the future.

DEFENSE BUSINESS BOARD VIEW

35. Senator MCCAIN. Mr. Lynn, the Defense Business Board (DBB), an internal management oversight board established by Secretary Gates, recently warned that the Defense Department's budget is "unsustainable" and that the Department can only meet its priorities if it makes hard budget decisions on its largest and costliest acquisition programs. "Business as usual [in terms of the Department's budget decisions] is no longer an option," warned the Board. Do you agree with the DBB's warning?

Mr. LYNN. Yes, business as usual is no longer an option. President Obama and Secretary Gates have underscored that change is needed and vowed to make acquisition reform a top priority.

36. Senator MCCAIN. Mr. Lynn, what principles will guide your thinking on possible cuts to large acquisition programs?

Mr. LYNN. Acquisition programs must be able to deliver the required capability on schedule and at or under cost. The capabilities they provide must not be duplicative of other acquisitions, and these capabilities must be integral components of the overall portfolio of capabilities that the Department needs to accomplish its mission. We will review programs to ensure that they have the required technological and production maturity to enable successful delivery of the required capability to the warfighter according to schedule, and at cost. Programs lacking this maturity may be candidates for termination or restructure, depending on their potential contributions to our mission accomplishment. Cuts to large acquisition programs will also be evaluated against the capabilities they provide to ensure accomplishment of the Department's mission to defend our Nation, its interests, and our allies. We will re-

view acquisitions to determine which best address requirements of near-term engagements and current known threats, and fund the highest priority acquisition programs that address these areas. At the same time, we will also ensure that we do not neglect the need for increased capabilities to meet increased or new threats in the future. As standard practice, we will align our acquisitions to stay within our funding topline and always strive to get the best value for our resources.

F-22A DECISIONS

37. Senator MCCAIN. Mr. Lynn, early this year, this administration will be required to make what amounts to a go/no-go decision on the F-22A Raptor program, an increasingly expensive tactical program that has made no contribution to the global war on terror and that may impinge on the timing and cost of when the F-35 Joint Strike Fighter may first be operationally capable. Do you have any preliminary thoughts on whether the F-22A program should be continued or should be wound down as originally planned?

Mr. LYNN. The F-22A Raptor is the most advanced tactical fighter in the world and, when combined with the F-35 Joint Strike Fighter, will provide the Nation with the most capable and lethal mix of 5th generation aircraft available for the foreseeable future. The tremendous capability of the F-22A is a critical element in the Department's overall tactical aircraft force structure requirements. The Department is reviewing whether to procure more F-22A aircraft beyond its current Program of Record quantity of 183 and will make a recommendation to the administration in time to meet the requirements stipulated in section 134 of the National Defense Authorization Act for Fiscal Year 2009.

38. Senator MCCAIN. Mr. Lynn, what principles will guide the Department's thinking on that matter?

Mr. LYNN. The Department is currently reviewing whether to procure more F-22A aircraft beyond its current Program of Record quantity of 183. Some of the factors that will go into the Department's recommendation to the administration are: compliance in meeting the requirements of the current National Military Strategy; affordability of additional F-22A aircraft within the Department's resource constrained environment; and whether continued production or termination is in the national interest of the United States.

REFORMS FOR PROCUREMENT OF WEAPONS SYSTEMS

39. Senator MCCAIN. Mr. Lynn, over the last few years, this committee has developed several legislative initiatives intended to reform the process by which the Department buys its largest and most expensive weapons systems. The preponderance of those initiatives have addressed acquisition policy and the requirements system. Are there any aspects of acquisition policy, the requirements-determination system, or the resource allocation process that you believe require additional reform?

Mr. LYNN. One issue the Department faces in regard to buying weapon systems is creating program stability. There are critical linkages among the requirements generation, acquisition management, and programming and budgeting systems. To achieve effective outcomes, all three systems must be aligned so that once a corporate commitment is made to developing a material solution that achieves a needed capability the development process is not destabilized by changes in requirements, immature technology, or budget adjustments. To stabilize programs, DOD must perform the necessary analysis, technology development, and cost estimating so sufficient knowledge is available to allow informed decisions to move into development. Over the years, DOD has implemented several reforms to improve program stability. For example, DOD has created Configuration Steering Boards to manage requirements changes and directed competitive prototyping to mature technology. The Department will continue to emphasize the need to perform adequate upfront planning prior to development. More work needs to be done on funding stability. Congress has helped by emphasizing certifications that focus on assessing need, priority, and funding. Now, DOD must find a way to eliminate perturbations in high priority programs that are well-managed.

40. Senator MCCAIN. Mr. Lynn, the Department recently instituted several reforms to the Defense Department Instructions on how the Defense Acquisition System (DAS) operates. Those initiatives seek to start major acquisition programs off responsibly by increasing emphasis on systems engineering and greater upfront planning and management of risk, as well as utilization of competitive prototyping

in a newly-named Technology Development Phase (before Milestone B). Are there any aspects of those newly instituted instructions (or the newly structured DAS) with which you have difficulty or intend to modify or repeal?

Mr. LYNN. I believe the general direction of the new policies is sound. The Department should stay committed to achieving improved acquisition outcomes by reducing risk, and improving process discipline. If confirmed, I plan to closely monitor the execution of these policies and review whether any modifications are appropriate.

41. Senator MCCAIN. Mr. Lynn, among the reforms that this committee and the Department have instituted include those that enable the Department to remove more effectively non-essential requirements; have the Department move towards employing fixed-type contracts while better incentivizing contractor performance; and require the Department to exercise better oversight of service contracts. Are there any aspects of those initiatives in particular with which you have difficulty or intend to modify or repeal?

Mr. LYNN. I believe these can be effective initiatives. If confirmed, I will monitor these policies to ensure the Department is providing the right level of oversight to maximize our acquisition outcomes.

42. Senator MCCAIN. Mr. Lynn, the current estimate for the costs to relocate the marines from Okinawa to Guam is at least \$10 billion, with the Government of Japan directly contributing \$2.8 billion. The remainder will be funded by DOD through military construction or loans paid back through future housing allowances. With all the other modernization, recapitalization, and reset requirements facing the Department in the next 4 years, in your opinion, can we afford this move?

Mr. LYNN. Secretary Gates has spoken to the strategic importance of this relocation initiative in terms of our regional deterrent posture and our key alliance relationship with Japan. These are long-term investments in our enduring regional interests. The Department will ensure fiscal discipline is exercised throughout the duration of the effort, both with respect to U.S. appropriated funds and with respect to the \$6.09 billion of funding our Japanese ally is providing.

43. Senator MCCAIN. Mr. Lynn, there has also been discussion about the significant investment necessary to upgrade port, road, and utility infrastructure on Guam to support the stationing of marines and their families. Do you believe DOD should assume this financial obligation as well?

Mr. LYNN. The Department recognizes the necessary investment associated with port, roads, and utility infrastructure on Guam resulting from the Marine relocation. It is critical to thoroughly evaluate the broad Federal impact of this significant investment and partner with other Federal entities, such as the Guam Federal Interagency Task Force, to determine the financial obligation that the United States should assume for infrastructure on Guam. The Department is addressing Guam's needs that are directly related to maintaining an enduring presence in support of the military mission.

Guam's infrastructure, namely the commercial port and the island's road network, require upgrades that will directly assist our ability to carry out the program and also benefit Guam. The Department, through the Defense Access Road program, is preparing to address qualifying improvements to roadways, intersections, and bridges that are critical to executing the construction program for DOD.

The Maritime Administration (MARAD) was designated the lead Federal agency for the Port of Guam Improvement Enterprise Program in Public Law 110-417, section 3512. As the lead Federal agency, the MARAD will manage the expenditure of Federal, non-Federal, and private funds made available for the project and provides oversight and project management through a prime contractor. The DOD is working closely with MARAD to help facilitate their initiative to correct the issues at the port.

DOD is also working to facilitate the necessary utilities solutions that will: meet the DOD mission; provide the widest benefit to the people of Guam; be technically and financially supportable by all participating parties; and be acceptable to the environmental regulators. DOD is working in collaboration with GovGuam officials to understand their needs and to determine the feasibility of utilities solutions that are mutually beneficial to DOD, the civilian community and the regulatory agencies. Additionally, we are working with the Government of Japan to ensure that their equities are met in conjunction with the DOD's needs and the equities of the Government of Guam and the Consolidated Commission on Utilities. Concurrently, we are working with the environmental regulators to ensure that the solution set meets the requirements set by the regulatory standards.

QUESTIONS SUBMITTED BY SENATOR MEL MARTINEZ

NUCLEAR WEAPONS SURETY AND THE NEW TRIAD

44. Senator MARTINEZ. Mr. Lynn, on August 30, 2007, a B-52 bomber mistakenly loaded with six nuclear warheads flew from Minot Air Force Base, ND, to Barksdale Air Force Base, LA. Following the Defense Science Board's Permanent Task Force on Nuclear Weapons Surety and the two part Secretary of Defense's Task Force on DOD Nuclear Weapons Management, there are numerous recommendations and issues which need to be addressed over the next administration. How will you implement the panels' recommendations and how else will you provide our deterrence with the oversight and leadership it deserves?

Mr. LYNN. I take this issue very seriously. Senior leader oversight and governance is vital to the success of our nuclear weapons enterprise and strategic deterrence. If confirmed, I will work with Secretary Gates to continue his efforts to strengthen deterrence and to sustain our high standards for safeguarding and storing nuclear weapons. I am committed to working with the Secretary to assess panel recommendations and to prepare an action plan for those recommendations.

45. Senator MARTINEZ. Mr. Lynn, the 2008 National Defense Strategy references the 2002 Nuclear Posture Review's New Triad in saying "the New Triad remains a cornerstone of strategic deterrence"; however, there is no central plan for the "New Triad". With increasing military requirements, draw-downs in nuclear warhead numbers, and limited follow-on programs to replace an aging deterrent, how do you see the future of our Strategic Triad?

Mr. LYNN. Congress has directed DOD to conduct a Nuclear Posture Review in 2009. This effort will provide an opportunity to review these critical questions and develop a consensus on the way forward. I expect senior officials in OSD Policy will guide these efforts, in coordination with other senior officials in DOD, as well as those in the Departments of Energy and State. If confirmed, I would expect to take an active role in this review, and to consult with members of this committee on its results and implications once completed.

PREEMPTION

46. Senator MARTINEZ. Mr. Lynn, both the 2008 National Defense Strategy and the 2006 National Security Strategy reference the act of preemption. Where do you see the line drawn between preemption and aggression? How will you ensure the legislature is correctly informed of military action with enough time for substantive thought and debate?

Mr. LYNN. It is impossible to foresee the nature of all the future threats against the United States and its allies. While the United States does not seek conflict with others, the Nation has a responsibility to its people to provide for their defense. In each case, the elements in the decision to use force will likely be unique. Close consultation with Congress will be important any time the United States is faced with an imminent threat.

STRATEGIC DISPERSAL OF THE NUCLEAR CARRIER FLEET

47. Senator MARTINEZ. Mr. Lynn, carriers have been homeported in two east coast bases since the arrival of the U.S.S. *Tarawa* (CVS-40) in Ribault Bay in 1952. Admiral Mullen as Chief of Naval Operations on the record before the Senate Armed Services Committee stated that he was "very supportive of strategic dispersal of our carriers" as well as his predecessor Admiral Vern Clark stated in February 2005 that "It is [his] belief that it would be a serious strategic mistake to have all of those key assets of our Navy tied up in one port." Gordon England as Secretary of the Navy stated before the committee that his "judgment is that dispersion is still the situation. A nuclear carrier should be in Florida to replace the U.S.S. *John F. Kennedy* to get some dispersion." Even more recently Secretary Donald Winter with the concurrence of the current Chief of Naval Operations, Admiral Gary Roughead, signed the Record of Decision to upgrade Mayport to being nuclear ready, continuing the Navy's 47 year history of east coast strategic dispersal. Please state for the record, that, if confirmed as Deputy Secretary of Defense, your intentions will be to continue to strategically disperse the Nation's nuclear aircraft carriers along the east coast. If you disagree with the previous three Chiefs of Naval Operations, specifically outline why you would go against the uniformed members' recommendations.

Mr. LYNN. Although I am aware of this issue, I have not yet been briefed on it. I expect to examine this issue and consult with the Navy, the Joint Staff, and members of this committee.

QUESTIONS SUBMITTED BY SENATOR SUSAN COLLINS

SHIPBUILDING

48. Senator COLLINS. Mr. Lynn, in your answers to the advance policy questions, you stated that you want to work with the Under Secretary of Defense for Acquisition, Technology, and Logistics, as well as the Service Assistant Secretaries for Acquisition, in developing a better acquisition process, that balances the need to meet requirements in a timely manner and delivering major weapons systems as cost effectively as is possible. In one of your answers you stated that one of your themes would be greater stability. A stable industrial base and predictable levels of funding are critical to achieving cost projections. As has been evident in the shipbuilding industry, the lack of a stable, fully-funded shipbuilding plan has put a tremendous burden on our Nation's shipbuilders. While I applaud Secretary Winter and Admiral Roughead for continuing to state that the Navy's goal is a 313-ship fleet, I was very concerned with their decision last summer to change, without any consultation with Congress, the Navy's shipbuilding plan. Our shipyards make strategic decisions based upon long-term plans and, such sudden changes have significant impacts, one of which is cost. If confirmed, what will you do to help stabilize our country's industrial base for shipbuilding and other major weapons acquisition programs?

Mr. LYNN. Since I have not been briefed on the specifics on the major acquisition programs, I will not be able to speak about the details of a specific program; however, let me explain what will be my principles that will allow a stable, cost-effective acquisition process if I am confirmed as the Deputy Secretary of Defense. First, I think there is agreement from both our industrial partners and the leaders in the Navy, DOD, and government in general that the shipbuilding industry needs a stable, reliable shipbuilding plan from which to make sound business decisions. Given the long lead times for both skilled manpower and material, shipbuilding is not a business that responds well to multiple, quick changes in policy. For several years now, the Navy has had a long-term shipbuilding plan on the table, and now, it must be executed. To accomplish that, the Navy must buy only exactly what it needs—the capabilities put into each ship must provide the absolute best return on investment. We can't afford all the newest technologies on every platform, so the early decisions on requirements and design of a new system are crucial to maintaining an affordable shipbuilding or major weapon acquisition program. Design and requirement changes, once the design has begun maturing, cost an enormous amount in both time and money—these changes should be minimized to only cases where the system will not function without the change. I understand the Secretary of the Navy announced last summer several changes in the acquisition process to ensure that more senior leadership oversight is injected early into a program's life cycle. This increased senior level involvement in the first stages of a program should prove crucial to improving the definition of requirements and ensuring they remain stable throughout the design and production phases of the program. Much of the cost growth of acquisition programs can be tied to unrealistic build times and cost estimates based on overly optimistic projections or immature technologies. We must use realistic figures for our estimates of both cost and build times to ensure our initial plans project the most realistic cost possible. Finally, having a plan is the first step; fully funding that plan is the second. If the plan is only paper and doesn't translate into real contracts, our shipbuilding partners will not be able to do the long-term strategic planning that will give the Navy the cost savings that can be realized from successful long-term planning.

ARMED FORCES END STRENGTH

49. Senator COLLINS. Mr. Lynn, it has now been over 7 years since the initial call-up and mobilization of National Guard and Reserve Forces in support of the global war on terrorism. In the Afghan Study Report of 2007, it stated that "Afghanistan stands at a crossroads," and that the progress achieved over the previous 6 years was threatened by resurgent Taliban violence. The report recommended that the "light footprint" in Afghanistan be replaced by the "right footprint" of U.S. and Allied force levels. Given the strain on the Active-Duty Forces and the over usage of the National Guard and Reserves, do you think the current end strength numbers for the Armed Forces, especially the Army and Marine Corps, are sufficient to meet

today's current needs and threats while reducing the strain on our Active, Reserve, and National Guard troops?

Mr. LYNN. All of our servicemembers (Active and Reserve) continue to perform extraordinarily in light of the demands we have placed upon them. I believe the increases in our ground forces (Army and Marines) are necessary, and will strengthen the ability of the Department to continue to support the global war on terror. We cannot fail to have the right numbers and kinds of uniformed personnel to win our wars, and to deter potential adversaries. Additionally, our force, Active and Reserve, must be large enough to not only satisfy deployed demands, but also have a rotation base that recognizes the personal needs of our volunteers and their families. At the same time, our volunteers must have the weapons, equipment, and support that will enable mission success. Striking the right balance between personnel, recapitalization, and operational and support costs will be a challenging imperative and I look forward to working with Congress.

QUESTIONS SUBMITTED BY HONORABLE CHUCK GRASSLEY, U.S. SENATOR FROM THE
STATE OF IOWA

FINANCIAL MANAGEMENT

50. Senator GRASSLEY. Mr. Lynn, as the Under Secretary of Defense (Comptroller), you were the Department's Chief Financial Officer (CFO). That position was established by the CFO Act of 1990. Section 902 of the CFO Act states: "The CFO shall develop and maintain an integrated agency accounting and financial management system, including financial reporting and internal controls." This requirement existed for at least 5 years before you became the DOD CFO. While you were CFO, did DOD operate a fully integrated accounting and financial management system that produced accurate and complete information? If not, why?

Mr. LYNN. The DOD financial and business management systems were designed and created before the CFO Act of 1990 to meet the prior requirements to track obligation and expenditure of congressional appropriations accurately. The CFO Act required the Department to shift from its long-time focus on an obligation-based system designed to support budgetary actions to a broader, more commercial style, accrual-based system. To accomplish this transformation, several things needed to be done. First, the Department created the Defense Finance and Accounting Service (DFAS) to consolidate financial operations, which was accomplished in 1991 before my tenure as Under Secretary. Second, the Department had too numerous and incompatible finance and accounting systems. From a peak of over 600 finance and accounting systems, I led an effort to reduce that number by over two-thirds. This consolidation effort also strove to eliminate outdated financial management systems and replace them with systems that provided more accurate, more timely, and more meaningful data to decisionmakers. The third and most difficult step in developing an integrated accounting and financial management system has been to integrate data from outside the financial systems. More than 80 percent of the data on the Defense Department's financial statement comes from outside the financial systems themselves. It comes from the logistics systems, the personnel systems, the acquisition systems, the medical systems, and so on. On this effort, we made progress while I was Under Secretary but much more needs to be done. If confirmed, I will take this task on as a high priority.

51. Senator GRASSLEY. Mr. Lynn, under section 3515 of the CFO Act, all agencies, including DOD, are supposed to prepare and submit financial statements that are then subjected to audit by the Inspectors General. While you were the CFO, did DOD ever prepare a financial statement in which all DOD components earned a clean audit opinion from the DOD IG? If not, why?

Mr. LYNN. In the 1997, the DOD had 23 reporting entities, only 1 of which, the Military Retirement Fund, had achieved a clean audit. Over the next 4 years, the Department under my leadership as Under Secretary earned a clean opinion on three other entities: most importantly, the DFAS in 2000, followed by the Defense Commissary Agency, and the Defense Contract Audit Agency in 2001. We were unable to obtain clean opinions on the other reporting entities. The primary reason for not earning clean opinions on the remaining entities was the difficulty of capturing data from nonfinancial systems and integrating that data into the financial systems in an auditable manner. It is my understanding that the Department still faces the challenge of integrating financial and nonfinancial systems to support the auditability of the DOD financial statements.

52. Senator GRASSLEY. Mr. Lynn, as CFO, what specific steps did you take to correct this problem?

Mr. LYNN. Under my leadership, the DOD instituted several important efforts to achieve a clean audit opinion. The primary effort was described in the Biennial Financial Management Improvement Plan (FMIP) which was submitted to Congress in 1998. That plan merged previous initiatives with new ones into a single comprehensive effort to achieve both financial management improvement and auditability. To directly address auditability, the FMIP included an effort in collaboration with the Office of Management and Budget, the General Accounting Office, and the Office of the Inspector General to address 10 major issues identified by the audit community: 1) internal controls and accounting systems related to general property plant and equipment; 2) inventory; 3) environmental liabilities; 4) military retirement health benefits liability; 5) material lines within the Statement of Budgetary Resources; 6) unsupported adjustments to financial data; 7) financial management systems not integrated; 8) systems not maintaining adequate audit trails; 9) systems not valuing and depreciating properly, plant and equipment; and 10) systems not using the Standard General Ledger at the transaction level. Due to this effort, substantial progress was made on most of these issues and several were resolved, including valuation of the military retirement health benefits liability, the reduction of unsupported adjustments to financial data, and the identification of environmental liabilities.

53. Senator GRASSLEY. Mr. Lynn, 18 years after the CFO Act was signed into law, DOD is still unable to produce a comprehensive financial statement that has been certified as a clean audit. It may be years before that goal is met. If DOD's books cannot be audited, then the defense finance and accounting system is disjointed and broken. Financial transactions are not recorded in the books of account in a timely manner and sometimes not at all. Without accurate and complete financial information, which is fed into a central management system, DOD managers do not know how the money is being spent or what anything costs. That also leaves DOD financial resources vulnerable to fraud, waste, and abuse, and even outright theft. The last time I looked at this problem billions—and maybe hundreds of billions—of tax dollars could not be properly linked to supporting documentation. As Deputy Secretary of Defense, what will you do to address this problem? Please give me a realistic timeline for fixing this problem.

Mr. LYNN. The Department needs stronger management information systems. I can assure you that, if confirmed, I will be committed to improving financial information and business intelligence needed for sound decisionmaking. I have not yet completed my review of all the information needed to provide a specific timeline; however, I will continue to examine this issue, including consideration of this and other committees' views as well as the resources needed for the audit, before forming my assessment of how close DOD is to a clean audit.

POTENTIAL CONFLICT OF INTEREST

54. Senator GRASSLEY. Mr. Lynn, as a Senior Vice President of Government Operations at the Raytheon Company, you were a registered lobbyist until July 2008. Correct? How long were you a registered lobbyist?

Mr. LYNN. Yes. From July 2002 to March 2008.

55. Senator GRASSLEY. Mr. Lynn, in his "Blueprint for Change," President-elect Obama promises to "Shine Light on Washington Lobbying." He promises to "Enforce Executive Branch Ethics" and "Close the Revolving Door." He promises: "no political appointees in an Obama-Biden administration will be permitted to work on regulation or contracts directly and substantially related to their prior employer for 2 years." Raytheon is one of the big defense contractors. As Deputy Secretary, Raytheon issues will surely come across your desk. If you have to recuse yourself from important decisions, you would limit your effectiveness as Deputy Secretary of Defense. How will you avoid this problem for 2 years?

Mr. LYNN. I have received a waiver of the "Entering Government" restrictions under the procedures of the Executive order implementing the ethics pledge requirements. The waiver, however, does not affect my obligations under current ethics laws and regulations. Until I have divested my Raytheon stock, which will be within 90 days of appointment, I will take no action on any particular matter that has a direct and predictable effect on the financial interests of Raytheon. Thereafter, for a period of 1 year after my resignation from Raytheon, I also will not participate personally and substantially in any particular matter involving Raytheon, unless I

am first authorized to do so under 5 C.F.R. § 2635.502(d). If confirmed, I pledge to abide by the foregoing provisions. I would add that I have not been exempted from the other Executive order pledge requirements, including the ones that restrict appointees leaving government from communicating with their former executive agency for 2 years and bar them from lobbying covered executive branch officials for the remainder of the administration.

[The nomination reference of William J. Lynn III follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 20, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

William J. Lynn III, of the District of Columbia, to be Deputy Secretary of Defense, vice Gordon England, resigned.

[The biographical sketch of William J. Lynn III, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF WILLIAM J. LYNN III

William Lynn served as the Under Secretary of Defense (Comptroller) from 1997 to 2001. In that position, he was the chief financial officer for the Department of Defense and the principal advisor to the Secretary of Defense for all budgetary and fiscal matters. From 1993 to 1997, Mr. Lynn was the Director of Program Analysis and Evaluation in the Office of the Secretary of Defense, where he oversaw the Defense Department's strategic planning process.

During his tenure at the Defense Department, Mr. Lynn was awarded three Department of Defense medals for Distinguished Public Service, the Joint Distinguished Civilian Service Award from the Chairman of the Joint Chiefs of Staff and awards from the Army, Navy and Air Force. He also received the 2000 Distinguished Federal Leadership Award from the Association of Government Accountants for his efforts to improve defense accounting practices.

Mr. Lynn currently serves as senior vice president of Government Operations and Strategy at Raytheon Company. In that position, he leads the company's strategic planning and oversees the government relations activity. Before entering the Department of Defense in 1993, he served for 6 years on the staff of Senator Edward Kennedy as liaison to the Senate Armed Services Committee. He has also been a Senior Fellow at the National Defense University, on the professional staff at the Institute for Defense Analyses and served as the executive director of the Defense Organization Project at the Center for Strategic and International Studies.

A graduate of Dartmouth College, Mr. Lynn has a law degree from Cornell Law School and a Master's in Public Affairs from the Woodrow Wilson School at Princeton University.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by William J. Lynn III in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
William J. Lynn III.
2. **Position to which nominated:**
Deputy Secretary of Defense.
3. **Date of nomination:**
Intention to nominate issued January 8, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
January 1, 1954; Key West, FL.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Mary A. Murphy.
7. **Names and ages of children:**
Catherine J. Lynn, 2.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
1972-1976 - Dartmouth College, Hanover, NH - B.A. - 06/1976.
1977-1980 - Cornell Law School, Ithaca, NY - Juris Doctor - 06/1980.
1980-1982 - Princeton University, Woodrow Wilson School - Princeton, NJ - Masters Degree, Public Affairs - 06/1982.
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
08/2002-Present - Raytheon Company, Senior Vice President, Government Operations & Strategy, Arlington, VA.
01/2001-07/2002 - DFI International, Executive Vice President, Washington, DC.
11/1997-01/2001 - Department of Defense, Under Secretary of Defense, Washington, DC.
06/1993-11/1997 - Department of Defense, Director PA&E, Washington, DC.
10. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.
Office of Senator Edward M. Kennedy, Legislative Counsel, Washington, DC - 1983-1987.
Office of the Defense Adviser, Graduate Student Intern, Belgium, Brussels - 06/1981-12/1981.
11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Raytheon Company, Corporate Officer.
Center for New American Security, Board of Directors.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Bar Association - District of Columbia.
Wychemere Harbor Beach Club - Harwich Port, MA.
TPC Avenel - Potomac, MD.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

2008 - Obama for America - \$2,300.
2008 - Jeff Merkley for Oregon (general election) - \$2,300.
2008 - Reed Committee - \$500.
2008 - John Kerry for Senate - \$1,000.
2007 - Jeff Merkley for Oregon (primary) - \$2,300.
2007 - Hillary Clinton for President (general election) - \$2,300 (returned in 2008).
2007 - Hillary Clinton for President (primary) - \$2,300.
2006 - Friends of Jane Harman - \$500.
2006 - Forward Together PAC - \$1,000.
2005 - Bill Nelson for U.S. Senate - \$500.
2004 - The Markey Committee - \$500.
2004–2008 - Annual contributions of \$5,000 to Raytheon Company PAC.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Joint Distinguished Civilian Service Award - Joint Chiefs of Staff.
Department of Navy Distinguished Service Award.
Department of Air Force Distinguished Service Award.
Department of Army Distinguished Service Award.
2000 Distinguished Federal Leadership Award - Assoc. of Government Accountants.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

“Guns That Die of Embarrassment,” book review in *The New York Times Book Review* (December 21, 1986).

“U.S. Defense Policy,” *Yale Law & Policy Review* (Fall/Winter 1986).

“The Case for JCS Reform,” *International Security* (Winter 1985–1986).

Toward a More Effective Defense, Ballinger (1985).

“Reform Needed so JCS Can Act as One,” *Atlanta Journal and Constitution* (March 24, 1985).

“The Wars Within: The Joint Military Structure and Its Critics,” *Reorganizing America’s Defenses: Leadership in War and Peace*, edited by Art, Davis, and Huntington Pergamon Press (1985).

“U.S.-Soviet Crisis Management and Confidence-Building Measures,” in *Preventing Nuclear War*, edited by Barry Blechman, Indiana University Press (1985).

“Service Rivalries Block True Security,” *The Los Angeles Times* (April 13, 1983).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth

in the Appendix to this volume. The nominee's answers to Parts B-F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

WILLIAM J. LYNN III.

This 13th day of January, 2009.

[The nomination of William J. Lynn III was reported to the Senate by Chairman Levin on February 5, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on February 11, 2009.]

[Prepared questions submitted to Robert F. Hale by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense (DOD) Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I believe the Goldwater-Nichols Act is one of the most important and effective defense reforms enacted by Congress. I do not see any need for modifications. However, if confirmed, I will keep an open mind regarding changes.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. As noted, I do not see any need for modifications.

RELATIONSHIPS

Question. What is your understanding of the relationship between the Under Secretary of Defense (Comptroller) and each of the following?

The Secretary of Defense.

Answer. The Under Secretary of Defense (Comptroller) is the principal assistant and advisor to the Secretary and Deputy Secretary of Defense on fiscal and budgetary matters. The Under Secretary (Comptroller) also performs such other duties as the Secretary or Deputy Secretary may prescribe.

Question. The Deputy Secretary of Defense.

Answer. Please see the answer above.

Question. The other Under Secretaries of Defense.

Answer. My relationship with all other senior officials of the Department will, for the most part, be based on the role described above. If confirmed, I will work closely with the other Under Secretaries to carry out the policies and guidance of the Secretary and Deputy Secretary.

Question. The Assistant Secretaries of Defense.

Answer. My relationship with the Assistant Secretaries of Defense and other senior officials of the Office of the Secretary of Defense would be similar to that described above in relation to the other Under Secretaries of Defense.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman of the Joint Chiefs of Staff is the principal military advisor to the President, the National Security Council, and the Secretary of Defense. If confirmed, I intend to work closely with the Chairman and Joint Staff on resource and financial management issues.

Question. The Secretaries of the Military Departments.

Answer. The Secretaries of the military departments carry out the policies of the President and the Secretary of Defense in their respective military departments and formulate recommendations to the Secretary and to Congress relating to their military departments and DOD. If confirmed, I intend to work closely with the Secretaries of the military departments, and specifically, their Assistant Secretaries for Financial Management who I intend to meet with regularly. I will ensure that they are aware of the President's and the Secretary of Defense's policies and priorities and assist them in contributing to the successful development and implementation of effective DOD policies and programs.

Question. The heads of the defense agencies.

Answer. As the Department's Comptroller and Chief Financial Officer, I will, if confirmed, work closely with the heads of the defense agencies, and specifically, with our financial management counterparts in those agencies. I will ensure that they are aware of the President's and the Secretary of Defense's policies and priorities and assist them in contributing to the successful development and implementation of effective DOD policies and programs.

Question. The Assistant Secretaries for Financial Management of the Services.

Answer. In the role of Comptroller and Chief Financial Officer for the Department, I will, if confirmed, work closely with the Assistant Secretaries of the Military Departments for Financial Management in the development and execution of the budgetary and fiscal policies and initiatives of the President and the Secretary of Defense.

Question. The General Counsel of DOD.

Answer. As the Department's Comptroller and Chief Financial Officer, I will, if confirmed, rely on the General Counsel, who is the Chief Legal Officer of DOD, on all legal matters, and will consult and coordinate with the General Counsel on all matters relating to programs, projects, and activities of DOD, as well as matters relating to financial management, accounting policy and systems, management control systems, and contract audit administration, that may have legal implications.

Question. The Inspector General.

Answer. As the Department's Comptroller and Chief Financial Officer, I will, if confirmed, consider it my responsibility to support the DOD Inspector General in carrying out his or her duties as set forth in the Inspector General Act.

Question. The Director, Office of Program Analysis and Evaluation.

Answer. If confirmed, I will ensure a high level of coordination with the Director of the Office of Program Analysis and Evaluation in fulfilling his or her role of providing independent assessments for acquisition systems. I will also work with the Director of PA&E to ensure the success of the combined program/budget review.

Question. The Deputy Chief Management Officer (CMO).

Answer. I would, if confirmed, establish an appropriate relationship based on the responsibilities assigned to that official and do everything possible to improve management of the Department's complex operations and organization.

Question. The Director, Office of Management and Budget (OMB).

Answer. If I am confirmed, my relationship would include periodic interaction with the OMB leadership on the sound preparation and execution of DOD budgets and the advancement of both OMB and DOD management improvements.

Question. The Comptroller General.

Answer. If I am confirmed, my relationship would be to analyze and address recommendations of the Comptroller General and the Government Accountability Office (GAO) regarding DOD matters, and to solicit recommendations in areas I think could use additional perspectives.

DUTIES OF THE COMPTROLLER

Question. The duties of the Comptroller of the DOD are set forth in section 135 of title 10, U.S.C., and in DOD Directive 5118.3. Among the duties prescribed in statute are advising and assisting the Secretary of Defense in supervising and directing the preparation of budget estimates of DOD, establishing and supervising DOD accounting policies, and supervising the expenditure of DOD funds.

Assuming you are confirmed, what duties do you expect that Secretary Gates will prescribe for you?

Answer. Provide high quality, timely advice to the Secretary of Defense and Deputy Secretary on issues related to financial management in the Department.

Ensure that the men and women in the military Services have the resources they need to meet national security objectives.

Ensure that funds are spent in accordance with laws and regulations and that the American taxpayers get the best possible value for their tax dollars.

Account in an accurate manner for the funds spent by the Department.

Question. What background and experience do you possess that you believe qualifies you to perform the duties of the Comptroller?

Answer. I have more than 30 years of experience with defense and its financial management tasks including:

- Seven years as Air Force Comptroller overseeing many of the types of tasks I would, if confirmed, oversee for the Department as a whole.
- Twelve years at the Congressional Budget Office heading the group dealing with national security issues.
- Work in support of professional development initiatives to improve the training of defense financial managers.
- Service as a member of the United States Navy, both on Active Duty and in the Reserves.
- Completion of the Certified Defense Financial Manager program, a test-based certification program set up to provide objective verification of knowledge of the rules and processes governing defense financial management.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform these duties?

Answer. I believe I can continue to increase my expertise by learning more about current, specific issues regarding the DOD budget through study of source documents and discussions with subject matter experts.

Question. Do you expect Secretary Gates to make any changes in the duties of the Comptroller as set out in DOD Directive 5118.3?

Answer. I have not yet discussed this question with Secretary Gates.

CHIEF FINANCIAL OFFICER

Question. DOD Directive 5118.3 designates the Comptroller as the Chief Financial Officer of DOD. Does Secretary Gates intend to continue to designate you, if confirmed as the Comptroller, as the Chief Financial Officer of DOD?

Answer. I have seen no indications that he would do otherwise, but will address this issue expeditiously if I am confirmed.

Question. If so, what would be your major responsibilities as Chief Financial Officer?

Answer. Oversee all financial management activities relating to the programs and operations of DOD; develop and maintain integrated agency accounting and financial management systems; direct, manage, and provide policy guidance and oversight of DOD's financial management personnel, activities, and operations; prepare audited financial statements; and monitor the financial execution of budgets.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Under Secretary of Defense (Comptroller)/Chief Financial Officer?

Answer. If confirmed, the foremost challenge is to prepare and manage defense budgets so that the Department obtains the resources necessary to accomplish national security objectives—especially the resources needed to meet wartime requirements and for our military forces to successfully conduct their operations. This includes:

- Ensuring that the pay, benefits, health care, and quality of life support is commensurate with the sacrifices we are asking our troops and their families to make.
- Making sure the troops have the training and equipment needed to meet the challenges they will face.

If confirmed, I must also improve the financial information available to DOD managers including achieving, where appropriate, auditable financial statements and improving financial systems. Better information will also help control defense spending in ways that assist in reducing long-term deficits.

If confirmed, I need to support the components in their critical efforts to recruit, train, and retain a workforce that can meet defense financial management needs into the 21st century.

Question. If confirmed, what plans do you have for addressing these challenges?
Answer. If confirmed, I will work closely with other senior principals in DOD and the Comptroller staff, military departments, defense agencies, OMB, and Congress to develop policies to meet these challenges.

I will also provide aggressive leadership and support for my staff in executing these policies.

AUTHORIZATION FOR NATIONAL DEFENSE PROGRAMS

Question. Do you believe that an authorization pursuant to section 114 of title 10, U.S.C., is necessary before funds for operation and maintenance, procurement, research and development, and military construction may be made available for obligation by DOD?

Answer. I understand that it has been the Department's practice to work with all the oversight committees to resolve these matters. If confirmed, I will respect the prerogatives of the Department's oversight committees and will work closely with the committees to achieve a consensus necessary to meet our defense needs.

SUPPLEMENTAL FUNDING FOR MILITARY OPERATIONS

Question. Section 1008 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364) requires the President's budget to include funding for ongoing military operations in Afghanistan and Iraq in the Department's annual budget requests, along with a detailed justification for that funding. It also requires the President's budget to include an estimate of the total funding to be required in that fiscal year for such operations. The Department fully complied with these requirements in the fiscal year 2008 budget, but more than a year elapsed before Congress approved the bulk of the requested funding. The administration then failed to comply with these requirements in the fiscal year 2009 budget request.

To what degree do you believe it is possible, in the near term, to include the full cost of these ongoing operations in the base budget request?

Answer. If confirmed, I would hope to work with Congress and OMB to try to move away from supplementals. The feasibility of moving away from supplementals depends on the budget year.

- For fiscal year 2009, DOD needs a supplemental, because the base budget has been enacted.
- For fiscal year 2010, with limited time available for submission of a base budget request, and with continuing uncertainty about changing war requirements, the President may decide he will need to have a supplemental.
- In later budgets, we should be better able to minimize dependence on supplementals.

Regardless of the year, we should avoid including predictable costs in supplemental requests.

Question. Do you believe the costs of ongoing military operations can be fully incorporated into a unified budget request such that the use of supplementals could be discontinued? If so, what criteria would need to be met to achieve that objective?

Answer. Full elimination of supplementals would require substantial reduction in the uncertainties associated with wartime operations. However, the negative aspects of supplementals can be minimized by ensuring DOD scrutiny of supplemental requests similar to that afforded the base budget (a policy endorsed by the President-elect) and by providing Congress with early information regarding supplemental requests.

Question. In recent years the Department has had to prepare a base budget and two separate supplemental funding requests each year.

Do you believe the Comptroller organization has the personnel and other resources needed to adequately manage this increased workload?

Answer. I am concerned about the adequacy of resources in the Comptroller organization to manage the increased workload associated with wartime operations.

If confirmed, I will carefully review the staffing and organization and recommend any changes that I believe are required.

PROGRAM AND BUDGET REVIEW

Question. The Department has operated under a planning, programming, and budget system for decades. The programming and budgeting functions have sometimes been combined in a single reporting chain and at other times, as is currently the case, been run by distinct offices (Program Analysis and Evaluation and the Comptroller, respectively) that report separately to the Secretary of Defense. The program and budget review processes have also been revised in recent years and have been made more concurrent than was previously the case.

What are your views on the proper relationship between the program and budget processes and the offices responsible for those functions?

Answer. I believe there must be regular and effective coordination between the Comptroller and Program Analysis and Evaluation organizations. If confirmed, I will keep an open mind about possible changes regarding the proper relationship be-

tween the program and budget processes and the offices responsible for those functions. I will also, if confirmed, consider whether to recommend changes in the concurrency of the program and budget processes.

MANAGEMENT OF DEFENSE SPENDING

Question. GAO recently released its list of “urgent issues” for the next administration and Congress. Among those issues was defense spending. According to the GAO: “The Department’s current approach to planning and budgeting is based on overly optimistic planning assumptions and lacks a strategic, risk-based framework for determining priorities and making investment decisions. As a result, it continues to experience a mismatch between programs and budgets, and it does not fully consider long-term resource implications and the opportunity cost of selecting one alternative over another.”

What are your views on the concerns raised by GAO?

Answer. The Department’s Planning, Programming, Budgeting, and Execution (PPBE) process provides DOD with a sound process with which to develop a strategic plan and build a 6-year program and budget to achieve that plan. Within the PPBE process there is ample opportunity to debate and determine priorities and make resource decisions that take into account relative risks. The key is how that process is managed. If confirmed, my goal will be to assist in ensuring that the PPBE process does in fact achieve its designed purpose and to recommend changes where they are appropriate.

Question. If confirmed, what actions would you take, as the Under Secretary of Defense (Comptroller), with respect to those aspects of the management of the Department that are within the purview of the Comptroller that may be relevant to the concerns raised by GAO?

Answer. As I noted above, I will review the current implementation of the PPBE process and recommend improvements where appropriate.

EARMARKS

Question. On January 29, 2008, President Bush signed Executive Order 13457, which states that agency decisions to commit, obligate, or expend funds may not be “based on language in any report of a committee of Congress, joint explanatory statement of a committee of conference of Congress, statement of managers concerning a bill in Congress, or any other non-statutory statement or indication of views of Congress, or a House, committee, Member, officer, or staff thereof.” Congress responded to this Executive order by including a provision in the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 that incorporated by reference the funding tables in the conference report on the bill. Similar provisions were included in several other bills.

Do you see the need for any changes to Executive Order 13457? If so, what changes would you recommend?

Answer. I would expect that all Executive orders from prior administrations will be reviewed by the new administration. I would want to see the results of that review before making any specific recommendations regarding changes.

However, I believe that there should be a careful review of the effectiveness of defense spending including all spending, not just earmarks. Such a review would be consistent with policies likely to be promulgated by President Obama after his inauguration.

Question. If confirmed, what would your duties be with respect to implementing this Executive order with respect to funding for DOD?

Answer. I expect that the White House will provide direction on earmarks and, if confirmed, I will ensure that direction is followed.

Question. If confirmed, what steps would you expect to take to ensure that DOD abides by congressional funding decisions and that funds available to the Department are expended only for the purposes for which they have been appropriated?

Answer. If confirmed, I would work with DOD components to ensure that the funds are spent for the purposes for which Congress appropriated the funds.

Question. The committee has considered the possibility of including the funding tables in bill language, instead of report language, in future bills. Concern has been expressed that this approach could limit the flexibility of DOD to transfer funds to meet emerging high-priority needs.

What is your view on the advisability of incorporating funding tables into the text of bills authorizing and appropriating funds for DOD?

Answer. I am concerned that DOD must have enough flexibility to meet national security requirements by, among other things, accomplishing needed reprogramming. As for this specific question, I am not familiar enough with the legal implica-

tions of incorporating the tables into the bill. If confirmed, I would examine this issue, discuss it with the Department's lawyers, and then work closely with the committees and others before implementing a solution.

CONTRACTING FOR SERVICES

Question. In recent years, DOD has become increasingly reliant on services provided by contractors. Over the past 8 years, for example, DOD's spending on contract services has more than doubled with the estimated number of contractor employees working for the Department increasing from an estimated 730,000 in fiscal year 2000 to an estimated 1,550,000 in fiscal year 2007. As a result, the Department now spends more for the purchase of services than it does for products (including major weapon systems).

Do you believe that the Department can or should continue to support this level of spending on contract services?

Answer. It is my understanding that service contractors provide a valuable function to DOD.

If confirmed, I would support efforts by the Under Secretary of Defense (Acquisition, Technology, and Logistics) and other leaders to review the level of contracting services required in keeping with President-elect Obama's pledge to have the Department improve its strategy for determining when contracting makes sense.

Question. Do you believe that the current balance between Federal employees and contractor employees is in the best interests of DOD?

Answer. DOD requires some mix of Federal employees and contractors to carry out its mission effectively.

If confirmed, I would support efforts to help ensure the appropriate balance in that mix.

Question. If confirmed, will you take a close look at the Department's expenditures for services and determine whether it would be appropriate to cap or limit growth in such expenditures for a period of time?

Answer. Yes.

ACQUISITION WORKFORCE

Question. Over the last 15 years, DOD has dramatically reduced the size of its acquisition workforce, without undertaking any systematic planning or analysis to ensure that it would have the specific skills and competencies needed to meet current and future needs. Since September 11, 2001, moreover, the demands placed on that workforce have substantially increased. Do you believe that the DOD acquisition workforce is large enough and has the skills needed to perform the tasks assigned to it?

Answer. If confirmed, I will support the Under Secretary of Defense (Acquisition, Technology, and Logistics) organization on this issue.

Question. Would you agree that the Department is losing more money through waste and inefficiency in its acquisition programs than it is likely to save through constraints on the size and qualifications of its acquisition workforce, and, if so, what recommendations do you have to address the problem?

Answer. I understand the committee's concerns with this issue. However, I do not have sufficient recent information to answer this question effectively. Eliminating waste and inefficiency in acquisition needs to be a top priority for DOD leaders, and if confirmed, I would make that part of my agenda.

Question. Section 852 of the National Defense Authorization Act for Fiscal Year 2008 established an Acquisition Workforce Development Fund to help the DOD address shortcomings in its acquisition workforce. The fund would provide a minimum of \$3 billion over 6 years for this purpose.

Do you support the use of the DOD Acquisition Workforce Development Fund to ensure that DOD has the right number of employees with the right skills to run its acquisition programs in the most cost effective manner for the taxpayers?

Answer. If confirmed, I certainly would support efforts to have the right number of professionals with the right skills for our acquisition work.

I believe it is too early to know how effectively the fund is being used. But, if confirmed, I certainly will comply with the law regarding the fund and do everything I can to advance the cost-effective management of acquisition programs.

Question. If confirmed, what steps would you take to ensure that the Acquisition Workforce Development Fund remains fully funded throughout the period of the Future Years Defense Program?

Answer. I do not have in mind any specific steps, but if confirmed, I will examine this issue and, after consulting with this committee and others, make an appropriate recommendation.

CHIEF MANAGEMENT OFFICER

Question. The positions of CMO of DOD and Deputy CMO of DOD were established by section 904 of the National Defense Authorization Act for Fiscal Year 2008. In accordance with section 904, the purpose of these new positions is to improve the overall efficiency and effectiveness of the business operations of DOD and to achieve an integrated management system for business support areas within DOD. Do you believe that a comprehensive, integrated, enterprise-wide architecture and transition plan is essential to the successful transformation of DOD's business systems?

Answer. Yes. I believe an effective architecture is a necessary but not a sufficient condition for successful overhaul of DOD business systems.

Question. Do you believe that the Department needs senior leadership from a CMO and a Deputy CMO to cut across stovepipes and ensure the implementation of a comprehensive, integrated, enterprise-wide architecture for its business systems?

Answer. Yes. Creation of an architecture and, more importantly the implementation of system changes, are major tasks that require substantial time and management expertise. I believe that a CMO and Deputy CMO can help provide the required time and expertise.

Question. If confirmed, what role do you expect to play in working with the CMO and the Deputy CMO to improve the business operations of DOD?

Answer. If confirmed, I will work with the CMO and Deputy CMO in ensuring unified, standardized, and integrated business processes and systems.

Question. What responsibilities, if any, that may have formerly been performed by the Comptroller do you believe have been, will be, or should be reassigned to the CMO or the Deputy CMO of DOD?

Answer. I believe that I need more knowledge of the specific options, and the resources and expertise available from the CMO and Deputy CMO, before deciding what, if any, changes in responsibilities are appropriate. If confirmed, I will consider appropriate changes.

GOVERNMENT PERFORMANCE AND RESULTS ACT

Question. If confirmed as Comptroller, what would your responsibilities be with respect to DOD implementation of the requirements of the Government Performance and Results Act (GPRA) to set specific performance goals and measure progress toward meeting them?

Answer. I would collaborate with the other principals to ensure that the budget justification material includes realistic annual performance goals and corresponding performance measures and indicators.

These executive-level goals and metrics should represent the leading performance trends that the Secretary must monitor to manage risk across the Department, and to maintain progress toward accomplishing the long-term outcomes of the defense strategy.

Question. What additional steps can the Department take to fulfill the goal of the GPRA to link budget inputs to measurable performance outputs?

Answer. If confirmed, I will review the existing GPRA metrics and work with the other principals to improve them where warranted.

COLLECTION OF CONTRACTOR TAXES

Question. The Comptroller General has reported that approximately 27,100 DOD contractors owe more than \$3.0 billion in back taxes, and that DOD has not fulfilled its duty under the Debt Collection Improvement Act of 1996 to help recoup these back taxes.

What steps will you take, if confirmed, to improve the Department's performance in this area?

Answer. If confirmed, I would do what is necessary to help DOD fulfill its duty under the Debt Collection Improvement Act of 1996—to include the collection of all monies owed to the Federal Government from any contractor with whom we are doing business. I look forward to working with other government agencies to improve the tax collection process.

Question. Do you believe that the Department needs additional statutory authority to be effective in identifying and recovering back taxes from contractors?

Answer. If confirmed, I will explore this issue with other agencies, specifically the Internal Revenue Service and the Treasury, after which I can better address the need for additional legislation.

LEASING MAJOR WEAPON SYSTEMS

Question. The Air Force's proposal, which was ultimately not implemented, to lease rather than purchase new tanker aircraft, highlighted serious concerns about the cost-effectiveness of leasing major capital assets as opposed to purchasing them and led the Department to create a "Leasing Review Panel," co-chaired by the Comptroller, to review all major leasing agreements.

What are your views on the merits of leasing versus buying major capital equipment?

Answer. I do not have any predetermined views on leasing versus buying major capital equipment. I believe that each proposal would need to be evaluated on its own merit.

Question. Under what circumstances do you believe that the lease of major capital equipment should be considered an annual operating expense for budget purposes?

Answer. If confirmed, I will ensure that the Department adheres to OMB guidance and pursues leasing only when it clearly benefits the taxpayer.

INCREMENTAL FUNDING VS. FULL FUNDING

Question. Do you believe DOD should continue to adhere to the longstanding practice of fully funding the purchases of major capital assets, including ships and aircraft, in the year the decision to purchase the asset is made, or do you believe incremental funding of such purchases is justified in some cases?

Answer. As I understand it, it is OMB's policy that requires that programs be fully funded when they are procured.

I fully support this requirement and, if confirmed, will work to ensure full funding because it ensures that all of the funding is there to support a usable end item.

However, there may be limited instances where incremental funding is warranted and is in the best interest of the Department and the taxpayer. For example, I can understand why we may want to consider incremental funding of some major end items such as aircraft carriers and large building construction projects because they take so long to complete and are very expensive.

Question. If you believe a change in policy is warranted, please explain how you believe such changes would benefit the Department and the taxpayer.

Answer. If confirmed, I will assess whether such a policy change is warranted.

BASE CLOSURE SAVINGS

Question. The costs of the 2005 Base Realignment and Closure round have exceeded the initial estimates put forward by DOD and the independent commission by about 50 percent, an increase of approximately \$10 billion. Those initial estimates were derived from the Cost of Base Realignment Actions (COBRA) model, which is not designed to produce "budget quality" data.

Do you believe the Department should continue to use the COBRA model, in its current form, for any future base closure rounds that may be authorized, or do you believe the accuracy of the estimated cost of such actions should be improved?

Answer. If confirmed, and before significant additional use is made of the COBRA model, I will discuss this issue further with the committee and make a recommendation.

Question. Do you think the office of the Comptroller should play a greater role in developing these cost estimates?

Answer. If confirmed, I will assess how great a role is appropriate as part of a review of the COBRA model.

FINANCIAL MANAGEMENT

Question. What is your understanding of the efforts and progress that have been made in DOD since 1999 toward the goal of being able to produce a clean audit?

Answer. I believe DOD is making substantial progress toward a clean audit. There is, however, a substantial amount of work still to do, including efforts to address some of the most difficult problems. If confirmed, I will pursue appropriate actions to ensure continued progress toward meeting clean audit goals.

Question. Do you believe the Department's Financial Improvement and Audit Readiness (FIAR) plan will lead to achieving a clean audit opinion for DOD, or are changes in that plan necessary in order to achieve that goal?

Answer. I do not have detailed knowledge of the FIAR plan, but if confirmed, I will study this issue further after consulting with the FIAR committee and others.

Question. Do you believe that the Department can achieve a clean audit opinion through better accounting and auditing, or is the systematic improvement of the Department's business systems and processes a prerequisite?

Answer. Both business systems and improved processes are required.

Question. When do you believe the Department can achieve a clean audit?

Answer. I have not had the opportunity to review all the information needed to provide a specific timeline. However, if confirmed, I will examine this issue more fully, including consideration of this committee's views as well as the resources needed for the audit, and provide an answer.

Question. If confirmed, what role do you expect to play, and how do you expect to work with the CMO and Deputy CMO, in the effort to achieve a clean audit opinion?

Answer. Better business practices and fully integrated business systems are a must to achieve and sustain a clean audit opinion.

If confirmed, I will work with the CMO and Deputy CMO and make use of their skills to ensure better business practices and fully integrated business systems are in place to support the Department's audit opinion goals.

COST OVERRUNS ON MAJOR ACQUISITION PROGRAMS

Question. Last year, the GAO reported that DOD's Major Defense Acquisition Programs had experienced an estimated total (lifecycle) acquisition cost growth of \$295 billion in constant fiscal year 2008 dollars.

Do you believe the Department can build and manage an affordable program with cost increases of this magnitude?

Answer. I believe DOD must do everything possible to minimize acquisition cost growth, which can help ensure that we are able to provide our fighting forces the technology and capabilities needed to ensure their combat dominance.

Question. If you believe these cost increases are a concern, what role, if any, do you see for the Comptroller in improving the accuracy of the cost estimates for major weapons programs?

Answer. If confirmed, I would work with Program Analysis and Evaluation leaders, my staff, and others to scrutinize cost estimates—because they are essential components of our budget and management responsibilities.

Question. The poor performance of major defense acquisition programs has been attributed in part to instability in funding and requirements.

What steps would you plan to take, if confirmed, to increase the funding and requirements stability of major defense acquisition programs?

Answer. If confirmed, I would make stability a pivotal priority during DOD deliberations on funding and requirements. We must look at all programs and especially those that are early in their program lives, and try to ensure that enough funds are available to avoid slowdowns due to lack of funding.

Question. Would you agree that early communication between the acquisition, requirements, and budget communities is critical to establishing acquisition programs on a sound footing?

Answer. Yes, early and detailed communication is critical.

Question. What steps would you plan to take, if confirmed, to improve such communication?

Answer. If confirmed, I would work to ensure such communications are an integral part of DOD processes on acquisition, requirements, and especially on budgets.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Under Secretary of Defense (Comptroller)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR DANIEL K. AKAKA

SUPPLEMENTAL BUDGET REQUESTS

1. Senator AKAKA. Mr. Hale, section 1008 of the National Defense Authorization Act for Fiscal Year 2007 required the President's budget to include funding for ongoing military operations that are traditionally included in supplementals. In your response to the advance policy questions, you stated: "the negative aspects of supplementals can be minimized by ensuring Department of Defense (DOD) scrutiny of supplemental requests similar to that afforded the base budget (a policy endorsed by the President-elect) and by providing Congress with early information regarding supplemental requests." If confirmed, what steps are you going to take to include traditional supplemental requirements in the DOD planning, programming, budgeting, and execution process for the fiscal year 2011 budget?

Mr. HALE. DOD needs to move away from supplementals, using them only for truly unexpected costs. Working with others in DOD and with the Office of Management and Budget, I expect to work to achieve this goal. I hope to make progress in the fiscal year 2010 budget and achieve the goal by the fiscal year 2011 budget.

CHIEF MANAGEMENT OFFICER

2. Senator AKAKA. Mr. Hale, in May 2007, the Secretary of Defense designated the Deputy Secretary of Defense as the Chief Management Officer (CMO) of DOD. The CMO position was developed to address management challenges that have plagued DOD for years. The CMO was charged with establishing performance goals and measures for improving and evaluating overall economy, efficiency, and effectiveness, and to monitor and measure the progress of the Department. What is your understanding of the relationship between the Under Secretary of Defense (Comptroller) and the CMO?

Mr. HALE. My relationship with the Deputy Secretary of Defense in his capacity as CMO will be to do my utmost to ensure that the Department's business systems and processes are unified, standardized, and integrated. I will also take an active role in supporting the CMO in defining, establishing, and reporting business operations performance metrics that provide leading indicators of effective DOD operations.

QUESTIONS SUBMITTED BY SENATOR BILL NELSON

SURVIVOR BENEFIT PLAN/DEPENDENCY AND INDEMNITY COMPENSATION OFFSET

3. Senator BILL NELSON. Mr. Hale, for 8 years I have worked to eliminate the unjust offset between the DOD Survivor Benefit Plan (SBP) and the Department of Veterans Affairs Dependency and Indemnity Compensation (DIC). Under current law, if the surviving spouse of a servicemember is eligible for SBP, that annuity is offset by the amount of DIC received. I would like to work with DOD to devise a plan to eliminate the offset over time; it is the least we can do for the widows, widowers, and orphans of our servicemembers. What is the proper balance of discretionary and mandatory spending that will not only ensure our national defense, but will also take care of our servicemembers, veterans, and their families?

Mr. HALE. The offset to SBP for simultaneous DIC entitlement is fair, reasonable, and equitable. Allowing one to receive both annuities, without offset, would create an inequity by giving dual lifetime annuities to certain survivors while survivors of other deceased former military members would continue to receive only one or the other.

If current levels of the annuity for survivors of members who die from service-connected causes are deemed insufficient, the level of DIC should simply be recalibrated, ensuring there are no winners and losers—simply that all similarly situated families benefit from an appropriate annuity level defined by Congress.

4. Senator BILL NELSON. Mr. Hale, what would a plan look like that would eliminate the SBP-DIC offset over 4 years and over 10 years?

Mr. HALE. As noted in the answer to the prior question, I do not favor eliminating the SBP-DIC offset and suggest that if current annuity levels for survivors of

former military members who die of service-connected causes are deemed inadequate, the level of DIC should be reevaluated.

BASE REALIGNMENT AND CLOSURE COMMISSION

5. Senator BILL NELSON. Mr. Hale, in November 2005, the Base Realignment and Closure Commission (BRAC) of 2005 went into effect. Full funding of BRAC 2005 is imperative because the Services must build infrastructure to support the mandated force movements. Two BRAC 2005 conclusions that affect Florida are the establishment of Initial Aircraft Training for the F-35 Lightning II Joint Strike Fighter and the beddown of the 7th Special Forces Group at Eglin Air Force Base. The BRAC 2005 law expires in 2011. Explain how DOD will support the Services' funding requests necessary to implement the BRAC 2005 law before expiration of the BRAC 2005 mandate.

Mr. HALE. It is my understanding that the Department has directed the DOD components with BRAC realignments and/or closures to fully fund those actions to ensure implementation of each BRAC recommendation by the statutory deadline of September 15, 2011. As such, it is my understanding that all costs to implement BRAC are included in departmental budget requests (including supplemental requests) and in the Future Year Defense Program.

NAVY DECISION TO ESTABLISH A SECOND AIRCRAFT CARRIER HOMEPORT

6. Senator BILL NELSON. Mr. Hale, in 2006, the Navy began an environmental impact statement to determine the environmental impact of homeporting additional surface ships at Naval Station Mayport, FL. Since 2005, congressional and military leadership have reaffirmed the importance of dispersing the Atlantic Fleet in two ports. In February 2005, then Chief of Naval Operations, Admiral Clark, stated that it was his view that, "over-centralization of the [carrier] port structure is not a good strategic move . . . the Navy should have two carrier-capable homeports on each coast." He went on to say, ". . . it is my belief that it would be a serious strategic mistake to have all of those key assets of our Navy tied up in one port."

Deputy Secretary of Defense Gordon England, as the former Secretary of the Navy, testified to the Senate Armed Services Committee that the Navy needed to disperse its Atlantic coast carriers: "My judgment is that [dispersion] is still the situation . . . a nuclear carrier should be in Florida to replace the [U.S.S. *John F. Kennedy* to get some dispersion."

The current Chief of Naval Operations, Admiral Roughead, recommended to Secretary of the Navy Winter that Naval Station Mayport should be made capable of homeporting a nuclear aircraft carrier homeport to reduce the risk to our Atlantic Fleet carriers should Norfolk become incapacitated. The current Chairman of the Joint Chiefs of Staff, Admiral Mullen, agrees with Admiral Roughead's recommendation.

On January 14, the Navy made its decision to make Naval Station Mayport a carrier homeport and plans to request the necessary funding for its implementation in its fiscal year 2010 budget request. Understanding the fiscal challenges facing our country and the constrained defense budget, how will you approach this funding priority among the many priorities facing the military?

Mr. HALE. If confirmed, I will review the implications of this decision with the Navy, and the impact, if any, on the fiscal year 2010 and future budget requests. At such time, I would be willing to provide Congress an update on specifics once the review is completed.

7. Senator BILL NELSON. Mr. Hale, the principle of strategic dispersal is decades old. What is your understanding of the principle of strategic dispersal and what are your thoughts of Secretary of the Navy Donald Winter's implementation of this principle with respect to Naval Station Mayport?

Mr. HALE. You raise a good question that would require more study on my part, if confirmed. I am not yet familiar with all the details and potential impacts with Secretary Winter's decision to implement strategic dispersal on the east coast, but I am committed to review the matter thoroughly and respond to your question in the near future.

QUESTIONS SUBMITTED BY SENATOR EVAN BAYH

CLEAN AUDIT

8. Senator BAYH. Mr. Hale, the DOD budget continues to grow by billions annually. How close to a clean audit do you believe DOD is today?

Mr. HALE. I have not yet completed my review of all the information needed to provide a specific timeline. However, there are many difficult tasks still to be completed before DOD receives a clean or unqualified opinion. I expect that DOD will not achieve that goal any sooner than the date specified in the latest Financial Improvement and Audit Readiness report—which stated that major statements would be audit ready by 2017.

9. Senator BAYH. Mr. Hale, what steps do you believe will be necessary to take in order to perform a clean audit?

Mr. HALE. DOD is making progress towards an unqualified audit opinion. However, there are many difficult steps yet to be achieved. These include but are not limited to implementing integrated business systems, achieving an auditable funds balance with Treasury, and resolving valuation issues such as those associated with military equipment. The Department must also continue to improve its financial controls.

10. Senator BAYH. Mr. Hale, what benefits or savings do you believe could be realized by such an audit?

Mr. HALE. An unqualified audit opinion provides evidence that the financial systems of an entity provide reliable, accurate, and timely information for management decisionmaking. Informed decisionmaking leads to cost saving and/or cost avoidance. There is also a benefit to citizens and taxpayers in that an unqualified audit opinion validates their confidence in their government to manage, protect, and use their resources well by proving the Department's books are reliable and accurate.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

ACTIVE-DUTY END STRENGTH

11. Senator MCCAIN. Mr. Hale, the President-elect and the Secretary of Defense have endorsed significant increases in the Active-Duty strengths of the Army and Marine Corps and these Services have been working hard to accelerate this growth. Please discuss your concerns about the rising cost of personnel and how you anticipate this will affect the ability of the Services to recapitalize its equipment.

Mr. HALE. I am concerned about the rising cost of personnel in our DOD budget. Of course, we must continue to compensate our military people adequately, and we must take good care of military families. At the same time, we must also address rising costs in order to have the resources to upgrade military equipment, systems, and facilities. For example, we must do more to control the escalating cost of health care for our military. These difficult trade-offs will need to be made—both by the executive branch and Congress—during program and budget reviews.

RETIREES AND THE COST OF DOD HEALTH CARE

12. Senator MCCAIN. Mr. Hale, for the last 3 years, the administration has tried—without success—to gain approval for increases in the annual premiums for DOD-provided health care paid for by military retirees under the age of 65. What are your views about the need for change in this regard?

Mr. HALE. The proposed increases in TRICARE premiums included with the fiscal year 2009 DOD budget was based on recommendations of the Task Force on the Future of Military Healthcare, which DOD established as directed by the National Defense Authorization Act for Fiscal Year 2007. I expect that—during upcoming program and budget reviews—the new administration will analyze options regarding the large and growing cost of TRICARE, and I look forward to helping with that analysis.

DEFENSE BUSINESS BOARD VIEW

13. Senator MCCAIN. Mr. Hale, the Defense Business Board (DBB), an internal management oversight board established by Secretary Gates, recently warned that the DOD's budget is "unsustainable" and that the Department can only meet its pri-

orities if it makes hard budget decisions on its largest and costliest acquisition programs. "Business as usual [in terms of the Department's budget decisions] is no longer an option," warned the Board. Do you agree with the DBB's warning?

Mr. HALE. Yes, business as usual is no longer an option. President Obama and Secretary Gates have underscored that change is needed and vowed to make acquisition reform a top priority.

14. Senator MCCAIN. Mr. Hale, what principles will guide your thinking on possible cuts to large acquisition programs?

Mr. HALE. Acquisition programs must be able to deliver the required capability on schedule and at or under cost. The capabilities they provide must not be duplicative of other acquisitions, and these capabilities must be integral components of the overall portfolio of capabilities that the Department needs to accomplish its mission. We will review programs to ensure that they have the required technological and production maturity to enable successful delivery of the required capability to the warfighter according to schedule, and at cost. Programs lacking this maturity may be candidates for termination or restructure, depending on their potential contributions to our mission accomplishment. Cuts to large acquisition programs will also be evaluated against the capabilities they provide to ensure accomplishment of the Department's mission to defend our Nation, its interests, and our allies. We will review acquisitions to determine which best address requirements of near-term engagements and current known threats, and fund the highest priority acquisition programs that address these areas. At the same time, we will also ensure that we do not neglect the need for increased capabilities to meet increased or new threats in the future. As standard practice, we will align our acquisitions to stay within our funding topline and always strive to get the best value for our resources.

REFORMS FOR PROCUREMENT OF WEAPONS SYSTEMS

15. Senator MCCAIN. Mr. Hale, over the last few years, this committee has developed several legislative initiatives intended to reform the process by which the Department buys its largest and most expensive weapons systems. The preponderance of those initiatives have addressed acquisition policy and the requirements system. Are there any aspects of acquisition policy, the requirements-determination system, or the resource allocation process that you believe require additional reform?

Mr. HALE. Yes, we need reforms in the areas I listed in my answer to question 14 above.

16. Senator MCCAIN. Mr. Hale, the Department recently instituted several reforms to the DOD Instructions on how the Defense Acquisition System (DAS) operates. Those initiatives seek to start major acquisition programs off responsibly by increasing emphasis on systems engineering and greater upfront planning and management of risk, as well as utilization of competitive prototyping in a newly-named Technology Development Phase (before Milestone B). Are there any aspects of those newly instituted instructions (or the newly structured DAS) with which you have difficulty or intend to modify or repeal?

Mr. HALE. I think the recent changes to defense acquisition policy reflect the Department's commitment to achieving improved acquisition outcomes by reducing risk, and improving process discipline. I believe the new policies are sound and I support them. If confirmed, I plan to closely monitor the execution of these policies and contribute to the success of these important initiatives.

17. Senator MCCAIN. Mr. Hale, among the reforms that this committee and the Department have instituted include those that enable the Department to remove more effectively nonessential requirements; have the Department move towards employing fixed-type contracts while better incentivizing contractor performance; and require the Department to exercise better oversight of service contracts. Are there any aspects of those initiatives in particular with which you have difficulty or intend to modify or repeal?

Mr. HALE. No, I believe these are effective initiatives and I will support them. Each of the policies mentioned is designed to improve the operation of our acquisition system and enhance oversight of our substantive investments in our major defense acquisition programs and contract services. If confirmed, I plan to monitor the effectiveness of these policies to ensure that the desired outcomes are being achieved.

RELOCATION OF U.S. MARINES FROM OKINAWA

18. Senator MCCAIN. Mr. Hale, the current estimate for the costs to relocate the marines from Okinawa to Guam is at least \$10 billion, with the Government of Japan directly contributing \$2.8 billion. The remainder will be funded by DOD through military construction or loans paid back through future housing allowances. With all the other modernization, recapitalization, and reset requirements facing the Department in the next 4 years, in your opinion, can we afford this move?

Mr. HALE. The Department is committed to this relocation initiative, and I support it. This investment provides assurance of the U.S. commitment to security and strengthens deterrent capabilities in the Asia-Pacific region. The Japanese Government may commit up to \$6 billion in total funding for this initiative. During upcoming program and budget reviews, the Department will balance the fiscal commitment required to move forward with this initiative against other high-priority initiatives.

19. Senator MCCAIN. Mr. Hale, there has also been discussion about the significant investment necessary to upgrade port, road, and utility infrastructure on Guam to support the stationing of marines and their families. Do you believe DOD should assume this financial obligation as well?

Mr. HALE. The Department recognizes the necessary investment associated with port, roads, and utility infrastructure on Guam resulting from the Marine Corps relocation. It is critical to thoroughly evaluate the broad Federal impact of this significant investment and partner with other Federal entities, such as the Guam Federal Interagency Task Force, to determine the financial obligation that the United States should assume for infrastructure on Guam. The Department is addressing Guam's needs that are directly related to maintaining an enduring presence in support of the military mission.

Guam's infrastructure, namely the commercial port and the island's road network, require upgrades that will directly assist our ability to carry out the program and also benefit Guam. The Department, through the Defense Access Road (DAR) program, is preparing to address qualifying improvements to roadways, intersections, and bridges that are critical to executing the construction program for DOD.

The Maritime Administration (MARAD) was designated the lead Federal agency for the Port of Guam Improvement Enterprise Program in Public Law 110-417, section 3512. As the lead Federal agency, the MARAD will manage the expenditure of Federal, non-Federal, and private funds made available for the project and provide oversight and project management through a prime contractor. DOD is working closely with MARAD to help facilitate their initiative to correct the issues at the port.

DOD is also working to facilitate the necessary utilities solutions that will: meet the DOD mission; provide the widest benefit to the people of Guam; be technically and financially supportable by all participating parties; and be acceptable to the environmental regulators. DOD is working in collaboration with the Government of Guam officials to understand their needs and to determine the feasibility of utilities solutions that are mutually beneficial to DOD, the civilian community, and the regulatory agencies. Additionally, we are working with the Government of Japan to ensure that their equities are met in conjunction with the DOD's needs and the equities of the Government of Guam and the Consolidated Commission on Utilities. Concurrently, we are working with the environmental regulators to ensure that the solution set meets the requirements set by the regulatory standards.

 QUESTIONS SUBMITTED BY SENATOR MEL MARTINEZ

ACQUISITION STRATEGY

20. Senator MARTINEZ. Mr. Hale, as you have read, the Secretary of Defense wrote recently in Foreign Affairs, "When it comes to procurement, for the better part of 5 decades, the trend has gone toward lower numbers as technology gains have made each system more capable. In recent years, these platforms have grown ever more baroque, have become ever more costly, are taking longer to build, and are being fielded in ever-dwindling quantities. Given that resources are not unlimited, the dynamic of exchanging numbers for capability is perhaps reaching a point of diminishing returns. A given ship or aircraft, no matter how capable or well-equipped, can be in only one place at one time." How do you intend to ensure that simple, effective and cost efficient systems are not replaced by cutting edge, yet highly expensive platforms our Nation is not willing to procure en masse?

Mr. HALE. I believe that DOD must make trade-offs between performance and cost, especially early in the life of new programs, in order to ensure reasonably priced yet adequately capable weapon systems. Stability during the acquisition process is another key to ensuring reasonable prices. Working along with other offices in charge of acquisition, I expect to be an advocate for these and other process improvements necessary to improve DOD's acquisition system.

21. Senator MARTINEZ. Mr. Hale, how will you bring sensibility to the procurement process so we maintain the capacity to address the Nation's needs?

Mr. HALE. As I said in my answer above, I intend to lead my staff, and work with other DOD offices, to help carry out the acquisition goals enunciated by Secretary Gates.

22. Senator MARTINEZ. Mr. Hale, what additional acquisition process improvements will you bring to the Pentagon?

Mr. HALE. Discipline is the key to creating affordable weapons programs, especially discipline in the early stages of a weapon system's life cycle. The Under Secretary of Defense (Acquisition, Technology, and Logistics) is responsible for DOD acquisition process. Once the new Under Secretary takes office I plan to be helpful in identifying improvements.

QUESTION SUBMITTED BY SENATOR SUSAN COLLINS

UPGRADING AGING SYSTEMS

23. Senator COLLINS. Mr. Hale, in your answers to the advance policy questions, you listed what you believe to be some of the major challenges confronting the next Under Secretary of Defense (Comptroller) and Chief Financial Officer. One of the biggest challenges for all the Services is the need to replace aging major equipment and weapons systems with newer and more technologically advanced systems in a cost effective manner. For example, DOD has spent countless hours and millions of dollars trying to develop the next generation aerial refueling tanker, and the Navy has a strong need to replace many of its aging warships. What is your fiscal plan to purchase these systems that DOD so desperately needs?

Mr. HALE. Fiscal discipline will be a key to meeting the many budgetary challenges facing DOD. We must maintain an adequate force structure, but we also need to identify ways to hold down personnel costs (including health care costs) in order to free up resources needed to replace aging systems. We must buy a reasonable number of replacement systems, but we also need to make the hard trade-offs (including performance trade-offs) necessary to hold down the unit costs of the replacement systems. During upcoming program and budget reviews, I expect to be an advocate for the necessary fiscal discipline.

[The nomination reference of Robert F. Hale follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 20, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Robert F. Hale, of Virginia, to be Under Secretary of Defense (Comptroller), vice Tina Westby Jonas, resigned.

[The biographical sketch of Robert F. Hale, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ROBERT F. HALE

Robert F. Hale currently serves as the Executive Director of the American Society of Military Comptrollers (ASMC). In that capacity he runs an 18,000 member association that provides a wide range of professional development activities for defense financial managers.

From 1994 to 2001 Mr. Hale was appointed by the President and confirmed by the Senate as the Assistant Secretary of the Air Force (Financial Management and Comptroller). He was responsible for the Air Force budget and all aspects of Air Force financial management. During this period Mr. Hale oversaw submission of budgets that met Air Force needs in peace and war. He made numerous improvements in Air Force financial management and brought about substantial streamlining of processes. He also spearheaded creation of the first-ever certification program for defense financial managers.

Mr. Hale served for 12 years as head of the defense unit of the Congressional Budget Office. His group provided defense analyses to Congress, and he frequently testified before congressional committees. He was a sought-after expert on the Federal budget, especially the defense budget, and spoke widely on budget topics.

Before coming to ASMC, Mr. Hale directed a program group at LMI Government Consulting and, early in his career, he served on active duty as a Navy officer and worked for the Center for Naval Analyses.

Robert Hale holds a BS with honors from Stanford University, as well as an MS from Stanford, and an MBA from George Washington University. He is also a Fellow in the National Academy of Public Administration and has served on the organization's task forces. Mr. Hale has served on the Defense Business Board and on the Congressionally-Mandated Task Force on the Future of Military Health Care. He is a former National President of the American Society of Military Comptrollers and is a Certified Defense Financial Manager with acquisition specialty.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Robert F. Hale in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Robert F. Hale.
2. **Position to which nominated:**
Under Secretary of Defense (Comptroller).
3. **Date of nomination:**
Intention to nominate issued January 8, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**

January 21, 1947; Sacramento, CA.

6. Marital Status: (Include maiden name of wife or husband's name.)
Married to Susan Kohn.

7. Names and ages of children:
Scott D. Hale, 30; Michael J. Hale, 28.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

George Washington University, MBA, 1976 (attended 1972–1976).

Stanford University, MS, 1969 (attended 1969).

Stanford University, BS, 1968 (attended 1964–1968).

Armijo High School, 1964 (attended 1960–1964).

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Executive Director, American Society of Military Comptrollers, July 2005–present;
415 North Alfred Street, Alexandria, VA.

Currently managing all aspects of a professional association with 18,000 members. Created an “easy-access” program of professional development, using internet and audio approaches to meet new training needs. Significantly improved content of Society’s quarterly journal and its annual conference (a premier training event for defense financial managers). Successfully implemented major automation improvements at Society headquarters. Improved organization’s profitability without raising member dues.

Program Director and Consultant, LMI Government Consulting, May 2001–July 2005; 2000 Corporate Ridge Road, McLean, VA.

Served as program director for a group of about 20 professionals providing consulting services to Federal agencies on acquisition topics. Inherited a group that was not productive or profitable. Instituted major changes in business processes that brought in new, high-quality business and rendered the group profitable within a year. Also consulted for Federal agencies on financial issues.

Assistant Secretary (Financial Management and Comptroller), United States Air Force, March 1994–January 2001; 1130 Air Force Pentagon, Washington, DC.

Nominated by the President and confirmed by the Senate, managed all aspects of Air Force financial management. Oversaw creation and defense of seven budgets and associated supplementals that successfully met critical Air Force resource needs, both in peacetime and during the Bosnian war. Worked successfully to involve all key personnel in the budget process, especially those in the Secretariat. Streamlined Air Force financial business processes by overseeing implementation of three new automated systems and shepherding implementation of four major multi-service systems. Sharply reduced antideficiency act cases and credit card delinquencies by devoting personal attention to these problem areas. Accomplished first full audit of an Air Force financial statement. Created a new office to improve base-level financial services. Also spearheaded creation of a new certification program for defense financial managers, which has now become an important part of their training. Longest serving Assistant Secretary in the history of the office.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Member, Defense Business Board, 2002–2007.

Member, DOD Task Force on the Future of DOD Health Care, 2006–2007.

Member, Task Force on Fiscal Futures, National Academy of Public Administration, 2008–present.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

RFH Consulting, single-person consulting firm doing limited work for private companies and DOD, 2001–present.

Member, National Executive Committee, American Society of Military Comptrollers (nonprofit society devoted to professional development).

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, National Academy of Public Administration.
Executive Director, American Society of Military Comptrollers.
Member, Association of Government Accountants.
Member, National Contract Management Association.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

10/23/08, Obama for America - \$1,000.
9/21/08, Obama for America - \$1,000.
9/22/08, Connolly for Congress - \$250.
7/28/08, Obama for America - \$500.
5/6/06, Democratic Senate Committee - \$500.
9/17/06, Democratic Congressional Campaign - \$500.
9/29/06, Fairfield-Suisan CA, Save the Farms, \$250.
4/3/04, Kerry for President - \$500.
6/27/04, Kerry for President - \$1,000.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

DOD Exceptional Public Service Award.
Air Force Distinguished Service Award.
National Defense Medal.
Fellow, National Academy of Public Administration.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

"Defense and Deficits," Armed Forces Comptroller Journal, Spring 2004.

"The Graying of Federal Financial Management," Journal of Government Financial Management, Spring 2003.

"Promoting Efficiency in the Department of Defense: Keep Trying, But Be Realistic," Center for Strategic and Budgetary Assessments, January 2002.

Authored numerous reports on defense financial management during service as a Federal employee with the Congressional Budget Office (1975–1994).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

No formal, written speeches.

Many informal speeches, mainly to chapters of the American Society of Military Comptrollers.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ROBERT F. HALE.

This 13th day of January, 2009.

[The nomination of Robert F. Hale was reported to the Senate by Chairman Levin on February 5, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on February 9, 2009.]

[Prepared questions submitted to Michèle Flournoy by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Goldwater-Nichols was landmark legislation that led to dramatic improvements in operational effectiveness, unity of effort, and civilian oversight. We now have a generation of military leaders for whom operating in a coordinated and joint, multi-service environment is the norm. Given these successes, I do not see the immediate need to change the provisions of this legislation.

I have co-authored a number of studies that have advocated using the Goldwater-Nichols Act as a point of departure for enhancing interagency unity of effort and the capabilities of America's non-military instruments of statecraft. If confirmed, I would hope to be in a position to help strengthen the U.S. Government's ability to craft effective whole of government approaches to the national security challenges we face.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. See my previous answer.

RELATIONSHIPS

Question. What is your understanding of the relationship between the Under Secretary of Defense for Policy (USD(P)) and each of the following:

Question. The Secretary of Defense.

Answer. The USD(P) serves as the principal staff assistant and advisor to the Secretary of Defense for all matters concerning the formulation of national security and defense policy and the integration and oversight of DOD policy and plans to achieve national security objectives. The USD(P) provides policy support to the Secretary in interagency fora (such as National Security Council and Homeland Security Council deliberations), engagement with international interlocutors, and in the Planning, Programming, Budgeting, and Execution (PPBE) processes inside the Department, including the Quadrennial Defense Review (QDR), the Nuclear Posture Review (NPR), and annual program and budget reviews.

Question. The Deputy Secretary of Defense.

Answer. The Under Secretary for Policy provides similar support to the Deputy Secretary as described above.

Question. The other Under Secretaries of Defense, including the Under Secretary of Defense for Intelligence.

Answer. The Under Secretary for Policy works closely with the other Under Secretaries of Defense to achieve the Secretary's objectives. This includes providing policy input, as appropriate, to each of them in their respective areas of responsibility. In addition, the USD(P) works closely with the Under Secretary of Intelligence and other intelligence officials to ensure that policy formulation and execution are well-informed and supported by intelligence.

Question. The Assistant Secretaries of Defense.

Answer. The USD(P) exercises authority, direction, and control over the Principal Deputy USD(P), and the Assistant Secretaries of Defense for International Security Affairs, Asian and Pacific Affairs, Global Security Affairs, Special Operations and Low-Intensity Conflict and Interdependent Capabilities, and Homeland Defense and Americas' Security. This team works together to provide the Secretary with advice

and recommendations on the full range of policy issues under consideration in the Department and provides policy oversight to ensure that the Secretary's guidance and decisions are implemented properly.

Question. The Secretaries of the Military Departments.

Answer. The USD(P) works closely with the secretaries of the military departments on a broad range of issues, including strategy development, force planning, and other areas in which the military departments are critical stakeholders.

Question. The General Counsel of the Department of Defense (DOD).

Answer. The USD(P) works closely with the General Counsel on all policy issues that involve a legal dimension. In practice, this means significant and regular coordination on a broad range of issues.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff.

Answer. As the principal military advisor to the Secretary of Defense, the President, and the National Security Council, the Chairman has a unique and critical military role. The USD(P) works closely with the Chairman and Vice Chairman to support the efforts of the Secretary and Deputy Secretary, and to ensure that their military advice is taken into account in an appropriate manner.

Question. The Commanders of the Regional Combatant Commanders.

Answer. The USD(P) also works closely with the regional combatant commanders to support the efforts of the Secretary and Deputy Secretary, particularly in the areas of regional strategy and policy, contingency planning, and policy oversight of operations.

DUTIES OF THE UNDER SECRETARY OF DEFENSE FOR POLICY

Question. Section 134 of title 10, U.S.C., provides that the USD(P) shall assist the Secretary of Defense in preparing written policy guidance for the preparation and review of contingency plans, and in reviewing such plans. Additionally, subject to the authority, direction, and control of the Secretary of Defense, the Under Secretary shall have responsibility for supervising and directing activities of DOD relating to export controls. Further, subject to the authority, direction, and control of the Secretary of Defense, the USD(P) is responsible for overall direction and supervision for policy, program planning and execution, and allocation and use of resources for the activities of the DOD for combating terrorism.

DOD Directive 5111.1 reiterates these duties and specifically notes that the USD(P) is the principal staff assistant and advisor to the Secretary of Defense and the Deputy Secretary of Defense for all matters on the formulation of national security and defense policy and the integration and oversight of DOD policy and plans to achieve national security objectives.

What is your understanding of the duties and functions of the USD(P) under current regulations and practices?

Answer. If confirmed, I will perform the duties set forth in title 10 and the DOD Directive. The USD(P) serves as the principal staff assistant and advisor to the Secretary and Deputy Secretary of Defense for all matters concerning the formulation of national security and defense policy and the integration and oversight of DOD policy and plans to achieve national security objectives. Specifically the USD(P) directly supports the Secretary of Defense in the interagency process, in dealings with foreign counterparts, in developing strategy and planning guidance for the rest of the PPBE process, in providing policy oversight of current operations, and in guiding the development and review of contingency plans. He or she is the Secretary's principal policy adviser on the use of the U.S. military instrument and its adaptation for future missions.

Question. What is your understanding of the responsibilities of the USD(P) in combating terrorism, in particular as differentiated from those of the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict (ASD(SOLIC))?

Answer. The ASD(SOLIC) and Integrated Capabilities (IC) functions under the authority, direction, and control of the USD(P) in combating terrorism. In practice, ASD(SOLIC)/IC is often asked to provide direct support to the Secretary on sensitive operational material.

Question. Assuming you are confirmed, what additional duties and functions do you expect that the Secretary of Defense would prescribe for you?

Answer. I look forward to speaking with him further about how I could best support his efforts beyond those set forth in section 134(b) of title 10.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I have had the privilege of spending more than 20 years working on a broad range of national security and defense issues, both in and out of government. From my time in university and graduate school wrestling with issues surrounding the Cold War and the Soviet nuclear arsenal, to my 5½ years spent in the Pentagon taking a lead role in formulating defense strategy in the immediate post-Cold War context for three different Secretaries of Defense, to my more recent roles in the think-tank community exploring U.S. policies to address the complex challenges of the post-September 11 era, I believe I have the policy background and management experience that would serve the country well if confirmed as the next USD(P).

CONTINGENCY PLANNING

Question. One of the purposes of Goldwater-Nichols was to increase military and civilian attention on the formulation of strategy and contingency planning. The USD(P) is specifically directed to assist the Secretary of Defense in preparing written policy guidance for the preparation and review of contingency plans and in reviewing such plans.

What is your view of the civilian role, as compared to the military role, in the formulation of strategy and contingency planning?

Answer. I believe that civilian leadership is critical in the formulation of strategy and planning. Civilian defense leadership is particularly vital in translating broad national security policies and principles into the strategic ends that ultimately drive military planning.

More specifically, the USD(P) supports the development of the President's National Security Strategy, leads the development of the defense strategy, establishes realistic objectives and guidance to form the basis for contingency planning, and reviews DOD plans and programs to ensure they support strategic objectives. The Chairman of the Joint Chiefs of Staff is a critical partner in the development of guidance for contingency planning and provides independent military advice to the Secretary of Defense and the President. In addition to the provision of written guidance, an important civilian role is to review contingency plans submitted for approval by the combatant commanders. The USD(P) is also responsible for facilitating interagency coordination on contingency planning efforts, as necessary.

Question. In your opinion, does the civilian leadership currently have an appropriate level of oversight of strategy formulation and contingency planning?

Answer. I believe that the United States is at a critical time in history—with multiple wars, enduring threats, and imminent challenges. From the need to redeploy forces in Iraq, strengthen commitments in Afghanistan, to the importance of combating terrorism and preparing for a future in which energy security and the rise of states like China and India will fundamentally alter the international environment, I believe that a strong civilian and military partnership on these issues is vital. If confirmed, I will examine this issue closely and seek to ensure that civilian leadership has the appropriate level of oversight on the full range of strategy, planning, and use-of-force issues.

Question. What steps do you believe are necessary to ensure effective civilian control and oversight of strategy formulation and contingency planning?

Answer. Given that we are at this critical point in history, I do feel that the strategy and planning capacity in the Office of the Secretary of Defense should be strengthened. From my time inside and outside of government, I have come to believe that the U.S. Government needs to fortify its capacity for strategic thinking and strategic planning to ensure that it not only deals with the challenges of today but is also well-prepared for those of tomorrow.

If confirmed, I would strive to provide the best advice possible to the Secretary of Defense in fulfilling his responsibility to provide written policy guidance and to review contingency plans. I would also work closely with the Joint Staff to develop further opportunities to collaborate on planning guidance and reviews.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges confronting the USD(P)?

Answer. If confirmed, my office will likely play an important role within the Department and the interagency process in developing policy for a number of key issues, including among others: responsibly ending the war in Iraq; ensuring that the United States develops and employs a more effective strategy in Afghanistan and the surrounding region; working to prevent nuclear and weapons of mass destruction (WMD) proliferation; combating terrorism; adapting the U.S. military for 21st century challenges; and strengthening America's alliances with key partners and allies. Beyond ensuring that the Secretary of Defense receives the best possible

policy input on these vital questions, another major challenge will be to strengthen the organizational capacity to support these efforts.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I would participate in a number of policy reviews, including the upcoming QDR, which provides an opportunity to assess these challenges and develop policy, plans, and investments to address them.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the USD(P)?

Answer. If confirmed, I would give priority to the major challenges identified above and to strengthening the organizational capacity of the Office of the Secretary of Defense Policy to address them. I would also give priority to ensuring effective working relationships with both military and civilian counterparts through the Department and the interagency.

IRAQ

Question. The U.S.-Iraqi Status of Forces Agreement (SOFA) requires that U.S. combat forces withdraw from cities and towns by June 2009 and that all U.S. forces withdraw from Iraq by the end of December 2011. Additionally, if Iraqi voters reject the SOFA in a referendum scheduled for July 2009, U.S. troops would be required to withdraw by July 2010.

What, in your view, are the greatest challenges facing the Department in meeting these deadlines and what actions, if any, would you recommend to maximize the chances of meeting these requirements?

Answer. The challenge in Iraq will be to continue the phased redeployment of U.S. forces while maintaining a secure environment to support elections, political reconciliation, and economic development. If confirmed, I would review DOD plans and work with colleagues across the Department to make any necessary recommendations to the Secretary of Defense.

Question. What is your understanding and assessment of U.S. plans to support implementation of the SOFA requirements for repositioning and redeployment of U.S. forces, including contingency planning relating to the Iraqi referendum?

Answer. I have not had the opportunity to review detailed plans regarding the repositioning and redeployment of U.S. forces in Iraq. If confirmed, I would review such plans and make any necessary recommendations to the Secretary of Defense.

Question. To date, U.S. taxpayers have paid approximately \$48 billion for stabilization and reconstruction activities in Iraq while the Iraqi Government has accrued a budget surplus of tens of billions of dollars. On April 8, 2008, Ambassador Crocker told the committee "the era of U.S.-funded major infrastructure is over" and said the United States is no longer "involved in the physical reconstruction business."

What do you believe is the appropriate role for the United States in reconstruction activities in Iraq going forward?

Answer. I support the President-elect's views on bringing in Iraq's neighbors to help with reconstruction efforts. I also believe American policy should continue to be supportive in working with and through our Iraqi partners and that the U.S. role in reconstruction should focus on capacity development and assisting our Iraqi partners in prioritizing, planning, and executing their reconstruction projects.

Question. What are your views on the responsibility of the Iraqi Government to assume the cost of training, equipping, and operations for its security forces?

Answer. I believe that a critical part of our strategy depends on ensuring that the Iraqi Government assumes control of the entire range of tasks necessary to organize, train, and equip its security forces. From DOD's perspective, this includes helping our Iraqi partners to formulate a defense strategy and acquisition policy that is prudent and practical given finite resources.

Question. What are your views on the responsibility of the Iraqi Government to share the cost of combined operations with Multi-National Forces-Iraq (MNF-I) forces and stability programs throughout Iraq?

Answer. I understand that the U.S. Government has not requested the Iraqis contribute to the costs of MNF-I operations. A key objective is for Iraq to develop and fully support its forces in order to assume responsibility for its own security and stability.

Question. What are your views on the responsibility of the Iraqi Government to share the increased operating and facilities costs associated with repositioning or withdrawal of U.S. forces in accordance with the U.S.-Iraqi SOFA?

Answer. My understanding is that under the U.S.-Iraqi Security Agreement, there is no Iraqi responsibility to pay costs associated with repositioning or withdrawal of U.S. forces. I believe the U.S. Government should encourage Iraq to focus on the development and support of its security forces.

AFGHANISTAN

Question. What is your understanding and assessment of our strategic objectives in Afghanistan?

Answer. Our strategic objective is a stable and secure Afghanistan in which al Qaeda and the network of insurgent groups, including the Taliban, are incapable of seriously threatening the Afghan state and resurrecting a safe haven for terrorism. We are a long way from achieving this objective. If confirmed, I look forward to working with the committee on this enormous challenge, which requires urgent and sustained attention.

Question. What changes, if any, would you recommend to our current strategy in Afghanistan?

Answer. Achieving our strategic objectives in Afghanistan will require a more integrated and comprehensive approach to security, economic development, and governance. All of the instruments of national power and persuasion must be harnessed in order to be successful. It is imperative that we improve coordination and cooperation between Afghanistan and its neighbors and that we achieve greater unity of effort among our coalition partners, international institutions, and the Government of Afghanistan.

Question. Do you believe that there is a need to develop a comprehensive civil-military plan for Afghanistan, akin to that used in Iraq?

Answer. Yes.

Question. How do you assess the contributions of North Atlantic Treaty Organization (NATO) allies to the effort in Afghanistan, and how do you believe that the United States can persuade these allies to increase their efforts as the United States does so?

Answer. Afghanistan would be less secure without the contributions and sacrifices of our NATO allies and other International Security Assistance Force (ISAF) partners. President-elect Obama and Secretary Gates have both called for greater contributions with fewer caveats from our NATO allies. By committing more of our own resources to the challenge, the United States will be better positioned to persuade our allies to do more.

Question. General David McKiernan, USA, Commander of the NATO ISAF and Commander, U.S. Forces-Afghanistan, has identified a need for four additional combat brigades and support units in Afghanistan.

Do you support General McKiernan's request for additional forces? If so, would you support drawing down U.S. forces in Iraq faster in order to meet General McKiernan's request?

Answer. President-elect Obama and Secretary Gates have both consistently stated that they believe the deteriorating security conditions in Afghanistan required additional U.S. and international forces. If confirmed, I look forward to talking with them and the Chairman of the Joint Chiefs of Staff and others to determine how DOD can best support that request. Balancing the demand for forces between Iraq and Afghanistan while ensuring that the military is ready for other contingencies will be one of the Department's key challenges and, if confirmed, I look forward to working with those in the Department responsible for this as well as with this committee.

Question. What is your understanding and assessment of the Department's plans for the continued rotational flow of combat brigades and other units necessary to support operations in Iraq through 2009 and the availability of the additional combat brigades as requested by General McKiernan?

Answer. Though I have not been briefed in detail, I understand that the Department is preparing plans for the requirements for Iraq and Afghanistan as currently understood. If confirmed, I will consult with the Chairman of the Joint Chiefs of Staff and senior commanders to examine the plans in detail as the law requires my office to do.

Question. How would the Department support combat brigade increases in Afghanistan without extending combat brigades or redeploying combat brigades without replacement in Iraq?

Answer. Managing the build-up of forces in Afghanistan must be balanced with the demands in Iraq and the necessity to restore full spectrum readiness. We have asked a great deal of our service men and women, and I am acutely aware of the costs to them and to their families of extended and repeated deployments.

Question. The goal for increasing the size of the Afghan National Army (ANA) has been revised from 68,000 to approximately 134,000 soldiers.

Would you support a surge of trainers from the United States and coalition partners into Afghanistan to accelerate the expansion of the ANA?

Answer. Building an effective, broadly representative, and respected ANA will require additional resources. If confirmed, I will work with the Services, senior commanders, and our international partners to make sure that we have the right number of trainers, mentors, and advisors with sufficient resources to accomplish their mission.

Question. What recommendations, if any, would you have for encouraging or enabling our coalition partners to provide more training team personnel to embed with ANA units?

Answer. Developing the ability of the Afghan National Security Forces to assume the front-line responsibility of security inside Afghanistan should be the greatest incentive for coalition partners to provide training team personnel. We must stress to our allies the long-term commitment of the United States to Afghanistan and the shared responsibility NATO has to develop Afghan forces so that they can eventually take the lead for security in Afghanistan.

Question. One of the main threats to U.S. and coalition forces in Afghanistan comes from cross-border attacks by the Taliban and extremist militants who find safe haven in Pakistan's border regions.

What steps in your view need to be taken to eliminate the threat posed by Taliban and extremist militants hiding out across the Afghanistan-Pakistan border?

Answer. Both President-elect Obama and Secretary Gates have cited the need to eliminate the terrorist sanctuary in the border regions of Pakistan, but there is no purely military solution. The United States must have an integrated strategy to promote development and prevent terrorism across the Afghanistan-Pakistan border region. If confirmed, I intend to work closely with my DOD and interagency colleagues to examine several potential components of such a strategy:

- Work with the Pakistani Government to strengthen the capacity of the Pakistani military and police to conduct counterterrorism and counter-insurgency missions;
- Encourage Pakistani political reforms in the Federally Administered Tribal Areas to better link the border regions to the central government with more democratic representation;
- Increase non-military economic assistance and support for education and health care; and
- Improve the partnership between Afghanistan, Pakistan, and the coalition to secure the border, eliminate terrorist camps, and reduce cross-border insurgent movement.

Question. The ANA has shown itself to be effective, well-motivated, and respected by the Afghan people.

Would you support giving the ANA the lead in stopping cross-border incursions, either by transferring the mission of patrolling the border to the ANA or by bringing the Afghan Border Patrol (ABP) under the ANA?

Answer. Securing the border from cross-border incursions and illegal smuggling is an important component of a strategy for success in Afghanistan, but the specific command relationship between the ABP and ANA is an area that, if confirmed, I would need to examine in closer detail.

Question. The cultivation of poppies and trafficking of opium has reached alarming proportions in Afghanistan. Some estimate that over 50 percent of Afghanistan's gross national product is associated with the illegal opium trade and that Afghanistan is at risk of failing as a nation state. Coalition strategies for countering the opium trade have not been effective to date.

In your view, what strategy would be most effective in reducing opium production and trafficking in Afghanistan?

Answer. Opium traffic distorts the Afghan economy, corrodes the judicial system, and increases the incentives for corruption and criminal violence. Countering the opium trade must include a multi-pronged coalition and Afghan strategy, including judicial reform, better law enforcement and intelligence sharing, and rural economic development.

Question. What should the role of the U.S. military forces be in the counterdrug program in Afghanistan?

What is the appropriate role for coalition nations and the larger international community in effectively addressing the counterdrug challenge in Afghanistan and the surrounding region?

Answer. The international community must play a greater role in helping the Afghan Government to strengthen Afghan institutions, including the judicial and law enforcement system, intelligence service, and Afghan National Security Forces, so that it can better take the lead in combating narcotics in Afghanistan.

Question. What are the main challenges facing the U.S. and international community's reconstruction efforts in Afghanistan?

Answer. The deterioration of the security situation is the most immediate challenge, but reconstruction and development in Afghanistan also face more fundamental challenges. As one of the poorest countries in the world that has suffered through more than a generation of war, Afghanistan's development challenges are daunting. Four out of five Afghans make their living from farming, yet widespread drought and a crumbling agricultural infrastructure have created an opening for illicit opium production to supplant the legal agricultural economy. While Afghanistan has made significant strides since 2001 in health care delivery, life expectancy is still below 45 years and more than half of Afghan children are growth-stunted from poor nutrition and disease. While progress has been made towards primary education in Afghanistan, fewer than half of adult males and only one in eight females can read, impeding the professionalization of the Afghan Government and security forces and limiting economic growth.

Question. What would be your priorities for addressing those challenges?

Answer. If confirmed, I look forward to working with the interagency and international partners to help create a truly comprehensive civil-military strategy to build the necessary foundation for a stable and secure Afghanistan.

Question. What changes, if any, would you recommend for the strategy, organizational structure, or resourcing of Provincial Reconstruction Teams in Afghanistan?

Answer. Provincial Reconstruction Teams have been critical to the development work undertaken in Afghanistan over the past 6 years. If confirmed, I look forward to discussing the committee's concerns and ideas on the use of PRTs.

PAKISTAN

Question. What is your understanding and assessment of the efforts by the Pakistani Government to counter militant groups along the Afghanistan-Pakistan border and to fight terrorism in general?

Answer. The Pakistani Government will, of course, be central to defeating the terrorist and cross-border insurgent groups that threaten Afghanistan, Pakistan, and the international community. Although the Pakistani Government has conducted a series of military operations against militants in the border region, the area remains a sanctuary for al Qaeda and Taliban-affiliated groups. If confirmed, I plan to focus significant time and energy to better understand the requirements to solve this particular challenge.

Question. In your view, is the Pakistani Government doing enough to combat these threats? If not, what more should it be doing? What, in your view, should be the United States' approach vis-à-vis Pakistan?

Answer. I have not had the opportunity to review Pakistan's most recent efforts in detail. If confirmed, I look forward to reporting back to the committee on my assessment of ways in which the United States and Pakistan can work better together to combat these shared threats.

INDIA

Question. The recent attacks in Mumbai raise questions about what more might be done to help India guard against and react to terrorist incidents and underscore the fragile nature of the relationship between India and neighboring Pakistan.

What is your view of the current state of U.S.-India military-to-military contacts?

Answer. I understand that the U.S.-India military-to-military relationship is quite positive and getting stronger. If confirmed, these are areas that I hope we can work on together.

Question. What do you believe the United States should do to assist the Indian Government in the prevention of and response to terrorist events?

Answer. As the world's largest democracy, India is a critical strategic partner of the United States. Both India and the United States share an interest in preventing terrorism. If confirmed, I will work with the State Department to carefully consider all requests for counterterrorism assistance from India.

Question. In your view, what impact has this rise in tensions between Pakistan and India had on the stability of the South Asia region, generally, and on the prospects for security in Afghanistan?

Answer. India, Pakistan, and Afghanistan are linked by history, culture, language, and trade, and regional stability cannot be achieved without the cooperation

of all three. It is in America's national interest to play a constructive role in helping defuse the recent rise in tensions and to help derive from the tragic attacks in Mumbai an opportunity for further cooperation between three of America's crucial allies.

FUTURE OF NATO

Question. What are the greatest challenges and opportunities that you foresee for NATO over the next 5 years?

Answer. The United States has enormous stakes in a strong, mutually supportive NATO alliance, and both the President-elect and the Secretary of Defense have stressed their strong desire to rebuild and adapt transatlantic security relationships to meet 21st century security challenges. Over the next 5 years, top-tier NATO-related challenges include, first and foremost, achieving durable progress on Afghanistan, while also developing a common approach toward managing relations with Russia, improving the prospects for unity-of-action between NATO and the European Union (EU), and finding common ground across the alliance on emerging threats and opportunities.

Question. Do you envision further enlargement of NATO, beyond Albania and Croatia, within the next 5 years?

Answer. The President-elect has stated that NATO enlargement should continue so long as new candidates are democratic, peaceful, and willing to contribute to common security. Precisely which countries and within what applicable timeframe NATO would undertake further enlargement are important questions which the new administration will need to address in close consultation with Congress and our allies. It is important that each NATO aspirant should be judged on its individual merits and progress in implementing political, economic, and military reforms.

Question. What more can the United States do to encourage NATO members to develop the capabilities and provide the resources necessary to carry out NATO missions in Afghanistan and elsewhere?

Answer. While the President-elect and Secretary Gates have both stressed the need for the United States to invest more in its non-military instruments of national power, many of our NATO allies are underperforming in terms of their own investments in defense capabilities, especially when it comes to deployable expeditionary forces. Forging a shared strategic view of the emerging threat environment and updating NATO's strategic concept will be critical to encouraging NATO allies to develop the military capabilities needed now and in the future.

NATO-EU RELATIONS

Question. A challenge facing the United States and NATO in the months and years ahead is the EU's implementation of its European Security and Defense Policy (ESDP), that is, an EU capability to conduct military operations in response to international crises in cases where "NATO as a whole is not engaged." At the same time, NATO and EU are working alongside each other in addressing a number of common security challenges, including police training in Afghanistan and crisis management in Kosovo.

Are you concerned that the EU could assume a competing role, rather than a complementary role, to the NATO alliance?

Answer. Ideally, the NATO-EU relationship should be complementary. In the defense realm, NATO is going to be the preferred vehicle for negotiation whenever our European allies view the U.S. role as indispensable in responding to a shared security challenge. At the same time, the EU's great strength lies in its ability to project economic power and political influence in a way that helps to attenuate conflict. The Obama administration will need to look carefully at the relationship to ensure that competition is kept to a minimum. Moreover, because both NATO and the EU draw largely from a single pool of national capabilities, cooperation will be extremely important.

Question. What steps do you believe that the United States and NATO must take to ensure that ESDP is implemented in a way that strengthens the alliance?

Answer. Over the past several years, ESDP-related activities have grown in number and diversity, to include the EU's recently launched anti-piracy operations off the coast of Somalia. Given these trends, high priority should be given to promoting good communications and a common operating picture between the United States, its allies and partners, and EU-sponsored operations.

Question. What is your view of the future of NATO-EU relations in areas relating to security, defense, and crisis management?

Answer. Both NATO and the EU have important roles to play in meeting future security, defense, and crisis management challenges. As noted above, from an alli-

ance perspective, it will be important for DOD and U.S. interagency partners to take a clear-eyed view of the entire range of current EU-activities—from civilian policing, to military, border control or other missions—to identify both areas of duplication and where closer coordination may be required.

ENGAGEMENT POLICY

Question. One of the central pillars of our national security strategy has been military engagement as a means of building relationships around the world. Military-to-military contacts, Joint Combined Exchange Training exercises, combatant commander exercises, humanitarian de-mining operations, and similar activities are used to achieve this goal.

If confirmed, would you support continued engagement activities of the U.S. military? If yes, would you advocate for expanding U.S. military-to-military engagement? If not, why not?

Answer. If confirmed, I will support continued U.S. military-to-military engagement. I believe the current and emerging security environment will require robust engagement with the militaries of our partners and allies around the world, and building productive relationships with many states in which our past military-to-military engagements have been limited or absent entirely.

Question. Do you believe that these activities contribute to U.S. national security?

Answer. Yes. I believe military-to-military contacts contribute to U.S. national security in a variety of important ways. Such activities can build capacity among partner nations to participate in coalition operations to counterterrorism and other transnational threats, potentially relieving stress on U.S. forces. They can help harmonize nations' views of common security challenges. Military-to-military activities can also help sustain investments made by other U.S. assistance programs. Finally, when performed effectively, military-to-military activities should show by example how military forces can act effectively while respecting human rights and civilian control. If confirmed, I intend to help ensure that our engagement activities remain at the forefront of our planning and strategy development processes.

STABILITY OPERATIONS

Question. Experience in Iraq has underscored the importance of planning and training to prepare for the conduct and support of stability operations in post-conflict situations.

In your view, what is the appropriate relationship between DOD and other departments of government in the planning and conduct of stability and support operations in a post-conflict environment?

Answer. In stabilizing post-conflict environments, success depends upon the integrated efforts of both civilian and military organizations in all phases of an operation, from planning through execution. Ideally, civilian agencies should lead in areas such as fostering political reconciliation, building accountable institutions of government, restoring public infrastructure, and reviving economic activity. Military forces, in turn, are best suited to help provide a safe and secure environment and to assist in building accountable armed forces. The U.S. military has learned many hard lessons in this area over the past several years, and if confirmed, I will work closely with Secretary Gates, military leaders, and other U.S. Government agencies to ensure we have the capabilities we need to execute these challenging missions.

Question. What lessons do you believe the Department has learned from the experience of planning and training for post-conflict operations in Iraq?

Answer. One of the most important lessons is that 21st century conflict will occur along the entire spectrum of conflict. That is, the military cannot be prepared only for combat. They must plan and train with their civilian counterparts and be prepared to operate effectively in all phases of conflict. That said, the military should also be prepared to undertake critical non-military tasks when civilian agencies cannot operate effectively, either due to the security environment or due to lack of capacity. Indeed, the need for greater capabilities and capacity in civilian agencies has been a recurring lesson for the entire government. Finally, we need to obtain better situational awareness of the underlying drivers—political, cultural, and economic—instability and conflict so as to ensure that our actions will meet our objectives and not trigger unintended consequences.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations. These include the global train-and-equip authority (section 1206) and the security and stabilization assistance authority (section 1207).

In your view, what are our strategic objectives in building the capacities of partner nations?

Answer. One of the greatest threats to international security is the violence that is sparked when human security needs are not met by governments. This creates space for terrorists, insurgents, and other spoilers to operate and, as the September 11 attacks demonstrated, to threaten the United States and its allies. The goal, therefore, is to close this space through efforts that strengthen bilateral relationships; increase U.S. access and influence; promote militaries that respect human rights; civilian control of the military and the rule of law; and build capacity for common security objectives. In addition to promoting regional and global security, enhanced partner capacity reduces the risk of future military interventions and reduces stress on U.S. Armed Forces.

Question. What is your understanding of the purpose of the section 1206 global train-and-equip authority? What is your assessment of the implementation of the global train-and-equip program?

Answer. My understanding is that section 1206 is intended to provide a quicker, more targeted ability to build partner capacity in critical regions than the more traditional routes of security assistance. Under law, it has two discrete purposes: to build a partner's national military or maritime security forces' capacity either to (1) conduct counterterrorism operations or (2) conduct or support stability operations where U.S. forces are participating. I have not been involved in section 1206 implementation, but I understand that the program has enthusiastic support from embassies and combatant commands and reflects a close collaboration between State and DOD who work together in a "dual key" process to approve funding allocations. If confirmed, I will assist the Secretary in fully assessing how well this authority is working and whether it meets congressional intent.

Question. What is the relationship of the global train-and-equip authority to other security assistance authorities, such as counternarcotics assistance and foreign military financing? What should be done to ensure that the global train-and-equip authority does not duplicate the efforts of these other assistance programs?

Answer. The Departments of State and Defense need to work together very closely to avoid duplication of effort among these important activities. The Global Train-and-Equip authority fills two specific legal requirements (to build capacity for counterterrorism and for stability operations where U.S. forces are a participant). Foreign Military Financing serves a broader set of diplomatic and foreign policy objectives such as improving bilateral relations, encouraging behavior in the U.S. interest, increasing access and influence, and building capacity particularly where host-nation and U.S. interests align.

Counternarcotics authorities are focused on providing DOD the ability to support U.S. or other government efforts to counter the flow of narcotics globally. If confirmed, I will support any interagency assessment of potential overlaps and work to ensure DOD programs are focused on supporting U.S. and other agency efforts to counter the flow of narcotics.

Question. What is your understanding of the purpose of the security and stabilization assistance authority (section 1207)? What is your assessment of how this authority has been utilized?

Answer. Section 1207 was, as I understand it, designed to help the State Department's Coordinator for Reconstruction and Stabilization to become operational. It facilitates security, stabilization, and reconstruction missions—bringing civilian expertise to bear alongside or in lieu of U.S. military forces. If confirmed, I will monitor this effort closely.

Question. Secretary Gates has called for an expansion of the Government's resources devoted to instruments of non-military soft power—civilian expertise in reconstruction, development, and governance.

Do you agree with Secretary Gates that there is a need to expand the Government's resources devoted to the ability of civilian departments and agencies to engage, assist, and communicate with partner nations?

Answer. Absolutely. The President-elect and Secretary Gates have both made clear their strong desire to see more robust non-military instruments of national power. Congress has the authority to expand significantly the Government's soft-power resources and U.S. civilian agency capacity. If confirmed, I will certainly make it my priority to assist in this effort.

Question. In your view, what should be the role of the DOD, vis-à-vis other civilian departments and agencies of the Government, in the exercise of instruments of soft power?

Answer. Generally, the Department's role should be to support, not lead, in the exercise of soft power. But DOD plays a vital role in helping to promote—through the full gamut of planning effort, exchanges, exercises, operations, and bilateral de-

fense relationships—the conditions that enable these instruments to be applied with maximum beneficial effect.

Question. Which department should have the lead in setting U.S. Government security assistance policy, the Department of State or DOD?

Answer. The State Department should retain the overall lead in setting our foreign policy and foreign assistance priorities broadly, including security assistance. Still, DOD has critical roles to play in informing, developing, and implementing agreed programs in an effective and timely manner. Strong and close working relationships between DOD, the State Department, and other U.S. agencies are critical.

RUSSIA

Question. What is your assessment of the current U.S.-Russian security relationship?

Answer. Russia's more aggressive external behavior—combined with its retreat from democracy and openness at home—is a source of deep concern. Of greatest concern, clearly, is a growing pattern of Russian pressures on, and, in some cases, aggressive action against the sovereign states located on its immediate borders, most notably Georgia. Russia's standing in the international community has declined as a result of its threatening behavior, and the U.S.-Russia security relationship has become much more difficult to manage as a result. That said, as Secretary Gates has noted, Russia's military capacity remains a shadow of its Soviet predecessor, and a combination of adverse economic and demographic trends are not likely to change that picture dramatically in the foreseeable future.

Question. What do you believe are appropriate objectives for U.S.-Russian security relations, and what do you believe are the areas of common interest between the United States and Russia in the security sphere?

Answer. As the President-elect has stressed, it is in no one's interest to see our relations return to a Cold War posture. Our interests clearly overlap in areas such as non-proliferation, counterterrorism, Afghanistan, and counternarcotics. Ultimately, I believe we should work to create the conditions that make clear that stable, democratic neighbors on Russia's borders are in Russia's own interest. We need to look at ways of enhancing cooperation in areas such as preventing WMD terrorism, where coordinated action is critical.

Question. In your view, what policy steps should DOD take to improve relations with Russia? For instance, would you support increased military-to-military relations and exchanges with Russia?

Answer. Yes, when it is in our interest to do so, and in close coordination with the State Department. If confirmed, I will make it a priority to assess areas where greater military-to-military and other exchanges with Russia might be beneficial. It is certainly important for U.S. security interests that we work to keep our lines of communication open.

Question. Would you support any joint development or other programs with Russia?

Answer. I am not prepared at this stage to offer any specific recommendations on this issue. If confirmed, I will study the issue closely and consult with interested members of this committee.

IRAN

Question. Do you believe it would be in the United States' interest to engage Iran in a direct dialogue to promote regional stability and security?

Answer. I support the President-elect's view that the United States should be willing to engage with all nations, friend or foe, and with careful preparation, to pursue direct diplomacy. Furthermore, I fully support the President-elect's view that we should not take any options off the table, but that we should employ tough diplomacy, backed by real incentives and pressures, to prevent Iran from acquiring nuclear weapons and end their support of terrorist organizations such as Hezbollah.

Question. Do you believe it would be in the United States' interest to engage Iran in a direct dialogue regarding the narcotics problem in Afghanistan?

Answer. This issue should be examined as part of a broader interagency policy review on Iran.

Question. What more do you believe the United States and the international community could be doing to dissuade Iran from pursuing a nuclear weapons program? Specifically, what actions do you believe that DOD should undertake to support diplomatic efforts to dissuade Iran from pursuing a nuclear weapon?

Answer. The United States has not yet brought to bear all the elements of statecraft to deal with this issue. The use of tough, direct, and principled diplomacy, working with our other international partners and allies, can increase the chances

of making useful inroads. Setting the conditions in the region is critical. DOD should therefore continue developing the ongoing multilateral cooperation with the Gulf Cooperation Council countries and other allies in the region, in support of the State Department's diplomatic initiatives.

SYRIA

Question. Do you believe it would be in the United States' interest to engage Syria in a direct dialogue regarding regional security and stability?

Answer. The Department of State should take the lead on any diplomatic initiatives with Syria. I agree with the President-elect's view that Syria is best engaged in the context of an aggressive regional diplomatic approach on the question of Iraq. Syria has a great and growing interest in ensuring that the large population of Iraqi refugees within its borders eventually returns home. I would hope that this topic would be examined when the new administration comes into office.

SAUDI ARABIA

Question. What is your assessment of the current state of U.S.-Saudi bilateral relations and defense cooperation activities? What changes, if any, would you recommend in this relationship?

Answer. Saudi Arabia is an important ally of the United States. The United States and Saudi Arabia have a close defense relationship and extensive security assistance programs. If confirmed, I look forward to assessing ongoing cooperation activities and identifying ways to sustain this important relationship.

Question. What is the future of U.S.-Saudi security cooperation, including training programs such as the Saudi Arabian National Guard Modernization program? What other types of military or security cooperation do you envision advocating?

Answer. I have not been briefed on the details of current or prospective security cooperation programs with the Kingdom. If confirmed, I will consider and evaluate the full range of possible initiatives to support this relationship.

CHINA

Question. China is viewed by some in the United States as a potential threat and by others as a potential constructive international partner that should be welcomed and integrated into the international economic and political community.

To what extent do you believe the policies and actions of the United States and other major regional and international actors will affect the direction in which China develops, and the extent to which it becomes a cooperative partner or a competitor of the United States?

Answer. China's sustained rise over the past decade is due in no small measure to its progressive integration into the global economy. For this reason, I believe that the United States and other countries can have positive influence on the direction of China's development. Indeed, no country has done more to assist, facilitate, and encourage China's development and international integration than the United States. However, U.S. policy and actions, or those of any country or group of countries, cannot alone determine China's future. Ultimately, it is the Chinese who will determine China's future.

Furthermore, as Secretary Gates noted in a recent speech, "China is a competitor but not necessarily an adversary, and there is no reason for China to become an adversary." If confirmed, I would seek to encourage China to play a responsible and constructive role in the international community and to encourage Beijing to view this role as the best choice for their own strategic interests, as well as ours.

Question. What do you see as the impact of the current global economic crisis on stability and security in China specifically, and in the region generally?

Answer. It is too early to gauge the full impact of the global economic crisis upon China and stability in the Asia-Pacific region more broadly. But those who manage defense and security issues must be attentive to the security-economic interconnections and be prepared to work together with colleagues in economic and diplomatic fields, both to guard against negative outcomes and also to seek positive ways forward where they may exist.

Question. What do you believe are China's political-military objectives regarding Taiwan, the Asia-Pacific region, and globally?

Answer. Broadly, the overriding objectives of China's leaders appear to be to ensure the continued rule of the Chinese Communist Party, continue China's economic development, maintain the country's domestic political stability, defend China's national sovereignty and territorial integrity, and secure China's status as a great power. Within this context, preventing any moves by Taipei toward de jure independence is a key part of Beijing's strategy. Within each dimension there lies a mix

of important challenges and opportunities for the United States that will continue to deserve priority attention.

Question. What is your view of the U.S. policy of selling military equipment to Taiwan, despite China's objections?

Answer. U.S. policy on arms sales to Taiwan is based on the 1979 Taiwan Relations Act, which provides that the United States will make available to Taiwan defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability. That policy has contributed to peace and stability in the region for nearly 30 years and is consistent with the long-standing U.S. calls for peaceful resolution of the Taiwan issue in a manner acceptable to the people on both sides of the Taiwan Strait. If confirmed, I would work closely with Congress and our interagency partners to ensure the continued effective implementation of this longstanding policy.

Question. How do you believe the United States should respond to China's military modernization program?

Answer. The pace and scale of Chinese modernization, coupled with the lack of transparency surrounding both capabilities and intentions, are a source of concern for the United States as well as for its allies and the region more broadly. An appropriate U.S. response would include efforts to fully comprehend the future direction of China's programs, active engagement to reduce the potential for miscalculations and to manage unwanted competition, and, finally, defense preparedness to ensure we retain our edge in areas that are critical to achieving specific operational objectives. If confirmed, I would seek to ensure that DOD places a high priority on this issue and would consult closely with committee members on appropriate U.S. responses.

Question. In its 2008 Report to Congress, the U.S.-China Economic and Security Review Commission concluded that China is asserting various excessive claims of sovereignty relating to maritime, air, and space, and also concluded that these claims have negative implications for the United States. Further, the Commission concluded that more must be done to ensure that China's rapid expansion of nuclear power does not result in the decline in safety or an increase in proliferation of nuclear weapons technology or expertise.

How should the United States respond to excessive claims of sovereignty by China?

Answer. I appreciate that China's claims of sovereignty are controversial and detract from regional stability. The United States has a longstanding policy on Freedom of Navigation and does not acquiesce to excessive maritime claims that restrict navigation and over-flight rights under customary international law, as reflected in the U.N. Convention on the Law of the Sea. If confirmed, I would work closely with the Department of State, and as appropriate with other countries that have a stake in this issue, on developing a common understanding of and collaborative approaches to these issues.

Question. What is the role of DOD in helping to ensure that China does not contribute to the proliferation of nuclear weapons or weapons technology in the region?

Answer. DOD should continue to support interagency efforts to prevent the proliferation of WMD and delivery systems, along with related technologies and materials, including with respect to China.

Question. Our current military-to-military relations with the Chinese have been described by defense officials as "modest."

Do you believe that we should make any changes in the quality or quantity of our military relations with China? If so, what changes and why?

Answer. More can be done to improve the U.S.-China military-to-military relationship, both in terms of the quality and the quantity of exchanges between the Armed Forces of our countries. If confirmed, I would look closely at exchanges with the Chinese armed forces at all levels and across a range of issues, including the recently opened dialogue on nuclear policy and strategy, which I understand is a priority for Secretary Gates. If confirmed, I look to engage in a wide range of areas where we can encourage China to act responsibly both regionally and globally.

Question. Is legislation needed to effect these changes?

Answer. I do not know. If confirmed, I would carefully monitor developments in the U.S.-China military-to-military relationship and consult with Congress on these issues.

NORTH KOREA

Question. What is your assessment of the current security situation on the Korean peninsula and the diplomatic efforts to date to persuade North Korea to verifiably dismantle its nuclear weapons program?

Answer. North Korea's conventional military, WMD and proliferation activities pose a significant threat to regional peace and security. Working with our allies and other key parties in the region on diplomatic solutions is an essential element in addressing the totality of the security problem on the Korean peninsula. Likewise, it is essential to maintain the capabilities to deter North Korea's military threat and proliferation activities. Our strong alliances with South Korea and Japan remain instrumental in this regard. These alliances help maintain the peace and stability that has allowed the wider East Asia region and U.S. interests there to prosper over the past several decades. If confirmed, I would work with my military and inter-agency colleagues to strengthen these alliance relationships and U.S. efforts to address the problems posed by North Korea. The United States must continue to provide strong leadership to ensure the full implementation of the recent agreement in North Korea. North Korea must dismantle its nuclear weapons program and confirm the full extent of its past plutonium production and uranium enrichment activities.

Question. What is your assessment of the threat posed to the United States and its allies by North Korea's ballistic missile and WMD capabilities and the export of those capabilities? In your view, how should DOD forces be sized, trained, and equipped to deal with this threat?

Answer. North Korea missile and WMD programs pose a serious threat to the United States, the rest of Asia, and the world. Strong alliances, regional partnerships and forward military presence remain key means to deal with these threats. U.S. national capabilities are also an essential element in deterring the threat and defending our interests. Additionally, in the event of a DPRK collapse, the U.S. would need the capabilities to work closely with the Republic of Korea (ROK) to rapidly and safely secure nuclear weapons and materials. If confirmed, I would work closely with the Chairman of the Joint Chiefs of Staff, senior military commanders and members of this committee to ensure that the U.S. military has the capabilities needed to deal with the range of threats North Korea poses and that our contingency planning is adaptive and responsive.

Question. In your view, what should be done to maintain or strengthen deterrence on the Korean peninsula?

Answer. Maintaining a strong alliance between the United States and the ROK remains central to effective deterrence on the Peninsula. Our alliance with Japan is likewise a critical factor in security and stability in the wider Asia-Pacific region, including on the Peninsula. If confirmed, I would work hard to continue strengthening these alliances.

Question. With recent speculation regarding the possible poor health of North Korean leader Kim Jong-il, what do you believe the United States should be doing now to prepare for the possibility of a change in leadership in North Korea?

Answer. The unexpected, with its attendant opportunities and challenges, can take different forms, including a sudden health crisis or change in leadership in North Korea. If confirmed, I look forward to consulting with this committee about the range of potential challenges we face and ensuring that we are capable of addressing these contingencies. I believe our focus should be ensuring we are ready to maintain stability in the region, defend the ROK, and prevent the proliferation of WMD or other dangerous technologies from the DPRK.

Question. If confirmed, would you undertake a review of the status of the efforts to obtain from North Korea remains of U.S. service men missing from the Korean War and specifically address under what circumstances such efforts could resume?

Answer. Yes.

REPUBLIC OF KOREA

Question. Since the end of World War II, the alliance between the United States and the ROK has been a key pillar of security in the Asia Pacific region. This relationship has gone through periods of inevitable change.

What is your understanding and assessment of the current U.S. security relationship with the ROK?

Answer. Over a half-century old, the alliance remains strong and reflects the common values and aspirations of the Korean and American people. The alliance continues to ensure peace and stability on the Korean Peninsula and in Northeast Asia. As the regional security environment has evolved over time, the U.S. and the ROK have made great strides in transforming their collective deterrent and defense posture. In particular, the ROK has made major strides in developing its defense capabilities, commensurate with its economic development. Consequently, the Alliance remains relevant and capable both for deterring aggression on the peninsula and for addressing regional and global security issues. If confirmed, I would work to con-

tinue the positive development of this key U.S. security relationship and would hope to work with the committee to that end.

Question. If confirmed, what measures, if any, would you take to improve the U.S.-ROK security relationship?

Answer. If confirmed, I would work with Congress, the Joint Staff, and others to complete the realignment of U.S. forces on the Korean peninsula and return facilities our forces no longer require. I would also work to ensure that our command and control relationships with Korea and our contingency plans remain appropriate to the situations we face. Additionally, I believe it is important to ensure the U.S. and Korean publics continue to understand the enduring mutual benefits derived from this alliance.

Question. What is your view regarding the planned timing of the transfer of wartime operational command to the ROK?

Answer. As Secretary Gates said following his meeting with the Korean Minister of Defense last October, the ROK military forces and U.S. forces are on track to complete the alliance agreement to transition wartime operational control in 2012. This effort will enable the ROK military to take the lead role in the defense of Korea. If confirmed, I will work with the Secretary, this committee, and others to ensure that the important transition in command relationships is carried out in a manner that strengthens deterrence and maintains a fully capable U.S.-ROK combined defense posture on the Korean Peninsula.

U.S. AFRICA COMMAND

Question. On October 1, 2008, U.S. Africa Command (AFRICOM) was authorized Unified Command status. The creation of AFRICOM has raised questions about the role of DOD in U.S. development efforts.

What do you see as the role of AFRICOM in U.S. African policy and in economic development and humanitarian engagement?

Answer. The Department of State and USAID lead U.S. foreign policy and development engagements abroad, to include Africa. President-elect Obama has argued that AFRICOM should promote a more united and coordinated engagement plan for Africa. Ideally, AFRICOM's supporting role should be to promote national security objectives by working with African states, regional organizations, and the African Union to enhance stability and security in the region. In particular, AFRICOM should work to forge closer U.S. military-to-military relations with states on the African continent. If confirmed, my intent would be to work closely with State, USAID, other agencies and Congress to ensure that AFRICOM's roles and missions support U.S. foreign policy and national security objectives and are transparent.

Question. AFRICOM's leadership has promoted the concept of "active security," with an increased emphasis on theater security cooperation, as a guiding principle of the command.

Are DOD's current security assistance authorities and funding levels adequate to fulfill AFRICOM's mission? If yes, please explain. If not, why not?

Answer. I am not in a position to render a definitive judgment on this important question. I will, if confirmed, study the matter and, if changes are needed, provide views to Secretary Gates and the members of this committee.

Question. The Combined Joint Task Force-Horn of Africa (CJTF-HOA) mission appears to have shifted from counterterrorism to civil and humanitarian affairs since its inception in 2002.

What do you see as CJTF-HOA's primary mission?

Answer. It is my understanding that the CJTF-HOA is designed to support the State Department's and DOD's security strategy in Africa to counterterrorism, in part through building partner capacity and promoting regional stability.

Question. Do you believe it should continue as an enduring presence? If yes, what recommendations might you make regarding manpower, resources, and activities?

Answer. If confirmed, I will work closely with the Joint Staff and AFRICOM to assess the question of CJTF-HOA's duration and to ensure that U.S. security interests in the region are supported by an appropriate, right-sized and properly resourced posture to promote long-term stability in the region.

DARFUR

Question. More than 4 years after then-Secretary of State Powell's declaration that genocide was taking place in Darfur, the death toll has climbed still higher, the camps for displaced persons have grown more crowded, and humanitarian access to help people in need has diminished in many areas. The United Nations has pledged to send 26,000 peacekeepers to Darfur, but has sent less than half that

number and has not provided them with the helicopters, vehicles, and other tools to fulfill their mission.

What do you believe is the appropriate role of the United States and, in particular, DOD, in assisting with the deployment and mobility of this peacekeeping mission, given that its creation was largely a U.S. initiative and today is largely funded by a variety of U.S. assistance programs?

Answer. I agree with the President-elect's statements about the need to bring pressure to bear on Sudanese authorities in Khartoum to halt the genocide in Darfur. The U.N. has two major peacekeeping missions in Sudan that seek to create a secure environment conducive to a political settlement of the cultural, ethnic, and religious differences that divide Sudan's periphery from the center. I understand that the Departments of State and Defense have supported the deployment of African contingents to the U.N. Darfur mission by providing personnel, training, equipment, logistical expertise, deployment assistance, and, when required, airlift. If confirmed, I will look closely at what additional support DOD could reasonably provide in this area if so directed by the President-elect.

UNITED NATIONS PEACEKEEPING

Question. DOD has provided logistics, communications, and headquarters staff to a variety of U.N. peacekeeping missions over the past several years.

In your view, what support, if any, should DOD provide to U.N. peacekeeping missions?

Answer. From Haiti to Liberia, Lebanon and other venues, the United States has important stakes in the success of U.N. peacekeeping operations. In addition to logistics, communications, and headquarters staff-related assistance, the issue of DOD help for U.N. field missions should be studied closely and in close consultation with other U.N. member states.

Question. The United States sponsored along with its partners in the G-8 an initiative to train 75,000 peacekeepers by 2010. This program, known as the Global Peace Operations Initiative (GPOI), is run by the Department of State. DOD has provided varying degrees of support since the program's inception.

In your view, what is the appropriate role of DOD in this program and, more generally, in the training of peacekeepers?

Answer. DOD plays an important role in bringing its expertise to bear in the training and equipping of peacekeeping units. DOD collaboration with State is important to successfully identifying and vetting viable partners, analyzing indigenous capacities, developing sustainable train-the-trainer programs, and promoting self-sufficiency in this critical area so that more nations can more effectively contribute to the increasing demand for skilled peacekeepers around the world.

Question. As the GPOI program approaches its scheduled end date (i.e. 2010), would you support or oppose an extension of the program and its mandate? Please explain.

Answer. President-elect Obama has stated his support for continued funding for GPOI. In general, I believe the United States has a strong interest in effective training that expands the pool of available peacekeepers worldwide, including those with whom we may need to operate jointly. If confirmed, my intent would be to work closely with State Department colleagues as well as Members of Congress to ensure GPOI supports the President-elect's objectives in this area.

SOMALIA

Question. In your view, what should be the U.S. policy towards Somalia and what do you believe to be the appropriate role of DOD in support of that policy?

Answer. Somalia's political turmoil and violence pose the continued specter of humanitarian suffering as well as offering a sanctuary to violent extremists and, more recently, a haven for pirates. Instability in Somalia is a threat to the region and potentially to the United States and our allies. If confirmed, I will work with the interagency to develop a coordinated U.S. national security policy toward Africa that addresses the U.S. strategic interests in the Horn of Africa, and to determine how DOD can and should best support this policy.

COMBATING TERRORISM

Question. What is your understanding and assessment of the Department's comprehensive strategy for combating terrorism, both at home and abroad?

Answer. As I understand it, the Department's strategy for combating terrorism has three primary elements: protecting the homeland, disrupting and attacking terrorist networks, and countering ideological support for terrorism. The strategy includes indirect approaches aimed at building the capacity of partner governments

and their security forces as well as direct approaches to defeat terrorist networks. Consistent with existing law, the Department's role within the United States is limited to providing support to civil authorities.

I believe the United States needs a more comprehensive strategy for combating terrorism—an integrated whole-of-government effort that brings all elements of national power to bear effectively against this threat and fully engages allies and international organizations. If confirmed, I will work with the Chairman and the Joint Chiefs of Staff, the combatant commanders, and my interagency colleagues to undertake a review and assessment of our strategy to ensure it meets the goals of the President-elect and the Secretary of Defense.

Question. How can the Department best structure itself to ensure that all forms of terrorism are effectively confronted?

Answer. I am not in a position to recommend changes in structure for this specific problem-set at this time. If confirmed, I look forward to evaluating the Department's structure vis-à-vis a whole-of-government strategy as discussed above and will do my utmost to ensure that we are organized properly to combat all forms of terrorism.

Question. What changes, if any, would you recommend to the Defense Intelligence Community to ensure optimal support to combating terrorism and other homeland security efforts?

Answer. Timely and accurate intelligence is a vital part of U.S. efforts against terrorism. If confirmed, I will continue the close relationship Policy has with the Under Secretary of Defense for Intelligence and the Intelligence Community to ensure intelligence and operations are mutually supportive.

Question. Are there steps the Department should take to better coordinate its efforts to combat terrorism with those of other Federal agencies?

Answer. Yes. If confirmed, I look forward to collaborating with members of the National Security Council, National Counterterrorism Center, and others in a whole-of-government approach to combating terrorism.

Question. The Department and Intelligence Community have determined that some terrorist organizations are beginning to rely more heavily on producing and trafficking narcotics to fund their operations.

Do you believe DOD should have the lead for the U.S. Government's efforts to combat the nexus between narcotics and terrorism? If not, who should have the lead?

Answer. The nexus between narcotics and terrorism is a serious challenge. This requires an integrated interagency approach, of which DOD is an integral part. DOD brings important tools and global capabilities to interagency efforts to counter networks that support both terrorist and international criminal organizations. If confirmed, I will review the DOD role in combating this nexus and coordinate with the other elements of the U.S. Government to determine the best way ahead.

WAR ON DRUGS

Question. DOD serves as the single lead agency for the detection and monitoring of aerial and maritime foreign shipments of drugs flowing toward the United States.

What is your assessment of the ongoing efforts of the United States to significantly reduce the amount of drugs illegally entering into our Nation?

Answer. Drug trafficking—and the increasing link to terrorism in many places—is a formidable threat that challenges our Nation as well as our friends such as Mexico and Afghanistan. Drug traffickers can acquire the latest technology and corrupt governments around the world facilitate the trade. Although we have made significant progress in coordinating efforts across multiple agencies to counter this threat, there is more to be done. If confirmed, I will work with my interagency colleagues to assess the U.S. Government's efforts to date and craft a strategic way forward.

Question. In your view, what is the appropriate role of DOD in U.S. counterdrug efforts?

Answer. The Department's global focus, organization, capabilities, and its ability to act as an honest broker complement law enforcement goals and make it an effective actor in counterdrug efforts. DOD brings important tools and global capabilities to interagency efforts to counter both terrorist and international criminal networks.

Question. The international community has detected a new narcotics trafficking route from Columbia to Europe via West Africa.

In your view, what should be the role of the United States in countering the flow of narcotics to nations other than the United States?

Answer. Clearly the transnational flow of narcotics is a global issue and cannot be addressed separately by individual nations around the world. The United States

should work with allies and international organizations to counter the trans-national flow of narcotics through coordinated and strategic civil-military efforts.

COLOMBIA

Question. Success in suppressing violence in Colombia has been credited to U.S. assistance to support Plan Colombia and to the growth of the Colombian economy, which spread wealth to a larger portion of the population. Over the past 2 years, there has been a debate about the most effective balance of U.S. assistance to continue to build on this success. Much of the U.S. assistance to Colombia over the past 5 years would be characterized as hard-side security assistance (such as weapons, aircraft, and necessary training), but some argue hard-side assistance should now be decreased significantly and a more robust development plan should be implemented.

In your view, what is the most appropriate strategy for U.S. engagement (including “soft” support) vis-à-vis Colombia?

Answer. In principle, where a threat has been diminished, external support should be able to transition from a heavily military posture to a greater focus on promoting enduring stability through soft-power engagement. Congress has already begun a phased reduction of assistance reflecting their assessment that Colombian security forces are capable of pressing rebels and paramilitary groups to demobilize. If confirmed, I will work with my interagency colleagues—and the Colombians—to assess the progress of Plan Colombia and support a comprehensive civilian-military strategy for enduring stability.

SPACE POSTURE REVIEW

Question. If confirmed, what role will you play in the Space Posture Review?

Answer. The Space Posture Review is a joint review to be conducted by the Secretary of Defense and the Director of National Intelligence intended to clarify the national security space policy and strategy of the United States. In this regard, if I am confirmed, I will play a leading role in working with the Office of the Director of National Intelligence and others to conduct the review and respond to the congressional tasking.

NUCLEAR POSTURE REVIEW

Question. If confirmed, what role will you play in the NPR?

Answer. If confirmed as USD(P), I would oversee the NPR. I consider this basket of issues one of the most important long-term challenges we face—how to support the President-elect’s ultimate goal of eliminating nuclear weapons worldwide while ensuring that America retains a robust nuclear deterrent that is sufficient to the threats we face. I would expect to engage other senior officials in DOD, as well as officials in the Departments of Energy and State, in this review and to consult fully with members of this committee.

NUCLEAR WEAPONS COUNCIL

Question. The USD(P) is a member of the Nuclear Weapons Council (NWC). What are the significant issues that the NWC should/will take up in the coming years?

Answer. In my view, the most important immediate issue before the NWC is ensuring a credible U.S. nuclear deterrent that is safe, secure, and reliable. In the near term, this includes sustaining a viable nuclear stockpile and a weapons complex capable of supporting the stockpile, both of which are appropriately sized for the 21st century.

Question. Do you believe that the NWC should have a role in addressing lapses in attention to nuclear matters, which have resulted in a number of serious problems, particularly in the Air Force?

Answer. The NWC has oversight for a variety of matters, including nuclear safety, security, and control issues. I believe we must demand the highest standards of stewardship for nuclear weapons. If confirmed, I will give these important responsibilities the attention they deserve through my participation on the NWC as well as other related fora.

Question. If confirmed, would you commit to active personal participation in NWC matters?

Answer. Yes.

COOPERATIVE THREAT REDUCTION PROGRAM

Question. Do you think the CTR program is well-coordinated among the U.S. Government agencies that engage in threat reduction efforts in Russia, e.g., DOD, the State Department, and the Department of Energy?

Answer. The President-elect has expressed his concern about the need to break bureaucratic logjams that have slowed the progress of CTR and other threat reduction programs, and if confirmed, I will give this matter the urgent attention it deserves.

Question. The CTR program was recently expanded to geographic areas outside the former Soviet Union.

What, in your view, are the key proliferation concerns that CTR should address outside the former Soviet Union? Please explain.

Answer. The congressional initiative to expand the geographic reach of the Nunn-Lugar CTR program beyond the former Soviet Union strikes me as an important step toward reducing WMD threats and building global partnerships. I am aware that recent bipartisan reports, including the report from the Commission on the Prevention of Weapons of Mass Destruction, Proliferation and Terrorism, have stressed the importance of reducing nuclear threats wherever possible and highlight bioterrorism as a key proliferation concern demanding greater attention. If confirmed, I will work closely with Congress, other U.S. Government agencies, and global partners to strengthen our efforts to prevent WMD proliferation and terrorism.

Question. CTR has completed or will soon complete the bulk of the scheduled work with Russia.

What, in your view, is the next step in the U.S.-Russia CTR program?

Answer. I anticipate that our CTR programs in Russia will remain a high priority for the new administration. The Nunn-Lugar CTR program represents an important and very successful relationship between our two countries which has endured even as difficulties have grown in other aspects of our relations. If confirmed, I will explore expanding this relationship and the capabilities built through CTR for mutually beneficial purposes to reduce the risks of WMD proliferation and terrorism outside of Russia.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. The United Nations Convention on the Law of the Sea (UNCLOS) is currently pending in the Senate.

What are your views on U.S. accession to UNCLOS?

Answer. Like the President-elect and the current Secretary of Defense, I strongly support U.S. accession to the Law of the Sea Convention. The United States should be at the forefront of promoting the rule of law, including in the world's oceans; by becoming a party to the Convention we send a clear signal to all nations that we are committed to advancing the rule of law at sea. Additionally under the Convention, we provide the firmest possible legal foundation for the navigational rights and freedoms needed to project power, reassure friends and deter adversaries, respond to crises, sustain combat forces in the field, and secure sea and air lines of communication that underpin international trade and our own economic prosperity.

Question. From a national security standpoint, what do you see as the advantages and disadvantages to being a party to UNCLOS?

Answer. Joining the Convention will give the United States a seat at the table when rights vital to our national interests are debated and interpreted, including the maritime mobility of our Armed Forces worldwide. The navigation and overflight rights and high seas freedoms codified in the Convention are essential for the global mobility of our Armed Forces and the sustainment of our combat forces overseas. America has more to gain from legal certainty and public order in the world's oceans than any other country. More than 150 nations are parties to the Convention. By becoming a party, the United States will be better positioned to work with foreign air forces, navies, and coast guards to cooperatively address the full spectrum of 21st century security challenges.

Question. In your view, is customary international law alone sufficient to safeguard U.S. navigational and overflight rights and freedoms worldwide?

Answer. I am not a legal expert, but from what I have learned from those who are, customary international law alone is not sufficient to safeguard U.S. navigational and overflight rights and freedoms. U.S. assertions of rights under customary international law carry less weight with other states than do binding treaty obligations. By its very nature, customary international law is less certain than treaties, as it is subject to the influence of changing state practice. If the United States remains outside the Convention, it will not be best positioned to interpret, apply, and protect the rights and freedoms contained in the Convention.

BILATERAL DEFENSE TRADE COOPERATION AGREEMENTS

Question. Defense trade cooperation agreements between the United States and the United Kingdom and between the United States and Australia are currently pending before the Senate Foreign Relations Committee.

What are your views on the U.S.-UK and U.S.-Australia defense trade cooperation agreements?

Answer. I have not had the opportunity to review these agreements in detail. I understand that several Senators raised a number of concerns and questions about the Treaties during the last Congress. If confirmed, I look forward to working with the Senate on any issues related to ratification.

Question. In your view, are these agreements in the national security interest of the United States?

Answer. I have not had the opportunity to review these agreements in detail. If confirmed, I will review them and be available to consult with Congress.

Question. What do you consider to be the main advantages and disadvantages of these defense trade cooperation arrangements?

Answer. See above.

ARMS CONTROL

Question. What role do you see for arms control as a means of improving U.S. national security?

Answer. Arms control has been an important element of U.S. national security policy since the Cold War, and it remains important today. Engaging other nations in a process that builds confidence, increases transparency, reduces arsenals, and enhances cooperation has been, and remains, important to our interests. Arms control negotiations can also further progress towards the long-term goal of eliminating nuclear weapons.

Question. What are your views on the next bilateral steps to address nuclear weapons issues between the United States and Russia?

Answer. High level engagement will be critical in addressing the wide variety of issues between the United States and the Russian Federation, including nuclear weapons issues. One key issue that both nations will need to address early in the new administration is the impending expiration of the Strategic Arms Reduction Treaty (START).

Question. What elements of START, if any, do you believe should be retained in any future agreement?

Answer. The most important element to retain in any future agreement is the extension of essential monitoring and verification provisions contained in the current START.

Question. In the absence of a START extension or successor treaty, what steps would you take to extend, expand, and to verify the Moscow Treaty?

Answer. If confirmed, I would initiate a prompt and detailed review to determine the best path forward with respect to START, the Moscow Treaty, and any successor agreements.

Question. What is your view of the role of the Nuclear Nonproliferation Treaty (NPT) in U.S. national security, and how should it be strengthened or improved?

Answer. The NPT is an important tool for constraining further nuclear proliferation. We should work to strengthen the Treaty by encouraging states to adhere to the NPT and to agree to IAEA safeguards inspections. I support the President-elect's view that we need to work with our allies, partners, and other nations to achieve a successful outcome in the 2010 NPT review conference. One way to strengthen the NPT regime would be to ensure that any violation automatically triggers sanctions. Others should be examined as well. I would also like to see the United States abide by our promises to reduce our nuclear stockpiles over time and to further increase the safety and security of our arsenal.

Question. Do you support a Comprehensive Test Ban Treaty (CTBT)?

Answer. Yes, I support the President-elect's view that passing the CTBT is in America's national security interest.

BALLISTIC MISSILE DEFENSE

Question. Do you agree that any ballistic missile defense systems that we deploy operationally must be operationally effective, suitable, survivable, cost-effective, affordable, and should address a credible threat?

Answer. Yes. If confirmed, I will seek to ensure that missile defense programs are prioritized in a manner that ensures that further development and deployment is pragmatic, cost-effective, and appropriate to the threats of tomorrow. I understand

that the United States currently has operationally deployed a range of sea-based and ground-based ballistic missile defense systems to protect our forward-based forces, allies, and other friendly nations against short- and medium-range missile threats and to defend the U.S. homeland against longer-range threats.

Question. Do you agree that U.S. missile defense efforts should be prioritized on providing effective defenses against existing ballistic missile threats, especially the many hundreds of short- and medium-range ballistic missiles that are currently within range of our forward-based forces, allies, and other friendly nations?

Answer. I am aware of the threats posed by short- and medium-range ballistic missiles. If confirmed, I will review our BMD programs and consult with Congress to ensure we have an appropriate mix of short-, medium-, and long-range ballistic missile defense capabilities that are responsive to existing and emerging threats to our homeland, deployed forces, allies, and other friendly nations.

Question. Do you agree that ballistic missile defense testing needs to be operationally realistic, and should include operational test and evaluation, in order to assess operational capabilities and limitations of ballistic missile defense systems, prior to making decisions to deploy such systems?

Answer. Yes. While missile defense testing is not a Policy responsibility, I agree that missile defense testing should be operationally realistic and should involve the Operational Test and Evaluation office as well as our warfighters.

Question. If the United States and Russia could agree on a cooperative approach on missile defense issues, do you believe it would be in the security interest of the United States to pursue such an effort?

Answer. Yes, although the final contours of such an approach would require close consultations between the administration and Congress. I believe that working with Russia in areas where we have common security concerns is in the interests of both of our countries. Efforts to cooperate with Russia on missile defense to address the risk of ballistic missile and WMD proliferation go back to the 1990s during the Clinton administration. I understand that in recent years, the United States has continued to explore missile defense cooperation with Russia. If confirmed, I will review the recent efforts, consult with colleagues and the State Department, and help recommend an appropriate course of action.

CHEMICAL WEAPONS ELIMINATION AND THE CHEMICAL WEAPONS CONVENTIONS

Question. Do you agree that the United States should make every effort to meet its treaty obligations, including its obligations under the Chemical Weapons Convention (CWC)?

Answer. Yes. As a signatory to the CWC, the United States is obligated to destroy its chemical weapons stockpile by April 29, 2012. The United States also has a congressional mandate to destroy its stockpile by April 29, 2012, but not later than December 31, 2017.

Question. Do you agree that the Department should plan and budget for the most expeditious elimination of United States chemical weapons stockpile, consistent with safety and security requirements, in order to complete the destruction of the U.S. chemical weapons stockpile as close to the CWC deadline as possible?

Answer. Yes, but there are competing priorities to balance. Although I have not yet examined this issue in detail, I understand that in 2006, the United States informed the Organization for the Prohibition of Chemical Weapons (OPCW) that it would not meet this deadline, but would accelerate the destruction effort as much as practical. To date, the Department is on track to destroy 90 percent of the U.S. stockpile by the CWC deadline.

Question. If confirmed, will you focus your personal attention on this matter?

Answer. If confirmed, I will look for alternative ways to accelerate the destruction of the remaining 10 percent of the stockpile.

SPACE MANAGEMENT AND ORGANIZATION

Question. What role, if any, do you believe the USD(P) should play in the establishment of a national security space policy?

Answer. I understand that the recent congressionally-directed Review and Assessment of the Organization and Management of Space in DOD has recommended the development of a National Space Strategy. If this initiative is adopted and I am confirmed, I will consult with Secretary Gates on the proper role that the USD(P) should play in the development and coordination of any such policy or strategy.

NATIONAL GUARD AND RESERVE ROLE IN HOMELAND DEFENSE

Question. There is current debate about the role the National Guard and Reserve should play in defending the homeland.

What role do you believe the National Guard and Reserve should have in defending the homeland?

Answer. Homeland defense is a total force responsibility. However, experience has shown the Nation needs to focus on better using the extensive competencies and capabilities of the National Guard and the Reserves in support of their priority missions. If confirmed, I will update my understanding of the roles, missions, and capabilities of the National Guard and the Reserves and will work to ensure that they have the equipment, training, and personnel to accomplish their missions, both at home and abroad, during this time of war.

Question. What role do you believe the Active-Duty Forces should have in defending the homeland?

Answer. As part of the Total Force, Active-Duty Forces also have important roles to play in supporting civilian authorities in homeland defense, particularly in large-scale crises when local and State responders may lack response capabilities adequate to the task. If confirmed, I will look into the roles and missions performed by each element of the Total Force to ensure that we take best advantage of their competencies to fulfill this critical obligation to protect the American people.

HOMELAND DEFENSE

Question. The Department of Homeland Security (DHS) is now responsible for homeland security, but DOD retains responsibility for homeland defense.

Answer. What do you believe are the principal roles and missions of DOD for homeland defense, and how do they relate to the roles, missions, and responsibilities of DHS?

Question. DOD and DHS have complementary and mutually supporting roles, missions, and responsibilities. DOD is responsible for defending the United States from attack upon its territory at home and securing its interests abroad. DOD executes military missions to deter, defend against, and defeat those who threaten the United States. DHS is responsible for leading the Nation's efforts to prepare for, protect against, respond to, recover from, and mitigate against the risk of natural disasters, acts of terrorism, and other manmade disasters; to secure the Nation's borders, ports, and airports; and to ensure that the Federal Government works with States, localities, and the private sector as a true partner in prevention, mitigation, and response. As necessary, and consistent with the law, DOD provides support to DHS in the execution of its missions.

REORGANIZATION OF THE OFFICE OF THE UNDER SECRETARY OF DEFENSE FOR POLICY

Question. If confirmed, what changes, if any, would you propose to the current organization of the Office of the USD(P)?

Answer. If confirmed, I would anticipate the need to shift some portfolios to better align the organization with President-elect Obama's and Secretary Gates' policy objectives. For example, we may want to consider elevating and realigning strategic portfolios such as nuclear weapons, countering WMD, space, missile defense, and cyber. We may also want to consider how best to enhance the policy role in the PPBE process, for example by elevating the strategy, planning, and force development functions. Finally, there may be an opportunity to enhance policy coordination on the issue of Afghanistan and Pakistan, which currently spans multiple ASDs. If confirmed, I would consult with the committee in detail on these ideas.

Question. Do you anticipate that any proposed changes would require changes to existing law?

Answer. No. At this point, none of these potential portfolio adjustments should require changes to existing law.

PRIVATE SECURITY CONTRACTORS

Question. Do you believe DOD and other Federal agencies should rely upon contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. I understand the concerns of Congress on this issue and believe that a comprehensive review of the role of military contractors on the battlefield is needed in order to set the terms for how they might be utilized in the future. I also agree with President-elect Obama's views on the need to improve oversight and transparency in how private security contractors are utilized and to establish clear standards regarding accountability, command and control, Rules of Engagement, and personnel policies. If confirmed, I will work with civilian and military officials of the Department and others who have primary responsibility for policy development and employment of private security contractors.

Question. In your view, has the U.S. reliance upon private security contractors to perform such functions risked undermining our defense and foreign policy objectives in Iraq?

Answer. I do believe that several high-profile incidents in Iraq involving private security contractors have harmed U.S. policy objectives in Iraq. In December 2007, DOD and the Department of State agreed on consistent procedures for use of private security contractors in Iraq; moreover, both Departments have been transitioning to greater use of local nationals wherever practical. If confirmed, I expect to work on this issue and will keep Congress informed.

Question. What steps would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. The use of security contractors in any area of combat operations must be fully coordinated among all agencies that employ them. There must be unified procedures and strong oversight for all such contractors, regardless of which U.S. agency hires them. Commanders on the ground should have the authority to restrict or redirect their operations as appropriate. I believe there must be assured legal accountability for the actions of all security contractors, not just those employed by the Defense Department.

Question. How do you believe the ongoing operations of private security contractors in Iraq are likely to be affected by the new SOFA between the United States and Iraq?

Answer. It is my understanding that since January 1, U.S. Government private security contractors no longer have immunity from host nation law. Furthermore, they must comply with host nation registration and licensing requirements. For all contractors, the SOFA has meant substantially more liaison and coordination with Iraqi authorities at all levels.

Question. Do you support the extension of the Military Extraterritorial Jurisdiction Act to private security contractors of all Federal agencies?

Answer. Yes.

CONTRACTOR PERFORMANCE OF INFORMATION OPERATIONS

Question. In October 2008, DOD announced a plan to award contracts in excess of \$300 million to U.S. contractors to conduct "information operations" through the Iraqi media. The purposes of this contract include building up Iraqi public support for the Government of Iraq and the security forces of Iraq, and undermining Iranian influence in Iraq.

What is your view of the appropriate roles of DOD and the Department of State in media campaigns to build up Iraqi public support for the government and security forces of Iraq and undermining Iranian influence in Iraq?

Answer. I have not had an opportunity to become familiar with the details of these programs, but believe they deserve careful scrutiny. If confirmed, I would expect to look into these matters and discuss them with members of the committee.

Question. What is your view on the effectiveness of information operations conducted by the United States through the Iraqi media?

Answer. See previous answer.

Question. Do you believe that it is appropriate for the United States to pay for media campaigns to build up support for the government and the security forces of Iraq at a time when the Iraqi Government has a surplus of tens of billions of dollars?

Answer. See previous answer.

Question. Do you see a risk that a DOD media campaign designed to build up support for the government and security forces of Iraq could result in the inappropriate dissemination of propaganda inside the United States through the internet and other media that cross international boundaries?

Answer. See previous answer.

Question. A spokesman for the Iraqi Government has been quoted as saying that any future DOD information operations in the Iraqi media should be a joint effort with the Iraqi Government. According to a November 7, 2008 article in the Washington Post, the spokesman stated: "We don't have a hand in all the propaganda that is being done now. It could be done much better when Iraqis have a word and Iraqis can advise."

Do you believe that DOD information operations through the Iraqi media should be conducted jointly with the Iraqis?

Answer. See previous answer.

Question. Under what circumstances do you believe that it is appropriate for the DOD to conduct information operations in a sovereign country without the participation and approval of the host country?

Answer. See previous answer.

DETAINEE TREATMENT POLICY

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the United States Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is the prohibition in the best interest of the United States? Why or why not?

Answer. I believe the prohibition on cruel, inhuman, or degrading treatment or punishment is clearly in America's best strategic interest and consistent with our values. During the long history of the Cold War, when America's way of life was challenged by a powerful competing ideology, we were ultimately successful, in part, because we held true to the best ideals and principles that sustained America as a shining beacon to millions under totalitarian rule. Power in the 21st century will stem as much from the strength and appeal of our ideas and moral principles as from our military might. If we are to defeat violent extremism, we must hold true to those ideas that make this country great, and continue to inspire the growth of freedom and tolerance around the world.

Question. Do you believe that the phrase "cruel, inhuman, or degrading treatment or punishment" has been adequately and appropriately defined for the purpose of this provision?

Answer. I have not received enough information to have an informed opinion on this question. If confirmed, I expect to work with the DOD General Counsel on this issue.

Question. If confirmed, will you take steps to ensure that all relevant DOD directives, regulations, policies, practices, and procedures fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. Yes, I will.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the DOD Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. Section 2441 of title 18, U.S.C., as amended by the Military Commissions Act of 2006, defines grave breaches of Common Article 3 of the Geneva Conventions, including torture and cruel and inhuman treatment.

In your view, does section 2441 define these terms in a manner that provides appropriate protection from abusive treatment to U.S. detainees in foreign custody and to foreign detainees in U.S. custody?

Answer. Yes. If confirmed, I expect to work with the DOD General Counsel on this issue.

Question. Do you believe that the United States has the legal authority to continue holding alleged members and supporters of al Qaeda and the Taliban as enemy combatants?

Answer. Yes, I do as a general matter, but I am not in a position to comment on specific cases.

Question. Do you believe that the Combatant Status Review Tribunals convened by the DOD to provide Guantanamo Bay, Cuba (GTMO) detainees an opportunity to contest designation as enemy combatants provide detainees with appropriate legal standards and processes?

Answer. I have not been briefed on this specific issue. If confirmed, I expect to work with the DOD General Counsel on this issue.

Question. Do you believe that the Federal courts have the procedures and capabilities needed to fairly and appropriately review the detention of enemy combatants, pursuant to habeas corpus petitions?

Answer. It is my understanding that U.S. Supreme Court recognized that some adjustment to normal habeas proceedings may be necessary in these cases and that the exact procedures to apply in these cases are still being considered by the courts.

Question. What role would you expect to play, if confirmed, in reviewing the status of GTMO detainees and determining whether the United States should continue to hold such detainees?

Answer. If confirmed as USD(P), I would provide policy advice to the Secretary of Defense regarding the closure of GTMO and the disposition of the remaining detainee population.

Question. Do you support closing the detention facility for enemy combatants at GTMO?

Answer. Yes. As both President-elect Obama and Secretary Gates have stated, the detention facility at GTMO has become a liability for the United States.

Question. In order to mitigate the risk associated with the release of GTMO detainees, do you believe DOD should establish some form of rehabilitation training for enemy combatants held at GTMO?

Answer. I understand that the efforts in Iraq to rehabilitate and reconcile detainees have been fairly successful. If confirmed as USD(P), I expect to learn more about whether such a program could be tailored appropriately and successfully implemented for the population at GTMO.

Question. What other ways could the United States use to encourage or entice our allies or other nations to accept detainees from GTMO? Would monetary support or sharing of technology for monitoring detainees be helpful inducements?

Answer. If confirmed as USD(P), I would work closely with the Office of Detainee Affairs and the State Department to seek new ways to encourage our allies and friends to assist us in transferring those detainees from GTMO who can be safely returned to their home countries or resettled in a third country when that is not possible. In some cases, financial incentives may be appropriate, and increased capacity-building may be mutually beneficial for this purpose and for broader collaborative efforts to combat terrorism.

Question. The Military Commissions Act (MCA) of 2006 authorized the trial of "alien unlawful enemy combatants" by military commission and established the procedures for such trials.

In your view, does the MCA provide appropriate legal standards and processes for the trial of alien unlawful enemy combatants?

Answer. If confirmed, I expect to review any recommendation from the DOD General Counsel and the Department of Justice about whether the MCA strikes the right balance in protecting U.S. national security interests while providing appropriate legal standards and processes for a fair and adequate hearing.

Question. Under what circumstances, if any, do you believe that it would be appropriate to use coerced testimony in the criminal trial of a detainee?

Answer. If confirmed, I would expect to review this matter with the DOD General Counsel and the Department of Justice.

Question. What role would you expect to play, if confirmed, in determining whether GTMO detainees should be tried for war crimes, and if so, in what forum?

Answer. If confirmed, it is my understanding that I would play no role in determining which specific detainees should be tried for war crimes. However, should there be a review of our options for war crimes trials, I would expect to play a role in advising the Secretary of Defense on policy matters.

Question. What role would you expect to play, if confirmed, in reviewing the MCA and developing administration recommendations for any changes that may be needed to that Act?

Answer. If confirmed, I would expect to play a role in advising the Secretary of Defense on policy options.

Question. In the past 2 years, significant changes have been made in Iraq in the way detention operations have been conducted in a counterinsurgency environment, including through the establishment of reintegration centers at theater internment facilities.

What do you consider to be the main lessons learned from the changes to detention operations in Iraq?

Answer. I visited Iraq in February and October of 2008 and was impressed by the "COIN Inside the Wire" approach taken by U.S. forces there. Particularly as we begin to transition detention operations and facilities to full Iraqi control, it is vital that we do our best to ensure that the quality of our facilities and our approach to detainee operations is maintained, as this line of operation is a critical component of successful counterinsurgency doctrine and practice. If confirmed as USD(P), I would be interested in seeing whether these counterinsurgency based programs can be tailored and applied more broadly to our detention operations elsewhere.

Question. What should be done to incorporate those lessons learned into DOD doctrine, procedures, and training for personnel involved in detention and interrogation operations?

Answer. I believe that a lot of these lessons are being captured today, and are reflected in new doctrine and directives, FM 3-24 Counterinsurgency in particular. I firmly believe that these lessons should continue to be gleaned as we continue op-

erations in Iraq and Afghanistan. To a degree perhaps unappreciated in the past, the way we treat detainees inside operational theaters is an important component of our overall strategy. If confirmed as the USD(P), I would work to ensure that these efforts continue in DOD schoolhouses, manuals, publications, and training, and that these lessons are applied as robustly as possible in all of our detention operations.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the USD(P)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JACK REED

SOCIAL SCIENCE RESEARCH

1. Senator REED. Ms. Flournoy, the office you have been nominated for has been involved in a project called “Minerva,” which seeks to invest in social science and cultural research in support of military missions and capabilities. What is your assessment of the value of social science research (cultural anthropology, sociology, et cetera) to support defense missions?

Ms. FLOURNOY. Social science research is increasingly valuable to support defense missions. To meet the varied and complex threats we face, we need to tap the breadth of cross-disciplinary expertise that is found within the social sciences.

Secretary Gates has repeatedly spoken on the consequences of failing to understand the dangers posed by insurgencies and failing states. In his recent article in Foreign Affairs, for example, he wrote that: “No one should ever neglect the psychological, cultural, political, and human dimensions of warfare.”

2. Senator REED. Ms. Flournoy, how will you work to strengthen the Department of Defense’s (DOD) in-house capabilities to perform this kind of research at our network of DOD laboratories and schools?

Ms. FLOURNOY. I have not had an opportunity to review in detail the DOD’s in-house capabilities for social science research. As such, I would envision first examining what in-house capabilities exist today and then seek to ensure that DOD professional military education institutions and research laboratories have the appropriate curriculum and relevant programs to perform this kind of research.

IMPORTANCE OF INFORMATION SHARING TO NATIONAL SECURITY

3. Senator REED. Ms. Flournoy, the September 11 attacks illustrated a fundamental failure by our Government to share information effectively in order to detect and prevent the attack by “connecting the dots.” The 9/11 Commission identified 10 lost “operational opportunities” to derail the attacks. Each involved a failure to share information between agencies. In the aftermath of the September 11 attacks, major efforts have been made to improve information sharing. Through legislation and executive orders these efforts were designed to effect a “virtual reorganization of Government” with communities of interest working on common problems across

agency boundaries and between Federal, State, and local governments, and the private sector. While we have established the necessary legal structures, I am concerned that implementation is lacking. What is your view on the importance of information sharing to our national security and what steps will you take to improve the Government's ability to share information in a trusted environment?

Ms. FLOURNOY. I believe sharing accurate, relevant, and timely information horizontally among Federal agencies, vertically among Federal, State, and local governments and the private sector, and with our international allies and friends is critical to combating terrorism and ensuring national security, and that current and emergent threats require a coordinated whole-of-government effort able to bring to bear all elements of national power. I will strive to ensure that DOD, consistent with the Intelligence Reform and Terrorism Prevention Act of 2004 and the Implementing Recommendations of the 9/11 Commission Act of 2007, is committed to the trusted sharing of information to enable all levels of government to do their part in assuring our Nation's security.

4. Senator REED. Ms. Flournoy, in the wake of September 11, Congress and President Bush put enhanced information sharing forward as a major goal by passing the Intelligence Reform and Terrorism Prevention Act of 2004 and the 9/11 Commission Recommendations Implementation Act of 2007. The information-sharing environment established by this legislation is designed to enable our Government to use information in new and more powerful ways. While improved information sharing enhances our national security, it also presents the risk that the Government will use these powerful new authorities to acquire vast amounts of data. This has the potential to infringe on privacy and civil liberties. As the 9/11 Commission said, this increase in governmental power "calls for an enhanced system of checks and balances." What steps will you take to ensure that, as information sharing is enhanced, new and more powerful protections are developed to safeguard privacy and civil liberties and how will you help make sure that the American public trusts that the Government will respect their privacy?

Ms. FLOURNOY. I believe that the protection of privacy and American civil liberties is a legal imperative and that we need not compromise our civil liberties in the pursuit of security. As Under Secretary of Defense for Policy, I will provide careful oversight and policy guidance on all matters under my purview to ensure that they are consistent with the U.S. Constitution and the law.

QUESTION SUBMITTED BY SENATOR DANIEL K. AKAKA

IRAQ STABILIZATION

5. Senator AKAKA. Ms. Flournoy, the Strategic Framework and Status of Forces Agreement symbolized a major step toward Iraq assuming full responsibility for its security. Iraq has witnessed a nationwide reduction in civilian deaths. According to a DOD report to Congress released in December 2008, Measuring Stability and Security in Iraq, the civilian death rate is lower than any time since 2004. Although these developments are promising, security gains in Iraq remain fragile. What do you believe are critical activities the military must accomplish to ensure the stabilization efforts are not undermined after our military exit Iraq?

Ms. FLOURNOY. As we plan for a responsible military drawdown in Iraq, I believe a critical portion of the U.S. military's stabilizing efforts must continue to be focused on ensuring that the Iraqi Government assumes control of the entire range of tasks necessary to organize, train, and equip its security forces. This includes, but is not limited to, helping our Iraqi partners develop a comprehensive defense strategy as well as a plan for the modernization and development of their forces.

QUESTIONS SUBMITTED BY SENATOR BILL NELSON

NUCLEAR POSTURE REVIEW

6. Senator BILL NELSON. Ms. Flournoy, the National Defense Authorization Act for Fiscal Year 2008 (P.L. 110-181) requires the Obama administration to conduct a Nuclear Posture Review (NPR). What role will you have in the NPR?

Ms. FLOURNOY. As Under Secretary of Defense for Policy, I will oversee the NPR. I would expect to engage other senior officials in DOD, as well officials in the Departments of Energy and State, in this review and to consult fully with members of this committee.

7. Senator BILL NELSON. Ms. Flournoy, how do you propose to reorganize the DOD Policy office to address nuclear and deterrence policy issues?

Ms. FLOURNOY. I would anticipate the need to elevate the way in which these issues are addressed by the DOD Policy office. I intend to make recommendations to Secretary Gates on how best to ensure that the critical issue of nuclear and deterrence policy is handled, and will certainly speak with committee staff and members on this issue in the near future.

POLICY OVERSIGHT OF MISSILE DEFENSE AGENCY AND BALLISTIC MISSILE DEFENSE

8. Senator BILL NELSON. Ms. Flournoy, since it was created in 2002, the Missile Defense Agency and its programs have not had much policy oversight from DOD. If you are confirmed to be the Under Secretary for Policy, will you ensure that the Missile Defense Agency and the ballistic missile defense programs of the Department are subject to thorough policy oversight?

Ms. FLOURNOY. Yes. If I am confirmed, I will review the Department's missile defense policy oversight processes to ensure they are appropriate and effective.

QUESTIONS SUBMITTED BY SENATOR EVAN BAYH

TROOP LEVELS IN AFGHANISTAN

9. Senator BAYH. Ms. Flournoy, as the U.S. military continues to draw down our forces in Iraq, how does the new administration propose to balance the needs of maintaining security in Iraq with its pledge to increase our troop levels in Afghanistan by as many 30,000 servicemembers?

Ms. FLOURNOY. As Secretary Gates recently testified, the Department is preparing a range of options for the President to achieve that balance, based on the assessments of the commanders on the ground, United States Central Command, and the Joint Chiefs of Staff. I look forward to engaging in the review of these options and in further discussions with the committee on this critical issue.

10. Senator BAYH. Ms. Flournoy, how do these requirements square with the readiness levels and operational tempo we have demanded of our troops?

Ms. FLOURNOY. The readiness levels and operational tempo of our troops require the Department's constant attention. Examining rotation timelines, as well as clearly defining our objectives and strategy in Afghanistan and Iraq, will be a priority for me. Working with our allies to increase their contributions to provide a safe and secure environment in Afghanistan and Iraq will be important. I also believe a strong interagency plan for Afghanistan can help adjust the demand on U.S. forces. Finally, Secretary Gates' intent to complete the planned growth of Army and Marine Corps end strength will also help alleviate some of the tension between readiness and OPTEMPO.

RESOURCES FOR IRAQ AND AFGHANISTAN

11. Senator BAYH. Ms. Flournoy, according to the recently signed Status of Forces Agreement with Iraq, American combat troops will begin leaving Iraq very soon. How do you plan to address the significant need for equipment recapitalization and reset while also weaning the Department off of supplemental budget requests?

Ms. FLOURNOY. Equipment recapitalization and reset decisions are part of the overall balance of choices between succeeding in today's wars while preventing tomorrow's conflicts. The Department will need to make these decisions with careful attention to the economic environment. As the Secretary has stated, the fiscal year 2010 budget must make hard choices, including what equipment to recapitalize. As Under Secretary, I will play an active role in helping the Secretary make such choices.

12. Senator BAYH. Ms. Flournoy, what risks does DOD face by continuing to rely so heavily on the supplemental process?

Ms. FLOURNOY. The Department should reinvigorate its ability to balance risk within defense planning. The supplemental process often makes integration with our overall defense planning efforts more difficult. Although supplemental funding may be necessary to meet surge requirements, the Department should seek to reduce its reliance on supplementals over time. Failure to do so could increase the risk that DOD will not be properly balanced for a complex future.

13. Senator BAYH. Ms. Flournoy, given your expertise in counterinsurgency strategy, how do you plan to advise Secretary Gates, his deputy, and President-elect Obama on properly resourcing forces deployed to Iraq and Afghanistan? Specifically, how do you intend to advise they balance the need for counterinsurgency capabilities of today with the conventional deterrence capabilities that may be needed for tomorrow?

Ms. FLOURNOY. I believe that the United States must be prepared to respond to a full spectrum of challenges, and maintain balanced capabilities for irregular warfare, conventional warfare, asymmetric challenges, and strategic deterrence. My advice will be informed by discussions with commanders in the field, Combatant Commander and Service Chief priorities, and a comprehensive review of existing studies and assessments on these matters.

14. Senator BAYH. Ms. Flournoy, if you were rebaselining the defense budget by taking into account lessons learned from Iraq, Afghanistan, and war on terror needs, what weapons systems and training competencies would be your highest procurement priorities?

Ms. FLOURNOY. As I have not been formally briefed on the full range of these issues, it is difficult to speak to specific weapon systems or training programs. As Under Secretary, I will work with the Under Secretary of Defense for Acquisition, Technology, and Logistics, and with the Military Services to ensure that the lessons drawn from Afghanistan and Iraq are used to develop weapons systems and training programs that meet our needs in current conflicts as well as our long-term requirements. In general, however, I agree with Secretary Gates that DOD clearly needs to pay particular attention to developing systems and training programs that ensure the U.S. military is postured for success in counterinsurgency operations, stability operations, and building the capacity of America's partners and allies.

15. Senator BAYH. Ms. Flournoy, I, along with other members of the Senate Armed Services Committee, have worked to make sure that Iraq does not continue to sit on its burgeoning budget surplus while Americans are forced to go into further debt in order to help rebuild that country. How well do you believe Iraq is doing paying for its own reconstruction projects?

Ms. FLOURNOY. I understand that the Government of Iraq is improving budget execution and has assumed the bulk of reconstruction costs. The Government of Iraq spent a total of \$36 billion on reconstruction activities through the end of October 2008, \$15 billion more than the same period of time in 2007. Despite budget revisions resulting from falling oil prices, the Government of Iraq remains committed to funding its own reconstruction activities. I will continue to make the transfer of financial responsibilities to Iraq a priority.

16. Senator BAYH. Ms. Flournoy, do you believe it is necessary for the U.S. Government to request that Iraq assist in funding joint operations?

Ms. FLOURNOY. I do believe Iraq should continue to pay for an increasing amount of the effort. However, rather than asking the Iraqis to contribute to the costs of joint operations, I believe there is a greater benefit in the Government of Iraq funding and developing its forces in order to assume greater responsibility for its own security and stability.

BALLISTIC MISSILE CAPABILITY

17. Senator BAYH. Ms. Flournoy, what is your assessment of the need for (and feasibility of) a missile defense system designed to counter Iran's growing ballistic missile capability?

Ms. FLOURNOY. Iran continues to upgrade its existing ballistic missile systems and develop new ballistic missiles with increasing range, accuracy, and lethality. These developments give Iran the potential to threaten our deployed forces, our friends and allies in the region and in Eastern Europe, and perhaps at some point the U.S. homeland, as well as to limit our freedom of action in the region. To reassure our allies and friends, deter potential aggression, and, if necessary, defeat a ballistic missile attack, it is prudent to develop and deploy effective missile defense systems to counter Iran's growing ballistic missile capabilities.

In doing so, however, we also need to ensure that such systems are developed in a way that is pragmatic, operationally effective, cost-effective, and in collaboration with our allies. Missile defense systems are one tool in our national arsenal, along with diplomacy and continued multilateral cooperation with our partners and allies, to counter Iranian ballistic missile capability.

18. Senator BAYH. Ms. Flournoy, do you plan to continue the development of ballistic missile defense?

Ms. FLOURNOY. Although the Under Secretary of Defense for Policy is not responsible for making acquisition programs decisions, if confirmed, I will review our ballistic missile defense programs along with other Department officials to ensure we have an appropriate mix of ballistic missile defense capabilities that are responsive to existing and emerging threats to our homeland, deployed forces, allies, and other friendly nations. However, we must ensure that these capabilities follow a strong testing regime, are effective, and are affordable.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

TROOP LEVELS IN AFGHANISTAN

19. Senator MCCAIN. Ms. Flournoy, General McKiernan has spoken of increasing U.S. troops in Afghanistan by something on the order of four combat brigades. Do you support this request?

Ms. FLOURNOY. I support General McKiernan's request for additional U.S. troops in Afghanistan to improve security and serve as trainers. As Secretary Gates recently stated, we lack the troops necessary to provide a baseline level of security in some of Afghanistan's most volatile areas. The Taliban has increasingly filled this security vacuum. Additional military presence, along with further development of the Afghan security forces, will go a long way to help secure the Afghan people from insurgents and help stabilize the country.

20. Senator MCCAIN. Ms. Flournoy, would increasing the number of troops in Afghanistan require us to draw down in Iraq faster than we otherwise might?

Ms. FLOURNOY. As Secretary Gates recently testified, military commanders are preparing a range of options for the President's review to balance drawing down combat forces in Iraq and increasing combat forces in Afghanistan.

21. Senator MCCAIN. Ms. Flournoy, how large do you believe the Afghan National Army (ANA) and the Afghan National Police (ANP) should ultimately be?

Ms. FLOURNOY. In September 2008 the international community and Government of Afghanistan agreed to increase the size of the ANA to 134,000. The ultimate goal is for the Afghans to assume primary security responsibility of their country, and we plan to accelerate the expansion of the ANA. As we move towards this goal, we will continually reevaluate the ANA end strength in light of the current security situation to ensure it is appropriate.

For the ANP, the current end strength agreed to between the Government of Afghanistan and the international community is 82,000. The current focus is to improve the quality of the current ANP to allow them to better secure the people of Afghanistan. The ultimate end strength of the ANP will also be subject to review and reevaluation over time.

NATO SUPPORT IN AFGHANISTAN

22. Senator MCCAIN. Ms. Flournoy, the Afghanistan mission is an important test of the North Atlantic Treaty Organization's (NATO) out-of-area capability. Yet, NATO commanders continue to have difficulty persuading allies to contribute forces to International Security Assistance Force (ISAF) or to provide NATO forces the appropriate equipment for their tasks. Secretary Gates testified last year that he is worried about the alliance evolving into a two-tiered alliance, in which you have some allies willing to fight and die to protect people's security, and others who are not. How do you assess the contributions of NATO allies to the war in Afghanistan?

Ms. FLOURNOY. Afghanistan would be less secure without the contributions and sacrifices of our NATO allies and other ISAF partners. Our allies and non-NATO partners contribute to the ISAF mission in significant ways, with both military and civilian contributions, and have increased their contributions each year. Despite this, increasing NATO contributions remains a key part of our approach to Afghanistan. We must continue to stress to our allies the U.S. commitment to Afghanistan and the shared responsibility NATO has to secure and stabilize Afghanistan.

23. Senator MCCAIN. Ms. Flournoy, what steps would you recommend to persuade NATO nations to increase their efforts in concert with our own?

Ms. FLOURNOY. Again, the contributions of our NATO allies are imperative to success in Afghanistan. President Obama and Secretary Gates have both called for

greater contributions from our NATO allies. By committing more of our own resources to the challenge, the United States will be better positioned to persuade our allies to do more. The new administration's review of Afghanistan/Pakistan strategy should recommend concrete steps to increase allied contributions.

NARCO-TRAFFICKING IN AFGHANISTAN

24. Senator MCCAIN. Ms. Flournoy, we have heard estimates that over 50 percent of Afghanistan's gross national product is associated with the illegal opium trade. Coalition strategies for countering the opium trade have not been effective to date. In your view, what strategy would be most effective in reducing opium production and trafficking in Afghanistan?

Ms. FLOURNOY. While I have not been briefed in detail on our counternarcotics efforts in Afghanistan, it is my impression that our counterdrug strategy needs to be better integrated into the broader effort. Opium traffic in Afghanistan distorts the economy, corrodes the judicial system, and increases funding for insurgents and incentives for corruption and criminal violence. An effective approach to counternarcotics is a key component of a realistic Afghanistan strategy. I intend to focus on ensuring that this and other elements are properly addressed.

25. Senator MCCAIN. Ms. Flournoy, what should the role of the U.S. military forces be in the counterdrug program in Afghanistan?

Ms. FLOURNOY. Any counternarcotics policy in Afghanistan should maintain an Afghan lead on counternarcotics operations with U.S. military forces supporting Afghan security forces. The U.S. military should continue to build Afghanistan's counternarcotics capacity in coordination with the U.S. Drug Enforcement Administration and the Departments of State and Justice in order to help Afghans to become self sufficient and reliable partners in the fight against illegal drugs.

26. Senator MCCAIN. Ms. Flournoy, do you believe that DOD should provide support for counternarcotics operations carried out by other agencies, such as the Drug Enforcement Agency?

Ms. FLOURNOY. Breaking the narcotics-insurgency nexus is critical to overall success in Afghanistan. U.S. military forces should provide support to other agencies in counternarcotics operations. DOD international counterdrug policy and Rules of Engagement were recently revised to enable U.S. commanders to support other agencies in Afghanistan properly.

27. Senator MCCAIN. Ms. Flournoy, what is the appropriate role for coalition nations and the larger international community in effectively addressing the counterdrug challenge in Afghanistan and the surrounding region?

Ms. FLOURNOY. I support the increased participation of NATO in addressing the counterdrug challenge in Afghanistan. DOD should continue to support NATO's role in the coordination and synchronization of deliberate counternarcotics interdiction operations. I understand that NATO defense ministers provided new guidance to the ISAF commander that allows for additional flexibility when conducting counternarcotics related military operations.

AFGHAN NATIONAL ARMY

28. Senator MCCAIN. Ms. Flournoy, the goal for increasing the size of the ANA has been revised from 68,000 to approximately 134,000 soldiers. Do you believe that a force structure of 134,000 is sufficient to address Afghanistan's growing insurgency?

Ms. FLOURNOY. In September 2008 the international community and Government of Afghanistan agreed to increase the size of the ANA to 134,000, with the intent of having an ANA that will be sufficient to meet Afghanistan's security needs. The ultimate goal is for the Afghans to assume primary security responsibility of their country, and accelerating the expansion of the ANA supports this goal.

29. Senator MCCAIN. Ms. Flournoy, would you support a surge of trainers from the United States and coalition partners into Afghanistan to accelerate the expansion of the ANA?

Ms. FLOURNOY. The expanded ANA will require additional trainers and mentors to meet the needs of a 134,000-strong force. I support a substantial increase in mentors and trainers as they are critical to the ANA's development and accelerated expansion.

CROSS-BORDER ATTACKS FROM PAKISTAN

30. Senator MCCAIN. Ms. Flournoy, one of the main threats to U.S. and coalition forces in Afghanistan comes from cross-border attacks by the Taliban and extremist militants who find safe haven in Pakistan's border regions. What steps in your view need to be taken to eliminate the threat posed by Taliban and extremist militants hiding out across the Afghan-Pakistan border?

Ms. FLOURNOY. Controlling the movement of extremists across the Afghanistan-Pakistan border requires a unified effort by governments on both sides of the border and the support of U.S. and NATO forces in Afghanistan. As Under Secretary of Defense for Policy, I will work to improve intelligence-sharing and cross-border coordination and encourage continued action by Pakistani forces to eliminate the militant threat within Pakistan.

U.S.-PAKISTAN RELATIONS

31. Senator MCCAIN. Ms. Flournoy, the stability of Pakistan has ramifications for broad U.S. regional interests as well as being an important underpinning to our success in our war against global extremists. Which DOD policies regarding Pakistan would you recommend we sustain; which need to be strengthened; and which would you recommend for elimination?

Ms. FLOURNOY. I have not been fully briefed on the entire range of DOD policies in Pakistan, and am not prepared to make specific policy recommendations at this time. I do, however, look forward to participating in an interagency review of Afghanistan/Pakistan strategy that should address this important question.

32. Senator MCCAIN. Ms. Flournoy, what is your assessment of the efforts by the Pakistani Government to counter militant groups along the border with Afghanistan and to combat terrorism in general?

Ms. FLOURNOY. Although I have not been briefed formally on these issues, I believe that the democratic Government of Pakistan should be strongly supported and held accountable for enhancing stability within its own borders, eliminating safe havens for extremists, and preventing cross-border attacks. I will support increased measures to enhance Pakistan's capability to secure its territory and combat terrorism.

CHIEF OF THE NATIONAL GUARD BUREAU AND THE JOINT CHIEFS OF STAFF

33. Senator MCCAIN. Ms. Flournoy, do you think the Chief of the National Guard Bureau should be a member of the Joint Chiefs of Staff? Why or why not?

Ms. FLOURNOY. The National Guard has become an integral part of the military operational force in recent years. As such, ensuring the National Guard is well integrated into the Defense Department's plans and policies is imperative. I agree with President Obama and Secretary Gates that ensuring that the concerns of our citizen soldiers are heard at the highest levels is particularly important. The Chief of the National Guard Bureau has only been a four-star position since December 2008. I imagine that the issue of making him a member of the Joint Chiefs of Staff will be debated in the months to come, and I hope to participate fully in that debate, make recommendations to the Secretary, and consult with members of this committee.

"SOFT POWER"

34. Senator MCCAIN. Ms. Flournoy, Secretary Gates has called on Congress to provide more funding for the State Department's Foreign Service and the U.S. Agency for International Development. Just a few days ago, Admiral Mullen expressed the same views commenting that our national security and foreign policy requires "a whole-of-government approach to solving modern problems" and "we need to re-allocate roles and resources in a way that places our military as an equal among many in government—as an enabler, a true partner." Admiral Mullen went on to say that "as an equal partner in government, I want to be able to transfer resources to my other partners when they need them." What thoughts do you have on these remarks calling for more resources for civilian agencies responsible for "soft power," including the Departments of State, Justice, Commerce, and Agriculture?

Ms. FLOURNOY. I stand with the President, Secretary Gates, and Admiral Mullen in stressing the need for the United States to invest more heavily in its non-military instruments of national power. The need for a more integrated approach to achiev-

ing our national security objectives using all elements of national power can only be realized if we invest in building the capacity of our civilian agencies. As Under Secretary, I intend to support my interagency counterparts in their efforts to significantly expand the Government's "soft-power" resources and the capacity of civilian agencies to contribute to U.S. humanitarian, counterinsurgency, and post-conflict efforts.

35. Senator MCCAIN. Ms. Flournoy, should Congress provide greater flexibility for the military to transfer funding during a crisis?

Ms. FLOURNOY. Yes. I believe that greater flexibility during, and before, crises allows DOD and the interagency to better support U.S. objectives.

AL QAEDA

36. Senator MCCAIN. Ms. Flournoy, General Hayden, the Director of the Central Intelligence Agency, has said that "al Qaeda operating out of Pakistan is the greatest danger to the United States" and that "if there is a major strike in this country, it will bear al Qaeda's fingerprints." What do you believe is the greatest danger to the United States?

Ms. FLOURNOY. Combating terrorism is one of the most pressing security challenges facing the United States. I agree with General Hayden that the al Qaeda network—whose leadership is concentrated within the border areas between Pakistan and Afghanistan but whose propaganda and violent extremist ideology inspire action by associated movements and potentially "homegrown" cells across the globe—remains an immediate threat to the United States and many of its allies. I am particularly concerned about terrorists gaining access to weapons of mass destruction (WMD).

Both President Obama and Secretary Gates have cited the need to eliminate the terrorist sanctuary in the border regions of Pakistan, but there is no purely military solution. The Governments of Pakistan and Afghanistan will be central to defeating the terrorist and cross-border insurgent groups that threaten the border region and the international community. To support their efforts, the United States must have an integrated strategy to promote security, development, and governance, and to prevent terrorism across the Afghanistan-Pakistan border. We must also bolster our efforts to keep WMD out of the hands of terrorists. I intend to work closely with my DOD and interagency colleagues to examine how best to strengthen U.S. efforts in these critical areas.

37. Senator MCCAIN. Ms. Flournoy, how would you describe the current intent, composition, and capabilities of al Qaeda?

Ms. FLOURNOY. I understand that al Qaeda remains committed to attacking the United States and its interests both at home and abroad. Its capabilities, while seriously degraded since September 11, 2001, remain significant. Surviving al Qaeda leadership have adopted an increasingly decentralized command and control structure that relies on the exploitation of modern communications systems to inspire like-minded regional affiliates and independent cells. Regional affiliates, such as al Qaeda in Iraq and al Qaeda in the Islamic Maghreb, as well as other al Qaeda efforts in the Horn of Africa and the Arabian Peninsula, broaden al Qaeda's capability to strike U.S. interests.

38. Senator MCCAIN. Ms. Flournoy, do you believe DOD is adequately organized to meet this threat?

Ms. FLOURNOY. DOD has taken many steps to improve its organization and capabilities to counter the terrorist threat. For example, Special Operations Command was designated the supported commander for planning and synchronizing combatant command operations against terrorist networks. Since the last Quadrennial Defense Review (QDR), the Department has made a significant investment in Special Operations Force capabilities and personnel growth. The general purpose forces are also taking on increased missions to train and advise the security forces of our partners and allies to counter terrorist and insurgent threats.

Many terrorist threats come from countries with which the United States is not at war, and manifest themselves in ways that cannot be overcome solely by military means. The responses they demand extend well beyond the traditional domain of any single government agency or department. Therefore, DOD works extensively with other departments and agencies, as well as the National Counterterrorism Center, in the development of U.S. Government counterterrorism plans and in the coordination of all elements of national power. These whole-of-government efforts

range from activities to disrupt terrorist organizations to promoting international partners' capacity to foster stability, the rule of law, and good governance.

As Under Secretary, I plan to work with the Chairman and the Joint Chiefs of Staff, the combatant commanders, and my colleagues across the interagency to review, assess, and refine the Department's organization to ensure that it meets the President's comprehensive strategy for combating terrorism.

39. Senator MCCAIN. Ms. Flournoy, do you believe our European allies are adequately concerned and focused on the threat posed by al Qaeda?

Ms. FLOURNOY. The United States and our European allies have a shared interest in countering transnational terrorism. The major terrorist attacks in both London and Madrid are just two examples that highlight the danger of this threat in Europe. Afghanistan would be a less secure environment without the contributions and sacrifices of our NATO allies and other international ISAF partners. However, as President Obama and Secretary Gates have both noted, efforts in Afghanistan would benefit from greater contributions from our European allies. In particular, European allies have unique capabilities—such as law enforcement competencies—that they can bring to bear in Afghanistan and elsewhere to build the capabilities and capacity of international partners.

As Under Secretary I will seek to improve U.S. partnerships with European allies to increase our common ground on emerging threats and opportunities.

QUADRENNIAL DEFENSE REVIEW

40. Senator MCCAIN. Ms. Flournoy, in your 2006 article titled "Did the Pentagon Get the Quadrennial Defense Review Right?", which appeared in the *Washington Quarterly*, you wrote that the 2006 QDR "did not include a regular consultation process with the chairmen and ranking members of the key defense committees in the Senate and the House of Representatives." Do you continue to believe that political engagement on the QDR is important and, if confirmed, would you advocate for the consultation that you described? Why?

Ms. FLOURNOY. I continue to believe regular engagement with all stakeholders in the Nation's defense enterprise is an important part of QDRs. The Department should regularly consult with Congress, interagency partners, defense industry, and key international partners with whom the United States works to understand and meet the challenges of today's security environment.

The Department's engagement with Congress throughout the QDR process is especially important to ensure a smooth transition between QDR decisionmaking and any related legislation, to include appropriations. I expect hard choices will have to be made in this QDR and the support of Congress will be necessary to be successful.

41. Senator MCCAIN. Ms. Flournoy, in that same article you wrote that "DOD needs a new and more rigorous approach to defense planning, one that provides the analytical basis for setting strategic priorities, allocating risk, and managing portfolio of capabilities." Can you expand on your statement with respect to how the Department can recapitalize or improve efforts on the QDR?

Ms. FLOURNOY. To be effective, the next QDR must articulate a comprehensive, long-term vision of U.S. military capabilities and identify where trade-offs, shifts in investment, or divestment should be made. I have long believed that DOD needs to enhance its ability to identify and manage risk across the spectrum of current operations and likely future requirements. I understand that the Department has made progress on refining its analytic and capability portfolio management tools and processes. I am particularly pleased that the 2008 National Defense Strategy stated that implementing the strategy "requires balancing risks, and understanding the choices those risks imply. We cannot do everything, or function equally well across the spectrum of conflict. Ultimately, we must make choices." I intend to work hard to further strengthen the Department's defense planning in the QDR and beyond.

RELOCATION OF U.S. MARINES FROM OKINAWA

42. Senator MCCAIN. Ms. Flournoy, the U.S. Government has an agreement with Japan regarding the realignment of U.S. Marines currently stationed in Okinawa. Current planning includes the relocation of about 8,000 marines and their families to the Territory of Guam. This committee may see in the fiscal year 2010 budget a substantial request for investment in new facilities to support movement of the marines to Guam. How do you view the agreement from a theater-wide strategic perspective?

Ms. FLOURNOY. The agreement is rooted in a shared regional strategic perspective between the United States and Japan. As the westernmost U.S. territory for basing in the Pacific, Guam provides the strategic flexibility and freedom of action necessary to support peacetime engagement and crisis response. The agreement with Japan builds on other posture changes that will support forward-basing of submarines and transient aircraft carriers, projection of intelligence, surveillance, and reconnaissance and strike assets, and increased logistical sustainment capabilities. The relocation to Guam is a key element in transforming the U.S.-Japan alliance in ways that will strengthen the political support in Japan for our reduced and consolidated presence on Okinawa. Overall, these efforts will strengthen the deterrent effect of U.S. forces and assure our regional allies of an enduring U.S. forward presence.

QUESTION SUBMITTED BY SENATOR MEL MARTINEZ

PREEMPTION

43. Senator MARTINEZ. Ms. Flourney, both the 2008 National Defense Strategy and the 2006 National Security Strategy reference the act of preemption. Where do you see the line drawn between preemption and aggression? How will you ensure the legislature is correctly informed of military action with enough time for substantive thought and debate?

Ms. FLOURNOY. The United States has the responsibility to protect and defend our citizens and allies. Although we do not seek conflict with other nations, neither should we ignore imminent threats to the United States. It is critical to consult with Congress and our allies in situations where the United States faces imminent threats. Precisely how the legislature is informed and in which situations the United States would use force are important questions that will need to be addressed in close consultation with Congress and our partners and allies. I intend to work closely with counterparts in Congress and other partners to ensure that U.S. national security objectives and decisionmaking processes are as transparent as possible.

QUESTION SUBMITTED BY SENATOR SUSAN COLLINS

AFGHANISTAN

44. Senator COLLINS. Ms. Flourney, in your answers to the advance policy questions, you identified the need for the United States to develop and employ a more effective strategy in Afghanistan and the surrounding region. Can you provide more detail on your vision for a new direction for Afghanistan?

Ms. FLOURNOY. President Obama has made it clear that the Afghanistan theater should be our top military priority. Secretary Gates has stated that more troops are needed "to provide a baseline level of security in some of the more dangerous areas." To that end, the United States is planning to increase its military presence in Afghanistan, in conjunction with a large increase in the Afghan security forces. We should also improve coordination between Afghan and coalition forces in the field and enable the Afghans to assume the lead for more operations.

At the same time, as in any counterinsurgency effort, success requires a commensurate increase in U.S. support to governance, rule of law, and economic programs. I will work with my counterparts at State, United States Agency for International Development, and other U.S. Government agencies to develop a comprehensive, holistic approach in Afghanistan and the broader region, particularly Pakistan. We should also support the United Nations in its mission to coordinate among the more than 40 nations and hundreds of nongovernmental organizations to help develop a comprehensive approach to reconstruction efforts in Afghanistan. Unity of effort and the effective application of both national and international resources will go a long way toward establishing the kind of sustainable security that is needed to ensure a successful outcome that is commensurate with U.S. interests.

[The nomination reference of Michèle A. Flourney follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 20, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Michèle A. Flournoy of Maryland, to be Under Secretary of Defense for Policy, vice Eric S. Edelman, resigned.

[The biographical sketch of Michèle A. Flournoy, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF MICHÈLE A. FLOURNOY

Michèle Flournoy was appointed President of the Center for a New American Security (CNAS) in January 2007. Prior to co-founding CNAS, she was a Senior Adviser at the Center for Strategic and International Studies, where she worked on a broad range of defense policy and international security issues. Previously, she was a distinguished research professor at the Institute for National Strategic Studies at the National Defense University (NDU), where she founded and led the university's Quadrennial Defense Review (QDR) working group, which was chartered by the Chairman of the Joint Chiefs of Staff to develop intellectual capital in preparation for the Department of Defense's 2001 QDR. Prior to joining NDU, she was dual-hatted as Principal Deputy Assistant Secretary of Defense for Strategy and Threat Reduction and Deputy Assistant Secretary of Defense for Strategy. In that capacity, she oversaw three policy offices in the Office of the Secretary of Defense: Strategy; Requirements, Plans, and Counterproliferation; and Russia, Ukraine, and Eurasian Affairs. Ms. Flournoy was awarded the Secretary of Defense Medal for Outstanding Public Service in 1996, the Department of Defense Medal for Distinguished Public Service in 1998, and the Chairman of the Joint Chiefs of Staffs Joint Distinguished Civilian Service Award in 2000. She is a member of the Aspen Strategy Group, the Council on Foreign Relations, the International Institute of Strategic Studies, the Executive Board of Women in International Security, and the Board of the Institute for Defense Analysis. She is a former member of the Defense Policy Board and the Defense Science Board Task Force on Transformation. In addition to several edited volumes and reports, she has authored dozens of articles on international security issues. Ms. Flournoy holds a B.A. in social studies from Harvard University and an M.Litt. in international relations from Balliol College, Oxford University, where she was a Newton-Tatum scholar.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Michèle Flournoy in connection with her nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
 Michèle Angelique Flournoy.
2. **Position to which nominated:**
 Under Secretary of Defense (Policy).
3. **Date of nomination:**
 Intention to nominate issued January 8, 2009.
4. **Address:** (List current place of residence and office addresses.)
 [Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
 December 14, 1960; Los Angeles, CA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
 Married to William Scott Gould.
7. **Names and ages of children:**
 William Alexander (Alec), 11.
 Victoria Morgan, 9.
 Aidan Campbell, 6.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
 Balliol College, Oxford University, M.Litt. International Relations, 1986 (09/1983-06/1986).
 Harvard University, B.A. Social Studies, 1983 (09/1979-06/1983).
 Beverly Hills High School, High School Diploma, 1979 (09/1975-06/1979).
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
 Center for a New American Security, President and Co-Founder, 01/2007-Present.
 Center for Strategic and International Studies, Senior Adviser-International Security Program, 12/2000-12/2006.
 Institute for National Strategic Studies-National Defense University, Distinguished Research Professor, 09/1998-12/2000.
 Office of the Secretary of Defense-Department of Defense, Principal Deputy Assistant Secretary for Strategy and Threat Reduction and Deputy Assistant Secretary for Strategy, 05/1993-09/1998.
10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.
 Office of the Secretary of Defense-Department of Defense, Principal Deputy Assistant Secretary for Strategy and Threat Reduction and Deputy Assistant Secretary for Strategy, 05/1993-09/1998.
 Defense Policy Board, 1998-2001.

U.S. STRATCOM Strategic Advisory Group, 2004–2007.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Center for a New American Security, President and Co-Founder.

W. Scott Gould and Michèle Angeliqne Flournoy Revocable Trust Co-Trustee.

Institute for Defense Analyses, Member-Board of Directors.

Women in International Security, Member-Executive Board.

Ava partners, Managing Director (clients below):

MPRI, Speaker

BAE Systems, Inc., Consultant

Booz Allen Hamilton, Consultant

Hicks & Associates, Consultant

Lockheed Martin, Consultant.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Institute for Defense Analyses, Trustee, 2007–present.

Women in International Security, member of the Executive Board, 1999–present.

Council on Foreign Relations, member, 1998–present.

International Institute for Strategic Studies, former member.

Aspen Strategy Group, member, 2002–present.

Christ Church, Georgetown, parishioner and member of the Vestry, 2006–present.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Provided policy advice to Kerry, Clinton, and Obama campaigns.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

06/16/08, Obama for America, \$1,000

09/29/07, Reed Committee, \$1,000

06/30/07, Hillary Clinton for President, \$500

06/22/06, Reed Committee, \$1,000

08/18/04, Democratic National Committee, \$200

07/09/04, Kerry Victory 2004, \$500

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Joint Distinguished Civilian Service Award by the Chairman of the Joint Chiefs of Staff, 2000.

Department of Defense Medal for Distinguished Public Service, 1998.

Secretary of Defense Medal for Outstanding Public Service, 1996.

Newton-Tatum Scholar to Balliol College Oxford, 1983–1985.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

17. Commitment to testify before Senate committees: Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MICHÈLE FLOURNOY.

This 13th day of January, 2009.

[The nomination of Michèle Flournoy was reported to the Senate by Chairman Levin on February 5, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on February 9, 2009.]

[Prepared questions submitted to Jeh Charles Johnson by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense (DOD) Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders in the strategic planning process, in the development of requirements, in joint training and education, and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions based on your experience in DOD?

Answer. At this time I have no proposals to amend any provision of the Goldwater-Nichols Act. If I am confirmed and if I identify possible changes that I think would be beneficial, I will propose those changes through the established process.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. See my prior answer.

RELATIONSHIPS

Question. What is your understanding of both the formal and informal relationship between the General Counsel of DOD and the following offices?

The Secretary of Defense.

Answer. The General Counsel is the Secretary's principal advisor on the wide variety of legal issues facing by DOD. I hope and expect to consult with the Secretary and his personal staff on these issues on a regular basis.

The Under Secretaries of Defense.

Answer. The General Counsel should work closely with the Under Secretaries, both personally and through the General Counsel's staff, to provide them and their respective offices with timely and quality legal advice.

The Assistant Secretaries of Defense.

Answer. Likewise, the General Counsel should work closely with the Assistant Secretaries, both personally and through the General Counsel's staff, to provide them and their respective offices with timely and quality legal advice.

The Chairman of the Joint Chiefs of Staff.

Answer. I am aware that the Chairman of the Joint Chiefs has his own dedicated Legal Counsel, and that a provision in the National Defense Authorization Act (NDAA) for Fiscal Year 2008 codified the existence of this position through a new section 156 in title 10, U.S.C., and that this provision in law also provided that the Legal Counsel be a one-star officer. See "NDAA for Fiscal Year 2008," Pub. L. No. 110-181, § 543, 122 Stat. 3, 115 (2008). While the Chairman relies primarily upon his Legal Counsel for legal advice, the Legal Counsel and the DOD General Counsel should work together on the broad range of matters that affect DOD.

The Judge Advocates General.

Answer. As General Counsel of the Air Force from October 1998 to January 2001, I believe I worked in a collegial and collaborative fashion with The Judge Advocate General of the Air Force and his staff to deliver effective legal service and advice to Air Force leaders. If confirmed as General Counsel of DOD, I hope and expect to resume that positive working relationship with all Judge Advocates General and the Staff Judge Advocate to the Commandant of the Marine Corps.

I am aware that The Judge Advocates General are responsible for the administration of military justice within their respective Services, and that senior leaders within the DOD should be mindful of the principles and restraints of unlawful command influence. Finally, I am aware that in 2004, title 10 was amended to direct that "no officer or employee of DOD interfere with the ability of the Judge Advocate[s] General to give independent legal advice to" the leadership of their respective military departments. See 10 U.S.C. §§ 3037, 5148, 8037 (2003), as amended by the Ronald Reagan NDAA for Fiscal Year 2005, Pub. L. No. 108-375, § 574, 118 Stat. 1811, 1921 (2004).

The Legal Advisor to the Chairman of the Joint Chiefs of Staff.

Answer. See my answer above concerning the Chairman of the Joint Chiefs. In addition, I am aware that in 2008, title 10 was amended to direct that "no officer or employee of DOD may interfere with the ability of the Legal Counsel to give inde-

pendent legal advice to the Chairman of the Joint Chiefs of Staff and to the Joint Chiefs of Staff.” See Duncan Hunter NDAA for Fiscal Year 2009, Pub. L. No. 110–417, § 591, 122 Stat. 4356, 4474 (2008). I understand that current practice is for the DOD General Counsel and the Chairman’s Legal Counsel to meet frequently to discuss issues of mutual concern and to exchange information. If confirmed, I hope and expect to continue that practice.

Question. The Staff Judge Advocates to the Commanders of Combatant Commands.

Answer. It is my understanding that the DOD General Counsel’s relationship to the staff judge advocates of the combatant commands is, for the most part, through the Chairman’s Legal Counsel.

Question. The General Counsels of the Military Departments.

Answer. As a former General Counsel of the Department of the Air Force, I am familiar with this relationship. The General Counsels of the Army, Navy, and Air Force serve as the chief legal officers of their respective departments, and each report to the Secretary of their respective departments. There is no direct reporting relationship to the DOD General Counsel, but the DOD General Counsel is the chief legal officer of DOD. The DOD General Counsel should meet regularly and work closely with the Army, Navy, and Air Force General Counsels. If confirmed, I will ensure that we work together closely.

Question. The Counsels for the Defense Agencies.

Answer. As I understand it, the DOD General Counsel is the Director of the Defense Legal Services Agency (DLSA), and the General Counsels of the defense agencies and DOD field activities are part of DLSA, and thus, report to the DOD General Counsel in his or her capacity as DLSA Director.

Question. The Counsel to the Inspector General (IG).

Answer. I am aware that a provision in the NDAA for Fiscal Year 2009 amended the IG Act of 1978 to establish a “General Counsel to the IG of DOD.” See Duncan Hunter NDAA for Fiscal Year 2009, Pub. L. No. 110–417, § 907, 122 Stat. 4356, 4569 (2008). This new law, in substance, changed the relationship between the DOD General Counsel and the DOD IG’s legal advisor, who reports directly to the DOD IG and performs duties assigned by the DOD IG. If confirmed, I hope and expect to work closely with the IG’s General Counsel to provide timely and quality legal advice to our respective clients.

Question. The Joint Service Committee on Military Justice.

Answer. The DOD General Counsel designates a non-voting representative to the Joint Service Committee on Military Justice.

Question. The Comptroller General.

Answer. As I understand it, an agency head may request an opinion from the Comptroller General on the obligation and disbursement of public funds, and the DOD General Counsel may submit such questions to the Comptroller General on behalf of the Secretary of Defense. I understand that, on an informal basis, DOD General Counsel’s office enjoys a very good relationship with the Comptroller General’s office, which includes informal consultation. If confirmed, I intend to continue that relationship.

Question. The United States Court of Appeals for the Armed Forces.

Answer. The law states that the Court of Appeals for the Armed Forces “is located for administrative purposes only in the DOD,” which emphasizes the Court’s judicial independence from DOD. See 10 U.S.C. § 941. I understand that, traditionally, the DOD General Counsel serves as an informal DOD liaison with the Court, and may be asked by the President to recommend candidates for appointment to the Court.

Question. The Code Committee established under Article 146 of the Uniform Code of Military Justice (UCMJ).

Answer. As I understand it, the Code Committee consists of the Judges of the United States Court of Appeals for the Armed Forces, The Judge Advocates General of the Military Departments, the Judge Advocate General and Chief Counsel of the Coast Guard, the Staff Judge Advocate to the Commandant of the Marine Corps, and two recognized authorities on military justice appointed by the Secretary of Defense from public life. The DOD General Counsel has no formal relationship to the Code Committee. However, I am told that the General Counsel may provide informal support as the Code Committee desires, and informs the Code Committee with respect to the activities and recommendations of the Joint Service Committee on Military Justice.

Question. The Attorney General.

Answer. The Attorney General is the chief legal officer and law enforcement authority of the United States. The DOD General Counsel must work closely with the Attorney General and his staff to fulfill their respective duties.

Question. The Office of Legal Counsel (OLC) at the Department of Justice.

Answer. The OLC issues formal legal opinions that can and do affect the operations and policies of the various agencies of the executive branch. The DOD General Counsel must, therefore, work closely with the OLC to ensure the best possible legal advice is provided to officials of DOD.

Question. The Office of Legal Adviser at the Department of State.

Answer. The Departments of State and Defense must work together on many matters in furtherance of the national security of the United States. Therefore, it is necessary for the DOD General Counsel and the Legal Advisor at the Department of State, and their staffs, to consult with each other on legal issues of mutual interest.

QUALIFICATIONS

Question. Section 140 of title 10, U.S.C., provides that the General Counsel is the chief legal officer of DOD and that the General Counsel shall perform such functions as the Secretary of Defense may prescribe.

What background and expertise do you possess that you believe qualifies you to perform these duties?

Answer. I am a lawyer in good standing at the Bar of the State of New York and the District of Columbia. I am admitted to practice in a variety of Federal courts around the country, including the U.S. Supreme Court. I am a trial lawyer and litigator at Paul, Weiss, Rifkind, Wharton & Garrison, LLP in New York City. I am a Fellow in the American College of Trial Lawyers.

I have served in public office twice. From January 1989 to December 1991, I was an Assistant United States Attorney in the Southern District of New York, where I prosecuted public corruption cases. From October 1998 to January 2001, I served as General Counsel of the Department of the Air Force, following nomination by the President and confirmation by the Senate. In that position, I worked in a professional and collaborative fashion with the more than 1,000 Judge Advocates General and civilian lawyers in the Air Force to accomplish many things for our common client. This also included working closely with the DOD General Counsel and attorneys within that office. In 2007, I was nominated by the New York State Commission on Judicial Nomination to be Chief Judge of the State of New York. The incumbent, Judith Kaye, was reappointed by the Governor.

While in private law practice, I am active in civic and professional affairs. I was a member of the Ethics Committee and chair of the Judiciary Committee of the New York City Bar Association. I am also a member of the Council on Foreign Relations.

Question. Assuming you are confirmed, what duties do you expect that the Secretary of Defense will prescribe for you?

Answer. If I am confirmed, I hope and expect that Secretary Gates and his senior staff will call upon me for legal advice and guidance on the wide variety of matters that cross his desk.

LEGAL OPINIONS

Question. If you are confirmed, would the legal opinions of your office be binding on all lawyers within DOD?

Answer. The DOD General Counsel is the chief legal officer of DOD. Consequently, the legal opinions of the Office of the DOD General Counsel are the controlling legal opinions of DOD, with the exception of lawyers in the Office of the DOD IG General Counsel, who are explicitly exempted from the scope of 10 U.S.C. § 140, by virtue of section 907 of the NDAA for Fiscal Year 2009. As stated before, I am also mindful of the recent changes in law that prohibit any officer or employee of DOD from interfering with the ability of the Judge Advocates General to give independent legal advice to the leadership of their respective military departments.

Question. How will you ensure that such legal opinions are available to lawyers in the various components of DOD?

Answer. Opinions of the Office of the DOD General Counsel are disseminated throughout DOD in the ordinary course of business, both electronically and in hardcopy format using normal departmental distribution processes. If confirmed, I expect to continue this practice.

Question. If confirmed, are there specific categories of General Counsel legal opinions that you expect to reconsider and possibly revise? If so, what categories?

Answer. If confirmed, one of my objectives is to assess whether the DOD General Counsel's legal opinions currently in effect need to be reconsidered or revised.

Question. What role do you expect to play, if confirmed, in the development and consideration (or reconsideration) of legal opinions by the OLC of the Department of Justice that directly affect DOD?

Answer. If confirmed, I expect to work with the OLC in the development, consideration, and reconsideration of OLC legal opinions, while recognizing that the ulti-

mate responsibility for the development of those opinions resides with the Department of Justice.

Question. What actions would you take in response to an opinion issued by OLC with which you disagreed as a matter of proper interpretation of the law?

Answer. If OLC issued an opinion with which I materially disagreed, I would not hesitate to inform OLC of the extent and nature of my disagreement, mindful, again, that the Attorney General is the chief legal officer of the United States and that his or her legal opinions are controlling throughout the executive branch.

INDEPENDENT LEGAL ADVICE

Question. In response to attempts within DOD to subordinate legal functions and authorities of the Judge Advocates General to the General Counsels of DOD and the military Services, Congress enacted legislation prohibiting any officer or employee of DOD from interfering with the ability of the Judge Advocates General of the Military Services and the legal advisor to the Chairman of the Joint Chiefs of Staff to provide independent legal advice to the Chairman, Service Secretaries, and Service Chiefs. Congress also required a study and review by outside experts of the relationships between the legal elements of each of the military departments of each of the military departments.

What is your view of the need for the Judge Advocates General of the Services, the Staff Judge Advocate to the Commandant of the Marine Corps, and the legal advisor to the Chairman of the Joint Chiefs of Staff to provide independent legal advice to Service Secretaries, Chairman of the Joint Chiefs, Chiefs of Staff of the Army and Air Force, and the Chief of Naval Operations?

Answer. This is my view: I respect and admire the role our Nation's military lawyers play for DOD. I appreciate that military lawyers, given their training and experience, may have a perspective that civilian lawyers do not have, particularly in matters of military operations, military personnel, and military justice. Further, as General Counsel of the Air Force from 1998 to 2001, I believe I worked in a collegial and collaborative fashion with the Judge Advocate General of the Air Force and his staff, and greatly respected his role and the advice he had to offer to the leadership of the Air Force.

I believe that the Judge Advocates General of the military departments, the Staff Judge Advocate to the Commandant of the Marine Corps, and the Legal Counsel to the Chairman of the Joint Chiefs of Staff should provide their best independent legal advice to the Secretaries of the military departments, the Chairman of the Joint Chiefs of Staff, and the Service Chiefs, as appropriate. That advice should be informed by the views of the Department of Justice, the DOD General Counsel, and the Military Department General Counsel concerned.

Question. What is your view of the responsibility of judge advocates within the Services and joint commands to provide independent legal advice to military commanders?

Answer. It is the responsibility of judge advocates within the Services and joint commands to provide legal advice to military commanders that is independent of improper external influence. Also, as a practical matter, judge advocates must be depended upon to provide timely and effective day-to-day legal advice to military commanders in the field, without seeking the approval and input of the DOD General Counsel for that advice. However, the DOD General Counsel is the senior legal officer of the Department. Therefore, judge advocates' advice should be informed by the views of the Department of Justice, the DOD General Counsel, the General Counsel of the military department concerned, and the Judge Advocate General concerned.

Question. If confirmed, would you propose any changes to the current relationships between the uniformed judge advocates and General Counsels?

Answer. I am not aware at this time of any changes that I would propose to the current relationships between the uniformed Judge Advocates and General Counsels.

DETAINEE ISSUES

Question. Section 1403 of the NDAA for Fiscal Year 2006, provides that no individual in the custody or under the physical control of the United States Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is the prohibition in the best interest of the United States? Why or why not?

Answer. In my view, this prohibition is in the best interest of the United States, the national security interests of the United States, and is consistent with fundamental American values.

Question. Do you believe that the phrase “cruel, inhuman, or degrading treatment or punishment” has been adequately and appropriately defined for the purpose of this provision?

Answer. I am not fully informed to provide an adequate response to this question. If I am confirmed, this is something I expect to review carefully.

Question. What role do you believe the General Counsel of DOD should play in the interpretation of this standard?

Answer. I believe the General Counsel should play a primary role in advising on the standards governing the treatment of persons detained by the U.S. military, including in any interpretation, if necessary, of the standard quoted above.

Question. What role do you believe the Judge Advocates General of the military Services should play in the interpretation of this standard?

Answer. The Judge Advocates General of the military departments should play a prominent role in the interpretation of this standard and other matters related to the treatment of detainees. I believe The Judge Advocates General and the military lawyers they lead bring an important and essential perspective to these and many other matters, and they play a vital role in supporting the operating forces worldwide. As I stated before, judge advocates must be depended upon to provide timely and effective day-to-day legal advice to military commanders in the field. If confirmed, and if called upon to offer any guidance on this standard, I hope and expect to consult the Judge Advocates General and the Chairman’s Legal Counsel for this guidance.

Question. If confirmed, will you take steps to ensure that all relevant DOD directives, regulations, policies, practices, and procedures fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2–22.3, issued in September 2006, and in DOD Directive 2310.01E, the DOD Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. Section 2441 of title 18, U.S.C., as amended by the Military Commissions Act of 2006, defines grave breaches of Common Article 3 of the Geneva Conventions, including torture and cruel and inhuman treatment.

In your view, does section 2441 define these terms in a manner that provides appropriate protection from abusive treatment to U.S. detainees in foreign custody and to foreign detainees in U.S. custody?

Answer. Yes. If I am confirmed, I expect to review this issue closely.

Question. Do you believe that the United States has the legal authority to continue holding alleged members and supporters of al Qaeda and the Taliban as enemy combatants?

Answer. Yes. As a general matter, the United States is authorized to detain those individuals determined to be enemy combatants. See, e.g., *Hamdi v. Rumsfeld*, 542 U.S. 507 (2004) and the Authorization for Use of Military Force, 115 Stat. 224. I cannot comment, legally or factually, on the circumstances of the detention of specific individuals, which, in many cases, is the subject of pending litigation.

Question. Do you believe that the Combatant Status Review Tribunals convened by DOD to provide Guantanamo detainees an opportunity to contest designation as enemy combatants provide detainees with appropriate legal standards and processes?

Answer. If I am confirmed, I expect to examine this issue carefully.

Question. Do you believe that the Federal courts have the procedures and capabilities needed to fairly and appropriately review the detention of enemy combatants, pursuant to habeas corpus petitions?

Answer. I am familiar with the Supreme Court’s decision in *Boumediene v. Bush*, 128 S.Ct. 2229 (2008). It is also my understanding that the exact procedures that will apply in the habeas cases that follow the *Boumediene* decision are still being considered by the District Court for the District of Columbia. I do not now have a personal belief about this issue. If confirmed, I will work closely with the Department of Justice to propose enhancements to current procedures and capabilities that may be necessary.

Question. What role would you expect to play, if confirmed, in reviewing the status of Guantanamo detainees and determining whether the United States should continue to hold such detainees?

Answer. If confirmed, I expect to provide legal advice to the Secretary of Defense on the status of the Guantanamo detainees and determinations whether the United States should continue to hold such detainees.

Question. The Military Commissions Act of 2006, authorized the trial of “alien unlawful enemy combatants” by military commission and established the procedures for such trials.

In your view, does the Military Commissions Act provide appropriate legal standards and processes for the trial of alien unlawful enemy combatants?

Answer. If confirmed, I intend to carefully review whether the Military Commissions Act strikes the right balance between protecting U.S. national security interests and providing appropriate legal standards and processes for a fair and adequate hearing.

Question. Under what circumstances, if any, do you believe that it would be appropriate to use coerced testimony in the criminal trial of a detainee?

Answer. If confirmed, I anticipate looking carefully at whether use of coerced testimony is ever appropriate in the criminal trial of a detainee.

Question. What role would you expect to play, if confirmed, in determining whether Guantanamo detainees should be tried for war crimes, and if so, in what forum?

Answer. Under the current structure, the General Counsel has no role in determining whether any particular Guantanamo detainee should be tried for war crimes. Rather, the Convening Authority makes the decision on which cases are referred to a military commission. If confirmed, I anticipate reviewing the current process to determine whether to recommend any changes to it.

Question. What role would you expect to play, if confirmed, in reviewing the Military Commissions Act and developing administration recommendations for any changes that may be needed to that Act?

Answer. If confirmed, I anticipate reviewing the Military Commissions Act to determine whether to recommend any legislative proposals to change it.

Question. What is your understanding of the relationship between the General Counsel of DOD and the legal advisor to the convening authority, the chief prosecutor, and the chief defense counsel for the military commissions?

Answer. It is my understanding that, for reporting purposes, these individuals are all under the cognizance of the Office of the General Counsel. The legal advisor to the convening authority reports to the Deputy General Counsel (Legal Counsel). Consistent with the Regulation for Trial by Military Commissions, the chief prosecutor reports to the legal advisor. The chief defense counsel reports to the Deputy General Counsel (Personnel and Health Policy).

CONTRACTORS ON THE BATTLEFIELD

Question. U.S. military operations in Iraq have relied on contractor support to a greater degree than any previous U.S. military operations. The extensive involvement of contractor employees in a broad array of activities—including security functions—has raised questions about the legal accountability of contractor employees for their actions.

Do you believe that current DOD regulations appropriately define and limit the scope of security functions that may be performed by contractors in an area of combat operations?

Answer. I know that both President-elect Obama and Secretary Gates are concerned about the oversight and accountability of private contractors in areas of combat operations. I am not now familiar with the specific provisions of the Department’s regulations in this area, but I recognize that this is an important issue. If confirmed, I will make review of the regulations one of my priorities.

Question. What changes, if any, would you recommend to such regulations?

Answer. If confirmed, I will review these regulations and, if appropriate, make recommendations for changes.

Question. Do you believe that current DOD regulations appropriately define and limit the scope of contractor participation in the interrogation of detainees?

Answer. As stated above, I am not now familiar with the specific provisions of the Department’s regulations in this area, but I recognize that this is an important issue. If confirmed, I will make review of these regulations one of my priorities.

Question. What changes, if any, would you recommend to such regulations?

Answer. If confirmed, I will review these regulations that would pertain to this matter and, if appropriate, make recommendations for changes.

Question. In October 2008, DOD announced a plan to award contracts in excess of \$300 million to U.S. contractors to conduct “information operations” through the Iraqi media.

In your view, is DOD’s use of private contractors to conduct information operations through the Iraqi media appropriate?

Answer. I am not fully familiar with the Department's use of private contractors to conduct information operations. If confirmed, I will review this issue. I recognize that this issue requires close scrutiny.

Question. Under what circumstances do you believe that it is appropriate for DOD to conduct information operations in a sovereign country without the knowledge and support of the host country?

Answer. I do not have enough information about information operations at this point to comment on when it would be appropriate for DOD to conduct such operations in a sovereign country without the knowledge and support of that country. If confirmed, I will study these matters carefully and ensure that DOD directives and policy on information operations are compliant with U.S. law. Again, I recognize that this is an issue that requires close scrutiny. I note also that in dealing with the media, DOD Public Affairs has an obligation to disseminate truthful and accurate information about military activities, consistent with security guidelines, to both domestic and international audiences.

Question. Office of Management and Budget (OMB) Circular A-76 defines "inherently governmental functions" to include "discretionary functions" that could "significantly affect the life, liberty, or property of private persons".

In your view, is the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations an inherently governmental function?

Answer. From my prior experience as General Counsel of the Air Force, I am generally familiar with OMB Circular A-76. I am also familiar with section 832 of the NDAA for Fiscal Year 2009 which provides the sense of Congress, regarding performance by private security contractors of certain functions in areas of combat operations. This is a sensitive and controversial area, which, if confirmed, I will study carefully.

Question. In your view, is the interrogation of enemy prisoners of war and other detainees during and in the aftermath of hostilities an inherently governmental function?

Answer. I am not now in a position to provide an informed view on this subject. I am generally familiar with OMB Budget Circular A-76 and am familiar with section 1057 of NDAA for Fiscal Year 2009, which reflects the sense of Congress regarding the interrogation of detainees by contractor personnel. Again, if confirmed, I will study this issue carefully.

Question. What role do you expect to play, if confirmed, in addressing the issue of what functions may appropriately be performed by contractors on the battlefield?

Answer. If confirmed, I intend to study this issue carefully and provide the appropriate legal advice and guidance.

Question. The Military Extraterritorial Jurisdiction Act (MEJA) was enacted in 2000 to extend the criminal jurisdiction of the U.S. courts to persons employed by or accompanying the Armed Forces outside the United States.

In your view, does MEJA provide appropriate jurisdiction for alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. I am generally aware of the provisions of the MEJA of 2000, Pub. L. No. 106-523, 114 Stat. 2488 (2000), as amended. See 18 U.S.C. §§3261-67. I am also aware that there have been legislative initiatives, including a bill introduced by then-Senator Barack Obama in February 2007, to explicitly cover MEJA's jurisdiction over contractors for Federal agencies other than DOD. I expect this legislative proposal will become a position of the new administration. I understand and appreciate the importance of appropriate accountability over all persons in support of our Armed Forces wherever located. If confirmed, I will give high priority to achieve that objective.

Question. What changes, if any, would you recommend to MEJA?

Answer. I am not now in a position to offer specific legislative changes to MEJA. If confirmed, I will give high priority to the Department's role in supporting this important law and provide advice when and where improvements are needed.

Question. What role would you expect to play, if confirmed, in developing administration recommendations for changes to MEJA?

Answer. If confirmed, to the extent that DOD develops recommendations for changes to MEJA to improve upon this law and its implementing procedures, I hope and expect to provide that necessary support. It is my understanding that the Office of the DOD General Counsel has been, since the enactment of MEJA, an integral player in implementing the act itself, and the processing of cases to the Department of Justice for consideration.

Question. Section 552 of the NDAA for Fiscal Year 2007 extended criminal jurisdiction of the military courts under the UCMJ to persons serving with or accom-

panying an Armed Force in the field during time of declared war or a contingency operation, such as our current operations in Iraq and Afghanistan.

In your view, does the UCMJ provide appropriate jurisdiction for alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. I strongly support the position that civilians serving with or accompanying our Armed Forces overseas who commit crimes should be appropriately held accountable. I do not now have an informed view about whether the UCMJ currently provides the appropriate jurisdictional reach.

Question. What is your view of the procedures agreed upon by the DOD and the Department of Justice to reconcile jurisdictional responsibilities under MEJA and the UCMJ?

Answer. I am aware generally that there are procedures to reconcile these responsibilities reflected in a Secretary of Defense memorandum of March 10, 2008. If confirmed, I intend to examine whether this memorandum strikes the appropriate balance in the exercise of criminal jurisdiction.

Question. What changes, if any, would you recommend to the UCMJ to ensure appropriate jurisdiction for alleged criminal actions of contractor employees?

Answer. I am not now prepared to offer specific suggestions or recommendations. If confirmed, I will examine this issue.

MILITARY JUSTICE MATTERS

Question. Article 6 of the UCMJ gives primary jurisdiction over military justice to the Judge Advocates General.

What is your understanding of the General Counsel's functions with regard to military justice and the Judge Advocates General?

Answer. In general, the DOD General Counsel has no direct role to play in specific military justice cases, or cases that may have military justice implications. Decisions in military justice cases are made by the commander of the accused, the convening authority, the military judge, and court members. The Service Courts of Criminal Appeals and the U.S. Court of Appeals for the Armed Forces provide appellate review of cases arising under the UCMJ, as does the U.S. Supreme Court through writs of certiorari. The Secretary of Defense becomes involved only in military justice in limited circumstances, and the General Counsel provides legal advice to the Secretary in those circumstances. The General Counsel, like the Secretary of Defense and other senior civilian and military officials in the Department, must avoid any action that may constitute unlawful command influence. I share the courts' oft-stated view that unlawful command influence is the "mortal enemy" of military justice.

See also my answers above concerning the Joint Service Committee on Military Justice and the Code Committee.

Question. In your view, how should the General Counsel approach military justice matters—both in terms of specific cases and general policy issues to provide useful advice without generating problems of unlawful command influence?

Answer. See my answers above to the preceding question concerning the role of the General Counsel.

PREVENTION OF AND RESPONSE TO SEXUAL ASSAULTS

Question. As required by section 577 of the Ronald W. Reagan NDAA for Fiscal Year 2005, DOD issued a new policy for the prevention of and response to sexual assaults involving members of the Armed Forces.

What is your assessment of the DOD policy as it pertains to the legal issues surrounding the investigation and prosecution of sexual assault cases?

Answer. I believe this is a very important issue and I intend to review it carefully if I am confirmed as General Counsel. I am aware of a Victim Witness Assistance Program to help victims of sexual assault navigate the military justice process.

Question. What is your view of the provision for restricted and unrestricted reporting of sexual assaults?

Answer. I dealt with this issue to some extent as General Counsel of the Air Force. Unrestricted reporting means law enforcement involvement and investigation that will ensue upon a report of sexual assault; restricted reporting allows a victim to disclose the details of the assault to specific individuals and receive medical treatment and counseling without involving law enforcement or triggering an automatic investigation. As I understand it, the goal of restricted reporting is to give the victim the support and confidence eventually to come forward with an unrestricted report so the offender can be held accountable. In all, there must be a balance between the need for the prosecution of sexual offenders on the one hand and the pri-

vacy and physical and mental well-being of the victim on the other. Finding the right balance is a delicate task. I do not now have a view about whether DOD has found that right balance.

Question. What is your understanding of the adequacy of DOD oversight of military service implementation of DOD and Service policies for the prevention of and response to sexual assaults?

Answer. I am currently unfamiliar with the adequacy of DOD oversight.

RELIGIOUS ACTIVITY IN THE ARMED FORCES

Question. What is your understanding of current policies and programs of the DOD and the Military Services regarding religious practices in the military?

Answer. My understanding is that the Secretary of Defense and his staff provide overall policy guidance, and the Secretaries of the Army, Navy, and Air Force provide supplemental guidance.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. I have not been in DOD for 8 years and, at this time, am not in a position to evaluate whether the current policies accommodate these important interests imbedded in our Constitution. I appreciate the importance of this issue. If confirmed, I hope and expect to review this issue in detail.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious belief?

Answer. See my answer to the prior question.

LAW OF THE SEA

Question. The United Nations Convention on the Law of the Sea (UNCLOS) is currently pending in the Senate.

What are your views on accession by the United States to UNCLOS?

Answer. Like the President-elect and the current administration, I support U.S. accession to the UNCLOS. My understanding is that there are important national security interests that are to be furthered by U.S. accession. If confirmed, I look forward to working within the new administration and with the Senate towards favorable action on the Convention during the 111th Congress.

Question. From a national security standpoint, what do you see as the legal advantages and disadvantages of the United States being a party to UNCLOS?

Answer. As I understand it, the Convention secures important freedom of navigation rights upon which our maritime forces must be able to rely without question. By not being a party to the Convention, the United States has had to rely on customary international law, which is not universally accepted and can change over time in ways that may not be in the best interests of the country. Being a party to the Convention places these important navigational rights on the strongest legal footing as treaty rights, and gives the United States a seat at the table in treaty-based institutions.

I do not see national security disadvantages of being a party to the Convention. Some suggest that being a party could subject our maritime forces to the jurisdiction of international tribunals. The Convention, however, expressly permits a party to exclude from international dispute settlement those matters that concern "military activities," and the United States could assert the exclusive right to determine what constitutes a military activity.

Question. In your view, is customary international law alone sufficient to safeguard U.S. navigational and overflight rights and freedoms worldwide?

Answer. No. See my prior answer.

PROCESSING THE ANNUAL DOD LEGISLATIVE REQUEST

Question. One of the current responsibilities of the General Counsel of DOD is to coordinate the Department's legislative program and to provide the Department's views on legislative proposals initiated from outside the Department

If confirmed, what actions will you take to ensure that the Department's legislative proposals are submitted in a timely manner to ensure ample opportunity for consideration by Congress before mark-up of the NDAA?

Answer. I understand that over the past 3 years, the Office of General Counsel has restructured the Department's Legislative Program specifically to ensure that the Department transmits the annual National Defense Authorization Bill to Con-

gress immediately after the President transmits his budget to Congress. If confirmed as DOD General Counsel, I will personally monitor this progress, and assess whether improvements in the process can be made.

Question. What actions would you take, if confirmed, to ensure Congress receives the Department's views on other proposed legislation in a timely manner?

Answer. When I was General Counsel of the Air Force, I was appalled at the slow turnaround time in responding to many letters from Congress. I recall one that took almost a year.

I am told that, over the past 2 years, the Office of General Counsel has worked closely with the Office of the Assistant Secretary of Defense for Legislative Affairs and OMB to improve the Department's responses to requests for views on congressional bills. If confirmed, I will work to ensure that the Department provides Congress with timely views on proposed legislation.

JUDICIAL REVIEW

Question. What is your understanding of the appropriate role of the Article III courts in the review of military activities?

Answer. The role of Article III courts in review of military activities has been addressed repeatedly by the Supreme Court and lower Federal courts. Historically, the courts have afforded great deference to the military in the conduct of its affairs. See, e.g., *Loving v. United States*, 517 U.S. 748, 767 (1996); *Gilligan v. Morgan*, 413 U.S. 1, 4, 10 (1973); *Orloff v. Willoughby*, 345 U.S. 83, 93-94 (1953). However, that deference is not without limits, and since September 11, 2001, the Supreme Court has found it necessary to assert itself in matters of national security and the conduct of military affairs. For example, in *Hamdi v. Rumsfeld*, 542 U.S. 507, 535-36 (2004), Justice O'Connor stated "whatever power the United States Constitution envisions for the executive in its exchanges with other nations or with enemy organizations in times of conflict, it most assuredly envisions a role for all three branches when individual liberties are at stake."

CLIENT

Question. In your opinion, who is the client of the General Counsel of the DOD?

Answer. DOD is the client.

LEGAL ETHICS

Question. What is your understanding of the action a DOD attorney should take if the attorney becomes aware of improper activities by a DOD official who has sought the attorney's legal advice and the official is unwilling to follow the attorney's advice?

Answer. Every DOD attorney is under an obligation to faithfully comply with all applicable laws and regulations. One such regulation, DOD Directive 5505.06, "Investigations of Allegations Against Senior Officials of the DOD," requires referral to the DOD IG of senior official misconduct, including allegations of a violation of criminal law or conflict of interest law. If a DOD attorney learns of improper activities by an official who has sought his or her legal advice but is unwilling to follow it, the attorney should immediately notify his or her legal supervisor (or the senior lawyer in the next higher level of his or her organization) for review and appropriate action by that higher level attorney. This is the appropriate avenue to escalate concerns to ensure that corrective action is promptly taken.

Question. Do you believe that the present limits on pro bono activities of government attorneys are generally correct as a matter of policy or does the policy need to be reviewed?

Answer. To my knowledge, the present limits on pro bono activities are appropriate. That said, I am aware that there are a number of opportunities for DOD attorneys to be involved in many types of pro bono activities. If confirmed, for example, I intend to encourage DOD attorneys to participate in bar association activity. I believe that involvement by DOD attorneys in professional legal associations contributes to professional development.

Question. In your view, do the laws, regulations, and guidelines that establish the rules of professional responsibility for attorneys in DOD provide adequate guidance?

Answer. With respect to professional responsibility rules in DOD, I am aware that all DOD attorneys are required to be licensed to practice in a State, the District of Columbia, or a United States commonwealth or territory. DOD attorneys must also adhere to the highest standards of professional conduct, including compliance with the rules of professional conduct of their State bar(s) and any supplemental requirements imposed by their DOD component. If confirmed, I will examine the adequacy of the professional responsibility rules for lawyers in the Office of the DOD General

Counsel and the DLSA, and make appropriate modifications or issue supplemental guidance if warranted.

ROLE IN THE OFFICER PROMOTION PROCESS

Question. In your view, what is the role of the General Counsel of DOD in ensuring the integrity and proper functioning of the officer promotion process?

Answer. It is essential that the integrity and independence of the promotion selection process be maintained. Based on my prior experience as General Counsel of the Air Force, I know that the Secretary of each Service, in consultation with his or her own general counsel and Judge Advocate General, has the initial responsibility to ensure that the promotion selection process for both regular and Reserve officers is in compliance with law and DOD policy. I am also aware that all reports of promotion selection boards are reviewed by the Office of the DOD General Counsel prior to final action on the report by the Secretary or Deputy Secretary of Defense. If the DOD General Counsel determines that a promotion selection board fails to conform to law or policy, it would be the duty of the General Counsel to inform the Secretary or Deputy Secretary of Defense of the irregularities and to recommend appropriate corrective action. Further, in providing advice to the Office of the Under Secretary of Defense for Personnel and Readiness, the General Counsel should ensure that officer promotion policies promulgated in DOD regulations fairly and accurately reflect provisions of law set out in title 10.

Question. What is the role of the General Counsel of DOD, if any, in reviewing and providing potentially adverse information pertaining to a nomination to the Senate Armed Services Committee?

Answer. It is my understanding that the Office of the DOD General Counsel reviews all nomination packages pertaining to general and flag officers with attributed adverse information before the package is forwarded to the Secretary or Deputy Secretary of Defense for approval. The General Counsel ensures that any adverse information attributed to such officers is supported by evidence in the associated reports of investigation. I am informed that the DOD General Counsel frequently provides specific advice to the Under Secretary of Defense for Personnel and Readiness, the Deputy Secretary of Defense, and the Secretary of Defense concerning difficult or unusual cases. The General Counsel also shares responsibility for ensuring that adverse information communicated to the Armed Services Committee is provided in an accurate, comprehensive, and timely manner. Further, I am advised that the DOD Office of General Counsel is actively involved in ensuring that the Armed Services Committee is notified in a timely manner about recently initiated investigations involving officers pending confirmation.

LITIGATION INVOLVING THE DEPARTMENT OF DEFENSE

Question. In your opinion, what is the relationship between DOD and the Department of Justice with respect to litigation involving DOD?

Answer. The Department of Justice has statutory responsibility to represent the United States, its agencies, and its officers, including DOD, in all litigation matters. See 28 U.S.C. § 516. However, DOD attorneys work directly with counsel at the Department of Justice in cases in which DOD, or one or more of its components or officials, is a party or has an interest. DOD attorneys review pleadings before they are filed with the courts, conduct and direct discovery, participate in making major litigation decisions, and in some cases serve as members of trial teams.

Question. In your view, does the Department need more independence and resources to conduct its own litigation or to improve upon its current supporting role?

Answer. If confirmed, I am sure I will review this issue.

COURT OF APPEALS DECISION

Question. On January 4, 2000, the United States Court of Appeals for the District of Columbia Circuit decided the case of *National Center for Manufacturing Sciences v. Department of Defense*, 199 F. 3d 507 (D.C. Cir. 2000). The court concluded that "Because of the existence of 10 U.S.C. section 114, it is clear that any monies appropriated for National Center for Manufacturing Sciences by Congress for research must be authorized before they can be appropriated and distributed"; and "Because 10 U.S.C. section 114(a)(2) requires authorization of these funds before they become available, appropriation alone is insufficient."

What is your view of the court's decision in this case and its implications regarding the obligation of funds that are appropriated, but not authorized?

Answer. I am generally aware of this case. It was decided while I was General Counsel of the Air Force. In addition, I am aware that there is doubt about whether funds can be utilized that are appropriated but not authorized. In my experience,

situations where funds have been appropriated but not authorized are often complex and may involve unique statutory language. As a result, if confirmed, I hope and expect that the Department, and the DOD General Counsel, will continue its practice of working closely with our oversight committees whenever this situation appears to be presented.

ROLE IN MILITARY PERSONNEL POLICY MATTERS

Question. What role, if any, should the General Counsel play in military personnel policy and individual cases, including cases before the Service boards for the correction of military records?

Answer. The potential range of issues that might require legal advice from the DOD General Counsel's office is very broad. The Office of General Counsel provides legal advice with respect to policy issues pertaining to military personnel, working closely with the Office of the Under Secretary of Defense for Personnel and Readiness, which has overall responsibility for departmental guidance for the correction boards.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next General Counsel of DOD?

Answer. Regardless of the substantive issues facing the Department, the military and civilian attorneys in the Department must work collaboratively to provide the highest quality, timely service to the Department and its leadership.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I plan to work closely with both the senior civilian and military attorneys across the Department to build the critical relationships necessary to successfully serve our clients in the highest traditional of public service.

MOST SERIOUS PROBLEMS

Question. What do you consider to be the most serious problems in the performance of the functions of the General Counsel of DOD?

Answer. There is always room for improvement, but I believe the DOD General Counsel's office is one of the finest law offices I have encountered, with many talented, dedicated, and extraordinary career professionals. Since I last worked in the Pentagon, the challenges facing DOD General Counsel have become far more complex in the post-September 11 world. It will be the highest honor of my professional career to lead this fine group of men and women in meeting those challenges.

Question. What management actions and timelines would you establish to address these problems?

Answer. If confirmed, I will encourage the Department's senior civilian and military attorneys to work collaboratively to provide timely legal advice of the highest quality to our clients.

Question. What do you see as the greatest legal problems facing the Department in the coming year?

Answer. The world has changed since I last worked in the Pentagon in January 2001, and my single greatest reason for wanting to return to public service is to help combat international terrorism. I was a personal witness to the events of September 11, 2001. We must imagine, prepare for, and try to prevent the next attack, not the last one, and the greatest challenge of the DOD General Counsel going forward will be to find legal solutions and the best legal advice to promote our national security while safeguarding our individual liberties and American values.

Question. Does the Office of the General Counsel have the resources to deal with these problems and do its everyday work?

Answer. If confirmed, I will assess whether the resources available to the DOD General Counsel are sufficient to perform the tasks described above.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate

and necessary security protection, with respect to your responsibilities as the General Counsel of the DOD?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR DANIEL K. AKAKA

GUANTANAMO BAY REVIEWS

1. Senator AKAKA. Mr. Johnson, DOD conducts Administrative Review Boards at Guantanamo Bay (GTMO) to determine if a detainee will be released, transferred, or retained. According to a Pentagon spokesman on the GTMO issue, "Since 2002, 61 former detainees have committed or are suspected to have committed attacks after being released from the detention camp." This number has increased since a March 2008 Pentagon report cited 37 former detainees had been suspected of terrorist activities. In your view, to what extent has the Administrative Review Boards been able to establish effectively mitigation of risk that a released/transferred detainee will return to the fight?

Mr. JOHNSON. I am aware of Administrative Review Boards and the role they play. However, I do not have enough information about Administrative Review Boards at this point to comment on their effectiveness, including whether Administrative Review Boards effectively consider the risk that a detainee will "return to the fight." If confirmed, I expect to examine this issue carefully as part of the detainee review ordered by the President.

QUESTION SUBMITTED BY SENATOR BILL NELSON

SEXUAL ASSAULTS IN IRAQ AND AFGHANISTAN

2. Senator BILL NELSON. Mr. Johnson, untold numbers of sexual assaults have been committed in Iraq and Afghanistan by executive branch contractors and employees. In 2007, I sent letters regarding sexual assault to the Secretaries of Defense and State and the Attorney General. On December 13, 2007, I wrote to Secretary of Defense Gates, requesting that he launch an investigation by the Defense Department's Inspector General (DOD/IG) into rape and sexual assault cases in Iraq and Afghanistan. Following my letters, the DOD/IG stated that the Army Criminal Investigation Command (CID) investigated 41 sexual assaults in Iraq in 2005, 45 sexual assaults in 2006, and 38 sexual assaults in 2007. These numbers are limited to only 3 years' worth of investigations by the Army in Iraq. They do not include investigations for both theaters of operations nor all the Services operating in Iraq and Afghanistan. Consequently, there could be many additional investigations and assaults that have not been investigated. Also, because the DOD/IG would not provide information on the status of its investigations, it remains unclear how many of these cases have been prosecuted and/or processed within the military or criminal justice systems. If confirmed, how will you work with your counterparts at the Departments of State, Justice, and other executive branch departments with regard to contractor crimes in Iraq and Afghanistan?

Mr. JOHNSON. Regrettably, as you state, there have been reported cases of sexual assaults committed in Iraq and Afghanistan. By any measure, these numbers are unacceptable. Even one case of sexual assault is one too many. In 2004, DOD created the Sexual Assault and Prevention Office to establish policy and procedures to address the various issues and difficulties encountered by victims of sexual assault worldwide. I understand also that attorneys of the Office of the General Counsel have been instrumental in providing legal advice and guidance in the development and implementation of those various policies. I am told that attorneys in the Office of the General Counsel work closely with Department of Justice officials on all reported cases of crimes committed in Iraq and Afghanistan where there is the possi-

bility of prosecution under the Military Extraterritorial Jurisdiction Act or other Federal criminal jurisdiction, and cases involving civilians during contingency operations for which the recently-expanded jurisdiction of the Uniform Code of Military Justice is available. If I am confirmed, I will see to it that the Office of the General Counsel will continue to be in the forefront of these efforts to hold accountable those who commit crimes while serving with or accompanying the Armed Forces outside the United States, as well as civilian contractors or employees of other Federal agencies whose employment relates to supporting the DOD mission overseas.

QUESTION SUBMITTED BY SENATOR MARK PRYOR

BREAKDOWN OF COMMUNICATION

3. Senator PRYOR. Mr. Johnson, the Senate Armed Services Committee report of its Inquiry into the Treatment of Detainees in U.S. Custody discovered a fundamental breakdown in communication between the respective Services' Counsels and that of DOD General Counsel. Such a breakdown could even be interpreted as General Counsel's blatant disregard for the opinion and counsel from the uniformed services. I believe the committee's report is quite clear about this correlation. As General Counsel to the Secretary of Defense, how will you establish a better working relationship with the Services to keep such a breakdown in communication from ever happening again?

Mr. JOHNSON. I was General Counsel of the Air Force from October 1998 to January 2001. As such, I appreciate the role the Service General Counsels play and their importance within the overall DOD legal community. Further, while Air Force General Counsel, I had extensive experience working in a collegial and collaborative fashion with The Judge Advocate General of the Air Force and his staff to deliver effective legal service and advice to the Air Force's leadership. If confirmed as General Counsel of DOD, I intend to continue that kind of positive working relationship with all Judge Advocates General and the Staff Judge Advocate to the Commandant of the Marine Corps.

As I stated during my testimony on January 15, my approach to legal analysis includes hearing from other senior counsel, such as The Judge Advocates General, as well as junior military and civilian lawyers working on the issue. Moreover, if I know that the Department's military lawyers have a strong view on a matter, I have in the past, and expect in the future, if confirmed, to include The Judge Advocates General collaboratively in discussions and deliberations on such issues. I believe that having the input of a cross-section of the Department's lawyers is important to being able to provide the best legal advice to the senior civilian and military leadership.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

DETAINEES

4. Senator MCCAIN. Mr. Johnson, the Detainee Treatment Act of 2005 provides that no individual in the custody or under the physical control of the United States Government, regardless of nationality or physical location, shall be subject to cruel, inhuman, or degrading treatment or punishment. Do you agree that this standard applies to all detainees in U.S. custody, including those detained by the military but who may be subject to interrogation by other U.S. Government agencies?

Mr. JOHNSON. Yes.

5. Senator MCCAIN. Mr. Johnson, if confirmed, how do you intend to ensure the standard is followed by U.S. forces worldwide?

Mr. JOHNSON. If confirmed, as part of the detainee review ordered by the President, I intend to examine thoroughly all detainee-related regulations and directives to ensure that this standard is clearly and effectively communicated throughout the Department and to U.S. forces worldwide.

GUANTANAMO BAY

6. Senator MCCAIN. Mr. Johnson, President-elect Obama has said he wants to close the military detention facility at GTMO. If confirmed, how would you go about executing the President-elect's policy? How would you approach this challenge?

Mr. JOHNSON. The President has directed the closure of the detention facilities at GTMO, in an Executive order signed on January 22, 2009. If confirmed, I expect

to provide legal advice to the Department as it works closely with other departments and agencies to implement all aspects of this important Executive order.

QUESTION SUBMITTED BY SENATOR SUSAN COLLINS

GUANTANAMO BAY

7. Senator COLLINS. Mr. Johnson, President-elect Obama has indicated his desire to close the detention facility at Naval Station Guantanamo Bay. What would be your recommendation to Secretary Gates as to what to do with the detainees once GTMO is closed?

Mr. JOHNSON. The President has directed the closure of the detention facilities at GTMO, in an Executive order signed on January 22, 2009. If confirmed, I expect to provide legal advice to the Department as it works closely with other departments and agencies to implement all aspects of this important Executive order. At this point, I do not have specific recommendations for Secretary Gates about what to do with any remaining detainees once GTMO is closed. In my view, decisions concerning the detainees should be guided by several principles: adherence to the laws and American values; public safety; bringing to justice those detainees who can and should be prosecuted; and the risk of recidivism, i.e., the risk that a detainee released or transferred could return to the fight.

[The nomination reference of Jeh Charles Johnson follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 20, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Jeh Charles Johnson, of New York, to be General Counsel of the Department of Defense, vice William J. Haynes II, resigned.

[The biographical sketch of Jeh Charles Johnson, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF JEH C. JOHNSON

Jeh Charles Johnson is a partner in the New York City-based law firm of Paul, Weiss, Rifkind, Wharton & Garrison, LLP.

Mr. Johnson's career has been a mixture of successful private law practice (as an experienced trial lawyer) and distinguished public service (as a Federal prosecutor and presidential appointee). In private practice, Mr. Johnson has personally tried some of the highest stakes commercial cases of recent years. At age 47, he was elected a Fellow in the prestigious American College of Trial Lawyers. His experience as a trial lawyer began in 1989–1991, as an Assistant United States Attorney in the Southern District of New York, where he prosecuted public corruption cases.

In 1998, Mr. Johnson left Paul, Weiss for 27 months when President Clinton appointed him General Counsel of the Department of the Air Force. In 2004, Mr. Johnson served as Special Counsel to John Kerry's presidential campaign. He was also actively involved in Barack Obama's presidential campaign as an advisor on national security and international law issues. In January 2007, Mr. Johnson was nominated by the bipartisan New York State Commission on Judicial Nomination to be Chief Judge of New York. The incumbent Judith Kaye was reappointed by Governor Spitzer. Mr. Johnson was rated "well-qualified" for the position by the New York State Bar Association—the highest rating it can give.

While in private practice, Mr. Johnson is active in professional and community activities. From 2001–2004, he was Chair of the Judiciary Committee of the New York City Bar Association, which rates and approves all the Federal, state and local judges in New York City. He now serves on the Executive Committee of the City Bar.

Mr. Johnson is a member of the Council on Foreign Relations and the American Law Institute. He currently serves on the Board of Governors of the Franklin and

Eleanor Roosevelt Institute and the Board of Advisors of the National Institute of Military Justice. Mr. Johnson is a past or present director or trustee of Adelphi University, the Federal Bar Council, the Fund for Modern Courts, the New York Community Trust, the Legal Aid Society, the Delta Sigma Theta Research and Education Fund, the Vera Institute, the Lawyers' Committee for Civil Rights Under Law, the New York Hall of Science, the Film Society of Lincoln Center and the New York City Bar Fund, Inc. in 1995–1997.

Mr. Johnson graduated from Morehouse College in 1979 and Columbia Law School in 1982.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Jeh Charles Johnson in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Jeh Charles Johnson.
2. **Position to which nominated:**
General Counsel of the Department of Defense.
3. **Date of nomination:**
Intention to nominate issued January 8, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
September 11, 1957; New York, NY.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Dr. Susan M. DiMarco.
7. **Names and ages of children:**
Jeh Charles Johnson, Jr. (born September 19, 1994).
Natalie Marguerite Johnson (born December 6, 1995).
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Morehouse College, August 1975–May 1979, B.A. 1979.
Columbia University School of Law, August 1979–May 1982, J.D. 1982.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Associate; Sullivan & Cromwell; 125 Broad Street; New York, NY; September 1982–October 1984.

Associate; Paul, Weiss, Rifkind, Wharton & Garrison LLP; 1285 Avenue of the Americas; New York, NY; November 1994–December 1988.

Assistant United States Attorney; One Saint Andrews Plaza; New York, NY; January 1989–December 1991.

Associate, then partner; Paul, Weiss, Rifkind, Wharton & Garrison LLP; 1285 Avenue of the Americas; New York, NY; January 1992–October 1998.

Adjunct lecturer of law (in trial practice) (volunteer, part-time); Columbia University School of Law; 435 West 116th Street; New York, NY; January 1995–April 1997.

General Counsel of the Department of the Air Force; Room 4E856; 1740 Air Force Pentagon; Washington, DC; October 1998–January 2001.

Partner; Paul, Weiss, Rifkind, Wharton & Garrison LLP; 1285 Avenue of the Americas; New York, NY; January 2001–present.

10. Government experience: List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Transition Team for President-elect Barack Obama, November 2008–December 2008.

Transition Team for NYS Attorney General Andrew Cuomo, November 2006–December 2006.

Congressional Intern, The Honorable Hamilton Fish, Jr.; Poughkeepsie, NY; May 1980–August 1980.

Senate Intern; The Honorable Daniel P. Moynihan; Washington, DC; May 1978–August 1978.

Congressional Intern; The Honorable Hamilton Fish, Jr.; Washington, DC; July 1977.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Partner; Paul, Weiss, Rifkind, Wharton & Garrison, LLP (law firm).

Board of Governors, Franklin and Eleanor Roosevelt Institute.

Director, Federal Bar Foundation.

Member and Executive Committee member, New York City Bar Association.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

See the response to question 11 above.

Member, American Bar Association.

Fellow, American College of Trial Lawyers.

Member, Counsel on Foreign Relations.

Member, Rockefeller Center Club (lunch club).

Member, Nisi Prius (lunch club).

Member, Bradford Swim & Tennis Club (local club for family in New Jersey).

Member, American Law Institute.

Member, Sigma Pi Phi fraternity.

Member, National Institute of Military Justice.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

Member, Dutchess County (New York) Republican Committee (1980–1981).

Member, New York County Democratic Committee (1993–1994).

Delegate, Democratic National Convention (2008).

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

National Finance Committee, Obama for America (2007–2008).

New York State Counsel to Obama for America (2008).

Special Counsel, John Kerry for President, Inc. (2008).

See also the response 13(c) below.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

10/18/2008, Nebraskans for Kleeb \$500.

10/05/2008, Jill Morgenthaler for Congress, \$250.
 09/30/2008, Linda Stender for Congress, \$500.
 09/26/2008, New Jersey Democratic State Committee, \$5,000.
 09/23/2008, Bill Richardson for President Inc., \$1,000.
 09/16/2008, Democratic National Committee, \$28,460.
 07/31/2008, Hillary Clinton for President, \$2,300.
 07/29/2008, Friends of Kevin Parker, \$1,000.
 07/24/2008, Obama Victory Fund, \$2,300.
 07/09/2008, Committee to Re-Elect Eric Adams, \$1,000.
 05/29/2008, Friends of Mark Warner, \$2,300.
 05/07/2008, Lautenberg for Senate, \$1,000.
 04/23/2008, People for Chris Gregoire, \$500.
 04/22/2008, Andre Carson for Congress, \$2,000.
 04/20/2008, Senate 2008, \$2,000.
 04/01/2008, Patrick Murphy for Congress, \$2,300.
 03/29/2008, Paul Hodes for Congress, \$1,300.
 03/31/2008, Gillibrand for Congress, \$500.
 03/21/2008, Waltner for Congress, \$500.
 03/11/2008, Al Franken for Senate, \$1,000.
 03/07/2008, Karim Camara, \$1,500.
 02/13/2008, Cyrus Vance, Jr. for District Attorney, \$1,000.
 12/31/2007, Paul Hodes for Congress, \$1,000.
 12/01/2007, John Hall for Congress, \$500.
 09/30/2007, Friends of Dick Durbin Committee, \$500.
 09/25/2007, Democratic Governors Association, \$500.
 09/25/2007, Linda Stender for Congress, \$1,000.
 09/18/2007, Our Common Values PAC, \$500.
 08/21/2007, Citizens for Harkin, \$2,000.
 07/09/2007, Conyers for Congress, \$2,000.
 06/13/2007, Friends for Gregory Meeks, \$500.
 05/31/2007, Patrick Murphy for Congress, \$2,300.
 03/27/2007, Friends of Jim Clyburn, \$1,500.
 03/01/2007, Kerry-Edwards 2004, Inc. General Election Legal and Accounting
 Compliance Fund, - \$2,000.
 02/09/2007, Linda Stender for Congress, \$300.
 01/23/2007, Obama for America, \$2,300.
 12/11/2006, Hopefund Inc., \$4,000.
 11/04/2006, Harold Ford Jr. for Tennessee, \$1,500.
 09/21/2006, Harold Ford Jr. for Tennessee, \$2,000.
 09/07/2006, Linda Stender for Congress, \$1,600.
 08/18/2006, Richardson for Governor, \$1,000.
 08/04/2006, James Webb for U.S. Senate, \$2,100.
 06/25/2006, Patterson for Attorney General, \$200.
 06/17/2006, Linda Stender for Congress, \$500.
 06/15/2006, Hopefund Inc., \$1,000.
 06/12/2005, Democratic National Committee, \$2,000.
 06/07/2006, Spitzer 2006, \$2,000.
 06/06/2006, Menendez for Senate, \$2,100.
 06/06/2006, Menendez for Senate, \$2,100.
 05/26/2006, Friends of Hillary, \$1,000.
 05/20/2006, Lee Harris for Memphis, \$250.
 04/13/2006, Democratic National Committee, \$1,000.
 03/28/2006, Bill Nelson for Senate, \$1,000.
 03/20/2006, David Yassky for Congress, \$250.
 02/06/2006, Harold Ford Jr. for Tennessee, \$1,000.
 12/06/2005, Friends of Rahm Emanuel, \$2,000.
 11/07/2005, Cam Kerry Committee, \$500.
 11/02/2005, Spitzer 2006, \$1,000.
 05/15/2005, Spitzer 2006, \$1,000.
 04/25/2005, Carol March for Mayor, \$250.
 04/13/2005, Deval Patrick, \$500.
 01/08/2005, Mark Green for Attorney General, \$1,000.
 11/23/2004, Jun Choi for Assembly, \$100.
 09/12/2004, Kerry-Edwards Victory 2004, \$1,000.
 07/08/2004, Obama for Illinois Inc., \$250.
 06/08/2004, Obama for Illinois Inc., \$250.
 06/06/2004, Garodnick for New York, \$1,000.
 05/19/2004, Spitzer 2006, \$1,000.

05/07/2004, Max Sandlin for Congress, \$100.
04/23/2004, Texas Fund, \$500.
04/05/2004, Rahm Emanuel for Congress, \$1,000.
03/01/2004, Rangel for Congress, \$100.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Recipient, DOD Decoration for Exceptional Civilian Service, 2001.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

“Mock Juries, Why Use Them?” Litigation Magazine (article on use of mock juries, written in July 2008, to be published).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

[Nominee responded and the information is contained in the committee’s executive files.]

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JEH CHARLES JOHNSON.

This 12th day of January, 2009.

[The nomination of Jeh Charles Johnson was reported to the Senate by Chairman Levin on February 5, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on February 9, 2009.]

NOMINATIONS OF DR. ASHTON B. CARTER TO BE UNDER SECRETARY OF DEFENSE FOR ACQUISITION, TECHNOLOGY, AND LOGISTICS; DR. JAMES N. MILLER, JR., TO BE DEPUTY UNDER SECRETARY OF DEFENSE FOR POLICY; AND AMBASSADOR ALEXANDER R. VERSHBOW TO BE ASSISTANT SECRETARY OF DEFENSE FOR INTERNATIONAL SECURITY AFFAIRS

THURSDAY, MARCH 26, 2009

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:35 a.m. in room SH-216, Hart Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Lieberman, Reed, McCaskill, Hagan, Begich, Burr, McCain, Inhofe, Sessions, Chambliss, Thune, Burr, and Vitter.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Madelyn R. Creedon, counsel; Richard W. Fieldhouse, professional staff member; Mark R. Jacobson, professional staff member; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; William G.P. Monahan, counsel; Russell L. Shaffer, counsel; and William K. Sutey, professional staff member.

Minority staff members present: Joseph W. Bowab, Republican staff director; Pablo E. Carrillo, minority investigative counsel; Richard H. Fontaine, Jr., deputy Republican staff director; Paul C. Hutton IV, professional staff member; Daniel A. Lerner, professional staff member; David M. Morriss, minority counsel; Lucian L. Niemeyer, professional staff member; Christopher J. Paul, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Kevin A. Cronin, Jessica L. Kingston, and Christine G. Lang.

Committee members' assistants present: Jay Maroney, assistant to Senator Kennedy; Christopher Griffin and Vance Serchuk, assistants to Senator Lieberman; Elizabeth King, assistant to Senator Reed; Christopher Caple, assistant to Senator Bill Nelson; Jon Davey, assistant to Senator Bayh; Gordon I. Peterson, assistant to

Senator Webb; Michael Harney, assistant to Senator Hagan; Brady King, assistant to Senator Burr; Anthony J. Lazarski, assistant to Senator Inhofe; Lenwood Landrum and Sandra Luff, assistants to Senator Sessions; Clyde A. Taylor IV, assistant to Senator Chambliss; Jason Van Beek, assistant to Senator Thune; Dan Fisk and Brian W. Walsh, assistants to Senator Martinez; Chris Joyner and Kevin Kane, assistants to Senator Burr; Michael T. Wong, assistant to Senator Vitter; and Chip Kennett, assistant to Senator Collins.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee today considers the nominations of Ashton Carter to be Under Secretary of Defense for Acquisition, Technology, and Logistics (AT&L); James Miller to be Deputy Under Secretary of Defense for Policy; and Alexander Vershbow to be Assistant Secretary of Defense for International Security Affairs.

Each of our nominees has a long track record of public service. Dr. Carter served as Assistant Secretary of Defense for International Security Policy from 1993 to 1996. Since that time he's continued to serve as a member of the Defense Science Board and the Defense Policy Board, co-chair of the Review Panel on Future Directions for the Defense Threat Reduction Agency, member of the National Missile Defense White Team, and a member of the National Academy of Sciences Committee on International Security and Arms Control.

Dr. Miller served as Deputy Assistant Secretary of Defense for Requirements, Plans, and Counterproliferation Policy from 1997 to 2000 and as a professional staff member for the House Armed Services Committee from 1988 to 1992.

Mr. Vershbow is a career foreign service officer who has served as Ambassador to the Republic of Korea from 2005 to 2008, as Ambassador to Russia from 2001 to 2005, and as Ambassador to the North Atlantic Treaty Organization (NATO) from 1998 to 2001.

We welcome our witnesses and we welcome their families to today's hearing. Senior Department of Defense (DOD) officials put in long hours every day. We appreciate the sacrifices that our nominees and their families—and we emphasize that—are willing to make to serve their country.

Dr. Carter, if confirmed, will assume leadership of DOD's acquisition organization at a particularly difficult time. According to recent estimates, the Department's 95 Major Defense Acquisition Programs (MDAPs) have exceeded their research and development budgets by an average of 40 percent, seen their acquisition costs grow by an average of over 25 percent, and experienced an average schedule delay of almost 2 years.

Last summer, the Government Accountability Office (GAO) reported that cost overruns on these major acquisition programs now total \$295 billion over the original estimates, even though we have cut unit quantities and reduced performance expectations on many programs in an effort to hold down costs. These problems are the consequence of the Department's continuing failure to develop reasonable cost and schedule estimates at the beginning of program, failure to establish realistic performance expectations, failure to

use mature technologies, and failure to avoid costly changes to program requirements, production quantities, and funding levels in the middle of ongoing programs.

Over the last few years, these problems have been compounded by an alarming lack of acquisition planning across the Department, the excessive use of time and materials contracts, undefinitized contracts and other open-ended commitments with DOD funds, and a pervasive failure to perform contract oversight and management functions necessary to protect the taxpayers' interest.

Dr. Miller will join DOD when almost 200,000 U.S. soldiers, sailors, airmen, and marines are deployed in harm's way in Iraq and Afghanistan alone. Dr. Miller will play a key role in facing the challenge of managing the transition between two ongoing wars, drawing down in Iraq as we build up in Afghanistan. He will help shape our policies in other key areas around the world, from countering the potential threat of a nuclear Iran to developing a common approach with our international partners for addressing North Korea. He will also help lead the 2010 Quadrennial Defense Review (QDR), which should get underway in the near future.

Ambassador Vershbow when he becomes Assistant Secretary of Defense for International Security Affairs will have the responsibility for helping to develop the Department's policies relating to Iraq, the Middle East, Europe, Africa, and Eurasia. In this capacity he will oversee our relations with our NATO partners who are contributing to coalition operations in Afghanistan, Kosovo, and elsewhere. He is also likely to play a key role as we seek to improve our relations with Russia, a country where he served with distinction as Ambassador for 5 years.

I look forward to the testimony of our nominees on these issues.

Senator McCain is on his way, and in a way it's a break that he's a little bit late because that gives us an opportunity to call on Senator Lieberman, who has another responsibility as chairman of the Senate Homeland Security and Governmental Affairs Committee in just a few minutes. So we're going to call on you, Senator Lieberman, for your introduction. We're delighted you're here.

**STATEMENT OF HON. JOSEPH I. LIEBERMAN, U.S. SENATOR
FROM THE STATE OF CONNECTICUT**

Senator LIEBERMAN. Thank you very much, Mr. Chairman. I appreciate your courtesy. I'm sorry that I can't stay for the hearing because we have one in Homeland Security and some nominees.

I must say, this gives me a different perspective on the committee and the staff, being at this lower altitude.

Chairman LEVIN. We hope you'll remember that. [Laughter.]

Senator LIEBERMAN. Exactly. I was going to say, I will show you more than the normal respect than I do from this altitude.

Thank you. I'm here to introduce and to support the nomination of Dr. Ash Carter, but I must say that these are three remarkable individuals. We are very fortunate that they are prepared to serve our country, and I think it shows President Obama's good judgment and really high standards in making these picks.

I must say as a U. Conn. [University of Connecticut] Huskies fan that my confidence in the President's judgment has been shaken

somewhat by his failure to put the Huskies in the Final Four for the NCAA [National Collegiate Athletic Association] brackets.

Chairman LEVIN. He has a lot on his plate, so I think it's understandable.

Senator LIEBERMAN. I understand. My confidence has been shored up by these three nominees.

I am here to introduce Ash Carter. I suppose that my constituency claim to Ash is that he spent 4 great years of his life in New Haven, CT, at college. But we've come to know each other very well over the ensuing years. I'm proud to consider him a friend. I've greatly benefited from his thinking on matters of national security. He has an extraordinary CV, which is before you: a double major, interestingly, in medieval history and physics at Yale; then a Rhodes scholarship and a doctorate at Oxford in theoretical physics.

Of course, he comes to us now from his position on the faculty at the Kennedy Center at Harvard. He served on the Defense Science Board from 1991 to 1993, and then as Assistant Secretary of Defense for International Security Policy. He was in that position for 4 years, during his tenure led the multi-billion dollar Cooperative Threat Reduction, the Nunn-Lugar Program supporting the removal of nuclear, biological, and chemical weapons from the former Soviet Union; and worked very closely with former Defense Secretary William Perry.

He really brings a remarkable array of talents to this position of Under Secretary of Defense for AT&L. He combines both program execution experience with remarkable capability to both formulate and see through policy transformations. Ash Carter understands that the acquisition part of this position is of intense interest to members of this committee, to Congress, to the country, because of the persistent overruns in the cost of systems that we are acquiring. He understands our concern about the number and quality of acquisition personnel. I think he really will bring a tough, fresh, pro-taxpayer, pro-national security view to this work.

As I say, he has remarkable policy judgment and policy experience, which I think will benefit the Department overall on some of the major questions about, particularly in a resource-constrained environment, which systems should we acquire. For instance, how can we through the acquisition process implement the high hopes of the Goldwater-Nichols joint warfighting vision, which has been realized in many ways and still not fully in acquisition.

I can go on a long time about Ash Carter. I will just say that I think we're very fortunate in him and his wonderful family that's with him, and that he's agreed to come back to Washington to serve our Nation. We will all be better and safer as a result of it, and of course I hope that our committee will recommend him favorably to the Senate.

Thank you very much, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Lieberman. Your introduction's not only significant to Dr. Carter, it's very significant, of course, to us. Thank you for working this into your schedule. Senator Kennedy also has an introduction for Dr. Carter and we'll put a copy of that statement into the record here.

PREPARED STATEMENT BY SENATOR EDWARD M. KENNEDY

It's a privilege to welcome Ash to the Senate Armed Services Committee and I look forward to his confirmation as Under Secretary of Defense for Acquisition, Technology, and Logistics. I know that Ash has impressive plans for the Department of Defense and I look forward to working with him on a range of issues.

Ash brings a wealth of experience to this position both from the private sector and his role as Assistant Secretary of Defense for International Security Policy under President Clinton. Most recently, he's been Ford Foundation Professor of Science and International Affairs at the Kennedy School at Harvard, where he led the faculty as Chair of the Department of International Relations, Security and Science. He is also a trustee at the Mitre Corporation and an adviser at MIT's Lincoln Laboratory and Draper Laboratory.

Ash has been a respected leader in national security for many years. Now more than ever, the Nation needs his skills and commitment. I strongly support his nomination, and I look forward very much to his confirmation by the Senate.

Senator McCain.

STATEMENT OF SENATOR JOHN McCAIN

Senator McCAIN. Thank you, Mr. Chairman.

Thanks, Senator Lieberman, for introducing our nominees today. Dr. Carter and Dr. Miller each have previously served in the Office of the Secretary of Defense (OSD), and Ambassador Vershbow, you have a distinguished career of service in the Foreign Service. I thank you all for your willingness to serve in these extraordinary positions of importance in DOD.

Dr. Miller and Ambassador Vershbow, I expect that they're awaiting your arrival. Your responses to the committee's advance policy questions (APQs) reflect, I believe correctly, the high priority that must be placed on achieving success in Iraq and Afghanistan. I look forward to working with you.

Dr. Carter, the need for comprehensive acquisition reform at DOD is an imperative. The American people can't afford the costly weapons procurement failures and mismanagement we've seen in the past. If confirmed as Under Secretary of Defense for AT&L, obviously you must ensure that acquisition decisionmaking is fiscally sound and responsive to our national security imperatives.

Perhaps no two programs reflect the problems in DOD procurement more than the F-35 Joint Strike Fighter (JSF) program and the Army's Future Combat Systems (FCS) program. The cost of the JSF program has increased 47 percent since 2001, from \$65 million to \$105 million per aircraft. What's even more troubling is that we don't know how much higher the cost of the program will go because the program is scheduled to buy 360 aircraft under a cost reimbursable contract, with only 2 percent of its development flight testing completed and critical technologies essential for the program remaining immature.

Similarly, the FCS program, according to GAO, is "unlikely to be executed within the Department's \$159 billion cost estimate." In fact, consensus is emerging that the cost of that program is likely to balloon to over \$200 billion. Yet, having already invested billions in that program, the Army is in many respects closer to the beginning of development than it is to the end.

Adding to the existing litany of failed or failing major defense programs, the status of the JSF and FCS programs lead to the unavoidable conclusion that the current acquisition process is broken. I won't go into the presidential helicopter issue.

Unless difficult decisions are made and serious reform measures undertaken, our ability to provide for our national security will be over time fundamentally compromised. The endless cycle of runaway costs, prolonged delivery schedules, and poor performance in the acquisition of major weapons has in my view mired us in a form of unilateral disarmament.

Dr. Carter, your cumulative experience and expertise in a wide range of defense-related matters is notable. However, I do have concerns about your lack of in-depth experience in acquisition-related matters. I'll look forward to your telling us about that. By the same token, I understand that experience alone is no guarantee of success in the arena you're about to enter.

I sincerely hope that you will bring needed clarity of vision and skill in management to this position. I look forward to your testimony.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

Now, we do expect Senator Reed to be here at any moment to make his introduction of Dr. Miller, but we are going to proceed and if he is able to get here he will make that introduction at that time.

I would suggest, Ambassador Vershbow, that you now move over one seat to your right and shift your name plate for us.

I will ask you first for your opening statements. Dr. Carter, let me call on you first, and then I'll ask you the standard questions when you're all done with your statements. Dr. Carter.

STATEMENT OF ASHTON B. CARTER, PH.D., NOMINEE TO BE UNDER SECRETARY OF DEFENSE FOR ACQUISITION, TECHNOLOGY, AND LOGISTICS

Dr. CARTER. Thank you, Mr. Chairman, members. Thank you for giving me the opportunity to appear before you as the nominee for the position of Under Secretary of Defense for AT&L. I thank Senator Lieberman for introducing me, and my wonderful wife Stephanie and my daughter Ava and my son Will for their support.

I'm humbled, but challenged, by the magnitude of President Obama's, Secretary Gates', and this committee's needs for this job in these times, times in which the world is perilous, but moreover when the perils are changing rapidly, times of severe budget pressures against a background of economic crisis, and times of poor performance in how we conceive and buy the defense systems we need, poor performance that is widely acknowledged.

What is not changing is that the world looks to the United States to use its power for good, and that power depends in the first measure on the impressive quality of the soldiers, sailors, airmen, and marines who make up our military, but importantly also on the equipment and technology they have.

I seek the consent of this committee and the Senate for this job. The constitutional phrase is "advice and consent." I certainly require your consent. But in view of the challenges to the Department, I'm going to need your advice, too. Some of that advice is contained in your legislation, the Weapons Acquisition Reform Act of 2009. I've read it carefully and I endorse its aims. If confirmed, I pledge to you, Mr. Chairman, to you, Senator McCain, and the

other members of this committee to benefit from your long experience and dedication in this field.

The job of Under Secretary of Defense for AT&L has several dimensions and I'd like to address each one briefly in turn. First and foremost is to get under control the many troubled programs that are supposed to be supporting our troops, present and future. As this committee well knows, too many of these programs are failing their cost, schedule, and performance expectations, and some are failing even more fundamentally the test of whether they are needed for the future military challenges we are most likely to face.

The state of these programs is not acceptable to the warfighter or to the taxpayer, and job one for the person who occupies the position for which I appear before you as the nominee is to get them under control.

I've had 25 years of experience working with and for DOD and its supporting defense industry and laboratories. I began my work in DOD with Secretary Caspar Weinberger on technical aspects of space, nuclear, command and control, and strategic defense programs in the 1980s. In the 1990s I was privileged to serve as Assistant Secretary of Defense.

In between government service, I have been a faculty member at Harvard's Kennedy School, director of its largest research center, and chair of the International and Global Affairs Faculty, a senior partner of Global Technology Partners, and a consultant and adviser to defense companies, to DOD laboratories and Federally Funded Research and Development Centers (FFRDCs), a member of the Defense Science Board and of DOD's Threat Reduction Advisory Council.

I believe I know the security challenges this Nation faces, the needs and workings of DOD, the nature of the defense industry and the demands upon it, and the views and policies laid down by this committee. I believe I know how to work with all parties over time to find the right path out of the woods for these many troubled programs, and if confirmed, I will try to do just that.

A second challenge for the incumbent of this job is to reform the acquisition system itself so we don't get ourselves into this situation again. One problem among many that Secretary Gates has stressed and that is just unacceptable in time of war is the apparent inability of the acquisition system to provide systems in months rather than years or even decades.

I concur with Secretary Gates that there is no silver bullet that will fix defense acquisition, and indeed the many troubled programs in DOD today—and Senator McCain has named two of them—have each its own history and reasons for getting into trouble, and no changes to the acquisition system itself can substitute for good sense, good discipline, alignment of what we buy with what our strategy requires, and above all good people performing the acquisition function. But it's also true, to paraphrase Eisenhower, that the right system might not guarantee success, but the wrong system guarantees failure.

I participated in many panels and studies that have assessed the defense acquisition system going back to the 1980s. I've even written a few books about it. I've also served for nearly 2 decades as a board member and consultant to the MITRE Corporation, which

is DOD's systems engineering and acquisition support FFRDC. I've a strong familiarity with the acquisition practices and key programs of DOD and the Intelligence Community and also a strong commitment to reform.

A third critical responsibility of this job is to oversee the science and technology (S&T) efforts of the Department. As a physicist, I have a deep appreciation for the fact that S&T is the key source of this Nation's comparative advantage in military affairs. But this advantage is not a birthright and needs constant attention, especially in a world where the science and engineering base outside of defense and outside of this country is growing rapidly.

I keep closely abreast of the development in defense technology, among other ways, through my affiliations with the Massachusetts Institute of Technology's Lincoln Laboratory and the Draper Laboratory and through membership in various panels of the National Academy of Sciences. If confirmed, I will be committed to preserving DOD's technological edge.

Fourth and finally, the Under Secretary of Defense for AT&L plays a key role in our nuclear deterrent and in other strategic issues—missile defense, space, and cyber. I've been deeply involved in technical aspects of nuclear weapons and missile defense since the 1980s, when I worked on technical aspects of MX missile basing in the Strategic Defense Initiative. I conducted the 1994 Nuclear Posture Review (NPR) for President Clinton and, through the Nunn-Lugar program for which I had responsibility, worked to denuclearize Ukraine, Kazakhstan, and Belarus. More recently, I have served as expert working group chair for the Commission on the Future Strategic Posture of the United States, the so-called Perry-Schlesinger Commission.

As far as missile defense is concerned, that was the first area of defense technology I ever worked in, assessing the possibility that lasers or neutral particle beams could intercept ascending ballistic missiles from space. I've written and edited two technical manuals on missile defense and for the last 10 years I've been a member of the Missile Defense Agency's (MDA) White Team.

If confirmed, I will use this background to inform and implement the Nation's policies on these important programs in consultation with this committee.

In sum, Mr. Chairman and members, I believe I have experience and demonstrated commitment relevant to each of the several dimensions of the important job for which you are considering me. But even more, I have a strong desire to help President Obama, Secretary Gates, and Congress put DOD on a solid strategic, programmatic, and budgetary path, where our troops and the taxpayer expect it.

I look forward to your questions.

Chairman LEVIN. Thank you, Dr. Carter.

Now, Senator Reed, we'll call on you to introduce Dr. Miller.

STATEMENT OF HON. JACK REED, U.S. SENATOR FROM THE STATE OF RHODE ISLAND

Senator REED. Thank you very much, Mr. Chairman, Senator McCain, and my colleagues. I'm delighted to be able to introduce Dr. James Miller, the President's nominee for Deputy Under Sec-

retary of Defense for Policy. Dr. Miller has a distinguished academic career, a B.A. at Stanford and a master's and doctorate in public policy from the Kennedy School of Government at Harvard University. He has served on the Hill as a staff member for the Armed Services Committee in the House of Representatives from 1988 to 1992. He served in the Pentagon as Deputy Assistant Secretary of Defense for Requirements, Plans, and Counterproliferation Policy. He has advised the Defense Science Board. He's been recognized for his service.

He brings to this task both great academic preparation and great practical experience, both in DOD and here on Capitol Hill. He has been working for the last several years, not only with the Center for Strategic and International Studies, but also for the Center for New American Security. He's been thoughtfully pursuing the whole range of policy issues which will confront both himself and Secretary Flournoy. He has the experience, the qualifications, and the character to do a remarkable job.

I also want to recognize the fact that he is supported by an extraordinarily strong and decent family. His wife Adele is here. He has four of his five children here: Zoe, Colin, Lucas, and Adrienne. The fifth daughter, Allison, is at Pomona College, I guess watching this on some type of webcast, I'm told. His mother is here, Doris Miller; his sister Amy Lockhart; his nephew James Leipshur; and a special family friend, Brooks Hoffman. So I think if it were a simple show of hands, he'd be confirmed.

I am delighted to be here and I want to thank you, Mr. Chairman and Senator McCain, for graciously allowing me to introduce the nominee. Thank you.

Chairman LEVIN. I know how much Dr. Miller appreciates your introduction, and we do too. I'm sure we'll now call on him to live up to that introduction. Dr. Miller.

STATEMENT OF JAMES N. MILLER, JR., PH.D., NOMINEE TO BE DEPUTY UNDER SECRETARY OF DEFENSE FOR POLICY

Dr. MILLER. Thank you, Mr. Chairman, Senator McCain, and members of the committee. I'm very grateful to Senator Reed for his kind introduction and for his strong leadership on national security over the years. I do want to also thank members of my family whom he introduced for being here and for their love and support.

It is a great honor to be here before you today as President Obama's nominee for Deputy Under Secretary of Defense for Policy. I want to thank President Obama for nominating me and I want to thank Secretary Gates, Deputy Secretary Lynn, and Under Secretary Flournoy for their support.

As the chairman noted, with over 200,000 soldiers, sailors, airmen, and marines deployed in harm's way in Afghanistan and Iraq and more around the world, it is a critical time for the country. Even as our military strives to succeed in current operations, it must also prepare for a wide spectrum of possible conflicts overseas, while coping with challenges in cyber space and outer space, and at the same time preparing to support the defense of our homeland.

Secretary Gates has often talked about the need for a strategy that balances between the many competing demands on our military. If confirmed, I look forward to assisting in developing and refining such a strategy and in applying it in support of sound policy decisions that strengthen our military and that protect our Nation. If confirmed, I expect to spend much of my first year on the QDR and on congressionally-mandated reviews on nuclear posture, missile defense, and space policy, among others.

I believe that my background in government, the private sector, academia, and as director of studies at a think tank, as Senator Reed referred to, as well as time I have spent advising the Department in other capacities, has prepared me well for these major reviews and for the myriad other issues that would arise during my tenure.

If confirmed, an important part of my job would also be assisting the Under Secretary in managing and leading the policy organization as a whole and helping to improve its effectiveness and its capacity to cope with the very complex strategic environment. I believe that my experience over the past 2 decades plus in the Pentagon and in both the private and nonprofit sectors provides a solid foundation for leading and managing in OSD Policy.

I started my professional career over 20 years ago working for Les Aspin as a staffer on the House Armed Services Committee and had the great honor to serve during the Clinton administration as the Deputy Assistant Secretary of Defense. If confirmed, I will be humbled by the privilege to serve my country again, this time during a time of war.

Thank you, Mr. Chairman, Senator McCain, and members of the committee. I look forward to any questions.

Chairman LEVIN. Thank you, Dr. Miller.
Now Ambassador Vershbow.

**STATEMENT OF HON. ALEXANDER D. VERSHBOW, NOMINEE
TO BE ASSISTANT SECRETARY OF DEFENSE FOR INTER-
NATIONAL SECURITY AFFAIRS**

Ambassador VERSHBOW. Thank you, Mr. Chairman, Senator McCain, and members of the committee. It's an honor for me to appear before this committee as President Obama's nominee for the position of Assistant Secretary of Defense for International Security Affairs. I'm very grateful to the President, Secretary of Defense Robert Gates, and Under Secretary of Defense for Policy Michéle Flournoy for supporting my candidacy for this important position.

I'm very pleased that my wife Lisa, who's been my partner during our 32-year journey in the foreign service, is here today. Unfortunately, our two grown sons, Benjamin and Gregory, weren't able to travel from New York and Boston to attend this hearing, but some close friends are here with their kids to represent ours.

If confirmed for this position, I look forward to working with this committee and with other Members of Congress to shape a bipartisan policy toward the many national security challenges that confront our Nation, our allies, and our friends, and to seize the many opportunities that exist to resolve conflicts and establish a more peaceful world.

The portfolio of the Assistant Secretary for International Security Affairs is a daunting one as it encompasses defense relations with the countries and international organizations of Europe, including NATO, the Middle East, and Africa. If I'm confirmed, among the many issues on which I'll advise the Secretary and Under Secretary, I see a number of especially urgent priorities:

- Implementing the President's strategy to end the war in Iraq, draw down our forces, and develop a normal long-term security relationship with a sovereign, democratic Iraq;

- Combatting terrorism, preventing weapons of mass destruction (WMD) proliferation, and strengthening security and stability across the Middle East;

- Transforming NATO to meet the challenges of the 21st century, while ensuring the success of the alliance's current International Security Assistance Force (ISAF) mission in Afghanistan;

- Promoting a more cooperative security relationship with Russia in areas of common interest, while also strengthening the security and independence of other European partners; and

- Developing the role of our new Africa Command (AFRICOM) in helping build the capacity of African nations and organizations to address security challenges on the continent.

I believe that my 32 years of experience in the foreign service equip me to deal with these and the many other security issues that are among the responsibilities of the Assistant Secretary of Defense for International Security Affairs. Throughout my State Department career I have worked very closely with DOD in shaping and implementing U.S. policy for the former Soviet Union and NATO, in contributing to U.S. efforts on nonproliferation and counterterrorism, and in managing a wide range of international conflicts and crises.

Over the years I've had the privilege of working closely with the U.S. military in U.S.-Soviet arms negotiations, in two tours of duty at NATO when the alliance acted to end the conflicts in former Yugoslavia, and most recently in keeping the peace on the Korean Peninsula. I've come to respect the courage, vision, and dedication of our Armed Forces and I've become a true believer in the importance of close civil-military coordination in meeting today's threats. Indeed, I think our success in Iraq and Afghanistan depends critically on our ability to craft a comprehensive strategy that integrates all the tools of national power, military and civilian, in support of our objectives.

If confirmed, I will strive to embody the spirit of Defense-State cooperation that the President and Secretary Gates have called for.

Once again, Mr. Chairman and distinguished members of this committee, I am honored to appear before you today. I look forward to hearing your views and ideas, both today and in the future, and I would be pleased to answer your questions. Thank you.

Chairman LEVIN. Thank you very much, Ambassador.

Let me now ask you all the standard questions. Have you adhered to applicable laws and regulations governing conflicts of interest?

Dr. CARTER. Yes.

Dr. MILLER. Yes.

Ambassador VERSHBOW. Yes.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Dr. MILLER. No.

Dr. CARTER. No.

Ambassador VERSHBOW. No.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Ambassador VERSHBOW. Yes.

Dr. CARTER. Yes.

Dr. MILLER. Yes.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Dr. MILLER. Yes.

Ambassador VERSHBOW. Yes.

Dr. CARTER. Yes.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Ambassador VERSHBOW. Yes.

Dr. CARTER. Yes.

Dr. MILLER. Yes.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Dr. CARTER. Yes.

Dr. MILLER. Yes.

Ambassador VERSHBOW. Yes.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Ambassador VERSHBOW. Yes.

Dr. MILLER. Yes.

Dr. CARTER. Yes.

Chairman LEVIN. Thank you.

We'll have an 8-minute round.

First for you, Dr. Carter. This year John Young, who's the current Under Secretary of Defense for AT&L, wrote a memo in which he stated that many of the problems we've encountered in the acquisition of major weapons systems are attributable to programs that have a poor foundation at milestone B, which is the starting point for major development and manufacturing design.

He said that: "Fundamentally, these programs move past that milestone with inadequate foundations built upon artificially low cost estimates, optimistic schedules and assumptions, immature design or technology, fluid requirements, and other issues."

Now, as you've mentioned in your opening comments and as you're aware of, Senator McCain and I have introduced a bill, S. 454, that's designed to help put MDAPs on a sound footing from the outset by addressing program shortcomings in the early phases, particularly of the acquisition process. Dr. Carter, you've already commented on this, but generally would you agree with John Young's assessment that many of our acquisition problems arise out of programs that are built on unreasonable cost and schedule estimates, unrealistic performance expectations, and immature technologies?

Dr. CARTER. I do, Mr. Chairman.

Chairman LEVIN. If you are confirmed, will you work with us to enact legislation which addresses those problems?

Dr. CARTER. Absolutely.

Chairman LEVIN. By the way, we are going to have a markup on that bill next Thursday morning.

You've worked long and hard in the missile defense area, and one of the issues which has arisen is whether or not we should have exempted or should continue to exempt missile defense programs from many of the most basic requirements of the DOD acquisition system. Until now, missile defense programs are not considered to be acquisition programs and therefore they're not required to have requirements validated by the Joint Requirements Oversight Council. They're not required to undergo analyses of alternatives and business case analyses; they're not required to obtain independent certification of technological maturity; they're not required to receive milestone approval from AT&L; they're not required to have formal baselines for system cost, schedule, and performance; and they're not required to track and report on deviations in planned acquisition costs and program schedules. They're also not required to develop comprehensive test plans leading up to operational test and evaluation.

Do you believe, Dr. Carter, that the MDA programs should be subject to cost and schedule baselines against which performance can be measured?

Dr. CARTER. I do.

Chairman LEVIN. Do you believe that the principle of fly-before-buy should apply to missile defense programs as it is to other defense acquisition programs? In other words, should missile defense programs be subject to operationally realistic testing before they're fielded?

Dr. CARTER. I think missile defense, like other programs, should be subject to such testing, yes.

Chairman LEVIN. Will you, if confirmed, review the current Director of Operational Test and Evaluation reports on missile defense testing, including classified portions, and inform the committee of your views of any concerns and your assessment, including any corrective steps that you feel are necessary to ensure that our ground-based missile defense program is operationally effective, suitable, and survivable?

Dr. CARTER. Absolutely, I will.

Chairman LEVIN. This question will go to any or all of you. Throughout the Iraq war we've used private security contractors to perform a wide variety of security functions that require the use

of deadly force in a hostile environment. To some extent this was done out of necessity because we didn't have sufficient troops to provide needed security. However, the extensive use of private security contractors in Iraq resulted in some abuses, including the September 2000 shooting incident in Baghdad.

Would you agree that DOD needs to undertake a comprehensive review of whether, and to what extent, it is appropriate for contractors to engage in functions that require them to make discretionary decisions about the use of deadly force outside of the military chain of command and on a routine basis? So first, do we need to undertake that comprehensive review? Let me call first on Dr. Miller, let me ask you.

Dr. MILLER. Yes, Mr. Chairman, I believe we do.

Chairman LEVIN. Okay. Dr. Carter?

Dr. CARTER. I would agree with that, absolutely.

Chairman LEVIN. Ambassador?

Ambassador VERSHBOW. Yes, I agree as well, Senator.

Chairman LEVIN. This is for you, Dr. Carter, going back to the acquisition bill that we've introduced. One of the provisions in that bill is the provision that relates to putting some teeth in the Nunn-McCurdy statute, which already exists. We would establish a presumption that a program that exceeds its critical cost threshold would be terminated unless it can be justified from the ground up.

In your response to one of our APQs, you stated that you believe that the current statutory provision provides the authorities that are needed and that you do not see the need for any changes at this time. Now, on this question, this is what GAO had to say earlier this month about this issue. DOD's tendency to initiate programs with unrealistic cost estimates based on a lack of knowledge and overly optimistic assumptions. This is GAO speaking—"reinforced by an acquisition environment in which there are few ramifications for cost growth and delays. Only in very rare instances have programs been terminated for poor performance. When the Department consistently allows unsound, unexecutable programs to begin with few negative ramifications from poor outcomes, accountability suffers."

According to GAO, tougher requirements for programs that exceed Nunn-McCurdy thresholds could force programs "to be more candid and upfront about potential costs, risks, and funding needs, increasing the likelihood of successful program outcomes."

Would you agree with the GAO assessment?

Dr. CARTER. I would, and I'd add a little bit to that and say that staring a Nunn-McCurdy breach in the face is and ought to be a disciplining factor, for any program manager.

What I meant in the APQ was that as I understand it the Department now has the authority to terminate a program if it makes a Nunn-McCurdy breach. Also it's true, as I understand it, that programs can breach the thresholds for reasons other than poor management. That's not to say that in many cases poor management isn't the reason, but sometimes it's for other reasons that they breach the threshold. So some flexibility in how the Department responds to the fact of a breach is appropriate.

But, that said, the terror factor, I can tell from program managers I know, about facing a Nunn-McCurdy breach is there and is real and is a healthy factor.

Chairman LEVIN. Thank you.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

Ambassador Vershbow, you have extensive experience in Korea and relations with North Korea. What do you think the implications are and what it means that the North Koreans have announced that they're going to have another "missile test"?

Ambassador VERSHBOW. Senator, although I'm not going to be dealing with Korea if confirmed for my proposed position, I have been working that very—

Senator MCCAIN. I would think that North Korean activity may pose a threat to our security in the Pacific and in the region.

Ambassador VERSHBOW. Indeed, and it's something that we need to ensure that our allies, even far away from Korea, recognize. The proliferation of ballistic missile technology and nuclear weapon technology from North Korea is a global threat.

I think that their announced intentions to launch a ballistic missile, ostensibly to launch a satellite, which we can't yet confirm, is an effort to escalate the pressure on the United States and the international community to legitimize North Korea's possession of these kinds of technologies and their nuclear weapons programs. At the same time, it is clearly going to be inconsistent with the two United Nations Security Council resolutions that were adopted in 2006. So it's clearly going to be a serious provocation and, as I think Secretary of State Hillary Clinton said just yesterday, "there will be consequences." I'm not yet in my position, so I can't say what those consequences will be, but it will be a very serious act.

Senator MCCAIN. Thank you.

Dr. Carter, your experience in weapons acquisition is?

Dr. CARTER. Senator, I've been working for 25 years in and with DOD, the defense industry, and defense laboratories on defense programs. That's where I began my career. That's the background I come from in physics. I know that we have interacted some over the years on policy questions as well, but most of my career in this field has been devoted to and involved in programs and defense technology.

Senator MCCAIN. Dr. Carter, the Defense Business Board has warned that DOD's procurement plan is "unsustainable," and with respect to the Department's budget decisions that "business as usual is no longer an option." The board found that DOD can only meet its priorities if it makes hard budget decisions on its largest and costliest acquisition programs.

Do you agree with that viewpoint as expressed by the Defense Business Board?

Dr. CARTER. I do.

Senator MCCAIN. Can you give the committee some insight into how you intend to address unfunded acquisition commitments that are currently in the DOD's procurement plan?

Dr. CARTER. Thank you for that question, because I rather suspect those unfunded commitments are large, and when I assume this job, if I assume this job, one of the first things I'm going to

want to do is look program by program through the pipeline of programs that we have and try to get in front of the process that we've experienced over the last few years of discovering, oops, all of a sudden midway through a program, how much trouble it's in.

Senator Levin quoted what we know now about MDAPs and the cost overruns in the MDAPs. I'm not sure that's the end of the story, and one of the things I would do, if confirmed, is see whether there isn't more to that iceberg.

Senator MCCAIN. Do you believe we should have a policy of no cost-plus contracts?

Dr. CARTER. Ideally, one would like to get into a situation where by the time one gets to the procurement phase of a program the program's parameters, technical and production, manufacturing, engineering, and so forth, are well enough known that one can have a competition of that kind. Earlier in a program, or in a program that is inherently riskier technologically, it may just not be possible to anticipate exactly what it's going to cost until one gets into it.

So I would say in answer to your question that in earlier phases of a program that kind of contracting might not work. In later phases it should be our aspiration to do that kind of contracting.

Senator MCCAIN. You would agree there's been a dramatic consolidation of major defense contractors and corporations since your early days in the Pentagon?

Dr. CARTER. Absolutely. In fact, I was at the so-called "last supper," the famous last supper that Les Aspin and Secretary Bill Perry, John Deutch, and I attended along with the defense industry leaders of that time. There were, I suppose, 16 of them around the table. It's Norm Augustine who's called it the "last supper," because he famously turned to two industry leaders to his left and his right at that time and said: "Next year one of the two of you won't be here." We went down from 16 to 5.

Senator MCCAIN. The point is, with this consolidation it's hard to have true competition.

Dr. CARTER. Exactly right.

Senator MCCAIN. So the conundrum is that you have basically an uncompetitive or very dramatically changed competitive environment than we had some years ago. The result has been, at least evidence might suggest, that with the lack of competition, combined with a cost-plus contract environment, the initial cost proposals made are usually far less than even those who are competing for the contract believe. Is there any validity to that suspicion?

Dr. CARTER. I think there is validity to the suspicion that low-balling goes on in programs. It's also true that there are fewer primes now. I do think that competition is the great discipliner, and it's still possible to have competition even in the defense industry that we have. The bill that the chairman and you have introduced makes note of that and suggests some ways that can be done.

For example, even if competition at the production phase is not possible, competition at earlier phases in the programs might still be possible. You can have competition below the prime levels, at the levels of the subcontractors who are building the subsystems.

So I think there are various ways that we can keep competition alive even in the defense system and it's necessary to do that.

Senator MCCAIN. You really believe that?

Dr. CARTER. I think it's not something that can be done across the board, but I think it's something that can be done very substantially, and it certainly would be my aspiration, if confirmed, to get as much competition as we possibly can.

Senator MCCAIN. I appreciate your support for the legislation that Chairman Levin introduced. Updating of the Nunn-McCurdy law is one of the real intents of this. But I'm not positive we're really getting at the magnitude of the problem. Do you share that concern? Including a change in attitude inside the Pentagon?

Dr. CARTER. I think the bill's provisions get at the heart of the matter as regards programs in their early phases, which as I understand it, is its intent. Now, if I'm confirmed, that's not going to be my only problem. There are all these programs that are well past that stage. The mistakes were made, whatever they were, back in the past and you can't start all over again.

So you have the problem that we are where we are, with lots of problems, programs, that had your provisions been in place when they were born wouldn't be where they are now. But they are where they are now. So that's a separate problem, which I understand the bill wasn't intended to address.

But as regards programs in their early phases, it seems to me it touched on all of the things that we now know are problems in early phases of programs and if addressed would lead to results later in phases of the program that would be very different from the ones we're facing today.

Senator MCCAIN. I'm very pleased to join Chairman Levin on this effort. But I also think that unfortunately, as you say, there are some, as I mentioned in my opening comments, such as FCS, JSF, and others that are already huge, big ticket items. I just don't see the funding being there to continue these programs that have already been initiated.

I'm sure you share that view and I look forward to working with you on it. I thank you, Chairman Levin.

Chairman LEVIN. Thank you so much, Senator McCain.

Let me first thank Senator Reed for taking the gavel for an hour or so, and call on Senator Begich.

Senator BEGICH. Thank you very much, Mr. Chairman.

I have a few questions. Dr. Carter, I'm going to follow up on Senator McCain's comments. The issue of acquisition is one of those complex problems, especially when you're developing new technology. I come from a little different perspective, I think, on this, and that is in the first phase—and I think you said this—in the technology development, because we're really testing technology which is unknown in a lot of cases. So the costing of it is going to be always very difficult.

If you asked Bill Gates in the early days of Microsoft what he thought it would cost to develop, or you go to Google or you go to any of the technology companies, they would tell you one thing and what really happened was much different, because you're dealing with the unknown.

I think then as you move down the path, how do you then, once the technology is developed, ensure that the competitiveness, as you describe, continues to stay in play? But do you subscribe to that thought, that the technology part is going to be always very difficult? Maybe I'm missing something, but every time I talk to private sector companies in a variety of technology developments it's always very difficult.

Am I missing the boat there?

Dr. CARTER. No, Senator, I wouldn't say you're missing the boat at all. It gets back to something that Chairman Levin raised earlier. I'm sorry, Senator McCain did. In an early stage of a program, if it's an ambitious program—and we want to have technologically ambitious programs—it's fair to not exactly know where you're going and what you're getting into. That's the nature of the beast.

So fair enough, and that's the point about cost-plus contracts and those phases. But the ambition of the program ought to be to get itself to a point where before it goes into production it's resolved all those technology issues. So you need to get yourself to a point where you do understand the technology you're dealing with, what it's going to cost, how it'll perform, and what schedule you can produce it.

That's the point at which a different kind of contract instrument might become appropriate. I should also note that in the legislation that was referred to earlier, one of its provisions is to strengthen the Department's discipline in making sure that before it passes into those later phases it really has done the job of understanding the technology.

But you're absolutely right. I'm a scientist and if you knew where you were going that wouldn't be science.

Senator BEGICH. It wouldn't be science. You'd know the answer.

Again I just wanted to follow up, and then I have a couple more questions. But I'm a former mayor. I'm a mayor that happens to be a Senator. As a mayor, you always have to think 7, 10 steps down the road. We continually use technology to develop those early stages, but once we've figured out what we're going to do and how we're going to do it, even with the sole contractor, you could be very competitive by putting in systems that reward price control. I would hope that, in your new position, there would be an opportunity, that there's a reward opportunity for price control, because sometimes in a noncompetitive environment that the almighty dollar becomes very competitive to achieve as much as they can.

So let me ask you—I'm going to read a comment in your 1984 book. It seems like every week we talk about missile defense and as a Senator from Alaska, I have a great interest in this issue. In your book titled, "Ballistic Missile Defense" (BMD), you stated: "Ideally, an actual BMD deployment in the United States would be preceded by three stages of analysis: a study of the underlying technology; an assessment of the technology effectiveness when embodied in a specific system, assigned a specific defense goal; and a judgment of the desirability or need of the defense."

Twenty-five years later after you've written that book, do you think we have done that with the missile defense system, those three stages?

Dr. CARTER. Missile defense has come a long way since then. But I would say that those three steps applied to missile defense today are as appropriate as they were then. In fact, they really apply to any program, and missile defense, as was mentioned earlier, needs to be looked at in the way that other programs are.

The only thing I'll say is at that time the mission was so different. The mission was to defend the whole country, as President Reagan's aspiration was to defend the whole country against 3,000 equivalent megatons of Soviet throw weight. So that was a pretty daunting mission. Today we're looking at a mission that is much more modest than that, defending ourselves against North Korean or Iranian missile threats which are far less formidable than was the Soviet Union's, and therefore the job's easier, in addition to us having behind us 25 years of technology development.

Senator BEGICH. I think you answered—my second question was going to be that, in regards to other major systems, that those three stages should also be utilized?

Dr. CARTER. Absolutely.

Senator BEGICH. Just to reiterate that.

Dr. CARTER. Yes, Senator.

Senator BEGICH. Another quick question, if I can. I guess it again goes to the issue—and I think you hit it and maybe we can elaborate a little bit on missile defense and how you see it as a shield and how it fits into our overall defense policy for homeland as well as deployed forces and others, as you mentioned, North Korea and Iran. Can you elaborate a little bit more on that, how you see it in the big picture?

Dr. CARTER. I can. I presume that is going to be addressed by the Department in a systematic way in its QDR that Dr. Miller will be conducting. But just to anticipate some aspects of it, today, unlike in the time when we were facing the Soviet missile threat, we are in the protection against nuclear attack sense as concerned about non-state actors and rogue state actors as we are concerned about established nuclear powers, as was the case with the former Soviet Union.

There are a lot of ways that they might introduce nuclear weapons into our country, of which a ballistic missile is only one. In fact, terrorists are unlikely to use that method. So I would say that we have to have walls as well as a roof to our defense. I've been involved in many programs aimed at building those walls as well. I think there's a balance question.

Senator BEGICH. So it's a piece of the equation, what level is the question.

Dr. CARTER. Certainly missile defense fits into that portfolio, and then we have to balance that mission area, which is defending ourselves against nuclear attack, against all the other mission areas we have, like Iraq and Afghanistan and so forth. I understand that's a complicated cocktail or portfolio, and Dr. Miller's going to sort it all out if he's confirmed.

Senator BEGICH. You've led to my question for Dr. Miller, since he's been so quiet there, I didn't want to leave him alone here. But you gave him the lead-in to a question you must have read here that I have.

Dr. Miller, you're going to be doing the QDR and the NPR. What are your thoughts on the value of the QDR and the NPR for defense? But also, add a little missile defense to that on top of it. You can thank Dr. Carter for setting that up for me. Thank you, Dr. Carter.

Dr. MILLER. Thank you, Senator. Thank you, Dr. Carter. [Laughter.]

Dr. MILLER. Senator, the QDR has been mandated as a key part of the Department's planning and preparation. Several have been conducted, going back to the early 2000s and a little bit before, in fact into the 1990s. The NPR has been similarly conducted several times. The Missile Defense Review and the Space Policy Review will be new this time around and will need to be integrated into that, into that broader set of issues.

Sir, my view is that it makes terrific sense for, at least every 4 years, to take a fresh look from starting principles, from strategy to broad policies, and then looking at the full range of programs and other activities in the Department, the organization of the Department as well, which is a key function of the QDR, and applying that across the board to the nuclear area, to missile defense, and so forth.

Senator BEGICH. Very good. My time is up. Mr. Ambassador, I did have questions. We'll submit those in writing to you, and I thank you all very much for being here. I have to go to another committee. But thank you for those answers.

Senator REED [presiding]. Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman. I'm in the same situation that Senator Begich is, that we have two simultaneous hearings, fortunately in the same building here.

There are two oversights in the introduction of both Dr. Miller and Dr. Carter that I'd like to correct for the record now. One is that, in the case of Dr. Carter, that Bill Perry was the best man at his wedding. The other was, Dr. Miller, that during your tenure as professor at Duke University, two of my kids were your students. You didn't know that, did you?

Let me ask a question of each one of you, if you don't mind responding. It's a three-part question. About a year ago there was a communique from NATO leaders that stated: "We therefore recognize the substantial contribution to the protection of allies from long-range ballistic missiles to be provided by the planned deployment of the European-based United States missile defense assets."

Of course, we've been busy putting that together. However, there is uncertainty now, and I've seen several things that have come from Poland. Right now they're in a holding pattern, not sure what to do. However, Foreign Minister Sikorski said: "We hope we don't regret our trust in the United States."

Now, the three-part question to each one of you. First, what in your opinion is the importance of the European site to the United States and NATO? Second, what impact would it have if we discontinue this program? Third, what impact would there be if there is a delay in this program? You can answer in any order.

Dr. CARTER. I'll take a shot first, Jim. First I'll try to answer the question from the perspective of the job for which you're consid-

ering me, which is the acquisition perspective, if I may, and then Dr. Miller can answer it from the policy perspective.

From the acquisition perspective, the importance of the site is that it is intended principally to protect the continental United States from a ballistic missile attack of long range from Iran. It would also have some capability in the current configuration to defend parts of Western Europe against intermediate range. So the importance of the site is that it is between Iran and us, and that's why it was selected.

The second and third parts had to do with the impact of delay, and Jim can address the geopolitical questions of the impact of delay. From a purely technical point of view, when one is considering deployment of a missile defense, there's always a tradeoff. You look at the threat and you don't want to deploy too late after the threat develops. On the other hand, the longer you wait the better the system is that you can deploy.

Now, we find ourselves with respect to Iran in a situation where they're not there yet in terms of an intercontinental ballistic missile threat. From that point of view, just purely speaking technically, one wouldn't have to have a defense in the field until the threat was in the field. With every passing year we'll get a little better. So the longer we wait, the better the system. But if you wait too long, you don't have the system in the field by the time the threat develops.

I would say that's the tradeoff purely from a program point of view in terms of the timing. So the need is Iran and the question of timing becomes a tradeoff—

Senator INHOFE. Are you saying then that you don't think we should proceed with that development and give a communication to the Governments of Poland and the Czech Republic?

Dr. CARTER. No, I'm not saying that. I'm just speaking from the acquisition point of view we have to be ready while the threat isn't there yet. We have to be there before the threat is. That argues for early deployment. The longer we wait, the better the system we could have, which would argue for being able to wait if you chose to wait.

I realize there are many factors other than these only that go into the question of whether you deploy now or don't deploy. But purely from a technical point of view, that would be the tradeoff.

Senator INHOFE. Dr. Miller?

Dr. MILLER. Senator, the question of the use of the system, I'd just say that I concur with Dr. Carter's assessment of the purpose with respect to defending the United States and a significant portion of Europe.

The impact of the delay, let me say two things. The first is that President Obama has reportedly suggested that if the Iranians were to delay or in fact verifiably stop their efforts at pursuing nuclear weapons then that would change the calculation, and then that is something that should be considered as a possible opportunity to improve the technology of the system and to consider its future.

The second thing I say about delay is that one of the issues associated with the system, as you suggested, is its impact on our relations with the Czech Republic, Poland in particular, and with the

rest of NATO, and the perceptions of Russia of that and the degree to which the United States continues to stand by its allies. Clearly that is an essential element of what the United States should consider in going forward and in the timing of the system.

Senator INHOFE. I don't want to go any further with this. I'm using up all my time and I didn't want to do that. But I can cite a lot of examples where the National Intelligence Estimate has been wrong. I agree, Dr. Carter, most people believe that capability is not there, but the consequences of being wrong are just unbelievable, and I think we need to be thinking in those terms. I'd like to be able to carry this on.

I have two other areas real quickly. I've been concerned about all of our aging everything. I'm talking about our Navy fleet, our KC-135s, our tanker capability. Everything that we have out there is aging. I'd have to say—and this is probably for you, Dr. Carter—it doesn't make sense to continue to spend money in maintaining these systems. There are several studies, business plan studies, that are on record right now, that I'm sure you've looked at, and I'd ask you to look a little bit deeper, as to the cost of maintaining what we have as opposed to getting in new systems. I think of the KC-X as one example, and others.

Do you have any thoughts about our aging fleets and how you want to approach them? That would include ground equipment, air, everything else that we have.

Dr. CARTER. Thank you. My only thought is that I share your concern. With every passing year, everything gets a year older. If confirmed, I know that that's one of the first things that I have to do, look at these—

Senator INHOFE. Let's do that. Then for the record, I would like to get from you some of these studies that have been made, because one of the problems, of course, is our accounting system that we have here. You can't do things that you would do if you were in the private sector in terms of taking care of these problems, because that's not the way the system works.

Dr. CARTER. Yes, sir.

[The information referred to follows:]

First, the Department of Defense considers business cases to exist in several documents, usually including the Analysis of Alternatives (AoA), Acquisition Strategy, Independent Cost Estimates, funding profiles, and Technology Readiness Assessments. Second, the Department of Defense uses such "business cases" to support certifications required by title 10, section 2366b. I have included three examples of business cases for the Joint High Speed Vessel (TAB A), Joint Precision Approach and Landing System (JPALS), and Global Combat Support System-Army (GCSS-A).

Joint High Speed Vessel

Business Case Analysis: The business case for the Joint High Speed Vessel (JHSV) is made in the following documents, which when viewed together support the four provisions in section 2366b that are required to be certified based on a business case analysis. The documents are:

- JHSV AoA dated April 2006 (copy of executive summary attached at TAB A).
- JHSV Capability Development Document (CDD) dated January 27, 2007.
- JHSV Acquisition Strategy dated July 19, 2007, with Revision 1 dated July 8, 2008.
- JHSV Program Office Cost Estimate dated July 18, 2008.
- JHSV Independent Cost Estimate (ICE) completed in November 2008.
- The Program Objective Memorandum 2010 Budget Estimate Submission.

Joint Precision Approach and Landing System

Business Case Analysis: The business case for the JPALS program is based on the following documents, which when viewed together support the four provisions required to be certified based on the business case analysis in section 2366a. The documents are:

- Initial AoA for JPALS by the Air Force, August 1997; Updated AoA validated by the Air Force Requirements for Operational Capability Council on November 17, 2005 (copy of executive summary attached at TAB B).
- Evaluation of JPALS AoA (Sufficiency Review), Office of the Secretary of Defense (OSD), Program Analysis and Evaluation, December 19, 2007.
- Prior to the Joint Capabilities Integration and Development System Process, JPALS requirements documented in the Joint Requirements Oversight Council (JROC) approved Precision Approach and Landing Capability (PALC) Mission Need Statement, JROCM Ser# 108-95, August 29, 1995.
- PALC Initial Capabilities Document Ser# 717-88-07, JROCM Ser# 208-05, September 19, 2005.
- JPALS CDD validated by the JROC, JROCM Ser# 056-07, March 16, 2007.
- Service Cost Position (SCP), by Naval Air Systems Command 4.2, delivered to the OSD Cost Analysis Improvement Group (CAIG), February 15, 2008 (updated April 7, June 3, and June 19).
- OSD CAIG ICE, CAIG brief on April 1, 2008 (updated June 17); report dated June 25, 2008.
- Fiscal Year 2009 President's Budget (PB09)—JPALS Program funding.
- JPALS Acquisition Strategy (AS), June 2008.
- Technology Readiness Assessment (TRA), by Director, Defense Research and Engineering (DDR&E), March 13, 2008.
- Program Support Review, by Deputy Under Secretary of Defense (Acquisition, Technology and Logistics (Acquisition and Technology)/System & Software Engineering, January 10-11, 2008; Briefing report dated April 7, 2008.

Global Combat Support System-Army

Business Case Analysis: The business case for the GCSS-A program is made in the following documents, which when viewed together support the four provisions required to be certified based on the business case analysis in section 2366a. The documents are:

- GCSS-A AoA validated October 24, 2005; revalidated May 25, 2007 (copy of executive summary attached at TAB C).
- GCSS-A CDD, dated June 13, 2006.
- PB09, February 4, 2008.
- GCSS-A AS Army Acquisition Executive signature dated April 2, 2008, pending final signature by the Missile Defense Agency.
- GCSS-A Economic Analysis and SCP from the Assistant Secretary of the Army (Acquisition, Logistics & Technology) dated April 28, 2008.
- GCSS-A CAIG ICE dated May 17, 2008.

[Tabs A, B, and C are for official use only and are retained in the committee files.]

Senator INHOFE. The last thing I'd like to ask you, Dr. Carter, is on the question of the shelf life of some of our nuclear weapons. You and I talked about that in my office. Do you think that we can continue to have something that we believe will work without conducting underground testing? I think also about the credibility that we have in our other countries, as to whether they look at us and some of the stuff that we have there in our nuclear weaponry, and can we keep that credibility without underground testing? Real quickly, can I have your thoughts on that?

Dr. CARTER. A safe and reliable stockpile is critical. I understand that's partly the responsibility of the person in this job. The national laboratory directors, who understand the physics of these weapons, are required every year to give an answer to your question about whether the existing stockpile is safe and reliable in the absence of underground testing.

There is a program, the Stockpile Stewardship Program, that's been going on for quite a long time. My understanding—I'll learn more if and when I get in this job—is that their judgment is that the Stockpile Stewardship Program has allowed them so far to give an answer yes to that question. They can't see forever into the future, but for now their answer would be yes.

Senator INHOFE. You would follow their guidance, then?

Dr. CARTER. Yes. In fact, I believe it's required under the law that we follow their guidance.

Senator INHOFE. Thank you very much.

Thank you, Mr. Chairman.

Senator REED. Thank you, Senator Inhofe.

Based on the order of arrival, I will now ask my questions.

I had the privilege of introducing Dr. Miller and his family and I want to welcome Ambassador Vershbow, but I want to say a particular word about Dr. Carter. I've had the privilege of knowing Ash for many years. He has an extraordinary intellectual range, from theoretical physics to medieval history, but is also terribly pragmatic, practical, and has the common sense that is necessary.

I think one of the things that, Ash, commends you to the job is not only do you have great technical knowledge, but you also understand the institutional and cultural politics and policies that will make your job—make your tenure, I think, very successful, so welcome.

Dr. Miller, one of the challenges that we have and you have particularly is dealing with the current situation, but looking ahead, and looking down the road to those places where problems will occur in the future. One of the issues that seems to be universal is the lack of capacity in many places in the world for effective governance, for effective control. It's seldom the marquis issue. It's not as pressing as a crisis in Iran or Afghanistan, et cetera. But in the longer run it might be one of the most significant challenges we have.

Could you give us your thoughts on how you and Secretary Flournoy are going to deal with this issue of capacity-building, particularly in places that now seem obscure. But Somalia was obscure, Afghanistan was obscure, et cetera.

Dr. MILLER. Senator, thank you. Secretary Gates has noted in the National Defense Strategy that the prospect of challenges arising from states that are troubled is probably at least as significant a challenge for the security environment as the challenges that may arise from strong states.

This has been a growing focus of DOD, first within Iraq and Afghanistan, and then more broadly a look at building partner capacity at least since the last QDR. Congress has certainly played an important role if you look at the authorities for the so-called sections 1206, 1207, 1208, that give the authority to provide resources through DOD in operations where there's counterterrorism and where the United States is involved in stability operations for section 1206, in moving money to the State Department's Office of the Coordinator for Reconstruction and Stabilization for section 1207, and then for the Special Operating Forces for section 1208.

All those authorities are relatively new and all worth looking at closely in terms of how they can be tailored most effectively. In ad-

dition then, there is the Commander's Emergency Response Program funds and others. It is an area that as the United States draws down its forces in Iraq over the coming years, it's an area where I would expect the Department, and I would hope the Nation, to provide significant attention, and where building the capacity of the State Department and U.S. Agency for International Development and other agencies is a critical step in that, as is working with our partners, our allies, in helping these countries that are struggling, sir.

Senator REED. Thank you.

Ambassador Vershbow, if I could get your response to this, because I think part of your duties will touch upon this, particularly engaging our allies in this same capacity-building effort?

Ambassador VERSHBOW. Thank you, Senator. Yes, I agree with what Dr. Miller just said. It is just as important in looking at some of these post-conflict situations or at unstable parts of the world, to help on the civilian side with the capacity-building for more effective governance. It ranges across the spectrum from helping with economic development, developing effective judicial institutions, police, rule of law.

I think all of these things require a comprehensive effort by different parts of our government, and I think that the legislation that Dr. Miller referred to, section 1206, section 1207 in particular, were designed well to require close State-Defense coordination, even a dual-key approach to the implementation of these programs, because we're really all in this together.

I think that some of the problems we had early on in Iraq reflected, I think, insufficient attention to these issues of governance. I think we've begun to work more closely with the Iraqis to get it right in that regard, and I think that's one of the reasons why the trends are more favorable in Iraq, and I think we now are turning our attention to Afghanistan, where there are similar problems of weak governance.

So yes, Senator, you've identified a very critical problem, and I think my background, having been at the State Department and now moving over to DOD, I hope, if confirmed, will help me in creating this kind of integrated approach.

Senator REED. Let me follow up with a question about Afghanistan, which is the necessity of more decisive and robust engagement by NATO. A corollary to that would be the recent announcement that France is rejoining NATO. Can you comment on both those issues?

Ambassador VERSHBOW. Yes, Senator. I think that it's been very helpful that NATO has stepped up to the challenge in Afghanistan and contributed to the ISAF coalition. We haven't always gotten quite as many troops as we had hoped, but I think one shouldn't underestimate the importance of the contributions that they made and the sacrifices that our allies have made. On a per capita basis, for example, Canada has taken more casualties than the United States. So I think the spirit of we're all in this together, shared risk, has been on display in Afghanistan.

Looking ahead, it's not clear how many more troops we will be able to get from our allies, but I think that as we look to trying to do better in Afghanistan, we will be looking to our allies, if they

can't contribute more on the military side, to contribute more on the civilian side, where the list of tasks is almost infinite as to what kind of contributions they could make.

As for French reintegration, I think this is a very important and positive step. The French have been good allies even when they weren't fully integrated in the military command structure, contributing sizable forces in Bosnia and Kosovo, and they have sizable forces on the ground in Afghanistan.

So I think bringing them fully into the military structure and the planning structure, which would mean that they would have more forces committed to NATO, assigned to NATO, will hopefully enhance NATO's effectiveness in the future.

Senator REED. Thank you.

Dr. Carter, you have an extraordinarily difficult challenge, as both Senator Levin and Senator McCain outlined. Senator McCain particularly talked about the concentration of the industry, the sense that you might be outgunned. I want to bring that down to a very practical, operational level. Let me ask you the question: Are there sufficient system engineers, acquisition professionals, people capable to go one-on-one with industry, that has the capacity through their incentive structures and their ability to recruit to mount a significant number of people, experts in an area?

Maybe the pathway to a better acquisition system is having on our side of the table more depth, more professional, better supported individuals.

Dr. CARTER. First of all, thank you for your kind words.

Senator REED. I was going to say that at Yale we deal with history and theoretical physics with the same course, but—

Dr. CARTER. Two separate things, but maybe this job is the perfect union.

Senator REED. It's the perfect—yes, alchemy, too.

Dr. CARTER. But I appreciate all you've taught me and I thank you for your kind words.

Your question really goes to the heart of things. Actually, this committee has received some testimony in the last couple of weeks that I thought was excellent on this very subject of systems engineering and, more generally, the competence and size of the government workforce to manage this much money and programs that are this complicated.

I do have that concern. I know that this committee has taken some action in that regard, and it's a subject that, if I am confirmed, I intend to take very seriously because, as I said earlier, you can have all the great paper acquisition system you want and if you don't have the right people to do it—systems engineering is a particularly important thing. A lot of people don't relate to systems engineering very well, but it's the ability to look at the whole task from early on, concept development and technology development, right through sustainment, and look at all of its aspects.

There are organizations in the Services and OSD that do that, and I've been associated with some of them. For a long time our ballistic missile programs were managed by the Ballistic Missile Office out at San Bernardino, CA, which is a perfect example of a systems engineering organization that dealt with all offensive ballistic missiles end to end. It's a very important skill set.

Dr. Kaminski testified on this subject a couple of weeks ago on the basis of a study he did for the National Academy of Sciences, and if I'm confirmed, you bet it's a serious concern, because one person isn't going to be able to do it, however hard I work.

Senator REED. Thank you very much.

Senator Chambliss.

Senator CHAMBLISS. Thank you, Mr. Chairman.

Gentlemen, thank you as well as your families for your willingness to continue or come back, as the case may be, into public service. We appreciate that very much.

I want to pick up, Dr. Carter, on what Senator Reed was talking about and what Senator McCain was talking about earlier. That is this issue of competition that you and I had a chance to visit about. As we have downsized, we do note that there are not only limited chances for competition, but also increased chances of conflict of interest. In the Levin-McCain bill there is a provision that would require the contract for the performance of systems engineering and technical assistance functions contain a provision prohibiting the contractor or any affiliate from having a direct financial interest in the development or construction of the weapon system or its components.

At face value this provision would seem to prohibit a company from performing any systems engineering and technical assistance (SETA)-related work that you just talked about on a contract for which they are prime or subcontractor. Given that over the last several years the larger defense contractors have bought up many of those smaller contracts for systems engineering that traditionally supplied the support, this provision may have the effect of prohibiting much of the systems engineering expertise from being available at DOD.

Now, the current provisions in the Federal Acquisition Regulation allow for avoidance, neutralization, or mitigation of significant potential conflicts of interest. At face value, the bill would simply require avoidance. Do you believe that strict avoidance is all that's necessary, or do mitigation and neutralization of conflicts of interest—could they be appropriate in some instances?

Dr. CARTER. I'm not sure I can give you a fully complete answer to that. That's something I'd like to get in and take a look at if I am confirmed. But I understand the question entirely. These large firms are now both making stuff and involving themselves in the process by which we decide as a government what we're going to buy and what it's going to look like, and that is the very clear possibility for the fact and at a minimum the appearance of a conflict of interest.

It's another form of organizational conflict of interest, the other one being the "make versus buy" question in a large and integrated firm. I see quite clearly the potential for conflict there. I am also aware within companies of their attempts to build firewalls between the organization that's doing the SETA work and the organization that will do the other work. I think from the outside looking in, those firewalls are always questionable.

But the only reason I can't give you a clear answer is that there is a countervailing factor, which is we do need that SETA work done. If, as Senator Reed said, we can't do it within the walls of

government, then how are you going to get it done? If excellent SETA work can be done by those companies, one doesn't want to lose access to that competence.

So somehow we have to get access to it without the conflict of interest, and you're asking me how to do that and I'm saying I don't know. I can't give you a good answer as I sit here today, but I know that you want and deserve a good answer, and that would be something I would try to give you in time if I were in the job.

Senator CHAMBLISS. As Senator Levin said, we're going to take up this bill it looks like next Thursday. I don't know the answer either. That's why I'm asking you, because we need to solve this, obviously, to make your job easier and make sure that we have the ability to inject that competition that is so sorely needed to do what Senator McCain suggested earlier, and that is try to get these costs under control.

This train wreck that was coming 10 years ago is here with respect to certain systems, and we have other train wrecks down the road that are going to make it very difficult for you to operate within the budget if we don't make sure we have that competition there.

If you have any thoughts on it between now and next week, I wish you'd let me know.

Dr. CARTER. May I add just one thing?

Senator CHAMBLISS. Sure.

Dr. CARTER. So as not to have nothing at all to help you, what the provision is, as I understand it, as drafted, is it requires more transparency. That certainly is necessary and clearly required. In addition to that, I can't say more. But to the extent that that's what is provided for in this draft legislation, I think it's absolutely appropriate.

Senator CHAMBLISS. Again, you and I discussed the issue of multi-year contracts. I'm a big fan of multi-years. I wish we could do more of them. What are your thoughts on multi-year contracts?

Dr. CARTER. I think there are, as we discussed, Senator, instances when multi-year contracting is appropriate and cost effective, and in those instances I would, if I were in this job, recommend that multi-year procurement be followed. I understand that there are other considerations in multi-year contracting, but where it is cost effective—and I think there are examples where it can be cost effective—my job would be to say what was cost effective.

Senator CHAMBLISS. We have two depots in my State. I have an opportunity to visit those depots regularly, at Warner Robbins and at Albany. Our folks do great work there, both on the military side and the civilian side. You're familiar with the 50-50 rule. You're also familiar with the fact that there's some discussion that's ongoing relative to changing the way modification work is incorporated in the 50-50.

Assuming that this discussion does continue, I want a commitment from you that you will dialogue with the committee and particularly me about any changes that might be forthcoming to the 50-50 relative to that modification within our depots, before any changes are made.

Dr. CARTER. Absolutely, I give you that commitment.

Senator CHAMBLISS. Dr. Miller and Ambassador Vershbow, earlier this week, General Craddock testified before this committee and in his written testimony he recommended maintaining two heavy brigade combat teams (BCTs) in Europe. I would like the thoughts of both of you on troop levels and composition for European Command, and how do you think we need to posture ourselves in Europe in response to Russia as well as our commitments to allies, threats of WMD proliferation, and transnational terrorist threats?

Dr. MILLER. Senator, the plan change to take those additional two heavy BCTs out of Europe is the product of a global posture review conducted by the previous administration, something like 6 years ago now. I think that what's happened in the mean time is that the world has changed. We're obviously now at war in Iraq and Afghanistan in significant ways. As we begin the transition from Iraq over the coming years and as we rebalance in Afghanistan as well, my view is that it merits taking a fresh look, not just at the question of these two heavy BCTs, but a fresh look at the global posture across the board.

I would anticipate, if confirmed, it would be something I would hope to engage in as part of the QDR.

Senator CHAMBLISS. Ambassador?

Ambassador VERSHBOW. Senator, I fully agree with what Dr. Miller just said about the importance of taking a fresh look at the overall global force posture. In the case of the recommendation by our Supreme Allied Commander, General Craddock, I think it is important to take a look at that. It's under review, as I understand, right now. Clearly there have been some significant developments even in the last year, including the Russia-Georgia war, which has cast new light on the critical importance of Article 5 of the NATO Treaty, especially for our new members in Central and Eastern Europe.

So I think it is appropriate to look at this question in the context of our global force posture review.

Regarding potential cooperation with Russia in dealing with trans-national terrorist threats—that was your second question, Senator?

Senator CHAMBLISS. Yes.

Ambassador VERSHBOW. I think we've had reasonably good cooperation with Russia over the years, even as some other aspects of our relationship have become more difficult. I think that the Russians certainly recognize that some of the most serious threats to their own security are the same as the ones that we worry about: instability to their south, Islamic fundamentalism, and of course the conflict in Afghanistan is very close to their own borders.

We've had a good counterterrorism working group with the Russians that has identified potential areas of cooperation. But I think there's more that we could do. I think there are some areas where we see the Russians taking a stance that could be more constructive. Iran is one example. I hope that as we try to expand those areas of cooperation we can do more with the Russians than we have in the past.

Senator CHAMBLISS. Thank you.

Senator REED. Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman, and thank each and every one of you for your interest and commitment to service in our government.

Dr. Miller, I too had a son who graduated from Duke, although he was there much later, after you left. Sorry he didn't get to take your classes.

In North Carolina we have a large number of resettled refugees from the Democratic Republic of the Congo, and they talk to me frequently about the extreme violence in the eastern region of their home country. Last week, General William Ward, the Commander of AFRICOM, provided our committee with an update on the dire security situation in the east. He spoke about the ongoing military operations against the various rebel groups in that region, which according to reports his command helped to plan.

I was wondering, Ambassador Vershbow and Dr. Miller, if you could provide the committee with your views on the situation in the Democratic Republic of the Congo and any update on the assistance that AFRICOM recently provided in supporting the multilateral military operation; and also if you can keep me and my staff updated on any decisions that are being made involved in decisions related to the Congo.

Ambassador VERSHBOW. Thank you, Senator. I think that you've identified an important issue that highlights the fact that security problems on the African continent are going to become an increasing focus for the United States in the coming years. I think that the fact that we decided to consolidate our resources focused on Africa in the form of the new AFRICOM was a very important initiative. The design of that has, I think rightly, tried to take a more integrated approach between civilian and military instruments of power.

Since I'm not yet confirmed, I don't have a very up-to-date insight into exactly how deeply involved we were in the recent operations. I do understand that there was some planning assistance involved.

I think that the trends in the Democratic Republic of the Congo have been positive as they've begun to recover from a decade of conflict and civil war. But I think that our provision of security assistance in targeted ways can help them get over the remaining hurdles. Thus far I think we've been focused on helping them reform their own defense sector and provide capacity-building assistance. But I need to get more deeply into the subject, if confirmed for this position, and I look forward to keeping in touch with you and your staff on this issue.

Senator HAGAN. Thank you.

Dr. MILLER. Senator, I would just add that, to pile onto what Ambassador Vershbow had to say, that the work of AFRICOM, working with other agencies of the Government—including State and the U.S. Agency for International Development, in situations where it's not quite so dire and where those personnel are able to get in is, I believe, a critical part of U.S. capabilities for making improvements on the African continent.

The use of targeted aid and the support of AFRICOM in terms of planning operations I think is also a very important instrument.

I, like Ambassador Vershbow, don't have insights into exactly what happened, but I also will commit, if confirmed, to work with you and your staff to keep you updated.

Senator HAGAN. Thank you.

I have another question, about the oil bunkering. Your responses to the committee's APQs—and this is to Ambassador Vershbow and Dr. Miller again—you discussed your intent to work with the State Department to develop strategies to counter the serious problem of oil bunkering in the Niger Delta. In particular, you emphasized maritime security and military capacity-building.

Given our growing dependence on West African countries for our energy requirements, I was pleased to see your interest in working on this issue. Ambassador Vershbow and Dr. Miller, can you expand on your answer to the committee? I'm particularly interested in knowing whether you believe we can overcome the issue of systemic corruption in Nigeria and successfully building the Nigerian military's capacity to respond to this threat, and whether you think any near-term progress can be made on this issue?

Ambassador VERSHBOW. Senator, I will confess that this is a subject on which I need to learn a lot more about.

Senator HAGAN. Okay.

Ambassador VERSHBOW. But from what I've been briefed thus far, I'm told that the assistance programs that we've carried out with the Nigerian military are going well, that the level of professionalization is improving. So I think with persistent effort over several years, we should be able to help them deal with the corruption issue.

But this is again an area where I may need to delve more deeply into the subject.

Senator HAGAN. Okay.

Dr. MILLER. Senator, the problem of oil bunkering and lawlessness in the Niger Delta is longstanding and serious. The assistance that the United States can provide I think is important, but I think it's essential to understand that this the problem has deep roots in the history and regionally in this area of the Delta and with the Nigerian military facing other challenges as well, security challenges in the north. We should expect to make progress and we should work to make progress, but we should expect that it will be challenging. The question of corruption is certainly longstanding and one where the United States will have to pay attention as it works with the government.

Senator HAGAN. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN [presiding.] Senator Thune.

Senator THUNE. Thank you, Mr. Chairman.

Thank you to all of you for your willingness to serve the country. I appreciate your appearing before the committee this morning and responding to the questions that we have.

As I conveyed to Dr. Carter in a meeting in my office, I have an interest in long-range strike capability and I would like to pose a question to Dr. Carter as well as Dr. Miller, regarding that subject, and refer to an article that was published in the January-February edition of the Foreign Affairs Journal, in which Secretary Gates wrote that "The United States' ability to strike from over the hori-

zon will be at a premium” and will “require shifts from short-range to long-range systems, such as the Next Generation Bomber (NGB).”

Dr. Carter, I also wanted to note that you had written a piece titled “Defense Management Challenges for the Next American President” for *Orbis*, which is a journal published by the Foreign Policy Research Institute. Your piece was in the winter 2009 edition of that publication, and in that piece you write about what you quote as “prudently hedging” against the down side scenario of competitive or aggressive behavior by China.

You write that: “A more specific focus of prudent hedging is to frustrate Chinese efforts in counter-air, counter-carrier, counter-space, and counter-information capabilities.” When you speak of frustrating Chinese efforts in counter-air capabilities as part of what you term the “China hedge,” do you think those efforts should include development of the NGB, which is expected to be able to penetrate air space that is protected by highly advanced air defense systems?

Dr. CARTER. Thank you, Senator. I appreciate the reference to both Secretary Gates’s statement and to that article.

There are several dimensions to frustrating Chinese anti-air capabilities which are relevant in a number of situations, the Taiwan Strait contingency being one. That article also refers to the possibility, which I certainly don’t hope for and I personally consider unlikely, but still one to be taken seriously, that China’s evolution takes it in a direction that brings it to a position of antagonism with the United States. That needs to be a little piece of our planning and our technology and program work that hedges against that eventuality. That was the thrust of the article.

The NGB would certainly be in that portfolio of things. I’m sorry I’m not in a position to speak specifically to the NGB program now. I have not had access to that program in the course of the pre-confirmation process. So that’s something I’ll be able to look into if and when confirmed.

I noted from our conversation the importance of that program in your mind as well as mine. When I get access to it, if you’ll allow me, I’d like to come back and tell you what I found.

Senator THUNE. Good. I appreciate that. I understand you’re somewhat limited at this point in time in what you can say about it.

Dr. Miller, in your view, how does the NGB and long-range strike capability fit into our national security strategy and the new QDR?

Dr. MILLER. Sir, I certainly agree with the quote that you provided from Secretary Gates with respect to the importance of long-range capabilities. More broadly, I’d say that over time it’s worth considering a shift in balance, shorter range to longer range, and also not across the board from any systems, manned to unmanned as well, because unmanned provides longer duration, persistence, and some other advantages.

Like Dr. Carter, I have not had an opportunity to look into the details of the program and its capabilities, but we certainly expect that it would be an important issue in the QDR.

The question of shorter-range and long-range aviation overall takes up a tremendous amount of the overall procurement, re-

search and development procurement budget of the Department. So it's certain to be an area of attention in the QDR, pretty much without question, sir.

Senator THUNE. As you perhaps know, the 2006 QDR did call for fielding the NGB by 2018. I guess I would be interested as you have an opportunity to begin to review some of those time lines, your thoughts about whether or not that's something we can continue to keep on schedule.

We are somewhat concerned about the age of the bomber fleet today, the B-52s, B-1s, B-2s, and some of the limitations that are imposed on those as assets that can be used in different operations and theaters, and the need for long-range strike and the need for range and payload that bombers can deliver. So my view is that the NGB is an important piece of our national security strategy, and I hope that you will come to that conclusion when you have an opportunity to review it more completely.

One other question, with regard to the missile defense systems. I know some of that ground's been covered already and so I'll try not to be redundant. But I think the question has to do with capability and reliability. I think I mentioned, Dr. Carter, in our discussion as well that the system has demonstrated considerable success during test flights and, according to the MDA, across all missile defense systems programs. Thirty-seven of 47 hit-to-kill intercepts have been successful since 2001.

Now, in the past 2 years, 13 of 15 intercepts have been successful, and we've had a couple combatant commanders in front of the committee, Admiral Keating and General Renuart, who testified earlier that they're confident the ground-based missile defense system would work if North Korea ever fired a missile at us. In fact, Admiral Keating went so far as to say that we have a high probability of knocking down a North Korean missile fired at us.

The President, however, has said that missile defense should be deployed only after "the technology is proved to be workable." If confirmed, the three of you are going to have considerable influence on the future of this system, and I'd like to get your thoughts on that.

Dr. Carter, are you confident about that capability at this point?

Dr. CARTER. Senator, I'm not confident of that as I sit here today. Clearly it's something, given the quote you made from the President, that if I am confirmed, I need to get in and get a look at.

I do have some familiarity, however, with that as a consequence of my beat on the National Missile Defense White Team, and the technical effectiveness of the system has grown steadily over time, that's to be expected with the evolution of technology. There are really two questions to ask about the effectiveness of the ground-based system against a North Korean threat.

The first is whether, if the North Koreans, which is likely, at first do not have any special so-called "penetration aids" or gimmicks on board their missile, but they're just trying to get it over here, what is the chance of an intercept in that case? We've done a lot of testing that bears upon that question. I think that General Renuart and General Chilton—I don't want to put words in their mouth, but I think that they anticipate, particularly if one has the

option of shooting several times at an incoming primitive missile, of having a good chance, as you said, of being successful.

The question of the next generation—or a ballistic missile accompanied with penetration aids gets a lot more difficult. In fact, it's inherently difficult for a passive infrared sensing missile defense system to deal with that circumstance. Now, that wouldn't be what the North Koreans started with first. That becomes another question.

I think both the first issue, dealing with North Korea in the near-term, and the second issue, dealing with them in the far-term, are in the intent of the President's statement, and if I'm confirmed, I'll get in there and get to the bottom of it and discuss it with you as we go.

Senator THUNE. If I might, Mr. Chairman, just to the other members of the panel. Dr. Miller and Ambassador Vershbow, what would you plan to do about the European missile defense site, the so-called third site, that has been something that has been of great focus here in the last few years, and more recently in the last few weeks as discussions have gotten to more of an elevated level about that particular site.

Dr. MILLER. Senator, let me first provide a very brief answer to the earlier question and agree with Dr. Carter, but also note how much has changed over the last couple decades from when I worked on the Hill previously. The defense of the country clearly needs to be top priority of all departments, including DOD. There is no such thing as a perfect defense against all threats.

We have to expect adversaries to adapt, including North Korea, as Dr. Carter suggested. In looking at the system's capabilities for our National Missile Defense Security and how those should be adapted over time is a fundamental issue.

I say that because, when you talk about the European site, so-called "third site," that is an issue as well. It will be addressed, I would expect, as part of another review of the congressionally-mandated review of the Missile Defense Review, but also in the context of discussions with Poland and the Czech Republic. The United States had previously made an offer to Russia to have some involvement, some cooperation with the system. I expect that it would make sense to me to have continued engagement with Russia on that question; then also to have a look at what Iran does and whether it's willing to verifiably stop its nuclear activities, and what that does for the threat and how that comes into the mix.

I expect that there'll be extensive consultations with our allies on this question and with Russia on this question over the coming weeks and months.

Senator THUNE. Ambassador, anything to add?

Ambassador VERSHBOW. Senator, I endorse what my colleagues have said. If confirmed for my job, I will be approaching this issue, obviously, from the political perspective. I will leave the issue of technical evaluation of the effectiveness of the systems to my colleagues.

I think it is important that the NATO alliance has endorsed missile defense. I think we've come a long way in reaching consensus that there is an emerging threat that affects not only the United States, but our allies in Europe; and I think that our newer allies

in Poland and the Czech Republic have taken important risks in agreeing in principle to the third site.

As I understand it, our overall policy on missile defense is now under review, so I can't really speak authoritatively as to precisely what we may do. But I would underscore what Dr. Miller said, that when it comes to the third site in Europe the driving factor is the emerging threat posed by Iran, both its pursuit of a nuclear weapons capability and its ability to marry that capability to long-range ballistic missiles.

Now, of course if we were, as others have said, able to eliminate that threat in a verifiable way, we'd have to look at the situation in a different light. But we're far away from achieving that goal, and so I think it's going to be a very important issue, on which we will need to continue to consult with our allies and of course with Congress.

The Russians have made a lot of complaints about the proposed third site. I believe that if one looks carefully at the geography and the technical capabilities that are being considered, this system poses no threat to Russia. It's directed at Iran. But I think the way forward—and this is something that Chairman Levin has spoken about just recently—could be to try once again to pursue cooperation in missile defense with Russia, which faces similar threats, may have some technological contributions to make to some kind of combined architecture. I think this could be a way of reinvigorating NATO-Russia cooperation, which has not fulfilled its early promise.

So there's a lot of different dimensions to this issue. The policy is under review. I think we'll want to continue to take on board the views of this committee and other Members of Congress.

Senator THUNE. Thank you, and I appreciate your observations. I agree when you have NATO endorsing it, the Czechs and Poles have invested and risked a lot on this, and I would hope that it's something that we don't walk away from.

Thank you.

Chairman LEVIN. Senator Vitter.

Senator VITTER. Thank you, Mr. Chairman.

I'm going to have to be real brief because I have to run to the floor. So I have two questions for Dr. Carter. Doctor, several acquisition programs have experienced cost overruns, including Nunn-McCurdy breaches and schedule delays and the like, and we all want to turn this negative trend around. What would you consider to be the essential principles of acquisition reform that could help do this, and specifically what are your thoughts about how competition can contribute to that?

Dr. CARTER. Thank you, Senator. I think I'd start, with respect to the reform part of your question, with the observation of Secretary Gates, and he said a few weeks ago with respect to acquisition reform: There is no silver bullet. What he meant by that—and I completely agree—is that as we look at the programs that are in trouble, as you noted—I think you said several; I wish it were only several; it's many severals that are in trouble—and you go back through their lifetime and do the diagnosis, how did we get to where we are, what went wrong, there are a number of different things that you can point to.

So there isn't one common denominator, but there are some things that keep popping up. One is the size and quality of the acquisition workforce, the people who do this job, from contracting to systems engineering and so forth, on the government side. That seems to be a frequent offender.

Another one—and I'm committed to try to fix that problem and this committee has already taken some action in that regard in years past, long before I came along for nomination, to deal with that. Other causes, I won't go through them all, but they're almost all covered in the draft legislation that is coming out of this committee, the Weapons Acquisition Reform Act of 2009. They have to do with, in addition to systems engineering, better cost estimation, including paying attention to cost estimates once you get a cost estimate, technology development, technology maturity, technology readiness at the early stage of a program, and your second point, which is competitiveness.

I believe that competitiveness is the single most powerful tool the government has to get good value. We have a system in which we don't make our weapons inside the government. We contract with the private sector for them, and competition is the great discipliner. It's not always possible to have competition in programs because there aren't always many manufacturers of the things that we need in defense. There's been some consolidation of the industry over the last couple decades. But even in those cases, it's usually possible to have competition far enough into the program to discipline it, that is through the development phase. It's also possible, even if you can't have competition at the level of the prime contractor throughout the lifetime of the program, to maintain a competition at lower tiers of the program that supply subsystems.

So in all these ways we need to keep looking for ways to keep competition alive, because that's the great discipliner that gives value to the warfighter and to the taxpayer. I'm committed to looking for those vehicles to keep competitiveness alive and, as I said, some of them have already been suggested by this committee.

Senator VITTER. I'm concerned about several examples of that, and one near the top of my list is JSF and the issue of engines. Congress has repeatedly pushed for competition in that area and has inserted that into the budget, and DOD has repeatedly resisted and never itself put that into the budget.

Would you support having that in the budget and continuing that competition because of the discipline, particularly long-term, it would provide?

Dr. CARTER. I understand exactly why some have favored an alternative engine for JSF, and I also understand the other argument. Let me just spell the two out. But the net of it is that I don't have access to the information now that allows me to make this tradeoff. But if you have two engines, you have the value of competition. On the other hand, you're paying for two programs.

So where does that come out? That's a quantitative question essentially and I don't have access to the information to allow me to make that assessment.

Senator VITTER. I'd urge you to focus on that as soon as possible. I'm going to propound some more detailed questions about that as your nomination is pending. I believe that the Pentagon's decision,

based on what I know, is based on a very short-term calculus of those pros and cons you're talking about, not a project life calculus, and I'm concerned about that, and I think competition there would really bring some rigor to that program, and I think a lot of folks, not just those directly involved, but the prime and other folks involved, support that.

I'll be propounding some more detailed questions, but I'd love for you to look at that.

Dr. CARTER. I absolutely will look into it and try to answer the questions.

Senator VITTER. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Vitter.

Senator McCaskill, are you ready?

Senator MCCASKILL. I am. I just have one brief area I want to cover, Mr. Chairman.

I want to thank Dr. Carter for spending some time with me in my office yesterday. I want to just for the record of this hearing talk about some of the things we talked about yesterday, most specifically contracting as it relates to operations in a contingency and the problems that have occurred in Iraq and before that in Bosnia, the same problems; and make sure that we have on the record your commitment to realize that that's a very important part of your responsibility at DOD.

Specifically, I would like you to speak briefly about what you would envision your plans as it relates to the drawing down of the contract force in Iraq. It is a huge undertaking to draw down that contract force and to do it in a way that is cost effective for the American taxpayer and that we get value out of the stuff that we've paid for that these contractors have is a big concern of mine. I have not yet heard anyone really address this issue that shows that there's a lot of planning going into it and a lot of forethought about how we can do it in a way that works for the American taxpayer, because frankly not much about contracting has worked either for the American military in terms of getting stuff we need at the best value, or the American taxpayer.

Dr. CARTER. Thank you, Senator, and I appreciated your giving me the time yesterday. I do absolutely share your concern. This is a big subject, contractors, the use of contractors in contingency operations, when that's appropriate and how to manage them.

My own view is, as I shared with you yesterday, it's unavoidable. We can't do it all ourselves. But there's a question of what activities are appropriate to contract out and then contracting competently so that there is no waste, fraud, and abuse and there's effective and efficient contracting. I think that there's reason for concern in recent years in dealing with Iraq and also Afghanistan about all those questions, you're absolutely right.

Also, another point you made which I agree with: Once you have all of these folks working for you and the need goes away or the need changes, are you able to move them from one place to another or move them off the government payroll when the contingency's over?

The last thing I'll say, I'll say for everyone, but I said yesterday, is I'm highly aware that the title of the job for which you're considering me is "AT&L," and that's not an afterthought in a time of

war. Secretary Gates has expressed his determination to supply the troops in the field the way they deserve. We have a big job to move equipment out of Iraq and into Afghanistan, and I realize I will be involved in that and that's a huge task, and to deal with this question of contingency contracting and contractors on the battlefield. As I said to you yesterday, that's something I know I need to get on top of if I get in this job, and I'm committed to working with you and learning from you and telling you what I learn as I do that.

Senator MCCASKILL. I think it is a big job, and I think that one of the ways that we will fix this long-term is for there to be an atmosphere of accountability. I'm not aware of anyone ever losing any kind of rank, getting any kind of demotion, just for their failure to oversee contracts in a way that makes sense. Until we instill that in the culture, I worry that our military commanders, for all the right reasons, want to focus on the mission, and they don't see how much stuff costs on contracts, whether it's in the mess or whether it's who's cleaning the latrines or who's doing the laundry—they don't really see that as part of the mission, and fixing that culture is probably the hardest part, and I wish you all the luck.

Dr. CARTER. Thank you.

Senator MCCASKILL. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCaskill.

Dr. Carter, DOD now actually spends more for the acquisition of services than it does for the acquisition of products, including major weapons systems. Yet the Inspector General and GAO have reported that the Department routinely fails to conduct required acquisition planning and contract oversight functions for its services contracts.

We enacted a provision a couple years ago that required the DOD to develop a comprehensive inventory of activities that are performed by service contractors, to serve as the basis for an analysis of whether we've gone too far in contracting out. The first inventory was supposed to be submitted last July. The Department now says it'll be unable to meet this requirement until 2011 at the earliest.

Now, that really shows the problem. We have contracted out so much of the services that are needed that we can't even inventory those services for years.

This is a real issue around here, this contracting out and whether or not we're getting our money's worth. There are some policy issues, but there's also some financial issues here. There's some real policy issues which I referred to in terms of contracting out security functions, but there's also some significant dollars here that are at issue. Will you ensure that the Department conducts the inventory of activities performed by service contractors in a timely manner?

Dr. CARTER. I will, Senator.

Chairman LEVIN. Will you tell us what the earliest date is we can expect that? Once you're confirmed and check this out, will you get back to the committee?

Dr. CARTER. You bet, Senator.

Chairman LEVIN. Dr. Miller, you wrote last September about the need for game-changing diplomacy with Iran, to emphasize more the need to put in place a comprehensive verification regime on Iran's activities and to talk directly with Iran on a broad range of issues. President Obama last Friday issued a video message to the people and Government of Iran in which he said that Iran had a choice, to assume its rightful place in the community of nations, but that Iran could not achieve this through terror and arms.

Do you believe that there is an opportunity to engage Iran on issues of mutual concern, or at least that the attempt should be made?

Dr. MILLER. Mr. Chairman, yes, I believe certainly an attempt should be made. Whether there's an opportunity or not we will find out as we see the reaction of the Iranians.

Chairman LEVIN. One of the issues, of course, that we're most concerned about with Iran is a potential missile threat, particularly if they ever achieve and obtain a nuclear weapon, given the make-up and the rhetoric of their current leadership. One of the arguments that I've been making is that if we can improve our relations with Russia, particularly if we can work with Russia on a joint missile defense that would be a defense against Iranian missiles, that this could be a true game-changer in a lot of ways, not just in providing a missile defense, but in terms of making a very strong statement to Iran about the determination of the world community, including Russia working with us, to deal with an Iranian threat.

First, Dr. Miller, if the United States and Russia could agree on a cooperative approach to missile defense, do you think that would be an important statement in terms of a determination to deal with Iran, but also could help to improve U.S. security in other ways?

Dr. MILLER. Yes, Mr. Chairman, I do.

Chairman LEVIN. Ambassador Vershbow, do you have a comment on that? Would you agree with that?

Ambassador VERSHBOW. Mr. Chairman, yes, I would agree very much that if we could achieve cooperation with Russia on missile defense it would be a very important step in our relationship with Russia in dealing with a common threat, and it would send a very important message to Iran as well, which could underpin the diplomatic engagement that we are going to attempt to see whether we're able to get them to change their course on nuclear weapons development.

Chairman LEVIN. Secretary Gates told us about a month ago or so that NATO would welcome cooperation or discussions about the possible cooperation between the United States and Russia relative to a cooperative approach to missile defense. You, of course, are an expert on NATO. Would you agree with Secretary Gates that NATO would welcome those efforts?

Ambassador VERSHBOW. I agree 100 percent with Secretary Gates on this, and my experience is that this attitude of our NATO allies goes back many years. As NATO itself has come to see the importance of missile defense, they have also emphasized their interest in cooperating with Russia. Whether it's in the NATO-Russia context or a U.S.-Russia context, they're very much for it.

Chairman LEVIN. Dr. Miller, the Law of the Sea Convention is pending in the Senate. In your response to prehearing policy questions, you stated that you support U.S. accession to the convention. Can you tell us what advantages you see in our joining that convention?

Dr. MILLER. Mr. Chairman, in my view there are numerous advantages to accession. Let me just list a couple for starters. The first is that the United States has a strong stake in freedom of navigation across the globe and that the convention would bring the United States additional tools to enforce that and to bring it in compliance also with international guidelines on that with the other countries that are involved across the globe.

Second, stepping out of the defense area, as the Arctic opens up and we've seen an opening that allows passages that haven't been the case for as long as we've recorded the situation up there, there is a growing competition over minerals and over energy resources of other kinds, including oil, in that area, and accession to the Law of the Sea would give the United States a firm foundation for competing for those resources.

Chairman LEVIN. Thank you.

Dr. Miller, Ambassador Vershbow, let me turn to Afghanistan for a minute. One of the reasons that the expansion of the Afghan Security Forces is slower than we'd like is the lack of trainers. That's the long pole in the tent, we've been told by a number of our military leaders.

The second longest pole would be the shortfall in equipment for the Afghan Security Forces. At Tuesday's hearing, General Craddock said that NATO members are failing to provide funds for the NATO Afghan Army Trust Fund, which would help pick up costs both of training and equipping the Afghan army.

Let me ask you, Ambassador, would you look into the NATO trust fund issue, press NATO members to meet the agreed target for that fund? Will you—and I guess this would also apply to Dr. Miller—try to see what you can do to speed up the availability of equipment to the Afghan army and the Afghan police?

Ambassador VERSHBOW. Mr. Chairman, if confirmed, I definitely will make all of those things a high priority. I think that these are issues that we would also be looking for some progress on at the upcoming NATO summit, and particularly the trust fund that you mentioned. These are all keys to success in Afghanistan and I think our allies have not done as well as we had hoped, but we will continue to press.

Chairman LEVIN. Thank you.

Senator SESSIONS.

Senator SESSIONS. Thank you, Chairman Levin, for your courtesy and your good leadership of this committee.

I congratulate President Obama on your nominations. From what I have seen in my opportunity to meet with each of you, I believe you bring to the government the kind of experience and good judgment that we need. You'll be under a lot of challenges. There's an article today about liberal groups demanding the President cut the defense budget even more. Our preliminary analysis of the budget that the President has submitted would indicate that he will be taking the defense expenditure from over 4 percent, almost 4.5 per-

cent of gross domestic product, to 3 percent of gross domestic product. That's a dramatic cut if it's carried out and it's going to put some real pressure on each one of you in conducting your affairs in a fair and legitimate way.

What has happened in the past is that procurement, Dr. Carter, is the thing that gets whacked, because you have to pay the salaries for our men and women in uniform and their health care, the electric bills, the housing, the transportation and upkeep on the equipment, and the fuel that goes in it. That is just a dangerous thing and I hope that you will recognize, as you and I talked earlier, that each President does have a responsibility during his watch to not only pay the salaries of our personnel, but also to provide for the future the weapons systems that they may need, but take years to develop.

Would you agree that that's a responsibility a President has?

Dr. CARTER. I would, absolutely.

Senator SESSIONS. Dr. Carter, in your advance questions I was pleased with a number of your answers. One of them, you were asked about international participation in the American defense base and you stated: "It also helps the Department to achieve the advantages of competition in contracting, which includes the ability to obtain world-class best value products for our warfighters."

Do you stand by that statement?

Dr. CARTER. I do.

Senator SESSIONS. I think that's fundamentally correct. Let me ask you this first, "best value" is a term that has some meaning within defense circles. Could you briefly summarize what that means to you?

Dr. CARTER. Yes. "Best value," I think, means in acquisition more or less what it means in everyday life, which is looking at a purchase, in this case of a system, by taking into account all of the attributes that one wishes to have. So it means the same thing as it means when I think the person, any of us, goes in to best value to buy a radio or something.

Senator SESSIONS. So price is a factor, quality is a factor, capabilities are a factor, all things, and you try to make a judgment for the warfighter based on the overall assembly of qualities that provide the best value for the military?

Dr. CARTER. That's correct. One attaches weights to the various factors and makes a decision accordingly.

Senator SESSIONS. Let me just be frank with you. We're talking about an Air Force refueling tanker bid process that's been stopped. Secretary Gates said that as soon as you're on board it'll be your project. Congratulations. I said he punted and he caught his own punt and now he's going to hand it off to you. [Laughter.]

But I believe strongly that best value is a fundamental principle of any good acquisition system. So I'm a little worried because I've heard some comment that, not official, but, well, we might just decide this purely on price. I would note that in the last bid round that the aircraft that would be built in my State was a good bit cheaper. At any rate, I think it was a more capable aircraft also.

But I think best value is the right principle. Do you intend to apply the best value principle to your supervision of the bid process

for the number one Air Force priority, the replacement of the aging tanker fleet?

Dr. CARTER. I recognize this is going to be a big responsibility. I think best value is a good principle in acquisition, as it is in everyday life. What I committed to you when we chatted earlier, and I do again, is my job as I understand it, if I'm confirmed, with respect to the tanker deal, is to serve up the best acquisition strategy as honestly as I possibly can.

I realize that this acquisition program's been through its ups and downs and so forth. I'm going to take a fresh eye to it and call it to the Secretary of Defense as straight as I possibly can.

Senator SESSIONS. But do you intend to use the principle of best value for the warfighter? Because we required this contract to be bid, Congress did, after a flap over the contract—and some people went to jail. We required it to be bid, and there were only two bidders in the whole world that could supply this aircraft. Both of them would build their aircraft in the United States.

I guess my question to you is, when you're going to analyze this why would you not use the traditional process of best value?

Dr. CARTER. I would use exactly the traditional process of best value in this case and attach the weights to the various parameters that go into best value, of which price is one, and call it like I see it. The Secretary of Defense and the President will have a voice in that as well. But my commitment to you is I will call it absolutely straight.

Senator SESSIONS. I thank you for that. We had a lot of political talk and out of all this storm DOD will have to maintain its reputation for integrity and making decisions on the merits and not politics. I feel like you've been there, you understand the pressures you're likely to be subjected to, but you'll do the right thing. That's what my present belief is, and I hope that the Secretary or others wouldn't alter the traditional process of choosing the best aircraft.

Chairman LEVIN. Thank you, Senator Sessions.

There are no more questions, so we will bring the hearing to a close. I want to before I close just say two things. First, we're going to bring these nominations to a vote of the committee as quickly as we possibly can and hopefully get these to the floor before recess.

Second, I just want to not only thank you for your commitment to public service; I want to thank again your families. If you don't mind, Dr. Miller, I want to single out particularly your younger kids. They have looked interested way beyond what could reasonably be expected of kids their age. I have grandkids about their age, so I won't say any more than that. But anyway, I know how important it is that all of you have your families here, but particularly when you have young kids that would much rather be out there in the rain.

Dr. MILLER. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you all. We will stand adjourned.

[Whereupon, at 11:55 a.m. the committee adjourned.]

[Prepared questions submitted to Ashton Carter by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense (DOD) Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I worked in the Pentagon both before and after the passage of the Goldwater-Nichols Act, and I have seen its benefits in terms of jointness, provision of military advice to the President, and streamlined acquisition management. Some of the act's principles are also being applied to interagency coordination. At this time I see no specific changes in the act that I would recommend. If confirmed, I would have the opportunity to assess whether changes were needed, and if so consult with this committee.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Acquisition reform must be a central priority, and if confirmed I will be assessing proposals for reform, including ones that might touch on aspects of Goldwater-Nichols. I will consult with this committee if such a proposal arises and appears to have merit.

DUTIES

Question. Twenty years ago, Congress established the position of Under Secretary of Defense for Acquisition in response to the recommendations of the Packard Commission. The Packard Commission report stated: "This new Under Secretary . . . should be the Defense Acquisition Executive. As such, he should supervise the performance of the entire acquisition system and set overall policy for R&D, procurement, logistics, and testing. He should have the responsibility to determine that new programs are thoroughly researched, that military requirements are verified, and that realistic cost estimates are made before the start of full-scale development. (In general, we believe, cost estimates should include the cost of operating and maintaining a system through its life.) He should assure that an appropriate type of procurement is employed, and that adequate operational testing is done before the start of high-rate production. He also should be responsible for determining the continuing adequacy of the defense industrial base."

Do you believe that the position of Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(ATL)) has the duties and authorities necessary to carry out the recommendations of the Packard Commission?

Answer. Yes.

Question. Do you see the need for modifications in the duties and authorities of the USD(ATL)?

Answer. No.

Question. Do you believe that DOD has effectively implemented a streamlined chain of command for acquisition programs, as envisioned by the Packard Commission?

Answer. I believe that the Department has implemented acquisition chains of command that provide a good management structure to meet current acquisition requirements and outcomes. If confirmed, I will continue to examine these acquisition structures and oversight chains.

Question. Do you see the need for modifications in that chain of command, or in the duties and authorities of any of the officials in that chain of command?

Answer. Not at this time. I believe the statutory reporting chain which provides USD(AT&L) directive authority for Service acquisition programs via the Service Secretaries is a critical authority which must be maintained. If confirmed, I will evaluate the current chains of command and recommend adjustments, if needed.

Question. Section 133 of title 10, U.S.C., describes the duties and responsibilities of the USD(ATL).

Assuming you are confirmed, what additional duties do you expect that the Secretary of Defense will prescribe for you?

Answer. If confirmed, I expect the Secretary to assign me duties and functions commensurate with the USD(AT&L) position, and any others he may deem appropriate.

Question. Do you recommend any changes to the provisions of section 133 of title 10, U.S.C., with respect to the duties of the USD(AT&L)?

Answer. No, I do not.

QUALIFICATIONS

Question. If confirmed, you will be responsible for managing an acquisition system pursuant to which DOD spends almost \$400 billion each year. Section 133 of title 10, U.S.C., provides for the Under Secretary to be appointed from among persons who have an extensive management background in the public or private sector.

What background and experience do you have that you believe qualifies you for this position?

Answer. I have had 25 years of experience working with and for DOD and its supporting defense industry and laboratories on major weapons systems and command and control systems. I first worked in DOD for Secretary Caspar Weinberger on space programs, nuclear weapons systems, command and control systems, and strategic defense in the 1980s. In the 1990s I was privileged to serve as Assistant Secretary of Defense. In between government service I have been a consultant and advisor to defense companies, to defense laboratories and federally-funded research and development centers (FFRDCs), and a member and consultant to the Defense Science Board and to DOD's Threat Reduction Advisory Council. I have participated in many panels and studies that have assessed the defense acquisition system going back to the 1980s and have written three books that address the subject. As a physicist, I am very familiar with developments in defense technology and therefore with the role the USD(AT&L) plays in overseeing the science and technology (S&T) efforts of the Department. The USD(AT&L) also plays a key role in our nuclear deterrent and in other strategic issues. I have been deeply involved in technical aspects of nuclear weapons and missile defense since the 1980s.

Question. What background or experience, if any, do you have in the acquisition of major weapon systems?

Answer. Acquiring weapons systems in a manner that that warfighter and taxpayer deserve has several dimensions, and I have background and experience in each. Secretary Gates and Deputy Secretary Lynn have stressed the need to ensure that the Department's acquisition program meets the needs of the 21st century, and I believe they expect the USD(AT&L) to contribute, with other senior managers, to that end. I have previously participated in many governmental and nongovernmental reviews and analyses of U.S. military strategy, trends in the types of threats the United States will face in the future, and the spectrum of military and non-military responses to these threats. Once a need is identified and a materiel approach selected, it is important to know whether the technology is mature enough to permit an acquisition program to commence and then to proceed at every key milestone. I am a physicist with long involvement in the technical aspects of defense programs, and I therefore believe that if confirmed, I will be able to discharge the USD(AT&L)'s responsibility to assess technology readiness levels at each step of the acquisition process. Development, procurement, and sustainment of major weapons systems require experience with DOD and the defense industry, systems engineering at every stage, and iron discipline. I have had 25 years of experience working with and for the Defense Department and its supporting industry, laboratories, and FFRDCs. Finally, the acquisition system itself is widely regarded as having failed both the warfighter and the taxpayer, and reform of the system is an imperative. I have participated in numerous reform efforts dating to the 1980s and have written three books that deal with the subject. I believe that, if confirmed, I can use this experience to help identify reforms that will avoid in the future some of the problems we are having with major defense programs today.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the USD(AT&L)?

Answer. A first major challenge is to ensure that AT&L is supporting the war effort through rapid acquisition of systems our soldiers, sailors, airmen, and marines need in Iraq, Afghanistan, and in the war on terror; ensuring that the logistics supply lines into and out of Iraq, and into Afghanistan, can support the forces and the required deployment timetables; and making sure the role of contractors on the battlefield is appropriate. A second major challenge is to get under control the many troubled acquisition programs that are supposed to be supporting our forces—both today and tomorrow. Too many of these programs are failing to meet their cost, schedule, and performance expectations, and some are failing even more fundamentally the test of whether they are needed for the future military challenges we are

most likely to face. In addition to disciplining these programs, reform of the acquisition system is needed to ensure that we do not get ourselves in this position again in the future. A third challenge is to ensure that the Department has the strongest S&T base supporting national security. A fourth challenge is to ensure, consistent with overall national policy, a safe and secure nuclear deterrent and technically effective missile defense programs.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I would use the experience and knowledge I have of defense programs, technology, and DOD to focus on these priorities, working with the acquisition team, other senior managers in the Department, Congress, and industry leaders to produce real progress for the warfighter and taxpayer.

ACQUISITION ORGANIZATION

Question. Do you believe that the office of the USD(ATL) is appropriately structured to execute its management and oversight responsibilities?

Answer. I have not had the opportunity to familiarize myself with the AT&L office organization, so at this time, I am not aware of significant structural impediments to accomplishing its function.

Question. Do you believe that any change is needed in the duties and responsibilities of the Deputy Under Secretaries of Defense serving under the USD(ATL)?

Answer. See previous answer.

Question. Do you see the need for any changes in the relationship between the USD(ATL) and senior acquisition officials in the military departments?

Answer. Not at this time. If confirmed, I will be actively involved in setting acquisition policy. My expectation would be to ensure the senior acquisition officials in the military departments and defense agencies implement and follow those policies, and demonstrate effective execution.

Question. Do you see the need for any additional processes or mechanisms to ensure coordination between the budget, acquisition, and requirements systems of the DOD and ensure that appropriate trade-offs are made between cost, schedule, and performance requirements early in the acquisition process?

Answer. I am not aware of a need for additional processes or mechanisms at this time. If confirmed, I will examine these issues and recommend appropriate changes. I do believe, however, that coordination among these functions is absolutely necessary to best serve the warfighter and taxpayer.

Question. What do you believe should be the appropriate role of the Service Chiefs in the requirements, acquisition, and resource-allocation process?

Answer. The Service Chiefs have a key role to play in the development of capability needs and in the planning and allocation of resources consistent with those needs. Service Chiefs do not play a formal role in the acquisition chain of command, but I would respect and encourage their advice on matters within their purview.

Question. What do you believe should be the appropriate role of the combatant commanders in the requirements, acquisition, and resource-allocation processes?

Answer. Combatant commanders have an important role in the development of capability needs and advising on priorities and allocation of resources consistent with those needs. I believe the acquisition system should be especially responsive to their urgent needs. If confirmed, I would respect and encourage their advice on matters within their purview.

Question. Do you see the need for any changes in the structure or operations of the Joint Requirements Oversight Council (JROC)?

Answer. JROC membership may be appropriate for the USD(AT&L). The USD(AT&L) must continue to at least participate in a full advisory role. Close coordination between requirements and acquisition is essential.

MAJOR WEAPON SYSTEM ACQUISITION

Question. The investment budget for weapon systems has grown substantially over the past few years to more than \$150 billion per year. An increasing share of this investment is being allocated to a few very large systems such as the Joint Strike Fighter, Future Combat Systems, and Missile Defense.

Do you believe that the current investment budget for major systems is affordable given increasing historic cost growth in major systems, costs of current operations, projected increases in end strength, and asset recapitalization?

Answer. I am concerned that it may not be. Moreover, I believe the investment budget will be under increasing pressure in the future. If confirmed, this is an area I will manage vigorously to ensure we have an affordable long-term investment strategy.

Question. If confirmed, how do you plan to address this issue?

Answer. If confirmed, I expect to acquaint myself as quickly as possible with the facts of this situation and assist the Secretary and Deputy Secretary in addressing it.

Question. What would be the impact of a decision by the Department to reduce purchases of major systems because of affordability issues?

Answer. If confirmed, I will carefully assess the impact of any proposal to reduce purchases of major systems because of affordability, including the impact on national security risk, industrial capability, as well as international implications.

Question. Nearly half of DOD's 95 largest acquisition programs have exceeded the so-called Nunn-McCurdy cost growth standards established in section 2433 of title 10, U.S.C, to identify seriously troubled programs. The cost overruns on these major defense acquisition programs (MDAPs) now total \$295 billion over the original program estimates, even though the Department has cut unit quantities and reduced performance expectations on many programs in an effort to hold costs down.

What steps, if any, would you take, if confirmed, to address the out-of-control cost growth on DOD's MDAPs?

Answer. We cannot change history. But it is important to assess whether programs that have already experienced cost growth are still out of control and whether they can still be afforded. Looking forward I intend to ensure programs start out right with an appropriate degree of practical realism in terms of technical, performance and cost expectations. If confirmed, I intend to emphasize realistic overall cost estimates and time phased funding profiles. If confirmed, I will also work to devise and enforce current and possible new policies to discipline the system so that program requirements are well understood when programs start, and are stabilized as much as possible over the long term to guard against unreasonable future growth in costs.

Question. What steps if any do you believe that the Department should consider taking in the case of MDAPs that exceed the critical cost growth thresholds established in the Nunn-McCurdy provision?

Answer. I believe the current statutory provision provides the authority to take appropriate measures, including major restructuring or termination.

Question. Do you believe that the Under Secretary of Defense for Acquisition, Technology, and Logistics, as currently structured, has the organization and resources necessary to effectively oversee the management of these MDAPs? If not, how would you address this problem?

Answer. If confirmed, this is an area I would examine carefully and make appropriate recommendations.

Question. Do you believe that DOD has the systems engineering and developmental testing organizations, resources, and capabilities needed to ensure that there is a sound basis for key requirements, acquisition, and budget decisions on MDAPs? If not, how would you address this problem?

Answer. I believe sound systems engineering and developmental testing is a fundamental basis for acquisition decisions, and I am concerned about the adequacy of the organizational and human capital dimensions of systems engineering in the Department. If confirmed, I will review and assess the organizations and capabilities in this area and make appropriate recommendations.

Question. Do you see the need for any changes to the Nunn-McCurdy provision?

Answer. Not at this time, but this is an issue I would intend to review if confirmed.

Question. What principles will guide your thinking on whether to recommend terminating a program that has experienced "critical" cost growth under Nunn-McCurdy?

Answer. The certification criteria in the statute provide a set of principles, namely, whether a program is still a high priority to national defense, has sound management, the costs are well understood moving forward, and that there are no other more cost effective alternatives.

Question. In the budget blueprint that supports the fiscal year 2010 presidential budget request, the administration committed to "setting realistic requirements, sticking to them and incorporating 'best practices' by not allowing programs to proceed from one stage of the acquisition cycle to the next until they have achieved the maturity to clearly lower the risk of cost growth and schedule slippage."

If confirmed, how would you help ensure that the Department makes good on this commitment?

Answer. If confirmed, I intend to enforce policies that discipline the system so that program requirements are well understood when programs start, and are stabilized as much as possible over the long term to guard against unreasonable future growth in costs for whatever reason.

TECHNOLOGICAL MATURITY

Question. Over the last several years, the Government Accountability Office (GAO) has prepared a series of reports for this committee comparing DOD approach to the acquisition of major systems with the approach taken by best performers in the private sector. GAO concluded that private sector programs are more successful because they consistently require a high level of maturity for new technologies before such technologies are incorporated into product development programs. The Department has responded to these findings by adopting technological maturity goals in its acquisition policies.

How important is it, in your view, for the Department to mature its technologies with research and development (R&D) funds before these technologies are incorporated into product development programs?

Answer. Launching into a product development program with immature technology presents a high risk with respect to cost, schedule, and performance. Ideally, technology maturation is accomplished through private sector investments, and the Department is able to harvest the results of commercial investments in its acquisition programs. However, when certain critical technologies are required for achieving mission success, and private sector investment is unlikely to be forthcoming or adequate, the Department should invest R&D funds to mature those technologies.

Question. What steps if any would you take, if confirmed, to ensure that the key components and technologies to be incorporated into major acquisition programs meet the Department's technological maturity goals?

Answer. Since 2006, the Department has required that all critical technologies for major acquisition programs must be rated as Technology Readiness Level (TRL) 6 or better at Milestone B, and TRL 7 or better at Milestone C. I believe this policy is extremely beneficial, and has resulted in numerous cases where acquisition programs have devoted much more attention to ensuring technology readiness at key milestones. I am in favor of developing policy and approaches that will shine a spotlight on technology readiness even earlier in the acquisition cycle to ensure that maturation occurs in a timely way.

Question. Do you believe that the Department should make greater use of prototypes, including competitive prototypes, to ensure that acquisition programs reach an appropriate level of technological maturity, design maturity, and manufacturing readiness before receiving Milestone approval?

Answer. Yes. When judiciously applied, competitive prototyping can substantially reduce development risk in acquisition programs. I say judiciously because it is not practical to force every program to prototype full systems in every case. If confirmed, I will include competitive prototyping in acquisition strategy decisions informed by technology readiness, systems engineering and integration evaluations, and other management factors.

Question. Section 2366a of title 10, U.S.C., requires the Milestone Decision Authority (MDA) for a Major Defense Acquisition Program (MDAP) to certify that critical technologies have reached an appropriate level of maturity before Milestone B approval.

What steps if any will you take, if confirmed, to make sure that the DOD complies with the requirements of section 2366a?

Answer. If confirmed, as chair of the Defense Acquisition Board and MDA for Acquisition Authority-1 programs, I will use technology readiness assessments submitted to ensure compliance with section 2366a.

Question. What steps if any will you take to ensure that the Director of Defense Research and Engineering is adequately staffed and resourced to support decision-makers in complying with the requirements of section 2366a?

Answer. If confirmed, I expect to work with Director, Defense Research and Engineering (DDR&E) and DUSD(S&T) and other members of the Office of the Secretary of Defense (OSD) staff to evaluate the adequacy of resources available to meet the challenges of complying with the requirements of section 2366a.

Question. Are you satisfied that technology readiness assessments adequately address systems integration and engineering issues which are the cause of many cost overruns and schedule delays in acquisition programs?

Answer. On the basis of the information currently available to me, I am not. If confirmed, I will direct the appropriate USD(AT&L) offices to ensure that systems integration, systems engineering, and technology maturity issues are properly addressed and coordinated.

Question. Do you plan to follow the recommendation of the Defense Science Board Task Force on the Manufacturing Technology Program and require program managers to make use of the Manufacturing Readiness Level tool on all programs?

Answer. I believe strongly in the importance of manufacturing technology as a type of technology deserving DOD fostering just as DOD fosters the technologies embedded in the manufactured weapons themselves. I also agree that manufacturing readiness should be assessed more rigorously before programs pass into production. If confirmed, I intend to review the specific recommendations of the DSB report and to take actions that reflect the importance of this subject.

Question. Beyond addressing technological maturity issues in acquisition programs, what other steps should the Department take to increase accountability and discipline in the acquisition process?

Answer. There are a great number of factors that contribute to the pervasive failure of programs to meet their schedule, cost, and performance goals. As Secretary Gates has said, there is no "silver bullet" that will address all of the factors. They involve all steps of the process, from unrealistic requirements and technology immaturity at the front end of the process to instability and inefficient production runs at the back end, to insufficient systems engineering throughout the process, to many other factors. If confirmed, I will be committed to addressing all these factors and, where necessary, reforming the system to minimize the frequency of these pervasive problems.

FIXED PRICE-TYPE CONTRACTS

Question. Recent congressional and DOD initiatives attempt to reduce technical and performance risks associated with developing and producing major defense acquisition programs so as to minimize the use of cost-reimbursable contracts.

Do you think that the Department should move towards more fixed price-type contracting in developing or procuring major defense acquisition programs? Why or why not?

Answer. I do think that the Department should whenever possible consider moving towards the more frequent use of fixed price type contracts in developing or procuring major defense acquisition programs. Whether a program should have a fixed price or cost type contract depends upon several key factors: 1) the stability of the requirement; 2) the maturity of the technology employed; 3) the ability to estimate accurately the cost of the system to be procured; and 4) stable funding. If these key factors are met, then it is appropriate to utilize a fixed price type contract for developing and producing major defense systems.

TECHNOLOGY TRANSITION

Question. The Department continues to struggle with the transition of new technologies into existing programs of record and major weapons systems and platforms. Further, the Department also has struggled with moving technologies from DOD programs or other sources rapidly into the hands of operational users.

What impediments to technology transition do you see within the Department?

Answer. There are several impediments to technology transition. One is the gap between the results of R&D sponsored in DOD laboratories and the engineering and production processes in industry. Another is having a rapid enough acquisition system that the technologies it embeds in the systems it produces are not out of date by the time they are fielded. Another is the gap that sometimes develops between the commercial (and largely globalized) technology base and the defense technology base.

Question. What steps if any will you take, if confirmed, to enhance the effectiveness of technology transition efforts?

Answer. As a technologist myself, overcoming these impediments will be a priority for me and for the DDR&E. If confirmed, I intend, with that individual's help, to devise and implement further measures to overcome these impediments.

Question. What can be done from a budget, policy, and organizational standpoint to facilitate the transition of technologies from S&T programs and other sources, including small businesses, venture capital funded companies, and other nontraditional defense contractors, into acquisition programs?

Answer. It is very important that defense tap into these sources, which are some of the most innovative in the world, for technology that can be applied to weapons systems. R&D and acquisition processes must make it easier for such entities to contribute to defense.

Question. Do you believe that the Department's S&T organizations have the ability and the resources to carry technologies to higher levels of maturity before handing them off to acquisition programs?

Answer. The S&T organizations can take technologies to levels appropriate to their mission, but going beyond that (e.g., to demonstrations in operational environments) would require resources not generally resident in S&T organizations.

Question. What steps if any do you believe the Department should take to ensure that research programs are sufficiently funded to reduce technical risk in programs so that technological maturity can be demonstrated at the appropriate time?

Answer. To enable research programs to reduce technical risk in acquisition programs more effectively, they must have current, detailed understanding of the technical approaches in those programs. Visibility into acquisition program technical approaches by the research enterprise may need to be improved.

Question. What role do you believe technology readiness levels (TRLs) and manufacturing readiness levels (MRLs) should play in the Department's efforts to enhance effective technology transition and reduce cost and risk in acquisition programs?

Answer. Together with others, TRLs and MRLs can serve as management tools to gauge the maturity of technologies that might be adopted by acquisition programs and to estimate the effort required to achieve acceptable production capabilities.

Question. Section 2359a(c) of title 10, U.S.C., requires the USD(ATL) to designate a senior official of the Department to support the development of policies to facilitate the rapid transition of technologies from S&T programs into acquisition programs of DOD.

If confirmed, would you expect to appoint a single technology transition advocate who would be responsible for promoting technology transition throughout the Department?

Answer. If confirmed, I would expect the DDR&E to be responsible for promoting technology transition.

Question. If appointed, where should this official be positioned within the Office of the USD(ATL) to most effectively and seamlessly transition technologies to acquisition programs from S&T programs and other sources and best reflect the needs of both the user and technology development communities?

Answer. See above.

UNREALISTIC COST, SCHEDULE, AND PERFORMANCE EXPECTATIONS

Question. Many acquisition experts attribute the failure of DOD acquisition programs to a cultural bias that routinely produces overly optimistic cost and schedule estimates and unrealistic performance expectations. As Senator Levin explained at a June 2008 hearing, "contractors and program offices have every reason to produce optimistic cost estimates and unrealistic performance expectations, because programs that promise revolutionary change and project lower costs are more likely to be approved and funded by senior administration officials and by Congress."

Do you agree with the assessment that overly optimistic cost and schedule estimates and unrealistic performance expectations contribute to the failure of major defense acquisition programs?

Answer. Yes. I believe there are real cultural issues at play in this regard. For example, each program is so difficult to start and "sell" within the enterprise and Congress that multiple stakeholders are needed, and the tendency is to settle on satisfying everyone's wishes. Since few of the parties at this stage face any real penalty for making the program do "a little bit more", this drives to overly ambitious programs with exquisite capabilities. Ultimately this results in overpromising and underdelivering.

Question. What steps if any would you take, if confirmed, to ensure that the Department's cost, schedule, and performance estimates are realistic?

Answer. There is no one step that will ensure that cost, schedule, and performance estimates are realistic. But, if confirmed, I will insist on technology maturity and the solicitation and heeding of independent cost estimates.

Question. Do you believe that early communication between the acquisition, budget, and requirements communities in DOD can help ensure more realistic cost, schedule, and performance expectations?

Answer. Yes, and if confirmed, I will work hard to break down any barriers between these three processes.

Question. If so, what steps if any would you take, if confirmed, to ensure such communication?

Answer. The key is leadership that is committed in all three processes working together. I believe that Secretary Gates and Deputy Secretary Lynn expect those who lead the requirements, acquisition, and budgeting functions to work as a team. If confirmed, that is my intention.

Question. What is your view of the need for an independent office of cost estimating within DOD?

Answer. The function of independent cost estimation is critical. My first Pentagon job in the 1980s was in PA&E, and I am well familiar with the capabilities of the

CAIG. If confirmed, I will take a careful look at the cost estimation capabilities, and more importantly whether their results figure in decisionmaking.

Question. DOD has increasingly turned to incremental acquisition and spiral development approaches in an effort to make cost, schedule, and performance expectations more realistic and achievable.

Do you believe that incremental acquisition and spiral development can help improve the performance of the Department's major acquisition programs?

Answer. Yes I do, in selected instances. Like other useful acquisition concepts, spiral development is not a silver bullet but should be in the acquisition system's toolkit.

Question. In your view, has the Department's approach to incremental acquisition and spiral development been successful? Why or why not?

Answer. I think the answer is mixed. My impression is that some of the more successful implementations of evolutionary approaches have come recently as a result of rapid fielding necessitated by operations in Iraq and Afghanistan. But if not used wisely, the result can be added complexity to systems.

Question. What steps if any do you believe are needed to ensure that the requirements process, budget process, and testing regime can accommodate incremental acquisition and spiral development approaches?

Answer. Each of these requirements, budget, and testing processes must be flexible enough to accommodate the possibility, where appropriate, of applying these acquisition concepts. If confirmed, I will seek to ensure this flexibility.

Question. How should the Department ensure that the incremental acquisition and spiral development programs have appropriate baselines against which to measure performance?

Answer. I see this as no different than any other program. If confirmed, I would insist that each increment or evolution of capability have a baseline for assessing execution performance.

FUNDING AND REQUIREMENTS STABILITY

Question. The poor performance of major defense acquisition programs has also been attributed to instability in funding and requirements. In the past, DOD has attempted to provide greater funding stability through the use of multi-year contracts. More recently, the Department has sought greater requirements stability by instituting Configuration Steering Boards to exercise control over any changes to requirements that would increase program costs.

Do you support the use of Configuration Steering Boards to increase requirements stability on major defense acquisition programs?

Answer. Yes, I support activities such as Configuration Steering Boards that prevent unnecessary changes to program requirements or system configuration that could have an adverse impact on program cost and/or schedule. In addition, I am aware that Configuration Steering Boards are required by section 814 of the National Defense Authorization Act for Fiscal Year 2009 and are included within the recent update to DOD Instruction 5000.02. If confirmed, I will review the Department's implementation of Configuration Steering Boards to ensure they are contributing to requirements stability as intended.

Question. What are your views on multi-year procurements? Under what circumstances do you believe they should be used?

Answer. In general, I favor multi-year procurement strategies if they provide savings. Frequently, multi-year procurements can offer substantial savings through improved economies in production processes, better use of industrial facilities, and a reduction in the administrative burden in the placement and administration of contracts. There are a number of criteria to be considered in deciding whether a program should be considered for multi-year procurement. Among them are: savings when compared to the annual contracting methods; validity and stability of the mission need; stability of the funding; stability of the configuration; associated technical risks; degree of confidence in estimates of both contract costs and anticipated savings; and promotion of national security.

Question. What is your opinion on the level of cost savings that constitute "substantial savings" for purposes of the defense multi-year procurement statute, title 10 U.S.C. § 2306b?

Answer. There has been much debate over the threshold on the level of cost savings that constitutes "substantial savings." It has been suggested that the Department needs to raise the bar with regard to the amount of savings that are achieved through the use of multi-year contracts. I agree that we need to ensure that the savings achieved are substantial not only in terms of dollars but also substantial in

terms of the relative difference in price that we would otherwise pay for an annual procurement.

But I also understand that placing an absolute minimum threshold on “substantial savings” could unnecessarily limit the contracting options available and should be evaluated based upon the circumstances of each particular proposed program being proffered for multi-year procurement.

Question. Under what circumstances, if any, do you believe that a multi-year contract should be used for procuring weapons systems that have unsatisfactory program histories, e.g., displaying poor cost, scheduling, or performance outcomes but which might otherwise comply with the requirements of the defense multi-year procurement statute, title 10 U.S.C. § 2306b?

Answer. Additional analysis and careful review of all information should be completed when a multi-year contract is being considered for use in procuring weapon systems that have unsatisfactory program histories but which otherwise comply with the statutory requirements. The Department would need to examine very carefully all risk factors to determine if a multi-year procurement would be appropriate.

Question. How would you analyze and evaluate proposals for multi-year procurement for such programs?

Answer. The Department would need to examine all risk factors in conjunction with the potential for cost savings to determine if multi-year procurement would be appropriate for a program with an unsatisfactory history. If confirmed, I will analyze and evaluate proposals for multi-year procurements in accordance with all statutory and regulatory requirements and I will ensure that we fully understand the benefit to the warfighter and taxpayer to proceed with a multi-year procurement for a program with a checkered history.

Question. If confirmed, what criteria would you apply in determining whether procuring such a system under a multi-year contract is appropriate and should be proposed to Congress?

Answer. If confirmed, I will ensure that all of the regulatory and statutory requirements are met before proceeding with any multi-year procurement.

Question. Under what circumstances, if any, should DOD ever break a multi-year procurement?

Answer. If the Department has done its job properly, the cancellation of a multi-year contract should be a rare event. However, there are circumstances under when it could occur. One such event would be the failure to fund a program year. Another would be the failure of the contractor to perform, which ultimately would lead to a decision to terminate for default.

Question. What other steps if any would you recommend taking to increase the funding and requirements stability of major defense acquisition programs?

Answer. I understand the Department has implemented numerous initiatives focused on improving funding and requirements stability. These include: (1) greater upfront planning implicit in the new Material Development Decision; (2) the use of Configuration Steering Boards; (3) Program Management Agreements to limit requirements changes; and (4) competitive prototyping to inform the Department on the realism of requirements. I believe these and other Department initiatives are sound and I support them. It will take time to show the impact of these policies, but lasting change starts with good common-sense policies that are measurable, enforceable, and widely accepted as good policy. If confirmed, I plan to closely monitor the execution of these policies and look for other opportunities to improve funding and requirements stability.

MULTI-YEAR CONTRACTS

Question. The statement of managers accompanying Section 811 of the National Defense Authorization Act for Fiscal Year 2008 addresses the requirements for buying major defense systems under multi-year contracts as follows: “The conferees agree that ‘substantial savings’ under section 2306b(a)(1) of title 10, U.S.C., means savings that exceed 10 percent of the total costs of carrying out the program through annual contracts, except that multi-year contracts for major systems providing savings estimated at less than 10 percent should only be considered if the Department presents an exceptionally strong case that the proposal meets the other requirements of section 2306b(a), as amended. The conferees agree with a GAO finding that any major system that is at the end of its production line is unlikely to meet these standards and therefore would be a poor candidate for a multi-year procurement contract.”

If confirmed, under what circumstances, if any, do you anticipate that you would support a multi-year contract with expected savings of less than 10 percent?

Answer. Multi-year contracting can provide cost savings, and therefore it should be considered as an option to serve the warfighter and taxpayer. There has been much debate over the threshold on the level of cost savings that constitutes “substantial savings.” That cost saving can be measured in dollar terms and in price the Department would otherwise pay for an annual procurement. If confirmed, I would value the flexibility to consider both metrics of cost savings.

Question. If confirmed, under what circumstances, if any, would you support a multi-year contract for a major system at the end of its production line?

Answer. It may be appropriate to consider a program for multi-year procurement when it is nearing the end of production. It depends upon the circumstances of the particular procurement. Analysis and careful review of all information as well as should be completed when a multi-year contract is being considered.

CONTINUING COMPETITION AND ORGANIZATIONAL CONFLICTS OF INTEREST

Question. The Defense Science Board Task Force on Defense Industrial Structure for Transformation recommended last summer that “DOD must increase its use of creative competitive acquisition strategies, within limited budgets, in order to ensure long-term innovation and cost savings, at both prime and critical sub-tier elements. Competition would not be required beyond the competitive prototype phase, as long as the current producer continuously improves performance and lowers cost—but other contractors should always represent a credible option if costs rise or performance is unacceptable.”

Do you agree with this recommendation? Do you believe that continuing competition is a viable option on MDAPs?

Answer. Yes, I believe that DOD must increase its use of creative competitive acquisition strategies to ensure long-term innovation and cost savings. Harnessing the power of competition in some form should be a goal on all MDAPs.

Question. Do you support the use of competitive prototypes for MDAPs?

Answer. Yes, I support competitive prototyping in our MDAPs.

Question. In your view, has the consolidation of the defense industrial base gone too far and undermined competition for defense contracts?

Answer. I understand it is the Department’s policy to oppose transactions that reduce or eliminate competition and I would implement that policy where necessary. Yes, I am concerned about the loss of competition caused by consolidation over the last few decades.

Question. If so, what steps if any can and should DOD take to address this issue?

Answer. The Department continues to discourage mergers and acquisitions among defense materiel suppliers that are anti-competitive or injurious to national security. If confirmed, I will work to adjust DOD transaction evaluation procedures/criteria as appropriate.

Question. What steps if any do you believe DOD should take to address organizational conflicts of interest in MDAPs?

Answer. Even the perception of an Organizational Conflict of Interest (OCI) may taint the integrity of the competitive procurement process. I support the requirement in the Federal Acquisition Regulation to avoid, neutralize, or mitigate significant potential conflicts before contract award.

Question. What are your views on the lead system integrator approach to managing the acquisition of major weapon systems?

Answer. I do not support the use of lead systems integrators unless adequate steps have been taken to ensure that there is no potential for conflict of interest. In general, the Department should select development contractors to perform substantive development work, rather than to perform acquisition functions closely associated with inherently governmental functions.

Question. What are your views on the use of system engineering and technical assistance contractors that are affiliated with major defense contractors to provide “independent” advice to the Department on the acquisition of major weapon systems?

Answer. Systems Engineering and Technical Assistance (SETA) support contractors are currently a critical component of the Department’s acquisition workforce. They provide engineering and analysis services in a consulting capacity. However, they must be properly utilized and not used to perform any inherently governmental functions. If confirmed, I will continue the efforts to increase government and FFRDC staff support to reduce the reliance on SETA contractors.

Question. What lines do you believe the Department should draw between those acquisition responsibilities that are inherently governmental and those that may be performed by contractors?

Answer. For acquisition responsibilities, I believe a clear line must be drawn such that only government personnel may make value judgments that obligate funds and commit the government contractually. However, I recognize a number of other important functions within the Defense acquisition community must be retained for government-only performance. Given the current workforce mix and the level of contracted support to acquisition functions, I believe a careful review is needed to assess whether the Department has become too dependent on contractors in this area. I understand Congress has recently codified a definition of inherently governmental functions and required a review by the Department. I believe this review provides a mechanism to address this important question.

Question. If confirmed, what steps if any would you take to ensure that defense contractors do not misuse their access to sensitive and proprietary information of DOD and other defense contractors?

Answer. It is my understanding that USD(AT&L) has issued guidance to information assurance and acquisition personnel to ensure strong measures are in place at the individual contract level. Because this issue is potentially so serious, I intend to review it, if confirmed.

Question. If confirmed, what steps if any would you take to ensure that defense contractors do not unnecessarily limit competition for subcontracts in a manner that would disadvantage the government or potential competitors in the private sector?

Answer. This is an unacceptable practice, and if confirmed, I will review the Department's safeguards against it.

DEFENSE ACQUISITION TRANSFORMATION REPORT

Question. In February 2007, the Secretary of Defense submitted a report to Congress titled: "Defense Acquisition Transformation Report to Congress".

If confirmed, to what extent would you support and continue implementation of the defense acquisition reform initiatives set forth in that report?

Answer. Acquisition reform will be a priority for me, if I am confirmed. In general, I support the majority of the acquisition reform initiatives identified in the Report. If confirmed, I will support the implementation activities which are already underway and evaluate additional ways and means to improve the effectiveness and efficiency of the system.

Question. In particular, please discuss your views regarding the following aspects of transformation:

Portfolio Management.

Answer. In general, I support the Capability Portfolio Management (CPM) Initiative which was intended to provide an enterprise-level, horizontal (cross-component) view of the Department to better balance and harmonize joint warfighter capability needs with capability development efforts. If confirmed, I will review the CPM construct to ensure it enables better-integrated and balanced advice across the full spectrum of capability needs to DOD senior leadership.

Question. Tri-Chair Concept Decision

Answer. In general, I strongly support efforts that harmonize the major Department processes for requirements, resources, and acquisition and, if confirmed, will pursue management mechanisms that ensure harmonization.

Question. Time-Defined Acquisitions

Answer. Time should be a critical element in DOD acquisition decisionmaking since in many programs "time is money," and emphasizing time forces consideration of material alternatives and technologies that can be fielded consistent with user need.

Question. Investment Balance Reviews

Answer. The Department should take a holistic approach, assessing the opportunities and threats across all the Services, to determine where to best focus investment and energy. Investment Balance Reviews (IBRs) provide the Defense Acquisition Executive with the opportunity to make course corrections during the life cycle of the portfolio of capabilities, systems, and programs. If confirmed, I will review this initiative for any additional support or direction needed.

Question. Risk-Based Source Selection

Answer. The Risk-Based Source Selection concept is intended to identify and quantify risk, inform requirements development and cost estimation, and improve available information to assess contractor proposals. Risk-Based Source Selection techniques enhance the quality of requests for proposal by improving technical criteria and making DOD a "smarter" buyer. It is my understanding that the Department has implemented a series of policy initiatives including: (1) the issuance of policy describing the proper use of award fees; (2) the establishment of competitive prototyping as the underlying strategy for demonstrating the technical maturity of

key technologies; (3) the requirement to do Preliminary Design Reviews before MSB when consistent with the Technology Development Strategy; (4) the requirement to conduct peer reviews of source selections to ensure requirements traceability and effective source selections; (5) the requirement for offerors to substantiate claims of technology maturity as part of their proposals for Engineering and Manufacturing Development contracts; and (6) a new MDA decision point titled the Post Critical Design Review Assessment to assess design maturity. If confirmed, I will review these efforts to ascertain whether they can be further strengthened.

Question. Acquisition of Services Policy

Answer. It is my understanding that the Department has recently issued new policy guidance regarding the Acquisition of Services. It is my understanding that this new policy imposes significant changes in the way the Department manages and reviews the performance of service contracts. If confirmed, I intend to assess such initiatives and related policy and make any adjustments necessary to implement the President's direction to carry out robust and thorough management and oversight of contracts.

Question. Systems Engineering Excellence

Answer. Systems engineering is a practice that is critical throughout the lifetime of a program and especially in its early stages, as recent testimony before this committee has attested. If confirmed, I will continue to strengthen early and informed systems engineering in both new and current acquisition programs as a clearly demonstrated best practice, augmented with a revitalized systems engineering workforce to strengthen program management organizations.

Question. Award Fee and Incentive Policy

Answer. I support the efforts currently underway to link award fee and incentive payments to acquisition outcomes such as cost, schedule, and technical performance. If confirmed, I intend to assess such initiatives and related policy and make any adjustments necessary to ensure that their intended purposes are being met.

Question. Open, transparent, and common shared data resources with Defense Acquisition Management Information Retrieval (DAMIR)

Answer. DAMIR currently provides enterprise visibility to acquisition program information. If confirmed, I intend to evaluate current initiatives focusing on implementation of open, transparent, and common shared data resources.

Question. Restructured Defense Acquisition Executive Summary Reviews

Answer. The Defense Acquisition Executive Summary reviews provide a forum for OSD to work with the Services and agencies to evaluate progress in program execution. In general, I support this initiative which is designed to improve decision-making, communication, and trust between OSD, the Joint Staff, and the Services. If confirmed, I will review this initiative for any additional support or direction.

Question. Policy on Excessive Pass-Through Charges

Answer. I support the full implementation of section 852 to ensure that pass-through charges on contracts or subcontracts that are entered into for or on behalf of DOD are not excessive in relation to the cost of work performed by the relevant contractor or subcontractor.

Question. Are there other initiatives or tools discussed in the Defense Acquisition Transformation Report that you view as particularly likely, or unlikely, to be productive in achieving acquisition reform?

Answer. I am aware that the final Defense Acquisition Transformation Report was recently submitted. The report has identified numerous initiatives. If confirmed, I will study all of the report's acquisition reform initiatives to determine additional ways and means to improve the effectiveness and efficiency of the system.

OPERATION OF THE DEFENSE ACQUISITION SYSTEM

Question. On December 2, 2008, the Department promulgated a new version of DOD Instruction 5000.02, the key guidance on the Department's acquisition of major weapon systems. The revised instruction restructured the management framework for translating capability needs and technology opportunities into stable, affordable, and well-managed defense acquisition programs.

What is your assessment of the new version of this instruction and the extent of its implementation to date?

Answer. The new instruction is a constructive step, and if confirmed, I will ensure that it is effectively implemented and seek to improve upon it.

Question. If confirmed, what steps would you take to continue implementation of the new version of DOD Instruction 5000.2 and improve upon it?

Answer. If confirmed, I intend to monitor the implementation and effectiveness of the new policies. If necessary, I will alter these or introduce additional policies to ensure that our programs achieve cost, schedule, and performance objectives.

CONTRACTING FOR SERVICES

Question. Over the past 8 years, DOD's spending on contract services has more than doubled, with the estimated number of contractor employees working for the Department increasing from an estimated 730,000 in fiscal year 2000 to an estimated 1,550,000 in fiscal year 2007. As a result, the Department now spends more for the purchase of services than it does for products (including major weapon systems).

Do you believe that DOD can continue to support this rate of growth in its spending on contract services?

Answer. I am very concerned about this trend. If confirmed, I intend to work with Secretary Gates and the Department's senior leadership to address the underlying question about whether the Defense Department is adequately staffed, quantitatively and qualitatively, to carry out its responsibilities. If the Department continues to utilize contracted service providers to such a large extent, it is absolutely essential we have a sufficient amount of qualified government, civilian, or military personnel dedicated to perform meaningful oversight of contractor activities.

Question. Do you believe that the current balance between government employees (military and civilian) and contractor employees is in the best interests of DOD?

Answer. DOD requires some mix of Federal employees and contractors to carry out its mission effectively, but that mix might be out of balance. If confirmed, I would support efforts to help ensure the appropriate balance.

Question. What steps if any would you take, if confirmed, to control the Department's spending on contract services?

Answer. If confirmed, I intend to work with Secretary Gates and the Department's senior leadership to assess the amount of spending on contracted services, consistent with President Obama's March 4, 2009, memorandum on Government Contracting which emphasizes the need to ensure best value for the taxpayers.

Question. At the request of the committee, GAO has compared DOD's practices for the management of services contracts to the practices of best performers in the private sector. GAO concluded that leading companies have achieved significant savings by insisting upon greater visibility and management over their services contracts and by conducting so-called "spend" analyses to find more efficient ways to manage their service contractors. Section 801 of the National Defense Authorization Act for Fiscal Year 2002 required DOD to move in this direction. Sections 807 and 808 of the National Defense Authorization Act for Fiscal Year 2008 built on this provision by requiring inventories and management reviews of contracts for services.

Do you believe the Department is providing appropriate stewardship over service contracts?

Answer. I am concerned that in some instances it might not be. I understand the Department has recently instituted policy and processes, such as peer reviews of significant service acquisitions, to ensure taxpayer funds are spent wisely when acquiring contracted services. If confirmed, I intend to assess these policies and procedures and make any necessary adjustments.

Question. Do you believe that the Department has appropriate management structures in place to oversee the expenditure of more than \$150 billion a year for contract services?

Answer. I have not had an opportunity to assess the current management structures that are in place, but if confirmed, I will make the necessary adjustments to implement President Obama's direction to carry out robust and thorough management and oversight of contracts.

Question. Do you believe that the Department should conduct a comprehensive analysis of its spending on contract services, as recommended by GAO?

Answer. Although I am not familiar with the specific GAO recommendations regarding a comprehensive spend analysis, I agree with its intent. It is also my understanding that the office of the Director of Defense Procurement and Strategic Sourcing has completed an extensive spend analysis of the Department's spending on services. If confirmed, I intend to review this analysis to ensure that the Department is effectively implementing cost saving strategies in the procurement of services.

Question. Do you support the use of management reviews, or peer reviews, of major service contracts to identify "best practices" and develop lessons learned?

Answer. I fully support the use of management reviews and peer reviews of major service contracts to identify "best practices" and develop lessons learned. If confirmed, I will work with the Department's senior leadership to further institutionalize this practice and make any necessary adjustments.

Question. If confirmed, will you fully comply with the requirement of section 807 of the National Defense Authorization Act for Fiscal Year 2008, to develop an inven-

tory of services performed by contractors comparable to the inventories of services performed by Federal employees that are already prepared pursuant to the Federal Acquisition Inventory Reform (FAIR) Act?

Answer. If confirmed, I will be committed to actively pursuing the continued implementation of section 807 as this legislation establishes a solid post-award review process and increased transparency of services contracts to Congress, the public, and internally within the Department.

Question. What additional steps if any would you take, if confirmed, to improve the Department's management of its contracts for services?

Answer. If confirmed, I will take steps to ensure leaders at all levels of the Department understand and appreciate the vital role they must play in diligently managing service contracts in a way that maximizes the benefit to the warfighter and the taxpayer.

CONTRACTOR PERFORMANCE OF CRITICAL GOVERNMENTAL FUNCTIONS

Question. Over the last decade, the Department has become progressively more reliant upon contractors to perform functions that were once performed exclusively by government employees. As a result, contractors now play an integral role in areas as diverse as the management and oversight of weapons programs, the development of personnel policies, and the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as DOD employees.

In your view, has DOD become too reliant on contractors to support the basic functions of the Department?

Answer. I am concerned that it may be.

Question. Do you believe that the current extensive use of personal services contracts is in the best interest of DOD?

Answer. While I am not specifically aware of the use of personal services contracts within the Department, I do know that there are statutory restrictions that govern the use of personal services contracts. If confirmed, I will ensure that if personal services contracts are being used in a manner that is inappropriate, that practice is ended immediately.

Question. What is your view of the appropriate applicability of personal conflict of interest standards and other ethics requirements to contractor employees who perform functions similar to those performed by government employees?

Answer. I believe that contractor employees who directly support government employees, and may have access to similar business sensitive or source selection sensitive information, should be subject to similar ethical standards as the government employees they support, and should not be allowed to profit personally from the information that may be available to them because of their performance under a DOD contract.

Question. U.S. military operations in Iraq have relied on contractor support to a greater degree than any previous U.S. military operations. According to widely published reports, the number of U.S. contractor employees in Iraq exceeds the number of U.S. military deployed in that country.

Do you believe that DOD has become too dependent on contractor support for military operations?

Answer. Secretary Gates has tasked the Chairman of the Joint Chiefs of Staff to oversee a Department-wide review of contractor roles and missions. If confirmed, I will work with the Secretary and Chairman Mullen in this review and implement recommendations where appropriate and, if necessary, work with Congress to institutionalize reforms.

Question. What risks do you see in the Department's reliance on such contractor support?

Answer. I see two risks: (1) Fraud, waste, or abuse if there is insufficient oversight; and (2) the possibility that contractors could choose to leave the mission because it became dangerous or for some other reason.

Question. What steps do you believe the Department should take to mitigate such risk?

Answer. The first step is to have a thorough understanding of any risks we have with the current workforce mix of military, civilian, and contractors. As mentioned earlier, the study being led by the Joint Staff will provide insight into this important issue. Next would be the development of a robust capability to provide oversight and management of contractor performance and restrictions.

Question. Do you believe the Department is appropriately organized and staffed to effectively manage contractors on the battlefield?

Answer. It is my understanding that there have been shortcomings in recent years, and if confirmed, I intend to learn more about them.

Question. What steps if any do you believe the Department should take to improve its management of contractors on the battlefield?

Answer. If confirmed, I intend to review this subject and recommend steps to ensure that shortcomings are not repeated.

PRIVATE SECURITY CONTRACTORS

Question. The Special Inspector General for Iraq Reconstruction (SIGIR) recently reported that Federal agencies including DOD have spent more than \$5 billion for private security contractors (PSCs) in Iraq since 2003. Over this period, there have been numerous reports of abuses by PSCs, including allegations of contractors shooting recklessly at civilians as they have driven down the streets of Baghdad and other Iraqi cities. In September 2007, employees of Blackwater allegedly opened fire on Iraqis at Nisour Square in downtown Baghdad, killing more than a dozen Iraqis and wounding many more.

Do you believe DOD and other Federal agencies should rely upon contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. I cannot directly comment on the Blackwater incident as I have not had access to information about this case, and in any event I understand that it is a State Department issue, presently in the Federal courts. But I believe that the use of PSCs, and more generally the use of contractors in wartime, deserves careful review.

As a practical matter, DOD must use the total force (military forces, Department civilians, and contractors) to resource the full spectrum of requirements. DOD's recent ongoing efforts to perform more detailed contractor support planning for all operational plans can ensure that the use of PSCs is based upon careful planning and assessment and not simply on general assumptions and, if confirmed, I will review these plans. If contractor personnel cannot be used appropriately, there will be force structure implications which will require consideration by Congress.

Question. In your view, has the U.S. reliance upon PSCs to perform such functions risked undermining our defense and foreign policy objectives in Iraq?

Answer. I have not had an opportunity to acquaint myself with the facts of this situation, nor to discuss it with DOD leadership, military commanders or diplomatic observers. But it is clear that appropriate conduct of Americans in the theater, including contractors, is important to overall progress in achieving our aims.

Question. What steps if any would you take, if confirmed, to ensure that any PSCs who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. We have learned two important lessons from the current operations: First, the use of PSCs in any area of combat operations must be fully coordinated. There must be unified and consistent procedures for all such contractors, regardless of which U.S. agency hires them. Our commanders on the ground must have authority to restrict or redirect their operations as the situation requires. Second, there must be assured legal accountability for the actions of PSCs. If confirmed, I will review further steps that can be taken.

Question. How do you believe the ongoing operations of PSCs in Iraq are likely to be affected by the new Status of Forces Agreement between the United States and Iraq?

Answer. I have not had the opportunity to acquaint myself with all the facts bearing on this situation, but if confirmed, I would intend to do so. I do understand that since January 1 of this year, U.S. Government contractors no longer have immunity from host nation law.

If confirmed, I would seek to ensure that the loss of contractor immunity in Iraq does not diminish the effectiveness of operations.

Question. Do you support the extension of the Military Extraterritorial Jurisdiction Act to PSCs of all Federal agencies?

Answer. I have not had the opportunity to acquaint myself with the practical and legal dimensions of the issue. It is my understanding that DOD has consistently supported unambiguous application of the Military Extraterritorial Jurisdiction Act to all U.S. Government PSCs operating in contingency areas.

Question. What is your view of the appropriate application of the Uniform Code of Military Justice to employees of PSCs operating in an area of combat operations?

Answer. I have not had the opportunity to acquaint myself with all the practical and legal dimensions of this issue. There must be assured legal accountability for

the actions of all contractors deployed to an area of combat operations. The application of the Uniform Code of Military Justice is one tool to do this.

Question. OMB Circular A-76 defines “inherently governmental functions” to include “discretionary functions” that could “significantly affect the life, liberty, or property of private persons.”

In your view, is the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations an inherently governmental function?

Answer. My understanding is that DOD’s decision to use PSCs (including sub-contractors) is in compliance with current U.S. Government policy and regulations. It clearly raises issues of appropriateness, and if confirmed, I would intend to participate in shaping policies regarding the appropriate use of contractors.

Question. In your view, is the interrogation of enemy prisoners of war and other detainees during and in the aftermath of hostilities an inherently governmental function?

Answer. The role of DOD contractors raises issues of appropriateness, and if confirmed, I would intend to participate in shaping policies regarding the appropriate use of contractors.

Question. Do you see a need for a comprehensive reevaluation of these issues now?

Answer. I do, and I understand that the Chairman of the Joint Chiefs of Staff, as directed by the Secretary of Defense, is already conducting a thorough examination of the use of DOD contractors in support of current military operations as well as a review of the range and depth of contractor capabilities necessary to support the Joint Force of the future.

Question. In October 2008, DOD announced a plan to award contracts in excess of \$300 million to U.S. contractors to conduct “information operations” through the Iraqi media.

In your view, is DOD’s use of private contractors to conduct information operations through the Iraqi media appropriate?

Answer. I have not had the opportunity to have access to information regarding this matter.

GOVERNMENT CONTRACTING REFORM

Question. In a memorandum to the heads of all Federal agencies, the President on March 4, 2009, directed a government-wide review of contracting procedures and stated that “executive agencies shall not engage in noncompetitive contracts, except in those circumstances where their use can be fully justified and where appropriate safeguards have been put in place to protect the taxpayer.”

If confirmed, how would you determine whether the use of noncompetitive contracts could be fully justified?

Answer. If confirmed, I will continue to emphasize the importance of competition and review the Department’s competition practices. At present, it is my understanding that DOD Competition Advocates participate in acquisition strategy sessions and are engaged in the review of noncompetitive contracts. All noncompetitive contracts must be supported by a justification and determination and approved by the procuring activity Competition Advocate if over \$550,000; the head of the procuring activity if over \$11.5 million; and the senior procurement executive of the agency if over \$78.5 million. The DOD Competition Advocate submits an annual report on the Department’s competition achievements to the Office of the Under Secretary of Defense for Acquisition, Technology and Logistics. If confirmed, I intend to review these practices to ascertain if adjustments are needed pursuant to the President’s guidance.

Question. In your opinion, how would the direction in this memo affect the use of single-award and multiple-award Indefinite Delivery/Indefinite Quantity (IDIQ) contracts?

Answer. I support the direction in the memo emphasizing competition and appropriate use of various contract types. An IDIQ contract is appropriate for use when the government cannot predetermine the precise quantities of supplies or services it will require and it is inadvisable to commit the government beyond the more than a minimum quantity. The Federal Acquisition Regulation establishes the preference for multiple awards when an IDIQ contract is awarded and requires approval of the agency head for a single-award IDIQ contract estimated to exceed \$100 million. It is my understanding that the Department does not support the use of single-award IDIQ contracts unless they are absolutely necessary. If confirmed, I intend to review these practices pursuant to the President’s guidance.

CONTRACTING METHODS

Question. The Office of Federal Procurement Policy and DOD have long agreed that Federal agencies could achieve significant savings and improved performance by moving to performance-based services contracting (PBSC). Most recently, the Army Environmental Program informed the committee that it has achieved average savings of 27 percent over a period of several years as a result of moving to fixed-price, performance-based contracts for environmental remediation. Section 802 of the National Defense Authorization Act for Fiscal Year 2002, as amended, established performance goals for increasing the use of PBSC in DOD service contracts.

What is the status of the Department's efforts to increase the use of PBSC in its service contracts?

Answer. It is my understanding that the preferred approach to services contracting within the Department is already to utilize fixed price performance based contracts whenever it has well-defined statements of work that have clear performance objectives which can be measured objectively. The Department continues to emphasize the use of this type of contract whenever possible.

Question. What additional steps if any do you believe the Department needs to take to increase the use of PBSC and meet the goals established in section 802?

Answer. If confirmed, I will ensure that a fundamental element of our strategic sourcing approach to services contracts will be the increased use of performance based fixed price contracts.

Question. In recent years, DOD has relied heavily on time-and-materials (T&M) contracts for the acquisition of services. Under such a contract, the Department pays a set rate per hour for contractor services, rather than paying for specific tasks to be performed. In some cases, contractors have substituted less expensive labor under T&M contracts, while continuing to charge Federal agencies the same hourly rates, resulting in effective contractor profits of 25 percent or more.

What is your view of the appropriate use of T&M contracts by DOD?

Answer. T&M contracts, regardless of dollar value, are the least preferred contract type and should only be used if no other contract type is appropriate. They are a very costly and ineffective method of contracting for services. If confirmed, I will ensure appropriate determinations are made to only use T&M contracts when no other contract will satisfy the requirement.

Question. What steps if any do you believe the Department should take to minimize the abuse of T&M contracts?

Answer. I understand the Department has taken several steps to minimize the abuse of T&M contracts. The Panel on Contracting Integrity is reviewing the appropriate approval levels for determinations made by contracting officers for use of a T&M contract. Additionally, the OUSD(AT&L) requested the military departments and other defense agencies review their use of T&M contracts for services and identify contracting activities that have executed more than 10 percent of their obligations using T&M. DPAP continues to monitor the inappropriate use of T&M contract types for services. If confirmed, I will review the various initiatives for any additional support or direction needed.

Question. Section 852 of the John Warner National Defense Authorization Act for Fiscal Year 2007 requires DOD to promulgate regulations prohibiting excessive "pass-through" charges on DOD contracts. Pass-through charges are charges added by a contractor for overhead and profit on work performed by one of its subcontractors, to which the contractor provided no added value. In some cases, pass-through charges have more than doubled the cost of services provided to DOD.

What is your view of the regulations promulgated by DOD to implement the requirements of section 852?

Answer. It is my understanding that the Department issued an interim rule amending the Defense Federal Acquisition Regulation Supplement to implement Section 852 to ensure that pass-through charges on contracts or subcontracts that are entered into for or on behalf of DOD are not excessive in relation to the cost of work performed by the relevant contractor or subcontractor. The rule provides a list of functions that are considered to be value-added. If the contractor does not perform the demonstrated functions or does not add value, the rule makes the excessive pass-through charges unallowable and provides for recoupment of the excessive pass-through charges consistent with the legislation. While I have not had the opportunity to analyze this matter sufficiently in order to form an opinion, if confirmed, I will be receptive to suggested refinements as the case makes its way through the Federal rulemaking process.

Question. What additional steps if any do you believe the Department should take to address the problem of excessive pass-through charges?

Answer. Beyond finalization of the DFARS rule and associated updates that should be made to Defense Acquisition University training curriculum, I understand the Department has incorporated this issue as an element to be addressed in Peer Reviews in accordance with Section 808 of the National Defense Authorization Act for Fiscal Year 2008.

INTERAGENCY CONTRACTING

Question. GAO recently placed interagency contracting—the use by one agency of contracts awarded by other agencies—on its list of high-risk programs and operations. While interagency contracts provide a much-needed simplified method for procuring commonly used goods and services, GAO has found that the dramatic growth of interagency contracts, the failure to clearly allocate responsibility between agencies, and the incentives created by fee-for-services arrangements, have combined to expose DOD and other Federal agencies to the risk of significant abuse and mismanagement. The DOD Inspector General and the GSA Inspector General have identified a long series of problems with interagency contracts, including lack of acquisition planning, inadequate competition, excessive use of time and materials contracts, improper use of expired funds, inappropriate expenditures, and failure to monitor contractor performance. DOD, in conjunction with the General Services Administration and the Office of Management and Budget, is taking a number of actions to improve training and guidance on the use of this contract approach.

If confirmed, what steps if any will you take to monitor and evaluate the effectiveness of the actions currently underway or planned regarding DOD's use of other agencies' contracts?

Answer. Interagency contracting is a necessity at times to achieve “whole of government” efforts to address complex contemporary security challenges, but it must be done in a way that gives best value to the taxpayer. If confirmed, I will review the efforts outlined in the January 2005 policy on the “Proper Use of Non-DOD Contracts” and subsequent policy updates. In addition, I understand that as part of the Department's strategic spending analysis, DOD is collecting adequate data to know what non-DOD agencies are acquiring on behalf of DOD and which organizations they are supporting.

Question. Do you believe additional authority or measures are needed to hold DOD or other agency personnel accountable for their use of inter-agency contracts?

Answer. If confirmed, I will review and evaluate these authorities.

Question. Do you believe contractors have any responsibility for assuring that the work requested by DOD personnel is within the scope of their contract?

Answer. The primary responsibility for ensuring work is within the scope of the contract rests with the contracting officer. I believe that if a contractor is uncertain whether or not supplies or services ordered are within scope of their contract they should consult with the contracting officer.

Question. Do you believe that DOD's continued heavy reliance on outside agencies to award and manage contracts on its behalf is a sign that the Department has failed to adequately staff its own acquisition system?

Answer. If confirmed, I will examine whether or not the Department is adequately staffed to manage and execute these efforts. However, the Department should continue to utilize the expertise of non-DOD agencies operating under congressional authority to acquire supplies and services in the most efficient and effective way possible.

ACQUISITION OF INFORMATION TECHNOLOGY

Question. Most of the Department's Major Automated Information System (MAIS) acquisitions are substantially over budget and behind schedule. In particular, the Department has run into unanticipated difficulties with virtually every new business system it has tried to field in the last 10 years.

Do you believe that unique problems in the acquisition of business systems require different acquisition strategies or approaches?

Answer. Yes. The problems suggest the need to move away from large business information technology development projects to smaller, more incremental business systems developments, utilizing commercial applications whenever possible. Existing DOD hardware development processes do not always translate effectively in the software development world. Finally, DOD frequently needs to do business process re-engineering prior to software development so that new development is not imposed on legacy systems and processes.

Question. What steps if any do you believe DOD should take to address these problems?

Answer. If confirmed, I would work with the Chief Information Officer and Chief Management Officer to create a set of processes that are used in industry to develop, test, and deploy software within DOD's regulatory and statutory framework. For example, I would use incremental development and limited deployments to get capability out to users as well as feedback from users to guide future increments of capability.

Question. If confirmed, how would you work with the Chief Information Officer of DOD to take these steps?

Answer. I would partner with the Chief Information Officer and Chief Management Officer to develop best practices for DOD.

Question. Problems with computer software have caused significant delays and cost overruns in a number of major defense programs. Section 804 of the National Defense Authorization Act for Fiscal Year 2003 required DOD to establish a program to improve the software acquisition process.

What steps if any would you take, if confirmed, to address delays and cost overruns associated with problems in the development of software for major weapon systems?

Answer. If confirmed, I would consider three steps. First, I would consider directing that weapon systems use incremental software development to minimize risk. Second, I would ensure that software embedded in weapon systems be mature before being integrated in platforms. Third, I would seek to use independent assessment teams of software experts to guide and advise weapon system program managers.

Question. What role, if any, do you believe that the Chief Information Officer of DOD should play with regard to the acquisition of information technology that is embedded in weapon systems?

Answer. The Chief Information Officer would be a key advisor to me and the Department in assessing program risk and acquisition strategies for development and procurement of embedded information technology.

ACQUISITION WORKFORCE

Question. Over the last 15 years, DOD has reduced the size of its acquisition workforce by almost half, without undertaking any systematic planning or analysis to ensure that it would have the specific skills and competencies needed to meet DOD's current and future needs. Since September 11, 2001, moreover, the demands placed on that workforce have substantially increased. While DOD has started the process of planning its long-term workforce needs, the Department does not yet have a comprehensive strategic workforce plan needed to guide its efforts.

Do you believe that DOD's workforce is large enough and has the skills needed to perform the tasks assigned to it?

Answer. I don't believe it is. A number of studies and analyses, including by this committee, have pointed in the direction of increasing the size of the DOD acquisition workforce and have identified certain skill sets that need to be built up.

Question. In your view, what are the critical skills, capabilities, and tools that DOD's workforce needs for the future?

Answer. Program management, risk management, and leadership are critical skills, as are systems engineering and financial management. Contracting officers need business acumen and understanding of how to formulate, negotiate, and oversee contracts.

Question. What steps will you take, if confirmed, to ensure that the workforce will, in fact, possess them?

Answer. We need to attract talented people to government service, specifically into the acquisition workforce, give them challenging work to do, retain the best of them, and be sure all of them are fully trained and qualified for the jobs we give them. If confirmed, I will want to ensure that the Department has the right infrastructure and resources in place to do all that and to improve where we should.

Question. Do you agree that the Department needs a comprehensive human capital plan, including a gap analysis and specific recruiting, retention, and training goals, to guide the development of its acquisition workforce?

Answer. Yes.

Question. What steps if any do you think are necessary to ensure that the Department has the ability it needs to attract and retain qualified employees to the acquisition workforce?

Answer. Personally, I can think of nothing more inherently rewarding than serving one's country as the men and women of our Armed Forces and our civilian employees do. These are dynamic times and the approach we take now may be different from what we did in the past or may need to do in the future. I'm told that

the largest numbers of people in the acquisition workforce are engineering, scientific, and technical professionals, followed by business-oriented people, such as contracting officers. Also, they are largely civilians. They will have to be change oriented, because as national strategy evolves, what we buy and how we buy will change. To attract and retain them we need to provide challenging and rewarding work and a competitive rate of compensation. If confirmed, I will do all I can to ensure we have a properly sized, highly qualified, professional acquisition workforce.

Question. What are your views regarding assertions that the acquisition workforce is losing its technical and management expertise and is beginning to rely too much on support contractors, FFRDCs, and, in some cases, prime contractors for this expertise?

Answer. A number of reports have pointed to this conclusion, and it is a disturbing trend. As a policy matter, it is vital that inherently governmental functions be performed by government, that is, in this instance, by civilian and military members of the DOD acquisition workforce. As a practical matter, program formulation, management, and contract oversight cannot be done effectively in the interests of both the warfighter and the taxpayer unless competent, trained, and dedicated government professionals do it. If we have let some of this slip away, say in areas like systems engineering and contracting, then it is time to reverse the trend, not to the point of eliminating all support contractors, but to achieve the proper balance. The first step is to understand how many support contractors we have, what they are doing, and at what cost. FFRDCs are in a different category since they are specifically chartered to assist government professionals and in many cases have done so effectively for many years.

Question. What is the appropriate tenure for program managers and program executive officers to ensure continuity in major programs?

Answer. Program managers and program executive officers need to be in their jobs long enough to be accountable for their decisions. These jobs are not training grounds or stepping stones to higher levels. Those who take them on must be fully qualified experts. I am aware that there are statutory tenure minima prescribed for these and other key leadership positions, which I support. I believe this may be more an issue of compliance than new policy, but it is something I would look at, if confirmed.

Question. Section 852 of the National Defense Authorization Act for Fiscal Year 2008 established an Acquisition Workforce Development Fund to help DOD address shortcomings in its acquisition workforce. The fund would provide a minimum of \$3 billion over 6 years for this purpose.

Do you believe that the Acquisition Workforce Development Fund is needed to ensure that DOD has the right number of employees with the right skills to run its acquisition programs in the most cost effective manner for the taxpayers?

Answer. Yes, it provides necessary resources to recruit, train, and retain the people we need in the acquisition workforce and the resources to increase the size of that workforce as appropriate.

Question. If confirmed, what steps if any will you ensure that the money made available through the Acquisition Workforce Fund is spent in a manner that best meets the needs of DOD and its acquisition workforce?

Answer. First, I would review the processes in place to allocate that money to the highest needs and I would review the execution of funding that has been allocated so far. I cannot say at this point what, if any, systemic changes may be needed, but an initiative of this magnitude would certainly have my personal attention, and I would welcome a continuing dialog with this committee on the matter, if I am confirmed.

PROCUREMENT FRAUD, INTEGRITY AND CONTRACTOR RESPONSIBILITY ISSUES

Question. Recent Air Force acquisition scandals have raised concerns about the adequacy of existing mechanisms to uphold procurement integrity and prevent contract fraud.

What is your view of the adequacy of the tools and authorities available to DOD to ensure that its contractors are responsible and have a satisfactory record of integrity and business ethics?

Answer. I believe that integrity in contracting is an absolute obligation to the taxpayer, and confidence in the integrity of DOD contracting must be re-established. If confirmed, I intend to assess the adequacy of the existing tools and authorities and make any necessary adjustments.

Question. In your view, are current "revolving door" statutes effective?

Answer. I understand an interim rule was published in the Federal Register in January of this year to strengthen regulatory language regarding DOD personnel

who accept positions with Defense contractors. It is important that the taxpayer have confidence in these practices. If confirmed, I will assess the effectiveness of the applicable statutes.

Question. What tools other than law enforcement measures could we use to help prevent procurement fraud and ethical misconduct?

Answer. I understand the Office of the Inspector General and the Defense Acquisition University continue to offer additional training and awareness presentations on procurement fraud indicators. If confirmed, I would seek to identify further tools.

Question. Are there sufficient enforcement mechanisms to ensure compliance with laws and regulations?

Answer. Under existing laws and regulations, a contractor may be suspended or debarred for failure to timely disclose a known violation of Federal criminal law in connection with the award or performance of any government contract performed by the contractor or a subcontract. If confirmed, I will assess the existing enforcement mechanisms to determine areas for improvement.

“BUY AMERICA”

Question. “Buy America” issues have been the source of considerable controversy in recent years. As a result, there have been a number of legislative efforts to place restrictions on the purchase of defense products from foreign sources.

What benefits do you believe the Department obtains from international participation in the defense industrial base?

Answer. I believe international participation in the defense industrial base serves to promote the interoperability, standardization, and rationalization of the conventional defense equipment used by the Armed Forces of the United States and its allies and other friendly governments. It also helps to avoid or reduce duplication in research and development initiatives. These attributes can lead to savings in terms of the time and money needed to develop, produce, support, and sustain the materiel needed and used by our warfighters. It also helps the Department to achieve the advantages of competition in contracting, which includes the ability to obtain world class, best value products for our warfighters. Further, international participation in the defense industrial base encourages development of mutually beneficial industrial linkages that enhance U.S. industry’s access to global markets and exposes U.S. industry to international competition, helping to ensure that U.S. firms remain innovative and efficient.

Question. Under what conditions, if any, would you support the imposition of domestic source restrictions for a particular product?

Answer. In certain instances involving national security or the preservation of a key defense technology or production capability, domestic source restrictions may be necessary. The Department has (and, I understand, has exercised) the authority to “self-impose” such domestic source restrictions.

Question. Section 831 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 requires the Secretary of Defense to ensure that the United States firms and United States employment in the defense sector are not disadvantaged by unilateral procurement practices by foreign governments, such as the imposition of offset agreements in a manner that undermines the United States industrial base.

What steps if any do you believe the Department should take to implement this requirement?

Answer. Section 831 requires the Secretary of Defense to make every effort to ensure that the policies and practices of the Department reflect the goal of establishing an equitable trading relationship between the United States and its foreign defense trade partners. I understand an interagency team composed of the Departments of Defense, Labor, Commerce, and State and the U.S. Trade Representative was established to consult with other nations about limiting the adverse effects of offsets. If confirmed, I would decide on the need for any steps to be taken by the Department based on information the team provides.

Question. The Defense Science Board Task Force on “Defense Industrial Structure for Transformation” found in July 2008 that U.S. policy regarding “Buy America” and the “Berry Amendment” inhibits the Nation from gaining the security and economic benefits that could be realized from the global marketplace.

What is your opinion of “Buy America” legislation and the “Berry Amendment”?
Answer. Such restrictions may impede the Department’s ability to procure world class products and capabilities on a “best value” basis for our warfighters, and they may impair effective defense cooperation with our allies and other friendly governments. For example, such restrictions can be inconsistent with supply chain management practices of commercial enterprises. This would impede efforts to promote

civil-military integration and to achieve greater reliance on commercial solutions to the Department's requirements. It would be a preferable alternative to allow the Department to rely on its ability, under existing law, to impose source restrictions when necessary. I understand that the Department also has authority to restrict procurements to domestic sources when it determines that a particular domestic industrial capability must be protected. This means the Department has the ability to sustain endangered industrial capabilities when necessary to protect national security interests and to remove the restrictions when no longer needed, thus returning to the benefits of competition.

THE DEFENSE INDUSTRIAL BASE

Question. What is your view of the current state of the U.S. defense industry?

Answer. The defense industry is a vital partner to defense, since most defense products and services are provided by the private sector. Generally, my viewpoint is that our Nation's defense and technology industrial base remains the most innovative, reliable, and cost-effective in the world.

Question. Do you support further consolidation of the U.S. defense industry?

Answer. I support the Department's overall policy to review each proposed merger, acquisition, and teaming arrangement on its particular merits in the context of the individual market and the changing dynamics of that market. I have some concern about the loss of competition caused by significant industry consolidation over the last decade. If confirmed, I would work with Department leadership to evaluate options to address continued consolidation and the flux of the competitive environment.

Question. What is your position on foreign investment in the U.S. defense sector?

Answer. Generally, I support foreign investment in the defense sector. Foreign firms enhance competition which can lower costs of specific defense systems as well as provide for them leading edge technologies which were developed abroad. In addition, such investment in the long-run will increase interoperability between the United States and its allies. To be sure, we must ensure that foreign investment in the defense sector does not create risks to national security.

Question. What steps if any do you believe DOD should take to ensure the continued health of the U.S. defense industry?

Answer. If confirmed, I would support the Department's strategy to rely on market forces to the maximum extent possible to create, shape, and sustain the industrial and technological capabilities needed to provide for the Nation's defense. However, I think it is also important to recognize that the Department (through its budget, acquisition, and logistics processes) can create market forces capable of harnessing the innovation potential in the industrial/technological base. In addition, when it becomes necessary to intervene in the marketplace, the Department has tools available which help to focus industry attention on critical technology development, accelerate technology insertion into manufacturing processes, create or expand critical production facilities, and direct production capacity towards meeting the most urgent warfighter needs.

MANUFACTURING ISSUES

Question. The recent Defense Science Board (DSB) study on the Manufacturing Technology Program made a number of findings and recommendations related to the role of manufacturing research and capabilities in the development and acquisition of defense systems.

Have you reviewed the findings of the DSB Task Force on the Manufacturing Technology Program?

Answer. Yes.

Question. What recommendations from the Task Force do you plan to implement?

Answer. The overarching recommendation of the DSB report was to give "leadership emphasis" to manufacturing technology. I believe strongly in the importance of manufacturing technology as a type of technology deserving DOD fostering just as DOD fosters the technologies embedded in the manufactured weapons themselves. I also agree that manufacturing readiness should be assessed more rigorously before programs pass into production.

Question. What incentives do you plan to use to enhance industry's incorporation and utilization of advanced manufacturing processes developed under the manufacturing technology program?

Answer. The Department's competitive solicitation process must adequately identify and reward proposers who plan to employ advanced manufacturing processes in response to DOD requests for proposals and where manufacturing processes are mature and do not present excessive risk.

SCIENCE AND TECHNOLOGY

Question. What, in your view, is the role and value of S&T programs in meeting the Department's transformation goals and in confronting irregular, catastrophic, traditional, and disruptive threats?

Answer. I believe S&T plays a large role in shaping the future direction of DOD as the Department takes on the challenge of accomplishing an expanded range of missions. The content of a S&T program needed to address these future challenges is likely different than in the past. The threats to our national security have expanded to cyberspace as well as physical space. Just as S&T gave us the world's most capable military at the end of the Cold War, we need S&T to provide answers for tomorrow's fight.

Question. If confirmed, what direction will you provide regarding funding targets and priorities for the Department's long-term research efforts?

Answer. I am aware that Secretary Gates has made, in particular, basic research a priority—increasing funding by about \$300 million in fiscal year 2009. If confirmed, I will carefully review all funding portfolios; then assess the relative merits and targets.

Question. What specific metrics would you use, if confirmed, to assess whether the Department is making adequate investments in its basic research programs?

Answer. There are a number of metrics to assess whether the Department is making an adequate investment in basic research. None of these provide a binary yes or no answer. By definition, basic research is long-term, and not measureable credibly with short-term metrics. The Department needs to assess a number of factors, to include growth or decline in real dollars of the basic research program; change in number of projects; proportion of DOD-funded researchers in key science disciplines; and number of students supported by the basic research program investments. While these metrics offer insight, if confirmed, I will need to work closely with the Director, Defense Research and Engineering before defining specific metrics.

Question. Do you feel that there is sufficient coordination between and among the S&T programs of the Military Services and defense agencies?

Answer. I am aware that there are coordination mechanisms in place for the Department's S&T program. If confirmed, I would look at this issue more closely to determine if current coordination is adequate.

Question. What is the Department's role and responsibility in addressing national issues related to science, technology, engineering, and mathematics (STEM) education and workforce development?

Answer. The Department must take a pro-active role in ensuring that the Nation has an adequate STEM workforce. In addition to encouraging STEM workforce development through its research investments and education outreach efforts, I believe DOD needs to work closely with the Office of Science and Technology Policy, the National Science Foundation, and other Federal components involved in national security, to generate a "whole of government" approach to workforce development.

Question. What steps if any would you take to support efforts to ensure that the Nation has the scientific and technical workforce needed for its national security technological and industrial base?

Answer. I am aware of several activities within DOD, such as the National Defense Education Program and the National Security Science and Engineering Fellows program, that aim to expand the pool of scientists and engineers able to contribute to the national security technological and industrial base. If confirmed, one of the first steps I would take would be to direct the DDR&E to determine how well these programs and others like them meet the Department's S&T workforce needs.

Question. How would you use S&T programs to better reduce technical risk and therefore potentially reduce costs and schedule problems that accrue in large acquisition programs?

Answer. S&T programs, particularly in Budget Activities 2 (Applied Research) and 3 (Advanced Development) can have substantial impact on improving technology readiness, and thereby reduce technical risk. I believe there is an opportunity to expand the ties from BA2 and BA3 programs to large acquisition programs, particularly between Milestones A and B.

Question. Do you feel that the S&T programs of DOD are too near-term focus and have over emphasized technology transition efforts over investing in revolutionary and innovative research programs?

Answer. If confirmed, I will look at the balance of near- and far-term innovative research. The DOD S&T program should be balanced so there are opportunities for both capabilities pull, responding to the warfighter's needs, and technology push, re-

sponding to the promise of new technology. The Under Secretary for AT&L has the responsibility of helping to shape and focus the portfolio, and if confirmed, I will rely on the DDR&E to advise me on how to discharge this responsibility.

Question. Are you satisfied that the Department has a well articulated and actionable S&T strategic plan?

Answer. I know the Department has a recent Research and Engineering Strategic Plan, published in 2007, and that each of the military Services and agencies that conduct research publish strategic plans that are harmonized with the DDR&E plan. If confirmed, I will ensure the plans have clear and actionable guidance.

Question. Do you see a need for changes in areas such as hiring authority, personnel systems, financial disclosure and ethics requirements, to ensure that the Department can recruit and retain the highest quality scientific and technical workforce possible?

Answer. I believe any modern enterprise needs effective tools, to shape the workforce and attract the most capable people. This principle holds true for the Department. Various recent studies indicate that the Department has difficulty competing with the private sector for technically capable staff. I will take all possible steps to ensure the Department is competitive.

Question. The DDR&E has been designated as the Chief Technology Officer of DOD.

In your view, what is the appropriate role of the Chief Technology Officer of DOD?

Answer. The role of the Chief Technology Officer of the Department is defined in the DDR&E charter. The charter defines the role of the DDR&E as the Principal Staff Assistant to the Under Secretary (AT&L) and the Secretary on all technical matters. The DDR&E should provide guidance to shape the DOD S&T program and develop technology options for the Department. The CTO should also contribute significantly to ensuring that major acquisition programs are conducted with acceptable technological risk.

Question. What authority should the DDR&E have over the Defense Advanced Research Projects Agency (DARPA)?

Answer. As the Department's primary corporate research activity, DARPA reports to DDR&E. The DDR&E should have all authorities necessary to ensure DARPA is effective in meeting its mission, including budgetary authority and authority over selection of agency leadership.

Question. What authority should the DDR&E have over other Service and agency S&T efforts?

Answer. The DDR&E should provide oversight responsibilities of the Service and agency programs, consistent with the DDR&E charter.

Question. Do you see the need for any changes in organizational structure, workforce, or availability of resources to improve the effectiveness of the Office of the Director of Defense Research and Engineering?

Answer. I believe S&T is critical to maintaining military superiority across a broad range of crises and military operations. Ensuring the technological superiority of our Armed Forces will require a strong DDR&E. If confirmed, I will take any steps I determine necessary for a strong DDR&E.

DEFENSE LABORATORIES

Question. What is your view on the quality of the DOD laboratories as compared to the DOE national laboratories, Federal laboratories, academic laboratories, and other peer institutions?

Answer. The DOD laboratories employ a talented and mission-oriented workforce, and constitute an important departmental resource for the Nation's national security. That said, I am certain they can be improved. If confirmed, I will place priority in examining the capabilities and long-term requirements of the DOD laboratories, and develop, with the Services, a plan to address the role of the DOD laboratories.

Question. What metrics will you use, if confirmed, to evaluate the effectiveness, competitiveness, and scientific vitality of the DOD laboratories?

Answer. The effectiveness, competitiveness, and scientific vitality of the DOD laboratories are gauged by a combination of factors, including external review of their research programs and the Service parent organizations' assessment of their effectiveness in meeting Service requirements and other needs. These in turn are influenced by the ability to attract and retain a talented workforce, and the adequacy and robustness of their physical infrastructure. I believe collaboration with universities, industry, and other laboratories also constitute an important contributor and measure of our laboratories' effectiveness in fostering and recognizing world class research and development.

Question. What steps if any will you take, if confirmed, to increase the mission effectiveness and productivity of the DOD laboratories?

Answer. If confirmed, I will work with the DDR&E to ensure that DOD labs operate at maximum effectiveness and productivity.

Question. Do you see value in enhancing the level of technical collaboration between the DOD laboratories and academic, other Federal and industrial scientific organizations?

Answer. Yes. The effectiveness and competitiveness of our laboratories can only be helped by enhanced technical collaboration with other research and development organizations.

Question. Do you feel that past investments in research equipment; sustainment, repair and modernization; and facility construction at the DOD laboratories have been sufficient to maintain their mission effectiveness and their standing as world class science and engineering institutions?

Answer. I believe that in some S&T areas that are key to defense, DOD laboratories are at the cutting edge. If confirmed, I will assess what they need to retain this standing.

DARPA

Question. What is the relationship between the DARPA and the DDR&E?

Answer. DDR&E is the Department's Chief Technology Officer responsible for ensuring the technological strength that undergirds our defense and overseeing all of the Department's technical activities. DARPA is the Department's primary corporate research agency, fulfilling a crucial role complementary with the Military Services' and agencies' research efforts. The DARPA director reports to the DDR&E.

Question. Has DARPA struck an appropriate balance between investments in near-term technology programs that are tied to current battlefield needs and investments in longer term, higher risk, and revolutionary capability development?

Answer. Since its inception in the late 1950s, DARPA has led the Department and this Nation in long-term, high-risk/high-payoff research, resulting in numerous revolutionary force-multiplier advantages for our warfighters. I am strongly committed to ensuring that DARPA maintains and enhances the leadership role it has established over decades, and that it strikes the right balance between near-term and far-term efforts.

Question. Do you feel that DARPA has adequately invested in the academic research community?

Answer. Many, if not most, of the revolutionary S&T advances of the future will likely arise from academic research conducted in America's outstanding universities, and from the spin-off companies that universities often foster. It is important for DOD's entire S&T enterprise, including DARPA, to nurture and encourage academic research.

Question. What are the major issues related to DARPA investments, management, and research outcomes that you will seek to address?

Answer. I believe that it is important for DARPA to pursue a portfolio of research investments that offer promise of future revolutionary warfighting advantage. DARPA must hire the most technologically advanced, creative, and innovative staff that our Nation can offer. DARPA must empower its workforce to think "out-of-the-box," to engage energetically with the brightest minds in the United States and abroad, regardless of nationality.

TEST AND EVALUATION

Question. The Department has, on occasion, been criticized for failing to adequately test its major weapon systems before these systems are put into production.

What are your views about the degree of independence needed by the Director of Operational Test and Evaluation in ensuring the success of the Department's acquisition programs?

Answer. In general, I believe an independent Director of Operational Test and Evaluation provides a valuable perspective on whether the Department's weapon systems are operationally effective and suitable. The Operational Evaluation, a validation of the developed system's ability to improve the warfighter's capability, is an essential input to any decisions on investing in the full production of new systems. It is however often too late in the acquisition cycle to influence design and development. That's the role of the systems engineers and developmental testers. Developmental testing is the verification half of systems engineering. If confirmed, I also intend to examine the independence and resourcing of developmental testing.

Question. Are you concerned with the level of test and evaluation conducted by the contractors who are developing the systems to be tested?

Answer. In general, I believe contractors are an important and integral part of the test and evaluation process during system development. In the past era of acquisition reform the Department may have delegated too much of the early developmental test and evaluations to the contractors without adequate government participation or oversight. If confirmed, my emphasis will be on integrating contractor and government test efforts.

Question. What is the impact of rapid fielding requirements on the standard testing process?

Answer. Rapid fielding requirements require rapid performance from the entire acquisition team, including the test and evaluation community. With a rapid fielding requirement, it is necessary to adjust the scope and amount of testing to address the key issues and risks that affect the system's use in combat and gain early insights into the capabilities and limitations of the system being acquired. In rapid fielding, particularly of commercial items, the focus needs to be on understanding what we're buying, not whether the system meets a set of rigid requirements. If confirmed, I will work with all stakeholders to ensure testing processes support rapid fielding without delaying our response to these urgent requirements.

Question. If confirmed, how will you work to ensure that all equipment and technology that is deployed to warfighters is subject to appropriate operational testing?

Answer. All equipment and technology acquired by the Department should be subject to robust Systems Engineering, comprehensive Developmental Test and Evaluation, and realistic Operational Test and Evaluation. If confirmed, I would enforce existing acquisition policies regarding these processes and where necessary amend them.

Question. Do you believe that the developmental testing organizations in DOD and the Military Services are adequate to ensure an appropriate level of developmental testing, and testing oversight, on major defense acquisition programs?

Answer. I believe the Department needs to improve the adequacy of the developmental testing organizations in DOD and the Services. If confirmed, I will look at the entire acquisition organization, including Developmental Test and Evaluation and make changes as necessary to best accomplish the mission.

Question. The National Defense Authorization Act (NDAA) for Fiscal Year 2003 included several provisions to improve the management of DOD test and evaluation facilities.

Are you satisfied with the manner in which these provisions have been implemented?

Answer. Yes. The language in the NDAA for Fiscal Year 2003 led to the establishment of the Defense Test Resource Management Center (TRMC). The TRMC's mission is to plan for and assess the adequacy of the Major Range and Test Facility Base (MRTFB). Two key provisions of that legislation included the TRMC's requirement to develop the Department's Strategic Plan for T&E Resources and to certify the adequacy of Service and Agency Test and Evaluation budgets. If confirmed, I will review the adequacy of the Department's responses to these mandates.

Question. Do you believe that the Department should take any additional steps to improve the management of its test and evaluation facilities?

Answer. If confirmed, I will review this matter and make changes where necessary and in consultation with Congress.

Question. As systems grow more sophisticated, networked, and software-intensive, DOD's ability to test and evaluate them becomes more difficult. Some systems-of-systems cannot be tested as a whole until they are already bought and fielded.

Are you concerned with DOD's ability to test these new types of systems?

Answer. Absolutely, testing and developing software-intensive programs in a net-centric, systems-of-systems (SoS) environment is indeed a challenge.

BALLISTIC MISSILE DEFENSE

Question. When it was created in 2002, the Missile Defense Agency (MDA) was exempted from normal acquisition rules and processes in order to field an initial set of missile defense capabilities on an expedited basis. That fielding has now taken place, although numerous upgrades and corrections are being implemented. Each of the elements of the Ballistic Missile Defense System (BMDS) would normally meet the criteria for an MDAP, but none of them has been managed as an MDAP. Furthermore, for most of MDA's existence, all its programs were funded with Research, Development, Test, and Evaluation (RDT&E) funds, even for non-RDT&E activities.

What management and acquisition changes or improvements if any do you believe are warranted for the ballistic missile defense programs?

Answer. I expect missile defense to be addressed as part of the upcoming Quadrennial Defense Review as well as the congressionally-mandated Ballistic Missile

Defense Policy and Strategy review. In concert with those policy reviews and if confirmed, I will review existing DOD acquisition policies and procedures related to developing and fielding ballistic missile defense capabilities to ensure appropriate acquisition processes are in place.

Question. Do you believe that the Under Secretary of Defense for Acquisition, Technology, and Logistics should have the same responsibilities relative to the ballistic missile defense acquisition programs as for all other MDAPs?

Answer. I believe that the Under Secretary of Defense for Acquisition, Technology, and Logistics, as the Department's senior acquisition executive, should have the same responsibilities, within the current departmental guidance, for all MDAPs, regardless of the capability being acquired.

Question. If confirmed, what steps if any would you plan to take to ensure that the ballistic missile defense programs of DOD follow sound acquisition and management practices and processes?

Answer. I understand that the Missile Defense Executive Board (MDEB) has been the forum for the last 2 years for senior departmental review of MDA activity. If confirmed, I would review within the MDEB, efforts to maintain regular oversight of the MDA acquisition and management practices.

Question. For many years, DOD and Congress have agreed on the principle that major weapon systems should be operationally effective, suitable, survivable, cost-effective, affordable, and should address a credible threat.

Do you agree that any ballistic missile defense systems that we deploy operationally must be operationally effective, suitable, survivable, cost-effective, affordable, and should address a credible threat?

Answer. Yes.

Question. If confirmed, what steps if any would you take to ensure that the BMDS and each of its elements meet these criteria?

Answer. Rigorous and realistic testing of missile defenses is imperative. I understand that the MDA presently is executing a plan which includes the use of a Development/Operational Testing approach that allows the U.S. Strategic Command warfighter community (which includes all combatant commanders) and all the Service Operational Test Agencies to be integral parts of the test program. If confirmed, I would need to review these plans and the proposed test activities to determine whether additional steps or other emphases are necessary or appropriate.

Question. Today, there are many hundreds of short- and medium-range ballistic missiles that can reach forward-deployed U.S. military forces, allies, and other friendly nations. A Joint Staff study, the Joint Capabilities Mix study, has repeatedly concluded that the United States needs about twice as many Standard Missile 3 (SM-3) and Terminal High Altitude Area Defense (THAAD) interceptors just to achieve the minimum inventory needs of regional combatant commanders to defend against such threats.

Do you agree that U.S. missile defense efforts should be prioritized on providing effective defenses against existing ballistic missile threats, especially the many hundreds of short- and medium-range ballistic missiles that are currently within range of our forward-based forces, allies, and other friendly nations?

Answer. If confirmed, I will review the balance among the elements of the ballistic missile defense program.

Question. What do you believe should be the appropriate role of the combatant commanders and the military in determining requirements, force structure, and inventory levels for ballistic missile defense forces?

Answer. Combatant commanders are the ultimate employers of the capabilities that the acquisition community delivers. As such, they should have a voice in determining their priorities for requirements, force structure, and necessary inventory levels. Title 10 provides for the military departments to have responsibility to organize, train, and equip the forces employed by the COCOMs. MDA serves as the materiel developer for ballistic missile defenses and as such has a role in determining what capabilities are achievable and what inventory quantities are feasible at what cost. These three roles are interdependent. If confirmed, I will review existing policies and procedures to ensure they are transparent and provide the capabilities required at the best value to the taxpayer.

Question. For many years, Congress and DOD have agreed on the principle of "fly before you buy," namely demonstrating that a weapon system will work in an operationally effective, suitable, and survivable manner before deciding to acquire and deploy such systems. This demonstration requires rigorous, operationally realistic testing, including independent Operational Test and Evaluation (OT&E), to provide an accurate assessment of how weapon systems will perform in combat conditions. The Director of Operational Test and Evaluation (DOT&E) has expressed concerns

that the testing of the Ground-based Midcourse Defense (GMD) system has not been sufficient to provide confidence in its operational capability.

Do you agree that ballistic missile defense testing needs to be operationally realistic, and should include OT&E, in order to assess operational capabilities and limitations of ballistic missile defense systems, prior to making decisions to deploy such systems?

Answer. I agree that operationally realistic testing is imperative, and if confirmed, I will review MDA's test plans and practices to ensure that they satisfy this imperative.

Question. If confirmed, what steps if any would you take to ensure that the BMDS, and each of its elements, undergoes independent OT&E?

Answer. If confirmed, I will work with the MDA and the DOT&E to see what testing is planned and eliminate any shortcomings.

Question. The MDA has developed ballistic missile defense systems and capabilities and procured the initial inventories of missile defense element weapon systems. However, the military departments are notionally intended to procure, operate, and sustain these missile defense systems.

What do you believe is the appropriate role for the military departments in the procurement, operation, and sustainment of ballistic missile defense systems, and at what point do you believe these systems should be transitioned and transferred to the military departments?

Answer. I understand the MDA and the military departments are in the process of preparing overarching and element-specific Memorandum of Agreements to define responsibilities and relationships in preparation for Ballistic Missile Defense System (BMDS) operations and deployment. If confirmed, I will work with the MDA and the military departments to ensure processes and policies are in place to accomplish the transition and transfer in a timely manner and within budget.

NUCLEAR WEAPONS COUNCIL

Question. If confirmed as USD(ATL), you will chair the Nuclear Weapons Council (NWC).

In your view, what are, or should be, the highest priorities of the NWC?

Answer. If confirmed, I will carry out all of the NWC responsibilities listed under section 179, title 10, U.S.C. In my view, the highest priority of the NWC is to ensure the safety, security, and reliability of our nuclear weapons stockpile.

Question. What improvements, if any, do you believe should be made to the operations of the NWC?

Answer. If confirmed, I will work with the Secretary of Defense, the Deputy Secretary of Defense, as well as members of the NWC, to identify improvements, if any, that would further the goals of the NWC. These may include recommendations from the recent Schlesinger Commission report.

Question. What role do you expect to play, if confirmed, in the development of the Nuclear Posture Review?

Answer. If confirmed, I will be closely involved, along with the appropriate agencies and departments, in both the development and the review of the NPR.

LOGISTICS AND READINESS

Question. If confirmed as USD(ATL), what steps if any would you take to ensure that life cycle maintenance requirements and sustainment support are considered in the acquisition process for new DOD systems?

Answer. Reliability, availability, and maintainability must be designed in early-on in the acquisition process for our weapon systems to provide the best value to the warfighter and taxpayer. DOD is pursuing several acquisition reforms to ensure the acquisition process maintains a life cycle management perspective, maximizes materiel availability for the warfighter, and controls operations and support costs. If confirmed, I will review and if necessary adjust these reform measures.

Question. Section 332 of the National Defense Authorization Act for Fiscal Year 2009 requires DOD to conduct life-cycle cost analysis for new capabilities including the fully burdened cost of fuel (FBCF) during the analysis and evaluation of alternatives in the acquisition program design trades.

Do you believe that the FBCF is an appropriate factor for the Department to consider in the evaluation of acquisition alternatives?

Answer. Absolutely yes. The FBCF serves as a means to address future systems energy demand within the Department's key business processes (force planning, requirements development, and acquisition). By properly valuing the "burden" of fuel delivery in systems development, the FBCF allows a more realistic examination of

departmental costs in terms of operational effectiveness, force structure, and operating budget.

Question. What steps if any will you take, if confirmed, to ensure that the DOD complies with the requirements of section 332?

Answer. My understanding is that work associated with institutionalizing the FBCF factor is underway within the Department. If confirmed, I will review this work and institute appropriate improvements.

Question. With persistent combat operations in Iraq, Afghanistan, and around the globe, combat service support units are constantly at risk when transporting supplies.

What role do you believe the USD(ATL) should play in developing strategies to reduce the logistical footprint of deployed units operating in hostile environments?

Answer. Logistics footprint is a multifaceted issue which is based on the mission, the force structure, the environment, the weapons systems deployed, and the capacity and security of our lines of communication. If confirmed, my office, in conjunction with U.S. Transportation Command, the Defense Logistics Agency, the Joint Staff, and the military Services should continue to focus on managing the logistics footprint required to sustain the force in any theater of operation. In the long-term, we must ensure the best possible sustainability, maintainability, reliability, and fuel efficiency of our weapon systems in the acquisition process as a way of lowering the footprint needed to maintain those systems.

Question. Sections 333 and 334 of the National Defense Authorization Act for Fiscal Year 2009 direct DOD to conduct studies on renewable energy sources such as wind and solar power and on the reduction of life-cycle emissions of alternative and synthetic fuels.

What is your view of the role that the USD(ATL) should play in developing and pursuing alternative energy sources for DOD?

Answer. Since sections 333 and 334 of the National Defense Authorization Act of Fiscal Year 2009 direct DOD to conduct studies on renewable energy sources and the reduction of life cycle emissions on alternative and synthetic fuels, I believe it prudent to determine the status of those studies before formulating a specific approach. I do believe the goals and intents of energy efficiency and renewable sources of energy may be consistent with operational effectiveness. If so, and if confirmed, I will ensure we establish the right research, prototyping, acquisition, and sustainment for a stable energy program.

Question. What steps if any will you take, if confirmed, to make sure that DOD complies with the requirements of sections 333 and 334?

Answer. If confirmed, I expect the Office of the USD(AT&L) to comply with statutory requirements. I will investigate the process we have in place to track progress against all statutory requirements, to include sections 333 and 334.

Question. Do you foresee a significant role for the use of solar and wind energy systems with deployed units operating in remote environments?

Answer. I think it is too early to determine if renewable energy systems will play a significant role in meeting deployed unit requirements. What I am comfortable in committing to is within the roles and responsibilities of the office for which I am nominated, to reduce the risk to deployed American forces and systems. If solar and wind energy can help meet that goal, we will do what can to accelerate their fielding.

BASE REALIGNMENTS AND CLOSURES

Question. GAO released a report in January 2009 regarding DOD's implementation of the decisions contained in the 2005 Defense Base Realignment and Closure (BRAC) round. In the report, GAO described several significant challenges which may impact the Department's ability to complete BRAC implementation by the statutory deadline of September 15, 2011.

If confirmed, will you be committed to meet the statutory goal for BRAC implementation?

Answer. Yes.

Question. In your opinion, what measures will you need to undertake to assist the Services to complete their BRAC actions on time?

Answer. The Department will need detailed business plans with cost and savings estimates to govern BRAC implementation and will need to apply the necessary resources to meet the statutory BRAC implementation deadline. If confirmed, I will do so to ensure that the statutory deadline can be met.

Question. Regarding policies related to the disposal of property at closed installations, currently, the Department is encouraged to obtain fair market value for excess property not required by the Federal Government. Funds obtained for this

property are used to augment appropriated funds for the environmental clean-up of other DOD property to be disposed. DOD is also authorized to convey property to local redevelopment agencies for little or no consideration in order to facilitate economic recovery and development.

In light of current economic conditions, do you see a need for the Department to reassess its policy on the need to seek fair market value in all cases? If so, what changes would you propose to this policy?

Answer. I understand that the Department has a broad range of authorities under which it may convey surplus property at closed installations, and I believe this flexibility is important. These authorities give the Department the flexibility to address the wide range of circumstances encountered at communities that have hosted closing installations. If confirmed, I will ensure the Department properly considers all relevant factors when selecting the appropriate property disposal method.

Question. In your opinion, does the current BRAC law authorize the Department to carry out property disposals for no consideration or consideration at less than fair market value? If not, what changes would you propose to the BRAC law?

Answer. Current BRAC law authorizes the Department to dispose of property using a variety of conveyance methods. Some of those conveyance methods involve payment of consideration, and some may be at no-cost. These conveyance authorities provide flexibility to address the wide range of circumstances encountered at communities that have hosted closing installations. If confirmed, I will ensure the Department properly considers all relevant factors when selecting the appropriate property disposal method.

Question. Many communities around the country affected by significant increases in populations at military bases have asked for financial assistance from the Federal Government to fund improvements or construction of local schools, transportation, utilities, ports, and other infrastructure.

What is your opinion about using funds appropriated to the DOD to pay for these types of projects in local communities?

Answer. Law and executive order direct the domestic Federal agencies to work with DOD and support a program of economic adjustment assistance for affected communities, workers, and businesses. If confirmed, I will review what can be done to ensure our cognizant Federal partners [U.S. Departments of Commerce (Economic Development Administration), Labor (Employment and Training Administration), Education, Transportation, and Agriculture (Rural Development Administration)] are supporting these efforts as intended. At the same time, I will review the status of these efforts, including the possible use of DOD appropriated funds beyond the State and local organizing and planning activities these funds have supported to date.

Question. If confirmed, how would you propose working with local communities to address their concerns about adequate support for military members and their families?

Answer. Across the Department, numerous components have responsibilities for working with and assisting these areas, including the Office of Economic Adjustment (OEA). If confirmed, I would review these interfaces to ensure we are appropriately structured for assisting these needs and optimizing our resources. This effort would take OEA's efforts to date with these affected States, communities, installations, and servicemembers into account. Additionally, I would work within the administration to effectively implement the statutory and executive order direction for the cognizant Federal agencies to afford priority consideration to requests from Defense-affected communities for Federal technical assistance and financial resources.

ENVIRONMENTAL SECURITY

Question. If confirmed, you will be responsible for environmental security for DOD.

What do you see as the most significant challenges facing the Department in the area of environmental security?

Answer. Environmental issues are an area of great importance to the Department. One of the Department's challenges is environmental sustainability, evident in the energy, environment, safety, and occupational health issues in its operations. The Department must also address these issues in a fiscally responsible manner.

Question. Assuming you are confirmed, what plans if any do you have for addressing these challenges?

Answer. To address these challenges, if confirmed, I will ensure collaboration among DOD, State and local governments, non-governmental organizations, other Federal agencies, industry, and academia to provide better tools and policies for life-

cycle cost and sustainability analyses. I will promote decisions that are based on the best science available at the time, while recognizing that the Department must adapt to changing events, technology, and emerging requirements.

Question. The Department of Justice recently concluded that the DOD must comply with clean-up orders from the Environmental Protection Agency (EPA).

What steps if any do you plan to take, if confirmed, in response to this determination?

Answer. It is my understanding that the Department has responded that it will comply with these orders and EPA and DOD have agreed to finalize interagency agreements required under the main cleanup law, the Comprehensive Environmental Response Compensation and Liability Act, to replace these orders. If confirmed, I will ensure that DOD continues to keep its primary focus on the Department's responsibility to ensure cleanup actions are promptly and cost effectively taken to protect human health and the environment.

Question. Unexploded ordnance (UXO) remains a problem at many current and former DOD sites. Sections 311 and 313 of the National Defense Authorization Act for Fiscal Year 2002 and section 313 of the John Warner National Defense Authorization Act for Fiscal Year 2007 required DOD to develop and implement plans for the remediation of UXO at such sites. However, the Department has yet to develop comprehensive plans and request adequate funding to comply with these requirements.

If confirmed, what steps if any would you take to address the UXO issue?

Answer. The Department has made significant efforts with all stakeholders to update the inventory of the Munitions Response Sites (MRSs), prioritize all the MRSs in the inventory with stakeholder input and measure progress through established performance goals and metrics. I will look into it further, if I am confirmed.

Question. What steps if any do you believe are needed to ensure that the UXO program receives adequate funding and makes meaningful progress in the detection and clearance of UXO?

Answer. The first step is to refine estimates for remediation of MRSs, including estimation of future costs and activities. This will be the key for both planning and execution for MRS remediation and will enable the Department to implement the predictable funding levels required for effective program execution in a fiscally responsible manner.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the USD(ATL)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JACK REED

DARFUR

1. Senator REED. Dr. Carter, in 2007 Congress passed the Sudan Accountability and Divestment Act. An important provision of this act prohibits companies engaged in restricted business operations in Sudan from contracting with the U.S. Government. Recently, it has been learned that certain prohibited companies have been

contracting with the Government, particularly with the Department of Defense (DOD). What steps will you take to ensure that DOD is not negotiating contracts with these prohibited companies?

Dr. CARTER. I understand the Government implemented the Sudan Accountability and Divestment Act as an interim rule in the Federal Acquisition Regulation on June 12, 2008. Effective that date, this rule requires each solicitation for the acquisition of products or services (other than commercial items) must include a provision that requires each offeror to certify that it does not conduct any restricted business operations in Sudan. Upon the determination of a false certification, the contracting officer may terminate the contract; the suspending official may suspend the contractor; and the debarring official may debar the contractor for a period not to exceed 3 years. The President may waive the requirement on a case-by-case basis if the President determines and certifies in writing to the appropriate congressional committees that it is in the national interest to do so. I am unaware of any violations of this law and its implementing regulations, but if confirmed, I would be pleased to review any alleged violations brought to my attention and ensure that appropriate remedial action is taken and any weaknesses in practices by the Department are resolved.

SHIPBUILDING

2. Senator REED. Dr. Carter, the Navy is at a critical juncture regarding its shipbuilding strategy and execution. During the last budget cycle, Congress was asked to consider a major change in the plan for building destroyers. Moreover, the Littoral Combat Ship (LCS) program costs continue to escalate, and the Navy's plan for the future cruiser pushed further into the future. These issues, both in planning and execution, cause Congress to call into question the quality of the Navy's analysis and decision processes. Given the purview of the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)), how do you plan to get some control over this process, exert the necessary acquisition oversight, and leverage the nearly \$20 billion invested in new combatant technologies and capabilities?

Dr. CARTER. I agree that the Navy shipbuilding effort is at a critical juncture. The Defense Acquisition System provides the mechanisms for the USD(AT&L) to control the process and exert the necessary acquisition oversight. I believe additional emphasis is needed to ensure programs are well-matured before proceeding to the next phase of acquisition. If confirmed, I will work with the Navy to ensure that its future acquisition planning efforts are well integrated and that the significant investments made in the past are considered as Department and national priorities change over time.

ACQUISITION STRATEGIES

3. Senator REED. Dr. Carter, many studies have shown that the implementation of Open Architecture enables competition and that despite defense industry consolidation, that competition is essential to innovation and cost containment. Can you please comment on how the implementation of these recommendations would positively impact programs such as the Aegis Weapons System, that have been sole-sourced for decades, and how the Services can rapidly implement these changes to achieve maximum benefits?

Dr. CARTER. I agree that Open Architecture is an important step forward across the broad acquisition portfolio. While I do not have complete acquaintance with the specifics of the Navy's plans for Open Architecture for the Aegis Weapons System, I believe it would be important for the Navy to define its objective combat systems architecture and to then conduct the developmental work and systems engineering necessary to evolve it into a standards-based modular architecture. I believe this would enhance innovation and allow qualified vendors to compete for and contribute to the overall Navy combat systems product line for the future. The quicker this could be done, the sooner the benefits could be achieved.

4. Senator REED. Dr. Carter, the Navy's future surface combatant plan unveiled in 2001 stated that the massive investment in DDG-1000 technologies, including automation, would be used on the "family of ships," which included LCS, DDG-1000, and CG(X). The Navy has proposed deviating from this plan and now proposes to truncate DDG-1000, restart DDG 51 production, push out CG(X) for nearly a decade, and insert something called Future Surface Combatant in the interim. Please explain how you would direct the Navy to leverage the investments already made.

Dr. CARTER. The Navy has learned a great deal from DDG-1000 research and development and I agree that it makes sense to insert proven technologies in future ship designs wherever possible. I understand there are 10 critical technology advancements associated with DDG-1000 and that 8 of the 10 critical technologies could have application to CG(X). One critical technology, the Advanced Gun System, is currently not planned for any platform other than DDG-1000. The Navy should continue to evaluate the utility of the DDG-1000 hull form in future applications. The Dual Band Radar is already planned for installation in the CVN 78 aircraft carrier. In addition, technologies such as Autonomic Fire Suppression System and the Total Ship Computing Environment would have utility for incorporation in future surface ship and carrier designs.

QUESTIONS SUBMITTED BY SENATOR EVAN BAYH

ELECTRONICS IN DEFENSE SYSTEMS

5. Senator BAYH. Dr. Carter, what are your plans for ensuring that DOD procures safe and trusted electronics and printed circuit boards for use in defense systems?

Dr. CARTER. Section 254 of the National Defense Authorization Act for Fiscal Year 2009 requires the Department of Defense to conduct assessments of acquisition programs to identify vulnerabilities in the supply chain associated with electronics and information technology systems. I understand that the Department is developing recommended practices for managing supply chain risk that are effective and can be implemented considering cost and schedule impact; and collaborating with industry to identify standards and best practices that recognize security challenges in commercial global sourcing. If confirmed, my intention is to review the results of these assessments, evaluate the effectiveness of existing directives and instructions related to the acquisition of critical electronic hardware and software, and adjust procurement policy and strategy as needed.

6. Senator BAYH. Dr. Carter, will these plans include changing how DOD imports these products?

Dr. CARTER. DOD must be able to both trust its electronic systems and preserve access to leading edge industrial capabilities from the global marketplace. Where trust is a paramount concern, such as to protect critical information, sensitive communications, and mission critical weapon system capabilities, the Department has programs in place like the DOD Trusted Foundry and Supplier Program for acquiring military unique or customized devices. If confirmed, I will continue working to ensure that procurement policies and processes are put in place to raise awareness of supply chain risks, and empower acquirers with the tools necessary to mitigate risk for these critical applications in our defense systems. For the vast majority of hardware and software it acquires, I think the Department's focus should be to work with industry to encourage use of standards, verification methods, and procurement practices that will preserve product trust, prevent tampering, malicious code insertion, and counterfeit substitution.

DEFENSE LABORATORIES

7. Senator BAYH. Dr. Carter, I am concerned that DOD laboratories are losing technical stature with respect to Department of Energy (DOE) labs, industry labs, and other peers. Do you have plans on improving this situation?

Dr. CARTER. If confirmed, I will work with Director, Defense Research & Engineering (DDR&E) to review the contribution of the DOD labs with an eye to ensuring that they operate at maximum effectiveness and productivity. I am certain the labs can be improved, and I will place priority in examining the capabilities and long-term requirements of the DOD laboratories, and develop, with the Services, a plan to address the role of the labs.

QUESTIONS SUBMITTED BY SENATOR MARK UDALL

SERVICE LEVEL AGREEMENTS

8. Senator UDALL. Dr. Carter, as the top acquisition official within DOD at a time when we are facing many different budget pressures, you will be faced with many difficult decisions. In this fiscally constrained environment, I believe you will need to look for new and innovative ways to acquire capability for our Armed Forces. A good example of an innovative and flexible acquisition model is NextView Service

Level Agreements (SLAs) that exist between commercial satellite imagery providers and the National Geospatial-Intelligence Agency (NGA). It is my understanding that this relationship has yielded substantial improvements to supporting NGA's geospatial and military mission, while delivering cost-cutting solutions to the taxpayer. It has recently come to my attention that one of the SLAs is set to expire at the end of July, but there are plans to extend this through the end of the year. While I am pleased to hear this, I am especially interested in your future plans for ensuring continued and assured access to innovative and cost-effective commercial services such as those provided by the commercial satellite imagery industry. Are you aware of this commercial government relationship and the imagery products the commercial satellite industry is currently providing to the warfighter and Intelligence Community?

Dr. CARTER. I am aware in general terms but, as a nominee, I have not had access to detailed information. From what I understand, the NGA recognizes that mid-resolution, geospatially accurate, commercial imagery and imagery derived products are valuable sources of geospatial-intelligence (GEOINT) and a key element in support of multiple U.S. Government initiatives. As such, they entered into a cost sharing arrangement for the development of imagery satellites. This has proven especially useful in support of emergencies, disasters, and humanitarian efforts both domestic and international. I will, if confirmed, continue to look for innovative and cost-effective ways of acquiring commercially available imagery that support a multitude of needs.

9. Senator UDALL. Dr. Carter, what steps will you take in your role as Under Secretary to see that NGA is able to leverage private sector investments to increase access to available services at a greater value?

Dr. CARTER. If confirmed, I will ensure that we fully enable the Director of NGA, in his role as the GEOINT functional manager, to leverage private sector investments to increase access to available geospatial services at the best value for the U.S. Government. As commercial remote sensing capabilities evolve, we should continue to ascertain when private sector investments for GEOINT applications and services are a cost effective way of supporting the needs of the U.S. Government.

SMALL BUSINESS CONTRACTING

10. Senator UDALL. Dr. Carter, in 2006, the Small Business Administration gave DOD a red rating for not meeting mandated small business goals. DOD has historically been significantly below the statutory small business contracting requirement of 23 percent. For example, the Air Force only issued 15–17 percent of their contract dollars to small businesses, and their small business contract dollar percentages have actually been declining in recent years rather than increasing. In your role as DOD's top acquisition official, what do you intend to do to improve the small business contracting record across all of the Services to meet these statutory small business contracting requirements?

Dr. CARTER. If confirmed, I will work with the DOD Office of Small Business Programs (OSBP) to analyze the existing data in order to determine what DOD is spending its contract dollars on and from what types of businesses. This will allow for identifying opportunities to maximize small business participation in DOD contracting. Additionally, I will work with the OSBP to ensure that organization has the tools necessary, and uses those tools, to improve the small business contracting record.

DIRECTOR FOR OPERATIONAL ENERGY

11. Senator UDALL. Dr. Carter, section 902 of the National Defense Authorization Act for Fiscal Year 2009 establishes a new position within DOD for a Director for Operational Energy. I understand that the Department is undertaking an analysis of options for implementing the provision, including resourcing and the office's placement within Office of the Secretary of Defense (OSD). Section 902 specifies that the Director is the principal advisor to the Secretary of Defense and Deputy Secretary of Defense and may communicate views "directly to the Secretary of Defense and the Deputy Secretary of Defense without obtaining the approval or concurrence of any other official within DOD." Are any of the options being considered for the Director's placement within OSD subordinate to any official in DOD other than the Secretary or Deputy Secretary? If so, under whom, and how does the Department reconcile that placement as consistent with the cross-cutting responsibil-

ities assigned to the Director and the direct line of communication with the Secretary and Deputy Secretary specified by section 902?

Dr. CARTER. I strongly believe that energy security is an important part of national security. DOD, through its activities, programs, and technology, can play a positive role in strengthening energy security. It appears to me that the establishment of the Director of Operational Energy in DOD can help the Secretary and Deputy Secretary to realize this potential. As a nominee, I have no insight or input into organizational matters, so I do not know the Department's intentions in this regard.

QUESTIONS SUBMITTED BY SENATOR SUSAN COLLINS

ACQUISITION CHALLENGES

12. Senator COLLINS. Dr. Carter, what do you believe are the biggest challenges facing the DOD acquisition workforce?

Dr. CARTER. I would cite capacity and capability as two of the biggest challenges facing the DOD acquisition workforce at this time. In the 1990s the workforce in acquisition organizations was cut substantially, and since 2001 workload has increased dramatically, but the size of the workforce has not kept pace. I believe we must reset DOD's multi-sector acquisition workforce with the right size and skill mix required to successfully provide proper oversight and management of contracts. DOD is also dealing with the dynamics of impending losses of an experienced and aging workforce. We must integrate and develop our younger generations into an experienced and successful future acquisition workforce. These challenges have increased the risk of successfully achieving desired acquisition outcomes.

13. Senator COLLINS. Dr. Carter, what do you believe should be done to address these challenges?

Dr. CARTER. I fully support the Secretary of Defense's new strategic direction to restore the acquisition workforce. It is essential to effectively achieving the objective of the President's March 4, 2009 memo to have the capacity and ability to develop, manage, and oversee acquisitions appropriately. The Secretary announced the DOD fiscal year 2010 budget objective to significantly grow the acquisition workforce by 15 percent—20,000 by 2015. It involves converting 11,000 contractors to full-time government employees, and hiring 9,000 more government acquisition professionals. The growth strategy will increase the contracting and oversight workforce, to include the Defense Contract Management Agency and the Defense Contract Audit Agency. It will enable DOD to have a strong capability in systems engineering, cost estimating, and other acquisition functions critical to successful acquisition outcomes. This is a very significant step to strengthen the acquisition workforce and I look forward, if confirmed, to supporting the President, the Secretary, and Congress in this urgent endeavor.

14. Senator COLLINS. Dr. Carter, Secretary Gates has made recent comments about several future major acquisition projects, including the Boeing F-22 Air Force fighter jet, the Lockheed Martin multiservice F-35 attack plane, the Boeing Future Combat System ground vehicle under development for the Army, and the *Virginia*-class attack submarine built by General Dynamics and Northrup Grumman. Can you please comment on your plans for evaluating each of these projects?

Dr. CARTER. On April 6, Secretary Gates announced his key decisions with respect to the fiscal year 2010 budget. As a nominee, I was not a party to the evaluations or discussions that went into the recommendations he has made to the President and cannot comment on the specific programs you mention. The recommendations appear to me to be fully consistent with Secretary Gates' statement that his recommendations are the product of a holistic assessment of capabilities, requirements, risks and needs for the purpose of shifting the Department in a different strategic direction.

Changes to top-level strategies, as Secretary Gates announced, or resource constraints may drive changes to the specific programs the Department pursues. Accordingly, each of the Department's acquisition programs must be evaluated in the context of how changes to strategy impact the need for the program and, conversely, how resource constraints affect strategy as well as individual programs the Nation pursues. If confirmed, I will evaluate acquisition programs consistent with these considerations.

U.S. SHIPBUILDING

15. Senator COLLINS. Dr. Carter, Chairman Skelton of the House Armed Services Committee recently expressed his concern about the United States' maritime posture, noting that since the Cold War ended, the United States ". . . forgot that we are a maritime nation. We forgot that lesson of history that only the nations with powerful navies are able to exert power and influence, and when a navy disappears so does that nation's power." I agree with Chairman Skelton's sentiments and believe that we need a strong Navy to meet the dynamic challenges of current and emerging threats. As a maritime nation, we must maintain our superior maritime edge in the world in order to meet our security, energy, and transportation needs. Not only is shipbuilding crucial to our national defense, but it preserves thousands of engineering and production jobs for the country and is a large contributor to the U.S. economy. If you are confirmed, what steps will you take to ensure that the United States maintains its worldwide naval dominance?

Dr. CARTER. As Secretary Gates outlined in his recent budget statement, the United States maintains a distinct maritime advantage in most areas. While I am committed to ensuring the United States maintains its worldwide naval dominance, I am open to considering the appropriate numbers and types of ships that deliver naval capabilities.

16. Senator COLLINS. Dr. Carter, what changes do you think can be made in order to create a more stable shipbuilding industrial base?

Dr. CARTER. Stability in the shipbuilding industrial base is clearly a function of stability in the Navy's shipbuilding plan. But beyond that there are a few initiatives that could be worked with the shipbuilding industry to mitigate workload fluctuations within the shipyards to maintain a stable and skilled workforce. These include:

- Level loading of ship procurements would help to sustain minimum employment levels and skill retention.
- Reducing the types and models of ships, maximizing the reuse of ship designs and components, and implementing open architectures for software and hardware systems.
- Mitigating workload peaks and valleys through work share opportunities and regional outsourcing to level load production facilities.
- Moving towards sustaining procurement rates would contribute to reducing the magnitude of annual funding variations and provide a more stable demand signal to the shipbuilding industry as a whole.

If confirmed, I look forward to working on this important issue.

[The nomination reference of Dr. Ashton B. Carter follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
March 18, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Ashton B. Carter, of Massachusetts, to be Under Secretary of Defense for Acquisition, Technology, and Logistics, vice John J. Young, Jr.

[The biographical sketch of Dr. Ashton B. Carter, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DR. ASHTON B. CARTER

Professor Ashton Carter is chair of the International and Global Affairs faculty at Harvard's Kennedy School of Government. He is also Co-Director (with former Secretary of Defense William J. Perry) of the Preventive Defense Project, a research collaboration of Harvard and Stanford Universities.

Dr. Carter served as Assistant Secretary of Defense for International Security Policy during President Clinton's first term. His Pentagon responsibilities encompassed: countering weapons of mass destruction worldwide, oversight of the U.S. nuclear arsenal and missile defense programs, policy regarding the collapse of the

former Soviet Union (including its nuclear weapons and other weapons of mass destruction), control over sensitive U.S. exports, and chairmanship of NATO's High Level Group. He oversaw military planning during the 1994 crisis over North Korea's nuclear weapons program; was instrumental in removing all nuclear weapons from the territories of Ukraine, Kazakhstan, and Belarus; oversaw the establishment of defense and intelligence relationships with the countries of the former Soviet Union when the Cold War ended; and participated in the negotiations that led to the deployment of Russian troops as part of the Bosnia Peace Plan Implementation Force. Dr. Carter managed the multi-billion dollar Cooperative Threat Reduction (Nunn-Lugar) program to support elimination of nuclear, chemical, and biological weapons of the former Soviet Union, including the secret removal of 600 kilograms of highly enriched uranium from Kazakhstan in the operation code-named Project Sapphire. Dr. Carter also directed the Nuclear Posture Review and oversaw the Department of Defense's (DOD) Counterproliferation Initiative. He directed the reform of DOD's national security export controls. His arms control responsibilities included the agreement freezing North Korea's nuclear weapons program, the extension of the Nuclear Nonproliferation Treaty, the negotiation of the Comprehensive Test Ban Treaty, and matters involving the START II, ABM, CFE, and other arms control treaties.

Dr. Carter was twice awarded the Department of Defense Distinguished Service Medal, the highest award given by the Department. For his contributions to intelligence, he was awarded the Defense Intelligence Medal. In 1987 Carter was named 1 of 10 Outstanding Young Americans by the United States Jaycees. He received the American Physical Society's Forum Award for his contributions to physics and public policy.

Dr. Carter continues to advise the U.S. Government as Co-Chair of the Review Panel on Future Directions for Defense Threat Reduction Agency (DTRA) Missions and Capabilities to Combat Weapons of Mass Destruction and Chair of the National Security Strategy and Policies Expert Working Group, Congressional Commission on the Strategic Posture of the United States, a consultant to the Defense Science Board, a member of the National Missile Defense White Team, and a member of the National Academy of Sciences Committee on International Security and Arms Control.

Carter served as a longtime member of the Defense Science Board (DSB) and the Defense Policy Board (DPB), the principal advisory bodies to the Secretary of Defense. He served on DSB from 1991 to 1993, and he served on both DSB and DPB from 1997 to 2001. In 1997 Dr. Carter co-chaired the Catastrophic Terrorism Study Group with former CIA Director John M. Deutch, which urged greater attention to terrorism. From 1998 to 2000, he was deputy to William J. Perry in the North Korea Policy Review and traveled with him to Pyongyang. In 2001–2002, he served on the National Academy of Sciences Committee on Science and Technology for Countering Terrorism and advised on the creation of the Department of Homeland Security. In 2006 to 2008 Dr. Carter served as a member of Secretary of State Condoleezza Rice's International Security Advisory Board. He has testified frequently before the armed services, foreign relations, and homeland security committees of both houses of Congress.

In addition to his public service, Dr. Carter is currently a Senior Partner at Global Technology Partners and a member of the Board of Trustees of the MITRE Corporation, and the Advisory Boards of MIT's Lincoln Laboratories and the Draper Laboratory. He is a consultant to Goldman, Sachs on international affairs and technology matters, and speaks frequently to business and policy audiences. Dr. Carter is also a member of the Aspen Strategy Group, the Council on Foreign Relations, the American Physical Society, the International Institute of Strategic Studies, the Advisory Board of the Yale Journal of International Law, and the National Committee on U.S.-China Relations. Dr. Carter was elected a Fellow of the American Academy of Arts and Sciences.

Dr. Carter's research focuses on the Preventive Defense Project, which designs and promotes security policies aimed at preventing the emergence of major new threats to the United States.

From 1990–1993, Dr. Carter was Director of the Center for Science and International Affairs at Harvard University's John F. Kennedy School of Government, and Chairman of the Editorial Board of International Security. Previously, he held positions at the Massachusetts Institute of Technology, the Congressional Office of Technology Assessment, and Rockefeller University.

Dr. Carter received bachelor's degrees in physics and in medieval history from Yale University, *summa cum laude*, Phi Beta Kappa. He received his doctorate in theoretical physics from Oxford University, where he was a Rhodes Scholar.

In addition to authoring numerous articles, scientific publications, government studies, and congressional testimonies, Dr. Carter co-edited and co-authored 11 books, including *Keeping the Edge: Managing Defense for the Future* (2001), *Preventive Defense: A New Security Strategy for America* (1997), *Cooperative Denuclearization: From Pledges to Deeds* (1993), *A New Concept of Cooperative Security* (1992), *Beyond Spinoff: Military and Commercial Technologies in a Changing World* (1992), *Soviet Nuclear Fission: Control of the Nuclear Arsenal in a Disintegrating Soviet Union* (1991), *Managing Nuclear Operations* (1987), *Ballistic Missile Defense* (1984), and *Directed Energy Missile Defense in Space* (1984).

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Dr. Ashton B. Carter in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Ashton Baldwin Carter (Ash Carter).

2. **Position to which nominated:**
Under Secretary of Defense for Acquisition, Technology, and Logistics.

3. **Date of nomination:**
March 18, 2009.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
September 24, 1954; Philadelphia, PA.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Stephanie DeLeeuw Carter.

7. **Names and ages of children:**
William Ashton Carter, 20.
Ava Clayton Carter, 17.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Abington High School, Abington, PA; 1968-1972; High School Diploma, 1972.
Yale University, New Haven, CT; 1972-1976; B.A., 1976.
Edinburgh University, Edinburgh, Scotland; Spring 1975; no degree.
Oxford University, Oxford, United Kingdom; 1978-1979; D. Phil.; 1979.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Chair, International & Global Affairs faculty, 2006–present; John F. Kennedy School of Government, Harvard University - Cambridge, MA.

Ford Foundation Professor of Science and International Affairs, 1996–present; John F. Kennedy School of Government, Harvard University - Cambridge, MA.

Co-Director (with William J. Perry), Preventive Defense Project; Harvard & Stanford Universities, 1997–present; Cambridge, MA.

Senior Advisor to the North Korea Policy Review, 1998–2000 (part time while teaching); U.S. Department of State, Washington, DC.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Chair, National Security Strategy and Policies Expert Working Group, Congressional Commission on the Strategic Posture of the United States, 2008–present.

Co-Chair, Review Panel on Future Directions for Defense Threat Reduction Agency Missions and Capabilities To Combat Weapons of Mass Destruction, 2007–2008.

Member, International Security Advisory Board to the Secretary of State, 2006–2008.

Member National Academy of Sciences Committee on Science and Technology for Countering Terrorism, 2001–2003.

Member, National Missile Defense White Team, 1998–present.

Member, Threat Reduction Advisory Committee, U.S. Department of Defense, 1998–2002.

Member, Defense Science Board, 1991–1993, 1997–2001.

Member, Defense Policy Board, 1997–2001.

Assistant Secretary of Defense for International Security Policy, U.S. Department of Defense, 1993–1996.

Member, National Academy of Sciences, Committee on International Security and Arms Control, 1990–1993.

Member, Sandia National Laboratory, President's Advisory Council, 1992–1993.

Member, Congressional Office of Technology Assessment, Advisory Panel on START Verification Technologies, 1991–1992.

Member, National Academy of Sciences Panel on National Security Export Controls, 1990–1991.

Member, National Research Council Naval Studies Advisory Committee on the Future of the Aircraft Carrier, 1990–1991.

Member, White House, President's Council of Advisers on Science and Technology, Panel on National Security, 1990–1991.

Member, Defense Science Board Task Force on New Scenarios and Intelligence, 1990.

Member, Congressional Office of Technology Assessment Advisory Panel on START Verification Technologies, 1989–1990.

Member, Joint Chiefs of Staff Advisory Group on the Future of U.S.-Soviet Military Relations, 1988–1989.

Member, Commission on the Presidency and Science Advising, 1988.

Consultant, Bureau of Intelligence and Research, U.S. Department of State, 1986–1988.

Member, Advisory Panel on Military Uses of Space, Office of Technology Assessment, U.S. Congress, 1985–1986.

Analyst, Program Analysis and Evaluation, Office of the Secretary of Defense, Pentagon, 1981–1982.

Analyst, International Security and Commerce Program, Office of Technology Assessment, U.S. Congress, 1980–1981.

Experimental Research Associate, Brookhaven National Laboratory, 1976.

Experimental Research Associate, Fermi National Accelerator Laboratory, 1975.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Trustee, The MITRE Corporation, 2006–present.

MIT Lincoln Laboratories Advisory Board, 1998–present.

Draper Laboratory Corporation, 2000–present.

Senior Partner, Global Technology Partners, LLC, 1998–present.

Consultant to Goldman Sachs on international affairs and technology matters, 1997–present.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Aspen Strategy Group, 1997–present.
 Council on Foreign Relations, 1989–present.
 Fellow, American Academy of Arts and Sciences, 1989–present.
 American Physical Society, 1976–present.
 International Institute for Strategic Studies, 1997–present.
 National Committee on U.S.-China Relations, 1998–present.
 American Academy of Diplomacy, 2008–present.
 American Association of Rhodes Scholars, 1977–present.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Member of National Security Advisory Group to Senator Tom Daschle, then Senator Harry Reid, chaired by William J. Perry.

Co-Chair, with Ronald Lehman, of Policy Advisory Group to Senator Richard Lugar.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Quarter 1, 2004, \$1,000, Wesley Clark.
 Quarter 1, 2004, \$1,000, Joe Lieberman.
 Quarter 1, 2004, \$2,000, John Edwards.
 Quarter 1, 2004, \$2,000, DNC.
 9/15/2007, \$2,300, Hillary Clinton for President.
 9/15/2007, \$1,500, Friends of Dick Lugar, Inc.
 8/28/2008, \$2,300, Friends of Hillary.
 6/24/2008, \$4,600, Obama for America.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Defense Intelligence Medal, from the Defense Intelligence Agency, April 1998.

Distinguished Public Service Medal, Department of Defense (awarded twice), the highest award of the Department of Defense, "For exceptionally distinguished service to the Nation as Assistant Secretary of Defense for International Security Policy," July 1994 and December 1995.

Forum Award, American Physical Society, "For his clear and lucid exposition of the physics issues in the nuclear arms race and his unique ability to combine his physics background and good judgment to clarify the technical parameters of these important public policy issues," 1988.

Ten Outstanding Young Americans, United States Jaycees, 1987.

Rhodes Scholar, 1976.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Books:

Keeping the Edge: Managing Defense for the Future. Editor (with John P. White) and author of three chapters. Cambridge, MA: The MIT Press, 2001. [translated into Chinese, Military History and Translation Office, MND, ROC, 2002]

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

I give a large number of lectures and speeches, using no notes or handwritten notes that are not archived. Almost all talks are derived from, or form the basis of, written publications or testimony, and their content can be found in #15 above.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ASHTON B. CARTER.

This 17th day of March, 2009.

[The nomination of Dr. Ashton B. Carter was reported to the Senate by Chairman Levin on April 1, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on April 23, 2009.]

[Prepared questions submitted to Dr. James N. Miller, Jr., by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? Answer. I do not see the need to modify the provisions of the Goldwater-Nichols Act at this time. The Act was a very significant piece of legislation that, over the course of several decades, has led to dramatic improvements in the effectiveness of the Armed Forces—from strategic decisionmaking to operational command and control. An entire generation of military officers now has a much improved perspective on coordinated, multi-service, joint training, and operations.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. See my previous answer.

RELATIONSHIPS

Question. What do you see as the relationship between the Principal Deputy Under Secretary of Defense for Policy and each of the following?

The Secretary of Defense.

Answer. Pursuant to the authority, direction, and control of the Under Secretary of Defense for Policy (USD(P)), as the USD(P)'s principal assistant, the Principal Deputy Under Secretary of Defense for Policy (PDUSD(P)) serves as a staff assistant and advisor to the Secretary of Defense on all matters concerning the formulation of national security and defense policy and the integration and oversight of DOD policy and plans to achieve national security objectives.

Question. The Deputy Secretary of Defense.

Answer. The Principal Deputy Under Secretary for Policy provides support to the Deputy Secretary similar to that provided to the Secretary, as described above.

Question. The Under Secretary of Defense for Policy.

Answer. The PDUSD(P) is the principal assistant to the USD(P) and is responsible for assisting the USD(P) in carrying out all responsibilities, fulfilling functions, managing relationships, and exercising authorities provided for in law to the USD(P). The PDUSD(P) advises on and supports the USD(P) with all responsibilities in providing advice to the Secretary of Defense in interagency fora (such as National Security Council and Homeland Security Council deliberations), engagement with international interlocutors, and in the Planning, Programming, Budgeting, and Execution (PPBE) processes inside the Department, including the Quadrennial Defense Review (QDR), the Nuclear Posture Review (NPR), and annual program and budget reviews.

Question. The other Under Secretaries of Defense, including the Under Secretary of Defense for Intelligence.

Answer. Pursuant to the authority, direction, and control of the USD(P), the PDUSD(P) works closely with the other Under Secretaries of Defense and their Deputies, including the Under Secretary of Defense for Intelligence, to achieve the Secretary's objectives. This includes providing policy input, as appropriate, to each of them in their respective areas of responsibility.

Question. The Assistant Secretaries of Defense.

Answer. Pursuant to the authority, direction, and control of the USD(P), the PDUSD(P) works closely with Assistant Secretaries of Defense across the Department to achieve the Secretary's objectives. This includes providing policy input, as appropriate, to each of them in their respective areas of responsibility. As the USD(P)'s principal assistant, within the Office of the USD(P), the PDUSD(P) provides oversight of Assistant Secretaries on issues and at times as directed by the USD(P). The Policy team works together to provide the USD(P) and the Secretary with advice and recommendations on the full range of policy issues under consideration in the Department and provides policy oversight to ensure that the Secretary's guidance and decisions are implemented properly.

Question. The Secretaries of the Military Departments.

Answer. The PDUSD(P) works closely with the Secretaries of the Military Departments on a broad range of issues, including strategy development, force planning and other areas in which the military departments are critical stakeholders.

Question. The General Counsel of DOD.

Answer. The PDUSD(P) works closely with the General Counsel on all policy issues that involve a legal dimension. This generally requires significant and regular coordination on a broad range of issues.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff.

Answer. As the principal military advisor to the Secretary of Defense, the President and the National Security Council, the Chairman has a unique and critical military role. The PDUSD(P) works closely with the Chairman and Vice Chairman to support the efforts of the USD(P), the Secretary and the Deputy Secretary, and to help ensure that military advice is taken into account in an appropriate manner.

Question. The Commanders of the Regional and Functional Combatant Commands.

Answer. The PDUSD(P) also works closely with the Regional and Functional Combatant Commanders to support the efforts of the USD(P), Secretary and Deputy Secretary, particularly in the areas of strategy and policy, contingency planning and policy oversight of operations.

Question. The Administrator and Deputy Administrators of the National Nuclear Security Administration

Answer. The PDUSD(P) works with the Administrator and Deputy Administrator of the National Nuclear Security Administration, in support of the USD(P)'s oversight of strategy for nuclear weapons and forces, as well as USD(P)'s role on the Nuclear Weapons Council.

DUTIES OF THE PRINCIPAL DEPUTY UNDER SECRETARY OF DEFENSE FOR POLICY

Question. Section 134a of title 10, U.S.C., provides that the DUSD(P) shall assist the USD(P) in the performance of his duties. DOD Directive 5111.3 emphasizes that the DUSD(P) advises and assists the USD(P), particularly on strategy formulation, contingency planning, and the integration of DOD plans and policy with overall national security objectives.

What is your understanding of the duties and functions of the PDUSD(P) under current regulations and practices?

Answer. My understanding is that, as the principal assistant to the USD(P), the PDUSD(P) is responsible for assisting the USD(P) in advising the Secretary of Defense on all matters concerning the formulation of national security and defense policy, and for assisting the USD(P) in carrying out all USD(P) responsibilities outlined in section 134(b) of title 10. This includes, but not limited to, strategy formulation, contingency planning, and the integration of DOD plans and policy with overall national security objectives.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of Defense and the USD(P) would prescribe for you?

Answer. If confirmed, I expect that my duties and functions would include advising and assisting the USD(P) and the Secretary of Defense on strategy formulation, contingency planning, and the integration of DOD plans and policy. I expect that this would include involvement in the planning, programming, budgeting, and execution (PPBE) system, and in major departmental reviews such as the QDR and the NPR. I look forward to speaking with the Secretary of Defense and the USD(P) further about how I could best support their efforts.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I have been privileged to spend the last 25 years working on a wide range of defense and national security issues, both in and out of government. I had the honor to work for the late Les Aspin for 4 years as a professional staff member of the House Armed Services Committee, where I was responsible for both policy and procurement issues. I was privileged to serve for over 3 years as Deputy Assistant Secretary of Defense for Requirements, Plans and Counterproliferation Policy, where my office led defense planning, oversight of war plans, and efforts to improve the military's ability to cope with weapons of mass destruction (WMD). During my time outside of government, I have had the opportunity to teach and conduct research on national security issues, to establish and lead a private sector group that provided consulting services to DOD, and to serve in a leadership position for a newly established national security think tank. In addition, I have served on a number of studies and panels including as an advisor to the Defense Science Board, and as an expert to the Commission on the Strategic Posture of the United States. I believe that my substantive expertise and management experience would allow me to serve the country well if confirmed as PDUSD(P).

STRATEGY FORMULATION AND CONTINGENCY PLANNING

Question. One of the purposes of Goldwater-Nichols was to increase military and civilian attention on the formulation of strategy and contingency planning. DOD Directive 5111.3 specifically assigns a major role to the DUSD(P) for those important matters.

What is your view of the civilian role, as compared to the military role, in the formulation of strategy and contingency planning?

Answer. Civilian oversight of the military is critical in a democracy, and is therefore paramount when considering the formulation of strategy and contingency plans. When I served in the Department as Deputy Assistant Secretary for Requirements, Plans, and Counterproliferation Policy, I oversaw the development of strategic planning and contingency planning guidance, as well as the civilian review of contingency plans in support of the USD(P) and the Secretary of Defense. Based on this experience, I believe strongly that the development of appropriate guidance and plans requires civilian and uniformed leaders to work in close partnership.

More specifically, the PDUSD(P) supports the development of the President's National Security Strategy, the development of the defense strategy, the establishment

of realistic objectives and guidance to form the basis for contingency planning, and the review of DOD plans and programs to ensure they support strategic objectives. The Joint Staff is a critical partner in the development of guidance for contingency planning and provides independent military advice to the Secretary of Defense and the President. In addition to the provision of written guidance, an important civilian role is to review contingency plans submitted for approval by the combatant commanders. The PDUSD(P) also supports the USD(P) in facilitating interagency coordination on contingency planning efforts, as necessary.

Question. In your opinion, does the civilian leadership currently have an appropriate level of oversight of strategy and contingency planning?

Answer. I believe that the civilian leadership has the necessary authorities to provide effective oversight of strategy and contingency planning. At the same time, I believe that changes to the organizational structure of the Office of the USD(P) could help improve the support of senior leadership on these critical issues. If confirmed, I will work with the USD(P) to examine this issue closely and to help ensure that civilian leadership has appropriate oversight of strategy, contingency planning, and other critical issues relating to the use of force.

Question. What steps do you believe are necessary to ensure effective civilian control and oversight of strategy and contingency planning?

Answer. Ongoing wars in Iraq and Afghanistan, as well as a complex security environment globally, provide an incredibly diverse set of challenges and opportunities for today and the future. Because of this increased complexity, I believe that it is likely that strategy and planning require more senior level attention and more supporting personnel in DOD, and in particular in the Office of the USD(P), than has been the case in the past. In addition, I believe that recent experience has shown the importance of “whole of government” approaches to strategy, plans, and operations. Therefore establishing effective organizations and processes for working with interagency partners, while protecting DOD prerogatives, is an area where I believe it is useful to consider possible additional measures. If confirmed, I look forward to working with the USD(P) to examine these issues closely.

If confirmed, I would strive to provide the best support possible to the USD(P) and the Secretary of Defense in fulfilling their statutory responsibilities to provide written policy guidance and to review contingency plans. I would also work closely with the Joint Staff, and where appropriate interagency partners, to help develop further opportunities to collaborate on planning guidance and reviews.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges confronting the PDUSD(P)?

Answer. If confirmed, I expect to provide advice and counsel to the USD(P) and aid in the development of policy advice to the Secretary of Defense. I would expect that major challenges would include ensuring that the internal organization of the various policy oriented structures in Office of Secretary of Defense (OSD) continue a relatively seamless transition as new leadership continues to assimilate. I also expect to play important roles in reviews including the QDR and the NPR, and ensuring that adequate scrutiny and oversight are applied to the entire range of policy options that are reviewed in support of ongoing contingencies and possible future operations. Beyond ensuring that the Secretary of Defense receives the best possible policy input on these vital questions, another challenge will be to strengthen the organizational capacity of OSD Policy to support these and other efforts.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I expect to serve important advisory roles in a number of policy reviews, including the upcoming QDR and NPR, which provide an opportunity to assess these challenges and develop policy, plans, and investments to address them. More broadly, I expect to participate actively in a variety of DOD decision-making processes, including in particular strategy development and the PPBE system. I also expect to support the USD(P) in efforts to responsibly end the war in Iraq; ensure that the United States develops and employs a more effective strategy in Afghanistan and the surrounding region; prevent nuclear and WMD proliferation; combat terrorism; adapt the U.S. military for 21st century challenges; and strengthen America’s relationships with key partners and allies.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the PDUSD(P)?

Answer. If confirmed, I would give priority to the major challenges identified by the Secretary of Defense and the USD(P), and to strengthening the organizational

capacity of OSD Policy to address them. I would also pay close attention to help develop and maintain effective working relationships with both military and civilian counterparts in the Department and the interagency.

IRAQ

Question. The President has announced his plans for the drawdown of U.S. forces in Iraq and their transition to an overwatch mission, to be completed by the end of August 2010. The U.S.-Iraqi agreement on the Withdrawal of United States Forces from Iraq and the Organization of Their Activities During Their Temporary Presence in Iraq (the "security agreement") requires that U.S. combat forces withdraw from cities and towns by June 2009 and that all U.S. forces withdraw from Iraq by the end of December 2011. Additionally, if Iraqi voters reject the security agreement in a referendum scheduled for July 2009, U.S. troops would be required to withdraw by July 2010.

What in your view are the greatest challenges facing the Department in meeting these deadlines and what actions, if any, would you recommend to maximize the chances of meeting these requirements?

Answer. A critical goal over the next months and years in Iraq will be to maintain a secure environment to support elections, political reconciliation, and economic development. As the U.S. military continues to transition from providing population security to conducting overwatch, and then redeploys out of Iraq, continuing to build the capacity of the Iraqi military and police forces will be a continuing priority, as will ensuring the effectiveness of counterterrorism operations. As the U.S. military repositions and draws down its forces in Iraq, there are likely to be important strategic choices about the positioning of U.S. forces in Iraq and the region, as well as questions relating to prioritization of logistical support for the movement of U.S. forces. If confirmed, I would aid in the review of DOD plans and work with colleagues across the Department to make any necessary recommendations to the USD(P) and the Secretary of Defense.

Question. What is your understanding and assessment of U.S. plans to support implementation of the President's drawdown plans and the security agreement requirements for repositioning and redeployment of U.S. forces, including contingency planning relating to the Iraqi referendum?

Answer. Based on my current knowledge, my assessment is that the President's drawdown strategy reflects a careful consideration of events on the ground and respect for the bilateral agreements between the United States and Iraq. If confirmed, I look forward to learning more about the details of plans for repositioning and redeploying U.S. forces, as well as any contingency planning relating to the Iraqi referendum, and to supporting the USD(P) and Secretary of Defense in overseeing the implementation of strategy and plans.

Question. To date, U.S. taxpayers have paid approximately \$48 billion for stabilization and reconstruction activities in Iraq. On April 8, 2008, Ambassador Crocker told the committee "the era of U.S.-funded major infrastructure is over" and said the United States is no longer "involved in the physical reconstruction business."

What do you believe is the appropriate role for the United States in reconstruction activities in Iraq going forward?

Answer. I agree with and support the President's view that bringing in Iraq's neighbors to help with reconstruction efforts is an important priority. American policy should also continue to encourage and where necessary assist Iraqi institutions in building sufficient capacity for prioritizing, planning, and executing their own reconstruction projects.

Question. What are your views on the responsibility of the Iraqi Government to assume the cost of training, equipping, and operations for its security forces?

Answer. An important component of our strategy centers on the Iraqi Government successfully assuming control of the entire range of tasks necessary to organize, train, and equip its security forces. From DOD's perspective, this includes helping Iraqi institutions better formulate a defense strategy and acquisition policy that is sustainable and prudent in the absence of significant external assistance.

Question. What are your views on the responsibility of the Iraqi Government to share the cost of combined operations with MNF-I forces and stability programs throughout Iraq?

Answer. It is my understanding that the U.S. Government has not requested that Iraq contribute to the costs of MNF-I operations. It will be important for Iraq to organize, train, equip, and fully support its forces in order to assume responsibility for its own security. It is my view that the U.S. Government should encourage Iraq to focus on the development and support of its security forces.

Question. What are your views on the responsibility of the Iraqi Government to share the increased operating and facilities costs associated with repositioning or withdrawal of U.S. forces in accordance with the U.S.-Iraqi security agreement?

Answer. I understand that under the new U.S.-Iraqi Security Agreement, there is no Iraqi responsibility to pay costs associated with repositioning or withdrawal of U.S. forces. In order to best advance our interests, I believe Iraq's internal resources are best applied in the development and support of its own security forces.

AFGHANISTAN

Question. In your view, what should be our strategic objectives in Afghanistan?

Answer. The administration is considering this question as part of its ongoing Strategic Review of Afghanistan and Pakistan. I believe that America's most enduring interest in the region is preventing Afghanistan from devolving to a safe-haven from which terrorists can attack the United States or our allies and partners. If confirmed, I expect to support the Department's efforts in this critical challenge, which requires urgent and sustained attention.

Question. What changes, if any, would you recommend to our current strategy in Afghanistan?

Answer. The administration's Afghanistan/Pakistan strategy review is ongoing, and I am confident that it will identify any needed changes. My own view is that achieving our strategic objectives in Afghanistan requires a regional perspective; for example, Pakistan is key to the future of Afghanistan and vice-versa, and working with Pakistan, India and others in the region is likely to be essential to success in Afghanistan. More broadly, I believe that the United States should work with Afghanistan and our coalition partners to develop and pursue a more integrated and comprehensive approach to security, economic development, and governance. We must harness all of the instruments of national power and persuasion to be successful. It is imperative that we improve coordination and cooperation between Afghanistan and its neighbors, so that greater unity of effort is achieved among our coalition partners, international institutions, and the Government of Afghanistan.

Question. Do you believe there is a need to develop a comprehensive civil-military plan for Afghanistan, akin to that used in Iraq?

Answer. Yes, and as noted above I believe that such a plan must consider Pakistan and other key players in the region.

Question. General David McKiernan, USA, Commander of the NATO International Security Assistance Force, and Commander U.S. Forces—Afghanistan, has identified a need for four additional combat brigades and support units in Afghanistan, equaling up to 30,000 additional troops. President Obama has approved the deployment of an additional 17,000 U.S. troops to Afghanistan by late spring and summer of this year. General McKiernan has said that these additional forces will provide him what he needs for the coming months, but additional forces will still be needed to meet fully his initial request.

Do you support General McKiernan's request for additional forces?

Answer. I agree with President Obama and Secretary Gates, who have both consistently stated that they believe the deteriorating security conditions in Afghanistan required the deployment of additional U.S. and international forces. I have not been fully briefed on the details of current operations and threat assessments, or internal deliberations associated with the ongoing Afghanistan/Pakistan strategy review. If confirmed, I look forward to assisting the USD(P) and others to assess the appropriate level of military forces required. I expect a critical component of these deliberations will concern the right balance between American, allied, and Afghan forces. Balancing the demand for additional forces while ensuring that the military is ready for other contingencies is one of the Department's key challenges.

Question. If so, how should the Department support combat brigade increases in Afghanistan, in advance of the National elections?

Answer. The President has approved the deployment of more than 17,000 additional U.S. forces to Afghanistan to meet urgent security needs, particularly in the volatile southern provinces, including the critical necessity to train additional Afghan National Security Forces (ANSF). My understanding is that these forces will arrive in Afghanistan in advance of the presidential election in August. It is also my understanding that the administration is looking to our allies and partners to provide additional forces to ensure security during the elections as well as the success of the ANSF training mission. To my knowledge no decision has been made on the deployment of additional U.S. combat brigades beyond the 17,000 additional U.S. forces already planned.

Question. If confirmed, would you support drawing down U.S. forces in Iraq faster or redirecting to Afghanistan combat brigades already slated to replace brigades in Iraq in order to meet General McKiernan's request?

Answer. If confirmed, I would work closely with the USD(P), Joint Staff, and the Services to help ensure that DOD are carefully assesses and addresses risks in both theaters and prudently managing our military commitments, operational readiness, and stresses on the force.

Question. If confirmed, would you support the temporary extension of combat brigades already deployed to Afghanistan? Would you support the accelerated deployment of combat brigades slated to deploy later this year to Afghanistan?

Answer. If confirmed, I expect to support the USD(P) and Secretary of Defense in providing guidance that ensures deployment lengths of the combat brigades in Afghanistan strike an appropriate balance between meeting our commanders' operational requirements and maintaining the health and readiness of our forces.

Question. The goal for increasing the size of the Afghan National Army (ANA) has been revised from 68,000 to approximately 134,000 soldiers.

In your view, should rapidly expanding the number of U.S. trainers to accelerate the expansion of the ANA be a top priority in Afghanistan?

Answer. Building an effective, broadly representative, and respected ANA requires significant resources, and in my view must be a top priority. It is important that we look closely at the forces required for security in Afghanistan, and I understand that the ongoing Afghanistan/Pakistan strategy review is doing so. If confirmed, I will support the USD(P) and Secretary of Defense in providing oversight and guidance that ensures that there are the right numbers of trainers, mentors, and advisors with sufficient resources to accomplish their mission.

Question. What recommendations, if any, do you have for encouraging or enabling our coalition partners to provide more training team personnel to embed with ANA units?

Answer. In my view, helping the Afghan National Security Forces develop the ability to assume primary responsibility for security inside Afghanistan should be at the center of our long-term strategy. The United States and NATO have assumed a long-term commitment to develop Afghan forces that can eventually take the lead for security in Afghanistan. If confirmed, I look forward to supporting the Department's efforts to encourage our coalition partners to deliver on their commitments to provide training team personnel.

Question. One of the main threats to U.S. and coalition forces in Afghanistan comes from cross-border attacks by the Taliban and extremist militants who find safe haven in Pakistan's border regions.

What steps in your view need to be taken to eliminate or mitigate the threat to Afghanistan's security posed by Taliban and other extremist militants hiding out across the Afghan-Pakistan border?

Answer. In my view, Afghanistan and Pakistan are in many respects a single theater of operations, and both President Obama and Secretary Gates have cited the need to eliminate the terrorist sanctuary in the border regions of Pakistan. This sanctuary poses a potential threat not only to Afghanistan, but to the region and indeed to the United States. Clearly however, there is no purely military solution. The United States must define and resource an integrated strategy to promote development and prevent terrorism across the Afghanistan-Pakistan border region, and I understand that this is a focus of the ongoing strategy review. If confirmed, I intend to work closely with my DOD and interagency colleagues in accordance with the results of the strategy review.

Question. Would you agree that it is possible that developments within Afghanistan could lead to improvements in Afghanistan's security irrespective of developments in Pakistan's border areas?

Answer. I agree that many of Afghanistan's challenges are internal. This is true of certain insurgent activities, the problem of warlords, poppy cultivation and narcotics production, and general criminality. However, I believe that we have learned from years of conflict that insurgent and terrorist safe-havens in Pakistan and illicit cross-border activity must also be addressed to establish sustainable security in Afghanistan.

Question. The ANA has shown itself to be effective, well-motivated, and respected by the Afghan people.

If confirmed, would you support giving the ANA the lead in stopping cross-border incursions, either by transferring the mission of patrolling the border to the ANA or by bringing the Afghan Border Patrol under the ANA?

Answer. I agree that the ANA has generally and increasingly shown itself to be effective, well-motivated, and respected. Clearly securing the border areas from cross-border incursions and illegal smuggling is an important element of a success-

ful long-term strategy. The issue of command relationships between the Afghan Border Patrol and ANA is an area that I have not examined in detail, and if confirmed, would need to examine more closely.

Question. The cultivation of poppies and trafficking of opium has reached alarming proportions in Afghanistan. Some estimate that over 50 percent of Afghanistan's gross national product is associated with the illegal opium trade and that Afghanistan is at risk of failing as a nation state. Coalition strategies for countering the opium trade have not been effective to date.

In your view, what strategy would be most effective in reducing opium production and trafficking in Afghanistan?

Answer. Opium traffic continues to distort the Afghan economy, corrode the judicial system, and exacerbate corruption and criminal violence. In my view, countering the opium trade must include a nuanced and fully resourced coalition and Afghan strategy, including crop substitution and alternative livelihoods, interdiction and eradication, judicial reform, better law enforcement and intelligence sharing, and rural economic development and public information.

Question. What should the role of the U.S. military forces be in the counterdrug program in Afghanistan?

Answer. I understand that in the past year U.S. forces have been provided with new rules of engagement regarding counternarcotics activities, but I have not had the opportunity to review them in detail nor to assess their effectiveness. If confirmed, I look forward to reviewing the effectiveness of these policies and to discussing them further with the USD(P) and other officials.

Question. What is the appropriate role for coalition nations and the larger international community in effectively addressing the counterdrug challenge in Afghanistan and the surrounding region?

Answer. I believe it is critical for the international community to play a greater role across the full range of initiatives and operations designed to help the Government of Afghanistan strengthen Afghan institutions, ranging from the judicial and law enforcement system, to its intelligence service, and the Afghan National Security Forces, so that it can better take the lead in combating narcotics in Afghanistan.

Question. What are the main challenges facing the U.S. and international community's reconstruction and development efforts in Afghanistan?

Answer. In my view, high levels of violence in Afghanistan constitute the most immediate and pressing challenge to reconstruction and development efforts, which must feature prominently in any successful long-term strategy. The Afghan people have suffered through more than a generation of war, and the country's development challenges are immense. The majority of Afghans make their living from farming, yet extensive drought and failing agricultural infrastructure create openings for opium production to supplant the legal agricultural economy. While Afghanistan has seen improvements in health care in recent years, life expectancy remains below 45 years while more than half of Afghan children suffer from poor nutrition and disease. While progress has been made towards primary education in Afghanistan, fewer than half of adult males and only one in eight females can read, impeding the professionalization of the Afghan government and security forces and limiting economic growth.

Question. If confirmed, what would your priorities be for addressing those challenges?

Answer. If confirmed, I look forward to aiding the USD(P) in working with inter-agency partners to help implement an improved strategy that can effectively engage our coalition partners and the international community to advance reconstruction and development efforts in Afghanistan.

Question. What changes, if any, would you recommend for the strategy, organizational structure, or resourcing of Provincial Reconstruction Teams in Afghanistan?

Answer. I believe that Provincial Reconstruction Teams (PRTs) have been critical to the development work undertaken in Afghanistan and Iraq in recent years. If confirmed, I look forward to discussing the committee's concerns and ideas on the use of PRTs.

PAKISTAN

Question. What is your view of the current state of U.S.-Pakistani security relations? What steps, if any, would you recommend to improve these relations?

Answer. Pakistan is a critical ally in the long-term struggle against extremism and terrorism. A confluence of overlapping security concerns—including presence of al Qaeda terrorists and Taliban-affiliated extremists, United States and NATO lines of communication to Afghanistan, nuclear weapons, and an unstable economic envi-

ronment—make Pakistan a key national security interest for the United States. Pakistan and the United States share mutual interests in these areas and it is essential that we continue to build and cultivate a long-term relationship built on respect and trust regarding security and other overlapping interests. If confirmed, I look forward to learning more about all aspects of ongoing U.S.-Pakistan relations and helping the USD(P) shape effective policies for engagement by the U.S. military, the State Department, and other agencies.

Question. What is your understanding and assessment of the efforts by the Pakistani Government to counter militant groups along the Afghan-Pakistan border and to fight terrorism in general?

Answer. Any enduring solution to the challenge of defeating the terrorist and cross-border insurgent groups that threaten Afghanistan, Pakistan, and the international community requires Pakistan's strong support. While the Pakistani government has conducted several military operations against militants in border areas, the region remains a sanctuary for al Qaeda and Taliban-affiliated groups. If confirmed, I expect to assist the USD(P) in overseeing and reviewing the development of options to improve Pakistani counterterrorism and counterinsurgency capacities.

Question. In your view, is the Pakistani Government doing enough to combat these threats? If not, what more should it be doing?

Answer. While I have not been briefed in detail on any assessments of Pakistan's willingness and ability to combat these threats, I believe that any long-term success in countering them requires extensive and sustained attention by various elements of Pakistan's government. If confirmed, I look forward to assessing ways in which the United States and Pakistan can work better together to combat these shared threats.

INDIA

Question. The attacks in Mumbai raise questions about what more might be done to help India guard against and respond to terrorist incidents and underscore the fragile nature of the relationship between India and neighboring Pakistan.

What is your view of the current state of U.S.-India military-to-military contacts?

Answer. It is my understanding that the U.S.-India military-to-military relationship is generally quite positive and is improving.

Question. What do you believe the United States should do to assist the Indian Government in the prevention of and response to terrorist events?

Answer. India is the world's largest democracy, and a strong and healthy U.S.-Indian partnership is an important American interest. The recent attacks in Mumbai have only underscored our shared interest in preventing and responding to terrorism. If confirmed, I will support the USD(P) in considering any additional measures, and in working with the State Department to carefully consider any requests for counterterrorism assistance from India.

Question. In your view, what impact has this rise in tensions between Pakistan and India had on the stability of the South Asia region, generally, and on the prospects for security in Afghanistan?

Answer. India, Pakistan, and Afghanistan are linked by history, culture, language, and trade, and progress in Afghanistan and broader regional stability cannot be achieved without the cooperation of all three. It is in America's national interest to play a constructive role in helping defuse any tensions and to help derive from the tragic attacks in Mumbai an opportunity for further cooperation between three of America's important allies.

FUTURE OF NATO

Question. What are the greatest challenges and opportunities that you foresee for NATO over the next 5 years?

Answer. Without question, the job of adapting our transatlantic alliance relationships to meet 21st century challenges is going to be arduous. The President and the Secretary of Defense have stressed our country's stakes in a strong, mutually supportive NATO alliance. To rebuild NATO solidarity, we need, first and foremost, a broadly agreed way-ahead for achieving durable progress on Afghanistan, especially where ISAF operations have been impeded by national caveats or the dearth of civilian expertise for critical missions. Closer to home, the alliance faces a more assertive Russia, continued instability in part of the Balkans and among former Soviet republics, and new concerns over cyber security and global climate change. My hope is that upcoming NATO summit in Strasbourg will give a strong boost to the drafting of a new strategic concept—one that helps to illuminate emerging threats and opportunities, as well as the capabilities required for effective joint action and ways for improving unity-of-action between NATO and the European Union.

Question. Do you envision further enlargement of NATO, beyond Albania and Croatia, within the next 5 years?

Answer. As the President and his national security team have stressed, NATO enlargement should continue so long as new candidates are democratic, peaceful, and willing to contribute to common security. Precisely which countries and within what applicable timeframe NATO would undertake further enlargement are important questions which the administration will need to address in close consultation with Congress and our allies. It is important that each NATO aspirant should be judged on its individual merits and progress in implementing political, economic, and military reforms.

Question. What more can the United States do to encourage NATO members to develop the capabilities and provide the resources necessary to carry out NATO missions in Afghanistan and elsewhere?

Answer. President Obama and Secretary Gates have both stressed the need for the United States and NATO to invest more in its nonmilitary instruments of national power. Many of our NATO allies have unique civilian capabilities that can enhance the overall effort in Afghanistan. The questions that both we and they now face are how best to mobilize these resources and target them to maximum positive effect. Also, as previously noted, forging a shared strategic view of the emerging threat environment and updating NATO's strategic concept from both a military and civilian governance perspective will be critical to success in Afghanistan.

NATO–EU RELATIONS

Question. A potential challenge facing the United States and NATO in the months and years ahead is the European Union's (EU) implementation of its European Security and Defense Policy (ESDP), that is, an EU capability to conduct military operations in response to international crises in cases where "NATO as a whole is not engaged." At the same time, NATO and EU are working alongside each other in addressing a number of common security challenges, including police training in Afghanistan and crisis management in Kosovo.

Are you concerned that the EU could assume a competing role, rather than a complementary role, to the NATO alliance?

Answer. As Under Secretary Flournoy indicated during her confirmation process, the NATO–EU relationship should ideally be complementary. For defense matters and crisis management, NATO is the preferred vehicle for cooperation between our European allies and the United States in responding to a shared security challenge. At the same time, the EU's great strength lies in its ability to project economic power and political influence in a way that helps to attenuate conflict. While the current economic crisis has greatly stressed the EU's solidarity and its outreach to the east, its "soft power" role will clearly be critical over the long-term. Moreover, because both NATO and the EU draw largely from a single pool of national capabilities, cooperation is extremely important.

Question. What steps do you believe that the United States and NATO should take to ensure that ESDP is implemented in a way that strengthens the alliance?

Answer. Given the growth and diversity of ESDP-related activities in recent years, to include the EU's current anti-piracy operations off the coast of Somalia, we must explore every possible angle of NATO–EU collaboration at the operational level. I believe that priority should be given to promoting good communications and a common operating picture between NATO, its allies, and EU partners.

Question. What is your view of the future of NATO–EU relations in areas relating to security, defense, and crisis management?

Answer. As suggested above, both NATO and the EU have important roles to play in meeting future security, defense, and crisis management challenges. From an alliance perspective, it is important for all U.S. interagency partners to take a clear-eyed view of the entire range of current EU-activities—from civilian policing to military border control or other missions—to identify both areas of duplication and where closer NATO–EU coordination is required.

ENGAGEMENT POLICY

Question. One of the central pillars of our national security strategy has been military engagement as a means of building relationships around the world. Military-to-military contacts, Joint Combined Exchange Training exercises, combatant commander exercises, humanitarian demining operations, and similar activities were used to achieve this goal.

If confirmed, would you support continued engagement activities of the U.S. military? If yes, would you advocate for expanding U.S. military-to-military engagement? If not, why not?

Answer. Yes. If confirmed, subject to guidance provided by USD(P) and the Secretary, I will support a policy of continued U.S. military-to-military engagement, and as appropriate, given opportunities and resource constraints, expanding this engagement. The emerging security environment requires that we engage with our partners and allies around the world, and work to build productive relationships with many states for which our past military-to-military engagements have been limited or absent entirely.

Question. Do you believe that these activities contribute to U.S. national security?

Answer. Yes. I believe military-to-military contacts contribute to U.S. national security in a variety of important ways. Such activities can help to strengthen the capacity of partner nations to counter terrorism and other transnational threats, both within and beyond their borders, thereby potentially relieving stress on U.S. forces. They can help harmonize nations' views of common security challenges. Military-to-military activities can also help safeguard investments made by other U.S. assistance programs. Finally, and very importantly, when performed effectively, military-to-military activities should show by example how military forces can act effectively while respecting human rights and civilian control.

STABILITY OPERATIONS

Question. The U.S. experience in Iraq and Afghanistan has underscored the importance of planning and training to prepare for the conduct and support of stability operations in post-conflict situations.

In your view, what is the appropriate relationship between DOD and other Federal agencies in the planning and conduct of stability and support operations in a post-conflict environment?

Answer. Success in stability operations in a post-conflict environment requires integrating the efforts of civilian and military organizations in all aspects, from planning through execution. It is important for civilian agencies to lead in areas such as fostering political reconciliation, building accountable and legitimate institutions of government, restoring public infrastructure, and reviving economic activity. Military forces are best suited to helping provide a safe and secure environment and to assist in building accountable armed forces. Over the last several years, the U.S. military has learned many hard lessons, and if confirmed, I will work closely with the USD(P), military leaders and other U.S. Government agencies to ensure that the Department properly institutionalizes adaptation to better prepare for future challenges.

Question. What lessons do you believe the Department has learned from ongoing operations in Iraq and Afghanistan with respect to achieving success in post-conflict stability operations?

Answer. I believe that the Department has learned many important lessons, including the following: Improved interagency planning of operations is critical, and must start early; because the situation on the ground will change, strategies and plans must be adapted over time; DOD must retain significant capabilities for stability operations, and other agencies and departments must build increased capacity to support these operations; building partner capacity is an essential task which requires significant leadership attention and resources; engaging allies and other coalition partners to contribute, while often challenging, is essential; and it is critical that DOD and other departments/agencies better institutionalize wartime lessons, and fully resource those capabilities and organizational innovations that have proved critical to success in stability operations.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations. These include the global train and equip authority (section 1206) and the security and stabilization assistance authority (section 1207).

What are our strategic objectives in building the capacities of partner nations?

Answer. I agree with Secretary Gates and others who have stated that the future security environment is likely to present more threats stemming from the consequences of state weakness than from displays of state strength. As the international system continues to become more complex and increasingly globalized, tensions arising from water and food scarcity, economic displacement, demographic shifts, and competition over resources are likely to present opportunities for terrorist and insurgent groups to undermine state, regional, and international stability. It is therefore critical that U.S. foreign policy support efforts that strengthen bilateral relationships; increase U.S. access and influence; promote militaries that respect human rights, civilian control of the military and the rule of law; and build

capacity for common security objectives. In addition to promoting regional and global security, enhanced partner capacity reduces the risk of future military interventions and reduces stress on U.S. Armed Forces.

Question. What is your understanding of the purpose of the section 1206 global train and equip authority? What is your assessment of the implementation of the global train and equip program?

Answer. It is my understanding that section 1206 was created to provide increased ability to build partner capacity than the more traditional routes of security assistance. Under law, it has two purposes: to build the capacity of a country's ability to conduct counterterrorism operations, and to help support stability operations where U.S. forces are participating. While I have not been involved in implementation of section 1206, I understand that the program enjoys strong support from embassies and combatant commands (COCOMs). If confirmed, I will assist the USD(P) and the Secretary in fully assessing how well this authority is working and whether it meets congressional intent.

Question. What is the relationship of the global train and equip authority to other security assistance authorities, such as counternarcotics assistance and foreign military financing? What should be done to ensure that the global train and equip authority does not duplicate the efforts of these other assistance programs?

Answer. It is important that both the Defense and State Departments work together to avoid duplication of effort among these important activities. The global train and equip authority fills two specific legal requirements: to build capacity for counterterrorism and for stability operations where U.S. forces are a participant. Foreign military financing serves a broader set of diplomatic and foreign policy objectives, to include improving bilateral relations, encouraging behaviors that advance U.S. interests, increasing access and influence, and building capacity where host-nation and U.S. interests overlap.

Counternarcotics authorities are designed to allow DOD to support U.S. or other government efforts to counter the flow of narcotics globally. If confirmed, I would support the Department and any interagency assessment of potential overlaps and work to ensure DOD counternarcotics programs are focused on supporting U.S. and other agency efforts to counter the flow of narcotics.

Question. What is your understanding of the purpose of the security and stabilization assistance authority (section 1207)? What is your assessment of how this authority has been utilized?

Answer. I understand that section 1207 was designed to help the State Department's Coordinator for Reconstruction and Stabilization to build the capacity to become more operational. It was designed to bring civilian expertise to security, stabilization, and reconstruction missions, and complement existing U.S. military capabilities. While I have not been involved in implementation of section 1207, I believe that the program has been useful in supporting a more integrated approach to security, stabilization, and reconstruction challenges.

Question. Secretary of Defense Gates has called for an expansion of the Government's resources devoted to instruments of non-military "soft power", i.e., civilian expertise in reconstruction, development, and governance.

Do you agree that there is a need to expand the Government's resources devoted to the ability of civilian departments and agencies to engage, assist, and communicate with partner nations?

Answer. Yes. I agree strongly with President Obama and Secretary Gates that the United States should strengthen non-military instruments of statecraft.

Question. In your view, what should be the role of DOD, vis-à-vis the civilian departments and agencies of the Government, in the exercise of instruments of soft power?

Answer. Generally, DOD's role should be to support, not lead, in the exercise of "soft power." However, the Department plays an important role in helping to promote—through planning, exchanges, exercises, operations, and bilateral defense relationships—the conditions that enable these instruments to be applied successfully.

Question. Which agency should have the lead in setting U.S. Government security assistance policy, the Department of State or DOD?

Answer. The State Department should have the lead in setting U.S. foreign policy and foreign assistance priorities broadly, including security assistance. DOD has critical roles to play, however, in informing, developing, and implementing such programs in an effective and timely manner. In my view, strong interagency processes and relationships are vital to ensure successful security assistance policies.

RUSSIA

Question. What is your assessment of the current U.S.-Russian security relationship?

Answer. Russia's recent aggressive external behavior is a source of deep concern. Of greatest concern is a growing pattern of Russian pressure, and, in some cases, aggressive action against sovereign states on its borders, most visibly including Georgia. Nevertheless, I believe that there is an opportunity to pursue a more constructive relationship with Russia on a range of issues including strategic arms control, non-proliferation, and counterterrorism.

Question. What do you believe are appropriate objectives for U.S.-Russian security relations, and what do you believe are the areas of common interest between the United States and Russia in the security sphere?

Answer. As President Obama noted, it is in no one's interest to see U.S.-Russian relations return to a Cold War posture. U.S. and Russian interests clearly overlap in such key areas as strategic arms control, non-proliferation (including North Korea and Iran), counterterrorism, Afghanistan, and counternarcotics. Ultimately, I believe we should work to create the conditions that make clear that stable, democratic neighbors on Russia's borders are in Russia's own interest.

Question. In your view, what policy steps should DOD take to improve security relations with Russia? For instance, would you support increased military-to-military relations and exchanges with Russia?

Answer. I believe that military-to-military and other exchanges with Russia are generally beneficial. If confirmed, in consultation the State Department as well as with Congress, I would assess areas where greater cooperation might be possible.

Question. Are there common security issues that you believe would best be addressed jointly by the United States and Russia, or which cannot be adequately addressed without Russia's cooperation?

Answer. U.S.-Russia cooperation is essential in many areas of importance to the United States, including strategic arms control and nonproliferation including policies toward North Korea and Iran. Such cooperation is highly desirable on many additional issues, including counterterrorism, counternarcotics, counterpiracy, and Afghanistan. To cite one example, Russia is already cooperating with NATO in Afghanistan by recently allowing the transit of nonlethal equipment through its territory for ISAF.

Question. Would you support any joint development or other cooperative programs with Russia?

Answer. If confirmed, I will support the USD(P) in exploring the potential for the Joint Data Exchange Center and additional cooperative programs with Russia.

IRAN

Question. Do you believe it would be in the U.S. interest to engage Iran in a direct dialogue to promote regional stability and security?

Answer. I support President Obama's view that after careful preparation, the United States should be willing to pursue direct diplomacy with Iran. Furthermore, I fully support the President's view that we should not take any options off the table and that engagement has an important role to play in our efforts to prevent Iran from acquiring nuclear weapons and end their support for destabilizing activities and terrorism in the region.

Question. Do you believe it would be in the U.S. interest to engage Iran in a direct dialogue regarding the narcotics problems in Afghanistan?

Answer. I understand that this issue is being examined as part of broader inter-agency policy reviews on Iran and Afghanistan. My own view is that it is in the U.S. interest to engage Iran on Afghanistan security issues including narcotics, and to do so largely through multilateral exchanges.

Question. What more do you believe the United States and the international community could be doing to dissuade Iran from pursuing a nuclear weapons program? Specifically, what actions do you believe that DOD ought to undertake to support diplomatic efforts to dissuade Iran from pursuing a nuclear weapon?

Answer. The United States has not yet brought to bear all the elements of statecraft to deal effectively with this issue. The use of tough, direct, and principled diplomacy, working with our other international partners and allies, can increase the chances of making useful inroads. Helping to bring about auspicious conditions in the region is critical to generating leverage and therefore to success. Therefore I believe that DOD should continue developing the ongoing multilateral cooperation with the Gulf Cooperation Council countries and other allies in the region, in support of the State Department's diplomatic initiatives.

SYRIA

Question. Do you believe it would be in the U.S. interest to engage Syria in a direct dialogue regarding regional security and stability?

Answer. I understand that the administration is engaged in a review of its Syria policy. The Department of State should take the lead on any diplomatic initiatives with Syria. I agree with the President's view that Syria is best engaged in the context of an aggressive regional diplomatic approach.

SAUDI ARABIA

Question. What is your assessment of the current state of U.S.-Saudi security relations and defense cooperation activities? What changes, if any, would you recommend in this relationship?

Answer. Saudi Arabia is one of our most important relationships in the Middle East. The United States continues to invest major efforts into our security assistance programs with the Ministry of Defense and Aviation (MODA) and Saudi Arabian National Guard (SANG). If confirmed, I will support the Department's efforts in coordination with State Department colleagues to encourage the Saudis to develop better ways and means to deter Iranian aggression, protect the Kingdom's critical infrastructure, enhance maritime security, enhance ballistic missile defense, counterpiracy, and conduct counterterrorism operations. I will also look for opportunities to increase Saudi support for multilateral security activities among GCC countries, to include regional air and missile defense and maritime security efforts.

CHINA

Question. China is viewed by some in the United States as a potential threat and by others as a potentially constructive international partner that should be welcomed and integrated into the international economic and political community.

To what extent do you believe the policies and actions of the United States and other major regional and international actors will affect the direction in which China develops, and the extent to which it becomes a cooperative partner or a competitor of the United States?

Answer. As Secretary Gates noted in a recent speech, "China is a competitor but not necessarily an adversary, and there is no reason for China to become an adversary." Without question, China's sustained rise over the past decade is due to its progressive integration into the global economy. While the ultimate destination of the Chinese people is for them to decide, I believe that the United States and other countries, both in East Asia and beyond, can exert a positive influence upon the direction of China's development. Indeed, no country has done more to assist, facilitate, and encourage China's development and international integration than the United States. That alone provides no assurance of China's willingness to play the role of constructive partner, but it does give both sides a clear appreciation of the stakes involved in maintaining a reasonable working relationship on a wide range of issues, including first and foremost in dealing with the current economic crisis.

Question. What do you believe are China's political-military objectives regarding Taiwan, the Asia-Pacific region, and globally?

Answer. I agree with the view that the overriding objectives of China's leaders appear to be to ensure the continued rule of the Chinese Communist Party, continue China's economic development, maintain the country's domestic political stability, defend China's national sovereignty and territorial integrity, and secure China's status as a great power. Within this context, preventing any moves by Taipei toward de jure independence is a key part of Beijing's strategy. Within each dimension there are both challenges and opportunities for the United States that will continue to deserve priority attention.

Question. What do you see as China's objectives for its military modernization program and steady increases in defense spending?

Answer. The pace and scale of China's military modernization, coupled with the lack of transparency surrounding both capabilities and intentions, are a source of concern for the United States as well as for its allies and the region more broadly. I believe that the United States should continue and expand engagement efforts to fully comprehend the future direction of China's programs in order to reduce the potential for miscalculations and build mutual trust. At the same time, we must strive for a prudent level of defense preparedness so as to ensure we are able to protect U.S. national interests and fulfill our alliance responsibilities.

Question. What is your view of the U.S. policy of selling military equipment to Taiwan, despite China's objections?

Answer. U.S. policy on arms sales to Taiwan is based on the 1979 Taiwan Relations Act, which provides that the United States will make available to Taiwan defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability. That policy has contributed to peace and stability in the region for nearly 30 years and is consistent with the long-standing U.S. calls for peaceful resolution of the Taiwan issue in a manner acceptable to the people on both sides of the Taiwan Strait. I believe our arms sales have been carried out in a responsible manner.

Question. In its 2008 Report to Congress, the U.S.-China Economic and Security Review Commission concluded that China is asserting various excessive claims of sovereignty, including maritime, air and space, and also concluded that these claims have negative implications for the United States. Further, the Commission concluded that more must be done to ensure that China's rapid expansion of nuclear power does not result in the decline in safety or an increase in proliferation of nuclear weapons technology or expertise.

How should the United States respond to excessive claims of sovereignty by China?

Answer. The United States has a longstanding policy on Freedom of Navigation, and as recent events relating to the USNS *Impeccable* have demonstrated, does not acquiesce to excessive maritime, air, or space claims that restrict navigation and overflight rights under customary international law (as reflected for example in the U.N. Convention on the Law of the Sea). In addition to asserting U.S. rights, I believe the United States should work with other countries that have a stake in this issue to engage China.

Question. What do you believe should be the role of DOD, if any, in helping to ensure that China's nuclear power industry does not contribute to the proliferation of nuclear weapons in the region?

Answer. The Obama administration has reiterated that preventing the proliferation of WMD and delivery systems, along with related technologies and materials, is a key goal for the United States. I believe that DOD should work in the interagency process to ensure that any proliferation concerns relating to China including its nuclear power industry are expressed to the Chinese Government in appropriate forums, and should similarly support the development of appropriate interagency responses in the event that China takes steps that do contribute to proliferation.

Question. Do you believe any changes in the quality or quantity of military-to-military relations with China should be made? If so, what changes and why?

Answer. If confirmed, I would look closely at exchanges with China's armed forces at all levels and across a range of issues, including the recently opened dialogue on nuclear policy and strategy, which I understand is a priority for Secretary Gates. My general sense is that more can be done to improve the U.S.-China military-to-military relationship, both in terms of the quality and the quantity of exchanges between the armed forces of our countries. In general, I believe we should look to engage in a wide range of areas where we can work with China on priorities that improve transparency, reduce risks of miscalculation, and advance stability, both regionally and globally.

Question. On March 8, 2009, five Chinese ships aggressively maneuvered in dangerously close proximity to USNS *Impeccable*, a U.S. ocean surveillance vessel operated by the Military Sealift Command conducting routine operations in the South China Sea.

How do you think the U.S. Government should respond to provocative actions of this kind and what actions should the United States take to try to prevent similar incidents in the future?

Answer. As noted above, the United States has a longstanding policy on freedom of navigation, consistent with customary international law and as reflected in the U.N. Convention on the Law of the Sea. I believe the United States should clearly assert and exercise our rights, work with other states with similar interests and perspectives as appropriate, and ensuring effective communication to reduce the risks of accident or miscalculation. I was very pleased by Secretary Gates' statement on March 18 that ". . . based on the diplomatic exchanges that have taken place, since the aggressive acts against the *Impeccable* . . . there won't be a repetition of this [incident]."

JAPAN

Question. Secretary of State Clinton recently signed a U.S. agreement with Japan on realignment of U.S. forces from Okinawa to Guam.

What is your understanding of the key provisions of this agreement and the risks surrounding the likelihood of the move proceeding on the timeline previously established given financial considerations in Japan and the United States?

Answer. My understanding of the Guam International Agreement (“Agreement between the Government of the United States of America and the Government of Japan concerning the Implementation of the Relocation of III Marine Expeditionary Force Personnel and their Dependents from Okinawa to Guam”) is that it was concluded as a means to formalize the accountability and transparency associated with Japan’s eventual transfer of \$2.8 billion for Guam development. The agreement also reiterates Japan’s commitment to build the Futenma Replacement Facility (FRF) on Camp Schwab and surrounding waters in northern Okinawa, and to provide additional financing for development of required facilities and infrastructure on Guam. Both the FRF project in Okinawa and the Guam project are complex challenges, with ambitious target completion dates of 2014.

The realignment of U.S. force posture in East Asia and the Pacific—and in particular the relocation of U.S. forces and their dependents to Guam—is a major focus for the U.S.-Japan alliance at present. I believe that while the timelines are challenging, both sides are committed to timely execution as well as ensuring a quality program.

NORTH KOREA

Question. What is your assessment of the current security situation on the Korean peninsula and the diplomatic efforts to date to persuade North Korea to verifiably dismantle its nuclear weapons program?

Answer. North Korea’s conventional military, WMD, and proliferation activities continue to pose a significant threat to regional peace and security. Also, recent North Korean provocations, including its apparent intent to launch a long-range missile (even if characterized as a satellite launch), are unhelpful to regional stability and relations. Working with our allies and other key parties in the region on diplomatic solutions is an essential element in addressing the totality of security problems on the Korean peninsula, the most vital of which is the denuclearization of North Korea. Likewise, it is essential to maintain the capabilities to deter North Korea’s military threat and proliferation activities. Our strong alliances with South Korea and Japan remain instrumental in this regard. These alliances help maintain the peace and stability that has allowed the wider East Asia region to prosper over the past several decades.

Question. What is your assessment of the threat posed to the United States, its forward-deployed forces, and its allies by North Korea’s ballistic missile and WMD capabilities and the export of those capabilities?

Answer. I believe that North Korea missile and WMD programs pose a serious threat to the United States, our forces, and our allies. This threat has been evidenced recently in North Korea’s announced intention to launch what it refers to as an “experimental communications satellite” in April (long-range ballistic missiles and satellite launch vehicles derive from nearly identical technology). Strong alliances, regional partnerships, and forward military presence remain key means to deal with these threats. U.S. national capabilities, such as ballistic missile defense, are also an essential element in deterring the threat and defending our interests.

Question. In your view, what should be done to maintain or strengthen deterrence on the Korean peninsula?

Answer. The most critical ingredient for effective deterrence on the peninsula is found in the strength of the alliances between the United States and the Republic of Korea, and between the United States and Japan. If confirmed, I would work with DOD and interagency colleagues to continue strengthening these alliances.

Question. In view of recent speculation regarding the possible poor health of North Korean leader Kim Jong-il, what do you believe the United States should be doing now, if anything, to prepare for the possibility of a change in leadership in North Korea?

Answer. The manifestations of sudden change in North Korea could take different forms, including a sudden health crisis or change in leadership in Pyongyang. If confirmed, I will work to ensure that the United States and our allies are capable of addressing sudden onset crises. Fundamentally, our focus should be ensuring we are ready to maintain stability in the region, support defense of the Republic of Korea and Japan, and prevent the proliferation of WMD or other dangerous technologies from North Korea.

Question. If confirmed, would you undertake a review of the status of the efforts to obtain from North Korea remains of U.S. servicemembers who have been missing since the Korean War?

Answer. Yes.

Question. Under what circumstances do you think that such efforts should resume?

Answer. I believe these efforts should resume once appropriate conditions exist that both enable us to carry out the important mission and ensure the safety of our personnel.

REPUBLIC OF KOREA

Question. The alliance between the United States and the Republic of Korea (ROK) is a key pillar of security in the Asia Pacific region. This relationship has gone through periods of inevitable change.

What is your understanding of the current U.S. security relationship with the ROK?

Answer. I believe that the U.S.-ROK alliance remains strong and continues to ensure peace and stability on the Korean Peninsula and in Northeast Asia. In the face of changes in the regional security environment, the United States and the ROK have made great strides in transforming their collective deterrent and defense posture. In particular, the ROK has made major strides in developing its defense capabilities, commensurate with its economic development. Consequently, the alliance remains relevant and capable both for deterring aggression on the peninsula and for addressing regional and global security issues.

Question. If confirmed, what measures, if any, would you take to improve the U.S.-ROK security relationship?

Answer. If confirmed, I would support the realignment of U.S. forces on the Korean peninsula and the return of facilities that our forces no longer require. The United States is also working toward new command and control relationships with Korea and we need to ensure that contingency plans remain appropriate to the situations we face. Additionally, I believe it is important to ensure the U.S. and Korean publics continue to understand the enduring mutual benefits derived from this alliance, and that we work effectively with the Republic of Korea as it plays an increasing role in regional and global security issues commensurate with its economic clout and influence.

Question. What is your view regarding the planned timing of the transfer of wartime operational command to the ROK?

Answer. As Secretary Gates said publicly following his meeting with the Korean Minister of Defense last October, the ROK military forces and U.S. forces are on track to complete the alliance agreement to transition wartime operational control in 2012. This effort will enable the ROK military to take the lead role in the defense of Korea. If confirmed, I will support the efforts of the Secretary, this committee, and others to ensure that the important transition in command relationships is carried out in a manner that strengthens deterrence and maintains a fully capable U.S.-ROK combined defense posture on the Korean Peninsula.

Question. What do you view as the optimal timeline, and major milestones, for consolidating U.S. forces south of Seoul at Camp Humphreys?

Answer. I understand that Camp Humphreys represents an essential part of our joint effort with our ROK allies to reduce the overall U.S. military footprint and consolidate U.S. forces in modern and enduring facilities away from the congested center of Seoul. This realignment of U.S. forces is mutually beneficial, and therefore it is our desire to implement these plans as efficiently as possible. If confirmed, I look forward to working with United States Forces Korea, U.S. Pacific Command, and others in DOD to review the timeline involved.

U.S. AFRICA COMMAND (AFRICOM)

Question. The creation of Africa Command has raised questions about the role of DOD in U.S. development efforts in Africa.

What do you see as the role of AFRICOM in U.S.-African policy and in development and humanitarian engagement?

Answer. The Department of State and USAID lead U.S. foreign policy and development engagements abroad, to include Africa. AFRICOM is intended to promote a coordinated engagement approach to Africa. Ideally, AFRICOM's supporting role should promote national security objectives by working with African states, regional organizations, and the African Union to enhance regional stability and security. Specifically, AFRICOM should help pursue closer U.S. military-to-military relations with African states. If confirmed, I would support DOD's efforts to maintain strong interagency relationships and work with Congress to ensure that AFRICOM assists in advancing U.S. foreign policy and national security objectives.

Question. AFRICOM's leadership has promoted the concept of "active security," with an increased emphasis on theater security cooperation, as a guiding principle of the command.

Are DOD's current security assistance authorities (e.g., section 1206 train-and-equip authority) and funding levels adequate to fulfill AFRICOM's mission? If yes, please explain. If not, why not?

Answer. I have not been briefed in detail on AFRICOM's current and projected requirements to fulfill its mission. If confirmed and if asked to study the matter, I will provide my views to USD(P) Flournoy and if requested the members of this committee.

Question. The Combined Joint Task Force-Horn of Africa (CJTF-HOA) mission appears to have shifted from counter-terrorism to civil and humanitarian affairs since its inception in 2002.

What do you see as CJTF-HOA's primary mission?

Answer. I understand that the CJTF-HOA is designed to support the State Department's and DOD's security strategy in Africa to counter violent extremism, in part through building partner capacity and promoting regional stability.

Question. Do you believe it should continue as an enduring presence? If yes, what recommendations, if any, might you make regarding manpower, resources, and activities?

Answer. If confirmed, I would support the USD(P)'s interaction with the Joint Staff and with AFRICOM to assess this issue, and would aid in efforts to ensure that U.S. security interests in the region are supported by an appropriate, properly balanced and resourced posture to promote long-term stability in the region.

DARFUR

Question. More than 4 years after then-Secretary of State Colin Powell's declaration that genocide was taking place in Darfur, the death toll has continued to climb, the camps for displaced persons have grown more crowded, and humanitarian access to help people in need has diminished in many areas. The member nations of the United Nations have pledged to send 26,000 peacekeepers to Darfur, but have sent less than half that number and has not provided them with the helicopters, vehicles, and other tools to fulfill their mission.

What do you believe is the appropriate role of the United States and, in particular, DOD, in assisting with the deployment and mobility of this peacekeeping mission, given that its creation was largely a U.S. initiative and today is largely funded by a variety of U.S. assistance programs?

Answer. I support President Obama's statements concerning the need to pressure the Sudanese authorities in Khartoum to halt the genocide in Darfur. It is my understanding that both the Defense and State Departments have supported the deployment of African contingents to the U.N. Darfur mission by providing a variety of enablers, to include equipment, logistical expertise, deployment assistance, and airlift.

UNITED NATIONS PEACEKEEPING

Question. The DOD has provided logistics, communications, and headquarters staff to a variety of U.N. peacekeeping missions over the past several years.

In your view, what support, if any, should DOD provide to U.N. peacekeeping missions?

Answer. The U.N. operates peacekeeping forces in a wide variety of venues—from Central and West Africa to the Middle East and the Caribbean—and the United States has important security and humanitarian stakes in the success of these missions. To ensure the best use of DOD's logistics, communications, headquarters staffing, and other forms of enabling assistance, the issue of U.S. support for U.N. field missions is certainly worthy of careful study in close consultation with our State Department colleagues, and subsequently with other U.N. member states.

Question. The United States along with its partners in the G-8 sponsored an initiative to train 75,000 peacekeepers by 2010. This program, known as the Global Peace Operations Initiative (GPOI), is run by the Department of State. DOD has provided varying degrees of support since the program's inception.

In your view, what is the appropriate role of DOD in this program and, more generally, in the training of peacekeepers?

Answer. DOD has long played an important role in the training and equipping of international peacekeeping units. In this regard, I believe that DOD collaboration with State is important to successfully identifying and vetting viable partners, analyzing indigenous capacities, developing sustainable train-the-trainer programs, and promoting self-sufficiency in this critical area so that more nations can more effec-

tively contribute to the increasing demand for skilled peacekeepers around the world.

Question. If confirmed, would you support or oppose an extension of the GPOI program and its mandate beyond its scheduled end date in 2010? Please explain.

Answer. In general, the United States has a strong interest in helping to expand the pool of available peacekeepers worldwide, including those with whom we may need to operate jointly. President Obama has stated his support for continued funding for GPOI. If confirmed, I would do my part to work closely with State Department colleagues as well as Members of Congress to ensure GPOI supports the President's objectives in this area.

SOMALIA

Question. In your view, what should the U.S. policy towards Somalia be and what do you believe to be the appropriate role of DOD in support of that policy?

Answer. Somalia's political turmoil and violence poses not only the specter of continued humanitarian suffering but also a security danger in that it provides a safe haven to violent extremists and, more recently, to pirates who prey upon international shipping routes through the Gulf of Aden. Instability in Somalia is a threat to the region and potentially to the United States and our allies. If confirmed, I will support DOD's efforts to work with the interagency to develop a coordinated U.S. national security policy toward Africa that addresses the U.S. strategic interests in the Horn of Africa, and to determine how DOD can and should best support this policy.

COMBATING TERRORISM

Question. What is your understanding and assessment of the Department's comprehensive strategy for combating terrorism, both at home and abroad?

Answer. The Department's strategy for combating terrorism has three pillars: protecting the homeland, disrupting and attacking terrorist networks, and countering ideological support for terrorism. The strategy includes indirect approaches aimed at building the capacity of partner governments and their security forces as well as direct approaches to defeat terrorist networks. Consistent with existing law, the Department's role within the United States is limited to providing support to civil authorities.

It is my view that the United States needs a more comprehensive and cohesive strategy for combating terrorism. An integrated interagency approach is needed that combines all tools of statecraft, and fully engages allies and international organizations. If confirmed, and as directed, I look forward to working with the Assistant Secretary of Defense (SOLIC & IC) and other colleagues within the Department and across the interagency to undertake a review and assessment of our strategy to ensure it meets the goals of the President and the Secretary of Defense.

Question. How can the Department best structure itself to ensure that all forms of terrorism are effectively confronted?

Answer. While I have not been briefed in enough detail to provide a complete answer, if confirmed and as directed I would welcome the opportunity to work with the Assistant Secretary of Defense (SOLIC & IC) to assist the USD(P) and the Secretary of Defense in evaluating the Department's counterterrorism posture to help ensure that it is appropriately organized to protect and defend against all forms of terrorism.

Question. What changes, if any, would you recommend to the defense intelligence community to ensure optimal support to combating terrorism and other homeland security efforts?

Answer. Timely and accurate intelligence is a vital part of U.S. counterterrorism efforts. If confirmed, I will help the USD(P) continue the close relationship Policy has with the Under Secretary of Defense for Intelligence and the Intelligence Community to ensure intelligence and operations are mutually supportive.

Question. Are there steps the Department should take to better coordinate its efforts to combat terrorism with those of other Federal agencies?

Answer. I expect that there is room for improvement in this area of vital national interest, but because of the sensitive nature of some activities, I do not at present have a comprehensive view. If confirmed, I look forward to developing such a view, and supporting the refinement and implementation of a comprehensive interagency approach to the challenge of combating extremism and terrorism.

Question. The Department and Intelligence Community have determined that some terrorist organizations are beginning to rely more heavily on producing and trafficking narcotics to fund their operations.

Do you believe the DOD should have the lead for the U.S. Government's efforts to combat the nexus between narcotics and terrorism?

Answer. The link between narcotics and terrorism is a serious and growing issue. This requires a comprehensive interagency approach, in which DOD plays an important part. The Department possesses important tools and provides extensive capabilities designed to counter networks that support both terrorist and international criminal organizations. If confirmed, I expect to support the USD(P) and work with ASD(SOLIC & IC) to help review DOD's role in this area and coordinate with other elements of the U.S. Government to determine the best way forward.

WAR ON DRUGS

Question. DOD serves as the single lead agency for the detection and monitoring of aerial and maritime foreign shipments of drugs flowing toward the United States.

What is your assessment of the ongoing efforts of the United States to significantly reduce the amount of drugs illegally entering into our Nation?

Answer. Drug trafficking is a significant and growing threat that affects not only the United States but many of our key partnership including Afghanistan, Colombia, El Salvador, Guatemala, Honduras, Mexico, Nicaragua, and parts of West Africa. Traffickers often employ advanced technology and corrupt governments to facilitate the drug trade. Although the U.S. Government has made progress in coordinating interagency efforts, there is more to be done to counter this threat. If confirmed, I will assist the Department's effort to work with its interagency partners in assessing its efforts to date and develop an improved way forward.

Question. In your view, what is the appropriate role of DOD in U.S. counterdrug efforts?

Answer. The Department's global focus, organization, capabilities, and its ability to act as an honest broker provide a useful complement to law enforcement agencies and make it an effective partner in global counterdrug efforts. DOD brings effective tools and global capabilities to interagency efforts to counter both terrorist and international criminal networks that often utilize the drug trade.

The international community has detected a new narcotics trafficking route from Colombia to Europe via West Africa. In your view, what should be the role of the United States in countering the flow of narcotics to nations other than the United States?

The spread and trafficking of narcotics is a global issue and, like other complex global issues, cannot be effectively addressed by individual states pursuing different and separate strategies. The United States should work with its allies and international organizations to counter the drug trade through coordinated and strategic civil-military efforts.

NUCLEAR POSTURE REVIEW

Question. If confirmed, what role will you play in the NPR?

Answer. If confirmed, I would support the USD(P) in overseeing the NPR. I would expect to engage other senior officials in DOD, as well officials in the Departments of Energy and State in this review, and to consult fully with members of this committee.

DOD'S COOPERATIVE THREAT REDUCTION PROGRAM

Question. Do you think the Cooperative Threat Reduction (CTR) program is well-coordinated among the U.S. Government agencies that engage in threat reduction efforts in Russia—namely, DOD and the Departments of State and Energy?

Answer. I am aware that President Obama has expressed his concern about the need to break bureaucratic logjams that have slowed the progress of CTR and other threat reduction programs in the recent past. If confirmed, I will support USD(P) in giving this matter the urgent attention it deserves.

Question. The CTR program was recently expanded to geographic areas outside the former Soviet Union.

What in your view are the key proliferation concerns that CTR should address outside the former Soviet Union?

Answer. Expanding the geographic reach of the Nunn-Lugar CTR program beyond the former Soviet Union strikes me as an important step toward reducing WMD threats and building global partnerships. I am also aware that recent bipartisan reports, including the report from the Commission on the Prevention of Weapons of Mass Destruction, Proliferation, and Terrorism, have stressed the importance of reducing nuclear threats wherever possible and highlight bioterrorism as a key proliferation concern demanding greater attention. If confirmed, I will look forward to

working closely with Congress, other U.S. Government agencies, and global partners to strengthen our efforts to prevent WMD proliferation and terrorism.

Question. The CTR program has completed or will soon complete the bulk of the scheduled work with Russia.

What in your view is the next step in the U.S.-Russia CTR program?

Answer. I believe that CTR programs in Russia should remain a high priority. Clearly, the Nunn-Lugar CTR program represents an important and very successful relationship between our two countries which has endured even as difficulties have grown in other aspects of our relations. If confirmed, I will support USD(P) in expanding this relationship and the capabilities built through CTR for mutually beneficial purposes to reduce the risks of WMD proliferation and terrorism outside of Russia.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. The United Nations Convention on the Law of the Sea (UNCLOS) is currently pending in the Senate.

What are your views on U.S. accession to UNCLOS?

Answer. I support U.S. accession to the Law of the Sea Convention. It is in America's enduring interest to be at the forefront of promoting the rule of law, including in the world's oceans. Were we to become a party to the Convention it would send a clear signal to the world that we are committed to advancing the rule of law at sea. Additionally under the Convention, we would provide the firmest possible legal foundation for the navigational rights and freedoms needed to project power, reassure our friends and allies, deter adversaries, respond to crises, sustain deployed combat forces, and secure sea and air lines of communication that underpin international trade and our own economic prosperity.

Question. From a national security standpoint, what do you see as the legal advantages and disadvantages to being a party to UNCLOS?

Answer. Were the United States to join the convention, it would provide a seat at the table when rights vital to our national interests are debated and interpreted, including the maritime mobility of our armed forces worldwide. The navigation and overflight rights and high seas freedoms codified in the Convention are essential for the global mobility of our Armed Forces and the sustainment of our combat forces overseas. America has more to gain from legal certainty and public order in the world's oceans than any other country. More than 150 nations are parties to the Convention. By becoming a party, the United States will be better positioned to work with foreign air forces, navies, and coast guards to cooperatively address the full spectrum of 21st century security challenges. More so than at any time in our past, it is in our national interest to lead, and be seen to lead, by helping frame a judicious and prudent approach to better ensure stability at sea.

BILATERAL DEFENSE TRADE COOPERATION AGREEMENTS

Question. Defense trade cooperation agreements between the United States and the United Kingdom and between the United States and Australia are currently pending before the Senate Foreign Relations Committee.

What are your views on the U.S.-U.K. and U.S.-Australia defense trade cooperation agreements?

Answer. While I have not had the opportunity to review these agreements in detail, I support the general objectives of the U.S.-U.K. and U.S.-Australia Defense Trade Cooperation Treaties. I also believe that robust interoperability with these two key allies along with the enhanced protection of our defense articles pursuant to the treaties will further America's national security interests. If confirmed, I will support the USD(P) and the State Department in working with the Senate to resolve any issues related to ratification.

Question. In your view, are these agreements in the national security interest of the United States?

Answer. I have not had the opportunity to review these agreements in detail, but I believe that the intent of the treaties to increase defense trade and interoperability with these two key allies is sound and in the interest of our national security. If confirmed, and if asked, I will review the treaties in detail and support the USD(P) and the Department of State in working with the Senate to address any issues.

ARMS CONTROL

Question. What role do you see for arms control as a means of improving U.S. national security?

Answer. Arms control has been an important element of U.S. national security policy since the Cold War and it remains important today. This is especially so if

such negotiations can help to stave off unwanted competition among states and strengthen our efforts to curb proliferation. Engaging other nations in a process that builds confidence, increases transparency, reduces arsenals, and enhances cooperation has been, and remains, important to our interests. Arms control negotiations can also further progress towards the President's long-term goal of eliminating nuclear weapons.

Question. What are your views on the next bilateral steps to address nuclear weapons issues between the United States and Russia?

Answer. High level engagement between Washington and Moscow will be critical in addressing the wide variety of issues, including (but not limited to) nuclear weapons issues. One key issue that both nations will need to address in the coming months is the expiration of START in December 2009.

Question. What elements of START, if any, do you believe should be retained in any future agreement?

Answer. I believe that the most important element to retain in any future agreement is the extension of essential monitoring and verification provisions contained in the current START. In addition, I believe that the United States should pursue further reductions in strategic warheads, and should encourage Russia to structure its strategic forces in ways that promote predictability, security, and strategic stability.

Question. In the absence of a START extension or successor treaty, what steps would you take to extend, expand, and to verify the Moscow Treaty?

Answer. If confirmed, I would support the USD(P) in determining the best path forward with respect to START, the Moscow Treaty, and any successor agreements.

Question. What is your view of the role of the Nuclear NPT in U.S. national security, and how should it be strengthened or improved?

Answer. The NPT is an important tool for constraining further nuclear proliferation. A first priority in preserving and strengthening the treaty regime is working with our international partners to roll back North Korea's nuclear weapons program and stop Iran from acquiring nuclear weapons. We should also work to strengthen the treaty by encouraging states to adhere to the NPT and to agree to IAEA safeguards inspections. I support President Obama's view that we need to work with our allies, partners, and other nations to achieve a successful outcome in the 2010 NPT review conference. One way to strengthen the NPT regime would be to ensure that any violation automatically triggers sanctions. Others should be examined as well. I believe that success in these efforts will be more likely if the United States sets an example by pursuing negotiated reductions with Russia.

Question. Do you support a Comprehensive Test Ban Treaty (CTBT)?

Answer. Yes, I share the President's assessment that ratifying and ultimately acceding to the CTBT is in America's national security interest, and believe that with careful planning and continued investment that the United States can ensure the safety, reliability, surety, security, and sustainability of our nuclear deterrent under a CTBT.

BALLISTIC MISSILE DEFENSE

Question. Do you agree that any ballistic missile defense systems that we deploy operationally must be operationally effective, suitable, survivable, cost-effective, affordable, and should address a credible threat?

Answer. Yes. I understand that the United States currently has operationally deployed a range of sea-based and ground-based ballistic missile defense systems to protect our forward-based forces, allies, and other friendly nations against short- and medium-range missile threats and to defend the U.S. Homeland against longer-range threats. If confirmed, I would do my part to ensure that further U.S. development and deployment of missile defenses is done in a pragmatic, cost-effective fashion, and is appropriate to the threats of today and the potential threats of tomorrow.

Question. Do you agree that U.S. missile defense efforts should be prioritized on providing effective defenses against existing ballistic missile threats, especially the many hundreds of short- and medium-range ballistic missiles that are currently within range of our forward-based forces, allies, and other friendly nations?

Answer. I agree that the threats posed by short- and medium-range ballistic missiles are growing and deserve priority attention. At the same time, I believe that it is important to defend the U.S. Homeland against potential longer-range threats that may emanate for example from North Korea and/or Iran. If confirmed, I will support efforts to review our BMD programs and consult with Congress to ensure we have an appropriate mix of short-, medium-, and long-range ballistic missile defense capabilities that are responsive to existing and emerging threats to our Homeland, deployed forces, allies, and other friendly nations.

Question. Do you agree that ballistic missile defense testing needs to be operationally realistic, and should include the Operational Test and Evaluation Office, in order to assess operational capabilities and limitations of ballistic missile defense systems, prior to making decisions to deploy such systems?

Answer. Yes. While missile defense testing is not a Policy responsibility, I strongly concur with the view that missile defense testing should be operationally realistic and should involve the Operational Test and Evaluation office as well as our warfighters.

Question. If the United States and Russia could agree on a cooperative approach on missile defense issues, do you believe it would be in the security interest of the United States to pursue such an effort?

Answer. I believe that it is possible that a cooperative approach on missile defense could be in U.S. interests; the answer would depend on the details of such an approach. More broadly, I believe that working with Russia in areas where we have common security concerns can be in the interests of both of our countries. Efforts to cooperate with Russia on missile defense to address the risk of ballistic missile and WMD proliferation go back to the 1990s. I understand that in recent years, the United States has continued to explore missile defense cooperation with Russia. If confirmed, I will review the recent efforts, consult with colleagues in DOD and the State Department, and help recommend an appropriate course of action for possible consideration by the administration and Congress.

CHEMICAL WEAPONS ELIMINATION AND THE CHEMICAL WEAPONS CONVENTION

Question. Do you agree that the Department should plan and budget for the most expeditious elimination of the U.S. chemical weapons stockpile, consistent with safety and security requirements, in order to complete the destruction of the U.S. chemical weapons stockpile as close to the Chemical Weapons Convention (CWC) deadline as possible?

Answer. Yes. I am aware, however, there are competing priorities to balance. Although I have not yet examined this issue in detail, I understand that in 2006, the United States informed the Organization for the Prohibition of Chemical Weapons (OPCW) that it would not meet this deadline, but would accelerate the destruction effort as much as practical. To date, I understand that the Department is on track to destroy 90 percent of the U.S. stockpile by the CWC deadline.

SPACE MANAGEMENT AND ORGANIZATION

Question. What role, if any, do you believe the Principal Deputy Under Secretary of Defense for Policy (PDUSD(P)) should play in the formulation of national security space policy?

Answer. Outer space is becoming a more contested arena for the United States; we cannot take a complacent attitude about the motivations and capabilities of other space-faring actors. As the administration conducts its policy review, I believe that, as directed, the PDUSD(P) should support the Secretary of Defense and the USD(P) in defining U.S. interests, objectives, and options, and in representing DOD perspectives to the interagency. I understand that the recent congressionally-directed Review and Assessment of the Organization and Management of Space in DOD has recommended the development of a National Space Strategy. If this initiative is adopted and I am confirmed, I will consult with Secretary Gates and Under Secretary Flournoy on the desired role of the PDUSD(P) in the development and coordination of any such strategy.

NATIONAL GUARD AND RESERVE ROLE IN HOMELAND DEFENSE

Question. There is current debate about the role the National Guard and Reserves should play in defending the Homeland and in providing support to civilian authorities with responsibility for Homeland Security.

What role do you believe the National Guard and Reserves should have in defending the Homeland as compared to supporting Homeland Security?

Answer. The National Guard and the Reserves—the Army Reserve, the Navy Reserve, the Marine Corps Reserve, and the Air Force Reserve—do indeed have complementary roles to play in defending the Homeland and in supporting Homeland Security. Their allocation for Homeland Security as opposed to Homeland Defense roles is something that deserves careful review. The National Guard and Reserves have extensive competencies and capabilities vital to defending the United States from attack by executing military missions to deter, defend against, and defeat those who threaten the United States and to assisting civil authorities in securing the United States from the threat and effects of natural disasters, terrorism, and other manmade disasters.

HOMELAND DEFENSE

Question. What is your understanding of the difference, or delineation, between the missions of Homeland Defense and Homeland Security?

Answer. It appears that DOD and Department of Homeland Security (DHS) coordination is still a work in progress. The two Departments do indeed have complementary and mutually supporting roles, missions, and responsibilities. DOD is responsible for the military defense of the United States from attack upon its territory at home and securing its interests abroad; its military missions aim to deter, defend against, and defeat those who threaten the United States. For its part, DHS is responsible for leading the Nation's efforts to prepare for, protect against, respond to, recover from, and mitigate against the risk of natural disasters, acts of terrorism, and other manmade disasters; to secure the Nation's borders, ports, and airports; and to ensure that the Federal Government works with States, localities, and the private sector as a true partner in prevention, mitigation, and response. As necessary, and consistent with the law, DOD provides support to DHS in the execution of its missions.

Question. What do you believe are the principal roles and missions of the Department of Defense for Homeland Defense, and how do they relate to the roles, missions, and responsibilities of DHS?

Answer. See preceding answer.

REORGANIZATION OF THE OFFICE OF THE UNDER SECRETARY OF DEFENSE FOR POLICY

Question. What is your understanding of changes that have been approved, if any, to the organization of the OUSD(P)?

Answer. In response to questions from the Senate Armed Services Committee during her confirmation process, now-USD(P) Flournoy stated that she anticipated the need to shift some portfolios to better align the Policy organization with President Obama's and Secretary Gates' policy objectives. My understanding is that Under Secretary Flournoy has advised the Secretary of Defense of potential changes intended to elevate the functions of strategy development and force management to better provide policy guidance for the Secretary, to enhance the oversight and policy role regarding strategic issues (e.g., combating WMD, nuclear deterrence, missile defense, space, and cyberspace issues), and to improve integration of efforts across OSD Policy. It is my understanding that the Secretary of Defense has approved Under Secretary Flournoy's plan to realign these and other selected functions within the organization.

Question. What would be your role in implementing any proposed changes to the organization of the OUSD(P)?

Answer. If confirmed, I would support the USD(P) as directed in implementing changes that support alignment of the Policy organization to the President's and Secretary of Defense's policy objectives, and would provide my assessment of the effectiveness of these changes over time to the USD(P), the Secretary of Defense, and if requested, to the Armed Services Committees.

PRIVATE SECURITY CONTRACTORS

Question. Do you believe DOD and other Federal agencies should rely on contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. In my view, wherever possible it would be preferable for military and where appropriate other government security personnel (U.S., coalition, and/or host nation) to perform such security functions. I understand and appreciate the concerns of Congress on this issue and believe that a comprehensive review of the role of military contractors on the battlefield, and the current and potential future capacities of DOD and other agencies, is needed in order to set the terms for possible future use. I also believe that improved oversight and transparency is needed in how private security contractors are utilized and to establish clear standards regarding accountability, command and control, Rules of Engagement, and personnel policies. If confirmed, I will support the USD(P) in working with civilian and military officials of the Department and others who have responsibility for policy development and employment of private security contractors.

Question. In your view, has the U.S. reliance upon private security contractors to perform such functions risked undermining our defense and foreign policy objectives in Iraq?

Answer. I think it is clear that several high-profile incidents in Iraq involving private security contractors harmed U.S. policy objectives. I understand that in Decem-

ber 2007 DOD and the Department of State agreed on consistent procedures for use of private security contractors in Iraq; moreover, both Departments have been transitioning to greater use of local nationals wherever practical. If confirmed, I expect to work on this issue with the USD(P) and others.

Question. What steps would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. The use of security contractors in any area of combat operations must be fully coordinated among all agencies that employ them. There must be unified procedures and strong oversight for all such contractors, regardless of which U.S. agency hires them. Commanders on the ground should have the authority to restrict or redirect their operations as appropriate. There must be assured legal accountability for the actions of all security contractors, not just those employed by the Defense Department.

Question. How do you believe the ongoing operations of private security contractors in Iraq are likely to be affected by the new security agreement between the United States and Iraq?

Answer. I understand that since January 1, 2009, U.S. Government private security contractors no longer have immunity from Iraqi law. Furthermore, they must comply with Iraqi registration and licensing requirements. For all contractors, the security agreement has meant substantially more liaison and coordination with Iraqi authorities at all levels.

Question. Do you support the extension of the Military Extraterritorial Jurisdiction Act to private security contractors used by all Federal agencies overseas?

Answer. Yes.

INFORMATION OPERATIONS

Question. What in your view is the role of the Office of the USD(P) in managing DOD public diplomacy and information operations activities? If confirmed, what do you envision would be the role of the PDUSD(P) in these efforts?

Answer. It is my understanding that the Department of State is the lead agency for public diplomacy and strategic communication, and that DOD works closely with the Department of State to ensure that DOD information activities support U.S. public diplomacy priorities and strategic communication efforts. Within DOD, OSD Policy plays an important role in the strategic communication planning process, necessitating close collaboration across the Department. If confirmed as the PDUSD(P), I would work to ensure that DOD works effectively with the State Department and others agencies and departments as appropriate, while continuing to improve the military's ability to support U.S. efforts in the changing information environment.

Question. In October 2008, DOD announced a plan to award contracts in excess of \$300 million to U.S. contractors to conduct "information operations" through the Iraqi media. The purposes of this contract include building up support for the Government of Iraq, the security forces of Iraq, and undermining Iranian influence in Iraq.

What is your view of the appropriate roles of DOD and the Department of State in media campaigns to build up support for the government and security forces of Iraq and undermining Iranian influence in Iraq?

Answer. I have not had an opportunity to become familiar with the details of these programs, but believe they deserve careful scrutiny. If confirmed, I would expect to look into these matters and look forward to sharing any conclusions with the committee.

Question. What is your view on the effectiveness of information operations conducted by the United States through the Iraqi media?

Answer. See previous answer.

Question. Do you see a risk that a DOD media campaign designed to build up support for the government and security forces of Iraq could result in the inappropriate dissemination of propaganda inside the United States through the internet and other media that cross international boundaries?

Answer. See previous answer.

Question. A spokesman for the Iraqi Government has been quoted as saying that any future DOD information operations in the Iraqi media should be a joint effort with the Iraqi Government. According to an article in the Washington Post, the spokesman stated: "We don't have a hand in all the propaganda that is being done now. It could be done much better when Iraqis have a word and Iraqis can advise."

Do you believe that DOD information operations through the Iraqi media should be conducted jointly with the Iraqis?

Answer. See previous answer.

Question. Under what circumstances do you believe that it is appropriate for the DOD to conduct information operations in a sovereign country without the knowledge and support of the host country?

Answer. See previous answer.

DETAINEE TREATMENT POLICY

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the United States Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is this prohibition in the best interest of the United States? Why or why not?

Answer. Yes, I believe that the prohibition on cruel, inhuman, or degrading treatment or punishment is in America's best strategic interest and consistent with our values. For decades during the Cold War with the Soviet Union and during long wars in a variety of theatres in the last century, America's image as a just and honorable global leader was retained in large part because of how we treated our adversaries and not simply our friends. Holding true to the values that lay at America's foundation is critical to ensuring that America's men and women in uniform enjoy the moral high ground when we ask them to go into harm's way. Perhaps more so in this century than during the last, American influence will stem from the power of our example and not simply the example of our power. If we are to defeat violent extremism, we must hold true to the ideals that made this country great, and continue to inspire the growth of freedom and tolerance around the world.

Question. Do you believe that the phrase "cruel, inhuman, or degrading treatment or punishment" has been adequately and appropriately defined for the purpose of this provision?

Answer. I understand that there are potential ambiguities in the application of these principles to specific cases, but have not received enough information to form a proper opinion on this question. If confirmed, I would expect to work with the DOD General Counsel on this issue.

Question. If confirmed, will you take steps to ensure that all relevant DOD directives, regulations, policies, practices, and procedures fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the DOD Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. Section 2441 of title 18, U.S.C., as amended by the Military Commissions Act of 2006, defines grave breaches of common Article 3 of the Geneva Conventions, including torture and cruel and inhuman treatment.

In your view, does section 2441 define these terms in a manner that provides appropriate protection from abusive treatment to U.S. detainees in foreign custody and to foreign detainees in U.S. custody?

Answer. Yes. However, I am not a lawyer, and if confirmed, I would consult with the DOD General Counsel regarding this issue.

Question. The President has announced his intention to close the detention facility for enemy combatants at Guantanamo Bay, Cuba.

What role, if any, would you expect to play, if confirmed, in reviewing the status of Guantanamo detainees and determining whether the United States should continue to hold such detainees?

Answer. If confirmed as PDUSD(P) and if asked, I would provide policy advice to the USD(P) and the Secretary of Defense regarding the closure of Guantanamo Bay and the disposition of the remaining detainee population.

Question. The Military Commissions Act of 2006 authorized the trial of "unlawful enemy combatants" by military commission and established the procedures for such trials.

What role, if any, would you expect to play, if confirmed, in determining whether Guantanamo detainees should be tried for war crimes, and if so, in what forum?

Answer. If confirmed, I understand that I would play no role in determining which specific detainees should be tried for war crimes. Should there be a review of options for war crimes trials, I would expect to play a role in advising the USD(P) and the Secretary of Defense on policy matters.

Question. What role, if any, would you expect to play, if confirmed, in reviewing the Military Commissions Act and developing administration recommendations for any changes that may be needed to that Act?

Answer. If confirmed, I would expect to play a role in advising the USD(P) and the Secretary of Defense on policy options.

Question. In the past 2 years, significant changes have been made in Iraq in the way detention operations have been conducted in a counterinsurgency environment, including through the establishment of reintegration centers at theater internment facilities.

What do you consider to be the main lessons learned from the changes to detention operations in Iraq?

Answer. I believe the main lessons learned from the changes to detention operations in Iraq reflect the insight that during counterinsurgency and stability operations, the strategic center of gravity is the health and welfare of the population, and not necessarily the strength or disposition of insurgent groups. Protecting the population—including those incarcerated by U.S. or host nation forces—and being seen to treat the people with respect and honor, is perhaps the most effective force multiplier that can be generated during these complex operations. If confirmed as PDUUSD(P), I would be interested in working to ensure these counterinsurgency based programs can be tailored and applied more broadly to our detention operations in Afghanistan and elsewhere.

Question. What should be done to incorporate those lessons learned into DOD doctrine, procedures, and training for personnel involved in detention and interrogation operations?

Answer. Like many of the hard won lessons gleaned from our ongoing experiences in Iraq and Afghanistan, I think civilian leaders have a vital role to play in ensuring that valuable innovations concerning detention and interrogation operations should be institutionalized in order to prevent a recurrence of future mistakes and oversights. If confirmed as PDUUSD(P), I would work to ensure that these efforts continue in DOD schoolhouses, manuals, publications, and training, and that these lessons are applied in all of our detention operations.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Principal Deputy Under Secretary of Defense for Policy?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[The nomination reference of Dr. James N. Miller, Jr., follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
March 10, 2009.

Ordered. That the following nomination be referred to the Committee on Armed Services:

James N. Miller, Jr., of Virginia, to be Deputy Under Secretary of Defense for Policy, vice Christopher Ryan Henry.

[The biographical sketch of Dr. James N. Miller, Jr., which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DR. JAMES N. MILLER, JR.

Dr. James N. Miller, Jr. is Senior Vice President and Director of Studies at the Center for a New American Security, where he has served since February 2007. Previous positions include serving as Senior Vice President (2003–2007) and Vice President (2000–2003) at Hicks and Associates, Inc.; Deputy Assistant Secretary of Defense for Requirements, Plans, and Counterproliferation Policy (1997–2000); assistant professor at Duke University (1992–1997); and senior professional staff member for the House Armed Services Committee (1988–1992). He is a member of the International Institute for Strategic Studies and the Combating WMD Panel of DOD's Threat Reduction Advisory Committee. He has served as an advisor to the Defense Science Board, as senior associate at the Center for Strategic and International Studies, and as senior associate member at St. Antony's College, Oxford. In 2000 he received the Department of Defense Medal for Outstanding Public Service. Dr. Miller received a B.A. degree with honors in economics from Stanford University, and Master's and Ph.D. degrees in public policy from the John F. Kennedy School of Government at Harvard University.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Dr. James N. Miller, Jr., in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
James Northey Miller, Jr. (Nicknames: Jim, Jimmy).
2. **Position to which nominated:**
Principal Deputy Under Secretary of Defense for Policy.
3. **Date of nomination:**
March 10, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**

August 15, 1959; Waterloo, IA.

6. Marital Status: (Include maiden name of wife or husband's name.)
Married to former Adele Marie Balk.

7. Names and ages of children:

Allison Northey Miller; 18.

Zoe Adele Miller; 16.

Colin James Miller; 14.

Lucas Eugene Miller; 12.

Adrienne Sara Miller; 8.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Harvard University, 1985–1988. Ph.D. in Public Policy, March 1989.

Harvard University, 1983–1985. Masters in Public Policy, June 1985.

Stanford University, 1981–1983. (graduate study in Statistics. No degree).

Stanford University, 1977–1981. B.A. with honors in Economics, June 1981.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Senior Vice President and Director of Studies, Center for a New American Security, 1301 Pennsylvania Ave., NW, Suite #403, Washington, DC; February 2007–present.

President, Adaptive Strategies, LLC, 3701 N. Harrison St., Arlington, VA; August 2006–present. (Sole-person company used for consulting).

President, The Miller Agency, Inc., 2615 W. 4th St, Waterloo, IA; July 2006–present. (Assumed unpaid position upon death of father. The company is pending dissolution.)

Consulting Employee, SAIC, 1710 SAIC Drive, McLean, VA; February 2007–November 2008.

Senior Associate, CSIS, 1800 K St., NW, Washington, DC; October 2006–February 2007.

Senior Vice President, Hicks and Associates, Inc., 1710 SAIC Drive, McLean, VA; October 2000–February 2007. (Started in 2000 as Vice President).

Deputy Assistant Secretary of Defense for Requirements, Plans, and Counterproliferation, Department of Defense, September 1997–October 2000.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Member, Defense Science Board Summer Study Task Force on Challenges to Military Operations in Support of National Interests (uncompensated), 2007.

Member, Threat Reduction Advisory Council Panel on Combating Weapons of Mass Destruction (uncompensated), 2006–present.

Consultant to Assistant Secretary of Defense for Strategy and Requirements, Defense Department, June–September 1997.

Consultant to Deputy to the Under Secretary of Defense for Policy, Defense Department, April 1994–April 1995.

Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, June–September 1984 (summer employment).

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Senior Vice President and Director of Studies, Center for a New American Security, 1301 Pennsylvania Ave., NW, Suite #403, Washington, DC.

President, Adaptive Strategies, LLC, 3701 N. Harrison St., Arlington, VA. (Sole-person company used for consulting).

President, The Miller Agency, Inc., 2615 W. 4th St, Waterloo, IA. (Assumed unpaid position upon death of father. The company is pending dissolution.)

The following all as part of consulting done under Adaptive Strategies, LLC:

Consultant, Systems Planning & Analysis, Inc., 2001 N. Beauregard St, Alexandria, VA.

Consultant, National Institute for Public Policy, 9302 Lee Highway, Suite 750, Fairfax, VA.

Consultant, Northrop Grumman Corp., 1000 Wilson Blvd. Suite 2300, Rosslyn, VA.

Consultant, Booz Allen Hamilton, 8283 Greensboro Drive, McLean, VA.

Consultant, CSIS, 1800 K St., NW, Washington, DC.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, International Institute for Strategic Studies.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Barack Obama Presidential Campaign: \$100 (Nov. 7, 2008).

Barack Obama Presidential Campaign: \$1,000 (Oct. 2, 2008).

Hillary Clinton Presidential Campaign: \$1,500 (Sept. 26, 2007).

Committee for Senator Jack Reed: \$1,000 (June 29, 2006).

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Member, International Institute for Strategic Studies (2007–present).

Department of Defense Medal for Outstanding Public Service (2000).

Atlantic Fellow in Public Policy (1995–1996).

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Iran: Assessing U.S. Strategic Options, with Christine Parthemore and Kurt M.

Campbell (Washington, DC: Center for a New American Security, June 2008).

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JAMES N. MILLER, JR.

This 12th day of March, 2009.

[The nomination of Dr. James N. Miller, Jr., was reported to the Senate by Chairman Levin on April 1, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on April 3, 2009.]

[Prepared questions submitted to Ambassador Alexander R. Vershbow by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readi-

ness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Goldwater-Nichols was landmark legislation that led to dramatic improvements in operational effectiveness, unity of effort, and civilian oversight. There is now a generation of military leaders who are experienced with operating in a coordinated and joint, multi-service environment. At this time, I do not see the need to change the provisions of this legislation.

If so, what areas do you believe might be appropriate to address in these modifications?

Answer. See my previous answer.

RELATIONSHIPS

Question. What do you see as the relationship between the Assistant Secretary of Defense for International Security Affairs (ASD(ISA) and each of the following?
The Secretary of Defense.

Answer. Under the direction of the Under Secretary of Defense for Policy (USD(P)), the Assistant Secretary of Defense for International Security Affairs (ASD(ISA)) advises the Secretary of Defense on international security strategy and policy on issues of DOD interest that relate to the nations and international organizations of Europe (including the North Atlantic Treaty Organization), the Middle East, and Africa.

Question. The Deputy Secretary of Defense.

Answer. Under the direction of the USD(P), the ASD(ISA) advises the Secretary of Defense on international security strategy and policy on issues of DOD interest that relate to the nations and international organizations of Europe (including the North Atlantic Treaty Organization), the Middle East, and Africa.

Question. The Under Secretary of Defense for Policy.

Answer. The ASD(ISA) provides similar support to the USD(P) as described above.

Question. The Under Secretary of Defense for Intelligence.

Answer. At the direction of the USD(P), the ASD(ISA) works closely with the Under Secretary of Defense for Intelligence and Deputy to achieve the Secretary's objectives and ensure that policy formulation and execution are well informed and supported by intelligence. The ASD(ISA) also provides policy input, as appropriate, to intelligence activities handled by the Under Secretary of Defense for Intelligence that relate to the nations and international organizations of Europe, the Middle East, and Africa.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff.

Answer. As the principal military advisor to the Secretary of Defense, the President and the National Security Council, the Chairman has a unique and critical military role. At the direction of the Under Secretary or Principal Deputy Under Secretary of Defense for Policy, the ASD(ISA) works with the Chairman and Vice Chairman to provide support on matters that affect strategy and policy for Europe, the Middle East, and Africa, working to ensure that military advice is taken into account in an appropriate manner.

Question. The Secretaries of the Military Departments.

Answer. The ASD(ISA) works with the Secretaries of the Military Departments on a broad range of issues related to international security strategy and policy.

Question. The Chiefs of Staff of the Services.

Answer. The ASD(ISA) works with the Chiefs of Staff of the Services on a broad range of issues related to international security strategy and policy.

Question. The combatant commanders, in particular the commanders of U.S. Central Command, U.S. Africa Command, U.S. European Command, and Supreme Allied Commander Transformation/Commander, U.S. Joint Forces Command.

Answer. The ASD(ISA) works closely with the commanders of U.S. Central Command, U.S. Africa Command, U.S. European Command, and Supreme Allied Commander Transformation/Commander, U.S. Joint Forces Command to support the efforts of the USD(P), Secretary and Deputy Secretary, particularly in the areas of strategy and policy, contingency planning, and policy oversight of operations.

Question. The Commanding General, Multi-National Force, Iraq.

Answer. In coordination with the Chairman of the Joint Chiefs of Staff, the ASD(ISA) works closely with the Commanding General, Multi-National Force, Iraq

to provide policy oversight of strategy, plans, and operations in Iraq in support of the USD(P), the Secretary of Defense, and the President of the United States.

Question. The Commander, International Security Assistance Force (ISAF) and Commander, U.S. Forces, Afghanistan.

Answer. In coordination with the Chairman of the Joint Chiefs of Staff, the ASD(ISA) works closely with the Commander, ISAF and Commander, U.S. Forces, Afghanistan to provide policy oversight of strategy, plans, and operations in Afghanistan in support of the USD(P), the Secretary of Defense, and the President of the United States.

Question. The Principal Deputy Under Secretary of Defense for Policy.

Answer. The ASD(ISA) is the principal advisor to the Principal Deputy Under Secretary of Defense for Policy on international security strategy and policy relating to the countries and international organizations of Europe, the Middle East, and Africa.

Question. The Assistant Secretary of Defense for Asian and Pacific Security Affairs.

Answer. The ASD(ISA) works with the Assistant Secretary of Defense for Asian and Pacific Security Affairs to provide sound policy advice to the Under Secretary and the Secretary on cross-cutting international security strategy and policy issues, such as the NATO ISAF mission in Afghanistan.

Question. The Assistant Secretary of Defense for Global Strategic Affairs.

Answer. The ASD(ISA) works with the Assistant Secretary of Defense for Global Strategic Affairs to provide sound policy advice to the Under Secretary and the Secretary on cross-cutting international security strategy and policy issues, such as arms control policy and countering the proliferation of weapons of mass destruction.

Question. The Assistant Secretary of Defense for Special Operations/Low-Intensity Conflict and Interdependent Capabilities.

Answer. The ASD(ISA) works with the Assistant Secretary of Defense for Special Operations/Low-Intensity Conflict and Interdependent Capabilities to provide sound policy advice to the Under Secretary and the Secretary on cross-cutting international security strategy and policy issues, such as countering violent extremism, stability operations, and oversight of security cooperation programs.

Question. The Director of the Defense Security Cooperation Agency.

Answer. The ASD(ISA) works with the Director of the Defense Security Cooperation Agency on implementation of security cooperation activities, such as Foreign Military Sales, with countries in Europe, the Middle East, and Africa to ensure that these activities support national security policy objectives and strategies.

Question. The proposed Deputy Under Secretary for Policy Integration and Chief of Staff.

Answer. Although I have not had the opportunity to review the responsibilities of the proposed Deputy Under Secretary for Policy Integration and Chief of Staff, the ASD(ISA) would work with this organization on cross-cutting policy issues to support the objectives of the Secretary of Defense and the USD(P).

Question. The proposed Deputy Under Secretary for Policy for Strategy, Plans, and Forces.

Answer. Although I have not had the opportunity to review the responsibilities of the proposed Deputy Under Secretary for Policy for Strategy, Plans, and Forces, the ASD(ISA) would work with this organization on cross-cutting policy issues to support the objectives of the Secretary of Defense and the USD(P).

DUTIES

Question. Department of Defense Directive 5111.07 (11/7/2008) delineates the functions and duties of the ASD(ISA). Under this directive, the ASD(ISA) is the principal advisor to the USD(P) and the Secretary of Defense on international security strategy and policy on issues of DOD interest that relate to the nations and international organizations of Europe (including NATO and Russia), the Middle East, and Africa, their governments and defense establishments; and for oversight of security cooperation programs.

What is your understanding of the duties and functions of the ASD(ISA)?

Answer. The ASD(ISA) primary responsibility is to advise and support the USD(P) and the Secretary of Defense on defense policy and strategy for Europe, the Middle East, and Africa.

Question. Under the proposed reorganization of the OUSD(P), what specific changes do you anticipate and please discuss what you believe to be impact these changes to your functions and duties?

Answer. I look forward to speaking with the Secretary and the USD(P) further about how I could best support their efforts beyond those set forth in section 134(b) of title 10.

Question. How would the proposed creation of an Assistant Secretary of Defense for Global Strategic Affairs impact the functions and duties of the ASD(ISA), particularly with regard to Russia?

Answer. The ASD(ISA) will have to coordinate closely with the Assistant Secretary of Defense for Global Strategic Affairs to balance the regional and functional perspective in the development of international security strategy and policy, including the U.S. approach to nuclear arms reductions negotiations with Russia, and in providing advice to the USD(P) and the Secretary of Defense.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I believe that my 32 years of experience in the Foreign Service dealing with national security issues provide me with the necessary background to handle the responsibilities of the ASD(ISA). Throughout my State Department career, I worked closely with the DOD in shaping and implementing U.S. policy toward the former Soviet Union and NATO, in contributing to U.S. efforts on nonproliferation and counterterrorism, and in managing a wide range of international conflicts and crises. Over the years, I have come to appreciate the importance of close civil-military coordination to the achievement of U.S. objectives—something that is especially important in meeting the new threats and challenges of the 21st century.

STRATEGY AND CONTINGENCY PLANNING

Question. One of the purposes of Goldwater-Nichols was to increase military and civilian attention on the formulation of strategy and contingency planning.

What is your view of the civilian role, as compared to the military role, in the formulation of strategy and contingency planning?

Answer. I believe that civilian leadership is critical in the formulation of strategy and planning. Civilian defense leadership is particularly vital in translating broad national security policies and principles into the strategic goals that ultimately drive military planning. The Joint Staff is a critical partner in the development of guidance for contingency planning and provides independent military advice to the Secretary of Defense and the President. In addition to the provision of written guidance, an important civilian role is to review contingency plans submitted for approval by the combatant commanders.

Question. In your opinion, does the civilian leadership currently have an appropriate level of oversight of strategy and contingency planning?

Answer. As the Under Secretary of Defense for Policy, Michèle Flournoy, has said, the United States is at a critical time in history—with multiple wars, enduring threats, and imminent challenges. Strong civilian and military partnership on the range of national security issues facing our Nation is vital. If confirmed, I will examine this issue closely and seek to ensure that civilian leadership has the appropriate level of oversight on the full range of strategy, planning, and use-of-force issues, while respecting the importance of receiving independent military advice from the Joint Staff and the combatant commanders.

Question. What steps do you believe are necessary to ensure effective civilian control and oversight of strategy and contingency planning?

Answer. I support the USD(P)'s view that the strategy and planning capacity in the Office of the Secretary of Defense should be strengthened. If confirmed, I would strive to provide the best advice possible to the Under Secretary of Defense in the provision of written policy guidance and in the review of contingency plans for Europe, the Middle East, and Africa.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges confronting the ASD(ISA)?

Answer. If confirmed, my office will likely play an important role within the Department and the interagency process in developing policy for a number of key issues, including among others: responsibly ending the war in Iraq; ensuring that NATO develops and employs a more effective strategy in Afghanistan and the surrounding region; working to prevent WMD proliferation; combating terrorism; strengthening security and stability across the Middle East; strengthening America's alliances with key partners and allies; and shaping a more constructive relationship with Russia while supporting the sovereignty and independence of Russia's neighbors. Beyond ensuring that the Secretary of Defense receives the best possible

policy input on these vital questions, another major challenge will be to strengthen the organizational capacity to support these efforts.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I would engage closely with my counterparts at the Department of State and NSC to develop comprehensive and coordinated strategies that bring to bear all elements of national power to advance U.S. interests.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the ASD(ISA)?

Answer. If confirmed, I would give priority to the major challenges identified by the President, the Secretary of Defense, and the USD(P) and to strengthening the organizational capacity of ISA to address them. I would also give priority to ensuring effective working relationships with both military and civilian counterparts through the Department and the interagency.

IRAQ

Question. The President has announced his plans for the drawdown of U.S. forces in Iraq and their transition to an overwatch mission, to be completed by the end of August 2010. The U.S.-Iraqi agreement on the Withdrawal of United States Forces from Iraq and the Organization of Their Activities During Their Temporary Presence in Iraq (the “security agreement”) requires that U.S. combat forces withdraw from cities and towns by June 2009 and that all U.S. forces withdraw from Iraq by the end of December 2011. Additionally, if Iraqi voters reject the security agreement in a referendum scheduled for July 2009, U.S. troops would be required to withdraw by July 2010.

What in your view are the greatest challenges facing DOD in meeting these deadlines and what actions, if any, would you recommend to maximize the chances of meeting these requirements?

Answer. The challenge in Iraq will be to continue the phased redeployment of U.S. forces while maintaining a secure environment to support elections, political reconciliation, and economic development. If confirmed, I would review DOD plans and work with colleagues across the Department and in other agencies to make any necessary recommendations to the Secretary of Defense.

Question. What is your understanding and assessment of U.S. plans to support implementation of the President’s drawdown plans and the SOFA requirements for repositioning and redeployment of U.S. forces, including contingency planning relating to the Iraqi referendum?

Answer. The President’s drawdown strategy reflects a careful consideration of events on the ground and respect for the bilateral agreements between the United States and Iraq. If confirmed, I look forward to implementing this strategy and working with the Joint Staff and our commanders to ensure we continue to meet our obligations under the security agreement and plan for contingencies, while we continue to support the Iraqi Government and help its security forces develop into a professional, non-sectarian force.

IRAQ LESSONS LEARNED

Question. What do you believe to be the major lessons learned from the Iraq invasion and the ongoing effort to stabilize the country?

Answer. One of many critical lessons learned from the Iraq invasion and the ongoing stability operations, is that better and more integrated civilian-military planning is required before any military endeavor. It is essential for policymakers to recognize that wars in the 21st century require preparation and competence along the entire spectrum of conflict—not just military, but often times political, ethnic, and social. The military cannot be prepared only for high-intensity combat. The government, as a whole, must be prepared to plan and execute an effort to win the peace. We have also learned that the appropriate force strength must be deployed to accomplish our objectives as well as account for a broad array of contingencies and the changing reality of the battlespace. Furthermore, our forces must plan and train with their civilian counterparts and be prepared to operate effectively in all phases of conflict, as well as post-conflict environments. The Iraq war also teaches us that the right training and doctrine must also be in place prior to any incursion.

Question. What are the greatest challenges and opportunities that you foresee for NATO over the next 5 years?

Answer. The United States continues to have an enormous stake in a strong, capable, and mutually supportive NATO alliance. Both the President and the Secretary of Defense have stressed their strong desire to adapt and modernize transatlantic security relationships to meet 21st century security challenges. Over the next 5 years, the primary NATO-related challenges include, first and foremost, achieving durable progress on Afghanistan; developing a common approach toward managing relations with Russia, drafting a new Strategic Concept to define emerging threats and required capabilities, and improving the prospects for unity-of-action between NATO and the European Union.

Question. Do you envision further enlargement of NATO, beyond Albania and Croatia, within the next 5 years? What criteria should the United States apply in evaluating candidates for future NATO enlargement?

Answer. The President has stated that NATO enlargement should continue so long as new candidates are democratic, peaceful, and willing to contribute to common security. NATO's door remains open to all European democracies that share our values and who can contribute to our common security. Precisely which countries and within what applicable timeframe NATO would undertake further enlargement are important questions which the administration will need to address in close consultation with Congress and our allies. It is important that each NATO aspirant be judged on its individual merits and progress in implementing political, economic, and military reforms. No country outside NATO can exercise a veto over other countries' NATO aspirations.

Question. What more can the United States do to encourage NATO members to develop the capabilities and provide the resources necessary to carry out NATO missions in Afghanistan and elsewhere?

Answer. We will continue to look to our allies to shoulder a significant share of the military burden in Afghanistan, Kosovo, and other theaters, and to allocate sufficient resources to the modernization of their defense capabilities. At the same time, the President and Secretary Gates have both stressed the need for the United States and NATO to invest more in non-military instruments of national power. Many of our NATO allies have unique civilian governance capabilities that can enhance the overall effort in Afghanistan; the European Union (EU) has developed a capability to provide police and police training to help in stabilizing post-conflict situations. Forging a shared strategic view of the emerging threat environment and updating NATO's Strategic Concept from both a military and civilian governance perspective will be critical to success in Afghanistan and future operations.

Question. What are your views on the potential for the NATO-Russia Council to serve as a useful forum for improving security relations between NATO and Russia?

Answer. The NATO-Russia Council has the potential to be a useful forum for developing security cooperation between NATO and Russia in areas of common interest, such as Afghanistan, nonproliferation, counterpiracy, counterterrorism, and possibly missile defense. The NRC also can serve as a venue for dialogue with Russia on European security issues, including areas where we disagree, such as Georgia.

Question. What is your assessment of the impact of France rejoining the integrated military structure within NATO?

Answer. President Obama has already underscored to French President Sarkozy his strong support for France's full participation in NATO's integrated military structure. As Vice President Biden stated in his speech to the Munich Security Conference in early February, "France is a founding member of NATO and a major contributor to its operations. We would expect France's new responsibilities to reflect the significance of its contributions throughout NATO's history, and to strengthen the European role within the alliance."

Deeper than this, full French participation in NATO's forces planning processes will result in French military capabilities being formally and openly designated for alliance use. The alliance will also benefit from having well trained French officers in the integrated military structure and from having full French participation in NATO common budgets. We believe that France will play an important role in the alliance's development of a new Strategic Concept.

NATO-EU RELATIONS

Question. A potential challenge facing the United States and NATO in the months and years ahead is the EU implementation of its European Security and Defense Policy (ESDP), that is, an EU capability to conduct military operations in response to international crises in cases where "NATO as a whole is not engaged." At the

same time, NATO and EU are working alongside each other in addressing a number of common security challenges, including police training in Afghanistan and crisis management in Kosovo.

In your view, what should be NATO's position with regard to European efforts to strengthen the ESDP and build military capacity within the EU?

Answer. NATO and the EU have agreed to ensure that their capability development efforts are "mutually reinforcing." In defense and security-related realms, I would consider NATO to be the preferred vehicle for cooperation between our European allies and the United States in responding to shared security challenges. At the same time, NATO has rightly reaffirmed the value of a stronger, more capable ESDP in dealing with crises in which NATO as a whole is not engaged, and has agreed to provide planning and material support in such cases, based on our shared security interests. I believe we have already seen the benefits of this approach in Bosnia, where the EU has assumed greater responsibility as NATO redeployed its forces elsewhere.

Question. What steps do you believe the United States and NATO should take to ensure that ESDP is implemented in a way that strengthens the alliance?

Answer. Over the past several years, ESDP-related activities have grown in number and diversity, to include the EU's current anti-piracy operations off the coast of Somalia. Given these trends, high priority must be given to promoting policy-level consultation and coordination, good communications, and a common operating picture between NATO, its allies, and partners.

Question. What is your view of the future of NATO-EU relations in areas relating to security, defense, and crisis management? Should NATO do more to institutionalize cooperation between the two organizations?

Answer. Both NATO and the EU have important roles to play in meeting future security, defense, and crisis management challenges. As noted above, from an alliance perspective, it is important for DOD and U.S. interagency partners to take a clear-eyed view of the entire range of current EU activities—from civilian policing, to military, border control, or other missions—to identify both areas of duplication and where closer NATO-EU coordination is required. NATO should fully use the valuable existing NATO-EU cooperation mechanisms, and consider additional mechanisms where they could help strengthen cooperation.

ENGAGEMENT POLICY

Question. One of the central pillars of our national security strategy has been military engagement as a means of building relationships around the world. Military-to-military contacts, Joint Combined Exchange Training exercises, combatant commander exercises, humanitarian demining operations, and similar activities were used to achieve this goal. However, the demands of supporting wars in Iraq and Afghanistan have drained resources needed by combatant commands to sustain military engagement activities.

Do you believe that military engagement activities contribute to U.S. national security? If so, what do you consider to be the main benefits of these activities?

Answer. Yes. I believe military-to-military contacts contribute to U.S. national security in a variety of important ways and, as such, I support continued military-to-military engagement. Such activities can build capacity among partner nations to participate in coalition operations to counter terrorism and other transnational threats, potentially relieving stress on U.S. forces. They can help harmonize nations' views of common security challenges. Military-to-military activities can also help sustain investments made by other U.S. assistance programs. Finally, when performed effectively, military-to-military activities should show by example how military forces can act effectively while respecting human rights and civilian control.

Question. If confirmed, would you advocate for continuing or expanding U.S. military-to-military engagement? If not, why not? If so, what would you recommend to address the combatant commanders' need for additional resources dedicated to these activities?

Answer. If confirmed, I will support continued U.S. military-to-military engagement. I believe the current and emerging security environment will require robust engagement with the militaries of our partners and allies around the world, and building productive relationships with many states in which our past military-to-military engagements have been limited or absent entirely. I have not had an opportunity to investigate the specific resource needs of combatant commanders. If confirmed, I will look into the resource needs associated with combatant commander military-to-military engagements.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations. These include the global train and equip authority (section 1206) and the security and stabilization assistance authority (section 1207).

What should be our strategic objectives in building the capacities of partner nations?

Answer. One of the greatest threats to international security is the violence that is sparked when human security needs are not met by governments. This creates space for terrorists, insurgents, and other spoilers to operate and, as the September 11 attacks demonstrated, to threaten the United States and its allies. The goal, therefore, is to close this space through efforts that strengthen bilateral relationships; increase U.S. access and influence; promote militaries that respect human rights, civilian control of the military and the rule of law; and build capacity for common security objectives. In addition to promoting regional and global security, enhanced partner capacity reduces the risk of future military interventions and reduces stress on U.S. Armed Forces.

Question. Do these objectives differ by region, e.g. do our objectives within the EUCOM area of responsibility (AOR) differ from those in the AFRICOM AOR?

Answer. I am not in a position to render a definitive judgment on this important question. I will, if confirmed, study the matter and, if changes are needed, provide views to Secretary Gates and the members of this committee. My understanding is that the basic objective of the 1206 program is to build partner capacity to work with the United States or independently to address the threat of terrorism. My understanding is that 1207 allows DOD to transfer funding to the State Department with the goal of assisting State's reconstruction, security, or stabilization efforts. The overall objectives of these programs are the same around the globe. U.S. interests vary in different regions so I would expect that 1206 and 1207 activities would vary accordingly, though the core objectives are the same.

Question. What is your understanding of the purpose of the section 1206 global train and equip authority?

Answer. My understanding is that section 1206 is intended to provide a quicker, more targeted ability to build partner capacity than the more traditional routes of security assistance, and is focused on building capacity to achieve security objectives. Under law, it has two discrete purposes: to build a partner's national military or maritime security forces' capacity either to: (1) conduct counterterrorism operations; or (2) conduct or support stability operations where U.S. forces are participating. I have not been involved in 1206 implementation, but I understand that the program has enthusiastic support from embassies and COCOMs and reflects a close collaboration between State and DOD, which work together in a "dual key" process to approve funding allocations. If confirmed, I will assist the Secretary in fully assessing how well this authority is working and whether it meets congressional intent.

Question. What is your assessment of the implementation of the global train and equip program?

Answer. See my previous answer.

Question. What is the relationship of the global train and equip authority to other security assistance authorities, such as counternarcotics assistance and foreign military financing?

Answer. The Departments of State and Defense need to work together very closely to avoid duplication of effort among these important activities. The global train and equip authority fills two specific legal requirements: to build capacity for counterterrorism and for stability operations where U.S. forces are a participant. Foreign Military Financing serves a broader set of diplomatic and foreign policy objectives such as improving bilateral relations, encouraging behavior in the U.S. interest, increasing access and influence, and building capacity particularly where host-nation and U.S. interests align.

Counternarcotics authorities are focused on providing DOD the ability to support U.S. or other Government efforts to counter the flow of narcotics globally. If confirmed, I will support any interagency assessment of potential overlaps and work to ensure that DOD programs are focused on supporting U.S. and other agency efforts to counter the flow of narcotics.

Question. What should be done to ensure that the global train and equip authority does not duplicate the efforts of these other assistance programs?

Answer. See my previous answer.

Question. What is your understanding of the purpose of the security and stabilization assistance authority (section 1207)?

Answer. Section 1207 was, as I understand it, originally designed to help the State Department's Coordinator for Reconstruction and Stabilization to become operational. It facilitates security, stabilization, and reconstruction missions—bringing civilian expertise to bear alongside or in lieu of U.S. military forces. I have not been involved in 1207 implementation, but I understand that the program has been useful in facilitating a “3D” (Development, Defense, Diplomacy) approach to security, stabilization, and reconstruction challenges. If confirmed, I will monitor this effort closely.

Question. What is your assessment of how this authority has been utilized?

Answer. See my previous answer.

Question. Secretary Gates has called for an expansion of the Government's resources devoted to instruments of nonmilitary “soft power”—civilian expertise in reconstruction, development, and governance.

Do you believe that there is a need to expand the Government's resources devoted to the ability of civilian departments and agencies to engage, assist, and communicate with partner nations?

Answer. Yes. The President and Secretary Gates have both made clear their strong desire to see more robust non-military instruments of national power. Congress has the authority to expand significantly the Government's “soft-power” resources and U.S. civilian agency capacity. If confirmed, I will certainly make it my priority to assist in this effort.

Question. In your view, what should be the role of DOD, vis-a-vis other civilian departments and agencies of the Government, in the exercise of instruments of soft power?

Answer. Generally, the Department's role should be to support, not lead, in the exercise of “soft power.” But DOD plays a vital role in helping to promote—through the full gamut of planning effort, exchanges, exercises, operations, and bilateral defense relationships—the conditions that enable these instruments to be applied with maximum beneficial effect.

Question. What is your view of the criticism that these security assistance programs have contributed to a “militarization” of U.S. foreign policy?

Answer. In general, I believe that our national security challenges require that the President have a broad set of options. I have not had experience with the 1206 and 1207 programs. However, I understand that all 1206 activities are approved by both the Secretaries of Defense and State. Further, I understand that 1207 is intended to ensure that State can better carry out its reconstruction, stabilization, and security responsibilities. It may be that the critics do not appreciate how deeply State is involved in the approval and authorization of these activities. If confirmed, I will work with Congress to ensure that 1206 and 1207 activities are framed and implemented appropriately, and based on thorough State-Defense coordination.

Question. Do you believe that there is an independent value to Section 1206 and 1207 funded activities or do you believe these authorities and associated funding should be switched to the Department of State?

Answer. I do not believe that 1206 and 1207 authorities and funding should be switched to the Department of State. Although I am not intimately familiar with these activities, I understand that the combatant commanders find them extremely valuable. If confirmed, I will be able to develop a more informed opinion on this issue.

RUSSIA

Question. What role will you play, if confirmed, in establishing policy with respect to the U.S.-Russia national security relationship?

Answer. If confirmed, I will work with other members of the administration to advance the President's goal of building a more constructive relationship with Russia, while managing differences in areas where U.S. and Russian interests may diverge. This will involve exploring renewed cooperation in a wide range of priority areas, strategic arms control, nonproliferation, Afghanistan, and improved cooperation on Iran.

Question. What do you believe are appropriate objectives for U.S.-Russian security relations, and what do you believe are the areas of common interest between the United States and Russia in the security sphere?

Answer. As the President has stressed, it is in no one's interest to see our relations return to a Cold War posture. Our interests clearly overlap in areas such as strategic arms control, nonproliferation, counterterrorism, Afghanistan, and counter-narcotics. Ultimately, I believe we should work to create the conditions that make clear that stable, democratic neighbors on Russia's borders are in Russia's own interest.

Question. In your view what steps should DOD take to improve security relations with Russia? For instance would you support increased military-to-military relations and exchanges with Russia?

Answer. If confirmed, I will make it a priority to assess areas where greater military-to-military and other exchanges with Russia might be beneficial. It is certainly important for U.S. security interests that we work to keep our lines of communication open and to cooperate to address key global challenges.

Question. Would you support any joint development or other cooperative programs with Russia, including cooperation on, or joint development of, missile defense capabilities in relation to Iran?

Answer. If confirmed, I will explore the potential for additional cooperation with Russia in relations to Iran. I believe it is in our interest to continue to explore a potential joint missile defense architecture with Russia to counter the emerging ballistic missile threat from Iran.

IRAN

Question. Do you believe it would be in the interest of the United States to engage Iran in a direct dialogue to promote regional stability and security?

Answer. I support the President's view that the United States should be willing to engage with all nations, friend or foe, and with careful preparation, to pursue direct diplomacy. Furthermore, I fully support the President's view that we should not take any options off the table and that engagement is the place to start our efforts to prevent Iran from acquiring nuclear weapons and end its support for destabilizing activities and terrorism in the region.

Question. Do you believe it would be in the interest of the United States to engage Iran in a direct dialogue regarding the narcotics problems in Afghanistan?

Answer. This issue is being examined as part of a broader interagency policy reviews on Iran and Afghanistan.

Question. What more do you believe the United States and the international community could be doing to dissuade Iran from pursuing a nuclear weapons program? Specifically, what actions do you believe that DOD ought to undertake to support diplomatic efforts to dissuade Iran from pursuing a nuclear weapon?

Answer. I support the President's view that it is very important for us to make sure that we are using all the tools of U.S. power, including diplomacy, in our relationship with Iran. I fully support the President's view that we should be willing to talk to Iran, to express very clearly where our differences are, but also where there are potential avenues for progress. Furthermore, by working with our international partners and allies, and by creating more favorable conditions in the surrounding region, we can increase the chances of making useful inroads with Iran. DOD should therefore continue developing ongoing bilateral and multilateral cooperation with the Gulf Cooperation Council countries and other allies in the region, in support of the State Department's diplomatic initiatives.

AFRICAN REGIONAL SECURITY CONCERNS

Question. What do you see as the greatest threat to U.S. national security interests in Africa?

Answer. There are many national security challenges to U.S. interests in Africa. There is, however, a growing concern over the compounding effects that transnational threats—such as the proliferation of small arms, the trafficking in illicit goods and persons, pandemic diseases, violent extremism, environmental degradation, piracy, and narcotics trade—will have on an already vulnerable security framework.

Question. How should the United States address the security challenges in the Niger Delta?

Answer. If confirmed, I will continue to work closely with the State Department to enhance our security relationship with the Government of Nigeria by offering our assistance, as appropriate, in the areas of maritime security and military capacity building.

Question. Is DOD the appropriate department to lead any U.S. Government effort in this area?

Answer. I believe there are certain situations within the African context where it is appropriate for DOD to lead, usually in response to requests by the Department of State. There are other instances where DOD, while not in the lead, can and does play a significant role as an enabler or supporter to other U.S. Government agencies in advancing U.S. national security interests in Africa.

Question. Given the increasing threat of piracy in East African waters, would you advocate an increased focus on maritime security assistance to regional governments?

Answer. I support DOD's efforts to work with the interagency to build the maritime security capacity of our African partners. Increasing African maritime capacity addresses not only the threat of piracy, but also other enduring security concerns, such as illegal fishing in territorial waters, smuggling of arms and drugs, and trafficking of people.

Question. If not, what do you believe to be the most effective method for the United States to combat the threat of piracy?

Answer. I support DOD's efforts to work with the interagency to build the maritime security capacity of our African partners, and to encourage our allies in Europe and Asia to contribute to counter-piracy efforts. Increasing African maritime capacity addresses not only the threat of piracy, but also other enduring security concerns, such as illegal fishing in territorial waters, smuggling of arms and drugs, and trafficking of people.

Question. What is your understanding of planning to expand naval cooperation or offer new foreign military sales to improve the naval capabilities of U.S. partners in the region?

Answer. The United States already cooperates with multiple international partners to address piracy off the coast of Somalia. DOD established Combined Task Force 151, and international participants include Turkey, the U.K., and Denmark. DOD is supportive of other interested partners joining this task force. In addition, DOD coordinates with other nations undertaking counterpiracy operations in the region, including Russia, China, Malaysia, India, Saudi Arabia, South Korea, and the European Union. Regarding a requirement for foreign military sales in the region, if confirmed, I will work closely with the Department of State to assess the naval capabilities of partners in the area and possible requirements for foreign military sales in the region.

U.S. AFRICA COMMAND

Question. The creation of AFRICOM has raised questions about the role of DOD in U.S. development efforts in Africa.

What do you see as the role of AFRICOM in U.S. policy towards Africa and in development and humanitarian engagement?

Answer. The Department of State and USAID lead U.S. foreign policy and development engagements abroad, to include Africa. President Obama has argued that AFRICOM should promote a more united and coordinated engagement plan for Africa. Ideally, AFRICOM's supporting role should be to promote national security objectives by working with African states, regional organizations, and the African Union to enhance stability and security in the region. In particular, AFRICOM should continue forging closer U.S. military-to-military relations with states on the African continent. If confirmed, I will continue the close working relationship with State, USAID, other agencies and Congress to ensure that AFRICOM's roles and missions assist in advancing U.S. foreign policy and national security objectives.

Question. What impact, if any, might AFRICOM's lack of standing forces have on the command's counterterrorism activities or on its ability to maintain the level of security cooperation activities conducted with Special Operations personnel from U.S. Central and European Commands?

Answer. The Global Force Management (GFM) process allows AFRICOM, like all the other geographic combatant commands, to request forces as necessary to accomplish missions tasked by the Secretary of Defense. These requests are reviewed and approved by the Secretary of Defense, allowing a dynamic balancing of military force application between emerging requirements and ongoing sustained operations. If confirmed, I will work closely with the Joint Staff in developing recommendations for the Secretary on allocation of forces to the regional combatant commanders.

LIBYA

Question. In his testimony before the Senate Armed Services Committee in March 2009, Commander U.S. Africa Command discussed AFRICOM's intent to expand engagement with the Libyans via military education exchanges and foreign military sales. Libyan leader Colonel Muamar Gaddafi has stated on more than one occasion that he is opposed to that command and has suggested it is a version of American colonialism. A recent New York Times article also suggested that the Libyans feel snubbed by the United States following their 2005 decision to give up their WMD program.

How do you see the U.S.-Libyan relationship moving forward on military-to-military engagement?

Answer. Speaking only about the defense part of the bilateral relationship, I understand that defense cooperation with Libya is continuing to develop in a positive direction. Our objective is to work with Libya to enable it to make a positive contribution to regional and continental security. The United States and Libya are discussing areas of cooperation that would be in our mutual security interest, such as border and coastal security.

Question. In light of Gaddafi's reported concerns about establishment of AFRICOM, do you believe these issues can be overcome?

Answer. Yes, it is my understanding that those issues have already been overcome. General Ward recently visited Tripoli and was well received. This outreach provides a foundation on which to build and continue to develop our defense relations with Libya in a positive way.

Question. What has been the impact of the recent agreement between the United States and Libya to establish a fund for settlement of outstanding claims related to terrorist acts committed by Libya?

Answer. I would defer to the Department of State on this question, as they led the U.S. side in negotiating this settlement with Libya. However, from DOD's perspective, the settlement opened up the relationship to the possibility of normalization.

DARFUR

Question. The U.N. has pledged to send approximately 26,000 peacekeepers to Darfur, but has sent less than half that number and has not provided them with the helicopters, vehicles, and other tools to fulfill their mission.

What do you believe is the appropriate role of the United States and, in particular, DOD, in assisting with the deployment and mobility of this peacekeeping mission?

Answer. I agree with President Obama's statements about the need to bring pressure to bear on Sudanese authorities in Khartoum to halt the genocide in Darfur. The U.N. has two major peacekeeping missions in Sudan that seek to create a secure environment conducive to a political settlement of the cultural, ethnic, and religious differences that divide Sudan's periphery from the center. I understand that the Departments of State and Defense have supported the deployment of African contingents to the U.N. Darfur mission by providing personnel, training, equipment, logistical expertise, deployment assistance, and, when required, airlift. If confirmed, I will look closely at what additional support DOD could reasonably provide in this area if so directed by the President.

UNITED NATIONS PEACEKEEPING

Question. DOD has provided logistics, communications, and headquarters staff to a variety of U.N. peacekeeping missions over the past several years.

In your view, what support, if any, should DOD provide to U.N. peacekeeping missions?

Answer. From Haiti to Liberia, Lebanon and other venues, the United States has important stakes in the success of U.N. peacekeeping operations. In addition to logistics, communications, and headquarters staff-related assistance, the issue of DOD help for U.N. field missions should be studied closely and in close consultation with other U.N. member states.

Question. In your view, should DOD provide U.S. military personnel to U.N. peacekeeping missions?

Answer. The United States can make important contributions to U.N. peacekeeping missions, though these should come in areas where we truly have an "edge," such as leveraging of technology, organizational and logistics capabilities, et cetera. Given their high level of training, our military personnel can also play useful roles as military observers in areas where the U.N. is preserving stability in a relatively secure environment. I would be extremely cautious about assigning U.S. military personnel to traditional U.N. peacekeeping missions, though I would want the President to have the option of doing so if he deemed it appropriate.

Question. The United States along with its partners in the G-8 sponsored an initiative to train 75,000 peacekeepers by 2010. This program, known as the Global Peace Operations Initiative (GPOI), is run by the Department of State. DOD has provided varying degrees of support since the program's inception.

In your view, what is the appropriate role of DOD in this program and, more generally, in the training of peacekeepers?

Answer. DOD plays an important role in bringing its expertise to bear in the training and equipping of peacekeeping units. DOD collaboration with State is important to successfully identifying and vetting viable partners, analyzing indigenous capacities, developing sustainable train-the-trainer programs, and promoting self-sufficiency in this critical area so that more nations can effectively contribute to the increasing demand for skilled peacekeepers around the world.

Question. If confirmed, would you support or oppose an extension of the GPOI program and its mandate beyond its scheduled end date in 2010? Please explain.

Answer. President Obama has stated his support for continued funding for GPOI. In general, I believe the United States has a strong interest in effective training that expands the pool of available peacekeepers worldwide, including those with which we may need to operate jointly. If confirmed, my intent would be to work closely with State Department colleagues as well as Members of Congress to ensure GPOI supports the President's objectives in this area.

PIRACY

Question. Piracy off the coast of Somalia grew at a significant rate in 2008. Dozens of successful acts of piracy have meant the capture of hundreds of hostages, valuable cargoes including arms, oil, and humanitarian aid, and have resulted in the payment of millions of dollars in ransoms. By all accounts, Somalia is unable to manage this problem, and the U.N. has adopted resolutions designed to generate international cooperation in addressing the scourge of piracy in that part of the world. Recently, the United States reached an agreement with Kenya regarding the detention and prosecution of suspected pirates.

What do you believe should be the role of the United States in general, and DOD in particular, in stemming the tide of piracy in the waters off the coast of Somalia?

Answer. The United States supports international efforts to address piracy off the coast of Somalia. To this end, DOD works closely with the interagency to support a multi-faceted approach to this problem. The interagency Counter-Piracy Action Plan (CPAP) outlines a strategic approach to address piracy off the coast of Somalia, including self-protection measures by commercial shippers, and international cooperation with authorities inside Somalia to address the land-based origins of the problem. In support of international efforts, DOD established Combined Task Force 151, a multinational task force that is executing counter-piracy operations off the Horn of Africa.

Question. Given the lack of an effective government or functioning court system in Somalia, what should be done to assist Somalia in strengthening its own operational capacity to fight piracy and bring to justice those involved in piracy?

Answer. Long-term instability in Somalia has enabled piracy to flourish in the region. An effective solution to piracy will require Somalis to lead efforts to create governance mechanisms that are able to effectively secure their territory, while also providing economic opportunities to their people that reduce the appeal of piracy.

Question. Are the international legal processes in place sufficient to ensure full and fair prosecutions of suspected pirates?

Answer. I am not in a position to render a definitive judgment on this issue. If confirmed, I will work with the interagency to review this issue and, as needed, provide recommendations to the USD(P) on this issue and how DOD can and should support efforts regarding the legal framework for prosecution of suspected pirates.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. The United Nations Convention on the Law of the Sea (UNCLOS) is currently pending in the Senate.

What are your views on U.S. accession to UNCLOS?

Answer. Like the President and the Secretary of Defense, I strongly support U.S. accession to the Law of the Sea Convention. The United States should be at the forefront of promoting the rule of law, including in the world's oceans. By becoming a party to the Convention, we would send a clear signal to all nations that we are committed to advancing the rule of law at sea. Additionally by joining the Convention, we would provide the firmest possible legal foundation for the navigational rights and freedoms needed to project power, reassure friends and deter adversaries, respond to crises, sustain combat forces in the field, and secure sea and air lines of communication that underpin international trade and our own economic prosperity.

Question. From a national security standpoint, what do you see as the advantages and disadvantages to being a party to UNCLOS?

Answer. Joining the Convention will give the United States a seat at the table when rights vital to our national interests are debated and interpreted, including

the maritime mobility of our armed forces worldwide. The navigation and overflight rights and high seas freedoms codified in the Convention are essential for the global mobility of our Armed Forces and the sustainment of our combat forces overseas. America has more to gain from legal certainty and public order in the world's oceans than any other country. More than 150 nations are parties to the Convention. By becoming a party, the United States will be better positioned to work with foreign air forces, navies, and coast guards to cooperatively address the full spectrum of 21st century security challenges.

BILATERAL DEFENSE TRADE COOPERATION AGREEMENTS

Question. Defense trade cooperation agreements between the U.S. and the U.K. and between the U.S. and Australia are currently pending before the Senate Foreign Relations Committee.

What are your views on the U.S.-U.K. and U.S.-Australia defense trade cooperation agreements?

Answer. I have not had the opportunity to review these agreements in detail but support the general objectives of the U.S.-U.K. and U.S.-Australia Defense Trade Cooperation Treaties. I believe that robust interoperability with two key allies along with the enhanced protection of our defense articles pursuant to the treaties will further our national security interests. If confirmed, I will support the USD(P) and the State Department in working with the Senate to resolve any issues related to ratification.

Question. In your view, are these agreements in the national security interest of the United States?

Answer. I have not had the opportunity to review these agreements in detail, but the intent of the treaties to increase defense trade and interoperability with two key trusted allies is sound and in the interest of our national security. If confirmed, I will review the treaties in detail and support the USD(P) and the Department of State in working with the Senate to address any issues.

Question. What do you consider to be the main advantages and disadvantages of these defense trade cooperation arrangements?

Answer. I am told that, if ratified, these two treaties will allow, under defined conditions, the transfer of defense articles without prior written authorization. By reducing trade barriers to the exchange of defense hardware, technical data, and services, we will strengthen U.S.-Australia and U.S.-U.K. defense cooperation, increase interoperability, and lend greater support to current and future coalition operations. There will also be substantial benefit to the respective three industrial bases. The treaties promise to enhance our bilateral government and industry research, development, and production efforts by providing a flexible, agile export control environment that will expedite the delivery of new technologies to our warfighters. Moreover, the treaties will increase competition in the defense marketplace by creating an approved community of companies in all three nations, which will result in improved quality and reduced costs in the defense equipment we provide to the men and women of our Armed Forces.

U.S. MILITARY BASING IN EUROPE

Question. Current DOD plans provide for the drawdown of U.S. Army forces in Europe to 32,000 U.S. soldiers by no later than 2013. However, General Craddock, Commander, U.S. European Command, is reviewing a recommendation that the two brigades currently scheduled for redeployment back to the United States should remain in Europe, keeping U.S. forces based in Europe at a force of around 42,000 beyond 2013.

Do you support maintaining a larger U.S. force presence in Europe than the 32,000-force level planned for 2013? Why or why not?

Answer. I understand that the Department intends to review posture issues such as European basing requirements as part of the upcoming Quadrennial Defense Review (QDR). If confirmed, I look forward to actively participating in the QDR process.

ARMS CONTROL

Question. What role will you have, if confirmed, in future arms control negotiations, such as a follow on to the Strategic Arms Reduction Treaty?

Answer. If confirmed, I would provide advice to the USD(P) on arms control policy with respect to Europe, the Middle East, and Africa and would perform any further duties as assigned by the Under Secretary. It is my understanding, however, that the Assistant Secretary of Defense for Global Strategic Affairs will have lead responsibility within DOD for talks on a follow-on to the Strategic Arms Reduction Treaty.

PRIVATE SECURITY CONTRACTORS

Question. The Special Inspector General for Iraq Reconstruction reported that Federal agencies including DOD have spent more than \$5 billion for private security contractors in Iraq since 2003. Over this period, there have been numerous reports of abuses by private security contractors, including allegations of contractors shooting recklessly at civilians as they have driven down the streets of Baghdad and other Iraqi cities.

Do you believe DOD and other Federal agencies should rely upon contractors to perform security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations?

Answer. I understand the concerns of Congress on this issue and believe that a comprehensive review of the role of military contractors on the battlefield is needed in order to set the terms for how they might be utilized in the future. I also agree with President Obama's views on the need to improve oversight and transparency in how private security contractors are utilized and to establish clear standards regarding accountability, command and control, rules of engagement, and personnel policies. Currently, there are a number of international efforts supported by the Department to establish open, transparent, and enforceable standards of conduct and good practices, such as the Montreux Document, that will enhance our ability to ensure that contractors perform in support of U.S. policies. If confirmed, I will work with civilian and military officials of the Department and others who have primary responsibility for policy development and employment of private security contractors.

Question. In your view, has the U.S. reliance upon private security contractors to perform such functions risked undermining our defense and foreign policy objectives in Iraq?

Answer. I do believe that several high-profile incidents in Iraq involving private security contractors have harmed U.S. policy objectives in Iraq. In December 2007 DOD and the Department of State agreed on consistent procedures for use of private security contractors in Iraq; moreover, both Departments have been transitioning to greater use of local nationals wherever practical. If confirmed, I expect to work on this issue and will keep Congress informed.

Question. What steps would you take, if confirmed, to ensure that any private security contractors who may continue to operate in an area of combat operations act in a responsible manner, consistent with U.S. defense and foreign policy objectives?

Answer. The use of security contractors in any area of combat operations must be fully coordinated among all agencies that employ them. There must be unified procedures and strong oversight for all such contractors, regardless of which U.S. agency hires them. Commanders on the ground should have the authority to restrict or redirect their operations as appropriate. I believe there must be assured legal accountability for the actions of all security contractors, not just those employed by the Defense Department.

Question. How do you believe the ongoing operations of private security contractors in Iraq are likely to be affected by the new SOFA between the United States and Iraq?

Answer. It is my understanding that since January 1, 2009, U.S. Government private security contractors in Iraq no longer have immunity from host nation law. Furthermore, they must comply with host nation registration and licensing requirements. For all contractors, the SOFA has meant substantially more liaison and coordination with Iraqi authorities at all levels.

Question. Do you support the extension of the Military Extraterritorial Jurisdiction Act to private security contractors of all Federal agencies?

Answer. Yes.

Question. What is your view of the appropriate application of the Uniform Code of Military Justice to employees of private security contractors operating in an area of combat operations?

Answer. If confirmed, I would consult with the General Counsel on this question.

CONTRACTOR PERFORMANCE OF INFORMATION OPERATIONS

Question. In October 2008, DOD announced a plan to award contracts in excess of \$300 million to U.S. contractors to conduct "information operations" through the Iraqi media. The purposes of this contract include building up support for the Government of Iraq and the security forces of Iraq, and undermining Iranian influence in Iraq.

What is your view of the appropriate roles, if any, of DOD and the Department of State in media campaigns to build up support for the government and security forces of Iraq and undermining Iranian influence in Iraq?

Answer. I have not had an opportunity to become familiar with the details of these programs, but believe they deserve careful scrutiny. If confirmed, I would expect to look into these matters and discuss them with members of the committee.

Question. What is your view on the effectiveness of information operations conducted by the United States through the Iraqi media?

Answer. See previous answer.

Question. Do you believe that it is appropriate for the United States to pay for media campaigns to build up support for the government and the security forces of Iraq at a time when the Iraqi Government has a surplus of tens of billions of dollars?

Answer. See previous answer.

Question. Do you see a risk that a DOD media campaign designed to build up support for the government and security forces of Iraq could result in the inappropriate dissemination of propaganda inside the United States through the internet and other media that cross international boundaries?

Answer. See previous answer.

Question. A spokesman for the Iraqi Government has been quoted as saying that any future DOD information operations in the Iraqi media should be a joint effort with the Iraqi Government. According to an article in the Washington Post, the spokesman stated: "We don't have a hand in all the propaganda that is being done now. It could be done much better when Iraqis have a word and Iraqis can advise."

Do you believe that DOD information operations through the Iraqi media should be conducted jointly with the Iraqis?

Answer. See previous answer.

Question. Under what circumstances do you believe it is appropriate for DOD to conduct information operations in a sovereign country without the knowledge and support of the host country?

Answer. See previous answer.

DETAINEE TREATMENT POLICY

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the U.S. Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is the prohibition in the best interest of the United States? Why or why not?

Answer. I believe the prohibition on cruel, inhuman, or degrading treatment or punishment is clearly in America's best strategic interest and consistent with our values. During the long history of the Cold War, when America's way of life was challenged by a powerful competing ideology, we were ultimately successful, in part, because we held true to the best ideals and principles that sustained America as a shining beacon to millions under totalitarian rule. Power in the 21st century will stem as much from the strength and appeal of our ideas and moral principles as from our military might. If we are to defeat violent extremism, we must hold true to those ideas that make this country great, and continue to inspire the growth of freedom and tolerance around the world.

Question. If confirmed, will you take steps to ensure that all relevant DOD directives, regulations, policies, practices, and procedures fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. Yes, I will.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. In the past 2 years, significant changes have been made in Iraq in the way detention operations have been conducted in a counterinsurgency environment, including through the establishment of reintegration centers at theater internment facilities.

What do you consider to be the main lessons learned from the changes to detention operations in Iraq?

Answer. I have not had an opportunity to study the changes in detention operations in detail in order to assess lessons learned. If confirmed as ASD(ISA), I would be interested in examining changes to detention operations.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the ASD(ISA)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JACK REED

DARFUR

1. Senator REED. Ambassador Vershbow, the Departments of State and Defense formed the Missing Assets Task Force to conduct a global search for 28 attack and transport helicopters, logistics units, and other assets for the operation in Darfur. As of December 2008, the task force was unable to obtain commitments for the helicopters. Can you please describe the efforts the Department of Defense (DOD) is undertaking to find those assets for the United Nations (U.N.) operation in Darfur?

Ambassador VERSHBOW. The Government of Ethiopia has offered five attack helicopters which the U.N. stated will fill the attack helicopter needs for the United Nations/African Union Mission in Darfur (UNAMID) peacekeeping force. The U.N. is building facilities for these helicopters and working with the Governments of Sudan and Ethiopia to get them deployed.

DOD continues to work with the State Department to identify other sources for these critical enabling assets, using U.S. Defense Attaché Offices (DAOs) to canvas host nation counterparts and providing input to the State Department in developing its diplomatic engagement strategy. Particular areas of focus are advising the State Department in its efforts to secure equipment support for the second Ethiopian multi-role logistics unit; supporting the deployment of Nepalese special forces and sector Reserve companies; and ensuring equipment missing from infantry battalions in UNAMID is en route or will be shortly.

2. Senator REED. Ambassador Vershbow, the National Defense Authorization Act for Fiscal Year 2008 included a reporting requirement that the Secretary of Defense report on the efforts the Department is undertaking “to provide training and guidance to the command of an international intervention force that seeks to prevent mass atrocities.” Do you have that report and can you speak to the Department’s efforts in that regard?

Ambassador VERSHBOW. Section 1266(b) of the National Defense Authorization Act for Fiscal Year 2008 required the Secretary of Defense to submit a report to Congress on “the capability of the DOD to provide training and guidance to the command of an international intervention force that seeks to prevent mass atrocities.” This report is under review by senior DOD officials. We expect it will be transmitted to Congress within the next few months.

DOD has no formal training program or doctrine aimed specifically at command of international intervention forces seeking to prevent mass atrocities. DOD does, however, provide training and possess doctrine adaptable to such forces. DOD maintains the capability to support the development of new doctrine for the training and guidance of an international intervention force if appropriately authorized and resourced to do so. If directed, DOD is prepared to work in cooperation with other Federal departments and agencies to this end.

DOD support to the Department of State-led Global Peace Operations Initiative, which facilitates both the African Contingency Operations Training and Assistance program and the Center of Excellence for Stability Police Units, provides foreign peacekeepers with capabilities that could be useful in the prevention of mass atrocities.

DOD doctrinal documents at both the Capstone and Operational levels do not address the prevention of genocide or mass atrocities specifically, but do highlight related issues such as stability operations, humanitarian relief, human rights and human rights law, the building of civilian capacity to preclude internal conflict, and the separation of combatants.

[The nomination reference of Ambassador Alexander Vershbow follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
March 12, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Alexander Vershbow of the District of Columbia, to be an Assistant Secretary of Defense, vice Mary Beth Long, resigned.

[The biographical sketch of Ambassador Alexander R. Vershbow, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ALEXANDER VERSHBOW

Alexander Vershbow served as Ambassador to the Republic of Korea from October 2005 to September 2008, his final assignment in a career with the U.S. Foreign Service spanning 32 years. Before coming to Korea, Vershbow was recognized as one of the State Department's leading experts in East-West relations, nonproliferation and European security affairs. As Ambassador to Korea, he was centrally involved in the transformation of the Korea-U.S. defense alliance, policy for the Six-Party Talks on North Korea, and securing Korea's participation in the U.S. Visa Waiver Program. In 2007 he won the State Department's Cordell Hull Award for Economic Achievement for his significant contributions to the negotiations on the Korea-U.S. Free Trade Agreement.

From 2001 to 2005, Alexander Vershbow served as U.S. Ambassador to the Russian Federation. During his tenure, the Ambassador worked to promote U.S. Russian cooperation in the areas of counterterrorism and counterproliferation, and to expand the agenda to encompass new challenges such as HIV/AIDS. He was a consistent advocate for the causes of democracy, human rights and rule of law in Russia, and received the American Bar Association's 2004 Ambassador's Award for these efforts. He also promoted U.S. business interests in Russia, advancing American trade, exports and investment while campaigning for the protection of intellectual property rights.

From 1998 to 2001, Alexander Vershbow served as the U.S. Ambassador to the North Atlantic Treaty Organization (NATO). As U.S. Permanent Representative on the North Atlantic Council, Ambassador Vershbow was centrally involved in transforming NATO to meet the challenges of the post-Cold War era, including the admission of new members and the development of relations with Russia, and in NATO's campaign to end the conflict in Kosovo. In June 2001, Secretary of State Colin L. Powell awarded Ambassador Vershbow the State Department's Distinguished Service Award for his work at NATO.

From 1994 to 1997, Alexander Vershbow served as Special Assistant to the President and Senior Director for European Affairs at the National Security Council. During this period, he helped shape U.S. policy toward NATO enlargement, the conflict in Bosnia and other U.S.-European issues. He was a principal member of the U.S. team that helped negotiate the Founding Act between NATO and the Russian Federation signed in 1997. In October 1997, former Secretary of Defense William Cohen presented Mr. Vershbow with the first annual Joseph J. Kruzel Award for his contributions to the cause of peace.

Alexander Vershbow is a long-time student of Russian Affairs and international relations. He received a B.A. in Russian and East European Studies from Yale University (1974) and a Master's Degree in International Relations and Certificate of the Russian Institute from Columbia University (1976). Vershbow was director of the State Department's Office of Soviet Union Affairs during the last years of the USSR and participated in numerous U.S.-Soviet summits and ministerial meetings. In 1990, he was awarded the Anatoly Sharansky Freedom Award by the Union of Councils of Soviet Jews for his work in advancing the cause of Jewish emigration from the USSR. Earlier Foreign Service assignments included postings to the U.S. Embassies in Moscow and London and Advisor to the U.S. Delegation to the Strategic Arms Reductions Talks in Geneva.

Ambassador Vershbow was born in Boston, MA. His wife, Lisa, is a prominent designer of contemporary jewelry.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Ambassador Alexander R. Vershbow in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Alexander Russell Vershbow.
2. **Position to which nominated:**
Assistant Secretary of Defense for International Security Affairs.
3. **Date of nomination:**
March 12, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
July 3, 1952; Boston, MA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Lisa Kaufman Vershbow (maiden name: Lisa Nan Kaufman).
7. **Names and ages of children:**
Benjamin Charles Vershbow, 29; Gregory Michael Vershbow, 26.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

1974–1976, Columbia University, School of International Affairs, New York, NY - Master of International Affairs (M.I.A.) & Certificate of the Russian Institute.

1970–1974, Yale University, New Haven, CT - B.A. Russian/East European Studies.

1963–1970, Browne & Nichols School, Cambridge, MA - High School Diploma.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

U.S. Department of State - Career Member of the Foreign Service, 1977–2008.

Assignments in last 10 years:

10/05–09/08, U.S. Ambassador to the Republic of Korea, Seoul.

07/01–07/05, U.S. Ambassador to the Russian Federation, Moscow.

01/98–07/01, U.S. Ambassador to the North Atlantic Treaty Organization (NATO), Brussels, Belgium.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Earlier Assignments in the Foreign Service (only other Government experience):

06/94–09/97, Special Assistant to the President and Senior Director for European Affairs, National Security Council, Washington, DC.

06/93–06/94, Principal Deputy Assistant Secretary of State for European and Canadian Affairs, U.S. Department of State, Washington, DC.

02/93–06/93, Acting U.S. Permanent Representative to the North Atlantic Council, Chargé d'affaires, U.S. Mission to NATO, Brussels, Belgium.

08/91–02/93, Deputy U.S. Permanent Representative and Deputy Chief of Mission, U.S. Mission to NATO, Brussels, Belgium.

08/88–07/91, Director, Office of Soviet Union Affairs, U.S. Department of State, Washington, DC.

07/85–07/88, Deputy Counselor for Political Affairs, U.S. Embassy, London, U.K.

08/83–07/85, Deputy Director for Multilateral and Security Affairs, Office of Soviet Union Affairs, U.S. Department of State, Washington, DC. Part-time Advisor to the U.S. Delegation to Strategic Arms Reductions Talks (START), Geneva, Switzerland.

07/81–07/83, Multilateral and Security Affairs Officer, Office of Soviet Union Affairs, U.S. Department of State, Washington, DC.

06/80–07/81, Political Officer, U.S. Embassy, Moscow, USSR.

06/69–06/80, Consular Officer, U.S. Embassy, Moscow, USSR.

05/77–06/79, Politico-Military Affairs Officer, Office of International Security Policy, Bureau of Politico-Military Affairs, U.S. Department of State, Washington, DC. Part-time Advisor to the U.S. Delegation to Strategic Arms Limitation Talks (SALT II), Geneva, Switzerland.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

American Foreign Service Association (AFSA), 1977–present.

Phi Beta Kappa, 1974–present.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

2008: Obama/Biden Campaign, \$500.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

2008, Cordell Hull Award for Economic Achievement by Senior Officers, U.S. Department of State - for work on Korea-U.S. trade negotiations.

2008, Diplomatic Order of Merit - Award presented by the President of the Republic of Korea for contributions to U.S.-Korea relations.

2008, Agency Seal Medal, Central Intelligence Agency.

2007, Honorary Doctor of Public Affairs, University of Maryland, University College.

2005, Honorary Doctor of Philosophy, Nizhniy Novgorod State Linguistic University, Russia.

2005, Gold Record, Recording Industry Association of America (RIAA) - for efforts to combat CD/DVD piracy in Russia.

2004, Ambassador's Award, American Bar Association's Central European and Eurasian Law Initiative (ABA-CEELI) - for efforts to promote democracy and the rule of law in Russia.

2004, Friend of the American Chamber of Commerce, Moscow, Russia.

2002, Commander of the Order of Grand Duke Gediminas of the Republic of Lithuania - for work in support of the enlargement of NATO.

2001, Distinguished Service Award, U.S. Department of State - for work as Ambassador to NATO on Kosovo and transformation of NATO.

2001, Commander (Commendatore) of the Order of Merit of the President of the Republic of Italy - for work as U.S. Ambassador to NATO.

2000, Group Superior Honor Award, U.S. Department of State - for work on NATO's 50th-anniversary summit in 1999.

1997, Joseph J. Kruzel Award, U.S. Department of Defense - award in memory of U.S. official killed in Bosnia 1995, for work for peace in the Balkans.

1990, Anatoly Sharansky Freedom Award, Union of Councils of Soviet Jews for work to overcome obstacles to Jewish emigration from the USSR.

1997, Various Presidential Senior Foreign Service Awards, State Department.

2008, Meritorious Service, Superior Honor and Senior Performance Awards.

1980s, Term Member of the Council on Foreign Relations.

1975-1976, Fellowship of School of International Affairs, Columbia University.

1974, White History Prize, Yale University.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

TUESDAY, APRIL 28, 2009

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:04 a.m. in room SD-106, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Reed, Akaka, Bill Nelson, Ben Nelson, Webb, McCaskill, Udall, Hagan, Begich, Burris, McCain, Inhofe, Martinez, Wicker, and Collins.

Also present: Senators Baucus, Cochran, and Landrieu.

Committee staff members present: Richard D. DeBobes, staff director; Leah C. Brewer, nominations and hearings clerk; and Paul J. Hubbard, receptionist.

Majority staff members present: Madelyn R. Creedon, counsel; Richard W. Fieldhouse, professional staff member; Creighton Greene, professional staff member; Michael J. Kuiken, professional staff member; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; William G.P. Monahan, counsel; Russell L. Shaffer, counsel; and William K. Sutey, professional staff member.

Minority staff members present: Joseph W. Bowab, Republican staff director; Pablo E. Carrillo, minority investigative counsel; Daniel A. Lerner, professional staff member; David M. Morriss, minority counsel; Lucien L. Niemeyer, professional staff member; Christopher J. Paul, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Kevin A. Cronin and Christine G. Lang.

Committee members' assistants present: Christopher Griffin, assistant to Senator Lieberman; Ann Premer, assistant to Senator Ben Nelson; Jon Davey and Patrick Hayes, assistants to Senator Bayh; Gordon I. Peterson, assistant to Senator Webb; Jennifer Barrett, assistant to Senator Udall; Brady King, assistant to Senator Burris; Anthony J. Lazarski, assistant to Senator Inhofe; Jason Van Beek, assistant to Senator Thune; Brian W. Walsh, assistant to Senator Martinez; Erskine W. Wells III, assistant to Senator Wicker; Rob Epplin and Chip Kennett, assistants to Senator Collins.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. This is a very, very exciting morning for many of us, for families and friends. We have a huge agenda ahead of us. So we are going to have to push on.

Instead of the nominees sitting at that table, I would suggest if you can find room on the side, you do that, and let our introducers all sit at that table because we are going to start off with them as soon as I make a brief opening statement.

I wonder if the Senators who are going to be making introductions can just sit right at the green table there right now, and then we will call on you in order. We are going to change things around a little bit here, save some time.

Senator Baucus, you can just sit anywhere there, too.

Today, the committee considers a number of nominations for the Department of Defense (DOD). In the first panel, we are going to hear from the following nominees: the Honorable Raymond Mabus to be Secretary of the Navy, Robert Work to be Under Secretary of the Navy, Elizabeth King to be Assistant Secretary of Defense for Legislative Affairs, and Donald Remy to be General Counsel for the Department of the Army.

In the second panel, we are going to hear from the following nominees: Dr. Michael Nacht to be Assistant Secretary of Defense for Global Strategic Affairs, Wallace Gregson to be Assistant Secretary of Defense for Asian and Pacific Security Affairs, Jo-Ellen Darcy to be Assistant Secretary of the Army for Civil Works, and Dr. Inés Triay—I hope I am pronouncing that name correctly—to be Assistant Secretary of Energy for Environmental Management.

Now, I am going to cut short my comments about each of the nominees until we come to their panel because we want to give the Senators who are with us to make introductions an opportunity to proceed because of the schedules that they have, and then I will also avoid repeating a lot of what we expect they will be saying.

Let me call on Senator McCain for his opening comment.

Senator MCCAIN. As I always follow your lead, Mr. Chairman, I will do the same.

Thank you.

Chairman LEVIN. Thank you very much, Senator McCain, as always for your great cooperation.

Senator MCCAIN. I welcome the nominees, and I know our colleagues will make their remarks very brief also. [Laughter.]

Chairman LEVIN. Well, I think we may leave each other at that point. I am not sure.

Now we are going to call on our colleagues who are going to be making the introductions first. Senator Baucus.

STATEMENT OF HON. MAX BAUCUS, U.S. SENATOR FROM THE STATE OF MONTANA

Senator BAUCUS. Thank you, Mr. Chairman.

Abraham Lincoln once said, "Character is like a tree and reputation like its shadow. The shadow is what we think of it. The tree is the real thing."

Chairman Levin, Ranking Member McCain, fellow Senators, as you prepared for this hearing, you likely learned about the fine reputation of Jo-Ellen Darcy. Having known and worked with Jo-Ellen for the last 16 years, I can assure you that Jo-Ellen has an unprecedented knowledge of the Army Corps of Engineers and has the highest character. She has earned her reputation. Jo-Ellen is the real thing.

She joined the staff of the Environment and Public Works Committee in 1993 when I became chairman. She worked on the committee for more than a decade, responsible for, among other things, legislation relating to the Clean Water Act, Safe Drinking Water Act, and Endangered Species Act.

Perhaps her most important contribution in this area was her work on the Safe Drinking Water Act of 1996, which is, to my mind, a model environmental law because it makes the law work more efficiently for cities and towns, and at the same time, it improves the protection of public health.

Most relevant to the position to which she has been nominated, Jo-Ellen was also the principal staffer responsible for legislation leading to the Water Resources Development Act. She became one of the Nation's foremost authorities on that law.

During her tenure, she helped pass some of the Corps' most sweeping initiatives, from restoring the Everglades to better protecting New Orleans in the wake of Hurricanes Rita and Katrina and requiring independent peer review of Corps projects.

Jo-Ellen's work has restored ecosystems, improved public safety, repaired our water infrastructure, and made the Corps more transparent and more accountable. If confirmed, I am sure she will continue to improve the work of the Army Corps of Engineers.

In 2006, I was able to persuade Jo-Ellen to join the staff of the Senate Finance Committee, where she was instrumental in developing a series of tax initiatives for environmental protection, including those that were enacted as part of the farm bill. She has a record of great accomplishment, which is reflected in important environmental laws and environmental restoration projects all across the country.

She knows the Civil Works Programs of the Army Corps as well as anyone. She knows the law. She knows the Congress and, in particular, the Senate and its committees, and she is uniformly re-

spected for an effective, pragmatic, and bipartisan approach to her work.

On a personal note, I would like to add that Jo-Ellen has achieved all of these accomplishments not only because of brains and hard work, but also because of her values. Her father, Dick Darcy, was a detective on the Fitchburg, Massachusetts, police force. He and his wife, Jean, raised Jo-Ellen to have strong values, especially fairness and open-mindedness, qualities that will serve her well.

I am sure that, although he has passed away, Dick Darcy would be proud of his daughter today. I know that Jo-Ellen's mom, who is not able to travel here today, and her sisters, brothers, cousins, nieces, and nephews, many of whom I have met, could not be more pleased and proud about this nomination.

So, Mr. Chairman, like you, I believe that there are few higher callings than public service. Jo-Ellen Darcy is the epitome of someone who has devoted her professional career to service, and I could not be more proud that the President has nominated her to serve as Assistant Secretary of the Army for Civil Works. Jo-Ellen is the real thing.

Thank you.

Chairman LEVIN. Thank you so much, Senator Baucus. We appreciate you and all of our colleagues coming here today for these very special moments in introduction.

Senator Cochran.

**STATEMENT OF HON. THAD COCHRAN, U.S. SENATOR FROM
THE STATE OF MISSISSIPPI**

Senator COCHRAN. Mr. Chairman, thank you very much for the opportunity to be here before the committee.

I am here to introduce to the committee the Honorable Ray Mabus, who has been nominated by the President to serve as Secretary of the Navy.

This distinguished nominee has had a career of public service in our State that is quite impressive. After graduating summa cum laude from Old Miss in 1969 and completing a Woodrow Wilson fellowship at Johns Hopkins University in 1970, he served 2 years as a naval surface warfare officer onboard the USS *Little Rock*.

After completing his active duty in naval service, he attended Harvard Law School and graduated magna cum laude in 1976. He served as a law clerk to Judge J.P. Coleman on the 5th Circuit Court of Appeals, and he also worked as legal counsel to the U.S. House of Representatives Agriculture Committee here in Washington.

He returned to Mississippi to work in Governor William Winter's office and was elected Mississippi State auditor in 1983, where he served with distinction. Four years later, he was elected Governor of our State, and he led a period of record economic development, streamlined State government, and improved Mississippi's public schools.

Ambassador Mabus was appointed by President Clinton to be United States Ambassador to Saudi Arabia in 1994. He served there for 2 years before returning to the private sector. He served on several corporate boards of international businesses. He is a

member of the RAND Center for Middle East Public Policy and the Council on Foreign Relations.

I know that Ambassador Mabus will bring to this job the same high level of energy and skill that has been the hallmark of his career throughout the many responsibilities of public service that he has held. His academic credentials, his record of distinguished service to the State of Mississippi and to our country has been exemplary.

His integrity and judgment will also serve him well, and he will certainly prove to be, in my opinion, an excellent choice to be Secretary of the United States Navy. I commend President Obama for nominating him, and I look forward to working with him in this new capacity.

Thank you.

Chairman LEVIN. Thank you, Senator Cochran.

I think we will complete the introductions for Governor Mabus and call on Senator Wicker now.

STATEMENT OF HON. ROGER F. WICKER, U.S. SENATOR FROM THE STATE OF MISSISSIPPI

Senator WICKER. Thank you very much, Mr. Chairman and my fellow colleagues on the committee.

It is an honor for me to be here today. Senator Cochran and I represent the Magnolia State of Mississippi. If you could sit a little closer to me, in honor of Governor Mabus, I am wearing my magnolia tie this morning.

We are joined by two colleagues from the House of Representatives, Chairman Bennie Thompson of the 2nd District of Mississippi and Representative Travis Childers of the 1st District of Mississippi. So it is a proud moment for people in the Magnolia State—Republican, Democrat, and Independent. Senator Cochran's presence and introduction testifies that we are continuing today in a strong tradition of bipartisanship of this Congress when it comes to matters of national defense.

Let me simply reiterate that in nominating Governor and Ambassador Mabus, President Obama has chosen well. Senator Cochran mentioned the stellar academic record of Governor Mabus as a top graduate from the University of Mississippi, a master's at Johns Hopkins, and a law degree from Harvard. Clearly, a great quantity of gray matter will be housed in the Navy department in the person of Ray Mabus.

His service as a naval surface warfare officer I think will serve him well in this capacity. As Thad mentioned, he has twice been elected to State-wide office as auditor of public accounts and as Governor of Mississippi.

When I had the opportunity to serve with Governor Mabus as a freshman Republican State senator from Lee County, I think it is fair to say that when Ray Mabus and Roger Wicker were sitting around the Governor's office, perhaps sharing differing views on various approaches to revenue challenges that we were having during that time, neither of us expected to be in this room at this particular moment in 2009 with this introduction.

Nevertheless, I am delighted to be here and to join Senator Cochran in this introduction. I think Governor Mabus' experience as

Ambassador to Saudi Arabia will also stand him in good stead, as will his experience in the private sector as Chief Executive Officer of Foamex, a polyurethane company, where he helped to move the company out of Chapter 11 bankruptcy.

Governor Mabus is joined today by his lovely family, and I am sure, Mr. Chairman, you will want him to make that introduction. But, indeed, they are a credit to Governor Mabus, Ambassador Mabus.

I expect Ray to run a tight ship for the taxpayers, and I think the President has chosen well on behalf of national security and on behalf of the best interest of America's sailors and marines.

I thank you very much, and I am delighted to join my senior colleague in this introduction.

Chairman LEVIN. Well, thank you both for a wonderful introduction, and thanks to your colleagues from the House for joining us here today as well.

Senator Landrieu.

STATEMENT OF HON. MARY L. LANDRIEU, U.S. SENATOR FROM THE STATE OF LOUISIANA

Senator LANDRIEU. Thank you, Mr. Chairman, and thank you, Senator McCain and fellow Senators, ladies and gentlemen.

I am here for two reasons this morning, and I will be brief. One is to reluctantly support my friend Ray Mabus for Secretary of the Navy, only under the condition that he be fair to the State of Louisiana in shipbuilding with our neighbor Mississippi. But I am convinced that he will, and I have observed him for many years, and he will be an outstanding leader.

Second, Mr. Chairman, to joyfully introduce to you Donald Michael Remy, who is being nominated for General Counsel for the Department of the Army. Although Mr. Remy was born close here to Washington, DC, his roots go very deep in Louisiana. He is here with his parents, who I would like the committee to welcome: Master Sergeant Donald E. Remy and his wife, Mrs. Ann Remy, who come from Harvey, LA.

His father dedicated many of his years to the Army, retiring finally from Fort Polk. Ann is the bedrock that has kept this family Army strong these many years and, I am confident, had a great influence in preparing her son for the position that he is being nominated by President Obama this morning.

Of course, Don's wife, Monitra, and his two sons, Alex and Jason. Would you welcome the family this morning?

Thank you.

As I said, he was born in Fort Lee, VA, but his roots run deep, graduating from Leesville High School, and graduating cum laude Howard University Law School. He received his undergraduate degree from Louisiana State University.

Throughout his career, Mr. Remy has served in numerous capacities, both the Government and private sector. Early on as an Army officer assigned to the Pentagon, he advised senior Army officials on numerous legal and policy issues related to major weapon acquisition systems. He has also served in the Department of Justice as senior counsel for policy and as Deputy Assistant Attorney General for Torts in Federal program branches of the Civil Division.

Moving into the private sector, where he has extensive experience, he served as attorney for a major U.S. company. He currently is a partner in a major and very prestigious Washington, DC, law firm of Latham & Watkins.

Mr. Remy has demonstrated tremendous commitment to this field over many years. He is no stranger here on Capitol Hill, having published, lectured, and testified before Congress on numerous occasions.

I have appreciated the opportunity, Mr. Chairman, to work over the years with Don Remy. Our paths have crossed, particularly as he led efforts to help our continued work to rebuild the Gulf Coast after Hurricanes Katrina and Rita. Confirming him will bring credit to this committee as well as to DOD and our Nation. So I urge you to confirm him as expeditiously as possible for general counsel of the Department of the Army.

Thank you very much, and I appreciate the opportunity, Mr. Chairman.

Chairman LEVIN. Thank you so much, Senator Landrieu, and thank you all for coming.

Senator WICKER. Mr. Chairman?

Chairman LEVIN. Senator Wicker?

Senator WICKER. I have noticed that since the hearing began, we have been joined by a third colleague from the House, Chairman Gene Taylor of Mississippi, the chairman of the Seapower Subcommittee of our counterpart at the other end of the building. So we are delighted to have three members of the House here in support of Governor Mabus.

Senator LANDRIEU. Now I am really feeling nervous, Mr. Chairman. Thank you. [Laughter.]

Chairman LEVIN. Another old friend. We welcome them all.

Now, Senator Reed has an introduction.

STATEMENT OF HON. JACK REED, U.S. SENATOR FROM THE STATE OF RHODE ISLAND

Senator REED. Thank you very much, Mr. Chairman.

I am privileged and extraordinarily proud to introduce Elizabeth L. King, the President's nominee to be Assistant Secretary of Defense for Legislative Affairs. Liz and I have been colleagues for 13 years, as she has been a colleague to this committee.

She has an extraordinary grasp of the legislative issues and the legislative process. But she is also outstanding in terms of her intelligence, her integrity, her judgment, and her commitment to the men and women who serve in the military forces.

That commitment is not just rhetorical. I doubt there are very few civilian appointees to DOD that can claim they have traveled 11 times to Iraq to visit forces in the field, 7 times to Afghanistan, 4 times to Pakistan, to Colombia, to Bosnia when we had troops committed there, and to East Timor when we had a Marine Expeditionary Corps there. She has seen what soldiers, sailors, marines, and airmen do, how difficult it is, and she will represent them extremely well on Capitol Hill.

She has great experience not only here in the Senate, but in the process of the 1995 Base Realignment and Closure Commission, she was a chief assistant to the chairperson. She served in the

House with Congressman Marty Meehan of Massachusetts. She is, again, an extraordinary individual.

She is a product of a strong, devout family of Chicago. Leo and Rita King are not with us today, but their legacy lives on in a woman committed to public service. Her sister Celeste and Liz are raising their nephew Brendan, who is not here today because he is getting ready for the SAT. Brendan's mother, Bernadette, passed away too soon, but with two strong Irish women behind him, he is going to be a great success, I am sure.

It is difficult to part company with someone you have worked with as a colleague for 13 years, but I do so knowing that she can serve even more widely and more adroitly than any woman in the armed services in her new position. I am proud to introduce her to this committee.

Chairman LEVIN. Thank you very much, Senator Reed.

Now Senator Webb will be introducing General Gregson, but he is on the second panel. We expect Senator Webb will be able to get here for that second panel.

Let me just make one introduction because there was no one here to introduce Mr. Work.

Mr. Work served a career in the Marine Corps, retiring after 27 years of service. He then served at the Center for Strategic and Budgetary Assessments, where he has focused on defense strategy, transformation, and also maritime affairs.

Our other nominees on the first panel have all been introduced, so I will not repeat what has been said about them. I will put my statement regarding them, however, in the record.

[The prepared statement of Senator Levin follows:]

PREPARED STATEMENT BY SENATOR CARL LEVIN

Today, the committee considers a number of nominations for the Department of Defense. In the first panel, we will hear from the following nominees: the Honorable Raymond E. Mabus to be Secretary of the Navy; Robert O. Work to be Under Secretary of the Navy; Elizabeth L. King to be Assistant Secretary of Defense for Legislative Affairs; and Donald M. Remy to be General Counsel of the Department of the Army. In the second panel, we will hear from the following nominees: Dr. Michael Nacht to be Assistant Secretary of Defense for Global Strategic Affairs; Wallace Gregson to be Assistant Secretary of Defense for Asian and Pacific Security Affairs; Jo-Ellen Darcy to be Assistant Secretary of the Army for Civil Works; and Dr. Inés R. Triay to be Assistant Secretary of Energy for Environmental Management.

Each of our nominees has a long history of public service. Governor Mabus served as Governor of Mississippi, and from 1994 to 1996, was Ambassador to Saudi Arabia. Subsequently, Governor Mabus served as Chairman and Chief Executive Officer of Foamex, a large manufacturing company, where he led that company out of bankruptcy. Notably, Governor Mabus served in the Navy as a surface warfare officer aboard the cruiser USS *Little Rock*.

Mr. Work served a career in the Marine Corps, retiring after 27 years of service. Thereafter, he has served at the Center for Strategic and Budgetary Assessments, where he focused on defense strategy and transformation and maritime affairs.

Ms. King is well known to this committee. For the past 12 years, Ms. King has served as Counsel and Senior Policy Advisor for Senator Jack Reed for defense, foreign affairs, and veterans' issues. Prior to that, she was legislative director for a member of the House Armed Services Committee, and was counsel to the 1995 Base Realignment and Closure Commission.

Mr. Remy is a partner at the law firm of Latham & Watkins, where he has dealt with criminal and civil litigation, and advised clients on International Traffic and Arms Regulations, the Office of Foreign Assets Control and Foreign Corrupt Practices Act enforcement. From 1997 to 2000, Mr. Remy served in the United States Department of Justice as a Senior Counsel for Policy and as a Deputy Assistant Attorney General for the Torts and the Federal Programs Branches of the Civil Divi-

sion. Earlier, as an Army Captain, Mr. Remy was an Assistant to the General Counsel of the Army from 1991–1995, where he advised senior Army officials on legal and policy issues concerning all aspects of government contracting, specifically including major weapon system acquisition.

I will save the introductions for the second panel until we have finished questioning the first panel.

We welcome our nominees and their families to today's hearing. Senior Department of Defense officials put in long hours every day, and we appreciate the sacrifices that our nominees and their families are willing to make to serve their country.

If confirmed, Governor Mabus and Mr. Work will assume leadership of the Navy organization at a difficult time. There are well known concerns about naval aviation and potential shortages of aircraft, Navy shipbuilding programs that are behind schedule and over budget, and more recently, we are hearing reports of readiness problems with the fleet. These are very difficult issues that will merit their personal attention.

If confirmed, Ms. King will join DOD when communications between Congress and the Department of Defense will be critical. As I am sure Ms. King knows, the Assistant Secretary for Legislative Affairs, has two sets of clients: one set in the Department, where she will assist the Secretary in representing Departmental positions to Congress, and another set in Congress, where she will represent the concerns of Congress to the Secretary and his team as they consider and decide major policy issues.

If confirmed as General Counsel for the Department of the Army, Mr. Remy will lead the Army legal team as the Army's chief legal officer, determine the controlling legal positions of the Department of the Army and provide professional guidance to the Army's legal community. He will come to this position at a time when there are many concerns and issues to be addressed relating to personnel and acquisition matters.

I look forward to the testimony of our nominees on these and other important issues.

Senator McCain, do you have a statement that you would like to make at this time?

I know that we have a number of Senators who have requested time to make introductions this morning. In the interest of time, we will hear from those Senators at the beginning of the hearing, without regard to the panel which includes the nominee to be introduced.

Chairman LEVIN. I guess the order of battle here is first to call on Governor Mabus.

STATEMENT OF RAYMOND E. MABUS, JR., NOMINEE TO BE SECRETARY OF THE NAVY

Ambassador MABUS. Mr. Chairman, Mr. Ranking Member, members of the committee, thank you so much for giving me this opportunity to appear before you.

I want to thank Senator Cochran and Senator Wicker for their very kind introductions. I have worked with both for more than two decades, and I appreciate it very much.

I also thank the members of the Mississippi congressional delegation: Gene Taylor, Bennie Thompson, Travis Childers, and Congressman Gregg Harper had a conflict today and could not be here. But thank you so much for being here today in support of my nomination.

Chairman LEVIN. Governor, I am sorry, let me interrupt you just for a minute.

Ambassador MABUS. Absolutely.

Chairman LEVIN. I failed to say something which is perhaps the most important, which is how indebted we are to all of your families, whether they are here or they are not able to be here, for their great support of you. It makes a huge difference in your lives, as

you all know because you have been in public service. Each of you feel free to make those introductions as you proceed.

Ambassador MABUS. Thank you so much, Mr. Chairman, and that gives me a great segue into introducing my family.

My wife, Lynne, who is a nurse and whose father was an Air Force doctor when she was born; our daughter Elisabeth, who is a freshman at Harvard; our daughter Annie, who is a junior at St. Andrew's Episcopal School in Mississippi; and our daughter Kate, who is a second grader, also at St. Andrew's.

I want to echo what the chairman said about how important families are, particularly in just being there when people are in public service.

I also want to express my deep appreciation to President Obama for nominating me to this position and Secretary Gates for everything that he has done.

The Navy and the Marine Corps play critical roles in our Nation's service: fighting America's wars, projecting power where needed, protecting the sea lanes, delivering disaster relief, cooperating with other countries in efforts to multiply force, trying and preventing conflicts from arising or from turning into things which are larger, more dangerous, and harder to control, providing training and other assistance to nations around the globe, and doing many of these things in a sea-based, minimum footprint way.

The job of the Secretary has many facets. They range from making sure that the Navy and Marine Corps recruit, train, and retain exceptional forces, to ensuring that those forces have enough of the right equipment to do their job, to caring for them and their families daily and especially in times of crisis, to working with Congress and the other Services in the larger DOD.

These are important times for the Marine Corps and the Navy. Thousands of brave marines and sailors are engaged in Iraq and Afghanistan while courageous thousands more carry out hazardous duties around the globe. These incredible, wonderful young Americans all volunteered to serve and are defending and representing the United States and all of us.

The Navy Department faces complex challenges. One of the most important is gaining control of an acquisition process, which far too often overpromises and underprices, breaks—sometimes spectacularly—budgets and schedules, ups requirements while lowering quantities, and resists accountability. If confirmed, this will be one of my areas of concentration.

Again, if confirmed, I look forward to working with the members of this committee to make sure we don't shortchange our sailors, marines, and taxpayers because of an out-of-control process.

My family history and my life's experiences will, if you confirm me, be crucial in doing this exacting job. My father served as a naval officer during World War II. His brother, my uncle, was a West Point graduate who was at the academy during World War I and served again during World War II. My mother's youngest brother, another uncle of mine, flew in both the North African and European theaters during World War II.

When it came my time to serve, I became a surface warfare officer in the Navy, and the time I spent in the Navy as a young man

was one of the most profound experiences of my life. It helped me so much in the other things that I have undertaken.

The people of Mississippi have honored me beyond measure by electing me both Governor and, before that, State auditor. As auditor, it was my job to make sure public money was being spent correctly. In it, I learned about hard decisions involving finance.

From my period as Governor, I know that one person cannot do everything and that cooperation and collaboration, especially with the legislative branch, is crucial if anything is to be accomplished.

Later, when I served as United States Ambassador to Saudi Arabia, I saw firsthand what our military and all of us face in that critical and exceedingly complex part of the Earth. From my time in the private sector, I bring lessons of efficiency and competition.

As a youngster growing up in Ackerman, MS, I could not have imagined how rich and varied my life was to be so far. I, like so many people in this room, have lived my own part of the dream that is quintessentially American.

If you confirm me, I look forward to working with you, the President, Secretary Gates, and many others to make sure that the country which allows such dreams is well protected by our Navy and Marine Corps.

Thank you, and I look forward to your questions.

Chairman LEVIN. Thank you so much, Governor.

Next we will call on Robert Work, nominated to be Under Secretary of the Navy.

**STATEMENT OF ROBERT O. WORK, NOMINEE TO BE UNDER
SECRETARY OF THE NAVY**

Mr. WORK. Mr. Chairman and Senator McCain, distinguished members of the committee, I am truly honored to be before you today as President Obama's nominee as the Under Secretary of the Navy. Serving in this post would be a great privilege, and I am grateful to both the President and Secretary Gates for choosing me for this position.

I would also particularly like to thank my family for being here today and supporting me, and I would like to introduce them to the panel and yourself, sir.

First is the love of my life, my bride of 31 years, Cassandra. She is a former Army nurse and mother of my beautiful daughter, Kendyl, who is finishing her first year at Randolph Macon College here in Virginia. I am forced to tell you that she is a proud new sister in Delta Zeta sorority. I am also joined by my brother, Skip, a former marine and now a director for contracting and an author.

Unfortunately, neither my dad nor mom could be here today. My father fought as a marine in three different wars, retired after over 30 years of active duty. But he was a marine until the day he died. My mom was a Navy nurse, served in World War II. I, myself, was a marine for 27 years, and my brother, Skip, a marine for another 20.

So my birth family has contributed about 84 years of active service to the Nation in the Department of the Navy, my wife another 6 in the Department of the Army, and my wife and daughter another 34 years supporting me while I was on active duty.

So as you might imagine then, Mr. Chairman and members of the committee, I am both humbled and excited about the prospect of returning to service and especially at having the opportunity of being in a department that I so respect and love. If we are confirmed, I look forward to helping Governor Mabus lead the finest Navy and Marine Corps in the world and working closely with members of the committee and your respective staffs in carrying out the duties and responsibilities of the Under Secretary of the Navy.

Being called upon to serve our country at any time is a great honor, but being asked to serve in time of war is an especially high one and one that comes with important responsibilities. If confirmed, I give you my word I will do everything possible to ensure that our brave sailors and Marines have what they need to prevail in combat and that they go into harm's way knowing that their families will receive the support that they deserve.

I will also work hard with the Secretary of the Navy to ensure that our nearly 11,000 wounded warriors receive the best care possible and that the families of our fallen are treated with the dignity and respect they deserve.

I am also mindful that because of what looks like to be an especially challenging fiscal and budgetary environment, the incoming Secretary and Under Secretary will be forced to make hard decisions about the future Navy and Marine Corps. If confirmed, I believe that my lifelong experience, first as an active duty dependent, then a military officer, a husband and father of a military family, and a leader strategist and analyst, well prepares me to contribute to these decisions.

However, I pledge not to enter this important job with any preconceived notions or positions. I will listen to the best available civilian and military advice and, when asked, give honest, pragmatic advice and counsel to the Secretary of the Navy, the Secretary of Defense, and the President.

If confirmed as the Under Secretary, I will also work hard as the department's Chief Management Officer (CMO) to tee up well thought-out positions and recommendations to the Secretary on a full range of Department of Navy activities, lead and manage the Department's Senior Executive Service, and explore ways to improve departmental business practices across the board.

In closing, I want to again thank President Obama for nominating me to this position and Secretary Gates for supporting my nomination. I am honored and truly humbled to be before you today. If the Senate chooses to confirm me in this position, I hope to justify your trust fully and look forward to working closely with all of you in maintaining our great Navy and Marine Corps.

Thank you, Mr. Chairman. I look forward to the questions.

Senator INHOFE. Mr. Chairman? Mr. Chairman?

Chairman LEVIN. Yes?

Senator INHOFE. Just a brief comment. I am ranking member on the Environment and Public Works Committee. My attendance is required at a meeting coming up.

But I want to say and get on the record that I am in full support of all the nominees today on both panels. I have worked with Ms. King back when she was with Marty Meehan on different causes,

and certainly with Jo-Ellen Darcy, I agree with everything that Senator Baucus said.

I want to make this one comment, though. I know there is some request to have a confirmation hearing for Ms. Darcy before the Environment and Public Works Committee, and I think that if I can just go ahead and submit the questions as it would pertain to that committee, maybe that can be avoided. We will try to do that.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Inhofe.

Now Liz King is an old friend of this committee. It is wonderful to see you here in any capacity, but a little bit strange to see you on the other side of this dais.

Ms. KING. Indeed.

Chairman LEVIN. Welcome.

STATEMENT OF ELIZABETH L. KING, NOMINEE TO BE ASSISTANT SECRETARY OF DEFENSE FOR LEGISLATIVE AFFAIRS

Ms. KING. Thank you. Thank you, Mr. Chairman.

Senator Levin, Senator McCain, members of the committee, thank you for the opportunity to appear here today.

I would like to begin by recognizing and thanking my sister Celeste and my nephew Brendan. While they could not be here today, I know they are with me in spirit, and their love, understanding, and camaraderie mean the world to me.

I would also like to thank a small army of friends, many of whom are here today. They have given me their love, support, and loyalty for many years, and it has made all the difference.

Finally, I would like to thank Senator Reed not only for his introduction, but for the privilege of working for him for the past 13 years. He has been a wonderful boss, mentor, and friend. Opportunities to work for someone like him do not come along often in one's life, and I will always treasure the experience.

It has been an honor to work on Capitol Hill for the past 14 years. If I am confirmed, I may be switching offices, but I look forward to continuing to work with the members of the Senate and House and their staffs to solve problems, implement legislation, and provide needed information in a timely fashion.

I hope to foster a strong partnership between Congress and the DOD so that together we can reach the common goal of meeting the needs of the men and women in uniform who tirelessly serve our Nation.

Thank you.

Chairman LEVIN. Thank you very much, Ms. King.

Now Mr.—is it “Ray-mee” or “Ree-mee”?

Mr. REMY. It is “Rem-mee,” Mr. Chairman.

Chairman LEVIN. Remy. I will get it right the third time. Mr. Remy?

STATEMENT OF DONALD M. REMY, NOMINEE TO BE GENERAL COUNSEL OF THE DEPARTMENT OF THE ARMY

Mr. REMY. Thank you, Mr. Chairman.

Chairman Levin, Senator McCain, and distinguished members of the committee, it truly is an honor and a privilege to appear before you today as the nominee for General Counsel of the Army.

I am grateful to President Obama for his confidence in me and, if confirmed, for giving me the opportunity to return to my roots at the Pentagon and serve alongside the men and women, civilian and uniformed, who protect and defend our country.

Mr. Chairman, I am especially thankful to you, to Senator McCain, the committee, and your staffs for holding this hearing so promptly. I also want to thank Senator Landrieu for her kind introduction.

If I may, I would like to follow up on the introduction that Senator Landrieu provided of my family. Were it not for the unconditional love and support of my family, my friends, and for the grace of God, I would not be before you today.

In the audience today is my partner and head coach in what we refer to as "Team Remy," Monitra, my wife. She has been with me on our journey for 22 years, since our days in Reserve Officers' Training Corps as cadets together.

Seated beside her are our two terrific sons: Alex, who is 15, and Jason, who is 11. Members of the committee, these two boys are happy to be here today and enjoy this civics lesson rather than go to school. [Laughter.]

Their mother and I could not be more proud of the young men they have become and the future that they have ahead of them. Indeed, it wasn't until I was a parent myself that I truly appreciated all that my parents did to help me become the man that I am.

Last year, Secretary of the Army Geren declared 2009 the Year of the Noncommissioned Officer (NCO), and I can think of no better tribute to the NCO than to offer my thanks in this forum to my father, retired Army Master Sergeant Donald Remy, who was awarded the Bronze Star for his service in Vietnam.

But we all know that beside every great soldier is the soldier's spouse. Just as my father dedicated 25 years of service to this Nation, so, too, did my mother, Ann Remy. Whether my father was deployed or at home, my mother was steadfast in caring for and raising not just me and my brother Adrian and sister Renee, who could not be here today, but also many other sons and daughters of our Army community.

While many friends and colleagues are here today, I want to thank, in particular, my sister-in-law, Christine Butler, for her presence and always being there for our family. I also want to recognize one of my closest friends, former Federal Communications Commission chairman, the Honorable Michael Powell.

America's Army is pivotal to the strength of our Nation. In an ever-changing global dynamic, the Army continues to adapt its aim to achieve and maintain balance for the 21st century. The issues, particularly the legal issues that arise in that context are complex, challenging, and, in some instances, unprecedented.

If confirmed, I want to assure the committee that I am committed to working cooperatively with the Judge Advocate General (JAG) to provide expert, timely, value-added advice to the Army Secretariat and the Army staff. I am committed to assisting the department's efforts to assure that the acquisition process for materiel and services is efficient, effective, and compliant with our laws and regulations.

I am committed to making certain that the Army's transformation is accomplished consistent with the rule of law and a practical understanding of the issues affecting our All-Volunteer Force and their families.

Senator Landrieu kindly noted my background and dedication to public service. I have served our Nation in uniform as a soldier and as a public servant in both the Department of the Army and the Department of Justice. I am greatly humbled by the opportunity to serve again. If confirmed, I pledge to work closely with this committee to support and promote the outstanding men and women of the United States Army and their families.

I welcome your questions, Mr. Chairman.

[The prepared statement of Senator Warner follows:]

PREPARED STATEMENT BY SENATOR MARK R. WARNER

It's an honor and a privilege to support Donald Remy's nomination before the Senate Armed Services Committee. I strongly endorse Don's nomination and look forward to his confirmation as General Counsel of the Army. I know that Don will perform admirably as the chief attorney for the Army. This is a job of utmost importance as the General Counsel is charged with the weighty responsibility of determining the Army's legal stance on many of our Nation's most challenging issues.

Don brings a wealth of experience to this position from the private sector including his distinguished work as an attorney and businessman. In the private sector, he served in numerous high level legal roles and has tremendous experience in employment, procurement, and contracting law.

Don completed his undergraduate schooling at Louisiana State University, where he graduated with honors and was commissioned a 2nd Lieutenant in the United States Army. He then finished Cum Laude at Howard University Law School, where he also served as the Executive Articles Editor of the Law Journal. Upon graduation from Howard he was selected to serve as a clerk to The Honorable Nathaniel R. Jones of the United States Court of Appeals for the Sixth Circuit.

Don has also made public service a priority during his career. He has published, lectured and testified before Congress on legal topics relating to torts, constitutional law, employment law, diversity, government contracts, litigation and compliance. During his time in the Army General Counsel's Office, he lectured at the Judge Advocate General's School and the Army Materiel Command. In 2005, Don was recognized by Black Enterprise as one of America's most powerful executives under 40.

Don is also a respected leader, admitted to Practice Law in Pennsylvania, the District of Columbia, U.S. Supreme Court, U.S. Courts of Appeals for the Armed Forces, Sixth Circuit, Ninth Circuit, Eighth Circuit, Fifth Circuit and Fourth Circuit. He is a DC Bar Delegate to the American Bar Association and a member of the National Bar Association and Washington Bar Association. Don also sits on the Boards of Louisiana State University—University College, the Washington Lawyers Committee on Civil Rights and Urban Affairs, the Abramson Foundation, and the Legal Counsel for the Elderly.

Now more than ever, the Nation needs his skills and commitment. I offer my strongest support to his nomination, and I look forward to his confirmation by the Senate.

Chairman LEVIN. Thank you, Mr. Remy.

Now, I will ask you to answer the following standard questions. You can all answer at once.

Have you adhered to applicable laws and regulations governing conflicts of interest?

[All four witnesses answered in the affirmative.]

Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

[All four witnesses answered in the negative.]

Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

[All four witnesses answered in the affirmative.]

Will you cooperate in providing witnesses and briefers in response to congressional requests?

[All four witnesses answered in the affirmative.]

Will those witnesses be protected from reprisal for their testimony or briefings?

[All four witnesses answered in the affirmative.]

Do you agree, if confirmed, to appear and testify upon request before this committee?

[All four witnesses answered in the affirmative.]

Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

[All four witnesses answered in the affirmative.]

We thank you.

Let us try 8-minute rounds and see if we can get all of our questions that we need to ask during that period. We are trying to fit a lot in this morning. If we can do it, it would be great.

If we can't get both panels completed, we will have to figure out other arrangements. But we will give it a go.

First, Governor Mabus, one initiative to improve management of our acquisition process within the department is Senate Bill 454, which is sponsored by Senator McCain and myself. This bill would make several changes to current acquisition law: presuming that programs would be terminated if they breached the Nunn-McCurdy threshold, elevating the level of independent cost estimating, and dealing with organizational conflicts of interest.

Governor Mabus first, and then I will ask you, Mr. Work, the same question. Are you familiar with our legislation?

Ambassador MABUS. Yes, sir. Senator, I have read the legislation.

Chairman LEVIN. Can you give us your personal opinion regarding any of the components of that legislation?

Ambassador MABUS. It is very obvious that our acquisition process needs reforming in some fundamental ways that this legislation seeks to address. If I am confirmed, I look forward to working with this committee to make sure that those reforms are implemented, the reforms that Congress mandates are implemented effectively, timely, and in a very professional way.

Chairman LEVIN. Mr. Work, do you have any comment?

Mr. WORK. Mr. Chairman, I fully agree with the intent of the legislation. I am especially drawn to trying to establish cost controls over out-of-control programs, independent cost estimation, and solving conflict of interest issues. I haven't been able to discuss fully with staff all of the aspects of the legislation and how it might be implemented, but I fully subscribe to the intent.

Chairman LEVIN. Thank you.

Mr. Work, if confirmed as Under Secretary, you are going to also become the first CMO of the Department of the Navy. We established this position in 2007 out of frustration with the inability of the military departments to modernize their business systems and processes.

We chose to have the Under Secretary serve concurrently as CMO because no other official in the Department of the Navy, other than the Secretary, sits at a high enough level to cut across stovepipes and implement comprehensive change.

Will you make the modernization of the Navy's business systems and processes a top priority?

Mr. WORK. Yes, Mr. Chairman, I will.

In my interviews with both Secretary Gates and the Deputy Secretary, they indicated how important this position is and how much that they were going to exercise it. I look forward to working with the members of the committee to understanding the intent of the legislation and implementing it, if confirmed.

Chairman LEVIN. Will you report back to this committee on a regular basis on any obstacles that you are encountering in that effort?

Mr. WORK. Absolutely, sir. Yes, sir.

Chairman LEVIN. Now Chapter 633 of Title 10 establishes the requirement for a board of officers, commonly referred to as the Board of Inspection and Survey, to examine naval vessels. The committee is concerned about recent reports from that board, which have found that certain front-line ships of the Navy are unfit for combat operations, and forward-deployed mine countermeasure ships were unable to get underway in 2006. The Navy attacked the material issues to restore those ships to high readiness.

However, subsequent reports of serious degradation to amphibious ships and, more recently, the determination that two Aegis combatants are unfit for combat operations raises concerns that there are systemic issues associated with organic-level maintenance and self-assessment that might jeopardize the Navy's ability to meet the objectives under the Navy's concept of operations called the Fleet Response Plan.

Governor and Mr. Work, are you aware of recent reports that Navy readiness of the fleet has some real problems such that additional ships have been unable to get underway and have inoperable systems that might threaten crew safety? Are you familiar with those reports? Governor, you can answer first.

Ambassador MABUS. I am aware of the reports, Senator. I have not had an opportunity to study them in any detail.

Chairman LEVIN. Mr. Work, are you aware of the reports?

Mr. WORK. Yes, sir. I am.

Chairman LEVIN. Will you both assure this committee that you are going to look into this matter to ensure that any classification of these reports is handled properly and not just done to shield the Navy from some unflattering press articles?

Ambassador MABUS. Yes, sir.

Mr. WORK. Yes, sir.

Chairman LEVIN. Ms. King, members and staff of this committee, we work well with the DOD officials on a day-to-day basis. We request and receive information that we need to understand the programs and activities of the Department and to meet the committee's oversight responsibilities.

From time to time, the Department has decided to impose formal requirements on such exchanges, such as all communications having to go through the Office of Legislative Affairs, all requests for

information to be in writing, no official of the DOD could discuss an issue until the Secretary has made a decision, and so forth.

Now in our experience, and you have had an experience second to none for anybody who has, I think, ever been in the position to which you have been nominated, the imposition of that type of formal requirement could unnecessarily undermine the working relationship between this committee and the Department that has been so beneficial to both sides.

I am wondering if you could give us your assessment as to the desirability of informal communication between department officials and the committee and whether it is necessary and essential at times? Also then why impose any formal requirements on such communications?

Ms. KING. I am aware that recently there has been some imposition of formal requirements. If I am confirmed, I plan on reviewing those procedures and processes because I believe that open channels of communication, getting everyone what they need in a timely manner in the most efficient way possible, is the best way to form a partnership between Congress and DOD.

Chairman LEVIN. Okay. Thank you.

Mr. Remy, increasing violence along the border with Mexico has brought renewed calls to use our military to assist the Border Patrol and Customs Service. Can you give us your thoughts on that? Any implications in terms of *posse comitatus*?

Mr. REMY. Yes, Mr. Chairman.

Mr. Chairman, the *posse comitatus* law deals with the ability of the uniformed personnel in our United States military to help States. I understand that there have been some circumstances where our military has been deployed, and there is a study underway looking at the deployment of our military forces along the border.

That is something that I believe would require a significant amount of analysis and thought. If confirmed, I pledge to do that.

Chairman LEVIN. All right. Mr. Remy, during the Iraq war, private security contractors were used to perform a wide variety of security functions requiring the use of deadly force in a hostile environment. To some extent, this was done out of necessity because we just didn't have and don't have yet sufficient troops to provide needed security.

However, the extensive use of private security contractors in Iraq has resulted in a number of problems, including the 2007 shooting incident in Baghdad, which resulted in the recent indictment of some employees.

Do you agree that the Department needs to take steps to undertake first a comprehensive review of whether and to what extent it is appropriate for contractors to engage in functions that require them to make discretionary decisions about the use of deadly force, which is not in the military chain of command by definition?

Mr. REMY. Yes, Mr. Chairman, I do believe that such a study is necessary.

Chairman LEVIN. Do you undertake that review and your commitment to do it with any particular thoughts along that line?

Mr. REMY. Yes. Mr. Chairman, if confirmed, if I have an opportunity to look into these issues, I will examine the question of

whether or not individuals are doing functions that are inherently governmental functions and to determine whether or not it is appropriate to have contractors conduct interrogations, especially in the circumstance where those interrogations may impact the life or liberty of the individuals that are being interrogated.

Chairman LEVIN. Thank you.

Senator McCain.

Senator MCCAIN. Well, thank you, Mr. Chairman, and congratulations to the nominees, we look forward to as rapid confirmation as possible of your nominations.

Ambassador Mabus and Mr. Work, you are aware of the situation concerning cost overruns. This has been particularly true of the United States Navy, whether it be on acquisition of aircraft, a Littoral Combat Ship, or other acquisition requirements that have had dramatic and really terrible cost overruns associated with them.

Do you have thoughts on that, particularly in relation to the legislation that Senator Levin and I have introduced? We will begin with you, Governor.

Ambassador MABUS. Yes, sir. The acquisition process has to be gotten under control or we are going to unilaterally disarm ourselves. We must begin to match up requirements with resources and make sure that our technology is mature before proceeding, stabilize the requirements for ships and aircraft during the manufacturing process, and have fair and adequate contracts going forward. If confirmed, one of my areas of intense concentration and focus will be on this whole acquisition process, both for new systems and for those already in place.

Senator MCCAIN. Have you looked at Senator Levin's and my legislation?

Ambassador MABUS. Yes, sir. I have read it. As Mr. Work said in his statement, I believe the intent of the legislation absolutely goes to the heart of some of these matters. We have to make sure that we have good, independent cost estimates, so if systems spin out of control, there is some teeth to looking at whether to continue them or not.

Senator MCCAIN. Mr. Work?

Mr. WORK. This is a problem that has long years in building. I believe that the U.S. Navy, along with other members of the DOD acquisition team, lost what Admiral Phil Balisle used to refer to as "technical authority," being able to set good requirements, being able to understand when a program is in trouble, and being able to set remedial actions to take care of problems.

The intent of the legislation, especially on the independent cost estimation and tracking closely the costs as they grow and taking action as required, I think are exactly right. I don't fully understand the intent of the conflict of interest provisions of the legislation. Hopefully, if confirmed, I will be able to work with the committee to understand the intent and to keep these cost overruns from occurring.

Senator MCCAIN. Ms. King, I note that Senator Reed is next, and he will probably pose the most difficult questions for you. But, we have had a problem from administration to administration, wheth-

er it be Republican or Democrat, with candid views from the members of the administration that work on the other side of the river.

This sometimes leads to needless conflict. Sometimes it leads to legislation which isn't developed in the closest coordination possible. I hope you will work to keep the committee informed and help us perform our constitutional duties.

Ms. KING. Yes, Senator McCain, I plan to do that.

Senator MCCAIN. So, you know from sitting on this side that some of the problems that we have had are both Republican and Democrat.

Ms. KING. Yes, sir.

Senator MCCAIN. Thank you.

Mr. Remy, I noticed in your bio that you said you worked for a well-known company or corporation. That happened to be Fannie Mae, one of the organizations that is responsible for the severe crisis we are in today. I will be submitting questions to you concerning what responsibilities you had there and what decisions were made during that period of time that you worked there. Certainly, the collapse of Fannie Mae was a direct contributor to many of the economic difficulties we have today.

Mr. REMY. Senator McCain, I am happy to answer any questions of yours or the committee's.

Thank you.

Senator MCCAIN. Thank you.

On the issue of the deployment of the military, I also serve on the Homeland Security and Governmental Affairs Committee, and we had a hearing in Phoenix, AZ, which is now the kidnapping capital of America, about border violence. From talking with the mayors, the sheriffs, the Governor, and the attorney general of my State, it is very clear that there is great danger of that violence spilling over into our State, Texas, New Mexico, and California.

Now, all four Governors of border States have requested the deployment of the National Guard to the border for the reasons that I have just stated. Do you have views on this subject, particularly in light of the fact that the National Guard has been deployed in the past and there doesn't seem to be any large national crisis, constitutional crisis, associated with it?

Mr. REMY. Senator McCain, I understand the concerns that the States are voicing, and I understand the need to have the security forces that are adequate to deal with the issues on those borders. I believe that, if appropriate, it would make sense to further examine that issue if it is something that is put into my space and, if confirmed, if it is something that I am charged with looking at.

Presently, it is not an issue that I have studied at great length, but it is something that I would be committed to examine.

Senator MCCAIN. Let me even recommend to you that you take a trip down to the border and are briefed personally by the individuals not only that are tasked to enforce our border, but also the residents, the mayors, city councils, and others who are grappling with this very serious issue.

I could give you numerous examples of how close this violence has come to spilling over, and actually has spilled over, into the United States of America. Now all of it, of course, is exacerbated

by this threat of swine flu, which we all know is originated in the country of Mexico, as well.

So you will have significant input into the decisions concerning deployment of Guard or regular forces to the border, and I hope that you will give it a priority of familiarizing yourself with this situation.

Mr. REMY. Yes, Senator McCain. I will make it a priority.

Senator MCCAIN. Finally, Mr. Work, you said in your statement that you had some ideas about new approaches you are considering to curb rising health and personnel costs. What approaches are you considering?

Mr. WORK. During the last 2 weeks, we have received several briefings on both the Safe Harbor program and the Wounded Warrior program, as well as all of the health care issues that are facing the Department. The costs, Senator McCain, are rising much faster than the rate of inflation, and it is really causing a problem as far as execution in the Department of the Navy's budget.

The only clear idea that I have right now, if confirmed, is to work with the Secretary, the two Service Chiefs, the Assistant Commandant, and the Vice Chief of Naval Operations to take a hard look at how we might be able to handle the problem within the service and then to work with members of the committee and also DOD to try to get a handle on healthcare costs writ large.

Senator MCCAIN. Thank you, Mr. Chairman.

I thank the witnesses.

Chairman LEVIN. Thank you, Senator McCain.

Senator Reed.

Senator REED. Thank you very much, Mr. Chairman.

Governor Mabus, you bring an extraordinary range of experience to the task before you. I think the President made a very wise choice. I think particularly, as you point out, your experience as a young officer on the deck of a service combatant is going to be very critical.

As my colleagues have suggested, the shipbuilding program in the Navy needs reform and attention, and there are just two issues that I think you probably don't have firm opinions, but I would like your comments upon.

There is always a tradeoff between advanced technology and new hulls. Building ships or just improving technology, if you could comment on that?

Also, any sense of whether you feel there is excess capacity, particularly in service combatant capabilities of building those ships?

Ambassador MABUS. In terms of the first question, Senator, new technology, first, has to be looked at to decide whether it is appropriate; second, whether it is mature enough to be put on a combatant surface, subsurface ship, or airplane. Then there is the issue of stability of requirements because once you have begun, as you well know, construction, making major changes is one of the leading causes of stretching the completion date and raising the cost.

I think you should look at, if new technologies come along, building ships in blocks so that the next block of ships can be upgraded in terms of technology, but not trying to make the ships that are currently under construction be the most perfect ships that you can have.

Forgive me, but I have forgotten the second part of your question.

Senator REED. Just the issue of the excess capacity of particularly surface combatants in terms of the capacity to build these ships, the number of yards?

Ambassador MABUS. Well, I believe, sir, that the number of yards is very small in terms of just sheer numbers. To keep the industrial base and to keep a well-trained workforce in order to build these ships that we are going to need, both today and in the future, we don't have any excess capacity, but we do need to work very hard to make sure that there remains competition among those shipyards.

Senator REED. Thank you, Governor. Governor, Ambassador, and soon-to-be Secretary, thank you.

Ambassador MABUS. Thank you, Senator Reed.

Senator REED. Mr. Work, let me ask the same question, but a focus on the Marine Corps in terms of the technology that they need for this new asymmetric warfare. I know you have done a lot of work in terms of looking at this issue of how the Navy participates and the Marine Corps participates in asymmetric warfare, but are there technologies that the Marine Corps might need that they don't have, and would you focus on that?

Mr. WORK. Senator Reed, the Marine Corps combat development command has been, as I understand it, working very closely with the Department at large to determine these new capabilities. For example, I know that they have specifically looked at unmanned aerial vehicles and populating more of those throughout the Force, ground robotics, and advanced body armor for the Marines.

I believe that the Commandant of the Marine Corps is very much interested in getting the right gear to the troops at the right time, as quickly as possible.

Senator REED. Thank you.

I just want to note, too, that Congressman Taylor was here, Gene Taylor from Mississippi, a dear friend whom I served with. He has since departed, but looking at him, I just discovered how the Senate ages you. He still looks remarkably good.

Mr. Remy, one of the issues that you will face is working with your uniformed colleagues, and you had the privilege of being a young captain JAG officer, I presume, in the general counsel's office. Is that correct?

Mr. REMY. Yes, I was in the honors programs in the general counsel's office, Senator Reed.

Senator REED. We have found out that the best source of advice, particularly with respect to these issues of compliance with the Geneva Convention, has been from uniformed officers, who raised the cry very early and who consistently were, I think, principal critics of some of the policies.

This is less a question and more a comment. I hope you, as a former uniformed JAG, recognize the real skill and talent and experience of those uniformed officers you will serve with.

Mr. REMY. I absolutely do, Senator Reed.

Senator REED. Well, thank you very much.

I will refrain from asking the question who your favorite boss is, Ms. King. [Laughter.]

I will just simply say I neglected to indicate for the record that Liz is a graduate of the University of Pennsylvania and Georgetown Law School.

So, good luck. Thank you all for your commitment to the Country and your service.

Chairman LEVIN. Thank you, Senator Reed.

Senator Martinez.

Senator MARTINEZ. Mr. Chairman, thank you very much.

I want to congratulate all of the nominees and your families and wish you the very best as you undertake your service. Thank you for undertaking the service.

I want to begin with Governor Mabus and Mr. Work and ask a question of both of you. Since 1952, there have been aircraft carriers based in two different homeports on the east coast of the United States. The USS *Tarawa* was homeported in Mayport in 1952, and ever since that time, we have had that kind of a dispersal policy.

Admiral Mullen, Chief of Naval Operations (CNO), before this committee stated that he was very supportive of strategic dispersal of our carrier force. His predecessor, Admiral Vern Clark, also stated on February 2005, and I quote, it is his belief that, "It would be a serious strategic mistake to have all of those key assets of our Navy tied up in one port."

Secretary England, who was Secretary of the Navy before he was Deputy Secretary, also stated in this committee that, in his judgment, dispersion was still a situation. A nuclear carrier should be in Florida to replace the USS *John F. Kennedy* to get some dispersion.

Even more recently, Secretary Donald Winter, with the concurrence of the current CNO, Admiral Gary Roughead, signed the record of decision to upgrade Mayport to be nuclear ready, continuing the Navy's 54-year commitment of east coast strategic dispersal.

My question to both of you is would you let us know, today, what your intentions are with regards to the strategic dispersal of the Nation's nuclear aircraft carriers along the east coast? Would you tell us whether you agree or disagree with the prior three CNOs on their recommendations that there should be strategic dispersal of the nuclear carrier force?

Ambassador MABUS. Senator, I understand this issue and its importance. I also understand that this issue has been put into the Quadrennial Defense Review (QDR). If confirmed, I expect to be an active member of that review, and I commit to making this a priority item if confirmed as Secretary.

Senator MARTINEZ. I need an answer to my question, though.

Ambassador MABUS. Sir, I simply do not have enough information to give you an answer in terms of what the final outcome should be.

Senator MARTINEZ. You would not disagree with three CNOs that all have indicated in their opinion the importance of strategic dispersal of the nuclear fleet, though, would you not?

Ambassador MABUS. Again, Senator, I do not have the information, as I am sitting here today, to give you an answer on that, except to acknowledge that I do understand that is their position.

Senator MARTINEZ. Mr. Work?

Mr. WORK. Senator, we haven't had an opportunity to talk with the former CNOs. As the Governor has said, this is an issue that has been briefed to us at the broadest level, and I look forward, if confirmed, to working with DOD and the Secretary of Defense to look at this issue again in the 2009 QDR.

Senator MARTINEZ. There is also an issue of funding. A decision was made, and that decision, to my knowledge, was final in deciding that there would be strategic dispersal and that Mayport would become a homeport. You both are aware of that decision having been made, correct, by the prior Secretary of the Navy and right up the chain of command?

As a result of that decision, there was some work that needed to be done. We have had an environmental impact statement that has all gone through the process, a prior QDR. As I say, this is a decision that goes back to when Vern Clark, Admiral Clark, was the CNO.

Do you foresee supporting the continuation of the work that is already in the pipeline, including dredging and other improvements to Mayport that would make it capable of homeporting a nuclear carrier?

Ambassador MABUS. Senator, I believe that the two items that you mentioned, one is the dredging and second the pier upgrade and repair in Mayport, have been recommended by the Secretary of Defense to be included in the President's budget for this year. As the President's nominee and reporting directly to the Secretary of Defense, of course, I support their recommendations.

Senator MARTINEZ. Mr. Work?

Mr. WORK. Senator, I agree with exactly what Governor Mabus said. As we understand it, the record of decision was made at the Department of the Navy in early January, and DOD reviewed that decision. Secretary Gates decided to delay or to look at the decision as part of the 2009 QDR, but to continue the work that Governor Mabus referred to, which would not pre-close any option after the 2009 QDR.

Senator MARTINEZ. The Navy has a goal and a plan to have a 313 ship fleet. Do you have an opinion on that issue and how we should get there?

Ambassador MABUS. Senator, this is another issue that the 313 ship fleet came out of the QDR 4 years ago. It was the best estimate at the time of what the Navy combatant needs would be going forward. There is another QDR underway right now, and I know that the size of the fleet is one of the critical parts of that QDR.

I will, if confirmed, be a very active participant, and this will be one of the areas that I concentrate on to make sure that the size of the fleet is adequate and matches up with the requirements that we have and will give the Navy in terms of what its mission is both today and in the future.

Senator MARTINEZ. Mr. Remy, I want to ask a question of you, and I think it is, frankly, one of candor. I want to suggest to you that I think it is important to have good communication with the committee and to be clear.

I have looked at your resume, and I find it astonishing that you do not list your employer for a number of years. I can't even see the number of years because also your resume does not state when you began and when you ended your employment with what you describe as "a major U.S. company."

Now I know by description and also what Senator McCain said that it appears to have been Fannie Mae, but you don't disclose that or the years that you were at Fannie Mae. Am I correct that it is Fannie Mae that you were employed by before you were at Latham & Watkins?

Mr. REMY. Yes, Senator. Yes, Senator.

Senator MARTINEZ. When did you go to work there, and how long did you work there?

Mr. REMY. Senator, I worked at Fannie Mae from the years of 2000 through 2006.

Senator MARTINEZ. To my knowledge, there is nothing wrong with having done that, and I think it should be on your resume clearly stated for all to see. Although there has been some controversy with the company, I know a lot of honorable people who have worked there, and I just don't think it is appropriate not to disclose it clearly.

Mr. REMY. Senator Martinez, you are right. I have nothing to hide. I did disclose my employment at Fannie Mae on a number of forms that I filed with the committee. I have many different versions of my biography. The version that apparently made it to this committee did not include Fannie Mae as my employer, although it did have the responsibilities that I had undertaken at Fannie Mae at the time.

That was a mistake. I take responsibility for that bio coming to the committee. Indeed, my time at Fannie Mae was a time period where I am personally proud of all of the work that I did at Fannie Mae. Some shameful things may have happened there, but I have nothing to hide from my responsibilities.

Senator MARTINEZ. I don't disagree with that at all, particularly from the timeframe you describe and the responsibilities that appears that you held there. So I wasn't trying to imply anything other than I think it is important to speak with candor to the committee when you are up for nomination, and that is my only point. I appreciate your explanation.

I wish you all well, and thank you very much.

Mr. REMY. Thank you, Senator.

Chairman LEVIN. Thank you very much, Senator Martinez.

I concur. I think we all would concur with your point that there is nothing to be ashamed of. In any event, it should be fully disclosed, and apparently, it was on a number of your other bios. It was stated more generically you worked for a major company, I gather, in terms of the bio that came to us, as you indicated.

I am not familiar offhand with that bio. But apparently, that is what happened. You have acknowledged it, and I think that Senator Martinez's point is a good one, and you agree with it that.

Mr. REMY. Yes, I do. Thank you, Mr. Chairman.

Chairman LEVIN. There may be questions for the record on that, as Senator McCain suggested. If there are, we will try to get them

to you quickly, and you can then answer them promptly as well as to specifically what those duties were.

Senator Akaka.

Senator AKAKA. Thank you very much, Mr. Chairman.

I would like to begin by thanking each of you on the first panel for your dedicated public service and your desire to serve our Nation in these very important leadership roles. I also want to add my welcome to your families and your supporters who are here with you this morning.

If confirmed, each of you will face, without question, enormous challenges in DOD. You will be charged with forming a comprehensive national security strategy to address today's crises while planning for a complex and uncertain future for our Nation. I would say that, with your backgrounds and expertise, I feel each of you are well qualified to handle these challenges that you will face.

I have been a strong advocate of our military readiness, military presence, and our military engagements around the world. We cannot overstate the importance of our work.

With the recent activities we have witnessed from China and North Korea, it is obvious that the challenges are many. I want to pose this question to Governor Mabus and to tell you at the outset that I feel that the men and women of the Pacific Command have maintained a remarkable level of stability, but we must ensure that they are properly manned and equipped to address possible future conflicts that are part of our challenges.

I also wanted to mention that I feel that Admiral Keating has done a tremendous job. He is helping to maintain the stability with the forces that are there in the Pacific.

I am particularly interested in readiness. The question I ask of you, Governor, is what thoughts do you have on the overall readiness of the naval fleet in our country and, in particular, in the Pacific Command as it relates to the military personnel and available equipment?

Ambassador MABUS. Senator, at this point in the process, I do not have enough information to give you a definitive answer on that except to say that the readiness of the fleet in performing the mission that the Country has given it is of highest importance and that, if confirmed, it will be one of the things that will occupy my time more than any other.

Senator AKAKA. Governor, you and I know that readiness is so important to our military.

Ambassador MABUS. Absolutely, Senator.

Senator AKAKA. Training and taking care of personnel, including the care of families, are part of the importance of readiness, and I look forward to continuing to work with you, if confirmed, in this area.

Mr. Work, I have been really concerned about the position of CMO of Defense and, in this case, of the Navy. The Government Accountability Office (GAO) has reported that the Navy has not yet followed DOD's lead in establishing a template to address business transformation. As Navy CMO, it is critical that you establish performance goals and measures for improving the efficiency and effectiveness of the Navy.

My question to you is what is your understanding of the roles and responsibility of the CMO?

Mr. WORK. Senator, the CMO is responsible to the Secretary of the Navy for the efficient business processes throughout the department. For the last couple years, the Department of the Navy hasn't had an Under Secretary, and as I understand it, the CMO slot was delegated to the Assistant Secretary of the Navy for Financial Management and the Comptroller. The Department of the Navy also set up an Office of Business Transformation, as required by the legislation.

If confirmed, one of my top priorities will be to find out exactly what these offices and people have done and to work very closely with the committee to understand exactly what the intent of the legislation is and to work with the Secretary and the Deputy Secretary to have a very, very good CMO operation.

Senator AKAKA. Ms. King, I am so glad to see you moving into this area in Defense and look upon your move as one that will help our cause, both Defense and the Congress, because of your work here, your relationships, and your understanding of what needs to be done to carry out the goals that we have.

My simple question to you, with all of your experience, is what do you intend to do that may be different in bringing about a relationship of partnership as well as integrating our working processes between Congress and DOD?

Ms. KING. Senator Akaka, if I am confirmed, what I would like to do is to make sure that the Congress and DOD see the relationship as not adversarial, but as working together toward a common goal and to review the processes and the communication to make sure that we are working toward one goal instead of against each other.

Senator AKAKA. I am asking that because I am chairman of the Veterans Affairs Committee here in the Senate, and what we have done in the last 3 years has been to try to create what we call a "seamless order" between Defense and Veterans Affairs. This has been working out well.

Ms. KING. Yes.

Senator AKAKA. So that both deputies are talking to each other once a week, and it is amazing what we have been able to do by phone. I hope this can grow and continue as we move along here.

Ms. KING. I plan to keep that model going.

Senator AKAKA. Thank you very much, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Akaka.

Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman.

To all of the nominees here today, congratulations for being here. I look forward to hearing more of your testimony and also to meet your families that are with you.

One of the questions I have is to Governor Mabus and to Mr. Work. Unmanned aerial vehicles have proven to be a critical resource in Iraq and Afghanistan, and the unmanned ground vehicles have also proven to be an important and growing tool to support our military personnel. Although still in an earlier stage, the Navy's development of unmanned underwater vehicles is also important.

What is your perspective on the role of unmanned systems for the Navy and the Marine Corps, and what do you see as the focus areas for the Navy and the Marine Corps for the development, training, and deployment of these vehicles?

Ambassador MABUS. Senator, Secretary Gates, in his recommendations as we move forward, was to put a great deal of emphasis on these unmanned vehicles. In terms of the Navy, my level of knowledge there is simply to say that I understand the importance of these and that I know, going forward, the Navy and Marine Corps have to look into unmanned vehicles to perform some critical tasks. I will make sure that the research, the development, and the technology is there and is adequately analyzed and, if we move into an acquisition phase, adequately contracted in a way that is cost efficient and makes sure that our sailors and our marines get the very best equipment possible.

If confirmed, this will be an area that I look forward to working on to make sure that this new cutting-edge technology makes it to the fleet.

Mr. WORK. Senator Hagan, I believe we are on the cusp of a revolution in unmanned technologies. The last years of war have really shown how these different systems can help both the Marine Corps and the Navy. The Navy is about to commission a class of ships, the Littoral Combat Ships, which is specifically designed to employ unmanned systems.

I agree with Governor Mabus that this is an extremely high priority for the Department. If confirmed, I look forward to trying to populate more of these systems throughout the Navy and the Marine Corps.

Senator HAGAN. Thank you.

Another question I have concerns piracy. I think the media is focusing so much on the piracy off the coast of Somalia and some of the other areas in the world. Piracy is certainly increasingly becoming a strategic threat to the U.S. and our partners in the Asian Gulf. I think key to combating this threat is to encourage partnership capacity and interoperability with the regional navies in the area.

What is your view of countering piracy, and how will you encourage other navies to contribute to maritime security, such as the Combined Task Force (CTF)-150 and CTF-151?

Ambassador MABUS. Senator, the whole country is so proud of the SEALs, the sailors, the marines that took part in the operation a couple of weeks ago that ended so successfully. But as you correctly point out, it is going to take a lot more to combat this problem, particularly in that part of the world.

If confirmed, one of my jobs as Secretary of the Navy will be to ensure that we have the vessels, the people, and the equipment to be able to carry out whatever missions are given by the combat commanders against those pirates. I think it is particularly important what you brought out about partnering with other countries.

The Navy now has the Africa partnership to partner with the navies and the countries along the coast of Africa, both east and west coasts, to encourage interoperability, to do training, to do combined exercises and also humanitarian efforts in those countries. Because one of the quotes from the National Maritime Strategy that the

CNO, the Commandant of the Marines, and the Commandant of the Coast Guard released says that while people and equipment can be surged, trust cannot, and that you have to work for a long time to establish that trust and that operating together.

I think that the Navy, from my information, has made a good start there but it is going to have to be very vigilant and work with the navies and the governments in that region to take on this problem.

Senator HAGAN. Mr. Work?

Mr. WORK. Senator, piracy is an issue that has been around for ages, centuries. It is not only a problem on the sea, but it also emanates from the land.

So the Navy can do its part in areas where piracy is a big problem by working with other nations. I would note that even the Chinese have dispatched ships to fight this problem. But ultimately, it will require a solution both on the land and at sea to deny these pirates the ungoverned spaces where they operate.

Senator HAGAN. I had one further question on our wounded warriors. Certainly, I know that it is of prime importance, and certainly, it is important for the families, sustaining the welfare for our sailors and marines. But can you give me any thoughts on how you emphasize within the branch what you need to be doing in any different way or to continue the treatment for our wounded warriors?

Ambassador MABUS. Senator, there is no higher priority, if confirmed, that I will have than to care for these men and women who have represented us so well and who have paid so dearly in this country's defense.

Whether it is in their healthcare, their mental healthcare, the assistance to families, the reintegration either into their units or back to their hometowns, the continuing healthcare, the continuing care for them and their families, we have no higher duty as a country. If confirmed, I will have no higher priority as Secretary of the Navy.

Mr. WORK. Senator, I believe both the Navy's Safe Harbor program and the Marine Corps Wounded Warrior Regiment are extremely well run. As Governor Mabus said, if confirmed, I look forward to working with the Secretary to make sure that this is a world-class operation as we take care of our wounded heroes.

I agree with the Governor that there is no higher priority in the Department to take care of our sailors and marines who have given so much.

Senator HAGAN. Thank you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Hagan.

Senator Burris.

Senator BURRIS. Thank you, Mr. Chairman.

Welcome to our nominees. I continue to be extremely impressed with the very high caliber of individuals President Obama has nominated to run the essential portions of our Government. This panel is no less, Mr. Chairman. Quite an impressive panel.

The President and I agree that we need dedicated leadership to run the affairs of our Government. The Nation is looking for you nominees to play a role in the redirection of our efforts to benefit

and protect all of our citizens, especially those who were ignored as a result of the previous policies.

I have office calls scheduled, I think, with several of you and look forward to these nominees moving quickly as we work on this ambitious agenda that we have also undertaken. There is an opportunity for us, in partnership with you nominees, to cause a real change in our Nation, and I look forward to the mutual cooperation to the benefit of this great Nation.

Mr. Chairman, there is a relationship here with each one of these nominees. Mr. Work, I understand that you are a graduate of the University of Illinois.

Mr. WORK. I am, sir. Go Illini.

Senator BURRIS. Yes, Go Illini. Okay. I am a Saluki. But you are from Illinois. That will help.

To Ms. King, who has the same name as my chief of staff, and I just wondered whether or not there was some relationship there.

Ms. KING. We have looked, but no.

Senator BURRIS. Yes, she told me that you all are just "play cousins." So that is what we call it. But they have the same name. So Brady has already briefed me in terms of your skills on the Hill and what you will do as the nominee.

Of course, Mr. Remy is distinguished being a Howard Law graduate. What is your class, Mr. Remy?

Mr. REMY. 1991.

Senator BURRIS. 1991 is a recent class. How about the class of 1963? [Laughter.]

Mr. REMY. Go Bison.

Senator BURRIS. Go Bison.

I saved the best for last. This young man here who is going to be our Secretary of the Navy was the State auditor of the great State of Mississippi when I was State comptroller, and we worked very closely together in upholding our responsibility for our States. But not only that, he advanced to the great position of Governor of the great State of Mississippi.

We kind of shocked the people in my State capital when I was being honored, Mr. Chairman, for 10 years in public service. We brought in the guest speaker of our banquet, the Governor of the State of Mississippi, to Springfield, IL, to be the guest speaker to honor the State comptroller for 10 years. Of course, that kind of sent a message to a lot of people in my capital that there was something going on.

This was in the mid-1980s, and Governor Mabus was very, very supportive. Not only that, Governor, you may remember when my wife, who hails from Mississippi, from the great Delta part of Itta Bena, where Mississippi Valley State is, and I visited you at the Governor's mansion. It was the first time in her lifetime she had a chance to go in the Governor's mansion in the State of Mississippi.

Ray, you are a tribute to the people of your State. I just noticed how you had bipartisan support. I didn't think that those two Senators would come and support you like that, but evidently you have made your record in the State of Mississippi, and they are very proud of you. I know you will maintain that record as Secretary of the Navy. I am very pleased to be with you.

Just one quick question, Governor. Are you familiar with the contract that the Navy is putting out to a company called Boeing for the F-18 fighter that is going to replace five various Navy planes that are on the ships? I think the Navy has requested some 39 of them, but they only budgeted for 31.

I wondered if you wouldn't look into that, should you be confirmed—and I know you will have a vote here. But look into the facts so we can make sure that we are getting an adequate supply of those F-18 and those Super Hornets that the Navy will need. Have you had any chance to look into any of that?

Ambassador MABUS. Senator, I know that Secretary Gates' recommendation going forward is to acquire 31 of the Super Hornets, 9 tactical fighters, the E/F series, and the other planes to be the G series, the Growler series of that plane. His recommendation also was to have 24 planes each of the F-18 E/F series in the next 2 years.

But in specific answer to your question, yes, I will look into that if I am confirmed.

Senator BURRIS. Second, Governor, I was listening to your answer and lost my train of thought. Oh, wow. I can't pull it back.

Chairman LEVIN. Perhaps you could just submit that question for the record.

Senator BURRIS. Yes, I will submit that question for the record because it had to do with the follow-up on, oh, I know what it is. It is the single-year contract. The company Boeing is seeking a 2-year contract on those F-18s, and they put that line up. That line now has to come down.

Boeing hired a lot of people from across the river, and the plant is in St. Louis. But a lot of Illinoisans work in that Boeing factory, and I wondered if you would look at, when you get there, whether or not that could be a 2-year contract with you and Secretary Gates rather than the 1-year contract?

Ambassador MABUS. Yes, sir.

Senator BURRIS. Okay, thank you. That was my point.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Burriss.

Senator Begich is next.

Senator BEGICH. Thank you very much, Mr. Chairman.

I have very few questions. But first, Elizabeth, thank you for taking the time and meeting with me. It sounds like a breath of fresh air in the communication that you are going to bring to the Senate. So I appreciate that, as a new member here, and I look forward to working with you.

I want to follow up on Senator Hagan's questions, if I could, to Governor Mabus and Mr. Work in regards to the pirates. It seems to be a continued growing problem not only here, but also in the Pacific and the Pacific Rim. How do you see or do you see a more aggressive role by the United States in dealing with the pirates?

Ambassador MABUS. Senator, I think that the administration has talked about a much more comprehensive approach toward piracy and that you cannot simply deal with the pirates at sea. You have to deal with where they come from, with the states on the land.

One of the reasons that there has been more success against piracy in places like the Straits of Malacca is that you have govern-

ments and states ashore that are willing to use their law enforcement tools and techniques against pirates when they come back to their home bases. You simply don't have that situation in Somalia right now. You have a state that has no government that can do anything like that.

I know that the President and Secretary Clinton have talked about a far more comprehensive strategy in dealing with them and that, if confirmed, I look forward to making sure that the Navy has the equipment and has the people to carry out whatever missions the President and the combatant commanders give them in terms of whatever strategy we pursue.

Senator BEGICH. If I could follow-up? Again, you may not be able to fully answer this, but are we going to be in a situation where we are waiting for the on-land situation to get resolved or at least become more conducive to dealing with this?

Somalia has not been the most stable country for many, many years, but yet the piracy has continued to grow and become more aggressive in the last few years. I guess I am a little more direct in how to deal with it, and I think what the SEALs did was the right thing to do in the sense of sending a message.

How do you see this process moving forward? I recognize there is a lot of discussion, but Somalia is not necessarily the place that is going to end up first out to solve this problem, unless I am missing something. I am new here, though.

Ambassador MABUS. Well, sir, at this point in my process, and I am very new.

Senator BEGICH. We share that.

Ambassador MABUS. I have not been given what exactly our strategy is against these pirates, and I know it is a matter of intense concern. The things I said about the President and Secretary Clinton in terms of dealing with it are things they have said publicly. But I know that it will be something that I will be intently concerned with should I be confirmed to this job.

Senator BEGICH. Thank you.

I am assuming because one of the pieces of the puzzle will be if there is more intensity from us, the Navy will have to have the proper equipment, the right kind of ships that can move and be mobile and be able to deal with the issue.

Ambassador MABUS. Yes, sir.

Senator BEGICH. Is that part of the equation?

Ambassador MABUS. Yes, sir.

Senator BEGICH. Mr. Work, do you want to add to that?

Mr. WORK. Simply, Senator, that there are two different ways or two complementary ways to deal with this problem. One is through law enforcement, using the U.S. Coast Guard following up on Suppression of Unlawful Acts Against the Safety of Maritime Navigation. Kenya, for example, is just about ready to prosecute one of the first piracy cases because they are a signatory, as are we.

The Coast Guard operates under use of force rules, and the Navy would operate under rules of engagement (ROE). So, if confirmed, I think it would be very, very critical for the naval commanders to understand the ROE and to be given all of the support they need to accomplish the mission.

Senator BEGICH. Very good.

Last totally different area. We are going to go north now because I am from Alaska. I know the Coast Guard has a lot of comment regarding the Arctic, what the future is, and what the role they might have there.

Do you from the Navy, from either one of you, have any comment in where you see the long-term role and participation in the future of Arctic policy and how the Navy may or may not participate up there?

Ambassador MABUS. In the National Maritime Strategy that was put out by the CNO, the Commandant of the Marine Corps, and the Commandant of the Coast Guard, one of the major areas that they saw our naval forces participating in is climate change and persistent presence in places all around the world to meet whatever either potential adversaries that we have or natural conditions that may be changing or needs attention. Our naval forces are uniquely positioned to be able to provide a lot of the information and a lot of the presence in those areas.

Senator BEGICH. So I think, yes, the Arctic is important?

Ambassador MABUS. A much better answer than I just gave. Yes.

Senator BEGICH. I understand.

Mr. Work, do you have any additional comments?

Mr. WORK. If the Northwest Passage opens up year round, it will fundamentally change trade routes and also passage of warships to the north. The Coast Guard obviously will have a prime role in supporting our interests up there. But if the northwest passage opens year round, the U.S. Navy would obviously find this area a very, very important operational focus.

Senator BEGICH. Thank you very much.

I will end there, Mr. Chairman. I would just say again, as Senator Burriss said earlier and others have said, the President has continued to bring folks forward for confirmation, especially to this committee that I have a role in, that are an impressive group of folks with wide ranges of experience and the knowledge to bring to the table.

I congratulate you, and I wish your families the best because you will need a lot of support going through this process that I hope ends in a positive in the sense of confirmation of all of you. But also once you are in service, the service that will be required of you and your families.

So thank you very much for your willingness to serve.

Senator REED [presiding]. Senator Webb.

Senator WEBB. Thank you, Mr. Chairman.

First, just a follow-up on a couple of things that Senator Begich just said. I am of the view that on this piracy issue, we are making it far too complicated. The policies, in terms of the violation of international law, have been around for a long time. If you shoot the people who do it and blow up their boats, they won't be back.

I would like to respond just a bit to what Senator Martinez said on this Mayport issue. I know you all are kind of in the barrel on this during your confirmation hearings. But I can remember when I was Assistant Secretary of Defense, and we had big push on strategic homeporting when John Lehman was Secretary of the Navy. Any logical proposition can be carried to an extreme. That is why

you need to measure these things through risk assessment and other ways.

Actually, there was a big push at that time in the name of strategic homeporting to put homeporting in Alaska. Senator Stevens was a great advocate of that, and there actually was a plan in place at one point.

With respect to the names that Senator Martinez brought forward in terms of people who support the idea of strategic dispersal, I don't think there is anybody who disagrees with the notion that properly constructed and properly analyzed, there ought to be strategic dispersal. But I will tell you two former Secretaries of the Navy who certainly don't believe that applies to the situation we are talking about with moving a carrier from Virginia to Mayport, and that is Senator John Warner and myself. If I were a Senator from Nebraska, I would be saying the same thing.

I am not going to pose this to you directly, Governor Mabus, today because I am aware that the Deputy Secretary of Defense has already made a commitment to bring this issue up to the Office of the Secretary of Defense (OSD) level and to examine it in the next QDR. But for the record, there has never been a nuclear aircraft carrier in Mayport. You can check the data on that. There have been carriers. There has never been a nuclear aircraft carrier in Mayport.

The number of aircraft carriers from the time that I was Secretary of the Navy even then, and I say "even" because, as I was saying to you yesterday, there were 930 ships in the United States Navy when I was commissioned in 1968. But even when I was Secretary of the Navy in the 1980s, there were 15 carriers, and it was a different situation than there is today.

We have a commitment from OSD on this. The preliminary work that has been authorized or that we have been informed will take place, the dredging and the improvement of the pierside, I am not going to oppose that. I believe, in fact, that it alleviates a lot of the concerns about possibly having a second place for a carrier to go in terms of an emergency. But I would say very strongly that this issue is going to be debated, and I want it to be debated properly.

I want it to be debated on issues of our national strategy and the assets that we have available to solve problems. When the Navy comes in here, as they did last year, and said they got \$4.6 billion in unfunded priorities—requirements, not priorities—requirements. Unfunded requirements, and then they turn around and say they want another \$1 billion to do this, I think they have gone from the area of "need to have" to the area of "nice to have." There are a lot of places you can take \$1 billion and do some good for the United States Navy.

Mr. Work, you are uniquely qualified to address that issue. I am going to get back to that in minute.

Before I ask a question of you, Governor Mabus, I would like to say something to Ms. King. I would hope in the spirit of bringing DOD and this panel into harmony that you will take a look at this 60-day rule.

When we have people come up here and testify and we ask questions, and their response basically is, "Well, we will get back to you with a written answer." In too many cases and, frankly, particu-

larly with the Army, this has been used as a way to sort of roll issues that are kind of hot-button issue now and kind of get them off the radar screen.

I hope that you will look at that 60-day period as sort of the floor rather than the regular process, particularly when there are issues that come before us that are time sensitive.

Ms. KING. I will, Senator.

Senator WEBB. Thank you.

Governor, I would like to say, first of all, I think you bring a great set of qualifications to the job, a very unique set of qualifications having been Governor, having been an Ambassador, having served on active duty, and having been a businessman.

I would say to you, as someone who has spent 5 years in the Pentagon, been around the military all my life, who loves the military, who also believes the military sometimes needs tough love, that I hope that once you assume your position here, you will resist the notion to get on an airplane and go say "hi" around the world, which is what they are going to ask you to do, and really get your arms around the need for strong civilian leadership in the Department of the Navy.

I would like to give you an example here and ask for you to bring us your ideas in terms of management policies that might fix it. About a year and a half ago, I read in the Wall Street Journal that Blackwater, which now has a new name, I think it is Xe, was building a facility and had something like a tens-of-million-dollar project in San Diego to train active duty sailors how to tactically deal with a presence on their ship.

The first thing that struck me about that was that why, 6 years then after September 11, were we asking civilian contractors to teach our military people how to perform military functions? It would be like when I was in Quantico as a marine having Blackwater coming and teaching me how to patrol.

So I started asking questions about this. The city of San Diego was opposing this facility. That is how it ended up in the Wall Street Journal. But I started asking questions about how did this project get authorized? Had it ever come before this committee? Was it specifically before the Appropriations Committee? How do these things happen?

The end result of it was that there was a block of money that had moved forward from the Appropriations Committee, Operation and Maintenance money, from which the Department of the Navy decided that to service the "needs of the fleet," they would make this contract with Blackwater. In other words, it wasn't an authorized program. It simply emanated from a locality in the Navy.

As I asked further questions, it turned out that from the information that I was given, a Senior Executive in the Navy one level up from the program authorizer could make this decision on up to an amount of \$78.5 million without even the approval of the Secretary of the Navy.

Now I think, as someone who has a lot of experience in business and management, you would probably find that as disconcerting as I did?

Ambassador MABUS. Yes, sir.

Senator WEBB. Here is what I would ask. I would like to send you this packet and just get you to put a management check on it, if you would. Maybe we can discuss it or maybe I can just get your reaction in terms of management policies for these sorts of things that are happening inside the Department of the Navy?

Ambassador MABUS. I will be very happy to do that.

Senator WEBB. Thank you very much.

Mr. Work, you are a lucky man because my time just ran out. [Laughter.]

Senator REED. Senator Nelson.

Senator BILL NELSON. Ms. King, you have worked for Senator Reed, and you know the process up here. I think the words of Senator Webb are well spoken about making sure that DOD is getting back to us. They haven't in the past.

Ms. KING. I understand.

Senator BILL NELSON. It is another way of rope-a-doping. We are so busy around here that we are not all the time checking every day to see that DOD is responding. So, thank you. You are uniquely qualified for this.

Because Mayport has been brought up as an issue here, I am compelled to recall for the record the long history of commentary and testimony that has been made to this committee. This past January 14, the Navy issued its record of decision to have a homeport for a nuclear aircraft carrier at Mayport. It, by the way, was replacing another aircraft carrier, the *John F. Kennedy*, a conventional carrier, that had been homeported there, and back in the 1980s, there were two aircraft carriers.

The Atlantic fleet has historically been spread at least over two ports. In the Pacific, we know there are three homeports of which the six carriers stationed in the Pacific are spread.

In its record of decision just a couple of months ago, the record of decision said, "The most significant strategic advantage offered by the development of an additional east coast nuclear-powered aircraft carrier (CVN) homeport is a hedge against a catastrophic event that may impact Naval Station Norfolk, the only existing CVN homeport for the Atlantic fleet CVNs of which there are five that are homeported of the now six CVNs, the most recent having just been commissioned, the *George H.W. Bush*."

Furthermore, the Navy stated in that record of decision, "Neither the Navy nor the Nation nor its citizens can wait for a catastrophic event to occur before recognizing the potential impacts of such an event. This lesson was learned all too well in the aftermaths of the recent catastrophic events, such as Hurricane Katrina. The Navy recognized its responsibility to develop a hedge against such an event."

Thus, according to the Navy, and I continue to read from the record of decision, "The decision to create the capacity to homeport a CVN at Naval Station Mayport represents the best military judgment of the Navy's leadership regarding strategic considerations."

They determined that, "The cost of developing a CVN homeport at Naval Station Mayport is more than offset by the added security for CVN assets and enhanced operational effectiveness provided by the ability to operate out of two homeports."

Those are not my words. That is the Navy's words in their decision to have a homeport for a nuclear carrier.

Mr. Chairman, I ask that the Navy's record of decision be entered into this committee record.

Chairman LEVIN [presiding]. It will be at this point.
[The information referred to follows:]

DEPARTMENT OF DEFENSE

Department of the Navy

**Record of Decision for Homeporting of Additional Surface Ships
at Naval Station Mayport, Florida**

AGENCY: Department of the Navy, Department of Defense.

ACTION: Notice of Record of Decision.

SUMMARY: The Department of the Navy (DON), after carefully weighing the strategic, operational, and environmental consequences of the proposed action, announces its decision to homeport one nuclear-powered aircraft carrier (CVN) at Naval Station (NAVSTA) Mayport. Today's decision does not relocate a specific CVN to NAVSTA Mayport. It does initiate a multiyear process for developing operational, maintenance, and support facilities at NAVSTA Mayport to support homeporting of one CVN. This multiyear process includes implementing projects for dredging and dredged material disposal, construction of CVN nuclear propulsion plant maintenance facilities, wharf improvements, transportation improvements, and construction of a parking structure to replace existing parking that would be displaced by development of the CVN nuclear propulsion plant maintenance facilities. The projects necessary to create the capacity to support CVN homeporting could be completed as early as 2014. No CVN homeport change will occur before operational, maintenance, and support facility projects are completed. Selection of the CVN to be homeported at NAVSTA Mayport would not occur until approximately one year prior to the ship's transfer to NAVSTA Mayport. Selection of a specific CVN for homeporting at NAVSTA Mayport will be based upon then current operational needs, strategic considerations, and maintenance cycles.

The DON decision to utilize the capacity at NAVSTA Mayport to homeport a CVN is the culmination of a two and a half year process involving environmental analysis under the National Environmental Policy Act (NEPA), identification of the recurring and nonrecurring costs associated with homeporting surface ships at NAVSTA Mayport, and an assessment of strategic concerns.

The DON environmental analysis included extensive studies regarding impacts associated with dredging, facility construction, and homeport operations. The environmental

analysis undertaken by the DON included lengthy and detailed consultations with regulatory agencies, such as the U.S. Fish and Wildlife Service (USFWS) and the National Marine Fisheries Service (NMFS), regarding impacts to endangered and threatened species, and the U.S. Army Corps of Engineers (USACE) and the Environmental Protection Agency (EPA) regarding dredging operations and the in-water disposal of dredged materials. Public awareness and participation were integral components of the Environmental Impact Statement (EIS) process. The DON ensured that members of the public, state agencies, and federal agencies had the opportunity to help define the scope of the DON's analysis as well as examine and consider the studies undertaken by the DON. Public review and comment on the DON's interpretation of those studies and the conclusions drawn from the DON's interpretation of associated data were robust.

The decision reached by the DON, as further explained later in this Record of Decision, is based upon the DON's environmental, operational, and strategic expertise and represents the best military judgment of the DON's leadership. The need to develop a hedge against the potentially crippling results of a catastrophic event was ultimately the determining factor in this decision-making process. The consolidation of CVN capabilities in the Hampton Roads area on the East Coast presents a unique set of risks. CVNs assigned to the West Coast are spread among three homeports. Maintenance and repair infrastructure exists at three locations as well. As a result, there are strategic options available to Pacific Fleet CVNs should a catastrophic event occur. By contrast, NAVSTA Norfolk is homeport to all five of the CVNs assigned to the Atlantic Fleet and the Hampton Roads area is the only East Coast location where CVN maintenance and repair infrastructure exists. It is the only location in the U.S. capable of CVN construction and refueling. The Hampton Roads area also houses all Atlantic Fleet CVN trained crews and associated community support infrastructure. There are no strategic options available outside the Hampton Roads area for Atlantic Fleet CVNs should a catastrophic event occur.

FOR FURTHER INFORMATION CONTACT: Mr. Royce Kemp, Naval Facilities Engineering Command Southeast, Building 903, Naval Air Station Jacksonville, FL 32212-0030, telephone 904-542-6899.

SUPPLEMENTARY INFORMATION: Pursuant to Section 4332(2)(c) of Title 42 of the United States Code (Section 102(2)(c) of the National Environmental Policy Act of 1969 [NEPA]); the regulations of the President's Council on Environmental Quality

(CEQ) that implement NEPA procedures (40 Code of Federal Regulations [CFR] Parts 1500-1508); DoD Instruction 4715.9, Environmental Planning and Analysis; and the applicable DON environmental regulations that implement these laws and regulations, the DON announces its decision to homeport one CVN at NAVSTA Mayport. The proposed homeporting will be accomplished as set out in Alternative 4, described in the Final EIS as the Preferred Alternative. The DON considered applicable executive orders, including the requirements of Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low Income Populations.

Specific components of the Preferred Alternative, as described in the Final EIS, include the following: (a) dredging of the NAVSTA Mayport turning basin and entrance channel and federal navigation channel (duration approximately 12 to 18 months); (b) disposal of approximately 5.2 million cubic yards (cy) of dredged material in an ocean dredged material disposal site (ODMDS); (c) improvements to Wharf F (duration approximately 24 months); (d) improvements to parking (duration approximately 24 months); (e) improvements to on-station roads (duration approximately 24 months); (f) construction of CVN nuclear propulsion plant maintenance facilities (duration approximately 33 months), followed by equipment outfitting; (g) and arrival of one CVN for homeporting as early as 2014, dependent upon the completion of CVN nuclear propulsion plant maintenance facilities construction and outfitting.

PURPOSE AND NEED: The purpose of the proposed action is to ensure effective support of fleet operational requirements through efficient use of waterfront and shoreside facilities at NAVSTA Mayport. The DON has developed plans for ashore infrastructure to ensure appropriate support of the Fleet Response Plan and the DON's required operational battle force.

The DON needs to utilize the available facilities at NAVSTA Mayport, both pierside and shoreside, in an effective and efficient manner. Effective use of NAVSTA Mayport helps preserve distribution of assets among homeport locations to reduce the risks to fleet resources and to maintain operational, maintenance and repair capabilities in the event of natural disaster, manmade calamity, or attack by foreign nations or terrorists. Developing homeport capability for a CVN at NAVSTA Mayport optimizes use of existing infrastructure including housing, support facilities (gym, exchange, etc.), and available berthing capacity.

PUBLIC INVOLVEMENT: The DON initiated a mutual exchange of information through early and open communications with interested stakeholders throughout the development of the EIS. The Notice of Intent (NOI), which provided an overview of the proposed action, explained the projected scope of the EIS, and identified the scoping meeting time and location, was published in the Federal Register on November 14, 2006 (71 FR 66314). Notification of the public scoping meeting was also made through local media outlets and newspapers. The DON conducted a scoping meeting on December 6, 2006 at the Florida Community College at Jacksonville South Campus in Jacksonville, Florida. In addition, relevant project information was made available on a public website (www.mayporthomeportingeis.com) and copies of the NOI were sent to federal, state, tribal, and local agencies. Thirty-eight people attended the scoping meeting, and additional comments were collected during the 45 day public scoping period. A total of 17 individuals, agencies and organizations submitted 82 written comments in response to the NOI. The USACE and the U.S. Environmental Protection Agency (USEPA) agreed to be cooperating agencies in the EIS process.

The Notice of Availability of the Draft EIS and Notice of Public Hearing were published in the Federal Register on March 28, 2008 (73 FR 16672). Notification of DRAFT EIS availability and public hearing date was also made through local media outlets, newspapers, and direct mailings to interested individuals, agencies, and associations, as well as elected and other public officials. The Draft EIS was distributed to those individuals, agencies, and associations who asked to be notified during the scoping process, as well as members of Congress, and state officials. The Draft EIS was available for public comment from March 28, 2008 to May 27, 2008. The public comment period was extended from the original 45 day availability to provide the public 60 days to review the EIS and provide comments (73 FR 24260). The Draft EIS was made available for general public access at 5 public libraries in the Jacksonville area, and on the project website. The DON held a public hearing on April 16, 2008 at the Florida Community College at Jacksonville - Deerwood Center. A total of 120 individuals, agencies, and organizations submitted 273 comments on the Draft EIS.

The Notice of Availability of the Final EIS was published in the Federal Register on November 21, 2008 (73 FR 70640). The Final EIS included identification of the Preferred Alternative, mitigation measures to reduce environmental consequences, and

public and agency comments on the Draft EIS and responses to those comments. Notification of the availability of the Final EIS was also made through various newspapers and direct mailings to interested individuals, agencies, and associations, as well as elected and other public officials. The Final EIS was distributed to those individuals, agencies, and associations who asked to be notified during the public comment period, as well as members of Congress and state officials. In addition, the Final EIS was made available for general public access at 5 public libraries in the Jacksonville area, and on the project website. The 30-day no action period, allowing for public review of the Final EIS, ended on December 22, 2008.

ALTERNATIVES CONSIDERED: The Draft and Final EIS assessed the impacts of 12 action alternatives and the no action alternative. Consistent with the purpose and need for the proposed action, the alternatives addressed only options for utilizing capacities at NAVSTA Mayport for homeporting additional surface ships. Examination of homeporting options at other geographic locations was not relevant to the established purpose and need, so no such alternatives were considered. The 12 action alternatives evaluated a broad range of options for homeporting surface ships at NAVSTA Mayport. The alternatives included ship types currently homeported at NAVSTA Mayport: destroyers (DDGs), and frigates (FFGs), as well as additional types of ships identified by the Chief of Naval Operations (CNO), including amphibious assault ships (LHDs), amphibious transport dock ships (LPDs), dock landing ships (LSDs), and a CVN.

In the Final EIS, the DON identified Alternative 4, as the Preferred Alternative. Alternative 4 involves homeporting one CVN at NAVSTA Mayport and included dredging, infrastructure and wharf improvements, on-station road and parking improvements, and construction of CVN nuclear propulsion plant maintenance facilities at NAVSTA Mayport. Factors that influenced selection of Alternative 4 as the Preferred Alternative included impact analyses in the EIS, estimated costs of implementation, including military construction and other operation and sustainment costs, and strategic considerations.

Regulations implementing NEPA require the identification of the environmentally preferred alternative. The environmentally preferred alternative for this EIS is Alternative 2, homeporting two LHDs at NAVSTA Mayport. LHD homeporting would require no dredging or other major construction activities compared to

dredging and construction activities required to implement the Preferred Alternative to homeport a single CVN. As such, the Preferred Alternative (Alternative 4) would have greater environmental impact than the environmentally preferred alternative (Alternative 2) on earth resources, water resources, air quality, noise, biological resources, and utilities. While the environmentally preferred alternative would have less environmental impact than the Preferred Alternative, it does not address strategic concerns or reduce risks to critical Atlantic Fleet assets and infrastructure.

ENVIRONMENTAL IMPACTS: The EIS analyzed environmental impacts and the potential magnitude of those impacts relative to the following categories of environmental resources: earth resources, land and offshore use, water resources, air quality, noise, biological resources, cultural resources, traffic, socioeconomic, general services, utilities, and environmental health and safety. Analysis of these categories also included the radiological aspects of CVN homeporting. Only environmental impacts to NAVSTA Mayport and the project area were evaluated. There were no environmental impacts to the human environment outside of NAVSTA Mayport and the project area that were interrelated to the natural or physical environmental effects of the proposed action.

The environmental impact of implementing each alternative was evaluated against the 2006 baseline. The baseline year 2006 best represents recent and historical operations at NAVSTA Mayport, and 2014 represents the end-state year by which all alternatives evaluated in the EIS could be implemented. Many impacts were found to be common among the alternatives. A detailed discussion of the environmental consequences for each resource is provided in Chapter 4 of the Final EIS.

The discussion below identifies resource categories for which the potential for significant impacts were identified or for which substantial public comments were made. The focus of this discussion is on the impacts associated with the Preferred Alternative, homeporting of one CVN at NAVSTA Mayport.

SHIP AND PERSONNEL LOADING: The number of ships homeported and the average net daily population would decrease between the 2006 baseline and 2014 due to decommissioning of the conventionally-powered aircraft carrier, USS JOHN F. KENNEDY (CV 67), formerly homeported at NAVSTA Mayport, in 2007. In addition, between 2006 and 2014, homeported ships and personnel stationed at

NAVSTA Mayport would also decrease due to: 1) the scheduled decommissioning of 10 FFGs currently homeported at NAVSTA Mayport and 2) the downsizing of the Southeast Regional Maintenance Center (SERMC). With the Preferred Alternative, between the 2006 baseline and the 2014 end state, NAVSTA Mayport's net daily population would decrease by approximately 1,600 and the number of homeported ships would decrease from 22 to 12.

EARTH RESOURCES: The Preferred Alternative would require approximately 30 acres of upland development, but the primary issues pertain to dredging and disposal of the dredged material. The Final EIS reported that one sediment sample representing a zone of approximately 315,000 cy of the proposed dredge sediments had failed a portion of the bioassay requirements per the Marine Protection, Research, and Sanctuaries Act (MPRSA) Section 103 for suitability for placement in an ODMDS. As a result of this one sample failing the solid phase bioassay test, the Final EIS concluded that approximately 4.8 million cy of the total 5.2 million cy of the proposed dredge material would be suitable for ocean disposal in an ODMDS, but this zone of approximately 315,000 cy of material may require disposal at a permitted upland disposal site. Since publication of the Final EIS, however, the U.S. Army Corps of Engineers (USACE) has retested sample sediments from that zone. The retest conducted in coordination with USEPA Region 4 showed passing results, indicating that all 5.2 million cy of proposed dredge material is suitable for ocean disposal. Amplifying information is as follows.

The results of the initial solid phase bioassay tests reported in the Final EIS indicated that all but one of the proposed dredging zones in the project area passed published ocean disposal criteria. The one zone, Zone 4, minimally failed to pass the criteria for survival of the amphipod test species (*L.plumulosus*) as the initial results were 70 percent survival rate compared to a needed 71 percent survival rate. The cause of the test failure was that one of the five replicate tests taken for Zone 4 had a very low survival rate when compared with all of the other 59 solid phase amphipod bioassay tests taken for this project series of sediment tests. The USACE conferred with the USEPA Region 4 about the retesting for the solid phase amphipod survival in Zone 4. USEPA Region 4 concurred with the retesting and directed the USACE to use the same sample sediment from the initial testing in Zone 4, control, and reference sediments. The retest values showed a survival rate for test

species, amphipod, of 93 percent in Zone 4, far exceeding the 70 percent survival rate threshold. Additionally, a statistical analysis was completed on the combined initial and retest amphipod survival rates for Zone 4. These pooled test results showed that sediment samples representing Zone 4 were not significantly lower in survival rates than the reference site and therefore passed the solid phase bioassay for ocean disposal. With these passing results from the retesting of Zone 4 sample sediments, all 5.2 million cy of the proposed dredging project are suitable for disposal at ODMDSs. As part of the dredge project permitting phase, the remaining biological tests will be finished and the formal MPRSA Section 103 Evaluation completed by USACE and USEPA to conclude determination of suitability for ocean disposal.

The relatively limited capacity of the Jacksonville ODMDS would be affected, but would be minimized by placement of approximately 2 million cy at the Jacksonville ODMDS and placement of the remaining approximately 3.2 million cy at the Fernandina ODMDS. The USACE concluded that the Jacksonville ODMDS could accommodate the DON's proposed 2 million cy while still supporting other regional projected maintenance projects for 8 to 10 years following the proposed DON project.

The following additional actions will be taken to minimize impacts to earth resources: adhere to requirements of Construction Generic Permit and Environmental Resource Permit for Stormwater Management Systems; modify NAVSTA Mayport Stormwater Pollution Prevention Plan (SWPPP) and Municipal Separate Storm Sewer System (MS4) management plans and goals to include the 30 acres of upland improvements; design facilities to prevent additional nutrients from entering receiving waters; conclude biological testing per MPRSA Section 103 permitting process for dredge material disposal in ODMDSs; DON (as a member of the Jacksonville ODMDS Site Management and Monitoring Plan team) continue to support the USACE Jacksonville District and USEPA Region 4 in determining appropriate disposal practices and potential management options at the Jacksonville ODMDS, including possible expansion of the Jacksonville ODMDS under MPRSA Section 102 if deemed necessary by USEPA Region 4.

WATER RESOURCES: There would be increased impervious surface and impacts to stormwater flow resulting from the approximately 30 acres of upland development. The dredging project would not impact groundwater. Hydrodynamic model results show that currents, salinity levels, and sedimentation rates in the NAVSTA

Mayport turning basin, entrance channel, federal navigation channel, and the St. Johns River would not change significantly from existing conditions following the proposed dredging project.

The following additional actions will be taken to minimize impacts to water resources: obtain required permits prior to construction, including an Environmental Resources Permit from Florida Department of Environmental Protection (FDEP) or St. Johns River Water Management District (SJRWMD), and implement appropriate Best Management Practices to protect water resources from increased stormwater runoff associated with an increase in impervious surfaces; obtain required permits prior to dredging, including a CWA Section 401 State Water Certificate and an Environmental Resources Permit from FDEP, and a Rivers and Harbors Act Section 10 permit from USACE; conclude biological testing per MPRSA Section 103 permitting process for dredge material disposal in ODMDSS; avoid wetlands for Massey Avenue road improvements or, if unavoidable, mitigate accordingly; construct CVN nuclear propulsion plant maintenance facilities above the 100-year floodplain; and modify NAVSTA Mayport Multi-Sector Generic Permit SWPPP permit plans and goals.

AIR QUALITY: Duval County is designated as an attainment area under the Clean Air Act Amendments; therefore, the General Conformity requirements do not apply. Short-term increases in air emissions would occur from construction activities, primarily due to the dredging equipment and the tug engines used in transport of dredged material to the ODMDSS. The greatest contribution would be in oxides of nitrogen (NOx) emissions, primarily due to emissions from mobile sources associated with the construction dredging. The use of modern dredging equipment with USEPA rated tier 1, tier 2, or tier 3 diesel engines to the greatest extent practicable would help minimize NOx emissions. Over the long-term there would be a minor increase in operational emissions associated with the boilers for the new CVN nuclear propulsion plant maintenance facilities.

BIOLOGICAL RESOURCES: The dredging project would result in short-term minor impacts from dredging operations and sediment disposal to marine resources, including marine flora, invertebrates, and fish in the vicinity of the dredging areas and ODMDSS. The proposed dredge project is located within the vicinity of designated Essential Fish Habitat (EFH) for 21 Fishery Management Units (FMUs); none occur in the vicinity of the ODMDSS. Habitat Areas of Particular Concern designated

for four of these FMUs (managed by the South Atlantic Fishery Management Council) occur within the vicinity of the proposed dredging activities. Dredging activities would be expected to result in fish temporarily avoiding the area; and the potential for entrainment of fish species at larval stages at levels which would not adversely impact larval populations within the FMUs.

In accordance with section 7 of the Endangered Species Act (ESA), the DON consulted with the USFWS and NMFS regarding potential impacts to federally listed species and designated critical habitat for proposed construction and dredging activities.

With implementation of the conditions of the USFWS Letter of Concurrence, it was determined implementation of the dredge project would have no effect on nesting listed sea turtles; may affect, but is not likely to adversely affect Florida manatee; and would not destroy or adversely modify Florida manatee designated critical habitat.

Per USFWS Letter of Concurrence dated December 5, 2008, the DON will include the following conditions to be reflected in the USACE permit and in any plans and specifications for dredging associated with the proposed homeporting: implement the July 2005 Standard Manatee Conditions for In-Water Work; for nighttime clamshell dredging within the NAVSTA ship turning basin, a dredge window restricting such dredging to the period extending from the last full week in October through February 28. Dredge mobilization and demobilization may occur prior to and after this window. This window may be extended up to an additional 21 days in the event the dredging is not completed within the specified window. The DON shall notify the USFWS, Jacksonville Ecological Services Field Office (JAFL), in writing of the need for the extension and request its approval, along with supporting information, at least two weeks prior to the beginning of the requested extension. The JAFL shall provide its written response, indicating either concurrence, non-concurrence, or concurrence with additional conditions, to the DON within two days of receipt of the request.

With implementation of the conditions of the NMFS Biological Opinion (BO) dated 7 January 2009, it was determined implementation of the dredge project may affect, but is not likely to adversely affect shortnose sturgeon, smalltooth sawfish, NARW, and humpback whales. As NMFS determined in the BO, there is currently no NARW critical habitat in the proposed

action area. NMFS also found, with implementation of the reasonable and prudent measures and the terms and conditions, dredging to include bed-leveling activities, is likely to adversely affect, but is not likely to jeopardize the continued existence of sea turtles (loggerhead, green, and Kemp's ridley). Based on historical distribution data, hopper dredge observer reports, and observations of past strandings, loggerhead, green, and Kemp's ridley sea turtles may occur in the action area and may be taken by the hopper dredging operations of this project. NMFS believes that the proposed action can be expected to lethally take up to 17 loggerhead, 3 green, and 2 Kemp's ridley sea turtles during the proposed project.

For construction related to the Wharf F improvements, no anticipated impacts are expected to listed fish, sea turtles, and marine mammals. However, to further reduce any potential impacts, the use of a vibratory hammer will be implemented for pile driving operations. If a marine mammal is observed within 50 ft of the proposed pile driving operations, operations would cease if practicable until the animal leaves the area.

Per the NMFS BO, the DON will include the following sea turtle conservation measures to be reflected in the USACE permit and in any plans and specifications for dredging and bed-leveling associated with the proposed homeporting:

1. Sea Turtle Deflecting Draghead: In order to minimize the incidental takes of sea turtles, the use of sea turtle deflecting dragheads will be used on all hopper dredging projects where the potential exists for sea turtle interactions. The leading edge of the deflector is designed to have a plowing effect of at least 6 inches depth when the drag head is being operated that could deflect, rather than damage or entrain, a sea turtle during dredging operations. Sea turtle deflecting dragheads will be required for this project.
2. Relocation Trawling: In order to minimize the level of lethal takes by hopper dredge, the DON intends to use a modified relocation trawling approach. A modified net system either with an open net or with a "tickler chain" towed by a trawl vessel will be used to disturb the sediment on the bottom in front of the dredge, to disperse any turtles that may be on or in the bottom, up into the water column. Unlike traditional relocation trawling where the turtle is handled and sampled for biological information, this approach would prevent the turtle from being

captured in the net and from undergoing the stresses associated with net capture and handling, yet would get the turtle off the bottom and up into the water column, reducing the risk of injurious or lethal take by the hopper dredge's draghead. Also, because the modified gear would not have to be retrieved frequently to check for turtles and to release other bycatch, the amount of effective trawling time can be greatly increased. Modified (i.e., non-capture) relocation trawling will be conducted during all portions of the project when hopper dredges are used and will be operated in front of the active hopper dredge at a reasonable and safe distance.

3. Dedicated observers: USACE Standard Observer Specifications will be implemented, requiring 24-hr monitoring (i.e., two observers each monitoring for 12 hours daily) onboard hopper dredges to observe, identify, and document any lethal or injurious sea turtle (or other protected species) take associated with operation of the hopper dredge and dragheads.

4. Bed-leveling: The cleanup phase of the Navy's proposed dredging activity may involve the use of a bed-leveling device. Bed-levelers are essentially heavy H-beams or heavy drag bars dragged across the channel bottom to smooth out high spots and rough spots left over during clamshell, hopper, or other types of dredging. Standard USACE permit conditions for bed-leveling will be implemented. In addition, the following protective measures will be required for any bed-leveling activities to minimize the potential for harm to listed species:

a. Bed-leveling would be completed within 3 months of dredging, limiting the potential for any establishment of foraging habitat or resources for sea turtles.

b. There will be a GPS system on the barge that will indicate that the bed-leveling device is only being used on the high spots and within the center of the channel where sea turtles are not expected to occur.

c. USACE standard specifications require the contractor to report the location, time, and date of bed-leveling device usage via the Resident Management System. These standard specifications will be incorporated into the required project specifications.

5. The Navy and USACE will require monitoring measures that will provide data on the efficacy of modified relocation trawling on loggerhead, green, and Kemp's ridley sea turtles.

6. The Navy and USACE will report on testing results from experiments being conducted by the USACE Engineer Research and Development Center on various bed-leveling equipment designs. The Navy and USACE should implement the best identified alternative design for bed-leveling associated with this project.

As recommended in the NMFS BO, to minimize potential for project impacts on the NARW and other marine mammals from the proposed dredging and dredged-material disposal operations, the DON will include implementation of the following whale conservation measures to be reflected in the USACE permit and in any plans and specifications for dredging associated with the proposed homeporting:

1. Dredge vessel transits to the Fernandina ODMDS will not occur during the NARW calving season (November 15 through April 15).
2. During transport of dredged material to the ODMDSs and when returning to the dredge site, vessels will use extreme caution and proceed at a safe speed, no greater than 10 knots during the NARW calving season, such that the vessel can take proper and effective action to avoid a collision with a NARW or other marine mammals and can be stopped within a distance appropriate to the prevailing circumstances and conditions; slower vessel speeds can reduce the potential for a vessel strike with a listed species by providing more time for animals to react to a vessel and move out of the way (discussed below).
3. Dredge contractors will participate, and respond as appropriate, in the NARW Early Warning System (EWS), where ships are alerted to the presence of NARWs in the project area during the calving season with the aid of aerial surveys. Dredge vessel operators will be required to make their radio contact information available to NMFS or the Coast Guard. To the extent practicable, dredge vessel operations in the NARW calving area during the calving season will be minimized and transit courses altered immediately upon notification of a NARW sighting through the EWS. The Navy and USACE are partners in the funding and implementation of the EWS.

4. As clarified in subsequent discussions with NMFS, hopper dredges and/or ocean going scows will not exceed 10 knots during the NARW calving season from November 15 through April 15.

5. When whales have been sighted in the area, vessels will increase vigilance and take reasonable and practicable actions to avoid collisions and activities that might result in close interaction of vessels and marine mammals. Actions may include changing speed and/or direction and would be dictated by environmental and other conditions (e.g., safety, weather, sea state).

6. During the period December 1 through March 30, daily aerial surveys within 15 nautical miles (NM) of the dredging and disposal sites will be conducted by others (i.e., EWS) to monitor for the presence of NARWs. Right whale sightings will be immediately communicated by marine radio to the Dredging Contractor's dredge.

7. During the period November 15 through April 15, barges or dredges moving through the NARW calving area shall take the following precautions: If whales have been spotted via EWS or other observers within 15 NM of the vessel's path within the previous 24 hours, the tug/barge or dredge operator shall slow down to 5 knots or less during evening hours or when there is limited visibility due to fog or sea states greater than Beaufort 3.

8. Tug/barge or dredge operators shall maintain a 500-yard buffer between the vessel and any whale.

9. As clarified in subsequent discussions with NMFS, a NMFS-approved observer will be present 24 hours a day during the calving season, on hopper dredges during the transport of dredged materials. Observers would monitor for the presence of marine mammals from the bridge during daylight hours while transiting to and from the disposal area.

10. Floating weeds, algal mats, Sargassum rafts, clusters of seabirds, and jellyfish are good indicators of sea turtles and marine mammals. Therefore, increased vigilance in watching for sea turtles and marine mammals will be taken where these are present.

Over the long-term, the DON vessel transit activities at NAVSTA Mayport associated with vessels homeported would be reduced

commensurate with the decrease in homeported ships from 22 ships in the 2006 baseline to 12 ships in 2014 under the Preferred Alternative thereby reducing the long-term potential for NAVSTA Mayport homeported vessels to strike threatened and endangered species during these transits (primarily a concern with whales). DON vessel transit activities are addressed in the DON's 1997 Regional BO with NMFS for Navy Activities off the Southeastern United States along the Atlantic Coast. The Navy is currently in consultation with NMFS for East Coast Navy vessel transit activities, to include all those associated with ships homeported at NAVSTA Mayport, under the East Coast Navy Tactical Training Theater Assessment Planning (TAP) Program consultation. The resultant BO from the TAP consultations will supersede other BOs pertaining to Navy vessel transit activities, and provide a comprehensive evaluation of potential effects of East Coast vessel activities on listed species.

CULTURAL RESOURCES: No historic properties have been identified within the areas of potential effects for the Preferred Alternative. An archaeological monitor will be present during the Massey Avenue/Maine Street intersection improvement construction to ensure that National Register of Historic Places (NRHP) eligible prehistoric archaeological site (8DU7458) is avoided. As an additional safeguard, the DON also will attach a post-review discovery clause to the construction contract pursuant to 36 CFR 800.13 to ensure that cultural resources are taken into account in the unlikely event of their discovery. In a letter dated 2 December 2008, the Florida State Historic Preservation Officer (SHPO) concurred with the DON that the implementation of the Preferred Alternative would not affect historic properties.

SOCIOECONOMICS: The evaluation of socioeconomic impacts compares the 2006 baseline with the 2014 end state in the NAVSTA Mayport area. Some socioeconomic impacts related to personnel levels at NAVSTA Mayport have already occurred due to personnel decreases associated with the decommissioning of the KENNEDY in 2007 and SERMC downsizing. As compared to the 2006 baseline, with implementation of the Preferred Alternative, estimated regional economic benefits resulting from the federal investment of military construction dollars would total approximately \$671 million and result in 7,400 short-term full- and part-time jobs. It is anticipated that total dependents would decrease by 13 percent, and total school age children would be reduced by 12 percent. Average annual growth in direct jobs would be reduced 2.1 percent, and total reduction in employment would be

approximately 2,000 jobs. Direct payroll would be reduced by \$150 million, and change in disposable income would be reduced by a total of \$141 million. Estimated local tax contributions would be reduced by approximately \$6 million.

GENERAL SERVICES: As with the socioeconomic impact analysis, the evaluation of general services compare the 2006 baseline with the 2014 end state and acknowledges some impacts assessed herein have already occurred due to personnel decreases associated with the decommissioning of the KENNEDY and SERMC downsizing. As compared to the 2006 baseline, implementation of the Preferred Alternative would result in declines in population and dependents and school age children associated with NAVSTA Mayport personnel by 2014. Population declines are not expected to affect most general services. With regard to schools, declines in enrollment associated with NAVSTA Mayport school age dependents would be somewhat offset by other shifts in demographics that have resulted in regional increases in enrollment in Duval County Public Schools and other area schools.

RADIOLOGICAL ASPECTS OF CVN HOMEPORTING: As discussed in the EIS, the DON's methods for design and operation of nuclear-powered ships and their support facilities are fully protective of the health and safety of the public, and of the environment. The same stringent radiological control and environmental monitoring practices used throughout the Naval Nuclear Propulsion Program would be employed at Naval Station Mayport, resulting in no adverse effect on the environment. Based on the successful record discussed above, the DON concludes that there are no additional mitigative measures which need to be taken to further reduce potential radiological impacts on the environment associated with permanently homeporting a CVN at Naval Station Mayport.

MITIGATION:

BIOLOGICAL RESOURCES: The following Reasonable and Prudent Measures (RPMs) and implementing Terms and Conditions have been identified by NMFS as necessary and appropriate to minimize impacts of incidental take of loggerhead, green, and Kemp's ridley sea turtles from the proposed project.

1. The Navy and USACE shall implement best management measures that reduce the risk of injury or mortality of listed species.

2. The Navy and USACE shall have measures in place to report all interactions with any protected species (ESA or Marine Mammal Protection Act) resulting from the proposed action.
3. As clarified in subsequent discussions with NMFS, the contractor shall be required to use a methodology to track and record hopper dredge and/or ocean going scow speed for transits conducted during calving season. This data will be made available to NMFS for independent speed verification if requested.
4. The Navy and USACE will require or conduct activities in compliance with NMFS' March 23, 2006, Sea Turtle and Smalltooth Sawfish Construction Conditions.
5. Prior to modified (non-capture) relocation trawling, the Navy and USACE shall develop and submit to NMFS detailed specifications on the final selected modified (non-capture) relocation trawling gear sufficiently ahead of planned dredging activities for NMFS to review and comment on the plans. NMFS fisheries gear specialists may be able to provide technical assistance in developing specifications.
6. As clarified in subsequent discussions with NMFS, if compelling Sea Turtle Stranding and Salvage Network (STSSN) observer reports and evidence indicate that a turtle was killed by a bed-leveler associated with the proposed action covered by this opinion, the Navy shall reinstate the consultation. USACE and U.S. Navy in consultation with NMFS will make each determination of take.
7. If any listed species are injured or killed during the proposed project, the Navy or USACE shall provide a report summarizing the incident, within 90 days of project completion, to: NMFS Protected Resources Division, 263 13 Avenue South, St. Petersburg, FL 33701-5505. Notification of take shall be provided to NMFS at the following e-mail address within 24 hours of each take: takereport.nmfs@noaa.gov.
8. The BO serves as both the requirement and the permitting authority for any NMFS approved protected species observer aboard a non-capture trawler or hopper dredge to collect tissue samples from live- or dead-captured sea turtles without the need for an ESA section 10 permit. All live or dead sea turtles captured by hopper dredging during or associated with the proposed dredging action shall be tissue-sampled prior to

release (if alive) or prior to disposal (if dead). Sampling shall continue uninterrupted until such time as the project ends. Sea turtle tissue samples shall be taken in accordance with NMFS' Southeast Fisheries Science Center's (SEFSC) procedures for sea turtle genetic analyses (Appendix II of this opinion). The Navy and USACE shall ensure that tissue samples taken during the project are collected and stored properly and mailed within 60 days of the completion of the dredging project to: NOAA, National Marine Fisheries Service, Southeast Fisheries Science Center, Attn: Lisa Belskis, 75 Virginia Beach Drive, Miami, Florida 33149. Ultimately, tissue samples gathered during sampling will be used to obtain reliable genetic data on the nesting or sub-population identity of sea turtles being captured or lethally taken. No sea turtle captures are expected during modified (i.e., non-capture) relocation trawling; however, if any are taken during this trawling, they must be sampled, unless shipboard safety concerns preclude it.

DECISION: After considering the environmental impacts analyzed in the EIS, the recurring and nonrecurring costs associated with homeporting additional surface ships at NAVSTA Mayport, and strategic implications of a second CVN homeport on the East Coast to support the Atlantic Fleet, the DON elected to implement Alternative 4, the Preferred Alternative. That alternative provides for homeporting one CVN at Naval Station (NAVSTA) Mayport. The DON decision does not immediately relocate a specific CVN to NAVSTA Mayport. It does initiate a multiyear process for developing operational, maintenance, and support facilities at NAVSTA Mayport to support homeporting of one CVN. This multiyear process includes implementing projects for dredging and dredged material disposal, construction of CVN nuclear propulsion plant maintenance facilities, wharf improvements, transportation improvements, and construction of a parking structure to replace existing parking that would be displaced by development of the CVN nuclear propulsion plant maintenance facilities. The projects necessary to create the capacity to support CVN homeporting could be completed as early as 2014.

No CVN homeport change will occur before operational, maintenance, and support facility projects are completed. Selection of the CVN to be homeported at NAVSTA Mayport would not occur until approximately one year prior to the ship's transfer to NAVSTA Mayport. Selection of a specific CVN for homeporting at NAVSTA Mayport will be based upon then current

operational needs, strategic considerations, and maintenance cycles.

The most critical considerations in the DON's decision-making process were the environmental impacts associated with the action, recurring and nonrecurring costs associated with changes in surface ship homeporting options, and strategic dispersal considerations. The need to develop a hedge against the potentially crippling results of a catastrophic event was ultimately the determining factor in this decision-making process. The consolidation of CVN capabilities in the Hampton Roads area on the East Coast presents a unique set of risks. CVNs assigned to the West Coast are spread among three homeports. Maintenance and repair infrastructure exists at three locations as well. As a result, there are strategic options available to Pacific Fleet CVNs if a catastrophic event occurred. By contrast, NAVSTA Norfolk is homeport to all five of the CVNs assigned to the Atlantic Fleet and the Hampton Roads area is the only East Coast location where CVN maintenance and repair infrastructure exists. It is the only location in the U.S. capable of CVN construction and refueling. The Hampton Roads area also houses all Atlantic Fleet CVN trained crews and associated community support infrastructure. There are no strategic options available outside the Hampton Roads area for Atlantic Fleet CVNs if a catastrophic event occurred.

Environmental impacts: Environmental impacts were identified through studies and data collection efforts. The information culled from the studies and collected data was assessed and conclusions were drawn regarding the significance of environmental impacts. These conclusions, along with the underlying studies and data, were the subject of discussions and consultations with federal/state regulators over the course of the EIS process. This interagency process led to identification of mitigation measures, where appropriate, to address environmental impacts. Based on these consultations with regulators and their subject matter experts, the DON has committed to implementation of specific mitigation measures as outlined earlier in this Record of Decision. There are no environmental impacts associated with homeporting a CVN at NAVSTA Mayport that cannot be appropriately addressed or mitigated, including impacts to endangered species such as the NARW, Florida Manatee, and sea turtles.

Recurring and nonrecurring costs: The DON's analysis and assessment of socioeconomic impacts in the EIS associated with

the range of alternatives addressed short-term and long-term local economic impacts in the Mayport area. In addition to the socioeconomic impacts considered in the EIS, recurring and onetime costs associated with changes to surface ship homeporting were projected and considered in the DON's decision-making process. Recurring and nonrecurring costs for the preferred alternative are less than 10% of the cost of a single CVN and less than 1% of the cost of the DON's CVN assets. That investment in homeport capacity at NAVSTA Mayport provides additional security for CVN assets and enhances the DON's ability to maintain its effectiveness at a time when the ability to address contingencies and respond to the unexpected is essential. In terms of risk mitigation, DON gains a dispersal capability and its benefits at a fraction of the cost of an aircraft carrier.

Recurring costs included costs associated with Sustainment, Restoration, and Modernization (SRM), Base Operations Support (BOS), training, air wing transportation, nuclear maintenance labor, and Basic Allowance for Housing (BAH) for Sailors and their families. Sustainment costs are for activities necessary to keep facilities in good condition and therefore enable them to achieve their intended useful life. Restoration and Modernization costs are life-cycle investments required to provide for recapitalized facilities that support new missions, return facilities to good condition, and improve facilities beyond original conditions or capabilities. BOS costs included Facilities Operations costs such as Utilities, Facility Services, Facility Management, and Fire and Emergency Services.

Onetime costs included costs associated with MILCON projects (construction and Planning and Design), onetime maintenance costs for management and Industrial Plant Equipment (IPE) costs, and Permanent Change of Station (PCS) associated with the initial CVN homeport assignment at NAVSTA Mayport. PCS costs are those costs associated with moving the ship's crew and dependents to NAVSTA Mayport. PCS costs were estimated costs because the location from which crews and their families would be moved remains undetermined.

Strategic dispersal: The strategic dispersal of surface ships, especially vital strategic assets such as CVNs that serve our national interests in both peace and war, was assessed through examination of potential vulnerabilities. These potential vulnerabilities were examined in the context of operational, training and maintenance requirements of East Coast assets.

Strategic dispersal factors considered included: transit times to various deployment and training areas; shipping traffic volumes and associated risk of a maritime accident; port force protection postures and risk mitigation measures; integrated vulnerability and threat assessments; historic aircraft carrier loading; physical pier capacity; nuclear maintenance capability; homeporting options in response to a catastrophic event; geographic location of the aircraft carrier aircraft squadrons; transit times from port to the open sea; historic sortie rates due to hurricanes or other natural phenomena; and the risk to the ships, infrastructure and personnel who man, service and repair aircraft carriers associated with natural or man-made catastrophic events. In terms of these factors, the analysis concluded that the strategic value of NAVSTA Norfolk and NAVSTA Mayport as CVN homeports essentially was equal. The DON's strategic analysis, however, also demonstrated the value of having both NAVSTA Norfolk and NAVSTA Mayport as CVN homeports. Establishing CVN homeport capacity at NAVSTA Mayport can be accomplished without any adverse impacts on operations while at the same time providing the added strategic value of a second CVN homeport on the East Coast.

The most significant strategic advantage offered by development of an additional East Coast CVN homeport is a hedge against a catastrophic event that may impact NAVSTA Norfolk, the only existing CVN homeport for Atlantic Fleet CVNs. It is difficult to quantify the likelihood of a catastrophic event, whether natural or man-made. Nonetheless, there is a need to plan and prepare for any such event. That planning and preparation must address CVN maintenance and repair infrastructure as well as operational considerations. The fact that quantifying the likelihood of a catastrophic event is so difficult underscores the need to ensure that our planning and preparation efforts do not underestimate or overlook the long-term effects of such event. Hurricane Katrina is a clear and recent example. The level of devastation in New Orleans in the aftermath of Hurricane Katrina was so extensive and so pervasive that more than three years after Katrina hit, the New Orleans industrial infrastructure, work force, and community support functions have not fully recovered.

The potential impact of similar man-made or natural catastrophic events in the Hampton Roads area requires the DON to plan and prepare. A failure to do so presents an unacceptable risk. The aircraft carriers of the United States DON are vital strategic assets that serve our national interests in both peace and war.

The President calls upon them for their unique ability to provide both deterrence and combat support in times of crisis. Of the 11 aircraft carriers currently in service, five are assigned to the Atlantic Fleet. NAVSTA Norfolk is homeport to all five of the CVNs assigned to the Atlantic Fleet and the Hampton Roads area is the only East Coast location where CVN maintenance and repair infrastructure exists. It is the only location in the U.S. capable of CVN construction and refueling. The Hampton Roads area also houses all Atlantic Fleet CVN trained crews and associated community support infrastructure. A second CVN homeport on the East Coast will provide additional CVN maintenance infrastructure, thereby providing added strategic value and allowing the DON to extract the added operational value of two CVN homeports in meeting its national defense obligations.

Homeporting a CVN at NAVSTA Mayport would provide strategic options in case of a catastrophic event in the Hampton Roads area, and enhance distribution of CVN assets, thereby reducing the risks to aircraft carriers and associated maintenance and repair infrastructure supporting those crucial assets.

AGENCY CONSULTATION AND COORDINATION: USACE and USEPA were cooperating agencies throughout the EIS process. These agencies were requested by the Navy to participate in the NEPA process because of their special expertise and the jurisdiction of their agencies to permit activities required for the proposed action. Their early participation in the EIS process aided in the Navy's analysis of potential environmental impacts and greatly facilitated consultations with other federal agencies. In addition, the DON consulted and coordinated with Federal and State agencies regarding the proposed homeporting of additional surface ships at NAVSTA Mayport throughout the EIS process. Agencies reviewing biological and cultural resources were contacted early in the environmental planning process and received notification letters in November 2006. Agency consultations were the culmination of discussions beginning in February 2007. Navy requested USFWS and NMFS review our Biological Assessments and the Draft EIS on March 5, 2008. NMFS supplied comments in coordination with NOAA HQ addressing concerns with MMPA, ESA and Magnusen Stevens Act that same month. Consultation with NMFS, consistent with the EPA regulations, involved an exchange of information ultimately resulting in the request for formal consultation, in compliance with the Endangered Species Act, on June 4, 2008. Formal Section 7 consultation, in compliance with the Endangered

Species Act, was initiated with the USFWS in May 2008 and NMFS in June 2008. The USFWS concluded consultation when it issued a Letter of Concurrence on December 5, 2008 with determinations of no effect on the wood stork and nesting sea turtles and may affect, but is not likely to adversely affect the piping plover or the West Indian (Florida) manatee. In addition, because no incidental take of manatees is anticipated, no such authorization under the Marine Mammal Protection Act is needed. The NMFS concluded formal consultation when it issued a Biological Opinion and Incidental Take Statement on January 7, 2009. The BO considered impacts to eight listed species that may occur in the project area. By letter dated May 12, 2008, the State of Florida agreed that the EIS is consistent with the Florida Coastal Management Program. Section 106 consultation was initiated with the Florida SHPO in March 2008, pursuant to the National Historic Preservation Act (NHPA). Section 106 consultation was completed December 2, 2008 with a Letter of Concurrence from the Florida SHPO.

RESPONSES TO COMMENTS ON THE FINAL EIS: The DON reviewed and considered all comments that were received during the 30-day no action period following the issuance of the Notice of Availability of the Final EIS. The comments summarized here represent the major substantive comments received. A total of 93 comment letters or emails totaling over 350 comments were received on the Final EIS. These included approximately 150 that were similar or identical to comments received on the Draft EIS that were previously considered and addressed in the Final EIS. The majority of the comments received questioned the fiscal responsibility and cost of implementing the preferred alternative (approximately 35 percent). The next most significant number of comments challenged the strategic considerations in the selection of the preferred alternative (approximately 22 percent) or challenged the Navy's lack of analysis of impacts to the Hampton Roads region (approximately 14 percent). The rationale for the DON decision to implement the preferred alternative and utilize the capacity at NAVSTA Mayport to homeport a CVN is fully laid out above in this ROD including consideration of cost and strategic concerns. The majority of the remaining comments related to dredging impacts, hardship incurred to Navy families by moving a CVN to Mayport, and lack of a BO or the opportunity to comment on the ESA consultation process.

Comments warranting specific responses are provided below.

Comment 1: The zones for the in-fill/sedimentation of the deepened channel and basin are not defined and volumes/types of sedimentation are not projected. In addition, the Final EIS identifies shortfalls in available areas for ocean disposal and does not state how future maintenance dredging will occur.

Response: Future maintenance is addressed in the Final EIS. Sections 2.3.1.1 and 4.3.2.2 of the Final EIS indicate approximately 30,000 cy of dredged material will be added to the annual maintenance requirements because of the moderately deeper water depths in the turning basin, entrance channel and outer portion of the federal navigation channel. USEPA and USACE both concur following their detailed capacity modeling of the site that the existing Jacksonville ODMDS has adequate capacity to accept planned dredging projects for the next 10 years, including this project and future maintenance requirements at NAVSTA Mayport.

Comment 2: Final EIS did not analyze whether Jacksonville ODMDS 2 million cy annual limit will be exceeded when considering other non-Navy dredge projects.

Response: The USACE/USEPA modeled the capacity at the Jacksonville ODMDS and concluded that there was 10 years of available capacity considering 2 million cy from the proposed project and other known maintenance and new dredging projects.

Comment 3: Potential erosion or accretion of Duval and Nassau beaches due to creation of large bathymetric highs (associated with the Jacksonville ODMDS) have not been demonstrated in the Final EIS. In addition, potential wave impacts on the shorelines, inlets, and beaches have not been projected.

Response: The Jacksonville ODMDS is managed pursuant to the Site Management and Monitoring Plan (SMMP) that is managed by the USACE and USEPA. The Jacksonville ODMDS is located 4.5 nautical miles offshore and covers an area of one square nautical mile. The ODMDS is regularly monitored for changes in bathymetry at the site; currents and waves; sediment composition, and biological activity among other parameters. Any impacts associated with creation of the dredged material mound at the ODMDS is the responsibility of the USACE and USEPA within the context of the SMMP.

Comment 4: Final EIS describes 30% slope for ODMDS which is not realistic or achievable.

Response: USACE and Navy utilized industry accepted models which predict slopes based on material type, currents, etc. This comment only refers to one of the three methods that the Navy reported for the capacity estimates for the ODMDSs. One method as described by the commenter made a geometrical measurement of the remaining capacity. It is a simple method that provides a range of estimated volume of dredged material that could be placed at the ODMDSs. The second method was that the Navy used, Multiple Dump Fate (MDFATE) an USACE/USEPA computer model that simulates dredged material disposal events. This later method predicts that the full proposed dredging project (5.2 million cy) would fit in either ODMDS. Both of these methods were reported in the Draft EIS. The USACE and EPA also used MDFATE to predict the capacity at the Jacksonville ODMDS. This later method was reported in the Final EIS and estimates that with 2 million cy from the proposed deepening and other known dredging projects that there is an estimated 10 years left of capacity at the Jacksonville ODMDS. This is a conservative estimate as the USACE/EPA plan to do Long-Term Fate (LTFATE) modeling at the site which will bring the effects of dispersal of material from the site over the long-term and, hence, provide more capacity for additional dredging projects to be placed there.

Comment 5: The Final EIS does not estimate the potential volume of beach quality sand that will be removed from the nearshore system of the Sea Islands system of northeast Florida. This information is important because it puts additional erosion stress on the beaches south of the inlet.

Response: As reported in the Draft EIS and Final EIS, the Navy undertook studies to determine the amount of beach quality sand that might be located within the dredged prism of the proposed project. As part of the initial sampling regime, the Navy extracted core samples of sediment throughout the proposed deepening project area to identify the physical characteristics of the material to be dredged, including the amount of sand, silt, and clay contained within each core sample. Additionally, the Navy targeted sub-bottom profiling to further define the extent of any potential beach quality sand. While some amount of beach compatible sand was identified and reported in the Draft EIS, additional core sampling was completed by USACE prior to publication of the Final EIS. The USACE analysis was shared with FDEP, and it was concluded that the sand could not be readily extracted separately as it was mixed within the future dredged material. It was therefore determined and reported in

the Final EIS that beach quality sand was not readily available, nor suitable for placement on state of Florida beaches.

Comment 6: Final EIS does not identify upland dredge material disposal site and quantity of contaminated sediment.

Response: Additional testing results after the Final EIS was released indicates that none of the 5.2 million cy of dredged material will require upland disposal. See ROD summary of Earth Resources.

Comment 7: Updated environmental permit conditions for Navy operations of CVN [support for carriers in port] not available for comment.

Response: Updates to environmental permit conditions, if required due to operations of a CVN, will be available for public and resource agency review during the standard permitting process wherein a 'Notice of Intent to Issue' is published in a newspaper of general circulation in the area affected.

Comment 8: NOAA recommends Navy:

- Continue to monitor the St. John's Water Management District water withdrawal analysis and provide an update in its application for CWA permit.
- Update cumulative impacts assessment and include examination of rebuilding and relocating the Mile Point training wall and White Shells training wall and constructing the Chicopit Bay diversion.
- Address apparent lack of site-specific studies supporting the conclusion that impacts to benthic communities would be minimal and temporary.

Response: The cumulative impacts section of the Final EIS was updated to include all available project information. NAVSTA Mayport personnel have participated in and will continue to keep abreast of St. Johns River Water Management District's evaluation of potential changes in the volume of freshwater withdrawals from the St. Johns River, including the cumulative impacts analysis being performed by that agency noted in the Final EIS at Section 6.3.3. As noted in Section 6.1.3 of the Final EIS, USACE is preparing a Supplemental EIS for the

Jacksonville Harbor Navigation Study, General Reevaluation Report and the Supplemental EIS will be available to the public in the fall 2010 and will include evaluation of the direct, indirect, and cumulative impacts of proposed and alternative deepening and widening measures on Chicopit Bay, White Shells Bay, and rebuilding and relocating the Mile Point training wall. These evaluations have not matured in a manner that would inform the cumulative impacts analysis beyond that presented in the Final EIS. The Navy will examine availability of any additional information (including site specific studies) prior to permit applications. If available, new information will be considered and incorporated during the standard CWA permitting process.

Comment 9: Effect of deepening on channel stability is not definitively addressed.

Response: The Final EIS provides information on the natural offshore movements of marine sediments in the vicinity of Mayport (see longshore drift text added in Final EIS pp 3-6 thru 3-8 and Figure 3.1-3 showing jetties). This information includes a graphic illustration of the presence and location of the north and south jetties that extend from the mouth of the NAVSTA Mayport entrance channel and St. Johns River Federal navigation channel into the ocean. As described in the Final EIS, the presence of these jetties alters the nearshore movement of marine sediment to the extent that sediment has build up on the north side of the jetties and erosion occurs on the south side of the jetties. The channel deepening within the jetties will have no effect on adjacent beach shorelines. Additionally, the channel deepening beyond the length of the jetties is well offshore and will not have significant effect on the movement of sediment and, therefore, will have insignificant effect on adjacent beaches.

Comment 10: Final EIS does not illustrate how barge loads of dredged material will be placed to insure disposal process meets requirements of ODMDS.

Response: The Navy and its contractors will follow all conditions of state and Federal permits for dredging and dredged material placement at the ODMDSs. These conditions may include standard operating procedures for disposal including targeted placement of barge dumps within the permitted zone of the

ODMDSs. This information will be provided in the permits for this proposed project. Actual placement will be identified through the permitting process.

Comment 11: Final EIS does not include a BO or provide the public an opportunity to comment on the BO, including those measures the Navy has or will adopt to reduce Right Whale impacts.

Response: Per CEQ 1501.14(f), the EIS contained a full discussion of means to mitigate adverse environmental impacts. The Navy entered into early consultations with USFWS and NMFS regarding potential impacts to all listed ESA species in the project area, including sea turtles, the Florida manatee, and the North Atlantic Right Whale. The Final EIS contained a biological assessment (BA) which included a full discussion of mitigation measures per the CEQ requirements. In addition, the Draft EIS contained a discussion of anticipated mitigation measures. The public was provided the opportunity to comment on the Navy proposed mitigation measures during the public comment period of the Draft EIS and during the no action period of the Final EIS. The Navy received only a few comments on the proposed mitigation measures, all of which were addressed. See ROD sections on Biological Resources and Mitigation.

Comment 12: The 2006 baseline/limited No Action Alternative evaluation does not provide clear basis for comparison of alternatives.

Response: Under the No Action Alternative, it was presumed there would be no homeporting of additional ships at NAVSTA Mayport, no construction to support additional ships, and no dredging associated with CVN homeporting or capability. In addition, the No Action Alternative included the end state year of 2014 including the decommissioning of the USS JOHN F KENNEDY (CVN 67) in 2007 and scheduled decommissioning of 10 FFGs. The No Action Alternative analysis enabled the decision makers to accurately compare the magnitude of environmental effects of implementing each action alternative with those of taking no action. The decision makers were provided all necessary information to compare the environmental effects of the proposed action and preferred alternative with the impacts of taking no action.

Comment 13: Final EIS failed to consider connected actions and interrelated environmental effects to the Hampton Roads region.

Response: The Navy has not yet identified the particular CVN that would be moved to Mayport as a result of this decision. As such impacts to Norfolk, or any other Navy port, at this point are merely speculative and not interrelated to the proposed action. Nevertheless, even if a Norfolk carrier were identified for homeport relocation, the relocation of one CVN from Norfolk Naval Base would have no adverse environmental impact on the base. A reduction in force of this magnitude is unlikely to result in any impacts other than purely socioeconomic. The Navy routinely changes homeport for single ships and experiences no impacts to the physical environment such as those suggested (spreading pollution from unremediated contaminated properties, reduction or elimination of environmental enhancement and mitigation programs, increased congestion and vehicle emissions, reduced quality of the urban environment, reduction in emergency preparedness, reduction in funding for incentives and programs targeting energy conservation and efficiency for homes and businesses).

Comment 14: The Final EIS provides site-specific impacts to fishery resources and concludes that juvenile and adult fish would likely avoid portions of the project area during dredging, but would return when dredging pauses or stops completely. These discussions are adequate except for the assessment of impacts at the tidal inlet. No site-specific assessment of the significance of these impacts is presented. NOAA recommends the Navy provide additional data in its application for a CWA permit.

Response: Navy will provide additional data, as appropriate, in its application for a CWA permit.

Comment 15: Final EIS did not address Draft EIS comments for Navy to address impacts from ship operations on protected species.

Response: No CVN would be homeported in Mayport prior to 2014. The Navy has an existing BO (1997) from NMFS which covers vessel operations, particularly impacts to NARW. As a result of this decision, the number of ships homeported at NAVSTA Mayport will be less than at the time Navy first consulted with NMFS on vessel operations in the JAX Operating Area. In addition, Navy has been, and continues to be, in ongoing consultations with NMFS on all vessel training. This consultation will be

concluded prior to any CVN movement to Mayport and will supersede the existing BO.

Comment 16: Increased ship operations will clearly result from the Navy's decision, including homeported ship operations, Coast Guard vessel security activity, or other Navy different surface ships.

Response: No increased ship movements are anticipated with the implementation of the preferred alternative. The number of ships anticipated to be homeported in Mayport is expected to reduce from 22 ships in the baseline year of 2006 to 12 ships in the end state year of 2014.

Comment 17: Preferred Alternative does not meet purpose and need. The cost is unclear due to use of 2004 dollars and not including ongoing operational costs.

Response: The Final EIS has been prepared to ensure all alternatives fully meet the purpose and need. Although the EIS only analyzes the costs of the project as they relate to socio-economic impacts, the decision makers considered all recurring and nonrecurring costs associated with implementation, including military construction and other operation and sustainment costs. The parenthetical in the statement "The Navy developed estimated construction costs (in FY 2004 dollars) for all construction-related activity necessary at NAVSTA Mayport for each alternative" at Appendix page F-4 of the Final EIS mistakenly stated the year 2004 vice 2011. The MILCON costs presented in Tables 4.9-3, 4.9-9, and 4.9-15 of the Final EIS, however, accurately represent the year of 2011. With military construction projects appropriated and initiated in 2010, 2011 would represent the first full year of construction.

Comment 18: Section 404 of CWA only allows USACE to issue discharge permit for the least environmentally damaging practicable alternative (LEDPA).

Response: Design considerations of construction features of the Preferred Alternative should make it unnecessary for the Navy to obtain a CWA Section 404 permit. The Navy will seek a Section 10 permit for the dredging and a 103 permit for the transportation of the dredge material from the ACE. The USACE will issue a separate ROD pertaining to the permit decision. The Navy will also seek a CWA 401 Water Quality Certification from the State of Florida. This is received through the FDEP Joint Coastal or Environmental Resource Permitting Programs.

Comment 19: Commenter noted USEPA raised concerns with proposed action because of the "potential for impacts that should be avoided/minimized."

Response: USEPA submitted comments on the Draft EIS. USEPA did note concerns that the proposed action identified the potential for impacts to the environment that should be minimized/avoided. USEPA requested additional information. Per USEPA's judgment, additional information was added to the Final EIS. Comments from USEPA on the Final EIS noted minor, additional concerns that can be addressed during permitting process. USEPA was generally satisfied with Navy responses to all previous comments on Draft EIS including minimizing quantity of dredged material requiring offshore disposal.

CONCLUSION: The decision to create the capacity to homeport a CVN at NAVSTA Mayport represents the best military judgment of the DON's leadership regarding strategic considerations. In reaching that decision, the DON considered the environmental impacts analyzed in the EIS, comments from regulatory agencies as well as those received from members of the public, mitigation measures that would lessen the extent and severity of environmental impacts, recurring and nonrecurring costs, and the strategic implications of developing a second CVN homeport on the East Coast to support Atlantic Fleet operational, training and maintenance needs.

There will be no significant adverse environmental impacts associated with the CVN homeporting. That conclusion is based on the data collected and analyzed in the EIS, on interagency consultations, and on the mitigation measures developed as part of that consultation process.

The cost of developing a CVN homeport at NAVSTA Mayport was balanced against the strategic need to create a hedge against a catastrophic event in the Hampton Roads area. The cost of developing a CVN homeport at NAVSTA Mayport is more than offset by the added security for CVN assets and enhanced operational effectiveness provided by the ability to operate out of two homeports.

Ultimately, the need to develop a hedge against the potentially crippling results of a catastrophic event was the driver behind the decision to homeport a CVN at NAVSTA Mayport. Developing a second CVN homeport on the East Coast not only reduces potential risk to CVN assets through dispersal of those critical assets, it provides some maintenance and repair infrastructure and

ensures access to that infrastructure by CVNs deployed at the time a catastrophic event in Hampton Roads occurred. Mayport allows DON to obtain the advantages of fleet dispersal and survivability without impacting operational availability. On the West Coast DON has accepted reduced operational availability in the interest of dispersal. By homeporting CVNs in the Northwestern U.S., DON loses operational availability during the additional transit time required to reach operational and training areas. By establishing a second CVN homeport on the East Coast, DON can gain the dispersal advantage without the increased transit time. The proximity to training areas and transit time to operating areas is about equal from Norfolk and Mayport.

West Coast CVN homeports and maintenance facilities are not viable options in planning for Atlantic Fleet CVN assets in the event a catastrophic event occurs in the Hampton Roads area. The nuclear powered aircraft carriers are too large to transit the Panama Canal, requiring a 12,700 nautical mile voyage around South America to reach the closest CVN homeport on the West Coast at NAVSTA San Diego.

Neither the DON, nor the nation, nor its citizens can wait for a catastrophic event to occur before recognizing the potential impacts of such an event and appropriately planning and preparing for continuity of operations. This lesson was learned all too well in the aftermath of recent catastrophic events such as Hurricane Katrina. The DON looked at the possible crippling effects - immediate and long-term - of a catastrophic event in the Hampton Roads area and recognized its responsibility to develop a hedge against such an event. That hedge is homeporting a CVN at NAVSTA Mayport and developing the requisite operational, training, maintenance and support facilities.

Homeporting one CVN at NAVSTA Mayport best serves the interests of the DON and the nation, and can be accomplished in a manner that keeps environmental impacts at a less than significant level.

14 JAN 2009
Date

BJ Penn
Assistant Secretary of the Navy
(Installations and Environment)

Senator BILL NELSON. Now, needless to say, the Secretary of the Navy and the CNO, Admiral Roughead, clearly understood also the lessons of Pearl Harbor. Admiral Kimmel, a four-star admiral, the head of the Pacific fleet, allowed those battleships to be all collected up, and it was just serendipitous that our carriers had left port when the Japanese struck.

Admiral Kimmel was relieved of his command. He was forced to retire, and he was stripped of two of his four stars. His family, over the last half-century, have tried to have that case reviewed and stars reinstated, and the Navy has refused in large part because of the lesson that we must always remember.

So the Navy's decision to make Naval Station Mayport a homeport to a nuclear aircraft carrier is consistent with senior DOD and Navy leadership, including the following instances that have been well chronicled in this record of this committee.

In the additional views, we have cited, for example, the former CNO Admiral Vern Clark told the Armed Services Committee in February 2005 that, in his view, "Overcentralization of the carrier port structure is not a good strategic move. The Navy should have two carrier-capable homeports on each coast."

Admiral Clark went on to say, "It is my belief that it would be a serious strategic mistake to have all of those key assets of our Navy tied up in one port."

In March 2006, Deputy Secretary of Defense and the former Secretary of the Navy Gordon England testified to this committee that the Navy needed to disperse its Atlantic Coast carriers, saying, "My judgment is that dispersion is still the situation. A nuclear carrier should be in Florida to replace"—to replace—"the USS *John F. Kennedy* to get some dispersion."

Secretary England explained that, "The concern was there always will be weapons of mass destruction. Even though carriers were at sea, the maintenance facilities, et cetera, are still there, and the crews. So having some dispersion would be of value to the Department of the Navy."

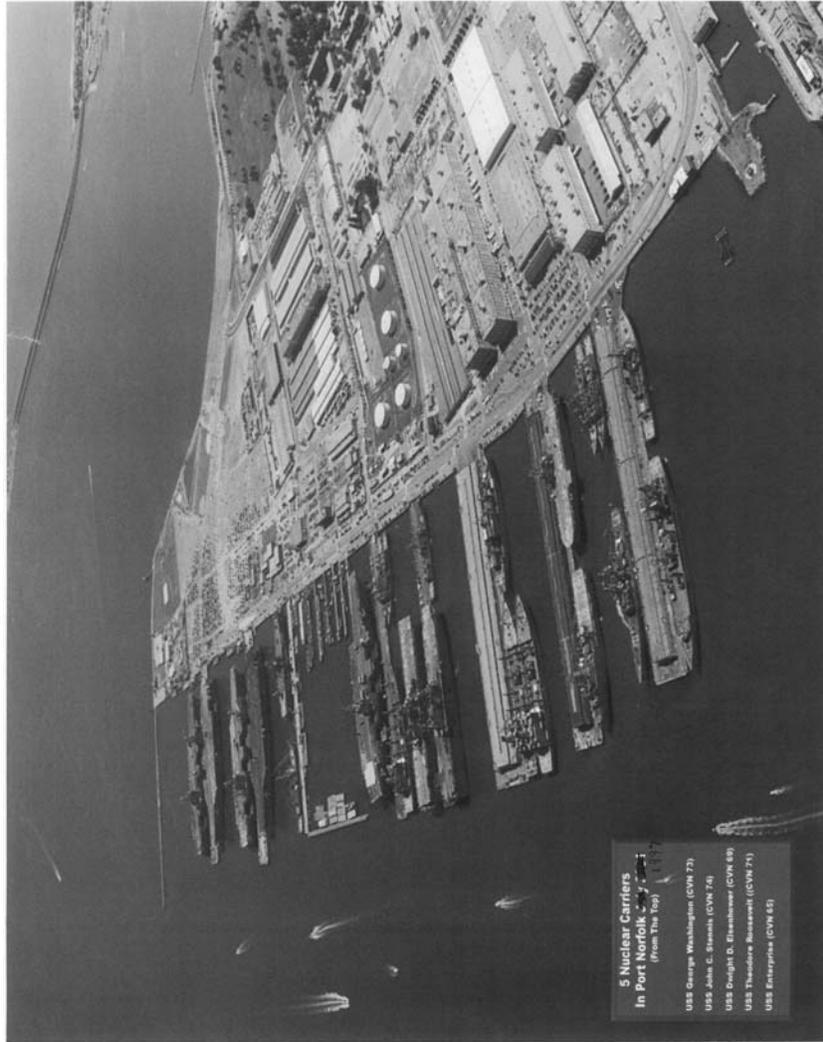

At the same hearing, the Vice Chairman of the Joint Chiefs of Staff Admiral Edmund Giambastiani shared his own judgment that we should disperse our carriers. He illustrated his sense of risk to the Nation's east coast carriers when he recalled his own visit to Norfolk one Christmas where, "We had five aircraft carriers, all sitting one next to each other, and that is not something that we should routinely do."

Mr. Chairman, I would like to enter into the record a photograph as recent as 1997 of five aircraft carriers all docked, side by side, at the Naval Station Norfolk. I would also like to enter into the record a chart prepared by the Department of the Navy of the number of times that two, three, four, five and, when you include across the river in the dry dock, six aircraft carriers have been located at Norfolk and the number of days in that particular calendar year going back for a couple of decades.

Chairman LEVIN. Without objection.

[The information referred to follows:]

This updated chart reflects the addition of carriers located at Hampton Roads area shipyards. This data does not include new construction carriers prior to commissioning.

Number of CV/CVNs inport	FY84	FY85	FY86	FY87	FY88	FY89	FY90	FY91

Senator BILL NELSON. Then, on July 31, 2007, before this committee, when asked whether he agreed that it is in our national interest to ensure that we maintain two nuclear carrier ports on the east coast of the United States and in the principle of strategic dispersal, the Chairman of the Joint Chiefs of Staff Admiral Mike Mullen stated, "I am, Senator, and I am on the record more than once for this, very supportive of strategic dispersal of our carriers."

On December 18, 2008, Secretary Gates wrote to Senator Webb and to Senator Warner, two former Secretaries of the Navy, as Senator Webb has pointed out, but also the two Senators from Virginia. Secretary Gates wrote of the Navy's decision, wrote to those two Senators, "Based foremost on strategic considerations, the CNO recommended and after thorough consideration of the Environmental Impact Statement, estimated cost of implementation, and strategic laydown and dispersal, Secretary Winter concluded that homeporting a CVN at Naval Station Mayport best supports the Navy's mission and is critical to our naval security interest."

That is from a letter from Secretary Gates. He continued, "There is significant national security value in establishing an additional east coast CVN support base." Secretary of Defense Gates wrote, "Having a single CVN homeport has not been considered acceptable on the west coast and should not be considered acceptable on the east coast."

Mr. Chairman, I ask that that letter be entered in the record.

Chairman LEVIN. Without objection.

[The information referred to follows:]

SECRETARY OF DEFENSE
1000 DEFENSE PENTAGON
WASHINGTON, DC 20301-1000

DEC 18 2008

The Honorable Jim Webb
United States Senate
Washington, DC 20510

Dear Senator Webb:

Thank you for your letters of November 19, 2008, and December 10, 2008, regarding the Navy proposal to base a nuclear-powered aircraft carrier (CVN) at Naval Station Mayport, Florida.

The Navy has studied this matter carefully since the Environmental Impact Statement (EIS) analyzing surface ship homeporting alternatives for Naval Station Mayport was initiated in 2006. Based foremost on strategic considerations, the Chief of Naval Operations (CNO) recommended homeporting a CVN at Naval Station Mayport. After thorough consideration of the impact analysis in the EIS, estimated costs of implementation, and strategic laydown and dispersal, Secretary Winter concluded that homeporting a CVN at Naval Station Mayport best supports the Navy's mission and is critical to our national security interests.

Delaying the EIS process would regrettably defer the opportunity to mitigate risk for several years, as the process is lengthy. Fundamentally we cannot forecast six to eight years out and give assurances concerning the risk of having all east coast carrier infrastructure in one location. Having a single CVN homeport has not been considered acceptable on the west coast and should not be considered acceptable on the east coast.

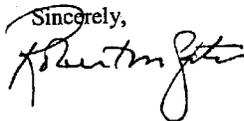

The Record of Decision concerns only the environmental impact to Mayport and the building of infrastructure to support a CVN. There has been no decision to relocate any specific carrier to Mayport and ample opportunity remains to review this course of action. On the most aggressive schedule, it would be three to four years before a final carrier homeporting decision is made.

I deeply respect your experience on defense matters and particularly those related to the Department of the Navy. As you can appreciate, there is significant national security value in establishing an additional east coast CVN support base. I consider it appropriate that the Department of the Navy move forward with a Record of Decision.

Thank you again for sharing your views on this important matter. A similar response has been provided to Senator Warner. As always, if I can be of any further assistance, please let me know.

Sincerely,

cc:

The Honorable Carl Levin
 Chairman
 Senate Committee on Armed Services
 The Honorable John McCain
 Ranking Member
 Senate Committee on Armed Services
 The Honorable Robert C. Byrd
 Chairman
 Senate Committee on Appropriations
 The Honorable Thad Cochran
 Ranking Member
 Senate Committee on Appropriations
 Admiral Gary Roughead
 Chief of Naval Operations

Senator BILL NELSON. Well, then, as Senator Webb has stated, on 10 April 2009, DOD announced their intent to review the Navy's homeporting decision in the QDR. Now both of you, I think, have stated for the record that you intend to play a major participatory role in the QDR. Is that correct?

Ambassador MABUS. If confirmed, that is correct, Senator.

Mr. WORK. Yes, sir.

Senator BILL NELSON. What weight would you share with the committee that you would give to the professional military judgments of the Chairman of the Joint Chiefs, the CNO, Admirals Mullen and Roughead?

Ambassador MABUS. Senator, I think that at this stage of my process and at the fact that this decision has been put in the QDR, that I should say that I understand the issue. I understand its importance. I understand the expressions of the decisions on both sides of the issue and that I look forward to delving into the details of this issue so that a fair and equitable decision can be made coming out of the QDR.

Senator BILL NELSON. All right. I understand how you are constrained at this point. I appreciate that. It is a delicate situation. You are a great public servant, and you are going to be a great Secretary of the Navy.

One other fact has come to my attention that when you consider what we expect to be the DOD request on the funding for the long-lead items, which is the dredging of the channel—it has been filling up—back down to the depth that will accommodate a nuclear air-

craft carrier, and it had been dredged to a similar depth when the *John F. Kennedy* was coming and going up through 2007.

We expect there to be the request as well on the improvements to the pier, which is also a long-lead item and of which Senator Webb said he is not going to oppose those funding requests. However, it has come to my attention that the Navy engineers must have military construction funding this year if there is to be no delay in implementing the Navy's decision.

Secretary Lynn has assured us that the QDR review would not cause a delay to the Navy. Since the QDR would be decided in the coming months, that would seem to be the case, and that is what he has committed to us.

Now the concern is that there may not be the request in the funding for the design funding, and that is a long-lead item, too. So I would ask you, as the new Secretary of the Navy, if you would go and speak to your superiors that within that funding there should be the provisions for the design funding so that there is, in fact, what has been committed without delay, instead of it being pushed off again?

Ambassador MABUS. Yes, sir. I will investigate that particular issue.

Senator BILL NELSON. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you.

Now I was not planning on a second round, but I think Senator Webb has his hand up.

Senator WEBB. Yes, briefly, Mr. Chairman, since my colleague took well over his 8 minutes and in lieu of a second round, I would just like to reiterate a few points that I made on this before, that it is properly before the OSD to be looked at in terms of strategic viability.

I would like also, since my friend from Florida has put all these documents into the committee hearing, we did a 21-page assessment of the Navy's proposal. It was written largely by Gordon Peterson on my staff, a 30-year naval officer. I would ask that be submitted and included in the record as well.

Chairman LEVIN. Without objection.

Executive Summary

The Navy has made no compelling argument to justify its proposal to homeport a nuclear-powered aircraft carrier at Naval Station Mayport. There is little or no evidence that the Navy's preferred homeporting alternative is supported by either strategic necessity or economic logic. Given the unavoidable adverse impact that today's economic crisis will have on defense programs, the Navy would be irresponsible to incur costs (already projected to exceed \$600 million) for a poorly justified project to duplicate existing nuclear-support facilities that the service itself describes as an "insurance policy."

The Navy's flawed and incomplete analysis does not demonstrate a strategic necessity or the economic logic for homeporting a nuclear-powered aircraft carrier in Mayport. Of note:

- **There is no indication the Navy conducted a formal, comparative threat/survivability intelligence assessment to validate its claim that dispersing a nuclear-powered aircraft carrier to Mayport will reduce risk or increase operational readiness.** The Navy has provided no documentation of a cohesive, focused assessment of current and projected military threats for its homeporting proposal that included estimated levels of risk, potential vulnerabilities, and the implications for survivability, consequence management, and physical security programs;
- **The Coast Guard currently assesses the port-security risk for the Hampton Roads region and the port of Jacksonville/Mayport to be the same.** The Navy did not request the U.S. Coast Guard to provide an independent assessment of maritime security risk in Hampton Roads, Virginia., or Mayport, Florida. The U.S. Coast Guard has statutory responsibilities for assessing maritime security risk in major U.S. seaports.
- **The concept of strategic dispersal was challenged by critics even at the height of the Cold War.** In 1986, for example, the GAO reported that the Navy's decision to disperse the fleet as part of its strategic homeporting plan was not based on a formal threat analysis, deeming the conventional threat to U.S. ports as relatively low.
- **The Navy fails to acknowledge the more than \$111-million investment federal agencies have made to improve port security in Hampton Roads to mitigate significantly the risk of a terrorist attack.**
- **The Navy's proposal is fiscally irresponsible. The Navy estimated that it had \$4.6 billion in unfunded budget priorities for fiscal year 2009.** The Navy does not account for the impact the project's approximately \$600 million to \$1 billion cost would have on the Navy's inadequately funded accounts for shipbuilding and aircraft procurement, shore readiness, and military construction. The proposal also runs counter to the Navy's "Shore Investment Strategy" which calls for consolidating the Navy's shore footprint to save money and improve physical security.

- **The Navy did not acknowledge that aircraft carriers homeported in Norfolk are supported by multiple military and civilian airfields, including an outlying airfield necessary to support carrier-qualification training requirements for the Atlantic Fleet carrier air wings.** In 2006, the citizens of Jacksonville had the chance to reopen the Naval Air Station Cecil Field for military use, but they voted not to do so.
- **The Navy issued its Final Environmental Impact Statement (FEIS) for homeporting alternatives in Mayport prior to the receipt of other agencies' statutory biological assessments.** The Navy also sought to fast-track the environmental review process so that it could issue its Record of Decision in early January. Virginia Governor Timothy M. Kaine described the Navy's FEIS as "legally insufficient and technically flawed."
- **Naval Station Norfolk is home to one of the largest regional concentrations of naval and military installations in the world, but the Navy did not apparently assess the impact that relocating a nuclear-powered aircraft carrier to Naval Station Mayport would have on assigned crew members and their families.** Any assessment of the impact of a permanent change of station should include all relevant training, career progression, sea-shore rotation, permanent change of station, and quality-of-life factors.
- **There is no evidence the Navy evaluated the comparative advantages for the private sector's ship-repair industrial base in Jacksonville resulting from an alternative homeporting arrangement encompassing a larger number of surface-combatant warships.**

It is my strong belief that no funds should be made available for the relocation of a nuclear-powered aircraft carrier to Naval Station Mayport unless the Navy fully justifies such a move in a comprehensive report to the appropriate congressional defense committees.

I. Background and Purpose

This paper critically assesses the strategic rationale, financial considerations, environmental dimensions, and personnel impacts associated with the Navy's proposal to homeport a nuclear-powered aircraft carrier at Naval Station (NAVSTA) Mayport, Florida. On November 21, 2008, after completing a two-year Environmental Impact Statement (EIS) and assessing 13 alternatives, the Navy announced its preferred alternative to homeport a single nuclear-powered aircraft carrier (CVN) at NAVSTA Mayport in Florida.

The Navy's stated purpose for this proposed action is to ensure effective support of fleet operational requirements through efficient use of waterfront and shore side facilities at NAVSTA Mayport. In 2010 the Navy will begin to decommission frigates currently homeported at Mayport. While budgetary decisions drive a Navy trend to consolidate or reduce the number of Navy bases overall, the Service maintains that retaining bases in dispersed locations nationwide and around the world supports its Fleet Response Plan and its operational battle forces. The EIS states, "The Navy needs to utilize the available facilities at NAVSTA Mayport, both pierside and shoreside, in an effective and efficient manner, *thereby minimizing new construction.*"¹

Contrary to the Navy's professed goal to identify a homeporting alternative that would minimize new Navy military construction, *permanently assigning a nuclear-powered aircraft carrier to Mayport is one of the most expensive alternatives that the Navy evaluated.* (Three more expensive options included variants of homeporting cruisers, destroyers, an amphibious assault ship (LHA), and a nuclear-powered aircraft carrier.) Homeporting a nuclear-powered aircraft carrier at Mayport will require extensive dredging, infrastructure and wharf improvements, and construction of expensive nuclear propulsion plant maintenance facilities needed for the performance of depot-level maintenance.

The Navy estimates the additional costs associated with its preferred CVN homeporting option is a one-time expenditure of \$564.8 million, of which \$426 million would be in new military construction. An additional recurring cost of \$20.4 million also is projected. The EIS states estimated construction impacts of \$671 million; according to the Navy, this sum reflects the estimated economic benefit to the region resulting from the federal investment of military construction dollars (i.e., the "ripple effect"), not just the budgeted construction costs.

The Navy maintains that homeporting a nuclear-powered aircraft carrier at NAVSTA Mayport would reduce risks to fleet resources in the event of a natural disaster, man-made calamity, or attack by foreign nations or terrorists. This rationale includes purported risks to aircraft carriers, industrial support facilities, and the people that operate and maintain these crucial assets. The net result, according to the Navy, is increased operational readiness.

As Secretary of the Navy Donald Winter explained, "The principal rationale for that has

to do with the vulnerability of the concentration [of aircraft carriers] we have right now in the Tidewater [Va.] area and the desirability to be able to have an additional resource for homeport operations and support."²

Given the significant budgetary impact of the Navy's preferred alternative, it is reasonable to ask if the Navy's proposal: (1) is based on a formal threat/survivability analysis; and (2) will produce benefits that are worth the additional costs given the Navy's unfunded budget requirements and the extraordinary financial crisis facing our nation today.

II. Strategic Rationale for Fleet Dispersal: A Flawed and Incomplete Analysis

Conventionally, non-nuclear powered aircraft carriers were homeported at NAVSTA Mayport until the decommissioning of the USS John F Kennedy (CV 67) in 2007. At present, all five of the Navy's aircraft carriers homeported on the East Coast are assigned to NAVSTA Norfolk, Va., the Navy's only East Coast facility capable of supporting a nuclear-powered aircraft carrier. The Navy's six nuclear-powered aircraft carriers homeported in the Pacific region are geographically dispersed on the West Coast (5 CVNs when the USS Carl Vinson completes its refueling overhaul in 2010) and forward deployed to Japan (1 CVN).³

The Navy's selection of the CVN East Coast homeporting alternative as its preferred option for Mayport was influenced by several factors, but the Navy cited *fleet strategic dispersal* considerations as a primary reason. In the Navy's view, homeporting an aircraft carrier at Mayport would enhance the distribution of homeport locations and reduce risks to fleet resources in the event of natural disaster, man-made calamity, or attack by foreign nations or terrorists.⁴

A copy of the executive summary to the Navy's Final EIS is provided at Appendix 1.

A Navy briefing on the Mayport Homeporting EIS to members of Congress on November 18, 2009, elaborated on the strategic rationale behind the Navy's proposal.⁵ The Navy's "strategic laydown" methodology for apportioning the planned 313-ship fleet to the West Coast, East Coast, and forward-deployed homeports for the year 2020 was influenced by the following:

- Navy Force Structure Analysis: Based on conventional campaigns, the Global War on Terror, and homeland defense requirements;
- 2020 Global Maritime Posture: Satisfy integrated steady-state and lesser-contingency requirements;
- Navy 313-Ship Plan: Encompass total force structure—the process baseline for the Navy's strategic laydown; and
- Additional Factors: Optimize sourcing of forces based on speed of response (time/distance), Maritime Strategy, and the 2006 Quadrennial Defense Review.

The Navy's strategic laydown analysis for the year 2020 yielded a total of 132 ships based on the East Coast, including a total of five nuclear-powered aircraft carriers. A

chart in the Navy’s congressional briefing on its EIS depicted the relative advantages of homeporting a CVN in Norfolk or Mayport resulting from the Navy’s operational comparison in five categories:

	Response times to COCOMs	Transit times to Respective Training Ranges	Hurricane Risk	Man Made Disaster Risk	Physical Force Protection
Norfolk	Slight Advantage		No Advantage		
Mayport	Slight SOUTHCOM Advantage (HADR/GFS)	Slight Advantage	No Advantage	Slight Advantage	Slight Advantage

The Navy’s November 18 briefing stated the following conclusions regarding its comparison of Norfolk vs. Mayport:

- Average Response (Transit) Times to Combatant Commanders: “Transit time differences *strategically insignificant*.”
- Relative Hurricane Risk: “Historically—hurricane risk to Norfolk is *similar* to Jacksonville.”
- Risk Assessment: “Mayport would provide a strategic option and serve as a hedge against risk to Hampton Roads.”

In assessing military risk at either NAVSTA Norfolk or NAVSTA Mayport, the Navy identified the following implications resulting from an act of aggression involving either a nation state (a traditional conventional or nuclear attack) or an act of terrorism:

- Loss of one or more nuclear-powered aircraft carriers
- Unable to sortie nuclear-powered aircraft carriers, guided-missile destroyers, or guided-missile cruisers due to a blocked channel;
- Unable to bring carriers at sea pierside on the East Coast due to blocked channel.

The Navy’s comparative assessment of each homeport concluded, “The most compelling strategic rationale to homeport a CVN/LHA in Mayport is as a hedge against a catastrophic event in Norfolk.” Pressed during the November 18 congressional briefing to identify a precise threat warranting this conclusion, one of the officers stated Mayport had a “slight advantage,” but there was not a clear, credible threat distinguishing one homeport from the other. Copies of the Navy’s Briefing Slides are provided at Appendix 2.

In summary, according to the Navy’s own assessment, *the meager advantages attributed to NAVSTA Mayport over NAVSTA Norfolk were acknowledged by Navy briefers to be “slight” at best*, while initial Navy estimates identify nearly \$600 million in military

construction costs and other expenses that would be incurred to enable Mayport to serve as a homeport for a nuclear-powered aircraft carrier. These cost projections could well run much higher. *The Navy's flawed and incomplete analysis does not demonstrate a strategic necessity for homeporting a CVN in Mayport.*

- *Issue 1: There is no indication the Navy conducted a formal intelligence-based threat/survivability analysis that specifically addressed force dispersal. Absent a more rigorous and documented threat/survivability assessment, it is impossible to validate the Navy's alleged claim that dispersing a single CVN to Mayport will reduce risk and increase operational readiness.*

There is an emotional appeal to the concept of reducing security risk through fleet dispersal. In today's budget-constrained environment, however, a formal threat analysis is essential to allow the Department of Defense and Congress to make informed decisions regarding the relative level of military risk (low, medium, high) and if the security benefits that will be supposedly be achieved through a proposed course of action are worth the costs. A classified version of the Navy's November 18 briefing did not address this issue. Subsequently, then-Senator John Warner and Senator Jim Webb asked the Navy to provide the classified "threat assessment" for NAVSTA Norfolk and NAVSTA Mayport that guided the Navy's selection of its preferred homeporting alternative.

The Navy's classified briefing took place December 8, 2008. Unclassified highlights of the briefing are summarized as follows:

- It was less a formal, integrated comparative threat assessment reflecting current intelligence estimates, threats, consequences, vulnerabilities, and mitigating factors than it was a "file-drawer" compilation of past classified security assessments prepared largely by the Naval Criminal Investigative Service (NCIS) for installations in the region (Naval Air Station Oceana, Craney Island, Northrop Grumman Newport News) that were said to be applicable to southern Virginia in general. Similar past NCIS security assessments for installations in the Jacksonville/Mayport region also were provided for comparison.
- There was no stand-alone security assessment for NAVSTA Norfolk included in the briefing—potential security risks identified for other installations were extrapolated to the Hampton Roads region.
- There was no indication during the December 8 briefing that the Office of Naval Intelligence conducted an independent threat/survivability study to guide the Navy's homeporting proposal. The National Maritime Intelligence Center, staffed jointly by the Navy, the Coast Guard, and the Marine Corps, provides a world-class maritime intelligence capability dedicated to the nation's defense. It is superbly qualified to conduct a more rigorous threat assessment.

- After a discussion of approximately 15 to 20 minutes, then-Senator Warner told the Navy's briefing officers, "If you have the law, argue the law. If you have the facts, argue the facts. You don't have the facts." Pressed to make a clearer threat-based distinction between Norfolk and Mayport, the Navy's senior briefing officer acknowledged, "*The risk of a catastrophic event in Hampton Roads is small, but the CNO [chief of naval operations] wants an insurance policy in the event one occurs.*"
 - By this, the officer explained that having nuclear-capable repair facilities in Mayport for a CVN would be a "strategic hedge" in the event of a catastrophic event in Hampton Roads. He cited the need for an alternate East Coast Controlled Industrial Facility capable of supporting a CVN. "It's not about Norfolk versus Mayport," the flag officer said, "It's about having all assets in one place."
 - The Navy's senior briefing officer would not agree that the Navy's rationale for CVN strategic dispersal on the East Coast represents a "worst case, least likely" scenario in terms of military risk. Then-Senator Warner, however, emphasized that the future terrorist threats are far more likely to center on Washington, D.C., than Norfolk. "We're more vulnerable here," Senator Warner said. "You have more security in Norfolk." The Navy briefing officers did not disagree.
- *Issue 2: There is no question that the risk of a terrorist attack somewhere in the world involving a weapon of mass destruction (WMD) will increase in the future. What the Navy has failed to assess for military installations like NAVSTA Norfolk or NAVSTA Mayport are: (1) the threat level now and implications for the future; (2) potential vulnerabilities; and (3) implications for survivability, consequence management, and physical security programs.*
- The U.S. Commission on the Prevention of Weapons of Mass Destruction, Proliferation, and Terrorism reported in December 2008, "The Commission believes that unless the world community acts decisively and with great urgency, it is more likely than not that a weapon of mass destruction will be used in a terrorist attack somewhere in the world by the end of 2013."⁶
 - The Commission believes that terrorists are more likely to be able to obtain and use a biological weapon than a nuclear weapon. It called for the U.S. government to take more aggressive action to limit proliferation of such weapons to reduce the likelihood of a bio-terror attack.
 - From a military-threat perspective, however, it is necessary to assess the likelihood that a terrorist WMD would be directed against a U.S. military installation vs. a more vulnerable civilian target. The unclassified version of the *National Intelligence Estimate* released in 2007 states: "We assess that al-Qa'ida's homeland plotting is likely to continue to focus on

prominent political, economic, and infrastructure targets with the goal of producing mass casualties, visually dramatic destruction, significant economic aftershocks, and/or fear among the U.S. population.”

- Issue 3: *The Navy did not request the U.S. Coast Guard to provide an independent assessment of maritime security risk in Hampton Roads, Va., or Mayport, Fla.*⁷
 - The U.S. Coast Guard has statutory responsibilities for assessing maritime security risk in major U.S. seaports. Its current assessment of maritime security risks in the Hampton Roads region and Jacksonville/Mayport, Fla., would allow for a more informed cost/benefit analysis of the Navy’s homeporting proposal. The Coast Guard confirmed the Navy made no request for its assessment.
 - The Maritime Transportation Security Act of 2002, 33 CFR 103.400, required the Area Maritime Security (AMS) Committees to ensure risk-based AMS Assessments are completed and meet the requirements of 33 CFR 103.310 and 103.405, which include identifying risks through threat, consequence, and vulnerability. The AMS Committee is established under the direction of the Coast Guard Captain of the Port per 33 CFR 103.300.
 - The SAFE Port Act of 2006, Section 111, required the Department of Homeland Security to provide a risk assessment tool with standardized risk criteria to AMS Committees. The Maritime Security Risk Analysis Model developed by the Coast Guard is an accepted risk assessment tool with standardized risk criteria.
- Issue 4: *The Coast Guard currently assesses the port security risk for the Hampton Roads region and the Jacksonville/Mayport, Fla. area to be the same.*
 - The Coast Guard supports the Federal Emergency Management Agency and the Department of Homeland Security (DHS) in the administration of the DHS Port Security Grant Program (PSGP). The PSGP prioritizes security risk and allocates grant funds to port areas, which are rank-ordered in four groups.
 - Group One represents the highest risk ports and Group Four the lowest. The Hampton Roads region is a Group Two port, which generally equates with medium risk. The Coast Guard confirmed in December 2008 that Jacksonville/Mayport also is ranked as a Group Two port.
- Issue 5: *The Navy’s military-risk assessment for NAVSTA Norfolk ignores how U.S. Coast Guard and Department of Homeland Security investments in port security and Navy physical security enhancements since 9/11 have significantly mitigated risk in Hampton Roads. Since September 11, 2008, these agencies have invested more than \$111 million in the Hampton Roads region to strengthen port security and reduce the risk of a successful terrorist attack.*

- U.S. Coast Guard: The U.S. Coast Guard has invested millions of dollars in improving port security in Hampton Roads since 9/11—to include the stand-up of a Joint Harbor Operations Center (manned jointly by the Coast Guard and the Navy). A summary of Coast Guard investments is provided at Appendix 3.
 - The Joint Harbor Operations Center (JHOC) in Hampton Roads is a combined Coast Guard/Navy watch floor. The JHOC, also called a Sector Command Center - Joint (SCC-J), is involved with all 11 Coast Guard mission areas with the addition of an Anti-Terrorism/Force Protection cell staffed by the Navy. The SCC-J is enhanced with the communication systems necessary to coordinate and conduct military High Value Unit escorts. Hampton Roads is also enhanced with radars and cameras to monitor escorts and security zones around critical infrastructure.
 - These capabilities, combined with special navigation regulations in the area, enhance awareness of all port activities and improve security in the lower Chesapeake Bay. This situational awareness and interagency cooperation increases the opportunity to detect and respond to threats in the maritime environment.⁸

Department of Homeland Security (DHS). Between 2002 and 2008, the DHS Port Security Grant Program (PSGP) also provided \$30.4 million to the Hampton Roads port region. In the early years of the PSGP, the grant applications were focused largely on enhancing physical security and surveillance (e.g., gates, fences, cameras, etc.) at individual facilities. In recent years, the grant applications have become much more inclusive and robust:

- Group I and II Ports have been developing Port Wide Risk Management plans and are in the process of implementing five-year investment plans to “buy down” the risk.
 - Examples of the types of allocations of PSGP funding for the Hampton Roads region between 2002 and 2008 include such enhancements as a grant of \$846,000 in 2007 to local police departments for maritime domain awareness equipment and security patrol boats. Also in 2007, the Virginia Department of Emergence Management received \$1.8 million to develop Port Area Wide Risk Management/Mitigation and Business Continuity Plans.
- U.S. Navy: The U.S. Navy has made significant investments since 9/11 to improve physical security at NAVSTA Norfolk and other installations in the Hampton Roads region. These port security improvements reduce

military risk and potential vulnerabilities. For example, a Waterfront Security Operations Center was established at NAVSTA Norfolk to integrate, coordinate, and control the security initiatives and response of all waterfront naval assets. Installations also are in the process of receiving the Electronic Harbor Security System—a combination of surface and subsurface threat detection and response capabilities at an approximate cost of \$700,000. A host of other initiatives have been achieved at area installations, including the provision of Harbor Security Boat assets to patrol the waterfront and serve as a first response layer for waterfront threats. Physical security improvements also have been made.⁹ A summary of Navy port security improvements, provided in response to a request for information, is provided at Appendix 4.

- Acting in cooperation with the Coast Guard, the Navy has instituted procedures to reduce the risk of a terrorist attack to so-called “High Value Units.” All high-value ships are provided an armed escort by either the Coast Guard or the Navy during their transit to or from NAVSTA Norfolk and other installations in the Hampton Roads area.
- According to the Navy, the escort by armed surface craft provides a highly visible security force to detect, deter and respond to a terrorist attack thus enhancing the overall port security in Hampton Roads. The Navy also provides armed escorts of submarines when Coast Guard assets are not available from the Naval Submarine Support Center located at NAVSTA Norfolk.
- The Navy also acknowledges the role that the Coast Guard’s prototype Port and Coastal Surveillance System’s wide network of sensors play in improving port security. The system, which includes radars, visual cameras, infrared cameras and other sensors, provides Coast Guard Sector Hampton Roads the ability to monitor overall port activity and provides targeted surveillance at critical junctures and key infrastructure across the port.
- The Navy stated the Coast Guard-Navy Joint Harbor Operations Center’s advanced systems, staffing and interagency capabilities not only provide real-time situational, maritime domain awareness throughout the port, but also allow for the integration of public and private maritime risk mitigation strategies, ultimately enhancing port safety and security and mission effectiveness, efficiency and execution.

➤ *Issue 6: The Navy's current argument for CVN dispersal on the East Coast evokes a similar scheme used during the 1980s when then-Secretary of the Navy John Lehman developed a “Strategic Homeporting Plan” for a 600-ship Navy. Although the Navy contended that the dispersal of ships to more U.S. homeports*

would improve U.S. defense posture and the survivability of the fleet, this strategic underpinning was challenged by the General Accounting Office (GAO, today's Government Accountability Office). Regardless, the Navy's Strategic Homeporting Plan did not propose duplicating Norfolk's nuclear-repair capabilities for a CVN in Mayport.

- The Navy's "Strategic Homeporting" plan reflected concerns in the 1980s that the existing homeporting structure was not optimum from a strategic and military standpoint for a planned 600-ship Navy. The Navy based its plan on five principles: (1) *force dispersal*; (2) battlegroup integrity; (3) industrial base utilization; (4) geographic considerations; and (5) logistics suitability.
- In 1986, the GAO reported that the Navy's decision to disperse the fleet was not based on a formal threat/survivability analysis. "Some Navy officials advised us that the conventional threat to U.S. ports is relatively low," said one GAO official.¹⁰
 - The GAO later reported (GAO-NSIAD-86-146) that the Navy overstated the strategic imperative for dispersal. It found that the Naval Intelligence Command and a National Intelligence Estimate did not provide evidence of a demonstrable Soviet threat against U.S. homeports to justify the scale of investment. The Navy's military construction estimates for the plan totaled \$799 million. This funding, a figure widely judged to be significantly underestimated at the time, was capped by Congress.
 - In 1990, the Congressional Research Service observed, "... It can be argued that the justification of avoiding a Pearl Harbor-like attack is now weaker than it was in the mid-1980s because the possibility of a war with the Soviet Union and its allies is now considered remote."¹¹
 - By the end of 1991, any potential threat from the Soviet Union to justify strategic dispersal of the fleet evaporated with that country's dissolution and the end of the Cold War. Secretary of the Navy John Lehman's goal of a 600-ship Navy fell victim to defense budget cuts five years before.
- More often than not, Norfolk's homeported aircraft carriers are geographically dispersed at sea through frequent operational deployments and work-ups. According to information provided by the Navy, the Naval Station's four carriers were in port simultaneously only 43 days in Fiscal Year 2008. In Fiscal Year 2007, that number was 18 days.
- The questions GAO raised more than 20 years ago regarding the strategic rationale for dispersing the fleet to multiple homeports are equally relevant today for assessing the Navy's CVN homeporting proposal for Mayport.

- The Navy has yet to provide a compelling strategic rationale for its East Coast CVN homeporting proposal that is supported with a focused threat/survivability analysis. The strategic dispersal concept may possibly have been a viable concept during the Cold War, but times have changed since the fall of the Soviet Union. The strategic dispersal argument is not applicable today if the military risk that would warrant dispersal is not judged to be high.
- *Issue 7: The Navy's narrowly focused proposal to relocate a CVN to Mayport does not reflect the same analytical framework used to evaluate similar homeporting proposals for the West Coast. Its comparative evaluation with Mayport ignored such critical factors as access to shoreside fleet training centers, cross-training and shore-duty reassignment opportunities for sailors, centralized logistics support, and other important advantages associated with NAVSTA Norfolk.*
 - When the Navy began planning in the 1990s to homeport up to three Nimitz-class CVNs on the West Coast, it advocated the homeport of North Island Naval Air Station owing to the existence of San Diego as an adjacent "megaport," maintenance advantages, and quality of life considerations. In addition, the Navy said that North Island (Coronado/San Diego) is a proven homeport for Pacific Fleet carriers, has an operational airfield that can support air wing logistics and aircraft, and contains an extensive and efficient transportation network.¹²
 - The Navy applied a similar analytical framework in 2007 when it reviewed four prospective homeports in the Pacific region for the USS Carl Vinson (CVN 70). In March 2007, the Navy announced the carrier would likely relocate to San Diego in early 2010 following the completion of its complex refueling overhaul now underway at the Northrop Grumman Newport News shipyard in Virginia. According to Hawaii's U.S. Senators Daniel Inouye and Daniel Akaka, Secretary of the Navy Donald Winter's selection of San Diego was based on a consideration of such factors as each homeport's strategic location, the cost of infrastructure upgrades required to accommodate a nuclear-powered aircraft carrier, the port's proximity to an airfield, and training opportunities for the carrier's aircrew.¹³
- *Issue 8: Aircraft carriers homeported in Norfolk are collocated with their operational aircraft squadrons, associated staffs, and assigned battle group ships. They are supported by multiple military and civilian airfields, including an outlying airfield necessary to support carrier-qualification training requirements for the Atlantic Fleet carrier air wings.*
 - Naval Air Station Cecil Field was the largest military installation in the Jacksonville, Florida., region when it was closed in 1999 following the recommendations of two Base Closure and Realignment (BRAC)

Commissions. In 2006, the citizens of Jacksonville were afforded an opportunity to reopen the airfield for military use as the result of BRAC 2005, but they voted not to do so.

- By contrast, the Commonwealth of Virginia and local communities in the Hampton Roads region have consistently supported operations at Naval Air Station Oceana—the Navy’s East Coast Master Jet Base. In recent years, for example, the Commonwealth and municipalities in Virginia Beach have spent approximately \$45 million to purchase land to reduce civilian encroachment at the airfield.
- *Issue 9: Despite the potential for increased military risk, in 2005 the Navy recommended the closure of Naval Submarine Base New London, Connecticut. (as part of Department of Defense BRAC actions) and relocation of its assigned submarines to NAVSTA Norfolk and Submarine Base Kings Bay, Georgia. This proposal was consistent with its Shore Investment Strategy.*
 - The Navy’s primary justification for closing its submarine base in New London was the material contribution it would make to the maximum reduction of excess capacity (i.e., berthing capacity) while increasing the military value of the remaining bases affected by the proposal.¹⁴
 - One of the main elements in the Navy’s Shore Investment Strategy is to reduce cost and improve physical security by eliminating any excesses in the Navy’s shore footprint. “While fiscal imperatives across the Navy currently prevent full funding of shore-readiness requirements in the near term, we are making smart investments to support the fleet, fighter, and families,” the Navy has stated.
 - By contrast, building duplicative nuclear-support shore infrastructure in Mayport runs counter to the objectives of the Navy’s Shore Investment Strategy and will, in the long term, only continue to degrade the Navy’s ability to provide full funding for other higher priority shore-readiness requirements.

III. Economic Factors: Mayport Proposal Enters the Realm of Fiscal Irresponsibility

The Congressional Budget Office (CBO) reported in January 2009 that the United States has entered a recession that will probably be the longest and the deepest since World War II. As a share of the economy, the CBO estimates the deficit in 2009 also will be the largest recorded since World War II—\$1.2 trillion, or 8.3 percent of the nation’s gross domestic product. Federal revenues are expected to decline by \$166 billion, or 6.6 percent, from 2008.¹⁵ *The Washington Post* reported that Senator Kent Conrad, the chairman of the Senate Budget Committee, called the figure “jaw-dropping.”

The CBO also reported in early January that carrying out defense spending plans of the Bush administration's Fiscal Year 2009 Future Years Defense Program would require sustaining annual defense spending over the long term at higher real (inflation-adjusted) levels than those that occurred at the peak of the defense build-up in the mid-1980s.¹⁶

In a speech on the economy and a proposed federal government economic recovery plan, President-elect Obama said, "If nothing is done, this recession could linger for years. The unemployment rate could reach double digits. Our economy could fall \$1 trillion short of its full capacity, which translates into more than \$12,000 in lost income for a family of four."¹⁷ The President-elect also vowed in a press conference January 7, 2009, to ensure that federal government dollars are not wasted, tasking his nominee as "chief performance officer" in the White House budget office to retool budget practices and cut unnecessary programs. "In order to make these investments that we need, we'll have to cut the spending that we don't," he said.¹⁸

Given this extraordinary financial crisis, the need to reduce non-critical federal spending, and the compelling requirement to fund higher-priority Navy budget requirements, the Navy's homeporting proposal for Mayport is fiscally irresponsible. *Last year, the Navy identified \$4.6 billion in Fiscal Year 2009 unfunded budget requirements.* Its unfunded budget requirements for Fiscal Year 2010 will be made known to Congress when the new administration's defense budget request is proposed. Homeporting a nuclear-powered aircraft carrier in Mayport at a cost that could approach \$1 billion is a luxury the Navy simply cannot afford.

➤ **Issue 1:** *The Navy is substantially under-investing in its shipbuilding and aircraft procurement accounts. Expensive investments in duplicative nuclear-support infrastructure in Mayport are opportunity costs the Navy cannot afford in the face of the compelling requirement to reset, modernize, and recapitalize its ships and aircraft.*

- Attaining the goal of a 313-ship Navy is already in doubt owing to a combination of factors, including an underfunded Navy shipbuilding plan, unrealistic cost estimates, a steady growth in the cost of shipbuilding programs, and mission-requirements creep.
- The Navy's long-range shipbuilding plan for 313 ships should be considered a floor—the minimum number of ships necessary for the Navy and Marine Corps team to meet its global commitments. Recapitalizing today's deployable battle force of 283 ships is encountering new affordability problems.
- For example, the costs of the commodities needed to build ships skyrocketed between 2001 and 2007—including a 109 percent increase in the price for carbon steel, a 360 percent increase for copper, and a 535 percent increase for nickel. Such unprecedented cost increases are beyond the ability of the Navy to control, *Seapower* magazine reported recently. "No one has been able to model this," the deputy assistant secretary of the

Navy for Ship Programs (Research, Development, and Acquisition) said.¹⁹

- The Navy also faces a significant shortfall in the number of strike-fighter tactical aircraft needed for its 10 carrier air wings. The Navy's own estimate is that it will be more than 125 strike-fighters short by 2014 due to the retirement of F/A-18 Hornet aircraft before the F-35C Joint Strike Fighter is operational. A more responsible operational alternative for spending the estimated \$600 million the Navy projects for homeporting a nuclear-powered aircraft carrier in Mayport is to use this funding to address the Navy's strike-fighter shortfall.
 - The typical air wing aboard a U.S. Navy aircraft carrier includes four F/A-18 squadrons totaling roughly 44 aircraft. If the current tactical aircraft shortfall is not reversed, there is a real concern that a major portion of the Navy's aircraft carrier fleet will be rendered hollow.
 - Of the Navy's 10 carrier air wings, one—Carrier Air Wing 17, home-based at Naval Air Station Oceana, Virginia—has only one of its required four squadrons of F/A-18 Hornets assigned owing to the Navy's current tactical aircraft shortfall. When CVW-17 deploys to sea on an aircraft carrier, it must “crossdeck” (i.e., borrow) F/A-18 aircraft from other squadrons on the East or West Coasts. Unavoidably, this cross decking of squadron aircraft, pilots, and support personnel poses adverse consequences to their operational and personnel tempo.
 - Should the Department of Defense approve multi-year contracting for the F/A-18 Hornet strike-fighter, approximately 12 modern aircraft could be procured for the \$600 million the Navy plans to spend in Mayport—a sufficient number of aircraft for one additional squadron.
- *Issue 2: Good stewardship of taxpayer dollars demands that the Navy should fund its shortfalls in shore-readiness requirements rather than expand its footprint ashore with duplicative facilities. There is no economic logic to the Navy's proposal for Mayport.*
 - Before creating excess infrastructure and nuclear-warship capacity in Mayport, the Navy should complete a large number of critical unfunded, backlogged military construction and modernization projects.
 - Owing to the chronic underfunding of modernization at its four public naval shipyards, the Navy confirmed a \$791 million backlog in sustainment, restoration, and modernization projects at its four naval shipyards during Fiscal Year 2008:

- Pearl Harbor Naval Shipyard: \$183 million
 - Puget Sound Naval Shipyard: \$208 million
 - Portsmouth Naval Shipyard: \$176 million
 - Norfolk Naval Shipyard: \$224 million
- Within the last several years, NAVSTA Norfolk has undergone approximately \$400 million in facility upgrades to allow it to better support nuclear powered aircraft carriers. This investment included a \$155 million project to demolish and rebuild Pier 11 for the station's assigned aircraft carriers. Before duplicating Norfolk's existing capital-intensive facilities in Mayport, the Navy should make the fiscally sound decision to optimize past investments at Norfolk and preserve scarce resources to address the near crisis in budget shortfalls for its people, shipbuilding program, aircraft procurement, and installations.
 - As noted previously, the Navy's proposal for Mayport also runs counter to its current Shore Investment Strategy, which calls for consolidating the Navy's shore footprint to save money and improve physical security. New military instruction construction costs in Mayport can only be funded at the expense of existing military construction and modernization projects.
- *Issue 3: The Navy's need to retain NAVSTA Mayport as an operational base for surface ships is not questioned; at issue is the need for the Navy to adopt a more cost-effective, responsible alternative centered on such platforms as the littoral combat ship, guided-missile destroyers, guided-missile cruisers, or an amphibious assault ship. The projected benefits to the private sector's ship-repair industrial base in Jacksonville should be considered in this new assessment.*
 - Sustaining the nation's ship-repair industrial base is a continuing challenge given the sizable reduction in the size of the fleet over the past 20 years. The number of Navy ships on active service is at one of its lowest levels since World War I.
 - Unlike a nuclear-powered aircraft carrier, homeporting additional numbers of surface combatant warships will generate a higher level of sustained ship-repair work for the private sector in Jacksonville—a material benefit to a critical strategic sector of the defense industrial base that also will added economic benefits to the local economy.
 - *Issue 4: The Navy's cost estimates of more than half-a-billion dollars to homeport a nuclear-powered aircraft carrier in Mayport should be independently verified for accuracy. The actual costs likely will run substantially higher if past is prologue.*
 - During congressional consideration of the Navy's military construction budget submission for fiscal year 1996, for example, the Navy was chastised by a member of the House of Representatives for the inaccuracy

of its estimated funding necessary to berth three aircraft carriers at Naval Air Station North Island. The Navy's initial estimate of \$267.8 million was later revised upward to \$546.1 million following a GAO review.²⁰

IV. Environmental Assessment: “Legally Insufficient and Technically Flawed”

Senator Jim Webb and then-Senator John Warner expressed serious concerns with numerous aspects of the Navy's Final Environmental Impact Statement (FEIS) in a December 2008 meeting with officials from the National Oceanic and Atmospheric Administration, the U.S. Fish and Wildlife Service, and the National Marine Fisheries Service. “The Navy's documented haste to issue a record of decision must not be allowed to interfere with your agencies' requirements to complete the Section 7 consultation process with due diligence,” they said.

- **Issue 1:** *The Navy issued its FEIS prior to completion of the Biological Opinions, which is inconsistent with the Endangered Species Act Handbook. The Navy also sought to fast track the environmental review process so that it could issue its Record of Decision in early January 2009.*
 - At the time the FEIS is issued, “section 7” consultation should be completed. Absent these agencies' assessments, it is questionable if the Navy adequately assessed the impacts of its actions on protected species in the FEIS.
 - The Navy attempted to fast-track each agencies' comment period by requesting their inputs be submitted by December 31, 2008. Given the potential adverse impacts of the proposed homeporting action on several threatened and endangered species, Senator Webb and then-Senator Warner encouraged agency officials to take the time and obtain the documentation needed to conduct thorough analyses of the Navy's proposed action, unhindered by arbitrary deadlines.
 - The National Marine Fisheries Service (NMFS) received the Navy's completed consultation package for a Mayport Opinion December 8, 2008. The Endangered Species Act allows the agency 135 days to complete its formal consultation—a deadline of April 22, 2009.
 - NMFS officials acknowledged they would be “challenged” to meet the Navy's arbitrary deadline of December 31 and subsequently set a working deadline of January 5, 2009, to complete their assessment.
- **Issue 2:** *The Navy's proposal to homeport a nuclear-powered aircraft carrier at Mayport would increase the amount of military and commercial traffic in and around the Naval Station and require the collection and disposal of 5.2 million cubic yards of dredged material.*

- Owing to the greater draft of a nuclear-powered aircraft carrier, increased dredging will result in thousands of additional vessel trips to and from dredge disposal areas.
 - The Navy's proposed action presents potential risks to species and habitat protected under the Endangered Species Act, particularly the North American right whale and the Florida manatee, and their respective habitats. Both species are particularly susceptible to ship-strikes, which could increase should the Navy homeport a nuclear-powered aircraft carrier at Mayport.
- *Issue 3: The Navy intends to make its East Coast CVN homeporting decision without the benefit of the conclusions from the East Coast Range Complex Biological Evaluation, which is not expected to be completed until April 2009. The Navy narrowly defined the scope for its homeporting EIS for Mayport in terms of dredging and construction— notwithstanding the clear linkage with resulting aircraft carrier operations should a CVN be permanently stationed there.*
- As stated in its EIS, one of the Navy's three factors behind its consideration of NAVSTA Mayport as a homeport for additional ships is the use of the facility to help optimize fleet access to naval training ranges and operating areas by retaining ship homeport locations within six hours transit time of local operating areas.²¹ Clearly, there is an inextricable linkage between the Navy's desire to homeport a nuclear-powered aircraft carrier in Mayport with resulting training activities and other ship operations.
 - Unavoidably, such increased operational activity and ship transits pose potential risks to endangered species, including the right whale. Senator Webb and then-Senator John Warner encouraged the NMFS to complete a single, more comprehensive Biological Assessment that addresses the Navy's acknowledged CVN training and operational activities—and not be bound by the Navy's purposefully narrow approach in defining its EIS. The Endangered Species Act handbook provides the authority for NMFS to make its own determination about the proper scope of its assessment. It cannot be forced by the Navy to accept an overly narrow scope.

On December 19, 2008, Governor Timothy M. Kaine submitted the Commonwealth of Virginia's comments on the Navy's FEIS for proposed homeporting alternatives at Mayport. "The Final Environmental Impact Statement is legally insufficient and technically flawed," Governor Kaine said. A copy of the Commonwealth of Virginia's comments to the Navy, identifying 16 major concerns, is provided at Appendix 5. Courts have rejected federal agency EISs for the precise types of deficiencies found in the Navy's Mayport EIS.

Similar concerns were raised December 18, 2008, in a letter to the Navy signed by all members of the Public Sector Board of Directors for the Hampton Roads Military and Federal Facilities Alliance. The board is composed of the mayors of nine cities and the chairs of three county boards of supervisors representing the Hampton Roads region.

Congress has paid renewed attention to issues associated with strategic homeporting of Navy ships for the last four years. There are significant environmental issues associated with the Navy's proposal for Mayport, Florida. It is inconceivable that those agencies responsible for evaluating the environmental impacts of the Navy's proposal should not be afforded as much time as necessary to ensure their assessments and opinions are developed as thoroughly and carefully as possible.

V. Sailors and Their Families: Added Hardships

Military leaders are fond of saying, "Mission first—people always." That sentiment is hardly reflected in the Navy's proposal to homeport a nuclear-powered aircraft carrier in Mayport owing to the added hardships the move will impose on Sailors and their families. The Navy's justification and rationale for its homeporting proposal pays only cursory attention to this critical consideration. Absent its crew, the aircraft carrier is nothing but cold, lifeless steel.

- *Issue 1: Should the Navy announce a decision to relocate a CVN to Mayport without naming the ship, Sailors and their families will face an uncertain future as they weigh the risks posed by a possible relocation.*
 - In today's precarious economy and fiscal crisis, the need to relocate one's family and find a new home is a far greater concern than even a year ago. Today's drastic fall-off in home sales and a persistent slump in the housing market are affecting military families. Faced with more frequent permanent-change-of-station moves than many of their civilian counterparts, the hardships can be more painfully acute. As noted by many financial experts, today's fiscal crisis and its economic impacts are not expected to be resolved quickly.
 - The town of Brandon, Fla., on Florida's western coast near MacDill Air Force Base in Tampa, exemplifies the experiences many military families face today. One Air Force colonel purchased his four-bedroom home in 2005 for \$333,000. With his tour ending three years later and orders in hand to move to the state of Washington, he could not find a buyer. He was one of an estimated 1,000 military members leaving MacDill during the summer of 2008, according to the *Tampa Bay Times*. An automated housing referral network serving military members in the Tampa Bay region listed 668 rental homes within a 60-mile radius of the Air Force base at the time. Those service members being reassigned who elected to rent their homes instead of selling found that the rent payments would not cover their mortgage payments.²²

- The Congressional Budget Office reported in January 2009 that the inventory of unsold homes in the United States remains very high, despite the past year's reduction in housing starts and house prices. Military families, unavoidably, will continue to bear a disproportionate burden in this area owing to their more frequent, government-directed permanent-change-of-station reassignments.
- *Issue 2: NAVSTA Norfolk, home to one of the largest regional concentrations of naval and military installations in the world, offers far more quality-of-life and career progression opportunities to Sailors and their families than the far-smaller NAVSTA Mayport—including opportunities for shoreside training, medical care, family support, military commissaries and exchanges, and local employment.*
 - Ten years ago, the Navy began the realignment of its shore installations into fleet areas of concentration as part of a process known as “regionalization.” Sea-going carrier Sailors—unlike Soldiers, Marines, or Airmen—must satisfy “sea-shore” rotation goals established by the Navy. An aviation boatswain’s mate, for example, will likely spend four years assigned to sea duty followed by a three-year shore assignment.
 - Concentrating its aircraft carriers in Norfolk allows carrier sailors (and personnel assigned to nearby aviation squadrons) to have more stability and greater opportunity for suitable sea and shore assignments. The Norfolk area also boasts a large number of senior staff and joint-duty billets, a key factor in career progression for officers especially.
 - “Homebasing” is one initiative the Navy undertook in 1996 to assign enlisted Sailors to the same geographic area for their entire careers. The program benefits both the Sailors and families (more than 50 percent of today’s enlisted members are married) and the Navy. The Sailor and family have less frequent reassignments out of their area of fleet concentration, contributing to greater stability in their personal lives. The Navy, in turn, reaps cost savings owing to the reduced requirement to pay for expensive permanent-change-of-station reassignments.

VI. Conclusion and Recommendation

The Navy has made no compelling argument to justify its proposal to homeport a nuclear-powered aircraft carrier at NAVSTA Mayport. There is little or no evidence that the Navy’s preferred homeporting alternative is supported by either economic logic or strategic necessity. Given the unavoidable adverse impact that today’s economic crisis will have on federal programs, the Navy would be irresponsible to incur costs (already projected to exceed \$600 million) for a poorly justified project that the service itself describes as an “insurance policy.”

No funds from any defense appropriation should be made available for the relocation, or

planning for the relocation, of any nuclear-powered aircraft carrier away from NAVSTA Norfolk, or for any homeporting of a nuclear-powered aircraft carrier at NAVSTA Mayport unless the Navy fully justifies such a move in a comprehensive report to the congressional defense committees. This justification should include the following categories of information:

- A classified, comparative threat/survivability intelligence assessment of current and projected military threats for the homeporting of aircraft carriers at both NAVSTA Norfolk and NAVSTA Mayport, to include estimated levels of risk, potential vulnerabilities, and the implications for survivability, consequence management, and physical security programs. The U.S. Coast Guard should contribute to this threat assessment;
- An independent cost estimate prepared by the Cost Analysis Improvement Group of the Department of Defense of the total cost to be incurred by the United States to relocate an aircraft carrier from NAVSTA Norfolk to a new homeport, including the full costs of any associated support requirements, to include physical security, personnel, maintenance and construction of new facilities, and any additional costs that would be incurred by other state or federal agencies. The cost estimate should assess the degree to which it conforms to budget planning guidance issued by the new Obama administration;
- An evaluation of the economic impact in the Hampton Roads region resulting from the relocation of a nuclear-powered aircraft carrier from NAVSTA Norfolk to NAVSTA Mayport;
- A full accounting of the Navy's Fiscal Year 2010 unfunded budget requirements, to include shore readiness shortfalls identified in its *Shore Investment Strategy* and the current backlog in sustainment, restoration, and modernization (SRM) projects at the Navy's four naval shipyards. The SRM backlog's impact on safety and industrial performance at each shipyard should be described as a part of this assessment;
- An assessment of the impact that relocating a nuclear-powered aircraft carrier from NAVSTA Norfolk to NAVSTA Mayport would have on assigned crew members and their families, to include all relevant training, career progression, sea-shore rotation, and quality-of-life factors;
- An assessment of how the relocation of a nuclear-powered aircraft carrier from NAVSTA Norfolk to NAVSTA Mayport would affect the crew's access to shoreside fleet training centers, centralized logistics support, access to intermodal transportation systems, and the availability of supporting airfield(s);
- Identification of more cost-effective alternatives for homeporting surface ships at NAVSTA Mayport, to include an assessment of their impacts on the

private-sector ship-repair industrial base;

- An assessment of the optimum strategic laydown for Navy ships at NAVSTA Mayport that best satisfies operational military requirements identified by the Commander, U.S. Southern Command, in this command's area of operational responsibility;
- An assessment of the adequacy of the Navy's current inventory of public and private depot and intermediate maintenance facilities for nuclear-powered aircraft carriers; and
- A certification from the Secretary of the Navy that the relocation of a nuclear-powered aircraft carrier is in the best interests of U.S. national security based on a strategic threat assessment.

² Remarks at Center for Strategic and International Studies *Statesmen's Forum*, Washington, D.C., November 17, 2008.

³ The Navy will have 11 nuclear-powered aircraft carriers in service when the George H.W. Bush (CVN 77) is commissioned Jan. 10, 2009. The Navy has announced that CVN 77 will be initially homeported in Norfolk. Other CVN homeports include: **Norfolk, Va.**—USS Theodore Roosevelt (CVN 71), USS Enterprise (CVN 65), USS Harry S. Truman (CVN 75), and USS Dwight D. Eisenhower (CVN 69); **San Diego, Calif.**—USS Ronald Reagan (CVN 76), USS Nimitz (CVN 68), and USS Carl Vinson* (CVN 70, following completion of a nuclear-refueling overhaul at Northrop Grumman Newport News, Va., the Navy has stated its preference for the ship to be homeported in San Diego in 2009); **Bremerton, Wash.**—USS John C. Stennis (CVN 74); **Everett, Wash.**—USS Abraham Lincoln (CVN 72); **Yokosuka, Japan**—USS George Washington (CVN 73).

U.S. Coast Guard budgetary investment in improved maritime security in the Hampton Roads region from FY 2002 through FY2008:

<i>Fiscal Year</i>	<i>Capability</i>	<i>Full Time Positions</i>	<i>Budgetary Investment</i>
FY02	Maritime Safety and Security Team Chesapeake	83	\$6,397,000
FY03	Coast Guard Cutter SHEARWATER	11	\$1,009,000
FY03	Facility Security Planners	4	\$430,000
FY04	Joint Harbor Operations Center	25	\$2,705,000
FY05	Port State Control Officers	8	\$750,000

FY05	Marine Transportation Security Act Personnel	4	\$463,000
FY05	Coast Guard Cutter SEAHORSE	16	\$1,544,000
FY06	Establishment of Maritime Security Response Team	164	\$13,971,000
FY07	Enhancement of Maritime Security Response Team	60	\$5,007,000
FY07	Port Security Spot Inspector	1	\$85,000
FY08	Port Security Spot Inspector	2	\$208,000
FY08	Maritime Security Response Team Follow On		\$859,000
FY02-08	Small Boat Station Personnel	20	\$1,521,000
FY02-08	Small Boats (3 RB-s)		\$840,000

Figures reflect fully annualized investments in then-year dollars.

**Appendix 4:
U.S. Navy Investments in Port Security in the Hampton Roads Region**

The following U.S. Navy port security improvements have been made in the Hampton Roads region since 9/11:

- Instituted a Waterfront Security Operations Center at NAVSTA Norfolk to integrate and coordinate/control the security initiatives and response of all waterfront naval assets. Installations are in process of receiving the Electronic Harbor Security System which is a combination of surface and subsurface threat detection and response capability. Approximate cost is \$700,000.
- Installations are in process of receiving waterfront security barriers to more effectively cordon off the waterfront restricted areas of the installations. Approximate costs are

-
- NAVSTA Norfolk Phase I \$3,500,000, Phase II \$2,277,000, Phase III \$1,750,000, Phase IV \$5,840,000, and Norfolk Naval Shipyard \$3,020,000.
- Partial pier enclaving (i.e. fencing) instituted at installations homeporting High Value Units. Approximate cost is \$250,000.
 - Vehicle inspection station built near Pier 12 NAVSTA Norfolk. Approximate cost is \$700,000.
 - Installations have been provided with Harbor Security Boat (HSB) assets to patrol the waterfront and serve as a first response layer for waterfront threats. This initiative included the development of a complete training regimen to enable sailors to effectively employ HSB assets against threats. Approximate costs are Fiscal Year 2008 NAVSTA Norfolk maintenance \$278,467, NAVSTA Norfolk HSB \$4,540,000, Fiscal Year 2008 boat operations fuel \$550,000.
 - All waterfront piers instituted a "Chief of the Guard" program to coordinate security response to threats (landward and seaward). Approximate cost for NAVSTA Norfolk is \$528,000.
 - Piers undergoing renovation/construction are being provided with a seaward guard shelter at the end of each pier which serves an elevated guard position. Approximate costs are Guard Tower Pier 7 \$400,000, Pier 3T \$1,367,700, and Piers 1 and 4-14 Security Upgrade \$1,632,100.
 - Entry Control Points of installations (landward) are in the process of being renovated with security improvements in accordance with the Unified Facilities Criteria for Entry Control Facilities. This includes such security capabilities as final denial barriers, ballistic resistant guard shelters, elevated cover sentry positions, etc. Approximate costs are Gate 5 \$4,483,282, Gate 2 and 3 \$6,300,000, and Gate 22 \$1,500,000.
 - Security manning was approximately 600 personnel in 2001. This went up to nearly 1100 additional military personnel by 2003. It has dropped to just an addition 116 personnel in 2008. Approximate cost is \$6,808,156 per year.

**Appendix 5:
Commonwealth of Virginia Comments on the Navy's Final Environmental Impact
Statement for the Proposed Homeporting of Additional Surface Ships at NAVSTA
Mayport, Florida**

28

Senator WEBB. Okay. Thank you, Mr. Chairman.

Senator BILL NELSON. Mr. Chairman, I would ask, in addition, I already requested that the chart be entered as well as the two photographs in the record, along with the record of decision, and the Secretary of Defense's letter to Senator Webb, December 18, 2008. That identical letter was sent to Senator Warner, the then-senior Senator of Virginia.

I also have additional views that I had submitted back in 2007 to the National Defense Authorization Act for 2007.

[Additional views from Senator Bill Nelson follow:]

Senate Report 109-254 - NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 2007

ADDITIONAL VIEWS OF SENATOR NELSON OF FLORIDA

The committee includes a provision that would repeal section 5062(2), title 10 U.S. Code that would require the Navy to have a minimum of twelve operational aircraft carriers in the fleet. I oppose this repeal. I am convinced that as a nation at war we should not increase our strategic risk by reducing our naval aviation capability or increase the time required to respond to crises around the world.

The committee's statement makes the case that, while lifting the 12-carrier minimum requirement, we should not allow our carrier fleet to fall dangerously lower than eleven ships. I believe strongly that the size and capability of our carrier fleet is a matter of highest national concern. Once mothballed, scrapped or a combat loss, a carrier is difficult and expensive to replace. The nation needs twelve carriers for worldwide presence and crisis response. Congress should support a funding program to ensure that we achieve and sustain that level as soon as practical.

As concerned as I am about reducing the size of our carrier fleet, I am equally concerned about the risk of failing to adequately disperse them. Stationing all our Atlantic coast carriers in a single port only compounds the challenges we will face with a smaller fleet. I am not alone in that assessment. The former Chief of Naval Operations, Admiral Vernon Clark, told the Armed Services Committee in February 2005 that in his view, 'over-centralization of the [carrier] port structure is not a good strategic move * * * the Navy should have two carrier-capable home ports on each coast.' Admiral Clark went on to say, '* * * it is my belief that it would be a serious strategic mistake to have all of those key assets of our Navy tied up in one port.' As recently as March this year Deputy Secretary of Defense and former Secretary of the Navy, Gordon England, testified to this committee that the Navy needed to disperse its Atlantic coast carriers saying, 'My judgment is that [dispersion] is still the situation * * * a nuclear carrier should be in Florida to replace the [USS John F.] Kennedy to get some dispersion.' Secretary England explained that, 'the concern there was always weapons of mass destruction. Even though carriers were at sea, the maintenance facilities, et cetera, are all still there and the crews * * * so having some dispersion would be of value to the Department of the Navy.' At the same hearing Vice Chairman of the Joint Chiefs of Staff, Admiral Edmund Giambastiani, shared his own judgment that we should disperse our carriers. He illustrated his sense of risk to the nation's east coast carriers when he recalled his own visit to Norfolk one Christmas, 'where we had five aircraft carriers all sitting next to one another, and that is not something we'd like to routinely do.'

I am opposed to cutting our nation's aircraft carrier fleet as a matter of strategic necessity during time of war. The risk, in my view, is unacceptable. As a matter of protecting our smaller carrier force, I am convinced that the nation must establish a second Atlantic coast nuclear carrier base as quickly as possible. An environmental impact study in 1997 found Naval Station Mayport,

Florida, current home of the USS John F. Kennedy, suitable to permanently station a nuclear aircraft carrier. The Navy should complete its update of that study as quickly as possible. Additionally, in order not to lose any time once the study is complete, the Navy should include funding in its fiscal year 2008 Future Years Defense Program to begin building the maintenance and support facilities necessary to stationing a nuclear aircraft carrier at Naval Station Mayport. Availability of these funds should naturally be contingent upon but timed in the budget's out-years to coincide with the completion of an updated environmental impact study. I look forward to working with my colleagues on both these vital issues.

BILL NELSON.

Senator WEBB. Mr. Chairman, perhaps we could——

Senator MCCAIN. Mr. Chairman, could I ask the indulgence of my friend? I can see we are in a discussion that will probably go on for a long time and will probably be the subject of a markup. I would remind my colleagues we do have other nominees that have been waiting patiently. I hope we could move on here pretty quick.

Thank you, Mr. Chairman.

Chairman LEVIN. I am, unless there is additional need for questions, going to excuse this panel.

Senator REED. Senator Udall?

Chairman LEVIN. No, I checked with Senator Udall. Thank you, Senator Reed, for pointing that out. I did check with Senator Udall, and he indicated he did not need to ask questions of this panel. We appreciate that.

We will now excuse the panel. However, Mr. Remy, following a request here, if you could provide promptly for the record a detailed description of your duties—and, again, this is for the record—at Fannie Mae and whether you were aware of any of the activities which contributed to the mortgage crisis that has emerged. If you could do that promptly, we would appreciate it.

Mr. REMY. Yes, Mr. Chairman.

[Statement and updated biography from Mr. Remy for the record follows:]

Mr. Chairman, Senator McCain, Members of the Committee,

28 Apr 09

Thank you for the opportunity to respond to your questions regarding my time at Fannie Mae. Once again, I apologize that the biography that was submitted did not specifically identify Fannie Mae as my employer from 2000-2006, but rather only included my various roles at the Company. I note for the Chairman, Ranking Minority Member and Members of the Committee that my time at the Company, including a description of my roles, responsibilities and benefits from Fannie Mae, was described in the Senate Armed Services Committee Questionnaire and the Financial Disclosure Form I submitted to the Committee. As requested, I have attached a biography which includes the names of all employers and dates that I worked for each of them. As I stated in my testimony, I am proud of the work that I did at Fannie Mae. As requested following are the roles that I held at the Company:

Vice President and Deputy General Counsel, 2000-2002

My responsibilities included managing litigation, handling employment law matters, advising on procurement contracts, investigating employee and contractor malfeasance, and advising on antitrust issues.

Senior Vice President and Deputy General Counsel 2002-2006

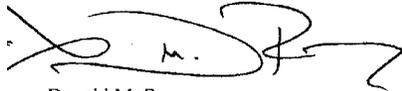

During this period of time the litigation, employment, and internal investigations sections of the General Counsel's Office continued to report to me. In the General Counsel's office I also was responsible for assisting in the coordination of and responses to Regulatory and internal investigations commissioned by the Board of Directors regarding accounting issues and internal controls.

Further, after the passage of The Sarbanes Oxley Act of 2002, in late 2002, I was given the responsibility of developing and implementing Fannie Mae's first corporate wide centralized legal and regulatory compliance system and assumed the additional title of Chief Compliance Officer while doing so. In this capacity, I also supervised internal investigations.

Once the compliance system was established, in late 2005, I relinquished my responsibilities in the compliance organization and assumed a Senior Vice President role in the Housing and Community Development Division where I worked on development of a plan for humanitarian relief and investment in rebuilding the communities along the Gulf Coast most affected by Hurricanes Katrina and Rita.

During my entire time at Fannie Mae, I was not in a position to have specific information or knowledge about or make decisions regarding accounting policies or practices, or the purchase or securitization of subprime loans. I learned of the improper accounting practices through the various investigations and findings, including the work of the federal regulators, and of the concerns surrounding the actual impact of the purchase and securitization of subprime loans -- most of which was done after I left the Company -- in the news.

Respectfully,

Donald M. Remy

DONALD MICHAEL REMY

Mr. Remy has been a partner in the Washington D.C. Office of Latham & Watkins from 2006 - present, where he defends individual and corporate clients in criminal and other government investigations, as well as civil litigation. In addition, Mr. Remy advises corporations on issues involving the International Traffic and Arms Regulations, the Office of Foreign Assets Control and Foreign Corrupt Practices Act enforcement, as well as financial, accounting and procurement fraud and general corporate governance.

Prior to joining Latham & Watkins, Mr. Remy served as an attorney and business person for Fannie Mae from 2000-2006 where he held a number of positions including: Vice President and Deputy General Counsel for litigation; Senior Vice President and Deputy General Counsel; Senior Vice President and Chief Compliance Officer; and Senior Vice President, Housing and Community Development. In these roles, his responsibilities included managing litigation, handling employment law matters, advising on procurement contracts, investigating employee and contractor malfeasance, developing and implementing a corporate compliance system, and building an investment strategy to rebuild communities on the Gulf Coast after Hurricane Katrina.

From 1997-2000, Mr. Remy served in the United States Department of Justice as a Senior Counsel for Policy and as a Deputy Assistant Attorney General for the Torts and the Federal Programs Branches of the Civil Division. He supervised litigation on behalf of 100 federal agencies, the President and Cabinet officers, and other governmental officials. Those matters involved a myriad of subject areas and included the defense against constitutional challenges to federal statutes, suits to overturn government policies and programs, and attacks on the legality of government decisions. Mr. Remy also personally handled litigation in the matters arising out of the events at Waco and Ruby Ridge

As an Army Captain, Mr. Remy was an Assistant to the General Counsel of the Army from 1991-1995, where he advised senior Army officials on legal and policy issues concerning all aspects of government contracting, specifically including major weapon system acquisition. Further, he assisted in the Army's litigation of bid protests and contract disputes and assisted the Department of Justice in government contract litigation that directly affected the Army. During his tour of duty at the Pentagon, Mr. Remy was detailed on special projects to other offices in the Department of Defense where he analyzed statutes and regulations governing programs affecting small and disadvantaged business and historically black college and university contracting with the Department of Defense, recommended modifications to ensure compliance with both the law and the President's guidance, assisted in development of the Department of Defense position on acquisition reform, crafted proposed legislation related to the Federal Acquisition Streamlining Act, negotiated legislative proposals, drafted portions of Defense Performance Reviews, and coordinated with the Office of the Vice-President on issues related to the National Performance Review.

Mr. Remy also served as a clerk to The Honorable Nathaniel R. Jones of the United States Court of Appeals for the Sixth Circuit from 1995-1996. Mr. Remy is a 1991 *cum laude* graduate of Howard University School of Law and received his undergraduate degree in 1988 from Louisiana State University, where he graduated with honors and was commissioned a 2nd Lieutenant in the United States Army. Mr. Remy has published, lectured and testified before Congress on legal topics relating to torts, constitutional law, employment law, diversity, government contracts, litigation and compliance. In 2005, Mr. Remy was recognized by Black Enterprise as one of America's most powerful executives under 40. He is a DC Bar Delegate to the American Bar Association. Further, Mr. Remy sits on the Boards of Louisiana State University - University College, the Washington Lawyers Committee on Civil Rights and Urban Affairs, the Abramson Foundation, and the Legal Counsel for the Elderly.

Chairman LEVIN. Now, without objection, we will excuse this panel with thanks to you and your families.

We won't break here. We will just ask for people to move quickly out and in. [Pause.]

Okay, everybody. Thank you for the quick turnaround time here. We are going to first ask Senator Webb if he would make his introduction, and then I will be calling on the other nominees.

Senator Webb.

**STATEMENT OF HON. JIM WEBB, U.S. SENATOR FROM THE
STATE OF VIRGINIA**

Senator WEBB. Thank you, Mr. Chairman.

I would like to say it is a great privilege and a pleasure for me to introduce General Gregson to this panel and to express my support for his confirmation.

I have known General Gregson since we were both 18 years old, which, when you get to be our age, is a long time. I would like to put an anecdote out here just to explain my view of why I respect his service so much.

In February 1968, during the Tet Offensive, we had service selection at the Naval Academy. This was the first time that there was—

Chairman LEVIN. Senator, I hate to interrupt you, but we want to be able to hear this. Could we ask the folks in the back of the room to please be very quiet?

Could the folks in the back of the room please be quiet while they are exiting? Thank you.

Senator Webb?

Senator WEBB. Thank you, Mr. Chairman.

Just to start again on this, in February 1968, during the Tet Offensive, we had our service selection at the Naval Academy. I was one of six battalion Marine Corps coordinators trying to figure out which of the midshipmen would volunteer to go into the Marine Corps. We had a 10 percent quota. Watching the Tet Offensive on television, we were probably the only class in modern Naval Academy history that did not make its Marine Corps quota.

In my battalion, I had 22 midshipmen who said they were going to go into the Marine Corps, and on service selection night, half of them, for whatever reasons, made another decision. It was a very bad time for our country. It was a very bad time for the Marine Corps, which lost more than 100,000 killed or wounded in Vietnam.

Of the six Marine Corps coordinators, five of them were infantry officers. They received nine Purple Hearts, and one was killed in action.

The interesting thing about that evening for me, which I will never forget, is that Chip Gregson for 4 years at the Naval Academy kept a destroyer model on his desk. We all thought he was going to be a surface warfare guy. When he looked at what was happening during Tet in 1968, he came down and signed up for the Marine Corps. He moved toward the sound of the guns.

He served in Vietnam with the 1st Reconnaissance Battalion, was wounded, and received a Bronze Star for heroism. He went on to a very distinguished career in the Marine Corps as an intellectual and as a combat leader. He has commanded at every level. He has spent years in Asia, in Japan, and at Okinawa. At the same time, he was a fellow over in the Brookings Institution and worked in the Pentagon in policy positions.

I can't think of a better person to take over the enormous responsibilities that he is about to assume. I normally do not introduce people on the committees on which I sit, but in this particular case, I am very pleased to recommend General Gregson to this committee.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Webb.

That is an extraordinary introduction, and I know how much we appreciate it and how much General Gregson appreciates it.

The other members of the panel are the following: Dr. Michael Nacht. Am I pronouncing your name correctly?

Dr. NACHT. Yes, Senator.

Chairman LEVIN. Currently a professor of public policy at the Goldman School of Public Policy at the University of California, Berkeley. Dr. Nacht served as a member of the U.S. Department of Defense Threat Reduction Advisory Committee for which he chaired panels on counterterrorism and counterproliferation of weapons of mass destruction.

He is also a consultant for Sandia National Labs and Lawrence Livermore National Laboratory. From 1994 to 1997, Dr. Nacht was Assistant Director for Strategic and Eurasian Affairs at the Arms Control and Disarmament Agency. Last, but far from least, I believe you have a son who resides in Ann Arbor, my home State.

Dr. NACHT. Correct.

Chairman LEVIN. That can only help you. [Laughter.]

[Senator Feinstein's statement in support of Dr. Nacht follows:]

PREPARED STATEMENT BY SENATOR DIANE FEINSTEIN

Thank you Mr. Chairman and Senator McCain for the opportunity to introduce and support a distinguished public servant, Dr. Michael Nacht, during the committee's consideration of his nomination to be Assistant Secretary of Defense for Global Strategic Affairs.

Dr. Nacht has a Bachelor's of Science degree in Aeronautics and Astronautics from New York University. He also holds four advanced degrees, including a Master's of Science in Operations Research from New York University, a Master's in Statistics from Case Western Reserve University, a Master's in Political Science from the New School for Social Research, and a Doctorate in Political Science from Columbia University.

He began his impressive career as a NASA missile aerodynamicist at the John Glenn Center in Cleveland, OH, working on the early lunar probe launch vehicles.

Later, he served as an Associate Professor of Public Policy, Associate Director of the Center for Science and International Affairs, and Acting Director of the U.S.-Japan Program at Harvard University and then as a professor and Dean at the University of Maryland School of Public Affairs.

During his time at the University of Maryland, Dr. Nacht took leave to serve as Assistant Director for Strategic and Eurasian Affairs of the U.S. Arms Control and Disarmament Agency, where he led the Agency's work on nuclear arms and missile defense negotiations with Russia and the opening of a nuclear arms dialogue with China.

During that time, Dr. Nacht participated in five summit meetings for President Clinton: four with Russian President Yeltsin and one with Chinese President Jiang Zemin and he received the Agency's Distinguished Honor Award—its highest form of recognition.

From 2001–2004, Dr. Nacht chaired panels of the Defense Threat Reduction Agency's Threat Reduction Advisory Committee on countering weapons of mass destruction and terrorism.

Dr. Nacht is a member of the Council on Foreign Relations and the International Institute for Strategic Studies. He also is the author or co-author of 5 books and more than 100 articles on U.S. national security policy, including nuclear weapons issues, missile defense, the proliferation of weapons of mass destruction, and homeland security.

Currently, Dr. Nacht is a Professor at the University of California, Berkeley's Goldman School of Public Policy and was the Dean of the School from 1998 to 2008. As a graduate of U.C. Berkeley's rival school, Stanford University, Dr. Nacht knows that I have especially high standards for those associated with my alma mater's rival across the San Francisco Bay.

Mr. Chairman, I can think of few people with a better set of skills and experiences to serve as Assistant Secretary for Global Strategic Affairs.

With negotiations underway on a new Strategic Arms Reduction Treaty this year, his expertise in the area of nuclear arms reductions should be especially welcome and beneficial as the administration works to make the threat of nuclear weapons a thing of the past.

I am pleased to offer my wholehearted support for his nomination, and I look forward to working with Dr. Nacht on nuclear policy, cyber security, and countering weapons of mass destruction—all of which are long-held interests of mine.

Should he be confirmed, I believe Dr. Nacht will serve with distinction, and the United States will be safer as a result.

Thank you Mr. Chairman.

Chairman LEVIN. Lieutenant General Wallace Gregson, U.S. Marine Corps retired, has been a foreign policy and military affairs consultant for WCG & Associates International since 2006. He has been beautifully introduced by Senator Webb, and I don't think I could possibly add anything to that introduction. So I am not going to try.

Jo-Ellen Darcy is the senior environmental advisor to the Senate Finance Committee. She was given a wonderful introduction by Senator Baucus.

I will put my additional comments about her in the record, except to say that she worked on water issues for our Governor Jim Blanchard of Michigan both in Lansing and Washington and also has a master's of science degree in resource development from Michigan State University. The rest I will put in the record, but nothing better can be said than what I just added.

Dr. Inés Triay, did I pronounce your name correctly?

Dr. TRIAY. Mr. Chairman, it is pronounced "Tree-iy."

Chairman LEVIN. Triay, and Dr. Triay, you spent most of your career in service to the Department of Energy (DOE) from your days as a scientist at Los Alamos Laboratory, and continuing as a career Federal employee, you have held a variety of senior scientific and management positions. You are presently Principal Deputy Assistant Secretary of Energy with responsibility for the DOE's Environmental Management Program.

Your experience in that position, your deep commitment to the cleanup program will help ensure that the program is very well managed and technically sound. We are delighted that you have been nominated as well.

[Senator Udall's statement in support of Dr. Triay follows:]

PREPARED STATEMENT BY SENATOR TOM UDALL

Chairman Levin and Ranking Member McCain, thank you for the opportunity to make this statement in support of Dr. Inés Triay, President Obama's nominee for Assistant Secretary of the Department of Energy. I had the pleasure of introducing Dr. Triay at her confirmation hearing at the Senate Energy and Natural Resources Committee.

Dr. Inés Triay is an extremely qualified scientist with a Ph.D. in physical chemistry from the University of Miami. She spent much of her successful career in New Mexico, first at Los Alamos National Lab, and next as the head of the Carlsbad Field Office, before serving in the Department's leadership in Washington, DC.

She is a strong role model and her career is a shining example for aspiring young scientists, particularly women and Hispanics.

She has devoted her career to the safe cleanup of the environmental legacy of the Nation's Cold War nuclear weapon production. This is the largest and complex environmental cleanup program in history, with more than 100 sites in more than 30 states.

I have witnessed Dr. Triay's work in New Mexico and attest to its quality.

Dr. Triay is able to handle both the difficult scientific issues and the critical public health issues involved in these clean-ups. During her tenure at DOE, Dr. Triay

has tackled some of the Nation's most difficult clean-up challenges, including completing cleanup in Rocky Flats, Colorado.

She also played an instrumental role in ensuring that transuranic waste disposal operations at the Department's Waste Isolation Pilot Plant in New Mexico are safe and secure.

Mr. Chairman, there is no scientist better qualified to be Assistant Secretary of the Office of Environmental Management at DOE. I hope you will join me in supporting Dr. Triay for this position.

Thank you, Mr. Chairman.

[The prepared statement of Senator Levin follows:]

PREPARED STATEMENT BY SENATOR CARL LEVIN

We will now hear from our second panel of witnesses.

Dr. Michael Nacht is currently Professor of Public Policy and former Aaron Wildavsky Dean at the Goldman School of Public Policy at the University of California—Berkeley. Dr. Nacht served as a member of the U.S. Department of Defense Threat Reduction Advisory Committee, for which he chaired panels on counterterrorism and counterproliferation of weapons of mass destruction. He has also consulted for Sandia National Laboratories and Lawrence Livermore National Laboratory. From 1994–1997, Dr. Nacht was assistant director for Strategic and Eurasian Affairs at the Arms Control and Disarmament Agency. Dr. Nacht, I believe you have a son who resides in Ann Arbor, is that correct?

Lieutenant General Wallace C. Gregson, USMC (ret.), has been a foreign policy and military affairs consultant for WCG & Associates International since 2006. Previously he served as Chief Operating Officer for the United States Olympic Committee. This service followed a 37-year career in the Marine Corps, where his final assignment was as Commanding General of the Marine Corps Forces Pacific and Marine Corps Forces Central Command, where he led and managed over 70,000 marines and sailors in the Middle East, Afghanistan, East Africa, Asia and the United States.

Dr. Nacht and General Gregson come to the DOD policy arena with a wealth of experience that will be very helpful as the President and Secretary Gates seek to shape the agenda for the new administration. Dr. Nacht and General Gregson, we look forward to having your steady hands in place in helping to guide this process.

Ms. Jo-Ellen Darcy is the Senior Environmental Advisor to the Senate Finance Committee, responsible for environment, conservation and energy issues. Previously, she was Senior Policy Advisor to the Senate Environment and Public Works Committee, concentrating on fish and wildlife issues, the Army Corps of Engineers, nominations, and a variety of conservation and water issues. She worked on water resources issues for Governor Jim Blanchard of Michigan in both Lansing and Washington, DC. She has another connection to Michigan, a Master of Science degree in resource development from Michigan State University. Ms. Darcy, your wealth of experience here in Congress should help you lead the Army Civil Works organization effectively.

Dr. Inés Triay has spent most of her career in service to the Department of Energy, from her days as a scientist at Los Alamos Laboratory and continuing as a career Federal employee, she has held a variety of senior scientific and management positions. She is presently the Principal Deputy Assistant Secretary of Energy with responsibility for DOE's Environmental Management Program. Her experience in that position and her deep commitment to the cleanup program should help to ensure that it is well managed and technically sound.

Chairman LEVIN. Now I am going to ask you standard questions that you can all answer together.

Have you adhered to applicable laws and regulations governing conflicts of interest?

[All four witnesses answered in the affirmative.]

Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

[All four witnesses answered in the negative.]

Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

[All four witnesses answered in the affirmative.]

Will you cooperate in providing witnesses and briefers in response to congressional requests?

[All four witnesses answered in the affirmative.]

Will those witnesses be protected from reprisal for their testimony or briefings?

[All four witnesses answered in the affirmative.]

Do you agree, if confirmed, to appear and testify upon request before this committee?

[All four witnesses answered in the affirmative.]

Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

[All four witnesses answered in the affirmative.]

Okay. I think we are going to call first on Dr. Nacht.

STATEMENT OF DR. MICHAEL NACHT, NOMINEE TO BE ASSISTANT SECRETARY OF DEFENSE FOR GLOBAL STRATEGIC AFFAIRS

Dr. NACHT. Mr. Chairman, Senator McCain, members of the committee, it is an honor to come before you as President Obama's nominee to be Assistant Secretary of Defense for Global Strategic Affairs.

I wish to thank President Obama, Secretary Gates, and Under Secretary Flournoy for their support of my nomination.

Let me say a few words about my family. For their unswerving love and support, I want to foremost acknowledge my wife, Marjorie Jo, my partner of 45 years; my son Alexander and his wife, Maria, of New York; my son David and daughter-in-law, Alicia, who, as the chairman has acknowledged, are residents of Ann Arbor, Michigan; and our loving grandchildren Joshua, Benjamin, Julian, and a fourth on the way. I am delighted that my son Alexander could be with us today.

I also wish to cite the contributions to our Nation of my wife's family in national security. Her dad, Walter Seltzer, now deceased, won the Silver Star with Oak Leaf Cluster, the Bronze Star, and the Purple Heart at the Battle of the Bulge in World War II.

Her cousin, Major Stephen Nurenberg, U.S. Army, is currently in Iraq with the Joint Task Force while stationed at Fort Eustis, VA. Another cousin, Michael Nurenberg, a member of the Virginia National Guard, was previously in the 3rd Ranger Battalion in Afghanistan.

Senators, I have twice served full time in Government, first, as a NASA missile aerodynamicist in the early days of the space program, and, more recently, as a nuclear arms and missile defense negotiator in the Clinton administration, for which I received unanimous U.S. Senate confirmation.

After September 11, as the chairman has noted, I had the privilege to be asked by General Larry Welch, former U.S. Air Force Chief of Staff, to chair two panels of the Threat Reduction Advisory Committee of the Defense Threat Reduction Agency on counterterrorism and counterproliferation of weapons of mass destruction.

If confirmed, I would be honored to return to public service to contribute to our Nation's security. I would make every effort to meet the challenges posed by the array of issues in global strategic affairs.

I pledge to work closely with this committee and other committees of Congress on each of these challenges, and I would like to thank the members of the committee for your consideration of my nomination.

Chairman LEVIN. Thank you, Dr. Nacht.
General Gregson?

STATEMENT OF WALLACE C. GREGSON, NOMINEE TO BE ASSISTANT SECRETARY OF DEFENSE FOR ASIAN AND PACIFIC SECURITY AFFAIRS

General GREGSON. Mr. Chairman, Senator McCain, members of the committee, thank you for the opportunity to appear before you this morning.

I would like also to thank Senator Webb for his most gracious introduction.

I am honored and grateful that the Secretary of Defense recommended me, and the President has chosen to nominate me, for Assistant Secretary of Defense for Asian and Pacific Security Affairs.

My wife, Cindy, whose patience and understanding have made this possible, is here today. Our oldest son is working in Boston and unable to attend. Our youngest son is serving with the marines in Iraq and, similarly, unable to attend.

We have both urgent challenges and important opportunities in the Asian and Pacific region. If confirmed, I am eager to lend my efforts to meeting our national security goals.

Thank you.

Chairman LEVIN. Thank you very much, General Gregson.
Ms. Darcy?

STATEMENT OF JO-ELLEN DARCY, NOMINEE TO BE ASSISTANT SECRETARY OF THE ARMY FOR CIVIL WORKS

Ms. DARCY. Thank you, Chairman Levin, Senator McCain, and members of the committee. Thank you for holding this hearing today so promptly after the announcement of our nominations.

It is my honor and privilege to be here today as President Obama's nominee to be Assistant Secretary of the Army for Civil Works. I am here today because of my experience with the Corps and its mission, and I am also here because of the love and support of my family and my friends.

I would like to introduce my family. My mom, Jean, couldn't be here today or my brother Richard, and I know that my father is looking down from on high. But I would like to introduce my three sisters, Bonnie Darcy Waldman, Pam Farentino, and Dr. Margie Darcy. My cousin Sarah Lord is here, as well as my long-time friend Jean Antonucci.

I have several friends and colleagues here also today, and I would like to thank them for their support and their guidance over the years.

My experience as a Senate staffer for the last 16 years, and my time working for the Governor of Michigan on Great Lakes issues, has given me the opportunity to work with the Corps of Engineers on realizing project goals and on developing the policies that guide the Corps' mission.

In addition to firsthand knowledge of the complexity and importance of the Corps' responsibilities, my experience has given me great respect for the outstanding men and women of the Corps, who serve the Corps and serve this Country. The Corps has, throughout its history, marshaled expertise and ingenuity to serve the changing needs of a growing Nation.

If confirmed, I look forward to building on that tradition of rising to new challenges to meet the Nation's needs in the 21st century.

Thank you for the opportunity to testify today, and I look forward to answering any questions.

Chairman LEVIN. Thank you, Ms. Darcy.

Dr. Triay?

STATEMENT OF DR. INÉS R. TRIAY, NOMINEE TO BE ASSISTANT SECRETARY OF ENERGY FOR ENVIRONMENTAL MANAGEMENT

Dr. TRIAY. Mr. Chairman, Senator McCain, members of the committee, it is a great honor to appear before you today as President Obama's nominee to be the Assistant Secretary for Environmental Management at the DOE.

I thank President Obama and Secretary Chu for their confidence. I also thank the committee for considering my nomination.

I would like to introduce my husband, Dr. John Hall, who has been my friend, my partner, and my inspiration for over 20 years, and his parents, Mr. and Mrs. Harvey Hall, who are also here with me today.

In 1961, when my parents fled Cuba's Communist regime and went into exile with a 3-year-old daughter and nothing but their dreams for a better life and their love for freedom, it would have been impossible to believe that their daughter would ever be nominated by the President of the United States to serve this great country.

My parents and I are proud to be naturalized citizens of the United States and are humbled by the honor of my being here today. The pride that we feel has only served to deepen the great love that we have for this country and the admiration and respect that we have for the American people.

That a girl born in Cuba was welcomed in Puerto Rico; encouraged to study math and science; received a Ph.D. in chemistry at the University of Miami in Florida; was recruited by Los Alamos National Laboratory and mentored by giants in the field of nuclear science; was asked to direct the beginning of the operational phase of the waste isolation pilot plant, the only nuclear waste repository of its kind in the world; was promoted to the top career position in the DOE's Environmental Management Program, the most complex nuclear cleanup in the world; and is now being nominated to direct that cleanup is something that only happens in America.

Mr. Chairman, if I am confirmed to this position, I will work closely with you and with all of Congress to address the many

local, State, regional, and national issues that we face within the Environmental Management Program. I commit to informing and consulting with Congress, the tribal nations, the State, our regulators, our stakeholders, and individual concerned citizens.

As I address you today, I want to affirm my commitment to safety, the safety of our workers, the safety of the public, and the safety of our environment. Safe operations and cleanup is our ever-present and ultimate goal.

I come before you today with a unique understanding of the complexity and magnitude of the task that we face. I have firsthand experience in every aspect of environmental management and have dedicated my life to the successful cleanup of the environmental legacy of the Cold War.

While we have made significant progress in the Environmental Management Program, I recognize the enormity of the remaining effort and the technical challenges that we face. I am eager to use science and technology, robust project management, and our inter-governmental partnerships to reduce the cost and schedule of the remaining program.

As the committee is aware, the Environmental Management Program has come under considerable criticism for the execution of its projects. Under my leadership as acting Assistant Secretary, aggressive efforts are underway to transform the Environmental Management Program into a best-in-class project management organization.

I commit to you that if I am confirmed, I will work tirelessly to make this effort successful and to continue to improve the Environmental Management Program. I have a long history of demanding excellence from my team. Nothing less than performance that results in delivering our projects on time and within cost will be acceptable from the environmental management Federal team and our contractors.

Should I be confirmed, I will use every tool to ensure the successful performance of the environmental management mission. Relentless focus on performance, utilization of science and technology, staff professionalism and competency, transparency, and accountability—these will be the cornerstones of my tenure if I am confirmed.

Mr. Chairman, members of the committee, I would be honored to serve this great country that I so deeply love. As a Latina, I embrace the responsibility of excelling and, if confirmed, I will do everything in my power to meet your highest expectations.

I would be pleased to answer your questions.

[The prepared statement of Dr. Triay follows:]

PREPARED STATEMENT BY DR. INÉS R. TRIAY

Good morning, Mr. Chairman, Senator McCain, members of the committee.

It is a great honor to appear before you today as President Obama's nominee to be the Assistant Secretary for Environmental Management at the United States Department of Energy. I thank Secretary Chu and President Obama for their support and confidence in recommending and nominating me. I also thank the committee for considering my nomination. I would like to introduce my husband of 24 years, Dr. John Hall, and his parents Mr. and Mrs. Harvey Hall, who are with me here today.

In 1961, when my parents fled Cuba's Communist regime and went into exile with a 3-year-old daughter and nothing but their dreams for a better life and their

love for freedom, it would have been impossible to believe that their daughter would ever be nominated by the President of the United States to serve this great country. My parents and I are proud to be naturalized citizens of the United States of America and are humbled by the honor of my being here today. The pride that we feel has only served to deepen the great love that we have for this country and the admiration and respect that we have for the American people.

That a girl born in Cuba was welcomed in Puerto Rico; encouraged to study math and science; received a Ph.D. in Chemistry at the University of Miami in Florida; was recruited by Los Alamos National Laboratory in New Mexico and mentored by giants in the field of nuclear science; was asked to direct the beginning of the operational phase of the Waste Isolation Pilot Plant in Carlsbad, NM, the only nuclear waste repository of its kind in the world; was promoted to the top career position in the Department of Energy's Environmental Management program, the most complex nuclear cleanup in the world; and is now being recommended by a Nobel laureate, Secretary Chu, and nominated by President Obama to direct that cleanup is something that only happens in the United States of America.

Mr. Chairman, if I am confirmed to this position, I will work closely with you and with all of Congress to address the many local, State, regional and national issues that we face within the Environmental Management program.

As I address you today, I want to affirm my commitment to safety—the safety of our workers, the safety of the public, the safety of our site communities and our stakeholders and the safety of our environment. Safe operations and cleanup is our ever present and ultimate goal.

I come before you today with a unique understanding of the complexity and magnitude of the task that we face in the Environmental Management program. I have first-hand experience in every aspect of environmental management and I have dedicated my life to the successful cleanup of the environmental legacy of the Cold War.

While we have made significant progress in the Environmental Management program, I recognize the enormity of the remaining effort and the technical challenges that we face. I am eager to use science and technology, robust project management, and our intergovernmental partnerships to reduce the cost and schedule of the remaining program.

As the committee is aware, the Environmental Management program has come under considerable criticism over the years in the execution of its projects. We must strengthen our project management capability and improve the skill set of our project management teams. Under my leadership as Acting Assistant Secretary, aggressive efforts are underway to transform the Environmental Management program into a “best-in-class” project management organization. We are implementing processes and procedures for quality assurance and for identifying and managing project risks. I commit to you that if I am confirmed, I will work tirelessly to make these efforts successful and to continue to improve the Environmental Management program.

I would like to thank Congress for including \$6 billion in the American Recovery and Reinvestment Act for the Environmental Management program. This funding will save and create jobs quickly for shovel-ready work that is essential to our strategic objective to reduce the footprint of the legacy cleanup complex. Footprint reduction can be accomplished by focusing cleanup activities on decontamination and demolition of excess contaminated facilities, soil and groundwater remediation, and solid waste disposition, all of which have proven technologies and an established regulatory framework. In addition to creating jobs, the Recovery Act funding will accelerate protection of human health and the environment at these sites. I recognize that disciplined management and oversight of these funds will be critical to our success. I pledge to work with other offices in the Energy Department and Congress to ensure that we meet this challenge.

I would like to end my testimony by reaffirming my commitment to the safety of our staff and contractors, to the safety of the communities and stakeholders at our sites and to the protection of our environment. I commit to informing and consulting with Congress, the tribal nations, the States, our regulators, our stakeholders and individual concerned citizens.

I have a long history of demanding excellence from my team. Nothing less than performance that results in delivering our projects on time and within cost will be acceptable from the Environmental Management Federal team and our contractors. Should I be confirmed, I will use every available tool to ensure the successful performance of the Environmental Management mission, relentless focus on performance, utilization of science and technology, hard work, staff professionalism and competency, transparency, and accountability. These would be the cornerstones of my tenure if I am confirmed.

Mr. Chairman, members of the committee, I would be honored to serve this country that I so deeply love. As a Latina executive and scientist, I embrace the responsibility of excelling, and, if confirmed, I will do everything in my power to meet your highest expectations. It is an honor to testify before you today. I would be pleased to answer your questions.

Chairman LEVIN. Thank you very much, Doctor.

Let us try 8 minutes for questions and see if we can finish in time for the vote at noon.

Dr. Nacht, first, one of the most significant policies for which you are going to be responsible is the nuclear posture review, and you are going to be leading that review for the Under Secretary of Defense for Policy, as I understand it.

Balancing near-term deterrence requirements while seeking to achieve the elimination of nuclear weapons is, to put it mildly, a challenge. I am wondering how you see that process working on a practical basis?

Dr. NACHT. Thank you, Senator.

Yes, the nuclear posture review policy process has begun. I don't know all the details, but it is a rather elaborate process that involves all the key stakeholders, including U.S. Strategic Command, the National Nuclear Security Administration (NNSA) and DOE, Department of State, and others.

I will co-chair and lead key aspects of this review, reporting to Under Secretary Flournoy. I think it is on a pretty fast track, but yet I intend to be very comprehensive.

It is the first nuclear posture review since the Bush administration's activities in 2002, and we know that, I believe, there was no declassified version of that report produced, and we are going to try very hard to produce a declassified as well as a classified report. So I will play a significant role in that process.

Chairman LEVIN. General, on the question of U.S. assistance to Pakistan, I have a couple of questions. This assistance can only be effective if Pakistan's leadership at all levels comes to believe that violent extremists in Pakistan pose the greatest threat to Pakistan's survival, not India.

Otherwise, the United States is simply going to be misjudged. If we just pour money into there without the government of Pakistan understanding or agreeing that its principal threat is the threat of extremists, we would be perceived as trying to buy their support for our goals rather than supporting Pakistan in their efforts to confront the existential threat to Pakistan represented by those extremists.

There has been a proposal now by the administration to provide military and development assistance to Pakistan as part of its new strategy. There is a request for \$400 million to establish a Pakistan counterinsurgency contingency fund to train and equip the Pakistan Frontier Corps and to provide counterinsurgency training to the Pakistan army. The Kerry-Lugar bill (S. 962) would provide \$1.5 billion a year for 5 years to build democratic and economic institutions in Pakistan.

Would you agree, General, that the government of Pakistan needs to make the case publicly that the single-greatest threat to their security is posed by the militant extremists that spread out from the border area and that the Pakistan army should redirect its main focus to countering that threat?

General GREGSON. Mr. Chairman, I would certainly agree that Pakistan is in significant difficulty. They need to recognize that the extremism is an existential threat, and the resources that we provide to Pakistan need to be directed toward alleviating that specific threat.

Chairman LEVIN. General, in your opinion, to what extent is an improvement in Pakistan-India relations a prerequisite for successfully stabilizing the security situation in Pakistan itself?

General GREGSON. Pakistan and India have had difficult relations for the history of Pakistan. We need to work with Pakistan, India, and with other countries across the region to decrease any of the tensions that distract from our effort against the extremists.

Chairman LEVIN. There is a program in Afghanistan, General, called the National Solidarity Program. You and I have spoken about this in my office. Both General Petraeus and Under Secretary of Defense Flournoy have expressed strong support for this program.

It works through locally elected village councils. It empowers the Afghan people to set out their own development priorities. It also supplies small amounts of money, up to \$60,000 per village, so that the project that they select can be built or adopted.

I am hoping that, after your confirmation, you will become familiar with the National Solidarity Program and the community development councils that they have established in over 21,000 villages and localities in Afghanistan as a way of bringing some kind of grassroots decisionmaking, as well as grassroots selected development to Afghanistan. Can you do that?

General GREGSON. Yes, sir. I certainly can, and I took the liberty of researching that program a bit after I left your office. I think it is a wonderful example of bottom-up development, and you mentioned that we work on projects that they select rather than projects that we select for them; I think that approach has a lot of promise.

Chairman LEVIN. Then finally, the President has said that he supports benchmarks for measuring progress in Afghanistan and for promoting accountability. In Iraq, Congress pressed for benchmarks, and Prime Minister Maliki and the Iraqi Government finally did adopt some goals or milestones to measure progress in security and in political reconciliation.

We didn't invent the benchmarks. These were objectives that Iraq itself had set for itself with a timetable for achieving the benchmarks. I am wondering, General, whether you will support the adoption of benchmarks by the Afghan Government? We can have our own benchmarks, obviously, to track this. But most importantly, would you encourage the Afghan Government to set some benchmarks for their own progress?

General GREGSON. I certainly would. Whether we call them benchmarks, measures of effectiveness, or some other term, I believe that we need to have a continuous dialogue about whether we are accomplishing what we need to accomplish. If not, what do we need to change?

We also need, I think, to be very aware of the fact that the situation itself can change and that might change what we are trying to do in the normal countermeasure ways that these develop. But

we need to have a clear understanding not only within DOD but, in my mind, across the Government on what it is we are trying to do and, more than that, across the international coalition.

Chairman LEVIN. Okay. Thank you.

Ms. Darcy, just a question for you about the significant backlog of the Corps work. The Harbor Maintenance Trust Fund has about \$4 billion surplus in it that is growing every year, and yet we have all kinds of ports, facilities, waterways, small harbors, including harbors in Michigan, that are silting due to the Corps saying that they don't have funds available for dredging and other operations and maintenance, which is critically important to commerce in our harbors.

The money collected for the Harbor Maintenance Trust Fund is intended to maintain harbors and channels. The Corps has significant operations and maintenance backlogs, and yet in fiscal year 2008, they spent only \$766 million in operations and maintenance from that trust fund while the tax revenues collected were more than twice that amount, \$1.6 billion.

Will you take a look at that issue, particularly take a look at the growing backlog that exists in dredging in our important harbors, not just in the Great Lakes, but obviously representing a Great Lake State, I am keenly aware of the importance of that trust fund and the need to keep those harbors open. Will you commit to taking a strong look and see if we can address those backlogs?

Ms. DARCY. I will, Senator.

Chairman LEVIN. Okay. Thank you. My time is up.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

I would tell all the nominees and their families who are here, we appreciate their willingness to serve the country.

General Gregson, in follow-up to Senator Levin's questioning, do you believe that we should set benchmarks for the progress of Pakistan in their cooperation and assistance in addressing the threat that is based in Pakistan to Afghanistan?

General GREGSON. We need to come to an understanding with Pakistan.

Senator MCCAIN. Do you think that we ought to have benchmarks for them?

General GREGSON. We certainly should have some measure of standards, benchmarks, measure of effectiveness. We need to know where we are going and whether we are getting there.

Senator MCCAIN. Should those benchmarks be included in the aid package to Pakistan?

General GREGSON. We need to somehow make sure that the aid that we are giving to Pakistan goes to the purpose for—

Senator MCCAIN. I say with respect, General, it is like you either don't wish to answer or have no answer. My question is pretty clear. Should those benchmarks be included in any aid package to Pakistan?

General GREGSON. Yes, sir. They should.

Senator MCCAIN. They should in writing. What if the Pakistanis don't meet those benchmarks, General?

General GREGSON. If the Pakistanis don't meet those benchmarks, then our position and our posture over there and our effort

becomes even more difficult. I think it is absolutely essential that we work with Pakistan to solve the problems in Central Asia, and they are all linked together.

Senator MCCAIN. Thank you, General.

Could I ask you about North Korea and ask you what do you think the state of the situation is vis-à-vis North Korea and whether we should resume Six-Party Talks? Do you believe that they are willing to resume Six-Party Talks?

General GREGSON. They have indicated most recently that they are not willing to resume the Six-Party Talks. I think the Six-Party Talks should be resumed. There are elements within the Six-Party Talks that help us. The first essential reason is to stay in close formation with our two allies over there that are most intimately involved with North Korea: Japan and the Republic of Korea.

With the solid foundation from there, if we can find matters of common interest to work with Russia and China, that is in our favor, and it helps to build confidence in Northeast Asia that we are trying to work the issue.

Senator MCCAIN. Thank you.

General, I would just like to comment I think it is pretty obvious that North Korea has taken actions recently that are exactly in the opposite direction: driving out the inspectors, saying they are moving forward with development of more nuclear weapons, and the recent missile launch, which was more successful than the prior ones.

So, I hope that you will pay some attention to it and close attention to events there. I think we are in agreement that China plays a key role in whatever cooperation we might lead to be expected from them.

Dr. TRIAY, have you ever been to Hanford, Washington?

Dr. TRIAY. Yes, Senator. I have.

Senator MCCAIN. You have been? Have you seen the state of the cleanup there?

Dr. TRIAY. Yes, Senator. I have. I am very familiar with the state of the cleanup.

Senator MCCAIN. What is your assessment of the state of the cleanup? The information that we have is it may be 2062 before it is cleaned up?

Dr. TRIAY. Senator, that is correct. But, as I was saying in my testimony, we will use science and technology. We will use robust project management in order to bring in the schedule as well as reduce the lifecycle cost of that cleanup.

Senator MCCAIN. Thank you.

I can't recall the numbers right now for the cost overruns over the initial estimates, but they are astronomical. It seems to me that a target date of 2062 is not something that we should be satisfied with. It took a lot less years than that to do the pollution, much less.

So I hope you will give that a high priority. It has just been something I have been concerned about for a long period of time.

Ms. Darcy, do you believe that the Corps of Engineers should prioritize projects for authorization?

Ms. DARCY. No, Senator.

Senator MCCAIN. You don't?

Ms. DARCY. No, the current practice of the Corps is to not prioritize them for authorization. Once those projects—

Senator MCCAIN. Do you agree with that?

Ms. DARCY. I do.

Senator MCCAIN. Business as usual.

Dr. Nacht, do you believe we can achieve a world free of nuclear weapons?

Dr. NACHT. I think it is an aspiration, and as President Obama said in Prague, something that may not be achieved in his lifetime. But it is an aspiration, which will then structure some of what we will try to do to change attitudes. Perhaps this will lead to reduction in nuclear arsenals, significant reduction, and also to dissuasion of others to acquire nuclear weapons.

Senator MCCAIN. Are you optimistic about recent dialogue between the United States and Russia?

Dr. NACHT. I haven't been briefed in detail on this, but from the public accounts, the terms were used as a productive beginning. I have spent 3 years negotiating with the Russians in the START and missile defense area, and I know it is a challenging experience.

But I think, as I understand it, Under Assistant Secretary Gottemoeller, we are off to a good start.

Senator MCCAIN. Have you had a chance to look at the proposals that Secretary Gates has made concerning reductions in some of our missile defense programs or even elimination?

Dr. NACHT. I have read some of them. I don't believe the department has released a full budget, but I have read some of the statements.

Senator MCCAIN. Well, I was talking specifically about missile defense proposals that Secretary Gates has made, which are pretty specific. Will you look at those and give us a response in writing as to what you feel about those proposals?

Dr. NACHT. Absolutely.

[The information referred to follows:]

Mr. Chairman, Senator McCain, members of the committee, thank you for the opportunity to respond to your questions regarding the fiscal year 2010 President's budget.

I have no direct knowledge of the fiscal year 2010 President's budget, but it is my understanding that the Secretary made a number of adjustments to the ballistic missile program as part of a larger effort to rebalance defense capabilities to meet a wide range of military challenges in the most affordable manner.

U.S. missile defense capabilities are designed to defend against two broad threats: longer-range ballistic missiles from rogue countries that could threaten the United States in the future and regional or shorter-range ballistic missiles that threaten our deployed forces and friends and allies today.

The Secretary has decided to restructure the program to focus on the rogue state and theater missile threat. He has decided not to increase the current number of ground-based interceptors based in Alaska as had been planned. DOD will continue to fund robustly continued research and development to improve the capability we already have to defend against long-range rogue missile threats.

The Secretary also increased funding for short- and medium-range missile defense capabilities, such as Standard Missile-3 and Terminal High Altitude Area Defense, which protect our forces and those of our allies and friends in theater. The Secretary made the decision to rebalance our investments and increase production of these ballistic missile defense capabilities.

Senator MCCAIN. Thank you very much.

I thank the witnesses for being here and look forward to their confirmation.

I thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Senator McCaskill?

Senator MCCASKILL. Thank you, Mr. Chairman.

My questions are for Ms. Darcy as it relates to water, and it won't surprise you, Ms. Darcy, that I want to talk about the Missouri River. As you are aware, the GAO, I am sure, did a study at the urging of Senator Dorgan earlier this year that talked about the decline in the amount of goods being transported along the Missouri River.

Unfortunately, this study did not take into account that the navigation season had been severely curtailed by the Corps and nor did it take into account the value of the goods that are being shipped or the jobs associated with these shipments and the impact on Missouri and, in fact, the heartland's utilities as it relates to water being used as cooling on four major power plants along the river.

I understand why Senator Dorgan wants the Garrison diversion project, but what he is advocating now is a new study. Now, what drives me crazy in the Federal Government is the money we spend on studies.

We completed a study that cost \$35 million about the river. It cost \$35 million, and it took 15 years to complete. Now we are proposing to do another study.

Some things aren't going to change. The north is going to want more water, and the south is going to fight about it. We could study it until the cows come home, but it is not going to change reality: whether or not we are going to make sure that navigation is still available on the southern portions of the river.

So we were able to get a letter that Senator Dorgan signed that said that the Corps should delay this study, even though the funding was put into the omnibus appropriations bill, over my objection and other Senators' objection. There was an agreement reached that Senator Dorgan would ask the Corps, along with Senator Bond and me, to not begin this study until after October to give us another chance to reach out to stakeholders and perhaps have the entire Senate weigh in about this.

We have learned that preliminary work has begun on this study, even though a letter was sent to the Corps saying to delay the study. I need to ask you today why is preliminary work being done on a study that you have been asked to delay? Whether or not you are willing to say "stop it" until we hear back from the Senate after we finish the appropriations process this year?

Ms. DARCY. Senator, because I am not at the Corps yet, my only response to you, I think, today can be, if confirmed, I would be happy to look into it. I understand the frustration on the Missouri River, and I also understand the frustration over continuous studies.

Senator MCCASKILL. Well, I appreciate that. I don't mean to diminish North Dakota, South Dakota, and Montana, but the population of Missouri alone exceeds the population of those three States. We need that navigation. It is very important to the economic health of our State.

I just have learned the hard way that sometimes this is arm wrestling behind doors as it relates to appropriators, and there are

much bigger policy issues here than who has Senators on the Appropriations Committee and who doesn't.

I just wanted to make sure that, on the record, I got your assurances that you were going to go into this with your eyes wide open, and I particularly would like, as quickly as possible once you are confirmed, some kind of word back to my office about not beginning to spend any of the money that has been appropriated on this study until after the date of October that we asked you to hold off on until you actually begin going down that road.

Ms. DARCY. If confirmed, I most certainly will look at it immediately.

Senator MCCASKILL. Thank you, and thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCaskill.

Senator MCCAIN. Could I just ask one more question of Ms. Darcy? You are aware of the threats to the Colorado River?

Ms. DARCY. Yes, I am, Senator.

Senator MCCAIN. Not only pollution, but lower levels and all of those aspects of the issue?

Ms. DARCY. I am, Senator.

Senator MCCAIN. How important they are to the west?

Ms. DARCY. Yes, sir.

Senator MCCAIN. I thank you, Mr. Chairman.

Chairman LEVIN. Thank you.

There have been requests for some answers for the record. Dr. Nacht, if you can get those in? As soon as you get those in, we can then proceed to consider the nomination. There is another witness who is going to get us information for the record from the earlier panel.

We are going to move as quickly as we can on these nominations. If you could get those answers in today or tomorrow, it would be helpful. There is usually, I think, a 48-hour wait before they go to the floor? Do they still wait 2 days?

No limit. Okay. If you could get those answers in promptly, we will try to take these nominations up very, very quickly.

We very much appreciate, as Senator McCain said, not only your service, your willingness to serve, but the support of your families. It is essential. You know it, and we just want them to be understanding that we are grateful to them as well as to you.

We will stand adjourned.

[Whereupon, at 11:56 a.m., the committee adjourned.]

[Prepared questions submitted to Hon. Raymond E. Mabus, Jr., by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders in the strategic planning process, in the development of requirements, in joint training and education, and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions based on your experience with the Department of Defense (DOD)?

If so, what areas do you believe might be appropriate to address in these modifications?

Answer. If confirmed, I will closely examine Goldwater-Nichols and make recommendations for changes to the Secretary of Defense if I deem change to be advisable. However, at this time I am not aware of any needed modifications.

Question. Do you believe that the role of the Service Secretaries under the Goldwater-Nichols legislation is appropriate and the policies and processes in existence allow that role to be fulfilled?

Answer. Yes.

Question. Do you see a need for any change in those roles, with regard to the resource allocation process or otherwise?

Answer. I am not aware of any need for changes to the roles of the Service Secretaries at this time.

DUTIES

Question. Section 5013 of title 10, U.S.C., establishes the responsibilities and authority of the Secretary of the Navy.

What is your understanding of the duties and functions of the Secretary of the Navy?

Answer. If confirmed as Secretary of the Navy, I will be responsible for the responsibilities and authorities in Section 5013 of Title 10 for both the U.S. Navy and U.S. Marine Corps.

Question. Assuming you are confirmed, what duties do you expect that Secretary Gates would prescribe for you?

Answer. If confirmed, I believe that Secretary Gates would expect me to implement the President's national security objectives throughout the Department of the Navy.

Question. What duties and responsibilities would you plan to assign to the Under Secretary of the Navy?

Answer. If confirmed, the Under Secretary would be designated as deputy and principal assistant to me, and per the National Defense Authorization Act (NDAA) 2009 the Chief Management Officer (CMO) of the Navy.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Secretary of the Navy?

Answer. My accumulated professional experience which includes being the Governor of Mississippi, Ambassador to Saudi Arabia, and senior leadership and management positions in the private sector provides me with the tools necessary to lead large and complex organizations. I approach the Secretary of the Navy's duties and responsibilities with an open mind and a dedication to serve. If confirmed, I will seek to rapidly assemble a strong team composed of dedicated, experienced, and talented people.

RELATIONSHIPS

Question. Please describe your understanding of the relationship of the Secretary of the Navy to the following officials:

The Secretary of Defense.

Answer. The Secretary of the Navy reports directly to the Secretary of Defense and ensures that his priorities are implemented in the Department of the Navy.

Question. The Deputy Secretary of Defense.

Answer. The Secretary of the Navy works closely with the Deputy Secretary of Defense to ensure that the Secretary of Defense's priorities are implemented in the Department of the Navy.

Question. The Under Secretaries of Defense.

Answer. If confirmed, I, the Under Secretary of the Navy, and the Assistant Secretaries of the Navy will coordinate and work closely with the Under Secretaries of Defense to ensure the Department of the Navy's actions complements the priorities set forth by the Secretary of Defense and the Deputy Secretary of Defense.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Secretary of the Navy coordinates with the Chairman of the Joint Chiefs of Staff to ensure that he has all the information and support necessary from the Department of Navy to perform the duties of principal military advisor to the President, National Security Council, and Secretary of Defense.

Question. The other Service Secretaries.

Answer. The Secretary of the Navy should maintain close and positive relationships with the other Service Secretaries to ensure that a cohesive and fully equipped

and trained joint force is prepared to execute operations in support of our national interests.

Question. The Chief of Naval Operations.

Answer. The Chief of Naval Operations performs his duties under the authority, direction, and control of the Secretary of the Navy and is directly responsible to the Secretary according to Title 10.

Question. The Commandant of the Marine Corps.

Answer. The Commandant of the Marine Corps performs his duties under the authority, direction, and control of the Secretary of the Navy and is directly responsible to the Secretary according to title 10.

Question. The combatant commanders

Answer. The Secretary of the Navy supports the combatant commanders' operational and warfighting requirements.

Question. The Under Secretary of the Navy.

Answer. The Under Secretary of the Navy is the principal assistant to the Secretary of the Navy. He acts with full authority of the Secretary in the management of the Department and performs any duties given him by Secretary of the Navy.

Question. The Assistant Secretaries of the Navy

Answer. The Assistant Secretaries perform specific oversight roles delegated to them by the Secretary of the Navy.

Question. The General Counsel of the Navy.

Answer. The General Counsel is the senior civilian legal advisor to Secretary of the Navy. The General Counsel also serves as the Secretary of the Navy's chief ethics official.

Question. The Judge Advocate General of the Navy.

Answer. The Judge Advocate General of the Navy and the Staff Judge Advocate to the Commandant of the Marine Corps are the Secretary of the Navy's senior uniformed legal advisors.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the next Secretary of the Navy?

Answer. If confirmed, my challenges will include: providing for the health and welfare of our sailors, marines, and their families; supporting Overseas Contingency Operations and maintaining readiness; maintaining fiscal and budget discipline and establishing and maintaining long-term shipbuilding and aviation procurement programs that are achievable affordable, and responsive to the needs of the Nation.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. I plan to work closely with Congress, the President, the Secretary of Defense, the Chief of Naval Operations, and the Commandant of the Marine Corps, as well as other people and institutions to address manpower costs while continuing to support our sailors, marines and their families; execute affordable and effective shipbuilding and aviation plans; and address budget issues.

Question. What do you consider to be the most serious problems in the performance of the functions of the Secretary of the Navy?

Answer. I am not aware of any serious problems in the performance of the functions of the Secretary of the Navy.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. If confirmed, I will work closely with the Secretary of Defense and the Service Chiefs to develop plans to address any areas requiring attention.

PRIORITIES

Question. If confirmed, what broad priorities will you establish?

Answer. The broad priorities of the Department of the Navy will be aligned with those established by the Secretary of Defense. These include commitment to and support for maintaining the All-Volunteer Force; balancing programs to fight the wars we are fighting in Iraq and Afghanistan; ensuring we are prepared for other operations and contingencies; and reforming acquisition, procurement, and contracting.

TRANSFORMATION

Question. If confirmed as the Secretary of the Navy, you would play an important role in the ongoing process of transforming the Navy and Marine Corps to meet new and emerging threats.

If confirmed, what would your goals be for Navy and Marine Corps transformation?

Answer. The Navy and Marine Corps continuously assess new and emerging threats to ensure that their personnel are trained and equipped to meet and defeat them.

Question. In your opinion, does the Department of the Navy's projected budget have adequate resources identified to implement your transformation goals?

Answer. I have not had the opportunity to study in depth the Department's budget requests.

TACTICAL AVIATION

Question. Several years ago, the Navy and Marine Corps began to integrate their tactical aviation units.

What is your assessment of this initiative?

Answer. My initial assessment based upon limited information is that integration of tactical aviation between the Navy and Marine Corps allows the Department of the Navy to best meet the needs of the Nation.

Question. The Department of the Navy is facing a potential shortfall of strike fighter aircraft in the next decade even if the Navy continues to buy F/A-18E/F aircraft and F-35 Joint Strike Fighter (JSF) aircraft at the rate projected in last year's budget.

What is your assessment of this situation and what actions should the Department of the Navy take to address this potential shortfall?

Answer. If confirmed, I will review current and projected procurement of strike fighter aircraft, a top priority for Naval Aviation, and determine the actions and strategies necessary to mitigate or prevent any potential shortfall.

Question. What is your understanding of whether the Navy will continue to operate the 10 carrier air wings that supported the fleet of 11 aircraft carriers, or whether the air wing force structure will be modified to reflect a planned reduction to a permanent level of 10 aircraft carriers?

Answer. I am not aware of plans to reduce air wing force structure, although this issue, like all force structure issues, will be reviewed in the Quadrennial Defense Review (QDR). If confirmed, I will work with the Secretary of Defense to ensure the QDR reflects the best balance of capabilities and risk for the Nation.

Question. What is your assessment of the current risk to the F-35 JSF Program schedule during its system development and demonstration phase?

Answer. I am not aware of the status of risk to the JSF program, although I know the Navy and Marine Corps are fully committed to the JSF program.

Question. Alternatives for maintaining sufficient strike assets if there are new schedule difficulties with the JSF program are limited. It appears that the Department of the Navy's options for extending the service life of existing F/A-18 aircraft are limited and procurement of additional F/A-18 aircraft beyond those planned last year may be more difficult with the Secretary of Defense's recent announcement of a reduction of nine F/A-18 aircraft from the number originally planned for the fiscal year 2010 program.

What other potential alternatives do you see for maintaining sufficient strike assets if there were any additional slippage in the initial operating capability date for the F-35 JSF?

Answer. If confirmed, I will fully review strike asset requirements, taking into account all naval systems—airborne, surface and subsurface, manned and unmanned—capable of delivering striking power. It is essential that we maintain an effective naval strike capability to support the Joint Force.

SHIPBUILDING PLAN

Question. The Navy annually submits a 30-year shipbuilding plan. The last shipbuilding plan included very optimistic assumptions about unit costs of ships and excluded any funding for a replacement for the current fleet of Trident ballistic missile submarines.

Do you agree that the 30-year shipbuilding plan should, in fact, reflect realistic cost estimates and include all important shipbuilding efforts for that document to be useful for decisionmakers?

Answer. In order to effectively plan and achieve cost efficiencies it is important to have realistic cost estimates; this is especially true for a shipbuilding program.

Question. What level of funding do you think the Navy will need to execute this plan, and considering competing priorities, do you believe this level of funding is realistic?

Answer. I have not yet examined in detail the level of funding that Navy will need to execute the 30-year shipbuilding plan. If confirmed, I am committed to being a responsible steward of the taxpayers' dollars while ensuring development of the most efficient and effective ship building plan.

Question. Cost growth continues to be a prevalent problem in Navy shipbuilding programs, particularly for the first ships in new classes. Some experts have taken the position that DOD could improve the performance of its acquisition plans by adopting commercial practices, such as: retiring all major risk prior to signing a procurement contract; fixing the cost and delivery date at contract signing; competing all basic and functional design prior to starting construction; and having a disciplined construction process that delivers ships on cost and on schedule.

To what extent should such commercial shipbuilding best practices, and any others you may be aware of, be incorporated into Navy shipbuilding programs?

Answer. There are significant differences between commercial shipbuilding and Navy shipbuilding. The best practices from each should be used to determine the most efficient and cost effective way to procure the ships the Navy requires for the defense of our country.

AIRCRAFT CARRIERS

Question. The Navy decommissioned the USS *John F. Kennedy* in fiscal year 2006. This decreased the number of aircraft carriers to 11. Additionally, in the fiscal year 2006 budget request, the Navy slipped the delivery of CVN-78 (USS *Gerald R. Ford*) to 2015, creating a 2-year gap between the scheduled decommissioning of the USS *Enterprise* and the availability of a new aircraft carrier. During this period, under the proposed plan, only 10 aircraft carriers would be operational. Recently, there have been reports that delivery of the USS *Gerald R. Ford* could be further delayed because of technical difficulties with the electromagnetic aircraft launch system.

What is your view of the plan announced by Secretary Gates to permanently change the aircraft carrier force structure to 10 from the current number of 11?

Answer. I understand that Secretary Gates' recommendation is for the Navy's aircraft carrier force structure to be 10 carriers in 2040. If confirmed, I will work with the Secretary of Defense during the QDR to examine the aircraft carrier force structure.

Question. Is it Secretary Gates' plan to retire another aircraft carrier when the USS *Gerald R. Ford* delivers to keep the carrier force structure at 10 carriers?

Answer. I am not aware of such a plan.

Question. If not, do you believe that this reduced carrier force structure for a 2-year gap is supported by adequate analysis?

Answer. I have been told that the Navy has developed a mitigation plan. If confirmed, I will review that plan to ensure the Navy can provide sufficient carriers to support the operational needs of the combatant commanders.

Question. How would the aircraft carrier presence requirements of combatant commanders be met with only 10 operational aircraft carriers, particularly if the 10 carrier force structure is made permanent?

Answer. I have not had access to the information necessary to analyze combatant commander requirements. If confirmed, I will fully review this matter.

SURFACE COMBATANTS

Question. Until fiscal year 2009, the Future Years Defense Program had plans for buying DDG-1000 destroyers until the Navy was ready to begin procurement of a new missile defense cruiser, CG(X). During budget deliberations last year, Navy leadership announced that the Navy wanted to cancel the DDG-1000 program after building only two ships and restart the DDG-51 production line. Ultimately, the Secretary of Defense decided not to cancel the third DDG-1000 that was requested as part of the fiscal year 2009 budget.

In your judgment, can a credible and capable surface force be sustained at the level of multi-mission surface combatant construction the Navy currently plans, and if so, how?

Answer. I have not fully reviewed the Navy's shipbuilding plan; however, I believe that the QDR may have an impact on the existing plan. If confirmed, I would seek an appropriate force mix of surface combatants while considering our requirements in terms of capability and capacity.

Question. Has the Navy produced adequate analysis of the effects of the new shipbuilding plan on the surface combatant industrial base?

Answer. I do not have sufficient information on the shipbuilding plan and its relationship to the industrial base. If confirmed, my objective will be to work to ensure

that the Navy plan supports force structure needs and maintains a viable industrial base.

Question. In your opinion, how many shipyards capable of building surface combatants does this Nation need?

Answer. The answer to this question is complex and must consider: shipyard capabilities, the need for surge capacity, the benefit of competition in minimizing costs, possible disruptions from natural and manmade disasters, and the industrial infrastructure that supports the shipbuilding industry. If confirmed, I will work with the Chief of Naval Operations, Congress, industry, and others to determine the appropriate number of shipyards needed to efficiently build our surface combatants—a key aspect of our Nation's strength.

ACQUISITION ISSUES

Question. What are your views regarding the need to reform the process by which the Department of the Navy acquires major weapons systems? If confirmed, what steps would you recommend to improve that process?

Answer. Acquisition reform is a top priority for President Obama and Secretary Gates, and if confirmed, one of my highest priorities would be support them by ensuring the Department of the Navy acquires weapons systems in the most efficient and cost effective way possible.

Question. Department-wide, nearly half of the DOD's 95 largest acquisition programs have exceeded the so-called "Nunn-McCurdy" cost growth standards established in section 2433 of title 10, U.S.C. The cost overruns on these major defense acquisition programs now total \$295 billion over the original program estimates, even though the Department has cut unit quantities and reduced performance expectations on many programs in an effort to hold costs down. Many of those programs are being executed by the Department of the Navy.

What steps, if any and if confirmed, would you take to address the out-of-control cost growth on the Department of the Navy's major defense acquisition programs?

Answer. If confirmed, one of my top priorities will be to review the acquisition process and existing systems to ensure the Department of the Navy receives items on time and on cost.

Question. What principles will guide your thinking on whether to recommend terminating a program that has experienced "critical" cost growth under Nunn-McCurdy?

Answer. I agree with Secretary Gates that programs that underperform or are over cost should be immediately considered for termination. The Department of the Navy must clearly determine what it needs, what alternatives if any could satisfy those needs, and what options and trade-offs provide best value. If confirmed, should a program experience a Nunn/McCurdy breach, I will work with the Secretary of Defense and other senior leaders in the Department to thoroughly review it and determine if continuation or termination is in the best interest of the Department of the Navy and the taxpayer.

Question. Many experts have acknowledged that the DOD may have gone too far in reducing its acquisition workforce, resulting in undermining of its ability to provide needed oversight in the acquisition process.

Do you agree with this assessment?

Answer. Yes.

Question. If so, what steps do you believe the Department of the Navy should take to address this problem?

Answer. The acquisition workforce has been reduced to the point that it impedes the Department's ability to provide adequate management and oversight of the acquisition process. If confirmed, ensuring the Department of the Navy has adequate personnel to manage and oversee of the acquisition process will be a priority for me.

Question. Section 852 of the National Defense Authorization Act (NDAA) for Fiscal Year 2008 establishes an Acquisition Workforce Development Fund to provide the resources needed to begin rebuilding the Department's corps of acquisition professionals.

Do you believe that a properly sized workforce of appropriately trained acquisition professionals is essential if the Navy is going to get good value for the expenditure of public resources?

Answer. Yes.

Question. What steps do you expect to take, if confirmed, to ensure that the Navy makes appropriate use of the funds made available pursuant to section 852?

Answer. It is my understanding that the Department of the Navy is working closely with the DOD to hire additional acquisition professionals. If confirmed, I will review the status of the Department's acquisition workforce, including quantity,

competencies, and alignment to ensure the Department of the Navy efficiently and effectively executes acquisition programs.

Question. Would you agree that shortened tours as program managers can lead to difficulties in Acquisition programs? If so, what steps would you propose to take, if confirmed, to provide for stability in program management?

Answer. Shortened tours of program managers can lead to lack of consistency in acquisition programs. If confirmed, I will review the status of the Department's program manager tour lengths.

Question. Major defense acquisition programs in the Department of the Navy and the other military departments continue to be subject to funding and requirements instability.

Do you believe that instability in funding and requirements drives up program costs and leads to delays in the fielding of major weapon systems?

What steps, if any, do you believe the Navy should take to address funding and requirements instability?

Answer. Stable requirements and funding are critical for a successful acquisition process. If confirmed, I will examine the Navy's acquisition process and seek to maximize stability in funding and requirements.

Question. The Comptroller General has found that DOD programs often move forward with unrealistic program cost and schedule estimates, lack clearly defined and stable requirements, include immature technologies that unnecessarily raise program costs and delay development and production, and fail to solidify design and manufacturing processes at appropriate junctures in the development process.

Do you agree with the Comptroller General's assessment?

If so, what steps do you believe the Department of the Navy should take to address these problems?

Answer. I have not had an opportunity to review the Comptroller General's assessment. However, realistic program costs and clearly defined requirements are essential to ensuring an effective and efficient acquisition process.

Question. By some estimates, the DOD now spends more money every year for the acquisition of services than it does for the acquisition of products, including major weapon systems. Yet, the Department places far less emphasis on staffing, training, and managing the acquisition of services than it does on the acquisition of products.

What steps, if any, do you believe the Navy and Marine Corps should take to improve the staffing, training, and management of its acquisition of services?

Answer. Improvements in the acquisition process require a focus on acquisition of services as well as acquisition of systems. It is my understanding that the Department of the Navy is focusing on these concerns in the acquisition of services. If I am confirmed, I will work to ensure that there is proper staffing, training, and management of the acquisition of services in the Department of the Navy.

Question. Do you agree that the Navy and Marine Corps should develop processes and systems to provide managers with access to information needed to conduct comprehensive spending analyses of services contracts on an ongoing basis?

Answer. Yes.

Question. The last decade has seen a proliferation of new types of government-wide contracts and multiagency contracts. The DOD is by far the largest ordering agency under these contracts, accounting for 85 percent of the dollars awarded under one of the largest programs. The DOD Inspector General and others have identified a long series of problems with interagency contracts, including lack of acquisition planning, inadequate competition, excessive use of time and materials contracts, improper use of expired funds, inappropriate expenditures, and failure to monitor contractor performance.

What steps, if any, do you believe the Navy and Marine Corps should take to ensure that its use of interagency contracts complies with applicable DOD requirements and is in the best interests of the Department of the Navy?

Answer. If interagency contracts are not appropriately planned, competed, managed, and monitored, then they are not in the best interest of the Department of the Navy. Acquisition reform must focus upon ensuring that interagency contracts are effective and that the Department's use of interagency contracts complies with applicable rules and requirements.

Question. In the Budget Blueprint that supports the fiscal year 2010 Presidential budget request, the administration committed to "set[ting] realistic requirements and stick[ing] to them and incorporat[ing] 'best practices' by not allowing programs to proceed from one stage of the acquisition cycle to the next until they have achieved the maturity to clearly lower the risk of cost growth and schedule slippage."

If confirmed, what steps would you recommend to help ensure that the Department makes good on this commitment?

Answer. It is critical to set and meet realistic requirements and to use best practices throughout the acquisition process. While I do not have sufficient information to recommend any specific steps at this time, if confirmed I intend to support the commitment and that major acquisition programs receive the appropriate level of management attention.

Question. Recent congressional and DOD initiatives have attempted to reduce technical and performance risks associated with developing and producing major defense acquisition programs, including ships, so as to minimize the need for cost-reimbursable contracts.

Do you think that the Department should move towards more fixed price-type contracting in developing or procuring major defense acquisition programs? Why or why not?

Answer. There are benefits to fixed price contracts; however, they may not be appropriate under all circumstances. The use of fixed price contracts in the acquisition process for major defense programs should be given due attention.

Question. Section 811 of the NDAA for Fiscal Year 2008 amended section 2306b of title 10, U.S.C. to ensure that the DOD enters multiyear contracts only in cases where stable design and stable requirements reduce risk, and only in cases where substantial savings are expected. The revised provision requires that data be provided to Congress in a timely manner to enable the congressional defense committees to make informed decisions on such contracts.

What types of programs do you believe are appropriate for the use of multiyear contracts?

Under what circumstances, if any, do you believe that a multiyear contract should be used for procuring Navy weapons systems that have unsatisfactory program histories, e.g., displaying poor cost, scheduling, or performance outcomes?

Answer. Multiyear contracts are most appropriate when the design and requirements are stable and they provide the best value for the taxpayer and the Department of the Navy. Any weapons system which has an unsatisfactory program history should be closely examined and deficiencies corrected prior to continuing a multiyear contract.

Question. If confirmed, will you ensure that the Navy and the Marine Corps fully comply with the requirements of section 2306b of title 10, U.S.C., as amended by section 811 of the NDAA for Fiscal Year 2008 (Public Law 110-181) with respect to programs that are forwarded for authorization under a multiyear procurement contract?

Answer. Yes.

Question. The statement of managers accompanying section 811 of the NDAA for Fiscal Year 2008 addresses the requirements for buying major defense systems under multiyear contracts as follows: "The conferees agree that 'substantial savings' under section 2306b(a)(1) of title 10, U.S.C., means savings that exceed 10 percent of the total costs of carrying out the program through annual contracts, except that multiyear contracts for major systems providing savings estimated at less than 10 percent should only be considered if the Department presents an exceptionally strong case that the proposal meets the other requirements of section 2306b(a), as amended. The conferees agree with a Government Accountability Office finding that any major system that is at the end of its production line is unlikely to meet these standards and therefore would be a poor candidate for a multiyear procurement contract.

If confirmed, under what circumstances, if any, do you anticipate that you would support a multiyear contract with expected savings of less than 10 percent?

Answer. I am not prepared to answer this question until I have thoroughly reviewed the NDAA 2008 and Section 811. If confirmed, I will work with DOD and Navy acquisition professionals to determine when to use multiyear contracts.

Question. If confirmed, under what circumstances, if any, would you support a multiyear contract for a major system at the end of its production line?

Answer. Any decision to support a multiyear contract would be done on a case-by-case basis consistent with section 811, and occur only after detailed analysis and discussion with DOD and Navy acquisition professionals.

Question. What is your understanding of the new requirements regarding the timing of any DOD request for legislative authorization of a multiyear procurement contract for a particular program?

Answer. If confirmed, these requirements would be incorporated as part of the overall analysis of the acquisition process. The Department of the Navy will comply with these timing requirements.

Question. What steps will you take, if confirmed, to ensure that the Navy complies with 10 U.S.C., section 2366a, which requires that the Milestone Decision Authority

for a Major Defense Authorization Program (MDAP) certify that critical technologies have reached an appropriate level of maturity before Milestone B approval?

Answer. If confirmed, I will ensure that the Department of the Navy will fully comply with the law.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics has issued a memorandum directing that the largest DOD acquisition programs undergo competitive prototyping to ensure technological maturity, reduce technical risk, validate designs, cost estimates, evaluate manufacturing processes, and refine requirements.

Do you support that requirement?

Answer. Yes.

Question. What steps will you take, if confirmed, to ensure that the Navy complies with this new requirement?

Answer. If confirmed I will support this requirement in programs where competitive prototyping will further the aims of the memorandum.

BUSINESS MANAGEMENT ISSUES

Question. The Navy's business systems, like those of the other military departments, remain incapable of providing timely, reliable financial data to support management decisions. In particular, the Government Accountability Office has reported that the Navy has not yet followed DOD's lead in establishing new governance structures to address business transformation; has not yet developed comprehensive enterprise architecture and transition plan that plug into DOD's federated architecture in a manner that meets statutory requirements; and instead continues to rely upon old, stove piped structures to implement piecemeal reforms. Section 902 of the NDAA for Fiscal Year 2008 endeavored to address this problem by designating the Under Secretary of the Navy as the Navy's CMO. Section 908 of the NDAA for Fiscal Year 2009 requires the CMO of each of the military departments to carry out a comprehensive business transformation initiative, with the support of a new Business Transformation Office.

If confirmed, what steps, if any, would you take to ensure that the Navy develops the business systems and processes it needs to appropriately manage funds in the best interest of the taxpayer and the national defense?

Answer. If confirmed, I will work to ensure that the Department of the Navy follows the DOD lead in establishing new governance structures needed for business transformation. This would also include laying the groundwork for the development of a well-defined, enterprise-wide, business systems architecture and business transformation plan.

Question. If confirmed, what role do you expect to play, and what role do you expect your Under Secretary to play, in carrying out these initiatives?

Answer. I expect the Under Secretary as the designated Department of the Navy CMO to provide the guidance and oversight to ensure compliance with DOD direction on business transformation. Additionally, if confirmed, I will ensure that the CMO is given the authority to effectively organize the business operations of the department.

MINE COUNTERMEASURES CAPABILITY

Question. Congress has been particularly interested in the Navy's ability to respond to the asymmetric threat posed by mines. The Navy has had mixed results in fielding robust mine countermeasures capabilities.

If confirmed, what steps would you take to ensure that the Navy maintains its focus on achieving robust mine countermeasures capabilities for the fleet?

Answer. A capable mine countermeasure program is essential to the operational effectiveness of the fleet. If confirmed, I am committed to ensuring that the Navy maintains a robust program.

HOUSING PRIVATIZATION

Question. The DOD has been engaged in the privatization of many of its support functions. Among the most significant privatization efforts are military family housing units and utility systems.

What challenges do the Navy and Marine Corps face in implementing housing privatization?

Answer. I recognize that a public-private venture program has benefits. However, I do not have the information to analyze the specific challenges faced by the Navy and Marine Corps in their housing privatization program. If confirmed, I will work to ensure that the Department of the Navy is implementing the program in the most effective way possible.

INVESTMENT IN INFRASTRUCTURE

Question. Witnesses appearing before the committee in recent years have testified that the military services under-invest in their facilities compared to private industry standards. Decades of under-investment in our installations have led to increasing backlogs of facility maintenance needs, created substandard living and working conditions, and made it harder to take advantage of new technologies that could increase productivity.

Based on your experience in government and the private sector, do you believe the Navy and Marine Corps are investing enough in their infrastructure?

Answer. If confirmed, I will review the sufficiency of the Department of the Navy's investment in infrastructure.

IMPLEMENTATION OF BASE CLOSURES AND REALIGNMENTS

Question. The 2005 Defense Base Realignment and Closure (BRAC) process has resulted in the required closure or realignment of numerous major naval installations. The DOD installation closure process resulting from BRAC decisions has historically included close cooperation with the affected local community in order to allow these communities an active role in the reuse of property.

If confirmed, would you change any of the existing efforts to assist affected communities with economic development, revitalization, and re-use planning of property received as a result of the BRAC process?

Answer. If confirmed, I will support the DOD's goals to expeditiously dispose of property in order to facilitate economic development within affected communities. I will also work with local communities to facilitate expeditious conversion of excess property to civilian use.

HUMANITARIAN ASSISTANCE AND DISASTER RELIEF

Question. In recent years, the Navy has provided extensive support of humanitarian assistance and disaster relief operations throughout the world. Naval and Marine Corps forces responded rapidly to the December 2004 tsunami in the Indian Ocean utilizing over 25 ships, the hospital ship USNS *Mercy*, and delivering 24 million pounds of relief supplies. Naval and Marine Corps forces also led recovery and relief operations in Pakistan following devastating earthquakes. These forces and ships of all types also responded to Hurricanes Katrina and Rita across the southern coast of the United States.

What is your view of the importance of the Navy and Marine Corps mission to provide humanitarian assistance and disaster relief throughout the world?

Answer. These are core capabilities of the Navy and Marine Corps as stated in the Maritime Strategy, and as such, are of high importance.

Question. Do you believe the mission is sustainable within a constrained defense budget?

Answer. As a core capability of the Navy and Marine Corps, it should be sustained within a constrained budget through planning and oversight.

Question. If confirmed, how would you approach the funding and execution of this mission in light of current budget and naval mission priorities?

Answer. Funding will be thoroughly reviewed and analyzed in developing the Department's recommended budget while execution will be subject to planning and oversight.

DEPARTMENT OF THE NAVY SCIENCE AND TECHNOLOGY

Question. Do you believe that the current balance between short- and long-term research is appropriate to meet current and future Department of the Navy needs?

Answer. A balanced approach to short-term and long-term research is critical to meet current and future Department of the Navy needs. If confirmed, I will evaluate the research program and work to ensure that an appropriate balance is in place.

Question. If confirmed, what direction would you provide regarding the importance of innovative defense science in meeting Navy and Marine Corps missions?

Answer. If confirmed, I will support innovative defense science which might include engaging the Science and Technology Corporate Board as well as take other actions to ensure this vital area is addressed.

Question. If confirmed, what guidance would you give to ensure research priorities that will meet the needs of the Navy and Marine Corps in 2020?

Answer. If confirmed, I will support a balanced program of science and technology investment in basic and applied research and advanced development across the spectrum of naval needs. I will seek a program that focuses on science and technology areas that provide the biggest payoff for the future, fosters innovative think-

ing, efficient and effective business processes, and improves our ability to transition findings to acquisition programs.

DEFENSE INTEGRATED MANPOWER HUMAN RESOURCES SYSTEM

Question. Defense Integrated Manpower Human Resources System (DIMHRS) is a single integrated human resources pay and personnel system for all the Armed Services and the Defense Finance and Accounting System, and is intended to replace many of the systems currently used to perform personnel management and pay functions. DIMHRS, which has been under development for several years, has come under criticism for cost growth, delays in implementation, and not meeting the expectations of each Service.

What are your views of the need for completion of implementation of DIMHRS and what specific benefits, if any, would the Department of the Navy derive from this system?

Answer. I understand that DIMHRS is an initiative to develop and deploy an integrated human resources pay and personnel management system for the entire DOD. Although I do not have the information concerning the specific challenges encountered in developing the DIMHRS system, if confirmed I will work with appropriate authorities to ensure the Department of the Navy has an effective pay and personnel system.

Question. What is your understanding of the Navy and Marine Corps positions with respect to the utility of DIMHRS and its suitability for sailors and marines?

Answer. I understand the position of the Navy and Marine Corps is that DIMHRS is not, at this time, ready for use.

DELIVERY OF LEGAL SERVICES

Question. What is your understanding of the respective roles of the General Counsel and Judge Advocate General of the Navy in providing the Secretary of the Navy with legal advice?

Answer. The General Counsel and the Judge Advocate General each bring independent and complementary perspectives to the Department's legal requirements. The General Counsel provides specialized expertise in ethics, acquisition and civilian personnel matters. The Judge Advocate General provides the uniformed and operational perspective that is essential to good order and discipline of a globally deployed force. Together, these two leaders comprise an integrated legal cadre that ensures the proper operation of the services and the Department as a whole.

Question. What are your views about the responsibility of staff judge advocates within the Navy and Marine Corps to provide independent legal advice to military commanders in the fleet and throughout the naval establishment?

Answer. Navy and Marine Corps staff judge advocates are selected and trained to provide timely, relevant, and independent advice to commanders afloat and ashore. Flexible and worldwide deployable, the judge advocate communities of the Navy and Marine Corps are structured to ensure sufficient numbers of deployable and well-trained military lawyers are ready to respond to emergent requirements.

Question. What are your views about the responsibility of the Judge Advocate General of the Navy and the Staff Judge Advocate to the Commandant of the Marine Corps to provide independent legal advice to the Chief of Naval Operations and the Commandant of the Marine Corps, respectively?

Answer. The uniformed military attorneys of the Navy and Marine Corps are critical components of the Department's legal team. The Judge Advocate General and the Staff Judge Advocate to the Commandant of the Marine Corps perform functions in their respective organizations that are essential to the proper operation of their service and the Department as a whole.

NAVY JUDGE ADVOCATE GENERAL'S CORPS

Question. The Center for Naval Analyses (CNA) recently completed a study of manpower requirements for the Navy in which it concluded that the Navy's Judge Advocate General's Corps was significantly under strength for its mission, including combat service support of Marine Corps' units and Task Force 134 in Iraq.

What is your understanding of the CNA study's findings with respect to manpower in the Navy JAG Corps?

Answer. I have not had the opportunity to review the findings of the CNA study. However, if confirmed, I will consider judge advocate end strength as part of my overall review of manpower requirements.

Question. What is your understanding of the sufficiency of the number of active-duty judge advocates in the Marine Corps to provide legal support for all the Marine Corps' missions?

Answer. I do not have the information to offer an opinion on the sufficiency of current manpower. If confirmed, I will consider this as part of the overall review of manpower requirements.

Question. If confirmed, will you review the judge advocate manning within the Navy and Marine Corps and determine whether current active-duty strengths are adequate?

Answer. Yes.

SUPPORT FOR WOUNDED, ILL, AND INJURED SAILORS AND MARINES

Question. Wounded servicemembers from Operations Enduring Freedom and Iraqi Freedom deserve the highest priority from the Navy and Marine Corps for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support beyond retirement or discharge.

How do the Navy and Marine Corps provide follow-on assistance to wounded personnel who have separated from active service? How effective are those programs?

Answer. The Navy has established the "Safe Harbor" Program and the Marine Corps has established the "USMC Wounded Warrior Regiment." They extend support to the Wounded Warrior from separation or retirement from the service through reintegration into a community. If confirmed, I will continue to assess the effectiveness of these programs, and to develop and refine best practices to make sure these programs are successful.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Navy's and Marine Corps' support for wounded personnel, and to monitor their progress in returning to duty or to civilian life?

Answer. If confirmed, I will work to ensure sailors and marines and their families are provided with the best medical care and support they need throughout their recovery, rehabilitation, reintegration as a result of their selfless service and sacrifice.

Question. What measures would you take, if confirmed, to facilitate the seamless transition of wounded, ill, and injured sailors and marines from the DOD to the Department of Veterans Affairs (VA)?

Answer. Fostering a continuity of care between DOD and VA systems is essential to facilitate the most efficient and effective transition. Continued collaboration with the DOD and Veterans' Affairs will further strengthen the transition of health care for wounded, ill, and injured sailors and marines.

Question. Would you propose any changes to the Navy's disability evaluation system?

Answer. The Physical Evaluation Board manages the Navy's disability evaluation system. If confirmed, I will review and assess the evaluation and separation process to ensure it is fair.

NATIONAL SECURITY PERSONNEL SYSTEM

Question. Section 1106 of the NDAA for Fiscal Year 2008 restored the collective bargaining rights of civilian employees included in the National Security Personnel System (NSPS) established by the DOD pursuant to section 9902 of title 5, U.S.C. Under section 1106, the Department retains the authority to establish a new performance management system (including pay for performance) and streamlined practices for hiring and promotion of civilian employees.

What is your view of the NSPS, as currently constituted?

Answer. I do not have sufficient information at this time on the NSPS. If confirmed, I will coordinate with the Secretary of Defense to ensure the Navy's human resource management system provides necessary flexibility in assigning work with effective performance management processes aligned to the mission while preserving employee benefits, rights, and protections.

Question. If confirmed, how will you evaluate its success or failure to meet its goals?

Answer. If confirmed, information and data will be collected in various ways, including reaching out to key stakeholders, to give a concrete basis for review of NSPS.

Question. Do you support the pay-for-performance approach adopted for civilian employees in the NSPS?

Answer. I do not have sufficient information at this time on the NSPS. If confirmed, I will review how the NSPS supports the pay-for-performance approach in the Department of the Navy and make recommendations to the Secretary of Defense accordingly.

Question. Do you believe that the Department needs streamlined authority for hiring and promotion of civilian employees to meet its human capital needs?

Answer. At this time I do not have the information necessary to make this judgment.

Question. In your view, is it viable in the long run for the DOD to maintain two separate systems (NSPS and the General Schedule) for its civilian employees?

Answer. I do not have enough information at this time to evaluate the viability of maintaining both the NSPS and General Schedule systems for civilian employees. If confirmed, I will include this issue in my review of civilian pay systems.

Question. What changes, if any, would you recommend to the NSPS authorizing legislation?

Answer. I am informed the DOD is conducting a review of NSPS. Prudence dictates waiting for the results of that review and the related recommendations before making any judgments or assessments at this time.

Question. What changes, if any, would you recommend to the NSPS regulations?

Answer. I am informed the DOD is conducting a review of NSPS. It is best to reserve judgment related to recommendations until the review of NSPS is completed.

NAVY AND MARINE CORPS RECRUITING AND RETENTION

Question. The retention of quality sailors and marines, officer and enlisted, Active-Duty and Reserve, is vital to the Department of the Navy.

How would you evaluate the status of the Navy and Marine Corps in successfully recruiting and retaining high caliber personnel?

Answer. The Navy and Marine Corps continue to recruit and retain high caliber personnel for Active and Reserve Service. Both Services have exceeded their goals for active duty enlisted accessions and new contracts in fiscal year 2008 and are already at the goal established for 2009.

Question. What initiatives would you take, if confirmed, to further improve the attractiveness of Navy and Marine Corps, Active-Duty and Reserve Service?

Answer. It is my understanding that recruiting and retention have been successful in recent years. If confirmed, I will work with the Chief of Naval Operations and the Commandant of the Marine Corps to further improve the Naval Services attractiveness to recruits and their families.

SENIOR MILITARY AND CIVILIAN ACCOUNTABILITY

Question. While representative of a small number of individuals in DOD, reports of abuses of rank and authority by senior military and civilian leaders and failures to perform up to accepted standards are frequently received. Whistleblowers and victims of abuses often report that they felt that no one would pay attention to or believe their complaints. Accusations of unduly lenient treatment of senior officers and senior officials against whom accusations have been substantiated are also frequently heard.

What are your views regarding the appropriate standard of accountability for senior civilian and military leaders of the Department?

Answer. The U.S. Navy and Marine Corps traditions and history demand the exemplary conduct of its senior civilian and military leaders. The high standards of conduct that were taught to and expected of me as a junior naval officer are precisely the standards I will require of all senior civilian and military leaders in the Department of the Navy if I am confirmed. The Secretary of the Navy and senior military and civilian leaders must set the example for their subordinates. If our Nation's Navy and Marine Corps are to be respected among all nations, then we must maintain the highest standards of honor, integrity, and absolute adherence to the rule of law. Therefore, we must ensure prompt and thorough investigation of complaints, as well as swift and equitable treatment of those few people who fail to demonstrate exemplary conduct.

Question. If confirmed, what steps would you take to ensure that senior leaders of the Navy and Marine Corps are held accountable for their actions and performance?

Answer. The honor and privilege to lead and command in the naval service carries with it accountability for their actions and performance. If confirmed, I will continue to foster and enforce the Department of the Navy's earnest commitment to the highest ethical standards of principled leadership and honorable service.

NAVY SUPPORT TO GROUND FORCES

Question. The Navy has been challenged to find new ways of supporting the Army and Marine Corps in Iraq and Afghanistan by taking on nontraditional support functions.

In your view, what are the kinds of nontraditional support the Navy feasibly can provide, and what additional missions, if any, should the Navy be assigned in the global war on terrorism?

Given that these are nontraditional roles for Navy personnel, what additional training and equipment have been provided, or, in your view, need to be provided?

Answer. The Navy's sailor is known and respected for courage, resourcefulness, and versatility. At this time I do not have sufficient information on the types of nontraditional support the Navy can provide. However, I will examine current and anticipated nontraditional support and missions and will work to ensure that the necessary training and equipment is provided for our sailors to be successful executing them.

Question. What procedures are in place for the Navy to assess the potentially adverse operational effect on organizations from which individual augmentees are drawn? If you do not believe these procedures are adequate, what should be done to strengthen them?

Answer. At this time I do not have the information as to what Individual Augmentation procedures are in place. However, if confirmed, I will make it a priority to examine the entire Individual Augmentation process and the impact it has on the readiness of our operational forces.

PREVENTION AND RESPONSE TO SEXUAL ASSAULTS

Question. What is your evaluation of the progress to date made by the Navy and Marine Corps in preventing and responding adequately to incidents of sexual assault?

Answer. This is a high priority for me and is an essential aspect of maintaining Navy and Marine Corps values. If confirmed, I will use all means available to ensure that incidents of sexual assault are prevented or responded to rapidly and effectively.

Question. What problems do you foresee, if any, in implementing current policies with respect to confidential, restricted reporting of sexual assaults by sailors and marines?

Answer. Confidentiality and restricted reporting of sexual assaults is critical. I will work to ensure effective policies are implemented and enforced.

Question. If confirmed, what actions do you plan to take to ensure that senior civilian leaders of the Department of the Navy have ongoing visibility into incidents of sexual assault and the effectiveness of policies aimed at preventing and responding appropriately to such incidents?

Answer. I will make sure this issue is stressed and that there will be a regular and comprehensive evaluation of policies to ensure effectiveness.

PREVENTING SEXUAL HARASSMENT AND VIOLENCE

Question. The Defense Task Force on Sexual Harassment and Violence at the Military Service Academies reported that "Historically, sexual harassment and sexual assault have been inadequately addressed at both Academies [United States Military Academy and United States Naval Academy]. Harassment is the more prevalent and corrosive problem, creating an environment in which sexual assault is more likely to occur. Although progress has been made, hostile attitudes and inappropriate actions toward women, and the toleration of these by some cadets and midshipmen, continue to hinder the establishment of a safe and professional environment in which to prepare military officers. Much of the solution to preventing this behavior rests with cadets and midshipmen themselves."

If confirmed, what actions would you take to encourage not only midshipmen but also all sailors and marines to step up to their responsibility to create a culture where sexual harassment and sexual assault are not tolerated?

Answer. If confirmed, I will use all available tools to ensure every midshipman, sailor, marine, and civilian employee understands that sexual harassment and sexual assault won't be tolerated in the Department of the Navy and that swift and appropriate action will be taken against those who do not value such a culture.

Question. If confirmed, what other actions would you take to address the problem of sexual harassment and sexual assault in the Navy and Marine Corps?

Answer. Please see answer to previous question.

HUMAN CAPITAL

Question. The Navy has a large civilian workforce that is integral to the support of the Navy's worldwide mission.

What is your vision for an effective human capital strategy for the Navy's civilian workforce?

Answer. The Navy's civilian workforce is made up of over 180,000 employees worldwide, engaged in a myriad of mission areas and career fields. The Navy's vision must be broad enough to encompass this very wide range of people, missions, locations, and requirements, as well as provide the framework for developing policies and systems to ensure both capabilities and competencies are in place to meet the changing demands of our global force. If confirmed, I will work to ensure the Department of the Navy has an effective human capital strategy.

Question. Section 1122 of the NDAA for 2006, as amended by section 1102 of the John Warner NDAA for 2007 and section 851 of the NDAA for 2008, requires the Secretary of Defense to develop and annually update a strategic human capital plan that specifically identifies gaps in the Department's civilian workforce and strategies for addressing those gaps. The DOD has not yet produced a strategic human capital plan that meets the requirements of these provisions.

Do you believe that the Navy has appropriate planning processes in place to identify and address gaps in the capabilities of its civilian workforce?

Answer. At this time I do not have sufficient information about what processes exist. However, if confirmed, I will work with the Chief of Naval Operations and Commandant of the Marine Corps to implement good planning processes that ensure any gaps are identified and addressed.

Question. What do you view as the greatest challenges in recruiting and retaining a highly skilled civilian workforce?

Answer. There are many challenges in recruiting and retaining a highly skilled workforce, to including compensation, working conditions, fair evaluation systems, and career paths.

PERSONNEL AND HEALTH BENEFIT COSTS

Question. The cost of the Defense Health Program, like the cost of medical care nationwide, is escalating rapidly. Similarly, the cost of personnel as a key component of the Services' budgets has risen significantly in recent years.

If confirmed, how would you approach the issue of rising health care and personnel costs?

Answer. Based on my experience with fiscal management in state government and the private sector, I am aware that rising costs associated with health care and other personnel costs pose a significant threat to the fiscal strength of organizations nationwide. Streamlining and effective cost accounting alone cannot adequately ameliorate the effects of increasing medical costs. If confirmed, I will work with the Secretary of Defense to explore changes to the way the department meets these challenges.

QUALITY OF LIFE PROGRAMS

Question. If confirmed, what priorities would you establish to ensure that military quality of life programs are sustained and improved for Navy and Marine Corps members and their families?

Answer. Quality of life programs for Navy and Marine Corps personnel of all ranks and their families are a key component to ensuring readiness, job satisfaction, and retention. If confirmed, I will work with the Chief of Naval Operations and the Commandant of the Marine Corps to maintain focus and commitment to programs that support the quality of life needs of all naval personnel and their families.

Question. What challenges do you foresee in sustaining quality of life programs, and are there new initiatives that you would undertake, if confirmed, to ensure the availability of high quality services, including child care, education, and recreational opportunities, for sailors and marines and their families?

Answer. The current and anticipated economic and fiscal challenges could pose a threat to Navy and Marine quality of life programs. If confirmed, I will work to provide effective and innovative quality of life programs that our sailors, marines, and their families rely on, and are critical to maintaining combat readiness.

BALLISTIC MISSILE DEFENSE

Question. Do you view ballistic missile defense—for both deployed forces and the U.S. homeland—as a core mission for the Navy?

Answer. Yes.

READINESS LEVELS

Question. What is your assessment of the current readiness of the Department of the Navy to execute its assigned missions?

Answer. While naval forces are conducting combat and combat support missions in Operation Iraqi Freedom and Enduring Freedom, the naval forces also stand ready to answer the Nation's call across the spectrum of operations in support of the National Defense Strategy. Despite a high operational tempo due to Operation Iraqi Freedom, Operation Enduring Freedom, and other combatant commander requirements, our forces remain resilient, motivated, and are performing superbly around the globe. If confirmed, I will work to continue the Navy and Marine Corps proud tradition of readiness and ensure that our sailors and marines are fully trained, equipped, and resourced for their assigned missions.

Question. What do you view as the major readiness challenges that will have to be addressed by the Navy and Marine Corps over the next 3 years, and, if confirmed, how would you approach these issues?

Answer. One of the most significant readiness challenges facing the Navy and Marine Corps is balancing current overseas contingency operations with other anticipated readiness requirements. Navy and Marine Corps procurement, acquisition, maintenance, and recapitalization are also readiness challenges.

If confirmed, I will approach these issues by working with the Chief of Naval Operations and Commandant of the Marine Corps to review the Department's current challenges; craft a clear and concise vision and plan to address them; develop a means to track compliance and real savings for future use; work closely with my counterparts in the other Services, Office of the Secretary of Defense, Congress, and the defense industry; and reaffirm the strong relationships within the Navy and Marine Corps team.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. The United Nations Convention on the Law of the Sea (UNCLOS) is currently pending in the Senate.

What are your views on U.S. accession to UNCLOS?

Answer. I do not have sufficient information at this time to adequately address accession to UNCLOS.

Question. From a national security standpoint, what do you see as the advantages and disadvantages to being a party to UNCLOS?

Answer. At this time, I do not have sufficient information to form an opinion on the advantages or disadvantages to being a party to UNCLOS.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Secretary of the Navy?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JACK REED

NAVY LABS

1. Senator REED. Governor Mabus, I am concerned about the continued deterioration of the Navy's laboratory facilities. Research and development are essential to the long-term survival and efficiency of the fleet. Are Navy laboratories a high priority for you?

Mr. MABUS. Yes they are. Navy laboratories are a critical source of technological competitive advantage for the Navy. In 2008, Navy established a Principal Civilian Deputy (PCD), a Senior Executive reporting to ASN (RDA), to address the needs and capabilities of all the Navy Warfare Centers and Naval Research Lab and to improve the quality of the S&E workforce. This position engaged the senior civilian leadership of the Warfare Centers and Naval Research Lab through the Navy Lab and Centers Competency Group to strengthen the S&E workforce. In 2009, PCD ASNRDA has established a Science Technology Engineering & Mathematics Executive to establish a revitalization plan. The National Defense Authorization Act (NDAA) for Fiscal Year 2009, section 219, Mechanisms to Provide Funds for Defense Laboratories for Research and Development of Technologies for Military Missions, allows the DON to reinvest in science and technology.

2. Senator REED. Governor Mabus, how can the military construction (MILCON) allocation be changed to alleviate some of the more serious examples?

Mr. MABUS. Currently there are two initiatives to mitigate this issue:

Defense Laboratory Revitalization Program (LRP)

Continuation of the Laboratory Revitalization Program (LRP, Section 2805 of Title 10, United States Code) has been an important initiative to help enhance the quality of our labs. This initiative provides temporary authority to support revitalization of DOD laboratories through unspecified minor MILCON projects and is a critical tool. LRP has allowed Navy Laboratories to carry out RDT&E Minor MILCON valued at up to \$2.0 million to quickly meet emergent requirements. Warfare Centers have awarded projects in fiscal years 2008 and 2009 and plan to use this authority through fiscal year 2012.

Global Shore Infrastructure Plans (GSIPs) and Regional Integration Plan (RIPS)

Commander, Navy Installations Command (CNIC) is in the process of finalizing the second phase of GSIP development which identifies infrastructure capability gaps for Navy Enterprises and Providers. RIPS identify solutions to infrastructure capability gaps identified in GSIPs. NAVFAC Atlantic is expected to award a contract for the development of the Office of Naval Research functional plan (to be included in the CNIC GSIP) by the end of third quarter FY09. RIP solutions to GSIP infrastructure capability gaps are planned to be identified in time to support RDT&E projects in the 2012 budget request. Other RDT&E functional plans (SPAWAR, NAVAIR and NAVSEA Warfare Centers) to be included in the Fleet Readiness Enterprise GSIP are planned to be awarded for development in early next fiscal year pending funding availability.

3. Senator REED. Governor Mabus, are there other funding mechanisms that might be used to correct this deficiency?

Mr. MABUS. Yes, currently Navy is executing several congressional directives:

NDAA for Fiscal Year 2008, Section 802, Lead Systems Integrator.

This legislation has given impetus to reconstitute where necessary and to sustain and enhance systems engineering skills within the Warfare Centers.

NDAA for Fiscal Year 2008, Section 852, Department of Defense (DOD) Acquisition Workforce Development Fund.

This legislation provides funds for the recruitment, training, and retention of acquisition personnel of DOD to ensure that the DOD acquisition workforce has the capacity, in both personnel and skills, needed to properly perform its mission, provide appropriate oversight of contractor performance, and ensure that the Department receives the best value for the expenditure of public resources.

NDAA for Fiscal Year 2009, Section 219, Mechanisms to Provide Funds for Defense Laboratories for Research and Development of Technologies for Military Missions

This legislation establishes mechanisms under which the director of a defense laboratory may use an amount of funds equal to not more than 3 percent of all funds available to the defense laboratory for the following purposes: (a) to fund innovative basic and applied research that is conducted at the defense laboratory and supports military missions; (b) To fund development programs that supports the transition of technologies developed by the defense laboratory into operational use; (c) To fund workforce development activities that improve the capacity of the defense laboratory to recruit and retain personnel with needed scientific and engineering expertise.

NDAA for Fiscal Year 2009, Section 833, Acquisition Workforce Expedited Hiring Authority

This legislation designates any category of acquisition positions within the DOD as shortage category positions. It utilizes the authorities in such sections to recruit and appoint highly qualified persons directly to positions so designated.

4. Senator REED. Governor Mabus, would you consider relaxing some of the centralized control over facilities and equipment funding and provide the laboratory technical directors with more autonomy in the utilization of support services at their local institutions, as is common practice in world-class research facilities?

Mr. MABUS. Navy laboratories operate under working capital fund financial policies promulgated by the Office of the Under Secretary of Defense (Comptroller). Designed to satisfy recurring DOD requirements using a buyer-seller approach, the working capital fund already employs many best business practices found in the private sector.

Navy laboratories, like other working capital fund activities, procure facilities (other than MILCON projects), equipment, and services either through the Capital Investment Program or through operating funds, based on expense/investment criteria. Authority provided via the Laboratory Revitalization Program, (10 U.S.C. Section 2805), provides DOD labs more flexibility than other working capital fund business areas groups by raising the ceiling for unspecified minor construction from \$750,000 to \$2 million.

I believe existing policies provide technical directors at Navy labs and other working capital fund facilities with sufficient authority to successfully manage both financial and operational results in a manner comparable to the private sector. However, I support continued dialogue on proposals that would enhance existing policy and improve financial and operational results at Navy Working Capital Fund activities.

LAB DIRECTOR DISCRETIONARY FUNDING

5. Senator REED. Governor Mabus, the Navy has been most prompt to implement recent legislation designed to enhance the mission performance of Navy laboratories and warfare centers, which permits the direct hire of senior scientists and engineers at the Navy defense laboratories. There has also been recent legislation, section 219 of the NDAA for Fiscal Year 2009, which permits the Secretary of each Service to allocate a small percentage of funds expended at the laboratory for the discretionary use by the laboratory director to invest in research which he believes is worthy of support. Do you intend to likewise act expeditiously on implementing section 219?

Mr. MABUS. Yes. The Navy is working with the Office of Secretary of Defense to implement section 219 initiatives at the Naval Research Laboratory and Naval Warfare Centers. These initiatives will contribute to the development and sustainment of the world class skills and innovation of the science and engineering workforce at the Naval Research Laboratory and the Warfare Centers. I support these initiatives.

QUESTION SUBMITTED BY SENATOR EVAN BAYH

PRINTED CIRCUIT BOARD TECHNOLOGY

6. Senator BAYH. Governor Mabus, the NDAA for Fiscal Year 2007 directed the Secretary of Defense to submit to the Committees on Armed Services of the House and Senate a report on the implementation of the recommendations of the National Research Council Committee on Manufacturing Trends in Printed Circuit Board (PrCB) Technology. This report recommended that the Navy be designated the Executive Agent (EA) for PrCB.

In turn, section 256 of the NDAA for Fiscal Year 2009 mandated that the Secretary of Defense designate an EA for PrCB technology. In a letter to me dated April 8, 2009, former Under Secretary of Defense for Acquisition, Technology, and Logistics John Young indicated that the final designation of the Secretary of the Navy as the DOD EA would be complete within 90 days.

If confirmed, how do you plan to fund and resource the EA office for PrCB technology?

Mr. MABUS. Initially, it will be important to determine the requirements. The cost necessary to establish the processes associated with the DON'S assigned Executive Agent responsibilities will then be identified following the determination of these requirements. The costs will be included within recommended funding strategies nec-

essary to meet requirements associated with development and execution of the Printed Circuit Board and interconnect technology roadmap.

QUESTION SUBMITTED BY SENATOR TOM UDALL

TRANSITION TO THE NEXT GENERATION ENTERPRISE NETWORK

7. Senator UDALL. Governor Mabus, the Navy Marine Corps Intranet (NMCI) is a program that is an important part of our Nation's security. There is some concern that the transition to the Next Generation Enterprise Network (NGEN) should be accomplished in a manner that "does no harm" to our sailors and marines. It is my understanding that the Department has only recently given guidance on how it intends to proceed even though the NMCI contract is due to expire in 2010. Yet it is important to ensure this command and control network continues to perform as required during the transition to provide all of the Navy's information technology (IT) interests beyond 2010. Do you agree or disagree?

Mr. MABUS. I agree.

Continuity of services during the transition to NGEN is a critical priority of the Department of the Navy (DON).

Today, the DON contracts with EDS, an HP Company, to provide NMCI services. The 10-year, \$9.3 billion NMCI contract (originally awarded in October 2000) has resulted in the largest intranet in the world, with over 700,000 users. Given the complexity and magnitude of the upcoming contracting and transition activities, the Department has developed a comprehensive integrated master schedule to guide critical events. The transition strategy is designed to ensure services provided under the NMCI contract continue without interruption while working toward a competitive contractual environment for NGEN.

Currently, EDS owns and/or controls the infrastructure, operating processes, operating procedures and the technical data associated with NMCI. In replacing the NMCI contract, we will require the use of the NMCI infrastructure and access to EDS's processes and technical data. Therefore, the Department intends to enter into a sole source contract with the incumbent to provide the continuity of service. The Department will obtain the right to use the current NMCI infrastructure and obtain Government Purpose Rights license to the technical data in order to fully understand the technical data and processes which will ensure an open and competitive environment in the future. On February 18, 2009, this approach was approved by the Under Secretary of Defense, Acquisition, Technology and Logistics (USD AT&L). He authorized the DON to begin negotiations on the Continuity of Services Contract with the incumbent. The strategic approach was briefed to industry on March 31, 2009, providing industry an opportunity to understand the Department's approach and provide constructive feedback on the way toward a competitive environment.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

FISCAL YEAR 2010 PRESIDENTIAL BUDGET REQUEST

8. Senator MCCAIN. Governor Mabus, on April 6, 2009, Secretary Gates announced how the fiscal year 2010 defense budget request will reshape the priorities of the defense establishment. In so doing, he announced his decision to cut dramatically or cancel various major weapons systems. Are there any aspects of Secretary Gates' plan with which you have any difficulty? Please explain.

Mr. MABUS. We fully support Secretary Gates' plan. In this challenging fiscal and budgetary environment, we must look hard at every requirement, every development plan, and every capability. We must also demand performance from the acquisition community and industry. The decisions by Secretary Gates on Navy programs were consistent with these requirements, and very prudent.

In that regard, it is obvious that acquisition processes need reform in some very fundamental ways. Regaining control of acquisition processes is one of the most complex challenges that we will face. We are especially drawn to efforts directed at establishing cost control over out-of-control programs and making better use of independent cost estimates. The recommendations of Secretary Gates are clear statements that past behavior cannot continue.

9. Senator MCCAIN. Governor Mabus, what is your view of the aspect of the plan that permanently changes the aircraft carrier force structure to 10 from the current number of 11?

Mr. MABUS. The Navy remains committed to a force structure of 11 carriers for the next several decades, a commitment that Secretary Gates April budget announcement supports. However, the Navy requests a temporary waiver to operate 10 carriers during the period between inactivation of USS *Enterprise* (CVN 65) and the commissioning of USS *Gerald R. Ford* (CVN 78). During this 33 months period, the Navy assesses it can meet operational commitments by adjusting operational and maintenance schedules.

10. Senator MCCAIN. Governor Mabus, what is your view of the aspect of the plan that commits, to the exclusion of procuring other tactical fighter platforms, to the Joint Strike Fighter (JSF) program in light of the development and technology risk still associated with that program?

Mr. MABUS. The Department of the Navy believes that JSF development and technology risk are manageable. The JSF Program Office is providing program-wide schedule and technology risk analysis in conjunction with periodic Defense Acquisition Board reviews. The timing of these reviews will ensure the analysis is available to support key acquisition milestone decisions and budget discussions.

During the transition to the JSF, the Department of the Navy is exploring a range of options to meet its continuing strike fighter requirements. These include supporting legacy aircraft; SLEPIing some number of F/A-18 A-Ds; and procuring more F/A-18 E/F Super Hornets.

In this regard, the Navy is procuring F/A-18E/F Super Hornets in fiscal year 2010 via a single year procurement in PB10. The Department will continue to assess its TACAIR force structure and inventory requirements through this summer's Quadrennial Defense Review (QDR).

11. Senator MCCAIN. Governor Mabus, in the budget blueprint that supports the fiscal year 2010 presidential budget request, the administration committed to "set[ting] realistic requirements and stick[ing] to them and incorporat[ing] best practices" by not allowing programs to proceed from one stage of the acquisition cycle to the next until they have achieved the maturity to clearly lower the risk of cost growth and schedule slippage." If confirmed, what steps, if any, would you recommend to help ensure that the Department makes good on this commitment?

Mr. MABUS. We fully support the increased emphasis on upfront planning as specified in the 2008 changes made to DOD 5000.2 in the NDAA for Fiscal Year 2008. The defense-acquisition process needs improvement in the areas of systems engineering, developmental test and evaluation, technological maturity, and cost estimation, and that changes are needed to strengthen a culture of acquisition excellence in the DOD. We support the administration's commitment to making trade-offs among cost, schedule, and performance to significantly reduce cost growth in major defense acquisition programs. We will also ensure that requirements are defined and understood and that technologies are mature prior to entering system development, thus reducing risks to both cost and schedule.

ACQUISITION REFORM POLICY

12. Senator MCCAIN. Governor Mabus, what are your views regarding the need to reform the process by which the Navy acquires major weapons systems?

Mr. MABUS. We support the "Weapons Systems Acquisition Reform Act of 2009." We fully agree with an emphasis on sound cost estimation, systems engineering, and performance assessment upfront to establish a culture of acquisition excellence. These are all guiding principles that underpin our vision as an enterprise committed to getting timely, effective, and affordable solutions to our warfighters. A number of acquisition process changes have recently been initiated that will take some time to evaluate. However, we believe the emphasis on due diligence during both the requirements and technology development stages of any program should improve acquisition performance. We also intend to stress and enforce discipline of all established processes.

13. Senator MCCAIN. Governor Mabus, if confirmed, what steps, if any, would you recommend to improve the acquisition process?

Mr. MABUS. We are aware of the Department of Navy's two-pass/six-gate acquisition process and will personally review its effectiveness in supporting program execution and oversight. We need to put more emphasis in the acquisition process on solid cost estimation, risk tolerant schedules, and understanding where the technical risks are. We also will insist on realistic plans for mitigating those risks. Moreover, we both recognize and accept that when new technical problems are identified

we cannot hold cost and schedule constant. We believe the emphasis on due diligence during both the requirements and technology development stages of any program should improve acquisition performance. We also intend to stress and enforce discipline of all established processes.

In addition, the health of the defense and commercial industrial base are critical to our national security. We will support collaborative efforts between the government and industry in advancing the state-of-the-art in science and technology in both basic and applied research. We will also support technology development in all areas that have potential military utility for the warfighter, to deliver high performance weapons on target, more effectively, efficiently, and at reasonable cost to the taxpayer.

14. Senator MCCAIN. Governor Mabus, department-wide, nearly half of the DOD's 95 largest acquisition programs have exceeded the Nunn-McCurdy cost growth standards established in Section 2433 of Title 10, U.S. Code. The cost overruns on these major defense acquisition programs now total \$295 billion over the original program estimates, even though the Department has cut unit quantities and reduced performance expectations on many programs in an effort to hold costs down. Many of those programs are being executed by the Navy. What steps, if any and if confirmed, would you take to address the out-of-control cost growth on the Navy's major defense acquisition programs?

Mr. MABUS. We believe increased collaboration between industry and Government early in the program formulation stage will ensure there is a realistic balance. We must establish realistic baselines before entering into system development which can only be accomplished with a thorough understanding of warfighting requirements and the maturing of technologies early in the process. Overestimating performance leads us to proceeding with immature technologies while underestimating cost leads us to compressing development efforts. Together these dynamics lead us to taking on more risk, which often leads to cost increases and schedule delays.

We will continue the process initiated last year to rebuild the Department of the Navy Cost Estimating Enterprise which was based upon an analysis of gaps within the existing structure. This effort culminated with the release of an instruction which reestablished the Naval Center for Cost Analysis, enabled greater insight into the costs of Major Defense Acquisition programs, and focused efforts on rebuilding the Naval System Commands Cost Analysis centers. We will continue this effort to ensure the Department meets increased demands across all cost estimating functions including Earned Value Management, Operating and Support analysis, and greater investment cost rigor in the early life of the Department's acquisition programs. The DON Cost Estimating community is continuing to take steps to rebuild and rebalance the core cost estimating capabilities within the government to better establish realistic cost analysis.

15. Senator MCCAIN. Governor Mabus, what principles will guide your thinking on whether to recommend terminating a program that has experienced critical cost growth under Nunn-McCurdy?

Mr. MABUS. The principles that will guide our decisions will be the Nunn-McCurdy certifications as modified by the Weapons Systems Acquisition Reform Act of 2009 on whether:

- The root cause of the program's Nunn-McCurdy breach is properly identified, understood, and correctable;
- The program is essential to national security;
- No alternative will provide equal or greater capability at less cost;
- New program or unit cost estimates are reasonable; and
- Management structure for program is adequate to manage and control unit costs.

We will use these certifications to evaluate a program for any significant breach of its baseline and not just if it's a unit cost issue.

16. Senator MCCAIN. Governor Mabus, recent congressional and DOD initiatives have attempted to reduce technical and performance risks associated with developing and producing major defense acquisition programs, including ships, so as to minimize the need for cost-reimbursable contracts. Do you think that the Department should move towards more fixed price-type contracting in developing or procuring major defense acquisition programs? Why or why not?

Mr. MABUS. Yes. We are committed to a thorough analysis that ensures the right contract type at the right time that balances risk and ensures best value to the gov-

ernment. We fully support the DOD policy to examine the increased use of fixed-price type contracts in the procurement of major defense acquisition programs.

S.454, THE LEVIN-MCCAIN ACQUISITION REFORM BILL

17. Senator MCCAIN. Governor Mabus, recently, Chairman Levin and I sponsored acquisition reform legislation, titled: “Weapon Systems Acquisition Reform Act of 2009.” The legislation recognized that vital to reforming how we buy the biggest and most expensive weapons systems is to start them off right—by emphasizing sound systems engineering so that we can obtain reliable technological readiness assessments and independent cost estimates up front. The more we understand technology risk early and manage that risk, the less likely that such risk will present themselves later in the acquisition process and blow out costs. What is your assessment of that bill, and did we get anything wrong?

Mr. MABUS. We strongly support the spirit and intent of the “Weapons Systems Acquisition Reform Act of 2009.” We agree that the defense-acquisition process needs improvement in the areas of systems engineering, developmental test and evaluation, technological maturity, and cost estimation, and that changes are needed to strengthen a culture of acquisition excellence in the DOD. The Department of the Navy is committed to making trade-offs among cost, schedule, and performance to significantly reduce cost growth in major defense acquisition programs. The Department of the Navy (DON) is working closely with DOD to develop a common approach to implementing the requirements. DON is already involved with acquisition process improvements, such as implementing the two-pass/six-gate governance in 2008, and is committed and working diligently to implement required improvements that will require a longer term implementation cycle.

TACTICAL AVIATION

18. Senator MCCAIN. Governor Mabus, the Navy is facing a potential shortfall of strike fighter aircraft in the next decade even if the Navy continues to buy F/A-18E/F aircraft and F-35 JSF aircraft at the rate projected in last year’s budget. What is your assessment of this situation and what actions should the Navy take to address this potential shortfall?

Mr. MABUS. The Navy and Marine Corps share a common inventory of 623 legacy F/A-18 A-D aircraft. Navy and Marine Corps integrate F/A-18 A-C strike fighter squadrons into carrier air wings and Marine air groups under the charter of TACAIR Integration (TAI). There are four considerations to mitigate negative strike fighter inventory trends:

1. Maintain wholeness of the JSF program. Department strike fighter inventory projections are based on the following assumptions: the F-35B will reach Initial Operational Capability (IOC) in 2012 and F-35C will reach IOC in 2015; and that JSF will deliver at planned quantities/cost. Any program slips, major costs increases, or decreases to planned procurement quantities may exacerbate the DON strike fighter shortfall.

2. Extending the service life of F/A-18A-D Hornets. Over half of the Department of the Navy’s Hornets are beyond 6,000 flight hours, towards a currently approved 8,600 flight hour service life. Extending the service life of as many as 300 of these aircraft is an essential element to maintaining available DON strike fighter inventory through transition to JSF. Analysis is ongoing within the Department to refine cost estimates and the process for executing this service life extension.

3. Continued sustainment and support of currently fielded legacy aircraft (AV-8, EA-6B, F/A-18 A-D) through transition to JSF. These aircraft are the bulk of the Department’s current TACAIR inventory and require continuous support—including program related engineering and logistics—through the end of transition to JSF, currently envisioned to be out to 2023.

4. Additional investment in F/A-18E/F Block II Super Hornet procurement. In PB 2010, F/A-18E/Fs are budgeted for single year procurement in fiscal year 2010. Future procurements are being considered in the 2009 QDR.

The Department will re-assess force structure requirements and inventory investments this summer during the QDR.

19. Senator MCCAIN. Governor Mabus, in your view, should the Navy continue to operate the 10 carrier air wings that support the current fleet of 11 aircraft carriers,

or should the air wing force structure be modified to reflect a planned reduction to a permanent level of 10 aircraft carriers?

Mr. MABUS. The Navy remains committed to a force structure of 11 carriers and 10 air wings for the next several decades. However, between the decommissioning of USS *Enterprise* and the commissioning of USS *Ford*, the Navy requests to temporarily decrease its aircraft carrier fleet from 11 to 10 ships. During this 33 month period, the Navy will continue to require and utilize each of its 10 carrier air wings to meet its deployment schedule and to maintain its ability to respond to emergent operational requirements.

20. Senator MCCAIN. Governor Mabus, alternatives for maintaining sufficient strike assets are limited if there are new schedule difficulties with the JSF program. It appears that the Navy's options for extending the service life of existing F/A-18 aircraft are limited and procurement of additional F/A-18 aircraft beyond those planned last year may be more difficult with the Secretary of Defense's recent announcement of a reduction of nine F/A-18 aircraft from the number originally planned for the fiscal year 2010 program. What other potential alternatives do you see for maintaining sufficient strike assets if there were any additional slippage in the initial operating capability date for the F-35 JSF?

Mr. MABUS. The Department of the Navy is closely monitoring the JSF program. JSF is currently scheduled for an F-35B IOC of 2012 and an F-35C IOC of 2015. The Department is refining cost estimates and process for extending the service life for as many as 300 legacy F/A-18 A-D aircraft from 8,600 flight hours to 10,000 flight hours through, a service life extension program—service life extension is completely within engineering feasibility for this number of aircraft.

Maintaining JSF wholeness, continued support of legacy aircraft, Service Life Extension Program (SLEP) of F/A-18 A-D and continued procurement of F/A-18E/F are options being pursued to provide the strike fighter inventory necessary to support the Department of the Navy's force structure requirements.

The Navy is procuring F/A-18E/F Super Hornets in fiscal year 2010 via a single year procurement in PB 2010. The Department will continue to assess its TACAIR force structure and inventory requirements through this summer's QDR.

21. Senator MCCAIN. Governor Mabus, is it a viable solution to consider purchasing additional F/A-18 Super Hornets, the only new strike fighter aircraft in production? If not, how will the Navy expect to solve this shortfall?

Mr. MABUS. Maintaining Joint Strike Fighter wholeness, continued support of legacy aircraft, SLEP of F/A-18 A-D and continued procurement of F/A-18E/F are options to provide the strike fighter inventory necessary to support the Department of the Navy's force structure requirements.

The Navy is procuring F/A-18E/F Super Hornets in fiscal year 2010 via a single year procurement in PB10. The Department will continue to assess its TACAIR force structure and inventory requirements through this summer's QDR.

F-35 JOINT STRIKE FIGHTER PROGRAM

22. Senator MCCAIN. Governor Mabus, the Services are planning on purchasing approximately 2,450 JSFs at a cost of over \$300 billion, a sum that reflects a cost growth of nearly 47 percent beyond original 2002 estimates. Recently, the Government Accountability Office issued a report on the JSF program that was critical of its past cost overruns and schedule slips, and predicted that development will cost more and take longer than what has been reported to Congress. In November 2008, a Pentagon Joint Estimating Team reportedly said the JSF program would require an additional 2 years of testing and would need another \$15 billion to cover new development costs.

If the F-35 program costs continue to significantly increase and the F-35 development does not go as well as promised—draining resources from other priority programs that are needed by the Navy—what actions would you recommend the Department take to remedy strike-fighter shortfalls and preserve its limited procurement base?

Mr. MABUS. The Department of the Navy believes that JSF development and technology risk are manageable. The JSF Team closely monitors all risks and provides program-wide schedule and technology risk analysis in conjunction with periodic Defense Acquisition Board reviews. The timing of these reviews will ensure the analysis is available to support key acquisition milestone decisions and budget discussions.

The Navy and Marine Corps share a common inventory of 623 legacy F/A-18 A-D aircraft. Navy and Marine Corps integrate F/A-18 A-C strike fighter squadrons into carrier air wings and Marine air groups under the charter of TACAIR Integration (TAI). There are four considerations to mitigate negative strike fighter inventory trends:

1. Maintain wholeness of the JSF program. Department strike fighter inventory projections consider that F-35B will IOC in 2012 and F-35C will IOC in 2015, and that JSF will deliver at planned quantities, as a foundation. The Department needs JSF to deliver planned quantities at a delivery rate that supports these planned initial operational capability dates. Any further slips or decreases to planned procurement quantities further exacerbates future DON strike fighter inventory issues.
2. Extending the service life of F/A-18 A-D Hornets. Over half of the DON Hornets are beyond 6,000 flight hours, towards a currently approved 8,600 flight hour service life. Extending the service life of as many as 300 of these aircraft is an essential element to maintaining available DON strike fighter inventory through transition to JSF. Analysis is ongoing within the Department to refine cost estimates and the process for executing this service life extension.
3. Continued sustainment and support of currently fielded legacy aircraft (AV-8, EA-6B, F/A-18 A-D) through transition to JSF. These aircraft are the bulk of the Department's current TACAIR inventory and require continuous support—including program related engineering and logistics—through the end of transition to JSF, currently envisioned to be out to 2023.
4. Additional investment in F/A-18E/F Block II Super Hornet procurement. In PB 10, F/A-18E/F are budgeted for single year procurement in fiscal year 2010.

The Department of the Navy will continue to guide JSF development and update assessments of costs and scheduled deliveries to the fleet. We will monitor F/A-18 A-D flight hours flown and update cost estimates for needed life extensions and sustainment. Procurement of additional F/A-18 E/F Super Hornets will continue to be a viable alternative in the near term. All these factors will be taken into account when the Department determines how best to satisfy the strike fighter force structure needs established in the QDR.

SHIPBUILDING PLAN

23. Senator MCCAIN. Governor Mabus, the most recent Navy 30-year shipbuilding plan included arguably over-optimistic assumptions about the unit costs of ships and excluded any funding for a replacement for the current fleet of Trident ballistic missile submarines. Do you agree that the 30-year shipbuilding plan should reflect realistic cost estimates and include all important shipbuilding efforts for that document to be useful for decisionmakers?

Mr. MABUS. The 30-year shipbuilding plan, as submitted to Congress, reflects the best estimates for the ships included in the plan. The near-term section of the future plan reflects cost estimates that are predicted, in most cases, on existing production lines for ships either currently being procured or very near the completion of contract negotiations for their procurement. The period covered by about 10-20 years in the future, largely includes what we expect to be the economic conditions that the shipbuilding industry will face and this too is based on our best understanding of the labor rates and material cost escalation that this industry will incur. The period beyond about 20 years, out to the end of the report, is a planning range and the costs included in this part of the report reflect those costs that the Navy believes to be affordable for the ship types that will be procured in the period. Since there are essentially no designs to use as a basis for the cost models, we believe that projecting an affordable cost for these ships is the appropriate metric to use. This introduces discipline in the expectations for what these ships should be able to do since it is unlikely that there would be infinite resources available for their procurement.

A majority of the ships in the 30-year shipbuilding plan have not yet been designed and therefore cost must be based on the best estimate of what the new ship will be including new technology, and appropriate hull size and propulsion system. As more accurate cost estimates are determined in future ship development, the Navy will adjust the average annual investment objective or revisit individual ship and/or force warfighting requirements as appropriate. Navy's goal in producing the shipbuilding plan is always to provide a balanced capability, with acceptable levels of risk that provides stable industry demand at reasonable cost.

In addition to the National Security Strategy, the statutory guidelines required the report to reflect the QDR. The latest QDR is ongoing in parallel with the National Security Strategy work. Also, the Nuclear Posture Review, which has direct bearing on the numbers of strategic ballistic missile submarines, is due for completion incident with submission of the fiscal year 2011 budget. In addition, a Ballistic Missile Defense Review is ongoing and is also due for completion with the fiscal year 2011 budget. These efforts will likely have a substantive impact on the Navy's force structure requirements.

24. Senator MCCAIN. Governor Mabus, in your view, what level of funding will the Navy need to execute its 30-year shipbuilding plan, and considering competing priorities, do you believe this level of funding is realistic?

Mr. MABUS. As the National Security Strategy is due for release this summer, the Navy considers it prudent to defer its fiscal year 2010 report and submit its next report concurrent with the President's fiscal year 2011 budget.

In addition to the National Security Strategy, the statutory guidelines required the report to reflect the QDR. The latest QDR is ongoing in parallel with the National Security Strategy work. Also, the Nuclear Posture Review, which has direct bearing on the numbers of strategic ballistic missile submarines, is due for completion incident with submission of the fiscal year 2011 budget. In addition, a Ballistic Missile Defense Review is ongoing and is also due for completion with the fiscal year 2011 budget. These efforts will likely have a substantive impact on the Navy's force structure requirements.

The President's budget submission for fiscal year 2010 represents the best overall balance between procurement for future ship and aircraft capability with the resources necessary to meet operational requirements and affordability.

AIRCRAFT CARRIERS

25. Senator MCCAIN. Governor Mabus, under his recently announced budget plan, the Secretary of Defense proposed that only 10 aircraft carriers be operational. But, we may need 11: the slip in the delivery of the CVN 78 (USS *Gerald R. Ford*) to 2015 created a 2-year gap between the scheduled decommissioning of the USS *Enterprise* and the availability of a new aircraft carrier. That gap could be longer because of technical difficulties with that carrier's electromagnetic aircraft launch system (EMALS). What is your view of the plan that Secretary Gates announced to permanently change the aircraft carrier force structure to 10 from the current number of 11?

Mr. MABUS. The Navy is currently committed to an 11 carrier force structure for the next several decades, and this commitment was supported by Secretary Gates during his April budget announcement. However, as you have pointed out, the Navy requires temporary legislation to operate with 10 carriers during the period between inactivation of USS *Enterprise* (CVN 65) in November 2012 and the delivery of *Gerald R. Ford* (CVN 78) in September 2015. Navy assesses it can meet operational commitments during this approximately 33-month gap by adjusting both carrier and air wing maintenance and operational schedules. The carrier force structure, along with the entire battleforce, is being considered in the QDR. EMALS development is currently on track to meet the planned delivery of CVN 78 in September 2015.

26. Senator MCCAIN. Governor Mabus, in your view, should DOD retire another aircraft carrier when the USS *Gerald R. Ford* is delivered to keep the carrier force structure at 10 carriers?

Mr. MABUS. The Navy has no current plans to retire an aircraft carrier upon delivery of USS *Gerald R. Ford* (CVN 78). The Navy is currently committed to an 11 carrier force structure for the next several decades, and this commitment was supported by Secretary Gates during his April budget announcement. However, as you have pointed out, the Navy requires temporary legislation to operate with 10 carriers during the period between inactivation of USS *Enterprise* (CVN 65) in November 2012 and the delivery of *Gerald R. Ford* (CVN 78) in September 2015. Navy assesses it can meet operational commitments during this approximately 33-month gap by adjusting both carrier and air wing maintenance and operational schedules. The carrier force structure, along with the entire battleforce, is being considered in the QDR.

27. Senator MCCAIN. Governor Mabus, do you believe that the requirements of the combatant commanders for an aircraft carrier presence be met with only 10 operational aircraft carriers?

Mr. MABUS. The Navy can sustain current combatant command (COCOM) demand for carrier presence with 10 operational aircraft carriers for a relatively short and defined period of time with moderate risks by leveraging the inherent flexibility of the Fleet Response Plan. Navy will continue to evaluate projected COCOM demand and use the QDR and other strategic planning processes to match carrier force structure to projected demand; this requirement will be based on fiscal and operational risk.

SUBMARINE STRATEGIC WEAPONS PROGRAMS COST REIMBURSABLE CONTRACTS

28. Senator MCCAIN. Governor Mabus, for over 30 years the Navy has manufactured and sustained its Trident submarine and other related weapon systems under a cost-reimbursable contract. This is unacceptable to me. After a 30-year procurement history, costs and design are (or should be) stable and enough is (or should be) known, about technology risk associated with those programs so that the Navy should be contracting here on a fixed-price—not cost-reimbursable—basis. However, the Navy's Strategic Weapons Programs (SSP), which manufactures and sustains logistical support for nuclear submarines, continues to award—inappropriately, in my view—multi-hundred million-dollar cost-plus contracts for, among other things, the production of the D-5 Trident Missile System. Why is there this anomaly with the Navy's submarine programs?

Mr. MABUS. As the Fleet Ballistic Missile Program has matured over the last four decades, SSP has developed and implemented an acquisition strategy that maintains a primary focus on safety and reliability, while managing cost risk at or below budget. Because of the strategic importance of the system, any deviation from this successful acquisition strategy could engender unnecessary unintended consequences, and jeopardize the safety and reliability of the weapon. At inception, during concept formulation and advanced development, Cost Plus Fixed Fee contracts were used, placing maximum cost risk on the Government, due to the overall program uncertainty and rapidly changing requirements. As the program matured into full scale development, the contract type moved along a continuum to Cost Plus Incentive Fee with a conservative share ratio of 90/10 or 80/20. Eventually, as the requirements stabilized the share ratio was increased to 70/30 for initial production activities and 50/50 for mature production efforts.

SSP has committed to transition the mature full-rate production effort for TRIDENT II D5 Subsystems to fixed-price contract beginning in fiscal year 2011. We anticipate that this will result in approximately 50 percent of all contracted dollars being fixed price. SSP is developing the transition plan for mature full rate production items including the appropriate contractual and acquisition reviews to support completion by 2011. As always, we will continue to monitor and manage technical risk throughout this transition and make any adjustments that are deemed necessary to ensure we maintain the program's preeminent responsibility for safety and reliability.

29. Senator MCCAIN. Governor Mabus, will you look into this contracting folly and ensure me that the Navy will begin awarding contracts on this submarine program and other SSPs under fixed price-type contracts, where appropriate?

Mr. MABUS. SSP has committed to transition the mature full-rate production effort for TRIDENT II D5 Subsystems to fixed price contract beginning in fiscal year 2011. We anticipate that will result in approximately 50 percent of all contracted dollars being fixed price. SSP is developing the transition plan for mature full rate production items including the appropriate contractual and acquisition reviews to support completion by 2011. As always, we will continue to monitor and manage technical risk throughout this transition and make any adjustments that are deemed necessary to ensure we maintain the program's preeminent responsibility for safety and reliability.

QUESTIONS SUBMITTED BY SENATOR JOHN THUNE

STRATEGIC DISPERSAL OF THE NUCLEAR CARRIER FLEET

30. Senator THUNE. Governor Mabus, the Navy has undergone and completed a Final Environmental Impact Statement. The Secretary of the Navy, in consultation with the Chief of Naval Operations, signed a Record of Decision to develop a second nuclear-carrier homeport on the East Coast on January 14, 2009, and determined that it is in the best national security interest of the Nation to homeport a nuclear powered aircraft carrier at Naval Station Mayport. During your Senate Armed Serv-

ices Committee hearing on April 28, 2009, understanding the sensitivities surrounding this matter, I asked you what you thought of strategically dispersing our carrier fleet on the east coast and whether or not you agreed with the Navy's requirement to make Mayport nuclear ready and continue the long-term practice of strategic dispersal. At the time, you answered that you understood the issue and that it was to be made part of the QDR but that you did not have enough information to provide an answer as to how you felt about the Navy's requirement. This was the culmination of 2½ years of effort to ensure compliance with environmental regulations as well as strategic needs. What is your view of strategic dispersal?

Mr. MABUS. I have an appreciation of the long history and importance of strategic dispersal for the Navy. I believe that strategic dispersal will play an important role in global posture discussions during the upcoming QDR.

31. Senator THUNE. Governor Mabus, do you understand its importance to the Navy?

Mr. MABUS. I have an appreciation of the long history and importance of strategic dispersal for the Navy. I believe that strategic dispersal will play an important role in global posture discussions during the upcoming QDR.

32. Senator THUNE. Governor Mabus, how do you view this Navy requirement based on the information you have?

Mr. MABUS. I have an appreciation of the long history and importance of strategic dispersal for the Navy. I believe that strategic dispersal will play an important role in global posture discussions during the upcoming QDR.

33. Senator THUNE. Governor Mabus, what weight will you attribute the recommendations of senior uniformed leaders of the Navy?

Mr. MABUS. Our senior uniformed leaders have significant experience and are well respected. If confirmed, I will vigorously seek their opinions on all matters associated with the manning, training and equipping of our Naval Forces.

34. Senator THUNE. Governor Mabus, do you believe it is important to proceed with planning and design of the nuclear maintenance facility at Naval Station Mayport?

Mr. MABUS. It is my understanding that additional decisions beyond the recommended dredging and pier maintenance at NS Mayport will be made during the upcoming QDR. I do not have enough information on the planning and design of a nuclear maintenance facility at NS Mayport to answer this question, but if confirmed, I intend to look at this issue and actively participate in the QDR.

QUESTIONS SUBMITTED BY SENATOR SUSAN COLLINS

NAVAL FLEET REQUIREMENTS

35. Senator COLLINS. Governor Mabus, I appreciated the opportunity to discuss with you the impressive contributions that the State of Maine has made to our Navy through the Portsmouth Naval Shipyard (PNSY) in Kittery, Bath Iron Works (BIW) in Bath, and the Brunswick Naval Air Station in Brunswick, as well as several other defense contractors. These contributions from PNSY and BIW depend on a sufficient and steady workload to maintain the skilled workforce critical to preserving the defense industrial base. You have seen first-hand in Mississippi how difficult it is for a shipyard to recover when it loses skilled workers. Could you comment on what actions you will take to ensure a strong industrial base for building surface combatants, constructing, overhauling, and modernizing submarines, and otherwise ensuring that the Navy has a fleet that meets its requirements?

Mr. MABUS. The Department recognizes that low levels of shipbuilding activity introduce challenges and inefficiencies at shipyards. The Navy has developed a long term shipbuilding procurement plan that provides the foundation for future planning within the shipbuilding industry. The Navy continues to work with Congress to enact this strategy and where appropriate, have proposed multiyear procurements which provide further stability and result in cost savings. Reducing volatility, through multiyear procurements and a stable shipbuilding procurement profile, enables industry leaders to make informed decisions regarding current operations, employment, infrastructure, and future capital investments.

BALLISTIC MISSILE THREATS

36. Senator COLLINS. Governor Mabus, ballistic missiles in the hands of rogue states or non-state actors present a serious security threat to this country. North Korea's recent missile launch coupled with Iran's ballistic missile inventory and continued efforts to seek a nuclear capability reinforce the need to maintain a robust and layered missile defense capability. Aegis cruisers and destroyers provide a critical element to that capability from the sea. Secretary Gates has proposed adding missile defense capabilities to six Aegis ships next year, and plans to spend an additional \$700 million on the SM-3 missile and other missile defense systems. What do you see as the future role of front-line surface combatants in defending our forces and our Homeland from potential threats posed by ballistic missiles?

Mr. MABUS. Navy cruisers and destroyers are multi-mission platforms which perform a variety of missions, including but not limited to: anti-air, anti-submarine, anti-surface, and Ballistic Missile Defense (BMD). Aegis BMD contributes to homeland defense through long range surveillance and tracking and Aegis BMD-capable ships can conduct both midcourse and terminal engagements of short and medium range ballistic missiles in support of regional and theater defense. While our current fleet has no capability against the longer range intermediate and ICBM threats, the development of future Aegis baselines and Standard Missile (SM-3) will address these capabilities within the next 10 years.

BMD is a core Navy mission directly contributing to our overarching missions of deterrence, power projection and sea control. Today, Navy Aegis BMD capability is currently installed on 18 ships: three guided missile cruisers and 15 guided missile destroyers. Additionally, we are in the process of outfitting three more East Coast ships with BMD capability, increasing our numbers to 21 BMD capable ships. Aegis Modernization plan, beginning in 2012, will over two decades outfit Aegis Destroyers and 15 of 22 Aegis Cruisers with BMD capability providing combatant commanders an in-stride BMD capability with regularly deploying surface combatants.

Maritime ballistic missile defense will enhance deterrence by providing an umbrella of protection to forward-deployed forces, friends and allies, while contributing to the larger architecture planned for defense of the United States. This is particularly important in light of the rapidly evolving and proliferating ballistic and advanced cruise missile threat.

In addition, our partners and allies, principally Japan, have an increasingly important role in theater and regional defense as they gain their own capability. Through cooperative programs and partnerships with our allies, their BMD capable assets will provide an added "layer" of protection against the growing threat of ballistic missiles.

SURFACE SHIP STRUCTURE PLANS

37. Senator COLLINS. Governor Mabus, despite economic recessions, both China and Russia are increasing defense spending in an effort to modernize and transform their militaries. China has indicated its intent to construct its first aircraft carrier, and continues to develop anti-ship missiles and quieter and more capable submarines. Media reports indicate Russia's nearly 26 percent increase in defense spending this year will go toward transforming its military into a more effective fighting force. What are your views on our surface ship structure plan?

Mr. MABUS. The ongoing QDR, NPR, BMD Review, and Space Review currently in progress, will determine the shape of the Navy's future. While the demands placed on the Navy for forces by the combatant commanders and by our Presence, security cooperation and humanitarian assistance missions continue to be significant; we have been largely able to meet these demands with the force we have in commission today. The 313 force construct is both a total inventory of ships and a specific mix of ships in that total and is focused on the threats that were envisioned for the 2020 timeframe.

Since completing the Force Structure Assessment that led to the 313 requirement, myriad changes have been realized in the strategic security environment around the globe. There has been a burgeoning proliferation of advanced cruise missiles, submarine technology is getting ever more difficult to counter and ballistic missile capabilities are becoming more precise and lethal. All of these challenges have required us to continually reassess the capability of the ships we are designing, the capacity of the ships we are procuring and the effectiveness of the ships we have in our current inventory. While there are always improvements that could be made in any of these areas to reduce the overall risk to the force today, as well as in the future, we believe the ships we are buying and those we continue to modernize in our existing inventory are up to the task of meeting the Navy's missions in the foreseeable

future. Should the Security Strategy change or the QDR shift our priorities and responsibilities, any changes required to our plans will be included in our next budget submission and long-range shipbuilding plan.

[The nomination reference of Hon. Raymond E. Mabus, Jr., follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 20, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Raymond Edwin Mabus, Jr., of Mississippi, to be Secretary of the Navy, vice Donald C. Winter.

[The biographical sketch of Raymond E. Mabus, Jr., which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF RAYMOND E. MABUS, JR.

Ray Mabus is a native of Ackerman, MS, and received a Bachelor's Degree from the University of Mississippi, a Master's Degree from Johns Hopkins University, and a Law Degree from Harvard Law School. He served as Governor of Mississippi (1988–1992), Ambassador to the Kingdom of Saudi Arabia (1994–1996), and as Chairman and Chief Executive Officer (CEO) of Foamex (2006–2007), a large manufacturing company. As the youngest Governor of Mississippi in more than 100 years at the time of his election, Governor Mabus stressed education and job creation. He passed B.E.S.T. (Better Education for Success Tomorrow), one of the most comprehensive education reform programs in America, and was named one of Fortune Magazine's top 10 education governors.

During his tenure as Ambassador, a crisis with Iraq was successfully averted and Saudi Arabia officially abandoned the boycott of United States businesses that trade with Israel. He was chosen CEO of Foamex to help lead the company out of bankruptcy and less than 9 months after his appointment; Foamex successfully emerged from Chapter 11. Governor Mabus has been awarded the U.S. Department of Defense Distinguished Public Service Award, the U.S. Army's Distinguished Civilian Service Award, the Martin Luther King Social Responsibility Award from the King Center in Atlanta, the National Wildlife Federation Conservation Achievement Award, the King Abdul Aziz Award from the Kingdom of Saudi Arabia, and the Mississippi Association of Educators' Friend of Education Award.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate, and certain senior military officers as determined by the committee, to complete a form that details the biographical, financial and other information of the nominee. The form executed by Raymond E. Mabus, Jr., in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Raymond Edwin Mabus, Jr.
2. **Position to which nominated:**
Secretary of the Navy.
3. **Date of nomination:**
April 20, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
October 11, 1948; Starkville, MS.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Lynne Marie Horecky (Maiden Name).
7. **Names and ages of children:**
Elisabeth Hamilton Mabus, 18; Anne Gates Mabus, 16; Kate Elizabeth Musgrove, 8 (stepdaughter).
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Ackerman High School, Ackerman, MS, 1962-1966, High School Diploma, 1966.
University of Mississippi, 1966-1969, Bachelor of Arts, 1969.
The Johns Hopkins University, 1969-1970, Master of Arts, 1971.
Harvard Law School, 1972-1976, Juris Doctorate, 1976.
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
Board Member, Wincup, Inc., Stone Mountain, GA, 01/08-12/08.
Board Member, Hines Horticulture, Chicago, IL, 07/07-01/09.
Board Member, Enersys, Inc., Reading, PA, 08/07-present.
Board Member, (09/00-04/07), Chairman (04/04-04/07), CEO (06/06-04/07), Foamex International, Media, PA.
Board Member, Strategic Partnerships, Alexandria, VA, 05/03-present.
President and Board member, Frontline Global Resources, Alexandria, VA, 04/00-05/03.
Board Member, International Management and Development, Alexandria, VA, 07/96-04/00
Board Member, Fusion Telecommunications, New York, NY, 04/99-present
Board Member, Eggs Overnight, Stone Mountain, GA, 06/08-present
Board Member, Citizens International, Alexandria, VA, 07/00-present
Board Member, Thomas Engine, Boulder, CO, 04/04-08/07
Board Member, Kröll, Inc., New York, NY, 10/96-02/05
Board Member, Friede Goldman, Halter, Jackson, MS, 10/96-05/01

Consultant, Sikorsky, Stratford, CT, 03/00–01/02.
 Consultant, Raytheon, Waltham, MA, 10/96–01/00.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Law Clerk for John Godbold, U.S. Court of Appeals, 5th Circuit Court, Montgomery, AL (1976–1977).

Legal Counsel, Cotton Subcommittee, House Committee on Agriculture (1977–1978).

Legal Counsel to the Governor of Mississippi (1980–1983).

Mississippi State Auditor General (1984–1988).

Governor of Mississippi (1988–1992).

Ambassador to the Kingdom of Saudi Arabia (1994–1996).

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Board Member, Enersys, Inc.

Board Member, Strategic Partnerships.

Board Member, Fusion Telecommunications.

Board Member, Eggs Overnight.

Managing Member, REM Strategies.

Board Member, Citizens International.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Board Member, RAND Center for Middle East Public Policy.

Board Member and Treasurer, AMIDEAST.

Member, Council on Foreign Relations.

Board Member and Founder, Help and Hope Foundation.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

Governor of Mississippi

State Auditor of Mississippi

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Senior Advisor, Obama for America.

Foreign Policy Advisor, John Kerry for President.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

John Kerry for President	2004	\$2,000.00
Gene McGee Mayoral Campaign	2005	\$200.00
Senator Tom Daschle	2004	\$1,000.00
Friends to Re-elect Bill Waller, Jr.	2005	\$100.00
Florida Victory 2004 Federal Account	2004	\$1,000.00
Friends of Harvey Johnson	2005	\$400.00
MS Democratic Committee	2007	\$75.00
Citizens for McLemore	2005	\$100.00
Jessie Banks Campaign	2003	\$100.00
Tom Carper for Senate	2004	\$200.00
Taylor for One Georgia	2006	\$400.00
Chet Culver Committee	2006	\$450.00
Jack Carter for Senate	2006	\$300.00
Tom Reilly for Massachusetts	2006	\$500.00
Hob Bryan Campaign Committee	2003	\$100.00
Friends of Bennie Thompson	2008	\$900.00
Committee to Re-elect David Chandler	2005	\$100.00
Cecil Brown Campaign	2007	\$800.00
Deval Patrick Committee	2006	\$250.00
Suzanne Saunders for Madison County Judge	2006	\$200.00
Steve Wade Senate Campaign	2007	\$100.00
Friends of Hiram Eastland	2007	\$250.00
MS Democratic Party	2007/8	\$1,350.00
Senator Willie Simmons	2007	\$250.00
Billy McCoy Campaign	2007	\$150.00
Friends of John Horne	2007	\$100.00
David Blount for Senate	2007	\$1,000.00
Eaves for Governor	2007	\$500.00
Mark Pryor for US Senate	2008	\$200.00
Obama for America	2007	\$2,300.00
VPAC	2007	\$500.00
Gary Anderson Campaign Fund	2007	\$500.00
Eric Clark Campaign Fund	2003	\$100.00
John Ditto for City Council	2005	\$100.00
Jamie Franks for Lt. Gov.	2007	\$300.00
Friends of Rickey Cole	2007	\$150.00

Committee to Re-elect Cono Caranna	2007	\$100.00
Eaves Fundraiser (In-Kind)	2007	\$1,006.00
Jim Hood for MS Attorney General	2007	\$250.00
Rob Smith for Secretary of State	2007	\$200.00
Childers for Congress	2008	\$350.00
DSCC	2008	\$200.00

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Department of Defense Distinguished Public Service Award
 Department of the Army Distinguished Civilian Service Award
 Martin Luther King, Jr., Social Responsibility Award by the
 King Center in Atlanta, GA.
 King Abdul Aziz Award, Kingdom of Saudi Arabia
 International Security Leadership Award of National Security Council Foundation
 Jackson, MS Clarion Ledger, Best Governor of the 20th Century Reader Poll
 Award
 Fortune Magazine "Top Ten Education Governors"

National Wildlife Federation's Conservation Achievement Award
Mississippi Association of Educators' "Friend of Education" Award

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Yale Journal of Biology and Medicine, "Medicine in Mississippi" 1992.

Technological Horizons In Education Journal, "A New Light in Education: Mississippi 2000" 1991.

"Light on the Land: Photographs of the World by Ray Mabus" Blurb Online Publishers 2008.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

RAY MABUS.

This 27th day of April, 2009.

[The nomination of Raymond E. Mabus, Jr., was reported to the Senate by Chairman Levin on May 14, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on May 18, 2009.]

[Prepared questions submitted to Robert O. Work by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the services and the combatant commanders in the strategic planning process, in the development of requirements, in joint training and education, and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions based on your experience with the Department of Defense (DOD)?

Answer. I believe the act has yielded enormous benefits to DOD such as strengthened joint operational commanders and better military advice to the President. I do not, at this time, see a need for modifications to Goldwater-Nichols. However, if confirmed, my subsequent experience as the Under Secretary of the Navy could potentially suggest further needed changes. Should that be the case, I would identify recommended changes to the Secretary of the Navy.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I am aware of no modifications at this time.

Question. Do you believe that the role of the Service Secretaries under the Goldwater-Nichols legislation is appropriate and the policies and processes in existence allow that role to be fulfilled?

Answer. Yes.

Question. Do you see a need for any change in those roles, with regard to the resource allocation process or otherwise?

Answer. I do not see a need for any changes to the roles of the Service Secretaries at this time. However, if confirmed, my subsequent experience as the Under Secretary of the Navy could potentially suggest further needed changes. Should that be the case, I would identify recommended changes to the Secretary of the Navy.

DUTIES

Question. Section 5015 of title 10, U.S.C., states the Under Secretary of the Navy shall perform such duties and exercise such powers as the Secretary of the Navy may prescribe.

Assuming you are confirmed, what duties and powers do you expect to be assigned to you?

Answer. The Under Secretary of the Navy performs such duties and exercises such powers as the Secretary of the Navy prescribes. If confirmed, I will review the duties assigned to the Under Secretary in the current SECNAVINST 5430.7P, and discuss them with the Secretary of the Navy. I will then determine the manner in which the Secretary desires me to function. I expect that the Secretary will assign me duties that are consistent with my background and expertise.

RELATIONSHIPS

Question. Please describe your understanding of the relationship of the Under Secretary of the Navy to the following officials:

The Secretary of the Navy.

Answer. The Under Secretary of the Navy is the deputy and principal assistant to the Secretary of the Navy, and acts with full authority of the Secretary of the Navy in managing the Department of the Navy. The Under Secretary and Secretary of the Navy should have a close, personal relationship based on trust and mutual respect.

Question. The Chief of Naval Operations.

Answer. The Under Secretary deals directly with the CNO in all Departmental leadership meetings and when acting in the Secretary's stead. The Under Secretary of the Navy works most closely with the Vice Chief of Naval Operations. Both of these relationships are very important to the day-to-day running of the Department of the Navy (DON), and should be based on mutual respect, trust, and cooperation.

Question. The Commandant of the Marine Corps.

Answer. The Under Secretary deals directly with the Commandant of the Marine Corps in all Departmental leadership meetings and when acting in the Secretary's stead. The Under Secretary of the Navy works most closely with the Assistant Commandant of the Marine Corps. Both of these relationships are very important to the day-to-day running of the DON, and should be based on mutual respect, trust, and cooperation.

Question. The Assistant Secretaries of the Navy.

Answer. Under any circumstances, the relationship between the Under Secretary and the Assistant Secretaries is a close one. The exact working relationship will be determined by the management style of the Secretary of the Navy, and the duties he delegates to the Under Secretary.

Question. The General Counsel of the Navy.

Answer. If confirmed, the Under Secretary will deal closely with the GC on staff matters on a variety of issues, such as base encroachment and marine mammals.

Question. The Vice Chief of Naval Operations.

Answer. The Under Secretary of the Navy works very closely with the Vice Chief of Naval Operations and the Assistant Commandant of the Marine Corps. The three ensure the smooth staffing of issues through the Department and Secretariat, work together to ensure a close working relationship between the service staffs, and resolve disagreements. This relationship is very important to the day-to-day running of the DON, and should be based on respect, trust, and cooperation.

Question. The Judge Advocate General of the Navy.

Answer. If confirmed, I believe I will deal with the Navy JAG primarily through the General Counsel.

Question. The Chief Management Officer (CMO) and Deputy Chief Management Officer of the DOD.

Answer. The Under Secretary of the Navy is designated the CMO for the DON. If confirmed, I will deal directly with the Deputy Secretary of Defense (DOD CMO) and the DOD DCMO on the full range of matters dealing with the management of the DOD, and will assist in the development of a comprehensive Departmental transformation plan and business systems architecture, and help to identify and implement potential business process improvements.

Question. The Director of the Navy's Office of Business Transformation.

Answer. The Director of the Navy's Office of Business Transformation is currently designated as the DON DCMO. If confirmed, I would work closely with the DCMO to determine needed changes to Departmental transformation plan, business systems architecture, and to identify needed business process improvements.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the next Under Secretary of the Navy?

Answer. The Department of the Navy has operated without an Under Secretary of the Navy for over 2 years. If confirmed, one major challenge will be to re-integrate the office of the Under Secretary into the day-to-day activities of the DON, and to provide value added support to the Secretary of the Navy in tackling the challenges discussed below.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, there are an enormous number of challenges facing the DON. First is to help the Secretary of the Navy plan and execute a smooth leadership transition from the outgoing administration to the new one. To that end, I would work closely with the White House, Secretary of Defense and Secretary of the Navy to assemble a top-quality cadre of civilian leaders with the expertise and experience to effectively perform the duties of the key positions that must be filled. The second challenge is to participate in the 2009 Quadrennial Defense Review (QDR) and to ensure that the DON's fiscal year 2011 budget is consistent with the President's, SecDef's, and Secretary of the Navy's priorities, and outlines a program consistent with expected future resource allocations. A third challenge will be to perform an active reform agenda for the management of the DON. If confirmed, I would devote a considerable portion of my time to improve DON processes for strategic planning, program and budget development, and acquisition oversight. Improving the Department's record on cost control and improving its budget and cost forecasts would also be a top priority. Finally, and of utmost importance, I would work to try to make the DON's Safe Harbor and Wounded Warrior Regiment programs the standard for excellence within the DOD.

Question. What do you consider to be the most serious problems in the performance of the functions of the Under Secretary of the Navy?

Answer. The Department of the Navy has operated without an Under Secretary of the Navy for over 2 years. If confirmed, it will take some time to reassert the duties and responsibilities of the Under Secretary.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. If confirmed, my first priority would be to set up a well run office of the Under Secretary and to establish new staffing procedures. If confirmed, this should be done within the first 30 days of assuming the position. All other actions, priorities, and established timelines would be developed after close consultation with the incoming Secretary of the Navy.

PRIORITIES

Question. If confirmed, what broad priorities will you establish?

Answer. If confirmed, I will support the Secretary of the Navy in his efforts to articulate the challenges the Department must address to meet the principle objectives Secretary Gates has articulated:

- "Reaffirm our commitment to All-Volunteer Force"
- "Rebalance programs in order to institutionalize and enhance our capabilities to fight the wars we are in today and the scenarios we are most likely to face in the years ahead, while at the same time providing a hedge against other risks and contingencies."
- "In order to do all this, we must reform how and what we buy, meaning a fundamental overhaul of our approach to procurement, acquisition and contracting."

If confirmed, I will support the Secretary of the Navy's efforts to initiate or reinforce existing direction aimed at meeting these challenges, including:

- Sustain a cadre of officers and enlisted personnel, and supporting civil service that is technically competent and culturally adept. Maintain a capable and diverse workforce.
- Focus appropriate resources in support of the current fight, readiness, homeland defense, etc.
- Develop a portfolio of capabilities to cover all realistic scenarios to fight and win our Nation's wars which includes a blend of capabilities in Cooperative Security, Irregular Warfare and Conventional Warfare.
- Establish and maintain a long-term shipbuilding program that is achievable, affordable, and responsive to the needs of the Nation.
- Reaffirm the ethical basis of the naval institution; ensure the highest standards of conduct that exemplify the Department's core values of honor, courage, and commitment.
- Firmly embrace my role as CMO to align and improve business processes to enable the most effective and efficient delivery of all missions and capabilities.

DUTIES AND RESPONSIBILITIES AS CHIEF MANAGEMENT OFFICER

Question. Section 904 of the National Defense Authorization Act (NDAA) for Fiscal Year 2008 designates the Under Secretary of the Navy as the Navy's CMO. Section 908 of the NDAA for Fiscal Year 2009 requires the CMO of each of the military departments to carry out a comprehensive business transformation initiative, with the support of a new Business Transformation Office.

What is your understanding of the duties and responsibilities of the Under Secretary in his capacity as CMO of the Department of the Navy?

Answer. If confirmed, my most important duty as DON CMO will be to ensure that the DON has a pragmatic and well thought-out comprehensive business transformation plan with measurable performance goals and objectives. In addition, I will work to develop a well-defined enterprise-wide business systems architecture and transition plan. In this regard, I would work with the DCMO to:

- Transform the budget, finance, accounting, and human resource operations of the DON consistent with the DON business transformation plan
- Eliminate or replace financial management systems that are inconsistent with the business systems architecture and transition plans
- Monitor the implementation of both the business transformation plan and business systems architecture.

Question. What background and expertise do you possess that you believe qualify you to perform these duties and responsibilities?

Answer. The Under/CMO must have a thorough knowledge of the Department of the Navy; understand and respect the cultures of the Navy and Marine Corps as well as the DON's civilian civil service force; understand the way programs and budgets are developed; and be a strong leader and manager. During my 27 year career in the Marine Corps, I served in a variety of command and staff positions where I honed my own leadership and management skills. During the last 5 years of active service, first as the Director of the Marine Corps Strategic Initiatives Group and later as Senior Aide and Military Assistant to the Secretary of the Navy, I developed a thorough understanding of the Department, its two services and civilian workforce, and the programming and budgeting process, as well as a working understanding of the Department's core business processes. After retiring, I studied the Department carefully, focusing on shipbuilding and acquisition programs. I therefore believe that my background provides a solid foundation for the position as CMO. However, I also recognize that the job of CMO encompasses a very diverse set of responsibilities and challenges. So I accept that I have much to learn, and will rely heavily on the knowledge and advice of military personnel and civilian experts in the Departments of Defense and Navy.

Question. Do you believe that the CMO and the Business Transformation Office have the resources and authority needed to carry out the business transformation of the Department of the Navy?

Answer. My understanding is that absent an Under Secretary, the DON assigned the CMO duties to the Assistant Secretary of the Navy for Financial Management/Comptroller and established an Office of Business Transformation headed by a civilian highly qualified expert. If confirmed, I will assume duties as the CMO and review all of the DON's efforts associated with the CMO/DCMO since the NDAA for Fiscal Year 2008. I will place a high priority on determining whether or not the CMO/DCMO efforts have the requisite authorities and required resources needed to implement the intent of the legislation. If I find the resources and authorities to be insufficient, I will work to correct the problem.

Question. What role do you believe the CMO and the Business Transformation Office should play in the planning, development, and implementation of specific business systems by the military departments?

Answer. If confirmed, I will work with the DCMO/Director, Business Transformation Office to ensure the development of a well-defined enterprise-wide business systems architecture and a business transformation plan that provides accurate performance measures and goals to improve the core business operations in the DON.

Question. What changes, if any, would you recommend to the statutory provisions establishing the position of CMO and creating the Business Transformation Office?

Answer. I do not have the data to make any recommended changes to the associated statutory provisions at this time.

Question. Section 2222 of title 10, U.S.C., requires that the Secretary of Defense develop a comprehensive business enterprise architecture and transition plan to guide the development of its business systems and processes. The Department has chosen to implement the requirement for an enterprise architecture and transition plan through a “federated” approach in which the Business Transformation Agency has developed the top level architecture while leaving it to the military departments to fill in most of the detail. The Navy’s business systems, like those of the other military departments, remain incapable of providing timely, reliable financial data to support management decisions. In particular, the Government Accountability Office has reported that the Navy has not yet followed DOD’s lead in establishing new governance structures to address business transformation; has not yet developed comprehensive enterprise architecture and transition plan that plug into DOD’s federated architecture in a manner that meets statutory requirements; and instead continues to rely upon old, stovepiped structures to implement piecemeal reforms.

If confirmed, what steps, if any, would you take to ensure that the Navy develops the business systems and processes it needs to appropriately manage funds in the best interest of the taxpayer and the national defense?

Answer. If confirmed as the Under Secretary, I will take my responsibilities as the DON’s CMO very seriously, and work every day to give the Secretary of Defense, Secretary of the Navy, Congress, and American people the highest return on their investment in their Navy and Marine Corps. After ascertaining the state of the DON’s business transformation efforts, I will evaluate and consider the GAO findings and recommendations and work to make the changes necessary to develop the very best business systems and processes needed to appropriately manage Departmental funds.

Question. Do you believe that a comprehensive, integrated, enterprise-wide architecture and transition plan is essential to the successful transformation of the Navy’s business systems?

Answer. Absolutely.

Question. What steps would you take, if confirmed, to ensure that the Navy’s enterprise architecture and transition plan meet the requirements of section 2222?

Answer. If confirmed, I will work with the DCMO and the DON Business Transformation Council to review systems investment plans and develop appropriate measures of effectiveness based on section 2222.

Question. What are your views on the importance and role of timely and accurate financial and business information in managing operations and holding managers accountable?

Answer. Accurate and timely management information, to include financial information is the fundamental requirement for ensuring both proper stewardship and the best application of taxpayer dollars. I understand that the DON Financial Improvement program is already pursuing this goal as part of the broader DOD initiative. This effort is a central element of the DON business transformation strategy.

Question. How would you address a situation in which you found that reliable, useful, and timely financial and business information was not routinely available for these purposes?

Answer. If confirmed, I would demand that those responsible for providing this information provide it. If they lacked the systems needed to generate the information, I would work to get them the systems needed to produce the data. If they still proved incapable of providing timely and useful information, I would replace them, and seek someone able to generate the information.

Question. What role do you envision playing, if confirmed, in managing or providing oversight over the improvement of the financial and business information available to Navy managers?

Answer. If confirmed, I will work closely with the Department’s Assistant Secretary of the Navy Financial Manager/Comptroller to execute those measures required to improve the quality of financial information used for decisionmaking.

END STRENGTH

Question. What are your views on the appropriate size and mix of the active-Duty Navy and Marine Corps, and their Reserve components?

Answer. If confirmed, I will work with the two Services to generate affordable manpower requirements, and to help them achieve the optimal balance of Active and Reserve end strength, experience, skills, and seniority, for both officers and enlisted.

Question. How does Navy support to the ground forces in the form of individual augmentee missions affect Navy end strength requirements?

Answer. As I understand it, the Navy has worked very hard to develop a coherent and affordable plan for individual augmentees. If confirmed, I intend to review this initiative and how it affects Navy end strength requirements and readiness, for both shore and sea billets.

TRANSFORMATION

Question. If confirmed as the [Under] Secretary of the Navy, you would play an important role in the ongoing process of transforming the Navy and Marine Corps to meet new and emerging threats.

If confirmed, what would your goals be for Navy and Marine Corps transformation?

Answer. If confirmed, I will enter the Department with no preformed goals for Navy and Marine Corps transformation. I will work within the framework of the 2009 QDR to understand the President's, Secretary of Defense's and Secretary of the Navy's future goals for the two Services. I will offer my best judgment and recommendations on the development of these goals. Once the Department's goals are established, I would do my level best to achieve them.

Question. In your opinion, does the Department of the Navy's projected budget have adequate resources identified to implement your transformation goals?

Answer. I have not been briefed in detail on the fiscal year 2010 budget, so I cannot make a judgment as to their adequacy. A key aim for the QDR is to balance departmental goals and resources. If confirmed, I will take part in the QDR process to achieve this balance.

LOW DENSITY/HIGH DEMAND FORCES

Question. If confirmed, how would you address the Department of the Navy's challenge in manning low density/high demand units, ratings, and occupational specialties?

Answer. If confirmed, one of the first questions I will ask is what platforms, units, ratings, and occupational specialties are considered low density/high demand. I will then review the plans to develop or grow the platforms, units, ratings, and occupational specialties so as to limit the deployment demand on equipment and personnel, such as offering targeted bonuses and special incentive pays to the appropriate ratings and specialties. I will ensure that the Services have means by which to monitor dwell time to ensure that units and individuals have adequate time to rest and be with their families, and the implementation of mitigation strategies for high demand/low density units and personnel.

NATIONAL SECURITY PERSONNEL SYSTEM

Question. Section 1106 of the NDAA for Fiscal Year 2008 restored the collective bargaining rights of civilian employees included in the National Security Personnel System (NSPS) established by the DOD pursuant to section 9902 of title 5, U.S.C. Under section 1106, the Department retains the authority to establish a new performance management system (including pay for performance) and streamlined practices for hiring and promotion of civilian employees.

What is your view of the NSPS, as currently constituted?

Answer. At this time I am not knowledgeable of all of the details of the NSPS. I am aware that the Department of the Navy has put forth a significant amount of effort to implement NSPS and ensure the civilian workforce is adequately trained and informed.

Question. If confirmed, how will you evaluate its success or failure to meet its goals?

Answer. If confirmed, I will determine NSPS goals; identify existing plans to achieve them; and judge their adequacy. I will direct adjustments to plans, as necessary, and will monitor the Department's subsequent implementation of revised plans.

Question. Do you support the pay-for-performance approach adopted for civilian employees in the NSPS?

Answer. At this time I am not aware of the specifics of the NSPS pay-for-performance program. However, in order to recruit, motivate, and retain quality civilian personnel, it is essential to ensure that they are appropriately compensated for their performance.

Question. Do you believe that the Department needs streamlined authority for hiring and promotion of civilian employees to meet its human capital needs?

Answer. Expedited hiring authority is an exceptional tool in the recruiting process. If confirmed, I would consider expedited hiring authority for critical positions.

Question. In your view, is it viable in the long run for the DOD to maintain two separate systems (NSPS and the General Schedule) for its civilian employees?

Answer. At this time, I am not aware of how NSPS works with the GS system. If confirmed, I will review the differences between the two systems and work for the greatest degree of standardization possible.

Question. What changes, if any, would you recommend to the NSPS authorizing legislation?

Answer. I have no specific legislative changes to propose at this time.

Question. What changes, if any, would you recommend to the NSPS regulations?

Answer. I have no specific regulatory changes to propose at this time.

NAVY AND MARINE CORPS RECRUITING AND RETENTION

Question. The retention of quality sailors and marines, officer and enlisted, Active-Duty and Reserve, is vital to the Department of the Navy.

How would you evaluate the status of the Navy and Marine Corps in successfully recruiting and retaining high caliber personnel?

Answer. Recruiting and retention in both the Navy and Marine Corps appear to be strong. As I understand it, the Navy and Marine Corps are currently meeting or exceeding enlisted and officer recruiting goals across both the active and Reserve components, while exceeding DOD quality standards in all recruit categories. In addition, there has been increased retention and lower attrition across the force.

How would you evaluate the recruiting and retention of uniformed and civilian health care professionals?

Answer. I have not been briefed on this issue. If confirmed, I will look into it.

Question. What initiatives would you take, if confirmed, to further improve Navy and Marine Corps recruiting and retention, in both the active and Reserve components, including health care professionals?

Answer. I have not been briefed on the initiatives in place, or their effectiveness. However, if confirmed, I would explore and argue for "best in class" programs and policies to attract and retain high quality people. This might include targeted bonuses and special incentive pays for critical skills in the medical field.

DEFENSE INTEGRATED MANPOWER HUMAN RESOURCES SYSTEM

Question. The Defense Integrated Manpower Human Resources System (DIMHRS) is a single integrated human resources pay and personnel system for all the armed services and the Defense Finance and Accounting System, and is intended to replace many of the systems currently used to perform personnel management and pay functions. DIMHRS, which has been under development for several years, has come under criticism for cost growth, delays in implementation, and not meeting the expectations of each Service.

What are your views of the need for completion of implementation of DIMHRS and what specific benefits, if any, would the Department of the Navy derive from this system?

Answer. I have not had an opportunity to learn about the DIMHRS system in depth. If confirmed, I will evaluate the system and work with the Secretary of the Navy and DOD leadership to ensure that our personnel system is compatible with DOD approved systems and is fully supportive of our sailors and marines.

DELIVERY OF LEGAL SERVICES

Question. What is your understanding of the respective roles of the General Counsel and Judge Advocate General of the Navy in providing the Secretary of the Navy with legal advice?

Answer. Both the Judge Advocate General and the Staff Judge Advocate to the Commandant perform functions in their respective organizations that are essential to the proper operation of their Service and the Department as a whole. The Judge Advocate General and Staff Judge Advocate to the Commandant work closely with the Navy General Counsel. Their unique expertise and independent judgment and

advice complement that of the General Counsel and offer the necessary blend of legal advice to the civilian and military leadership.

Question. What are your views about the responsibility of the Judge Advocate General of the Navy and the Staff Judge Advocate to the Commandant to provide independent legal advice to the Chief of Naval Operations and the Commandant of the Marine Corps, respectively?

Answer. It is critical that the CNO and the CMC receive independent legal advice from the senior uniformed judge advocates.

Question. What are your views about the responsibility of staff judge advocates within the Navy and Marine Corps to provide independent legal advice to military commanders in the fleet and throughout the naval establishment?

Answer. Uniformed staff judge advocates, assigned worldwide and through the chain of command are essential to the proper functioning of the operational and shore-based Navy and Marine Corps. Navy and Marine Corps commanders depend extensively on their staff judge advocates for their unique expertise that combines legal acumen with the well-schooled understanding of military operations and requirements.

NAVY JUDGE ADVOCATE GENERAL CORPS

Question. The Center for Naval Analyses (CNA) recently completed a study of manpower requirements for the Navy in which it concluded that the Navy's Judge Advocate General Corps was significantly under strength for its mission, including combat service support of Marine Corps' units and Task Force 134 in Iraq.

What is your understanding of the CNA study's findings with respect to manpower in the Navy JAG Corps?

Answer. I am not familiar with the CNA study. If confirmed, I will review this report and consider its recommendations.

Question. What is your understanding of the sufficiency of the number of active-duty judge advocates in the Marine Corps to provide legal support for all the Marine Corps' missions?

Answer. At this time, I am not aware of the overall manpower needs of the legal community within the Navy or Marine Corps. If confirmed, I will evaluate this issue.

Question. If confirmed, will you review the judge advocate manning within the Navy and Marine Corps and determine whether current active-duty strengths are adequate?

Answer. Yes.

PREVENTION AND RESPONSE TO SEXUAL ASSAULTS

Question. What is your evaluation of the progress to date made by the Navy and Marine Corps in preventing and responding adequately to incidents of sexual assault?

Answer. I am aware that the Navy and Marine Corps have undertaken several important measures to address the prevention and response to sexual assaults. I have not had an opportunity to fully review these programs. However, as a former Marine commander, I know these programs are critically important. If confirmed, they will receive my sustained attention.

Question. What problems do you foresee, if any, in implementing current policies with respect to confidential, restricted reporting of sexual assaults by sailors and marines?

Answer. At this time, I am not aware of any problems in implementing current sexual assault reporting programs. If confirmed, I will evaluate policy implementation as part of a Departmental review of sexual assault prevention and response programs.

Question. If confirmed, what actions do you plan to take to ensure that senior civilian leaders of the Department of the Navy have ongoing visibility into incidents of sexual assault and the effectiveness of policies aimed at preventing and responding appropriately to such incidents?

Answer. If confirmed, I will evaluate the current reporting and response policies and systems accessible to senior civilian leaders in the Department to determine whether any modifications would be appropriate.

PREVENTING SEXUAL HARASSMENT AND VIOLENCE

Question. The Defense Task Force on Sexual Harassment and Violence at the Military Service Academies reported that "Historically, sexual harassment and sexual assault have been inadequately addressed at both Academies [United States Military Academy and United States Naval Academy]. Harassment is the more

prevalent and corrosive problem, creating an environment in which sexual assault is more likely to occur. Although progress has been made, hostile attitudes and inappropriate actions toward women, and the toleration of these by some cadets and midshipmen, continue to hinder the establishment of a safe and professional environment in which to prepare military officers. Much of the solution to preventing this behavior rests with cadets and midshipmen themselves.”

If confirmed, what actions would you take to encourage not only midshipmen but also all sailors and marines to step up to their responsibility to create a culture where sexual harassment and sexual assault are not tolerated?

Answer. Sexual harassment and assault cannot be tolerated. If confirmed, I will evaluate the current culture along with reporting and response policies to determine whether or not modifications would be appropriate.

PERSONNEL AND HEALTH BENEFIT COSTS

Question. The cost of the Defense Health Program, like the cost of medical care nation-wide, is escalating rapidly. Similarly, the cost of personnel as a key component of the Services' budgets has risen significantly in recent years.

If confirmed, how would you approach the issue of rising health care and personnel costs?

Answer. Costs associated with personnel are by far the largest part of the Department's budget. A key priority is to operate as efficiently and effectively as possible with respect to utilization of personnel. The military and civilian force structure must be right sized for the mission but not any larger than necessary. As stewards of the taxpayer's money, the Department needs to utilize the fiscal resources it dedicates for personnel in the optimum manner. A key part of this thought process is to ensure that the Department apportions that part of the budget devoted to personnel on those benefits that deliver the best value to naval personnel. Medical is just one piece of the overall benefit package.

If confirmed, I will seek new options and approaches to address the rising cost of health care and other personnel costs and work with the Secretary of Defense, Secretary of the Navy, and Congress to address this critical matter, while ensuring that our sailors and marines have access to the quality health care they deserve.

QUALITY OF LIFE PROGRAMS

Question. If confirmed, what priorities would you establish to ensure that military quality of life programs are sustained and improved for Navy and Marine Corps members and their families?

What challenges do you foresee in sustaining quality of life programs, and are there new initiatives that you would undertake, if confirmed, to ensure the availability of high quality services, including child care, education, and recreational opportunities, for sailors and marines and their families?

Answer. Navy and Marine Corps personnel of all ranks deserve high quality family programs. Family health is as important a component of personnel readiness as the personal health of sailors and marines. Quality of life programs enable the Department of the Navy to compete in the job market to attract and recruit bright, talented young people. Those same high quality programs are essential to provide the level of personal and job satisfaction that allows the Department to retain our best and brightest Sailors and Marines. If confirmed, I will work with the Office of the Secretary of Defense (OSD), the Secretary of the Navy, Assistant Secretary of the Navy for Manpower and Reserve Affairs, and Navy and Marine Corps leaders to ensure we are focused on the quality of life programs that meet the needs of all naval personnel.

FAMILY SUPPORT

Question. What do you consider to be the most important family readiness issues in the Navy and Marine Corps, and, if confirmed, what role would you play to ensure that family readiness needs are addressed and adequately resourced?

Answer. As a former dependent of an active duty marine, and later a husband and father in an active duty military family, I have a keen appreciation for the importance of family readiness programs and issues. I consider all family readiness issues to be important. If confirmed, I will take a close personal interest in Navy and Marine Corps family readiness programs, and will strive to meet all family readiness needs throughout the Navy-Marine Corps team.

Question. If confirmed, how would you address these family readiness needs in light of global rebasing, BRAC, deployments, and the recent growth in the active-duty end strength of the Marine Corps?

Answer. I do not have the detailed information needed to answer this question. If confirmed, I intend to closely follow all rebasing, BRAC, and manpower and family readiness issues, and take the actions necessary to provide Navy and Marine families with the best support possible.

Question. If confirmed, how would you ensure support to Reserve component families related to mobilization, deployment and family readiness, as well as active duty families who do not reside near a military installation?

Answer. If confirmed, I intend to work with the Secretary of the Navy to maintain focus and commitment to the quality of life needs of all Navy personnel, regardless of where they live.

SUICIDE PREVENTION

Question. Effective measures to prevent suicides remain a high priority. The suicide rates in both the Navy and Marine Corps have increased over the past 2 years.

What initiatives would you take, if confirmed, to improve the Navy and Marine Corps Suicide Prevention Programs? If confirmed, how would you seek to reduce stigma associated with seeking personal counseling and eliminate policies and procedures that may inadvertently prevent sailors and marines from seeking professional help for emotional or mental health problems?

Answer. Over a 27-year career in the Marine Corps, I had to personally deal with two suicides. Both were devastating for the family of the servicemember who committed the act, as well as the servicemember's parent unit. I am therefore deeply concerned about the incidents of suicide in the Department. If confirmed, I intend to leverage all tools available to improve the quality and access to suicide prevention programs, to reduce the stigma associated with seeking mental health treatment, and to consider new programs to help families and units deal with the trauma of these devastating acts.

SUPPORT FOR WOUNDED, ILL, AND INJURED SAILORS AND MARINES

Question. Wounded servicemembers from Operations Enduring Freedom and Iraqi Freedom deserve the highest priority from the Navy and Marine Corps for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support beyond retirement or discharge.

How do the Navy and Marine Corps provide follow-on assistance to wounded personnel who have separated from active service? How effective are those programs?

Answer. I understand that the Navy has established the Safe Harbor Program and the Marine Corps the Wounded Warrior Regiment. Both extend support to the wounded heroes within the Navy and Marine Corps. Both programs continue to offer support should a servicemember be separated or retire due to medical issues, up through and including reintegration to a community. An annual survey is used to determine the effectiveness of these programs. These surveys help to develop best practices and process improvements to optimize the success of these programs.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Navy's and Marine Corps' support for wounded personnel, and to monitor their progress in returning to duty or to civilian life?

Answer. If confirmed, I will determine if additional strategies and resources are needed to ensure that wounded sailors and marines and their families are provided with optimum medical care and nonmedical care and support throughout their recovery, rehabilitation, reintegration, and beyond. These men and women deserve no less.

Question. What measures would you take, if confirmed, to facilitate the seamless transition of wounded, ill, and injured sailors and marines from the DOD to the Department of Veterans Affairs (VA)?

Answer. I am not fully familiar with all of the programs that exists, or how they are performing. However, if confirmed, I will work to foster a seamless transition for continuity of service between the DOD and VA systems of care.

Question. Would you propose any changes to the Navy's disability evaluation system?

Answer. The Physical Evaluation Board manages the Department of the Navy's disability evaluation system. If confirmed, I intend to review the evaluation and separation process to ensure it is fair, thorough and regimented for all servicemembers.

SENIOR MILITARY AND CIVILIAN ACCOUNTABILITY

Question. While representative of a small number of individuals in DOD, reports of abuses of rank and authority by senior military and civilian leaders and failures to perform up to accepted standards are frequently received. Whistleblowers and

victims of such abuses often report that they felt that no one would pay attention to or believe their complaints. Accusations of unduly lenient treatment of senior officers and senior officials against whom accusations have been substantiated are also frequently heard.

What are your views regarding the appropriate standard of accountability for senior civilian and military leaders of the Department?

Answer. Individuals should be held accountable for abuses of their position and authority, regardless of their position in the Department's hierarchy. Senior leaders must be held accountable through the use of prompt and thorough investigation of complaints, as well as prompt and appropriate treatment for offenders. If confirmed, I will work with the Secretary of the Navy to enforce the highest ethical and professional standards with the Department of the Navy.

Question. If confirmed, what steps would you take to ensure that senior leaders of the Navy and Marine Corps are held accountable for their actions and performance?

Answer. Individuals should be held accountable for abuses of their rank and authority, regardless of their position in their Service's hierarchy. Senior leaders must be held accountable through the use of prompt and thorough investigation of complaints, as well as prompt and appropriate treatment for offenders. If confirmed, I will work with the Secretary of the Navy to enforce the highest ethical and professional standards within the leadership ranks of the Navy and Marine Corps.

NAVY SUPPORT TO GROUND FORCES

Question. The Navy has been challenged to find new ways of supporting the Army and Marine Corps in Iraq and Afghanistan by taking on nontraditional support functions.

In your view, what are the kinds of nontraditional support the Navy feasibly can provide, and what additional missions, if any, should the Navy be assigned in the global war on terrorism? Given that these are nontraditional roles for Navy personnel, what additional training and equipment have been provided, or, in your view, need to be provided?

Answer. The U.S. Navy is fully committed to the fight against al Qaeda and its extremist allies. Right now, the Navy has over 14,000 officers and sailors on the ground in the Central Command's Area of Responsibility—more than they have afloat in the region. Some are performing their traditional jobs, like Seabees and Explosive Ordnance Disposal Technicians. Others are performing nonstandard roles, such as commanding Provincial Reconstruction Teams in Afghanistan. It is vitally important that the Department do everything in its power to ensure that those servicemembers who are performing nontraditional roles receive the training needed to accomplish their assigned tasks. If confirmed, I will work closely with the Secretary of the Navy to ensure that this training is taking place.

Question. What procedures are in place for the Navy to assess the potentially adverse operational effect on organizations from which individual augmentees are drawn? If you do not believe these procedures are adequate, what should be done to strengthen them?

Answer. As I understand it, the Navy has had to reduce readiness both at sea and ashore to provide the numbers of Individual Augmentees now requested by the Central Command. If confirmed, one of my top priorities will be to understand fully the entire Individual Augmentation process, and to work with the Secretary to minimize its impact on fleet-wide readiness, while ensuring that the Navy continues to support current operations wherever it is needed.

TACTICAL AVIATION

Question. Several years ago, the Navy and Marine Corps began to integrate their tactical aviation units.

What is your assessment of this initiative?

Answer. Execution of Tactical Air (TACAIR) Integration has been challenged by the impact of Operation Iraqi Freedom and Operation Enduring Freedom requirements and the surge requirements of the Navy's Fleet Response Plan that has resulted in what some consider to be a present shortfall in Navy carrier air wing force structure. However, it is my understanding that for the immediate future, Navy and Marine Corps will continue to meet all of their TACAIR operational commitments, enhanced by tightly integrated carrier air wings and Marine air-ground task forces. If confirmed, I intend to review this initiative and its ability to optimize the use of our Nation's naval tactical aviation assets.

Question. The Department of the Navy is facing a potential shortfall of strike fighter aircraft in the next decade even if the Navy continues to buy F/A-18E/F air-

craft and F-35 Joint Strike Fighter aircraft at the rate projected in last year's budget.

What is your assessment of this situation and what actions should the Department of the Navy take to address this potential shortfall?

Answer. I have not had an opportunity to review any detailed analysis associated with it. Accordingly, I am unable to provide a meaningful assessment of the situation at this time. If confirmed, I intend to review the overall strike fighter issue in detail as part of the 2009 QDR, and the strategies now in place to mitigate any shortfall. I intend to work with the Secretary of the Navy, the Secretary of Defense and Congress to achieve the best resolution for the Department.

Question. What is your understanding of whether the Navy will continue to operate the 10 carrier air wings that supported the fleet of 11 aircraft carriers, or whether the air wing force structure will be modified to reflect a planned reduction to a permanent level of 10 aircraft carriers?

Answer. Under current law, the Navy must maintain a force of 11 active carriers. The Secretary of Defense's recent fiscal year 2010 budget roll-out indicated that the carrier force would fall to 10 carriers in 2040, the result of moving to a build rate of 1 carrier every 5 years. As I understand it, the Navy is seeking a legislative waiver to allow it to temporarily reduce the carrier force to 10 carriers for a period of not less than 33 months, the period of time between the planned retirement of the USS *Enterprise*, CVN-65, and the planned commission of the USS *Gerald R. Ford*, CVN-68. I am not aware of plans to reduce air wing force structure although I would expect this issue, like all force structure issues, would be reviewed by the QDR. If confirmed, I intend to follow this review carefully.

Question. What is your assessment of the current risk to the F-35 Joint Strike Fighter (JSF) Program schedule during its system development and demonstration phase?

Answer. Although I know the Navy and Marine Corps are both fully committed to the Joint Strike Fighter program, I have yet to have the opportunity to be briefed on the current status of the JSF program. I am therefore unable to offer any program risk assessment.

Question. Alternatives for maintaining sufficient strike assets if there are new schedule difficulties with the JSF program are limited. It appears that the Department of the Navy's options for extending the service life of existing F/A-18 aircraft are limited and procurement of additional F/A-18 aircraft beyond those planned last year may be more difficult with the Secretary of Defense's recent announcement of a reduction of nine F/A-18 aircraft from the number originally planned for the fiscal year 2010 program.

What other potential alternatives do you see for maintaining sufficient strike assets if there were any additional slippage in the initial operating capability date for the F-35 Joint Strike Fighter?

Answer. If confirmed, I intend to fully review the Department's tactical aviation requirements and plans. I will work to identify all reasonable and affordable alternatives, if necessary, for maintaining Department-wide tactical aviation and strike capability during the transition to the Joint Strike Fighter program.

SHIPBUILDING PLAN

Question. The Navy annually submits a 30-year shipbuilding plan. The last shipbuilding plan included very optimistic assumptions about unit costs of ships and excluded any funding for a replacement for the current fleet of Trident ballistic missile submarines.

Do you agree that the 30-year shipbuilding plan should, in fact, reflect realistic cost estimates and include all important shipbuilding efforts for that document to be useful for decisionmakers? What level of funding do you think the Navy will need to execute this plan, and considering competing priorities, do you believe this level of funding is realistic?

Answer. The Navy's shipbuilding plan will be an important item in the 2009 QDR. The output of this activity should be a new 30-year shipbuilding program. If confirmed, I will be able to review the data supporting the plan, and provide an estimate of the level of resources needed to execute the plan. As a general principle, I believe that any Navy plan submitted to Congress should be based on the best estimates available at the time, and fully consistent with expected future resource streams. This is especially true for the Navy's 30-year shipbuilding program, which has a disproportionate impact on DON acquisition plans and industrial base calculations.

Question. To what extent should such commercial shipbuilding best practices, and any others you may be aware of, be incorporated into Navy shipbuilding programs?

Answer. Building warships is significantly more complex than building commercial ships under any circumstances. The differences compound when building warships at low rates of production. However, there are some basic tenets that hold true in all construction processes: smart development of requirements; completing design to the greatest extent possible before construction; building in sequence; and minimizing design changes once construction begins. If confirmed, I will work with OSD, Secretary of the Navy, ASN for Research, Development, and Acquisition, the naval shipbuilding enterprise and industry to identify and implement those best practices and innovations with the greatest potential for producing savings.

AIRCRAFT CARRIERS

Question. The Navy decommissioned the USS *John F. Kennedy* in fiscal year 2006. This decreased the number of aircraft carriers to 11. Additionally, in the fiscal year 2006 budget request, the Navy slipped the delivery of CVN-78 (USS *Gerald R. Ford*) to 2015, creating a 2-year gap between the scheduled decommissioning of the USS *Enterprise* and the availability of a new aircraft carrier. During this period, under the proposed plan, only 10 aircraft carriers would be operational. Recently, there have been reports that delivery of the USS *Gerald R. Ford* could be further delayed because of technical difficulties with the electromagnetic aircraft launch system (EMALS).

What is your view of the plan announced by Secretary Gates to permanently change the aircraft carrier force structure to 10 from the current number of 11?

Answer. I support the Secretary's announced plan to move carriers to 5 year price points. As he stated, this would cause the Navy's aircraft carrier force structure to drop from 11 to 10 after 2040 barring any change to future aircraft carrier production rates. I understand that future aircraft carrier force structure may be reviewed during the QDR. If confirmed, I will work closely with OSD, the Secretary of the Navy, and the Navy to understand the reasons behind Secretary Gates' recent decision, and any further changes that are being contemplated.

Question. Is it Secretary Gates' plan to retire another aircraft carrier when the USS *Gerald R. Ford* delivers to keep the carrier force structure at 10 carriers?

Answer. I am not aware of any such plan. I expect this will be a consideration for the 2009 QDR. I would expect any recommendation to reduce the carrier force permanently to 10 carriers would be discussed fully with Congress.

Question. If not, do you believe that this reduced carrier force structure for a 2-year gap is supported by adequate analysis?

Answer. My understanding is that the Navy has taken a close look at this gap and developed an appropriate mitigation plan. If confirmed, I will work closely with the Secretary of the Navy to ensure that sufficient carrier assets exist to support operational needs.

Question. How would the aircraft carrier presence requirements of combatant commanders be met with only 10 operational aircraft carriers, particularly if the 10 carrier force structure is made permanent?

Answer. I have not yet been briefed on specific combatant commander requirements for aircraft carrier availability, or how these requirements might be met with a temporary 10-carrier force. If confirmed, I will review this matter.

SURFACE COMBATANTS

Question. Until fiscal year 2009, the Future Years Defense Program had plans for buying DDG-1000 destroyers until the Navy was ready to begin procurement of a new missile defense cruiser, CG(X). During budget deliberations last year, Navy leadership announced that the Navy wanted to cancel the DDG-1000 program after building only two ships and re-start the DDG-51 production line. Ultimately, the Secretary of Defense decided not to cancel the third DDG-1000 that was requested as part of the fiscal year 2009 budget.

In your judgment, can a credible and capable surface force be sustained at the level of multi-mission surface combatant construction the Navy currently plans, and if so, how?

Answer. Large, multi-mission surface combatants form the heart of the Navy's battle force. Fully 88 of 313 ships in the Navy's current 313-ship battle force are guided missile cruisers and destroyers. Whatever plans the Navy develops for its future fleet will revolve around its ability to build and maintain an affordable surface combatant construction program. I therefore support Secretary Gates' recent fiscal year 2010 budget decisions on large surface combatants. They appear to be made with the goal of developing a more affordable long-term building plan for these type ships. This will be another issue of great importance in the 2009 QDR. If confirmed, I will work with OSD and the Secretary of the Navy to ensure the development of

a credible and capable surface combatant plan that best meets the needs of the Nation and efficiently leverages the shipbuilding industrial base.

Question. Has the Navy produced adequate analysis of the effects of the new shipbuilding plan on the surface combatant industrial base?

Answer. While I have not had an opportunity to review a detailed analysis on the current shipbuilding plan initiative. If confirmed, it would be my goal to ensure that this plan is consistent with both force structure needs and the objective of maintaining a viable industrial base.

Question. In your opinion, how many shipyards capable of building surface combatants does this Nation need?

Answer. This is a difficult question, and one I cannot answer until gaining access to all of the data and information available to the DOD, Department of the Navy, Congress, and industry. However, as Katrina showed, having two yards is a very good hedge against natural or manmade disasters, and provides an important national surge capacity in case of a concerted maritime challenge. If confirmed, I will work with OSD, the Secretary of the Navy, Congress, and industry to determine the appropriate number of shipyards needed to efficiently build our surface combatants.

BALLISTIC MISSILE DEFENSE

Question. Do you regard ballistic missile defense as a core mission of the Navy?

Answer. Yes, defense against ballistic missiles of all ranges should be an important mission for the Navy. If confirmed, I will work to assure that the unique capabilities of the Navy are leveraged to best effect in support of our Nation's ballistic missile defense programs.

Question. Do you support the current division of responsibility in which the Missile Defense Agency (MDA) is responsible for ballistic missile defense research and development and the services are responsible for procurement of ballistic missile defense systems?

Answer. I generally understand that the division of responsibility between the Missile Defense Agency and the services was outlined by OSD, but lack the detailed knowledge to comment on this subject. If confirmed, I would examine this question more carefully.

Question. What steps do you believe the Navy needs to take to ensure that Aegis ships are available to provide radar coverage against potential missile attacks?

Answer. Virtually all Aegis ships can be modified to allow them to track and engage ballistic missiles. The Secretary of Defense announced as part of his fiscal year 2010 budget roll-out that the Navy would provide six more Aegis ships with these modifications. These would be in addition to the 18 ships already modified. At this time, I do not know if the Navy plans to convert more ships into ballistic missile defense ships. If confirmed, I will work to understand the requirements for ballistic missile defense ships and to ensure that the Navy fulfills these requirements.

CRUISE MISSILE DEFENSE

Question. In your view, how serious is the cruise missile threat to the Navy?

Answer. Very serious. Cruise missiles such as the SS-N-27 Sizzler are extremely difficult targets for fleet defenses. Moreover, as the attack on the Israeli corvette Hanit during the 2006 Lebanon War demonstrates, cruise missiles are proliferating even to non-state actors. Anti-ship cruise missiles are an enduring threat to naval forces.

Question. If confirmed, what actions would you take to ensure that the Navy is adequately addressing this threat?

Answer. The Navy's Naval Integrated Fire Control-Counter-air Program (NIFC-CA), which includes such components as the cooperative engagement capability (CEC), E-2D Advanced Hawkeye, and SM-6 extended range active missile is designed to counter advanced cruise missile and air threats. However, I have not had the opportunity to be fully briefed on these programs, and thus am not in a position to opine on the specific steps needed to ensure a robust defense. If confirmed, I will work with the Secretary of the Navy and the Chief of Naval Operations to support the development and fielding of these and other capabilities needed to meet this important mission.

NAVY FORCE STRUCTURE

Question. The Chief of Naval Operations has publicly stated that the Navy has a requirement for 313 ships.

Do you agree with this requirement?

Answer. Since 1993, the stated requirements for the Navy's total ship battle force (TSBF) have fluctuated in a narrow band between 305 and 346 ships, with an aver-

age requirement of 318–319 ships. The current requirement for 313 ships came out of the 2006 QDR. The 2009 QDR will produce its number. If confirmed, I hope to take an active role in helping to determine what this number should be, and to help the Secretary of the Navy ensure the Navy's force structure requirements are fully articulated to OSD and Congress.

Question. How would that goal change by implementing Secretary Gates' plan to reduce aircraft carrier force structure from 11 to 10?

Answer. My understanding of the recommendation specified by Secretary Gates is that the Navy's aircraft carrier force structure could drop from 11 to 10 in the 2040 timeframe. As this change would not take place for 30 years, it would be too early to assess force structure changes that would result from a reduction in aircraft carriers. If confirmed, I will support the Secretary of the Navy in his efforts to determine the required Navy force structure for the future.

SCIENCE AND TECHNOLOGY PROGRAM

Question. Do you believe that the current balance between short- and long-term research is appropriate to meet current and future Department of the Navy needs?

Answer. I have not yet been briefed on the current balance between short-term and long-term research, so cannot comment on it. As a general principal, however, I believe a robust R&D effort is vital to the future health of the Navy and Marine Corps team. If confirmed, I will work with the Secretary of the Navy to maintain a robust Departmental R&D program, and to evaluate our Navy's Science and Technology Program to ensure an appropriate funding and balance.

Question. If confirmed, what direction would you provide regarding the importance of innovative defense science in meeting Navy and Marine Corps missions?

Answer. I firmly believe that innovative, high payoff research is an integral part of any science and technology investment portfolio. If confirmed, I would work with the Secretary of the Navy and the Department's Science and Technology Corporate Board (Vice Chief of Naval Operations, Assistant Commandant of the Marine Corps, and ASN RD&A) to ensure the Department of the Navy has adequately addressed this critical area. I would also work closely with the Director of DARPA, the Office of Naval Research, industry, and academia to leverage their technology investments.

Question. If confirmed, what guidance would you give to ensure research priorities that will meet the needs of the Navy and Marine Corps in 2020?

Answer. If confirmed, I will provide guidance to ensure that a balanced program of science and technology investment is created.

MILITARY SPACE

Question. Do you believe that the current DOD management structure for space programs sufficiently protects Navy space equities?

Answer. I cannot yet answer this question. However, the Navy and Marine Corps both depend heavily on spaced-based combat support, and I have a keen interest and background in military space systems and operations. If confirmed, I will examine this matter closely.

Question. In your view, how actively should the Navy be engaged in the management of space programs?

Answer. Very actively. Our cadre of naval space experts have long played a critical role in ensuring space systems are appropriately prioritized and realized within both the DOD and the Department of the Navy.

Question. In your view, is the Navy adequately involved in the requirements process for space programs?

Answer. I believe so. I do know DON space experts are involved in the Joint Capabilities and Development System (JCIDS) and the National Security Space acquisition process. However, if confirmed, I will ensure that the Navy is fully involved in the requirements process.

Question. What is the Navy's appropriate long-term role in space systems, other than as a user of space information and products?

Answer. Space has long been and will remain critical to naval warfighting. The DON has been in the forefront of operationalizing space. For example, the DON currently leads the next generation narrowband system acquisition, Mobile User Objective System (MUOS). DON also contributes with joint space S&T/R&D initiatives, Naval Observatory enabling efforts as the provider of precise time and positional data to GPS and other space assets, and direct participation in the National Reconnaissance Office. If confirmed, I will work to make sure the Navy continues its long tradition in developing operational space systems and new applications for space-based combat support.

JOINT OPERATIONS

Question. If confirmed, what recommendations, if any, would you have for improving joint force integration?

Answer. Joint Force Integration is essential for effective warfighting. If confirmed, I will work with the Secretary of the Navy to ensure a continual focus on joint integration as well as the importance of commonality and interoperability across all services to include the Joint Professional Military Education (JPME) necessary to develop future joint force commanders. I will also work to expand interservice relationships, such as pursuing new AirSea battle doctrine.

INVESTMENT IN INFRASTRUCTURE

Question. Witnesses appearing before the committee in recent years have testified that the military Services underinvest in their facilities compared to private industry standards. Decades of underinvestment in installations has led to increasing backlogs of facility maintenance needs, substandard living and working conditions, and has made it harder for the Services to take advantage of new technologies that could increase productivity.

Do you believe the Department of the Navy is investing enough in its infrastructure? Please explain.

Answer. I have not had an opportunity to focus on the Navy's overall infrastructure investments. If confirmed, I will work with the Secretary of the Navy to ensure appropriate resources are directed to enhancing existing and future infrastructure projects.

ACQUISITION ISSUES

Question. What are your views regarding the need to reform the process by which the Department of the Navy acquires major weapons systems? If confirmed, what steps would you recommend to improve that process?

Answer. Acquisition reform is a top priority for President Obama and Secretary Gates. I understand the Department of the Navy has already taken significant steps to improve the acquisition process for major weapons systems such as by implementing a new six-gate/two-pass system. If confirmed, I will work to ensure that this six-gate/two-pass system provides adequate oversight and flexibility for DON acquisition efforts, and will work with OSD, the Secretary of the Navy, Congress and industry to pursue continual improvement in the DON acquisition enterprise.

Question. Department-wide, nearly half of the DOD's 95 largest acquisition programs have exceeded the so-called "Nunn-McCurdy" cost growth standards established in section 2433 of title 10, U.S.C. The cost overruns on these major defense acquisition programs now total \$295 billion over the original program estimates, even though the Department has cut unit quantities and reduced performance expectations on many programs in an effort to hold costs down. Many of those programs are being executed by the Department of the Navy.

What steps, if any and if confirmed, would you take to address the out-of-control cost growth on the Department of the Navy's major defense acquisition programs?

Answer. The aforementioned six-gate/two-pass system, has a system to control program cost growth. However, I am not aware of the details of this system, or if it is adequate enough to prevent future cost growth. If confirmed, one of my top priorities will be to review the system and to ensure that the Navy receives any negotiated system, item or service on time and on cost.

Question. What principles will guide your thinking on whether to recommend terminating a program that has experienced "critical" cost growth under Nunn-McCurdy?

Answer. I agree with Secretary Gates that programs that consistently underperform or are over cost should be immediately eyed for termination. In the coming budget environment, programs that experience critical cost growth under Nunn-McCurdy should be kept only if there is a clear and compelling need for the program, and there are no alternatives readily available. If confirmed, should a program experience a critical Nunn/McCurdy breach, I will work with senior leaders within the Department to thoroughly review and determine if termination or continuation is in the best interest of the warfighter and the taxpayer.

Question. Many experts have acknowledged that the DOD may have gone too far in reducing its acquisition work force, resulting in undermining of its ability to provide needed oversight in the acquisition process. Do you agree with this assessment? If so, what steps do you believe the Department of the Navy should take to address this problem?

Answer. I agree that the Navy cut back its design and acquisition workforce too far, which caused it to lose its "technical authority." As I understand it, the Navy has taken significant steps to increase its acquisition workforce. If confirmed, I will work with senior Navy leadership to identify gaps and needs and allocate the appropriate resources to bridge those gaps. If confirmed, adequate oversight in the acquisition process will be a top priority for me.

Question. Section 852 of the NDAA for Fiscal Year 2008 establishes an Acquisition Workforce Development Fund to provide the resources needed to begin rebuilding the Department's corps of acquisition professionals.

Do you believe that a properly sized workforce of appropriately trained acquisition professionals is essential if the Navy is going to get good value for the expenditure of public resources?

Answer. Yes.

Question. What steps do you expect to take, if confirmed, to ensure that the Navy makes appropriate use of the funds made available pursuant to section 852?

Answer. If confirmed, I will work with senior Departmental leaders to identify the most appropriate usages of these funds by reviewing the needs identified by the warfighter and Navy programs.

Question. Would you agree that shortened tours as program managers can lead to difficulties in Acquisition programs? If so, what steps would you propose to take, if confirmed, to provide for stability in program management?

Answer. Yes. Leadership consistency is a very important part of a program's success. I understand that the Navy is working to provide longer tours for Program Managers. If confirmed, I will review these decisions to ensure we maintain leadership consistency and thereby help ensure success of specific programs.

Question. Major defense acquisition programs in the Department of the Navy and the other military departments continue to be subject to funding and requirements instability. Do you believe that instability in funding and requirements drives up program costs and leads to delays in the fielding of major weapon systems? What steps, if any, do you believe the Navy should take to address funding and requirements stability?

Answer. Instability of any kind can impact a program. I understand that the Navy has implemented the six-gate/two-pass system to provide requirements review to avoid instability in a program. If confirmed, I will work with the senior Navy leaders currently working requirements and funding issues to ensure maximum stability for Navy programs.

Question. The Comptroller General has found that DOD programs often move forward with unrealistic program cost and schedule estimates, lack clearly defined and stable requirements, include immature technologies that unnecessarily raise program costs and delay development and production, and fail to solidify design and manufacturing processes at appropriate junctures in the development process. Do you agree with the Comptroller General's assessment? If so, what steps do you believe the Department of the Navy should take to address these problems?

Answer. I understand that unrealistic program costs and schedules, along with unclear requirements can cause delay and costs increases. I am aware of the Navy's six-gate/two-pass system that was implemented to avoid these very issues. If confirmed, my priority will be working matters regarding the Navy's ability to obtain the negotiated for item or service at the cost and date needed.

Question. By some estimates, the DOD now spends more money every year for the acquisition of services than it does for the acquisition of products, including major weapon systems. Yet, the Department places far less emphasis on staffing, training, and managing the acquisition of services than it does on the acquisition of products. What steps, if any, do you believe the Navy and Marine Corps should take to improve the staffing, training, and management of its acquisition of services? Do you agree that the Navy and Marine Corps should develop processes and systems to provide managers with access to information needed to conduct comprehensive spending analyses of services contracts on an ongoing basis?

Answer. The use of service contracts has grown. I understand that the Navy has taken action to ensure more oversight with regard to service contracts. If confirmed, I will work with Navy officials to ensure that there is proper oversight on service contracts and that appropriate training is provided to those individuals providing the oversight.

Question. The last decade has seen a proliferation of new types of government-wide contracts and multiagency contracts. The DOD is by far the largest ordering agency under these contracts, accounting for 85 percent of the dollars awarded under one of the largest programs. The DOD Inspector General and others have identified a long series of problems with interagency contracts, including lack of acquisition planning, inadequate competition, excessive use of time and materials con-

tracts, improper use of expired funds, inappropriate expenditures, and failure to monitor contractor performance. What steps, if any, do you believe the Navy and Marine Corps should take to ensure that its use of interagency contracts complies with applicable DOD requirements and is in the best interest of the Department of the Navy?

Answer. If confirmed, I will review the Navy's usage of interagency contracts and will work to ensure appropriate oversight and compliance with DOD requirements.

Question. In the Budget Blueprint that supports the fiscal year 2010 presidential budget request, the administration committed to "set[ting] realistic requirements and stick[ing] to them and incorporat[ing] 'best practices' by not allowing programs to proceed from one stage of the acquisition cycle to the next until they have achieved the maturity to clearly lower the risk of cost growth and schedule slippage." If confirmed, what steps would you recommend to help ensure that the Department makes good on this commitment?

Answer. I am aware of the Navy's six-gate/two-pass process that was developed to establish set requirements and costs. If confirmed, I will utilize that process to review programs and ensure defined requirements and costs to avoid cost growth and delay.

Question. Recent congressional and DOD initiatives have attempted to reduce technical and performance risks associated with developing and producing major defense acquisition programs, including ships, so as to minimize the need for cost-reimbursable contracts. Do you think that the Department should move towards more fixed price-type contracting in developing or procuring major defense acquisition programs? Why or why not?

Answer. I believe that the usage of fixed or cost-type contracts must be made on a program-by-program decision. If confirmed, I will work closely with Navy officials to ensure the appropriate contract type is utilized.

Question. Section 811 of the NDAA for Fiscal Year 2008 amended section 2306b of title 10, U.S.C., to ensure that the DOD enters multiyear contracts only in cases where stable design and stable requirements reduce risk, and only in cases where substantial savings are expected. The revised provision requires that data be provided to Congress in a timely manner to enable the congressional defense committees to make informed decisions on such contracts.

Question. What types of programs do you believe are appropriate for the use of multiyear contracts?

Answer. In general, I support multiyear contracts when they make sense, as they help to generate substantial savings. If confirmed, I will work with Navy's acquisition enterprise to identify those programs where multiyear contracts provide the best value for the Department and American taxpayer, and are consistent with other Departmental priorities.

Question. Under what circumstances, if any, do you believe that a multiyear contract should be used for procuring Navy weapons systems that have unsatisfactory program histories, e.g., displaying poor cost, scheduling, or performance outcomes?

Answer. I do not feel ready to offer a definitive opinion on this question. If confirmed, I will work with DOD and Navy acquisition professionals to determine when to use multiyear contracts.

Question. If confirmed, will you ensure that the Navy and the Marine Corps fully comply with the requirements of section 2306b of title 10, U.S.C., as amended by section 811 of the NDAA for Fiscal Year 2008 (Public Law 110-181) with respect to programs that are forwarded for authorization under a multiyear procurement contract?

Answer. Yes.

Question. The statement of managers accompanying section 811 of the NDAA for Fiscal Year 2008 addresses the requirements for buying major defense systems under multiyear contracts as follows: "The conferees agree that 'substantial savings' under section 2306b(a)(1) of title 10, U.S.C., means savings that exceed 10 percent of the total costs of carrying out the program through annual contracts, except that multiyear contracts for major systems providing savings estimated at less than 10 percent should only be considered if the Department presents an exceptionally strong case that the proposal meets the other requirements of section 2306b(a), as amended. The conferees agree with a Government Accountability Office finding that any major system that is at the end of its production line is unlikely to meet these standards and therefore would be a poor candidate for a multiyear procurement contract."

If confirmed, under what circumstances, if any, do you anticipate that you would support a multiyear contract with expected savings of less than 10 percent?

Answer. I do not feel ready to offer a definitive opinion on this question. If confirmed, I will work with DOD and Navy acquisition professionals to determine when to use multiyear contracts.

Question. If confirmed, under what circumstances, if any, would you support a multiyear contract for a major system at the end of its production line?

Answer. Again, if confirmed, I would approach this question on a case-by-case basis and rely on the advice of DOD and Navy acquisition professionals to determine when to use multiyear contracts.

Question. What is your understanding of the new requirements regarding the timing of any DOD request for legislative authorization of a multiyear procurement contract for a particular program?

Answer. I have not been briefed on these requirements.

Question. What steps will you take, if confirmed, to ensure that the Navy complies with 10 U.S.C. section 2366a, which requires that the Milestone Decision Authority for a Major Defense Acquisition Plan certify that critical technologies have reached an appropriate level of maturity before Milestone B approval?

Answer. I have not fully reviewed this requirement and am not in the position to provide an opinion. However, if confirmed, I intend to work closely with DOD and Navy acquisition professionals to develop a world-class Navy acquisition enterprise that is fully compliant with associated laws.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics has issued a memorandum directing that the largest DOD acquisition programs undergo competitive prototyping to ensure technological maturity, reduce technical risk, validate designs, cost estimates, evaluate manufacturing processes, and refine requirements.

Do you support that requirement?

Answer. Yes.

Question. What steps will you take, if confirmed, to ensure that the Navy complies with this new requirement?

Answer. If confirmed, I will work closely with DOD and Navy acquisition professionals to develop a world-class Navy acquisition enterprise that is fully compliant with all associated laws and requirements.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. The United Nations Convention on the Law of the Sea (UNCLOS) is currently pending in the Senate.

What are your views on U.S. accession to UNCLOS?

Answer. I strongly support accession to the Law of the Sea Convention. Remaining a nonparty undermines our ability to further U.S. national security interests.

Question. From a national security standpoint, what do you see as the advantages and disadvantages to being a party to UNCLOS?

Answer. There are many national security advantages to acceding to the Law of the Sea Convention. Joining the Law of the Sea Convention will codify navigational rights, assist in the expansion of the Proliferation Security Initiative, and expand our enforcement authorities under international law.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Under Secretary of the Navy?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR EDWARD M. KENNEDY

SHIPBUILDING PLAN

1. Senator KENNEDY. Mr. Work, I remain concerned about the Navy's long-term shipbuilding plan and overall strategic direction. Despite my repeated requests for information, the Navy has yet to provide Congress sufficient justification in support of the proposal to truncate the DDG-1000 program at three ships and, instead, restart the DDG-51 production line.

It's my understanding that the Navy's desire to shift from DDG-1000s to DDG-51s is based on a belief that DDG-51s can be configured to provide greater capability in ballistic missile defense, advanced anti-ship cruise missile defense, and blue-water antisubmarine warfare. When testifying before the House Armed Services Subcommittee on Seapower on July 31, 2008, Vice Admiral McCullough stated, "Modifying the DDG-1000s to support these missions is unaffordable from the Navy's standpoint." Congress still has not seen the analysis to support this statement.

Accordingly, it's not clear to me that the Navy's path forward makes the most sense. When considering DDG-1000's capabilities, it is my understanding that:

- SM-2 is included in the baseline, and relatively modest research and development would allow the ship to also employ SM-3 and SM-6 missiles in a ballistic missile defense mission;
- The DDG-1000 could be further optimized for the ballistic missile defense mission through combat systems modifications, and by perhaps deleting the Advanced Gun System and replacing it with additional missile tubes;
- The current DDG-1000 radar has more potential for improvement to achieve the capability required to support a more robust ballistic missile defense mission, as compared to the radar on the DDG-51;
- The DDG-1000 Operational Requirements Document already articulates a requirement to provide area air defense capability, and that the advances in capability provided by the dual band radar are well suited to counter the Hezbollah threat often cited;
- The DDG-1000 has an integrated undersea warfare suite that is not only capable of blue water and littoral anti-submarine warfare, but is also capable of in-stride mine avoidance; and
- The DDG-1000 platform has more growth potential for carrying bigger, more capable radars as well as other new sensors and weapons.

It would therefore be helpful if the Navy provided a detailed comparative analysis between the DDG-51 and DDG-1000. I believe this analysis would entail providing complete cost data on a DDG-51, as envisioned by the Navy after restart of the production line, and on a DDG-1000 that has modifications the Navy believes are critical to perform the ballistic missile defense, area-defense anti-air warfare, and bluewater antisubmarine warfare missions driving the Navy's desire to shift between platforms.

Additionally, the Navy has asserted that their plan to restart the DDG-51 line would be budget neutral but, even if that were the case, it is not clear to me that the "budget neutral" plan is neutral when it comes to funding the workload necessary to support the surface combatant industrial base. Therefore, I would like to see how many DDG-51s the Navy plans to procure, budget quality estimates for that plan, what effect that plan would have on the surface combatant industrial base, and any associated termination costs while the Navy waits to begin building the CG(X) in 2017. In past communications with the Navy, I have a suggested format for providing some of the information requested.

Similarly, the path forward to the next generation of surface combatants, the CG(X), is even cloudier than it was last year. The Navy has still not provided:

- Analysis defining the differences in cost and schedule arising from the need to accommodate new sensors and weapons to counter the newly defined future threats, as compared with the cost and schedule of the previous shipbuilding program;
- A technology roadmap for transitioning to the CG(X) missile defense cruiser that replaces the Navy's previously preferred alternative of relying on the DDG-1000 program as the baseline for such a transition; or
- Any joint analysis by the Navy and the Missile Defense Agency setting forth additional requirements for investment in Aegis ballistic missile de-

fense systems beyond those previously programmed in budget requests and the associated Future Years Defense Program.

For any cost comparison of alternative shipbuilding plans, I believe Congress should be provided cost estimates that assume: (1) improvements are made to the dual band radar only as necessary to give the ship capabilities comparable to the radar envisioned for restarted DDG-51s; and (2) improvements are made that would reflect a growth path to greater capability while you are waiting on the CG(X) program.

I look forward to your assistance in obtaining this information so that we may continue this important dialogue on surface combatant production.

Mr. WORK. The current 313-ship battle force target includes 88 “large battle network combatants”—large, multi-mission warships most commonly referred to as guided missile cruisers and destroyers. This number is far higher than any other category of ships in the Navy’s battle force. I believe it is imperative that the Navy develop a well thought out and affordable building and maintenance plan for these “workhorses of the fleet.”

The questions and arguments posed above are important ones. If confirmed, I hope to examine them in great detail, using all of the collected data in the Department of the Navy. Once I do this, I will be able to give an informed opinion on them to the Secretary of Defense, Secretary of the Navy, and to you and your staff.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

FISCAL YEAR 2010 PRESIDENTIAL BUDGET REQUEST

2. Senator MCCAIN. Mr. Work, on April 6, 2009, Secretary Gates announced how the fiscal year 2010 defense budget request will reshape the priorities of the defense establishment. In so doing, he announced his decision to cut dramatically or cancel various major weapons systems. Are there any aspects of Secretary Gates’ plan with which you have any difficulty? Please explain.

Mr. WORK. We fully support Secretary Gates’ plan. In this challenging fiscal and budgetary environment, we must look hard at every requirement, every development plan, and every capability. We must also demand performance from the acquisition community and industry. The decisions by Secretary Gates on Navy programs were consistent with these requirements, and very prudent.

In that regard, it is obvious that acquisition processes need reform in some very fundamental ways. Regaining control of acquisition processes is one of the most complex challenges that we will face. We are especially drawn to efforts directed at establishing cost control over out-of-control programs and making better use of independent cost estimates. The recommendations of Secretary Gates are clear statements that past behavior cannot continue.

3. Senator MCCAIN. Mr. Work, what is your view of the aspect of the plan that permanently changes the aircraft carrier force structure to 10 from the current number of 11?

Mr. WORK. The Navy remains committed to a force structure of 11 carriers for the next several decades, a commitment that Secretary Gates’ April budget announcement supports. However, the Navy requests a temporary waiver to operate 10 carriers during the period between inactivation of USS *Enterprise* (CVN 65) and the commissioning of USS *Gerald R. Ford* (CVN 78). During this 33 months period, the Navy assesses it can meet operational commitments by adjusting operational and maintenance schedules.

4. Senator MCCAIN. Mr. Work, what is your view of the aspect of the plan that commits, to the exclusion of procuring other tactical fighter platforms, to the Joint Strike Fighter (JSF) program in light of the development and technology risk still associated with that program?

Mr. WORK. The Department of the Navy (DON) believes that JSF development and technology risk are manageable. The JSF Program Office is providing program-wide schedule and technology risk analysis in conjunction with periodic Defense Acquisition Board reviews. The timing of these reviews will ensure the analysis is available to support key acquisition milestone decisions and budget discussions.

During the transition to the JSF, the DON is exploring a range of options to meet its continuing strike fighter requirements. These include supporting legacy aircraft; Service Life Extension Program (SLEP)ing some number of F/A-18 A-Ds; and procuring more F/A-18E/F Super Hornets. In this regard, the Navy is procuring F/A-18E/F Super Hornets in fiscal year 2010 via a single year procurement in PB 2010.

The Department will continue to assess its TACAIR force structure and inventory requirements through this summer's Quadrennial Defense Review (QDR).

5. Senator MCCAIN. Mr. Work, in the budget blueprint that supports the fiscal year 2010 presidential budget request, the administration committed to "set[ting] realistic requirements and stick[ing] to them and incorporat[ing] 'best practices' by not allowing programs to proceed from one stage of the acquisition cycle to the next until they have achieved the maturity to clearly lower the risk of cost growth and schedule slippage." If confirmed, what steps, if any, would you recommend to help ensure that the Department makes good on this commitment?

Mr. WORK. We fully support the increased emphasis on upfront planning as specified in the 2008 changes made to DOD 5000.2 in the National Defense Authorization Act for Fiscal Year 2008. The defense acquisition process needs improvement in the areas of systems engineering, developmental test and evaluation, technological maturity, and cost estimation, and that changes are needed to strengthen a culture of acquisition excellence in the Department of Defense (DOD). We support the administration's commitment to making trade-offs among cost, schedule, and performance to significantly reduce cost growth in major defense acquisition programs. We will also ensure that requirements are defined and understood and that technologies are mature prior to entering system development, thus reducing risks to both cost and schedule.

ACQUISITION REFORM POLICY

6. Senator MCCAIN. Mr. Work, what are your views regarding the need to reform the process by which the Navy acquires major weapons systems?

Mr. WORK. We support the "Weapons Systems Acquisition Reform Act of 2009." We fully agree with an emphasis on sound cost estimation, systems engineering, and performance assessment upfront to establish a culture of acquisition excellence. These are all guiding principles that underpin our vision as an enterprise committed to getting timely, effective, and affordable solutions to our warfighters. A number of acquisition process changes have recently been initiated that will take some time to evaluate. However, we believe the emphasis on due diligence during both the requirements and technology development stages of any program should improve acquisition performance. We also intend to stress and enforce discipline of all established processes.

7. Senator MCCAIN. Mr. Work, if confirmed, what steps, if any, would you recommend to improve the acquisition process?

Mr. WORK. We are aware of the Department of Navy's two-pass/six-gate acquisition process and will personally review its effectiveness in supporting program execution and oversight. We need to put more emphasis in the acquisition process on solid cost estimation, risk tolerant schedules, and understanding where the technical risks are. We also will insist on realistic plans for mitigating those risks. Moreover, we both recognize and accept that when new technical problems are identified we cannot hold cost and schedule constant. We believe the emphasis on due diligence during both the requirements and technology development stages of any program should improve acquisition performance. We also intend to stress and enforce discipline of all established processes.

In addition, the health of the defense and commercial industrial base are critical to our national security. We will support collaborative efforts between the government and industry in advancing the state-of-the-art in science and technology in both basic and applied research. We will also support technology development in all areas that have potential military utility for the warfighter, to deliver high performance weapons on target, more effectively, efficiently, and at reasonable cost to the taxpayer.

8. Senator MCCAIN. Mr. Work, department-wide, nearly half of the DOD's 95 largest acquisition programs have exceeded the Nunn-McCurdy cost growth standards established in section 2433 of title 10, U.S.C. The cost overruns on these major defense acquisition programs now total \$295 billion over the original program estimates, even though the Department has cut unit quantities and reduced performance expectations on many programs in an effort to hold costs down. Many of those programs are being executed by the Navy. What steps, if any and if confirmed, would you take to address the out-of-control cost growth on the Navy's major defense acquisition programs?

Mr. WORK. We believe increased collaboration between industry and Government early in the program formulation stage will ensure there is a realistic balance. We must establish realistic baselines before entering into system development which can only be accomplished with a thorough understanding of warfighting requirements and the maturing of technologies early in the process. Overestimating performance leads us to proceeding with immature technologies while underestimating cost leads us to compressing development efforts. Together these dynamics lead us to taking on more risk, which often leads to cost increases and schedule delays.

We will continue the process initiated last year to rebuild the DON Cost Estimating Enterprise which was based upon an analysis of gaps within the existing structure. This effort culminated with the release of an instruction which reestablished the Naval Center for Cost Analysis, enabled greater insight into the costs of Major Defense Acquisition programs, and focused efforts on rebuilding the Naval System Commands Cost Analysis centers. We will continue this effort to ensure the Department meets increased demands across all cost estimating functions including Earned Value Management, Operating and Support analysis, and greater investment cost rigor in the early life of the Department's acquisition programs. The DON Cost Estimating community is continuing to take steps to rebuild and rebalance the core cost estimating capabilities within the government to better establish realistic cost analysis.

9. Senator MCCAIN. Mr. Work, what principles will guide your thinking on whether to recommend terminating a program that has experienced critical cost growth under Nunn-McCurdy?

Mr. WORK. The principles that will guide our decisions will be the Nunn-McCurdy certifications as modified by the Weapons Systems Acquisition Reform Act of 2009 on whether:

- The root cause of the program's Nunn-McCurdy breach is properly identified, understood, and correctable;
- The program is essential to national security;
- No alternative will provide equal or greater capability at less cost;
- New program or unit cost estimates are reasonable; and
- Management structure for program is adequate to manage and control unit costs.

We will use these certifications to evaluate a program for any significant breach of its baseline and not just if it's a unit cost issue.

10. Senator MCCAIN. Mr. Work, recent congressional and DOD initiatives have attempted to reduce technical and performance risks associated with developing and producing major defense acquisition programs, including ships, so as to minimize the need for cost-reimbursable contracts. Do you think that the Department should move towards more fixed price-type contracting in developing or procuring major defense acquisition programs? Why or why not?

Mr. WORK. Yes. We are committed to a thorough analysis that ensures the right contract type at the right time that balances risk and ensures best value to the government. We fully support the DOD policy to examine the increased use of fixed-price type contracts in the procurement of major defense acquisition programs.

S.454, THE LEVIN-MCCAIN ACQUISITION REFORM BILL

11. Senator MCCAIN. Mr. Work, recently, Chairman Levin and I sponsored acquisition reform legislation, titled: "Weapons Systems Acquisition Reform Act of 2009." The legislation recognized that vital to reforming how we buy the biggest and most expensive weapons systems is to start them off right—by emphasizing sound systems engineering so that we can obtain reliable technological readiness assessments and independent cost estimates upfront. The more we understand technology risk early and manage that risk, the less likely that such risk will present themselves later in the acquisition process and blow out costs. What is your assessment of that bill, and did we get anything wrong?

Mr. WORK. We strongly support the spirit and intent of the "Weapons Systems Acquisition Reform Act of 2009". We agree that the defense-acquisition process needs improvement in the areas of systems engineering, developmental test and evaluation, technological maturity, and cost estimation, and that changes are needed to strengthen a culture of acquisition excellence in DOD. The DON is committed to making trade-offs among cost, schedule, and performance to significantly reduce cost growth in major defense acquisition programs. The DON is working closely with DOD to develop a common approach to implementing the requirements. DON is al-

ready involved with acquisition process improvements, such as implementing the two-pass/six-gate governance in 2008, and is committed and working diligently to implement required improvements that will require a longer-term implementation cycle.

TACTICAL AVIATION

12. Senator McCAIN. Mr. Work, the Navy is facing a potential shortfall of strike fighter aircraft in the next decade even if the Navy continues to buy F/A-18E/F aircraft and F-35 JSF aircraft at the rate projected in last year's budget. What is your assessment of this situation and what actions should the Navy take to address this potential shortfall?

Mr. WORK. The Navy and Marine Corps share a common inventory of 623 legacy F/A-18 A-D aircraft. Navy and Marine Corps operate F/A-18 A-C strike fighter squadrons into carrier air wings and Marine air groups under the charter of TACAIR Integration (TAI). There are four considerations to mitigate negative strike fighter inventory trends:

1. Maintain wholeness of the JSF program. Department strike fighter inventory projections are based on the following assumptions: the F-35B will reach IOC in 2012 and F-35C will reach IOC in 2015; and that JSF will deliver at planned quantities/cost. Any program slips, major costs increases, or decreases to planned procurement quantities may exacerbate the DON strike fighter shortfall.

2. Extending the service life of F/A-18 A-D Hornets. Over half of the DON'S Hornets are beyond 6,000 flight hours, towards a currently approved 8,600 flight hour service life. Extending the service life of as many as 300 of these aircraft is an essential element to maintaining available DON strike fighter inventory through transition to JSF. Analysis is ongoing within the Department to refine cost estimates and the process for executing this service life extension.

3. Continued sustainment and support of currently fielded legacy aircraft (AV-8, EA-GB, F/A-18 A-D) through transition to JSF. These aircraft are the bulk of the Department's current TACAIR inventory and require continuous support—including program related engineering and logistics—through the end of transition to JSF, currently envisioned to be out to 2023.

4. Additional investment in F/A-18E/F Block II Super Hornet procurement. In PB 10, F/A-18E/Fs are budgeted for single year procurement in fiscal year 2010. Future procurements are being considered in the 2009 QDR.

The Department will re-assess force structure requirements and inventory investments this summer during the QDR.

13. Senator McCAIN. Mr. Work, in your view, should the Navy continue to operate the 10 carrier air wings that support the current fleet of 11 aircraft carriers, or should the air wing force structure be modified to reflect a planned reduction to a permanent level of 10 aircraft carriers?

Mr. WORK. The Navy remains committed to a force structure of 11 carriers and 10 air wings for the next several decades. However, between the decommissioning of USS *Enterprise* and the commissioning of USS *Ford*, the Navy requests to temporarily decrease its aircraft carrier fleet from 11 to 10 ships. During this 33 month period, the Navy will continue to require and utilize each of its 10 carrier air wings (CVW) to meet its deployment schedule and to maintain its ability to respond to emergent operational requirements.

14. Senator McCAIN. Mr. Work, alternatives for maintaining sufficient strike assets are limited if there are new schedule difficulties with the JSF program. It appears that the Navy's options for extending the service life of existing F/A-18 aircraft are limited and procurement of additional F/A-18 aircraft beyond those planned last year may be more difficult with the Secretary of Defense's recent announcement of a reduction of nine F/A-18 aircraft from the number originally planned for the fiscal year 2010 program. What other potential alternatives do you see for maintaining sufficient strike assets if there were any additional slippage in the initial operating capability date for the F-35 JSF?

Mr. WORK. The DON is closely monitoring the JSF program. JSF is currently scheduled for an F-35B IOC of 2012 and an F-35C IOC of 2015. The Department is refining cost estimates and process for extending the service life for as many as 300 legacy F/A-18 A-D aircraft from 8,600 flight hours to 10,000 flight hours

through a service life extension program—service life extension is completely within engineering feasibility for this number of aircraft.

Maintaining JSF wholeness, continued support of legacy aircraft, SLEP of F/A-18 A-D and continued procurement of F/A-18E/F are options being pursued to provide the strike fighter inventory necessary to support the DON's force structure requirements.

The Navy is procuring F/A-18E/F Super Hornets in fiscal year 2010 via a single year procurement in PB 10. The Department will continue to assess its TACAIR force structure and inventory requirements through this summer's QDR.

15. Senator McCAIN. Mr. Work, is it a viable solution to consider purchasing additional F/A-18 Super Hornets, the only new strike fighter aircraft in production? If not, how will the Navy expect to solve this shortfall?

Mr. WORK. Maintaining JSF wholeness, continued support of legacy aircraft, SLEP of F/A-18 A-D and continued procurement of F/A-18E/F are options to provide the strike fighter inventory necessary to support the DON's force structure requirements. The Navy is procuring F/A-18E/F Super Hornets in fiscal year 2010 via a single year procurement in PB 10. The Department will continue to assess its TACAIR force structure and inventory requirements through this summer's QDR.

F-35 JOINT STRIKE FIGHTER PROGRAM

16. Senator McCAIN. Mr. Work, the Services are planning on purchasing approximately 2,450 JSFs at a cost of over \$300 billion, a sum that reflects a cost growth of nearly 47 percent beyond original 2002 estimates. Recently, the Government Accountability Office issued a report on the JSF program that was critical of its past cost overruns and schedule slips, and predicted that development will cost more and take longer than what has been reported to Congress. In November 2008, a Pentagon Joint Estimating Team reportedly said the JSF program would require an additional 2 years of testing and would need another \$15 billion to cover new development costs.

If the F-35 program costs continue to significantly increase and the F-35 development does not go as well as promised—draining resources from other priority programs that are needed by the Navy—what actions would you recommend the Department take to remedy strike-fighter shortfalls and preserve its limited procurement base?

Mr. WORK. The DON believes that JSF development and technology risk are manageable. The JSF Team closely monitors all risks and provides program-wide schedule and technology risk analysis in conjunction with periodic Defense Acquisition Board reviews. The timing of these reviews will ensure the analysis is available to support key acquisition milestone decisions and budget discussions.

The Navy and Marine Corps share a common inventory of 623 legacy F/A-18 A-D aircraft. Navy and Marine Corps integrate F/A-18 A-C strike fighter squadrons into carrier air wings and Marine air groups under the charter of TAI. There are four considerations to mitigate negative strike fighter inventory trends:

1. Maintain wholeness of the JSF program. Department strike fighter inventory projections consider that F-35B will IOC in 2012 and F-35C will IOC in 2015, and that JSF will deliver at planned quantities, as a foundation. The Department needs JSF to deliver planned quantities at a delivery rate that supports these planned initial operational capability dates. Any further slips or decreases to planned procurement quantities further exacerbates future DON strike fighter inventory issues.

2. Extending the service life of F/A-18 A-D Hornets. Over half of the DON Hornets are beyond 6,000 flight hours, towards a currently approved 8,600 flight hour service life. Extending the service life of as many as 300 of these aircraft is an essential element to maintaining available DON strike fighter inventory through transition to JSF. Analysis is ongoing within the Department to refine cost estimates and the process for executing this service life extension.

3. Continued sustainment and support of currently fielded legacy aircraft (AV-8, EA-6B, F/A-18 A-D) through transition to JSF. These aircraft are the bulk of the Department's current TACAIR inventory and require continuous support—including program related engineering and logistics—through the end of transition to JSF, currently envisioned to be out to 2023.

4. Additional investment in F/A-18E/F Block II Super Hornet procurement. In PB 10, F/A-18E/F are budgeted for single year procurement in fiscal year 2010.

The DON will continue to guide JSF development and update assessments of costs and scheduled deliveries to the fleet. We will monitor F/A-18 A-D flight hours flown and update cost estimates for needed life extensions and sustainment. Procurement of additional F/A-18E/F Super Hornets will continue to be a viable alternative in the near term. All these factors will be taken into account when the Department determines how best to satisfy the strike fighter force structure needs established in the QDR.

SHIPBUILDING PLAN

17. Senator MCCAIN. Mr. Work, the most recent Navy 30-year shipbuilding plan included arguably over-optimistic assumptions about the unit costs of ships and excluded any funding for a replacement for the current fleet of Trident ballistic missile submarines. Do you agree that the 30-year shipbuilding plan should reflect realistic cost estimates and include all important shipbuilding efforts for that document to be useful for decisionmakers?

Mr. WORK. The 30-year shipbuilding plan, as submitted to Congress, reflects the best estimates for the ships included in the plan. The near-term section of the future plan reflects cost estimates that are predicted, in most cases, on existing production lines for ships either currently being procured or very near the completion of contract negotiations for their procurement. The period covered by about 10-20 years in the future, largely includes what we expect to be the economic conditions that the shipbuilding industry will face and this too is based on our best understanding of the labor rates and material cost escalation that this industry will incur. The period beyond about 20 years, out to the end of the report, is a planning range and the costs included in this part of the report reflect those costs that the Navy believes to be affordable for the ship types that will be procured in the period. Since there are essentially no designs to use as a basis for the cost models, we believe that projecting an affordable cost for these ships is the appropriate metric to use. This introduces discipline in the expectations for what these ships should be able to do since it is unlikely that there would be infinite resources available for their procurement.

A majority of the ships in the 30-year shipbuilding plan have not yet been designed and therefore cost must be based on the best estimate of what the new ship will be including new technology, and appropriate hull size and propulsion system. As more accurate cost estimates are determined in future ship development, the Navy will adjust the average annual investment objective or revisit individual ship and/or force warfighting requirements as appropriate. Navy's goal in producing the shipbuilding plan is always to provide a balanced capability, with acceptable levels of risk that provides stable industry demand at reasonable cost.

In addition to the National Security Strategy, the statutory guidelines required the report to reflect the QDR. The latest QDR is ongoing in parallel with the National Security Strategy work. Also, the Nuclear Posture Review, which has direct bearing on the numbers of strategic ballistic missile submarines, is due for completion incident with submission of the fiscal year 2011 budget. In addition, a Ballistic Missile Defense Review is ongoing and is also due for completion with the fiscal year 2011 budget. These efforts will likely have a substantive impact on the Navy's force structure requirements.

18. Senator MCCAIN. Mr. Work, in your view, what level of funding will the Navy need to execute its 30-year shipbuilding plan, and considering competing priorities, do you believe this level of funding is realistic?

Mr. WORK. As the National Security Strategy is due for release this summer, the Navy considers it prudent to defer its fiscal year 2010 report and submit its next report concurrent with the President's fiscal year 2011 budget.

In addition to the National Security Strategy, the statutory guidelines required the report to reflect the QDR. The latest QDR is ongoing in parallel with the National Security Strategy work. Also, the Nuclear Posture Review, which has direct bearing on the numbers of strategic ballistic missile submarines, is due for completion incident with submission of the fiscal year 2011 budget. In addition, a Ballistic Missile Defense Review is ongoing and is also due for completion with the fiscal year 2011 budget. These efforts will likely have a substantive impact on the Navy's force structure requirements.

The President's budget submission for fiscal year 2010 represents the best overall balance between procurement for future ship and aircraft capability with the resources necessary to meet operational requirements and affordability.

AIRCRAFT CARRIERS

19. Senator MCCAIN. Mr. Work, under his recently announced budget plan, the Secretary of Defense proposed that only 10 aircraft carriers be operational. But, we may need 11: the slip in the delivery of the CVN-78 (USS *Gerald R. Ford*) to 2015 created a 2-year gap between the scheduled decommissioning of the USS *Enterprise* and the availability of a new aircraft carrier. That gap could be longer because of technical difficulties with that carrier's electromagnetic aircraft launch system (EMALS). What is your view of the plan that Secretary Gates announced to permanently change the aircraft carrier force structure to 10 from the current number of 11?

Mr. WORK. The Navy is currently committed to an 11-carrier force structure for the next several decades, and this commitment was supported by Secretary Gates during his April budget announcement. However, as you have pointed out, the Navy requires temporary legislation to operate with 10 carriers during the period between inactivation of USS *Enterprise* (CVN 65) in November 2012 and the delivery of *Gerald R. Ford* (CVN 78) in September 2015. Navy assesses it can meet operational commitments during this approximately 33-month gap by adjusting both carrier and air wing maintenance and operational schedules. The carrier force structure, along with the entire battleforce, is being considered in the QDR. EMALS development is currently on track to meet the planned delivery of CVN 78 in September 2015.

20. Senator MCCAIN. Mr. Work, in your view, should DOD retire another aircraft carrier when the USS *Gerald R. Ford* is delivered to keep the carrier force structure at 10 carriers?

Mr. WORK. The Navy has no current plans to retire an aircraft carrier upon delivery of USS *Gerald R. Ford* (CVN 78). The Navy is currently committed to an 11 carrier force structure for the next several decades, and this commitment was supported by Secretary Gates during his April budget announcement. However, as you have pointed out, the Navy requires temporary legislation to operate with 10 carriers during the period between inactivation of USS *Enterprise* (CVN 65) in November 2012 and the delivery of *Gerald R. Ford* (CVN 78) in September 2015. Navy assesses it can meet operational commitments during this approximately 33-month gap by adjusting both carrier and air wing maintenance and operational schedules. The carrier force structure, along with the entire battleforce, is being considered in the QDR.

21. Senator MCCAIN. Mr. Work, do you believe that the requirements of the combatant commanders for an aircraft carrier presence be met with only 10 operational aircraft carriers?

Mr. WORK. The Navy can sustain current COCOM demand for carrier presence with 10 operational aircraft carriers for a relatively short and defined period of time with moderate risks by leveraging the inherent flexibility of the Fleet Response Plan. Navy will continue to evaluate projected COCOM demand and use the QDR and other strategic planning processes to match carrier force structure to projected demand; this requirement will be based on fiscal and operational risk.

SUBMARINE STRATEGIC WEAPONS PROGRAMS COST REIMBURSABLE CONTRACTS

22. Senator MCCAIN. Mr. Work, for over 30 years the Navy has manufactured and sustained its Trident submarine and other related weapon systems under a cost-reimbursable contract. This is unacceptable to me. After a 30-year procurement history, costs and design are (or should be) stable and enough is (or should be) known, about technology risk associated with those programs so that the Navy should be contracting here on a fixed-price—not cost-reimbursable—basis. However, the Navy's Strategic Weapons Programs (SSP), which manufactures and sustains logistical support for nuclear submarines, continues to award—inappropriately, in my view—multi-hundred million-dollar cost-plus contracts for, among other things, the production of the D-5 Trident Missile System. Why is there this anomaly with the Navy's submarine programs?

Mr. WORK. As the Fleet Ballistic Missile Program has matured over the last four decades, SSP has developed and implemented an acquisition strategy that maintains a primary focus on safety and reliability, while managing cost risk at or below budget. Because of the strategic importance of the system, any deviation from this successful acquisition strategy could engender unnecessary unintended consequences, and jeopardize the safety and reliability of the weapon. At inception, during concept formulation and advanced development, Cost Plus Fixed Fee (CPFF) contracts were used, placing maximum cost risk on the Government, due to the

overall program uncertainty and rapidly changing requirements. As the program matured into full scale development, the contract type moved along a continuum to Cost Plus Incentive Fee (CPLF) with a conservative share ratio of 90/10 or 80/20. Eventually, as the requirements stabilized the share ratio was increased to 70/30 for initial production activities and 50/50 for mature production efforts.

SSP has committed to transition the mature full-rate production effort for TRIDENT II D5 Subsystems to fixed-price contract beginning in fiscal year 2011. We anticipate that this will result in approximately 50 percent of all contracted dollars being fixed price. SSP is developing the transition plan for mature full rate production items including the appropriate contractual and acquisition reviews to support completion by 2011. As always, we will continue to monitor and manage technical risk throughout this transition and make any adjustments that are deemed necessary to ensure we maintain the program's preeminent responsibility for safety and reliability.

23. Senator MCCAIN. Mr. Work, will you look into this contracting folly and ensure me that the Navy will begin awarding contracts on this submarine program and other SSPs under fixed price-type contracts, where appropriate?

Mr. WORK. SSP has committed to transition the mature full-rate production effort for TRIDENT II D5 Subsystems to fixed price contract beginning in fiscal year 2011. We anticipate that will result in approximately 50 percent of all contracted dollars being fixed price. SSP is developing the transition plan for mature full rate production items including the appropriate contractual and acquisition reviews to support completion by 2011. As always, we will continue to monitor and manage technical risk throughout this transition and make any adjustments that are deemed necessary to ensure we maintain the program's preeminent responsibility for safety and reliability.

QUESTIONS SUBMITTED BY SENATOR JOHN THUNE

STRATEGIC DISPERSAL OF THE NUCLEAR CARRIER FLEET

24. Senator THUNE. Mr. Work, the Navy has undergone and completed a Final Environmental Impact Statement. The Secretary of the Navy, in consultation with the Chief of Naval Operations, signed a Record of Decision to develop a second nuclear-carrier homeport on the east coast on January 14, 2009, and determined that it is in the best national security interest of the Nation to homeport a nuclear powered aircraft carrier (CVN) at Naval Station Mayport. During your Senate Armed Services Committee hearing on April 28, 2009, understanding the sensitivities surrounding this matter, I asked you what you thought of strategically dispersing our carrier fleet on the east coast and whether or not you agreed with the Navy's requirement to make Mayport nuclear ready and continue the long-term practice of strategic dispersal. At the time, you answered that you understood the issue and that it was to be made part of the QDR but that you did not have enough information to provide an answer as to how you felt about the Navy's requirement. This was the culmination of 2½ years of effort to ensure compliance with environmental regulations as well as strategic needs. What is your view of strategic dispersal?

Mr. WORK. The strategic dispersal of the fleet has long been an issue of great importance to Navy leadership. The laydown of U.S. conventional forces has also been a matter of great importance to DOD leadership. Accordingly, as I understand it, the issue of fleet dispersal is now part of DOD's global posture deliberations in the 2009 QDR. If confirmed, I hope to take part in any global posture deliberations, and any debates over where our carriers are homeported.

25. Senator THUNE. Mr. Work, do you understand its importance to the Navy?

Mr. WORK. The Navy's requirement for strategic dispersal can be traced back to the turn of the century, when the United States built and maintained separate Atlantic and Pacific fleets, and built a Panama Canal to facilitate fleet concentration. Strategic dispersal remained important throughout the Cold War, and remains important to this day. The exact laydown of the fleet is derived from both strategic analysis and judgment.

26. Senator THUNE. Mr. Work, how do you view this Navy requirement based on the information you have?

Mr. WORK. The decision to address the carrier homeport decision as part of the QDR does not diminish the importance of strategic dispersal in any way. The QDR will likely try to balance the requirement for strategic dispersal with the National

Defense Strategy, joint force requirements, and cost. If confirmed, I hope to be part of these deliberations.

27. Senator THUNE. Mr. Work, if confirmed, what role do you envision playing in the QDR process?

Mr. WORK. If confirmed, I hope to play an active role in the QDR process. However, the Under Secretary of the Navy performs those duties as prescribed by the Secretary of the Navy. As such, I would look to the Secretary to direct my exact role in the QDR process.

28. Senator THUNE. Mr. Work, do you believe it is important to proceed with planning and design of the nuclear maintenance facility at Naval Station Mayport based on the information you have?

Mr. WORK. It is my understanding that additional decisions beyond the recommended dredging and pier maintenance at Naval Station Mayport will be made during the upcoming QDR. I do not have enough information on the planning and design of a nuclear maintenance facility at Naval Station Mayport to fully answer this question. However, if confirmed, and if tasked by the Secretary of the Navy to do so, I will look closely at this issue.

CARRIER NUMBERS

29. Senator THUNE. Mr. Work, section 5062 of title 10 of the U.S. Code states: "The naval combat forces of the Navy shall include not less than 11 operational aircraft carriers." In your document, "Strategy for the Long Haul," you project that the Navy will deploy 10 carriers from 2013 to 2038. As Under Secretary of the Navy, how will you ensure that the legal requirement of not less than 11 carriers will be met?

Mr. WORK. If confirmed as Under Secretary of the Navy, I will work to the best of my abilities to enforce any legal requirement established by Congress.

ANTI-SUBMARINE WARFARE

30. Senator THUNE. Mr. Work, in your February 2009 paper you discuss increasing the submarine force. In light of last week's demonstration of Chinese submarines in Qingdao, and the world's overall increase in submarine construction, what do you see as the future of anti-submarine warfare?

Mr. WORK. Command of the seas depends on achieving and maintaining undersea superiority. The proliferation of new, extremely quiet diesel-electric submarines—augmented with air independent propulsion systems that allow them to patrol for extended periods of time without having to recharge their batteries—underlines the importance of maintaining our undersea superiority. Antisubmarine warfare today is a "team sport" that requires highly capable submarines of our own. The future of antisubmarine warfare will include an increase in production of the *Virginia* class SSNs to two per year. However, it will also require that the Navy have a long-range maritime patrol aircraft, ASW helicopters, ASW capable surface ships, unmanned systems, and even more advanced capabilities to combat the growing threat. As a result, the Navy's P-8 Poseidon program, SH-60 Romeos, the LCS with its ASW module, the new Broad Area Maritime Surveillance (BAMS) UAV, and a robust ASW research and development effort are as important to our future antisubmarine warfare capabilities as our SSNs.

LITTORAL COMBAT SHIP COST

31. Senator THUNE. Mr. Work, the Navy has requested two more Littoral Combat Ships (LCS) in 2009. We anticipate, based on Secretary Gates' words, three more to be requested in 2010. The Navy has two designs for the LCS sea frame; one primed by Lockheed Martin and the other by General Dynamics. Although originally a down-select to one sea frame design was envisioned early in the program, recent comments by Mr. John Young, USD(AT&L), indicates both LCS designs could be procured in significant quantities. The Navy ultimately plans to procure 55 LCS sea frames. It is my understanding that the Navy has deferred a decision to choose one version over another of the LCS for a variety of reasons. If the Navy were to choose to continue with two variants, would it make sense to strive for as much commonality as possible in fitting out those ships?

Mr. WORK. As I understand it, the Navy desires to keep both versions in production for an extended period of testing before deciding whether or not to move to a

single hull. As a general principle, I endorse the idea of common combat systems with open architectures as well as common ship systems. If confirmed, I would work to make sure that smart LCS acquisition strategies are developed, that commonality opportunities for the LCS ships are fully explored.

32. Senator THUNE. Mr. Work, how will the Navy ensure commonality?

Mr. WORK. Both component and system commonality opportunities should be considered and business cases must be developed and evaluated for each alternative to understand the acquisition and/or life cycle cost savings and associated investment (if required) for them. A final decision should be based on which alternative provides the greater return on investment of taxpayer dollars.

33. Senator THUNE. Mr. Work, do you think 55 is the right number based on the information you have?

Mr. WORK. The current requirement for 55 LCSs was developed during the 2006 QDR. The requirement for 55 ships will be reviewed and validated or changed during the 2009 QDR. However, Secretary Gates' decision to accelerate the LCS buy indicates how important this platform is to the future Navy. If confirmed, I hope to take part in deliberations over the size of the future LCS fleet and the size of the overall battle force.

313-SHIP NAVY

34. Senator THUNE. Mr. Work, earlier this year, the Chief of Naval Operations, Admiral Roughead, said, "313 is still the floor when it comes to the size of the fleet we need to carry out our maritime strategy. The capacity of our fleet—the number of ships we have—matters greatly today and I believe will matter even more in the future." Are you committed to the Navy's uniformed leaders' plan of building at least 313 ships?

Mr. WORK. I am committed to providing the best, most balanced, and most capable Navy possible within the confines of expected future resource streams. I agree with Admiral Roughead that the fleet must have both the capability and the capacity to accomplish the missions the Navy is asked to fulfill. The exact numbers and types of ships needed will be dependent upon our national strategy and projected Navy topline. I anticipate the ongoing QDR will help shape the necessary makeup of naval forces and may change the overall battle force number. If confirmed, I intend to take part in the deliberations over the size of the future fleet.

35. Senator THUNE. Mr. Work, do you believe that is the right number based on the information you have?

Mr. WORK. Since the 1992–1993 Bottom-Up Review, the requirement for a "two war" fleet has fluctuated between 305 to 346 ships, with an average of about 318 ships. The current requirement for 313 ships is therefore consistent with past reviews. This number might change if the national strategy changes, or if the DON is given different guidance from the Secretary of Defense.

QUESTIONS SUBMITTED BY SENATOR DAVID VITTER

NAVY SHIPS

36. Senator VITTER. Mr. Work, what are your thoughts on the future of shipbuilding, specifically the LPD–17?

Mr. WORK. The DON must develop an affordable long-term shipbuilding plan that provides the foundation for the future Navy force structure. This stable long-term shipbuilding plan would reduce industrial base volatility and allow the industry to better match investments to meet Navy capabilities.

The Navy and Marine Corps have thoroughly discussed the number of LPD–17 ships required. The CNO and CMC believe the requirement is for 11 ships. In the January 2009 Report to Congress on Naval Amphibious Force Structure, the current CNO and CMC reaffirmed that requirement and agreed to sustain an amphibious force of about 33 total amphibious ships (30 operationally available) in the assault echelon, evenly balanced at 11 aviation capable ships, 11 LPD–17 class ships, and 11 LSD 41 class ships. A summary of the broader amphibious lift agreement:

- The amphibious lift requirement is to lift the assault echelon (AE) of 2.0 Marine Expeditionary Brigades (MEBs).

- The 33-ship force accepts risk in the arrival of combat support and combat service support elements of the MEB but has been adjudged to be adequate in meeting the needs of all parties within today's fiscal limitations.
- The Navy currently has a total of 31 Assault Echelon ships in commission.

With respect to the LPD-17 Program, four ships have been delivered, five additional ships are currently under contract and in various stages of construction. A Request for Proposal for the design and construction of the 10th ship of the program was released by the Navy in May 2009 and funding for advance procurement for the 11th LPD is included in the fiscal year 2010 budget request.

The Navy is making a significant investment in expeditionary lift capacity and will continue to work with the Marine Corps to meet requirements within budgetary constraints.

37. Senator VITTER. Mr. Work, do you believe that commonality for hulls should be utilized more and should be mandated to an extent to realize cost savings?

Mr. WORK. No, I do not believe commonality of hulls should be automatically mandated. That said, the Navy and industry have stated for several years that reducing the number of ship hull forms would help stabilize the shipbuilding program and have the added benefit of reducing cost. I support the idea of doing so.

In that regard, the Navy's long-range vision reduces the types and models of ships, maximizes the reuse of ship designs and components, and implements open architecture for software and hardware systems and mission systems modularity. The Navy is proposing that variants which leverage existing production lines be explored. For example, for LCC(R), in addition to reviewing the land based solutions, there are two ship variants being addressed in the AoA, LPD-17 and T-AKE. The potential requirement for a LSD/LPD(X) is also being explored.

QUESTION SUBMITTED BY SENATOR SUSAN COLLINS

313-SHIP NAVY

38. Senator COLLINS. Mr. Work, you have written extensively on defense strategy. In your recently released report titled: "The U.S. Navy: Charting A Course For Tomorrow's Fleet," you cited the minimum two-war standard for the Navy's Total Force Battle Network, which was supported by substantial analyses and 3 successive QDRs, was 346 ships, with an average objective fleet target of about 320 ships. The Chief of Naval Operations has stated that a fleet of 313 ships is a floor, not a ceiling. Do you believe this figure is sufficient in light of the requirements the Navy is facing today?

Mr. WORK. The DOD is currently conducting a QDR, and three separate reviews: Nuclear Posture Review; Ballistic Missile Defense Review; and Space Review. All of these efforts will likely have a substantive impact on the Navy's force structure requirements.

Until the Navy has completed these ongoing studies and determined where the Nation's priorities are in these critical areas, it is difficult to determine what lies ahead for Navy force structure. Although, absent changes in the missions assigned to the Navy, both in combat scenarios and in the complex security environment of today, we are committed to building a force structure that does not place our sailors, airmen, and marines at risk in the event they are called upon to complete their assignments—whether or not this is a 313-ship force, we will ensure they have the tools they need to be successful in pursuit of their mission and that they are able to do so without undue risk.

[The nomination reference of Robert O. Work follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 20, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Robert O. Work, of Virginia, to be Under Secretary of the Navy, vice Dionel M. Aviles, resigned.

[The biographical sketch of Robert O. Work, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ROBERT O. WORK

Robert Work is currently Vice President, Strategic Studies at the Center for Strategic and Budgetary Assessments (CSBA). During a 27-year career in the Marine Corps, Mr. Work held a wide range of command, leadership, and management positions. His last assignment was as Military Assistant and Senior Aide to the Honorable Richard J. Danzig, 71st Secretary of the Navy.

Since retiring in 2001, Mr. Work has focused on defense strategy and transformation and maritime affairs. He has written and spoken extensively on U.S. Navy and Marine Corps strategies and programs: directed and analyzed three war game series for the Office of Net Assessment, Office of the Secretary of Defense; contributed to Department of Defense studies on global basing and emerging military missions; and provided support for the 2006 Quadrennial Defense Review. He has also studied and prepared several reports on future defense challenges, including the changing nature of undersea warfare, power projection against regional nuclear powers, and power projection against future anti-access/area denial networks.

Mr. Work earned a Bachelor of Science degree in Biology from the University of Illinois; a Master's of Science in Systems Management from the University of Southern California; a Master's of Science in Space System Operations from the Naval Postgraduate School; and a Master's in International Public Policy from the Johns Hopkins School of Advanced International Studies. He is a member of the International Institute for Strategic Studies and an Adjunct Professor at George Washington University, where he teaches defense analysis and roles and missions of the Armed Forces.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Robert O. Work in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Robert Orton Work (Robert O. Work, Robert Work, Bob Work).
2. **Position to which nominated:**
Under Secretary of the Navy.

3. Date of nomination:

April 20, 2009.

4. Address: (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

January 17, 1953; Charlotte, NC.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Cassandra Baugher Work; formerly Cassandra Faye Baugher.

7. Names and ages of children:

Kendyl Taylor Work, 18.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

University of Illinois, 09/70–08/74, BS (Biology), 08/08/74.

University of Southern California, 01/78–01/80, MS in Systems Management, 01/31/80.

Naval Postgraduate School, 06/88–09/90, MS in Systems Technology (Space Operations), 09/27/90.

Johns Hopkins University School of Advanced International Studies (SAIS), 08/92–05/93, Masters in International Public Policy, 05/26/94.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

I was commissioned a 2nd Lieutenant in the U.S. Marine Corps on August 8, 1974. I retired as a Colonel on September 1, 2001 (terminal leave began in May 2001). The following is a list of my assignments starting in May 1993. Start and end dates are approximate due to travel/leave between duty stations:

- May 1993–May 1994, Lieutenant Colonel, USMC, Director of Operations and Exercise Support, Operational Support Office, National Reconnaissance Office (NRO), Washington, DC.
- July 1994–May 1996, Lieutenant Colonel, USMC, 11th Marine Regiment, Camp Pendleton, CA, Operations Officer, 11th Marine Regiment Commanding Officer, 5th Battalion, 11th Marines Executive Officer, 11th Marine Regiment.
- July 1996–April 1998, Lieutenant Colonel and Colonel, USMC, Director, Strategic Initiatives Group, Plans, Policies, and Operations, Headquarters, Marine Corps, Washington, DC.
- May 1998–Jan. 1999, Colonel, USMC, Commanding Officer, Camp Fuji, Japan.
- Jan. 1999–May 2001, Colonel, USMC, Senior Aide and Military Assistant to the Secretary of the Navy, Pentagon, Washington, DC.

Since retirement in 2001:

- June 2001–March 2002, Senior Associate, Toffler Associates, Reston, VA/Washington DC.
- April 2002–Dec. 2006, Senior Fellow, Center for Strategic and Budgetary Assessments, Washington, DC.
- Jan. 2007–present, Vice President for Strategic Studies, Center for Strategic and Budgetary Assessments, Washington, DC.
- Jan. 2007–present, Adjunct Professor, The George Washington University, Washington DC.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Career officer, U.S. Marine Corps, 1974–2001.

As member of Toffler Associates, provided consulting services to the Air Force Air Combat Command and the Department of the Navy.

As a member of the Center for Strategic and Budgetary Assessments, provided analytical support to the Office of the Secretary of Defense, the Departments of the Army, Navy, and Air Force, U.S. Joint Forces Command.

Member, President-elect Obama's DOD Transition Team, Nov.–Dec. 2008.

Member, President-elect Obama's DOD Transition Team:

- Team Lead, Navy and Marine Corps Programs
- Member of Acquisition, Policy, and QDR Teams

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corpora-

tion, company, firm, partnership, or other business enterprise, educational, or other institution.

Vice President for Strategic Studies, Center for Strategic and Budgetary Assessments, Washington, DC.

Adjunct Professor, The George Washington University, Washington DC.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

See Question 11 above. In addition, I hold the following memberships:

Organization	Office held (if any)	Dates
International Institute for Strategic Studies	None	1974–present
U.S. Naval Institute	None	1974–present
Marine Corps Association	None	1974–present
Military Officer Association of America	None	1974–present
Navy League of the United States	None	1974–present
American Association of Retired Persons (AARP)	None	1974–present
Services Employees Int'l Union (SEIU) Local 500	None	1974–present

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Assisted Richard Danzig and the Obama Defense Team during the 2008 Presidential campaign (point papers, critiques, etc.).

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

\$1,000, Obama for America, Feb. 16, 2008.

\$1,300, Obama for America, July 8, 2008.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Presidential Classroom for Young Americans, 1970.

NROTC Scholarship, University of Illinois, 1970.

Honor Graduate, Marine Corps Officer Candidates School, Quantico, VA, 1973.

Distinguished Military Graduate, University of Illinois NROTC program, 1974.

Honor Graduate, The Basic School, U.S. Marine Corps, Quantico, VA, 1975.

Honor Graduate, U.S. Army Field Artillery School, Fort Sill, OK, 1975.

Honor Graduate, Amphibious Warfare School, U.S. Marine Corps, Quantico, VA, 1981.

Distinguished Speaker Award, U.S. Marine Corps Amphibious Warfare School, 1981.

1st Marine Brigade Nominee for the annual U.S. Marine Corps Leftwich Award, which recognizes the best small unit leader in the Marine Corps, 1983.

Graduate (with Distinction), U.S. Naval Postgraduate School, 1990.

Astronaut Michael K. Smith Award for Outstanding Thesis, U.S. Naval Postgraduate School, 1990.

Marine Corps Fellow, The John's Hopkins University School of Advanced International Studies, 1993–1994.

Inducted into the Ancient Order of St. Barbara for Conspicuous Service to Marine Field Artillery, 1995.

Marine Corps Attendee, MIT Seminar XXI: Foreign Politics, International Relations, and the National Interest, 1997.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

The Challenge of Maritime Transformation: Is Bigger Better (Washington, DC: Center for Strategic and Budgetary Assessments, 2002).

Meeting the Anti-Access and Area-Denial Challenge, with Andrew Krepinevich and Barry Watts (Washington, DC: Center for Strategic and Budgetary Assessments, 2003).

Naval Transformation and the Littoral Combat Ship (Washington, DC: Center for Strategic and Budgetary Assessments, 2004).

“Small Combat Ships and the Future of the Navy,” *Issues in Science and Technology*, fall 2004.

To Take and Keep the Lead: A Naval Fleet Platform Architecture for Enduring Maritime Supremacy (Washington, DC: Center for Strategic and Budgetary Assessments, 2005).

Thinking About Seabasing: All Ahead, Slow (Washington, DC: Center for Strategic and Budgetary Assessments, 2006).

“The Global Era of National Policy and the Pan-Oceanic National Fleet,” William B. Ruger Chair Workshop Report No. 3, U.S. Naval War College, 2007.

Range, Endurance, Stealth, and Networking: The Case for a Carrier-Based Unmanned Air Combat System, with Thomas P. Ehrhard, Ph.D (Washington, DC: Center for Strategic and Budgetary Assessments, 2008).

“A Cooperative Strategic for 21st Century Seapower: an Assessment,” CSBA Backgrounder, with Jan van Tol, March 26, 2008.

“The Global Era of National Policy and the Pan-Oceanic National Fleet,” *Orbis*, fall 2008.

The Challenges to U.S. National Security, with Andrew Krepinevich and Robert Martinage, Washington, DC: Center for Strategic and Budgetary Assessments, 2008).

The U.S. Navy: Charting a Course for Tomorrow’s Fleet (Washington, DC: Center for Strategic and Budgetary Assessments, 2009).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

“DDX,” Testimony before the House Armed Services Committee Projection Forces Subcommittee Hearing on DD(X), July 19, 2005.

“The 313-Ship Fleet and Navy’s 30-Year Shipbuilding Plan,” Testimony before the House Armed Services Committee Projection Forces Subcommittee Hearing on the Affordability of the Navy’s 313-Ship Navy and the Executability of the 30-Year Shipbuilding Plan, March 30, 2006.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ROBERT O. WORK.

This 27th day of April, 2009.

[The nomination of Robert O. Work was reported to the Senate by Chairman Levin on May 14, 2009, with the recommendation

that the nomination be confirmed. The nomination was confirmed by the Senate on May 18, 2009.]

[Prepared questions submitted to Elizabeth Lee King by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. At this time I do not see a need to modify any Goldwater-Nichols Act provisions.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. If Congress should pursue adaptations to this construct or if the Department proposes changes, I would work closely with this committee and Congress to provide witnesses, briefings, and the necessary information so Congress can make informed judgments on policy alternative.

DUTIES

Question. Section 138 of title 10, U.S.C., and DOD Directive 5142.01, provide that the principal duty of the Assistant Secretary of Defense for Legislative Affairs shall be the overall supervision of legislative affairs of the Department of Defense (DOD). Additionally, the Assistant Secretary of Defense for Legislative Affairs is required to provide advice and assistance concerning congressional aspects of DOD policies, plans, and programs; to coordinate actions relating to congressional consideration of the DOD legislative program; and to coordinate the completion of responses to congressional inquiries.

Question. If confirmed as the Assistant Secretary of Defense for Legislative Affairs, what would you view as your principal responsibilities to the Secretary of Defense and to Congress?

Answer. If confirmed, one primary responsibility would be to be the principal voice for Congress in the DOD and to ensure that their concerns, actions, requests, and initiatives are addressed properly and in a timely fashion. In addition, it would be my responsibility to keep the Secretary informed of these congressional actions, requests, concerns, and initiatives.

Question. Assuming you are confirmed, what other duties do you expect that Secretary Gates will prescribe for you?

Answer. If confirmed, I expect Secretary Gates to assign me the responsibility of ensuring that the Department's liaison with Congress is effective, responsive, user and customer friendly, and to ensure the Department's goals and priorities are properly articulated.

Question. What experience do you have that would qualify you to perform the duties of the Assistant Secretary of Defense for Legislative Affairs?

Answer. Since March 1997, I have been the counsel and senior policy advisor for defense, foreign affairs and veterans for Senator Jack Reed, a senior member of the Armed Services Committee and member of the Appropriations Committee. In that position, I have worked extensively with the staff members of the two committees on the annual authorization and appropriations bills. I have also worked with the committee staff and Leadership staff on several legislative initiatives, including the Levin-Reed legislation on the U.S. mission in Iraq, and legislation increasing the end strength of the Army. I also learned about the relationships between a Member of Congress and the military installations in their States. Also, as a member of Senator Reed's staff, I have traveled with him and other Senators to areas where U.S. troops have been deployed, including Iraq, Afghanistan, Pakistan, Korea, Japan, Colombia, and Bosnia.

From January 1996 to March 1997, I was legislative director for Congressman Marty Meehan, a member of the House Armed Services Committee. I was his principal staffer for this committee and learned the House process and worked with several members of the committee and committee staff.

I was also a counsel for the 1995 Defense Base Closure and Realignment Commission. In that capacity, I visited numerous military installations and gained indepth knowledge of naval shipbuilding capacity, depots, and air stations.

I have a law degree from Georgetown University and a BA from the University of Pennsylvania.

RELATIONSHIPS

Question. If confirmed, what would your working relationship be with: The Secretary of Defense.

Answer. If confirmed, I will function as the principal assistant to the Secretary on congressional matters. Under the Secretary's direction, I will be responsible for the coordination of the DOD legislative program, participation of departmental witnesses in congressional hearings, responses to congressional inquiries, DOD support of congressional travel, and I will be the Secretary's chief liaison with Congress.

Question. The Deputy Secretary of Defense.

Answer. If confirmed, I would have a similar relationship with the Deputy Secretary of Defense.

Question. The Under Secretaries and Assistant Secretaries of Defense.

Answer. If confirmed, my relationship with the Under Secretaries of Defense and the Assistant Secretaries will be to serve as their principal advisor regarding legislative liaison and communications with Congress.

Question. The General Counsel of the DOD.

Answer. If confirmed, I would work closely with the General Counsel to ensure responsiveness in matters of congressional interest and to assist Office of the General Counsel coordination on legislation under consideration within the Department. I would seek the views and recommendations of the General Counsel on legal issues.

Question. The Inspector General (IG) of the DOD.

Answer. If confirmed I would exercise no authority or control over the DOD IG. I would be fully cooperative and supportive of the IG's mission.

Question. The Secretaries of the Military Departments.

Answer. If confirmed my relationship with the Military Department Secretaries would be principally through their Chiefs of Legislative Affairs. I would diligently work to ensure that the military department secretaries received the best assistance and congressional advice from my office by fostering an environment of trust and mutual support.

Question. The Chiefs of Legislative Affairs of the Military Services.

Answer. By DOD Directive, ultimate responsibility for supervision of legislative liaison activities throughout the Department is vested in the Assistant Secretary of Defense for Legislative Affairs. I would work closely with the legislative affairs offices of the Military Services to foster a climate of cooperation and support. If confirmed, I would routinely meet with the chiefs of legislative affairs of the Military Services to coordinate the Department's liaison mission, and ensure responsiveness to this committee and Congress.

Question. The Legislative Assistant to the Chairman of the Joint Chiefs of Staff.

Answer. If confirmed, I would routinely meet with the legislative assistant to the Chairman to ensure responsiveness to the committees of jurisdiction and Congress.

Question. The Defense Agencies.

Answer. If confirmed, I would provide overall guidance to the individual Defense Agencies with respect to the Department's legislative issues. I would meet regularly with the legislative assistants of the Defense Agencies to ensure they operate consistent with the Department's initiatives, the Secretary's position, and to ensure they are responsive to congressional inquiries.

Question. Congressional liaison offices in the combatant commands and other entities throughout the DOD.

Answer. If confirmed, I would routinely meet with the legislative assistants to the combatant commands as well as the other DOD entities to ensure responsiveness to this committee and Congress.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges and problems confronting the Assistant Secretary of Defense for Legislative Affairs?

Answer. The most significant challenge for the Assistant Secretary of Defense for Legislative Affairs is communication. I would work to ensure that vital information

is provided to Congress in a timely and useful manner. If confirmed I would work to ensure Congress should not be in a position of reading or hearing about important issues in the media. The second challenge is providing timely, valuable advice to the Secretary, Deputy Secretary, and the key principals about congressional issues, concerns, or requests.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges and problems?

Answer. If confirmed, I would work diligently to ensure that the legislative affairs function in the Department is properly fulfilling its mission. I would review the organization and procedures of the office to ensure they are best able to meet the title 10 responsibilities extended to this position. I would advocate organizational and/or procedural changes to the Secretary and Deputy Secretary where or if required.

LEGISLATIVE LIAISON OFFICES

Question. Within the Office of the Secretary of Defense, the Defense Agencies, and the combatant commands, there are various offices which have their own congressional liaison personnel.

If confirmed, what steps, if any, would you take to coordinate the activities of the various congressional liaison offices and ensure that information provided to Congress is accurate, reliable, and represents the views of the Department?

Answer. If confirmed, I will capitalize on my position within the Department to foster an environment that promotes rapid communication. Furthermore, I will ensure that the Department as a whole has an inclusive congressional engagement strategy that promotes a unified, accurate, reliable, and representative voice.

LIAISON WITH THE APPROPRIATIONS COMMITTEE

Question. Legislative liaison with the Appropriations Committees is primarily carried out through the Office of the Under Secretary of Defense, Comptroller, not through the Office of the Assistant Secretary of Defense for Legislative Affairs.

Do you believe that this arrangement allows you to fulfill your responsibilities under section 138 of title 10, U.S.C.?

Answer. If confirmed, I would have a cooperative relationship with both the Under Secretary of Defense (Comptroller) and the Appropriations Committees. I would coordinate closely with the Comptroller's office on all matters and issues of interest to the Congress and would include Comptroller staff in my daily staff meetings. I believe this arrangement would allow me to carry out the responsibilities under section 138 of title 10, U.S.C.

UNTIMELY LEGISLATIVE PROPOSALS

Question. Late submission of legislative proposals by DOD to Congress for consideration as part of the annual National Defense Authorization Act has been a chronic problem. Legislative initiatives, which require substantial review and in many cases, testimony and discussion at annual posture hearings, are routinely forwarded to Congress too late for appropriate action.

If confirmed, what actions would you take to improve the Department's performance in providing timely legislative initiatives to Congress?

Answer. If confirmed, I would make more timely submissions of legislative proposals to Congress a priority. I would immediately address the timeline for submission of legislative proposals with the General Counsel and the Office of Legislative Counsel where this function is managed. I would also address this matter with the Office of Management and Budget.

EVALUATION OF LEGISLATIVE PROPOSALS AND FUNDING REQUESTS

Question. Every year, dozens of legislative proposals are referred to the Armed Services Committee for consideration. In addition, the committee receives hundreds of requests from Members to fund specific programs, projects, and activities. The committee relies on the Department to provide timely evaluations of these legislative proposals and funding requests so that we can give full consideration to the Department's views.

If confirmed, will you ensure that the Department makes every reasonable effort to provide the committee with timely evaluations of legislative proposals and funding requests?

Answer. Yes.

Question. How do you anticipate that you will work with the military departments and agencies to ensure that these evaluations are prepared and submitted in a timely manner?

Answer. If confirmed, I will work with the military departments and agencies to ensure that all anticipate the requirement for the timely turnaround of the evaluations and that they make every effort to provide sufficient personnel and resources for their preparation.

TIMELY WRITTEN STATEMENTS AND RESPONSES TO QUESTIONS AND INFORMATION FOR
THE RECORD

Question. Under DOD Directive 5142.01, the Assistant Secretary of Defense for Legislative Affairs is responsible for the coordination and oversight of submission of responses to congressional inquiries and reports and for the provision of information at congressional hearings. The failure on the part of departmental witnesses to submit written statements when required and to timely respond to questions for the record (QFRs) by Senators and requests for information for the record (IFRs) following hearings is a problem requiring the attention of the Assistant Secretary of Defense for Legislative Affairs.

If confirmed, what actions would you take to improve the Department's performance in providing timely written statements and answers to QFRs and IFRs?

Answer. If confirmed, I would work to ensure that a system of timelines is in place for proper response to Congress' request for information and for Congress' desire to have all legislative proposals and statements submitted to both Houses in a complete and timely manner.

ACCESS TO DOCUMENTS AND MATERIALS

Question. In the course of oversight activities on behalf of the Armed Services Committee staff frequently requests and receives detailed briefings and materials on ongoing programs and activities of the Department. The information requested sometimes includes proprietary, source selection, or other sensitive categories of information. From time to time, various officials of the military departments and defense agencies have requested that the committee provide a letter signed by the chairman, or a certification signed by the staff member, as a precondition to providing such information. These conditions are inconsistent with past practice and the historic relationship between the Department and the committee.

What is your view of the circumstances, if any, in which it would be appropriate for the Department to insist on a letter from the chairman before providing documents and information requested by the committee staff to carry out the committee's oversight responsibility?

Answer. Requiring written requests from the chairman is appropriate where FOIA exempt materials or other materials that may have privacy concerns are an issue. Though FOIA and its exemptions do not apply to requests from Congress, only the chairman of a congressional committee may make a request on behalf of Congress. Though privacy concerns also do not apply to requests from Congress, the Department has certain requirements that they must follow to protect such material and a request from the chairman in the record assists the Department in keeping their records complete.

Question. What is your view of efforts to change the Department's historic practice and require a certification by committee staff before providing documents and information requested by the staff to carry out the committee's oversight responsibility?

Answer. I look forward to reviewing these processes if confirmed, and working through related issues with Congress.

PROVIDING INFORMATION TO CONGRESSIONAL SUPPORT AGENCIES

Question. Congress relies on its three support agencies—the Government Accountability Office (GAO), the Congressional Budget Office (CBO), and the Congressional Research Service (CRS)—for information and analysis. On defense matters, there have been instances where the Department has not been as responsive and forthcoming in timely providing relevant information to these support agencies as the committee would expect.

If confirmed, what steps would you take to ensure that the Department responds fully to GAO, CBO, and CRS and would you be committed to ensuring that the Department cooperates with these agencies in fulfilling their responsibilities?

Answer. If confirmed, I will commit myself to ensuring that all congressional inquiries, whether they originate from an oversight committee or a supporting agency, are responded to in a timely and effective manner. Furthermore, I will use my position of leadership to assist the Services and other defense entities in doing the same.

LEGISLATIVE FELLOWS PROGRAM

Question. In Senate Report 110-335 accompanying S. 3001, the National Defense Authorization Act for Fiscal Year 2009, the committee called for a critical review by May 1, 2009, of the Department's Legislative Fellows Program in order to ensure that the program is organized, resourced, managed, and controlled consistent with the career progression needs of the officers who are assigned and the manpower requirements of their respective Services.

What is the status of the required review of the Legislative Fellows Program?

Answer. It is my understanding that the review has been completed, and the report is being finalized for submission.

Question. What is your view of the optimal number of legislative fellows and what do you consider the appropriate role and responsibilities of a legislative fellow within a Senator or Congressman's office should be?

Answer. The current number, 100 per year, seems to be about right. I am informed this number is divided among the Services and Defense Agencies. The Legislative Fellow Program should be a unique educational experience, and as such, fellows should be given real opportunities to learn how the legislative branch functions and not be used for administrative office roles. I will therefore work to ensure that the fellows program is meeting the needs of Congress, the Services, and the Defense Agencies.

Question. Have the Services fulfilled their responsibility to ensure that legislative fellows immediately serve in billets that will utilize the training and experience they have obtained as legislative fellows?

Answer. It is my understanding that the Services are in compliance with DOD policy which states there should be an immediate follow-on utilization tour following the fellowship. However, in those few cases where operational or professional development needs preclude an immediate follow-on utilization assignment, the Military Department may delay, or ultimately waive, this requirement.

NOMINATIONS

Question. If confirmed, what role would you, as Assistant Secretary of Defense for Legislative Affairs, expect to play in the military and civilian nomination processes?

Answer. If confirmed, I would expect to play a primary role in preparing civilian nominations for confirmation, and a primary support role to the Chairman of the Joint Chiefs and the Services in preparing military nominations for confirmation. In addition, my staff and I will track nominations closely and ensure the committee is made aware of all relevant information.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of Defense for Legislative Affairs?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Question for the record with answer supplied follows:]

QUESTION SUBMITTED BY SENATOR SUSAN COLLINS

BASE REALIGNMENT AND CLOSURE

1. Senator COLLINS. Ms. King, Senator Reed mentioned your involvement in an earlier round of base realignment and closure (BRAC) decisions. Regrettably, the Brunswick Naval Air Station in Maine will be closing over the next 2 years due to the most recent BRAC decisions. This is a major blow at the worst possible time economically. At times, it has been difficult for the redevelopment commission to get prompt information and cooperative answers from the Pentagon. Will you pledge to help communities in Maine and elsewhere coping with base closures get the information and assistance they need from the Department of Defense?

Ms. KING. Should I be confirmed, I give you my personal assurance all requests for information from the Brunswick Naval Air Station community and all other communities facing BRAC, can expect a timely response. When notified of these types of requests, I pledge to work with the appropriate Department stakeholders in responding to them quickly and thoroughly. Further, I will strive to keep congressional members and their staffs informed of the way ahead on these and other important actions involving the communities which have served our Nation proudly for so many years.

[The nomination reference of Elizabeth Lee King follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 20, 2009.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Elizabeth Lee King, of the District of Columbia, to be an Assistant Secretary of Defense, vice Robert L. Wilkie, resigned.

[The biographical sketch of Elizabeth Lee King, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ELIZABETH L. KING

Elizabeth King is the Counsel and Senior Policy Advisor for Defense, Foreign Affairs, and Veterans for Senator Jack Reed (D-RI). For the past 12 years, Ms. King has been Senator Reed's primary liaison to the Senate Armed Services Committee and the Senate Appropriations Committee in the areas of defense, military construction, veterans, and foreign operations. Ms. King has traveled with Senator Reed and other Members of Congress to Iraq, Afghanistan, Pakistan, China, Korea, Colombia, and East Timor.

Before joining the staff of Senator Reed, Ms. King was the Legislative Director for Representative Marty Meehan (D-MA), a Member of the House Armed Services Committee. She was also a counsel on the 1995 Defense Base Closing and Realignment Commission.

Ms. King was born and raised in Chicago, IL. She received a Bachelor of Arts, cum laude, in American history and international relations from the University of Pennsylvania in 1987 and a Juris Doctor from Georgetown University Law Center in 1993. She is a member of the International Institute of Strategic Studies.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Elizabeth L. King in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Elizabeth Lee King.
2. **Position to which nominated:**
Assistant Secretary of Defense for Legislative Affairs.
3. **Date of nomination:**
April 20, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
June 18, 1965; Evergreen Park, IL.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Single.
7. **Names and ages of children:**
None.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
St. Ignatius College Prep, 1076 Roosevelt Road, Chicago, IL; Attended 1979-1983; received high school diploma, May 1983.
University of Pennsylvania, Philadelphia, PA; Attended 1983-1987, received B.A. May 1987.
Georgetown University Law School, 600 New Jersey Ave., NW, Washington, DC; Attended 1990-1993, received J.D. May 1993.
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
Counsel and Senior Policy Advisor; U.S. Senator Jack Reed, 728 Hart Senate Office Building, Washington, DC; March 1997-present.
10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.
None.
11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
None.
12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Active member, DC Bar.

Member, International Institute for Strategic Studies.
 Member, University of Pennsylvania Alumni Club of DC.
 Member, University of Pennsylvania Band Alumni Club.
 Member, Georgetown University Alumni Association..

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Daniel Hynes, Illinois State Comptroller, \$100, June 2008.

Colleen Callahan, Candidate for Congress in Illinois, \$100, September 2008.

14. Honors and Awards: List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Member, International Institute for Strategic Studies.

15. Published writings: List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. Speeches: Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. Commitment to testify before Senate committees: Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ELIZABETH LEE KING.

This 27th day of April, 2009.

[The nomination of Elizabeth L. King was reported to the Senate by Chairman Levin on May 6, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on May 7, 2009.]

[Prepared questions submitted to Donald M. Remy by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to re-

cruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. The Goldwater-Nichols Act changed Department of Defense operations profoundly and positively. Although I believe that the framework established by Goldwater-Nichols has significantly improved interservice and joint relationships and promoted the effective execution of responsibilities, the Department, working with the Congress, should continually assess the law in light of improving capabilities, evolving threats, and changing organizational dynamics. Although I am currently unaware of any reason to amend Goldwater-Nichols, if confirmed, I hope to have an opportunity to assess whether the challenges posed by today's security environment require amendments to the legislation.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. This milestone legislation is now more than 20 years old and has served our Nation well. If confirmed, I believe it may be appropriate to consider with Congress whether the act should be revised, but at this time I have no specific proposals to amend any provisions of the act.

DUTIES

Question. What is your understanding of the duties and functions of the General Counsel of the Department of the Army?

Answer. Title 10, U.S.C., section 3019, provides that the General Counsel of the Army shall perform such functions as the Secretary of the Army may prescribe. The Secretary has done so through general orders, regulations, and memoranda. The General Counsel provides legal advice to the Secretary of the Army, the Under Secretary, the Assistant Secretaries, and other offices within the Army Secretariat. As the chief legal officer of the Department of the Army, the General Counsel determines the controlling legal positions of the Department of the Army. The General Counsel's responsibilities extend to any matter of law and to other matters as directed by the Secretary. I understand that a few examples of specific responsibilities currently assigned to the General Counsel include providing professional guidance to the Army's legal community, overseeing matters in which the Army is involved in litigation, serving as the Designated Agency Ethics Official, exercising the Secretary's oversight of intelligence and other sensitive activities and investigations, providing legal advice to the Army Acquisition Executive, and taking final action on certain claims filed against the Army.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. The diversity and complexity of legal issues confronting the Department of the Army are such that no one lawyer can have in-depth experience in all of them. However, the General Counsel must possess absolute integrity, mature judgment, sound legal and analytical skills, and strong interpersonal and leadership abilities. I believe that my background and diverse legal experiences in both the public and private sectors have prepared me to meet the challenges of this office.

I received my undergraduate degree with honors from LSU in 1988, where I was a Distinguished Military Graduate and commissioned second lieutenant in the U.S. Army. Thereafter, I was awarded an educational delay and graduated cum laude and third in my class from Howard University School of Law in 1991, having served as executive articles editor of law review. Immediately upon graduation from law school, I was selected into the Honors Program in the Army General Counsel's Office where I served as a Captain and Assistant to the General Counsel focusing on domestic and international research, development, and acquisition. I clerked for the Honorable Nathaniel R. Jones of the U.S. Court of Appeals for the Sixth Circuit. I have been in private practice at two law firms, presently a litigation partner at a prominent global firm. I served in a variety of significant capacities, legal and business, at a major U.S. corporation. At the U.S. Department of Justice, I served as a Senior Counsel for Policy and Deputy Assistant Attorney General for Torts and Federal Programs in the Civil Division.

I believe that my extensive experience in the Army, at the Justice Department, in corporate America, and in private practice all have helped prepare me for the extraordinary challenge of serving as General Counsel of the Department of the Army and overseeing the delivery of legal services in the Army during a period of wartime and of continued Army transformation. Indeed, my familiarity with the Department of Defense and with broader governmental legal practice has well equipped me to address this important responsibility.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the General Counsel of the Department of the Army?

Answer. Based on my 18 years of the practice of law, most of which has been in public service with all three branches of government, I believe I have the requisite legal training and abilities and leadership skills to serve as the Army General Counsel. If I am confirmed, I will work to broaden my expertise and further my understanding and knowledge of the Army, its people and organization, the resources necessary to sustain and transform it, and the challenges it faces.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of the Army would prescribe for you?

Answer. Although the Secretary of the Army has not discussed with me the duties and functions he will expect that I perform, I anticipate that he will rely on me to provide accurate and timely legal advice to help ensure that the Army complies with both the letter and spirit of the law. Presumably, the current enumeration of General Counsel responsibilities set forth in the general order prescribing the duties of each principal official of the Headquarters, Department of the Army, will generally remain in effect. Apart from such formally prescribed duties, I believe the Secretary of the Army would expect me to continue a collegial and professional relationship with the General Counsels of the Department of Defense, the other military departments, and the Defense Agencies and the legal staffs of other Federal agencies. I anticipate that the Secretary of the Army will expect me to continue the effective and professional working relationship that exists between the Office of the General Counsel and The Judge Advocate General and his staff. Finally, I anticipate that the Secretary of the Army will expect me to manage the General Counsel's office efficiently and effectively, and to ensure that the Army legal community is adequately resourced to perform its important mission.

Question. In carrying out your duties, how will you work with the General Counsel of the Department of Defense?

Answer. The General Counsel of the Department of Defense is the Chief Legal Officer and final legal authority for the Department of Defense. Although there is no direct reporting relationship to the General Counsel of the Department of Defense, Jeh Johnson has made clear in his testimony before this committee and his actions in the Department, that he intends to work closely with the Service General Counsels. If confirmed, I anticipate having a close and professional relationship with Mr. Johnson, characterized by continuing consultation, communication, and cooperation on matters of mutual interest, in furtherance of the best interests of the Department of Defense.

MAJOR CHALLENGES

Question. In your view, what are the major challenges that will confront the General Counsel of the Department of the Army?

Answer. In my opinion, one major challenge will be to continually provide responsive, accurate legal advice regarding the broad array of complex issues likely to arise in connection with the Army's role in support of Joint Operations while simultaneously adapting its aim toward a balanced Army for the 21st century. Although the current environment makes it difficult to anticipate specific legal questions, I expect to confront issues relating to operational matters, acquisition reform, privatization initiatives, military and civilian personnel policies, compliance with environmental laws, and oversight of Department of the Army intelligence activities. At this time, I am not aware of any problems in the current delivery of legal services. However, if confirmed, I will work hard to ensure that the Army legal community is adequately staffed and resourced to provide the responsive, accurate, and timely legal advice necessary to ensure success in all of the Army's endeavors.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will prioritize legal issues in the manner that best serves the Department of the Army. I will also ensure that the talented and dedicated lawyers comprising the Army legal community continue to provide timely value added legal advice of the highest possible quality in response to the Department of the Army's recurring legal responsibilities and the numerous issues that the Army confronts every day. I will endeavor to keep Army lawyers involved at all stages of the decisionmaking process, because I believe that preventive law, practiced early in the formulation of departmental policies, will undoubtedly facilitate the Department's adaptation to the changing operational environment. If confirmed, I will work diligently to adequately resource and expertly staff the Army legal community, in order to guarantee decisionmakers at all levels access to the best possible legal advice.

Question. What broad priorities will you establish in terms of issues which must be addressed by the Office of the General Counsel of the Department of the Army?

Answer. If confirmed, I will focus foremost on the issues that directly impact soldiers, their families, readiness, and the support of military operations. I anticipate that the other legal issues of highest priority will arise from the Army's operational readiness to meet the challenges posed by today's dynamic security environment while simultaneously planning and executing broad strategic initiatives. I will ensure that expert advice is provided to those engaged in the Army's efforts to improve the acquisition process and eliminate fraud, waste, and abuse. I will also ensure that the Army legal community continues to provide timely legal advice of the highest possible quality, executing the Department's recurring legal responsibilities and anticipating and responding to the numerous issues the Army confronts every day.

RELATIONSHIP WITH THE JUDGE ADVOCATE GENERAL

Question. In carrying out your duties, how will you work with the Judge Advocate General of the Army?

Answer. As an Assistant to the General Counsel of the Army from 1991–1995 I believe that I worked in a collegial and collaborative fashion with the Judge Advocate General's Corps to deliver effective legal advice to the Army leadership. Indeed, I believe that close, professional cooperation between the civilian and uniformed members of the Army's legal community is absolutely essential to the effective delivery of legal services to the Department of the Army. If confirmed, I will seek to ensure that the Office of the General Counsel and The Judge Advocate General and his staff, as well as The Judge Advocate General and I, continue to work together to deliver the best possible legal services to the Department of the Army.

Question. How are the legal responsibilities of the Department of the Army allocated between the General Counsel and The Judge Advocate General?

Answer. The Army General Counsel is the chief legal officer of the Department of the Army. The Office of the Army General Counsel is a component of the Army Secretariat, and provides legal advice to the Secretary of the Army and other Secretariat officials on all legal matters. The Judge Advocate General is the legal adviser of the Chief of Staff of the Army, members of the Army Staff, and members of the Army generally. In coordination with the Army General Counsel, The Judge Advocate General serves as military legal adviser to the Secretary of the Army. The law expressly prohibits interference with the ability of The Judge Advocate General to give independent legal advice to the Secretary of the Army. Even in the absence of that statutory requirement, I would always welcome the expression of independent views about any legal matter under consideration. The Judge Advocate General also directs the members of the Judge Advocate General's Corps in the performance of their duties. By law, he is primarily responsible for providing legal advice and services regarding the Uniform Code of Military Justice and the administration of military discipline. The Office of the Army General Counsel and the Office of The Judge Advocate General have developed and maintain a close and effective working relationship in performing their respective responsibilities. If confirmed, I will work to continue that synergistic partnership in providing legal services to the Army.

Question. How will you ensure that legal opinions of your office will be available to Army attorneys, including Judge Advocates?

Answer. It is my understanding that the majority of legal opinions provided to Army attorneys and judge advocates are issued by the Office of The Judge Advocate General, and that many of these opinions are coordinated with the Office of the Army General Counsel. The close, professional cooperation between the civilian and uniformed members of the Army's legal community is absolutely essential to ensure legal opinions issued by the Office of the Army General Counsel will be available to all Army attorneys and Judge Advocates and vice versa. If confirmed, I will seek to ensure that the Office of the General Counsel appropriately makes available any legal opinions that it issues.

Question. In response to attempts within the Department of Defense to subordinate legal functions and authorities of the Judge Advocates General to the General Counsels of the Department of Defense and the Military Services, Congress enacted legislation prohibiting any officer or employee of the Department of Defense from interfering with the ability of the Judge Advocates General of the Military Services and the legal advisor to the Chairman of the Joint Chiefs of Staff to provide independent legal advice to the Chairman, Service Secretaries, and Service Chiefs. Congress also required a study and review by outside experts of the relationships between the legal elements of each of the military departments of each of the military departments.

What is your view of the need for The Judge Advocate General of the Army to provide independent legal advice to the Secretary of the Army and the Chief of Staff of the Army?

Answer. The Judge Advocate General's statutory authority to provide independent legal advice has repeatedly been recognized as essential to the effective delivery of legal services. Uniformed attorneys bring another perspective and can provide insight and advice shaped by years of service throughout the Army. In today's environment, our senior leaders must have independent, honest advice from their lawyers. Recent history has clearly demonstrated why that independent advice is critical.

Question. What is your view of the responsibility of Army Judge Advocates to provide independent legal advice to military commanders?

Answer. Army Judge Advocates in the field have a critical responsibility to provide independent legal advice to commanders given the missions they perform. Army commanders deserve the best legal advice available, and that is in part made possible when the Judge Advocates know they can operate independently with appropriate advice and guidance from supervising attorneys in their technical chain.

Question. If confirmed, would you propose any changes to the current relationships between the Army's uniformed Judge Advocates and General Counsel?

Answer. Based upon my knowledge and understanding to date, I believe that uniformed Army Judge Advocates and the Army General Counsel have an excellent working relationship. If confirmed, I will continue to foster this professional and collaborative relationship to ensure the effective delivery of legal services to the Department of the Army. Yet, as all relationships are dynamic, I will continually assess whether any changes or improvements are needed.

Question. Article 6 of the Uniform Code of Military Justice gives primary jurisdiction over military justice to The Judge Advocates General of the Army, Navy, and Air Force.

How do you view your responsibilities in the performance of military justice matters with regard to the Judge Advocate General of the Army?

Answer. The Judge Advocate General has the primary responsibility for providing legal advice and services regarding the Uniform Code of Military Justice and the administration of military discipline. Article 6 of the Uniform Code of Military Justice requires The Judge Advocate General or senior members of his staff to make "frequent inspections in the field" in furtherance of his responsibility to supervise the administration of military justice. I will, if confirmed, consult with The Judge Advocate General on matters of mutual interest or concern relating to military justice, recognizing his statutory duties and special expertise in this area. I will also work with The Judge Advocate General in safeguarding the integrity of the military justice system.

ATTORNEY RECRUITING AND RETENTION ISSUES

Question. How do you assess your ability to hire and retain top quality attorneys and provide sufficient opportunity for advancement?

Answer. I understand that the Army continues to recruit and retain top quality military and civilian attorneys. Through an extensive professional development program, Army military and civilian attorneys are ready to perform the full spectrum of demanding positions. I recall that the Judge Advocate General's Legal Center and School is the cornerstone of the successful continuing education of these attorneys. If confirmed, I will continue to monitor and assess recruitment, retention, and advancement programs for our military and civilian attorneys.

Question. In your view, does the Department of the Army have a sufficient number of attorneys to perform its missions?

Answer. The Army's legal community has grown out of necessity in recent history, and may need to adjust because of new mission requirements. If confirmed, I will evaluate the adequacy of the numbers of attorneys in the Department of the Army to accomplish the Army's missions.

Question. In your view, what incentives to successful recruiting and retention of attorneys, if any, need to be implemented or established?

Answer. I am not familiar with the full scope of the Army's programs for recruiting and retaining military and civilian attorneys, but if confirmed, with the Judge Advocate General I will look at this area very carefully and support initiatives that enhance the Army's ability to recruit and retain those critical skills that give it flexibility and ensure we have the right attorneys performing every mission.

DETAINEE ISSUES

Question. What role do you expect to play, if confirmed, in helping the Department of Defense and the Department of the Army address legal issues regarding detainees?

Answer. Addressing the legal issues regarding detainees is of vital importance to the Department of Defense and the Nation as a whole. I understand that the Office of the General Counsel and the Office of The Judge Advocate General have representatives on a DOD General Counsel subgroup convened pursuant to the President's Executive Orders. If confirmed, I will work closely with the DOD General Counsel and this subgroup in executing the President's directives. Additionally, in coordination with The Judge Advocate General, I will provide advice to the Secretary of the Army in his role as the Department of Defense Executive Agent for the administration of detainee operations policy, with particular focus on our obligation to treat all detainees humanely.

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the U.S. Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is the foregoing prohibition in the best interest of the United States? Why or why not?

Answer. Yes, I firmly believe that this prohibition is in the best interest of the United States. This prohibition is consistent with the longstanding military tradition of applying the humanitarian provisions of the Law of War to those individuals who, for whatever reason, are no longer actively participating in hostilities and find themselves in custody. Moreover, this prohibition is consistent with international standards to which the United States is a party. As President Obama recently noted, "[a] democracy as resilient as ours must reject the false choice between our security and our ideals." Prohibiting the cruel, inhumane, or degrading treatment or punishment of individuals in our custody or under our physical control upholds our ideals and reinforces our moral authority around the world.

Question. Do you believe that the phrase "cruel, inhuman, or degrading treatment or punishment" has been adequately and appropriately defined for the purpose of this provision?

Answer. Although the phrase "cruel, inhuman, or degrading treatment" is, on its face, susceptible to broad interpretation, the proscriptions on such conduct contained in the Department's implementing directives, as well as the provisions of the Geneva Conventions that are embodied in those directives, make it clear to our soldiers what conduct is prohibited. If confirmed I will ensure the Army's implementation of this policy in doctrine, to include training manuals, is clearly understood.

Question. What role do you believe the General Counsel of the Army should play in the interpretation of this standard?

Answer. The appropriate role of the General Counsel is to provide advice to the Secretary of the Army and his staff on detention and interrogation policies that implement this standard. If confirmed, I will ensure Army implementation is consistent with the law, the intent of the administration, and the guidance issued by the Secretary of Defense.

Question. What role do you believe the Judge Advocate General of the Army should play in the interpretation of this standard?

Answer. The appropriate role of The Judge Advocate General is to provide advice to the Chief of Staff of the Army and the Army staff on detention and interrogation policies that implement this standard. The Judge Advocate General should also continue to train and supervise the Judge Advocates in the field, who are so instrumental in attaining and maintaining this standard.

Question. If confirmed, will you take steps to ensure that all relevant Army directives, regulations, policies, practices, and procedures fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. I will. I believe the requirements of section 1403 and Common Article 3 of the Geneva Conventions continue to be essential to maintaining a disciplined Army, bound by the Rule of Law.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. I do. These standards have been instrumental in restoring the confidence of the American people in the Army and will be important, in the future, in guiding our soldiers in contingency operations.

Question. Section 2441 of title 18, U.S.C., as amended by the Military Commissions Act of 2006, defines grave breaches of common Article 3 of the Geneva Conventions, including torture and cruel and inhuman treatment.

In your view, does section 2441 define these terms in a manner that provides appropriate protection from abusive treatment to U.S. detainees in foreign custody and to foreign detainees in U.S. custody?

Answer. These sections of the War Crimes Act were necessary to define the “serious crimes,” or “grave breaches,” of Common Article 3 to the Geneva Conventions. Defining these felony-level offenses was important to complete international law obligations to define, with specificity, the grave breaches which must be prosecuted under the law of war. In addition, in order to complete the U.S. obligation to “take all measures necessary for the suppression” of all other violations of the law of war, other than grave breaches, I believe the Department must continue to hold soldiers accountable for violations of these standards. I understand that these obligations will continue to be enforced through appropriate directives, training, and oversight.

CONTRACTORS ON THE BATTLEFIELD

Question. U.S. military operations in Iraq have relied on contractor support to a greater degree than any previous U.S. military operations. The extensive involvement of contractor employees in a broad array of activities—including security functions—has raised questions about the legal accountability of contractor employees for their actions.

Do you believe that current Department of Defense and Department of the Army regulations appropriately define and limit the scope of security functions that may be performed by contractors in an area of combat operations?

Answer. It is my current understanding that Department of Defense Instructions currently define the limit and scope of security functions that may be performed by contractors in an area of combat operations; however, I have been advised that this instruction is currently under review. Accordingly, it would be premature for me to offer an opinion at this time regarding whether current Department of Defense and Department of the Army regulations on the subject are adequate, and if confirmed I will support this review as appropriate.

Question. What changes, if any, would you recommend to such regulations?

Answer. It would be premature for me to recommend any changes to Department of Defense or Department of the Army regulations until the review of Department of Defense Instruction 3020.41 is complete.

Question. Do you believe that current Department of Defense and Department of the Army regulations appropriately define and limit the scope of contractor participation in the interrogation of detainees?

Answer. I understand that the current Department of Defense and Department of the Army regulations define and, if implemented properly, limit the scope of contractor participation in the interrogation of detainees

Question. What changes, if any, would you recommend to such regulations?

Answer. I have no basis to propose any changes at this time. If confirmed, I will review the applicable Department of Defense and Department of the Army regulations to determine what, if any, changes may be needed.

Question. OMB Circular A-76 defines “inherently governmental functions” to include “discretionary functions” that could “significantly affect the life, liberty, or property of private persons.”

In your view, is the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations an inherently governmental function?

Answer. There are many factual data points that may have an impact on determining whether the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations is an inherently governmental function. For example, I understand that support services that require substantial discretion or prudent judgment are inherently governmental, and that the likelihood that an individual will be required to resort to force, especially deadly force, and the degree to which an individual may be required to exercise force in public are important factors to consider in assessing whether a particular security mission is inherently governmental. Therefore, if I am confirmed, I intend to examine this issue in greater depth to ensure the Army’s assessment regarding this issue is fully considered in the ongoing review of its policies.

Question. In your view, is the interrogation of enemy prisoners of war and other detainees during and in the aftermath of hostilities an inherently governmental function?

Answer. I understand that under Department of Defense policy the direction and control of intelligence interrogations—to include the approval, supervision, and oversight of interrogations, as well as the execution of those aspects of an interrogation that entail substantial discretion—are inherently governmental activities. However, an issue may arise to the extent that properly trained and cleared contractors may be used to conduct government approved interrogations if they are supervised and closely monitored throughout the interrogation process by properly trained DOD military or civilian personnel. In my view the conduct of interrogations is a dynamic activity that could create circumstances that might cause a contractor to exercise discretion that could significantly affect the life, liberty, or property of private persons. As a result, the Department should continue to assess the appropriateness of the contractors' role in an interrogation.

Question. What role do you expect to play, if confirmed, in addressing the issue of what functions may appropriately be performed by contractors on the battlefield?

Answer. If confirmed, I will provide advice to the Secretary of the Army and the appropriate Assistant Secretaries regarding the functions that contractors may legally perform on the battlefield, and I will assist them in implementing policies regarding the use of contractors that are consistent with applicable statutory and regulatory constraints.

Question. The Military Extraterritorial Jurisdiction Act (MEJA) was enacted in 2000 to extend the criminal jurisdiction of the U.S. courts to persons employed by or accompanying the Armed Forces outside the United States.

In your view, does MEJA provide appropriate jurisdiction for alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. I understand that MEJA was intended to address the jurisdictional gap in U.S. law regarding criminal sanctions, as applied to civilians employed by or accompanying the Armed Forces outside the United States, members of the Armed Forces, and former members of the Armed Forces, including their dependents. In my opinion, MEJA provides an effective means of exercising extraterritorial criminal jurisdiction over contractor employees in Iraq, Afghanistan, and other areas of combat operations who engage in conduct that would constitute a felony-level Federal crime in the United States.

Question. What changes, if any, would you recommend to MEJA?

Answer. I understand that legislation has been proposed in the past that would expand MEJA to cover individuals employed under a contract (or subcontract at any tier) awarded by any department or agency of the United States, where the work under such contract is carried out in an area, or in close proximity to an area (as designated by the Department of Defense), where the Armed Forces are conducting contingency operations. If confirmed, I will study this and assess whether this or any other change to MEJA may be appropriate.

Question. What role would you expect to play, if confirmed, in developing administration recommendations for changes to MEJA?

Answer. The General Counsel is responsible for the administration of Army contracts and the supervision of Army civilian employees potentially subject to prosecution under MEJA. If confirmed, I would play an active role in the development of any proposals to change MEJA. I would also coordinate closely with The Judge Advocate General in the development of any such proposals given the complementary and sometimes competing availability of jurisdiction under the Uniform Code of Military Justice (UCMJ).

Question. Section 552 of the National Defense Authorization Act for Fiscal Year 2007 extended criminal jurisdiction of military courts martial under the UCMJ to persons serving with or accompanying an armed force in the field during time of declared war or a contingency operation, such as our current operations in Iraq and Afghanistan.

In your view, does the UCMJ provide appropriate jurisdiction for alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. The UCMJ provides commanders the tools necessary to maintain good order and discipline and the morale, welfare and safety of all those under their jurisdiction during military operations. Because misconduct by contractors may undermine good order and discipline, Congress extended UCMJ jurisdiction over such individuals, and the Secretary of Defense, in turn, published guidance on the prudent exercise of such jurisdiction. This guidance ensures that the Department of Justice and the Department of Defense each play an appropriate role in resolving whether, and under which system, jurisdiction might be better exercised in each potential case.

Question. What is your view of the procedures agreed upon by the Department of Defense and the Department of Justice to reconcile jurisdictional responsibilities under MEJA and the UCMJ?

Answer. I have not had an opportunity to review the procedures agreed upon by the Department of Defense and the Department of Justice to reconcile jurisdictional responsibilities under MEJA and the UCMJ. If confirmed, I will monitor cases in which MEJA and the UCMJ are employed in coordination with The Judge Advocate General to assess the effectiveness of the procedures and whether further refinements of these procedures are necessary.

Question. What changes, if any, would you recommend to the UCMJ to ensure appropriate jurisdiction for alleged criminal actions of contractor employees?

Answer. At present, I am not aware of any specific provisions in need of change

RELIGIOUS GUIDELINES

Question. What is your understanding of current policies and programs of the Department of Defense and the Department of the Army regarding religious practices in the military?

Answer. As a former soldier and attorney in the Army General Counsel's office and Civil Division of the Department of Justice, it always has been my understanding that the Army's policies support religious tolerance and respect. If confirmed, I would continue the Army's apparent commitment to upholding the Constitutional tenets of the "free exercise" and "establishment" clauses and review policies as necessary to assure continued compliance with the First Amendment.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. I understand that, as they now stand, Army policies require chaplains to support all unit personnel, regardless of their beliefs. It is my view that these Army policies do accommodate free exercise of religion. If confirmed, I am willing to study this issue further to determine if changes in policy are necessary under the law.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious belief?

Answer. I understand that, during mandatory official functions, chaplains are not compelled to offer prayers that are inconsistent with their faith, but are expected to remain sensitive to the pluralistic Army and society they serve. In my opinion, these policies strike an appropriate balance given the diversity of religious views in the Army. If confirmed, I am willing to study this issue further to determine if changes in policy are necessary under the law.

GENERAL AND FLAG OFFICER NOMINATIONS

Question. Under DOD Instruction 1320.4, adverse and alleged adverse information pertaining to general and flag officers must be evaluated by senior leaders in the Services and in the Office of the Secretary of Defense prior to nomination.

If confirmed, what role, if any, would you play in the officer promotion system, particularly in reviewing general and flag officer nominations?

Answer. I understand that, for all officer promotions, including general officer promotions, the Office of the Army General Counsel, in coordination with the Office of The Judge Advocate General, reviews the following:

- a. Memoranda of Instruction that govern the conduct of promotion selection boards and subsequent promotion selection board reports.
- b. Adverse information that is not in an officer's official military personnel file that may be presented to the promotion selection board. I have been advised that this information is reviewed to ensure it is accurate and comports with the requirements of title 10 such that the information is "substantiated, relevant information that could reasonably affect the deliberations of the selection board."
- c. Adverse information related to general officers. In general officer cases, the standard for adverse information that must be presented to a promotion selection board is "any credible information of an adverse nature." I have been advised that the Office of the Army General Counsel participates in a detailed screening process in which a panel of senior officials reviews all credible information related to officers whose records will be reviewed by a promotion selection board for promotion to a general officer grade. The

panel ensures that all adverse information is properly identified for presentation to the promotion selection board.

d. Adverse information that becomes available after a promotion selection board makes its recommendations. I have been advised that the Office of the Army General Counsel and the Office of The Judge Advocate General coordinate in providing legal advice to the Secretary of the Army so that he may determine whether a promotion review board should be convened to consider whether to continue to support the promotion of the considered officer or take steps to remove the officer from the promotion list.

Question. What is your understanding of the role of the General Counsel of the Department of the Army in ensuring the legal sufficiency of statutory selection board processes?

Answer. I understand that under title 10, the Secretary of the Army is responsible for the proper functioning of the Department of the Army's promotion selection process. Prior to approval by the Secretary of the Army, all Memoranda of Instructions for officer promotion selection boards are reviewed by the Office of the Army General Counsel, in coordination with the Office of The Judge Advocate General, to ensure the Secretary's instructions conform to statutes and accurately reflect his guidance regarding attributes necessary for service in the next grade. All reports of promotion selection boards are processed through the Office of the Army General Counsel prior to final action on the report by the Secretary. The Army General Counsel must satisfy himself or herself that the Army has met applicable statutory standards and that individual selection board reports conform to the law. The Army General Counsel must advise the Secretary of the Army of any case in which a selection board report fails to adhere to the statutory standards, either generally or with regard to a particular officer being considered for promotion. In advising the Secretary of the Army and the Office of the Assistant Secretary of the Army (Manpower and Reserve Affairs), the General Counsel helps to ensure that Army promotion policies properly implement applicable laws and regulations and are fairly applied.

Question. What is the role, if any, of the General Counsel of the Department of the Army in reviewing and providing potentially adverse information pertaining to a nomination to the Senate Armed Services Committee?

Answer. It is my understanding that under current Department of the Army practice, the General Counsel's office reviews each selection board report, as well as departmental communications to the committee, the President, and the Secretary of Defense concerning nominations, to ensure that the reports and communications comply in form and substance with law and regulation. The General Counsel's office gives special attention to cases of nominees with substantiated or potentially adverse information, in order to ensure that such information is reported to the Senate Armed Services Committee in a timely, accurate, and comprehensible manner.

MILITARY PERSONNEL POLICY AND CASES

Question. In your view, what role, if any, should the General Counsel play in military personnel policy and individual cases, including cases before the Board for Correction of Military Records?

Answer. If confirmed, I will work closely with the Secretary of the Army, the Assistant Secretary of the Army (Manpower and Reserve Affairs), and other senior Department of the Army leaders to ensure that the Department of the Army's military personnel policies are formulated and applied uniformly, fairly, and in accordance with applicable laws and regulations. If I were to become aware of an individual case in which military personnel policies were not fairly and lawfully applied, I would take appropriate action to ensure that the case is properly resolved. I will coordinate with the Assistant Secretary of the Army (Manpower and Reserve Affairs), who exercises overall supervision of the Army Review Boards Agency, regarding the legal sufficiency of materials and recommendations that the Army Board for the Correction of Military Records is providing to senior Department of the Army leaders. In addition, I am aware of and fully respect the independent role that the Army Board for the Correction of Military Records plays in the correction of military records.

SEXUAL ASSAULT PREVENTION AND RESPONSE POLICY

Question. Numerous cases of sexual misconduct involving soldiers have been reported from Iraq, Kuwait, and Afghanistan over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They asserted that the military failed to respond appropriately by providing basic services, including medical attention and criminal investigations of their charges.

What is your understanding of the resources and programs the Army has in place in deployed locations to offer victims of serious sexual assaults the medical, psychological, and legal help they need?

Answer. This is an extremely important issue for the Army and, if confirmed, I will focus significant attention on this area. While I am not fully aware of all Army initiatives or resources, I understand that the Army has taken significant steps to improve the assistance to victims of all sexual assaults, with enhanced recognition of the special circumstances that apply to deployments. If confirmed, I will study this matter in greater depth with a view to ensuring the Army continues to take appropriate steps to provide medical, psychological, and legal help to soldiers who are victims of sexual assault, both in garrison and in deployed locations.

Question. What is your view of the steps the Army has taken to prevent additional sexual assaults on female soldiers at their home stations and when they are deployed?

Answer. In my opinion, the Army has taken several extremely important steps in its campaign to prevent sexual assaults on female soldiers at their home stations and when they are deployed. I have been advised that the Army launched a new comprehensive sexual assault prevention campaign in 2008. If confirmed, I will ensure that the legal community fully supports this initiative and any others and will assess whether additional steps need to be taken. If confirmed, I look forward to working closely with Army leaders on this and other vital initiatives to prevent sexual assault.

Question. What is your view of the adequacy of the training and resources the Army has in place to investigate and respond to allegations of sexual assault?

Answer. Presently, I am not familiar with all of the Army's training and resources to investigate and respond to allegations of sexual assault. If confirmed, I will assess whether additional steps should be taken to support victims and hold offenders accountable.

WHISTLEBLOWER PROTECTION

Question. Section 1034, title 10, U.S.C., prohibits taking retaliatory personnel action against a member of the Armed Forces as reprisal for making a protected communication. By definition, protected communications include communications to certain individuals and organizations outside of the chain of command.

If confirmed, what actions will you take to ensure that senior military leaders understand the need to protect servicemembers who report misconduct to appropriate authorities within or outside the chain of command?

Answer. If confirmed, I will work with The Judge Advocate General to ensure that military leaders are fully and accurately advised of the whistleblower protections accorded by law and regulation, and that they understand their legal responsibilities in this important area. In addition, I will ensure that any individual cases involving illegal reprisals that come to my attention are addressed in accordance with the law. Whistleblower protections for military personnel affirm that members of the Armed Forces shall be free from reprisal for making or preparing a protected communication to a Member of Congress; an Inspector General; a member of a DOD audit, inspection, investigation, or law enforcement organization; or any other person or organization (within or outside the chain of command) designated under regulations or established procedures to receive such communications. I believe that these protections are essential to the integrity of our process.

SUPPORT TO ARMY INSPECTOR GENERAL

Question. What role, if any, do you think the General Counsel of the Army should have in reviewing the investigations and recommendations of the Army Inspector General?

Answer. If confirmed, as the chief legal officer of the Department of the Army and counsel to the Secretary and other Secretariat officials, I will establish and maintain a close, professional relationship with The Inspector General, and will communicate with him directly and candidly as he performs his prescribed duties. I will provide independent and objective legal advice with regard to all matters that relate to Inspector General programs, duties, functions, and responsibilities. I will oversee the provision of productive and effective legal guidance to the Office of the Inspector General in conducting investigations and delineating recommendations. Further, as part of my responsibility to review legal and policy issues arising from the Army's intelligence and counterintelligence activities, I will advise The Inspector General concerning proper reporting of the Army's intelligence oversight activities. Of course, given The Inspector General's mandate for independence and candor in advising the

Secretary as to his investigative findings and recommendations, the Inspector General has final authority over matters within his functional purview.

WOMEN IN COMBAT

Question. Section 541 of the National Defense Authorization Act for Fiscal Year 2006 required the Secretary of Defense to report to Congress on his review of the current and future implementation of the policy regarding assignment of women in combat. In conducting the review, the Secretary of Defense examined Army unit modularization efforts and associated personnel assignment policies to ensure their compliance with the Department of Defense policy on women in combat that has been in effect since 1994.

What is your understanding of the conclusions and lessons that have been learned about the feasibility of current policies regarding women in combat from Operation Iraqi Freedom and Operation Enduring Freedom and what is your assessment of the Army's compliance with the requirements of law relating to women in combat?

Answer. Although I have not reviewed the study in detail, it is my understanding that the study revealed that the Army is in compliance with the requirements of the law relating to women in combat. It is also my understanding that the Army's transformation to modular units took into account and is in compliance with the current assignment policy for women. Women have and will continue to be an integral part of the Army team, performing exceptionally well in all specialties and positions open to them.

Question. In your view, should the current policy regarding assignment of women in combat be revised to reflect changing roles for female soldiers?

Answer. At this point I do not believe that I have enough information to make an informed judgment about whether the policy should be changed. However, if I am confirmed and the Army determines after careful study and deliberation, that there is a need to seek a change to the policy, I will provide the Secretary with cogent legal advice regarding the changes sought and ensure that the Army complies with all of the notification requirements of the law.

CIVILIAN ATTORNEYS

Question. Judge advocates in the Armed Forces benefit from an established career ladder, substantial training opportunities, and exposure to a broad spectrum of legal areas and problems. By contrast, civilian attorneys in the military departments normally do not have established career programs and may do the same work for many years, with promotion based solely upon longevity and vacancies.

In your opinion, does the personnel management of civilian attorneys need revision? If so, what do you see as the major problems and what changes would you suggest?

Answer. There appears to be a growing need for a systemic civilian attorney professional development program that appropriately reflects the tenets by which we have historically developed judge advocates. I understand that there is a Working Group in the Army for the purpose of assessing and recommending programs for the professional development of civilian attorneys. If confirmed, I would work closely with all of the entities affected by this issue to support the continuing and important efforts of the Working Group and any other initiative deemed appropriate.

CLIENT

Question. In your opinion, who is the client of the General Counsel of the Department of the Army?

Answer. The client of the General Counsel of the Department of the Army is the Department of the Army, acting through its authorized officials.

LEGAL ETHICS

Question. What is your understanding of the action a Department of the Army attorney or an Army Judge Advocate should take if the attorney becomes aware of improper activities by a Department of the Army official who has sought the attorney's legal advice and the official is unwilling to follow the attorney's advice?

Answer. Army attorneys generally provide legal advice to Army officials in their capacity as representatives of the Department of the Army. The Department of the Army is the attorney's client, and no attorney-client privilege is established between the attorney and the Army official. When an Army attorney advises an Army official, the official may use that advice to exercise official functions. If an Army attorney suspects that the individual Army official, either in the exercise of functions or in the failure to exercise functions, violates a law or standard of conduct, I believe

that he or she should report the potential violation. Potential violations of the conflict of interest laws may be reported to Army criminal investigators; potential violations of provisions of the Federal Acquisition Regulation may be reported to the appropriate contracting officer; and potential violations of the standards may be reported to an Army ethics counselor, the head of the Army command or organization, the individual's or attorney's supervisor, or the Army Inspector General (IG), as appropriate. At all times, Army personnel and attorneys may report any misconduct to the IG or criminal investigators, either in person or anonymously.

Question. Do you believe that the present limits on pro bono activities of government attorneys are generally correct as a matter of policy or does the policy need to be reviewed and revised?

Answer. I understand that government attorneys may participate in pro bono activities so long as the representation is consistent with general governmental ethical rules and with the rules of professional responsibility applicable to attorneys. I understand that Army civilian attorneys may, for instance, perform pro bono work with supervisory approval so long as the representation does not occur on Government time or at its expense, does not interfere with official duties, and does not create a conflict of interest or the appearance of a conflict of interest. I understand the Army also operates legal assistance program for soldiers and families, providing free services in areas such as family law, wills and estate planning, tax law, landlord/tenant matters, contract disputes, consumer law, and assistance during the disability evaluation system. Although I am not aware of any need for revision of the present limits, it is important that government attorneys be able to participate in pro bono activities. If confirmed, I would review the current policy in coordination with The Judge Advocate General and recommend revisions, if appropriate.

Question. In your view, do the laws, regulations, and guidelines that establish the rules of professional responsibility for attorneys in the Department of the Army provide adequate guidance?

Answer. The Army has a comprehensive regulations, based upon the American Bar Association Model Rules of Professional Conduct which govern the ethical conduct of Army lawyers, both military and civilian. All Army attorneys, military and civilian, must, at all times, be in good standing with the licensing authority of at least one State, territory of the United States, the District of Columbia, or the Commonwealth of Puerto Rico. This regulatory system would appear to provide adequate guidance; however, if confirmed, I would review the current policy in coordination with The Judge Advocate General and recommend revisions, if appropriate.

ACQUISITION ISSUES

Question. What role should the General Counsel play in ensuring that Army procurement programs are executed in accordance with the law and DOD acquisition policy?

Answer. If confirmed, I will work closely with the Secretary of the Army, the Assistant Secretary of the Army (Acquisition, Logistics, and Technology), and other senior Department of the Army leaders to ensure that the Department of the Army's acquisition and procurement programs are executed in accordance with applicable provisions of the U.S. Code, as well as higher-level regulations and policy. Today's acquisition professionals face the challenge of managing their programs' cost, schedule, and performance while remaining in compliance with a myriad of legal and policy requirements. I believe it is the responsibility of Army lawyers to proactively assist their acquisition clients in meeting that challenge. From the earliest stages of program development, counsel should be involved in identifying potential issues and, where appropriate, legally-compliant alternative courses of action. In those rare situations, where an issue cannot be satisfactorily resolved, it is incumbent on counsel to promptly elevate their concerns in order to protect the Department's overarching interests.

Question. What role should the General Counsel play in ensuring that ethics provisions on conflict of interest are followed both by Army personnel and by Army contractors?

Answer. Structuring Departmental business practices to avoid both personal and organizational conflicts of interest should be one of the Army's highest priorities. If confirmed, I will work closely with the Secretary of the Army, the Assistant Secretary (Acquisition, Logistics and Technology) and other senior Departmental officials to promote an organizational climate that is sensitive to the need to avoid conflicts of interest and that reacts appropriately when specific issues arise. I believe that Army lawyers can make a significant contribution to this endeavor through the provision of acquisition ethics training and through early and sustained involvement in the Department's acquisition programs and procurement activities.

Question. Allegations of fraud and abuse during contingency contracting in Iraq and Afghanistan have been wide-spread. What role should the General Counsel play in ensuring that Army personnel are properly trained in contingency contracting and are supervised in the performance of their duties?

Answer. It is my understanding that the contracting workforce was understaffed and not fully equipped to handle the resultant surge of contracting actions in support of our Nation's missions in Iraq and Afghanistan. This situation undoubtedly contributed to the widely publicized increase in allegations of fraud and abuse in connection with contracting in those theaters of operations. Secretary of the Army, Pete Geren, responded by appointing Dr. Jack Gansler to lead a special commission on contracting with the purpose of assessing current conditions and providing a long-term strategic view of the Army's acquisition and contracting system in support of expeditionary operations.

If confirmed, I will work closely with the Secretary of the Army, the Assistant Secretary of the Army (Acquisition, Logistics, and Technology), and other senior Department of the Army personnel to ensure that the legal community continues to fully support the initiatives recommended and currently being implemented as a result of the Gansler Commission's assessment. One of the Commission's recommendations was to provide training and tools for contracting activities that would equip contracting personnel to handle the complexities of a contingency contracting mission for our warfighters, while assuring proper fiscal stewardship of taxpayer dollars. If confirmed, I will ensure the legal community is proactive in providing timely legal advice and training of the highest possible quality to effect the recommended Gansler Commission changes in compliance with the letter and spirit of the law. I would also work closely with The Judge Advocate General and the other Army legal qualifying authorities to ensure that adequate legal resources are available to support the contingency contracting mission.

ROLE IN THE OFFICER PROMOTION AND CONFIRMATION PROCESS

Question. In your view, what is the role of the General Counsel of the Department of the Army in ensuring the integrity and proper functioning of the officer promotion process?

Answer. As addressed above, I understand that, under title 10, U.S.C., Chapter 36, the Secretary of the Army is responsible for the proper functioning of the Department of the Army's promotion selection process. In addition to the legal review of memoranda of instruction and selection board reports to ensure they comport with statutory standards, the Army General Counsel must also ensure the conduct of the board process conforms to all legal requirements. Additionally, the Army General Counsel must advise the Secretary of the Army of any case in which a selection board report or selection board process fails to adhere to the statutory standards, either generally or with regard to a particular officer being considered for promotion. In advising the Secretary of the Army and the Office of the Assistant Secretary of the Army (Manpower and Reserve Affairs), the General Counsel helps to ensure that Army promotion policies properly implement applicable laws and regulations and are fairly applied. Additionally, the Office of the Army General Counsel coordinates closely on these matters with The Office of the Judge Advocate General.

LITIGATION INVOLVING THE DEPARTMENT OF THE ARMY

Question. In your opinion, what is the relationship between the Department of the Army and the Department of Justice with respect to litigation involving the Department of Defense?

Answer. The Department of Justice represents the Department of the Army in civil litigation. In general, my recollection is that coordination on every level is timely and consistent. If confirmed, I will work with The Judge Advocate General to ensure the continuation of a collaborative relationship with the Department of Justice with respect to litigation involving the Department of the Army.

Question. In your view, does the Department need more independence and resources to conduct its own litigation or to improve upon its current supporting role?

Answer. The Army's interests in civil litigation are effectively protected and defended by the Department of Justice. If confirmed, I will work with The Judge Advocate General to ensure that adequate resources are available to ensure that the Army is able to provide the appropriate level of support to the Department of Justice and protect the Army's interests in civil litigation in which the department is involved.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the General Counsel of the Department of the Army?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR MEL MARTINEZ

EXPERIENCE AT FANNIE MAE

1. Senator MARTINEZ. Mr. Remy, the Office of Federal Housing Enterprise Oversight (OFHEO) Report of the Special Examination of Fannie Mae of 2006 identified numerous accounting discrepancies and management failures at Fannie Mae during the period from 1998 to 2004. The report details a corporate culture where Fannie Mae employees manipulated accounting and earnings to trigger bonuses for senior executives from 1998 to 2004. Please explain your involvement as the Deputy General Counsel and Vice President for Housing and Community Development from 2000 to 2006 in the events described in the investigation that led to the 2006 OFHEO Report.

Mr. REMY. During most of my tenure at Fannie Mae, I served as an attorney in the Office of the General Counsel. In that capacity I was principally responsible for advising on litigation, employment law, antitrust, procurement contracts, internal investigations of employee or contractor malfeasance, and building and maintaining a compliance system for adherence to laws, regulations, and the Code of Conduct. I did not perform any accountant functions, and made no accounting judgments. Similarly, during my time in the Housing and Community Development Division, I was not involved in any accounting activities, but rather was responsible for humanitarian relief and investment in rebuilding communities along the Gulf Coast after Hurricanes Katrina and Rita. More particularly, at no time was I involved in any way in making any accounting judgment, including the specific accounting judgments reviewed by the OFHEO, and I was not implicated in any way in the errors that were the focus of the Special Examination conducted by OFHEO.

The 2006 Report of the Special Examination of Fannie Mae issued by OFHEO was the product of a multi-year review by the company's regulator, focused on whether the implementation of certain accounting pronouncements complied with Generally Accepted Accounting Principles (GAAP). The original impetus was the December 2003 Report of the Special Examination of Freddie Mac and an effort to determine whether similar issues existed at Fannie Mae. During the course of its review, OFHEO concluded that a number of accounting policies and practices—including those relating to premium and discount amortization (FAS 91) and derivatives and hedging activities (FAS 133)—had been erroneous. OFHEO also addressed more general problems relating to accounting policy development, poor segregation of duties of the CFO, and other internal control deficiencies. All of these issues were described in a 211 page September 2004, Report of Findings to Date of the Special Examination of Fannie Mae. As I played no role in the accounting practices being reviewed, I was not mentioned at all in that report.

Subsequent to the September 2004 report, the Board of Fannie Mae hired former Senator Warren Rudman and the law firm of Paul Weiss Rifkin Wharton & Garrison (Paul Weiss) to conduct an independent review of the issues identified in the

OFHEO Report and any other issues they deemed appropriate. Paul Weiss issued a 616 page report at the conclusion of its review. While I was mentioned in that report regarding my compliance roles and responsibilities, I was in no way found to have engaged in any improper activity.

Further, in December 2004 the U.S. Securities and Exchange Commission (SEC) determined that the accounting policies of Fannie Mae for both FAS 91 and FAS 133 departed from GAAP and advised the company to restate its financial statements for the years 2001 through 2004. Nothing regarding my conduct or matters falling within my areas of responsibility was implicated in any way in the SEC's investigation.

OFHEO's Special Examination continued, as it looked into additional accounting issues and other issues. In May 2006, OFHEO issued its 340 page Report of the Special Examination of Fannie Mae (the "2006 OFHEO Report" or the "Report"). Some of my appearances in this report were identified in your letter and are discussed in summary below and more fully in response to your specific questions. I am not certain if any of these instances in which I am mentioned are responsive to your request in this question for information regarding my "involvement in . . . events described in the investigation that led to the . . . report." Nonetheless, I list them here in an effort to be responsive and complete.

- First, in the section of the report that is related to OFHEO's regulatory authority, I am referenced regarding advice and legal strategy discussed with the General Counsel. As a Deputy General Counsel responsible for litigation it was part of my job to engage with the General Counsel on matters that might involve litigation. This is a reference to one such conversation. This mention, which is discussed in further detail below, however does not find that I am responsible for any improper corporate culture, tone at the top, or regulatory interference.
- Next, I am referenced as having transferred information in my official capacity to the external auditor regarding an internal investigation. This reference demonstrates that as the Chief Compliance Officer I properly informed the external auditor of some issues raised by an employee.
- Another reference to me appears in a footnote describing a memorandum that I wrote which reflected that the Company's external auditor was at a meeting regarding an internal investigation in which it was determined that certain items had been properly accounted for. I was the supervisor of some of the individuals who conducted the investigation into allegations made by an employee that accounting amortization practices were improper, allegations that his reporting environment discouraged dissent, and allegations that he was discriminated against. In my capacity as Chief Compliance Officer, I wrote a memorandum to memorialize and consolidate the final findings of these various investigations.
- In another footnote my name appears as having been cc'd on an e-mail from the General Counsel regarding responses to a question posed by an employee in a town hall "unplugged" meeting held by the Chief Operating Officer.
- Finally, I am referenced as having been given the title of and certain responsibilities as Chief Compliance Officer, which OFHEO found conflicted directly with my responsibilities for managing the defensive components of the Legal Department (i.e., litigation and employment.) OFHEO did not conclude or even suggest that the potential for conflict resulted in any instances of improper conduct or actual conflicts that impacted my job performance.
- Also, although not referenced in the Report, I assisted in the efforts to produce documents and witnesses to OFHEO to help facilitate its examination.

2. Senator MARTINEZ. Mr. Remy, the 2006 OFHEO Report details that, while you were serving in a senior position at Fannie Mae, Fannie Mae over-reported its earnings by a total of \$10.6 billion. Earnings management made a significant contribution (approximately \$52 million) to the compensation of then Chairman and CEO totaling over \$90 million. We all know the ramifications of unethical behavior in the mortgage market. Describe what you did in your role as Senior Vice President for Housing and Community Development of Fannie Mae between 2003 and 2006 to prevent or mitigate these false earning reports.

Mr. REMY. In my role in as SVP, Housing and Community Development from late 2005 until my departure in 2006, I was responsible for developing a plan for humanitarian relief and investment in rebuilding communities along the Gulf Coast most affected by Hurricanes Katrina and Rita. Much of this time, I was on the ground

with the victims of the storms and community leaders in Louisiana, Mississippi, Alabama, Florida, and Texas attempting to help develop solutions to critical housing issues. I had no role or responsibilities in that job with respect to accounting or earning reports.

3. Senator MARTINEZ. Mr. Remy, did you know of these false earning reports?

Mr. REMY. I was unaware of the accounting errors that led to the restatements of earnings or any false earnings reports or earnings management that OFHEO concluded led to higher bonuses. Nothing in my job responsibilities or my skill sets would have put me in a position to have knowledge of those issues before the potential problems were identified through allegations, investigations or examinations by regulators. Once the accounting problems, which impacted earnings, were identified the company withdrew its financial statements and established a restatement team to mitigate the problems that had been created. I was not part of those decisions or the restatement effort.

ADVANCED POLICY QUESTION REPOSSES

4. Senator MARTINEZ. Mr. Remy, on answering the advanced policy question (APQ) for the committee, "What background and experience do you possess that you believe qualifies you to perform these duties?", you failed to recognize Fannie Mae as your employer. At any time during the vetting process for this nomination, were you advised to remove references to Fannie Mae in your biography or this APQ? If not, why did you decide to not be candid with the committee about your employment with Fannie Mae?

Mr. REMY. No. I was never told to remove references to Fannie Mae from my biography or my APQ response. I have tried, at all times, to be completely and fully candid with the committee. Indeed, I clearly stated my past employment with Fannie Mae in other materials I submitted to the committee and in a courtesy call with committee staff. In submitting my biography, I used one of several versions that I have used in the private sector. That more summary version discusses certain segments of my work experience generally, and does not expressly reference Fannie Mae. That version, however, should never have been used to respond to the APQ or sent to the committee, which has a duty to carefully evaluate all of my experience and qualifications. That was a mistake for which I take full responsibility. I have answered the enclosed questions and other questions asked by the committee about my tenure at Fannie Mae fully and frankly, as I am certain there is nothing in my service there by which I cannot proudly stand.

OFFICE OF FEDERAL HOUSING ENTERPRISE OVERSIGHT REVIEW OF FANNIE MAE

5. Senator MARTINEZ. Mr. Remy, on May 23, 2006, James B. Lockhart, Acting Director of the OFHEO said he found an "environment where the ends justified the means" and "there was a systematic effort by senior management to manipulate accounting, reap financial rewards, and prevent the rest of the world from knowing about it." Fannie Mae agreed to pay \$400 million as part of settlements with OFHEO and the SEC. For the 6 years, you were a senior executive within Fannie Mae. Can you explain your involvement in the OFHEO's investigation and in the subsequent settlement?

Mr. REMY. OFHEO's Special Examination of Fannie Mae began in 2003 and ended with the release of its report in May 2006. Hence, my involvement in the Special Examination did not begin until 2003. I assisted in the Company's efforts to preserve and produce documents and witnesses to OFHEO. I was not involved in the settlements with OFHEO and the SEC.

PAY AND BONUS STRUCTURE WHILE AT FANNIE MAE

6. Senator MARTINEZ. Mr. Remy, the committee understands you were employed with Fannie Mae from 2000 to 2006. Please provide a schedule of your total annual compensation (including but not limited to your annual salary and bonuses) for each of the 6 years you were employed at Fannie Mae.

Mr. REMY. The following is a schedule of my salary, bonus, and stock awards. I also have included the severance payments I received upon departure. As the long-term stock and Performance Share Plan (PSP) compensation are more complex and very difficult to value, I provide you with the stock option or restricted stock award amounts. I never exercised a single stock option that I was granted—which are all now expired. Hence the actual value of all options received by me during by entire

6 years with the company is \$0.00. Moreover, many of the restricted shares that I was granted were sold at a loss.

Year	Salary ¹	Cash Bonus	Options Granted ³	Restricted Stock Awarded ⁴	Severance ⁷
2000	\$160,000	\$68,800	6,960 @ \$60.84 5,700 @ \$77.10	2,000 shares	
2001	\$164,800	\$92,000	3,680 @ \$78.56 8,030 @ \$80.95		
2002 ²	\$215,000	\$219,375			
2003	\$235,000	\$229,800	2,718 @ \$69.43 6,693 @ \$69.43		
2004	\$258,000	⁵ \$0	9,476 @ \$78.32		
2005	\$280,000	⁶ \$332,500	0	⁶ 3,100 shares 6,039 shares	
2006	\$290,500	\$0	0		⁸ \$391,058 ⁹ \$274,000

¹ Salary for each year is annualized, not actual.

² Promoted to Senior Vice President during 2002 and salary was increased to \$215,000.

³ Options are listed based upon year of grant. Of course, they only have value if they increase above the strike price. Options however vest over a period of 3 or 4 years. All options currently have no value and in any event have expired. I never exercised any options and therefore received no value from these grants.

⁴ Restricted shares vest either over a period of 3 years or 4 years. The value of the stock is attributed as income in the year that they vest.

⁵ No bonus pool was available due to restatement.

⁶ Includes retention bonuses and accelerated vesting upon departure in 2006.

⁷ I left the company and upon departure received severance payouts under the standard Management Group Severance Program at the time. I also received a distribution of deferred compensation upon departure.

⁸ I was paid 1 year of salary, plus 3 weeks of salary for every year of service. Severance also included payout of prorated bonus.

⁹ Received final payment of retention bonus.

7. Senator MARTINEZ. Mr. Remy, please describe to what extent any of your compensation was directly tied to the performance of Fannie Mae's earnings per share.

Mr. REMY. I was eligible to receive a bonus under Fannie Mae's Annual Incentive Plan (AIP), if the pool was funded for bonuses. During most of the years I was at Fannie Mae, the AIP funding pool was set in part based upon the company's performance, including EPS, but I understand that the actual bonus I received was based on my job performance (i.e., quality of work, responsiveness of direct reporting organizations, soundness of judgment, and progress of organizational improvements), which was unrelated to the financial performance of the company. Once I was promoted to Senior Vice President, I also was eligible to participate in Fannie Mae's PSP—a long-term stock compensation plan that is based both on financial and nonfinancial company goals. However, grants and vesting under that plan were suspended during the restatement and only one of the grants from that plan vested while I was with Fannie Mae.

CONFLICTS OF INTEREST WHILE AT FANNIE MAE

8. Senator MARTINEZ. Mr. Remy, the 2006 OFHEO Report states your position of Chief Compliance Officer was in direct conflict of interest with your responsibilities for managing the employment law, antitrust, and potential criminal and civil liability groups in the Legal Department. Do you agree with this summary? If so, why did you not realize this then? If not, what steps did you take to mitigate or eliminate the apparent conflict?

Mr. REMY. During almost my entire time at Fannie Mae I served as one of several Deputy General Counsels in the Office of the General Counsel providing legal advice to the Company through its executives. My job responsibilities were set by my superiors and over time I was rewarded for hard work and delivering results with new and challenging assignments. I was given the assignment of building a new compliance system at the time I already had responsibility for among other areas, employment law, litigation, and the Office of Corporate Justice (OCJ). To me, it was a logical assignment, given the work that I already had been doing with OCJ and my ability to succeed as a project manager. Although it was found that my duties as the senior reporting official for litigation, employment, or defensive activities potentially conflicted with my responsibilities as the senior reporting official for the Office of Corporate Justice or Office of Corporate Compliance, it was never found or suggested that such a conflict resulted in any actual or apparent impropriety. Quite to the contrary, I believe that I was widely regarded as an excellent manager and superior steward of the Company's interest—even when that required making hard

unpopular decisions. Moreover, the 2006 OFHEO Report expressly determined that I was not the person responsible for the creation of such potential conflicts.

Before the OFHEO Report was released in May 2006, I already had relinquished my responsibilities as Chief Compliance Officer and management of OCJ and taken on new responsibilities in the Housing and Community Development Division regarding responses to Hurricanes Katrina and Rita. As a result, any apparent conflict had been eliminated.

FIELDING CONCERNS OF INAPPROPRIATE ACCOUNTING AT FANNIE MAE

9. Senator MARTINEZ. Mr. Remy, on September 9, 2003, the Director of Securities of Fannie Mae brought to the Chief Operating Officer concerns about Fannie Mae's accounting, including amortization accounting, which had also been brought up by another employee a month earlier. The head of the Office of Auditing validated these concerns, yet the firm's General Counsel later disregarded them. This was despite the Baker Botts LLP internal report on Freddie Mac demonstrating fraud in their accounting. At that time, you were the Deputy General Counsel at Fannie Mae and reportedly carbon copied on the General Counsel's emails (OFHEO Report pages 269–270).

Please inform the committee of your role with regard to enforcing regulatory compliance of amortization accounting, if you did or did not speak to the concerns of the Director of Securities at the time, and if you had supported the General Counsel's dismissal of the Director's validated concerns.

Mr. REMY. As discussed above, I did not have any responsibility for setting any accounting policies or practices, including amortization accounting. Moreover, monitoring, developing internal controls, and assuring compliance with accounting policies was not part of my duties or responsibilities.

If anyone at the company raised a concern about accounting, the Office of Corporate Compliance and later the Office of Corporate Justice, did however, have authority to investigate such allegations of improper accounting. Because no one in those offices (including me) was an accountant, however, such an investigation would require the use of an accounting firm or other knowledgeable accounting experts to conclude whether the accounting was appropriate. While most allegations that led to investigations did not involve accounting issues, those that did followed this process and in fact the OCJ used an independent expert boutique accounting firm on a number of occasions to look at the issues. If findings of impropriety were found, corrective action would be required and would be enforced by one of those offices under my supervision. For example, in an actual investigation of amortization accounting issues conducted weeks earlier, there also were allegations regarding work environment. Because the findings identified some problems, corrective actions were required and were enforced by the OCC.

In my roles in the Office of the General Counsel, I reported to the General Counsel and she on occasion copied me on messages for informational rather than action purposes. This would make sense in this instance given the prior investigation of amortization accounting of which I was aware. Although on OFHEO report page 269–270 it cites to an e-mail from her where she apparently copied me, I do not recall being involved in addressing this Director's concerns and therefore would have no basis to support or reject a determination of the internal auditor or an action of the General Counsel.

In response to Questions for the Record from Senator McCain, I provided an answer to a similar question which I believed at the time related to a different investigation into amortization accounting issues. Your citation to page numbers in your question prompted me to look up those specific pages in the OFHEO Report. As a result, I now have realized that I misunderstood Senator McCain's question and just as you are, he in fact was asking about the circumstances described on page 269–270 of the OFHEO Report.

In the interest of completeness, however, I provide you below the answer to the question that Senator McCain asked, which I mistakenly believed referred to an actual investigation conducted weeks earlier into an allegation of improper accounting amortization made by a different employee.

What were Mr. Remy's actions with respect to the internal investigation and were they proper?

Yes, my actions with respect to the internal investigation into allegations of improper amortization accounting were proper and no investigation or inquiry has found otherwise. I did not choose the method, structure or personnel to conduct the investigation—that was done by the General Counsel. I did not interview witnesses or develop facts in connection with the inves-

tigation. I was not present at the meeting when internal audit presented its views to the employee and external auditors. I did, however, communicate the results of the investigation to the external auditor and discussed with them follow-up forensic work. I also reviewed drafts of the OCC report on the work environment in the controller's office and the OCJ report on discrimination. I issued a final memorandum memorializing the findings in the OCC, OCJ, and litigation aspects of this matter upon the conclusion of each of its parts.

CHIEF COMPLIANCE OFFICER

10. Senator MARTINEZ. Mr. Remy, in a letter you wrote to the Senate Armed Services Committee on April 28, 2009, you state that from late 2002 to late 2005 you "supervise(d) internal investigations." According to the 2006 OFHEO Report, on September 9, 2003, the Director of Securities brought up an issue with Fannie Mae's accounting practices which resembled practices deemed inappropriate in an internal Freddie Mac investigation done by Baker Botts LLP. What role did you play in this internal Fannie Mae investigation? If there was no formal internal investigation, why wasn't there?

Mr. REMY. As noted in response to question 9, I do not recall playing a role in this matter at all. If I did, it would have been to do nothing more than to receive an informational cc: as described above and perhaps to provide input if I had any. The little I do recall about this matter after reading your references in the report is that it was a response to a question posed at a town hall "unplugged" session. It was not the type of whistle blower employee complaint or allegation that necessarily would have required an OCJ or OCC investigation; rather it appears that it was a "question" posed by an employee to which a complete answer was owed. In that context, I do not find it unusual for the Chief Operating Officer to get the "right" people—head of internal audit, general counsel, external audit—involved in finding out the answer and reporting back to the employee promptly.

11. Senator MARTINEZ. Mr. Remy, in an e-mail dated April 28, 2004, you wrote to then General Counsel of Fannie Mae that you recommended that Fannie Mae sue the OFHEO to prevent an impending investigation of Fannie Mae by OFHEO. Please describe all of the reasons you now believe it was appropriate for Fannie Mae to obstruct OFHEO's planned investigation.

Mr. REMY. The April 28, 2004 e-mail referenced above was wholly unrelated to OFHEO's ongoing Special Examination of Fannie Mae, and does not state or suggest in any way that the Company take legal action to prevent any such investigation of Fannie Mae. Instead, the e-mail relates to press accounts of regulation being considered by OFHEO that appeared to go beyond the authority granted the agency by Congress. In providing candid advice, I laid out alternatives to address this, including the company availing itself of the procedures authorized in the Administrative Procedures Act, which provides a mechanism for independent court review of agency actions that may go outside the scope of their authority.

INTERNAL CONTROL SYSTEMS AT FANNIE MAE

12. Senator MARTINEZ. Mr. Remy, in a letter you wrote to the Senate Armed Services Committee on April 28, 2009, you state that from late 2002 to late 2005 you were "given the responsibility of developing and implementing Fannie Mae's first corporate wide centralized legal and regulatory compliance system." According to the 2006 OFHEO Report, "Senior executives exploited the weaknesses of the Enterprise's (Fannie Mae) accounting and internal control system." Please explain whether the "regulatory compliance system" described in your letter is the same "internal control systems" which were exploited by executives to increase their bonuses per the AIP.

Mr. REMY. The legal and "regulatory compliance system" described in my letter and the accounting "internal control system" for financial reporting referenced above are wholly unrelated. The first was within my area of responsibility; the second completely outside. As discussed above, I was responsible for constructing a program that would help ensure the Company's compliance with certain applicable laws and regulations, as well as compliance with the Company's own Code of Conduct. These include, but are not limited to, laws and regulations such as anti-money laundering, antitrust, Title VII, fair housing and fair lending, and intellectual property. Again, my responsibilities did not include developing internal controls for financial report-

ing under GAAP. That type of responsibility rest with the Controller's office and the Office of Internal Audit would audit its effectiveness.

[The nomination reference of Donald M. Remy follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 20, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Donald Michael Remy, of Virginia, to be General Counsel of the Department of the Army, vice Benedict S. Cohen, resigned.

[The biographical sketch of Donald Michael Remy, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DONALD MICHAEL REMY

Mr. Remy is a partner in the Washington, DC, Office of Latham & Watkins, where he defends individual and corporate clients in criminal and other government investigations, as well as civil litigation. In addition, Mr. Remy advises corporations on issues involving the International Traffic and Arms Regulations, the Office of Foreign Assets Control and Foreign Corrupt Practices Act enforcement, as well as financial, accounting and procurement fraud and general corporate governance.
